

between 350,000 to 400,000 jobs in steel production, pipe manufacturing, trucking and shipping, and construction jobs for 3 to 4 years assembling the pipe. This pipeline would be a mammoth project, requiring four times as much steel as used for all the cars produced globally in 1999.

The potential natural gas resources could supply the American market for 50 to 60 years as compared to the oil from ANWR which might yield 6 months' worth of America's petroleum supply.

There are other reasons, all of which are good, to oppose the energy provisions in the Lott amendment—and we are going to vote on this matter very shortly—but there is no reason to sacrifice the financial security of these retirees who have an interest in the railroad retirement bill—not only the retirees but the widows who would benefit.

Sadly, those who are pushing the Lott amendment are working against the hard-working Americans who have retired from the railroads around our country and, of course, the widows of those hard-working railroad workers. So I hope we will defeat soundly the Lott amendment.

Also, I have mentioned the provision dealing with the Arctic National Wildlife Refuge. I was in Las Vegas over the weekend, and somebody I had not seen in several decades, somebody I used to go to high school with, came up to me. We had not seen each other but, I, of course, recognized him in a second: Claude, how are you? He said: I am fine.

I know his family. It is a very conservative family. He said: I want you to know you have to do everything you can to make sure we can go forward with therapeutic cloning. Those were his words. Stem cell research.

Why did he care? Because he has two diabetic children, and it is genetic; he believes there is hope. He is someone who has worked with his hands all his life and does not have a scientific mind. His hope comes from his heart, but hope is coming from the minds of people who are scientists. They believe therapeutic cloning could be the breakthrough for diabetes, Parkinson's, Alzheimer's, and many of these other dread diseases.

If we could find a cure for the three diseases I mentioned, not only would it be the right thing to do for the families and the individuals with these diseases, but it would also be an economic boon to this country that would be unsurpassed. That people are in institutions because of Alzheimer's is really a drag on the economy of this country.

So I hope there will be a resounding vote to make sure we do not go forward on this legislation attached regarding ANWR and cloning. I am in favor of therapeutic cloning.

Maybe the word is wrong, "cloning." We had scientists who came and talked to us last Thursday. Maybe it is the wrong use of words, but that is what

has developed in the vernacular we are using. Scientists believe they need to go forward so they can do the stem cell research unfettered. Frankly, if we do not do it, it is going to happen somewhere else anyway. Other countries are going to do it. So we who lead the world in scientific endeavors should make sure we also lead the endeavors regarding therapeutic cloning.

The ACTING PRESIDENT pro tempore. The Senator has used 10 minutes.

Mr. REID. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

---

#### ENERGY BILL

Mr. REID. Mr. President, we focused on the energy bill the Republicans put forth and on ANWR, but there are other problems with the bill. Time is short and we cannot spend too much time on it. For example, one of the things that bill does not have included is vehicle fuel efficiency. It failed to provide an increase in fuel efficiency standards for light trucks, sport utility vehicles, and minivans. I think it should provide additional standards for passenger automobiles in general.

Dealing with just light trucks, sport utility vehicles, and minivans, the provisions would reduce overall national gasoline usage by 1 percent. Closing the SUV loophole would substantially reduce air pollution, greenhouse gas emissions, and save consumers billions at the gas pump each year. The current standard established in 1989 is 27.5 miles for passenger automobiles, sports utility vehicles, SUVs, and minivans. A much larger increase in fuel efficiency would be paid for. I have no doubt that is the case in future fuel savings. That is something not addressed in the bill.

Also in the bill they provide \$33.5 billion over 10 years in tax breaks for electric utilities and oil and natural gas exploration. No offset was provided for the additional tax breaks, and only 17 percent is for energy efficiency and 83 percent for fossil fuels and nuclear power. While from a strict policy standpoint this is not good, from the sense that we need not give them any more tax breaks than they have, even if you disagree with that statement, you should be concerned about the fact there is no offset for the tax breaks. Further, over 10 years, this is adding \$33.5 billion in deficit spending for our country.

We have to be very careful. There are many problems with this legislation. It is more than the arctic wilderness. We have focused on that. They are weakening environmental protections and drilling in national forests. There are a

number of things we cannot lose sight of that include more than just the national arctic wilderness.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. REID. I ask during this quorum call that the time be charged equally against both sides.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BURNS. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

---

#### SENATE WORK

Mr. BURNS. Mr. President, we continue to hear in the Senate a powerful argument put forth by the assistant majority leader. Yet I am struck by the idea the Railroad Retirement Act under consideration now is a given. There are 70 cosponsors on that piece of legislation; I am one of the cosponsors. Yet we are also denied the ability to move an energy policy act that the Nation is demanding, as well as a stimulus package which, again, the Nation favors.

I challenge my colleagues and Americans by asking why just a few can deny a State such as Alaska its ability to develop and market its own natural resources, not only for the good of the economy of Alaska but also at a time when this Nation's economy is struggling and it would contribute to the rebuilding of that economy. I find that disheartening. This is important.

The season of Christmas is fast approaching. We should be finishing up our work. There are two things that have to be done: Finish the appropriations process to run this Government, and also develop an appropriation for our military in a time we are at war. By the way, this is a war that will not be won at Camp Pendleton, Fort Bragg, or any other military installation, but will be won in every community around this country. Yet the military now is carrying the load to destroy the core of terrorism.

Why deny those resources when just across the border, in the tundra—and one must remember, this is not a pristine wilderness when we talk about ANWR, as one might envision wilderness in my State of Montana where we already have 3.5 million acres. This is tundra. It runs for miles and miles and
