Congressional Record

PROCEEDINGS AND DEBATES OF THE *107th* CONGRESS, FIRST SESSION

Vol. 147 WASHINGTON, THURSDAY, DECEMBER 20, 2001 *No. 178*

House of Representatives

The House met at 10 a.m.

The Reverend Msgr. Peter J. Vaghi, Pastor, St. Patrick Catholic Church, Washington, D.C., offered the following prayer:

Almighty God, we call upon You this cold December morning. You are Light of Lights and Light From Light. You are the Light who pierces the perennial darkness of our world, the darkness of our mind and soul, the darkness of a world at war. Because of You, O living and true God, we live, walk, and have our being. You are Emmanuel, God-with-us.

We pray to You this day that passage from the Advent prophet Isaiah: ''Let justice descend, O heavens, like the dew from above, like gentle rain let the skies drop it down. Let earth open and salvation bud forth; let justice also spring up.''

We pray also for peace. Peace in our world begins with peace in our hearts. And peace in our hearts comes from You, Almighty Father. Draw near to us and grant us Your peace.

Encourage us, O Lord, in this holy season in all our humble efforts carried out in Your life-giving name, O Prince of Peace and Light, Lord of Justice. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentlewoman from North Carolina (Mrs. MYRICK) come forward and lead the House in the Pledge of Allegiance.

Mrs. MYRICK led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

INTRODUCTION OF REVEREND MONSIGNOR PETER VAGHI

(Mr. FERGUSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FERGUSON. Mr. Speaker, I rise today to honor Monsignor Peter Vaghi for his dedicated service to St. Patrick's Church here in Washington, D.C.

Monsignor Vaghi was born here in Washington, D.C., and attended Gonzaga College High School and the College of the Holy Cross, where he was awarded a Fulbright Scholarship to attend the University of Salzburg in Austria.

Returning home to America, he went on to get his juris doctor at the University of Virginia Law School and worked in Washington, D.C., before he answered a calling to the priesthood and attended the Gregorian University in Rome, Italy.

Monsignor Vaghi was ordained a Catholic priest on June 29, 1985, and designated a ''Prelate of Honor'' by Pope John Paul II on November 13, 1995.

NOTICE—DECEMBER 20, 2001

A final issue of the Congressional Record for the 107th Congress, 1st Session, will be published on January 3, 2002, in order to permit Members to revise and extend their remarks.

All material for insertion must be signed by the Member and delivered to the office of the Official Reporters of Debates, Room 1718 Longworth House Office Building by noon January 3, 2002. The House Office of the Official Reporters will be open in 1718 Longworth House Office Building December 26, 27, 28 and January 2 and 3 between the hours of 9:00 a.m. and 6:00 p.m. The final issue will be dated January 3, 2002, and will be delivered on Friday, January 4, 2002.

None of the material printed in the final issue of the Congressional Record may contain subject matter, or relate to any event that occurred after the sine die date.

Members of Congress desiring to purchase reprints of material submitted for inclusion in the Congressional Record may do so by contacting the Congressional Printing Management Division, at the Government Printing Office, on 512–0224, between the hours of 8:00 a.m. and 4:00 p.m. daily.

By order of the Joint Committee on Printing.

MARK DAYTON, *Chairman.*

Mr. Speaker, it is my privilege to welcome Monsignor Vaghi to this House. He is not only a family friend, but he also gave my wife Maureen and me the honor of officiating at our wedding in 1996. I thank him for being here today. His presence and his blessing on this House and on our work here means so very much to me and to every Member of this body.

WAIVING POINTS OF ORDER AGAINST CONFERENCE REPORT ON H.R. 3338, DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2002

Mrs. MYRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 324 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 324

Resolved, That upon adoption of this resolution it shall be in order to consider the conference report to accompany the bill (H.R. 3338) making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes. All points of order against the conference report and against its consideration are waived. The conference report shall be considered as read.

The SPEAKER pro tempore (Mr. CAMP). The gentlewoman from North Carolina (Mrs. MYRICK) is recognized for 1 hour.

Mrs. MYRICK. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Texas (Mr. FROST), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

Mr. Speaker, yesterday, the Committee on Rules met and granted a normal conference report rule for H.R. 3338, the Fiscal Year 2002 Department of Defense Appropriations Act.

The rule waives all points of order against the conference report and against its consideration. In addition, the rule provides that the conference report shall be considered as read.

Mr. Speaker, this should not be a controversial rule. It is the type of rule we grant for every conference report we consider in the House. The gentleman from Texas (Mr. FROST), who is managing this rule for the minority, understands the importance of a strong national defense, and I am sure I do not need to convince him or anyone else that this bill is important, now more than ever before.

At a time when we are facing terrorism at home and engaged in combat abroad, we need to give our government the tools to defend us overseas and at home. This bill does just that. It provides our military with $317 billion in much-needed support, including a 4.6 percent pay raise; and the supplemental portion of the bill will bolster our fight against terrorism by providing much-needed funding for border patrols, port security, bioterrorism prevention, and the FBI.

Lastly, Mr. Speaker, this bill contains our strong support for the people of New York by providing another $8.2 billion in disaster assistance, including $2 billion in community development block grants.

Mr. Speaker, we are about to go home for the holidays and after the events of this fall, I cannot think of a better thing to do before we leave town than to provide for our armed forces, for our fight against terrorism, and for the victims of September 11.

Mr. Speaker, I reserve the balance of my time.

Mr. FROST. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as we speak, the brave men and women of the U.S. military are halfway around the world waging and winning the war on terrorism. Their courage and professionalism are a fitting tribute to the strength and unity of the United States of America.

Meanwhile, here at home, domestic security has become our top priority, and thanks to the funding priorities in this conference report, America will now be better prepared to prevent, defend against, and recover from any future terrorist attacks.

I am very pleased that the conference report more closely reflects Democratic priorities on homeland defense than was provided in the House-passed bill. Specifically, it provides more funding for nuclear, border, port, aviation and bioterrorism priorities. On bioterrorism alone, Democrats were able to secure $2.5 billion, $1 billion more than the President requested. While additional funding will be necessary to fully address other domestic security needs, this conference report is a good start.

Mr. Speaker, here in Congress, there has always been strong bipartisan support for America's armed forces. The history of this defense appropriations bill reflects that fact.

Last month, the House Committee on Appropriations reported its original version of H.R. 3338, and the full House passed it by a vote of 406 to 20. I am confident that another large bipartisan majority will pass this conference report today. That is because Democrats and Republicans are strongly committed to America's national defense and to a first-rate military that carries it out. As the President said yesterday in addressing House Democrats, security of the United States is not a partisan issue.

Mr. Speaker, this is a good conference report, and I support it. I would like to commend the gentleman from Florida (Chairman YOUNG); the gentleman from Wisconsin (Mr. OBEY), the ranking Democrat; the gentleman from California (Chairman LEWIS); and the gentleman from Pennsylvania (Mr. MURTHA), the ranking Democrat on the subcommittee, for the tremendous job they have done to support America's troops and to protect Americans here at home.

This conference report provides $478 million to combat chemical and biological attacks against the military and $404 million for the Nunn-Lugar nuclear nonproliferation program. It provides for a significant military pay raise and for substantial increases in critical readiness accounts; and it strengthens research for tomorrow's weapons and equipment while providing the weapons and equipment the U.S. military needs today.

Mr. Speaker, I am especially pleased by the substantial quality-of-life improvements funded by this conference report. It includes funding for a significant pay raise of between 5 and 10 percent for every member of the military. And to boost critical midlevel personnel retention, much of the pay raise will be directed towards junior officers. It also significantly increases funding for health benefits for service members and their families.

I am also pleased that this conference report continues to fund the wide range of weapons programs that ensure our military's superiority throughout the world. For instance, it includes more than $2.6 billion for the initial production of 13 of the F–22 Raptor aircraft, the next-generation air dominance fighter for the Air Force. The conference report also provides $882 million for research and development for this aircraft.

Additionally, Mr. Speaker, the conference report provides $1.5 billion for continued development of the Joint Strike Fighter, the high-technology multirole fighter of the future for the Air Force, the Navy, and the Marines. It also includes $1.04 billion for procurement of 11 MV–22 Osprey aircraft.

Mr. Speaker, all of these aircraft are important components in our national arsenal, and moving forward on the research and production sends a clear signal that the United States has no intention of relinquishing our air superiority.

The first duty of the Congress, Mr. Speaker, is to provide for the national defense and the men and women who protect it. This conference report does a great deal to improve military readiness and to improve the quality of life for our men and women in uniform as well as their families. It is a good first step at providing the needed funding to ensure that attacks like those that occurred on September 11 will never happen again.

Mr. Speaker, I wish we could have done more, but Republican leaders insisted that many homeland security priorities wait until next year. I hope they will allow us to address the remaining priorities as soon as possible.

Mr. Speaker, I urge the adoption of this rule and of this conference report.

Mr. Speaker, I reserve the balance of my time.

Mrs. MYRICK. Mr. Speaker, I reserve the balance of my time.

Mr. FROST. Mr. Speaker, I yield 5 minutes to the gentleman from Wisconsin (Mr. OBEY), the ranking member of the Committee on Appropriations.

(Mr. OBEY asked and was given permission to revise and extend his remarks, and include extraneous material.)

Mr. OBEY. Mr. Speaker, there are two provisions in this bill which I think are of note. One is a bad provision which is here because of OMB, and the other is a good provision in the bill which is here despite OMB.

This country has a serious need to purchase additional tankers. This bill does that. It meets our national responsibility in doing so. But because OMB would prefer to keep a pretty set of books, rather than saving the taxpayers money, it will cost us significantly more to lease those tankers than it would to buy them. That is unfortunate, but it was the only choice the committee was left with because OMB appears to be more concerned with accounting niceties than it is with fiscal realities or cost realities. And I think people need to understand that that regretful result is not the fault of the committee.

I would hope that OMB in the future would recognize the need to allow reality to occasionally interfere with their philosophical biases.

Second, as was indicated by the gentleman from Texas (Mr. FROST), we do have $2.8 billion in this bill above the House bill for homeland security items. After the tragic events of September 11, on a bipartisan basis the gentleman from Florida (Mr. YOUNG) and I tried to put together a list of the actions that both sides of the aisle thought were necessary in order to improve the homeland security of the United States.

That process was rudely interrupted, to say the least, by OMB, who informed us in rather blunt terms that they had all the wisdom, that they did not need to provide any additional funding, and that we could put a ''Wait 'Til Next Year'' sign on our homeland security needs.

Mr. Speaker, I am pleased to say that despite that resistance, the conferees brought back to this House a bill which contains crucial items that will increase the security of this country at home. I want to congratulate Senators BYRD and STEVENS and the gentleman from Florida (Chairman YOUNG) and the gentleman from California (Chairman LEWIS) for helping to see to it that rationality prevailed over stubbornness. As a result, we have $664 million in this bill that was not contained in the House bill to protect the country against bioterrorist attacks; we have $50 million more in this bill to provide for cockpit security; we have law enforcement additions to the bill of over $407 million, including $208 million for the FBI so that they will be able to modernize their computer system by this coming summer, rather than having to wait until the year 2004.

Right now the FBI has a large number of computers that cannot even send pictures of potential terrorists to other FBI terminals because they do not have the adequate computer capacity. This bill fixes that.

The most crucial item of all is keeping weapons of mass destruction away from terrorists. We wound up with $382 million in additional funding in this bill above the amount that was originally in the House bill. We have $120 million of additional funding to secure nuclear material in the former Soviet Union so it does not fall into terrorists' hands.

The bill provides $383 million for increased security for our Nation's ports and for our border, especially the Canadian border. For food safety, it increases the percentage of imported food subject to inspection from the present 1 percent to 10 percent, as we have been asking all along.

It contains a number of other items which I will insert in the record.

Mr. Speaker, I insert the table in the RECORD at this point.

CONFERENCE ADDITIONS TO THE HOUSE BILL FOR DOMESTIC SECURITY

[in millions of dollars]

	House	Conference	Conference over House
Protecting Against Bioterrorism			
Upgrading State & Local Health Departments & Hospitals	593	1,000	407
Expanding CDC Support of State and Local Health Departments	50	100	50
Accelerating Research on Biohazards, Detection and Treatment	100	93	−7
Bio Safety Laboratories at NIH and Fort Detrick, MD	0	71	71
Vaccine and Drug stockpiles	1,103	1,105	2
Other Bioterrorism Requirements	110	56	−54
Total	1,956	2,425	469
Securing the Mail			
Procurement of Sanitation Equipment for Postal Service	0	500	500
Airport and Airline Safety			
Federal Assistance for Mandated Security Upgrades at Airports	0	175	175
Increased Sky Marshals and Sky Marshal Training	288	155	−133
Cockpit Door Security & Explosive Detection Equipment	159	209	50
Innovations in Airport Security	90	50	−40
Total	537	589	52
Law Enforcement			
FBI Case Management Computer System (Trilogy)	105	237	132
FBI Data Backup and Warehousing	0	56	56
FBI Cybersecurity, Transportation and Other	434	452	18
Other Justice Department Law Enforcement	106	80	−26
Law Enforcement Assistance (Olympics)	17	17	0
Law Enforcement Assistance (National Capital Area)	25	234	209
Federal Law Enforcement Training Center	14	32	18
Secret Service, IRS etc.	236	236	0
Total	937	1,344	407
Keeping Weapons of Mass Destruction Away from Terrorists			
Improved Security at 4 DoD Sites Storing Tons of Chemical Weapons	35	35	0
Improved Security for Nuclear Weapons Activities	88	131	43
Improved Security for U.S. commercial/research nuclear reactors (NRC)	0	36	36
Nuclear Non Proliferation Assistance for Russia	0	148	148
Security of Russian Nuclear and Biological Scientists	0	0	0
Nuclear, Chemical and Biological Detection	18	78	60
Improved Security at Nuclear Cleanup Sites	8	8	0
Energy Intelligence	4	4	0
CDC Oversight and Training for Labs Handling Dangerous Pathogens	0	10	10
Improved Security at Fort Detrick, MD	9	9	0
Improved Security at CDC, NIH, FDA and USDA Research Facilities	58	143	85
Total	220	602	382
Immigration, Port and Border Security			
Additional Customs Agents for Canadian Border and seaports	160	246	86
Machine Readable Visa Machines at All U.S. Consulates	0	0	0
Immigration Inspectors, Border Patrol & Related Equipment	410	450	40
Adequate INS Detention & Admin. Facilities at U.S. Border Crossings	0	100	100
Full Annual Cost of Expanding Coast Guard by 640 positions	145	209	64

Security of Government Buildings and Facilities			
Security Upgrades for Supreme Court and Other Federal Courthouses	32	93	61
Security Upgrades for Federal Buildings and Facilities	182	248	66
Increased Security for Federal Museums, Parks and Monuments	81	81	0
Security Upgrades for National Water Infrastructure	169	169	0
Security Measures for White House and Congress	306	306	0
Security Upgrades for U.S. Military Facilities	105	104	−1
Total	875	1,001	126
Security for Schools and Colleges			
Grants for Assessments and Emergency Response Planning	0	0	0
Other Security			
Counterterrorism Assistance for State and Local First Responders	400	400	0
Grants for Firefighters	0	210	210

Mr. OBEY. Mr. Speaker, I simply want to say that I think what this bill demonstrates is that when committees are allowed to work in a substantive way, casting aside ideology or political views, the result is good for the country, and it is good for this institution, and I congratulate all of those involved.

Mrs. MYRICK. Mr. Speaker, I would inquire of the gentleman from Texas (Mr. FROST) if he has any other speakers.

Mr. FROST. Mr. Speaker, we have no more speakers.

Mr. Speaker, I urge adoption of the rule, and I yield back the balance of my time.

Mrs. MYRICK. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.J. RES. 79, FURTHER CONTINUING APPROPRIATIONS FOR FISCAL YEAR 2002

Mr. LINDER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 323 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 323

Resolved, That upon the adoption of this resolution it shall be in order without intervention of any point of order to consider in the House the joint resolution (H.J. Res. 79) making further continuing appropriations for the fiscal year 2002, and for other purposes. The joint resolution shall be considered as read for amendment. The previous question shall be considered as ordered on the joint resolution to final passage without intervening motion except: (1) one hour of debate on the joint resolution equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations; and (2) one motion to recommit.

The SPEAKER pro tempore. The gentleman from Georgia (Mr. LINDER) is recognized for 1 hour.

Mr. LINDER. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentlewoman from New York (Ms. SLAUGHTER), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

Mr. Speaker, H. Res. 323 is a closed rule providing for the consideration of H.J. Res. 79, which is a continuing resolution that makes further appropriations for fiscal year 2002.

The rule provides for 1 hour of debate in the House equally divided and controlled by the Chairman and Ranking Minority Member of the Committee on Appropriations. The rule waives all points of order against consideration and provides for one motion to recommit.

Mr. Speaker, as we approach the end of this year's session, I urge my colleagues to join me in supporting this rule so that we may proceed to consideration on the underlying continuing resolution.

Mr. Speaker, I reserve the balance of my time.

Ms. SLAUGHTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this rule makes in order the consideration of H.J. Res. 79. H.J. Res. 79 is a continuing resolution which will be in effect from December 21, 2001, to January 10, 2002.

This is a simple housekeeping matter, Mr. Speaker, and merely ensures that should the Senate be unable to complete its work, or if the President has not signed the remaining bills sent to him, the funding will be in place for those departments and agencies.

This is a noncontroversial matter, and I urge adoption of this resolution.

Mr. Speaker, I yield back the balance of my time.

Mr. LINDER. Mr. Speaker, I yield back the balance of my time, and I move the previous question.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H. RES. 322, APPOINTING DAY FOR THE CONVENING OF THE SECOND SESSION OF THE 107TH CONGRESS

Mr. HASTINGS of Washington. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 322 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 322

Resolved, That upon the adoption of this resolution it shall be in order to consider in the House a joint resolution appointing the day for the convening of the second session of the One Hundred Seventh Congress. The joint resolution shall be considered as read for amendment. The previous question shall be considered as ordered on the joint resolution to final passage without intervening motion except: (1) one hour of debate equally divided and controlled by the Majority Leader and the Minority Leader or their designees; and (2) one motion to recommit.

The SPEAKER pro tempore. The gentleman from Washington (Mr. HASTINGS) is recognized for 1 hour.

(Mr. HASTINGS of Washington asked and was given permission to revise and extend his remarks.)

Mr. HASTINGS of Washington. Mr. Speaker, for the purpose of debate only, I yield the customary 30 minutes to the gentleman from Texas (Mr. FROST), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

Mr. Speaker, House Resolution 322 is a closed rule providing for consideration of a joint resolution appointing the day for the convening of the second session of the 107th Congress. The joint resolution shall be considered as read for amendment.

The previous question shall be considered as ordered on the joint resolution to final passage without intervening motion except: (1) 1 hour of debate, equally divided and controlled by the Majority Leader and the Minority Leader or their designees; and (2) one motion to recommit.

Mr. Speaker, we had hoped to bring this resolution to the floor under unanimous consent agreement, but were unable to secure such an agreement. Accordingly, in the interest of completing

the work of the House as expeditiously as possible, I encourage my colleagues to support both this rule and the resolution that it makes in order.

Mr. Speaker, I reserve the balance of my time.

Mr. FROST. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this rule makes in order a joint resolution which sets the date for convening of the second session of the 107th Congress as January 23, 2002. This is a totally noncontroversial rule and joint resolution, and I urge adoption of both.

Mr. Speaker, I yield back the balance of my time.

Mr. HASTINGS of Washington. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. LEWIS of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the conference report accompanying H.R. 3338, and that I may include tabular and extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

CONFERENCE REPORT ON H.R. 3338, DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2002

Mr. LEWIS of California. Mr. Speaker, pursuant to House Resolution 324, I call up the conference report accompanying the bill (H.R. 3338) making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to House Resolution 324, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of Wednesday, December 19, 2001.)

The SPEAKER pro tempore. The gentleman from California (Mr. LEWIS) and the gentleman from Pennsylvania (Mr. MURTHA) each will control 30 minutes.

The Chair recognizes the gentleman from California (Mr. LEWIS).

Mr. LEWIS of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would say to my colleagues and the gentleman from Pennsylvania (Mr. MURTHA), my friend, that the House has had a long night this past night. We have very, very extensive discussions that should take place regarding this bill, but we have heard this discussion before. So I am going to pass on those formal remarks, and I hope that my colleagues will read about them very carefully in the RECORD. But in the meantime, there are a couple of items of business that I must attend to.

First, due to a clerical error, language was mistakenly omitted from the Statement of Managers that relates to the FMTV truck program, a very important program to some of the Members of the House.

That language, agreed to by the conferees but inadvertently not included in the statement of managers, is as follows: "The conferees understand that the Army did not request legislative authority to extend the current multi-year contract. The conferees direct the Army to act in the best interest of the Army with respect to the FMTV."

Secondly, I would ask that on behalf of myself and Chairman YOUNG, that I be allowed to insert in the RECORD at the end of my opening remarks a series of tables summarizing the conference agreements, on both the Defense and Supplemental appropriations bills.

Finally, let me mention that our former colleague from the Committee on Appropriations, Larry Coughlin of Pennsylvania, who was a proud Marine by the way, Larry Coughlin was laid to rest at Arlington Cemetery this morning.

1/ FDA appropriation of $104.35 million was originally requested by the President as part of the HHS Public health and social services emergency fund account.

2/ Amounts for counterterrorism assistance to State and local governments were requested by the President as part of FEMA.

3/ National Park Service relocation costs were originally requested by the President as part of the GSA Federal buildings fund account.

Mr. Speaker, I reserve the balance of my time.

Mr. MURTHA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I have no requests for time. We did the best we could with the little bit of money we had.

Mr. Speaker, I yield back the balance of my time.

Mr. LEWIS of California. Mr. Speaker, I yield such time as he may consume to the gentleman from Washington (Mr. DICKS) for a very brief colloquy.

(Mr. DICKS asked and was given permission to revise and extend his remarks.)

Mr. DICKS. Mr. Speaker, I would like to enter into a colloquy with the distinguished gentleman from California (Mr. LEWIS).

Mr. Speaker, I rise in support of this Defense Appropriations bill. Chairman LEWIS and Ranking Member MURTHA have done excellent work in balancing very difficult and demanding priorities. Most of all, I am very pleased that the conferees agreed to accept a Senate provision which allows the Air Force to lease new aircraft to replace the oldest of our KC–135 tankers. The issue of replacing the Air Force's tanker refueling aircraft is, in fact, very simple despite the cloud of confusion being created by its opponents. In their frenzy to condemn what they see as a special deal, they have totally lost sight of the facts. The truth is this provision is a good deal—a good deal for our armed forces and a good deal for taxpayers.

First, it is important to understand that every credible defense and aviation observer agrees that it is time to replace the aging KC–135–E tanker aircraft fleet with new tankers based on the 767 aircraft. Both of the large tanker refueling aircraft now in use were built by the Boeing Company—current aircraft are based on the 707 and DC–10 airliners—and Air Force analyses have shown that the 767 due to its size, range, and carrying capacity is uniquely suited to this role. The proof of this is already evident in the commercial marketplace. The Italian Government has already signed a deal for 767 tankers for its Air Force, Japan recently did the same, and several other European governments are likely to be close behind. The 136 KC–135 E model aircraft the Air Force is seeking to replace average 43 years of age. They exhibit severe corrosion and structural damage due to age and spend on average well over a year in depot in an attempt to patch up this damage. The Air Force has two choices, either spend billions to attempt to repair and partially modernize these aircraft, or make the transition to a new airframe with much greater capability and lower cost of operation. The decision is not hard. The Air Force must replace its KC–135 Es and it must begin its program now.

The war in Afghanistan has shown just how vital our tanker capability is. Navy aircraft flying from aircraft carriers are being refueled at least 2 and sometimes 3 or 4 times on each mission. Bombers from Diego Garcia, and even those coming all the way from the United States, are being refueled, some up to as much as 6 times on one mission. Simply put, we could not fight a war in Afghanistan without these tankers, and what we've discovered is that our current fleet is too old to do the job for long in high intensity situations like the current one. The only question then is how do we pay to replace these tankers? Again, for the Air Force the choice is relatively simple. It needs 100 aircraft delivered as quickly as possible. The Air Force calculates that phasing out the KC–135 Es on an aggressive schedule will save at least $5.9 billion. But the Air Force's procurement budget was held flat this year by the new administration, and for now there doesn't appear to be any help for procurement in sight. The Air Force bears the responsibility of paying not only for the nation's tanker aircraft, but also for all of the nation's airlift, most of our space assets, and our Air superiority capability. So the right answer is to lease tanker aircraft, which allows the Air Force to spread the cost over up to 10 years, and buy down the value of these aircraft to the point where at the end of the lease, the Air Force can easily buy or release these aircraft for their residual value. This is the same principle on which a car lease operates, an arrangement understood and exercised by millions of Americans. And the Office of Management and Budget (OMB) has determined that ''the lease price quoted is a very good price.'' How can the taxpayer be sure that Boeing will not turn around at the end of the lease and sell these aircraft to somebody else? Boeing can sell or lease these aircraft only with US government approval under export control laws.

Mr. DICKS. Mr. Speaker, I ask unanimous consent that the next six lines of the colloquy be inserted in the record.

Mr. LEWIS of California. Absolutely.

The SPEAKER pro tempore. The Chair advises the gentleman that colloquies may not be inserted in the record.

Mr. LEWIS of California. Mr. Speaker, would the gentleman read this very brief colloquy to me, and I will try to respond.

Mr. DICKS. Mr. Speaker, I understand that this bill grants approval for the Air Force to enter into a lease for new tanker aircraft to be delivered as general purpose aircraft in commercial configuration. Is that correct?

Mr. LEWIS of California. Mr. Speaker, reclaiming my time, the gentleman is correct.

Mr. DICKS. Mr. Speaker, it is also my understanding that Italy and Japan have selected the 767 tanker for their air forces. Italy intends to buy at least four of the tankers, and Japan intends to procure at least one. Further, I believe that the same tanker configuration is being offered commercially to other countries to meet their in-flight refueling requirements. Is that the gentleman's understanding?

□ 1030

Mr. LEWIS of California. Yes, it is.

Mr. DICKS. Then the gentleman would say that a commercial market exists for general purpose, commercially configured aerial refueling tanker aircraft?

Mr. LEWIS of California. Yes, very well said.

Mr. DICKS. Would the gentleman agree a general purpose aircraft that will meet the general requirements of many customers; that can operate as a passenger aircraft, a freighter, a passenger/freighter ''combination'' aircraft, or as an aerial refueling tanker; and is available to either government or private customers, meets the definition of a general purpose, commercially configured aircraft?

Mr. LEWIS of California. Absolutely.

Mr. DICKS. The gentleman would agree with that assessment?

Mr. LEWIS of California. Of course. Of course.

Mr. DICKS. I thank the chairman.

Mr. LEWIS of California. Mr. Speaker, I yield such time as he may consume to the chairman of the full committee, the gentleman from Florida (Mr. YOUNG).

(Mr. YOUNG of Florida asked and was given permission to revise and extend his remarks.)

Mr. YOUNG of Florida. Mr. Speaker, this is a very good bill, and I think we will pass it expeditiously here this morning, but I want to remind the Members that it does include the $20 billion emergency supplemental, which is divided into three basic sections; which is national defense, or military, homeland defense, and the recovery effort for after the terrible September 11 attack.

I want to thank the gentleman from Pennsylvania (Mr. MURTHA) for being a good partner on the minority side, and the gentleman from Wisconsin (Mr. OBEY), who has been a tremendous partner as we went through this process. And, of course, the gentleman from California (Mr. LEWIS) is an outstanding chairman of the Subcommittee on Defense of the Committee on Appropriations.

I am happy to report, Mr. Speaker, that this is the 15th, let me repeat, the 15th appropriation bill that we have done this year. We have not lumped any of them together. Each bill has had its own identity. This is something we have been striving to do for years, and this year we finally accomplished it.

Mr. Speaker, today the House is considering a very important piece of legislation, our last appropriations bill—H.R. 3338, the Defense Appropriations bill for fiscal year 2002. Included in this bill is not only critical funding for the Defense Department and the Intelligence Community, but also an allocation of the $20 billion in emergency supplemental appropriations enacted as part of the Emergency Supplemental Appropriations Act for Recovery from and Response to Terrorist Attacks on the United States.

I commend Chairman LEWIS, working closely with his partner, the ranking Member of the subcommittee, JACK MURTHA—as well as all of the members of the Defense Appropriations Subcommittee, on the cooperation that has produced a truly bipartisan Defense portion of this bill that shares broad-based support. This was not only because of the way this bill was put together, but because of what it does. It is a bill which provides strong support for our troops—both in the immediate

circumstances they find themselves, as well as the longer term security challenges confronting our Nation.

You may know that the Defense Subcommittee was actually beginning its subcommittee mark-up of this bill on the very morning of September 11th—when our country suffered the horrific attacks on New York and Washington. As we all know, those attacks have changed so many, many things—and I can report that this Defense Appropriations bill was re-worked by the committee following the attacks as well as the onset of our military operations overseas, to reflect the new demands of the war on terrorism as well as the other challenges we confront around the world. The bill addresses new threats of this new century—ranging from areas such as Ballistic Missile Defense, to force protection measures for our troops in the field, and new equipment and technologies such as aerial refueling aircraft and unmanned aerial vehicles. It also fully funds the President's initiatives in the area of military pay and quality of life programs—such as the largest military pay raise in 15 years, and more than a 50 percent increase in funding for the medical programs supporting our troops and their families. And it includes a new title to deal with counter-terrorism—ranging from more funding for intelligence, to providing additional resources in the area of so-called ''cyber war'' (computer network protection) and improved equipment and research to counter the threats of chemical and biological weapons.

EMERGENCY SUPPLEMENTAL

With regard to Emergency supplemental portion of the bill—Division B—I believe we have struck an appropriate balance between funding to address our homeland security, recovery efforts and humanitarian assistance, and defense requirements. We expect that this is only the first bill that will provide funding to support our war against terrorism and the needs of this country to respond and recover from the attacks of September 11th.

The conference report before you today includes $20 billion to address the immediate requirements.

RECOVERY

The bill provides approximately $8.2 billion to help impacted areas recover from the terrorist attacks. This brings the total provided for recovery at $11.2 billion when $3 billion in previously released funds are added. Included is: $2 billion for the Community Development Block Grant for economic recovery assistance in New York City; $4.357 billion for FEMA disaster relief $300 million in additional transportation assistance and security enhancements, including funds for Amtrak, subways and ferries; and $140 million in reimbursement to hospitals impacted by the terrorist attacks.

HOMELAND SECURITY

The bill provides approximately $8.3 billion to improve our homeland defense and to assist communities in their emergency preparedness, including: $399.7 million for the Customs Service for increased border and seaport inspections, $285.5 million more than the request; $209 million for the Coast Guard, $6 million above the President's request; $2.5 billion for Public Health and Bioterrorism activities, $1 billion above the request; Aviation security initiatives through the Federal Aviation Administration receive $200 million which includes $100 million for cockpit door modifications and $65 million for the hiring of additional Sky marshals. An additional $108.5 million is provided to the FAA for the purchase and installation of explosive detection systems; $93 million for grants to U.S. seaports for security assessments and enhancements; $745 million for the Federal Bureau of Investigation for a variety of counterterrorism efforts, $206 million above the request; $256 million for Legislative branch security and the U.S. Capitol Police are authorized to hire an additional 195 FTEs; $226 million for Nuclear Nonproliferation, including $120 million to secure nuclear materials at sites in Russia and the Newly Independent States.

NATIONAL DEFENSE

The bill provides $3.5 billion for the Department of Defense for increased operational costs, Pentagon reconstruction and classified activities. This brings the total for defense spending in the counter-terror supplemental to $17.2 billion. Also provides authority for agencies to reimburse the National Guard.

I am asking that we move this important legislation forward so we can get it to the President for his signature. Critical funding for our military during a time of war and for homeland security and recovery efforts is at stake.

Mr. RYUN of Kansas. Mr. Speaker, I rise today in support of our national security. During most of the last decade, the United States military has been consistently asked to make do with inadequate budgets. By adding more than $19 billion over the funding made available last year, this bill marks a turn for the better in defense funding.

Our nation has recently suffered a devastating blow from a new and faceless enemy. Terror was brought to our door on September 11th—masterminded by an enemy as devious as he is evasive.

As we witness the day-by-day actions of our military response to Operation Enduring Freedom, the importance of our readiness to dominate the conflict is a constant reminder. If we expect to control the battlefield, we must be prepared to fight quickly and with decisive force. We must allocate enough resources to support our troops at the highest level of readiness.

By appropriating $317.5 billion, H.R. 3338 will give our fighting forces the funding levels needed to succeed in protecting our national security interests.

I urge my colleagues to vote for this conference report and give our expectional military personnel the support and equipment they need to achieve current goals and those of the future.

Mr. SCHAFFER. Mr. Speaker, I commend the leaders of the House, our colleagues in the Senate and the president and his administration for following through today on a commitment made to Colorado to construct a new facility in Fort Collins, Colorado to replace the aging Center for Disease Control building there which houses the Division of Vector-Borne Infectious Diseases (DVBID). The first, and most important step, in fulfilling this commitment is contained in the resolution before us now, H.R. 3338—the Department of Defense Appropriations Act conference report and its supplemental appropriations for bio-terrorism.

As you know, the safety and security of the Division of Vector-Borne Infectious Diseases in Fort Collins has been of the utmost importance to me, to Colorado and to the nation. It is a high complement to the outstanding professional staff and administrators of the Fort Collins CDC facility to know that they will finally be getting a new facility commensurate with the world-class researchers who daily accomplish there important mission in the spirit of devoted public service.

The DVBID employs a number of epidemiologists, entomologists, molecular biologists, laboratory technicians, and behavioral scientists along with the other members of their prestigious staff. The DVBID performs critical functions for the country including conducting epidemiological studies to monitor disease spread, identification of risk factors associated with transmission and measuring public health impact, studying pathogens and developing new and more effective integrated, community-based prevention and control strategies, including vaccine development programs.

The facility deals with such deadly pathogens as Lyme disease, Dengue, Hemorrhagic Fever, Arboviral Encephalitides, Plague and Aedes albopictus that can be transmitted through hosts such as insects, mammals, and rodents. Clearly, Mr. Speaker, the work done by the DVBID entails life-saving research affecting not only Colorado and the United States, but also the entire world. The new facility initiated by this bill will lend another helping hand as the DVBID continues to fight these diseases.

Mr. Speaker, the working conditions at the existing facility are not conducive to allowing the doctors and researchers of the DVBID to do their jobs as well as they otherwise would be able. As many in this House know, the Inspector General will soon be issuing a report citing approximately $100 million as the possible cost for completing this new facility. Due to the dramatic state of disrepair of the facility and the more urgent shortcomings in security as documented in the report, expediting the construction becomes even more critical. When the laboratory was first constructed in the 1960s, it was only designed to accommodate 50 employees. Through the years, new personnel have been added and now the facility contains more than 150 scientists, researchers, and other workers. Clearly, the number of people working in this building have tested its capacity and created an extremely cramped working environment. The security needs of the facility are well documented in the IG's report and are self-explanatory. Because of the sensitivity of the report's recommendations, I will not restate them herein but will insist the report's findings receive expedient attention.

In addition to the confining workspace, the facility's airflow system has been a chronic problem. In most government offices, such a ventilation problem would only be a minor inconvenience (my office in the U.S. House of Representatives suffers from a similar problem). However, proper airflow and ventilation become much larger issues when placed within the context of laboratory conducting research on some of the world's most volatile viruses.

Mr. Speaker, while I worked hard to make sure the new building would be constructed,

this was certainly not a one-man effort. The Senator from Colorado Mr. ALLARD, and gentle lady from Colorado Ms. DEGETTE were instrumental in helping me elevate the needs of the Fort Collins lab to a state of national concern. In fact, Ms. DEGETTE traveled to Fort Collins and toured the facility with me. Together we observed first hand the clear and convincing conditions of the facility, which fully warrant replacement of the lab. Fort Collins Mayor Ray Martinez also joined me on a separate tour of the facility. His observations and subsequent leadership likewise proved crucial in conveying to this Congress the urgency of this project.

The gentlemen from Texas, Mr. DELAY took personal interest in the facility as well and played the pivotal role in inserting the necessary language to effectuate the facility replacement into the legislation under our immediate consideration. Finally, Mr. Speaker, I thank President George W. Bush whose staff helped set this victory in motion. By pledging its word and its honor early on, the White House has assured me and Colorado that the new facility will be completed in a speedy and timely fashion, and through his representatives, the president has given me his commitment to place the goal of completion of the Fort Collins facility among his administration's highest priorities.

Once again the Colorado delegation to this Congress has proved that working together across party lines for the greater good of Colorado and all our constituents yields productive results in Congress for America. I am deeply grateful for the support and assistance of my Colorado colleagues. Absent their devoted attention to this important matter, it is most likely the new DVBID facility would remain an elusive dream.

Mr. Speaker as I have stated, I am proud to announce the new DVBID facility to be housed at Colorado State University. I congratulate the employees of the facility, especially the director, Dr. Duane Gubler. I applaud the efforts of the DVBID and look forward to being at the groundbreaking ceremony.

Mr. PETRI. Mr. Speaker, while we all want to support our military, our fight against terrorism, and efforts to rebuild areas affected by the terrorist attacks of September 11, I find I must once again express my strong objection to the continued disregard for existing law and the House Rules shown by the Appropriations Committee. While the conference report has only been available for a few hours, there clearly are several objectionable provisions. While too numerous to specify all of them, I will highlight just a few.

When the House considered H.R. 3338 on November 28, several points of order were made striking provisions that funded certain aviation and highway spending from the Aviation and Highway Trust Funds. The points of order were upheld because language directing that the funding be from the trust funds was determined to be a violation of the House Rules because this funding from the Trust Funds was not authorized. The $40 billion emergency response supplemental passed after September 11 did not provide for funding from the Trust Funds. This spending should come from the general fund. Perhaps it is no surprise to find that this conference report inserts the Trust Fund provisions again, in violation of the House Rules.

It is shocking that just a few days after the FY2002 Department of Transportation Appropriations Act was signed into law, the Appropriators have seen a need to make ''technical corrections'' to the Act and continue their practice of Revenue Aligned Budget Authority diversion which negatively impacts state formula funds. The Transportation Appropriations Act diverted roughly $1 billion of RABA (which under TEA 21 is to be distributed proportionately to states and among allocated programs) into a few programs to increase their earmarking opportunities. One of the programs which had its share of RABA funds zeroed out was the Woodrow Wilson Bridge, which under TEA 21 should have received $29.9 million in RABA funds this year. Now, I am no fan of the vast amounts of federal highway funds going toward this project, but that is the project's fair share under TEA 21. H.R. 3338 restores $29.9 million to the Wilson Bridge. But the Bridge's good fortune is more bad news for the States. In order to make room for the additional funding for the Bridge, all the States will receive another cut from their TEA 21 formula funds to pay for the $29.5 million. This is on top of the $423 million cut in formula funds as a result of the first raid on the States included in the DOT Appropriations Act.

Inexplicably, the Appropriators cut RABA funds for the National Scenic Byway Program, a program that seeks to preserve some of the great driving roads across our nation and that should receive $3.4 million in RABA funds.

The Appropriators found time to do a little more earmarking, though in a less objectionable fashion. Two more projects for Mississippi and Washington are included, but funded from general funds and added to the $144 million of projects funded in sec. 330 of the original DOT Act and then earmarked. While unauthorized, we should at least be thankful that, unlike the Senate bill, the conference report does not fund these two projects from the Trust Fund programs that were the beneficiaries of the raid on the RABA funds from the states and other programs.

On December 11, less than 10 days ago, the House passed by voice vote H.R. 3441. This bill, requested by the Administration, creates the positions of Under Secretary of Transportation for Policy and Assistant Secretary for Public Affairs. When the House considered this bill on the Floor, not one member of the Appropriations Committee expressed any concerns. In fact, not one word of opposition was uttered on the Floor. And again, it was passed by voice vote. Yet, section 1107 of this conference report prohibits the use of any funds for these two positions. Why? No explanation is given.

Section 1102 provides that no appropriated funds or revenues generated by Amtrak may be used to implement section 204(c)(2) of Amtrak's current authorization law until Congress has enacted an Amtrak authorization law. Section 204(c)(2) requires Amtrak to prepare a liquidation plan within 90 days of the Amtrak Reform Council determining that Amtrak will not reach operational self-sufficiency by December, 2002. It also requires the Council to submit a plan to restructure Amtrak within 90 days of that finding. The Council made such a finding last month.

This prohibition on developing such plans will impede Congress' consideration of the future of Amtrak. The liquidation and restructuring plans would help educate Members and provide vital information during reauthorization of Amtrak. It is sad that the Appropriators saw fit to eliminate this statutory requirement. And, since it prohibits use of appropriations and revenues generated by Amtrak, I would argue that this is legislating on an appropriations bill in violation of the House Rules.

Chapter 11 of this conference report is replete with legislative provisions affecting programs under the jurisdiction of the Transportation and Infrastructure Committee. This practice of usurping the jurisdiction of authorizing committees must stop. And it is getting worse with each passing year. Thankfully, we have completed all action on appropriations bills for FY 2002, but next year we must not continue to proceed down this path. I urge all Members, particularly those on authorizing committees, to stand together against this continuing assault on the jurisdiction of the authorizing committees.

Mr. BLUMENAUER. Mr. Speaker, the Defense Appropriations bill for 2002 (H.R. 3338) includes important language to solve a critical problem with funding deficiencies in a technical assistance program under the Multifamily Assisted Housing and Assistance Restructuring Act (MAHRA). The Office of Multifamily Housing and Assistance Restructuring (OHMAR) was charged with the administration of this program, which offers grants to nonprofit groups for outreach and rehabilitation of housing. OMHAR mistakenly exceeded an annual $10 million restriction in two of the last four fiscal years. HUD has subsequently frozen all funds for the program. Over 100 nonprofit and tenant organizations with written, signed contracts have incurred expenses on the assumption that the contracts would be honored. Even though these organizations have completed work according to the terms of their contracts, they are now forced to lay off staff because invoices for reimbursement have not been paid. The solution included in the defense appropriations bill does not require the appropriation of new money. Rather, it includes a technical correction to appropriate money that already exists within the HUD budget.

While I strongly support this technical correction as a necessary and critical step to ensure that 100's of non-profit organizations around the country are properly compensated, there remains one area of concern. The language embodies requirements for additional audits and reviews of the office responsible as well as other elements of the program. While a full and ongoing investigation of the reasons for OMHAR's financial errors is absolutely necessary, these steps can and should be taken without further delaying the reimbursement of non-profit organizations associated with the program. Any additional requirements for financial reviews and audits should balance the need for continued accountability with the need to meet our current and future obligations to these important non-profit organizations.

I urge my colleagues to work with their local non-profit housing organizations to ensure that any additional requirements posed by this legislation do not serve to stymie their efforts to provide quality housing in our nation's communities.

Mr. FRELINGHUYSEN. Mr. Speaker, I rise today in support of H.R. 3338, the Fiscal Year 2002 Defense Appropriations Conference Report and ask unanimous consent to revise and extend by remarks.

As a member of the Defense Subcommittee, let me first thank our Chairman JERRY LEWIS

and our ranking member, Congressman MURTHA, as well as our full Committee Chairman BILL YOUNG.

Our subcommittee was first scheduled to begin work on this bill on the morning of September 11 at the very hour that terrorists attacked our county, killing thousands of our fellow Americans and forever changing the course of our nation's history.

America is now at war and our young men and women in the military have been called on to defend our citizens and our nation. The course of our nation's history *will not* be written by the terrorists *but by* the bravery and success of our troops now serving on the frontlines of this war against terrorism. And our history will be written, in part, *by the actions we take here today.*

Today, there is no more important task before this Congress than to provide our military with the tools and resources they need to defend our citizens and fight for our freedom. Our military needs to know that this Congress *not only* supports their mission in theory *but in substance;* that we are prepared to take all the necessary steps and provide all the necessary means for their safety and their success in battle. With this Conference Report, we go a long way in doing just that.

With this bill, we help meet the immediate needs of our troops and their families, to keep our military at the ready, and to invest in all the many, diverse capabilities we need to protect our citizens from all potential threats.

Overall, we provide $317.5 billion for the Department of Defense and with those dollars, we do the following:

First and foremost, we give our troops better pay.

We add much needed dollars for troop readiness, training, supplies, and mobility that allow our Commander in Chief to send our Armed Forces into battle anywhere and at a moment's notice.

We add support for our National Guard and reserves, so many of whom have now been called to duty.

We provide for modernizing major weapon systems that allow us to better combat our enemies in the air, on the ground and at sea.

We continue to support critical long-term investments in research and development so we have the most lethal and effective weapons now and in the future.

We add significant resources to strengthen classified intelligence programs, and accelerate and enhance U.S. military intelligence, surveillance and reconnaissance capabilities.

And we also add critical funds for our homeland defense to better protect our citizens from all potential threats.

And with the release of $20 billion in emergency appropriations, we are also helping to meet the very real needs of those communities and states most directly impacted by the attacks of September 11 and to strengthen our homeland defense.

As my colleagues know, New Jersey was on the frontlines of the attacks of September 11 our people suffered greatly as so many lives were lost and our state and local law enforcement where there to answer the call to help our neighbors in New York. And it's important that we all work to help rebuild lower Manhattan and most important, work together to help our fellow citizens who suffered to rebuild their lives.

I want to thank the House for agreeing to requests to help New Jersey directly by including $30 million to replace our state police communications system which sat atop the World Trade Center and was destroyed in the attack. And as a result of the destruction of the PATH station, thousands of New Jersey commuters are struggling every day to get to work. Our commuters need help and this bill provides relief for our commuters by providing $100 million for increased mass transit and $100 million for increased ferry service. We also provide $100 million critical safety improvements for the tunnels that take millions of people to and from Manhattan and New Jersey every day.

Finally, let us also be clear that the commitments we make in this bill to our military do not meet every need. As more will be required of our troops, more will be required of this Congress.

Mr. Speaker, as those of us who have served in the military know only too well, wars are fought by the young. We know, too, that freedom never has, nor will it be this time, free. At no time in our nation's history has the sacrifice and service of our young men and women been more important to the defense of our country and the security of our future.

Mr. Speaker, I urge my colleagues to pass the fiscal year 2002 Defense Appropriations Conference Report and to do so unanimously.

[From Daily Record, Dec. 20, 2001]

FRELINGHUYSEN DISAPPOINTED WITH FUNDING FOR N.J. MILITARY

(By Matt Manochio)

U.S. Rep. Rodney Frelinghuysen said Wednesday he's disappointed with the funding provided by the U.S. Senate for New Jersey's military installations, but the state's two Democratic senators say they are steadfast in their support of those bases.

Frelinghuysen, R-Harding, released a statement with details of the Department of Defense budget that soon will land on President' Bush's desk.

At Picatinny Arsenal in Rockaway Township, $447 million is slated for research and development for the arsenal's Crusader self-propelled howitzer program. All totaled, more than $600 million is earmarked for Picatinny projects in the 2002 budget.

Frelinghuysen's statement compared House and Senate funding requests, along with the amounts that actually made it into the budget.

The House asked for $98 million for the Crusader's ''Common Engine'' program, compared to $43 million requested by the Senate. The final amount budgeted was $98 million.

The release listed various projects at Picatinny and other bases, showing the Senate budgeted no money for them while the House set aside between $1.5 million and $40 million.

The state's two Democratic senators strongly disagreed with Frelinghuysen's suggestion that the Senate has failed to adequately support the military, according to their spokespeople.

''Basically, we're surprised about it,'' said David Wald, a spokesman for Sen. Jon Corzine. ''We know that the bulk of the ($300 million) for Homeland Defense that impacts on New Jersey started on the Senate side.''

Likewise, Sen. Robert G. Torricelli's spokeswoman, Debra DeShong, took exception to the Frelinghuysen document.

New Jersey military bases have no bigger advocate than Sen. Torricelli,'' she said, adding that the senator was ''disappointed that Congressman Frelinghuysen has chosen to politicize our state's defense projects and our efforts to protect our priorities.''

Frelinghuysen's spokesman, Mark Broadhurst, said that the congressman wasn't trying to politicize anything.

''To say that he was disappointed with the final numbers this year, that would be an accurate statement,'' Broadhurst said.

''But in no way is the congressman trying to point any fingers,'' he said, adding that Frelinghuysen is telling the Senate ''we have to do better.''

Picatinny Arsenal spokesman Pete Rowland said he was pleased with the congressman's efforts.

''I think that it goes without saying (Frelinghuysen) has displayed a real strong support for military installations not only in his district but in the state of New Jersey and military services at large,'' he said. ''And this is another example of his personal support, as well as that of the other members of the New Jersey congressional delegation.''

Picatinny Arsenal covers about 6,500 acres with 1,000 buildings. It employs approximately 3,500 people designing new weapons and munitions for the military.

[From the Star Ledger, Dec. 20, 2001]

MILLIONS EXPECTED FOR AREA'S TRANSIT AND SECURITY

(By J. Scott Orr)

WASHINGTON.—House and Senate negotiators have agreed on a Pentagon spending bill that includes hundreds of million of dollars for law enforcement and transportation aid to New Jersey in the aftermath of the Sept. 11 terrorist attacks.

Included is close to $300 million to improve commuter access to New York City from New Jersey and more than $50 million for the State Police and the Newark and Jersey City police departments to help tighten security.

''These important security and transportation initiatives are critical to the safety and well-being of New Jersey residents,'' said Rep. Rodney Frelinghuysen (R–11th Dist.), the state's senior member of the House Appropriations Committee.

''Through no choice of its own, New Jersey has become one of the front lines in the war on terrorism, and it is absolutely crucial that the state receives the resources it needs to provide the strongest security possible,'' added Sen. Robert Torricelli (D–N.J.), who fought for the New Jersey money in the Senate.

While they joined in applauding the transportation and security funding, Frelinghuysen and Torricelli were divided over another part of the bill that sets funding levels for New Jersey's military installations, including Picatinny Arsenal, Fort Monmouth, McGuire Air Force Base and Fort Dix. The bases would receive more than $650 million under the bill.

Without mentioning Torricelli or Sen. Jon Corzine (D–N.J.), Frelinghuysen charged that the Senate failed to support more than $25 million in additional funding for programs at the bases, including more than $20 million at Picatinny.

Frelinghuysen had complained privately that the money for the transportation and security projects, championed in the Senate by Torricelli and Corzine, could jeopardize funding levels for other military programs in the state.

Speaking through a spokesperson, Torricelli said he was ''disappointed'' that Frelinghuysen would blame the Senate for ''shortcomings that resulted from the work of the committee on which he serves.''

The transportation and security funding is part of $20 billion in anti-terror and reconstruction funding included in the appropriations bill for the Department of Defense for the fiscal year that began Oct. 1.

The agreement still requires final approval by the House and the Senate, but its backers said there is little doubt it will be approved quickly, possibly today.

The transportation funding includes:

$100 million to expand ferry service for PATH commuters between New Jersey and Manhattan.

$100 million in capital investment funding to accelerate improvements under way by the Port Authority of New York and New Jersey to improve PATH and NJ Transit systems.

$100 million for Amtrak to enhance safety and security of its rail tunnels under the East and Hudson rivers.

$93.3 million to improve security at all U.S. seaports, including the Port of New York and New Jersey, and along the Delaware River in New Jersey.

''The enhancement of the metropolitan area's transportation infrastructure is central to the region's ability to recover economically from both the attacks on the World Trade Center and the economic situation we are currently facing,'' Torricelli said.

The transportation funding—usually not included in an appropriations package for the Department of Defense—was put in to help New Jersey and New York recover from the destruction of the World Trade Center, which sat atop a vital PATH station.

The loss of the World Trade Center station forced some 67,000 daily commuters to seek alternative routes to Manhattan. The station is expected to be out of service at least until mid-2003.

The aging Amtrak Hudson River rail tunnels are slated for a $1 billion rehabilitation in addition to the $100 million in the Pentagon bill, which will go for immediate improvements to protect them against terrorist attack.

For police, the bill would provide:

$30 million to replace the New Jersey State Police Radio System tower, lost in the attacks on the World Trade Center.

$10.7 million for modernization of the Jersey City Police Department's communications system.

$10 million for law enforcement purposes and security equipment updates in Newark.

''This funding will help ensure that our men and women of the State Police continue to have the tools and resources necessary to protect our state and its citizens,'' Frelinghuysen said.

Mr. BOEHLERT. Mr. Speaker, I want to congratulate the appropriators on reporting our a fine defense bill overall. However, I need to put in the record my objections to the inclusions of a provision related to the Homestake mine in South Dakota. I made the same comments when the language passed as a free-standing measure, S. 1389.

I'm afraid I must oppose the Homestake language, despite the strenuous efforts made to improve it by both Mr. THUNE and the House leadership. As a Member of Congress, I'm afraid that this language could still unnecessary saddle taxpayers with costly and unprecedented environmental responsibilities. And as Chairman of the House Science Committee, I'm concerned that it may distort the priorities of the National Science Foundation for years to come.

This provision sets up dangerous and unprecedented situation in which the federal government will be financially responsible for activities it did not undertake at a piece of property it does not control. That flies in the face of common sense and fiduciary responsibility.

Under this language, the federal government will be responsible for any environmental liability connected with the portions of the Homestake mine that are conveyed to South Dakota—even if they originated while the mine was privately operated. And while the mine will be owned by South Dakota, the state will have no financial responsibility for it; that will rest solely with the federal taxpayer. It's lucky that South Dakota doesn't have any bridges to sell us.

In S. 1389 as originally introduced the federal government did not even have any real ability to have problems at the mine cleaned up before it was transferred. Thanks to the efforts of Mr. THUNE, that situation has been improved.

I would urge the Environmental Protection Agency (EPA), which will hire a contractor to review the mine, not to accept any contractor with which it is not completely satisfied. The unfortunate fact that the contractor must be selected ''jointly'' by Homestake, South Dakota and EPA should not be allowed to pressure EPA into hiring a contractor that will not fully protect the federal taxpayer. And the requirement that EPA consult with Homestake and the State over the nature of the contract with the independent entity'' must not be interpreted to give Homestake or the State any veto over the content of that contract.

But EPA should consult with the National Science Foundation (NSF) throughout the environmental review process, as NSF is the federal agency that will have continuing responsibility if a laboratory is established at the mine.

Importantly, the bill now allows the EPA Administrator to reject the final report of he contractor if it identifies conditions that would make the federal assumption of liability ''contrary to the public interest.'' I believe this allow the federal government to reject the transfer of the mine if it would cost too much to remedy existing environmental problems. This is vital since Homestake's contribution to pre-transfer remediation could well turn out to be nothing, given the language in this bill.

The bill says nothing about which federal agency would be responsible for overseeing or financing any pre-transfer remediation. This is a major, conspicuous, and I assume, purposeful gap in the legislation.

I certainly would hope that these costs—which should not have been federalized in the first place—are not borne by the National Science Foundation, a small agency with important tasks that do not include environmental remediation.

But this bill raises many other concerns related to the National Science Foundation. All the activities under this bill are contingent on NSF approval of an underground laboratory at the Homestake mine.

While such a laboratory certainly has scientific merit, it may not be a high priority compared to other NSF programs and projects, especially given that construction of other neutrino detectors is either under consideration or underway.

This bill must not be used to pressure NSF to change or circumvent its traditional, careful selection procedures. Normally, a project of this magnitude would require several years of review. NSF would have to determine its relative priority among other Major Research Equipment proposals. And NSF would have to ensure that proper management is in place. Those procedures must be followed in this case. Indeed, this is even more important in the case of Homestake because any mismanagement could result in both environmental harm and substantial liability for the federal government.

I would also urge the National Science Foundation (NSF) not to make a decision on whether to award a grant to the underground laboratory until the report to EPA has been prepared. This is essential even though NSF will have to have an Environmental Impact Statement prepared about the conversion of the mine into a laboratory.

NSF should not be committing federal resources to a project until it knows how much the project will cost the federal taxpayer and which agencies will be responsible for shouldering that burden.

The federal assumption of liability will already pose unfortunate costs for NSF. The laboratory is to pay into an Environment and Project Trust Fund, and some if not all of that money will come from NSF.

NSF must be an active participant in determining how much needs to be contributed to the trust fund, especially since it may end up being the only contributor to that fund. And NSF must have a role in determining the final disposition of the fund. The bill is silent on what is to become of the fund if a laboratory is started and then closed. All that is clear is that the federal government gets saddled with the costs of closing the mine. But which agency is responsible for that undertaking? And what will happen to any leftover funds? NSF should have an active role in deciding that.

The Homestake language bill poses enormous, unnecessary and unprecedented risks for the federal taxpayer. It is, in a phrase, a sweetheart deal for the Canadian company that owns Homestake and for the State of South Dakota. It could threaten the stability of the National Science Foundation, a premier science agency whose processes have been viewed as a model of objectivity and careful review.

I should point out that the federal government is already paying Homestake $10 million in this fiscal year to keep the mine open because it might become a laboratory. If that continues through the period of NSF decision-making the federal government could easily sink as much as $50 million into a mine that it may never use.

I will work to ensure that NSF itself is not saddled with those unnecessary costs, which could be spent on worthy grants to researchers.

The Science Committee will be following this matter extremely closely to ensure that the environmental review is rigorous and protects the public interest. We will watch closely to ensure that the laboratory is being reviewed in the same manner as every other NSF project and does not distort the agency's processes or priorities or weigh it down with unsustainable costs. The risks of proceeding with this bill are clear; we will work to see that they are never realized.

Mr. Speaker, I am attaching an exchange of letters with the National Science Foundation that will further highlight the risks inherent in proceeding in this unorthodox manner.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON SCIENCE,
Washington, DC.

Dr. RITA COLWELL,
Director, National Science Foundation, Arlington, VA.

DEAR DR. COLWELL: As you know, the Senate recently passed S. 1389, the ''Homestake Conveyance Act of 2001.'' This bill has serious implications for the National Science Foundation (NSF).

With that in mind, we want to be sure that NSF is considering the likely consequences should S. 1389 be enacted. Therefore, I am writing to request that you submit to the House Science Committee the following items by no later than December 15:

(1) A plan for how NSF would absorb the expected costs of an underground laboratory at Homestake beginning in Fiscal Year 2003, with special attention to the impact on other projects in the Major Research Equipment account.

(2) A plan for how NSF would ensure that the laboratory was properly managed, even if a project were awarded in calendar 2002.

(3) A plan for how NSF would interact with the Environmental Protection Agency and the State of South Dakota to ensure that the mine is in proper condition for the establishment of a laboratory and to determine amounts NSF grantees would have to pay into the Environment and Project Trust Fund established under the bill.

The enactment of S. 1389 could complicate NSF's situation for years to come both directly and through the precedents the bill may set. We want to work together with you, starting immediately, to limit any problems this measure may cause.

Sincerely,

SHERWOOD BOEHLERT,
Chairman.

NATIONAL SCIENCE FOUNDATION,
Arlington, VA December 14, 2001.

Hon. SHERWOOD BOEHLERT,
Chairman, Committee on Science, House of Representatives, Washington, DC

DEAR MR. CHAIRMAN:

Thank you for your letter regarding S. 1389, the ''Homestake Conveyance Act of 2001' and its possible implications for the National Science Foundation (NSF).

The following responds to your requests:

(1) A plan for how NSF would absorb the expected costs of an underground laboratory at Homestake beginning in Fiscal Year 2003, with special attention to the impact on other projects in the Major Research Equipment account.

NSF has not identified funds to support the conversion of the Homestake mine into an underground research laboratory. Unless the President requests and Congress appropriates additional monies for the lab, its establishment would force us to reconsider the priorities within the Research and Related Activities appropriation or reevaluate the funding profiles and timelines of existing MRE projects.

(1) A plan for how NSF would ensure that the laboratory was properly managed, even if a project were awarded in calendar 2002.

An applicant for a grant of this magnitude must submit a management plan for NSF's review prior to any funding decision by the Foundation. That plan must cover all phases of the project including the planning process, construction or acquisition, integration and test, commissioning, and maintenance and operations. The management plan sets forth the management structure and designates the key personnel who are to be responsible for implementing the award. This proposed management plan then becomes the basis for NSF's review of the adequacy of management for the project.

The technical and managerial complexity of the proposed lab suggests that NSF would utilize a Cooperative Agreement as the funding instrument. The particular terms of a Cooperative Agreement covering the lab would be established prior to NSF's funding of the proposal. That Cooperative Agreement would specify the extent to which NSF would advise, review, approve or otherwise be involved with project activities. To the extent NSF does not reserve or share responsibility for certain aspects of the project, all such responsibilities remain with the recipient.

(3) A plan for how NSF would interact with the Environmental Protection Agency (EPA) and the State of South Dakota to ensure that the mine is in proper condition for the establishment of a laboratory and to determine amounts NSF grantees would have to pay into the Environment and Project Trust Fund established under the bill.

NSF would interact in good faith with the EPA and the State of South Dakota to ensure that the mine is in satisfactory condition for the establishment of a laboratory. Additionally, assessment of the proposal before us will presumably require an Environmental Impact Statement (EIS). The findings of that EIS would very much inform our evaluation of the proposal.

We share your concern about the mandatory contribution to the Fund required of each project conducted in the lab. Our review of each proposal for science in the lab would include a careful analysis of (1) the projected costs of removing from the mine or laboratory equipment or other materials related to a proposed project, and (2) the projected cost of claims that could arise out of or in connection with a proposed project. Meaningful analysis of both factors would require close cooperation with the lab's Scientific Advisory Board, the State of South Dakota, and the EPA. These costs will factor into our evaluation of each proposal.

I appreciate the opportunity to work with you in assessing the possible impact of this legislation on the National Science Foundation.

The Office of Management and Budget advises that there is no objection to the submission of this report from the standpoint of the President's program.

Sincerely,

RITA R. COLWELL,
Director.

Mr. RYUN of Kansas. Mr. Speaker, I rise today to commend the House Defense Appropriations Subcommittee for the extraordinary job they have done in bringing this Conference Report to the Floor. Never before in most of our lifetimes has the security of our Nation been more paramount than it is at this moment. All the Members in this body, indeed, every American, owe a great debt of gratitude to Chairman LEWIS of California and the Ranking Member, Congressman MURTHA of Pennsylvania along with their hard working staff. They have ensured that the men and women in uniform receive the pay increases that they deserve and the modern equipment that they need to defend our homeland and other freedom-loving people in harm's way.

I was pleased to see in the Committee Report an initiative to accelerate and enhance the United States' intelligence, surveillance and reconnaissance capabilities through a program called the Multi-Sensor Command and Control Aircraft or MC2A, a concept strongly advocated by the Chief of Staff of the Air Force. Such an aircraft will advance the capabilities of AWACS and Joint STARS air and ground surveillance radars and will serve as the airborne integrator for a large variety of battlefield information systems. This aircraft will be the cornerstone of our military's transformation to network centric warfare.

However, due to overall budget constraints, the MC2A program was not funded. While this is a disappointment to the Air Force and to the warfighters that would readily benefit from this revolutionary capability, I strongly encourage the Air Force, along with their industry partners, to continue to find ways to bring this program forward. I look forward to working with this Committee next year to accelerate the MC2A program providing our forces dominance over the information battlefield.

Mr. LEWIS of California. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. LEWIS of California. Mr. Speaker, sections 901 and 903 of the division B of the Emergency Supplemental Act, 2002, give the Sergeant at Arms of the Senate and the Chief Administrative Officer of the House of Representatives identical authority to acquire buildings and facilities in order to respond to emergencies. The phrase ''notwithstanding any other provision of law'' was included in these sections to clarify that provisions of law which would otherwise prohibit these individuals from acquiring buildings and facilities, such as section 3736 of the Revised Statutes (41 U.S.C. 14), would not interfere with this authority. It was not the intent of the conferees or the Congress for this phrase to be construed more broadly to waive the application of other provisions of law which may apply to these kind of activities, such as the Anti-Deficiency Act.

Indeed, subsection (d) of each of these sections permits any portion of the costs incurred by the Sergeant at Arms or Chief Administrative Officer in acquiring buildings and facilities under this authority during a fiscal year to be covered by funds which are appropriated to the Architect of the Capitol during the fiscal year and transferred to the Sergeant at Arms or Chief Administrative Officer. It would be unnecessary for Congress to permit this kind of transfer if the Sergeant at Arms and Chief Administrative Officer were permitted to carry out the underlying acquisitions without using appropriated funds, since that would eliminate the need for these costs to be covered with other appropriated funds in the first place.

The SPEAKER pro tempore (Mr. CAMP). Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

Pursuant to clause 10 of rule XX, the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 408, nays 6, not voting 20, as follows:

Mr. CONYERS changed his vote from ''yea'' to ''nay.''

Mr. OBERSTAR changed his vote from ''nay'' to ''yea.''

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Mr. SPRATT. Mr. Speaker, I was late arriving this morning, and I missed rollcall vote 510, final passage of the Department of Defense Appropriations Act for Fiscal Year 2002.

Had I been present, I would have voted ''yea.''

Mrs. JONES of Ohio. Mr. Speaker, I inadvertently missed the vote on H.R. 3338 Defense Appropriations Conference Report. Had I been present I would have voted ''yea.''

GENERAL LEAVE

Mr. YOUNG of Florida. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.J. Res. 79, and that I may include tabular and extraneous material.

The SPEAKER pro tempore (Mr. CAMP). Is there objection to the request of the gentleman from Florida?

There was no objection.

FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 2002

Mr. YOUNG of Florida. Mr. Speaker, pursuant to House Resolution 323, I call up the joint resolution (H.J. Res. 79) making further continuing appropriations for the fiscal year 2002, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The text of House Joint Resolution 79 is as follows:

H.J. RES. 79

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That Public Law 107–44 is further amended by striking the date specified in section 107(c) and inserting in lieu thereof ''January 10, 2002''; and by striking the date specified in section 123 and inserting in lieu thereof ''January 1, 2002''.

The SPEAKER pro tempore. Pursuant to House Resolution 323, the gentleman from Florida (Mr. YOUNG) and the gentleman from Wisconsin (Mr. OBEY) each will control 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. YOUNG).

□ 1100

Mr. YOUNG of Florida. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this continuing resolution merely extends the date of the previous continuing resolution until the 10th of January. We do this not because we need the extra time in the Congress, but the President does need some additional time to review these last bills that we have sent to him.

I hope that we can pass this expeditiously and everybody get home for a very merry Christmas or a happy Hanukkah or whatever celebration that we all enjoy.

Mr. OBEY. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Wisconsin.

Mr. OBEY. Would the gentleman entertain a unanimous-consent request to change the January 10, 2002 date to January 10, 2003?

Mr. YOUNG of Florida. That would make our life a lot easier, but we probably could not get that kind of unanimous consent.

Mr. Speaker, I reserve the balance of my time.

Mr. OBEY. Mr. Speaker, I yield back the balance of my time.

Mr. YOUNG of Florida. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. CAMP). All time for debate has expired.

The joint resolution is considered as having been read for amendment.

Pursuant to House Resolution 323, the previous question is ordered.

The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR ADJOURNMENT SINE DIE OF BOTH HOUSES OF CONGRESS

Mr. ARMEY. Mr. Speaker, I offer a privileged concurrent resolution (H. Con. Res. 295) and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

HOUSE CONCURRENT RESOLUTION 295

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on the legislative day of Thursday, December 20, 2001, or Friday, December 21,

2001, on a motion offered pursuant to this concurrent resolution by its Majority Leader or his designee, it stand adjourned sine die, or until Members are notified to reassemble pursuant to section 2 of this concurrent resolution, whichever occurs first; and that when the Senate adjourns at the close of business on Thursday, December 20, 2001, or Friday, December 21, 2001, on a motion offered pursuant to this concurrent resolution by its Majority Leader or his designee, it stand adjourned sine die, or until Members are notified to reassemble pursuant to section 2 of this concurrent resolution, whichever occurs first.

SEC. 2. The Speaker of the House and the Majority Leader of the Senate, acting jointly after consultation with the Minority Leader of the Senate, shall notify the Members of the House and the Senate, respectively, to reassemble at such place and time as they may designate whenever, in their opinion the public interest shall warrant it.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTING DAY FOR THE CONVENING OF THE SECOND SESSION OF THE 107TH CONGRESS

Mr. ARMEY. Mr. Speaker, pursuant to House Resolution 322, I call up the joint resolution (H.J. Res. 80) appointing the day for the convening of the second session of the 107th Congress, and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The text of the joint resolution is as follows:

H.J. RES. 80

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DAY FOR CONVENING OF SECOND REGULAR SESSION OF ONE HUNDRED SEVENTH CONGRESS.

The second regular session of the One Hundred Seventh Congress shall begin at noon on Wednesday, January 23, 2002.

SEC. 2. AUTHORITY FOR CALLING SPECIAL SESSION BEFORE CONVENING OF SECOND REGULAR SESSION.

If the Speaker of the House of Representatives and the Majority Leader of the Senate, acting jointly after consultation with the Minority Leader of the House of Representatives and the Minority Leader of the Senate, determine that it is in the public interest for Congress to assemble before the convening of the second regular session of the One Hundred Seventh Congress as provided in section 1—

(1) the Speaker and Majority Leader shall notify the Members of the House and Senate, respectively, of such determination and of the place and time for Congress to so assemble; and

(2) Congress shall assemble in accordance with such notification.

The SPEAKER pro tempore. Pursuant to House Resolution 322, the gentleman from Texas (Mr. ARMEY) and the gentleman from Missouri (Mr. GEPHARDT) each will control 30 minutes.

The Chair recognizes the gentleman from Texas (Mr. ARMEY).

Mr. ARMEY. Mr. Speaker, not seeing the minority leader, I yield back the balance of my time.

The SPEAKER pro tempore. All time for debate has expired.

The joint resolution is considered as having been read for amendment.

Pursuant to House Resolution 322, the previous question is ordered.

The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

VACATING ORDERING OF YEAS AND NAYS ON H.R. 3423, H.R. 2561, AND H.R. 1432

Mr. ARMEY. Mr. Speaker, I ask unanimous consent to vacate the ordering of the yeas and nays on H.R. 3423, H.R. 2561, and H.R. 1432 to the end that the Chair put the question on each of those measures de novo.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair will now put the question on motions to suspend the rules on which further proceedings were postponed earlier today (legislative day of Wednesday, December 19, 2001).

Votes will be taken in the following order:

S. 1714, de novo;
H.R. 1432, de novo;
S. 1202, de novo;
H. Con. Res. 279, de novo;
H.R. 3507, de novo;
H.J. Res. 75, by the yeas and nays;
concurring in Senate amendments to H.R. 2336, de novo;
H.R. 3423, de novo;
H.R. 2561, de novo;
H.R. 3504, de novo;
H.R. 3487, de novo;
H. Con. Res. 292, de novo;
S. 1762, de novo;
S. 1793, de novo.

The Chair will reduce to 5 minutes the time for any electronic vote after the first such vote in this series.

PROVIDING FOR PLACEMENT OF PLAQUE HONORING DR. JAMES HARVEY EARLY IN THE WILLIAMSBURG, KENTUCKY, POST OFFICE BUILDING

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the Senate bill, S. 1714.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Virginia (Mrs. JO ANN DAVIS) that the House suspend the rules and pass the Senate bill, S. 1714.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill was passed.

A motion to reconsider was laid on the table.

MAJOR LYN MCINTOSH POST OFFICE BUILDING

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 1432.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Virginia (Mrs. JO ANN DAVIS) that the House suspend the rules and pass the bill, H.R. 1432.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

OFFICE OF GOVERNMENT ETHICS AUTHORIZATION ACT OF 2001

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the Senate bill, S. 1202.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Maryland (Mrs. MORELLA) that the House suspend the rules and pass the Senate bill, S. 1202.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill was passed.

A motion to reconsider was laid on the table.

RECOGNIZING SERVICE OF CREW MEMBERS OF USS ENTERPRISE BATTLE GROUP FOR WAR EFFORT IN AFGHANISTAN

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and agreeing to the concurrent resolution, H. Con. Res. 279, as amended.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Virginia (Mr. SCHROCK) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 279, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The title of the concurrent resolution was amended so as to read: ''Concurrent Resolution recognizing and commending the excellent service of members of the Armed Forces who are prosecuting the war to end terrorism and protecting the security of the Nation.''

A motion to reconsider was laid on the table.

COAST GUARD AUTHORIZATION ACT FOR FISCAL YEAR 2002

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 3507.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. LOBIONDO) that the House suspend the rules and pass the bill, H.R. 3507.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

REGARDING MONITORING OF WEAPONS DEVELOPMENT IN IRAQ

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the joint resolution, H. J. Res. 75, as amended.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. HYDE) that the House suspend the rules and pass the joint resolution, H.J. Res. 75, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 392, nays 12, answered ''present'' 7, not voting 23, as follows:

□ 1131

Messrs. FILNER, RUSH, JACKSON of Illinois and STRICKLAND changed their vote from ''yea'' to ''nay.''

Mr. GEORGE MILLER of California changed his vote from ''nay'' to ''present.''

Mr. PASTOR changed his vote from ''present'' to ''yea.''

So (two-thirds having voted in favor thereof) the rules were suspended and the joint resolution was passed.

The result of the vote was announced as above recorded.

The title of the joint resolution was amended so as to read: ''Joint resolution regarding inspection and monitoring to prevent the development of weapons of mass destruction in Iraq.''.

A motion to reconsider was laid on the table.

MAKING PERMANENT THE AUTHORITY TO REDACT FINANCIAL DISCLOSURE STATEMENTS OF JUDICIAL EMPLOYEES AND JUDICIAL OFFICERS

The SPEAKER pro tempore (Mr. CAMP). The unfinished business is the question of suspending the rules and concurring in the Senate amendments to the bill, H.R. 2336.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. SENSENBRENNER) that the House suspend the rules and concur in the Senate amendments to the bill, H.R. 2336.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and Senate amendments were concurred in.

A motion to reconsider was laid on the table.

ELIGIBILITY OF CERTAIN PERSONS FOR BURIAL IN ARLINGTON NATIONAL CEMETERY

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 3423, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. SMITH) that the House suspend the rules and pass the bill, H.R. 3423, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: ''A bill to amend title 38, United States Code, to enact into law eligibility of certain Reservists and their dependents for burial in Arlington National Cemetery, and for other purposes.''.

A motion to reconsider was laid on the table.

LIVING AMERICAN HERO APPRECIATION ACT

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 2561, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. SMITH) that the House suspend the rules and pass the bill, H.R. 2561, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: ''A bill to amend title 38, United States Code, to increase the rate of special pension for recipients of the Medal of Honor and to make that special pension effective from the date of the act for which the recipient is awarded the Medal of Honor and to amend title 18, United States Code, to increase the criminal penalties associated with misuse or fraud relating to the Medal of Honor.''.

A motion to reconsider was laid on the table.

AMENDING PUBLIC HEALTH SERVICE ACT WITH RESPECT TO ORGAN PROCUREMENT ORGANIZATIONS

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 3504.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. BILIRAKIS) that the House suspend the rules and pass the bill, H.R. 3504.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

NURSE REINVESTMENT ACT

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 3487.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. BILIRAKIS) that the House suspend the rules and pass the bill, H.R. 3487.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

SUPPORTING THE GOALS OF THE YEAR OF THE ROSE

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and agreeing to the concurrent resolution, H. Con. Res. 292.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Virginia (Mrs. JO ANN DAVIS) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 292.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

ESTABLISHING FIXED INTEREST RATES FOR STUDENT AND PARENT BORROWERS

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the Senate bill, S. 1762.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. BOEHNER) that the House suspend the rules and pass the Senate bill, S. 1762.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair two-thirds of those present have voted in the affirmative.

RECORDED VOTE

Mr. GEORGE MILLER of California. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 257, noes 148, not voting 29, as follows:

□ 1153

So (two-thirds not having voted in favor thereof) the motion was rejected.

The result of the vote was announced as above recorded.

Stated against:

Ms. SLAUGHTER. Mr. Speaker, I was unable to be present for rollcall vote No. 512. Had I been present, I would have voted "no."

HIGHER EDUCATION RELIEF OPPORTUNITIES FOR STUDENTS ACT OF 2001

The SPEAKER pro tempore (Mr. SIMPSON). The unfinished business is the question of suspending the rules and passing the Senate bill, S. 1793.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. MCKEON) that the House suspend the rules and pass the Senate bill, S. 1793.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill was passed.

A motion to reconsider was laid on the table.

FIXED INTEREST RATES FOR STUDENT AND PARENT BORROWERS

(Mr. ARMEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ARMEY. Mr. Speaker, I would just like to point out that increasing student loans and making them less expensive and costly has been a big part of our objectives in this majority, and we are very disappointed in the loss of this bill that just failed, S. 1762. I will mention that we will be having that bill available under a rule as soon as we can reconvene in the next session.

APPOINTMENT OF COMMITTEE OF TWO MEMBERS TO INFORM THE PRESIDENT THAT THE TWO HOUSES HAVE COMPLETED THEIR BUSINESS OF THE SESSION

Mr. ARMEY. Mr. Speaker, I offer a privileged resolution (H. Res. 327) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 327

Resolved, That a committee of two Members be appointed by the House to join a similar committee appointed by the Senate, to wait upon the President of the United States and inform him that the two Houses have completed their business of the session and are ready to adjourn, unless the President has some other communication to make to them.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Pursuant to House Resolution 327, the Chair appoints the following Members of the House to the committee to notify the President: The gentleman from Texas (Mr. ARMEY) and the gentleman from Missouri (Mr. GEPHARDT).

AUTHORIZING THE SPEAKER, MAJORITY LEADER, AND MINORITY LEADER TO ACCEPT RESIGNATIONS AND MAKE APPOINTMENTS NOTWITHSTANDING SINE DIE ADJOURNMENT

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that until the day the House convenes for the second session of the 107th Congress, and notwithstanding any adjournment of the House, the Speaker, the majority leader, and the minority leader may accept resignations and make appointments authorized by law or by the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

AUTHORIZING SPEAKER TO APPOINT MEMBER TO PERMANENT SELECT COMMITTEE ON INTELLIGENCE NOTWITHSTANDING SINE DIE ADJOURNMENT

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that until the day the House convenes for the second session of the 107th Congress, the Speaker, pursuant to clause 11 of rule X and clause 11 of rule I, and notwithstanding the requirement of clause 11(a)(1) of rule X, may appoint a Member to the Permanent Select Committee on Intelligence to fill the existing vacancy thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

GRANTING MEMBERS OF THE HOUSE PRIVILEGE TO EXTEND AND REVISE REMARKS IN CONGRESSIONAL RECORD UNTIL LAST EDITION IS PUBLISHED

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that Members may have until publication of the last edition of the CONGRESSIONAL RECORD authorized for the first session by the Joint Committee on Printing to revise and extend their remarks and to include brief, related extraneous material on any matter occurring before the adjournment of the first session sine die.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

EXPRESSING THE WILL OF THE HOUSE THAT THE NATION HAVE A SAFE AND HAPPY HOLIDAY PERIOD

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that it be the will of this House that all this Nation have a very merry holiday period that is safe and happy for all their families.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

LAYING ON THE TABLE H. RES. 290, H. RES. 291, H. RES. 317, H. RES. 318, AND H. RES. 321

Mr. DREIER. Mr. Speaker, I ask unanimous consent that the following resolutions be laid on the table: H. Res. 290, H. Res. 291, H. Res. 317, H. Res. 318, and H. Res. 321.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

APPOINTMENT OF HON. TOM DAVIS OR HON. WAYNE T. GILCHREST TO ACT AS SPEAKER PRO TEMPORE TO SIGN ENROLLED BILLS AND JOINT RESOLUTIONS UNTIL HOUSE CONVENES FOR SECOND SESSION OF 107TH CONGRESS

The Speaker pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
December 20, 2001.

I hereby appoint the Honorable TOM DAVIS or, if not available to perform this duty, the Honorable WAYNE T. GILCHREST to act as Speaker pro tempore to sign enrolled bills and joint resolutions until the day the House convenes for the second session of the 107th Congress.

J. DENNIS HASTERT,
Speaker of the House of Representatives.

The SPEAKER pro tempore. Without objection, the appointment is approved.

There was no objection.

MARSHALL UNIVERSITY GMAC BOWL CHAMPIONS

(Mr. RAHALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RAHALL. Mr. Speaker, last night's GMAC Bowl in Mobile, Alabama could have carried a warning from the Surgeon General: Not recommended for those with heart conditions. In the end, with all due respect to the gentleman from North Carolina (Mr. JONES), the best team won.

In only its fifth year, the Marshall University Thundering Herd stampeded over East Carolina. Although the Herd was down 38–8 at half-time, the enthusiasm of Marshall's fans did not waiver.

But Marshall rallied in the third quarter and charged on in the fourth. When time expired, the game was tied at 51. The noble opponents battled through two overtimes before Byron Leftwich connected on a pass to Josh Davis, ending the contest and securing the laurels of victory for our Thundering Herd. As the headline in the Huntington Herald Dispatch reads this morning, ''Miracle in Mobile.''

I congratulate Marshall's tenacious players and coaches, and applaud its faithful fans. Few football programs have suffered as severe a loss, struggled so valiantly, and risen to such heights, all in the course of 30 years.

During half time, Coach Bobby Pruett, who hails from my hometown of Beckley, West Virginia, talked with his team of belief and faith. It is a lesson we should all remember, not only in times of need, but in our everyday lives.

□ 1200

RURAL EQUITY PAYMENT INDEX REFORM ACT

(Mr. BEREUTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEREUTER. Mr. Speaker, I advise Members that today I am introducing the Rural Equity Payment Index Reform Act, a bill that will address the difference in reimbursement levels between urban and rural physicians and other health professionals. The formulas presently used by the Medicare program to reimburse these health professionals for beneficiaries' medical care do not accurately measure the cost of providing services; and, consequently, Medicare currently pays rural providers less than it should for equal work.

According to the Centers for Medicare and Medicaid Services, ''physician work'' is the amount of time, skill and intensity a physician puts into patients' visits. Physicians and other health care providers in rural areas put in as much or even more time, skill and intensity into a patient visit as do physicians in urban areas. Yet, rural physicians are paid less for their work. This is not only unfair, it is discriminatory.

Mr. Speaker, I ask my colleagues to consider cosponsoring this legislation. We do not take it away from the urban health care providers. We do adjust upward the formula for rural areas.

TRIBUTE TO MELVIN SMITH

(Mr. BARTLETT of Maryland asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BARTLETT of Maryland. Mr. Speaker, it is my pleasure to pay tribute to one of my constituents, Melvin Smith of Ellicott City, Maryland, who is retiring after more than 33 years of distinguished service with the United Parcel Service, the UPS. Mel was born on September 30, 1946, in Los Angeles, California. He attended Fremont High School and Los Angeles City College, and served in the Vietnam War.

He began his 33-year UPS career in 1968 as a package car driver in southern California. In 1976, Mel began his management career when he was promoted to full-time supervisor in the feeder transportation department. In 1981, Mel was promoted to hub division manager, and in 1993 he was promoted to district manager. Before Mr. Smith's retirement, he served as the chief operating officer of the UPS Atlanta district serving Maryland, Delaware, and parts of West Virginia.

Mel has always been active in numerous charities. In Maryland, Mr. Smith has served in a leadership capacity for the United Way, the Baltimore Urban League, and the Baltimore Chapter of the NAACP.

Mr. Speaker, I congratulate Mel Smith, his wife Debra Ann, and his entire family. Mel, enjoy your retirement.

(Ms. PELOSI asked and was given permission to speak out of order for 5 minutes and to revise and extend her remarks.)

TRIBUTE TO THE HONORABLE DAVID E. BONIOR, MEMBER OF CONGRESS

Ms. PELOSI. Mr. Speaker, today, and I do not want to use the word ''last,'' but just in terms of chronology, today is the last day that our great minority whip, Democratic whip of the House, the gentleman from Michigan (Mr. BONIOR) will serve in that capacity while the House is in session.

We will benefit for years to come from his service, 10 years, an historic 10 years as Democratic whip of the House, 4 years as chief deputy whip before that. That incredible experience is marked not only by longevity, but by the quality of his service. Leaders for all time to come will benefit from the example that he has set as a leader. Working families into perpetuity in our country have benefited and will continue to benefit from his championing of their issues. They have no greater champion. Working families in America have no greater champion than DAVID BONIOR. He has been a model leader. He has been a tireless worker for workers. We all owe him a tremendous debt of gratitude. I urge my colleagues to join me in paying tribute to the gentleman from Michigan (Mr. BONIOR).

Mr. GEORGE MILLER of California. Mr. Speaker, will the gentlewoman yield?

Ms. PELOSI. I yield to the gentleman from California.

Mr. GEORGE MILLER of California. Mr. Speaker, I join in this tribute to a career of remarkable service as a Member of this Congress, as our chief deputy whip, and as our whip for the last 10 years to my friend, the gentleman from Michigan (Mr. BONIOR), who will be stepping down from that position of whip and will be going on to run a successful race for Michigan. I have supported him in everything he has ever run for, and I plan to continue to support him. I have never been more proud of a public servant.

I have to say to the Members of this House and to the public that may be listening, this is an individual that all of us can be proud that his district sent him to Washington because he never, never once veered from the track of taking care of the needs of his district. And as the gentlewoman from California (Ms. PELOSI) has pointed out, on behalf of working families, he made it part of our agenda, he made it part of our lexicon, he made it part of our principles and part of our morality. He has done it in almost every meeting that I have been in. He has done it on our motions to recommit.

We are not always given the best forum here to pursue these issues, but he has made sure that every opportunity we had, we did do it. Why? Because of his strong convictions about a notion of economic and social justice in this country, that those individuals who get up and go to work every day and work hard, that they ought to have the rewards to be able to support their families. If they fall on economic hard times, there ought to be an income supplement program so they do not have to lose their car or house or take their children out of school.

Mr. Speaker, many people we are seeing in this recession have worked 15, 20, 30 years, and now they find themselves unemployed. He has been a champion.

I had the pleasure of traveling with DAVID to Central America in pursuit of social and economic justice in Central America at a time when the violence was unbelievable. Many people forget what was taking place in Central America, the murder of American citizens, of religious individuals, of the archbishop, of so many people who were simply trying to get along, trying to live a life in Central America. He spent an incredible amount of his energy trying to bring the peace process around. We were eventually successful in Nicaragua, in El Salvador, and Guatemala trying to stop the violence. The

gentlewoman has been deeply involved in those issues with us.

Mr. Speaker, we should all aspire to be such a champion of economic and social justice.

DAVID, I am very, very proud to have served in this Congress with you. I am very proud to be your friend, and I know that you are going to do great things for the people of Michigan and for the people of this Nation.

Mr. EDWARDS. Mr. Speaker, will the gentleman yield?

Ms PELOSI. I yield to the gentleman from Texas.

Mr. EDWARDS. Mr. Speaker, this is not a eulogy. The gentleman from Michigan (Mr. BONIOR) is alive and well, I am happy to say. But I must take this opportunity as we end this session of Congress and his career as the Democratic whip, recognizing he will continue to serve his district and our country in Congress next year, I want to say that knowing the gentleman from Michigan (Mr. BONIOR) personally and professionally has been one of the tremendous rewards of all of my years in public service, whether that be in Texas or here in the Nation's Capital.

Many Americans may not know the name DAVID BONIOR, but millions of decent working families across America are living a better life today, making higher wages. Even those living at the bottom of the economic rung on minimum wage, have a higher minimum wage today than they would have had had it not been for one person's passionate commitment to working families and their opportunity to have a decent life for their children, and that is the gentleman from Michigan (Mr. BONIOR).

DAVID BONIOR, I am convinced, will be the next Governor of Michigan. While I do not know all of the voters of that great State, I have to believe that they recognize integrity and decency when they see it.

What I have seen for 5 years working under the gentleman from Michigan (Mr. BONIOR) as the chief deputy whip is the epitome of decency and integrity. For anyone who might be cynical about our democratic process in America, I wish they could have seen up close and firsthand what I have seen in the person I call my friend, DAVID BONIOR.

His accomplishments are too numerous to mention in this brief time today, but they are well earned. They are significant. But I would conclude my remarks with two thoughts. It is not the tremendous accomplishments of making the difference for working families of America, and there is a list of specific achievements that I will ultimately respect the gentleman from Michigan (Mr. BONIOR) for, and although they are tremendously important, it is the kind of person that he is, the kind of human being he is, so honest, treating everyone as we would want others to treat us.

I would just conclude with this thought. Winston Churchill, during some of the darkest hours of World War II, spoke to the British people and the world when he said, ''We make a living by what we get, but we make a life by what we give.'' By that high standard, DAVID BONIOR has lived and will continue to live an extraordinarily successful life. His passion, his decency and his integrity will be a model for future public servants for generations to come, and I am honored to be his friend and his colleague.

Ms. PELOSI. Mr. Speaker, in honoring the service of DAVID BONIOR, his vision, his knowledge, his effectiveness, his energy, his integrity, his experience, indeed the people of Michigan are very blessed to have him as their future Governor.

I also want to acknowledge his very experienced staff who have served this Congress so well, the staff of DAVID BONIOR. I know that others will speak today about DAVID and his staff, but I wanted to be sure to acknowledge their considerable contributions to this body as well.

(Ms. DELAURO asked and was given permission to speak out of order for 5 minutes and to revise and extend her remarks.)

TRIBUTE TO HONORABLE DAVID E. BONIOR, MEMBER OF CONGRESS

Ms. DELAURO. Mr. Speaker, I come this afternoon to say thank you to the gentleman from Michigan (Mr. BONIOR). Ten years ago I first came to this institution, and at this very place I was given the honor of seconding the nomination of DAVID BONIOR for whip. I have served with him for 10 years. I have known him for 14 years. I learned from him as a mentor. I learned the skills of serving as a whip with him. I learned the battle for economic and social justice in Central America with him.

He comes from the earth, he comes from a family of working-class Americans, the way so many of us come to this institution. And he came here and he accomplished good public policy for the great people of this Nation. And in all that time, and in all that time, he never faltered. He never was afraid to stand up. He has never been afraid to championing the cause of the people of this country. And because of that tenacity and that brutal effectiveness, he has changed the lives of people in this country.

No one has fought harder for worker standards, for minimum wage, for those things that help people to live their lives because he understands their lives. He is a peaceful veteran, and, like myself, a Catholic who cares about life in its broader sense. His sense of integrity, his sense of honesty and his soul will be missed in this institution.

He will go on to do wonderful things, and we are all here for you, DAVID. We will stand with you and do what you want and try to help you be the next Governor of Michigan. To you and to Judy and to your family, we wish you the best.

There have been folks who have tried to demonize DAVID BONIOR, but his genuineness comes through, and they cannot do it. His gentle strength will prevail. It prevailed in what he did before he came here, it prevailed here, and it will prevail as he serves as Governor of the State of Michigan. God bless DAVID BONIOR, and I thank the gentleman for all that he has given to all of us.

Mr. Speaker, I yield to the gentlewoman from California (Ms. WOOLSEY).

□ 1215

Ms. WOOLSEY. DAVID, what am I going to do without you? Good grief. I have been here 8 years. After we lost the House in 1994, dithering, all of us, frustrated, all of us, I got a call from one of my sons. All of my kids tell me what I should be doing here because they are smart and they care. My son said, ''Mother, I hope you're listening to DAVE BONIOR.'' I said, ''Well, yeah, what are you saying?'' And he said, ''He's the only one that's saying anything.''

So I started listening more closely, because I knew the background and what you brought to us all along, but I listened to your message, and it became very important to me to get on your team, to be part of it. Thank you for putting me on the whip organization so I can do what I do best, which is rally and push and nudge and count. It has been a pleasure working for you.

Thank you very much. I have learned more from you than you will ever know.

My nice constituents worry about me here because they think it is kind of a mean place and a lot of them will say, ''How can you stand to work with all those people?'' And I say, ''Uh-uh, I get to work with DAVE BONIOR.'' They go, oh, yeah, there are good people there too; among others, of course.

Thank you again. I miss you already. Our loss is Michigan's gain for sure.

Ms. DELAURO. I yield to the gentleman from California (Mr. FARR).

Mr. FARR of California. Mr. Speaker, I rise with deep regret that DAVID BONIOR is leaving this institution. I arrived here about 9 years ago. It was in a special election. But I think of all the people I have met, DAVID BONIOR was the kindest person I met. What I have learned over the years of working here is, this is a tough institution; and to survive and to be into leadership, you have got to have tough skin, but you have also got to have a kind and soft heart.

The wonderful thing about DAVID BONIOR is how much he gives of himself to everybody else's problem. He will come to your district. And when he sees a wrong, he is out there trying to right it, whether it is in the fields of farm workers in California, whether it is in the stockyards, wherever it may be in the United States, where men and women are suffering or are not having

a fair wage, a fair treatment in their workplace, DAVID BONIOR is the first to be there to understand the problem and the first on the floor to talk about righting that wrong.

The people of Michigan are so fortunate to have this person in elective office. I hope they have the good wisdom to select him as governor because he is going to be a great leader in this country as a governor, as he was a Member of the House of Representatives. He rose to a leadership position. Who knows, if he were staying here, he could have been Speaker of the House, perhaps Vice President of the country, and maybe those days will still come.

But this is truly one of the great Members serving in a great institution at a great time in our history. This institution is going to suffer with his leaving, but the people of Michigan I hope will have the great wisdom to keep him in the public limelight and keep him in public office by electing him as their governor.

(By unanimous consent, Ms. KAPTUR was allowed to speak out of order for 5 minutes.)

TRIBUTE TO THE HONORABLE DAVID E. BONIOR, MEMBER OF CONGRESS

Ms. KAPTUR. Mr. Speaker, I rise to say what a joy it has been in my life for 19 years to be able to work with the great gentleman from the State of Michigan, DAVE BONIOR. There must be something in the water of Lake Michigan and Lake Erie to produce the Phil Harts of this country and the Dave Boniors. I want to thank the Wolverine State for sending this incredibly decent human being here to the Congress of the United States.

There are many things I like about DAVE BONIOR. The first thing I like is his wife. I think Judy is just so incredible and what a great partnership they do have. But I like the way that he treats her. I like the way he treats the Members. I watch the way he treats people, always with great love and with affection and with such great passion for the work that he does.

We have had so many fights here that deal with economic justice domestically and internationally. DAVE BONIOR has always been at the head of that line. He has always been leading us. I can remember during the great fight on the rules that would govern trade in the Americas, as he stood here and he talked about what would happen to working people on this continent in the factories and on the farms, I was sitting out there with tears in my eyes; and I thought, how could he have the strength and the intestinal fortitude, knowing what is going to happen, to stand there and to be such a strong advocate and to maintain his passion and his composure. That was a point in my career where I could not have done that.

I hope that from him I have learned how to do that better, and I thank him for what he is, because what he is has kept other Members here and running for office because of his beliefs and his unwillingness to change who he is and who he represents and how he loves people, that it is still possible to be here and to carry those values so close to your heart. In fact, they are his heart.

I just want to say from the Buckeye State, always a competitor to those to the north, that we deeply, deeply appreciate your service to the people of our country and the world. We appreciate your service as a spokesman for those who have no voice or who have less voice. You have never wavered, you have always been a gentleman, you have always been a leader, you have always been a scholar.

It has been my deep privilege to serve with you, Congressman DAVE BONIOR of Michigan. May you be Michigan's next governor. I only wish I could vote for you. God bless you.

Mr. WU. Mr. Speaker, will the gentlewoman yield?

Ms. KAPTUR. I yield to the gentleman from Oregon.

Mr. WU. I thank the gentlewoman for yielding.

Mr. Speaker, the wonderful thing about being a junior Member is that all the large issues are thoroughly addressed by others. I just want to focus briefly for one moment on how DAVID BONIOR has treated fellow Members and me.

I have seen him defend others with whom he deeply disagrees. I have seen his gentle guidance on sensitive votes. And I also wanted to share just briefly how well he treated me as a very new Member of Congress. With a name that starts with W, I was definitely last in my class. Yet he spent a chunk of time with me early on when it was just of benefit to me and clearly of no benefit to him.

But we spent some time together. I learned many, many things, but I want to mention three specific things that he said to me: There is a small lunchroom where you should share food with other Members and get to know them. Be sure to get some exercise. And there is a spiritual piece to being here and you should pay attention to that, also.

It took me 6 months to eat lunch with any regularity. After being here for 3 years, I think I am finally getting to the exercise piece. And I am working hard toward the spiritual piece. I tell this story because I think that it is an allegory for DAVE as he goes on to the governor's race and far beyond, because as we are eating lunch or getting exercise or becoming more spiritual, for DAVE BONIOR, for this country as a whole, it is always the case that the best is yet to be, the best of life for which the rest was meant.

Thank you, DAVE, for treating everyone, large, small and in the middle with grace and with dignity. Thank you very, very much.

(By unanimous consent, Ms. WOOLSEY was allowed to speak out of order for 5 minutes.)

TRIBUTE TO THE HONORABLE DAVID E. BONIOR, MEMBER OF CONGRESS

Ms. WOOLSEY. Mr. Speaker, I yield to the gentleman from Nebraska.

Mr. BEREUTER. Mr. Speaker, we have people here who make a very major contribution. There are partisan differences in this body, too many to my judgment, but when a person here is retiring from an important post and still going to make some contributions here, no doubt, I think he ought to be recognized for the extraordinary public service that he has provided here.

I admire DAVE BONIOR for the kind of person he is as well as for his effectiveness. I was thinking just yesterday, if I might say to the gentleman from Michigan, about you and the gentleman from Illinois, Mr. EVANS, because to your credit some years ago, you helped Mr. Cavanaugh and I, two Nebraskans, deauthorize the O'Neill project, which made it possible for us to subsequently declare the Niobrara River as a scenic river. It is the most appreciated ecological feature in the State of Nebraska by its citizens today.

So we actually owe you a debt of gratitude in Nebraska. You stepped up and helped John Cavanaugh and this Member at that time, along with Mr. EVANS. I want to commend you for your public service, but also thank you, as a Nebraskan, for what you did to preserve part of our natural heritage.

I thank the gentlewoman for yielding.

Ms. WOOLSEY. Mr. Speaker, I yield to the gentleman from Vermont.

Mr. SANDERS. I thank the gentlewoman for yielding. I was watching C–Span and I heard all these fine words about DAVID BONIOR. I thought, ''My God, something has happened. He's dead. What a shame.''

I came down here, he looks very good and the only thing that is happening to him is, he is going to be governor of the great State of Michigan and certainly while it is our loss, it is Michigan's gain.

In this institution, given all of the political and economic and financial pressures that are on all the Members, it is very difficult to hold out a moral compass, to be very sure that the values that you are fighting for are what you believe. It is doubly difficult to do that year after year. The first year you could do it and the second year, but after many years, it becomes harder and harder to do.

I think on virtually every issue affecting the lives of working people, whether it is helping people join unions and fight for their dignity there, whether it is developing a sane trade policy which protects the needs of American workers or raising the minimum wage or affordable housing or all the things that millions and millions of working families need, year after year, right up here, at this podium, DAVE BONIOR has been leading the fight. We are very proud of him, not just because

he is a good politician; because of the strong sense of morality and values that motivate him.

DAVID, you have been an inspiration to all of us. My wife says that you are her second favorite Congressman. I am not sure who the first one is, to tell you the truth, but we are going to miss you very much and the people of Michigan are very lucky to have you.

Ms. WOOLSEY. Mr. Speaker, I yield to the gentleman from Maine.

Mr. ALLEN. Mr. Speaker, like the gentleman from Vermont, I was in my office watching C-Span. I looked at all these bright faces down here in the front rows, DAVID BONIOR's staff and DAVID sitting down here, as well, and I could see him so I knew he was not gone; but I did want to come over and say a few things about DAVE BONIOR.

First of all, DAVID, I just want to thank you for all you have done for me. I cannot tell you how much I appreciate having been part of the whip organization and having the chance to work with Members here on the floor to make sure that the right thing gets done on particular pieces of legislation.

For those who do not know all the details, the whip organization is really a way of bringing information to other Members so that they are voting with good information and not necessarily bad information, that they have complete information. DAVID has done this job extraordinarily well for many years.

But beyond that, I have to say, this is a city, not alone in the country, but this is a city where people's faces can turn and their votes can turn to those who have money and to those who have power. But not with DAVID BONIOR. Because DAVID BONIOR in the House of Representatives has been what I think the Founding Fathers expected of a Representative, that he would represent all of the people all of the time and not be diverted by special interests. I cannot think of anyone in this Congress who has consistently day after day after day, in a long legislative career, kept the people in his district right in the forefront of his mind. He has not forgotten them ever in terms of what he does here and what we do here.

□ 1230

So I think it is a remarkable career and he is a remarkable human being.

As I have gotten to know DAVID over the last 5 years here, several things have struck me. One is that he treats everyone the same, which is, as I said, not common in this place, and that he is receptive to information and to people from all walks of life.

But the other thing I have noticed is you know where DAVID BONIOR comes from. He comes from Michigan, and in many respects my image of Michigan is shaped by you, DAVID, because I know how important working men and women who have had to join unions in order to get ahead, to have decent wages and decent benefits, have been to your State. Yet I know your State has such incredible diversity, with aspects of the new economy as well, with the service economy, as well as the manufacturing economy, and you seem to have somehow captured all of those threads.

I know from your remarks before the Democratic Caucus yesterday that you also have appreciation for the outdoors. I come from Maine, and this is real important to me. But I know how much you have walked around the State, how much time you spend on your own, getting away from this hurly-burly, in order to renew yourself so that you can do the best thing, day-to-day, for the people who sent you here to the House and who I believe will send you to the Governor's mansion in Michigan.

I cannot help but think that, to me, you have always been someone who has Michigan in his bones, Michigan in his blood, and Michigan in his dreams, and I know that you will be a fabulous governor for the people of Michigan. Thank you very much.

(Mr. HOLT asked and was given permission to speak out of order for 5 minutes.)

TRIBUTE TO THE HONORABLE DAVID E. BONIOR, MEMBER OF CONGRESS

Mr. HOLT. Mr. Speaker, this is not the time to recount the full Congressional career of DAVE BONIOR, because he continues to build on that record, but I would like to speak for a moment about the way that he does the job of whip, the job he is leaving within the House now.

We all know that there is a strong competitive streak in DAVE BONIOR. We have seen it on the baseball field, we have seen it in close votes, but we also see that in everything he does he exudes decency and civility.

Civility has been talked about so much in this House in recent years. When I say DAVE BONIOR exudes civility, I mean that it is really contagious. And when I look at his staff, some of his staff here with him today, I know that they would agree with me that they do their jobs better and probably would agree that they are better people because of their association with DAVE BONIOR and the way he does his job, which helps them do their job, and helps all of us here in Congress do our job.

It is a remarkable ability that DAVE BONIOR has to improve the performance of everyone round them so that competition does not mean meanness, and it does not lead to a lack of civility.

The way you do the job as whip, DAVE BONIOR, is a model for every public servant. We will talk about all you have done in your Congressional will career later after we are congratulating you for your election as Governor. But, for now, I want to thank you for what you have done for each of us individually here in the House of Representatives.

I yield to the gentlewoman from Indiana.

Ms. CARSON of Indiana. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I was sitting in my office planning to do some work before I drive back to Indianapolis, and saw this very special man was being praised today, a man who is worthy of praise, a hero who has earned his medal of honor, if you will.

DAVID BONIOR knew JULIA CARSON before JULIA CARSON knew DAVID BONIOR. When I first declared my candidacy for this august body, he was one of the first people who obviously believed that I was going to get elected and came out to Indiana to do what he could with his resources and his brain power.

Even beyond that, DAVID BONIOR has struck me as the perfect illustration of family values. A lot of us get up to the microphone, and we tap dance about family values and we waive the flag and my country tis of Thee and God bless America. But DAVID BONIOR has never missed the mark in terms of what is great and good and right for the American family and the United States of America. He is a gentleman's gentleman, he is a politician's politician, he is a family man par excellence.

I do not want to look at him because I am going to cry, but I love DAVID BONIOR and I want to tell you that.

Mr. HOLT. Mr. Speaker, I yield to the gentleman from Massachusetts (Mr. NEAL).

Mr. NEAL of Massachusetts. Mr. Speaker, I, like JULIA CARSON, was sitting in my office and I heard the tribute, and I wanted to come over for just a couple of seconds and highlight I think DAVE's contributions to this institution, but, most importantly, to the American family.

DAVID BONIOR's sense of America is community, and what he means by community is a place where nobody is ever to be abandoned and nobody is ever to be left behind.

One of the best speeches I ever heard on this House floor came the night that DAVID led us in opposition to the NAFTA treaty, when he raised the question for all of us here that night of what the Edmond Pettis Bridge meant to a generation of Americans, and what it meant to cross that bridge, what it meant to have a sense of justice and fairness and equity in this life, a catholic sense of justice; fairness, equity, the notion that you just cannot walk by the poor, that you just cannot abandoned them and turn your back, that government is there in the end to help them.

Another thing I am going to say about DAVID, in an institution that really troubles me, because many of the people that have gotten here on both sides of the aisle, they have run this institution into the ground day in and day out with their diatribes on what has always been wrong, and then they abandon in the next breath term limits, they abandoned the line item

veto, they abandon things like disturbing the Constitution based upon every whim that moves along.

Not DAVID BONIOR. DAVID BONIOR believed in something, and for too many people that have come to this institution for the last few years, their beliefs are bland. Their beliefs are based upon the emotion of the moment, there is no long-held view of anything.

It has been an honor for me to serve with DAVID, and, most importantly, I supported you when you ran for these jobs and was glad to do it. The manner in which you carried yourself day in and day out, you could be as fierce a partisan as there was, but you loved this institution, and, most importantly, you loved the community that we call the American family.

Thanks for all the goods things you did, DAVE.

(Mr. FRANK asked and was given permission to speak out of order for 5 minutes.)

TRIBUTE TO THE HONORABLE DAVID E. BONIOR, MEMBER OF CONGRESS

Mr. FRANK. Mr. Speaker, I will begin by yielding to the gentleman from Guam (Mr. UNDERWOOD).

Mr. UNDERWOOD. Mr. Speaker, I thank the gentleman for yielding me to speak on this.

Mr. FRANK. I will yield to the gentleman to speak anywhere he wishes, other than Guam.

Mr. UNDERWOOD. I wanted to take the time to pay tribute to DAVID BONIOR. In a way this is great, because, you know, you get to see all your friends. You do not have to wait until you pass away. This is a terrific opportunity to pay honor to our friend here.

But I have an office with a very not-so-eloquent title of Non-voting Delegate to the U.S. House of Representatives. It is always a curiosity to me, because he is the whip. He is supposed to count votes, and he knows I do not matter in that count. But it is really a mark of his approach to politics and his commitment to every member of the caucus that he has taken the time and the energy to support me in the various projects that I have had.

When I first decided to run for this office, he received me very well and he took the time to try to understand some of the issues and some of the unique circumstances that we deal with. For a long time, and it is a mark of the high regard and the approach that DAVID has taken over the years, for a long time I thought I was the only one that had a special relationship with him, but, as it turns out, he has got hundreds of these special relationships, and that is really a mark and a testimony to the terrific job that you have done.

Mr. Speaker, despite all the trials and tribulations here, when people ask me who are some of the Members that you really admire, certainly he comes to mind.

Mr. FRANK. Mr. Speaker, reclaiming my time, I just want to make two points.

First of all, recently we did have a real eulogy for a Member who passed away, our late colleague Joe Moakley, and the outpouring of affection and respect for Joe Moakley was very impressive. I am in a position to tell you, as someone who was a neighbor to Joe Moakley's district, there was no one in this business that he admired more than DAVID BONIOR.

One of the things Joe Moakley made his goal was when DAVE BONIOR ran for whip was to get Massachusetts Members to vote for him. So let me just past on that if Joe Moakley was still with us, you would be hearing from him his enormous respect and admiration for DAVID BONIOR.

I want to thank him for one other thing. I am a great believer in free speech. I generally vote against it when we start telling adults what they can read and what pictures they can show of each other. But if I was going to amend the Constitution, I would make it illegal to use the words ''pragmatism'' and ''idealism'' as if they were in opposition to each other.

The notion that the world should be divided between people who have a strong set of values and people who are effective is really a disaster morally. In fact, the more you are committed to a set of ideals, the more you are morally obligated to be effective in implementing those ideals. Otherwise, they are just something you put on in the morning to make yourself feel good. They do not do anybody else any good.

I know of nobody else in politics who better exemplifies that synthesis. I know of nobody else who is equally a passionate idealist in politics because he has a vision of the world that he wants to have implemented, which would be a fairer and kinder and better world for people who are in need in various ways, and who, at the same time, understands that that gives him the obligation to be as effective as possible; fair but tough; understanding the rules and abiding by the rules; but putting everything every ounce of energy into it. And for his exemplifying that merger of pragmatism and idealism, for understanding that a tough-minded approach to political reality in fact is a necessary compliment to a commitment to a set of values you want to implement, I want to join in honoring DAVID BONIOR and thank him for what he has shown us.

(Mr. GREEN of Texas asked and was given permission to speak out of order for 5 minutes.)

TRIBUTE TO THE HONORABLE DAVID E. BONIOR, MEMBER OF CONGRESS

Mr. GREEN of Texas. Mr. Speaker, like my colleagues, I was actually over in my office and did not know that this was happening today. But I have had the honor to serve five terms in this House and served with DAVID for many years as part of the whip operation, and for somebody who comes from Texas and sounds like I do, to get to know DAVID and to appreciate him and to realize he is a very low-keyed individual, but, as someone said earlier, very competitive, because I also have had the opportunity to play basketball with him, and not just try and pass or defeat legislation. So he is competitive, but he is very low-keyed.

Typically if I have something to say, I am not only out there and in your face, but DAVID is very quiet about it. So I appreciate that, and I think a lot of us could emulate what he does.

But working with him for these 9 years, I appreciate not only his inward strength, but also his dedication to the issues. It helps having, even though, again, a very urban district in Houston, and DAVID being from Michigan, having a lot of blue collar workers, some of the same demands are in Michigan on the economy as we have in Houston, Texas, a very industrialized district.

So I just appreciate, DAVE, your work here in the House. Like say, I have only seen you the last five terms, but the American people and the people of Michigan owe you a debt of gratitude for your work here in the House.

Obviously, if it does any good for somebody who sounds like me to come up and knock doors in Michigan, I will be up there.

So, DAVID, obviously we will be serving with you for the next year. But not only as our whip, but also just as a person, we will miss you, and I know I will too. Thank you, DAVE.

□ 1245

(Mr. PAYNE of New Jersey asked and was given permission to speak out of order for 5 minutes.)

TRIBUTE TO THE HONORABLE DAVID E. BONIOR, MEMBER OF CONGRESS

Mr. PAYNE. Mr. Speaker, I guess I did not think any Members looked at their screens in the office, at least after we adjourn, but I too was looking at the screen and I saw the gentleman from Massachusetts (Mr. NEAL) come and say that he was looking at his screen and saw that there was a program, so to speak, being held. I fussed at my scheduler, who was out to lunch, because I did not know about this, but I am so glad that I was listening.

I too want to simply add to what has already been said about a person that I have just respected for as long as I have been here in the House. I think that first connection, as I am from the 10th Congressional District too, of New Jersey, but I knew there had to be something good about the gentleman from Michigan (Mr. BONIOR). We had the same number. And then looking at his high school achievements, I tried to play a little ball and I see where DAVE

was a quarterback on the championship team at the Catholic school he attended and earned a scholarship to college and just worked his way through the military.

But the issue that DAVE has really dealt with, I recall when I was in county government many years ago, we talked about a ''bottle bill,'' and it was because DAVE sort of pushed that environmental concern ahead many years ago when he was in government in Michigan's State legislature. We talked about environmental protection for PCBs, in that DAVE was always worrying about people who might be afflicted by these diseases that many times went unnoticed because the big guys sort of kept things quiet, even though they knew they were injurious to the health of people, and it was DAVE who talked about these birth defects that were being created.

The statement of ''let us separate the warrior from the war,'' taking the Vietnam era veterans and separating them from an unpopular war, and as people turned their backs, I think it was a disgrace the way Vietnam veterans were treated; but DAVE talked about that and sort of raised the issue, along with the whole question of the Nicaragua Contras in El Salvador, those brutal death squads, when we traveled down there together. It was DAVE always on the side of things that were for justice, for those who were down and out, the HOPE scholarships and increasing Pell grants, increasing minimum wage. These are the areas, the SAVE Act, which really went to help guidance counselors.

So I am just proud to say that I know DAVE. I had the opportunity to vote in 1991, and there was not even a question when he ran for his current position. I happen to pick winners in that, even in the new one too, DAVE; so one of my strengths in Congress is that I know how to pick the winners. It does not say much about me, but it does say that maybe I have good judgment.

I do wish the gentleman from Michigan (Mr. BONIOR) well. I appreciate the courage that he takes when there are difficult votes to give, unpopular votes. We have talked about many of these issues. I think some of the things that we have talked about in the past, now others are seeing that there are issues that we should have been talking about all along which might have made a difference in where we are today.

It has been my pleasure to know you.

Mr. Speaker, as we draw this, what has turned into a Special Order, to a conclusion, I am pleased to yield to the gentleman from North Carolina (Mr. WATT).

Mr. WATT of North Carolina. Mr. Speaker, I thank the gentlewoman for yielding. I could not resist the opportunity to come over and say how much my good friend, DAVID BONIOR, has meant to me in my service in the U.S. House of Representatives. I came to Congress in January of 1993, and DAVID was certainly one of the people who took me under his wing and taught me the process. He is a student of parliamentary procedure, and we had a little group called the parliamentarian group that we used to use, sometimes to our substantive advantage and sometimes to the chaos of the House, but when we wanted to try to get things accomplish that the leadership would not voluntarily accomplish.

It has been a great pleasure for me to serve with DAVID BONIOR. He has certainly been at the top of the list of principal people who have served in this House with strong beliefs in, and willingness to fight for, working people and the things that he believes in. This House is going to miss him immensely and wish him godspeed and the very best in the future.

Mr. PAYNE. Mr. Speaker, I yield time to the gentlewoman from California (Ms. PELOSI).

Ms. PELOSI. Mr. Speaker, I thank the gentleman for yielding and for our excellent words about our colleague.

In conclusion, I would like to thank all of our colleagues for coming. This was intended to be 5 minutes. Our phone is ringing off the hook in the office saying, why did you not tell us that this was going to happen, so we will need many more days, Mr. Speaker, to accommodate the words that people want to say about the greatness of DAVID BONIOR. I thank him for the vision with which he has led us, with his knowledge, with his experience, with his integrity. Every one of us who serves in this body has a great privilege to do so. One of our greatest privileges, though, is to have called DAVID BONIOR colleague.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. SIMPSON). The Chair will recognize Members for Special Order speeches without prejudice to the resumption of legislative business.

PARLIAMENTARY INQUIRY

Mr. FRANK. Mr. Speaker, parliamentary inquiry.

The SPEAKER pro tempore. The gentleman may state it.

Mr. FRANK. What legislative business?

The SPEAKER pro tempore. If there is legislative business that comes from the Senate.

Mr. FRANK. Well, I wonder, is any contemplated? I think the minority would have an interest in that prospect. Does anyone know if any legislative business is contemplated?

The SPEAKER pro tempore. The Chair has been informed that there may be legislative business.

Mr. FRANK. Well, I have checked with our staff here who usually have good channels of communication. We did not know about any, and I would express some hope that there would be some communication so that we would have some idea of what legislative business might be transacted with everybody no longer in Washington.

The SPEAKER pro tempore. The Chair would suggest consultation with the leadership.

Ms. NORTON. Mr. Speaker, if many of us had our way, DAVE BONIOR would never leave this House. No one can or would begrudge a man of DAVE's multiple talents another high office, as Governor of Michigan, or deny the people of Michigan the extraordinary leadership he will bring. Yet, the place DAVE has carved out here in public service to his district, his state, and his country is an unique as it is lasting and unforgettable.

DAVE is a modest man who possesses large personal gifts. You can bet, therefore, that he is embarrassed by the spontaneous, maximum praise usually reserved for eulogies that is coming forward for him today. But, DAVE is going to have to grin, or blush, and bear it.

DAVE BONIOR has managed to lead the Democrats on issues when he agreed and when he did not by using his good head without ever losing his own heart and soul on issues of principle to him and his own constituents. Where DAVE got his bewildering combination of great calm and fierce determination I cannot say. Perhaps that kind of versatility is honed in the success DAVE has had in two very different games, basketball, and football.

The hallmark of the game DAVE played in the House was fairness, strategic skill, and devotion to principle. I am personally grateful for DAVE's strong support and action when the Democratic House voted to allow a vote in the Committee of the Whole for the people of the District of Columbia, the first time District residents who are second per capita in Federal income taxes have ever had a vote on the House floor since the Nation was founded. Members of every variety can quote countless examples of thoughtful, critical support for their districts or their issues DAVE has gathered. However, the affection and respect for DAVE is not centered in mere individual gratitude but fundamentally in the way he brought the best of this institution to bear.

DAVE BONIOR's tenure as a member of Congress from Michigan and as whip has prepared him well to be Michigan's next Governor. Between these two roles, DAVE has shown a mastery of both executive and legislative skills. Add this unique bonus to DAVE's extraordinary personal qualities, and the people of Michigan are guaranteed to continue to get from DAVE what they certainly deserve but much more than they bargained for.

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

CONTRIBUTIONS OF THE U.S. NAVY TO OUR VICTORY IN AFGHANISTAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. KIRK) is recognized for 5 minutes.

Mr. KIRK. Mr. Speaker, I requested this time to highlight the contribution of the United States Navy to our victory in Afghanistan.

After the September 11 attacks, the investigation quickly turned to Osama bin Laden and his al Qaeda training camps in Afghanistan. At first glance, a war in Afghanistan offered few options for the United States. Afghanistan has no coast line and is situated hundreds of miles from any shoreline. None of the nations bordering Afghanistan would permit U.S. strikes against Afghanistan from their own soil.

With few options, President Bush turned to the one asset in our military that can strike anywhere at any time, without needing permission from anyone, the United States Navy, which moved into action. In fact, September 11 fits the classic model of any crisis in our recent past. One of the first questions any President asks in time of national peril is this: Where are the carriers?

In this case, the USS *Enterprise* was in the Indian Ocean, heading home after a long deployment in the Gulf. Her crew saw the aircraft hit the World Trade Center and Pentagon on CNN; and without direction from Washington, the skipper ordered his battle group to come about and head for harm's way. Within minutes of this crisis beginning, the United States Navy, our Navy, was moving into position to strike back at our enemies in the heart of Central Asia.

The war against terrorism is unlike any war we have fought before. Of the approximately 60,000 U.S. military members currently deployed as part of Operation Enduring Freedom, more than half are sailors or Marines. The Navy and Marine Corps has served as the backbone of Operation Enduring Freedom.

From the very beginning, the Navy has been involved in power projection and combat operations against Osama bin Laden, the al Qaeda network, and the Taliban. Two weeks prior to the first shots of the war, the USS *Enterprise* was on station in the Arabian Sea, ready to launch strike aircraft against Taliban air defenses at a moment's notice. At the same time, Navy submarines were positioned near Afghanistan, gathering intelligence on the movements of Taliban and al Qaeda leadership and preparing to insert Navy Special Operation forces, namely, the legendary SEALs. These missions performed by the ''silent service'' are frequently cloaked in secrecy, but are vital to our efforts in Afghanistan.

More than 50 U.S. Navy ships have participated in Operation Enduring Freedom, including five aircraft carriers and two Amphibious Ready Groups, carrying the 15th and 16th Marine Expeditionary Units. U.S. Navy and coalition surface combatants continue to play an important role in ongoing interdiction missions in the Arabian Sea.

Navy ships operating in the Arabian Sea have demonstrated the adaptability and flexibility of the modern Navy that is unprecedented. The USS *Kitty Hawk* is operated as a Mobile Offshore Logistics Base, serving as a launch platform and supply base for Special Operations forces operating inside Afghanistan. This large carrier did not launch strike aircraft, but adapted to the unconventional needs of the war ahead.

The Navy and Marine Corps tactical air assets have also remained flexible, agile, and adaptable. The ability to rapidly retask aircraft and Tomahawk missiles provides the combatant commander with the flexibility he needs to engage the enemy. For example, Navy F–14 fighters have been engaged in air-to-ground strike missions, missions the aircraft was not originally intended to perform. The ability to position aircraft carriers just offshore has allowed the coalition to strike targets for special operations in Afghanistan. The nearest base from which the Air Force has been able to launch strike aircraft in the region is Kuwait, leaving the bulk of close air support to the Navy. On any given day, naval aircraft have been flying 60 to 80 strike sorties as part of the campaign against al Qaeda. Naval strike aircraft have flown more than 4,000 strike sorties and dropped nearly 5,000 weapons against Afghanistan. While the Air Force has performed most of the long-range strategic bombing, the Navy and Marine Corps have provided all of the close air support and precision strike capabilities required by forces on the ground.

For many of us unfamiliar with the geography of Central Asia, the scale and scope of the task before the Navy is hard to understand. If you were to superimpose a map of Afghanistan on the eastern United States, our carriers would be based off the coast of Pensacola, Florida, and the aircraft would be striking targets near Milwaukee. That capability, providing global reach to our Commander in Chief, gives the United States options and influence far in excess of any other nation.

The capability to strike hard and deep requires a complicated ballet of personnel and equipment that is daunting, at best, from the many ships supplying and protecting the battle groups to teams maintaining the aircraft to the air crews of airborne control, tankers, electronic warfare support, fighter caps, and close air support. We have won another war from the air.

I want to note the contribution of the sister services, especially the Air Force's heavy bombers, that dropped most of the strategic ordnance in this campaign. They made a vital contribution to this effort. But the key support was provided by tactical aircraft, close air support for our troops, provided overwhelmingly by the Navy.

The tactical aircraft from the U.S. Air Force were very limited because, from Kuwait, 13 hours' flight from Afghanistan, gave permission for U.S. strikes from their soil. They had little flexibility arriving over their targets. This diplomatic limitation meant that naval aviation had to carry the vast load of the work in Afghanistan.

I want to make special note of the Navy's electronic warfare aircraft and what they did.

With that, let me just close by saying that we want to take this opportunity to thank the men and women of the following battle groups: the *Enterprise*, the *Roosevelt*, the *Vinson*, *Kitty Hawk*, *Bataan*, the *Bonhomme*, *Richard*, and the many men and women of the 15th and 26th MEUs. To the men and women of Enduring Freedom, we wish you a happy holiday and the thanks of a grateful Nation; and in the words of the Navy, we would say ''Bravo Zulu.''

□ 1300

TRIBUTE TO MR. AND MRS. ULYSSES B. KINSEY

The SPEAKER pro tempore (Mr. SIMPSON). Under a previous order of the House, the gentlewoman from California (Ms. WATSON) is recognized for 5 minutes.

Ms. WATSON of California. Mr. Speaker, I come to pay tribute to a couple that exemplifies strong family values and ideals, Ulysses and Christine Kinsey, who celebrate their 60th wedding anniversary on December 28, 2001, in Florida.

Ulysses Bradshaw Kinsey, or U.B., as he was lovingly called, and Christine Teresa Stiles, met while attending college at the Florida A&M University, and married in Tampa, Florida. The wedding ceremony was performed on December 28, 1941, at the home of Christine's parents.

U.B.'s values of compassion, fairness, and integrity were instilled while working in his father's grocery store. He closely observed his father's treatment of people regardless of race, color, creed, or status. U.B. also admired his mother for her kindness and thoughtfulness towards others.

By watching her mother, who was an enterprising and industrious role model during the Depression, Christine learned the art of making ends meet and training others to do so. Christine epitomized both her parents in her development of compassion and values about hard work. These lessons helped for her to become an excellent homemaker, a caring mother, a resourceful wife, and are reflected in the way she and her husband raised their six children: Eula, Bradshaw, Bernard, Cassandra, Cheryl, and Linda.

The cultivation of U.B. and Christine's relationship over the years has given stability, guidance, structure, and a positive role model, and the results were shown in their children.

This husband and wife team, residing now in West Palm Beach, Florida, has far-reaching influence across the country and out to California, in California's 32nd District. My constituent, Bernard William Kinsey, is the former

senior vice president of Xerox Corporation and President of KBK Enterprises, a consulting firm located in Los Angeles, California. Bernard was a member of Our L.A. and instrumental in rebuilding Los Angeles after the 1992 uprising.

The other Kinsey children, teachers, executives, and operating an elderly care home, have all contributed to the progress in this great Nation.

U.B. Kinsey retired July 31, 1989, after 39 years of service as the principal of Palm View Elementary. While there, he watched more than 30,000 students enroll and graduate. The school was renamed U.B. Kinsey Palm View Elementary School, an unprecedented action in recognizing a living African American former principal.

Christine Kinsey has provided care, love, and support to her husband, her family, and her community for over 60 years. Among other organizations, Christine has been involved with the YWCA, the Tabernacle Baptist Church, and the Palm Beach County School District.

Mr. Speaker, U.B. and Christine Kinsey serve as a shining example of America's family values and ideals. This congressional tribute to the 60th wedding anniversary of the Kinseys exemplifies what is good in our country, and makes us, because of their contributions, the greatest country in the world. Congratulations and commendations.

Mr. Speaker, I yield to the gentleman from Ohio (Mr. BROWN).

TRIBUTE TO HONORABLE DAVID S. BONIOR, MEMBER OF CONGRESS

Mr. BROWN of Ohio. Mr. Speaker, I want to say a word about my friend, the gentleman from Michigan (Mr. BONIOR).

In 1965, a Mississippi civil rights leader said, Do not tell me what you believe; show me what you do, and I will tell you what you believe.

When I hear these words I think of the gentleman from Michigan (Mr. BONIOR), I think of his 10 years as Democratic whip, and I think of his leadership on issues of Central America, on issues of trade, on issues of social justice.

He did not just pay lip service, as many in this institution do, to those issues. The kind of hard work, the kind of day-to-day effort, the kind of persistence, the kind of stick-to-itiveness that the gentleman from Michigan (Mr. BONIOR) brought to this job, always in the name of social justice, always in the name of doing the right thing, standing on the floor doing special orders, doing meetings in his office, making calls to groups to encourage them to lobby this Congress, all that he did in the name of social justice, all that he did in the name of fair trade, meant so much to all of us.

Do not tell me what you believe; show me what you do, and I will tell you what you believe. That describes the gentleman from Michigan (Mr. BONIOR).

THE RIGHT OF COUNTRIES TO SELF-DEFENSE AGAINST TERRORISM, AND RECOGNIZING BRAVE AMERICANS ON THE FRONT LINES, AT HOME AND ABROAD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. SOUDER) is recognized for 5 minutes.

Mr. SOUDER. Mr. Speaker, as we depart for the Christmas and the rest of the holiday season, we all pray for peace and justice in the world. But I think that I have some concerns, as do others, that some people are having difficulty sorting the differences between terrorists and those who are trying to respond to terrorism.

The people who attacked the World Trade Towers and who blew Americans up are not the same as when people like us try to respond. We need to understand that same difference in Israel. For example, when a terrorist who attacks innocent people who are going about their daily routine with the sole purpose of causing terror, that is different than trying to respond with as much precision as possible, although there may be innocents killed, which is unfortunate, but it is still different. We cannot hold Israel to a different standard than we hold ourselves.

We now see the same problem in India. Once again, terrorists have stormed their Parliament and they have attempted to kill and assassinate the leadership of a democratic country. These are difficult times. They are difficult for us when we try to figure out how to respond, too. We all need to be carefully and prayerfully thinking of any response that might lead to more death in the world.

At the same time, it would be wrong for the United States to say that it is okay for us to respond to terrorists, and not for other countries. We all, including us, should be wise and careful in our responses, but respond we must.

I would also like to pay tribute to those brave Americans who are on the front lines protecting us all the time; not only our soldiers in Afghanistan and throughout the world, particularly those who are in immediate harm's way, but also to all the brave firemen and policemen who daily risk their lives to help us. We have all become more aware of their sacrifices.

I also want to thank all those on the front lines trying to protect us from future terrorist attacks: those in the Coast Guard, the INS, the Border Patrol, the DEA, the FBI, the U.S. Marshals, and the U.S. Customs Service. Every day they are trying to protect us from future terrorist attacks and from chemical and biological attacks, whether it be anthrax, heroin, smallpox, or cocaine.

Protecting our borders is not easy. It takes people of judgment, and daily they have to exercise that judgment.

I was recently along a number of the borders in Washington State. Diane Dean is one of our American heroes, along here with Mark Johnson and Gerald Slaminski. In late 1999 at the Port Angeles Customs Station in Washington State, she thought one of the people were behaving suspiciously. She detained him. As they looked further, they thought he had stuff for a meth lab in the car.

It turned out they were handling nitroglycerine. He had enough weapons to blow up LAX Airport, where they had the information that that was where he was headed to rendezvous with another person.

Because one Customs officer detained and went through a thorough examination, and two other Customs officers basically violated orders and chased the person down the street, because we have this absurd position right now that if the person can get away from the immediate border, they cannot be chased, but they took it in their hands to chase him.

We saved LAX Airport, and we also have a suspect who has been one of the key people, or we have a convict, basically, at this point, who has been one of the key people in identifying the al-Qaeda network in the United States and around the world. That information hopefully will save and has already saved and will save more lives in America and around the world.

We need to thank these public servants who are so key in keeping each of us safe, not only during this holiday season, but all year long.

Before closing, I would also like to add a few words of tribute to the gentleman from Michigan (Mr. BONIOR). I came in as a fierce partisan in 1995. I have tremendous respect for people who are also fierce partisans.

I also know he is a good man, a dedicated Midwesterner who stands up for the working man. And whether or not Members disagree with each other at times, it is important to have civility in this body. I believe he has been a fierce partisan, and that helps lead us to the type of debate that we have to have in America if we are going to arrive at public policy.

Too often, it seems to be coming in this day and age that we are trending towards blow-dried cookie cutters, where we all sound the same, we all move the same. It is important that we have people of conviction and people that follow the patterns that many before us have set.

I, too, will miss him in a different way. I will not miss part of his abilities and I will not miss part of his enthusiasm for his cause, but it is always a tragedy when we lose dedicated leaders who spent their lives having such an impact.

I have appreciated his time here as one of the rowdy class of 1994.

IN APPRECIATION OF MEMBERS OF CONGRESS AND IN TRIBUTE TO SUPPORTIVE AND CAPABLE STAFF

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. BONIOR) is recognized for 5 minutes.

Mr. BONIOR. Mr. Speaker, first of all, let me apologize to my friend, Elie Abboud, who has been waiting for me for an hour and a half to have lunch. I did not expect this to happen, and I am overwhelmed by the wonderful tributes and comments of my colleagues.

I want to thank the gentleman from Indiana (Mr. SOUDER) and the gentleman from Nebraska (Mr. BEREUTER) for their comments, and for spending the time that they have here on the floor throughout this hour-and-a-half, 2 hours.

Mr. Speaker, I came to the floor this afternoon, or actually I came this morning, but it is afternoon now, to pay tribute to my staff.

Before I do that, I want to express my appreciation to all the Members who came to this well and spoke so lovingly and so wonderfully concerning my service here.

It means a great deal to me to, number one, have such wonderful friendships of people that I admire and respect, and to have them publicly express their feelings and their thoughts. It was quite an emotional and heartfelt experience and well received, I might say, and I thank them for it.

The gentlewoman from California (Ms. PELOSI), of course, is going to be our next whip and a great leader of our country, and she already is, but more greatness awaits her; and my friend, the gentleman from California (Mr. GEORGE MILLER), who, with me, has had so many battles over so many years on education, labor issues, Central America; we go back a long time, and he is one of the best.

Of course, there is the gentlewoman from California (Ms. WOOLSEY), who I have come to admire and respect, and is about as genuine and as real and as committed to people as we can find in this place; and the gentleman from Ohio (Mr. BROWN), who was here and has now left, who will commence the leadership on the trade issue. He is already a great leader in it, but he will be even more so in the days and weeks and months ahead.

Thanks to the gentleman from Texas (Mr. EDWARDS) and the chief deputy whip, the gentleman from California (Mr. FARR); the gentlewoman from Connecticut (Ms. DELAURO), who spoke with such eloquence and love; the gentlewoman from Ohio (Ms. KAPTUR); the gentleman from Vermont (Mr. SANDERS), who always proves that I am bipartisan; the gentleman from Oregon (Mr. WU); the gentleman from Maine (Mr. ALLEN); the gentlewoman from Nevada (Ms. CARSON); the gentleman from Guam (Mr. UNDERWOOD), who is going to be the next Governor of Guam; the gentleman from Texas (Mr. GREEN); the gentleman from Massachusetts (Mr. FRANK); the gentleman from New Jersey (Mr. PAYNE); the gentleman from North Carolina (Mr. WATT); and the gentleman from Indiana (Mr. SOUDER), I thank him for his comments.

Thanks also to Harold Volkmer who came here, I saw him on the floor. Many of you knew him; he served many years in the House. He was a classmate of mine, and was very instrumental in getting me elected whip.

□ 1315

So I thank them all and I look forward to a final year of service with them here. We are going to do wonderful things for our country together.

I take this floor tonight to express my appreciation to people who have made it possible for me to be the whip of my party and be a leader in my party, and that is my staff. They are an extraordinary group of people, some of whom I will miss dearly. Although I am sure we will be in contact with each other over the years and the months as they go by, but some of them are leaving now, and they have been part of my whip staff, and I want to express my thoughts and feelings to them today.

Bridget Andrews will be coming over to the Rayburn staff with me for the next year and she is just a bright, thoughtful, caring, quiet but smart woman, and I am really honored to have her and look forward to working with her.

Brian Taylor, who is here on the floor as well, Brian has been with us a short time, but he has done a great, great job, and he has got all the abilities to be a great legislative assistant in this institution, and I wish him all the best. He has had the obligation of answering the phone when someone calls to find out what is going on and he does a great job. He knows how this place works now. He is a wonderful person.

Then Kim Kovach, who I will dearly miss. She started off not too long ago with us, a couple of years ago, several years ago, and she has done everything in the office, and she did our trade stuff for us on fast track. She has just progressed in such a wonderful fashion. She is caring, she is decent. She is going back to Pittsburgh. She got married. She is a lovely person, and whoever gets her in employment in Pittsburgh is going to be very, very fortunate. I wish Kim all the best in her endeavors.

I also want to take this opportunity to thank Howard Moon, who came from the gentleman from California's (Mr. MATSUI) staff. Howard is one of our floor people here, and he will continue on in that capacity in the next session of this Congress. He and Kristen are very special people, smart, hardworking, thoughtful, competent, all the things someone would want in a staff person, and I wish Howard all the best and I will miss him. We will see him, though, on the floor. So I guess I will not miss him that much. He will be around.

Jerry Hartz. Jerry has been with me now for, I do not want to get these things wrong, but it has been at least 15 years, since 1987. So let me do my math, about 15 years, and he will be continuing on serving this great institution, and he is an enormously talented individual, a floor person here who we relied on. Wonderful family. Jerry started in our offices when we were the chief deputy whip. There were just four of us in there Judy, my wife; Jerry, Kathy and then Sarah. I guess that is five, and he was so instrumental in our battles on Central America and disarmament issues and you name it, he is there. He is a great resource for this institution, and I wish Jerry all the best in his endeavors.

Sarah Dufendach and Kathy Gille have been with me the longest of the group. They worked on my first campaign 25 years ago. Sarah and Kathy and I, we all kind of grew up on the east side of Detroit, and as I said, they both worked on my first campaign, and Kathy came to work with me about 20 years ago, seems like 22, but she was in at the very beginning and she has been an enormous, wise consult to me. She has great instincts. She has great humanitarian instincts. She has great political wisdom and caring, and I am just going to miss her very, very much, but I know she is looking forward to the day when she can have a little bit of rest, as we all are, and I wish her and Doug much happiness. I know that it will be there in abundance for them. They put together well in their lives the different pieces that make life so profound and wonderful. The spiritual, the physical, the emotional, the educational, all those pieces they do very, very well, and she does extremely well.

Kathy traveled to Central America. She has been at all the battles that we have done over the years and the Vietnams veterans stuff, all the trade issues, worked on the Committee on Rules, as did Jerry, and she is just a very special person, and I thank her from the bottom of my heart for her service.

Then Sarah, who with Kathy, worked in that first campaign, has been with me in the office now for 25 years. She started in Michigan. She lived in the same community I did. She has worked in social services her whole life, and I consider this part of that. She has got enormous amounts of energy and optimism and can-do-it-iveness and is a deeply caring person and was the administrative and political part of our operation that was so very, very important. She did a great, great job for many, many years.

She is going on to wonderful things working for an organization called the Vietnam Veterans of America Foundation, which was an offshoot of the original Vietnam Veterans of America. I guess it really was not an offshoot, but it is Bobby Muller who was instrumental in forming both of those organizations, one which is now a national

veterans organization. She is going to go work over there, and they do stuff like land mines.

They are the folks that got the Nobel Peace Prize for the work they did on land mine issues around the world. So it is a good place for Sarah because when she puts her heart and soul into something, she works hard at it, and there is nothing that could be more important than doing that kind of work, making sure we demilitarize our land so that our loved ones around the world do not lose their lives and their limbs. There will be other things I am sure that she will be doing over there but she is a great person, and I wish her all the best in her endeavors, and I thank her for her service.

Another person who I should mention is Chris Cook, who was with me for 25 years as well and left just recently. I have four people that were with me virtually the whole time, Kathy, Sarah, Ed Bruley, who is still there and Chris Cook, Christine Cook. And Christine left recently from the Michigan office and those now kind of form the team that we have operated with for two and a half decades. And I am going to miss Christine. I will see her. She is busy now as a grandma. We were all young when we started out in this business, but we have other responsibilities now in our lives. And she is handling that with great grace and she is a gracious, lovely woman and I miss her already.

Then let me finally say that my wife, Judy, who worked in our office, in the whip's office, chief deputy whip's office and then in the majority whip's office and in the minority whip's office was an enormous piece in making things work and is the central piece of my life. And she was just fabulous in doing all the wonderful things she does. Caring, loving and advocating and fighting for the things that are important to her, socioeconomic justice, racial justice. So she is a beacon of light for me and for many people, and I want her to know that. I look forward to marching through life with her.

To all the Hill staff who I had the pleasure to work with, thank you for your cooperation and for your support. To run a whip shop is not easy. You do not just need your staff. There is a lot of people that are involved and a lot of energy and a lot of heart and soul gets poured into these issues. And, I hope over the next year, to thank you all individually and to give you my best wishes in your careers.

Mr. Speaker, you have been very generous. This has been a long 5 minutes, and I want to thank you for your kindness this afternoon. I want to wish my colleagues a very happy holiday season; a happy Hanukkah which has passed; a merry Christmas and a spiritual Kwanzaa and a Ramadan Koran for those who just finished their holy season.

We look forward to a good session the next part of this 107th Congress.

LEGISLATION TO BE CONSIDERED IN SECOND SESSION OF 107TH CONGRESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Nebraska (Mr. BEREUTER) is recognized for 5 minutes.

Mr. BEREUTER. Mr. Speaker, today I have introduced four bills for consideration during the next year and I want to call them at least briefly to the attention of the House for the Members and staff who will be watching or reading the CONGRESSIONAL RECORD.

The first of them is entitled the Lewis and Clark Voyage of Scientific Discovery Act, and it really is a comprehensive effort to foster the better management of the biological and physical health of the Missouri River.

The second and third bills relate to Afghanistan and Central Asian republics and the ability and assistance and authorization for that part of the world to produce food sufficient to feed themselves, at least on a sustainable or subsistence basis.

The second of the bills relates to a multi-lateral approach we would participate through the Treasury Department with cooperation and assistance with the State Department. It has 15 bipartisan cosponsors already, and it would utilize a trust fund with the fiduciary responsibility placed in the World Bank.

The third is a bilateral authorization program involving the State and USAID, and I will come back to those two bills briefly.

The fourth bill is a Rural Equity Payment Index Reform Act, and I had a chance to briefly mention that in a 1 minute address several hours ago. This bill will address a significant differential and reimbursement levels to urban and rural health care providers. The formulas used by Medicare programs to reimburse health care providers for beneficiaries' medical care, are not accurately measuring the cost of the providing services and are reimbursing physicians and other health care providers in a manner that disadvantages rural providers and, therefore, rural citizens.

Many rural communities have had great difficulty retaining physicians and other skilled health care professionals. Recruitment difficulties for primary and tertiary care remain more severe in areas with lower costs of living indices. It makes little sense, therefore, to pay physicians less in lower costs of living areas when these areas usually have the physician shortages.

The Rural Equity Payment Index Reform Act will lessen the disparity which currently exists between urban and rural areas. Specifically, the legislation would guarantee that we would have a gradual phase-in of a floor of 1.000 for the Medicare physician work adjuster, thereby gradually raising all localities with a work adjuster below 1.000 to that level.

Since it would be politically impossible to lower the work adjuster levels for health care providers in urban areas, the adjustment upward to the 1.000 floor would be enacted without regard to budget neutrality agreement in the present law, thereby requiring Congress to change law to authorize an increase in program expenditures.

While Congress has attempted to correct the inequities for hospitals, it has not addressed parallel problems with the physician component of our country's rural health infrastructure.

The Benefits Improvement and Protection Act of 2000 addressed inadequate payment for Medicare+Choice organizations, and took steps to stabilize and improve rural hospital payment. Nothing substantive in the legislation, however, addressed the underlying issues of inadequate reimbursement of the costs of providing physician services under Medicare Part B.

According to the Centers for Medicare and Medicaid Services, ''physician work'' is the amount of time, skill and intensity a physician puts into a patient visit. Physicians and other health care providers in rural areas put in as much or even more time, skill and intensity into a patient visit as do physicians in urban areas. Yet, rural physicians are paid less for their work under the Medicare program than those who practice in urban areas! This is not only unfair, but discriminatory against rural areas!

The amount Medicare spends on its beneficiaries varies substantially across the country, far more than can be accounted for by differences in the cost of living or differences in health status. Since beneficiaries and others pay into the program on the basis of income and wages and beneficiaries pay the same premium for Part B services, the geographic disparity results in substantial cross-subsidies from people living in low payment states with conservative practice styles or beneficiary preferences to people living in higher payment states with aggressive practice styles or beneficiary preferences. Physician work should be valued equally, irrespective of the geographic location of the physician.

The work geographic practice costs index for Nebraska is currently 0.949. According to this Member's calculations, establishing a floor of 1.000 would translate into a $7,562,772 annual increase in Medicare payments to Nebraska physicians. We have information of the current index levels for other states that we can make available to interested Members.

Mr. Speaker, this Member urges his colleagues to support the Rural Equity Payment Index Reform Act.

Mr. Speaker, with respect to the Afghanistan bills, the two that I have introduced, I would say it is important that Members understand that as Afghanistan moves towards developing a new government, it is important for the U.S. to provide incentives for the people of Afghanistan to create a new national government which will move towards increased stability in the region.

I would like to thank the distinguished Members from both sides of the aisle who have agreed to serve as original co-sponsors of the measure, and, in particular, the distinguished

gentlelady from North Carolina (Mrs. CLAYTON). Her commitment to assistant people in the U.S. and the rest of the world feed themselves through the Farmer-to-Farmer program and other technical education programs will truly be missed in this Body during the next Congress.

Mr. Speaker a very special note of appreciation is extended to Dr. Fred Starr of the School for Advanced International Studies of Johns Hopkins University for the concepts that undergird this legislation and for his generous amount of time and advice to this member and my staff Alicia O'Donnell, as we drafted this legislation. The distinguished Dr. Starr first explained his views and proposal at an Aspen institute breakfast sponsored by the distinguished former senator from Iowa, Rich Clark.

□ 1330

One important incentive which the U.S. can extend is assistance to address one of its most immediate needs, the need to rebuild Afghanistan's capability to feed itself.

Indeed, nearly all of the indigenous tools for food production and rural development in the Afghanistan area have been destroyed. The people of Afghanistan, necessarily, have eaten their seed stocks and most have slaughtered all of their breeding livestock to meet their immediate food requirements. Additionally, over 20 years of civil war and political unrest in Afghanistan have resulted in the destruction of the country's limited basic irrigation systems.

Unfortunately, the food production capabilities in the mountainous regions of Turkmenistan, Uzbekistan, Tajikistan, Kyrgyzstan, and Pakistan have reached abject levels, too, thus results in a regional crisis.

Mr. Speaker, the Afghanistan and Central Asia Republics Sustainable Food Production Trust Fund Act that I have introduced directs the Secretary of the Treasury to enter into negotiations for the creation of a multilateral global trust fund to address the food production crisis in Afghanistan and the surrounding Central Asian Republics. Through the trust fund, nongovernmental organizations, working in conjunction with local and regional entities, would receive grants to conduct food production in rural development projects, including microenterprise loan programs, in Afghanistan and in the impoverished mountainous regions of the countries I previously mentioned.

Upon the creation of the trust fund, the NGOs would be immediately eligible to receive grants to execute projects in the countries of the Central Asian Republics. This is a model laid out for us by Dr. Fred Starr, a very distinguished member of SAIS at Johns Hopkins University, in a breakfast for the Aspen Institute held in this Capitol building several months ago.

In order to provide the important incentive during critical stages of statebuilding, Afghanistan would not be eligible for programming until the Secretary of State certifies that the people of Afghanistan have made substantial progress towards creating a national government which meets four criteria: one, has diverse ethnic and religious representation; two, does not sponsor terrorism or harbor terrorists; three, demonstrates a strong commitment to eliminating poppy production use for opium production; and, four, meets internationally recognized human rights standards.

Mr. Speaker, helping the people in the region feed themselves is not only benefits which we are creating for them, it is important to us and to other countries. It would provide an opportunity to build good will in a region which has been neglected by U.S. policymakers and U.S. assistance programs. We cannot leave a vacuum there like the one that was left behind after the Soviets were expelled from Afghanistan.

U.S. leadership, in creating a long-term trust fund, can be a critical step towards rebuilding confidence in the USA. When funds from public and private sources are gathered and distributed through a multilateral mechanism, it becomes much more difficult for governments in the region to dismiss the projects as ephemeral U.S. foreign policy initiatives. Additionally, providing programming funds for the Central Asian Republics and not solely to Afghanistan, which will certainly become the recipient of massive bilateral and multilateral human assistance programs, will further demonstrate the U.S. commitment to the entire region.

Mr. Speaker, I hope my colleagues will look at this legislation. I think it begins the process of seeking a long-term solution to the region's dire food production challenges; and, furthermore, it is a real incentive for them to move the kind of government which will bring peace and stability to the region.

Mr. Speaker, this Member would note that the Afghanistan and Central Asian Republics Sustainable Food Production Trust Fund is not intended to replace similar bilateral projects which USAID has begun to conduct in the region. Furthermore, the trust fund is not intended to supplant the very necessary emergency food assistance programs in Afghanistan and the surrounding Central Asian Republics.

Mr. Speaker, it is critical that the U.S. and the rest of the global community begin to seek long-term solutions to the region's dire food production challenges. Through the creation of the Afghanistan and Central Asian Republics Sustainable Food Production Trust Fund, the U.S. can take an important step toward that end.

INDIAN TRUST MANAGEMENT REFORM

The SPEAKER pro tempore (Mr. SIMPSON). Under a previous order of the House, the gentleman from New Jersey (Mr. PALLONE) is recognized for 5 minutes.

Mr. PALLONE. Mr. Speaker, the U.S. Government has repeatedly committed to a trustee relationship with the American Indian nations. Defined by treaties, statutes, and interpreted by the courts, the trust relationship requires the Federal Government to exercise the highest degree of care with tribal and Indian lands and resources.

At first, the Federal trust responsibility served to protect tribal lands and tribal communities from intrusion. However, in a push to acquire tribal lands and turn Indians into farmers, the Federal Government imposed reservation allotment programs pursuant to the General Allotment Act of 1887. Under these policies, the selling and leasing of allotted lands and inherited interests became primary functions of the Bureau of Indian Affairs. Tribes lost 90 million acres and much of the remaining 54 million acres was opened to non-Indian use by lease. In sum, the Federal Government took the trust responsibility for Indian land upon itself in order to gain the benefit of vast tribal lands and resources that were guaranteed by treaty, executive order, and agreements for exclusive use by the tribes.

It is widely known, Mr. Speaker, that the BIA grossly mismanaged and squandered billions of dollars worth of resources that should have gone to the benefit of often impoverished American Indians. Today, the Secretary of the Interior is faced by a mandate from Congress to clean up the accounting and management of the Indian trust funds, and by a lawsuit alleging a great failure by the Secretary's trust responsibility for Indian lands. In response, the Secretary has proposed a plan to create a new Bureau of Indian Trust Asset Management and remove the trust functions from the Bureau of Indian Affairs.

Mr. Speaker, in my opinion, this proposal will profoundly affect the BIA's management of 54 million acres of Indian lands, the administration of trust funds derived from those lands, and nearly every aspect of economic development, agriculture, and land management within Indian country.

I am greatly concerned that this plan is repeating the failure of the many trust reform efforts of the past. Recently, 193 Indian tribes unanimously adopted a resolution opposing this reorganization and transfer of the responsibilities of the BIA. I strongly believe that this reorganization effort cannot go forward until the Department consults with Indian tribes in the development of a business processes plan for trust reform, a clear plan for performing the basic trust functions of accounting, collections, recordkeeping inspections enforcement and resource management. The plan must include policies, procedures and controls.

The fundamental and consistent criticism of the Department's trust reform efforts over the last decade has been the failure to develop a plan for these

business operations of trust management. Instead, the DOI has a well-documented record of making short-term cosmetic changes in response to court-imposed deadlines or congressional inquiries.

Mr. Speaker, it is notable that this criticism, a lack of structural foundation, is exactly the same as has been leveled against the Department's development of the Trust Asset and Accounting Management System. All tribal leaders strongly support trust reform and want to work constructively with the Department and with Congress to ensure sound management of tribal assets. In fact, it is the tribes that have the greatest interest in ensuring that tribal assets and resources are properly managed.

In this spirit, I will submit for the RECORD the following principles of the National Congress of American Indians, which should guide the Department of the Interior in its trust reform efforts. Secretary Norton clearly needs help in attending to the concerns of Native Americans, and I would hope these principles would be taken into consideration by her.

I. Put first things first. Creating a new agency does not create trust reform, and we unequivocally oppose this proposal as currently framed. Tribal leadership urges the Secretary to stop the BITAM reorganization effort until there has been an opportunity to actively engage and consult with tribes in developing an alternative plan for the business processes of trust management in an open and consensus-based process. Once the Department, working with tribes, has a clear definition of the tasks that must be accomplished, then any staff reorganization should be based on this business processes plan.

II. Tribes can help solve this problem, but the Secretary must consult and collaborate with the tribal leadership on a government-to-government, sovereign-to-sovereign basis. Announce and defend is not consultation. The Secretary and the tribes should agree that the upcoming regional meetings should be to consult on the scope of the issues to be addressed. The scoping meetings planned at present are too fast and too few, and should be extended to cover all regions, with an extended timeline. A Tribal Leaders Task Force on Trust Reform should be created and funded, and consultation should include the IIM account holders. Consultation must continue throughout the trust reform effort, and the discussions must be marked by some fundamental ground rules. The tribes insist that the Department agree to deal in good faith, avoid self-dealing, and commit to full disclosure of relevant and material information (including that relating to known failures and losses).

III. In the past twelve years, Interior has paid more than a billion dollars in judgments and settlements for its failures to protect the trust assets. The costs of continued failure will far outstrip the costs of doing it right. Congress must fund trust reform, and the IIM beneficiaries and tribes should not bear the burden of paying to fix the trust system. We therefore oppose the Department's proposed reprogramming of $300 million within the Fiscal 2002 budget from the BIA budget to fund the proposed BITAM, and any other proposal to remove funds from the BIA for this purpose.

IV. The Secretary of Interior should come forward in an honest and forthright way to discuss ways of settling on historic account balances. If she cannot do this, then Congress must address this issue substantively.

V. Do no harm. Many tribes and BIA field offices have been successful in establishing sound trust management for their lands pursuant to the tribal self-determination policy. These successful systems should not be harmed or modified by the trust reform efforts without tribal consent.

VI. Successful development and resource management in Indian Country are linked to Indian control. The future of trust management includes increased protection and tribal control over lands and resources, and a federal system that provides technical assistance and trust oversight on resource management in a flexible arrangement that is driven by self determination through the special circumstances, legal and treaty rights of each tribe and reservation. Different regions in Indian Country and their specialization in grazing, timber, oil & gas, commercial real estate, agriculture, fisheries, water, etc., will all require different systems that must reflect the unique needs of each.

VII. The survival of tribal cultures and traditions is dependent upon the continuance of tribal lands and resources as durable means to live and be Indian. One role of the trustee is to protect the long-term viability of tribal lands and resources and ensure that the actions of the trustee are consistent with tribal control of the use and development of Indian lands.

ANNIVERSARY OF CEDAW

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. WOOLSEY) is recognized for 5 minutes.

Ms. WOOLSEY. Mr. Speaker, this past Tuesday, December 18, marked the 22nd anniversary of the United Nations' adoption of the Convention on the Elimination of All Forms of Discrimination Against Women, otherwise known as CEDAW. Adopted by the U.N. General Assembly in 1979, CEDAW established a universal definition of discrimination against women and provides international standards to discourage sex-based discrimination. These standards encourage equality in education, health care, employment, and all other areas of public life.

This comprehensive United Nations treaty serves as a powerful tool for all women as they fight against discrimination, and this treaty has led to substantial improvements for women's lives in countries including Japan, Brazil, Sri Lanka, and Zambia. In fact, when Brazil redrafted its constitution, they used CEDAW as a framework for their human rights for women. The Brazilian constitution now contains provisions on gender equality, gender-based violence, equality of rights within marriage, family planning, and employment, paralleling those contained in CEDAW.

To date, 168 countries have ratified CEDAW. However, the United States is not one of those countries. In fact, the United States is the only industrialized nation that has not ratified CEDAW, a distinction that places us in the company of North Korea, Iran, and Afghanistan. The decision to abandon this embarrassing distinction is long overdue.

The last 3 months have focused on recovering from the tragic events of September 11 and fighting against terrorism. And as a part of our response to the terrorist attacks, the U.S. has overthrown the Taliban, a government that stripped Afghan women of all freedoms, dignity, and respect. Now the United States will play an important role in rebuilding the Afghan Government. Critical to building this new democracy will be the inclusion and acceptance of Afghan women.

But in our quest to help Afghanistan rebuild, we are presented with a shameful irony. While we are trying to teach the Afghani people that women must be an equal part of a post-Taliban democracy, we contradict ourselves by refusing to ratify the one international treaty that ensures the rights of all women. If we truly want to be regarded as a world leader and champion of human rights, our country must ratify this treaty. Women around the world are depending on the United States to show support for CEDAW, because United States' support will strengthen CEDAW's purpose and enhance its credibility.

During my 9 years in Congress, the ratification of this treaty has been a top priority of mine. Although it is the purview of the other body to ratify a U.N. treaty, 90 bipartisan Members of the House of Representatives have signed a House Resolution asking the Senate to take up this issue and ratify CEDAW. Please join this effort to convince the administration and the other body that the time has come for the United States to join 168 other nations who have committed themselves to safeguarding basic human rights and ending gender discrimination and ratifying CEDAW.

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from the District of Columbia (Ms. NORTON) is recognized for 5 minutes.

(Ms. NORTON addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. BROWN) is recognized for 5 minutes.

(Mr. BROWN of Ohio addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

NO EXPRESSION OF SUPPORT IN CONGRESS FOR WAR IN IRAQ

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. FRANK) is recognized for 5 minutes.

Mr. FRANK. Mr. Speaker, along with a large majority of the House, I voted for a resolution that reiterated our opposition to the acquisition by Saddam Hussein of Iraq of weapons of mass destruction. But I am concerned that some might try, quite inaccurately, to take that large vote repeating our condemnation of Saddam Hussein and our insistence he comply with U.N. resolutions regarding these weapons, that some might mistake this as an expression of support for a war in Iraq.

First of all, we should be very clear: there is no legislation, no resolution that has passed this House, that expresses support for war in Iraq. The post-September 11 resolution was explicitly limited to involvement in the attack on the World Trade Center. And to date, no one has produced evidence, as reprehensible as Saddam Hussein is, as despicable as his regime, that he was in any significant way involved in that.

Many of us, in fact many of us who voted for the resolution, signed a letter to the President reiterating we do not believe it would be appropriate to commit America to a major military action in Iraq or anywhere else in the world without a congressional vote. And I would be, at this point, voting against that.

We did a very good job in Afghanistan. The American military made us proud. And, by the way, that is the American military that President Bush inherited from President Clinton. All during the campaign of 2000 candidates Bush and CHENEY denigrated the American military, claimed inaccurately that Clinton had somehow left it impotent. All of a sudden it got very good in a hurry, because that very military that President Bush inherited from President Clinton showed a great capacity in Afghanistan.

But as good as they were and as careful as they were, innocent lives were lost, property was destroyed, the economy, already in tough shape, was disrupted, food distribution was inhibited. We had a moral right and a moral obligation to go into Afghanistan. But having done that, having unleashed significant military power in that poor country, for good moral reasons, I think it is now an equal moral obligation to show that we can work just as hard to help rebuild the country, to help feed people, and to help reconstruct it.

In the first place, I would say this: until we have shown an equal ability and commitment and dedication to giving the people of Afghanistan a better life, as we should, to helping them get rid of that terrible regime, then I do not think we have earned the right to go do that somewhere else.

□ 1345

I do not think that we can simply go from country and oppose destruction, even when it is morally justified to go after some bad people, without living up to the second part that of commitment.

Secondly, an attack on Iraq, unlike the war in Afghanistan, would be almost universally opposed by a variety of others. The Bush administration has learned that going it alone is not the best strategy. I am glad the Bush administration has abandoned the kind of unilateralism that unfortunately marked its early months. But if we now attack Iraq, we would be back in that situation. In fact, any hope of further cooperation with Arab regimes in getting intelligence, in prosecuting terrorists and continuing to go after al Qaeda would be discouraged.

Mr. Speaker, I am no fan of the regime in Saudi Arabia which is lacking in so many respects; I have become increasing disenchanted with Mubarak in Egypt, but they, at this point, seem to me better than what we would get as an alternative if we were to launch an attack on Iraq that could destabilize those countries. And as King Abdullah, the King of Jordan, in the tradition of his father, seems to be a responsible individual trying to do well, I do not want to see those efforts undercut.

So it would be counterproductive in the war against terrorism to go after Iraq. I would love to see Saddam Hussein out of power. He is a vicious and brutal man, but to attack him militarily at this point, engendering the opposition this would engender in the Muslim world, would be counterproductive to our fight against terrorism.

Indeed, as a strong supporter of the legitimate right of Israel for self defense, which is now under attack from the most irresponsible elements in the Arab world, people should understand, President Bush never said that he was for a Palestinian state until after September 11. The political need to show some connection to the Muslim world moved him in that direction. I fear greatly that an attack on Iraq, with all of the negative consequences that would have in the Muslim world would, in fact, lessen rather than strengthen America's support for Israel's legitimate needs. I fear there would be a tendency to trade-off a little bit of that support for Israel at a time of great crisis because of this.

Finally, they are not analogous. Not only do we not have Saddam Hussein not having attacked us the way the Afghan-supported Taliban allowed al Qaeda to do it, we do not have the same situation. There is no Northern Alliance. One of the things that helps morally vindicate our effort in Afghanistan was the obvious joy of so many people in Afghanistan that we helped rid them of this barbarous repressive regime.

Saddam Hussein is not a lot better than the Taliban, but I do not see in Iraq the kind of opposition that would allow us to do the same thing. So while to continue to support the sanctions and I continue to say we should work with opposition within Iran, if possible, to launch a military assault on Iraq comparable to what we do in Afghanistan would be counterproductive. I hope it will not be done. Clearly, the resolution we voted offers no support for that.

The SPEAKER pro tempore (Mr. SIMPSON). Under a previous order of the House, the gentleman from American Samoa (Mr. FALEOMAVAEGA) is recognized for 5 minutes.

(Mr. FALEOMAVAEGA addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

MORATORIUM CALLED FOR ON VETERAN PRESCRIPTION DRUG CO-PAYS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. STRICKLAND) is recognized for 5 minutes.

Mr. STRICKLAND. Mr. Speaker, I may be the last speaker in this Chamber of this particular session of the House of Representatives. I rise today to say when it comes to the way we treat our veterans in this country, talk is cheap, but actions speak louder than words. Why do I say that?

Mr. Speaker, I have in my hands this afternoon a document from the Department of Veterans Affairs entitled, ''Implementation of Medication Co-payment Changes.'' It is a document that details the changes that will take place in the level of co-payment made available to veterans who get their prescription medications at the VA hospitals. What we are proposing is outrageous in my judgment.

Currently, most veterans who go to VA hospitals and receive their medications as an outpatient pay a $2 co-pay per prescription. On February 4, according to this document, that co-pay will be increased from $2 a prescription to $7 a prescription, a whooping 250 percent increase. An unacceptable increase. Why is this so outrageous? It is outrageous because this House has recently passed a $15 billion bailout for the huge airline companies, $15 billion. This House has recently passed a bill that would have provided $24 billion in tax rebates going all of the way back to 1986, giving profitable companies a give-back of all of the taxes they had paid under the alternative minimum tax since 1986, estimated to be a $24 billion give-back. And yet at the same time, we are in the process of increasing the co-pay for veterans' medicines from $2 to $7.

Mr. Speaker, I serve a veterans hospital in southern Ohio, the Chillicothe VA Hospital. I have been told by administration there that the average veteran who gets prescription drugs at that facility will get 10 or more prescriptions per month. If we take a $7 co-pay and multiply that by 10, it is $70, a sizable amount of money for a veteran living on a fixed income. These veterans frequently get not 1-month supply, but a 3-month supply at a time. If we take $70 times 3, it is $210. Why is it that we talk so eloquently in this House about our concern for our military, we honor our veterans, and yet when it comes to taking action, we penalize them at the same time we are willing to give huge, huge tax cuts to profitable corporations, many of them multi-national corporations.

A 250 percent increase on our veterans for medicines they need to stay healthy or maybe even to stay alive, and we are doing it at a time when we are passing out money up here like drunken sailors. We have passed so many give-backs and pork barrel spending bills in this session of this House of Representatives, and yet we are penalizing our veterans. It is no wonder that veterans across this country have a right to say when it comes to the actions of this House, talk is cheap, but actions speak louder than words.

On February 4 when veterans go to our VA facilities to get their medicines, and they have been used to pay $2 per prescription and they are asked to pay $7 for that prescription, I hope they rebel. I hope they let those of us in this Chamber know how they feel about this outrageous action.

Mr. Speaker, I have introduced a bill to place a 5-year moratorium on any increase for veterans' prescription drugs. My bill is H.R. 2820. I currently have 42 cosponsors. I am hopeful that every Member of this Chamber will choose to cosponsor this legislation, and as soon as we get back here after the first of the year, we will pass this legislation so that we will not penalize our veterans and require them to pay more than they are currently paying for their needed prescription medications.

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Texas (Ms. JACKSON-LEE) is recognized for 5 minutes.

(Ms. JACKSON-LEE addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

□ 1400

ACCOMPLISHMENTS OF FIRST SESSION OF 107TH CONGRESS

The SPEAKER pro tempore (Mr. SIMPSON). Under a previous order of the House, the gentleman from Illinois (Mr. HASTERT) is recognized for 5 minutes.

Mr. HASTERT. Mr. Speaker, I rise today to talk about the accomplishments of the first session of the 107th Congress. I am proud of this House of Representatives and how it has risen to the challenges of this very turbulent year.

We started this session after the closest Presidential election in our Nation's history, with an evenly divided Senate and a closely divided House. We conclude it with an admirable track record of accomplishments in the face of a Nation that has utterly changed in a time of war. The themes we focused on at the beginning—economic security, retirement security, national security, and education—still occupy our attention at the end.

We started this session debating economic security. Should we take the steps necessary to jump-start our economy? The Congress, amid great debate, considered the President's campaign pledge to return $1.35 trillion of the taxpayers' money to the taxpayers themselves. We started in the House with the principle that it is wrong to penalize married people with a higher tax rate. We passed legislation to get rid of the marriage penalty. We believed it was wrong to tax people when they die, so we got rid of the death tax. We believed that all Americans deserved some tax relief, so we passed broad, across-the-board tax relief, which included a refund check for all Americans who pay income taxes.

We believed that families needed help to raise their kids and to send their kids to school. We doubled the child tax credit from $500 to $1,000 to give parents more money at home to take care of diapers and school supplies and braces and all the other things that kids need. We also passed tax-free education savings accounts to encourage parents to save money for their children's education. To improve retirement security, we included monumental IRA/401(k) reform so that people could save more money tax-free for their retirement.

Tax relief is the best remedy for a slowing economy, and there is no question in my mind that we did the right thing by passing the tax relief package early enough to soften what could have been an even greater economic blow to our country. The President signed this legislation on June 7. He kept his promise to the American people, and we kept our commitment to economic security. But tax relief was not our only accomplishment in this historic session of this Congress.

The President promised to work on a bipartisan basis to reform education, to improve our education system so that no child is left behind. As a former teacher and coach, I understand how important education is to our Nation's future and how complicated school reform truly is.

We worked on legislation that would do the following: children from the third to eighth grades would be tested annually in such important subjects as reading and mathematics so that we could make sure that they are learning. States and school districts will have more freedom to decide the most effective way to spend Federal dollars. And they will be held accountable for their decisions. Federal funds will be put in the programs that have the most positive impact on children, programs, for instance, that make sure that all our kids are reading by the third grade. Parents will be empowered with information about the quality of their children's schools and their teachers so that parents can make the best decisions for their kids' education. And parents with children in failing schools will be able to use Federal funds to pay for private, religious, or community-based after-school tutoring.

Last week, the House passed the conference report and the Senate completed its work and the President will sign this legislation in early January. From the beginning, we planned on tax relief and educational reform. But the Congress showed it was able to respond to an immediate crisis.

On September 11, the American people were deliberately and viciously attacked by terrorists who hijacked four airplanes, crashing two of them into the World Trade Towers, one of them into the Pentagon. The fourth crashed into a field in Pennsylvania after a heroic struggle by crew and passengers that led to the crash of that airplane. Many of us believe that the terrorists planned to crash that plane into this very Capitol of the United States of America. Those people who stopped those terrorists from their dastardly deed did a great service not only to the people who work here, the people who serve here, but certainly to the American people themselves. We hold those deeds in the greatest and highest honor that I think this country can bestow.

This disaster changed the character of Congress and the face of this Nation. I am proud of how this House has reacted. From the moment we sang ''God Bless America'' on the steps of the Capitol building, we sent the message to the world that we are united in fighting this new war on terrorism. We immediately got to work on a series of initiatives to go after these murderers and safeguard our Nation from future attacks.

Three days after the attack, Congress passed a bill providing $40 billion to fund September 11 recovery efforts and to combat terrorism. On the same day, we passed a resolution authorizing the President to use force against those who played a role in these attacks.

In the days that followed, we passed legislation vitally important to fighting this new war and in protecting America from further attack:

An airline recovery bill to help those airlines struggling after the attack on our Nation.

An antiterrorism bill to provide our law enforcement officials with the tools they need to track terrorists and bring them to justice.

An aviation security bill to improve safety at our country's airports for travelers and airport employees.

For bioterrorism, to protect our Nation from this growing threat, which we hope the Senate will complete this week.

The terrorist attacks pushed an already struggling economy into a recession. The House responded by passing an economic stimulus package. Unfortunately, the other body was unable to pass similar legislation. Our bill was a fair and balanced bill that would have helped workers who lost their jobs keep their health insurance. Most importantly, it would have helped those workers get back to work. It looks today that the other body will not complete work on our legislation. I think that is a shame.

One of the biggest frustrations this year has been the lack of production from our friends on the other side of the Rotunda. The House has led the way in implementing the President's agenda, but on too many occasions the Senate has dropped the ball.

Here is the long list of items that passed this House but that the Senate has left for next year:

We passed the President's faith-based initiative, to give religious organizations the same rights as other groups to use Federal funds to help America's less fortunate.

We passed a comprehensive energy bill to step up energy production here at home, reduce our reliance on foreign sources of energy, and make energy cleaner and cheaper and more dependable for years to come. Not only does this bill set us on a more secure road for the future, it helps our economy by creating another 700,000 American jobs.

We passed a bill that banned human cloning for reproduction and research to uphold the sanctity of life, as well as the Unborn Victims of Violence Act, which makes it a Federal crime to harm or kill an unborn child during a violent attack against a pregnant woman.

We passed Trade Promotion Authority for our President so that he could open new world markets for American goods and services, grow our economy, and open up 1 million new jobs by the year 2006.

We passed election reform, to restore the American public's confidence in the democratic process and ensure that America's voting system is the very best in the world.

Clearly, the other body has much work to do in the next session of the 107th Congress. We also must complete action on the President's issue that he said in his election that he wanted every American to have access to health care. The Patients' Bill of Rights legislation was passed in this House earlier this year.

□ 1415

The bill has been stuck in conference since August. It is time to get that legislation finished. The bill we passed in August aims to improve care to expand patient protections, make health care more affordable for the many families that lack coverage, and hold HMOs accountable, allowing patients to challenge their insurance plans if they fail to deliver quality coverage.

We will have other initiatives. We must authorize the historic Welfare Reform Act, first passed in 1996. We will consider proposals to strengthen retirement security, including making prescription drugs more affordable and available to America's seniors.

We must also help our President in this historic fight against terrorism. Whether it be providing more resources for homeland security and getting more money for our armed services, whether it be the effort to prepare our Nation for biological and chemical terrorism, or our efforts to reform our insurance laws so that our Nation will be adequately prepared for the consequences of terrorist attacks, this Congress will do the right things for the American people.

Looking over the events of this last year, I cannot help but note the passing of several important Members of Congress: Joe Moakley, a great American from Massachusetts; Norm Sisisky, a wonderful person who served this House from Virginia; Floyd Spence, from South Carolina; and Julian Dixon, from California, all served their country with distinction, in different ways, but with the same sense of patriotic duty. They will be sorely missed in this House of Representatives.

In conclusion, let me report to you, Mr. Speaker, that this House of Representatives has served the people in a year of turbulence and war with distinction. I am proud of our efforts, and I look forward to an equally successful year in the second session of the 107th Congress.

Mr. Speaker, I would be remiss if I did not thank the people who make this Congress work, who are here day in and day out, in the wee hours of the morning, who enroll our bills, who make this institution a great institution; and also those people who in the times of terror and terrorist attack spent countless hours and days and weeks making this place available to the American people so that this Congress could do its work. I thank you.

God bless America.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has passed without amendment a bill and a concurrent resolution of the House of the following titles:

H.R. 1088. An act to amend the Securities Exchange Act of 1934 to reduce fees collected by the Securities and Exchange Commission, and for other purposes.

H. Con. Res. 295. Concurrent resolution providing for the sine die adjournment of the first session of the One Hundred Seventh Congress.

The message also announced that the Senate agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3061) ''An Act making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 2002, and for other purposes.''.

RECESS

The SPEAKER pro tempore (Mr. SIMPSON). Pursuant to clause 12 of rule I, the Chair declares the House in recess subject to the call of the Chair.

Accordingly (at 2 o'clock and 19 minutes p.m.), the House stood in recess subject to the call of the Chair.

□ 1702

AFTER RECESS

The recess having expired, the House was called to order at 5 o'clock and 2 minutes p.m.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has passed with an amendment to House amendment to Senate amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 2884. An act to amend the Internal Revenue Code of 1986 to provide tax relief for victims of the terrorist attacks against the United States on September 11, 2001.

The message also announced that the Senate agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3338) ''An Act making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes.''.

GENERAL LEAVE

Mr. DOOLITTLE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the topic of the out-of-order speech of the gentlewoman from California (Ms. PELOSI).

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

CONDITIONAL ADJOURNMENT OF THE HOUSE AND SENATE

Mr. THOMAS. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 4 p.m. on Friday, December 21, 2001, unless it sooner has received a message from the Senate transmitting its passage without amendment of House Joint Resolution 79, in which case the House shall stand adjourned

sine die pursuant to House Concurrent Resolution 295.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

VICTIMS OF TERRORISM RELIEF ACT OF 2001

Mr. THOMAS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 2884) to amend the Internal Revenue Code of 1986 to provide tax relief for victims of the terrorist attacks against the United States on September 11, 2001, with a Senate amendment to the House amendment to the Senate amendments thereto, and concur in the Senate amendment to the House amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment to the House amendment, as follows:

Senate Amendment to House Amendment to Senate Amendments:

In lieu of the matter proposed to be inserted by the House amendment to the text of the bill, insert:

SECTION 1. SHORT TITLE; ETC.

(a) SHORT TITLE.—This Act may be cited as the ''Victims of Terrorism Tax Relief Act of 2001''.

(b) AMENDMENT OF 1986 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1986.

(c) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

TITLE I——VICTIMS OF TERRORISM TAX RELIEF

Subtitle A—Relief Provisions for Victims of Terrorist Attacks

SEC. 101. INCOME TAXES OF VICTIMS OF TERRORIST ATTACKS.

(a) IN GENERAL.—Section 692 (relating to income taxes of members of Armed Forces on death) is amended by adding at the end the following new subsection:

''(d) INDIVIDUALS DYING AS A RESULT OF CERTAIN ATTACKS.—

''(1) IN GENERAL.—In the case of a specified terrorist victim, any tax imposed by this chapter shall not apply—

''(A) with respect to the taxable year in which falls the date of death, and

''(B) with respect to any prior taxable year in the period beginning with the last taxable year ending before the taxable year in which the wounds, injury, or illness referred to in paragraph (3) were incurred.

''(2) $10,000 MINIMUM BENEFIT.—If, but for this paragraph, the amount of tax not imposed by paragraph (1) with respect to a specified terrorist victim is less than $10,000, then such victim shall be treated as having made a payment against the tax imposed by this chapter for such victim's last taxable year in an amount equal to the excess of $10,000 over the amount of tax not so imposed.

''(3) TAXATION OF CERTAIN BENEFITS.—Subject to such rules as the Secretary may prescribe, paragraph (1) shall not apply to the amount of any tax imposed by this chapter which would be computed by only taking into account the items of income, gain, or other amounts attributable to—

''(A) deferred compensation which would have been payable after death if the individual had died other than as a specified terrorist victim, or

''(B) amounts payable in the taxable year which would not have been payable in such taxable year but for an action taken after September 11, 2001.

''(4) SPECIFIED TERRORIST VICTIM.—For purposes of this subsection, the term 'specified terrorist victim' means any decedent—

''(A) who dies as a result of wounds or injury incurred as a result of the terrorist attacks against the United States on April 19, 1995, or September 11, 2001, or

''(B) who dies as a result of illness incurred as a result of an attack involving anthrax occurring on or after September 11, 2001, and before January 1, 2002.

Such term shall not include any individual identified by the Attorney General to have been a participant or conspirator in any such attack or a representative of such an individual.''.

(b) CONFORMING AMENDMENTS.—

(1) Section 5(b)(1) is amended by inserting ''and victims of certain terrorist attacks'' before ''on death''.

(2) Section 6013(f)(2)(B) is amended by inserting ''and victims of certain terrorist attacks'' before ''on death''.

(c) CLERICAL AMENDMENTS.—

(1) The heading of section 692 is amended to read as follows:

''SEC. 692. INCOME TAXES OF MEMBERS OF ARMED FORCES AND VICTIMS OF CERTAIN TERRORIST ATTACKS ON DEATH.''.

(2) The item relating to section 692 in the table of sections for part II of subchapter J of chapter 1 is amended to read as follows:

''Sec. 692. Income taxes of members of Armed Forces and victims of certain terrorist attacks on death.''.

(d) EFFECTIVE DATE; WAIVER OF LIMITATIONS.—

(1) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending before, on, or after September 11, 2001.

(2) WAIVER OF LIMITATIONS.—If refund or credit of any overpayment of tax resulting from the amendments made by this section is prevented at any time before the close of the 1-year period beginning on the date of the enactment of this Act by the operation of any law or rule of law (including res judicata), such refund or credit may nevertheless be made or allowed if claim therefor is filed before the close of such period.

SEC. 102. EXCLUSION OF CERTAIN DEATH BENEFITS.

(a) IN GENERAL.—Section 101 (relating to certain death benefits) is amended by adding at the end the following new subsection:

''(i) CERTAIN EMPLOYEE DEATH BENEFITS PAYABLE BY REASON OF DEATH OF CERTAIN TERRORIST VICTIMS.—

''(1) IN GENERAL.—Gross income does not include amounts (whether in a single sum or otherwise) paid by an employer by reason of the death of an employee who is a specified terrorist victim (as defined in section 692(d)(4)).

''(2) LIMITATION.—

''(A) IN GENERAL.—Subject to such rules as the Secretary may prescribe, paragraph (1) shall not apply to amounts which would have been payable after death if the individual had died other than as a specified terrorist victim (as so defined).

''(B) EXCEPTION.—Subparagraph (A) shall not apply to incidental death benefits paid from a plan described in section 401(a) and exempt from tax under section 501(a).

''(3) TREATMENT OF SELF-EMPLOYED INDIVIDUALS.—For purposes of paragraph (1), the term 'employee' includes a self-employed individual (as defined in section 401(c)(1)).''.

(b) EFFECTIVE DATE; WAIVER OF LIMITATIONS.—

(1) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years ending before, on, or after September 11, 2001.

(2) WAIVER OF LIMITATIONS.—If refund or credit of any overpayment of tax resulting from the amendments made by this section is prevented at any time before the close of the 1-year period beginning on the date of the enactment of this Act by the operation of any law or rule of law (including res judicata), such refund or credit may nevertheless be made or allowed if claim therefor is filed before the close of such period.

SEC. 103. ESTATE TAX REDUCTION.

(a) IN GENERAL.—Section 2201 is amended to read as follows:

''SEC. 2201. COMBAT ZONE-RELATED DEATHS OF MEMBERS OF THE ARMED FORCES AND DEATHS OF VICTIMS OF CERTAIN TERRORIST ATTACKS.

''(a) IN GENERAL.—Unless the executor elects not to have this section apply, in applying sections 2001 and 2101 to the estate of a qualified decedent, the rate schedule set forth in subsection (c) shall be deemed to be the rate schedule set forth in section 2001(c).

''(b) QUALIFIED DECEDENT.—For purposes of this section, the term 'qualified decedent' means—

''(1) any citizen or resident of the United States dying while in active service of the Armed Forces of the United States, if such decedent—

''(A) was killed in action while serving in a combat zone, as determined under section 112(c), or

''(B) died as a result of wounds, disease, or injury suffered while serving in a combat zone (as determined under section 112(c)), and while in the line of duty, by reason of a hazard to which such decedent was subjected as an incident of such service, and

''(2) any specified terrorist victim (as defined in section 692(d)(4)).

''(c) RATE SCHEDULE.—

"If the amount with respect to which the tentative tax to be computed is:	The tentative tax is:
Not over $150,000	1 percent of the amount by which such amount exceeds $100,000.
Over $150,000 but not over $200,000.	$500 plus 2 percent of the excess over $150,000.
Over $200,000 but not over $300,000.	$1,500 plus 3 percent of the excess over $200,000.
Over $300,000 but not over $500,000.	$4,500 plus 4 percent of the excess over $300,000.
Over $500,000 but not over $700,000.	$12,500 plus 5 percent of the excess over $500,000.
Over $700,000 but not over $900,000.	$22,500 plus 6 percent of the excess over $700,000.
Over $900,000 but not over $1,100,000.	$34,500 plus 7 percent of the excess over $900,000.
Over $1,100,000 but not over $1,600,000.	$48,500 plus 8 percent of the excess over $1,100,000.
Over $1,600,000 but not over $2,100,000.	$88,500 plus 9 percent of the excess over $1,600,000.
Over $2,100,000 but not over $2,600,000.	$133,500 plus 10 percent of the excess over $2,100,000.
Over $2,600,000 but not over $3,100,000.	$183,500 plus 11 percent of the excess over $2,600,000.
Over $3,100,000 but not over $3,600,000.	$238,500 plus 12 percent of the excess over $3,100,000.
Over $3,600,000 but not over $4,100,000.	$298,500 plus 13 percent of the excess over $3,600,000.
Over $4,100,000 but not over $5,100,000.	$363,500 plus 14 percent of the excess over $4,100,000.
Over $5,100,000 but not over $6,100,000.	$503,500 plus 15 percent of the excess over $5,100,000.
Over $6,100,000 but not over $7,100,000.	$653,500 plus 16 percent of the excess over $6,100,000.
Over $7,100,000 but not over $8,100,000.	$813,500 plus 17 percent of the excess over $7,100,000.
Over $8,100,000 but not over $9,100,000.	$983,500 plus 18 percent of the excess over $8,100,000.
Over $9,100,000 but not over $10,100,000.	$1,163,500 plus 19 percent of the excess over $9,100,000.
Over $10,100,000	$1,353,500 plus 20 percent of the excess over $10,100,000.

''(d) DETERMINATION OF UNIFIED CREDIT.—In the case of an estate to which this section applies, subsection (a) shall not apply in determining the credit under section 2010.''.

(b) CONFORMING AMENDMENTS.—

(1) Section 2011 is amended by striking subsection (d) and by redesignating subsections (e), (f), and (g) as subsections (d), (e), and (f), respectively.

(2) Section 2053(d)(3)(B) is amended by striking ''section 2011(e)'' and inserting ''section 2011(d)''.

(3) Paragraph (9) of section 532(c) of the Economic Growth and Tax Relief Reconciliation Act of 2001 is repealed.

(c) CLERICAL AMENDMENT.—The item relating to section 2201 in the table of sections for subchapter C of chapter 11 is amended to read as follows:

''Sec. 2201. Combat zone-related deaths of members of the Armed Forces and deaths of victims of certain terrorist attacks.''.

(d) EFFECTIVE DATE; WAIVER OF LIMITATIONS.—

(1) EFFECTIVE DATE.—The amendments made by this section shall apply to estates of decedents—

(A) dying on or after September 11, 2001, and

(B) in the case of individuals dying as a result of the April 19, 1995, terrorist attack, dying on or after April 19, 1995.

(2) WAIVER OF LIMITATIONS.—If refund or credit of any overpayment of tax resulting from the amendments made by this section is prevented at any time before the close of the 1-year period beginning on the date of the enactment of this Act by the operation of any law or rule of law (including res judicata), such refund or credit may nevertheless be made or allowed if claim therefor is filed before the close of such period.

SEC. 104. PAYMENTS BY CHARITABLE ORGANIZATIONS TREATED AS EXEMPT PAYMENTS.

(a) IN GENERAL.—For purposes of the Internal Revenue Code of 1986—

(1) payments made by an organization described in section 501(c)(3) of such Code by reason of the death, injury, wounding, or illness of an individual incurred as the result of the terrorist attacks against the United States on September 11, 2001, or an attack involving anthrax occurring on or after September 11, 2001, and before January 1, 2002, shall be treated as related to the purpose or function constituting the basis for such organization's exemption under section 501 of such Code if such payments are made in good faith using a reasonable and objective formula which is consistently applied, and

(2) in the case of a private foundation (as defined in section 509 of such Code), any payment described in paragraph (1) shall not be treated as made to a disqualified person for purposes of section 4941 of such Code.

(b) EFFECTIVE DATE.—This section shall apply to payments made on or after September 11, 2001.

SEC. 105. EXCLUSION OF CERTAIN CANCELLATIONS OF INDEBTEDNESS.

(a) IN GENERAL.—For purposes of the Internal Revenue Code of 1986—

(1) gross income shall not include any amount which (but for this section) would be includible in gross income by reason of the discharge (in whole or in part) of indebtedness of any taxpayer if the discharge is by reason of the death of an individual incurred as the result of the terrorist attacks against the United States on September 11, 2001, or as the result of illness incurred as a result of an attack involving anthrax occurring on or after September 11, 2001, and before January 1, 2002, and

(2) return requirements under section 6050P of such Code shall not apply to any discharge described in paragraph (1).

(b) EFFECTIVE DATE.—This section shall apply to discharges made on or after September 11, 2001, and before January 1, 2002.

Subtitle B—Other Relief Provisions

SEC. 111. EXCLUSION FOR DISASTER RELIEF PAYMENTS.

(a) IN GENERAL.—Part III of subchapter B of chapter 1 (relating to items specifically excluded from gross income) is amended by redesignating section 139 as section 140 and inserting after section 138 the following new section:

''SEC. 139. DISASTER RELIEF PAYMENTS.

''(a) GENERAL RULE.—Gross income shall not include any amount received by an individual as a qualified disaster relief payment.

''(b) QUALIFIED DISASTER RELIEF PAYMENT DEFINED.—For purposes of this section, the term 'qualified disaster relief payment' means any amount paid to or for the benefit of an individual—

''(1) to reimburse or pay reasonable and necessary personal, family, living, or funeral expenses incurred as a result of a qualified disaster,

''(2) to reimburse or pay reasonable and necessary expenses incurred for the repair or rehabilitation of a personal residence or repair or replacement of its contents to the extent that the need for such repair, rehabilitation, or replacement is attributable to a qualified disaster,

''(3) by a person engaged in the furnishing or sale of transportation as a common carrier by reason of the death or personal physical injuries incurred as a result of a qualified disaster, or

''(4) if such amount is paid by a Federal, State, or local government, or agency or instrumentality thereof, in connection with a qualified disaster in order to promote the general welfare,

but only to the extent any expense compensated by such payment is not otherwise compensated for by insurance or otherwise.

''(c) QUALIFIED DISASTER DEFINED.—For purposes of this section, the term 'qualified disaster' means—

''(1) a disaster which results from a terroristic or military action (as defined in section 692(c)(2)),

''(2) a Presidentially declared disaster (as defined in section 1033(h)(3)),

''(3) a disaster which results from an accident involving a common carrier, or from any other event, which is determined by the Secretary to be of a catastrophic nature, or

''(4) with respect to amounts described in subsection (b)(4), a disaster which is determined by an applicable Federal, State, or local authority (as determined by the Secretary) to warrant assistance from the Federal, State, or local government or agency or instrumentality thereof.

''(d) COORDINATION WITH EMPLOYMENT TAXES.—For purposes of chapter 2 and subtitle C, a qualified disaster relief payment shall not be treated as net earnings from self-employment, wages, or compensation subject to tax.

''(e) NO RELIEF FOR CERTAIN INDIVIDUALS.—Subsections (a) and (f) shall not apply with respect to any individual identified by the Attorney General to have been a participant or conspirator in a terroristic action (as so defined), or a representative of such individual.

''(f) EXCLUSION OF CERTAIN ADDITIONAL PAYMENTS.—Gross income shall not include any amount received as payment under section 406 of the Air Transportation Safety and System Stabilization Act.''

(b) CONFORMING AMENDMENTS.—The table of sections for part III of subchapter B of chapter 1 is amended by striking the item relating to section 139 and inserting the following new items:

''Sec. 139. Disaster relief payments.

''Sec. 140. Cross references to other Acts.''.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending on or after September 11, 2001.

SEC. 112. AUTHORITY TO POSTPONE CERTAIN DEADLINES AND REQUIRED ACTIONS.

(a) EXPANSION OF AUTHORITY RELATING TO DISASTERS AND TERRORISTIC OR MILITARY ACTIONS.—Section 7508A is amended to read as follows:

''SEC. 7508A. AUTHORITY TO POSTPONE CERTAIN DEADLINES BY REASON OF PRESIDENTIALLY DECLARED DISASTER OR TERRORISTIC OR MILITARY ACTIONS.

''(a) IN GENERAL.—In the case of a taxpayer determined by the Secretary to be affected by a Presidentially declared disaster (as defined in section 1033(h)(3)) or a terroristic or military action (as defined in section 692(c)(2)), the Secretary may specify a period of up to one year that may be disregarded in determining, under the internal revenue laws, in respect of any tax liability of such taxpayer—

''(1) whether any of the acts described in paragraph (1) of section 7508(a) were performed within the time prescribed therefor (determined without regard to extension under any other provision of this subtitle for periods after the date (determined by the Secretary) of such disaster or action),

''(2) the amount of any interest, penalty, additional amount, or addition to the tax for periods after such date, and

''(3) the amount of any credit or refund.

''(b) SPECIAL RULES REGARDING PENSIONS, ETC.—In the case of a pension or other employee benefit plan, or any sponsor, administrator, participant, beneficiary, or other person with respect to such plan, affected by a disaster or action described in subsection (a), the Secretary may specify a period of up to one year which may be disregarded in determining the date by which any action is required or permitted to be completed under this title. No plan shall be treated as failing to be operated in accordance with the terms of the plan solely as the result of disregarding any period by reason of the preceding sentence.

''(c) SPECIAL RULES FOR OVERPAYMENTS.—The rules of section 7508(b) shall apply for purposes of this section.''.

(b) CLARIFICATION OF SCOPE OF ACTS SECRETARY MAY POSTPONE.—Section 7508(a)(1)(K) (relating to time to be disregarded) is amended by striking ''in regulations prescribed under this section''.

(c) CONFORMING AMENDMENTS TO ERISA.—

(1) Part 5 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1131 et seq.) is amended by adding at the end the following new section:

''SEC. 518. AUTHORITY TO POSTPONE CERTAIN DEADLINES BY REASON OF PRESIDENTIALLY DECLARED DISASTER OR TERRORISTIC OR MILITARY ACTIONS.

''In the case of a pension or other employee benefit plan, or any sponsor, administrator, participant, beneficiary, or other person with respect to such plan, affected by a Presidentially declared disaster (as defined in section 1033(h)(3) of the Internal Revenue Code of 1986) or a terroristic or military action (as defined in section 692(c)(2) of such Code), the Secretary may, notwithstanding any other provision of law, prescribe, by notice or otherwise, a period of up to one year which may be disregarded in determining the date by which any action is required or permitted to be completed under this Act. No plan shall be treated as failing to be operated in accordance with the terms of the plan solely as the result of disregarding any period by reason of the preceding sentence.''.

(2) Section 4002 of Employee Retirement Income Security Act of 1974 (29 U.S.C. 1302) is amended by adding at the end the following new subsection:

''(i) SPECIAL RULES REGARDING DISASTERS, ETC.—In the case of a pension or other employee benefit plan, or any sponsor, administrator, participant, beneficiary, or other person with respect to such plan, affected by a Presidentially declared disaster (as defined in section 1033(h)(3) of the Internal Revenue Code of 1986) or a terroristic or military action (as defined in section 692(c)(2) of such Code), the corporation may, notwithstanding any other provision of law, prescribe, by notice or otherwise, a period of up to one year which may be disregarded in determining the date by which any action is required or permitted to be completed under this Act. No plan shall be treated as failing to be operated in accordance with the terms of the plan solely as the result of disregarding any period by reason of the preceding sentence.''.

(d) ADDITIONAL CONFORMING AMENDMENTS.—

(1) Section 6404 is amended—

(A) by striking subsection (h),

(B) by redesignating subsection (i) as subsection (h), and

(C) by adding at the end the following new subsection:

''(i) CROSS REFERENCE.—

''For authority to suspend running of interest, etc. by reason of Presidentially declared disaster or terroristic or military action, see section 7508A.''.

(2) Section 6081(c) is amended to read as follows:

''(c) CROSS REFERENCES.—

''For time for performing certain acts postponed by reason of war, see section 7508, and by reason of Presidentially declared disaster or terroristic or military action, see section 7508A.''.

(3) Section 6161(d) is amended by adding at the end the following new paragraph:

''(3) POSTPONEMENT OF CERTAIN ACTS.—

''For time for performing certain acts postponed by reason of war, see section 7508, and by reason of Presidentially declared disaster or terroristic or military action, see section 7508A.''.

(e) CLERICAL AMENDMENTS.—

(1) The item relating to section 7508A in the table of sections for chapter 77 is amended to read as follows:

''Sec. 7508A. Authority to postpone certain deadlines by reason of Presidentially declared disaster or terroristic or military actions.''.

(2) The table of contents for the Employee Retirement Income Security Act of 1974 is amended by inserting after the item relating to section 517 the following new item:

''Sec. 518. Authority to postpone certain deadlines by reason of Presidentially declared disaster or terroristic or military actions.''.

(f) EFFECTIVE DATE.—The amendments made by this section shall apply to disasters and terroristic or military actions occurring on or after September 11, 2001, with respect to any action of the Secretary of the Treasury, the Secretary of Labor, or the Pension Benefit Guaranty Corporation occurring on or after the date of the enactment of this Act.

SEC. 113. APPLICATION OF CERTAIN PROVISIONS TO TERRORISTIC OR MILITARY ACTIONS.

(a) DISABILITY INCOME.—Section 104(a)(5) (relating to compensation for injuries or sickness) is amended by striking ''a violent attack'' and all that follows through the period and inserting ''a terroristic or military action (as defined in section 692(c)(2)).''.

(b) EXEMPTION FROM INCOME TAX FOR CERTAIN MILITARY OR CIVILIAN EMPLOYEES.—Section 692(c) is amended—

(1) by striking ''outside the United States'' in paragraph (1), and

(2) by striking ''SUSTAINED OVERSEAS'' in the heading.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending on or after September 11, 2001.

SEC. 114. CLARIFICATION OF DUE DATE FOR AIRLINE EXCISE TAX DEPOSITS.

(a) IN GENERAL.—Paragraph (3) of section 301(a) of the Air Transportation Safety and System Stabilization Act (Public Law 107–42) is amended to read as follows:

''(3) AIRLINE-RELATED DEPOSIT.—For purposes of this subsection, the term 'airline-related deposit' means any deposit of taxes imposed by subchapter C of chapter 33 of such Code (relating to transportation by air).''.

(b) EFFECTIVE DATE.—The amendment made by this section shall take effect as if included in section 301 of the Air Transportation Safety and System Stabilization Act (Public Law 107–42).

SEC. 115. TREATMENT OF CERTAIN STRUCTURED SETTLEMENT PAYMENTS.

(a) IN GENERAL.—Subtitle E is amended by adding at the end the following new chapter:

''CHAPTER 55—STRUCTURED SETTLEMENT FACTORING TRANSACTIONS

''Sec. 5891. Structured settlement factoring transactions.

''SEC. 5891. STRUCTURED SETTLEMENT FACTORING TRANSACTIONS.

''(a) IMPOSITION OF TAX.—There is hereby imposed on any person who acquires directly or indirectly structured settlement payment rights in a structured settlement factoring transaction a tax equal to 40 percent of the factoring discount as determined under subsection (c)(4) with respect to such factoring transaction.

''(b) EXCEPTION FOR CERTAIN APPROVED TRANSACTIONS.—

''(1) IN GENERAL.—The tax under subsection (a) shall not apply in the case of a structured settlement factoring transaction in which the transfer of structured settlement payment rights is approved in advance in a qualified order.

''(2) QUALIFIED ORDER.—For purposes of this section, the term 'qualified order' means a final order, judgment, or decree which—

''(A) finds that the transfer described in paragraph (1)—

''(i) does not contravene any Federal or State statute or the order of any court or responsible administrative authority, and

''(ii) is in the best interest of the payee, taking into account the welfare and support of the payee's dependents, and

''(B) is issued—

''(i) under the authority of an applicable State statute by an applicable State court, or

''(ii) by the responsible administrative authority (if any) which has exclusive jurisdiction over the underlying action or proceeding which was resolved by means of the structured settlement.

''(3) APPLICABLE STATE STATUTE.—For purposes of this section, the term 'applicable State statute' means a statute providing for the entry of an order, judgment, or decree described in paragraph (2)(A) which is enacted by—

''(A) the State in which the payee of the structured settlement is domiciled, or

''(B) if there is no statute described in subparagraph (A), the State in which either the party to the structured settlement (including an assignee under a qualified assignment under section 130) or the person issuing the funding asset for the structured settlement is domiciled or has its principal place of business.

''(4) APPLICABLE STATE COURT.—For purposes of this section—

''(A) IN GENERAL.—The term 'applicable State court' means, with respect to any applicable State statute, a court of the State which enacted such statute.

''(B) SPECIAL RULE.—In the case of an applicable State statute described in paragraph (3)(B), such term also includes a court of the State in which the payee of the structured settlement is domiciled.

''(5) QUALIFIED ORDER DISPOSITIVE.—A qualified order shall be treated as dispositive for purposes of the exception under this subsection.

''(c) DEFINITIONS.—For purposes of this section—

''(1) STRUCTURED SETTLEMENT.—The term 'structured settlement' means an arrangement—

''(A) which is established by—

''(i) suit or agreement for the periodic payment of damages excludable from the gross income of the recipient under section 104(a)(2), or

''(ii) agreement for the periodic payment of compensation under any workers' compensation law excludable from the gross income of the recipient under section 104(a)(1), and

''(B) under which the periodic payments are—

''(i) of the character described in subparagraphs (A) and (B) of section 130(c)(2), and

''(ii) payable by a person who is a party to the suit or agreement or to the workers' compensation claim or by a person who has assumed the liability for such periodic payments under a qualified assignment in accordance with section 130.

''(2) STRUCTURED SETTLEMENT PAYMENT RIGHTS.—The term 'structured settlement payment rights' means rights to receive payments under a structured settlement.

''(3) STRUCTURED SETTLEMENT FACTORING TRANSACTION.—

''(A) IN GENERAL.—The term 'structured settlement factoring transaction' means a transfer of structured settlement payment rights (including portions of structured settlement payments) made for consideration by means of sale, assignment, pledge, or other form of encumbrance or alienation for consideration.

''(B) EXCEPTION.—Such term shall not include—

''(i) the creation or perfection of a security interest in structured settlement payment rights under a blanket security agreement entered into with an insured depository institution in the absence of any action to redirect the structured settlement payments to such institution (or agent or successor thereof) or otherwise to enforce such blanket security interest as against the structured settlement payment rights, or

''(ii) a subsequent transfer of structured settlement payment rights acquired in a structured settlement factoring transaction.

''(4) FACTORING DISCOUNT.—The term 'factoring discount' means an amount equal to the excess of—

''(A) the aggregate undiscounted amount of structured settlement payments being acquired in the structured settlement factoring transaction, over

''(B) the total amount actually paid by the acquirer to the person from whom such structured settlement payments are acquired.

''(5) RESPONSIBLE ADMINISTRATIVE AUTHORITY.—The term 'responsible administrative authority' means the administrative authority which had jurisdiction over the underlying action or proceeding which was resolved by means of the structured settlement.

''(6) STATE.—The term 'State' includes the Commonwealth of Puerto Rico and any possession of the United States.

''(d) COORDINATION WITH OTHER PROVISIONS.—

''(1) IN GENERAL.—If the applicable requirements of sections 72, 104(a)(1), 104(a)(2), 130, and 461(h) were satisfied at the time the structured settlement involving structured settlement payment rights was entered into, the subsequent occurrence of a structured settlement factoring transaction shall not affect the application of the provisions of such sections to the parties to the structured settlement (including an assignee under a qualified assignment under section 130) in any taxable year.

''(2) NO WITHHOLDING OF TAX.—The provisions of section 3405 regarding withholding of tax shall not apply to the person making the payments in the event of a structured settlement factoring transaction.''.

(b) CLERICAL AMENDMENT.—The table of chapters for subtitle E is amended by adding at the end the following new item:

''Chapter 55. Structured settlement factoring transactions.''.

(c) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by this section (other than the provisions of section 5891(d) of the Internal Revenue Code of 1986, as added by this section) shall apply to structured settlement factoring transactions (as defined in section 5891(c) of such Code (as so added)) entered into on or after the 30th day following the date of the enactment of this Act.

(2) CLARIFICATION OF EXISTING LAW.—Section 5891(d) of such Code (as so added) shall apply to structured settlement factoring transactions (as defined in section 5891(c) of such Code (as so added)) entered into before, on, or after such 30th day.

(3) TRANSITION RULE.—In the case of a structured settlement factoring transaction entered into during the period beginning on the 30th day following the date of the enactment of this Act and ending on July 1, 2002, no tax shall be imposed under section 5891(a) of such Code if—

(A) the structured settlement payee is domiciled in a State (or possession of the United States) which has not enacted a statute providing that the structured settlement factoring transaction is ineffective unless the transaction has been approved by an order, judgment, or decree of a court (or where applicable, a responsible administrative authority) which finds that such transaction—

(i) does not contravene any Federal or State statute or the order of any court (or responsible administrative authority), and

(ii) is in the best interest of the structured settlement payee or is appropriate in light of a hardship faced by the payee, and

(B) the person acquiring the structured settlement payment rights discloses to the structured settlement payee in advance of the structured settlement factoring transaction the amounts and due dates of the payments to be transferred, the aggregate amount to be transferred, the consideration to be received by the structured settlement payee for the transferred payments, the discounted present value of the transferred payments (including the present value as determined in the manner described in section 7520 of such Code), and the expenses required under the terms of the structured settlement factoring transaction to be paid by the structured settlement payee or deducted from the proceeds of such transaction.

SEC. 116. PERSONAL EXEMPTION DEDUCTION FOR CERTAIN DISABILITY TRUSTS.

(a) IN GENERAL.—Subsection (b) of section 642 (relating to deduction for personal exemption) is amended to read as follows:

''(b) DEDUCTION FOR PERSONAL EXEMPTION.—

''(1) ESTATES.—An estate shall be allowed a deduction of $600.

''(2) TRUSTS.—

''(A) IN GENERAL.—Except as otherwise provided in this paragraph, a trust shall be allowed a deduction of $100.

''(B) TRUSTS DISTRIBUTING INCOME CURRENTLY.—A trust which, under its governing instrument, is required to distribute all of its income currently shall be allowed a deduction of $300.

''(C) DISABILITY TRUSTS.—

''(i) IN GENERAL.—A qualified disability trust shall be allowed a deduction equal to the exemption amount under section 151(d), determined—

''(I) by treating such trust as an individual described in section 151(d)(3)(C)(iii), and

''(II) by applying section 67(e) (without the reference to section 642(b)) for purposes of determining the adjusted gross income of the trust.

''(ii) QUALIFIED DISABILITY TRUST.—For purposes of clause (i), the term 'qualified disability trust' means any trust if—

''(I) such trust is a disability trust described in subsection (c)(2)(B)(iv) of section 1917 of the Social Security Act (42 U.S.C. 1396p), and

''(II) all of the beneficiaries of the trust as of the close of the taxable year are determined by the Commissioner of Social Security to have been disabled (within the meaning of section 1614(a)(3) of the Social Security Act, 42 U.S.C. 1382c(a)(3)) for some portion of such year.

A trust shall not fail to meet the requirements of subclause (II) merely because the corpus of the trust may revert to a person who is not so disabled after the trust ceases to have any beneficiary who is so disabled.''

''(3) DEDUCTIONS IN LIEU OF PERSONAL EXEMPTION.—The deductions allowed by this subsection shall be in lieu of the deductions allowed under section 151 (relating to deduction for personal exemption).''.

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years ending on or after September 11, 2001.

TITLE II—DISCLOSURE OF TAX INFORMATION IN TERRORISM AND NATIONAL SECURITY INVESTIGATIONS

SEC. 201. DISCLOSURE OF TAX INFORMATION IN TERRORISM AND NATIONAL SECURITY INVESTIGATIONS.

(a) DISCLOSURE WITHOUT A REQUEST OF INFORMATION RELATING TO TERRORIST ACTIVITIES, ETC.—Paragraph (3) of section 6103(i) (relating to disclosure of return information to apprise appropriate officials of criminal activities or emergency circumstances) is amended by adding at the end the following new subparagraph:

''(C) TERRORIST ACTIVITIES, ETC.—

''(i) IN GENERAL.—Except as provided in paragraph (6), the Secretary may disclose in writing return information (other than taxpayer return information) that may be related to a terrorist incident, threat, or activity to the extent necessary to apprise the head of the appropriate Federal law enforcement agency responsible for investigating or responding to such terrorist incident, threat, or activity. The head of the agency may disclose such return information to officers and employees of such agency to the extent necessary to investigate or respond to such terrorist incident, threat, or activity.

''(ii) DISCLOSURE TO THE DEPARTMENT OF JUSTICE.—Returns and taxpayer return information may also be disclosed to the Attorney General under clause (i) to the extent necessary for, and solely for use in preparing, an application under paragraph (7)(D).

''(iii) TAXPAYER IDENTITY.—For purposes of this subparagraph, a taxpayer's identity shall not be treated as taxpayer return information.

''(iv) TERMINATION.—No disclosure may be made under this subparagraph after December 31, 2003.''.

(b) DISCLOSURE UPON REQUEST OF INFORMATION RELATING TO TERRORIST ACTIVITIES, ETC.—Subsection (i) of section 6103 (relating to disclosure to Federal officers or employees for administration of Federal laws not relating to tax administration) is amended by redesignating paragraph (7) as paragraph (8) and by inserting after paragraph (6) the following new paragraph:

''(7) DISCLOSURE UPON REQUEST OF INFORMATION RELATING TO TERRORIST ACTIVITIES, ETC.—

''(A) DISCLOSURE TO LAW ENFORCEMENT AGENCIES.—

''(i) IN GENERAL.—Except as provided in paragraph (6), upon receipt by the Secretary of a written request which meets the requirements of clause (iii), the Secretary may disclose return information (other than taxpayer return information) to officers and employees of any Federal law enforcement

agency who are personally and directly engaged in the response to or investigation of any terrorist incident, threat, or activity.

''(ii) DISCLOSURE TO STATE AND LOCAL LAW ENFORCEMENT AGENCIES.—The head of any Federal law enforcement agency may disclose return information obtained under clause (i) to officers and employees of any State or local law enforcement agency but only if such agency is part of a team with the Federal law enforcement agency in such response or investigation and such information is disclosed only to officers and employees who are personally and directly engaged in such response or investigation.

''(iii) REQUIREMENTS.—A request meets the requirements of this clause if—

''(I) the request is made by the head of any Federal law enforcement agency (or his delegate) involved in the response to or investigation of any terrorist incident, threat, or activity, and

''(II) the request sets forth the specific reason or reasons why such disclosure may be relevant to a terrorist incident, threat, or activity.

''(iv) LIMITATION ON USE OF INFORMATION.—Information disclosed under this subparagraph shall be solely for the use of the officers and employees to whom such information is disclosed in such response or investigation.

''(B) DISCLOSURE TO INTELLIGENCE AGENCIES.—

''(i) IN GENERAL.—Except as provided in paragraph (6), upon receipt by the Secretary of a written request which meets the requirements of clause (ii), the Secretary may disclose return information (other than taxpayer return information) to those officers and employees of the Department of Justice, the Department of the Treasury, and other Federal intelligence agencies who are personally and directly engaged in the collection or analysis of intelligence and counterintelligence information or investigation concerning any terrorist incident, threat, or activity. For purposes of the preceding sentence, the information disclosed under the preceding sentence shall be solely for the use of such officers and employees in such investigation, collection, or analysis.

''(ii) REQUIREMENTS.—A request meets the requirements of this subparagraph if the request—

''(I) is made by an individual described in clause (iii), and

''(II) sets forth the specific reason or reasons why such disclosure may be relevant to a terrorist incident, threat, or activity.

''(iii) REQUESTING INDIVIDUALS.—An individual described in this subparagraph is an individual—

''(I) who is an officer or employee of the Department of Justice or the Department of the Treasury who is appointed by the President with the advice and consent of the Senate or who is the Director of the United States Secret Service, and

''(II) who is responsible for the collection and analysis of intelligence and counterintelligence information concerning any terrorist incident, threat, or activity.

''(iv) TAXPAYER IDENTITY.—For purposes of this subparagraph, a taxpayer's identity shall not be treated as taxpayer return information.

''(C) DISCLOSURE UNDER EX PARTE ORDERS.—

''(i) IN GENERAL.—Except as provided in paragraph (6), any return or return information with respect to any specified taxable period or periods shall, pursuant to and upon the grant of an ex parte order by a Federal district court judge or magistrate under clause (ii), be open (but only to the extent necessary as provided in such order) to inspection by, or disclosure to, officers and employees of any Federal law enforcement agency or Federal intelligence agency who are personally and directly engaged in any investigation, response to, or analysis of intelligence and counterintelligence information concerning any terrorist incident, threat, or activity. Return or return information opened to inspection or disclosure pursuant to the preceding sentence shall be solely for the use of such officers and employees in the investigation, response, or analysis, and in any judicial, administrative, or grand jury proceedings, pertaining to such terrorist incident, threat, or activity.

''(ii) APPLICATION FOR ORDER.—The Attorney General, the Deputy Attorney General, the Associate Attorney General, any Assistant Attorney General, or any United States attorney may authorize an application to a Federal district court judge or magistrate for the order referred to in clause (i). Upon such application, such judge or magistrate may grant such order if he determines on the basis of the facts submitted by the applicant that—

''(I) there is reasonable cause to believe, based upon information believed to be reliable, that the return or return information may be relevant to a matter relating to such terrorist incident, threat, or activity, and

''(II) the return or return information is sought exclusively for use in a Federal investigation, analysis, or proceeding concerning any terrorist incident, threat, or activity.

''(D) SPECIAL RULE FOR EX PARTE DISCLOSURE BY THE IRS.—

''(i) IN GENERAL.—Except as provided in paragraph (6), the Secretary may authorize an application to a Federal district court judge or magistrate for the order referred to in subparagraph (C)(i). Upon such application, such judge or magistrate may grant such order if he determines on the basis of the facts submitted by the applicant that the requirements of subparagraph (C)(ii)(I) are met.

''(ii) LIMITATION ON USE OF INFORMATION.—Information disclosed under clause (i)—

''(I) may be disclosed only to the extent necessary to apprise the head of the appropriate Federal law enforcement agency responsible for investigating or responding to a terrorist incident, threat, or activity, and

''(II) shall be solely for use in a Federal investigation, analysis, or proceeding concerning any terrorist incident, threat, or activity.

The head of such Federal agency may disclose such information to officers and employees of such agency to the extent necessary to investigate or respond to such terrorist incident, threat, or activity.

''(E) TERMINATION.—No disclosure may be made under this paragraph after December 31, 2003.''.

(c) CONFORMING AMENDMENTS.—

(1) Section 6103(a)(2) is amended by inserting ''any local law enforcement agency receiving information under subsection (i)(7)(A),'' after ''State,''.

(2) Section 6103(b) is amended by adding at the end the following new paragraph:

''(11) TERRORIST INCIDENT, THREAT, OR ACTIVITY.—The term 'terrorist incident, threat, or activity' means an incident, threat, or activity involving an act of domestic terrorism (as defined in section 2331(5) of title 18, United States Code) or international terrorism (as defined in section 2331(1) of such title).''.

(3) The heading of section 6103(i)(3) is amended by inserting ''OR TERRORIST'' after ''CRIMINAL''.

(4) Paragraph (4) of section 6103(i) is amended—

(A) in subparagraph (A) by inserting ''or (7)(C)'' after ''paragraph (1)'', and

(B) in subparagraph (B) by striking ''or (3)(A)'' and inserting ''(3)(A) or (C), or (7)''.

(5) Paragraph (6) of section 6103(i) is amended—

(A) by striking ''(3)(A)'' and inserting ''(3)(A) or (C)'', and

(B) by striking ''or (7)'' and inserting ''(7), or (8)''.

(6) Section 6103(p)(3) is amended—

(A) in subparagraph (A) by striking ''(7)(A)(ii)'' and inserting ''(8)(A)(ii)'', and

(B) in subparagraph (C) by striking ''(i)(3)(B)(i)'' and inserting ''(i)(3)(B)(i) or (7)(A)(ii)''.

(7) Section 6103(p)(4) is amended—

(A) in the matter preceding subparagraph (A)—

(i) by striking ''or (5),'' the first place it appears and inserting ''(5), or (7),'', and

(ii) by striking ''(i)(3)(B)(i),'' and inserting ''(i)(3)(B)(i) or (7)(A)(ii),'', and

(B) in subparagraph (F)(ii) by striking ''or (5),'' the first place it appears and inserting ''(5) or (7),''.

(8) Section 6103(p)(6)(B)(i) is amended by striking ''(i)(7)(A)(ii)'' and inserting ''(i)(8)(A)(ii)''.

(9) Section 6105(b) is amended—

(A) by striking ''or'' at the end of paragraph (2),

(B) by striking ''paragraphs (1) or (2)'' in paragraph (3) and inserting ''paragraph (1), (2), or (3)'',

(C) by redesignating paragraph (3) as paragraph (4), and

(D) by inserting after paragraph (2) the following new paragraph:

''(3) to the disclosure of tax convention information on the same terms as return information may be disclosed under paragraph (3)(C) or (7) of section 6103(i), except that in the case of tax convention information provided by a foreign government, no disclosure may be made under this paragraph without the written consent of the foreign government, or''.

Mr. THOMAS (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment to the House amendment to the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER. Is there objection to the initial request of the gentleman from California?

There was no objection.

The SPEAKER. The gentleman from California (Mr. THOMAS) is recognized for 1 hour.

Mr. THOMAS. Mr. Speaker, I yield myself such time as I may consume.

I do want to note that the final act of the Senate in this year of 2001 and the final act of the House in this year of 2001 was in fact a very feeble gesture to those victims of terrorism that fundamentally changed our lives on September 11. And notwithstanding the difficulties of a democratic government, in which decisions are made quantitatively, as we close for this holiday season, the House and the Senate want this to be a gesture, small though it may be, to the victims of September 11.

Finally, Mr. Speaker, on behalf of all the Members of the House of Representatives, I wish to extend to the constitutional head of the House of Representatives, the Speaker of the

House of Representatives, and his family, a very merry holiday, happy Christmas, and a good new year.

The SPEAKER. Thank you.

Without objection, the Senate amendment to the House amendment is concurred in.

There was no objection.

A motion to reconsider was laid on the table.

The SPEAKER. Under a previous order of the House, the gentleman from Maryland (Mr. HOYER) is recognized for 5 minutes.

THANKING THE STAFF

Mr. HOYER. Mr. Speaker, as the first session of the 107th Congress draws to a close, I wish to thank the staff for their assistance throughout this eventful year. None of us could discharge our responsibilities without the help and support of the staff.

Let me begin by expressing gratitude to the employees of the Architect of the Capitol, who maintain the Capitol buildings and grounds. Without the vital work of engineers, carpenters, painters, electricians and others, especially the custodians who clean our offices each night, we could not work. AoC employees do a wonderful job under difficult circumstances, and they deserve special recognition.

Next, I wish to thank the three House Officers and all their employees, who collectively maintain the framework in which the House operates. Jay Eagen, our Chief Administrative Officer, and his deputy Lawrence Davenport, manage a diverse organization that provides us with everything from furniture and carpets to office supplies and information technology, child care and other personnel-related support, including food services and even our paychecks. Bill Livingood, our Sergeant at Arms, and his deputy, Kerri Hanley, oversee Capitol security for the benefit of Members, staff, dignitaries, tourists and others who visit the complex every year, working in conjunction with the brave men and women of the U.S. Capitol Police. Our Clerk, Jeff Trandahl, his deputy, Martha Morrison, and their staff compile the House Journal, tally our votes, enroll our bills, transcribe our debates, and generally ensure that our legislative process functions smoothly. Jeff also oversees the Page program, which provides an enriching experience for the Pages, who do a great job.

Let us all give thanks for the House Chaplain, Father Daniel Coughlin, who tends his flock superbly. Charles Johnson, our distinguished Parliamentarian, and his learned duputies and assistants John Sullivan, Tom Duncan, Muftiah McCartin, Tom Wickham, Ethan Lauer, Gay Topper, Brian Cooper and Debby Khalili, provide invaluable procedural guidance to the Speaker and Members who preside over the House. I recall being greatly comforted by their presence when, during an earlier era, I occasionally occupied the Chair.

The General Counsel, Geraldine Gennet, and her staff well represent the House in legal matters. The Law Revision counsel, John Miller, and his staff organize our legislation into a useful body of laws. The Inspector General, Steve McNamara, and his staff help us seek ways to improve the administration of the House. For all of them we are grateful.

We are also greatly indebted to the Legislative Counsel, Pope Barrow, and his staff for helping us draft legislation. They work long hours, often under intense pressure, transforming our public-policy ideas into the magic words of bills and amendments, doing so with grace and magnanimity and making it look easy. I want to applaud one particular legislative counsel, Noah Wofsy, whose help has been indispensable to the Committee on House Administration, most recently on the landmark Help America Vote Act (H.R. 3295). I greatly value Noah's help and expertise, and look forward to working with him again during the second session.

We also owe special thanks to our cloakroom staffs, who always have the answer to our favorite question (''when's the next vote?''), and to our leadership and floor staff, who are crucial members of the team.

We should also remember our ''extended'' staff, including Dan Mulhollan and his experts at the Congressional Research Service, and Dan Crippen and his Congressional Budget Office staff, all of whom provide excellent support to our deliberations. The Attending Physician, Dr. John Eisold and his staff, have coped superbly with the anthrax attack and its aftermath, inspiring confidence. As always, the professionals of the Government Printing Office and the General Accounting Office have provided exceptional support. Our tour guides provide constituents wonderful tours of the Capitol, for which we, and they, are always thankful.

Finally, I wish to thank the committee and joint-committee staffs, and the personal staffs of Members, whose efforts are also highly valued. I am obviously most grateful for the work of my own staff, beginning with Cory Alexander, John Bohanan, Betsy Bossart, Tom Craddock, Chonya Davis-Johnson, Stacey Farnen, Wanda Hardesty, Corey Jackson, Dayle Lewis, Kenya McGruder, Kathy May, Scott Nance, Faron Paramore, Andy Quinn, Thomas Richards, Betty Richardson, Betty Rogers, Erica Rossi, and Ryan Seggel of my personal office; Keith Abouchar, Robert Bean, Kevin Cyron, Connie Goode, Michael Harrison, Charles Howell, Ellen McCarthy, Matt Pinkus, Bernard Raimo, David Ransom, Brian Romick, and Sterling Springs of the House Administration Committee; Rob Nabors, of the Treasury, Postal Appropriations Subcommittee; and Marlene Kaufman, of the Helsinki Commission. I could not fulfill my responsibilities without them.

Mr. Speaker, Members aren't always aware of what all the staff do, and the staff aren't always aware of what Members do. But together, we make this House work for the American people. I hope all Members will join me in thanking the staff, wherever they work and whatever they do, for all their hard work this year.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. LUTHER (at the request of Mr. GEPHARDT) for today on account of family matters.

Ms. EDDIE BERNICE JOHNSON of Texas (at the request of Mr. GEPHARDT) for today on account of business in the district.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. FRANK) to revise and extend their remarks and include extraneous material:)

Mr. BONIOR, for 5 minutes, today.

Mr. PALLONE, for 5 minutes, today.

Ms. NORTON, for 5 minutes, today.

Ms. WOOLSEY, for 5 minutes, today.

Ms. WATSON of California, for 5 minutes, today.

Mr. BROWN of Ohio, for 5 minutes, today.

Mr. FRANK, for 5 minutes, today.

Mr. FALEOMAVAEGA, for 5 minutes, today.

Mr. STRICKLAND, for 5 minutes, today.

Ms. JACKSON-LEE of Texas, for 5 minutes, today.

Mr. HOYER, for 5 minutes, today.

(The following Members (at the request of Mr. BEREUTER) to revise and extend their remarks and include extraneous material:)

Mr. KIRK, for 5 minutes, today.

Mr. SOUDER, for 5 minutes, today.

Mr. BEREUTER, for 5 minutes, today.

(The following Member (at his own request) to revise and extend his remarks and include extraneous material:)

Mr. HASTERT, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. DOOLITTLE and to include extraneous material, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $17,963.63.

ENROLLED BILLS SIGNED

Mr. Trandahl, Clerk of the House, reported and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 643. An act to reauthorize the African Elephant Conservation Act.

H.R. 645. An act to reauthorize the Rhinoceros and Tiger Conservation Act of 1994.

H.R. 2199, An act to amend the National Capital Revitalization and Self-Government Improvement Act of 1997 to permit any Federal law enforcement agency to enter into a cooperative agreement with the Metropolitan Police Department of the District of Columbia to assist the Department in carrying out crime prevention and law enforcement activities in the District of Columbia if deemed appropriate by the Chief of the Department and the United States Attorney for the District of Columbia, and for other purposes.

H.R. 2657. An act to amend title 11, District of Columbia Code, to redesignate the Family Division of the Superior Court of the District of Columbia as the Family Court of the Superior Court, to recruit and retain trained and experienced judges to serve in the Family Court, to promote consistency and efficiency in the assignment of judges to the

Family Court and in the consideration of actions and proceedings in the Family Court, and for other purposes.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to enrolled bill of the Senate of the following title:

S. 1438. An act to authorize appropriations for fiscal year 2002 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year to the Armed Forces, and for other purposes.

SINE DIE ADJOURNMENT

Mr. THOMAS. Mr. Speaker, pursuant to House Concurrent Resolution 295, I move that the House do now adjourn.

The motion was agreed to.

The SPEAKER. Accordingly, pursuant to the previous order of the House of today, the House stands adjourned until 4 p.m. on Friday, December 21, 2001, unless it sooner has received a message from the Senate transmitting its passage without amendment of House Joint Resolution 79, in which case the House shall stand adjourned for the first session of the 107th Congress sine die pursuant to House Concurrent Resolution 295.

Thereupon (at 5 o'clock and 8 minutes p.m.), pursuant to House Concurrent Resolution 295, the House adjourned under the previous order of the House until 4 p.m. on Friday, December 21, 2001, unless it sooner has received a message from the Senate transmitting its passage without amendment of House Joint Resolution 79, in which case the House shall stand adjourned for the first session of the 107th Congress sine die pursuant to House Concurrent Resolution 295.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's table and referred as follows:

4969. A letter from the Director, Office of Management and Budget, transmitting notification of the intention to modify the November 9th release of funds from the Emergency Response Fund; to the Committee on Appropriations.

4970. A letter from the Senior Paralegal, Department of the Treasury, transmitting the Department's final rule—Risk-Based Capital Guidelines; Capital Adequacy Guidelines; Capital Maintenance: Capital Treatment of Recourse, Direct Credit Substitutes and Residual Interests in Asset Securitizations [Docket No. 2001–68] (RIN: 1550–AB11) received December 17, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

4971. A letter from the Assistant Secretary for Communications, Department of Commerce, transmitting the Department's final rule—Notice of Solicitation of Grant Applications (RIN: 0660–ZA06) received December 19, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4972. A letter from the Attorney-Advisor, NHTSA, Department of Transportation, transmitting the Department's final rule—Insurer Reporting Requirements; List of Insurers Required to File Reports [Docket No. NHTSA–2001–001; Notice 02] (RIN: 2127–AI07) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4973. A letter from the Secretary, Department of Transportation, transmitting the Department's report entitled, ''TREAD Follow-Up Report''; to the Committee on Energy and Commerce.

4974. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of defense articles or defense export license for any major defense services sold under a contract to Germany (Transmittal No. DTC 158–01), pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

4975. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of defense articles or defenseexport license for any major defense services sold under a contract to Japan (Transmittal No. DTC 157–01), pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

4976. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of defense articles or defense export license for any major defense services sold under a contract to Japan (Transmittal No. DTC 129–01), pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

4977. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of defense articles or defense export license for any major defense services sold under a contract to Denmark and Belgium (Transmittal No. DTC 145–01), pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

4978. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed Manufacturing License Agreement with France (Transmittal No. DTC 050–01), pursuant to 22 U.S.C. 2776(d); to the Committee on International Relations.

4979. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed Manufacturing License Agreement with Japan (Transmittal No. DTC 126–01), pursuant to 22 U.S.C. 2776(d); to the Committee on International Relations.

4980. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of defense articles or defense export license for any major defense services sold under a contract to Japan (Transmittal No. DTC 154–01), pursuant to 22 U.S.C. 2776(c)and 22 U.S.C. 2776(d); to the Committee on International Relations.

4981. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting notification of a proposed transfer of major defense equipment with Australia, Canada, Finland, Kuwait, Malaysia, Spain, and Switzerland (Transmittal No. RSAT–3–01), pursuant to 22 U.S.C. 2776(d); to the Committee on International Relations.

4982. A letter from the Assistant Administrator Bureau for Legislative and Public Affairs, Agency for International Development, transmitting a report on the Implementation of the Support for Overseas Cooperative Development Act; to the Committee on International Relations.

4983. A letter from the Assistant Secretary for Export Administration, Department of Commerce, transmitting the Department's final rule—Entity List: Removal of Two Russian Entities [Docket No. 010220046–1046–01] (RIN: 0694–AC40) received December 19, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on International Relations.

4984. A letter from the Special Assistant to the President and Director, Office of Administration, Executive Office of the President, transmitting the White House personnel report for the fiscal year 2001, pursuant to 3 U.S.C. 113; to the Committee on Government Reform.

4985. A letter from the Deputy Administrator, Environmental Protection Agency, transmitting a report on the Federal Activities Inventory Reform Act; to the Committee on Government Reform.

4986. A letter from the Chief Financial Officer, Export-Import Bank, transmitting the 2001 annual report in compliance with the Inspector General Act Amendments of 1988, pursuant to 5 app.; to the Committee on Government Reform.

4987. A letter from the Deputy Associate Administrator, Office of Acquisition Policy, General Services Administration, transmitting the Administration's final rule—Federal Acquisition Circular 2001–02; Introduction—received December 19, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Government Reform.

4988. A letter from the Deputy Associate Administrator, Office of Acquisition Policy, General Services Administration, transmitting the Administration's final rule—Federal Acquisition Regulation; Definitions of ''Component'' and ''End Product'' [FAC 2001–02; FAR Case 2000–015; Item I] (RIN: 9000–AJ24) received December 19, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Government Reform.

4989. A letter from the Deputy Associate Administrator, Office of Acquisition Policy, General Services Administration, transmitting the Administration's final rule—Federal Acquisition Regulation; Energy-Efficiency of Supplies and Services [FAC 2001–02; FAR Case 1999–011; Item II] (RIN: 9000–AI71) received December 19, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Government Reform.

4990. A letter from the Deputy Associate Administrator, Office of Acquisition Policy, General Services Administration, transmitting the Administration's final rule—Federal Acquisition Regulation; Prompt Payment and the Recovery of Overpayment [FAC 2001–02; FAR Case 1999–023; Item III] (RIN: 9000–AI89) received December 19, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Government Reform.

4991. A letter from the Deputy Associate Administrator, Office of Acquisition Policy, General Services Administration, transmitting the Administration's final rule—Federal Acquisition Regulation; Javits-Wagner-O'Day Act Subcontract Preference Under Service Contracts [FAC 2001–02; FAR Case 1999–017; Item IV] (RIN: 9000–AI82) received December 19, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Government Reform.

4992. A letter from the Deputy Associate Administrator, Office of Acquisition Policy, General Services Administration, transmitting the Administration's final rule—Federal Acquisition Regulation; Definition of Subcontract in FAR Subpart 15.4 [FAC 2001–02; FAR Case 2000–017; Item VI] (RIN: 9000–AJ25) received December 19, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Government Reform.

4993. A letter from the Deputy Associate Administrator, Office of Acquisition Policy, General Services Administration, transmitting the Administration's final rule—Federal Acquisition Regulation; North American Industry Classification System [FAC 2001–02; FAR Case 2000–604; Item VII] (RIN: 9000–AI75) received December 19, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Government Reform.

4994. A letter from the Deputy Associate Administrator, Office of Acquisition Policy, General Services Administration, transmitting the Administration's final rule—Federal Acquisition Regulation; Iceland-Newly Designated Country Under the Trade Agreements Act [FAC 2001–02; FAR Case 2001–025; Item VIII] (RIN: 9000–AJ26) received December 19, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Government Reform.

4995. A letter from the Deputy Associate Administrator, Office of Acquisition Policy, General Services Administration, transmitting the Administration's final rule—Federal Acquisition Regulation; Contractor Personnel in the Procurement of Information Technology Services [FAC 2001–02; FAR Case 2000–609; Item IX] (RIN: 9000–AJ11) received December 19, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Government Reform.

4996. A letter from the Deputy Associate Administrator, Office of Acquisition Policy, General Services Administration, transmitting the Administration's final rule—Federal

Acquisition Regulation; Small Entity Compliance Guide—received December 19, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Government Reform.

4997. A letter from the General Counsel, Office of Management and Budget, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

4998. A letter from the Director, Office of Personnel Management, transmitting a report on the Federal Activities Inventory Reform Act; to the Committee on Government Reform.

4999. A letter from the Acting Director, Office of Surface Mining, Department of the Interior, transmitting the Department's final rule—Kentucky Regulatory Program [KY–221–FOR] received December 18, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

5000. A letter from the Assistant Secretary, Department of the Interior, transmitting a proposed plan under the Indian Tribal Judgment Funds Act, 25 U.S.C. 1401 et seq., as amended, for the use and distribution of the Red Lake Band of Chippewa Indians (Tribe) judgment funds in Docket 189–C and the escrow funds remaining in Dockets 189–A and 189–B; to the Committee on Resources.

5001. A letter from the Assistant Attorney General, Department of Justice, transmitting the Office for Victims of Crime's Report to Congress on the Department's implementation of the Victims of Crime Act, as amended, pursuant to 42 U.S.C. 10604(g); to the Committee on the Judiciary.

5002. A letter from the Director, Policy Directives and Instructions Branch, Department of Justice, transmitting the Department's final rule— Adjustment of Certain Fees of the Immigration Examinations Fee Account [INS No. 2072–00] (RIN: 1115–AF61) received December 20, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on the Judiciary.

5003. A letter from the Director, Bureau of Transportation Statistics, transmitting the Transportation Statistics Annual Report 2000, pursuant to 49 U.S.C. 111(f); to the Committee on Transportation and Infrastructure.

5004. A letter from the Assistant Secretary, Department of the Interior, transmitting the Department's final rule—Distribution of Fiscal Year 2002 Indian Reservation Roads Funds (RIN: 1076–AE28) received December 20, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5005. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Boeing Model 767 Series Airplanes [Docket No. 2000–NM–116–AD; Amendment 39–12480; AD 2001–12–08 R1] (RIN: 2120–AA64) received December 6, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5006. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Boeing Model B–17E, F, and G Airplanes [Docket No. 95–NM–15–AD; Amendment 39–12485; AD 2001–22–06] (RIN: 2120–AA64) received December 6, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5007. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Boeing Model 747 Series Airplanes [Docket No. 2000–NM–220–AD; Amendment 39–12483; AD 2001–22–04] (RIN: 2120–AA64) received December 6, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5008. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Bombardier Model DHC–8–102, –103, –106, –201, –202, –301, –311, and –315 Series Airplanes [Docket No. 2000–NM–348–AD; Amendment 39–124828; AD 2001–22–03] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5009. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Honeywell International, Inc. LTP 101 Series Turboprop and LTS101 Series Turboshaft Engines [Docket No. 99–NE–16–AD; Amendment 39–12486; AD 2001–22–07] (RIN: 2120–AA64) received December 6, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5010. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Dassault Model Mystere-Falcon 50, Mystere-Falcon 900, and Falcon 900EX Series Airplanes [Docket No. 2001–NM–10–AD; Amendment 39–12489; AD 2001–22–10] (RIN: 2120–AA64) received December 6, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5011. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; General Electric Company GE90 Series Turbofan Engines [Docket No. 99–NE–62–AD; Amendment 39–12473; AD 2001–21–063] (RIN: 2120–AA64) received December 6, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5012. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; McDonnell Douglas Model MD–11 Series Airplanes [Docket No. 2000–NM–337–AD; Amendment 39–12476; AD 2001–21–05] (RIN: 2120–AA64) received December 6, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5013. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Boeing Model 767 Series Airplanes [Docket No. 2001–NM–258–AD; Amendment 39–12510; AD 2001–17–28 R1] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5014. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Boeing Model 737–100, –200, –300, –400, and –500 Series Airplanes; and Model 747, 757, 767, and 777 Series Airplanes [Docket No. 2000–NM–395–AD; Amendment 39–12492; AD 2001–22–13] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5015. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Boeing Model 747 Series Airplanes [Docket No. 2000–NM–317–AD; Amendment 39–12478; AD 2001–21–07] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5016. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Boeing Model 757 Series Airplanes [Docket No. 98–NM–225–AD; Amendment 39–12460; AD 2001–20–12] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5017. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Boeing Model 737 Series Airplanes [Docket No. 2000–NM–146–AD; Amendment 39–12458; AD 2001–20–10] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5018. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Short Brothers Model SD3 Series Airplanes [Docket No. 2001–NM–175–AD; Amendment 39–12484; AD 2001–22–05] (RIN: 2120–AA64) received December 6, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5019. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Eurocopter France Model EC 155B Helicopters [Docket No. 2001–SW–32–AD; Amendment 39–12509; AD 2001–23–11] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5020. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Overland Aviation Services Fire Extinguishing System Bottle Cartridges [Docket No. 98–CE–113–AD; Amendment 39–12493; AD 2001–22–14] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5021. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Raytheon Aircraft Company 33, T–34, 35, 36, 55, 56, 58, and 95 Series Airplanes [Docket No. 2001–CE–35–AD; Amendment 39–12507; AD 2001–23–10] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5022. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; McDonnell Douglas Model 717 Series Airplanes [Docket No. 2001–NM–230–AD; Amendment 39–12437; AD 2001–18–11] (RIN: 2120–AA64) received October 4, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5023. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Antidrug and Alcohol Misuse Prevention Programs for Personnel Engaged in Specified Aviation Activities [Docket No. FAA–2000–8431; Amendment No. 121–287] received November 19, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5024. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Bell Helicopter Textron Canada Model 222, 222B, 222U, and 230 Helicopters [Docket No. 2001–SW–49–AD; Amendment 39–12470; AD 2001–19–52] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5025. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Eurocopter France Model SA341G, SA342J, and SA–360C Helicopters [Docket No. 2001–SW–48–AD; Amendment 39–12508; AD 2001–19–51] (RIN: 2120–

AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5026. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Rolls-Royce plc. RB211 535 Turbofan Engines, Correction [Docket No. 2001–NE–22; Amendment 39–12445; AD 2001–19–05] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5027. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Raytheon Model Beech 400, 400A and 400T Series Airplanes, Model Mitsubishi MU–300 Airplanes, and Model Beech MU–300–10 Airplanes [Docket No. 2001–NM–347–AD; Amendment 39–12528; AD 2001–24–11] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5028. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Dassault Model Mystere-Falcon 50 Series Airplanes [Docket No. 2001–NM–330–AD; Amendment 39–12519; AD 2001–24–03] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5029. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Aeromot-Industria Mecanico Metalurgica Itda. Models AMT–100 and AMT–200 Powered Sailplanes [Docket No. 2001–CE–40–AD; Amendment 39–12515; AD 2001–23–16] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5030. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Modification of the Dimensions of the Grand Canyon National Park Special Flight Rules Area and Flight Free Zones [Docket No. FAA–1999–5926] (RIN: 2120–AG74) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5031. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Flightcrew Compartment Access and Door Designs [Docket No. FAA–2001–10770; SFAR 92–2] (RIN: 2120–AH54) received December 10, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5032. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Airbus Model A300 B4–600, B4–600R and F4–600R (Collectively Called A300–600) Series Airplanes; and Model A310 Series Airplanes [Docket No. 2001–NM–349–AD; Amendment 39–12526; AD 2001–23–51] (RIN: 2120–AA64) received December 14, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5033. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Flightcrew Compartment Access and Door Designs [Docket No. FAA–2001–10770; SFAR 92–1] (RIN: 2120–AH52) received December 10, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5034. A letter from the Deputy Secretary, Department of Defense, transmitting notification on the status of the Department's annual report on the current and future military power of the People's Republic of China; jointly to the Committees on Armed Services and International Relations.

5035. United States of America

Congressional Record

PROCEEDINGS AND DEBATES OF THE 107th CONGRESS, FIRST SESSION

Vol. 147 WASHINGTON, THURSDAY, DECEMBER 20, 2001 *No. 178*

Senate

(Legislative day of Tuesday, December 18, 2001)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the Honorable E. BENJAMIN NELSON, a Senator from the State of Nebraska.

PRAYER

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Dear Father, sovereign of this Nation, we press on with the work of the Senate with the message and meaning of this sacred season in our hearts. Although the Senators worship You in different liturgies based on their religious backgrounds, they all believe in You as sovereign of this Nation. Help them and their staffs work together in a way that exemplifies to our Nation that people who trust in You can trust one another; that people who experience Your goodness can be people of good will. May this historic Chamber be a place of creative exchange of insight that leads to greater unity around shared convictions about what is best for America. You are here listening, watching, judging. When we end this week, may we hear Your affirmation: ''Well done, you have pulled together for the sake of America.'' Amen.

PLEDGE OF ALLEGIANCE

The Honorable E. BENJAMIN NELSON led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, December 20, 2001.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable E. BENJAMIN NELSON, a Senator from the State of Nebraska, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. NELSON of Nebraska thereupon assumed the chair as Acting President pro tempore.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2002—CONFERENCE REPORT

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now proceed to consideration of the conference report to accompany H.R. 3061 which the clerk will report.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3061) making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 2002, and for other purposes, having met, have agreed that the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment and the Senate agree to the same, signed by all conferees on the part of both Houses.

(The conference report is printed in the House proceedings of the RECORD of Wednesday, December 19, 2001.)

The ACTING PRESIDENT pro tempore. The Senator from Nevada.

Mr. REID. Mr. President, I ask unanimous consent that the time that has been assigned run equally against all parties during this time. There is no one here on the bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

NEBRASKA SENATORS

Mr. REID. Mr. President, until someone comes to work on these bills, I would like to mention one thing. I wanted to say this last night. The hour was late. The Presiding Officer was the same.

I have had the good fortune during the time I have served in the Senate to work with some outstanding Senators. The two who come to my mind are from the State of Nebraska. Senator Jim Exon was such a unique individual. I have so many fond memories of this great big man who had such a big body, but in that big body was a great big heart. He was a tremendous Senator. I miss him a great deal.

Then, of course, to serve with BOB KERREY is an experience. He was truly a free spirit, someone who was not only an American hero, having the Congressional Medal of Honor, but someone who was as valiant in his legislative duties as he was in his military duties.

Following in the footsteps of these two men whom I enjoyed serving with so much is the Presiding Officer, a man who served as Governor of the State of Nebraska and came to the Senate with great credentials from my perspective. On paper, the Presiding Officer has all the credentials to be a great Senator. A lot of people are good on paper in all walks of life. But in the short time I have served with the Presiding Officer as a Senator from Nebraska, his credentials certainly have served him well in the Senate because the Presiding Officer is as good a person as he is on paper.

I extend my congratulations to the people of Nebraska for sending to the Senate a person with such great qualities. I am sure the people of Nebraska appreciate Senator BEN NELSON. But I am not sure they appreciate him enough. For those of us who work personally with the Presiding Officer on a daily basis, in some of the most difficult legislative matters that ever come before this country, I can say without hesitation that Senator BEN NELSON is in the same caliber as Nebraskans who have served before him and with whom I have had the honor of serving: Senators Exon and KERREY.

Nebraska should be very proud of the dignity and the service of the three people I have had the good fortune of serving with in the Senate.

The ACTING PRESIDENT pro tempore. The Senator from Wyoming.

ECONOMIC STIMULUS

Mr. THOMAS. Mr. President, I rise to make a couple of general comments. As we move towards perhaps the final day, certainly very close to the final day of our time here, I hope we can move forward. We have three appropriations bills that we have been looking forward to discussing and have to finish before we end. There will probably be some discussion on particularly the Defense appropriations.

Nevertheless, the bill and the issue that I suppose we will talk about the most, and seems to be one that is not agreed to, is that of economic stimulus. Certainly that will be coming forward. We have talked about it for a very long time. The President has talked about it. We have had meetings about it. The House obviously has worked out a separate proposal for us. I am hopeful that as we undertake this effort, we will decide, as we should on all of the topics that come before us, what do we want to see as the result.

So often we get wrapped up entirely with the details of what is going on here, and the details obviously are important, but what is more important is what it is we want to accomplish and how will what we are talking about do that.

Certainly, I hope we talk about what is the purpose of an economic stimulus package. Obviously, we are in a recession. No one seems to know exactly what the best techniques are to deal with stimulating the economy. We have listened to all kinds of economists, including our nationally celebrated economists. There are different ideas about that. Certainly, we want to see if we can't create more jobs, if we can't strengthen the economy.

If it is called an economic stimulus, then certainly that has to be the purpose.

How do you do that? You do it by creating jobs and investment. You do it by putting more money in the hands of the people in the countryside, particularly those who have suffered, of course. That is another alternative. The proposals we have had do both of those things in varying degrees. So I hope we can do that.

There are those, of course, who believe that at this point an economic stimulus is not necessary. I don't agree with that, but it is a point of view. I was thinking this morning, listening to the TV, about politics. This is politics. Well, having different views is not unusual. Everyone in the country has different views. In many places, that is defined as standing up for what you believe. When we disagree here, it is suddenly called politics. I understand that. There are legitimate, different views.

I hope we can keep in mind that certainly one of the major purposes of an economic stimulus is to stimulate the economy, to create jobs. We are not looking for a continuing assistance program. We are looking for something that will cause jobs to come back, so people can spend money. The other thing that, obviously, we want to do is assist those who have suffered as a result of the September 11 tragedy.

I look forward to it. I hope we can do something that will have an impact. Frankly, we will be limited in time, but I hope we don't establish new entitlement programs through this kind of emergency program. We ought to really be serious about seeing what we can do that is effective in measuring against the results we would like to have.

I yield the floor.

The PRESIDING OFFICER. The Senator from Nevada is recognized.

STIMULUS PACKAGE

Mr. REID. Mr. President, I didn't want this morning to disturb the mood of our last day here. Therefore, I didn't do anything about the message delivered from the House this morning. When she came in and bowed—and I appreciate the dignity that creates here—I had a big smile on my face. I wrote on my pad here ''laugh,'' because it is laughable.

A stimulus package now? What in the world are they trying to do in the House of Representatives? They are going home at 1:30 this afternoon. Did they think, after we worked on this so long and hard, we are going to accept that in the Senate? It makes the original bill they did that was so bad look good.

So I hope the American public understands the charade. That is what it is. The House of Representatives worked until 4:30 this morning coming up with a stimulus package strictly for political purposes. It has no substantive merit whatsoever. They knew that, and they know it has no chance of passing over here. That is too bad.

We started out with a stimulus package that made sense. Senator BYRD and I wanted to do something to create jobs. We knew that for every billion dollars spent on road building, 42 thousand jobs are created, and those 42,000 people would, of course, pay taxes and buy refrigerators and cars. The Republicans would not go along with that. We were always attempting to protect the American worker—their unemployment benefits, health benefits.

Because of the very narrowminded of the Republican House of Representatives, we are unable to do anything. That is too bad. I am disappointed that we have, on the last day of the session, this silly package brought to us from the House of Representatives. That is what it is—a silly package.

COMPLIMENTING SENATOR HARKIN

Mr. REID. Mr. President, changing the subject for a minute, while I still have the floor, I have spent 2 or 3 weeks with the Senator from Iowa on the farm bill. He has done a wonderful job getting the bill out of committee, trying to satisfy the disparate groups throughout America that have farm interests. He has done that. Again, because of a filibuster, we were unable to bring the bill forward. He is here again today as chairman of the Labor-HHS Appropriations Subcommittee, which is, other than Defense, the biggest money-spending bill we have.

There are so many important provisions for the State of Nevada and every State in our Nation. I hope people in Iowa understand what a resource they have in TOM HARKIN, chairman of the Agriculture Committee, chairman of the Labor-HHS Appropriations Subcommittee, one of the most senior members of the Appropriations Committee. I didn't have a chance, because of the parliamentary situation in the

last few days, to say anything complimentary about my friend. I want him to understand, on behalf of the entire Democratic caucus, how much we appreciate what he does. He is a resource that is invaluable to the Senate and this country.

Mr. HARKIN. I thank my friend from Nevada for the very kind words. I, again, thank him for all of his great support and help as we tried to get the farm bill through, but it was stopped by the other side. I thank my friend from Nevada for his great help on getting our appropriations bill through.

As Senator REID said, this is the second largest appropriations bill—second only to Defense. But what is important is that this is the appropriations bill that binds our country together. This is the bill that makes America unique in the world. This is the appropriations bill that says to every kid in America: No matter where you are born, no matter the circumstances of your birth, you are going to get a good education; we are going to put the resources out there. No matter what your resources are, we are going to get you the funds you need to go to college, or for job training if you don't want to go to college.

This provides the underpinning of our medical research. This bill underpins the health care of America in so many ways. This is the bill that provides all of the support for our jobs, our Job Corps, our training programs, all of the worker training programs that come through the Department of Health. This is the bill that covers the Department of Education, the Department of Health and Human Services, and the Department of Labor, and all biomedical research.

So I am very proud and I feel very privileged to be a Senator, but also to be on the Appropriations Committee and to chair this subcommittee that I believe speaks about what America really is. I am also on the Defense Appropriations Subcommittee. That is the committee that defends our interests around the globe. This is the subcommittee that makes America what America is in the world community—unique among nations.

I am proud and privileged to bring to the Senate Chamber this morning the conference report on the Labor, Health and Human Services, Education and related agencies appropriations bill.

First, I thank my good friend and longtime partner in this effort, Senator SPECTER. We have had a great partnership for a number of years. Some time ago, I was chairman of this subcommittee, and he was my ranking member. Then when the other party took control of the Senate, he became chairman and I was ranking member. Now I am chairman again and he is ranking member again. We have had a great partnership, going back now just about an even dozen years. I thank him and his staff, who I will name after a bit, for helping put together this bill on a truly bipartisan basis.

The conference report is a good bill. It is one I can strongly recommend to my colleagues. Senator SPECTER and I worked with our subcommittee members, the House leaders, Congressmen OBEY and REGULA, to help shape it. We have done our best to accommodate the literally thousands of requests we have received from our colleagues.

I wish to highlight some of the main features of our conference report.

First, it takes a number of important steps to improve the quality, affordability, and accessibility of health care in America. We included a record increase for the National Institutes of Health of $3 billion—again, building upon the excellent work done when Senator SPECTER chaired this subcommittee, in meeting the stated goal of the Congress to double NIH funding over 5 years. So we put a record $3 billion into this bill for NIH.

We have also combined with that an additional approximately $200 million in NIH resources related to bioterrorism, which is included not in this bill but in the supplemental appropriations bill. This keeps us on track in doubling our commitment. This action holds the hope of improving the lives of millions of Americans plagued by killers such as Alzheimer's, cancer, Parkinson's, heart disease, diabetes, osteoporosis, and so many other things.

The conference agreement also makes a major improvement in access to affordable health care by providing a $175 million increase to community health centers and major increases in critical prevention activities, such as cancer and heart disease screening. These changes will save lives and improve health around the country.

As a Senator from Iowa and cochair of the Rural Health Caucus of the Senate, I am pleased to report that the agreement includes a major new effort to improve health care in rural areas and small towns.

We will bring more doctors, nurses, and other health professionals to places they are needed by expanding the National Health Service Corps and the Nurse Loan Repayment Program. Our struggling rural hospitals are given help to deal with Medicare paperwork and help to expand into other activities, such as adult daycare.

This agreement also includes substantial new resources to improve education. While I am disappointed that additional funds were not provided by beginning to fully fund special education as a part of the education reform bill, I believe we did a good job with the resources we were provided.

The agreement makes college more affordable for millions of young people by increasing the Pell grant maximum to $4,000. We increase the TRIO Program by $72.5 million, which brings total funding for the TRIO Program to $802 million.

The bill also increases funding for title I reading and math by $1.6 billion for a total of $10.35 billion to title I.

We increase afterschool programs by $154 million. We finally broke the $1 billion threshold. We provide for $1 billion in afterschool programs.

We increase the funding for teacher quality by three-quarters of a billion dollars. The total we have in this bill for teacher quality is $2.85 billion.

The Senate bill contained nearly $1 billion when we passed it to make needed repair to our schools, including security enhancements. We started this initiative last year. It has been a great success. I am very disappointed we could not reach an agreement to continue it this year. However, I have made it clear that I will bring the issue back again next year. We have schools crumbling all over America, and I think it is a legitimate role for the Federal Government to play to help our States and local communities repair, rebuild, and modernize their schools to make them adaptable for the 21st century. The average age of our schools now is well over 40 years, many 50 years old and over 75 years old. They need to be upgraded. They need to be modernized. Our property-tax payers in my State and I know in the Presiding Officer's State are overburdened as it is. Property tax is not a real reflection of one's ability to pay, and yet that is still how we fund the rebuilding of our schools across America.

We started on this last year. I am disappointed we could not continue it this year, but hopefully we will be back again next year to meet that need.

I am also pleased this agreement improves our commitment to worker training and safety. We funded our State unemployment offices to handle the increased caseloads they are facing now and probably will face for the remainder of the winter. At this time of economic downturn, these investments are crucial.

I wish to highlight a substantial initiative in this bill to improve services to our Nation's elderly. We will allow more homebound seniors to receive Meals on Wheels. We provide a major increase in services, such as adult daycare, to help the elderly stay in their own homes and to give their loved ones who are taking care of them needed respite care and support.

Finally, our subcommittee held a series of four hearings on the need to better protect Americans from the threat of bioterrorism. Based on these hearings, Senator SPECTER and I put together a comprehensive antibioterrorism funding plan.

While the agreement before us contains a modest level of funding to address this need, our comprehensive $3 billion plan is included in the homeland security package which we will work on later today on the Defense appropriations bill. Between the two, we will be substantially improving the security of Americans against a bioterrorist attack. For the record, in the bioterrorism supplemental, we have provided $865 million to expand State and local public health capacity, to expand the health alert network, and for

round-the-clock disease investigators in every State.

We provided $512 million to acquire enough smallpox vaccine for every American, and hopefully the smallpox vaccine will be available for every American sometime towards the end of next year, maybe as early as September of next year.

We included $593 million to beef up our entire vaccine stockpile in America; $135 million to help our hospitals with surge capacity. If, God forbid, we did have a terrorist attack, our hospitals in so many areas just would not be able to handle it. We have provided $135 million that will help hospitals meet that surge capacity if they require it.

We provided $155 million to improve vaccine research and lab capacities at NIH. And we included up to $10 million for a new national tracking system for deadly pathogens such as anthrax. Right now, we track every microscopic ounce of radioactive material that is in our powerplants, in our laboratories, and weapons. We keep a good inventory and tracking system of radioactive nuclear materials, but we do not have such a capacity with our deadly pathogens, as we have seen with anthrax.

It now looks as though the anthrax that was sent to Senator DASCHLE's office and Senator LEAHY and others that came through the mail originated in this country. There are all kinds of stories in the press of it coming through Fort Detrick, MD, and Dugway in Utah, but no one knows because we have never had in place an inventory and tracking system for deadly pathogens. The money we appropriated will begin the process of making sure this situation does not happen again.

We put in $71 million to improve security at our Nation's laboratories.

That is all the money we put into the bioterrorism portion of the bill which will be in the Defense appropriations bill later today.

I believe we have a good bill of which we can be proud. It is the product of a bipartisan compromise. As I said, it is not perfect. Some of us wanted different provisions. I wish we could have kept the money in for school construction, but that is the legislative process. We had good bipartisan cooperation in getting to the end result.

I close by thanking my chairman, Senator BYRD, for all of his support and for the excellent leadership he has provided to make this bill and the bioterrorism package possible. I thank our ranking member, Senator STEVENS. Again, at every step of the way he has been a strong supporter and has made sure we received the necessary allocations for our bill.

Finally, this bill, as I said earlier, would not have been possible without the tireless and outstanding staff work. Our staffs have done a terrific job. I know they have not had much sleep in the process. In fact, I understand the night before last they broke at 6 o'clock in the morning. They worked all night to get this done. That is the kind of dedication and hard work of our Appropriations Committee staff of which I am proud.

I especially note the great work of the staff director on the subcommittee, Ellen Murray, who worked tirelessly through the year to shape, form, and work on the allocations and bring this all together. Just as I have worked closely with Senator SPECTER, I know she has worked closely with another great staff person, Bettilou Taylor with Senator SPECTER, and all of our staffs. Bettilou and Ellen have just done an outstanding job of putting this together. It would not have been possible without them. I thank them both very much for their expertise and their hard work.

I thank Jim Sourwine, Erik Fatemi, Mark Laisch, Adam Gluck, Lisa Bernhardt, Adrienne Hallett, and Carole Geagley, as well as Bev Schroeder and Chani Wiggins of my personal staff for their terrific and tireless efforts.

As I said, the bill before us simply would not have been possible without them. I mentioned my staff. Let me also mention Mary Dietrich on Senator SPECTER's staff, Sudip Parikh—I do not know where Sudip is, but I thank him for all the great briefings he has given me in the past. I thank him very much.

Maybe after all my briefings on anthrax he will let me know how it all works. Emma Ashburn, also I thank Emma for all of her great work.

I say again, we have an outstanding staff, and I thank them all. I take this opportunity publicly to wish them a restful Merry Christmas. I hope they catch up on all the sleep they have lost over the last couple weeks. They have done a great job and have my undying appreciation and admiration and thanks for the great job they have done.

I know a couple of other Senators were seeking time. How much time do I have remaining?

The PRESIDING OFFICER (Ms. STABENOW). The Senator has 22 minutes.

Mr. HARKIN. How much time does the Senator desire?

Mr. DURBIN. Ten minutes.

Mr. HARKIN. I yield 10 minutes to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. I thank the Chair. I thank Senator HARKIN. He and I were colleagues in the House of Representatives, and he would probably recall that Congressman Bill Natcher of Kentucky on the Appropriations Committee always chaired the subcommittee that had this appropriations, the Labor-HHS appropriations, and he would come to the floor in his courtly and dignified way and announce that this was the people's bill, Labor-HHS appropriations was the people's bill.

When Congressman Natcher took a look at the rollcalls he had in support of the bill, all the people were voting for it. And I think it reflects what Senator HARKIN said earlier about what is in this bill. I noticed Senator INOUYE was here a few moments ago. As chair of the Appropriations Subcommittee on Defense, he has a responsibility to defend and protect America. Senator HARKIN of the Labor-HHS Subcommittee of Appropriations has the responsibility to make sure that Americans' lives are worth living, whether it is education, health care or a commitment to labor. Time and again Senator HARKIN, in this appropriations bill, has answered the call of this country. I commend him, as Senator REID did earlier.

This is an important bill for America. It is a better bill because of the hard work Senator HARKIN and Senator SPECTER and the staffs have put into it. I am going to be an anxious supporter of the bill.

I have been fortunate to have served 12 years on the House Appropriations Committee and now 3 years on the Senate Appropriations Committee, but my dream to be on this appropriations subcommittee is still yet to be realized. I hope someday to make it because I think it is most important and certainly reflects your hard work has made it to the bill that will be considered on what may be the last day.

VERIFICATION OF PERSONAL IDENTITY

Madam President, I would like to address another issue very quickly, if I may.

Since September 11, 2001, all of us in Federal, State, and local governments have been looking for ways to enhance our homeland security. We have reviewed just about every government regulation or practice that affects the security of our daily lives in order to fix weaknesses, close loopholes, and beef up protection for all Americans.

Among other efforts that I have led—such as airline security, food safety, assuring a state of national readiness—I am now working on a bill to address weaknesses in our nation's personal identification system.

Specifically, I am interested in fixing the problems in the current disparate system we have where states issue driver's licenses without uniformity and without cross-checking with sister States.

In the aftermath of the most devastating attacks on America, we learned that some of the terrorists who were responsible for the September 11 tragedy carried driver's licenses issued to them by states that had extremely lax application process.

In Virginia, for example, it was reported that a terrorist paid a complete stranger $50 in the parking lot of a Department of Motor Vehicles to sign a sworn statement that vouched for the terrorist's identity and in-state residence on his driver's license application.

It was also reported that 13 of the 19 terrorists held driver's licenses from Florida, a state that—at that time—did not require any proof of permanent

residency from anyone. In fact, any foreign tourist could walk into a motor vehicles office, fill out a form on his own, and get one.

I am certainly not asserting that the September 11 attacks would have been avoided had the terrorists not had these driver's licenses. Clearly, there is little direct connection between the cards these evil men carried and the ungodly deeds that they carried out.

But what these driver's licenses—which have now become the most widely used form of personal ID in the country—gave these terrorists was the cover of legitimacy that allowed them to walk around and mingle into American society without being detected.

A driver's license is a key that opens many doors. In America, anyone who can produce a valid driver's license can access just about anything.

It can get you a motel room, membership in a gym, airline tickets, flight lessons, and even buy guns—all without anyone ever questioning you about who you are. If you can produce a driver's license, we just assume that you are legitimate, and you have a right to be here.

I realize that the investigations surrounding September 11 are still ongoing, but I think we can safely assume what some of the problems were that led to the vulnerability we left for the terrorists to exploit.

The terrorists took advantage of a combination of failures in our intelligence, law enforcement, border patrol, aviation security, and other infrastructures that, at some point, should have been able to discover and identify these individuals as threats.

As we enhance homeland security, it is critical that we improve all of these areas. But no amount of data sharing among Federal, State, local, and international law enforcement and regulatory agencies can be useful if one of the most significant pieces of the data that they transmit back and forth is unreliable.

And today, verification of personal identification is that weakest link in the process.

Whenever someone presents identification to a government official, we must be able to rely on that ID to be sure that the person is in fact who he says he is. That is the only way to ensure accurate results when a government official inputs that person's name into various databases that agencies use.

But today, with hundreds of different forms of ID cards that are in use across the Nation and with rampant identity theft problems, it is nearly impossible to know with certainty who a person is standing before you, no matter how many ID cards they can produce.

To further aggravate the problem, one form of ID often begets another, and can help someone assume a completely false identity.

For example, a person can start with a fake driver's license; and then pick up a fake Social Security number—this is really easy to get, and you don't even need a photo.

With this, he can easily obtain credit cards, library cards, video rental membership cards, etc.—all genuine forms of ID based on the fake original.

To begin the process of critically reviewing our Nation's ID system, I am drafting legislation to enhance the reliability of today's most popularly-used form of identification—the driver's license and State ID card.

But before I explain what this bill does, let me be absolutely clear what it does not do.

This is not about creating a new national ID card nor is it about developing one centralized mega-database that houses everyone's personal data. I understand the concerns that Americans have about going in that direction, and I agree that we do not need a national ID card which crosses that critical line of personal privacy.

Instead, my effort is focused on fixing a problem that we can address immediately and with significant results. My bill is about making the driver's license—which many consider as a de facto national ID card—more reliable and verifiable as a form of personal identification than it is today.

First, my bill requires all States and U.S. territories to adopt a minimum uniform standard in issuing drivers' licenses.

If someone walks into a department of motor vehicles in Virginia, he should be required to provide the same methods of verifying who he is, and should go through the same set of requirements, as someone who walks into a DMV in Illinois.

Why? Because if we don't have uniformity among States, we will remain vulnerable to those who exploit the system by forum shopping for a driver's license card in the weakest State. With that initial ID card, they can go on to obtain other ID cards and gain official recognition.

Or, under reciprocity, they can trade in that driver's license for a driver's license in another State with more strict application requirements even though they may not have qualified to get a license in the other State.

If we mandate a minimum standard that is applied uniformly across the Nation, we can ensure that anyone who presents any State-issued driver's license can be trusted that he is in fact who he claims he is, since he would not have been able to obtain the card but for having initially verified his identity in the same way across the country.

To set up the criteria and implementation of the uniform standard, I have enlisted the assistance of the American Association of Motor Vehicle Administrators AAMVA, which is a nonprofit organization whose members consist of motor vehicle and traffic law enforcement administrators of jurisdictions in the U.S., Canada, and Mexico.

AAMVA is the national expert on issues dealing with motor vehicle administration, and it develops model programs and encourages uniformity and reciprocity among the States.

My bill appoints AAMVA as the regulatory document and biometric standards-setting body, and tasks AAMVA to develop the minimum verification and identification requirements that each State must adopt for issues such as:

Uniform definition of in-State ''residency''; validation of source or ''breeder'' documents to verify ID; establishment of legal presence in the country; initial issuance procedures; and minimum security features.

With congressional oversight, AAMVA would supervise the implementation by the States so that within reasonable time, every State of our Nation will finally have uniform standards.

In implementing the uniform standards, it is also important to make sure the State DMVs have the support they need to verify the data they receive. Many DMVs across the country have complained that they receive little cooperation from Federal agencies who maintain databases containing information that could verify and confirm the information that people present at the DMV counter.

For example, the Social Security number is one of the primary unique identifiers used across the country. Yet many State DMVs have a difficult time accessing records from the Social Security Administration to match the number with the name of the applicant of the driver's license.

My bill addresses this problem by authorizing the Social Security Administration, Immigration and Naturalization Service, law enforcement agencies and any other sources of appropriate, relevant, real-time databases to provide motor vehicle agencies with limited access to their records.

My bill would also authorize and fund an initiative to ensure that all of these databases are compatible and can communicate with each other effectively.

Let me emphasize here that the access to the records is for the limited purpose of cross-checking and verifying individuals' name, date of birth, address, social security number, passport number if applicable, or legal status.

It is not a carte blanche access to records that could contain many confidential and sensitive and private information.

But we know that there may be unscrupulous employees in any organization, and some DMV employee, unfortunately, may be tempted to cut corners.

In order to discourage and prevent anyone from accessing these records without authorization, or use it in an unauthorized manner, my bill provides stiff penalties for any employee, agent, contractor, or anyone else who engages in unlawful access to such records.

Similarly, my bill provides for internal fraud within a department of motor vehicle where state employees access

DMV records to make fake IDs or to personally profit in any way.

My bill also encourages individuals to report any suspicious activities within such offices by providing whistleblower protection to those who uncover internal fraud.

But setting up the uniformity and data sharing are not enough to ensure security. I also want to make sure that the driver licenses and other forms of government identification cards issued by departments of motor vehicles are tamper proof so that there is no other source from which someone can obtain such a card.

It is time to stamp out the multi-billion dollar cottage industry of fake IDs.

My bill will make life miserable for those who manufacture, distribute, market, or sell fake driver's licenses or other forms of government identification cards, by raising the stakes for those caught in the act.

Identity theft is a national problem, and it deserves a national response. That is why I propose to make it a Federal offense to engage in the fake ID business.

I have heard from State and local officials across the country who complain that they didn't have sufficient tools to go after these crooks who hang out in parking lots and on the web luring people to buy fake IDs

In most States, such offenses are dealt with a slap on the wrist and the criminals are back on the streets eagerly trying to earn back the fines they just paid with the sale of a few more fake cards.

So I believe we need to federalize the illegal nature of this activity and go after the manufacturers, distributors, and marketers with full force of the law.

Likewise, I propose severe penalty for anyone who purchases fake IDs, obtains legitimate ID cards in a fraudulent manner, or engages in any activity that misrepresents their personal identification in anyway by using a fake or altered government-issued ID card.

Last year, I worked with Senator COLLINS to pass the Internet False Identification Prevention Act of 2000 which addressed many of these problems. My bill is designed to ensure that this and other laws dealing with fake IDs which are already in the books are working, and if they are not, that we find ways to ensure they are enforced against criminals.

Since September 11, all of us have been working around the clock with a singular goal: enhancing security of our homeland. I believe this bill will help us seal some of the cracks in our internal security systems, and I urge my colleagues to join me in this effort.

As chairman of the Governmental Affairs' Subcommittee on Oversight of Government Management, I will be holding a hearing when we return from the holidays to address this problem.

The PRESIDING OFFICER. Who yields time?

The Senator from Massachusetts.

Mr. KENNEDY. I think there is time that has been allocated to the Senator from Massachusetts. Am I correct?

The PRESIDING OFFICER. There has not at this point been time allocated to the Senator from Massachusetts.

Mr. KENNEDY. I see my friend and colleague from Minnesota. I am mindful that there is only about 12 minutes remaining to the Senator from Iowa.

The PRESIDING OFFICER. Fifteen remain.

Mr. DURBIN. Madam President, I yield any time remaining under my allocation of time until Senator HARKIN's return to the floor.

The PRESIDING OFFICER. Without objection, the Senator is recognized. The Senator from Massachusetts.

Mr. WELLSTONE. Madam President, also to facilitate the Senator from Massachusetts, I think I have 10 minutes separately allotted; is that correct?

The PRESIDING OFFICER. The Senator is correct. The Senator from Massachusetts.

Mr. KENNEDY. I thank the Chair.

Madam President, first of all, I join with others in commending our friend and colleague from Iowa for an excellent job in finding scarce resources and focusing them on the Nation's needs. I think particularly of the great efforts he made to make sure children in this country were going to have the benefits, hopefully, of an education bill that can provide educational opportunities for young people in this country. As a result of the actions of Senator HARKIN and his committee, more than 600,000 children who would not have participated in the title I program will participate in that program; 400,000 children who would not have participated in a bilingual program will participate in those programs; 200,000 children who would not have had an opportunity for after-school programs will benefit from those programs; and there will be tens of thousands of children who will benefit from the 1.2 billion that he has had in special education. So this has been an impressive achievement.

When you look at the allocations for funding of these programs in the early part of the year, none of this was foreseen. I think he would agree with me that we are going to have to do even better in the future as we are facing the challenges in education, and understanding the importance that has in the lives of families in this country.

I also commend him for his extraordinary efforts in leading this body, along with Senator HAGEL and our colleague, Senator JEFFORDS, in the funding for the IDEA program, which is related to education. There are those who say it is not, but I think we understand, as indicated in the conclusion of the debate on education, that two out of three of the children who receive IDEA funding also qualify for Title I. These, in many instances, are the same children. Shortchanging one group pits one group against the other. By adding the money even over the administration's budget, it will mean additional quality services for needy children.

We were unable to get the funding for the children who need IDEA, and that is going to be the subject of my comments this morning.

I also want to thank Senator HARKIN and Senator SPECTER for the great progress that was made in funding the health care priorities. Graduate Medical Education was increased by $50 million; the National Health Service Corps was increased by $24 million; and Community Health Centers received an increase of $175 million, which is the largest increase in its history.

Of course Senator HARKIN was there in the beginning with his subcommittee, understanding the importance of getting the funding to deal with bioterrorism. His committee worked with the Appropriations Committee and had very instructive and productive hearings developing the strong case for funding for bioterrorism as well as building a stockpile of vaccines. I feel strongly that, just as we have a petroleum reserve, we ought to have a pharmaceutical reserve so every child can be protected against any of these potential threats.

Senator HARKIN, in his committee, held very important hearings. Then Senator BYRD, with his strong leadership was able, working with Senator HARKIN, to make sure we are going to meet our Nation's responsibility. All of us are thankful for that leadership.

For more than 200 years, Americans have fought battle after battle against discrimination in all its forms. We have fought for racial equality to assure that all people are judged not by the color of their skin. We have fought for voting rights for women, and their rightful place in shaping the nation's democracy. We have acted to end discriminatory practices against the elderly and disabled.

Despite our many successes in the ongoing battle for fairer treatment for all, there is one form of dangerous discrimination that still pervades every community in this country. Few families have escaped facing this discrimination personally, or seeing the harm it has caused to loved ones, friends, or acquaintances. This discrimination is not based on skin color, gender, or age. It is based on an illness—mental illness.

For years, millions of Americans across this country with mental illness have faced stigma and misunderstanding. Even worse, they have been denied the treatment that can cure or ease their cruel afflictions. Too often, they are the victims of discrimination practiced by health insurance companies. It is unacceptable that the Nation continues to tolerate actions by insurers that deny medically necessary care for curable mental illnesses, while fully covering the cost of treatment for physical illnesses that are often more costly, less debilitating, and less curable.

It is long past time to end this unjust discrimination.

Unfortunately, we have just suffered a serious setback in the ongoing battle for the rights of the mentally ill. The House Republican leadership has blocked the Domenici-Wellstone Mental Health Equitable Treatment Act, which assures fair health insurance coverage of mental illness for the millions of Americans who must live with depression, post-traumatic stress, anorexia, and other mental illnesses.

This important bill was approved by the Senate Health, Education, Labor, and Pensions Committee last month on a unanimous vote. It passed the Senate without a word of opposition. This success was achieved by the skilful leadership and hard work of the bipartisan team of Senator PAUL WELLSTONE and Senator PETE DOMENICI.

That bill deserved to become law this year, but the House Republican leadership has refused to act. Three House committees have jurisdiction over parts of this legislation, but none has held a markup. Not one has held a single day of hearings. Now, operating behind the closed doors of the conference committee, the House Republican leadership has insisted on striking the amendment which the Senate added to the Labor, Health and Human Services Appropriations bill to achieve this essential goal.

The House leadership has bowed to the pressure of insurers and big business, at the peril of the health of millions of Americans. This legislation has the support of the American people. It has the support of a broad bipartisan majority of the Congress. It is cosponsored by 65 Members of the Senate. Over 240 Members of the House have signed a letter urging the House leadership to accept the Senate mental health parity amendment as part of the appropriations bill. The collective will of Congress has been flagrantly disregarded.

The message of the opponents on this basic issue is the same message of delay and denial that has been such a shameful blot on our national history when it was applied to African-Americans, to women, to the disabled, and to the elderly.

One of the most disappointing things about this first session of Congress has been the apparent retreat from the principles of equality and nondiscrimination.

On the education bill, the Congress failed to provide needed funding for IDEA. The Congress retreated from the commitment made a quarter of a century ago to assure that every child with disabilities would have a fair and equal chance for a quality education. Today, Congress has once again retreated on a basic question of civil rights and nondiscrimination—fair treatment for the mentally ill.

As one who has been involved in these struggles to end discrimination throughout my career, I know that the American people understand that discrimination against any American diminishes all Americans. They understand that discrimination is not only a denial of our brotherhood as human beings, it denies our country the ability to benefit from the talents and contributions of all our citizens.

Surely, this time of renewed patriotism in the struggle against the common enemy of terrorism is the wrong time to retreat from our basic American ideals.

Equal treatment for the mentally ill is not just an insurance issue, it is a civil rights issue. At its heart, mental health parity is a question of simple justice.

The House Republican leadership has now succeeded in blocking action for this session of Congress. But the battle goes on, and it will not end until true parity has been achieved once and for all. The American people understand that this battle is about justice for the mentally ill and their families. The Senate and a majority of the House understand it. It is time for the House Republican leadership to stop kowtowing to powerful special interests and listen to the voice of the American people—and to what is fair, just, and right for all those who suffer from mental illness.

I yield the remainder of my time.

The PRESIDING OFFICER. Who yields time? The Senator from Iowa?

Mr. HARKIN. Madam President, before I yield time to my good friend from Minnesota, let me again thank Senator SPECTER, who showed up here from the hearing in which he has been tied up.

Let me thank Senator KENNEDY for his great leadership on the two areas on which he spoke. Basically, I want to speak about education. I am privileged to serve on his committee and have for almost all the time I have been in the Senate. There isn't anyone I could even think of mentioning here in the Chamber who has devoted more of his or her life to the education of our kids and making sure they have a good quality education than Senator KENNEDY of Massachusetts. It has been a privilege and honor to work with him all these years.

We have had a tough fight over the last year in reauthorizing the Elementary and Secondary Education Act. I believe we came out with a good bill, one that will move us forward. But now, as I said at the time when the authorizing bill passed: We have created the authorization, now show us the money.

I think this is an appropriate time to say the President's budget will be coming down in a couple of months, the budget for next year. The President, I know, is a strong supporter of the reauthorization of the Elementary and Secondary Education Act. It has all these requirements for schools for testing and teacher quality and improvement, all the things on which we agreed. But will we have the resources? Will this President, in his budget, provide those resources to back up the authorization bills we passed? That will be the real test.

I hope this President will meet that test. I hope we get a budget from him next year that reflects those priorities.

Again, on the issue of the mental health parity, we had it on this bill.

As the Senator from Massachusetts said—I know Senator WELLSTONE will speak about it here in just a second—we had it in the bill, and it was widely supported, almost unanimously, in the Senate. It was widely supported in the House. But for some reason which I can't really divine and understand, the House Members decided they were going to vote against it. But it was the moment in time when we could have finally gotten over this, when we finally could have provided the same access to health care for mental health problems as we do for physical health problems.

Quite frankly, I believe we have failed in this endeavor. It should have been done. We held as long as we could, but when the House decided they would not agree to it, we had to abide by that and come back to the Senate without that provision in it. It is perhaps the biggest glaring loophole in our entire appropriations bill that we are now reporting back to the Senate.

My friend from Minnesota, Senator WELLSTONE, has been the leader in fighting for the people with mental health problems in this country to assure they have the same kind of health care coverage in their policies that people have for physical health problems. He has been the leader. He has led the charge on it. I know he is not going to give up. If I know anything about PAUL WELLSTONE, he is not going to give up on this fight. We will be back again next year. I will look to him next year for the same kind of leadership he provided this year, and for so many years in the past, for finally breaking down this last civil rights issue. I think Senator KENNEDY spoke about that. We have to confront it here in America.

I yield the floor.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Madam President, I begin by congratulating my distinguished colleague, Senator HARKIN, with whom I have worked closely on the subcommittee which has the responsibility for appropriations for the Departments of Labor, Health and Human Services, and Education for many years. While I liked it better when I was chairman for 6½ years, I believe the work of the subcommittee goes on seamlessly regardless of whether TOM HARKIN is chairman or ARLEN SPECTER is chairman. I think Senator HARKIN and I both recognize you can't get anything done in Washington if you are not willing to cross party lines and make accommodations.

May I just parenthetically note my very deep disappointment that there has not been an agreement on a stimulus package before Congress adjourns,

according to the most recent reports. Perhaps that will be corrected before we adjourn. If they would assign it to me and Senator HARKIN, I am sure we could get it worked out.

But this subcommittee report adopted by the full committee—and now by both the Senate and the House—is one of the most important pieces of legislation to emerge from the Congress all year.

I regret that I could not be here at the outset when the bill was called up. But I had reason to go to the hearing of the Commerce Committee which is considering the nomination of John Magaw to be the No. 3 man at that Department. I came back as soon as I could to make brief opening comments before yielding to Senator WELLSTONE who I know is waiting to speak.

This bill is one of enormous importance to America. The total figure of $123 billion represents an enormous investment in critical aspects of our way of life.

This bill contains very important funding and increases in the Department of Labor on worker safety, funding for the National Labor Relations Board, funding for the various other agencies, the Mine Health Safety Board, and OSHA.

It is my hope yet that we will resolve the critical question of ergonomics on which we await action by the Department Of Labor subcommittee. The subcommittee has held extensive hearings.

With respect to education, this bill contains more than $48 billion. There is an enormous increase for Federal participation in education. Last year's budget increased education funding by $5 billion. This year's budget increases education funding by $8 billion more.

Not only is there additional Federal funding but, as a result of action by the Congress, we are directing more of this money to the neediest students. Philadelphia, illustratively, under the new formula will get $115 million as opposed to $90 million last year.

In the conference, we adopted an amendment to provide additional targeted funding for those who were the neediest. We have provided very extensive funding on Pell grants and on guaranteed student loans in our recognition that education is a priority second to none and a major capital investment for the United States.

On a brief personal note, education was very heavily emphasized in the Specter household, perhaps because my parents had so little of it. My father was an immigrant from Russia in 1911 and had no formal education but became very extensively self-educated. My mother only went to the eighth grade but increased her educational background on her own. But my brother and my two sisters and I have been able to share the American dream because of our educational opportunity. When the President talks about leaving no child behind, it is not only for children, it is for college students, adult education, and literacy training.

There is very important funding in this bill.

The health subcommittee has taken the lead in increasing the funding for the National Institutes of Health—some $11 billion in the past several appropriations cycles. This year's increase was $2.9 billion. Frankly, I would like to have seen more, but there were other priorities.

The mark from our Senate subcommittee was $3.4 billion. The National Institutes of Health are the crown jewels of the Federal Government—maybe the only jewels of the Federal Government. They have made marvelous strides in conquering Parkinson's, perhaps with a sight 5 years down the road to cure Parkinson's, Alzheimer's, cancer, heart disease, and virtually every known malady.

Three years ago, there burst upon the scene the stem cell issue. Stem cells are extracted from embryos. Now they are working on inserting the stem cells in the human brain to cure Parkinson's or delay Alzheimer's; or into the heart, or into many other parts of the body.

A controversy has arisen because some object to stem cell research because they are extracted from embryos. Embryos can produce life. But the ones which are used for stem cell research would be discarded. Embryos are created from in vitro fertilization—customarily about a dozen. Mainly three or four are used, and the balance are being discarded.

If any of those embryos could produce life, I think they ought to produce life and ought not be used for stem cell production. If they are not going to produce life, why throw them away? Why not use them for saving lives?

We have put into this bill $1 billion for sort of a test program on embryo adoption. Let us try to find people who will adopt embryos and take the necessary steps on implanting them in a woman to produce life. If that could be done and use all of the embryos, that would be marvelous to produce life. But where those embryos are going to be discarded, I think the sensible thing to do is to use them for saving lives.

We have had in this Chamber an effort by our subcommittee and then the full committee to expand Federal funding for research on stem cells.

Right now Federal funding is permitted on stem cells once they have been extracted but not to extract them. My view is, that is something in which the Federal Government ought to participate, with the extensive funding available now in NIH.

Our efforts to expand that activity, to some extent, was complicated by amendments offered by the Senator from Kansas, Mr. BROWNBACK, who wanted to raise the cloning issue. We deferred that until next year because it would have tied up the bill for a protracted period of time. As the slow schedule of the Senate has worked, we could have been tied up, in any event, but we made the judgment, with the agreement of the majority leader, that a freestanding bill would come up in February or March.

While there is a consensus against cloning of another individual, there has been an unfortunate use of the terminology ''therapeutic cloning,'' which is really a transplant. That involves a process where there is the DNA for a person, for example, who has Parkinson's, and that is inserted into the embryo so the stem cells come out consistent with the patient, not being rejected by the patient. So that is something we will be working on further with hearings set for our subcommittee into the next year.

We have taken a very firm stand on the bioterrorism issue, with our bill containing $338 million, and our subcommittee taking the lead on having hearings which eventuated in the supplemental appropriations bill having an additional $2.5 billion for the needs of State and local health departments purchasing vaccines against bioterrorism.

When the officials from the Centers for Disease Control came in, we admonished, I guess is as good a word as any, why they had not made the subcommittee aware of their needs before.

It is no secret, you did not have to wait until anthrax came into the Hart Building or the terrorist attack on September 11 to realize the dangers of bioterrorism. Had they told us what their needs were, we would have responded as we were responding with billions for NIH.

But we worked through that. We asked them in an October 3 hearing for a list of all the bioterrorism threats and what it would cost to cure them. They produced the list, but we could not get it. CDC had to give it to HHS which did not want to disclose it because HHS had to give it to OMB, the Office of Management and Budget. By the time you finish playing alphabet soup in Washington, virtually everything is stymied.

But we had a subsequent hearing, and we got these figures, asking them what their professional judgment was as to what the funding should be. We have taken very important steps to protect America on bioterrorism.

Head Start has been a big issue for the subcommittee. There is additional funding, as we have in community health centers, and elevating women's health with additional funding. There was an initiative taken in the early 1990s by Senator HARKIN and myself to create a separate unit on women's health in the National Institutes of Health. There is additional funding for LIHEAP, the aging programs, AIDS, education, including education for disadvantaged children, school improvement programs, impact aid, bilingual education, special education, student aid, and public broadcasting.

Madam President, the conference agreement on the Labor, Health and Human Services, and Education bill before the Senate today includes $123.1

billion in discretionary spending, the full amount of the subcommittee's budget authority allocation under section 302(b) of the Budget Act. This amount represents an increase of $14 billion over the fiscal year 2001 freeze level.

At this time, I want to take this opportunity to thank the distinguished Senator from Iowa, Mr. HARKIN, the chairman of the committee, for his hard work in bringing this bill through the committee and on the floor for full consideration by all Senators.

The programs funded within the subcommittee's jurisdiction provide resources to improve the public health and strengthen biomedical research, assure a quality education for America's children, and offer opportunities for individuals seeking to improve job skills. I would like to mention several important accomplishments of this bill.

The conference agreement includes $23.3 billion for the National Institutes of Health, the crown jewel of the Federal Government. The $2.9 billion increase over the fiscal year 2001 appropriation will support medical research that is being conducted at institutions throughout the country. This increase will continue the effort to double NIH by fiscal year 2003. These funds will be critical in catalyzing scientific discoveries that will lead to new treatments and cures for a whole host of diseases.

Since September 11, 2001, Americans have become acutely aware that our enemies will use any means to murder and maim large numbers of U.S. civilians. The use of biological agents is no longer a threat—it is a reality. The committee has included $338 million to coordinate state and local readiness, stockpile appropriate pharmaceuticals, and build our public health infrastructure to respond to any act of bioterrorism. The anthrax found in Senator DASCHLE's office and in the House and Senate mail rooms, at postal facilities in New Jersey and the District of Columbia and surrounding areas, in news and other media facilities proves that we must try and prevent, detect and quickly respond to any further acts of bioterrorism. The supplemental appropriations bill which the Senate will take up shortly contains an additional $2,504,314,000 to address the needs of state and local health departments, purchase smallpox vaccine, to upgrade the capacity of laboratories and the CDC and NIH, and develop new vaccines at the National Institutes of Health.

For the first time, the conference agreement includes $1 million for a public awareness campaign to educate Americans about the existence of spare embryos and adoption options. During stem cell hearings, we were made aware that there are 100,000 spare frozen embryos stored in invitro fertilization clinics throughout the U.S. Many infertile couples could choose to adopt and implant such embryos if they were aware of that option.

To enable all children to develop and function at their highest potential, the agreement includes $6.5 billion for the Head Start Program, an increase of $338 million over the last year's appropriation. This increase will provide services to 916,000 ch8ldren in 49,420 classrooms across the nation.

To help provide primary health care services to the medically indigent and undeserved populations in rural and urban areas, the agreement contains $1.34 billion for community health centers. This amount represents an increase of $175.1 million over the fiscal year 2001 appropriation. These centers provide health care to nearly 12 million low-income patients, many of whom are uninsured.

Again this year, the conferees placed very high priority on women's health. Included in the amount is $26.8 million for the Public Health Service, Office of Women's Health, an increase of $9.5 million over last year's funding level to continue and expand programs to develop model health care services for women, provide monies for a comprehensive review of the impact of heart disease on women, and to launch an osteoporosis public educatoin campaign aimed at teenagers. Also included is $265 million for family planning programs; $124.4 million to support the programs that provide assistance to women who have been victims of abuse and to initiate and expand domestic violence prevention programs.

In fiscal year 2001, the Labor-HHS Subcommittee held several hearings to explore the factors leading to medical errors and received testimony from family members and patients detailing their experiences with medical mistakes. The Institute of Medicine also gave testimony and outlined findings from their recent report which indicated that 98,000 deaths occur each year because of medical errors and these deaths may cost up to $29 billion in excess health care expenditures and lost productivity each year. The conference report bill before the Senate contains $55 million to determine ways to reduce medical errors.

The agreement maintains $2 billion for the low Income Home Energy Assistance Program LIHEAP. The amount, when combined with the additional $300 million in emergency appropriations, will provide a total of $2.3 billion for the LIHEAP program fiscal year 2002 LIHEAP is the key energy assistance program for low income families in Pennsylvania and in other cold weather states throughout the Nation. Funding supports grants to states to deliver critical assistance to low income households to help meet higher energy costs.

For programs serving the elderly, the agreement includes: $357 million for supportive services and senior centers; $566.5 million for congregate and home-delivered nutrition services; and $206 million for the national senior volunteer corps; $445 million for the community service employment program which provides part-time employment opportunities for low-income elderly. Also, the bill provides $893.4 million for the National Institute on Aging for research into the causes and cures of Alzheimer's disease and other aging related disorders; funds to continue geriatric education centers; and the Medicare insurance counseling program.

For AIDS, the agreement includes in this amount is $1.9 billion for Ryan White programs, an increase of $103.1 million. also included is $; $781.2 million for AIDS prevention programs at the Centers for Disease Control; and $2.341 billion for research at the National Institute of Allergy and Infectious Diseases.

To enhance this Nation's investment in education, the bill before the Senate contains $48.5 billion in discretionary education funds, an increase of $8.3 billion over the fiscal year 2001 level, and $4 billion more than the President's budget request.

For programs to educate disadvantaged children, the bill recommends $12.3 billion, an increase of $2.6 billion over last year's level. The agreement also includes $250 million for the Even Start program to provide educational services to low-income children and their families.

For school improvement programs, the agreement includes $7.8 billion, an increase of $1.6 billion over the fiscal year 2001 appropriation. Within this amount, $2.850 billion will be used for a new state grant program for improving teacher quality. The agreement also includes $700.5 million for educational technology state grants.

For impact Aid programs, the agreement includes $1.143 billion, an increase of $150.1 million over the 2001 appropriation. Included in the recommendation is: $50 million for payments for children with disabilities; $982.5 million for basic support payments, $48 million for construction and $50 million for payments for Federal property.

For bilingual education, the agreement provides $665 million to assist in the education of immigrant and limited—English proficient students. This recommendation is an increase of $205 million over the 2001 appropriation.

For special education, the $8.6 billion provided in the agreement will help local educational agencies meet the requirement that all children with disabilities have access to a free, appropriate public education, and all infants and toddlers with disabilities have access to early intervention services. The $1.2 billion increase over the FY'01 appropriation will serve an estimated 6.5 million children age 3–21, at a cost of $1,133 per child. While also supporting 612,700 preschoolers at a cost of $637 per child.

For student aid programs, the agreement provides $12.3 billion, an increase of $1.6 billion over last year's amount. Pell grants, the cornerstone of student financial aid, have been increased by $250 for a maximum grant 34 million,

the work study program is held at the FY '01 level and the Perkins loans programs is increase by $7.5 million.

The agreement includes $380 million for the Corporation for Public Boardcasting. In addition to the core amount provided for CPB, the committee recommends $25 million for the conversion to digital broadcasting.

There are many other notable accomplishments in this agreement, but for the sake of time, I have mentioned just several of the kep highlights so that the nation may grasp the scope and importance of this bill.

In closing, Madam President, I again thank Senator HARKIN and his staff and the other Senators on the subcommittee for their cooperation.

I thank my distinguished colleague from Minnesota for his patience, if, in fact, he was patient.

I yield the floor. And may I note for the record that I am going to have to return to the Commerce Committee, but I will be back to carry forward on the floor consideration of the conference report.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. WELLSTONE. I, first of all, say to Senator SPECTER that was very gracious. Senator SPECTER and Senator HARKIN—Senator HARKIN and Senator SPECTER—are the ones who have led us, the ones who have been the leaders on this bill. So it was important to hear Senator SPECTER outline this legislation. I thank Senators HARKIN and SPECTER for their leadership. I am very proud of what they have done, given the resources with which we had to work.

I also thank Ellen Murray and Bettilou Taylor for their work. For a lot of us, there is a lot in this bill that is important to the people we love and believe in in our States. It is just a fact that a lot of the real tough work is done by the people who work with us. I thank them.

I also thank Ellen Gerrity because she is the one who has really driven, for me, and for lots of people, the mental health work. I am blessed to have her working with me. Senator DOMENICI and I are blessed to have her working with us.

On the vote which occurred 2 days ago in the conference committee, 10 House Members basically decided to eliminate the mental health parity legislation which would have ended the discrimination against people who struggle with this illness. This was the chance to end the discrimination, and they decided not to do so.

There were 67 Senators who were cosponsors of this legislation. It passed our committee—the HELP Committee—with the leadership of Senator KENNEDY, by a 21-to-0 vote. It was unanimously accepted on the floor of the Senate. And 244 House Members called on the conference committee: Please, don't block this legislation. This is an idea whose time has come. You can do something very good. You can end the discrimination against people struggling with this illness.

But the insurance companies won the day. The insurance companies lobbied furiously, and they got the House leadership to stop this. And the White House did not give us the support. No. The White House did not give us the support.

House leaders say next year they will hold hearings. They never have in the last 6, 7, 8, 9 years, but they say they will hold hearings. The White House says: We want to help next year. They could have helped this year. They could have helped now. It is not as if this discrimination just started yesterday. It is not as if we have not been working on this legislation for years. But they did not help now.

But I am confident, working with Senator DOMENICI—I am proud to work with him—that we will get their support next year. All of the groups and organizations representing all the people who struggle with this illness, and all the people who have loved ones who struggle with this illness, will be back.

My hope is that next year there will be a thousand people who struggle with this illness and who have friends and loved ones who struggle with this illness who will go to the House of Representatives and get 1 inch away from these Members who have blocked this bill and say: We are not going to let you do this to us any longer. We are men and women of worth and dignity and substance, and we refuse to accept this discrimination any longer.

They argue premiums would go up, but the Congressional Budget Office said premiums would go up 0.9 percent. They say it would be too expensive, but they do not talk about the $70 billion a year that we save by getting the treatment to people who now work, who can work with more productivity, with less absenteeism, or whose children now will be in school and will not be in jail, incarcerated, and needing to receive social services help.

The Washington Post editorialized last week that ''the new asylums of the 21st century'' for people struggling with mental illness are the prisons. I visited some of these juvenile ''correctional'' facilities. I have seen these children who never should have been there.

I say to Senator HARKIN, if there had been treatment for them on the front end, they would have never wound up incarcerated.

I went down to a hearing in Houston with SHEILA JACKSON-LEE. She asked me to come down there. It was packed with desperate parents who talked about the fact that their children ended up in jails because they couldn't get any coverage or help anywhere else. And the leadership of the House of Representatives, doing the bidding of the insurance companies, blocked this bill, and the White House did not help.

Now with the insurance industry we have something we have to be careful about. They are saying maybe next year we will cover only serious mental illness. They know that 90 percent of their costs are associated with severe mental illness, and they know that if they now all of a sudden say other illnesses won't be covered, the accountants working for the insurance companies will decide, not the doctors.

Do you want to know what will happen if all of a sudden we say we will only cover what they say is serious mental illness? The children will be the ones most discriminated against.

Suicide is the third leading cause of death of young people in the United States. Every year 30,000 Americans take their lives. In 90 percent of these situations it is because of depression, and the cause is inadequately treated mental illness. Every 18 minutes a child or adult takes their life because of the unmitigated, searing pain of depression and mental illness, and next year, while Americans wait for fairness in mental health care, thousands more will die and millions more will suffer because the House of Representatives, the Republican leadership, couldn't stand up to the insurance industry and couldn't do the right thing. And the White House couldn't see its way to help.

I thank the 67 Senators who helped. I thank the 244 House colleagues who helped. I thank the 154 organizations that have supported this legislation. I thank the Coalition for Fairness in Mental Illness Coverage, and I thank all of the organizations that are involved in that coalition.

I look forward to the day when people with mental illness will receive decent, humane, and timely health care. It will be a good day for our country.

A critical vote occurred in the Labor Health and Human Services conference committee earlier this week when 10 House members decided whether Congress would respond to the will of the people and establish fair treatment for people with mental illness. They decided they would not. The Mental Health Equitable Treatment Act (S. 543), supported by 67 Senators and 244 House members, was included in the Senate version of the LHHS appropriations bill, but not in the House version. Most of the 32 conferees had expressed strong support for this bill, and thus had their chance to vote their conscience and resist the enormous pressure that had been brought to bear by the business and insurance industries to kill this measure. Unfortunately, these lobbyists were joined by the House Republican Leadership and the White House to stop this bill in its tracks. They succeeded when the 10 House Republicans voted against accepting the mental health provision. Mental health parity was dropped.

House leaders are reportedly promising to hold hearings on parity for next year, and I strongly urge them to do so, and to allow no further delay to pass a full mental health parity bill. I look forward to continuing my long partnership with Senator DOMENICI and

working with the House to ensure that such hearings are fair and represent all those with mental illness. Mental health parity supporters on the House side have waited nine years for the authorizing committees to do just that and move the mental health parity legislation in the House. The White House too has expressed support for working on mental health parity legislation next year, though they had no explanation for their opposition to moving the bill now. They were very pleased with the bill as it was voted out of the Senate HELP committee with a vote of 21–0 on August 1, 2001. Yet, when Americans with mental illness needed the support of their President, now more than ever, he was not there for them.

Sometimes opponents claim that ending unfair limits for mental health care will cost too much, yet the Congressional Budget Office reported that the bill would increase total premium costs by only 0.9 percent. Moreover, this estimate does not even take into account the cost savings that have resulted in overall health care costs when mental health care is properly covered. Nor does it consider the cost savings in the workplace when absenteeism is reduced, and productivity is increased. Something else is lurking behind the claim of cost problems. What is lurking there is the continuing and widespread discrimination against people with mental illness in our health care system.

The stigma against people with mental disorders has persisted throughout history. As a result, people with mental illness are often afraid to seek treatment for fear that they will not be able to receive help, a fear all too often realized when they encounter outright discrimination in health coverage. Why is it that because the illness is located in the brain, and not the heart or liver or stomach, that such stigma persists?

One of the most serious manifestations of stigma is reflected in the discriminatory ways in which mental health care is paid for in our health care system. Health plans routinely set aside ''mental'' illnesses as distinct from ''physical'' illnesses in health care coverage. Inexplicably, they set an arbitrary number of hospital days or visits, or a higher level of copayments or deductible, as a way to handle mental health care. There is no clinical or scientific evidence that mental illness, or any illness for that matter, can always be treated successfully within a fixed number of days. Nor is there any economic or moral justification for charging people with mental illness more money for their care. One can only conclude that health plans try to save money at the expense of people with mental illness, and they bank on the stigma that accompanies this illness to discourage individuals from demanding better care. What a sad commentary on our health care system, and on our country.

The opponents, business and insurance lobbyists and their Congressional friends, who cite cost issues fail to recognize that proper treatment of mental illness actually saves money. They ignore the $70 billion per year cost of untreated mental illness. They also fail to recognize that our society picks up the cost of untreated mental illness in any case, for untreated illnesses don't just go away. Children with mental illness may end up in public institutions, foster care, or jail because their parents cannot afford their care. Adults who have private insurance are often forced into public health care systems financed through State governments, Medicare, and Medicaid. These systems are then forced to take scarce resources from those who have no insurance. Families are forced into bankruptcy; lives are broken; and lives are lost.

We also know that the number of people with serious mental illnesses in America's jails and prisons today is five times greater than the number in state mental hospitals. That is what happens when people, including those with jobs and private health insurance, do not get adequate care. How can our country tolerate this kind of abuse of basic human rights? Prisons, as the Washington Post editorial noted last Monday, are ''the new asylums of the 21st century.'' This criminalization of the mentally ill is inhumane. It is also emotionally and financially costly, and a testament to government failure at all levels. We cannot afford to lose any more lives and we must not let those with mental illness go on being treated as criminals or as unworthy of medical care.

Opponents also often try to defeat mental health parity legislation by claiming they want to cover mental illness, but only ''serious'' mental illness, and thus they would limit coverage to a selected list that is also designed to discriminate, most of all against children. The bill that was developed this year was carefully crafted to address the health needs of all those with mental illness as well as the concerns of employers, and it did so without discriminating against particular diagnoses. The insurance industry is very aware that 90 percent of their costs associated with mental illness are associated with the most severe, as is true for other kinds of health issues as well. And yet, they want to oppose coverage for life-threatening illnesses that accountants, and not doctors, have listed as not ''serious''. Any effort on the part of the lobbyists, the House Republicans, or the White House to limit coverage by particular diagnoses should be stopped immediately. It is just another way to try to stop the effort to provide fairness in treatment for people with mental illness.

We know that mental illness is a real, painful, and sometimes fatal disease. It is also a treatable disease. The gap between what we know from scientific research and clinical expertise and what we do on behalf of patients is lethal. Suicide is the third leading cause of death of young people in the U.S. Each year, 30,000 Americans take their lives, and in 90 percent of these situations, the cause is inadequate treated mental illness. This is one of the true costs of delaying this bill that I hope those who voted against this understand: Every 18 minutes, a child or adult takes their lives because of the unmitigated, searing pain of depression or other mental illness. Next year, while Americans wait for fairness in mental health care, thousands will die and millions will suffer.

Parity will do so much to end the unfair cost requirements, access limits, and personal indignities that people seeking mental health care have been forced to endure. Parity in private insurance has been shown to save other health care costs and would revolutionize our country and our health care system in extraordinarily humane ways. Congress was stopped from doing this right now because of a few members and their lobbyist friends. We must not let these powerful lobbyists subvert the will of the Congress and the will of the 154 supporting organizations of the 2001 Mental Health Equitable Treatment Act and the millions of Americans they represent whose lives are touched by the pain, suffering, and sorrow of mental illness.

I thank the 67 Senate and the 244 House colleagues who worked hard to do the right thing for people with mental illness, and I urge them to not take this defeat lightly. I especially want to thank the 154 organizations who supported this legislation and fought for its passage, particularly the Coalition for Fairness in Mental Illness Coverage and its member organizations: American Managed Behavioral Healthcare Association, American Medical Association, American Psychiatric Association, American Psychological Association, Federation of American Hospitals, National Alliance for the Mentally Ill, National Association of Psychiatric Health Systems, and National Mental Health Association.

We must return quickly to this bill early in 2002 and accept no excuses from the Administration or the House for any further delay. I look forward to the day when people with mental illness receive decent, humane, and timely health care. It will be a good day for our country.

Mr. SARBANES. Madam President, today I would like to bring to your attention title VI of the Labor, Health and Human Services Appropriations bill (H.R. 3061), which is the ''Mark to Market Extension Act of 2001''. This legislation was passed unanimously out of the Committee on Banking, Housing and Urban Affairs on August 1, 2001. We worked closely with both the House and the Administration to craft the final product that is now part of this conference report.

The legislation will ensure that HUD continues to have the authority to restructure the rents and the mortgages of its FHA-insured section 8 project-

based portfolio. These properties have been operating for the past 20 years on long term rental subsidy contracts, many of which are currently paying above-market rents. The program we seek to reauthorize provides HUD with the tools to reduce those rents to market levels and to restructure the underlying mortgages so that the new, lower rents will be sufficient to cover the debt. At the same time, the program provides for the rehabilitation of these projects, and requires another long term commitment to keep the properties affordable.

The appropriators asked that this reauthorization be incorporated into this appropriations bill in order to make use of the $300 million in savings that this legislation will generate. We were happy to accommodate this request.

I would like to thank Senator REED, the Chairman of the Subcommittee on Housing and Transportation, Senator GRAMM and Senator ALLARD for their hard work, support and cooperation throughout this process.

Below is a detailed description of title VI, which I would like to submit for the record on behalf of myself and Senators REED, GRAMM and ALLARD.

I ask unanimous consent that the two statements be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR SARBANES, SENATOR GRAMM, SENATOR REED, AND SENATOR ALLARD ON EXTENSION OF MARK-TO-MARKET PROGRAM FOR MULTIFAMILY ASSISTED HOUSING IN FY-20 LABOR-HHS APPROPRIATIONS LEGISLATION

The following represents the views of the Chairman and Ranking Members of the Senate Committee on Banking, Housing, and Urban Affairs and its Subcommittee on Housing and Transportation regarding the ''Mark-to-Market Extension Act of 2001,'' which is part of the Labor-HHS Appropriations Conference Report.

SUBTITLE A—MULTIFAMILY HOUSING MORTGAGE AND ASSISTANCE RESTRUCTING AND SECTION 8 CONTRACT RENEWAL

Section 602: Purposes

The bill includes a number of new purposes that reflect some of the concerns of the Committee and a number of stakeholders regarding the administration of the mark-to-market (MTM) program. For example, concerns were raised that the private participating administrative entities (PAEs) might not be providing the amount of rehabilitation and reserves necessary for the properties to meet the 30 years affordability commitment required by the law. Likewise, it is important for the PAEs, both public and private, to correctly calculate project expenses. Underestimation of expenses, as with inadequate investment in rehabilitation, will undermine the physical and financial condition of the properties. Failure to account realistically and accurately for the expenses of running a project could result in the project underwriting being too ''tight'' with too little debt restructured, and too little cash flow. In such cases, unexpected events, such as spikes in energy prices, could force the property into default. Such an outcome would undercut the purpose of this program, which is intended to reposition these properties both physically and financially to continue to serve low-income residents for the long haul.

The Committee expects the Department to continue to keep track of the properties after they have been restructured. This is particularly important for a number of properties that have had rents reduced to market levels without the debt being restructured. These properties have been put on a ''watch list'' to make sure the owners continue to maintain the properties, despite the reduction in cash flow. The Committee expects HUD to act expeditiously if these properties show any signs of deterioration.

Section 611: Mark-to-Market Amendments

Subsection (a)—Authorizes $10 million per year for tenant groups, non-profit organizations, and public entities for technical assistance and capacity building to meet the purposes of the Act. This provision allows the funding to be carried over. Entities that qualify for debt forgiveness under section 517(a)(5) automatically qualify for grants under this subsection.

(b) Exception rents are allowed for up to 5 percent of the total number of projects subject to a portfolio restructuring agreement.

(c) Provides for notice to residents of the Secretary's rejection of an assistance plan.

(d) Allows certain properties to go through the program upon transfer of ownership, at the request of the new owner.

(e) Provides the Secretary the authority to reduce the amount of funds contributed by owners for rehabilitation in cases where additional features such as an elevator or air conditioning are added to the project and were not previously in that project. This flexibility extends to these additional features only; the Committee expects the Secretary to continue to apply the full matching funds requirement for all standard rehabilitation.

(f) Allows owners of previously eligible projects to opt back into the program. HUD believes that the section 8 contracts on some properties that should have gone through the mark-to-market program were renewed without going through the program. This subsection allows such properties, at the owner's consent, to get back into the program, if the property would have been otherwise eligible.

(g) Redefines second mortgages to allow inclusion of miscellaneous costs, subject to likelihood of repayment. This subsection also allows the Secretary to assign the second mortgage to an entity that meets the conditions for debt modification or forgiveness. The Congress intends this additional tool to be used in the same framework as modification or forgiveness. For example, if HUD would otherwise have forgiven a second mortgage, we would expect the Secretary to assign the mortgage to the eligible owner without any additional requirements, if that is the preference of the non-profit owner.

(h) Retains program exemption for elderly projects financed through section 202 that have been refinanced.

Section 613: Consistency of Rent Levels Under Enhanced Voucher Assistance and Rent Restructurings

The Mark-to-market program is designed to lower section 8 rental payments that are above market and, where necessary, restructure the underlying debt in eligible properties. To determine if the contract rent is above, below, or at market levels requires that a rent comparability study be done. The Department raised a concern that some rent comparability studies may be inaccurate, resulting in a number of contracts being renewed at above market rents. Alternatively, the Committee has heard reports that OMHAR is setting rents too low, or that the value of vouchers being provided to residents in the case of opt outs are being set too high, thereby encouraging owners to avoid the mark-to-market program.

The Committee believes that none of these results is desirable: properties with rents that are above market should go through the program in order to get a thorough financial and physical review. Moreover, whatever organization is establishing the comparable market rent, whether it is the PAE or the PHA, the results should be consistent so that the owner's decision to stay in the program or opt out is not determined by who is doing the rent study. In this section, the Committee directs the Secretary to establish procedures for ensuring rents as determined through this program, the contract renewal process, or for enhanced vouchers for the same units are reasonably consistent.

Section 614: Eligible Inclusions for Renewal Rents of Partially Assisted Buildings

Allows certain projects that are partially assisted with section 8 to get budget-based rents up to comparable market rents, sufficient to cover the costs of maintenance of the project.

Section 615: Eligibility of Restructuring Projects for Miscellaneous Housing Insurance

Amends Section 223(a)(7) of the National Housing Act to allow HUD-held mortgages on properties in the program to be treated as FHA-insured loans to expedite the refinancing process. In addition, it extends the maximum term of FHA-insured and HUD-held mortgages refinanced under this subsection to 30 years.

SUBTITLE B—OFFICE OF MULTIFAMILY HOUSING ASSISTANCE RESTRUCTURING

Section 621: Reauthorization of Office and Extension of Program

Extends the program to October 1, 2006. Extends the Office until October 1, 2004.

Sections 622 and 623: Appointment of Director and Vacancy in Position of Director

Establishes the procedure for appointing the Director of OMHAR and for filling vacancies. The Director would be appointed by the President, but would no longer be a Senate-confirmed position.

Section 624: Oversight by Federal Housing Commissioner

Places OMHAR under the jurisdiction of the FHA Commissioner/Assistant Secretary of Housing, as requested by the Administration. This is being done to enable better coordination between the Office of Housing and OMHAR. The Committee does this with the understanding, as expressed by Assistant Secretary Weicher at the Subcommittee's June 19, 2001 hearing, that HUD has ''every expectation that [OMHAR] will continue to be fully dedicated to [the mark-to-mark] work.''

The Committee also expects the FHA Commissioner to work conscientiously to maintain the highly qualified staff that exists at OMHAR. At the hearing, the GAO witness noted several times of the need to retain OMHAR's ''contract staff that have unique expertise in this program. . . .''

Section 625: Limitation on Subsequent Employment

Prohibits certain OMHAR employees from subsequent compensation from parties with financial interests in the program for a period of 1 year.

SUBTITLE C—MISCELLANEOUS HOUSING PROGRAM AMENDMENTS

Section 631: Extension of CDBG Public Services Cap Exception

Extends the expanded public services cap for Los Angeles for an additional 2 years. It is expected that this will be the last in a number of extensions.

Section 632: Use of Section 8 Enhanced Vouchers for Prepayments

Extends eligibility for enhanced vouchers to projects that prepaid in 1996.

Section 633: Prepayment and Refinancing of Loans for Section 202 Supportive Housing

Makes the refinancing provisions for elderly (section 202) projects in the American Homeownership and Economic Opportunity Act of 2000 self-enacting. The Committee believes that the provisions enacted last year should have already been implemented by HUD. This Section makes it clear that the provisions from the 2000 Act are self-enacting, and do not need implementing regulations from the Department.

CHANGES TO THE 2001 AND 2002 APPROPRIATIONS COMMITTEE ALLOCATIONS AND THE BUDGETARY AGGREGATES

Mr. CONRAD. Madam President, section 314 of the Congressional Budget Act, as amended, requires the chairman of the Senate Budget Committee to adjust the budgetary aggregates and the allocation for the Appropriations Committee by the amount of appropriations designated as emergency spending pursuant to section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended. The conference report to H.R. 3061, the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act for 2002 includes $300 million in emergency-designated funding for the Low-Income Home Energy Assistant Program. That budget authority will result in $75 million in new outlays in 2002.

Pursuant to section 302 of the Congressional Budget Act, I hereby revise the 2002 allocation provided to the Senate Appropriations Committee in the concurrent budget resolution in the following amounts.

TABLE 1.—REVISED ALLOCATION FOR APPROPRIATIONS COMMITTEE, 2002

[In millions of dollars]

	Budget authority	Outlays
Current Allocation:		
General Purpose Discretionary	549,444	551,304
Highways	0	28,489
Mass Transit	0	5,275
Conservation	1,760	1,232
Mandatory	358,567	350,837
Total	909,771	937,137
Adjustments:		
General Purpose Discretionary	300	75
Highways	0	0
Mass Transit	0	0
Conservation	0	0
Mandatory	0	0
Total	300	75
Revised Allocation:		
General Purpose Discretionary	549,744	551,379
Highways	0	28,489
Mass Transit	0	0
Conservation	1,760	1,232
Mandatory	358,567	350,837
	910,071	937,212

Mr. CONRAD. Mr. President, I rise to offer for the RECORD the Budget Committee's official scoring for the conference report to H.R. 3061, the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act for fiscal year 2002.

The conference report provides $123.371 billion in discretionary budget authority, which will result in new outlays in 2002 of $50.089 billion. When outlays from prior-year budget authority are taken into account, discretionary outlays for H.R. 3061 total $107.791 billion in 2002. The conference report provides virtually the same amount of budget authority as did the Senate-passed bill, which provided $123.37 billion. The conference report is at the Senate subcommittee's section 302(b) allocation for both budget authority and outlays.

Included in the conference report's total is $300 million in emergency-designated funding for the low-income home energy assistance program, (LIHEAP), which will result in new outlays of $75 million in 2002. In accordance with standard budget practice, I am adjusting the appropriations committee's allocation by the amount of that emergency-designated spending.

Additionally, H.R. 3061 also provides $18.874 billion in advance appropriations for 2003 for employment and training, health resources, child care, and education programs. Those advances are specifically allowed for under the budget resolution adopted for 2002, and, combined with all other advance appropriations considered by the Senate to date, fall within the limit imposed by the resolution. Further, the report adopts the Senate provision extending the Mark-to-Market Program for multifamily assisted housing. That provision, which is included in the above totals, is estimated to save $355 million in 2002. Finally, the report includes language that extends by one year certain benefits regarding mental health parity. Because that provision includes language directing how its costs are to be counted for budgetary purposes, it violates section 306 of the Congressional Budget Act of 1974.

I ask unanimous consent that a table displaying the budget committee scoring of this report be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

H.R. 3061, CONFERENCE REPORT TO THE DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2002

[Spending comparisons—Conference Report, in millions of dollars]

	General purpose	Mandatory	Total
Conference report:			
Budget Authority	123,371	272,937	396,308

Senate-passed:			
Budget Authority	1	0	1
Outlays	42	0	42

[1] For enforcement purposes, the budget committee compares the conference report to the Senate 302(b) allocation.

Notes.—Details may not add to totals due to rounding. Totals adjusted for consistency with scorekeeping conventions. In addition, the conference report provides $18.874 billion in advance appropriations for fiscal year 2003.

Mr. DURBIN. Mr. President, during this summer's debate on the ESEA reauthorization legislation, I offered an amendment to increase the authorization for the new math and science partnerships program from $500 million in the Senate bill to $900 million in fiscal year 2002. Raising the authorization to this level brought math and science partnership participated and science partnership funding to the same level as the Reading First program also created in the education bill. My amendment passed by voice vote.

During that debate, I joined several of my colleagues in emphasizing the critical need to improve math and science education in our nation's elementary and secondary schools. U.S. students consistently score lower than their counterparts in other nations in math and science, yet more than one in four high school math teachers and nearly one in five high school science teachers lack even a minor in their main teaching field. The training and preparation of math and science teachers must be a top priority.

I am disappointed that the Labor–HHS–Education Appropriations bill funds the math and science partnerships at just $12.5 million in fiscal year 2002— a level far below the $450 million authorized by Congress for this program in the final ESEA legislation.

But I am encouraged by language included in the conference report that states,

the conferees believe math providing high-quality math and science instruction is of critical importance to our nation's future competitiveness, and agree that math and science professional development opportunities should be expanded. The conferees therefore strongly encourage the Secretary and the State to continue to fund math and science activities within the Teacher Quality Grant program at a comparable level in fiscal year 2002.

I understand that the conferees intend that at a minimum, the current commitment to the training of math and science teachers will be upheld. The conference report urges the Secretary of Education and the States to use the Teacher Quality grant program, funding available for math and science partnerships and through other federal grants to bring math and science education is a level that adequately prepares our young people for

the demands for the demands of the 21 century. I hope that States and districts continue to increase their efforts in the area. I look forward to working with my colleagues next year to further support strong math and science education in schools.

SMALLPOX VACCINATION FOR FIRST RESPONDERS

Mrs. BOXER. Mr. President, smallpox is a deadly disease that if not treated within the few first days after initial exposure, can cause death in 1 out of 3 cases. Clearly, this is not a disease to take lightly.

The problem with smallpox, unlike our recent experience with anthrax, is that it is highly contagious, and not simply infectious. Thus, one person can spread the disease to hundreds of people within a matter of days.

In this new climate of threatened bioterrorist attacks, it is essential that we prepare ourselves for the worst case scenario and not simply sit back and hope for the best.

This fact was highlighted in disturbing detail in the ''Dark Winter'' exercise conducted by the Center for Civilian Biodefense Studies at John Hopkins University.

''Dark Winter'' showed that an aerosol release of smallpox virus would spread easily, and that the dose needed to cause infection is very small. The exercise showed that 20 confirmed cases could result in as many as 300,000 additional infections and 100,000 deaths in just 3 short weeks.

In light of this, the Federal Government is working quickly to ensure that public health officials at all levels of government are able to work together should an outbreak occur.

I applaud the steps already taken by the Centers for Disease Control to vaccinate some of its first response personnel and to ensure the safety of those vaccinations.

But I believe it is not only essential to have a trained and ready team in place at the federal level to respond immediately to a possible outbreak, I believe that such a vaccination program should be expanded.

That is why I sent a letter to Health and Human Services Secretary Thompson urging him to work with Governors to identify and vaccinate key first responders in all 50 States. I specifically asked Secretary Thompson to instruct CDC officials to reach out to Governors and work with them to create lists of critical first responders in their States, and to authorize those vaccinations within the next 60 days.

We must also work quickly to make sure we have at least 290 million doses of smallpox vaccine available to treat the entire population as well as support additional research on antiviral therapies and other vaccines to help control and contain any bioterrorist attack.

In California, many companies are already making progress toward such antiviral therapies for smallpox, and I hope that we will not delay in providing funding for this type of research.

Mr. HARKIN. I commend my colleague from California on her thoughtful comment on the dangers of smallpox. I agree with her that much more research on new vaccines and therapies is needed and am proud of the many companies across the nation that are leaders in this important effort.

As my colleague indicates, the CDC has recently developed a strategy for vaccination in response to a smallpox outbreak and the funding provided in the Labor, Health and Human Services and Education Appropriations bill will help the CDC in carrying out this goal.

Additionally, I believe that the funding provided for the Office of Emergency Preparedness for bioterrorism-related activities can be especially useful in making the vaccine available to first responders.

Mrs. BOXER. I thank my distinguished colleague from Iowa for his supportive remarks, and hope that Secretary Thompson will seriously consider his suggestion.

I truly believe that a small cadre of vaccinated first responders from each of the 50 states would provide an indispensable complement to the CDC staff already inoculated.

Mr. HARKIN. I agree with my colleague from California that vaccinating first responders should be given serious consideration as the CDC and the Office of Emergency Preparedness pursue bioterrorist activities.

Mrs. BOXER. As we continue to discuss funding to prepare for potential bioterrorist attacks, we should also have confidence in this country's ability to react to a smallpox outbreak promptly. Ensuring that first responders are ''armed'' with a vaccination and in a position to respond is a responsible way to achieve this goal.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. McCAIN. Madam President, I thank the conferees on this bill for their hard work. This is important legislation that provides Federal funding for the Departments of Labor and Health and Human Services, and Education, and related agencies.

I am pleased to see increased funding for many programs, especially in light of our Nation's war on terrorism. This includes an increase in funding for bioterrorism activities and for strengthening our Nation's public health infrastructure. This funding is critical for all our States, localities, and our Nation as a whole to ensure that we are ready to respond to all contingencies.

There is funding to ensure our Nation's food supply remains safe and resources for helping meet the health care needs of the uninsured. In addition to funding key public health programs, this bill provides funds for helping States and local communities educate our children. Furthermore, it funds our scientists who are dedicated to finding treatments, if not cures, for many illnesses, including Parkinson's, Alzheimer's, and ALS.

The legislation also ensures our Nation's most vulnerable, our children, senior citizens and the disabled, have access to quality health care.

Funds are also provided for important programs that assist working families needing child care, adult daycare for elderly seniors, and Meals on Wheels.

For all the good in this bill, I ask: How many other worthy programs are being shortchanged because of our parochial appetites? Again, I find myself in the unpleasant position of speaking about parochial projects in yet another conference report. I have identified nearly $1 billion in earmarks. The total amount in porkbarrel spending appropriations bills considered so far is $15 billion.

I would like to start out by asking unanimous consent to print in the RECORD the Web site of the U.S. Senate Committee on Appropriations.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UNITED STATES SENATE COMMITTEE ON APPROPRIATIONS

AUTHORIZATIONS AND APPROPRIATIONS: WHAT'S THE DIFFERENCE?

Authorization laws have two basic purposes. They establish, continue, or modify federal programs, and they are a prerequisite under House and Senate rules (and sometimes under statute) for the Congress to appropriate budget authority for programs.

Some authorization laws provide spending directly. In fact, well over half of federal spending now goes to programs for which the authorizing legislation itself creates budget authority. Such spending is referred to as direct, or mandatory, spending. It includes funding for most major entitlement programs. (Some entitlements are funded in annual appropriation acts, but the amounts provided are controlled by the authorization law that established the entitlement.) The authorization laws that provide direct spending are typically permanent, but some major direct spending programs, such as the Food Stamp program, require periodic renewal.

Discretionary spending, which is provided in the 13 appropriation acts, now makes up only about one-third of all federal expenditures. For discretionary spending, the role of the authorizing committees is to enact legislation that serves as the basis for operating a program and that provides guidance to the Appropriations Committees as to an appropriate level of funding for the program. That guidance typically is expressed in terms of an authorization of appropriations. Such authorizations are provided either as specific dollar amounts (definite authorizations) or ''such sums as are necessary'' (indefinite authorizations).

In addition, authorizations may be permanent and remain in effect until changed by the Congress, or they may cover only specific fiscal years. Authorizations that are limited in duration may be annual (pertaining to one fiscal year) or multiyear (pertaining to two, five, or any number of specific fiscal years). When such an authorization expires, the Congress may choose to extend the life of a program by passing legislation commonly referred to as a reauthorization. Unless the underlying law expressly prohibits it, the Congress may also extend a program simply by providing new appropriations. Appropriations made available for a program after its authorization has expired are called ''unauthorized appropriations.''

Longstanding rules of the House allow a point of order to be raised against an appropriation that is unauthorized. During initial consideration of a bill in the House (which by precedent originates appropriation bills), unauthorized appropriations are sometimes dropped from the bill. However, the House Committee on Rules typically grants waivers for unauthorized appropriations that are contained in a conference agreement. In the Senate, there is a more limited prohibition against considering unauthorized appropriations.

Both House and Senate rules require that when the Committees on Appropriations report a bill, they list in their respective committee reports any programs funded in the bill that lack an authorization. The information in the committee reports, however, differs somewhat from the information shown in this report. This report covers programs that at one time had an explicit authorization that either has expired or will expire. Unlike the lists shown in the Appropriations Committee reports, this report does not include programs for which the Congress has never provided authorizations of appropriations. For example, some Treasury Department programs have never received explicit authorizations of appropriations. They receive appropriations nonetheless because the authority to obligate and spend funds is considered ''organic''—inherent in the underlying legislation or executive action that originally empowered the Treasury to perform particular functions.

As mentioned above, many laws establish programs with authorizations of discretionary appropriations that do not expire. Both the Appropriations Committee reports and this CBO report exclude programs with that type of authorization because its effect is permanent.''

WHERE DOES THE MONEY GO?

While the size of the annual federal budget has increased in dollar terms (reflecting inflation, increased population and economy) over the years, the proportion available for common government services has shrunk dramatically. Competition among federal agencies for funding is heating up.

Over the last three decades, discretionary spending has been cut significantly to accommodate rapid growths in other expenses. Discretionary spending covers everything from road building to police protection to medical research to our national defense—most of the government services with which Americans are familiar. All other spending is mandatory—required by law regardless of what is left over for discretionary spending. Mandatory spending includes entitlements such as Social Security and Medicare, and the enormous interest the U.S. must pay every year to finance the national debt.

Three decades ago, nearly two-thirds of the federal budget was available for discretionary programs: 1966—$9 billion, interest; $43 billion, entitlement; $90 billion (63%), discretionary.

In the 1970s, entitlement spending jumped, placing a crimp on discretionary spending: 1976—$27 billion, interest; $189 billion, entitlement; $475 billion, (45%), discretionary.

By the mid-1980's, interest payments on the national debt began to rise: 1986—$136 billion, interest; $462 billion, entitlement; $438 billion (42%), discretionary.

By 1996, entitlement spending took half of the budget pie. In just 30 years, the amount left over for roads, police, defense, and most other government services shrunk to a third of the budget: 1966—$241 billion, interest; $859 billion, entitlement; $535 billion (33%), discretionary.

Current budget projections show the same trend. By 2006, entitlement spending will demand the majority of the federal budget. Interest payments will continue to be a major drain on the Treasury, and the remaining amount will be divided among discretionary programs: 2006—$209 billion, interest; $1,476 billion, entitlement; $6266 billion (27%), discretionary.

Compare the forty-year difference side-by-side: 1966—$9 billion, interest; $43 billion, entitlement; $90 billion (63%), discretionary. 2006—$209 billion, interest; $1,476 billion, entitlement; $626 billion (27%), discretionary.

RULE XVI—APPROPRIATIONS AND AMENDMENTS TO GENERAL APPROPRIATIONS BILLS

1. On a point of order made by any Senator, no amendments shall be received to any general appropriation bill the effect of which will be to increase an appropriation already contained in the bill, or to add a new item of appropriation, unless it be made to carry out the provisions of some existing law, or treaty stipulation, or act or resolution previously passed by the Senate during that session; or unless the same be moved by direction of the Committee on Appropriations or of a committee of the Senate having legislative jurisdiction of the subject matter, or proposed in pursuance of an estimate submitted in accordance with law.

2. The Committee on Appropriations shall not report an appropriation bill containing amendments to such bill proposing new or general legislation or any restriction on the expenditure of the funds appropriated which proposes a limitation not authorized by law if such restriction is to take effect or cease to be effective upon the happening of a contingency, and if an appropriation bill is reported to the Senate containing amendments to such bill proposing new or general legislation or any such restriction, a point of order may be made against the bill, and if the point is sustained, the bill shall be recommitted to the Committee on Appropriations.

3. All amendments to general appropriation bills moved by direction of a committee having legislative jurisdiction of the subject matter proposing to increase an appropriation already contained in the bill, or to add new items of appropriation, shall, at least one day before they are considered, be referred to the Committee on Appropriations, and when actually proposed to the bill no amendment proposing to increase the amount stated in such amendment shall be received on a point of order made by any Senator.

4. On a point of order made by any Senator, no amendment offered by any other Senator which proposes general legislation shall be received to any general appropriation bill, nor shall any amendment not germane or relevant to the subject matter contained in the bill be received; nor shall any amendment to any item or clause of such bill be received which does not directly relate thereto; nor shall any restriction on the expenditure of the funds appropriated which proposes a limitation not authorized by law be received if such restriction is to take effect or cease to be effective upon the happening of a contingency; and all questions of relevancy of amendments under this rule, when raised, shall be submitted to the Senate and be decided without debate; and any such amendment or restriction to a general appropriation bill may be laid on the table without prejudice to the bill.

5. On a point of order made by any Senator, no amendment, the object of which is to provide for a private claim, shall be received to any general appropriation bill, unless it be to carry out the provisions of an existing law or a treaty stipulation, which shall be cited on the face of the amendment.

6. When a point of order is made against any restriction on the expenditure of funds appropriated in general appropriation bill on the ground that the restriction violates this rule, the rule shall be construed strictly and, in case of doubt, in favor of the point of order.

7. Every report on general appropriation bills filed by the Committee on Appropriations shall identify with particularity each recommended amendment which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session.

8. On a point of order made by any Senator, no general appropriation bill or amendment thereto shall be received or considered if it contains a provision reappropriating unexpended balances of appropriations; except that this provision shall not apply to appropriations in continuation of appropriations for public works on which work has commenced.

Mr. McCAIN. I will quote from it. It says:

Authorization laws have two basic purposes. They establish, continue, or modify federal programs, and they are a prerequisite——

I emphasize, ''a prerequisite''——

under House and Senate rules . . . for the Congress to appropriate budget authority for programs.

I found that entertaining and amusing because we have this list of hundreds of projects which are not authorized and are funded at whatever level the appropriators see fit.

I will go through a number of them. Some of them are entertaining; some of them make you sad. I would like to pose a question to the manager of the bill, if I could have his attention. I see that there is $1 million for the Shakespeare Rose Theater to enhance educational and cultural programs and language literacy in the arts for students and the general public.

Could the manager of the bill tell me where the Shakespeare Rose Theater is located?

I admit there are hundreds here. I can understand why the manager of the bill wouldn't know why it is a paltry $1 million, but could the manager of the bill tell me where the Shakespeare Rose Theater is located?

Mr. HARKIN. Might I inquire of the Senator, what committee does the Senator——

Mr. McCAIN. I only have 10 minutes. Can you tell me where the theater is located? That is a pretty straightforward question. It deserves a straightforward answer.

Mr. HARKIN. You know, Madam President, I would just say to the Senator, he asked me a question——

Mr. McCAIN. I withdraw the question.

Mr. HARKIN. You asked me a question. Now he won't let me answer it.

The PRESIDING OFFICER. The Senator from Arizona has the floor.

Mr. McCAIN. I asked for an answer. I didn't get an answer.

Mr. HARKIN. The answer is there are 1,600 different items in this bill. If the Senator has about 60 seconds of patience, I will find out for him.

Mr. MCCAIN. I thank you, but it is an example. The manager of the bill doesn't even know where a place that we are giving $1 million of the taxpayers' dollars is located.

Mr. HARKIN. It is in Massachusetts.

Mr. MCCAIN. That is instructive. That is instructive about the proliferation of the pork in this legislation.

Let me cite a few others: $500,000 for the Mattatuck Museum in Waterbury, CT; $800,000 for the Mind-Body Institute of Boston, MA—the Mind-Body Institute of Boston, MA?—$150,000 for the Lady B Ranch Apple Valley, CA, for the Therapeutic Horseback Riding Program.

I want to go back to what the Senator said, that there are 1,600 earmarks. So the manager of the bill doesn't even know where $1 million goes. Maybe $1 million isn't much to the manager of the bill, but it sure as heck is a great deal of money to my constituents. I won't pursue this.

Again, $150,000 for the Lady B Ranch Apple Valley, CA, for the Therapeutic Horseback Riding Program. If you asked the average citizen if a therapeutic horseback riding program was at the top of their priority list, I don't think so. But therapeutic horseback riding has to be earmarked for Apple Valley, CA.

Continuing, $500,000 for the University of Washington Center for Health Workforce Studies in Seattle, WA. By the way, there is $800,000 for the Seattle King County Workforce Development Council, Seattle, WA, for the purpose of retraining displaced Boeing employees. Now in the Defense appropriations bill, which is coming up very shortly, we will have a $26 billion bailout for Boeing. Yet we still need $800,000 to retrain their workers. That is a good deal for Boeing.

The list continues:

$750,000 for the Center for Textile Training and Apparel Technology at Central Alabama Community College;

$200,000 for the University of Arkansas Medical Services BioVentures Incubator for equipment needed for wetlabs used in training;

$800,000 for Bishops Museum. I dare not ask the manager where Bishops Museum is, but I can find out for myself.

Continuing with the list: $200,000 for the Mississippi State University, Center for Advanced Vehicular Systems, Mississippi State, MS, for automotive engineering training.

The list goes on and on and on. Here is something that is really entertaining, or saddening, depending on whether or not you are a taxpayer. For example, it earmarks $5 million, $5 million for a program never authorized—never a hearing through the Commerce Committee—$5 million for a program to promote educational, cultural apprenticeships, and exchange programs for Alaska Natives, native Hawaiians, and their historical whaling and trading partners in Massachusetts. That is remarkable, remarkable—$5 million. This is a new program authorized by the Senate-passed version of the ESEA authorization bill. It was not requested by the administration.

It is interesting to note that even though the United States does not engage or support commercial whaling—we are against commercial whaling—we are willing to provide $5 million for a program highlighting the practice.

Another issue of concern is the report's inclusion of $25 million for equipment and facilities to assist public broadcasters with the transition to digital television. I would remind my colleagues that this request was never the subject of a hearing by the Commerce Committee, which is the authorizing committee. I don't believe that Congress is exercising sound fiscal policy when it decides to appropriate millions of dollars to publicly funded television stations so that they may purchase the latest in digital technology.

Rather, the Corporation for Public Broadcasting should have come before the Commerce Committee to discuss with us the best way to achieve the goals of public broadcasters and ensure that taxpayer dollars are spent wisely.

So as the manager said, there are 1,600 earmarks in this bill, very few of them, if any, previously authorized; all of them are in violation of the Web site the Appropriations Committee has. The overwhelming majority of these earmarks are for members of the Appropriations Committee, so that those States that are not represented on the Appropriations Committee are shortchanged. There is no competition. There is no authorization. There is no hearing. We are talking about a billion dollars here. It is remarkable.

The rules of the Senate have to be changed. The rules of the Senate have to be changed so that those of us who don't support these programs will have an opportunity to have our States' priorities considered as well.

I have something that my staff put in front of me regarding the Rose. Apparently, it is in London, England. It was built in 1587 by Philip Henslowe. The Rose was the first theater on London's Bankside. Its repertory included plays by Kyd, Jonson, Shakespeare, and Marlowe. In 1989 its remains were discovered and partially excavated amidst a blaze of international press coverage.

Are we now giving a million dollars to a theater in London, England? Remarkable. Put in without any hearing, without any authorization, without anything? We are going to give a million dollars for that? Are the British so bad off that they need a million dollars from us for a theater in London?

We have homeless people wandering the cities of America and we are going to give a million dollars to the Rose Theater? Remarkable. Remarkable.

Madam President, it is outrageous, disgraceful, and it is an abrogation of the process of legislation. Again, I will continue to oppose this and try to bring this to the attention of the American people.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. HARKIN. Madam President, the Senator from Arizona never mentioned the projects in Arizona in the amount of $6.7 million. Let me read a couple: University of Arizona for a border health initiative. There is one for Pima Community College in Arizona for minority students to attend college. There is the Pima County Department of Health and the University of Arizona. Here is one for Herd Museum in Phoenix to develop exhibits and educational programs about the historic Phoenix Indian School and the Native Americans who attended the school.

Does the Senator want us to knock all those out?

Mr. MCCAIN. Absolutely. I have opposed every earmarked project for my State, and I have done so for all the years I have been here. I am sorry the Senator from Iowa doesn't know that.

Mr. HARKIN. The Senator knows full well that the other Senator from Arizona supports those.

Mr. MCCAIN. The other Senator does not support those. It came from the House.

Mr. HARKIN. So does the Congressman.

Mr. MCCAIN. It came from the House. He doesn't even know where the theater is in London.

Mr. HARKIN. The Congressman also supports them. I want to mention a couple of other projects. The Senator mentioned the Bishop Museum located in Hawaii. The other one mentioned was in Massachusetts. The Senator made fun of a horseback riding project that he kind of mocked. I don't know that program intimately, but I remember when it was brought up. This is a program in California for therapy for severely mentally retarded and brain-injured kids. It is a program where they have found that by using this kind of therapy, it allows these kids to have a little bit better life. I am not a medical expert. I don't know how this works. But according to the Member of Congress who brought this up, this is something the health care professionals believe is very important to these disabled kids.

I am told that the Senator from Arizona may be slightly mistaken, that the Senator from Arizona did ask for some of these projects. The Pima County Department of Health in Arizona, a $400,000 grant was asked for by the Senator from Arizona, Mr. MCCAIN—I am sorry, Mr. KYL. It was asked for by the other Senator from Arizona. Certainly, the other Senator from Arizona —I can't speak for him—would not say just this is mine and nobody else's. So I say that there are four projects in Arizona asked for by Senator KYL from Arizona. I want the record to show that.

Mr. MCCAIN. Madam President, do I have any time remaining?

The PRESIDING OFFICER. The Senator does not have any time remaining.

The Senator from Kansas is recognized.

Mr. BROWNBACK. I believe I have 10 minutes.

The PRESIDING OFFICER. Correct.

Mr. BROWNBACK. I yield a minute to the Senator from Arizona.

Mr. MCCAIN. The Senator from Iowa knows that Senators speak for themselves. My record is clear over many years. I have never supported earmarks, not because of its virtue or vices, but because it didn't go through an authorizing procedure. The Pima County College project may be good and beneficial, and the therapeutic horseback riding project might be good and beneficial. I happen to be ranking member of the Commerce Committee. Those are under the oversight of our Committee and they should be authorized. It is disgraceful the way these are put in.

The Senator from Kansas will soon bring out an example of a problem of legislating on appropriations. There is a major issue in his State concerning Indian gaming on which there has never been a hearing, never consideration. It was stuck into an appropriations bill, and it has profound effects on the State of Kansas. He is here, and rightfully upset, to say the least, about the fact that he, as a Senator from Kansas, never had any input into it and it was stuck into an appropriations bill.

I tell the Senator from Kansas that I will do everything I can to help him in the authorizing process to see that the process is carried out in a legitimate fashion.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

INDIAN GAMING

Mr. BROWNBACK. Madam President, I want to draw attention to something that happened in my State that I think is completely wrong in the appropriations process. The Senator from Nevada is aware of this and stated yesterday his support to help me out with this problem. I hope I can get the attention, as well, of the Senator from Iowa. This is what happens in the worst situations in the appropriating committees. It is not about money or an appropriation for a particular line item. In a conference committee, a half sentence was written in the report that overturned a Tenth Circuit Court of Appeals decision about Indian gaming in Kansas. It affects the Huron Cemetery in Kansas City, KS.

You can look at this picture. This is not a casino site. This is a cemetery site, Huron Indian Cemetery. It has been there several hundred years. It is on the banks of the Kansas River. It is a beautiful site, maintained well. What took place was this. We have four recognized Indian tribes in Kansas, and all four have casinos. A fifth tribe from outside the State, the Wyandotte tribe of Oklahoma, bought adjacent land and said: We want to make it into a reservation and casino, even though our tribe is in Oklahoma. We want to do this in Kansas City because this looks lucrative to us.

So they said, first, they wanted to put it right on top of this site. Then the courts and local opinion said no. Then they wanted to build the casino on stilts on the site. They said no to that, also. So they bought an adjacent building. That was blocked. That was blocked in the courts. The State of Kansas fought it.

The four recognized tribes of Kansas fought against it. I fought against it. The other Senator from Kansas fought against that. It has been stopped. The people of Kansas City don't want this taking place there.

OK. So then the tribe from Oklahoma litigates it in court. They are defeated at the Tenth Circuit Court of Appeals. They can't do this casino in Kansas, according to the Tenth Circuit Court of Appeals. The Governor doesn't want it, we Senators don't want it, and the tribes don't want it. Then they go into a conference committee—Department of Interior—and in the conference, at the last minute, a half-sentence, handwritten note was put in that overturns the Tenth Circuit Court of Appeals. Now they are going to be able to go forward and build a casino next to this beautiful cemetery.

This is a sacred site to a number of Native Americans in the United States. But because in a conference committee they got a half sentence in, written in pencil, it will overturn all of this work by all of these people. Is that right? Is that fair to take place? Is that the way the system is supposed to work? I don't think that is what is supposed to take place.

So we came back in the Labor-HHS appropriations bill and on the floor we worked with the managers and said: Look, this isn't right. Let's correct this in this appropriations bill.

The managers in the Senate, to their great credit—and I thank the Senator from Iowa—said: You are right; we will correct it in the Labor-HHS bill. Then it got stripped out of the bill because the House would not recede. We were trying to correct what took place in the dark of night through this conference committee report on Labor-HHS, and we were not able to get it done.

Now we are left with the possibility of a casino being built next to a cemetery by an out-of-State tribe that the tribes in Kansas, the Governor of Kansas, and the Senators from Kansas do not want, and it took place in the Appropriations Committee process.

We need a rule change so it does not happen again. I am here today to tell my colleagues that I am going to be working on this next year to get this overturned, to get this clarified. There were no hearings on this issue—none—in either the House or the Senate. It was stuck in at the last minute. It should not have taken place, yet it did, and now it is the law of the land, in spite of what all the people involved in this think about it.

This is clearly not appropriate. I hope we can put a rule in place to raise a point of order, requiring a 60-vote supermajority, against situations such as this happening to the Huron Indian Cemetery in Kansas City, KS. This just is not right. I am going to raise this issue next year. I hope my colleagues, and those on the Appropriations Committee, will work with us to correct such an injustice.

Thank you, Madam President. I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. HARKIN. Madam President, how much time is remaining?

The PRESIDING OFFICER. The Senator from Iowa has no time remaining.

Mr. HARKIN. How much time does Senator SPECTER have remaining?

The PRESIDING OFFICER. Twenty-nine minutes.

If no one yields time, time is charged equally to both parties.

Mr. HARKIN. Madam President, parliamentary inquiry: If a quorum call is instituted, does that time run against both sides?

The PRESIDING OFFICER. Under a previous order, it will run against all sides.

Mr. HARKIN. In that case, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Ms. LANDRIEU. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. NELSON of Florida). Without objection, it is so ordered.

Ms. LANDRIEU. Mr. President, I ask unanimous consent for 5 minutes to speak on the underlying bill and another unrelated subject.

The PRESIDING OFFICER. Against whose time?

Ms. LANDRIEU. Whatever time is remaining.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. LANDRIEU. I thank the Chair.

Ms. LANDRIEU. Mr. President, I realize there is time remaining and I thank the Senators for yielding. I have spoken many times on this issue, but I want to take another minute to speak about the underlying appropriations bill, particularly the educational aspects and components of this legislation. There were a few things I didn't get to say that I would like to add for the RECORD.

I thank the chair of the subcommittee, the Senator from Iowa, Mr. HARKIN, for his extraordinary work in this area for helping bring forward an appropriations bill that reflects the positive changes of the authorization bill, to have the appropriations reflect those new strategies for improving our schools and strengthening our move for reform, for strengthening the notion that every child can learn, that we can really have excellence in every school, that we are not happy with the status quo, that we recognize some schools

are terrific, some teachers are wonderful, but the system itself is not as invigorated and as strong as it should be, and it can be improved.

That is what this legislation says: No to the status quo and yes to change; no to process and yes to progress; no to ''incomes'' and yes to outcomes; and yes to results.

In this holiday season it is a wonderful gift to ourselves, to our Nation, to change the way we are appropriating funding for public schools and for all schools in this Nation.

Today marks a historic moment. For the first time in 35 years since the Federal Government says we will work in partnership with States to help educate our children, it needs to be a local responsibility, but it must be a national priority. Our Nation cannot be strong, it cannot be great, it cannot be economically as vital if we don't have good schools. In Florida and Louisiana, that does not begin in kindergarten or end with a college degree; that is prekindergarten, early childhood education, and lifelong learning.

It is clearly in our Nation's interest to help States and local communities educate and bring schools to our citizens. The best place to begin doing that is in the home. The second best place to shore that up is in schools, starting at the lower grades and working up. As a mother with young children, I know directly and very personally that those first few years, the foundation, are important.

This bill is historic because in that whole partnership, for the first time, we have actually funded something we talk about. We targeted the grants for title I. We have funded the effort to help get the money to the districts that need a helping hand, that have difficulty raising either sales tax or property tax or industrial tax and corporate tax because the tax base is not there, but the children are. The tax base might not be there, but there are smart children who live in that county. The tax base is not there, but their parents are working hard.

This bill, for the first time, sends the new money through the targeting formulas to bring that help to poor and disadvantaged children so they can take the new tests, pass them, and meet the new standards of accountability.

It is an extraordinary accomplishment. I thank the Senator from Vermont. I know he cast his vote—it was a difficult vote to cast—against the authorization bill because we failed to fully fund special education. I am disappointed in that. I will work with him and pledge to work with Democrats and Republicans to pick up more of our fair share of those special education dollars. I will work to reform special education, to make sure it works for our students, our families, our children who are greatly challenged, mentally and physically, as well as our teachers.

Without Senator JEFFORDS, the Senator from Vermont, his untiring commitment and focus to education, we never would have had $3 billion added to the Education bill. It would have been left on the table and there would not be the energy to get it. I know he is disappointed, but I hope he hears my words this morning and is encouraged.

There are those in the Chamber who recognize without his complete commitment and dedication to the schoolchildren of this Nation, this bill would be short a lot of money. But because he put his political muscle behind it and did what he needed to do, we have seen a tremendous increase in these investments. He should be happy and grateful. I know he is disappointed in special education, but I commit to him I will work diligently to see if we cannot shore up that part of the bill.

I ask unanimous consent to have printed in the RECORD the list of the moneys the States will receive, additional funds. Every State and county will be helped, but we will get resources to those families and communities that need a helping hand. It is a historic moment.

The PRESIDING OFFICER. The Senator from New Mexico has 5 minutes remaining.

Mr. DOMENICI. Did I lose time?

The PRESIDING OFFICER. There was a quorum call in progress that was evenly divided.

Mr. DOMENICI. Mr. President, fellow Senators, let me take a few minutes. First, I rise with a sense of great sadness and yet a feeling of great hope. You really can have both votes in yourself at the same time. Two nights ago Mental Health Equitable Treatment of 2001 was dropped from the Labor-HHS appropriations conference report. The Senate passed a wonderful bill. We sent it to the House as part of Labor appropriations, even though it was a major, major authorizing bill. We had our hopes high because in the Senate the support was high. The time had come to make sure, 2 years from now in the United States, most insurance policies would cover the mentally ill. That meant to this Senator in 8 or 10 years we would be able to look back and see a very different America when it came to street people, people who during cold winter months we see on the grates of our cities with the blankets wrapped around them.

In our jails and prisons, we know that now and for the ensuing months those who have mental illnesses such as distress that comes from depression, manic depression, schizophrenia, and a whole host of serious mental diseases, are more apt to be found in the county jail or the State jail than they are in treatment centers, be they treatment centers to which you take your sick person, and they are run privately or publicly. More mentally ill people, men and women, are in jails and facilities not intended for them than there are in facilities intended for them.

We in the Senate, with the leadership and help of my friend, Senator WELLSTONE, have a bill. We call it the Domenici-Wellstone bill. It is moving right along. It cleared the Senate, sending a powerful signal to those in America by the millions who are sick with these diseases, their relatives, and their friends. They had an extremely high hope that ran through their bodies and in many cases gave them a superb ray of hope that maybe, in the future in the greatest land on Earth, we would have insurance—subject to some limitations and some exclusions, but across this land the large businesses would be offering insurance coverage for those who were mentally ill who worked for them; that we would begin to see the same thing happen there that has happened to people with heart conditions. We would have doctors taking care of them. We would have research taking place. We would have centers and facilities for research and for care growing up across this land, public or private. We know that would be happening. Sure enough, we could cast our eyes, cast our vision not too far ahead of us, and say we are doing the right thing, serious mental illness is going to receive treatment.

I ask consent I have 5 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Insurance companies will be putting forth the kind of coverage necessary. What a day this will be. What a time that will be. What joy will come to those of us who have worked so hard. But more importantly, what joy will come to the millions of parents who will now see their children, when they probably have the first signs of these dread diseases, and these parents are going to be able to say we are not going to go broke trying to take care of an uninsured child with one of these dread diseases. What a marvelous, wonderful thing America will have done.

What do we hear? Over on the side, a dull but powerful beat of the insurance companies that are saying: This hasn't been covered before. Let's not cover it now. We hear a large undercurrent saying: We have never done this before. We should not start now. It is going to cost too much.

To them let me say: We hope you will join us when this bill clears both Houses, and when at that point you have to start writing insurance for people who are sick with schizophrenia, manic depression, those kinds of diseases—and there are many other diseases that will be covered. Research will start to take place because these kinds of sick people are carrying on their backs a package of assets, assets that are the payments that will be forthcoming from the sick person running to the doctor, to the clinic, to the research facilities. What a change and how America will have grown up when that occurs.

There are a lot of workers in this vineyard. There are thousands upon thousands of Americans who are busy in this field, in their home cities, in

their States. Many came to town this past week to show up at the conference meeting where the House and Senate met on this Labor, Health and Human Services appropriations bill. Why did they show up? They showed up because the Senate had attached to that bill a thorough covering of these diseases.

We knew it was a chance because the House would rather have this considered by another committee, not an appropriations committee. We got our chance to speak a few words. What words were spoken. Clearly, the message did not stay in this little cubicle, Senator WELLSTONE. The message went out from that room. The message went out that it is the time, it is the place, and it is ready.

As a matter of fact, I believe the members there present would have, by overwhelming numbers, voted to take this bill and put it on this appropriations bill and send it to the President for his signature. We made some good things happen. The President of the United States has issued a letter saying next year will be the time. We will hold him to it. He is saying he would like to do that. We know he had a distinguished friend who had depression and committed suicide, and he doesn't have any trouble with the idea of this being a disease, severe depression. It must be treated. Severe depression must have coverage just as the other dread diseases.

I have here lately been comparing these dread diseases of the mind with the diseases of the heart. Clearly, we covered heart even though it is part spiritual, part physical. We do not say ''we don't cover that because it is very difficult to diagnose and do research on.'' Thank God we got it together and worked on it.

So I understand my time is about to run out. I thank the Chair.

I just want to say I am happy again. The tenor and the tone—those who were saying we are going do it were really a different group of people. They are going to have hearings. Where they have not had a single hearing in the House of Representatives on the issue of parity of coverage for American people, we have had numerous hearings here. They have had none. They pledge it. Once they have it, once their Members hear, once their Members are importuned by these citizens to do this, it will move.

So I say thanks to Senator WELLSTONE for all the support and help, and to all those in the Senate—there are many, over 65 on the bill. The pressure from that, the ambience from that, was strong. We will, indeed, next year, be moving ahead with a big strong wave, and it will happen.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. HARKIN. Parliamentary inquiry, Mr. President: How much time remains on the conference report?

The PRESIDING OFFICER. The time remaining is 20 minutes to the Senator from Pennsylvania.

Mr. HARKIN. Again, I inquire, if there is a quorum call, then the time runs on both sides?

The PRESIDING OFFICER. It will all be charged to the Senator from Pennsylvania.

Mr. HARKIN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant bill clerk proceeded to call the roll.

Mr. NELSON of Florida. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. REID). Without objection, it is so ordered.

Mr. NELSON of Florida. Mr. President, I ask if the Senator from Pennsylvania would give me 2 minutes of his time.

Mr. SPECTER. Mr. President, I am delighted to yield 2 minutes to the Senator from Florida.

The PRESIDING OFFICER. The Senator from Florida is recognized for 2 minutes.

Mr. NELSON of Florida. I thank the Senator.

TERRORISM INSURANCE

Mr. NELSON of Florida. Mr. President, we are coming down to the crunch time with the conclusion of this session. One of the issues to be decided this afternoon is whether or not we are going to have any protection on terrorism insurance—not only for large and small businesses but also for homes and cars, and for personal lives.

Since there are so many agendas going on with this topic, I urge, since this is the very last gasp, the Senate to come to an agreement for a fallback and a short period of time—say 6 months—and adopt legislation that would have the Federal Government assume the terrorism risk for that short period of time with a freeze on rates so the consumer is not paying the high rates now being jacked up; and a moratorium on the cancellations so the consumers, businesses, and individual home and car owners would have protection against a terrorist risk of loss.

We can do that. That is a fallback position. The alternative is to do nothing. That is unconscionable.

Rates are being jacked as we speak, and cancellations of terrorist coverage is now occurring in the 50 States.

I thank the President for letting me bring this to the attention of the Senate. I thank the Senator from Pennsylvania for yielding the time.

Mr. SPECTER. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Pennsylvania has 13 minutes remaining.

Mr. SPECTER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant bill clerk proceeded to call the roll.

Mr. GRAMM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator is recognized.

Is someone yielding time?

Mr. SPECTER. I yield 2 minutes of my time.

The PRESIDING OFFICER. The Senator from Texas is recognized for 2 minutes.

Mr. GRAMM. Mr. President, I think we need to take the opportunity to do terrorism insurance. I don't think at this late date, having put together two different compromises, that we could start from scratch on a program which nobody fully understands. We are going to have a chance this afternoon to do it. We have a compromise that has been worked out by Senator DODD, Senator DASCHLE, Senator SARBANES, and members of the Banking and Commerce Committees. I think we need to take it.

THE STIMULUS PACKAGE

Mr. GRAMM. Mr. President, I hope we get an opportunity to vote on the stimulus package. I liken our situation to a situation we would face if in the cold of winter a storm came along and blew the roof off of an apartment house. It is clear unless something is not done that people would get pneumonia, frostbite, and suffer from exposure.

We have one group of Congressmen and Senators rushing in to say that we have to hire doctors. We have to buy penicillin. We need blankets.

We have another group that says: Why don't we rebuild the roof? Then it is suggested that rich people live on the upper floors and they would benefit more by putting the roof back on.

Then the President proposes the classic political compromise, which is: Why don't you rebuild some of the roof and buy some of the penicillin?

I hope we can go that route. At least we would benefit people. I hope we get a chance to vote on that package today.

I yield the floor. I thank the Senator for this and for many other things.

Mr. SPECTER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. NELSON of Florida). The clerk will call the roll.

The senior assistant bill clerk proceeded to call the roll.

Mr. SPECTER. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. Mr. President, we are about at the end of the time in this session. I just want to make a comment or two about the subject matter of the Domenici-Wellstone amendment to try to bring parity to mental health. I regret very much that the Appropriations Committee did not act on it.

That amendment passed the Senate floor. And it had support from some in the House, really divided along party lines. There are some assurances from the President and at least one of the

authorizing committees in the House that there will be action to bring parity.

Mental illness is as much an illness as is physical illness, and that ought to be corrected. In the conference, I made the point that it was my hope that if action was not taken by the authorizers that the appropriators would proceed, again, next year at this time and act in our conference.

Mr. President, how much time remains?

The PRESIDING OFFICER. There are 8 minutes remaining for the Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I ask unanimous consent that I may proceed for the remainder of that time—the 8 minutes—as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORTS ON THE CASES OF DR. WEN HO LEE AND DR. PETER LEE

Mr. SPECTER. Mr. President, before the first session of the 107th Congress ends, I want to put on the RECORD reports on the cases of Dr. Wen Ho Lee and Dr. Peter Lee, which were subject to oversight by the Judiciary Committee on the Department of Justice during the 106th Congress. The Subcommittee's work was controversial, partly because it included oversight of Attorney General Reno's handling of the investigations into campaign finance matters on President Clinton and Vice President Gore.

Without going into all the details, suffice it to say that bipartisan agreement could not be reached within the Subcommittee on a report or in the full Committee on issuance of subpoenas to obtain necessary testimony.

When a subpoena was sought for FBI Director Louis Freeh, the opposition of Senator HATCH, the Chairman of the Committee, proved decisive. In April 2000, the Subcommittee obtained a memorandum from Director Freeh dated December 1996 which recited a conversation between a ranking FBI official and a ranking Department of Justice official to the effect that the investigation of the Department of Justice would effect the Attorney General's tenure at a time before President Clinton had reappointed her. The Freeh memo further referenced a conversation between Attorney General Reno and Director Freeh. The Subcommittee's inability to subpoena and question Freeh was a significant hindrance to pursuing that important matter.

That memorandum and other files have been inaccessible since October with the closing of the Hart Building due to the anthrax mail. The terrorist attack of September 11 has further hindered the finishing of the Subcommittee's work because the FBI has, understandably, been occupied with investigating terrorists, which preempted other pending matters.

The Subcommittee's oversight was thwarted repeatedly by delays by the FBI and the intransigence of the Department of Energy. Once Wen Ho Lee was indicted, the FBI refused to provide additional information, claiming it would hamper the prosecution. Even after Dr. Wen Ho Lee entered a guilty plea and the prosecution was concluded, the FBI continued to refuse to provide information on the ground that it would impede their debriefing of Dr. Lee in obtaining the tapes which he took.

Congressional oversight is traditionally a difficult matter because the House and the Senate are so busy with legislative matters and it is like pulling teeth, at best, to get cooperation from the Executive branch. The Subcommittee's oversight efforts on Dr. Wen Ho Lee have been even tougher. In addition to the general difficulties, the Subcommittee's oversight efforts have been further complicated by the change in party control in May 2001, the terrorist attack on September 11 of this year, and the departure of the Subcommittee's key investigator Mr. Dobie McArthur. Mr. McArthur did an extraordinary job, virtually singlehandedly conducting the oversight investigations and writing the reports.

With the new FBI Director Robert S. Mueller, III focusing on reorganization of the Bureau and the additional responsibilities of the FBI occasioned by the September 11 terrorist attack, and the shift of the Department of Justice in the focus of FBI activities, it is very difficult to pursue further the Subcommittee's inquiry on Dr. Wen Ho Lee, but it is my hope that at some date that might be done. Because of the serious dereliction of the FBI's handling of the Dr. Wen Ho Lee investigation, it will never be known beyond a reasonable doubt whether Dr. Wen Ho Lee was a spy, although there is substantial evidence to that effect in the McArthur reports. The publication of the reports on Dr. Wen Ho Lee and Dr. Peter Lee will enable readers to evaluate the seriousness of espionage in damaging our national security interests, the failure of the Executive branch in dealing with those investigations, the need for changes in procedures by the Department of Justice, including the FBI, and the Department of Energy. Some legislation, as noted in the McArthur reports, has already been enacted as a result of the Subcommittee's oversight and further legislative reforms are needed. Publication of these reports will promote those objectives.

Mr. President, I ask unanimous consent that the text of the two-page Freeh memorandum of December 1996 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DECEMBER 9, 1996.

To: MR. ESPOSITO,
From: DIRECTOR,
Subject: DEMOCRATIC NATIONAL CAMPAIGN MATTER

As I related to you this morning, I met with the Attorney General on Friday, 12/6/96, to discuss the above-captioned matter.

I stated that DOJ had not yet referred the matter to the FBI to conduct a full, criminal investigation. It was my recommendation that this referral take place as soon as possible.

I also told the Attorney General that since she had declined to refer the matter to an Independent Counsel it was my recommendation that she select a first rate DOJ legal team from outside Main Justice to conduct that inquiry. In fact, I said that these prosecutors should be ''junk-yard dogs'' and that in my view, PIS was not capable of conducting the thorough, aggressive kind of investigation which was required.

I also advised the Attorney General of Lee Radek's comment to you that there was a lot of ''pressure'' on him and PIS regarding this case because the ''Attorney General's job might hang in the balance'' (or words to that effect). I stated that those comments would be enough for me to take him and the Criminal Division off the case completely.

I also stated that it didn't make sense for PIS to call the FBI the ''lead agency'' in this matter while operating a ''task force'' with DOC IGs who were conducting interviews of key witnesses without the knowledge or participation of the FBI.

I strongly recommended that the FBI and hand-picked DOJ attorneys from outside Main Justice run this case as we would any matter of such importance and complexity.

We left the conversation on Friday with arrangements to discuss the matter again on Monday. The Attorney General and I spoke today and she asked for a meeting to discuss the ''investigative team'' and hear our recommendations. The meeting is now scheduled for Wednesday, 12/11/96, which you and Bob Litt will also attend.

I intend to repeat my recommendations from Friday's meeting. We should present all of our recommendations for setting up the investigation—both AUSAs and other resources. You and I should also discuss and consider whether on the basis of all the facts and circumstances—including Huang's recently released letters to the President as well as Radek's comments—whether I should recommend that the Attorney General reconsider referral to an Independent Counsel.

It was unfortunate that DOJ declined to allow the FBI to play any role in the Independent Counsel referral deliberations. I agree with you that based on the DOJ's experience with the Cisneros matter—which was only referred to an Independent Counsel because the FBI and I intervened directly with the Attorny General—it was decided to exclude us from this decision-making process.

Nevertheless, based on information recently reviewed from PIS/DOC, we should determine whether or not an Independent Counsel referral should be made at this time. If so, I will make the recommendation to the Attorney General.

Mr. SPECTER. Mr. President, I am now going to commence with the reading of the report on Dr. Wen Ho Lee: My understanding, after consulting with the authorities, is that once I begin the reading of the report, the remainder may be incorporated in the RECORD as if read in full.

The PRESIDING OFFICER. And the Senator is advised he has 2½ minutes left.

Mr. SPECTER. I thank the Chair. I shall not use the full 2½ minutes.

This report augments and completes the interim report released on March 8, 2000, regarding the Government's investigation of espionage allegations against Dr. Wen Ho Lee who pleaded guilty on September 13, 2000 to one felony count of unlawful retention of national defense information.[1] The special Judiciary subcommittee on Department of

Justice Oversight, which I chaired in the last Congress, began oversight on the Wen Ho Lee case and several other matters in September 1999, but suspended its review of this case at the request of FBI Director Louis Freeh after Dr. Lee was indicted and jailed on December 10, 1999.

I issued the interim report in March 2000 to demonstrate the need for reforms contained in the Counterintelligence Reform Act of 2000, which became law as Title VI of Public Law 106–567 on December 27, 2000. That bipartisan bill, which passed the Senate Judiciary and Select Intelligence committees without a single vote in opposition despite sometimes strong disagreements about certain aspects of the Wen Ho Lee case, corrected many of the flaws in the government's procedures for handling espionage investigations and prosecutions. This report, consisting of an executive summary accompanied by a detailed review of the case, completes the oversight record on the Wen Ho Lee matter.

HIGHLIGHTS OF THE REPORT

The government's investigation of Los Alamos National Laboratory (LANL) nuclear weapons scientist Dr. Wen Ho Lee was so inept that despite scrutiny spanning nearly two decades, both the FBI and the Department of Energy missed repeated opportunities to discover and stop his illegal computer activities. As a consequence of these numerous failures, magnetic computer tapes containing some of the nation's most sensitive nuclear secrets are now missing when they could have been recovered as late as December 1998 and possibly even later.

One great tragedy of the Wen Ho Lee case is that the entire truth will likely never be known. As a consequence of an inept investigation, the government has lost the credibility to claim that its version of events is the absolute truth. Dr. Lee also lacks the credibility to tell the definitive tale of this case: he repeatedly lied to investigators, created his own personal nuclear weapons design library without proper authority, copied nuclear secrets to an unclassified computer system accessible from the Internet, and passed up several opportunities to turn his tape collection over to the government. If the information Dr. Lee put at risk did not fall into the wrong hands, it is a matter of mere luck. When the nation's most sensitive nuclear secrets are at issue, it is unacceptable that we should have to rely on luck to keep them safe.

Among the many concerns arising from the investigation and prosecution of Dr. Lee, the following are most significant:

The government obtained highly credible information in 1994 that Dr. Lee had helped the Chinese with computer codes and software, but took no steps to examine his computer. Had Dr. Lee's computer been examined, his illegal downloads of some of the nation's most sensitive nuclear weapons data to an unclassified computer system accessible from the Internet could have been detected and stopped.

The manner in which the FBI relied almost completely on the Department of Energy's Administrative Inquiry (AI) throughout the investigation which began in 1996, rather than developing an independent investigative plan, caused an inappropriate focus on the alleged loss of W–88 warhead design information to the exclusion of all else. The FBI never questioned how the suspected loss of the W–88 information related to the codes and software help that Dr. Lee was suspected of having provided to the PRC. The ongoing debate over whether the AI's underlying assumptions—namely that rapid advances in the PRC weapons program in the early 1990s resulted from their acquisition of U.S. weapons design information, and that the loss most likely occurred from Los Alamos—is of secondary importance. The mere fact that the PRC had obtained classified nuclear weapons information should have been sufficient to trigger a thorough investigation, but the FBI's investigation was anything but thorough.

The Department of Justice was wrong to reject the 1997 request by the FBI for electronic surveillance under the Foreign Intelligence Surveillance Act. Had the request been permitted to go forward to the court, Dr. Lee's illegal downloading could have been detected and halted in 1997. The Department of Justice's own internal review, conducted by Assistant U.S. Attorney Randy Bellows, concluded that the request should have been approved.

The Department of Energy was wrong to allow Wackenhut contract polygraph examiners to administer a polygraph to Dr. Lee on December 23, 1998. The Wackenhut contractors incorrectly reported that Dr. Lee passed the polygraph, prompting the FBI to nearly shut down its investigation at a time when scrutiny of Dr. Lee should have been intensified. Dr. Lee has told investigators the computer tapes that are now missing were in his office on December 23. Had the FBI conducted its investigation consistent with the fact that Dr. Lee did not pass the polygraph, the tapes could have been recovered.

The nuclear secrets that Dr. Lee mishandled were correctly described by the government as extremely sensitive. Dr. Lee's actions in downloading these files onto an unclassified computer system accessible from the Internet, and later onto portable magnetic tapes, constituted a serious threat to the national security.

Allegations that Dr. Lee was targeted for investigation and prosecution as a result of ''ethnic profiling'' are unfounded. The repeated investigations of Dr. Lee resulted from reasonable suspicions raised by Dr. Lee's own conduct. Moreover, there is absolutely no evidence that Dr. Lee's ethnicity was a factor in the decision to prosecute Dr. Lee or to hold him in unusually strict pretrial confinement.

The government's harsh treatment of Dr. Lee after his arrest on December 10, 1999, including putting him in solitary confinement and requiring him to be manacled does, however, raise troubling questions. The government's claim that Dr. Lee was such a threat he had to be held in pretrial confinement under very strict conditions is inconsistent with the long delay from March to December 1999—when the government first learned of the downloaded secrets until he was arrested—and the acceptance of a plea agreement in September 2000 by which Dr. Lee was released with no monitoring whatsoever, and which is only marginally better than it could have had in December 1999, at least in terms of finding out what happened to the tapes. Taken together with the many missed opportunities to detect Dr. Lee's illegal computer activity and recover the tapes, the government's handling of the plea agreement raises questions as to whether the harsh tactics were intended to coerce a confession.

The government's claim that Dr. Lee presented such a danger that he had to be prohibited from communicating is severely undercut by its failure to even seek any type of electronic surveillance on him even after the existence of the tapes was known. If the government was truly concerned that Dr. Lee could potentially alter the global strategic balance through phrases as innocuous as ''Uncle Wen says hello,'' or might send a signal to a foreign intelligence service to extract him, it should have sought to monitor his communications, but it did not.

Some of the most controversial and misguided steps in the case appear to have been motivated more by a desire to protect the affected agency's image than the national security. This is particularly true of the Department of Energy's decision to administer a polygraph to Dr. Lee in December 1998 when it seemed likely that the House's Cox Committee report[3] was going to expose the many missteps that had occurred up to that point.

The full report which follows addresses each of these matters in detail, as well as several other important aspects of the case.

REPORT ON THE GOVERNMENT'S HANDLING OF THE INVESTIGATION AND PROSECUTION OF DR. WEN HO LEE

The government's conduct in this case is so filled with major breakdowns by every agency involved that it almost defies analysis and makes determining responsibility for the failures a very complicated matter. This report attempts to sort out what went wrong and why, and to determine how such mistakes can be avoided in future cases. It includes some new information which has not been publicly disclosed before, and provides a thorough review of the facts that are known. For ease of reading, it is organized in roughly chronological order, with the exception being a section in the beginning which describes the key elements of the government's case against Dr. Lee.

The case against Dr. Wen Ho Lee

Most Americans had never heard of Dr. Wen Ho Lee before he was fired from Los Alamos National Laboratory in New Mexico on March 8, 1999. The first vague hints of the story that would explode on the national scene in March 1999 had come in a January 7, 1999, Wall Street Journal article by Carla Anne Robbins, which alleged that ''China received secret design information for the most modern U.S. nuclear warhead'' and quoted unnamed U.S. officials as saying that the ''top suspect is an American working at a U.S. Department of Energy laboratory.''[4] The WSJ article went on say that the loss of information related to the W–88 warhead was the ''most significant in a 20–year espionage effort by Beijing that targeted the U.S. nuclear weapons laboratories,'' and that ''China was given general, but still highly secret, information about the warhead's weight, size and explosive power, and its state-of-the-art internal configuration, which allowed designers to minimize size and weight without losing power.''[5] The article further noted that the investigation of the suspected loss of W–88 information was the ''third major Chinese espionage effort uncovered at the U.S. labs over the last two decades,'' and was a key part of the work of the special House committee, known as the Cox Committee, that was reviewing American high-tech transfers to China.[6]

The story of suspected espionage at LANL remained dormant after the Robbins article until the New York Times published a March 5, 1999 piece by James Risen and Jeff Gerth, titled ''Breach at Los Alamos: A Special Report.'' The article did not name Dr. Lee, but raised the profile of the case by quoting unnamed administration officials as saying that ''working with nuclear secrets stolen from an American Government laboratory, China has made a leap in the development of nuclear weapons: the miniaturization of its bombs. . .''[7] The Risen and Gerth story put a political spin on the case, quoting ''some American officials'' as asserting that ''the White House sought to minimize the espionage issue for policy reasons.'' The senior National Security Council official who handled the case, Gary Samore, denied the allegations, telling the NYT reporters that ''The idea that we tried to cover up or downplay these allegations to limit the damage to U.S.-Chinese relations is absolutely wrong.''[8]

Risen and Gerth then explained that their own investigation had revealed that ''throughout the Government, the response to the nuclear theft was plagued by delays, inaction and skepticism—even though senior intelligence officials regarded it as one of the most damaging spy cases in recent history.''[9] In support of their charges, they cited disagreements between former DOE intelligence chief Notra Trulock, who was the main proponent of the view that Chinese weapons advances were attributable to espionage, and other senior administration officials, including former Acting Energy Secretary Elizabeth Moler, who was said to have ordered Trulock not to brief the Cox Committee ''for fear that the information would be used to attack the President's China policy.''[10]

Ms. Moler denied the allegations that she had interfered with Mr. Trulock's congressional testimony, but the die had been cast so that as the story unfolded over the following months there was always an underlying hint that the Clinton Administration had ignored or downplayed an important espionage case to avoid criticism or complications with its China policy.

On March 8, 1999, Dr. Lee was publicly named for the first time in an Associated Press story by Josef Hebert. Quoting a statement from the Department of Energy (which did not name Dr. Lee), Hebert wrote that Dr. Lee had been fired for '''failing to properly safeguard classified material' and having contact with 'people from a sensitive country'''.[11] Shortly thereafter, the New York Times ran another article by James Risen, who had interviewed Energy Secretary Bill Richardson. According to Risen, Richardson told him that Dr. Lee had been fired on March 8 ''for security breaches after the FBI questioned him in connection with China's suspected theft of American nuclear secrets. . .''[12] Secretary Richardson also acknowledged that Dr. Lee had been questioned for three days, but had ''stonewalled'' during the questioning.[13]

Through the spring and summer, details of the case dribbled out as the press continued its investigation into the matter and several congressional committees conducted oversight on the case. Among the new details to emerge were allegations totally unrelated to the W–88 matter, including charges that Dr. Lee had transferred massive amounts of classified nuclear data to the unclassified portion of the LANL computer system and later onto portable magnetic tapes, which were thought to be missing.

The Cox Committee released its unclassified report on May 25, 1999, which did not mention Dr. Lee by name but clearly referred to his case. The President's Foreign Intelligence Advisory Board released its own review of security at the national labs in June, concluding that the labs did wonderful science but were lousy on security matters.[15] In August, Senators Thompson and Lieberman of the Governmental Affairs Committee released a special statement, saying:

''This is a story of investigatory missteps, institutional and personal miscommunications, and—we believe—legal and policy misunderstandings and mistakes at all levels of government. The DOE, FBI, and DOJ must all share the blame for our government's poor performance in handling this matter.''[16]

By September 1999, the government had finally separated the W–88 matter from the issue of Dr. Lee's illegal file downloads, and had started a new investigation aimed at finding out how the PRC had obtained the W–88 information it was known to possess. It did so quietly, without publicly acknowledging that Dr. Lee was apparently no longer a suspect in the loss of the W–88 information.

Also in late September 1999, the Senate Judiciary subcommittee on Department of Justice Oversight was organized, with a mandate to examine: technology transfer to the PRC, including the Wen Ho Lee case, the Peter Lee case, and the Loral/Hughes matter; the facts surrounding the FBI's use of pyrotechnic tear gas rounds during the 1993 standoff at Waco, which had recently been confirmed in a special report of the Texas Rangers; and the Department of Justice's handling of campaign finance investigations and prosecutions from the 1996 presidential campaign.[17]

The subcommittee began an expeditious review of the Wen Ho Lee case and the other matters within its jurisdiction, and sent out letters to witnesses on December 7, 1999, for a hearing on December 14, which would examine two issues: 1) the details of a December 23, 1998 polygraph exam that had been administered to Dr. Lee, and 2) the relationship between the Lees and the government.

On December 10, 1999, Dr. Lee was arrested and charged in a 59–count indictment[18] of mishandling classified nuclear weapons data, prompting FBI Director Freeh to write to me, asking that I postpone hearings on the case. In view of the extraordinary circumstances of the case and Director Freeh's unprecedented request, which he reiterated to me and Senator Torricelli in a meeting on December 14, I agreed to postpone hearings on the case, but to continue a review of government documents unrelated to the criminal case, as well as documents that came into the public domain as a result of the government's prosecution of Dr. Lee.

The indictment of Dr. Lee referred to a series of tapes Dr. Lee made from 1993 through 1997, during which time he collected SECRET and CONFIDENTIAL Restricted Data[19] into a directory on the classified computer system at LANL, then transferred the information onto the unclassified portion of the LANL computer system and ultimately onto a series of portable magnetic computer tapes, each capable of holding 150 megabytes of information. All told, the information he collected and transferred to portable magnetic tapes was more than 800 megabytes, the equivalent of over 400,000 pages of data.[20]

At the bail hearing of Dr. Lee on Dec. 13, 1999, the key government witness, Dr. Stephen Younger, Associate Laboratory Director for Nuclear Weapons at Los Alamos, testified as follows about the nuclear secrets Dr. Lee was accused of mishandling:

''These codes, and their associated data bases, and the input file, combined with someone that knew how to use them, could, in my opinion, in the wrong hands, change the global strategic balance.''[21]

It would be hard, realistically impossible, to pose a more severe risk than to ''change the global strategic balance.''

Dr. Younger further testified that:

''They enable the possessor to design the only objects that could result in the military defeat of America's conventional forces . . . . They represent the gravest possible security risk to . . . the supreme national interest.''[22]

A ''military defeat of America's conventional forces'' and ''the gravest possible security risk to . . . the supreme national interest'' constitute threats of obvious enormous importance.

At this same bail hearing, when the judge seemed to be leaning toward a restrictive form of house arrest, Mr. Kelly warned that Dr. Lee could be ''snatched and taken out of the country'' by hostile intelligence services.[23] The lead FBI Agent then on the case, Robert Messemer, told the judge to expect ''a marked increase in hostile intelligence service activities both here in New Mexico and throughout the United States in an effort to locate those tapes,'' and warned that ''our surveillance personnel do not carry firearms, and they will be placed in harm's way if you require us to maintain this impossible task of protecting Dr. Lee.''[24]

The government made these representations in a successful effort to deny Dr. Lee bail and he remained in pretrial confinement for more than nine months. By September 13, 2000, when Judge Parker approved the plea agreement under which Dr. Lee would plead guilty to one of the original fifty-nine felony counts and accept a sentence of ''time-served'' at 278 days, the government's case against Dr. Lee appeared to lie in tatters, as did its credibility.

Judge Parker's statements at the plea hearing were a stunning rebuke of the government when he said:

''. . . I believe you were terribly wronged by being held in custody pretrial . . . under demeaning, unnecessarily punitive conditions. I am truly sorry that I was led by our Executive Branch of government to order your detention last December.

''Dr. Lee, I tell you with great sadness that I feel I was led astray last December by the Executive Branch of our government through its Department of Justice, by its Federal Bureau of Investigation and by its United States Attorney for the District of New Mexico. . .''[25]

After praising many of the lawyers on both sides of the case, Judge Parker made clear where he felt the responsibility for the government's mistakes should lay:

''It is only the top decision makers in the Executive Branch, especially the Department of Justice and the Department of Energy and locally, during December, who have caused embarrassment by the way this case began and was handled. They did not embarrass me alone. They have embarrassed our entire nation and each of us who is a citizen of it.''[26]

When Dr. Lee walked free, convicted of a single felony count out of 59 and sentenced to time served, the nation was stunned by the government's rapid reversal. The government had argued even as late as September 1, 2000 that Dr. Lee was so serious a threat to the national security that he had to be held in solitary confinement under extraordinarily stringent conditions, yet less than two weeks later, he was allowed to walk out of jail a free man. Even President Clinton, who strangely acted as though it was some alien entity that had done such a sharp turnabout rather than an agency within his own administration, seemed stunned by the change of position. On the day after Dr. Lee was released, President Clinton told reporters at the White House:

''The whole thing was quite troubling to me, and I think it's very difficult to reconcile the two positions that one day he's a terrible risk to the national security and the next day they're making a plea agreement for an offense far more modest than what had been alleged.''[27]

It may remain impossible to reconcile the two positions, but it is necessary to try, if for no other reason than to help Americans understand why the government acted as it did in the Wen Ho Lee case. Although it may not be sufficient to restore the public's confidence in the agencies involved in this case, a thorough examination of the facts such as that attempted here is a necessary step in that direction.

The Investigations of Dr. Wen Ho Lee

The purpose of counterintelligence is to identify suspicious conduct and then pursue an investigation to prevent or minimize access by foreign agents to our secrets. From a counterintelligence perspective, the government's handling of the Wen Ho Lee matter

has been an unmitigated disaster. The investigation of Dr. Lee since 1982 has been characterized by a series of errors and omissions by the Department of Energy and the Department of Justice, including the FBI, which have permitted Dr. Lee to threaten U.S. supremacy by putting at risk information that could change the ''global strategic balance.''

While Dr. Lee, of course, must bear primary responsibility for any damage that might result to national security from his mishandling of our nuclear secrets, those officials in the DOE, the FBI and, to a lesser degree, the DOJ, who participated in the investigation of Dr. Lee must accept responsibility for their own failure to detect and put a stop to Dr. Lee's illegal computer activity. It would be one thing if an individual who had never shown up on the counterintelligence radar scope was later found out, but Dr. Lee was under active investigation during the very time he was engaged in illegal computer downloads, yet his activities were not detected.

In fact, Dr. Lee was investigated on multiple occasions over seventeen years, but none of these investigations—or the security measures in place at Los Alamos—came close to discovering and preventing Dr. Lee from putting the national security at risk by placing highly classified nuclear secrets on an unsecure system where they could easily be accessed by even unsophisticated hackers.[18] It is difficult to comprehend how officials entrusted with the responsibility for protecting our national security could have failed to discover what was really happening with Dr. Lee, given all the indicators that were present.

The 1982–1984 Investigation

Dr. Wen Ho Lee was born in Nantou, Taiwan, in 1939. After graduating from Texas A&M University with a Doctorate in 1969, he became a U.S. citizen in 1974, and began working at Los Alamos National Laboratory in applied mathematics and fluid dynamics in 1978.[20] The X-Division, where Dr. Lee worked from 1982 until 1998, has the highest level of security of any division at LANL. It is responsible for the design of thermonuclear weapons, and Dr. Lee was part of a team working on five Lagrangian mathematical codes, also known as ''source codes'', used in weapons development. Dr. Lee's wife, Sylvia, also worked at LANL from November 1980 until June 1995. The last position she held was ''Computer Technician,'' and she held a Top Secret clearance from 1991 through 1995.[30]

The FBI first became concerned about Dr. Lee as a result of contacts he made with a suspected PRC intelligence agent in the early 1980s. On December 3, 1982, Dr. Lee called a former employee of Lawrence Livermore National Laboratory (LLNL) who was suspected of passing classified information to the Peoples Republic of China (PRC). This call was intercepted pursuant to a FISA court authorized wiretap in another FBI espionage investigation. After introducing himself, Dr. Lee stated that he had heard about the Lawrence Livermore scientist's ''matter'' and that Lee thought he could find out who had ''squealed'' on the employee.[31] Based on the intercepted phone call, the FBI opened an espionage investigation on Dr. Lee.

For the next several months the FBI investigated Dr. Lee, with much of the work being done under the guise of the periodic reinvestigation required for individuals with security clearances. On November 9, 1983, the FBI interviewed Dr. Lee. Before being informed that the FBI had intercepted his call to the Lawrence Livermore employee, Lee stated that he had never attempted to contact the employee, did not know the employee, and had not initiated any telephone calls to him. These representations were patently false.[32] Dr. Lee offered during the course of this interview to assist the FBI with its investigation of the other scientist.

On December 20, 1983 Dr. Lee was again interviewed by the FBI,[33] this time in California. During this interview, Lee explained that he had been in contact with Taiwanese nuclear researchers since 1977 or 1978, had done consulting work for them, and had sent some information that was not classified but that should have been cleared with DOE officials. He tried to explain that he had contacted the subject of the other investigation because he thought this other scientist was in trouble for doing the same thing that Lee had been doing for Taiwan.[34] After this interview, the FBI sent Dr. Lee to meet with the espionage suspect.

On January 24, 1984, Dr. Lee took an FBI polygraph examination which included questions about passing classified information to any foreign government, Lee's contacts with the Taiwanese Embassy, and his contacts with the LLNL scientist. Although the FBI has subsequently contended that Dr. Lee's answers on this polygraph were satisfactory, there remained important reasons to continue the investigation. His suspicious conduct in contacting the Lawrence Livermore scientist and then lying about it, the nature of the documents that he was sending to the Taiwanese Embassy, and the status of the person to whom he was sending those documents were potential danger signals. Although not classified, the documents Dr. Lee was passing to Taiwan's Coordination Council of North America were subject to Nuclear Regulatory Commission export controls. They were specifically stamped ''no foreign dissemination.'' According to testimony of FBI Special Agent Robert Messemer at a special hearing on December 29, 1999, FBI files also contain evidence of other ''misrepresentations'' that Dr. Lee made to the FBI in 1983–1984 which have raised ''grave and serious concerns'' about Dr. Lee's truthfulness.[36] Notwithstanding these reasons for continuing the investigation, the FBI closed its initial investigation of Lee on March 12, 1984.[37]

Although the FBI's 1982–1984 investigation was generally well run, three areas of concern are worth noting. First, the FBI should have coordinated more closely with the Department of Energy. When initially contacted by the FBI in 1982, the DOE's Office of Security recommended that Dr. Lee be removed from access due to the sensitivity of the area in which he worked. Had the DOE security official's instincts been followed, Dr. Lee would not have been able to put at risk, years later, the massive volume of nuclear data that he ultimately did.

The second area of concern is that the FBI closed the investigation despite several troubling indicators. As noted previously, FBI Special Agent Messemer mentioned several misrepresentations that Dr. Lee made to the FBI which were relevant to his truthfulness. Two of these misrepresentations stand out as particularly important. First, Dr. Lee learned about the LLNL scientist's situation from a mutual friend during an October 1982 visit to LLNL.[38] Second, and more importantly, upon learning of the LLNL scientist's predicament, Dr. Lee immediately attempted to call his point of contact at the Coordination Council of North America (the equivalent of the Taiwanese Embassy in Washington, DC).[39] That Dr. Lee would attempt to contact a foreign embassy seeking help for a fellow scientist should have raised serious questions about his trustworthiness.

Unfortunately, the FBI did not discover this until after they had already made a decision to use him in the investigation of the LLNL scientist. Had the FBI been more cautious in assessing Dr. Lee's trustworthiness in the first place, it would likely not have used him in the investigation of the other scientist, and would therefore have been in a better position to facilitate his termination from LANL or, at the very least, the removal of his security clearance. Director Freeh recently confirmed that the FBI had made no recommendation to the DOE regarding the removal of Dr. Lee's clearance following the 1982–1984 investigation.[40]

The second element of Dr. Lee's conduct in the 1982–1984 investigation that deserved greater attention from the FBI than it got is the status of the individual to whom Dr. Lee was sending the information at the CCNA. This individual was known to the FBI as an intelligence collector (although it remains unclear as to whether Dr. Lee had any reason to be aware of that). The FBI did take the necessary steps to learn how Dr. Lee came to know this individual, but it did not give sufficient weight to the individual's status as an intelligence collector.

The third and final area of concern about the FBI's handling of the 1982–1984 investigation relates to the FBI's reporting of Dr. Lee's assistance in the investigation of the LLNL scientist, which has been inconsistent. Some documents, apparently including information provided to Attorney General Reno in preparation for her June 8, 1999 appearance before the Judiciary Committee in closed session, indicate that the FBI did not use Dr. Lee in its investigation. The final draft of the 1997 request for FISA coverage on Dr. Lee, in recounting this episode, states flatly that while Dr. Lee offered to help the FBI in its investigation of the LLNL scientist, the FBI did not use him.[41] Contemporaneous FBI records of the 1982 investigation, however, indicate that not only did Dr. Lee assist the FBI with its investigation of the other scientist, but that the result was far better than had been anticipated.

The failure to mention the assistance provided by Dr. Lee in 1983 when requesting FISA coverage in 1997 is troubling because it has the effect of presenting an incomplete picture of the initial investigation of Dr. Lee. Judgements regarding whether an individual is acting as an agent of a foreign power should be made in consideration of the totality of the circumstances, and the FBI's decision to use Dr. Lee in the investigation of the LLNL scientist is an important element of the total circumstances. If the FBI trusted Dr. Lee enough to use him in the investigation of the LLNL scientist, that fact should have been included in the FISA request. The failure to mention that fact gives an incomplete impression, which is inappropriate in these matters.

It is likely that the FBI's incorrect characterization of Dr. Lee's 1982–1984 activities was merely an inadvertent oversight and was not an attempt to conceal the assistance he had provided. For example, the FBI did not make any effort to conceal or deny Mrs. Lee's assistance to the government.

While the FBI should have acknowledged Dr. Lee's assistance in the FISA request, the totality of Dr. Lee's conduct in 1982–1984 was suspicious and was directly relevant on a probable cause determination.

The 1982–1984 investigation of Dr. Lee represents a missed opportunity to protect the nation's secrets. Had the matter been handled properly, Dr. Lee's clearance and access would most likely have been removed long ago, before he was able to put the global strategic balance at risk.

The 1994–November 2, 1995, Investigation of Dr. Lee

This investigation of Dr. Lee was initiated based upon the discovery that he was well

acquainted with a high-ranking Chinese nuclear scientist who visited Los Alamos as part of a delegation in 1994,[42] and that he was alleged to have helped Chinese scientists with codes and software. Dr. Lee had never reported meeting this scientist, which he was required to do by DOE regulations, so his relationship with this person aroused the FBI's concern. Unclassified sources have reported that Dr. Lee was greeted by ''a leading scientist in China's nuclear weapons program who then made it clear to others in the meeting that Lee had been helpful to China's nuclear program.'' [43] In concert with the 1982–1984 investigation, Dr. Lee's undisclosed relationship with this top Chinese nuclear scientist should have alerted the FBI and the DOE of the imperative for intensified investigation and reconsideration of his access to classified information. Instead, this FBI investigation was deferred on November 2, 1995, because Dr. Lee was by then emerging as a central figure in the Department of Energy's Administrative Inquiry,[44] which was developed by a DOE counterintelligence expert in concert with a seasoned FBI agent who had been assigned to DOE for the purposes of the inquiry. (The DOE Administrative Inquiry was given the code name Kindred Spirit.[45]) The investigation of Dr. Lee was essentially dormant from November 1995 until May 1996, when the FBI received the results of the DOE Administrative Inquiry and opened a new investigation of Dr. Lee on May 30, 1996.

It is difficult to understand why the FBI would suspend the investigation in 1995, even to wait for the Kindred Spirit Administrative Inquiry, when the issues that gave rise to 1994–1995 investigation remained valid and unrelated to the Kindred Spirit investigation. The key elements of the 1994–1995 investigation are described in the 1997 Letterhead Memorandum (LHM) which was prepared to support the request for a FISA search warrant. Specifically, the LHM describes the unreported contact with the top nuclear scientist,[46] and it makes reference to the ''PRC using certain computational codes . . . which were later identified as something that [Lee] had unique access to.'' [47] And, finally, the LHM states that ''the Director subsequently learned that Lee Wen Ho had worked on legacy codes.'' Given these allegations, it was a serious error to allow the investigation to wait for several months while the DOE AI was being completed. This deferral needlessly delayed the investigation and left important issues unresolved.

In addition to information known to the FBI which required further intensified investigation and not a deferred investigation on November 2, 1995, the Department of Energy was incredibly lax in failing to understand and pursue obvious evidence that Dr. Lee was downloading large quantities of classified information to an unclassified system. The sheer volume of Dr. Lee's downloading showed up on a DOE report in 1993.[49] Cheryl Wampler, from the Los Alamos computer office, has testified that the NADIR system, short for Network Anomaly Detection and Intrusion Recording, flagged Dr. Lee's massive downloading in 1993.[50] This system is specifically designed to create profiles of scientists' daily computer usage so it can detect unusual behaviors. A DOE official with direct knowledge of this suspicious activity failed to act on it, or to tell DOE counterintelligence personnel or the FBI. Based on its design, the NADIR system would have continued to flag Dr. Lee's computer activities in 1994 as being unusual, but no one from DOE took any action to investigate what was going on.[51] And it wasn't mentioned to the FBI or DOE's counter-intelligence personnel.

In response to written questions after a September 27, 2000 hearing on the Wen Ho Lee matter, DOE officials provided information to put the NADIR alerts in perspective. According to DOE, an average of 180 users per week exceeded the thresholds established by the system, and were flagged just like Dr. Lee.[52] While 180 is a substantial number of individuals, it would not be impossible to devise a system by which counterintelligence personnel can review these records to determine whether or not any individuals who are already under investigation have been identified by the system.

In response to another question about what happened to the NADIR records for 1994 (which, according to testimony from Ms. Wampler are missing), DOE replied simply that:

''. . . in 1993 NADIR was a new and developing technique and many other scientists in addition to Dr. Lee were transferring data due to a change in the computer environment at that time. During the 1993–1994 timeframe, Dr. Lee was not a suspect.'' [53]

Apart from the fact that the DOE's response is incorrect—Dr. Lee was a suspect beginning in 1994—the records should have been available for review when the FBI began its investigation. The fact that the DOE was able to confirm that Dr. Lee was flagged by NADIR in 1993 proves that point, but it does not explain the absence of the 1994 NADIR records. Had the FBI bothered to check with the DOE computer personnel, and there should have been no doubt that Dr. Lee had no expectation of privacy with regard to a system designed to identify abnormal system operations, Dr. Lee's illegal computer downloads could have been detected and halted.

The DOE computer and counterintelligence personnel could also have been more helpful in this situation.[54] Had DOE transmitted this information to the FBI, and had the FBI acted on it, Dr. Lee could have and should have been stopped in his tracks in 1994 on these indicators of downloading. The full extent of the importance of the information that Dr. Lee was putting at risk through his downloading was encapsulated in a document the Government filed in December 1999 as part of the criminal action against Dr. Lee:

''[I]n 1993 and 1994, Lee knowingly assembled 19 collections of files, called tape archive (TAR) files, containing Secret and Confidential Restricted Data relating to atomic weapon research, design, construction, and testing. Lee gathered and collected information from the secure, classified LANL computer system, moved it to an unsecure, ''open'' computer, and then later downloaded 17 of the 19 classified TAR files to nine portable computer tapes.'' [55]

These files, which amounted to more than 806 megabytes, contained information that could do vast damage to the national security.

The end result of these missteps and lack of communication was that, during some of the very time that the FBI had an espionage investigation open on Dr. Lee resulting from his unreported contacts with a top Chinese scientist and the realization that the Chinese were using codes to which Dr. Lee had unique access, DOE computer personnel were being warned by the NADIR system that Dr. Lee was moving suspiciously large amounts of information around, but were ignoring those warnings and were not passing them on to the FBI. At the same time, FBI personnel were taking no steps to investigate Dr. Lee's computer activities, even when one of the key allegations that prompted scrutiny of him in 1994 was that he had helped the Chinese with codes and software.

The near perfect correlation between the allegations which began the 1994–1995 investigation and Dr. Lee's computer activities is stunning. The codes the Chinese were known to be using were computer codes, yet FBI and DOE counterintelligence officials never managed to discover these massive file transfers. Where, if not on his computer, were they looking? And, as for the lab computer personnel who saw but ignored the NADIR reports, what possible explanation can there be for a failure to conduct even the most minimal investigation?

FBI and DOE failures in 1994–1995 represented the loss of a golden opportunity to detect and halt Dr. Lee's illegal computer activities. In the 1995–1996 period, another opportunity to find and fix the problem presented itself in the form of the DOE Administrative Inquiry (AI). Unfortunately, the opportunity represented by the AI was never fully realized.

The Investigation Renewed, May 30, 1996 to August 12, 1997

As noted previously, the investigation of Dr. Lee was dormant from November 2, 1995 until May 30, 1996. The investigation had been shut down to await the arrival of DOE's Administrative Inquiry, which was presented on May 28, 1996. With the DOE AI in hand, the FBI resumed its investigation of the Lees. To understand that investigation, however, it is first necessary to review the AI.

The Kindred Spirit Administrative Inquiry

The public perception of the government's actions in the Wen Ho Lee case, particularly with regard to charges of so-called ''ethnic profiling'', has been shaped by a misunderstanding of the Department of Energy's Administrative Inquiry (AI), code named ''Kindred Spirit''. Although he was not its author, former DOE intelligence chief Notra Trulock has been closely associated with this document, in large measure because he was instrumental in commissioning the DOE's Kindred Spirit Analytical Group (KSAG) which spawned the AI, and he later forcefully advocated the position that substantial espionage had occurred and that something needed to be done about it. The KSAG was formed in 1995 when scientists studying Chinese nuclear developments became concerned about certain developments in the level of sophistication of the PRC's weapons. During the summer of 1995, these concerns were fueled when an individual provided to the U.S. government a document, subsequently known as the ''walk-in'' document, which contained highly classified details of some of our most advanced nuclear warheads.

Recent attempts to re-examine the premise of the Kindred Spirit AI and to question its role in the FBI's subsequent investigation of the same name have fostered the perception that the DOE's AI was largely to blame for the FBI's misdirected investigation, which focused almost exclusively on Dr. and Mrs. Lee, the loss of the W–88 information, and the Los Alamos lab, when a much broader investigation was required.

The perception that DOE's AI was the weakest link in the FBI's Kindred Spirit investigation is unfortunate because it obscures a far more complex set of circumstances. This perception has also unfairly undermined the government's credibility on the ethnic/racial profiling question and seriously damaged Notra Trulock's reputation and career. A more complete public record on this matter may be helpful in repairing some of the damage.

In an October 29, 1999 letter, Energy Secretary Bill Richardson reacted to the FBI's attempts to lay the blame for its problems in the Kindred Spirit investigation on the Administrative Inquiry:

''. . . I think there has been a tendency to overstate the adverse influence that DOE's technical analysis and preliminary investigative support had on the conduct of the

KINDRED SPIRIT investigation. There also has been, in my opinion, an over-emphasis on the degree to which DOE input served to limit the FBI's investigative work. . . . [T]he fact is that all of the decisions to limit the scope of the investigation were clearly, mutually agreed-upon by DOE and the FBI, based on security and other concerns.'' [57]

In this regard, Secretary Richardson is correct. The FBI's failures in the Wen Ho Lee investigation should not be blamed on the AI. The DOE is, by law, limited in the scope of what it can do. The FBI could have and should have looked at the AI as a starting point. Instead, the FBI case agents seemed to think that the DOE investigators had done their job for them, and never seriously looked at the premise of the AI and its relationship to Dr. Lee's activities.

The facts of the AI and the controversy surrounding it can be stated in an unclassified fashion as follows:

(A) The U.S. government concluded in 1995 that the PRC had made remarkable progress in its nuclear weapons program in the early 1990s.

(B) The government also learned in 1995 that the PRC had obtained certain classified nuclear weapons design information on the W–88 warhead and other weapons.

There is widespread agreement that both A and B are true: the Chinese made rapid advancements in their nuclear weapons program in the early 1990s, and they obtained classified nuclear weapons design information sometime before 1995. The controversy arises over whether there is any causal relationship between the two facts. One school of thought—embodied in the Kindred Spirit AI—holds that the Chinese advances occurred because they obtained classified U.S. nuclear weapons design information, particularly that related to the W–88. The contrary school of thought holds that while both A and B may be true, there is no evidence that the Chinese nuclear advances resulted from their acquisition of U.S. nuclear weapons design information.

Investigations predicated upon these two schools of thought would take remarkably divergent paths. If one took as a starting point, as did the authors of the AI, the belief that the PRC's nuclear weapons design advances were in large part attributable to espionage against the United States, one would be looking for the wholesale transfer of W–88 design information. The alternative view—that the PRC's nuclear weapons advances could have occurred independently of the acknowledged acquisition of classified U.S. weapons data in the ''walk-in'' document—would lead to an investigation focused on the specific bits of classified information the Chinese were known to have obtained, not only about the W–88 but about other weapons systems as well. The former theory paints a picture consistent with a single act of espionage, conducted by a single individual transferring information from a specific place. The latter theory forces a broader review, implicitly acknowledging that the information could involve multiple transfers from multiple sources, quite possibly by numerous individuals.

While the debate over whether or not the PRC's nuclear weapons advances resulted from espionage is important from both a counterintelligence and an intelligence point of view, it should not have been the determinative factor in deciding how to conduct this espionage investigation. The threshold for required action by the FBI is met on the basis of fact B, irrespective of fact A and any relationship between the two elements. Section 811 of the Intelligence Authorization Act of 1995, enacted to improve interagency coordination on espionage investigations in the wake of the Aldrich Ames spy case, requires an agency to notify the FBI when it becomes aware that espionage may have occurred. Proof that the PRC had obtained classified U.S. nuclear weapons design information became available in the summer of 1995 in the form of the ''walk-in'' document, which was really a large cache of documents delivered to the U.S. government by a Chinese national. The information in the ''walk-in'' document was sufficient to trigger the requirements of section 811 and to prompt an investigation by the FBI.

The DOE could have satisfied its statutory obligations under section 811 simply by notifying the FBI of its view that certain information in the ''walk-in'' document was not in the public domain, had not been authorized for transfer to the PRC, and was therefore likely in the possession of the PRC as a result of espionage. In retrospect, it might have been better if they had done so. The conclusions of the AI, while accompanied by many caveats that the DOE had been limited in its ability to conduct the investigation and that further review was required, were adopted almost wholesale by the FBI and formed the basis of the FBI's own Kindred Spirit espionage investigation.

The Bellows Report is highly critical of the DOE AI, concluding essentially that the DOE overstated the degree of consensus that existed on the question of espionage as a causal factor in the PRC's nuclear weapons advances, thereby establishing a faulty predicate for the entire investigation. The fact that the DOE was already concerned that the PRC had detonated what appeared to be an advanced nuclear weapon when the information in the ''walk-in'' document became available may have led some members of the DOE scientific review panel, called the Kindred Spirit Analytical Group (KSAG), to give undue weight to the possibility of a causal link between the PRC's weapons design advances and the information in the ''walk-in'' document. That is a question about which reasonable individuals may disagree—even among the members of the KSAG there was not unanimity on this point [58]—but there is no doubt that the AI which flowed from the KSAG was built upon the belief that the PRC's design advances were the result of espionage. There can also be no doubt that the AI cast strong suspicion on the Lees.

Any fair reading of the Administrative Inquiry makes clear that its authors (a DOE counterintelligence official and an FBI agent seconded to the DOE to assist with the AI) considered Wen Ho and Sylvia to be the prime suspects in the alleged loss to the PRC of certain W–88 nuclear warhead design information, and that the loss had most likely occurred at Los Alamos. The AI reaches a preliminary conclusion:

''. . . it is the opinion of the writer that Wen Ho Lee is the only individual identified during this inquiry who had, opportunity, motivation and legitimate access to both W–88 weapons system information and the information reportedly received by [the PRC].'' [59]

A fair reading of the document also shows that the authors explicitly recognized the limitations of their investigation and recommended that the Lees and Los Alamos be a starting place for an investigation into the loss of the W–88 information, an investigation that would necessarily extend well beyond the Lees and Los Alamos. For example, the report says:

''This by no means excludes any other DOE personnel as being possible suspects in this matter. However, based upon a review of all information gathered by this inquiry, Wen Ho Lee and his wife, Sylvia appear the most logical suspects. Wen Ho Lee had the direct access to the W–88 [information], motivation and opportunity to provide the PRC the W–88 weapons design [information].'' [60]

The report concluded with the following recommendation:

''The writer believes the ECI [DOE Counterintelligence] has basically, exhausted all logical 'leads' regarding this inquiry which ECI is legally permitted to accomplish. Therefore, I strongly urge the FBI take the lead in this investigation.'' [61]

Thus, while the AI strongly points toward the Lees there are also enough qualifiers to make it clear that other suspects should also be investigated.

Had the AI arrived on the doorstep of the FBI's Albuquerque office under different circumstances, it might have been handled more appropriately. The AI came when the FBI had already been investigating Dr. Lee, albeit not very competently, on the basis of credible allegations from 1994 that he had helped the Chinese with codes and software. In this context, the AI served to reinforce the FBI's existing perceptions of Dr. Lee as a likely espionage suspect.

Instead of using the AI as a starting point for a comprehensive investigation, the FBI did little or no additional analysis and began focusing almost exclusively on the W–88 issue and the Lees. The reason for the FBI's action was made clear in an interview of the special agent who helped write the AI, who said that he assumed that the investigation of Dr. Lee and the Kindred Spirit investigation would eventually merge because it looked like Dr. Lee was the most likely suspect.[62]

Even when given an opportunity to take a fresh look at the case, the FBI did not do so. When the CIA expressed concern in the summer of 1996 that the individual who provided the ''walk-in'' document might be under the control of a hostile intelligence service, the FBI actually shut down its investigation for nearly three weeks in July and August. An August 20, 1996 teletype from FBIHQ to the Albuquerque division says:

''On August 19, 1996, DOEHQ provided FBIHQ with a letter stating it had conferred with CIAHQ and that DOE judged 'that a serious compromise of U.S. weapons-specific restricted data occurred most likely in the 1984–1988 timeframe.' In effect, DOE stands by their original conclusion.'' [63]

Thus, after the details were sorted out, it was clear that the investigation should go forward because the PRC had information they should not have, even if there were disagreements over what, exactly, had been compromised. A September 16, 1996 FBI 302 from an interview of a scientist puts this in perspective. It says, ''There was no disagreement that 'Restricted Data' information had been acquired by the Chinese. The only disagreement was over how valuable the information was.'' [64]

Thus, the recent attempts to dissect the AI, outlined elsewhere in this report, miss the mark. The FBI had an opportunity when the CIA raised a red flag about the ''walk-in'' in 1996 to review the structure of their investigation. They knew, based on the review they conducted at the time, that there had been some disagreement within the KSAG, but that espionage had, in fact, occurred. Unfortunately, when the FBI restarted its investigation in August 1996, the case agents never questioned the underlying assumptions of the AI or the impact of these assumptions on the structure and course of the investigation.

By restarting the investigation where they left off, the FBI failed to take into consideration massive amounts of information in their own files indicating that the investigation should extend beyond the W–88 information, beyond Los Alamos, and beyond the Lees. More importantly, the FBI never seems to have made any effort to understand what, if any, relationship existed between the Kindred Spirit allegations and the investigation

of Dr. Lee that was already under way related to computer codes and software. The FBI's failure to ask this basic question sent the investigation on a wild goose chase for more than three years while Dr. Lee's illegal computer activities, which were highly relevant to the 1994 allegations against him, continued unchecked and unimpeded.

The ''walk-in'' document

The ''walk-in'' document is central to the Kindred Spirit investigation, so it should be described in the greatest detail consistent with classification concerns. This document, dated 1988, is said to lay out China's nuclear modernization plan for Beijing's First Ministry of Machine Building, which is responsible for making missiles and nose cones.[65] The 74–page document contains dozens of facts about U.S. warheads, mostly in a two-page chart. On one side of the chart are various US Air Force and US Navy warheads, including some older bombs as well as the W–80 warhead (cruise missiles), the W–87 (Minuteman III); and the W–88 (Trident II).[66] Among the most important items of information in the ''walk-in'' document are details about the W–88 warhead.

The Cox Committee Report provides the following description and assessment of the ''walk-in'' document:

''In 1995, a ''walk-in'' approached the Central Intelligence Agency outside of the PRC and provided an official PRC document classified ''Secret'' that contained design information on the W–88 Trident D–5 warhead, the most modern in the U.S. arsenal, as well as technical information concerning other thermonuclear warheads.

''The CIA later determined that the ''walk-in'' was directed by the PRC intelligence services. Nonetheless, the CIA and other Intelligence Community analysts that reviewed the document concluded that it contained U.S. thermonuclear warhead design information.

''The ''walk-in'' document recognized that the U.S. nuclear warheads represented the state-of-the-art against which PRC thermonuclear warheads should be measured.

''Over the following months, an assessment of the information in the document was conducted by a multidisciplinary group from the U.S. government, including the Department of Energy and scientists from the U.S. national weapons laboratories.''[67]

The Cox Committee's view that the Chinese had obtained sensitive design information about U.S. thermonuclear warheads is bolstered by the June 1999 report of the President's Foreign Intelligence Advisory Board, which states that the ''walk-in'' document:

''unquestionably contains some information that is still highly sensitive, including descriptions, in varying degrees of specificity, of the technical characteristics of seven U.S. thermonuclear warheads.'' [68]

The preceding analysis shows that while there can be a legitimate debate as to whether the conclusions of the AI were stated with inordinate confidence, which may have contributed to the FBI's decision to focus on the Lees and the loss of the W–88 information, there can be no doubt that: (1) the PRC obtained classified nuclear secrets through espionage, and (2) the FBI had ample reason to investigate Dr. Lee. The problem is that the FBI focused too narrowly on the Lees as suspects in the W–88 investigation without ascertaining whether their suspicions about Dr. Lee were logically related to the alleged loss of the W–88 information.

From 1996 until 1997 the DOE and FBI investigation was characterized by additional inexplicable lapses. For example, in November 1996, the FBI asked DOE counterintelligence team leader Terry Craig for access to Dr. Lee's computer. Although Mr. Craig apparently did not know it until 1999, Dr. Lee had signed a consent-to-monitor waiver[69] on April 19, 1995. The relevant portion of the waiver states:

''Warning: To protect the LAN [local area network] systems from unauthorized use and to ensure that the systems are functioning properly, activities on these systems are monitored and recorded and subject to audit. Use of these systems is expressed consent to such monitoring and recording. Any unauthorized access or use of this LAN is prohibited and could be subject to criminal and civil penalties.'' [70]

For reasons that have yet to be explained, this waiver was not in Dr. Lee's security file or his personnel file.[71]

The computer that Dr. Lee used apparently also had a banner, which had information that may have constituted sufficient notice to give the FBI access to its contents. And, finally, LANL computer use policy gave authorities the ability to search computers to prevent waste, fraud and abuse.[72] As noted in the press release accompanying the August 12, 1999, Department of Energy Inspector General's Report, Mr. Craig's ''failure to conduct a diligent search deprived the FBI of relevant and potentially vital information.'' [73] Had the FBI National Security Law Unit (NSLU) been given the opportunity to review these facts, it may well have concluded that no FISA warrant was necessary to conduct a preliminary investigation of Dr. Lee's computer. More importantly, records from the DOE monitoring systems like NADIR could almost certainly have been reviewed without a FISA warrant. Had these records been searched, Dr. Lee's unauthorized downloading would have been found nearly three years earlier. Unfortunately, through the failures of both DOE and FBI personnel, this critical information never reached FBI Headquarters, and the NSLU decided that Dr. Lee's computer could not be searched without a FISA warrant.[74] Thus, a critical opportunity was lost to find and remove from an unsecure system, information that could alter the global strategic balance.

Nonetheless, the FBI developed an adequate factual basis for the issuance of a FISA warrant. The information developed by the FBI to support its FISA application in 1997 was cogently summarized in the August 5, 1999 special statement of Senators Thompson and Lieberman of the Senate Committee on Governmental Affairs[75]:

''DOE counterintelligence and weapons experts had concluded that there was a great probability that the W–88 information had been compromised between 1984 and 1988 at the nuclear weapons division of the Los Alamos laboratory. It was standard PRC intelligence tradecraft to focus particularly upon targeting and recruitment of ethnic Chinese living in foreign countries (e.g., Chinese-Americans).

''It is common in PRC intelligence tradecraft to use academic delegations—rather than traditional intelligence officers—to collect information on science-related topics. It was, in fact, standard PRC intelligence tradecraft to use scientific delegations to identify and target scientists working at restricted United States facilities such as LANL, since they ''have better access than PRC intelligence personnel to scientists and other counterparts at the United States National Laboratories.''

''Sylvia Lee, wife of Wen Ho Lee, had extremely close contacts with visiting Chinese scientific delegations. Sylvia Lee, in fact, had volunteered to act as hostess for visiting Chinese scientific delegations at LANL when such visits first began in 1980, and had apparently had more extensive contacts and closer relationships with these delegations than anyone else at the laboratory. On one occasion, moreover, Wen-Ho Lee had himself aggressively sought involvement with a visiting Chinese scientific delegation, insisting upon acting as an interpreter for the group despite his inability to perform this function very effectively.

''Sylvia Lee was involuntarily terminated at LANL during a reduction-in-force in 1995. Her personnel file indicated incidents of security violations and threats she allegedly made against coworkers.

''In 1986, Wen-Ho Lee and his wife traveled to China on LANL business to deliver a paper on hydrodynamics[76] to a symposium in Beijing. He visited the Chinese laboratory—the Institute for Applied Physics and Computational Mathematics (IAPCM)—that designs the PRC's nuclear weapons.

''The Lees visited the PRC—and IAPCM—on LANL business again in 1988.

''It was standard PRC intelligence tradecraft, when targeting ethnic Chinese living overseas, to encourage travel to the ''homeland''—particularly where visits to ancestral villages and/or old family members could be arranged—as a way of trying to dilute loyalty to other countries and encouraging solidarity with the authorities in Beijing.

''The Lees took vacation time to travel elsewhere in China during their two trips to China in 1986 and 1988.

''The FBI also learned of the Lees' purchase of unknown goods or services from a travel agent in Hong Kong while on a trip to that colony and to Taiwan in 1992. On the basis of the record, the FBI determined that there was reason to believe that this payment might have been for tickets for an unreported side trip across the border into the PRC to Beijing.

''Though Wen-Ho Lee had visited IAPCM in both 1986 and 1988 and had filed ''contact reports'' claiming to recount all of the Chinese scientists he met there, he had failed to disclose his relationship with the PRC scientist who visited LANL in 1994.

''Wen-Ho Lee worked on specialized computer codes at Los Alamos—so-called ''legacy codes'' related to nuclear testing data—that were a particular target for Chinese intelligence.

''The FBI learned that during a visit to Los Alamos by scientists from IAPCM, Lee had discussed certain unclassified hydrodynamic computer codes with the Chinese delegation. It was reported that Lee had helped the Chinese scientists with their codes by providing software and calculations relating to hydrodynamics.

''In 1997, Lee had requested permission to hire a graduate student, a Chinese national, to help him with work on ''Lagrangian codes'' at LANL. When the FBI evaluated this request, investigators were told by laboratory officials that there was no such thing as an unclassified Lagrangian code, which describes certain hydrodynamic processes and are used to model some aspects of nuclear weapons testing. ''In 1984, the FBI questioned Wen-Ho Lee about his 1982 contact with a U.S. scientist at another DOE nuclear weapons laboratory who was under investigation. ''When questioned about this contact, Lee gave deceptive answers. After offering further explanations, Lee took a polygraph, claiming that he had been concerned only with this other scientist's alleged passing of unclassified information to a foreign government against DOE and Nuclear Regulatory Commission regulations—something that Lee himself admitted doing. (As previously noted, the FBI closed this investigation of Lee in 1984.) ''The FBI, as noted above, had begun another investigation into Lee in the early 1990s, before the W–88 design information compromise came

to light. This investigation was based upon an FBI investigative lead that Lee had provided significant assistance to the PRC. ''The FBI obtained a copy of a note on IAPCM letterhead dated 1987 listing three LANL reports by their laboratory publication number. On this note, in English, was a handwritten comment to 'Linda' saying '[t]he Deputy Director of this Institute asked [for] these paper[s]. His name is Dr. Zheng Shaotang. Please check if they are unclassified and send to them. Thanks a lot. Sylvia Lee.' ''

The FBI request was worked into a draft FISA application by Mr. David Ryan, a line attorney from the Department of Justice's Office of Intelligence Policy and Review (OIPR) with considerable experience in FISA matters. It was then reviewed by Mr. Allan Kornblum, as Deputy Counsel for Intelligence Operations, and finally, by Mr. Gerald Schroeder, Acting Counsel, OIPR.[77] As is well known by now, the OIPR did not agree to forward the FISA application, and yet another opportunity to discover what Dr. Lee was up to was lost.

The Department of Justice should have taken the FBI's request for a FISA warrant on Dr. Lee to the Court on August 12, 1997.

Attorney General Reno testified about this case before the Senate Judiciary Committee on June 8, 1999. A redacted version of her testimony was released on December 21, 1999. The transcript makes it clear that the Department of Justice should have agreed to go forward with the search warrant for surveillance of Dr. Wen Ho Lee under the Foreign Intelligence Surveillance Act when the FBI made the request in 1997.

The DOJ's internal review of the FISA request, conducted by Assistant U.S. Attorney Randy Bellows, confirms that the request should have gone forward. Mr. Bellows said:

''The final draft FISA application [deleted] on its face, established probable cause to believe that Wen Ho Lee was an agent of a foreign power, that is to say, a United States Person currently engaged in clandestine intelligence gathering activities for or on behalf of the PRC which activities might involve violations of the criminal laws of the United States and that his wife, Sylvia Lee, aided, abetted or conspired in such activities. Given what the FBI and OIPR knew at the time, it should have resulted in the submission of a FISA application and the issuance of a FISA order.'' [78]

In evaluating the sufficiency of the FBI's statement of probable cause, the Attorney General and the Department of Justice failed to follow the standards of the Supreme Court of the United States that the requirements for ''domestic surveillance may be less precise than that directed against more conventional types of crime.'' In *United States v. U.S. District Court* 407 U.S. 297, 322–23 (1972) the Court held:

''We recognize that domestic security surveillance may involve different policy and practical considerations from the surveillance of ''ordinary crime'' . . . *the focus of domestic surveillance may be less precise than that directed against more conventional types of crime*. . . . Different standards may be compatible with the Fourth Amendment if they are reasonable both in relation to the legitimate need of government for intelligence information and the protected rights of our citizens. For the warrant application *may vary according to the governmental interest* to be enforced and the nature of citizen rights deserving protection.'' [emphasis added]

Even where domestic surveillance is not involved, the Supreme Court has held that the first focus is upon the governmental interest involved in determining whether constitutional standards are met. In *Camera v. Municipal Court of the City and County of San Francisco*, 387 U.S. 523, 534–539, (1967), the Supreme Court said:

''In cases in which the Fourth Amendment requires that a warrant to search be obtained, ''probable cause'' is the standard by which a particular decision to search is tested against the constitutional mandate of reasonableness. To apply this standard, it is obviously necessary *first to focus upon the governmental interest* which allegedly justifies official intrusion upon the constitutionally protected interests of the private citizen. . . . [emphasis added]

''Unfortunately, there can be no ready test for determining reasonableness other than by balancing the need to search against the invasion which the search entails. . . .

''The warrant procedure is designed to guarantee that a decision to search private property is justified by a reasonable governmental interest. But reasonableness is still the ultimate standard. If a valid public interest justifies the intrusion contemplated, then there is probable cause to issue a suitably restricted search warrant.''

Where the Court allowed inspections in *Camera* without probable cause that a particular dwelling contained violations, it is obvious that even more latitude would be constitutionally permissible where national security is in issue and millions of American lives may be at stake. Even under the erroneous, unduly high standard applied by the Department of Justice, however, the FBI's statement of probable cause was sufficient to activate the FISA warrant.

FBI Director Freeh correctly concluded that probable cause existed for the issuance of the FISA warrant. At the June 8 hearing, Attorney General Reno stated her belief that there had not been a sufficient showing of probable cause but conceded that FBI Director Freeh, a former Federal judge, concluded that probable cause existed as a matter of law.[79]

The Department of Justice applied a clearly erroneous standard to determine whether probable cause existed. As noted in the transcript of Attorney General Reno's testimony:

''On 8–12–97 Mr. Allan Kornblum of OIPR advised that he could not send our (the FBI) application forward for those reasons. We had not shown that subjects were the ones who passed the W–88 [design information] to the PRC, and we had little to show that they were presently engaged in clandestine intelligence activities.'' [80]

It is obviously not necessary to have a showing that the subjects were the ones who passed W–88 design information to the PRC. That would be the standard for establishing guilt at a trial, which is a far higher standard than establishing probable cause for the issuance of a search warrant. Attorney General Reno contended that the remainder of the 12 individuals identified in the AI would have to be ruled out as the ones who passed W–88 design information to the PRC before probable cause would be established for issuance of the FISA warrant on Dr. Lee. That, again, is the standard for conviction at trial instead of establishing probable cause for the issuance of a search warrant. Thus, it is apparent from the Kornblum statement that the wrong standard was applied: ''that subjects were the ones that passed the W–88 [design information] to the PRC.'' [81]

DOJ was also wrong when Mr. Kornblum concluded that: ''We had little to show that they were presently engaged in clandestine intelligence activities.'' [82] There is substantial evidence that Dr. Lee's relevant activities continued from the 1980s to 1992, 1994 and 1997 as noted above.

When FBI Assistant Director John Lewis met with Attorney General Reno on August 20, 1997, to ask about the issuance of the FISA warrant, Attorney General Reno delegated the matter to Mr. Daniel Seikaly, former Director, DOJ Executive Office for National Security, and she had nothing more to do with the matter. Mr. Seikaly completed his review by late August or early September and communicated his results to the FBI through Mr. Kornblum. As Mr. Seikaly has testified, this was the first time he had ever worked on a FISA request and he was not ''a FISA expert.'' It was not surprising then that Seikaly applied the wrong standard for a FISA application:

''We can't do it (a FISA wiretap) unless there was probable cause to believe that that facility, their home, is being used or about to be used by them as agents of a foreign power.'' [83]

Mr. Seikaly applied the standard from the typical criminal warrant as opposed to a FISA warrant. 18 U.S.C. 2518, governing criminal wiretaps, allows surveillance where there is:

''Probable cause for belief that the facilities from which, or the place where, the wire, oral, or electronic communications are to be intercepted, are being used, or are about to be used *in connection with the commission of such offense.*'' [emphasis added]

This criminal standard specifically requires that the facility be used in the ''commission of such offense.'' FISA, however, contains no such requirement. 50 U.S.C. 1805 (Section 105 of FISA) states that a warrant shall be issued if there is probable cause to believe that:

''Each of the facilities or places at which the electronic surveillance is directed is being used, or is about to be used, by a foreign power or an agent of a foreign power.''

There is no requirement in this FISA language that the facility is being used in the commission of an offense. This incorrect application of the law was a serious mistake. As noted in the Bellows report, ''This matter should not have been assigned to an attorney who did not already have a solid grounding in FISA law, FISA applications, and the FISA Court.'' [84]

Attorney General Reno demonstrated an unfamiliarity with technical requirements of Section 1802 versus Section 1804. She was questioned about the higher standard under 1802 than 1804: ''It seems the statutory scheme is a lot tougher on 1802 on its face.'' [85]

Attorney General Reno replied: ''Well I don't know. I've got to make a finding that under 1804, that it satisfies the requirement and criteria—and requirement of such application as set forth in the chapter, and it's fairly detailed.'' [86]

When further questioned about her interpretation on 1802 and 1804, Attorney General Reno indicated lack of familiarity with these provisions, saying:

''Since I did not address this, let me ask Ms. Townsend who heads the office of policy review to address it for you in this context and then I will. . . .'' [87]

As noted in the record, the offer to let Ms. Townsend answer the question was rejected in the interest of getting the Attorney General's view on this important matter rather than that of a subordinate.

The lack of communication between the Attorney General and the Director of the FBI on a matter of such grave importance is troubling. As noted previously, Director Freeh sent John Lewis, Assistant FBI Director for National Security to discuss this matter with the Attorney General on August 20, 1996. However, when the request for a review of the matter did not lead to the forwarding of the FISA application to the court, Director Freeh did not further press the issue. And Attorney General Reno conceded that she did not follow up on the Wen Ho Lee matter. During the June 8 hearing, Senator Sessions asked, ''Did your staff convey to you that they had once again denied this matter?'' [88]

Attorney General Reno replied, ''No, they had not.'' [89]

As the Bellows Report concludes, ''The failure to advise the Attorney General of the resolution of this matter had an unfortunate consequence: It effectively denied the FBI the true appeal it had sought.'' [90]

The June 8, 1999 hearing also included a discussion as to whether FBI Director Freeh should have personally brought the matter again to Attorney General Reno. The Attorney General replied that she did not ''complain'' about FBI Director Freeh's not doing so and stated, ''I hold myself responsible for it.'' [91]

Attorney General Reno conceded the seriousness of the case, stating, ''I don't think the FBI had to convey to the attorneys the seriousness of it. I think anytime you are faced with facts like this it is extremely serious.'' [92]

In the context of this serious case, it would have been expected that Attorney General Reno would have agreed with FBI Director Freeh that the FISA warrant should have been issued. In her testimony, she conceded that if some 300 lives were at stake on a 747 she would take a chance, testifying: ''My chance that I take if I illegally search somebody, if I save 300 lives on a 747, I'd take it.'' [93]

In that context, with the potential for the PRC obtaining U.S. secrets on nuclear warheads, putting at risk millions of Americans, it would have been expected that the Attorney General would find a balance in favor of moving forward with the FISA warrant. As demonstrated by her testimony, Attorney General Reno sought at every turn to minimize the FBI's statement of probable cause. On the issue of Dr. Lee's opportunity to have visited Beijing when he had been in Hong Kong and incurred additional travel costs of the approximate expense of traveling to Beijing, the Attorney General said that ''an unexplained travel voucher in Hong Kong does not lead me to the conclusion that someone went to Beijing any more than they went to Taipei.'' [94]

It might well be reasonable for a fact-finder to conclude that Dr. Lee did not go to Beijing; but, certainly, his proximity to Beijing, the opportunity to visit there and his inclination for having done so in the past would at least provide some ''weight'' in assessing probable cause. But the Attorney General dismissed those factors as having no weight even on the issue of probable cause, testifying, ''I don't find any weight when I don't know where the person went.'' [95] Of course it is not known ''where the person went.'' If that fact had been established, it would have been beyond the realm of ''probable cause.'' Such summary dismissal by the Attorney General on a matter involving national security is inappropriate given the circumstances. In other legal contexts, opportunity and inclination are sufficient to cause an inference of certain conduct as a matter of law.

The importance of DOJ's erroneous interpretation of the law in this case, which resulted in the FISA rejection, should not be underestimated. Had this application for a FISA warrant been submitted to the court, it doubtless would have been approved. DOJ officials reported that approximately 800 FISA warrants were issued each year with no one remembering any occasion when the court rejected an application.

Assistant U.S. Attorney Randy Bellows concurred on the damage done by OIPR's rejection of the FISA request:

''OIPR's erroneous judgment that [deleted] did not contain probable cause could not have been more consequential to the investigation of Wen Ho Lee. From the beginning of that investigation, the FBI's objective had been to obtain FISA coverage. It now faced the prospect of no FISA coverage, an eventuality for which it had never prepared. The other consequence, of course, is that such information as might have been acquired through FISA coverage was not acquired. It is impossible to say just what the FBI would have learned through FISA surveillance. That is, after all, the point of surveillance. What is clear is that [deleted] should have been approved, not rejected. For all the problems with the FBI's counterintelligence investigation of Wen Ho Lee, and they were considerable, the FBI had somehow managed to stitch together an application that established probable cause. That OIPR would disagree with the assessment would deal this investigation a blow from which it would not recover.'' [96]

Had the FBI obtained the FISA search warrant, it might have had a material effect on the investigation and criminal charging of Dr. Lee. Given the serious mistakes that had been made by the FBI prior to 1997, there is no guarantee that a FISA warrant would have led to a successful conclusion to the investigation, but the failure to issue a warrant clearly had an adverse impact on the case.

To put the 1997 FISA rejection in perspective, consider that the open network to which Dr. Lee had transferred the legacy codes was ''linked to the Internet and e-mail, a system that had been attacked several times by hackers.'' [97] Although we do not know the exact figures for the number of times that it was accessed, it has been reported that between October 1997 and June 1998 alone, ''there were more than 300 foreign attacks on the Energy Department's unclassified systems, where Mr. Lee had downloaded the secrets of the U.S. nuclear arsenal.'' [98]

Consider also the following from a December 23, 1999, Government filing in the criminal case against Dr. Lee:

''. . . in 1997 Lee downloaded directly from the classified system to a tenth portable computer tape a current nuclear weapons design code and its auxiliary libraries and utility codes.'' [99]

This direct downloading had been made possible by Los Alamos computer managers who made Lee's file transfers ''easier in the mid–1990s by putting a tape drive on Lee's classified computer.'' [100] As incomprehensible as it seems, despite the fact that Dr. Lee was the prime suspect in an ongoing espionage investigation, and despite plans to limit his access to classified information to limit any damage he might do, DOE computer personnel installed a tape drive on his computer that made it possible for him to directly download the nation's top nuclear secrets.

An important aim of surveillance under the FISA statute is to determine whether foreign intelligence services are getting access to our classified national security information. Although we do not know, and may never know, why Dr. Lee placed these classified files on an unsecure system, there should be no doubt that transferring classified information to an unclassified computer system and making unauthorized tape copies of that information created a substantial opportunity for foreign intelligence services to access that information. The breakdown of communication between the FBI and DOJ which resulted in the rejection of the FISA in 1997 resulted in yet another missed opportunity to find and protect the information Dr. Lee illegally put at risk.

Certain provisions of the Counterintelligence Reform Act of 2000, which became law as Title VI of Public Law 106–567 on December 27, 2000, will prevent the kinds of problems that plagued this FISA request. The law now requires that, upon written notification from the Director of the FBI (or of one of the few other officials who are authorized to make FISA requests), the Attorney General must explain in writing why the Department does not believe that probable cause has been established, and to make recommendations for improving the request. When given such recommendations in writing, the requesting official must personally supervise the implementation of any such recommendations. These procedures will ensure that disagreements over matters of probable cause are resolved rather than allowed to linger, as happened in the Wen Ho Lee case.

Investigation from August 12, 1997 to December 23, 1998

Notwithstanding the serious evidence against Dr. Lee on matters of great national security importance, the FBI investigation languished for 16 months, from August 1997 until December 1998, with the Department of Energy permitting Dr. Lee to continue on the job with access to classified information.

After OIPR's August 1997 decision not to forward the FISA application, FBI Director Louis Freeh met with Deputy Energy Secretary Elizabeth Moler to tell her that there was no longer any investigatory reason to keep Lee in place at LANL, and that DOE should feel free to remove him in order to protect against further disclosures of classified information. In October 1997, Director Freeh delivered the same message to Energy Secretary Federico Pena that he had given to Moler.[101] These warnings were not acted on, and Dr. Lee was left in place, as were the files he had downloaded to the unclassified system, accessible to any hacker on the Internet.

After the rejection of the FISA warrant request on August 12, it took the FBI three and one-half months to send a memo dated December 19, 1997, to the Albuquerque field office listing fifteen investigative steps that should be taken to move the investigation forward. The Albuquerque field office did not respond directly until November 10, 1998. The fifteen investigative steps were principally in response to the concerns raised by OIPR about the previous FISA request. To protect sources and methods, the specific investigative steps in the December 19, 1997 teletype cannot be disclosed, but have been summarized by the FBI as follows:

1. Conduct Additional Interviews

(a) Open preliminary inquiries on other individuals named in the DOE AI who met critical criteria;

(b) Develop information on associate's background, and interview the associate, and

(c) Interview co-workers, supervisors, and neighbors.

2. Conduct Physical Surveillance

3. Conduct Other Investigative Techniques

(a) Review information resulting from other investigative methods;

(b) Review other investigations for lead purposes; and

(c) Implement alternative investigative methods.[102]

Only two of the leads were seriously pursued. Most importantly, the FBI did not open investigations on the other individuals named in the DOE AI until much later.

The False Flag

One of the steps recommended in the December 1997 HQ investigative plan was carried out in August 1998. The results of this ''False Flag'' operation against Dr. Lee are partially described in a November 10, 1998 memorandum from Albuquerque to FBIHQ. The memorandum is identified as a request for electronic surveillance and lays out the basis for probable cause, including a description of a series of phone calls between Dr. Lee and an individual posing as an officer of

the Ministry of Foreign Affairs and Ministry of State Security. According to the memo, this undercover agent (UCA) introduced himself to Dr. Lee ''as a representative of the 'concerned Department,' from Beijing, PRC,'' and explained that the purpose of his visit to Sante Fe was to ''meet with Wen Ho Lee to assure of Lee's well-being in the aftermath of the conviction of a Chinese-American scientist, Peter Lee in California.'' [103]

The Albuquerque memo describes Dr. Lee as being ''skeptical of the entire situation and apprehensive about meeting face-to-face with [the UCA]'' and relates how Dr. Lee mentioned that ''departmental policy at LANL requires him to report to his superior if he meets with a representative of a foreign government, however, it does not mean that he is forbidden to meet such a person.'' [104] Dr. Lee stated a preference for discussing any matters with the representative of the PRC over the phone, but when told that there were other sensitive issues besides the Peter Lee case which must be discussed in person, Dr. Lee agreed to meet the UCA at the Hilton Hotel.[105]

About ten minutes after agreeing to travel to meet the UCA, Dr. Lee called back and said he had changed his mind, reiterating his concerns about registering with his superior when meeting with foreign government officials. Given that Dr. Lee would not agree to a face-to-face meeting, the UCA said that ''although he was an official from the PRC government, he was traveling under civilian status on this trip so that he could avoid scrutiny by the United States government.'' [106] The UCA then asked Dr. Lee if he had been interviewed by any U.S. authorities, including the FBI, and whether Dr. Lee had noticed anything unusual or was being treated differently by his employer or had any restrictions on his travel arrangements in the wake of the Peter Lee case. Dr. Lee responded negatively.[107]

The UCA then told Dr. Lee that one of the reasons he wanted to meet was to see if there was any material to take back to the PRC. After Dr. Lee said there was not any such material, the UCA said that ''since the material he brought back to China and the speech he gave were so helpful, did Lee have any plans in going to the PRC in the near future.'' [108] Dr. Lee said that he would probably not be going to the PRC until after his retirement from LANL in one or two years. He did not, as one would expect, deny that he had previously sent material.

The next day (August 19), the UCA called Dr. Lee again, saying that he would be leaving Santa Fe in a few days and asking if Dr. Lee would like to have a number where he could contact the UCA in the future. Dr. Lee said he would like to have a number, and was provided a pager number and was told that it belonged to an American friend who had helped the UCA and his associates in the past, and who could be trusted.[109]

Dr. Lee did not immediately report this contact, but he told his wife who told a friend, who told DOE security. When Dr. Lee was questioned by DOE counterintelligence personnel about the phone call, he was vague, and failed to mention the beeper number or the hotel.

The FBI did not properly handle the information learned from the False Flag operation. First, it took more than three months for the transcript of the exchange between Dr. Lee and the UCA to get to FBI Headquarters where it could be fully analyzed. Unfortunately, the transcript (and the FISA request based on the results of the False Flag) arrived at FBI HQ just when the DOE was asserting control over the case. Had the transcript been analyzed in the full detail that it deserved, the FBI would have been able to tell the Office of Intelligence Policy and Review that prior concerns about whether Dr. Lee was ''currently engaged'' as an agent of a foreign power had been addressed by his dealings with the undercover agent. Among the key points that should have been worked into the renewed FISA application are the following:

That Dr. Lee agreed to meet with an individual purporting to be an agent of a foreign government, traveling in the U.S. in civilian clothes to avoid detection by U.S. authorities. Although Dr. Lee called back and canceled the face-to-face meeting, he never reported to lab security personnel that he had agreed to meet in the first place.

That Dr. Lee accepted the contact number of an individual claiming to be an agent of a foreign power, yet failed to disclose that fact to lab security officials about the incident when asked about this contact. Dr. Lee apparently admitted more of the details of the August phone conversations when he was interviewed by FBI agents in January 1999, but his failure to acknowledge this fact when he spoke to Los Alamos officials in August 1998 continued a pattern of incomplete disclosure from Dr. Lee.

That Dr. Lee asked questions during the conversation which indicated a knowledge of PRC intelligence and scientific organizations and the operational methods used by these agencies.

None of these new items of information was sufficient, on its own, to tip the balance of probable cause against Dr. Lee. However, in the context of the other evidence that had already been gathered by the FBI, these elements were certainly relevant to a probable cause determination and should have been relayed to OIPR for consideration. While the FBI informally told OIPR of Dr. Lee's failure to fully report the August contact, that conversation did not take place until three months after the incident occurred. A proper and timely interpretation of the False Flag operation would have set the investigation on a very different course in late 1998. The Bellows Report supports the judgement that the FBI's handling of the False Flag was inappropriate, and that the information gained through the False Flag would have added to a showing of probable cause necessary for a FISA warrant.

Surreptitious Communications

The December 19, 1997 directive from FBI Headquarters also revived an investigative issue that had come to the FBI's attention in 1995, prior to the start of the Kindred Spirit investigation. Among the 15 actions that FBI Headquarters directed the Albuquerque office to take was a reinvestigation of the possibility that Dr. Lee was engaging in clandestine communications, using either a satellite system or Short Range Agent Communications (SRAC).

As part of the 1994–1996 investigation of Dr. Lee, the FBI had learned that Dr. Lee was reported to have installed a satellite antenna near his home and was suspected of using it to communicate surreptitiously. The case agents requested assistance in investigating the possibility that Dr. Lee was engaged in some sort of satellite communications, but the request was summarily dismissed by the case manager at FBI Headquarters, Supervisory Special Agent Craig Schmidt, and the matter was not further pursued for nearly three years.

After the FISA request was rejected in 1997, in part because the FBI had not been able to convince OIPR that Dr. Lee was currently engaged in any clandestine activity, the case manager's interest in the communications issue picked up. In the December 19, 1997 communication to Albuquerque, he directed the agents in the field to renew their investigation of this matter, which they did with substantial vigor. For several months during the summer of 1998, the Albuquerque office collected information to determine whether or not Dr. Lee was, in fact, engaged in some sort of clandestine communication from his home.

The Albuquerque case agents, with the help of a technical adviser who was brought in specifically for the purpose of helping on this issue, formed a hypothesis that Dr. Lee was communicating by satellite. They included this information, and much of the supporting data, in the November 10, 1998 request for a FISA warrant. The agents did not assert conclusively that Dr. Lee was using SRAC or satellite communications, but they explained their reasons for believing that he might be doing so and requested help in making a final determination about the significance of the possible communications.

The FBI has subsequently concluded that the observed phenomenon which originally led the Albuquerque case agents to believe that Dr. Lee might be using SRAC was not linked to any communication from Dr. Lee's house. The FBI's technical analysis of this issue is thorough and convincing. On the current state of the record, the phenomenon which led the FBI to suspect that Dr. Lee was engaged in surreptitious communications, while still unexplained, cannot be conclusively linked to anything that was going on inside Dr. Lee's house or on his property.

What is disturbing, however, is that the FBI did not even begin this analysis until November 1999, shortly after the November 3, 1999 closed hearing which focused heavily on this issue. The case manager at FBI Headquarters who received the November 10, 1998 FISA request from Albuquerque rejected the new request, despite the fact that it contained new information beyond what the FBI had felt was sufficient, in 1997, to get a FISA warrant. Outside the Albuquerque field office, no one in the FBI made any real effort to understand the data in the November 10, 1998 FISA request.

Even when the dynamics of the case changed after the FBI concluded that Dr. Lee had not passed the December 23, 1998 polygraph, and changed again when Dr. Lee failed an FBI polygraph on February 10, 1999, no one in the FBI expressed any interest in examining the possibility that there might be something more to the SRAC issue than initially suspected. The FBI still did not revisit the clandestine communications issue after learning that Dr. Lee had been downloading computer files and putting them on portable tapes. The notion that there might be a link between the clandestine communications and the portable tapes apparently never occurred to the FBI, and no effort was made to investigate the meaning of the strange electromagnetic phenomenon that had led the FBI case agents to suspect that Dr. Lee was using SRAC.

Instead of taking action on the new information, the case manager sent back a cable on December 10, telling the case agents that FBIHQ had reviewed the new FISA request and determined that it did ''not yet contain the justification necessary to successfully support a FISA Court application for electronic surveillance,'' and recommended that Albuquerque send copies of written reports from LANL's Counterintelligence officer, Terry Craig, regarding Dr. Lee's deception about the False Flag.[110]

On the merits, the failure to forward the FISA request to OIPR is inexplicable. The FBI had felt since 1997 that they had sufficient probable cause to get a FISA warrant. The 1998 investigative steps yielded new information that directly addressed the concerns OIPR had raised about the Lees being currently engaged in clandestine activity,

yet the FBI case manager summarily dismissed the new request, failing to even forward it to OIPR for consideration. The failure to take action when the dynamics of the case changed in early 1999 is just incomprehensible.

When such serious national interests were involved in this case, it was simply unacceptable for the FBI to tarry from August 12, 1997 to December 19, 1997, to send the Albuquerque field office a memo. It was equally unacceptable for the Albuquerque field office to take from December 19, 1997 until November 10, 1998 to respond to the guidance from Headquarters, and then for the FBI not to renew the request for a FISA warrant based on the additional evidence. The FBI's handling of this issue is impossible to justify.

The December 23, 1998 Polygraph

When Dr. Lee returned to the United States from a three-week trip to Taiwan in December 1998, he was administered a polygraph examination on instructions from Mr. Ed Curran, Director of DOE's Office of Counterintelligence (OCI). Although Dr. Lee was initially thought to have passed the polygraph with very high scores, his access to the X-Division was temporarily suspended to give the FBI time to conclude its investigation. When the polygraph results were examined by the FBI in late January or early February 1999, it became clear that Dr. Lee had not passed, and the investigation was restarted, eventually leading to the dismissal of Dr. Lee from LANL and, several months later, his indictment and jailing.

The circumstances surrounding this December 1998 polygraph are among the most important but least understood aspects of the case. The June 1999 report of the President's Foreign Intelligence Advisory Board raised questions about this issue and recommended that the Attorney General determine, ''why DOE, rather than the FBI, conducted the first polygraph in this case when the case was an open FBI investigation. . . .'' [111] The subcommittee's investigation demonstrates that the handling of the December 23, 1998 polygraph, or more accurately the mishandling of this polygraph is one of the most consequential errors of the Wen Ho Lee matter. To understand the impact of the polygraph on the case, it is necessary to review: 1) the events leading up to and the reasons for the December 23, 1998 polygraph; 2) the results of that polygraph; and 3) the effect on the investigation of the erroneous polygraph reading by Wackenhut. The short answer is that: 1) DOE jumped into the case in a heavy handed way during late 1998 in an effort to avoid criticism related to the upcoming release of the Cox Committee report, 2) the Wackenhut examiners' incorrect conclusion that Dr. Lee passed the polygraph prompted the FBI to nearly shut down its investigation of Dr. Lee, 3) with the result that during the time he supposedly was denied access to the X-Division, Dr. Lee was able to return and recover the tapes that are now missing. Given the vast number of mistakes that had already been made prior to December 1998, and the number that were made thereafter, it would be wishful thinking to believe that a correct reading of the polygraph would have led to a successful conclusion in this case, but Wackenhut's erroneous initial interpretation of the results and the long delay in getting the charts passed to FBIHQ for review put the case on a downward spiral from which it almost never recovered. Because these issues are both highly important and widely misunderstood, each is examined in some detail.

The events leading up to the December 23, 1998 Polygraph

As noted previously, the FBI's investigation of Dr. Lee had been dealt a severe blow in August 1997 when DOJ's Office of Intelligence Policy and Review rejected the FISA request. The local case agents spent most of 1998 trying to get the investigation back on track, but were not notably successful. By November 1998, the newly appointed lead case agent was ready to move forward and sent a new request for FISA coverage to FBI HQ. Unfortunately, the request fell on deaf ears for reasons that will be explored more fully below.

At approximately the same time the case agents were seeking FISA coverage, Dr. Lee asked for permission to travel to Taiwan to visit a company called Asiatek. According to an FBI document describing this request, Dr. Lee said that ''Asiatek invited him to visit Taiwan in December 1998 to give a presentation in exchange for his airfare.'' [112] When Dr. Lee submitted a request to travel under these terms, the LANL Internal Security section denied it, so Dr. Lee reportedly traveled at his own expense to visit an ailing sister.[113]

While the Internal Security section was correct to deny Dr. Lee's request to let Asiatek pay his travel expenses, the request should have set off alarm bells within both DOE and the FBI. The aforementioned FBI document says:

''Asiatek is a Taiwan-based company founded in 1985 which introduced state-of-the art information technology to both China and Taiwan. The company works with both private industry and Taiwan government research facilities such as the Chung Shan Institute of Science and Technology (administered by the Ministry of National Defense). Asiatek specializes in information technology, program planning and management, business process re-engineering, integrated logistic support, and continuous acquisition and life cycle support environmental planning and implementation. Asiatek also develops cannon and tank systems.'' [114]

The fact that the prime suspect in a major espionage investigation was asking to travel out of the country for the second time in less than nine months, with his travel to be paid for by a foreign company, should have been a call to action by someone in DOE or the FBI. The local case agent sent a message to FBIHQ asking that this information be considered ''in conjunction with Albuquerque Division's request for FISA/MISUR coverage of Wen-Ho Lee,'' [115] but the case manager did not act on it.

If the travel alone was not sufficient to compel the FBI and/or DOE to take some positive steps to regain control over the case, the nature of the work performed by Asiatek and its relationship to the Chung Shan Institute of Science and Technology should have been because these matters related directly to concerns that had been raised about Dr. Lee during the course of the investigation. When asked why Dr. Lee was allowed to travel under these circumstances, Mr. Curran replied that ''FBI personnel were running the investigation and were the ones that allowed Dr. Lee to travel to Taiwan. If it were my decision, I would not have allowed Mr. Lee to leave the country.'' [116]

Mr. Curran's statement on the travel issue reflects a larger problem that plagued the Kindred Spirit investigation from beginning to end, namely the systemic breakdown of effective communication between DOE and the FBI on matters of great importance.[117] If Mr. Curran was opposed to letting Dr. Lee go to Taiwan, he should have said something. As Director of DOE's OCI, his opinion clearly had weight. He did not act, so Dr. Lee went to Taiwan.

As another example of ineffective communication on important issues, consider Mr. Curran's statement that he first learned on December 15, 1998, that Director Freeh had recommended removing Dr. Lee from access more than a year before.[118] Mr. Curran assumed his position as Director of OCI in April 1998 and immediately conducted a 90–day review of the CI program at DOE as mandated by PDD–61. He received what he describes as a ''summary briefing on the Kindred Spirit investigation.'' He was aware of the False Flag that was run in August and wanted to ''get the case moving and to resolve the issues of the possible loss of sensitive information,'' but the fact that the FBI had recommended that Dr. Lee's access to classified information be pulled was apparently not shared with Mr. Curran until mid-December 1998, while Dr. Lee was in Taiwan.[119] It should be noted, however, that Mr. Curran told the DOE IG that he learned about Director Freeh's 1997 comments on moving Dr. Lee in October 1998, two months before he finally took action.[120] This is significant because it undermines Mr. Curran's assertion that the reason he acted in December 1998 was because he had just learned of Director Freeh's 1997 recommendations.

That the Director of DOE's Office of Counterintelligence was not informed (or did not make himself aware) of the FBI's view that Dr. Lee should be pulled from access reflects poorly on the DOE and the FBI. How could anyone brief this case to Mr. Curran in 1998 without mentioning that the Director of the FBI had twice told DOE's top leadership that Dr. Lee's access to classified information should be removed? What would one say, when briefing the new head of counterintelligence, that would not somehow convey the message that the FBI was concerned about the potential damage from keeping him in access? And how could the top counterintelligence officer in the DOE not inquire as to whether consideration had been given to reducing the risk posed by an individual who was the chief suspect in a major espionage investigation? This lack of communication defies comprehension.

The Counterintelligence Reform Act of 2000 will prevent such disasters in the future. The Act requires the Director of the FBI to notify appropriate officials, in writing, when a full field investigation is started in an espionage case, and to present to the head of the affected agency a written assessment of the potential impact of the actions of that agency or department on an FBI counterintelligence investigation. It will not be possible in future investigations for the head of counterintelligence in an agency to claim ignorance of an FBI recommendation regarding a suspect's access to classified information. And the FBI will have to ensure that its coordination with the affected agency is both close and continuous, so that when new officials come into decision-making roles, they will be fully informed as to the important aspects of pending cases. The FBI/DOE polygraph disaster in the Wen Ho Lee case should be the last such calamity.

The interim report issued in March 2000 touched briefly on the polygraph issue, prompting a letter from Mr. Curran,[121] who provided the following account of the events leading up to the polygraph:

''Every detail of this case was coordinated between DOE and the FBI. I personally wanted the FBI to do the interview rather than DOE, but they stated that they were not ready to interview him because they first wanted to interview some neighbors and associates of Mr. Lee. DOE had been asking the FBI to bring this case to a conclusion since the [false flag] in August. I did not believe I had the luxury of waiting any longer since the investigative activity in August and this was Mr. Lee's first opportunity to leave the U.S. I was very concerned as to what he would do and say on his trip to Taiwan and then what he would do upon his return. Since

the FBI was not going to interview Mr. Lee and bring this case to a conclusion prior to his departure to Taiwan, I made the decision, with the Secretary's approval, to remove Mr. Lee from access upon his return from Taiwan and until the FBI could conclude their investigation through interview and polygraph.

''Mr. Lee returned from Taiwan on December 23, 1998. He was interviewed and removed from access and asked to take a polygraph. The FBI was aware that if Mr. Lee refused to take a DOE polygraph, his security clearance would have been removed and steps taken to terminate his employment; if Mr. Lee agreed to take the test and failed, his clearance would be removed and termination proceedings would be initiated. This activity was completely coordinated with the FBIAQ. On December 21, 1998, a memo was furnished to the Secretary of Energy from me setting forth the above scenario. Mr. Lee took the polygraph test and representatives from FBIAQ were present.'' [122]

In subsequent correspondence with the subcommittee, Mr. Curran elaborated on his reasons for removing Dr. Lee's access in December 1998. Responding to follow-up questions from a September 27, 2000 subcommittee hearing, Mr. Curran cited four reasons for his decision to remove Dr. Lee from access in December 1998: ''(1) the fact that the FBI no longer required Lee be kept in access, (2) my discomfort at the extent of Dr. Lee's access, which was greater than I had originally thought, (3) the fact that the FBI's false flag operation had been unsuccessful, possibly alerting Lee to the investigation, and (4) the fact that Lee was then traveling in Taiwan, thus able to travel easily to Hong Kong or the People's Republic of China without our knowledge.'' [123]

While Mr. Curran's account explains what happened, it does not adequately explain why these events took place. It was simply inconsistent for DOE to allow Dr. Lee to travel to Taiwan, yet polygraph him and pull his access to classified information upon his return, even though he supposedly passed the polygraph. If Dr. Lee was such a threat that he needed to be polygraphed and removed from access, why was he allowed to go to Taiwan? And if he passed the polygraph after returning from Taiwan, including specific questions about espionage, why was there still a need to remove his access?

Mr. Curran's explanation for the series of events leading up to the December 1998 polygraph shows an investigation that was, at best, disjointed and poorly coordinated (despite Mr. Curran's assertions to the contrary). Consider, for example, that the FBI agent who took over the case on November 6, 1998, did not agree with the DOE decision to have Wackenhut [124] give Dr. Lee a polygraph examination, and has called it ''irresponsible.'' According to FBI protocol, Dr. Lee would have been questioned as part of a post-travel interview. However, as Mr. Curran noted, the case agents were inexplicably unprepared to conduct such an interview and the Special Agent in Charge (SAC) in Albuquerque agreed to go ahead with the polygraph at Mr. Curran's request. The lead case agent requested a new FISA in November 1998, but Supervisory Special Agent Craig Schmidt the same FBI case manager at headquarters who had put together an action plan in December 1997 trying to get the investigation back on track had suddenly gotten cold feet on the matter, casually rejecting the FISA request without even showing OIPR a written product. DOE was exercised enough about Dr. Lee that Ed Curran wanted to give Dr. Lee a polygraph and pull his access to classified information (something the FBI had recommended 14 months prior), but was not willing to stop him from traveling to Taiwan. The case was a mess, and then it got worse.

The disagreement between FBI and DOE over how best to proceed in late 1998 only partially explains why the investigation lurched forward with FBI seemingly in charge one moment (letting Dr. Lee travel to Taiwan, contrary to Mr. Curran's preference) and Mr. Curran prevailing the next (getting the Albuquerque SAC to overrule the lead case agent on the polygraph question). Other testimony and documents provided to the subcommittee paint a more complete and markedly different picture of the events surrounding the polygraph of Dr. Lee on December 23, 1998. Unfortunately, the picture they paint is one of DOE trying desperately to protect its image from the revelations it expected to come with the release of the Cox Committee report, with the FBI going along, and neither agency focusing on the national security implications of their actions.

To understand the context in which these decisions were being made, consider that the Cox Committee was taking testimony in mid-December, and that key portions of the testimony centered on security at the national labs. The atmosphere leading up to the Cox Committee hearings has been described as follows:

''With impeachment as a backdrop, allegations that the Clinton administration was allowing China easy access to American secrets collided with charges that China's military had funneled money into Democratic coffers. The New York Times reported that the daughter of a senior Chinese military officer was giving money to Democrats while also working to acquire sensitive American technology.

''Republicans, opening a new front against a beleaguered president, created a House select committee, headed by Representative Cox, to investigate whether the government was compromising technology secrets by letting American companies work too closely with China's rocket industry. With its deadline approaching, the committee stumbled on the W–88 case.

''Mr. Trulock became a star witness, and committee members were riveted by his testimony. C.I.A. analysts who testified before the committee agreed there was espionage, people who heard the secret proceedings said, but were more equivocal about its value to China.'' [125]

The Mr. Trulock referenced above is Notra Trulock, former DOE intelligence chief. According to a DOE chronology, the Cox Committee was briefed by DOE on November 12, 1998 and again on December 7. On December 16, Mr. Curran, Mr. Trulock and the Director of the DOE's Office of Intelligence, Mr. Lawrence Sanchez, testified again before the Cox Committee.[126] Describing the impact of his testimony to the House panel, Mr. Trulock told the subcommittee on September 27, 2000 that ''after our initial appearance and particularly our second appearance before the Cox Committee in December of 1998, there was a high level of agitation within the Office of Counterintelligence on the part of Mr. Sanchez and within the political appointees at the department.'' [127] Mr. Trulock further testified:

''it is certainly not a coincidence that after the FBI provided the information to the Cox Committee on Dr. Lee and other espionage cases within the Department of Energy that for the first time in almost two years, DOE management became energized about addressing the advice we had received from Director Freeh in August of 1997.'' [128]

Mr. Trulock's testimony is supported by documentary evidence and testimony from other witnesses. A December 18, 1998, memorandum from the FBI's Assistant Director for National Security, Neil Gallagher, says that Secretary Richardson would be calling Director Freeh about the Lee investigation on December 21, 1998. The memorandum explains that DOE counterintelligence personnel wanted to ''neutralize their employee's access to classified information prior to the issuance of a final report by the Cox Committee.'' When questioned on this point Mr. Curran acknowledged that the conversation mentioned in the memo had taken place, but denied any connection between DOE's desire to polygraph Dr. Lee and the release of the Cox Committee report.[130]

Mr. Curran's account of these events is contradicted by testimony from other individuals who were also directly involved. When Director Freeh testified before the Senate Select Committee on Intelligence on May 19, 1999, he told the committee:

''DOE was seeking to establish grounds to terminate Mr. Lee in December of 1998, and they went forward with their polygraph and interview with that objective. We, at that point, wanted more time to prepare for a confrontational interview which in these kinds of cases is the most important interview.'' [131]

Other FBI files from this period support the contention that Secretary Richardson wanted Dr. Lee fired in early 1999. A January 21 memo from FBI Supervisory Special Agent C. H. Middleton to Deputy Assistant Director Horan said that ''DOE is anxious to avoid criticism about the case. It removed the subject's access to classified information on 12/23/98. DOE wants to fire the subject, but may not have justification to do so at this time.'' [132]

None of the information the government had in its possession at that point would have justified a decision to fire Dr. Lee, but firing him would have allowed Secretary Richardson to avoid criticism that the DOE had not taken action on a major espionage case. Director Freeh's comments are further buttressed by statements that two security personnel made to the DOE Inspector General during an investigation of the decision-making process related to Dr. Lee's clearance and access. The former Director of LANL's Internal Security Division, Mr. Ken Schiffer, told the IG that he first heard Dr. Lee's name on December 21, 1998, in a conference call with two individuals from the Office of Counterintelligence, one of whom told him that ''the Secretary wanted Mr. Lee to be fired.'' [133] Mr. Richard Schlimme, the Counterintelligence Program Manager in the Albuquerque office, told the DOE IG that he had been on annual leave on December 21, 1998, when he was called to come in to work to deal with the Wen Ho Lee situation. When he arrived, Mr. Schlimme was told that ''Secretary Richardson wanted immediate action, so Mr. Curran decided to interview Mr. Lee immediately.'' [134] Further, according to Mr. Schlimme, ''Mr. Curran wanted Mr. Lee removed from the laboratory regardless of how he did on the polygraph.'' [135]

In addition to the evidence described above, the subcommittee has a sworn deposition from the case manager at FBI Headquarters, Supervisory Agent Craig Schmidt, who said he had very little control over the investigation in December 1998 because the ''Department of Energy was becoming more and more concerned about how they would appear and how they were appearing during the [Cox] committee meetings,'' [136] In the context of all the evidence to the contrary, Mr. Curran's assertion that the decision to act with regard to Dr. Lee had nothing to do with the imminent release of the Cox Committee report is not persuasive.

Incorrect reading of the December 23, 1998 polygraph

The subcommittee focused very intently on the question of whether Dr. Lee passed or failed the December 23, 1998 polygraph for

three reasons: (1) the erroneous reading changed the course of the investigation, prompting the FBI to nearly close down its investigation at a time when the scrutiny of Dr. Lee should have been increasing, (2) it took an inordinate amount of time to discover that the initial reading of the polygraph was wrong, and (3) the public perception that Dr. Lee really passed the test but the FBI somehow later reversed that finding is incorrect.

The consequences of the incorrect interpretation of the December 23, 1998 polygraph are the subject of the next section of this report. The remainder of this section will address the matter of the delay in getting the charts to the FBI and the question of whether Dr. Lee actually passed or failed this test.

The initial interpretation of the test was made by Wolfgang Vinskey, a Senior Polygraph Examiner with Wackenhut, a private firm that had a contract with DOE to conduct polygraphs. Mr. Vinskey wrote that he had administered ''a DOE Counterintelligence Scope PDD Examination'' to Dr. Lee, and concluded that ''this person was not deceptive when answering the relevant questions pertaining to involvement in espionage, unauthorized disclosure of classified information and unauthorized foreign contacts.'' [137] Mr. John Mata, Manager of DOE's AAAP Test Center, reviewed the exam and concurred with Mr. Vinskey that ''upon completion of testing, the Examinee was not deceptive when answering the relevant questions. . . .'' [138] Mr. Mata followed up the initial report with a more detailed memorandum on December 28, 1998, in which he reiterated to Mr. Curran the information that had been in the December 23 polygraph report, namely that ''data analysis of this examination disclosed sufficient physiological criteria to opine Mr. Lee was not deceptive when answering'' the relevant questions.[139]

After the exam, the two FBI agents who were on hand were briefed on the results of the test. There is a December 21, 1999 memorandum for the record written by John Mata which describes how the test results were relayed to the FBI.[140] Mr. Mata says that he told the lead case agent that the charts did not show significant reaction on three of the questions, but that ''a plus 3 on the fourth question (relating to having knowledge of anyone he knew who had committed espionage against the United States) was close.'' [141] Mr. Mata told the agent that Dr. Lee ''had disclosed information during the examination that he had not previously reported regarding an approach that was made to him on his recent or a past trip,'' and gave her a sheet of paper containing the data analyses.[142] According to Mr. Mata, the agent wrote down the questions from the exam and asked ''if further processing involved the charts being reviewed by their polygraph examiner (specific reference to Roger Black) . . .'' to which he said no.'' [143] Mr. Mata's memo also says that at no time [on that date] was he asked to provide the charts or any allied data from the test to the FBI.

During the first week of January, Mr. Mata's memo continues, the entire polygraph package (charts, questions, data analysis sheets and video tape) were sent to OCI Polygraph Program Manager David Renzleman in Richland, Washington. In mid-January, Mr. Mata got a call from Mr. Renzleman instructing him to provide the local FBI with everything generated by the polygraph, which he did.

An undated Quality Assurance record of this examination, prepared by David Renzleman contains the following comments:

''This test was initially classified and consequently DOE OCI did not get to see the collected charts or video tape recording until late January 1999.

''When the charts were subjected to the OCI QC [Quality Control] process, the initial NDI [No Deception Indicated] opinion could not be duplicated or substantiated.

''The Test Center Manager was advised of these QC concerns and was requested to send the charts to the Department of Defense Polygraph Institute (DODPI) which he did.

''DODPI advised the Test Center Manager that they could not duplicate or support the NDI opinion of this test.'' [144]

In the ''QC Opinion'' section of the report, Mr. Renzleman said, ''I am unable to render an opinion pertaining to the truthfulness of the examinee's answers to the relevant questions of this test. Additional testing is recommended.'' [145]

When the charts and videotape were subsequently analyzed by FBI polygraph experts in late January or early February, they concluded that Dr. Lee had failed relevant questions[146] or was, at best, inconclusive.[147] Based on these concerns, the FBI arranged for additional interviews and a new polygraph on February 10, 1999. In addition to learning on this date that Dr. Lee had reactivated his computer account simply by calling up the help desk and asking that it be restored,[148] the FBI concluded Dr. Lee failed the February polygraph and increased its investigative activity, but by then the chances of salvaging the investigation were slipping away.

There remains a serious question about the chain of events which led to the delayed discovery that Dr. Lee did not pass the December 1998 polygraph. A February 26, 1999 memorandum from William Lueckenhoff, Assistant Special Agent in Charge in Albuquerque, says:

''The FBI personnel present immediately requested the polygraph charts and documentation to the polygraph in order to have it reviewed by FBIHQ. DOE's initial response to this request, as per Ed Curran, DOE Counterintelligence Office, was not to allow the FBI access to the tapes and charts, only the numerical results of the polygraph.'' [149]

As is discussed elsewhere in this report, Dr. Lee did not pass the polygraph, and no one other than the initial reviewers have been able to interpret the charts to say that he did pass. Given that the charts clearly show that Dr. Lee did not pass, any effort to prevent their release to the FBI would be a serious matter. Where DOE was concerned about criticism because it was being accused before the Cox Committee of not taking action on the case, a failed polygraph would tend to prove the critic's point. However, a passed polygraph, followed by an investigation which cleared Dr. Lee of the W–88 allegations yet later resulted in his firing for unrelated security violations would show that DOE's critics were wrong about the W–88 investigation, but that DOE was serious about security anyway and ultimately removed Dr. Lee because he was a security risk. In these circumstances, any shenanigans with the polygraph charts would be extremely serious.

Mr. Curran strongly denies the allegation in Mr. Lueckenhoff's memo and DOE documents indicate that Mr. Curran was instrumental in getting the full record of the polygraph into the FBI's hands in January, 1999.[150]

When pressed for an explanation of the February 26, 1999 memo blaming Mr. Curran for the delay in getting the test results, the FBI took the position that the memo was only a blind memorandum not intended to capture official witness statements.[151] That does not explain why Assistant Special Agent in Charge William Lueckenhoff would attribute such remarks to Mr. Curran if he had no factual basis to do so.

Mr. Lueckenhoff's account is consistent with what actually happened, but the FBI is no longer willing to stand by the February 1999 memo. It is also possible that by February 26, 1999, after Dr. Lee had failed an FBI polygraph, Albuquerque realized that its failure to obtain the charts in a timely fashion (and the creation of the disastrous January 22 memo clearing Dr. Lee on the W–88 matter) would eventually be questioned. Saying that the FBI tried to get the charts but had been denied by Mr. Curran would provide an excuse for the Albuquerque division's abysmal performance in early 1999. Because the FBI will not stand by the version of events in the February 1999 memo, it is not possible to know what really happened. Instead, the FBI's position has the effect—intended or not—of making it next to impossible to assign responsibility for giving Dr. Lee more than a month to regain access to his computer and his office, enabling him to delete the incriminating evidence from his computer and destroy the now-missing tapes.

The FBI deserves substantial criticism for its handling of this investigation, but the record should be set straight on the result of the December 23, 1998 polygraph. On this matter, the FBI was correct—Dr. Lee did not pass the polygraph test.

One of the earliest and most sustained attacks on the FBI's reading of the December 1998 polygraph came from Dr. Lee's defense team. After Dr. Lee was held without bail at the end of 1999, defense attorney Mark Holscher claimed that Dr. Lee's scores on the 1998 test had been '' 'off the charts'' in indicating truthfulness.'' [152] It is a common defense tactic to take evidence that might be harmful to the defendant's position and deal with it up front, trying to put a positive spin on it. Mr. Holscher's comments that Dr. Lee's scores were off the charts in indicating truthfulness would certainly fit into that pattern—taking on an issue that might have to be dealt with if the case went to trial and getting a positive interpretation planted in the public's mind, to include the potential jury pool. As the negotiations between the defense and the government went forward, Mr. Holscher continued to press the polygraph issue, claiming that Dr. Lee had passed the only test that had been properly administered, and suggesting that the FBI was wrong to claim that Dr. Lee had failed either exam. Mr. Holscher's statements on the polygraph are exactly what one would expect a defense lawyer to do, but they have created the incorrect impression that the Wackenhut examiners were right and the FBI was wrong.

Mr. Holscher and Dr. Lee's supporters got help on this score from a story by CBS reporter Sharyl Attkisson. The February 2000 news report, titled ''Wen Ho Lee's Problematic Polygraph,'' claimed that ''three experts gave the nuclear scientist passing scores but the FBI later reversed the findings. CBS investigation fuels argument that he was a scapegoat.'' [153]

Ms. Attkisson asked precisely the right question, ''. . . how could the exact same charts be legitimately interpreted as 'passing' and also 'failing?' '' [154] To answer this question, CBS reached out to Richard Keifer, who was then the chairman of the American Polygraph Association. Mr. Keifer was also a former FBI agent who had run the FBI's polygraph program. The CBS report continues:

''Keifer says, ''There are never enough variables to cause one person to say (a polygraph subject is) deceptive, and one to say he's non-deceptive . . . there should never be that kind of discrepancy on the evaluation of the same chart.''

''As to how it happened in the Wen Ho Lee case, Keifer thinks, ''then somebody is making an error.''

''We asked Keifer to look at Lee's polygraph scores. He said the scores are ''crystal clear.'' In fact, Keifer says, in all his years as a polygrapher, he had never been able to score anyone so high on the non-deceptive scale. He was at a loss to find any explanation for how the FBI could deem the polygraph scores as ''failing.''

. . . Since Lee was never charged with espionage (only computer security violations), the content of the polygraph may be unimportant to his case. But the fact that his scores apparently morphed from passing to failing fuels the argument of those who claim the government was looking for a scapegoat—someone to blame for the alleged theft of masses of American top secret nuclear weapons information by China—and that Lee conveniently filled that role.'' [155]

The CBS report gave the clear impression that the Wackenhut examiners were correct. Rather than take on the issue, the FBI simply told CBS ''it would be 'bad' to talk about Lee's polygraph, and that the case [would] be handled in the courts.'' [156] The case never went to trial, and the FBI never got the chance to explain its interpretation of the exam. The result has been that there are lingering doubts as to whether the polygraph is a reliable tool, and whether it was misused by the FBI in the Wen Ho Lee case.

When the case of FBI Special Agent Robert Hanssen broke in February 2001, FBI Director Louis Freeh ordered, among other things, an expanded use of the polygraph within the FBI for counterintelligence purposes. The Judiciary Committee held a hearing on the utility of polygraphs in law enforcement and counterintelligence cases, and heard from a distinguished panel with witnesses offering opinions on both sides of the issue. With the matter of Wen Ho Lee's polygraph still unresolved, two of the witnesses were asked to review the results of the December 23, 1998 polygraph and answer a series of questions that would address the same concern that CBS had raised—how can the same charts be interpreted as both passing and failing?

Dr. Michael H. Capps, currently Deputy Director for Developmental Programs at the Defense Security Service and formerly head of DOD's Polygraph Institute, reviewed the polygraph data and said that he could ''render no opinion regarding whether or not deception is indicated. . . .'' [157] Mr. Capps went on to describe how he had evaluated the exam with and without the aid of the John Hopkins algorithm, which is designed to provide a statistical analysis using a mathematical model to render a probability of deception. He noted that ''there are what I believe to be substantial differences in the scores my evaluation produced and those of the Wackenhut examiner. . . . I cannot account for the differences between my results and those of the Wackenhut examiners.'' [158]

In response to a direct question about how different examiners could reach substantially different conclusions, Mr. Capps said, ''One would expect two properly trained examiners evaluating the same data to draw a similar, but not necessarily identical conclusion. This was not the case when comparing my evaluation with that of the Wackenhut examiner. I cannot account for the differences.'' [159]

One possible explanation for the differing opinions on the polygraph is that the questions were improperly structured, making the entire test invalid because the control questions and the relevant questions were not sufficiently distinct to permit an accurate differentiation of the responses to each. When Dr. Capps was asked about the appropriateness of the questions, he faulted two of the comparison questions used in the exam and said ''these comparison questions were not sufficiently distinct from the relevant questions so as to generate a useful basis of comparison.'' [160]

Mr. Richard Keifer was also asked to evaluate the December 23, 1998 exam in light of his comments to CBS. He provided a detailed analysis and critique of the test and reported:

''My review of the polygraph examination of Wen Ho Lee determined the results to be inconclusive. . . . It is my opinion this examination was not set up, conducted and reviewed using well-established procedures for counter-intelligence polygraph testing. This lack of experience in Foreign Counter-Intelligence polygraph testing contributed to an incorrect decision, an unacceptable delay in the decision making process, and negated the potential of fully uncovering the truth with a timely posttest interrogation.'' [161]

Mr. Keifer further noted that ''I have reviewed these charts at least a dozen times and have done so under every favorable assumption I could make and I have never found this examination to be non-deceptive.'' [162]

When asked to evaluate the test itself, which was not a standard set of questions but one that was created specifically for the examination of Dr. Lee, Mr. Keifer said that ''the fundamental problem with this examination was in question formulation.'' He then took issue with both the relevant questions and the control questions.[163] This finding is consistent with the concerns raised by Dr. Capps, as well as by FBI examiners who noted that Dr. Lee appeared to be reacting to all the questions, control and relevant. The structure of the questions used in the test is important because a polygraph is designed to measure differences between a subject's responses to control questions, which should generate little or no reaction, and the relevant questions where a substantial response is meaningful. Control questions that produce a reaction have the effect of minimizing the differences between the reactions to control questions and relevant questions, thereby rendering the test less useful.

Mr. Keifer also commented on his CBS appearance:

''I was quoted out of context and I felt it was deliberate. I had numerous telephonic conversations with Attkisson prior to the taped interview. She was fully briefed regarding polygraph procedures. I clearly and fully explained to her several times that the ''scores'' of the examiners were high on the non-deceptive side, but that subsequent testing and admissions indicated Lee was in fact deceptive. During the course of our conversations she suggested cover up and misconduct of various officials in the matter. Unfortunately, during the taped interview she asked only about the ''scores'' and did not provide an opportunity for me to clarify. In my opinion this was deliberate, and the piece was manipulated to suggest wrongdoing by the government. Once I saw the piece, I called officials at the Energy Department and the FBI to clarify the matter.'' [164]

The subcommittee's review of the matter shows that Dr. Lee definitely did not pass the December 23, 1998 exam. The best that anyone other than the initial examiners has been able to justify is an ''inconclusive'' or ''no opinion'' rating. It is important that no one has been able to substantiate the ''no deception indicated'' finding because any other result even a ''no opinion''—would have put the investigation on a completely different track. Instead, the government quit looking at Dr. Lee at the precise moment when it should have been looking most intently at his activities.

The Consequences of DOE's Interference in the Investigation

Ordinarily, the decision to polygraph an individual or to remove his access to the classified X-Division spaces would have only limited ramifications. In the Wen Ho Lee case, however, the incorrect handling of the polygraph issue was one of the most consequential mistakes in the entire investigation, likely costing the government an opportunity to recover the tapes that ultimately led to Dr. Lee's indictment and conviction, and creating much angst about the fate of the nuclear secrets on those tapes. In a June 28, 2001 letter, Assistant Attorney General Daniel J. Bryant confirmed that ''Dr. Lee has told the debriefing team that on December 23, 1998, the computer tapes at issue in the indictment were in his X-Division office at the Los Alamos National Laboratory.'' [165]

In other words, the tapes containing the ''crown jewels'' of American's nuclear secrets, that could ''change the global strategic balance,'' were sitting in Dr. Lee's X-Division office and could have been recovered by the government if the DOE had not gone into the panic mode and put political considerations ahead of national security concerns when it became concerned about what the Cox Committee report would say. The FBI, especially the Albuquerque SAC, bear equal responsibility for this turn of events for allowing it to happen.

One of the most fundamental tenets of counterintelligence work is that when you spook a suspect, you watch him. The suspect's reaction to unexpected events, whether planned (as when the FBI decides to confront a suspect in a hostile interview) or driven by unanticipated events (like DOE's decision to interview, polygraph and change Dr. Lee's classified access for no reason that he would know about), is a critical element of any counterintelligence investigation. Success often depends on observing and correctly interpreting that reaction. Even if the suspect does not show any apparent reaction in the presence of investigators, it is imperative that he be watched to see what he does when he thinks he isn't being watched. People with problems react differently than people who don't have anything to worry about. Failure to maintain proper surveillance under these circumstances can lead to the loss of the best opportunity to find out what is really going on. In the Wen Ho Lee, it cost a lot more than that.

Dr. Lee was definitely spooked by the interview and polygraph on December 23. According to an FBI chronology, the polygraph was completed at 2:18 p.m. and he was told at about 5:00 p.m. that his access to secure areas of X-Division and to both his secure and open X-Division computer accounts had been suspended. At 9:36 p.m., Dr. Lee made four attempts to enter the secure area of X-Division through a stairwell. At 9:39 p.m., he tried again through the south elevator.[166] At 3:31 a.m. on Christmas Eve, Dr. Lee again tried to gain access to the X-Division. Had the FBI maintained proper surveillance, they would have known that Dr. Lee was making these desperate attempts to get back into the X-Division. Surely that would have been a clue that further investigation was necessary. Had the case been handled properly, FBI or DOE personnel could have done what Dr. Lee eventually did—just walk into the X-Division and pick up the tapes. Instead of destroying them, as Dr. Lee says he did, government officials could have properly secured these tapes containing the crown jewels of America's nuclear secrets.

In a December 24 meeting, Dr. Lee was told ''that he was being transferred from X-Division to T-Division for thirty days to allow time for the FBI to complete their inquiry.'' [167] If there had ever been any doubt in his mind as to whether he was under an FBI investigation, this comment from DOE removed that doubt. His conduct over the next

few days shows clearly that he was worried about the government's sudden interest in him and the fact that his access to the X-Division had been removed. All told, Dr. Lee tried to get back into his X-Division office almost twenty times between the December 23 polygraph and the February 10 exam. Had the FBI and DOE been watching, they might have wondered why Dr. Lee wanted to get back into the X-Division so desperately, and they might have gone there to look.

It should be noted that not all of the blame for the FBI's lack of interest in Dr. Lee's conduct after the polygraph can be placed on the incorrect interpretation of the polygraph results. Even if one takes the position that the FBI thought that Dr. Lee had passed the polygraph, there is no excuse for completely dropping an investigation solely on the basis of a passed polygraph, especially when DOE and the case agents were told that during the pre-polygraph interview Dr. Lee had admitted foreign contact that he had not previously reported. The FBI should have continued the investigation on the basis of that revelation, regardless of the polygraph exam. A review of the transcript from the March 7, 1999 interview of Dr. Lee shows that the FBI focused very heavily on that unreported contact. If it was worth investigating in March, it should have been worth investigating the previous December.

DOE's answer as to why it failed to monitor Dr. Lee after the December 23, 1998 polygraph is both baffling and informative. DOE's Ed Curran said that ''since the FBI was conducting the investigation of Dr. Lee, it was responsible for determining the level of monitoring necessary.'' [168] All available evidence indicates that the impetus for the polygraph clearly came from within DOE, and that the FBI agreed to this at the insistence of DOE, yet DOE washed its hands of any responsibility for determining whether the polygraph provoked a response from Dr. Lee. Consider also that the catalog of Dr. Lee's attempts to get back into the X-Division was culled from information under DOE's control, information that the FBI did not have access to unless the DOE gave it to them. Under these circumstances, it is not surprising that Dr. Lee's attempts to get back into the X-Division almost immediately after his access was pulled went undetected until much later. The FBI says that it did not learn of Dr. Lee's attempts to reenter the X-Division until March 13, 2000.[169]

The almost complete breakdown in the surveillance of Dr. Lee had severe consequences. As the FBI later learned, ''within one hour of reactivation [of his computer account], he immediately deleted three files, including one which was named after the graduate student who had worked for him in 1997.'' [170] In late January, he began erasing the classified files from the unsecure area of the computer. After he was interviewed by the FBI on January 17, Dr. Lee ''began a sequence of massive file deletions . . .'' [171] He even called the help desk at the Los Alamos computer center to get instructions for deleting files. After he was interviewed and polygraphed again on February 10, within two hours of the time he was told he had failed the exam, he deleted even more files. All told, Dr. Lee deleted files on January 20th, February 9th, 10th, 11th, 12th, and 17th. When he called the help desk on January 22nd, his question indicated that he did not know that the ''delay'' function of the computer he was using would keep deleted files in the directory for some period of time. He asked why, when he deleted files, were the ones in parentheses not going away, and asked how to make them go away immediately. He also asked, on February 16, how to replace an entire file on a tape.[172]

Thus, the report that Dr. Lee had passed the December 23 polygraph gave Dr. Lee precious time to delete and secrete information. The significance of Dr. Lee's file deletions and the unreasonable delays in carrying out the investigation that should have detected and prevented them should not be underestimated. As FBI Agent Robert Messemer has testified, the FBI came very close, ''within literally days, of having lost that material.'' [173] The FBI was almost unable to prove that Dr. Lee downloaded classified files. If the material had been overwritten after it was deleted, ''that deletion by Dr. Lee [would] have kept that forever from this investigation.'' In this context, the repeated delays, the lack of coordination between the FBI and the Department of Energy, and later between the FBI and the Department of Justice, are much more serious.

February 10, 1999 to March 8, 1999

On February 10, 1999, Wen Ho Lee was again given a polygraph examination, this time by the FBI. During this second test, which Lee failed, he was asked: ''Have you ever given any of [a particular type of classified computer code related to nuclear weapons testing] to any unauthorized person?'' and ''Have you ever passed W–88 information to any unauthorized person?'' [174] It should be noted that the 1997 FISA request mentioned that the PRC was using certain computational codes, which were later identified as something Lee had unique access to.[175] Moreover, the computer code information had been developed independently of the DOE Administrative Inquiry which was subsequently questioned by FBI and DOJ officials.

After this second failed polygraph, there should have been no doubt that Dr. Lee was aware he was a suspect in an espionage investigation, and it is inconceivable that neither the FBI nor DOE personnel took the rudimentary steps of checking to see if he was engaging in any unusual computer activity. Again, this is not hindsight. The classified information to which Dr. Lee had access, and which he had been asked about in the polygraph, was located on the Los Alamos computer system. The failure of DOE and FBI officials to promptly find out what was happening with Dr. Lee's computer after he was deceptive on the code-related polygraph question is inexplicable. As noted above, this failure afforded Dr. Lee yet another opportunity to erase files from both the unsecure system and the unauthorized tapes he had made.

As should have been expected, Dr. Lee used the time afforded him by the delays to delete the classified information he had placed on the unclassified system, and to retrieve and dispose of the now-missing tapes. According to press reports, Dr. Lee was allowed to return to the X-Division in January 1999 by an unwitting security office. On other occasions, he walked in behind division employees. In fact, he apparently managed to slip in though an open door just hours after he was barred from X-Division.[176] He also approached two other T-Division employees with a request to use their tape drive to delete classified data from two tapes (he no longer had access to the one that had been installed in his X-Division computer since he had been moved from that division in December 1998).

Nearly three weeks after the polygraph failure, the FBI finally asked for and received permission to search Lee's office and his office computer, whereupon they began to discover evidence of his unauthorized and unlawful computer activities. Even so, the FBI did not immediately move to request a search warrant. The three week delay, from February 10 until the first week of March, is inexplicable.

The long hiatus in moving the case forward seems to have been broken primarily by the impending release of a story on the W–88 case by the New York Times, after which the case was once again moved from the national security track onto the political track. Upon learning of the New York Times story, government officials asked that it be delayed for several weeks, ''saying they were preparing to confront their suspect.'' [177] It is almost incomprehensible that the FBI was still not ready, in March 1999, to interview Dr. Lee. The same argument had been made in December 1998 when the DOE wanted to polygraph Dr. Lee, so there is absolutely no reason that the necessary preparations could not have been made in the interim.

The reporters did not know Dr. Lee's identity, but the FBI said they worried that he might recognize himself from details in the article as if he was not already aware that the FBI was investigating him after having been polygraphed and having his access to classified information suspended since December, having been interviewed by the FBI in January, having been asked to take another polygraph in February.

The FBI interviewed Dr. Lee on March 5, and the New York Times published its story the next day, ''China Stole Nuclear secrets for Bombs, U.S. Aides Say.'' Prompted to move by the breaking story, the FBI interviewed Dr. Lee again on Sunday, March 7. It was during this interview that one of the case agents, at the suggestion of Albuquerque SAC Kitchen, asked Dr. Lee if he had heard of the Julius and Ethel Rosenberg, the couple who had been executed for providing nuclear secrets to the Soviet Union. The reference to the Rosenberg case, after threats that Dr. Lee would lose his job, be handcuffed and thrown in jail, was over the top, creating the inference that the FBI was trying to scare Dr. Lee into a confession. According to a transcript of the interview:

''Do you know who the Rosenbergs are?'' [the agent] asked.

''I heard of them, yeah, I heard them mention,'' Dr. Lee said.

''The Rosenbergs are the only people that never cooperated with the federal government in an espionage case,'' she said. ''You know what happened to them? They electrocuted them, Wen Ho.'' [178]

FBI Director Freeh later acknowledged that this reference to the Rosenbergs was inappropriate, but he denied that the FBI ever attempted to coerce a confession from Dr. Lee.[179]

One day after the FBI's confrontational interview, Dr. Lee was dismissed from Los Alamos. Former LANL Counterintelligence chief Robert Vrooman, has suggested that the leaking of Dr. Lee's name to the press had an adverse impact not only on Dr. Lee but also on the integrity of the investigation into how the Chinese obtained U.S. nuclear secrets,[180] but the investigation was already in deep trouble before Dr. Lee's name became public.

Reopening the W–88 Investigation

Before turning to the criminal case against Dr. Lee, it is appropriate to make a comment about the status of the investigation into the loss of the W–88 information, the matter at the heart of the DOE's AI and the FBI's investigation from 1996 to 1999. The September 1999 decision by the FBI and the DOJ to expand the investigation of suspected Chinese nuclear espionage [181] is puzzling, primarily because it should have happened long ago.

In an October 1, 1999 letter, Attorney General Reno and FBI Director Freeh explained the rationale for reopening the case:

''Our decision to take this action in regard to the investigation into the compromise of U.S. nuclear technology is the result of two separate inquiries. First, there were investigative concerns raised by the FBI Albuquerque field office that began to develop in

November, 1998, regarding deficiencies in the DOE Administrative Inquiry. Second, after questions were raised by Senate Governmental Affairs Committee staff, we started to re-examine flawed analysis in the conclusions drawn in the DOE Administrative Inquiry.''[182]

This letter is significant on several fronts. First, it represents the beginning of a top level assault within DOJ and FBI on the AI as an explanation for why the W–88 investigation had been bungled. The reference to concerns in the Albuquerque office in November 1998 is misleading all—of the documents coming out of Albuquerque in 1998 were focused on getting FISA coverage on Dr. Lee. The documents did contain acknowledgment that somewhere in the neighborhood of 250 personnel per year had access to the W–88 information, which was more than had been previously believed, but the case agent nevertheless pressed for a FISA. It is simply not accurate to portray the November 1998 documents as raising questions about the AI as a basis for investigating Dr. Lee.

Subsequent documents from Albuquerque did raise concerns about the AI. One of the worst in this regard is the January 22, 1999 memorandum which essentially clears Dr. Lee. It says:

''A review of the pertinent questions asked in the [December 23, 1998] polygraph exam showed that Lee did not pass classified information to a foreign intelligence service. The polygraph charts and other documentation relating to the examination were made available to FBI AQ by DOE on 01/22/1999 . . .''[183]

In a section titled ''SAC ANALYSIS'' David Kitchen wrote that ''based on FBI AQ's investigation it does not appear that

Lee is the individual responsible for passing the W–88 information.'' At that point, FBI–AQ had done remarkably little investigation. The lead case agent had requested a FISA in November 1998, but had been overruled. By December, the DOE jumped into the investigation in response to the Cox Committee hearings and gave Dr. Lee a polygraph. Based on nothing more than a supposedly passed polygraph—the results of which Albuquerque received on the same day it was writing the memo and could not have—analyzed and an interview on January 17 (during which, according to Director Freeh, Dr. Lee provided new information about his relationships with Chinese scientists), the SAC Kitchen was prepared to shut down the investigation. This is nothing short of outrageous.

Was it mere coincidence that in his ''Dr. Lee's not guilty memo'' Kitchen took aim at the AI, which contained the very allegations that were the subject of testimony before the Cox Committee? The January 22, 1999 memo does not even address the allegations, from 1994, that Dr. Lee had helped the Chinese with codes and software, yet Mr. Kitchen is prepared to shut down the investigation. Any comments from Mr. Kitchen regarding flaws in the Administrative Inquiry must be viewed in the context of the Albuquerque division's bungling of the Kindred Spirit investigation.

Another significant result of the decision to reopen the W–88 investigation, and to do so based on the supposedly faulty analysis in the AI, has been to put FBI Assistant Director Neil Gallagher on the spot based on his testimony to Congress. In a November 10, 1999 letter on the question of why the investigation was reopened, he acknowledged that when discussing the DOE's Administrative Inquiry (AI) during his June 9, 1999, testimony before the Governmental Affairs Committee,[185] he stated that he ''had full credibility in the report,'' had ''found nothing in DOE's AI, nor the conclusions drawn from it to be erroneous,'' and stated there is a ''compelling case made in the AI to warrant focusing on Los Alamos.'' [186]

As a result of further inquiry, however, Mr. Gallagher now has reason to question the conclusions of the AI. He cites an August 20, 1999, interview by FBI officials of one of the scientists who participated in the technical portion of the AI, in which the scientist ''stated that he had expressed a dissenting opinion with respect to the technical aspects of the AI,'' and points out that the statement of this scientist is ''in direct conflict with the AI submitted to the FBI because the AI does not reflect any dissension by the 'DOE Nuclear Weapons Experts.' '' [187]

A General Accounting Office investigation of Mr. Gallagher's comments regarding the AI later concluded that his testimony had been inaccurate and misleading because he had ample opportunity to know and should have known that documents created by the Albuquerque office of the FBI raised questions about the FBI in late 1998 and early 1999.[188]

In his November 1999 letter, Mr. Gallagher could also have mentioned the draft of the July 9, 1999 document prepared by the Albuquerque division, ''Changed: FBI–DOE National Laboratory Assessment. . . .'' Had he done so, he would have reported that:

''Albuquerque is of the firm opinion that the AI should have been used only for investigative assistance during the initial portion of the 'Kindred Spirit' inquiry, and that a more in-depth and comprehensive analysis of the relevant issues/facts should have been continued through the course of the investigation.'' [189]

A subsequent draft of the same document lists half a dozen reasons why the AI was flawed. The document says that the espionage could have been done by a network of sources, the travel analysis was incomplete, the strategic opinions were preliminary, there had been a disagreement over the extent of the W–88 information compromise, the Lees had been doing things at the behest of the Government, and finally, ''. . . the AI was extremely confusing and self contradictory in reporting its conclusions . . .'' [190]

This is a classic case of too little too late, and it raises questions as to whether the FBI's assault on the AI was intended to get an investigation back on track or to spread the blame for a bungled investigation.

The delay by DOJ and the FBI until September 1999 is perplexing since five governmental reports had concluded, with varying degrees of specificity, that the losses of classified information extended beyond W–88 design information and beyond Los Alamos:

(1) the classified version of the Cox Report (January 1999);

(2) the April 21, 1999 damage assessment by Mr. Robert Walpole, the National Intelligence Officer for Strategic and Nuclear Programs; [191]

(3) the unclassified version of the Cox Committee Report (May 25, 1999);

(4) the Special Report of the President's Foreign Intelligence Advisory Board (June 1999); and

(5) the Special Statement by Senators Thompson and Lieberman (August 5, 1999)

All of these reports gave FBI and DOJ ample evidence that further investigation was necessary. For example, the Cox Committee report states flatly that ''the PRC stole classified information on every currently deployed U.S. inter-continental ballistic missile (ICBM) and submarine-launched ballistic missile (SLBM).[192] Tellingly, the Cox Committee notes that ''a Department of Energy investigation of the loss of technical information about the other five U.S. thermonuclear warheads had not begun as of January 3, 1999 . . .'' and that ''the FBI had not yet initiated an investigation'' as of that date.[193] Thus, the failure to reopen the investigation into the loss of W–88 design information much sooner, or to even initiate an investigation of the other losses, simply continued that pattern of errors.

The Prosecution of Dr. Lee

Two weeks[194] after Dr. Lee was fired from LANL, investigators discovered a notebook in his X–Division office containing a one-page computer-generated document showing the files in the ''kfl'' directory Dr. Lee had created on the unclassified portion of common file system.[195] When it was discovered that many of these files were highly classified, the FBI began a criminal investigation of Dr. Lee which led to his indictment, arrest and pretrial incarceration beginning on December 10, 1999.

Almost from the moment Dr. Lee was taken into custody, his attorneys protested the strict conditions of confinement and worked to secure his release under some combination of home detention and electronic monitoring. Judge James Parker, who presided over much of the case, repeatedly urged the government to relax the conditions of confinement, but the government steadfastly argued against releasing Dr. Lee, even under strict monitoring, until September 13, 2000. On that date, the government entered into a plea agreement with Dr. Lee under which he would plead guilty to a single felony count of mishandling government secrets and go free immediately in exchange for a promise to explain what happened to the missing tapes.

FBI Director Louis Freeh issued a statement on September 13, 2000, explaining the government's decision to reach the plea agreement. In relevant part, the statement said:

''In this case, as has often happened in the past, national security and criminal justice needs intersect. In some cases, prosecution must be foregone in favor of national security interests. In this case, both are served.

''As the government indicated previously, the indictment followed an extensive effort to locate any evidence that the missing tapes were in fact destroyed, and repeated requests to Dr. Lee for specific information and proof establishing what did or did not happen to the nuclear weapons data on these tapes. None was forthcoming. The indictment followed substantial evidence that the tapes were clandestinely made and removed from Los Alamos but no evidence or assistance that resolved the missing tape dilemma. . . .

''The obligation that rests on the government is first and foremost to determine where the classified nuclear weapons information went and if it was given to others or destroyed. This simple agreement, in the end, provides the opportunity of getting this information where otherwise none may exist.'' [196]

But the sudden reversal of the government's position flabbergasted Judge Parker. During the hearing to finalize the plea agreement, he commented from the bench:

''I would like to know why the government argued so vehemently that Dr. Lee's release earlier would have been an extreme danger to the government when at this time he, under the agreement, will be released without any restrictions.'' [197]

At a later point in the hearing, the judge continued:

''What I believe remains unanswered is the question: What was the government's motive in insisting on your being jailed pretrial under extraordinarily onerous conditions of confinement until today, when the Executive

Branch agrees that you may be set free essentially unrestricted? This makes no sense to me.'' [198]

The judge was not alone in being puzzled by the government's handling of the criminal phase of the case. It is difficult to reconcile the lack of forceful action between the time the government discovered, in June 1999 at the latest, that the tapes had been created, with its December 1999 claims that the only way to safeguard the secrets on the tapes was to hold Dr. Lee virtually incommunicado. As will be discussed later in this report, the information on the tapes was extremely sensitive, but it does not necessarily follow that the pretrial confinement conditions the government demanded represent the only way to protect that information. If it was the government's judgement that protecting the information required extraordinary restrictions on Dr. Lee, then why not act as soon as the existence of the tapes was known? [199] Moreover, if the government was willing, in September 2000, to accept Dr. Lee's sworn statement as to the disposition of the tapes (to be verified by polygraph examination), why could it not have accepted a very similar offer from Mr. Holscher on December 10, 1999, the date of Dr. Lee's arrest?

The remainder of this report addresses the government's handling of: (1) the investigation of Dr. Lee from March–December 1999, (2) the pretrial confinement of Dr. Lee, and (3) the case against Dr. Lee. The subcommittee's investigation supports the following conclusions regarding these matters: (1) the information on the tapes was highly sensitive and, if anything, the government should have acted sooner than it did to find out what happened to them, (2) the government overreached in demanding such onerous conditions of confinement prior to trial, and (3) the plea agreement was an acceptable resolution to the case, one that very likely could have been had much sooner if the government had not backed itself into a corner with its aggressive tactics after December 1999.

The March–December 1999 Investigation [200]

One day after Dr. Lee was fired, the Albuquerque Division of the FBI (FBI–AQ) met with the U.S. Attorney for the District of New Mexico, Mr. John J. Kelly. The following day, Dr. Lee's lawyer, Mr. Mark Holscher, wrote to the government offering to surrender Dr. Lee's passport and asking whether Dr. Lee was a target or a subject of investigation. In this letter, Mr. Holscher also advised the government that his client intended to travel to Los Angeles for several days.[201]

On March 11, the FBI learned that another LANL employee had been asked by Dr. Lee to retrieve a box of documents from his X–Division office.[202]

After a telephone conversation between Mr. Kelly and Mr. Holscher on March 15, Mr. Holscher wrote on March 19 asking that the investigation of Dr. Lee be terminated, and requesting security clearances so that he could counsel Lee. In this letter, Mr. Holscher also noted that at least six newspapers had carried stories quoting unnamed FBI officials as saying that there was not enough information to indict, much less convict, Dr. Lee. Mr. Holscher described this information as Brady material, and said the government had no evidence that Dr. Lee had any intent to injure the United States, as would be required under the espionage statutes.[203]

On March 23, investigators discovered the ''kfl'' file listing, and reached a tentative conclusion that classified files had been maintained on the unclassified portion of the LANL computer system. That same day, Mr. Holscher wrote to Mr. Kelly protesting government leaks to the press about the case, including statements that Dr. Lee had failed to cooperate with the government and had failed a polygraph exam. Mr. Holscher pointed out that 28 CFR 50.2(b)(2) prohibits DOJ personnel from disclosing any information that ''may reasonably be expected to influence the outcome of a pending or future trial.'' [205]

Mr. Holscher also sent a letter to FBI Director Louis Freeh on March 23, demanding an investigation into case-related leaks. In a clear reference to Dr. Lee's assistance to the government in the 1980s, Mr. Holscher told Director Freeh that he had ''refrained from explaining to the press the true facts concerning the Lee's 1986 visit to China and follow-up activities that are known to the FBI,'' and requested that Director Freeh release a statement showing that Dr. Lee had cooperated with the government.[206]

On March 26, a LANL scientist assisting with the investigation told the FBI that the ''kfl'' directory had been in the open part of the common file system (CFS), that the file names in the directory suggested they were classified, and that the files had been deleted from the CFS on February 11, 1999. The scientist also told the FBI that Dr. Lee had typed up and stored in a CFS directory letters seeking employment overseas.

After a telephone conversation between the two men, Mark Holscher wrote to Robert Gorence on March 29, saying that he understood from the conversation that Dr. Lee was the subject of a grand jury investigation rather than a target.[207] The difference is significant because being the target of an investigation is more serious than merely being the subject of one.

On March 30, a draft rule 41 search warrant affidavit for Dr. Lee's home was presented to the U.S. Attorney's Office (USAO) in New Mexico. From April 1–8, personnel in Washington and the USAO worked on an affidavit for a search warrant.

During this time the FBI was pursuing a dual track, and a key meeting took place on April 7 between the FBI and representatives of the Office of Intelligence Policy and Review. Rather than moving quickly to discover the extent of the potential damage, FBI and DOJ officials continued to wrangle over whether the matter should be handled under FISA or was ''way too criminal'' for that.[208] OIPR attorneys raised their old concerns about the currency and sufficiency of the evidence against Lee, as well as new concerns about the appearance of improperly using FISA for criminal purposes and the prospect of conducting an unprecedented overt FISA search.[209] FBI officials indicated that FBI Director Freeh was ''prepared formally to supply the necessary certifications that this search met the requirements of the FISA statute—that is, that it was being sought for purposes of intelligence collection (e.g., to learn about Lee's alleged contacts with Chinese intelligence).'' [210] The draft FISA application the FBI prepared was never formally presented to OIPR, in large part because the criminal search warrant was issued.

On April 9, Attorney General Reno made the necessary certification for using FISA derived material [211] in a rule 41 search warrant, and Magistrate Judge William W. Deaton issued the warrant later that same day. The following day, April 10, Dr. Lee's home was searched, and he provided written consent to search his automobiles.

In a letter to Mark Holscher dated April 16, Mr. Kelly and Mr. Gorence made one demand and several requests. The two prosecutors demanded the return of any classified material in Dr. Lee's possession, and requested the names and addresses of the individuals with whom the Lees stayed during their March 9 to April 7 trip to Los Angeles. The prosecutors also told Mr. Holscher of their intent to issue a grand jury subpoena to Mrs. Lee regarding the 1986 and 1988 trips to the PRC, and any actions related to those trips.[212]

On April 18, LANL provided two computer reports, one which outlined the deletion of files by Dr. Lee from his open CFS directories in January and February, and another describing the earlier transfer of these files from the closed to open CFS. A week later, according to an FBI chronology, a technical expert assisting the FBI in the investigation said that the information Dr. Lee had downloaded would not be sufficient for a foreign power to build or duplicate U.S. weapons, but that ''the files would significantly enhance their program and save them years of research and testing.'' [213]

On April 30, a LANL computer security expert informed the FBI of two incidents involving Dr. Lee which showed up in a review of the Network Anomaly Detection and Intrusion Recording system, one in 1993 and another in 1997.[214] That Dr. Lee was flagged by this system in 1997, while he was under investigation, but the FBI only learned about it in April 1999 is simply inexplicable.

On May 5, the FBI was informed by a LANL scientist that a notebook recovered during the search of Dr. Lee's residence contained directions for transferring classified files to a Sun Sparc computer workstation and from there onto portable DC6150 computer tape cartridges. On May 9, a LANL computer official provided a report on how the file transfers had been accomplished.

In response to suggestions from counsel for Mrs. Lee that she might claim marital communication privilege, spousal privilege or both, Mr. Kelly and another prosecutor, Ms. Paula Burnett, wrote to Mr. Brian Sun on May 5. The prosecutors laid out the areas of proposed questioning, to include: (1) biographical information on Mrs. Lee, her husband and their children; (2) contacts the Lees have with extended family, friends or business contacts in the PRC and Taiwan; (3) cooperation with the FBI in the 1986–1988 period; and (4) her knowledge of Dr. Lee's work and any job related activity that he did at home. Focusing on the Mrs. Lee's assistance to the FBI, the prosecutors explained that:

''Not only would we ask her the details of what she was asked to do and what she did during the time of cooperation with the FBI, but also the extent to which her husband was aware of those activities and participated in them.'' [215]

The next day, Mr. Sun responded in writing, saying that he had spoken to Mr. Holscher and felt it was appropriate for Mrs. Lee to assert the marital communications privilege and the spousal privilege. He said, however, that he might be willing to make an attorney proffer.[216]

On May 11, FBI–AQ prepared a Letterhead Memorandum on the Lee case, which was followed on May 16 by a written status report from USA Kelly to Deputy Attorney General Eric Holder and Attorney General Reno.

The next day, May 17, a LANL computer official provided a report on potential movement of files on Dr. Lee's CFS directories from LANL computers to outside computers.

The U.S. Attorney presented a prosecution memorandum on May 27, and requested guidance form DOJ because ''the Atomic Energy Act violation had never been prosecuted before.'' He anticipated difficulty showing Lee intended to harm the U.S. as a necessary element of the crime.[217] The FBI, USAO, and Criminal Division met in Washington, DC, on the same day the prosecution memorandum was presented, to discuss the case, and two days later FBI–AQ provided a written prosecutive report to USAO.

Mr. Holscher wrote on June 9, complaining that the government had not yet advised him what it wanted to discuss with Lee and had not sought to schedule a meeting. Six days later, Mr. Kelly responded that the government was considering serious charges, but ruled out espionage charges under 18 USC 794 (the most serious espionage charge), and suggested a meeting for June 21. In the letter, Mr. Kelly said that he had postponed a previously scheduled meeting so the government could complete its investigation. He further explained to Mr. Holscher:

''I did so not to inconvenience your client, but rather to insure that the interview would take place toward the conclusion of the investigation at a time when I would be able to provide meaningful information about potential charges and, in turn, your client would be motivated to provide a more complete explanation for his potentially criminal conduct. As I stated in our telephone conversation last night, that time has now come.

''You should know that I will be making a charging decision in this matter before the end of June and that the offense conduct under consideration involves various actions by your client over the last decade that collectively have compromised some of our nation's most highly sensitive and closely guarded nuclear secrets.'' [218]

At the June 21 meeting, which was attended by USAO, FBI and Criminal Division representatives, Dr. Lee's counsel asserted that he had only downloaded unclassified data onto the unsecure computer and then on to tapes. (When later confronted with evidence that Dr. Lee had, in fact, downloaded classified data onto portable tapes, counsel claimed that if Dr. Lee had done so, any such tapes had been destroyed.) The meeting was followed by a written status report to the DAG and the AG the following day.

In the interim, on June 15, the FBI learned that Dr. Lee had asked a colleague to retrieve a box of materials that he had left in his X-Division office when he had been transferred to the T-Division. The FBI was told that the colleague had retrieved the box for Dr. Lee, but had taken the materials to LANL security, which had questions regarding some of the contents of the box.[219] The FBI chronology does not mention when the colleague had retrieved the box or what LANL security did about the contents. The absence of details raises the inference that the now-missing tapes could have been in the box, and LANL security may have passed them back to Dr. Lee without knowing what was on them. The FBI has not answered this question.

During the first week of July 1999, Dr. Lee's lawyers made written presentations to the Albuquerque USAO and the Criminal Division in Washington, each of which was designed to dissuade the government from taking action against Dr. Lee.

On July 15, a LANL scientist provided a report on the creation of Tape N, which was downloaded directly to tape in 1997. It was also during July that the government learned that one of the six tapes which had been recovered from Dr. Lee's T-Division office contained a classified file, and that two others contained deleted classified files. LANL computer officials advised the government that one tape had been cleansed of classified data in February 1999, on the unsecure computer workstation belonging to a T-Division colleague of Dr. Lee.

Three days after a meeting in Washington between the USAO and the Criminal Division, Mr. Holscher sent a letter to the government explaining that Dr. Lee had not violated the Atomic Energy Act of 1954. The letter was followed one day later, on July 27, by a meeting in Washington between counsel for Dr. Lee and the Criminal Division.

Mr. Holscher wrote again on August 2, offering to make additional factual submissions, which prompted a response from Mr. Kelly on August 4, saying the government would review anything Mr. Holscher submitted but wanted a complete explanation from Dr. Lee himself. At the same time, Mr. Kelly sent a letter to Eugene Habiger, Director of DOE's Office of Security and Emergency Operations, seeking to include in a proposed indictment of Dr. Lee information about Dr. Lee's downloading activity.

After an August 9 telephone conversation between counsel for Dr. Lee and Richard Rossman, Chief of Staff of the Criminal Division, Mr. Holscher wrote a letter on August 10 stating that Dr. Lee would not submit to any additional interviews and offering further arguments why Dr. Lee had not violated 18 USC 793.

On August 16, Criminal Division Chief of Staff Rossman wrote to counsel for Dr. Lee advising that the government had not yet made a decision whether to charge Dr. Lee, and asking for additional information (which had been discussed during the July meeting) by August 30.

Following a supplemental written presentation by Dr. Lee's counsel on August 30, Mr. Kelly wrote to Mr. Holscher on September 3 asking for information about the location and custody of the tapes from the time of their creation until the present.

On September 8, representatives of the Criminal Division, USAO, LANL and DOE met in Washington to discuss the handling of classified information in the prosecution of Dr. Lee. All of the DOE and LANL representatives concurred as to the significance of the data at issue. By October 4, DOE had prepared a draft classification guide governing issues related to Dr. Lee's illicit computer activity and the classified files involved.

On October 14, the Senate Judiciary Committee approved a resolution authorizing subpoenas relevant to the work of the Department of Justice Oversight subcommittee, including the Wen Ho Lee matter. (A second, broader resolution was authorized on November 17.[220])

On October 27, Assistant Attorney General James Robinson, Criminal Division, wrote a memo to USA Kelly recommending that Dr. Lee be prosecuted under the Atomic Energy Act of 1954.

On November 3, the Department of Justice Oversight subcommittee held its first hearing on the Wen Ho Lee case. Much of the testimony focused on the failure of the FBI to properly investigate, from 1995 to 1998, the information it had related to Dr. Lee potentially engaging in surreptitious electronic communications.

The Lee case was discussed at an National Security Council meeting on November 11, with DOE, DOJ and LANL representatives in attendance.

On November 15, a LANL scientist wrote a ''Draft of Input to Damage Assessment'' regarding the case, which was faxed to USA Kelly on November 15. At the request of the NSC, the CIA prepared a damage assessment regarding the material on the missing tapes on November 24.

The case was briefed at the White House on December 4. A September 24, 2000 Washington Post article by Walter Pincus and David A. Vise described the events leading up to and the discussion at the December 4 meeting as follows:

''The decision to prosecute Lee was made at a meeting in [Attorney General] Reno's conference room shortly before Thanksgiving. Despite lingering question's about Lee's motives, according to participants, there was unanimity among the federal prosecutors from New Mexico and their superiors in Washington that the government should bring a massive, 59–count indictment against Lee using the Atomic Energy Act. Indeed, officials in Washington had decided to charge Lee with intent to injure U.S. national security and (not ''or'') to aid a foreign adversary.

''Crossing a final hurdle, Reno called a meeting of senior national security officials in the White House Situation Room on Dec. 4, 1999, to explain how much classified information prosecutors were prepared to reveal in court. In addition to Reno, Kelly, Freeh, and Richardson, those present included national security adviser Samuel R. ''Sandy'' Berger, CIA Director George J. Tenet and deputy defense secretary John J. Hamre.

''Robert D. Walpole, the national intelligence officer for strategic and nuclear programs, began the meeting with a formal assessment that the loss of the data downloaded by Lee would be a serious blow to national security

''The meeting ended after Reno offered her assurance that prosecutors were prepared to drop the case immediately if the judge were to grant a motion, sure to come from the defense, that the data downloaded by Lee had to be introduced, in full, in open court.'' [221]

On December 7, the Department of Justice Oversight subcommittee sent letters requesting testimony in a closed hearing from nine FBI witnesses, including two of the case agents, FBI General Counsel Larry Parkinson, Albuquerque Special Agent in Charge David Kitchen, Assistant Director for National Security Neil Gallagher, and other case supervisors and managers. The hearing, scheduled for December 14, was to explore the circumstances of the December 23, 1998 polygraph and the relationship between the government and the Lees.

On December 8, as required by statute, the Attorney General sent letters to Energy Secretary Richardson and USA Kelly approving charges against Dr. Lee under the Atomic Energy Act of 1954. That same day, Mr. Kelly spoke to Mr. Holscher by phone, telling him that indictment was imminent and asking for information about the missing tapes. At some point in late 1999, prior to the indictment, Mr. Kelly told Mr. Holscher that the case might be resolved without an indictment and advised Mr. Holscher to look at the latter sections of 18 USC 793.

Although Mr. Holscher faxed a letter at 8:24 a.m. (Pacific Time) on December 10, offering to make Dr. Lee available for a polygraph by a mutually agreeable polygrapher to verify that Dr. Lee did not mishandle the tapes or provide them to a third party, Dr. Lee was indicted and arrested later that same day.

Also on December 10, FBI Director Freeh wrote to request that I ''delay hearings on any aspect of this investigation until the conclusion of the current criminal proceedings resulting from the indictment handed down today.'' [223] In explaining why it was necessary to delay subcommittee hearings, Director Freeh said:

''In my view, the potential that your hearings could inadvertently interfere with the prosecution is substantial. Subcommittee hearings at this time risk impacting upon the Government's ability to successfully prosecute Mr. Lee by creating issues that may not presently exist. Moreover, it is critical for our national security that we have every opportunity to learn as much as we can from Wen Ho Lee in a carefully controllable setting. Given the gravity of the allegations and charges, and the potential opportunities that could be lost by hearings, I respectfully ask that you not go forward at this time. I hope you will agree that to do otherwise poses a substantial risk not only to the prosecution but to the Government's ultimate ability to discover the full extent of the damage done.'' [224]

When Director Freeh met with Senator Torricelli and me on December 14, he made the same arguments. The subcommittee agreed to withhold hearings until the case was resolved, which occurred on September 13, 2000, with the acceptance of the plea agreement.

With the inexplicable exception of never seeking electronic surveillance on Dr. Lee, the chronology presented here shows a thorough and methodical investigation. The discovery that Dr. Lee had created his own portable nuclear weapons data library must, in large measure, be credited to the extraordinary level of effort and skill on the part of the investigators from the FBI and the DOE. In Senate testimony, Director Freeh said that the investigation had required the ''interview of over 1,000 witnesses, review of 20,000 pages of documents in English and Chinese, and the forensic examination of more than 1,000 gigabytes containing more than one million computer files . . .'' [225] Any assessment of the investigation must acknowledge the vast amount of work involved in discovering Dr. Lee's illegal computer activity after he tried so diligently to erase any traces of what he had done. In this regard, the government personnel should be commended.

There are, however, two areas for concern [226] related to the conduct of the March–December 1999 investigation. The first is the delay from the time the existence of the tapes was known, which occurred at the latest in June, and the time Dr. Lee was indicted in December. The chronology provided by the Department of Justice shows continuing activity on the part of the government, and multiple contacts with Dr. Lee's attorneys seeking information about the fate of the tapes, but nothing commensurate with its subsequent declarations in court that the only way to keep the information from falling into the wrong hands, where it could change the global strategic balance, was to hold Dr. Lee in very strict pretrial confinement. In responding to a question about this delay, Director Freeh testified, ''This was an extremely complex investigation and prosecutive process. It could not have been brought, in my view, fairly and accurately before it was.'' [227]

The second great concern is that the FBI did not seek electronic surveillance of Dr. Lee during this period.[228] In view of the government's later pleadings that Dr. Lee could, in effect, upset the global strategic balance merely by saying something as seemingly innocuous as ''Uncle Wen says hello,'' it is difficult to comprehend why the government never sought electronic surveillance in an effort to discover the whereabouts of the missing tapes. In the December 1999 detention hearings, the U.S. Attorney, John Kelly, suggested that if Dr. Lee still had the tapes, he could send a signal to a foreign intelligence service to extract him. If he wasn't in custody ''then we would be dealing with a situation in which an individual not in custody is going to be snatched and taken out of the country.'' [229] As early as April 30, 1999, the FBI had been told by a LANL scientist that if the files Dr. Lee downloaded were given to a foreign power, they would have the ''whole farm,'' the ''crown jewels'' of the U.S. program which had been obtained through decades of effort by the U.S.[230]

If the government felt his communications were such a potential threat, why was there never an effort to ascertain with whom and about what he was communicating during the March–December 1999 period? This lapse severely undercuts the government's later arguments that the harsh conditions of confinement were only to protect the downloaded information.

The Pretrial Confinement of Dr. Lee

After his arrest on December 10, 1999, and a detention hearing before U.S. Magistrate Judge Don Svet on December 13, 1999, Dr. Lee was placed in pretrial confinement in the Santa Fe County Correctional Facility. The conditions of his incarceration, including the Special Administrative Measures (SAM) taken to prevent him from possibly communicating to others about the location of the tapes or the material thereon, have received a great deal of attention from Dr. Lee's attorneys, the press, and eventually, Congress.

The government's decision to hold Dr. Lee under such strict conditions raises a number of important points. Defendants are presumptively entitled to pretrial release except in certain circumstances specified in statute. Because none of the ordinary conditions for pretrial confinement—for example, when a violent criminal is captured after a killing spree—applied to Dr. Lee, Judge Parker explained in his order that:

''Only after a hearing and a finding that ''no condition or combination of conditions will reasonably assure the appearance'' of the defendant and the safety of the community, can a judge order a defendant's pretrial detention. 18 USC 3142(e). A finding against release must be ''supported by clear and convincing evidence.'' 18 USC 3142(f).'' [231]

In reaching a decision on pretrial detention, the judge was required to take into account the available information regarding: (1) the nature and circumstances of the offense charged, (2) the weight of the evidence against the person, and (3) the history and characteristics of the person.[232]

At a series of detention hearings from December 13 through December 29, before two different magistrates, the government painted a stark picture of Dr. Lee's conduct. A December 23, 1999 filing by Mr. Gorence summarized the government's position:

''Lee stole America's nuclear secrets sufficient to build a functional thermonuclear weapon. Lee absconded with that information on computer tapes, seven of which are still missing. Those missing tapes, in the hands of an unauthorized possessor, pose a mortal danger to every American. The government does not know what Lee did with the tapes after he surreptitiously created them. Despite previous denials, Lee now admits that he created the tapes—tapes which the government will establish contain an entire thermonuclear weapon design capability. The risk to U.S. national security is so great if Lee were to communicate the existence, whereabouts, or facilitate the use of the tapes that there is no condition or combination of conditions that will reasonably assure the safety of this country if Lee is released.'' [233]

The Atomic Energy counts with which Dr. Lee had been charged required that the conduct at issue be done with intent to injure the United states. On this score, the government argued that:

''Lee's secretive and surreptitious actions to gather the classified TAR files, to downpartition and download the files on to tapes, to lie to colleagues to facilitate his actions, and then his subsequent deletions to cover his tracks all evidence an intent to injure the United States. Lee's intent to injure the United States also can be inferred by the additional testimony that the government will present to this Court that Lee, in taking complete thermonuclear weapon design capability, stole information that was not in any way related to his duties as a hydrodynamicist. The United States also will offer additional testimony that there was no work related reason to ever move the classified information that Lee moved and downloaded on to computer tapes from the secure to the unsecure computing environment. These facts evidence an intent to injure the United States by depriving it of exclusive control of its most sensitive nuclear secrets.'' [234]

The government also argued that the only way to safeguard the information on the tapes Dr. Lee created was to hold him in detention, with special restrictions on his communications. As described in the government's motion on December 23, these measures included segregation from other prisoners; limiting his visitors to immediate family members and his attorneys, having an FBI agent monitor all family visitations, denial of access to a phone except to call his attorneys, and mail screening.[235]

After the required hearings, Judge Parker issued his order on December 30, 1999, in which he concluded that ''at this time there is no condition or combination of conditions of pretrial release that will reasonably assure the appearance of Dr. Lee as required and the safety of any other person, the community, and the nation.'' [236] He then addressed the nature of the alleged crimes, the weight of the evidence, and the characteristics of the defendant. Judge Parker noted that while the offenses charged fell short of espionage, they were ''quite serious and of grave concern to national security.'' [237] The judge also described the surreptitiousness with which the tapes had been created, citing the government's contention that Dr. Lee had misled a T-Division employee by claiming to want to download a resume to tape.[238] In addressing the weight of the evidence against Dr. Lee, Judge Parker noted that the government had presented direct evidence of the downloads, which was the relevant conduct at issue. With regard to the intent to injure, which was also an element of the charged offenses, he noted that:

''although the Government did not present any direct evidence regarding Dr. Lee's intent to harm the United States or to advantage a foreign nation . . . the Government did present circumstantial evidence of Dr. Lee's intent to violate these provisions of the Atomic Energy Act and the Espionage Act.'' [239]

With regard to the characteristics of the defendant, Judge Parker made points on both sides, noting that Dr. Lee had ''lied to LANL employees and to law enforcement agents and has consciously deceived them about the classified material that he had put on the tapes and about contacts with foreign scientists and officials.'' [240] On the other hand, the judge noted Dr. Lee's longstanding ties to the community, and said, ''Aside from Dr. Lee's deceptive behavior regarding the issues raised in this case, his past conduct appears to have been lawful and without reproach.'' [241] And, finally, the judge concluded that the government had presented ''credible evidence showing that the possession of information by other nations or by organizations or individuals could result in devastating consequences to the United States' nuclear weapon program and anti-ballistic nuclear defense system.'' [242]

In concluding, the judge stated:

''With a great deal of concern about the conditions under which Dr. Lee is presently being held in custody, which is in solitary confinement all but one hour a week when he is permitted to visit his family, the court finds, based on the record before it, that the Government has shown by clear and convincing evidence that there is no combination of conditions of release that would reasonably assure the safety of any person and the community or the nation. The danger is presented primarily by the seven missing tapes, the lack of an explanation by Dr. Lee or his counsel regarding how, when, where, and under what circumstances they were destroyed, and the potentially catastrophic

harm that could result from Dr. Lee being able, while on pretrial release, to communicate with unauthorized persons about the location of the tapes or their contents if they are already possessed by others. Although Dr. Lee's motion to revoke Magistrate Judge Svet's detention order is denied at this time, changed circumstances might justify Dr. Lee renewing his request for release. If, for instance, Dr. Lee submits to a polygraph examination . . . and the results of the exam allay concerns about the seven missing tapes, Dr. Lee's request for pretrial release can be reconsidered in a significantly different light.'' [243]

The judge's final statement before denying Dr. Lee's motion for pretrial release was an admonishment to the government ''to explore ways to loosen the severe restrictions currently imposed upon Dr. Lee while preserving the security of sensitive information.'' [244]

Having lost the initial fight for pretrial release, Dr. Lee returned to jail where the conditions of his confinement became a rallying point for his defenders. The following excerpt is taken from an Internet site established and maintained by Dr. Lee's supporters:

''He was arrested on December 10, 1999 and is now put in solitary confinement in a cell in a New Mexico jail 23 hours a day. He is allowed only one hour of visit a week from his immediate family. He is shackled any time he is out of his cell, at his waist, his ankle and his wrist except when he is meeting with his lawyers (and even then he must wear an ankle chain). A chain around his belly connecting to his handcuff prevents him from raising his hand above his head. We were told that two U.S. Marshals with machine guns accompanied him whenever he goes within the confine of the prison and a 'chase car' with armed Marshals follows Dr. Lee when he is moved from Santa Fe to Albuquerque and back. This is highly unusual and we questioned that other prisoners received the same treatment. The lawyer said Lee was kept separate from other prisoners during his hour-long exercise period. He is finally allowed to speak Mandarin with his family but with two FBI agents listening in. We were told by his families that Dr. Lee was always in shackles and chain even during their one hour weekly meeting. We were also told that the food provided by the prison system was inappropriate to Dr. Lee because he has long adopted to live on a non red meat diet after his colon cancer surgery several years ago.'' [245]

The government, however, portrayed Dr. Lee's conditions of confinement as a matter of necessity to protect the classified information he had downloaded to portable tapes. In a series of memoranda written by Lawrence Barreras, Senior Warden of the Santa Fe County Correctional Facility, on December 10 and 14, 1999, and January 4, 2000, the terms of Dr. Lee's confinement were outlined in detail. Specifically, Dr. Lee's confinement consisted of 24 hour supervision by a rotation of guards, permission to speak only with his attorneys and immediate family members (his wife, daughter and son) and in English only, non-contact visits from his immediate family members limited to one hour per week, no personal phone calls, and that he remain secured in his cell 24 hours a day.[246] Further, Dr. Lee was to remain in full restraints (leg and hand irons) anytime he was to be out of his cell being moved from one location to another.[247]

As previously noted, Dr. Lee's lawyers protested his conditions of confinement almost from the beginning. In a December 21, 1999 letter to Mr. Kelly and Mr. Gorence, lead defense attorney Mark Holscher said:

''Apparently at the request of the Department of Justice and the FBI, Dr. Lee's jailers have barred his family from visiting him for more than one hour a week. In addition, the agents have demanded that my client and his wife speak only English and do so in the presence of a federal agent.

''Please provide me immediately with a written description of the conditions that you have placed on Dr. Lee's imprisonment, and a statement of the legal authority for these draconian conditions.'' [248]

The legal authority to which Mr. Holscher referred was at that time still being assembled. Title 28 of the Code of Federal Regulations, section 501.2, provides that upon direction of the Attorney General, special administrative measures may be implemented that are reasonably necessary to prevent disclosure of classified information, upon written certification . . . by the head of a member agency of the United States intelligence community that the unauthorized disclosure of classified information would pose a threat to the national security and that there is a danger that the inmate will disclose such information. Energy Secretary Bill Richardson sent a letter to the Attorney General on December 27, 1999, in which he said:

''In my judgment, such a certification is warranted to enable the Department of Justice to take whatever steps are reasonably available to it to preclude Mr. Lee, during the period of his pretrial confinement, any opportunity to communicate, directly or through other means, the extremely sensitive nuclear weapons data that the indictment alleges Mr. Lee surreptitiously diverted to his own possession from Los Alamos National Laboratory (LANL). I make this certification at the request of the U.S. Attorney for the District of New Mexico, John Kelly, and upon the recommendations and evaluations of the Director of the Federal Bureau of Investigation and DOE's Director of Security and Emergency Operations, Eugene Habiger.'' [249]

By January 6, the Department of Justice had reviewed the administrative segregation procedures at the Santa Fe County Correctional Facility and determined with some additional measures, the standard segregation policy would adequately confine Dr. Lee. In a letter to Warden Lawrence Barreras, the local U.S. Marshal, John Sanchez described ten additional measures that were necessary:

1. Mr. Lee is to be kept in segregation until further notice (single cell).

2. Mr. Lee is not to have contact with other inmates at anytime.

3. All outgoing mail EXCEPT LEGAL MAIL will be screened by the FBI.

4. Mr. Lee will not be permitted personal telephone calls.

5. Mr. Lee will be allowed to place collect telephone calls to attorneys of record [Mr. John Cline and Mr. Mark Holscher].

6. Mr. Lee will be allowed contact visits with his attorneys only.

7. Mr. Lee will be allowed non-contact visits with immediate family members. . . . The FBI must be on site to monitor each visit. Visits will not be allowed unless an FBI agent is present.

8. Visitors are to be restricted to Attorneys of Record and immediate family.

9. Any changes to Mr. Lee's conditions of confinement will be authorized by USMS [U.S. Marshals Service] personnel only.

10. Mr. Lee is NOT TO BE REMOVED FROM THE FACILITY BY ANYONE UNLESS AUTHORIZED BY THE USMS.[250]

That same day, another of Dr. Lee's attorneys, Mr. John Cline, wrote to Mr. Gorence expressing the view that the conditions of confinement were unlawful. He requested three specific changes, including: (1) two hours outdoors every day, (2) permission for Dr. Lee to have a television, radio, and a CD player in his cell and to receive access to newspapers, and (3) a daily shower.[251]

A January 12, 2000 memorandum to the Attorney General from Principal Associate Deputy Attorney General Gary Grindler demonstrates that at least some of the concerns of Dr. Lee's lawyers were taken to the highest reaches of the Justice Department. The memo notes that the Attorney General had ''advised that some individuals have expressed concern about Dr. Lee's access to exercise,'' and explains that the order for Special Administrative Measures that she was being asked to sign ''does not limit Dr. Lee's access to exercise. According to the Santa Fe County Jail rules, Dr. Lee will be limited to one-hour per day of exercise, as are all administrative segregation prisoners.'' [252]

On January 13, 2000, the Attorney General formally authorized the special administrative measures for a period of 120 days in a memorandum to John W. Marshall, the Director of the Marshals Service. The conditions of confinement were as previously described. It should be noted, however, that from December 10, 1999 until the date the Attorney General signed the order on January 13, 2000, any special conditions of confinement imposed on Dr. Lee would have been without proper authority. If federal regulations require certifications from agency heads and the Attorney General, it can only be presumed that restrictions such as those imposed on Dr. Lee would not be properly authorized until all the certifications were in place. It is troubling that the government was not better prepared to make the necessary certifications in a timely fashion.

As the end of the initial 120 days approached, the Attorney General received a new letter from Secretary Richardson on May 4, in which he expressed his support for continuing the SAM. However, he mentioned the conditions of Dr. Lee's pretrial confinement, saying:

''At the same time, I want to emphasize my concern, that to the extent consistent with protecting the sensitive weapons information to which the indictment of Dr. Lee pertains, Dr. Lee's civil rights as a pre-trial detainee should be honored. I understand that, in response to a request by Dr. Lee's counsel, the Department of Justice has arranged for a translator to be present when he speaks with his family so that he can speak Chinese. I further understand that arrangements have been made to permit him to visit with his family on weekends, to have access to Los Alamos National Laboratory with his lawyers under appropriate safeguards so that he can prepare his defense, and to have access to a radio and reading material of his choice, as well as a reasonable period of exercise every day. Finally, I understand that the conditions of his confinement are in no respect more restrictive than those of others in the segregation unit of the detention facility, where he is confined specifically to protect against further compromise of classified information. Based on this information, I am satisfied that his civil rights are being adequately protected.'' [254]

At about the same time the FBI SAC in Albuquerque, David Kitchen, wrote to the new U.S. Attorney in New Mexico, Norman Bay, and expressed his unequivocal support for maintaining the SAM in place. Agent Kitchen expressed his ''firm conviction that any loosening of the SAM would enable Dr. Lee to communicate with an agent of a foreign power regarding the disposition or usage of the materials contained in the seven missing tapes.'' [255]

In July, the new lead prosecutor on the case, George Stamboulidis, arranged to have restraints removed from Dr. Lee during his scheduled recreation times,[256] but this did not occur without some difficulty.[257]

An August 1, 2000 letter from Warden Barreras to Mr. Stamboulidis describes the final state of Dr. Lee's confinement:

''In response to your letter date July 30th, 2000 inmate Wen Ho Lee began recreating without restraints on July 18th, 2000 at 8:30 a.m. As of August 5th, 2000 he is also allowed participation in the recreation yard 7-days a week for a period of 1-hour per day.

''In reply to inmate Wen Ho Lee's housing conditions: inmate Wen Ho Lee is permitted to have a radio in his cell, this gives him the ability to listen to news programs; he receives reading materials per the SAM guidelines.

''In addition, an exception to the rule was made to grant inmate Wen Ho Lee visits on Saturdays as opposed to the regular Friday schedule: this was done in order to accommodate his family. Supervisors are the only staff that are assigned to oversee his escort and visit. Inmate Wen Ho Lee also receives extra fruit at dinnertime, daily.'' [258]

On September 7, 2000, U.S. Attorney Norman Bay requested that the Attorney General continue the SAM, which had last been extended on May 12. In his letter, he outlined recent developments in the case, including Judge Parker's order granting Dr. Lee's renewed motion for pretrial release on August 24. Mr. Bay informed the Attorney General of the government's motion to stay the request of that order, and noted that the Tenth Circuit had stayed Judge Parker's order pending further review. Mr. Bay concluded his request to the Attorney General by noting that ''nothing has changed since the special administrative measures were first imposed to reduce the risk of Lee disclosing highly sensitive classified information to an unauthorized possessor,'' and requested another 120 days of SAM.[259]

Before the Attorney General acted on the request, the government reached a plea agreement with Dr. Lee, which ended his confinement.

After the plea agreement, the conditions of Dr. Lee's confinement were widely discussed in a way that they had not been discussed before, with new allegations that a light had been left on his cell 24-hours a day, and that he had been kept in shackles an inordinate amount of time. During a series of three hearings in late September and early October 2000, Department of Justice witnesses were asked about the conditions of detention. Attorney General Reno made the point that Dr. Lee's lawyers had not previously complained about the leg-restraints and that no one had ever mentioned the light before.[260] Mr. Bay explained that the light in question was ''a dull blue light, kind of like a night light, in Dr. Lee's room . . . [used] to make sure that if someone walked by and looked inside his cell that they could make sure that he was there and that he was doing okay.'' [261]

The Attorney General also read into the record a memorandum from Raymond L. Cisneros, the local sheriff in Santa Fe who served as the jail monitor. The memorandum, dated March 10, 2000, was to the county manager and explained that Mr. Cisneros had met with Dr. Lee after receiving phone calls from unknown persons claiming that Dr. Lee was not being treated well. According to the memo:

''Other than being incarcerated, he had no complaints. The staff was treating him very well. He singled out Warden Barreras and Deputy Warden Romero as treating him great. . . . His only request was for additional fruit at the evening meal, which I relayed to Warden Barreras.

''I gave him my business card and told him to contact me through his attorney if there was any mistreatment of other issues regarding his incarceration. . . . Because of the high profile nature of this case, I felt it was necessary to either confirm or disprove the allegations. Mr. Lee was very surprised about the calls and stated, 'I haven't complained to anyone about the jail because I am being treated very well.' '' [262]

Realizing that the hearings had not provided all the necessary information on the confinement issue, the DOJ later provided several hundred pages of relevant documents. Much of the discussion above has been drawn from these documents. The Department also sent a letter, dated January 20, 2001, which provided additional detail on the matter. Assistant Attorney General Robert Raben explained that the manner in which Dr. Lee had been treated flowed ''directly from a policy that sets bright line rules that apply to all prisoners under defined circumstances. These bright line rules are, in the Department's view, better than an alternative that would require detention facility personnel to make *ad hoc* decisions in each individual prisoner's case. A rule allowing such discretion would invite both favoritism and abuse.'' [263] Mr. Raben went on to explain that, because there is no federal detention facility in New Mexico, Dr. Lee had been housed at the Santa Fe County Detention Facility, under its administrative segregation policies, with the additional condition that he be allowed no unmonitored communications. According to Mr. Raben:

''While housed in the Santa Fe County Detention Facility, Dr. Lee was subject to all of that facility's other regulations for all prisoners in administrative segregation in addition to the ban on unmonitored communications. One of those requirements is that prisoners in administrative segregation must be in ''full restraints'' (handcuffs, waist chains, and leg irons) whenever they are outside of their cells within the facility, including during exercise periods. Dr. Lee was not in restraints while in his cell. In July 2000, after the issues was raised by Dr. Lee's attorneys, the restraints policy was modified uniquely for Dr. Lee so that he, unlike others in administrative segregation could exercise without restraints.'' [264]

Mr. Raben further explained that Dr. Lee was transported for all court appearances and meetings with his attorneys by the U.S. Marshals, under standard procedures, which included ''full restraints'' during transport, and at all times except when Dr. Lee was in a holding area cell administered by the Marshals Service and when he was meeting with his attorneys. During such meetings, the leg irons remained on, but Mr. Raben said that Dr. Lee's attorneys had never objected to that procedure.[265]

After reviewing the documents and testimony on the conditions of Dr. Lee's pretrial confinement, it is clear that the reasonableness of the government's actions turns on the question of whether or not it was really necessary to restrict his ability to communicate. The government was convinced that the only way to protect the national security was to prevent Dr. Lee from communicating. Having taken that position, the remainder of the government's actions were simply to further the objective of limiting Dr. Lee's ability to communicate. Although some of the government's responses were not as prompt as one might like—for example, taking more than a month to get the initial SAM guidelines signed by the Attorney General—the government seems to have been generally responsive to requests from Dr. Lee's attorneys.

That is not to say that the government's actions were appropriate, however, because the government has not made a showing as to why it was necessary to hold Dr. Lee under such strict terms of confinement in the first place. If he had not communicated the whereabouts of the tapes to a third party in the period prior to his arrest, what made the government believe he would do so from jail? None of the documents, testimony or other information available to the subcommittee provides a compelling answer to this question. While the government may have believed such harsh conditions were necessary, they have not made a convincing case. Judge Parker was not convinced by the government's arguments, and granted Dr. Lee's renewed motion for pretrial release on August 24, 2001. In his remarks at the plea hearing, Judge Parker expressed his sentiments, telling Dr. Lee that ''since by the terms of the plea agreement that frees you today without conditions, it becomes clear that the Executive Branch now concedes, or should concede, that it was not necessary to confine you last December or at any time before your trial.'' [266]

The Case Against Dr. Lee

Had the government not reached a plea agreement with Dr. Lee, the case was scheduled for trial in late November 2000. When the government settled, many questioned the appropriateness of the plea agreement because it seemed to be in such stark contrast with what the government had argued all along. To ascertain whether the plea agreement was appropriate, it is first necessary to examine the government's case.

Although the government would likely have won a conviction because many elements of the charged conduct were not disputed Dr. Lee could not credibly deny that he had made the tapes containing vast quantities of classified nuclear weapons data this would not have been an easy case. The government faced a number of obstacles, including: (1) challenges to the government's claims about the importance of the material on the missing tapes, (2) threats by Dr. Lee's attorney to take the government on a ''long, slow death march under CIPA,'' (3) claims that Dr. Lee was the victim of selective prosecution based on racial profiling, and (4) the issue of Dr. and Mrs. Lee's assistance to the government during the 1980s. None of these obstacles would have been unsurmountable. Each is discussed below.

The Importance of the Missing Tapes

As previously noted, government witnesses testified at Dr. Lee's bail hearing that the information on the tapes was the ''crown jewels'' of our nuclear secrets that could, in the wrong hands, change the global strategic balance. When Dr. Lee's lawyers renewed their motion for pretrial release in July 2000, they made a direct assault on this claim. The defense offered depositions from Dr. Harold Agnew, former Director of LANL, and Dr. Walter Goad, a Fellow Emeritus at LANL, both of whom took issue with the government's characterization of the material on the tapes. Dr. Lee's lawyers also noted that the information in question was not classified at the highest level—Top Secret—and had, in fact, been placed in a special category called ''Protect as Restricted Data'' or PARD when Dr. Lee downloaded it.

When Judge Parker held three days of hearings in August 2000 to consider Dr. Lee's renewed motion for pretrial release, he got testimony from Dr. John Richter that the information on the tapes was 99% unclassified.[267] The government was also forced to acknowledge that the information in question was classified as Secret Restricted Data (SRD) rather than Top Secret Restricted Data (TSRD), and could therefore be sent through certified or registered mail, as demonstrated in the following excerpt from the hearing on August 17:

Mr. CLINE: SRD, unlike TSRD, can be, for example, double wrapped and sent by registered mail from one classified location to another, can it not?

Dr. ROBINSON: That is true today, yes.

Mr. CLINE: And TSRD can not be sent by mail?

Dr. ROBINSON: That is correct.

Mr. CLINE: . . . . the information that we are talking about here, which has been described as the crown jewels, could be double wrapped and sent by registered mail from Washington, D.C. to New Mexico, correct?

Dr. ROBINSON: Correct.[268]

The defense team also noted that the material Dr. Lee had downloaded fell into a category called Protect As Restricted Data, or PARD, when he made the tapes. The definition of PARD, taken from the U.S. Department of Energy Office of Security Glossary of Terms, is as follows: A handling method for computer-generated numerical data or related information which is not readily recognized as classified or unclassified because of the high volume of output and low density of potentially classified data.[269]

As described in the judge's order for Dr. Lee's pretrial release, the effect of the expert opinions offered by Drs. Agnew, Goad and Richter, the defense's showing that the material was SRD as opposed to TSRD, and that the material was marked as PARD when it was downloaded was to ''show that the information Dr. Lee took is less valuable than the government had led the Court to believe it was and less sensitive than previously described to the Court. . . .'' [270]

Judge Parker also raised a question as to whether the missing tapes contained ''all the information needed to build a functional thermonuclear weapon.'' [271] He went on to say, ''In sum, I am confronted with radically divergent opinions expressed by several distinguished United States nuclear weapons scientists who are on opposite sides of the issue of the importance of the information Dr. Lee took.[272] The judge's findings on the sensitivity of the material on the tapes were a principal factor in his decision to order Dr. Lee's pretrial release, which he did on August 24, 2000.

When the government settled the case with a plea agreement less than three weeks later, it gave the impression that it was backing away from its claims about the importance of the material. This had the unfortunate effect of reinforcing the public perception that the government was persecuting, rather than prosecuting Dr. Lee. Like the judge, the subcommittee can only rely on the testimony of expert witnesses, but it seems that the government's witnesses made the stronger arguments in this regard.

The most concise description of the information Dr. Lee downloaded is found in the government's public filing in response to Dr. Lee's appeal of Judge Parker's initial denial of bail, the relevant portions of which are excerpted below:

''The source codes model and simulate every aspect of the complex physics process involved in creating a thermonuclear explosion. The source codes are written to design specific portions of a nuclear weapon—either the primary or the secondary.

''Although nuclear weapons source codes contain all of the physics involved in a thermonuclear weapon, the source codes themselves require ''data files''—both classified and unclassified—to run actual simulations. Data files contain all of the physical and nuclear properties of materials required for a nuclear explosion. . . . Data files become classified as SRD [Secret Restricted Data] when the properties of the materials are most directly relevant to nuclear weapons, i.e., in environments involving very high pressures and temperatures. . . .

'' 'Input decks' are mathematical descriptions of the actual geometry and materials within a nuclear device itself. In essence, an input deck is an 'electronic blueprint' of either a primary or a secondary within a nuclear weapon.

''. . . [Dr.] Lee down-partitioned and downloaded all of LANL's significant nuclear weapon primary and secondary design codes in their entirety. . . . In addition, Lee down-partitioned and downloaded ''all of the data files required to operate those codes,'' as well as multiple input decks representing actual nuclear bomb designs that ranged in sophistication from relatively simple to complex.

''. . . . For a group or state that did not have the indigenous scientific capability to do it alone, the information would represent an immediate capability to design a credible nuclear explosive. A country that had some experience with nuclear explosives could use the information to optimize its nuclear bombs. An advanced nuclear state could use the information to augment their own knowledge of nuclear explosives and to uncover vulnerabilities in the American arsenal which would help them to defeat our weapons through anti-ballistic missile systems or other means.'' [273]

At the August detention hearings, government scientists elaborated on the significance of the material and, specifically the increased importance that came from the way the files had been put together on the tapes. Dr. Paul Robinson, president of Sandia National Laboratories, testified that the tapes ''were very carefully designed to be loaded with the subroutines that would be needed for each design code to be placed right behind that design code. And so I believe they should not require a lot of additional instruction.[274] In other words, the collection of files was more than just a collection of files—it had been assembled so as to ensure that the data files called for in the codes were available at the right place, making it possible for the codes to actually run when executed.

The government also explained its rationale for claiming that the information on the tapes could change the global strategic balance. After a lengthy discussion of the technical aspects of ballistic missile defense and the challenges presented by Multiple Independently Targeted Reentry Vehicles (MIRVs), which are generally quite small, Dr. Robinson expressed his concern that the tapes Dr. Lee made could enable another nation to develop devices that would have reentry vehicles approximately the size of orange traffic cones.[275] Such small warheads would present an enormous challenge to U.S. ballistic missile defenses, even more difficult than that of defending against single warhead weapons which are larger (about the size of a minivan or small bus).

While it might be tempting to simply state that one group of scientist's arguments on this issue is most persuasive, it is not necessary to do so. One of the key witnesses who testified in support of Dr. Lee's position at the August 2000 hearings, Dr. John Richter, subsequently modified his position. The following exchange took place at an October 3, 2000 hearing before the Department of Justice Oversight subcommittee:

Senator SPECTER: Dr. Richter, you have been quoted as testifying before Judge Parker that at least 99 percent of the nuclear secrets that Dr. Lee downloaded to tapes were unclassified. Is that an accurate statement?

Dr. RICHTER: An accurate statement regarding the codes. I still maintain that. The materials properties, I do not think I was referring to that at that time, If I did say it that way then I did not mean it and I erred.[276]

Dr. Richter also acknowledged that the input decks contained important information,[277] but ultimately took the position that the loss of the information on the tapes would be ''marginally harmful, at worst.'' [278]

In evaluating Dr. Richter's opinion on the value of the information on the tapes, it is helpful to consider that ''in 1995, he was the first to suggest that the Chinese might have significant information about the W–88 warhead. Even though he eventually backed off that opinion, it helped start the investigation that led to the discovery of Dr. Lee's download and his jailing.'' [279] Dr. Richter later put his dual roles at the start and at the end of the Wen Ho Lee case in perspective for a reporter when he said, ''If I had any influence in getting him out, I figured that's a payback.'' [280]

In sum, the information on the tapes was clearly important. It does not necessarily follow, however, that the government was right to hold Dr. Lee in harsh pretrial conditions on that basis. In fact, in the August hearings, the judge was only ruling on the question of whether not Dr. Lee should remain in pretrial confinement—under conditions that were considerably harsher than he would be subjected to if he had been convicted. If the case had gone to trial, the government would undoubtedly have prevailed on the matter of whether or not the material on the tapes was important. The government's error was not in claiming the material was important, but in claiming that the only way to protect it was to hold Dr. Lee under such harsh conditions.

The Classified Information Procedures Act (CIPA) issues

CIPA establishes a framework for handling trials involving classified information, with the objective of protecting both national security information and the rights of the defendant. One of the key concepts in CIPA is the provision permitting substitutions for classified information to prevent the government from having to expose that information at trial. Rather than show the actual material at trial, the government is permitted to offer a document that conveys the same information in unclassified form. The judge presiding over the case reviews the material in question and the government's proposed substitutions. If the judge finds that the substitutions are an adequate representation of the material in question, the case goes forward. If the judge finds the government's substitutions lacking, the government can make an interlocutory appeal of the judge's ruling, meaning that the appeal is decided before the case goes forward rather than after as is the usual fashion. If the government loses a CIPA ruling, it can also simply drop the case.

Although the prosecution of Dr. Lee ended before the CIPA issues were fully tested in court, the defense clearly intended to implement a classic graymail tactic of forcing the government to dismiss the case by claiming that secret information had to be revealed in open court to guarantee their client a fair trial. According to U.S. Attorney Norman Bay:

''In late May, we met with defense counsel in this case. . . . And the defense lawyer said that he would never take a plea to any count in the indictment—that is, 'he' being Dr. Lee—and that if the Government wasn't willing to accept, the defense was going to put the United States on a, quote, 'long, slow death march under CIPA.' '' [281]

Senator Specter replied, ''Mr. Bay, if somebody had told me when I was a prosecuting attorney they were going to put me on a long, slow death march, I would say let's start walking.[282]

One of Dr. Lee's attorneys, Mr. John Cline, was the lead attorney on CIPA issues. He told the judge that using classified information in the trial: would be necessary for

proving four central defense arguments: that most of the downloaded material was already in the public domain; that some of the computer codes contained flaws that made them less useful; that the codes were related to Dr. Lee's work; and that they were difficult to use without user manuals, which were not on the tapes.'' [283]

The defense found a sympathetic ear with Judge Parker on these issues. In an order filed August 1, 2000, the judge gave the government two weeks to provide substitute language for specified classified information. He agreed with Dr. Lee (and opposed the government) as to the relevance of particular information to the defense. For example, Judge Parker said that:

''Although the parties dispute the existence or magnitude of any 'flaws' or imperfections in the various codes at issue, the Court nonetheless finds that evidence of those alleged flaws or imperfections is relevant to the Defendant's intent to secure an advantage to a foreign nation or to injure the United States. Evidence of these alleged flaws and imperfections is also relevant for use in the Defendant's cross-examination of witnesses and in the Defendant's rebuttal of Government witnesses' testimony on the issue of the sensitive nature of these codes.'' [284]

The Court delivered another blow to the Government when he ruled that:

''Evidence making a comparison of the input decks of Files 1 through 19 and Tape N to a nuclear weapons blueprint is relevant to the Defendant's intent. In addition, this evidentiary comparison is relevant to the cross-examination of witnesses and to the Defendant's rebuttal of Government witnesses' testimony on the Government's assertion that the input decks constitute an electronic blueprint of a nuclear weapon.'' [285]

Consonant with these determinations, the judge ordered the government to propose substitutions by August 14, with the defense to respond by August 21. Any issues that could not be agreed upon were to be resolved at a hearing on August 31.[286]

The government was perhaps most concerned that the argument about flaws in the codes could force an in-depth discussion of the codes in open court, something it was not prepared to do. There was also a very real concern about permitting Dr. Lee to make a comparison between an actual blueprint and the electronic version of a weapon contained in the input deck. These would have been challenges, but the government had not taken any of its appeals when it made the plea deal, and was a long way from having to cede the case on CIPA grounds.

Allegations of Selective Prosecution/Racial Profiling

Among the more sensational allegations of government misconduct in this case are charges that Dr. Lee was selected for investigation and prosecution based on his ethnicity. The terms ''selective prosecution'' and ''racial profiling'' have been used to describe how the government allegedly decided to focus on Dr. Lee. The subcommittee's review of these allegations shows that the evidence simply does not support charges that Dr. Lee's ethnic heritage was a decisive factor in the government's actions during any phase of this case.

In June 2000, Dr. Lee's defense team filed a motion ''for discovery of materials relevant to establishing that the government has engaged in unconstitutional selective prosecution.'' [287] As grounds for this discovery request, the defense team claimed that Dr. Lee had ''concrete proof that the government improperly targeted him for criminal prosecution because he is 'ethnic Chinese.''' [288] The defense's memorandum cited four examples as proof of such targeting:

''A sworn declaration from a LANL counterintelligence official who participated in the investigation of Dr. Lee that Dr. Lee was improperly targeted for prosecution because he was ''ethnic Chinese.''

''Videotaped statements of the FBI Deputy director who supervised counterintelligence investigations until last year admitting that the FBI engaged in racial profiling of Dr. Lee and other ethnic Chinese for criminal counterintelligence investigations.

''The sworn affidavit the U.S. Attorney's Office used to obtain the warrant to search Dr. Lee's home, in which the FBI affidavit incorrectly claimed that Dr. Lee was more likely to have committed espionage for the People's Republic of China (PRC) because he was ''overseas ethnic Chinese.''

''A posting to the Los Alamos Employees Forum by a LANL employee who assisted counterintelligence investigations and personally observed that the DOE engaged in racial profiling of Asian-Americans at Los Alamos during these investigations.'' [289]

The memorandum went on to explain that even if Dr. Lee did not have the direct evidence of bias, he had:

''satisfied the stringent requirements of *United States* v. *Armstrong*, 517 U.S. 456 (1996), which held that . . . a defendant is nevertheless entitled to discovery if he provides some evidence that similarly situated people have not been prosecuted and that his investigation and prosecution were caused by improper racial motivations.'' [290]

At the plea hearing in September 2000, Judge Parker noted from the bench that the government had made a deal with Dr. Lee only a short time before it would have been required to produce to the judge a substantial volume of material on the selective prosecution issue,[291] raising the inference that the government reached the plea agreement to avoid its discovery obligations on the selective prosecution issue. A Department of Energy review of ethnic bias within the department concluded that there was room for improvement on ethnic sensitivity,[292] but none of the survey's results supported the allegations that Dr. Lee had been targeted because of his ethnicity. An April 2001 review by DOE Inspector General Gregory Friedman was even more direct, concluding that ''information reviewed by the Office of Inspector General did not support concerns regarding unfair treatment based on national origin in the security processes reviewed.'' [293]

Because these charges have not been rebutted, the public may have been left with the impression that Dr. Lee's allegations were correct, and that the government acted out of racial or ethnic prejudice. Any such impression is injurious to the public's trust in the institutions which are charged with enforcing the nation's laws and must be properly addressed.

In pleading the case that Dr. Lee was targeted for criminal investigation because he is ethnic Chinese, Dr. Lee's lawyers alleged that ''the troubling chain of events that led to Dr. Lee's indictment began when the DOE's Chief Intelligence Officer, Notra Trulock, incorrectly concluded in 1995 that the PRC had obtained the design information for the W–88 warhead from someone at the Los Alamos National Laboratory.'' [294] The defense memorandum further alleges that the Administrative Inquiry which was issued by Mr. Trulock in May 1996 listed Dr. Lee as the main suspect, prompting the FBI to open a criminal investigation of Dr. Lee.[295]

There is legitimate debate about the scope and conclusions of the AI, and that subject is addressed elsewhere in this report, but the defense's allegations are inaccurate in two major ways. First, the memorandum overstates Mr. Trulock's role in the development of the AI, which was written by Dan Bruno and an FBI Special Agent who was assigned to the DOE for the purpose of helping to conduct the AI. Although Mr. Trulock was an aggressive advocate in the 1995–1996 period of the argument that the Chinese nuclear weapons program had successfully targeted the U.S. labs for espionage, he had only a limited role in the investigation which resulted in the list of names upon which Dr. and Mrs. Lee appeared. Second, and more importantly, the defense memorandum fails to acknowledge that the FBI was predisposed to focus on Dr. Lee because he was already under investigation, albeit at a lower level than what happened after the AI was issued.

The cumulative effect of these errors has been to create the incorrect impression that somehow Mr. Trulock was directly or primarily responsible for the government's focus on Dr. Lee. The defense memorandum fails to even address the question of how Mr. Trulock supposedly played a role in the prosecution of Dr. Lee when Mr. Trulock left government service in August 1999, nearly four months before Dr. Lee was indicted.[296]

To bolster its case that Mr. Trulock was responsible for focusing on Dr. Lee, the defense memorandum cites Mr. Robert Vrooman, who was Chief Counterintelligence Officer at LANL from 1987 until 1998. The defense quoted Mr. Vrooman as saying that ''Mr. Trulock's office chose to focus specifically on Dr. Lee because he is 'ethnic Chinese.' Caucasians with the same background and foreign contacts as Dr. Lee were ignored,'' and that ''racial profiling was a crucial component in the FBI's identifying Dr. Lee as a suspect.'' [297]

The bevy of civil lawsuits that this case has spawned will have to sort out whether anyone has violated anyone else's rights or engaged in slander or defamation, but for the purposes of this report, several observations about Mr. Vrooman's allegations are appropriate. First, his statement that ''Caucasians with the same background and foreign contacts as Dr. Lee were ignored'' is factually incorrect. While any fair reading of the document would suggest that the authors of the AI were of the opinion that Dr. and Mrs. Lee were the prime suspects, the document also listed several other individuals, some of whom were Caucasian, and recommended that the others be investigated as well. Therefore, it is simply inaccurate to state that Mr. Trulock's office focused specifically on Dr. Lee, for any reason, let alone because he was ethnic Chinese.

Second, Mr. Vrooman raised questions in the late 1980s about Dr. Lee's contacts with Chinese officials and identified Dr. Lee to Energy Department officials as a potential suspect in the W–88 case.[298] He also formerly subscribed to the theory that the Chinese had obtained information about the W–88 through espionage, telling the FBI at one point of a ''smoking gun'' in the case.[299] Thus, although Mr. Vrooman has become critical of the conclusions of the AI and its focus on Dr. Lee, he was instrumental in relaying the DOE analysis regarding the extent of the PRC espionage to the FBI. Had Mr. Vrooman doubted the analysis of the DOE's review group, he could have raised those concerns then rather than saying that a smoking gun had been discovered. When challenged on this point during a hearing, Mr. Vrooman said that he had called Mr. Trulock's office in May 1996, but Mr. Trulock was not in. He said that he did not further pursue the matter because:

''My supervisor, who was the lab's director, told me he wanted me to improve my relationship with Mr. Trulock and what I was about to say would not have done that.

''So we decided, as a matter of course, to let the FBI have this case. We had worked with the FBI for years. They had always protected people's civil rights and did the case

well and we thought they would quickly come to the same conclusion we had.'' [300]

Mr. Vrooman also said that he met weekly with FBI agents on the case and routinely expressed reservations, which came to a head in December 1998 when ''we were basically thinking that Lee was not the right man.'' [301] Given that Mr. Vrooman retired from Los Alamos on March 13, 1998,[302] it remains unclear as to how he was sufficiently informed on the case in December of that year to make judgements of this sort.

And, finally, it should be noted that Mr. Vrooman was one of the three individuals disciplined for his role in failing to remove Dr. Lee from access after the Director of the FBI recommended twice in late 1997 that Dr. Lee's clearance be removed.[303] The subsequent discovery that Dr. Lee had been engaged in massive illegal downloading reflects poorly on Mr. Vrooman's conduct as the lab's counterintelligence chief and gives him a strong motive to minimize Dr. Lee's conduct and to allege government discrimination. Any assessment of Mr. Vrooman's opinion of the government's handling of the case against Dr. Lee must be made with these facts in mind.

Furthermore, when pressed for examples of supposed bias on the part of the government, Mr. Vrooman fell short. At an October 3, 2000 hearing of the Judiciary subcommittee on Department of Justice Oversight, Senator Grassley pursued this line of questioning. Senator Grassley asked for information to substantiate Mr. Vrooman's allegation that whenever Dr. Lee's motive [for the alleged espionage against the United States] was discussed, it came down to ethnicity. The following exchange occurred:

Mr. VROOMAN: Well, the Department of Justice representative asked the FBI what Lee's motive was because it was not clear to him and the response was an elaboration on how the Chinese focus their efforts on ethnic Chinese. That is one example. And there are others, conversations over the years since this investigation proceeded, that that was the only motive.

Senator GRASSLEY: Okay. Could you point to any documentation that would back up the point that was just made?

Mr. VROOMAN: No, sir, I cannot.

Senator GRASSLEY: Or the points that you are making about ethnicity being of prime concern?

Mr. VROOMAN: I do not believe there are any documents.[304]

In fact, there are documents which describe Dr. Lee's motives, but they run counter to what Mr. Vrooman alleges. In the November 10, 1998 request for electronic surveillance on Dr. Lee, the newly appointed FBI case agent describes several incidents from Dr. Lee's past and states their relevance to the issue of motive. One section of this November 1998 FISA request from the Albuquerque office describes how Dr. Lee sent numerous documents to Taiwan's Coordinating Council of North America (CCNA) in the late 1970s and early 1980s, and says that Dr. Lee told the FBI that:

''his motive for sending the publications was brought on out of a desire to help in scientific exchange. During the same interview, Dr. Lee stated that he helps other scientists routinely, and had no desire to receive any monetary or any other type of reward.''[305]

The memo continues, saying the Albuquerque Division of the FBI believes that Dr. Lee's actions in sending these documents to a foreign government without proper authorization ''shows that Wen Ho Lee has the propensity to commit and engage in the crime of espionage to include willingly providing documentation to foreign officials. . . .''[306] This discussion of motive makes no mention of Dr. Lee's ethnicity. If documents or information provided to a foreign government could injure the United States or aid a foreign country, the crime of espionage has still been committed even if the transfer was motivated by a desire to promote scientific exchange and in the absence of a desire for monetary reward.

The November 10, 1998 memorandum also describes a meeting at Los Alamos in early 1994 during which it became apparent that Dr. Lee had a relationship with a top PRC nuclear weapons scientist. A reliable source quoted this top PRC nuclear scientist as saying of Dr. Lee, ''We know him very well. He came to Beijing and helped us a lot.'' [307] The source further reported that Dr. Lee had helped the Chinese Academy of Engineering Physics ''with various computational codes used in fluid dynamics which is a very important aspect of thermal nuclear [sic] weapons design work.'' [308] The Albuquerque memo cited these specific acts as showing ''Wen Ho Lee's propensity to associate with foreign governments and provide information to foreign governments and therefore the propensity to aid in and commit acts of espionage.'' [309] These statements demonstrate clearly that the government's assertions about Dr. Lee's motives were based on specific acts he was known to have committed rather than on the fact that he is ethnic Chinese. These specific acts gave the government ample reason to investigate him and the allegations of Mr. Vrooman and others, that the government relied only on ethnic profiling, are simply incorrect.

In fact, all of the arguments put forward by Dr. Lee's lawyers on the racial profiling issue are a skewed interpretation of the same point—namely the U.S. government's recognition that the PRC intelligence services focus on Chinese-Americans. Consider the second and third examples cited in the discovery memorandum, where the defense claims that former FBI Deputy Director Paul Moore has confirmed that Dr. Lee was targeted by the FBI due to racial profiling, and that the affidavit in support of a search warrant for Dr. Lee's home claimed that Dr. Lee was more likely to have engaged in espionage for the PRC because he was ethnic Chinese. Neither of these claims stands up to even the most minimal level of scrutiny because both are misrepresentations of what was actually said.

The defense memorandum on selective prosecution quotes former FBI Deputy Director Paul Moore as saying in a televised interview with Jim Lehrer on December 14, 1999:

''There is racial profiling based on ethnic background. It's done by the People's Republic of China. . . . Now the FBI comes along and it applies a profile, so do the other agencies who do counter intelligence investigations they apply a profile, and the profile is based on People's Republic of China, PRC intelligence activities. So, the FBI is committed to following the PRC's intelligence program wherever it leads. If the PRC is greatly interested in the activities of Chinese-Americans, the FBI is greatly interested in the activities of the PRC as [regards] Chinese-Americans.'' [310]

To say that the United States government is cognizant of the fact that the PRC prefers to target individuals for elicitation based on their ethnicity is completely different from saying that an individual would be more likely to engage in espionage because he or she is a member of a particular ethnic group. The former statement about recruitment efforts of PRC intelligence services would be a logical, relevant and acceptable observation so long as it was based on fact. The latter statement, implying that an individual would be more likely to engage in espionage on the basis of his or her race, would be an outrageous, biased and unacceptable claim that would have no place in any law enforcement or counterintelligence investigation.

In the Wen Ho Lee case, the government's assertions were confined to acknowledging that the PRC focused on overseas ethnic Chinese, without making inferences that the targeted individuals would be more likely to respond positively because of their Chinese heritage. The defense memorandum cites FBI Special Agent Michael Lowe's April 9, 1999 affidavit in support of a search warrant, saying that it leaves no doubt that improper racial profiling was a substantial basis for the targeting of Dr. Lee. The defense's assertion on this point is incorrect. In relevant part, the affidavit says:

''. . . PRC intelligence operations virtually always target overseas ethnic Chinese with access to intelligence information sought by the PRC. Travel to China is an integral element of the Chinese intelligence collection tradecraft, particularly when it involves overseas ethnic Chinese. FBI analysis of previous Chinese counterintelligence investigations indicates that the PRC uses travel to China as a means to assess closely and evaluate potential intelligence sources and agents, as a way to establish and reinforce cultural and ethnic bonds with China, and as a safehaven in which to recruit, task, and debrief established intelligence agents.'' [311]

This does not allege that Dr. Lee is likely to have engaged in espionage because he is ethnic Chinese, only that he is likely to have been targeted by the PRC intelligence services on that basis. All the defense memorandum shows is that if there is any ethnic profiling done, it is done by the PRC. Since the PRC had no role in the decision to investigate or prosecute Dr. Lee, any bias on their part would be irrelevant.

It should be noted that Dr. Lee's request for discovery related to selective prosecution contained several factual errors, including an incorrect claim that no one else had ever been prosecuted under the Atomic Energy Act, and an incorrect claim that the Department of Justice had never prosecuted anyone under the espionage statutes without evidence that classified material had been transferred to a third party. These claims were shown to be incorrect in the government's response to Dr. Lee's discovery request.[312]

The Relationship Between the Lees and the Government

Shortly after Dr. Lee was fired from LANL, he retained Mark Holscher as his counsel. On May 6, 1999, Mr Holscher released the following statement, which clearly indicated that any prosecution of Dr. Lee would have to deal with the Lees' cooperation with the government:

''Dr. Wen Ho Lee has dedicated himself to the defense of this country for the last 20 years. His work, much of which is classified, has led directly to the increased Safety and national security of all Americans, and he is responsible for helping this country safely simulate nuclear tests.

''In 1986 and 1988, Dr. Lee went to Mainland China to present papers at two technical conferences. Dr. Lee's participation in these conferences was pre-approved and encouraged by the Los Alamos Laboratory and the Department of Energy. These same entities also cleared the texts of the papers given at these conferences, which covered mathematics and physics topics.

''The press has incorrectly reported that Dr. Lee made ''several'' trips to Mainland China and also has failed to report that his two trips were approved in advance by the Los Alamos Laboratory and the Department of Energy. These two approved trips were the only times Dr. Lee has ever traveled to

Mainland China. These false press reports do a disservice both to Dr. Lee and the Los Alamos Laboratory.

''The press reports also fail to include the fact that Dr. Lee presented similar papers at conferences in several countries throughout Western Europe and other parts of the world. The false insinuations that Dr. Lee went to Mainland China in the late 1980s with an improper purpose are unfair. Not only did Dr. Lee go to Mainland China to present a technical paper, his and his wife's attendance were with the full knowledge and approval of the Federal Bureau of Investigation.

''There have been inaccurate press reports regarding the circumstances surrounding Dr. and Mrs. Lee's cooperation with the government. Mrs. Lee agreed to the FBI's request that she assists it as a volunteer without pay in the FBI's efforts to monitor Chinese scientists. She agreed to help the FBI with the full knowledge and approval of Dr. Lee and continued to do so for a number of years.

''At the request of the FBI, Dr. Lee's wife attended the 1986 conference with him, where she voluntarily provided background information on Chinese scientists. Dr. and Mrs. Lee supported and agreed with the FBI's request that Mrs. Lee assist it in obtaining background information on Chinese scientists. It simply defies logic for critics to now allege that Dr. Lee was engaged in improper activities in Mainland China while he and his wife were there.

''At no time during or after the pre-approved 1986 or 1988 trips did Dr. Lee ever provide any classified information whatsoever to any representative of Mainland China, nor has he ever given any classified information to any unauthorized persons. As was anticipated and approved by the U.S. government, Dr. Lee and his wife socialized with Chinese scientists. It was fully understood by the Department of Energy and the Los Alamos Laboratory that the conferences included social events with the participants.'' [313]

Had the case gone to trial, the government would have had to confront the issue of its relationship with Dr. and Mrs. Lee over a long period of time. As previously noted, Dr. Lee assisted the FBI in a 1983–1984 investigation of a Lawrence Livermore scientist. Notwithstanding the FBI's denial of any assistance when the FISA request went forward in 1997, Dr. Lee had, in fact, helped the FBI. Mrs. Lee's relationship with the government would have been a substantially more difficult matter to contend with.

In one discovery request, Dr. Lee's defense team asked for, among other things, all information related to ''Sylvia Lee's Cooperation with the FBI and CIA.'' Citing grand jury testimony of the FBI case agent on the Wen Ho Lee matter, the defense memorandum said that:

''Sylvia Lee served as an FBI ''Information Asset'' between 1985 and 1991 in connection with visits to LANL by PRC scientists. Her principal FBI contact was FBI Special Agent David Bibb. On at least two occasions, Dr. Lee attended meetings between Sylvia Lee and her FBI contact. Sylvia Lee also met with [name redacted] and representatives of the LANL internal security office to provide information concerning PRC scientists.'' [315]

In its response, the government claimed that it had produced all documents related to Lee's cooperation with the FBI. Further, the government argued that while Dr. Lee's purported assistance to the government might be relevant to a jury in considering his criminal intent pursuant to the Atomic Energy Act counts, Mrs. Lee's ''affiliation with the FBI and/or the CIA has no bearing on Lee's criminal intent.'' [316]

In a July 13, 2000 order, Judge Parker said that he would address this issue by reviewing, in camera: (1) documents reflecting Sylvia Lee's cooperation with the Federal Bureau of Investigation (FBI), Central Intelligence Agency (CIA), and the Department of Energy (DOE), and (2) certain FBI memoranda regarding the propriety of prosecuting the Defendant.[317] After reviewing this information, the judge ruled that it contained information relevant to the defense in several categories of exculpatory information:

1. [redacted];
2. The Defendant's cooperation with and provision of information to Government agencies;
3. The Government agencies' assessments of cooperation by and reliability of Sylvia Lee and the Defendant;
4. The Defendant's actions that may be perceived to be inconsistent with an intent to secure an advantage for a foreign nation; and
5. The Government agencies' conclusions about the Defendant's motives.[318]

The relationship between the government and the Lees would not likely have been a major part of any trial, but it certainly had the potential to embarrass the government. The laws on intelligence oversight set out strict procedures for establishing a reporting relationship or an asset relationship with an American citizen. Press reports suggest, for example, that Mrs. Lee provided information to both the FBI and the CIA, including repeated contacts in the mid–1980s where a CIA agent was present for the meetings and paid for the hotel room where the meetings took place.[319] If the government had failed to conform to any of the laws or regulations in these matters, it could expect the defense to bring them up at trial.

The Plea Agreement

After Judge Parker ruled that Dr. Lee had to be released pending trial, the landscape shifted markedly. By September 13, the government reached the plea agreement which has been previously described. When the judge accepted the plea agreement, Dr. Lee was set free, subject only to the requirement that he undergo three weeks of intense debriefing, subject himself to a polygraph on questions related to the case, and remain available to cooperate with the FBI for a period of one year.

During the plea hearing, Judge Parker asked the government to explain why the government considered the agreement to be in the best interest of the nation. The government's lead prosecutor, Mr. Stamboulidis, answered that the plea provided the ''best chance to find out with confidence precisely what happened to the classified material and data'' on the missing tapes, which he said had been the government's ''transcending concern.'' [320] He also explained that the cooperation agreement would allow the government to verify Dr. Lee's statements, and that Dr. Lee would be at great risk if he failed to fully cooperate or to be truthful. And, finally, Mr. Stamboulidis said, ''this disposition avoids the public dissemination of certain nuclear secrets which would have necessarily occurred on the way towards proceeding towards conviction in this case at trial.'' [321]

The judge was not entirely convinced, asking ''why the government argued so vehemently that Dr. Lee's release earlier would have been an extreme danger to the government at this time he, under the agreement, will be released without any restrictions?'' [322]

Referring to two sworn statements Dr. Lee had provided on the morning of the plea hearing, Mr. Stamboulidis said that Dr. Lee had finally, ''for the first time, given us these assurances that he never intended any harm to our nation by his mishandling these materials in an unlawful way and that he never allowed them to fall into harm's way and compromise national security.'' [323]

Again, the judge was not persuaded, saying, ''Throughout this case, the government has repeatedly questioned the veracity of Dr. Lee. You're saying now, simply because he has given a statement under oath, the government no longer believes he is a threat to national security?'' [324]

The judge appeared to be not so much concerned that the plea agreement was inappropriate, but that it could have been reached much sooner. He noted that the government had rejected a written offer from Dr. Lee's attorneys to have Dr. Lee explain the missing tapes under polygraph exam, which was essentially the same deal the government got in the end (minus the felony count). Judge Parker also reminded counsel for both sides that at the December detention hearing he had asked the parties to pursue the offer made by Mr. Holscher, but nothing came of it. Mr. Stamboulidis took issue with the judge, saying that after the indictment, the offer had been withdrawn, to which Judge Parker replied:

''Nothing came of it, and I was saddened by the fact that nothing came of it. I did read the letters that were sent and exchanged. I think I commented one time that I think both sides prepared their letters primarily for use by the media and not by me. Notwithstanding that, I thought my request was not taken seriously into consideration.'' [325]

The net effect of Judge Parker's questions and the government's apparent reversal on the matter of the threat posed by Dr. Lee created the impression that the case had collapsed. This led to some sharp questions to the Attorney General and FBI Director Freeh at the September 2000 hearing. Director Freeh explained that serious negotiations about a plea agreement had begun during the summer at the direction of Judge Parker, and reiterated that the over-arching reason for the government's decision to make the agreement was to find out what happened to the tapes.[326]

After noting that he and the Attorney General were in total agreement with the decision on the plea deal, Director Freeh outlined five other factors which figured into the government's decision which are summarized below:

1. Judge Parker's strong suggestion that the case was appropriate for mediation rather than trial;
2. Judge Parker's rulings in favor of the defendant in initial proceedings under CIPA, which made it appear that Dr. Lee might succeed in his attempt at graymail because the judge's reasoning left little room to expect that the government would prevail;
3. Judge Parker's August ruling (although stayed by the Tenth Circuit) that created the ''very real prospect that Dr. Lee would soon be released in any event under conditions that we pointed out to the judge were inadequate to prevent Dr. Lee's communications with others.''
4. The potential that the trial would become a ''battle of the experts'' with regard to the classification level and importance of the material on the tapes; and
5. The fact that ''the FBI's lead case agent had had to correct erroneous testimony from the initial detention hearing,'' including the agent's misstatement about Dr. Lee telling another scientist he wanted to use his computer to download a resume (when Dr. Lee had actually said he wanted to download some files), and the agent's overstatement of evidence relating to whether Dr. Lee had sent letters to find outside employment.[327]

Director Freeh's statements provide a compelling rationale for the government's decision to accept the plea agreement. What has not been adequately explained, however, is the decision to keep Dr. Lee in such onerous conditions of pretrial confinement. After

careful review, it becomes apparent that the government was right to reach a plea agreement with Dr. Lee, whose actions did constitute a serious threat to the national security, but was wrong to hold him virtually incommunicado in pretrial confinement for more than nine months.

17. The initial plan was to commission a Task Force, which I would chair. By October, Senator Hatch had prepared a resolution transferring me from the Constitution Subcommittee to the subcommittee on Administrative Oversight and the Courts, and spelling out the areas of inquiry and special procedures applicable to the investigation. In the end, the subcommittee's investigation was conducted pursuant to two subpoena resolutions which spelled out, in general terms, the investigative mandate. The first subpoena resolution, adopted by a vote of 18–0 on October 14, 1999, authorized the charirman, in consultation with the ranking member, to issue a subpoena requiring the Attorney General to produce certain documents if they were not delivered voluntarily. The second resolution, authorizing subpoenas in 38 categories for individuals and documents, was approved (not unanimously) on November 17, after a narrower proposal by Senator Leahy was rejected.

18. The indictment alleged violations of the following sections of the U.S. Code: 42 USC 2276, 42 USC, 2275, 18 USC 793(c), and 18 USC 793(e).

19. The term ''Restricted Data'' means all data concerning: (1) the design, manufacture or utilization of atomic weapons: (2) the production of special nuclear material; or (3) the use of special nuclear material in the production of energy. 42 U.S.C. §2014(y).

54. Even if DOE computer personnel and counterintelligence were unaware that Dr. Lee was under investigation by the FBI, and that would have been possible in 1994, it would not have been inappropriate for DOE to share records of systems like NADIR with the FBI. This has the benefit of allowing the FBI to find out if any individuals are being flagged by security and monitoring systems, without alerting computer personnel to the investigation.

115. FBI EC from Albuquerque to FBIHQ, dated December 8, 1998: 1.

116. See the letter of DOE Assistant Secretary for Congressional and Intergovernmental Affairs John Angell to Senator Arlen Specter of December 20, 2000, which encloses answers prepared by Mr. Curran to follow-up questions from the September 27, 2000 hearings of the Judiciary Subcommittee on Administrative Oversight and the Courts.

117. It is troubling that the level of attention paid to Dr. Lee's activities in 1998 was so low, and the coordination between DOE and FBI was so poor, that counterintelligence personnel did not even learn of his previous trip to Taiwan, in March-April 1998, until after he was already out of the United States.

118. See the letter of DOE Assistant Secretary for Congressional and Intergovernmental Affairs John Angell to Senator Arlen Specter of December 20, 2000, which encloses answers prepared by Mr. Curran to follow-up questions from the September 27, 2000 hearing of the Judiciary Subcommittee on Administrative Oversight and the Courts.

119. See the letter of DOE Assistant Secretary for Congressional and Intergovernmental Affairs John Angell to Senator Arlen Specter of December 20, 2000, which encloses answers prepared by Mr. Curran to follow-up questions from the September 27, 2000 hearing of the Judiciary Subcommittee on Administrative Oversight and the Courts.

120. See 1999 Report of DOE Inspector General regarding Dr. Lee's clearance and access, 101.

121. At the December 14, 1999 meeting in which Director Freeh asked the subcommittee to suspend its oversight of the Wen Ho Lee case, Mr. Curran was asked about an FBI memo from February 1999 which claimed that Mr. Curran had instructed his personnel not to share the charts and videotape of the December 1998 polygraph with the FBI. After seeing an early draft of the interim report. Mr. Curran wrote a letter on January 31, 2000, denying the information in the FBI report. He also sent a copy of a letter he had received from FBI Assistant Director Neil Gallagher, which described the memo in question as a ''blind memo'', not intended to capture actual witness statements.

122. Ed Curran, Director, DOE Office of Counterintelligence, letter to Senator Arlen Specter, January 31, 2000: 2–3.

123. See the letter of 20 December 2000 from John C. Angell, Assistant Secretary of Congressional and Intergovernmental Affairs, Department of Energy to Senator Charles Grassley, which enclosed responses from Mr. Curran to 22 questions from Senator Specter.

Wackenhut is a private company that has a contract with DOE to perform security related polygraphs.

177. Matthew Purdy, ''The Making of a Suspect: The Case of Wen Ho Lee,'' New York Times, February 4, 2001, online edition. Unless otherwise noted, the description of the government's actions in the first week of March 1999 is taken from this article.

178. Matthew Purdy, ''The Making of a Suspect: The Case of Wen Ho Lee,'' New York Times, February 4, 2001, online edition.

179. In his written statement to the Joint Hearing of the Senate Select Committee on Intelligence and the Judiciary Committee on September 26, 2000, Director Freeh said, ''One approach that was taken during that interview was not consistent with the conduct expected of agents during an interview. Specifically, Dr. Lee was reminded of the fate of Julius and Ethel Rosenberg, who were executed for espionage. Confrontational interviews often call for tough statements by investigators, but that implication was inappropriate. Again, Dr. Lee ended the interview without providing any useful information and without giving any indication of the actions to which he has now pled guilty.'' When asked by Senator Specter at the September 26 hearing about the Rosenberg reference and the harsh conditions of confinement and the inference that these measures might be intended to coerce a confession, Director Freeh responded, ''I would disagree very strongly with the suggestion or the notion that anything was done with respect to confinement, or anything else in this case, to improperly or unfairly treat Dr. Lee.'' See hearing transcript, 81.

180. For a discussion of the issue of how Dr. Lee's name was leaked to the press, see pages 53, 54, 64 and 65 of the transcript of the Senate Judiciary Subcommittee on Department of Justice Oversight hearing on October 3, 2000, during which Mr. Trulock says that NYT reporter James Risen told him that Energy Secretary Richardson leaked Dr. Lee's name to the media. Secretary Richardson vehemently denied being the source of the leak, both in a letter to Senator Hatch on October 3, 2000, in which he said he had received a letter from Senator Specter requesting a hearing on the basis of Mr. Trulock's statement. In reply, Secretary Richardson said, ''Mr. Risen has denied that he made this statement to Mr. Trulock, and I categorically deny that I shared Mr. Lee's name with Mr. Risen.'' Secretary Richardson made the same denials to Senator Specter in a meeting on October 5, 2000, but a review of the articles in question shows that Secretary Richardson gave an on the record interview in which he named Dr. Lee and made several comments about his lack of cooperation. Although Dr. Lee's name had first appeared in the press in an AP article the day before, Secretary Richardson confirmed on the record that Dr. Lee was the individual who had been fired for security violations.

181. See, for example, the September 28, 1999 press release from the FBI National Press Office which states that Special Agent in Charge Steve Dillard ''has been appointed as Inspector in Charge of a task force composed of FBI Special Agents and analysts that will investigate the possible theft or compromise of classified information from United States nuclear laboratories. . . .'' The full text of the press release is available at http://www.fbi.gov/pressrm/pressrel/dillard.htm.

182. Attorney General Janet Reno and FBI Director Louis Freeh, letter to Senator Orrin Hatch, October 1, 1999: 1.

192. Cox Committee Report, Vol 1, 68.

193. Cox Committee Report, Vol 1, 83–84.

194. According to a chronology prepared by the Justice Department, the discovery occurred on March 23, 1999. That it took more than two weeks after Dr. Lee had been dismissed from LANL (and nearly three weeks after he gave permission to search his office) to find this document is very troubling.

195. United States Senate, Joint Hearing of the Senate Select Committee on Intelligence and the Senate Judiciary Committee, ''Joint Hearing on the Wen Ho Lee Case,'' 106th Congress, 2nd Session, September 26, 2000: 52.

197. Transcript of Proceedings, United States v. Wen Ho Lee, September 13, 2000: 34–37.

198. Transcript of Proceedings, United States v. Wen Ho Lee, September 13, 2000: 48–50.

199. Although the subcommittee has not had access to the files from the criminal case against Dr. Lee, it should be noted that none of the information otherwise available suggests that the government applied for a Title III wiretap between March and December 1999. If the government was concerned that

he might somehow communicate the existence of the tapes to a third party, it should have requested a wiretap. It may be that the wiretap was requested and received, but the absence of any such request would strongly undermine the government's claim that restricting his communications was necessary to protect the tapes.

200. Unless otherwise noted, all the information in this section is drawn from a chronology prepared by the Department of Justice and forwarded to the Senate Judiciary Committee on June 22, 2001.

201. Mark Holscher, letter to Robert Gorence and John Hudenko, of March 10, 1999: 1. [DOJ–WHL–00001–00002]

202. FBI Chronology of Wen Ho Lee investigation from 1999–2000: 2.

216. Brian Sun, letter to John Kelly and Paula Burnett, of May 6, 1999: 1–2. [DOJ–WHL–00021–00022]

217. FBI Chronology of Wen Ho Lee investigation from 1999–2000: 7.

218. John Kelly, letter to Mark Holscher, of June 15, 1999: 1–2. [DOJ–WHL–00030–00031]

219. FBI Chronology of Wen Ho Lee investigation from 1999–2000: 8–9.

220. No subpoenas were issued pursuant to these resolutions because the investigation into the Wen Ho Lee case was suspended in December at the request of Director Freeh and the Department of Justice. The resolutions were intended as temporary measures to ensure that the subcommittee could continue its work during the congressional recess. When the Senate returned the following January, several other individual subpoenas on matters under investigation by the subcommittee were, in fact, debated and voted on. No subpoena requested by the subcommittee was defeated in the full committee.

222. Senator Arlen Specter, letter to FBI Director Louis J. Freeh of December 7, 1999. 1–2.

223. FBI Director Louis J. Freeh, letter to Senator Arlen Specter of December 10, 1999: 1.

224. Director Freeh letter of December 10, 1999: 1–2.

225. United States Senate, Joint Hearing before the Senate Select Committee on Intelligence and the Senate Judiciary Committee, ''Joint Hearing on the Wen Ho Lee Case,'' 106th Congress, 2nd Session, September 26, 2000: 63.

226. There are a number of other issues that raise questions as to whether the government fully pursued all the information it had available during the course of its investigation. These questions were identified in a June 27, 2001 letter from senators Patrick Leahy and Arlen Specter to Attorney General Ashcroft. With the exception of confirming that Dr. Lee has told investigators that the tapes were still in his office as of December 23, 1998, however, the Department continues to refuse to answer these questions on the ground that the case is still open.

227. United States Senate, Joint Hearing before the Senate Select Committee on Intelligence and the Senate Judiciary Committee, ''Joint Hearing on the Wen Ho Lee Case,'' 106th Congress, 2nd Session, September 26, 2000: 83.

228. In response to a question from staff on July 5, 2001, Sheryl Walter of DOJ's Office of Legislative Affairs confirmed that Dr. Lee had never been the target of electronic surveillance.

Mr. SPECTER. Mr. President, I now turn to the report on the handling of the espionage case against Dr. Peter H. Lee: Again, I intend to read only a sentence or two, as I have been advised that a sentence or two would be sufficient to have the remainder of the report printed in the RECORD.

On October 7th and 8th, 1997, Dr. Peter Hoong-Yee Lee confessed to the FBI that he

had provided classified nuclear weapons design and testing information to scientists of the People's Republic of China on two occasions in 1985 and had given classified antisubmarine information to the Chinese in May of 1997. The 1985 revelations, which occurred during discussions with, and lectures to, PRC scientists in Beijing hotel rooms, involved his work on hohlraums, devices used to simulate nuclear detonations in a process called Inertial Confinement Fusion, or ICF.[1] According to a 17 February 1998 ''Impact Statement'' prepared by experts from the Department of Energy,

''the ICF data provided by Dr. Lee was of significant material assistance to the PRC in their nuclear weapons development program. . . . For that reason, this analysis indicates that Dr. Lee's activities have directly enhanced the PRC nuclear weapons program to the detriment of U.S. national security.''[2]

The ''Impact Statement'' further notes that ''the ICF Program, when developed in conjunction with an already existing nuclear program, could assist in the design of more sophisticated nuclear weapons.''[3]

Dr. Lee's 1997 disclosures came in two lectures to PRC scientists, again in China, where he discussed his work on the joint U.S./U.K. Radar Ocean Imaging (ROI) project. The objective of the project, which has been carried out over several years at the cost of more than $100 million, is to study the feasibility of using radars to detect submerged submarines. After viewing videotapes of Dr. Lee's confession, Dr. Richard Twogood, former Technical Program Leader for the ROI project, stated that Dr. Lee's disclosures contained classified information at the SECRET level which went right to the heart of the most significant technical achievement of the U.S./U.K. program up until 1995.[4] Although Dr. Lee was not charged for the 1997 disclosures of classified information, a 9 March 2000 review by the Department of Defense concluded that Dr. Lee's anti-submarine warfare revelations were classified at the CONFIDENTIAL level,[5] which, by definition, would damage U.S. national security.[6] According to the Cox Committee Report, ''this research, if successfully completed, could enable the [Chinese military] to threaten previously invulnerable U.S. nuclear submarines.''[7]

Dr. Lee's confessed crimes caused serious harm to U.S. national security, yet he was offered a plea bargain which resulted in a sentence amounting to one year in a halfway house, 3,000 hours of community service and a $20,000 fine. Considering the magnitude of Dr. Lee's offenses and his failure to adhere to the terms of the plea agreement which called for complete cooperation and truthfulness, the interests of the United States were not well served by this outcome.

During the 106th Congress, I chaired a special subcommittee of the Senate Judiciary Committee for the purposes of conducting oversight on the Department of Justice's handling of this case and several other matters. The Subcommittee's review of the Dr. Peter Lee case identified a number of shortcomings in existing procedures for handling espionage investigations and prosecutions, particularly in cases where highly technical classified information is revealed verbally rather than through the transfer of documents. Communications between and within the Department of Justice and other Executive Branch organizations appear to have broken down at critical points during the Peter Lee case, with the result that several key decisions were made on the basis of incomplete or incorrect information. Had this case been handled more formally and deliberately, with more of the critical information being communicated in writing, the opportunities for misunderstandings would have been greatly reduced, and the chances of Dr. Lee receiving a long prison sentence commensurate with his crimes would have been greatly increased. Specifically, the Subcommittee's investigation showed that:

The classified nuclear weapons design and anti-submarine warfare information that Dr. Lee revealed in 1985, 1997, and on other occasions may have merited prosecution under 18 USC 794, the most serious of the espionage statutes.

Senior DoJ officials, including the Attorney General and the Deputy Attorney General, were not sufficiently involved in or aware of the case. Principal Deputy Assistant Attorney General John Keeney, the official with final approval authority in the case, advised that he would not have approved the plea bargain had he known the trial prosecutor would ask for only a short period of incarceration and would charge only an attempt to transmit classified information.[8]

The Department of Justice's ability to seek a tougher plea agreement or to prosecute Dr. Lee under section 794 was hampered by its failure to fully understand the classification level of, and the damage to national security from, Dr. Lee's nuclear weapons design revelations prior to offering him a plea agreement.

DoJ failed to inform the court that Dr. Lee repeatedly confessed to disclosing classified information to the PRC in 1997, allowing the defense to convince the judge during sentencing that the only time Dr. Lee intentionally passed classified information was more than 13 years prior.

DoJ did not have the DoE's ''Impact Statement,'' which stated that Dr. Lee had provided significant material assistance to the PRC nuclear weapons program, until February 1998, well after the plea agreement was concluded.

The reluctance of the Department of Defense, and the Navy in particular, to support the prosecution of Dr. Lee for his anti-submarine warfare revelations had an adverse impact on the case.

The ambiguity of the 14 November 1997 memorandum authored by Mr. J.G. Schuster, head of the Navy's Science and Technology Branch, seriously undermined DoJ efforts to prosecute Dr. Lee. This memorandum was based on incomplete information, without knowing the details of what Dr. Lee confessed to disclosing to PRC scientists.

DoJ prematurely determined that Dr. Lee could not be prosecuted for the 1997 revelations, and the explanation that the information Dr. Lee revealed was already in the public domain is contradicted by two classified memoranda from Lawrence Livermore National Laboratory which show that the disclosures extended beyond what was publicly available.

DoJ's failure to prosecute on the 1997 disclosures, or at least to add them as a separate count to the plea agreement, had a material adverse effect on the disposition of the case. Coupling the 1997 disclosures with the 1985 revelations would have demonstrated that Dr. Lee's classified disclosures were not limited to a single incident long ago, but were ongoing. Obtaining a conviction on the 1997 disclosures would not have been a foregone conclusion—pushing the matter risked disclosing certain information that the FBI and the prosecutor wanted very much to protect, and the Navy was reluctant to assist in the prosecution—but these were not insurmountable obstacles. At a minimum, an effort should have been made to add a separate count to the plea agreement to address these disclosures.

DoJ communications were confused on the critical question of what authority the trial prosecutor had with regard to a charge under Section 794. DoJ officials advised that the Internal Security Section would have reconsidered a prosecution under Section 794 if the plea agreement broke down,[9] which was unknown to the trial prosecutor who thought he could only take the watered-down plea bargain or get nothing at all.[10]

The fact that Dr. Lee was an espionage suspect while working on the Joint U.S./U.K. Radar Ocean Imaging project was not disclosed to the program's sponsors within the Office of the Assistant Secretary of Defense/Command, Control, Communications and Intelligence (OASD/C3I).[11]

Electronic surveillance under the Foreign Intelligence Surveillance Act was terminated at a critical juncture in September 1997, just when the FBI was stepping up its activity with regard to Dr. Lee and electronic surveillance could have yielded important counter-intelligence information. Although the listening device in Dr. Lee's home had been discovered in July, thereby decreasing the utility of that particular device, the FBI Field Office felt strongly enough about the need for continued surveillance to make a verbal renewal request to FBI Headquarters in August, but not strongly enough to ensure the request was granted.

The problems which affected this case were serious enough to require remedial steps. The Counterintelligence Reform Act of 2000 (S.2089), which became law on 27 December 2000 as Title VI of Public Law 106–567 (H.R. 5630), contained a provision that will address many of the shortcomings in the way the DoJ handled this case. That provision, Section 607, amended the Classified Information Procedures Act (CIPA) to require that the Assistant Attorney General for the Criminal Division and the appropriate United States attorney provide briefings to senior agency officials from the victim agency in cases involving classified information. The section further required that these briefings occur as soon as practicable after the Department of Justice and the United States attorney concerned determine that a prosecution could result and at such other times thereafter as are necessary to keep the affected agency fully and currently informed of the status of the prosecution.

The Subcommittee's investigation revealed other problems that have not yet been addressed through legislation, primarily because it was not possible to reach a consensus on how best to solve them. The Counterintelligence Reform Act moved through the Judiciary Committee and the Senate Select Committee on Intelligence without a single vote in opposition. The Judiciary Committee reported the measure favorably on 23 May 2000 and the Intelligence Committee did the same on 20 July 2000. As the bill's chief sponsor, I opted to work toward a consensus measure to ensure that the important reforms we had identified during oversight on this case and the Dr. Wen Ho Lee case could be implemented in a timely fashion. Rather than wait until we could work out acceptable language on other proposals arising from the Peter Lee case, I felt it more important to accomplish what could be done in the time available and address the more difficult matters later. I also withheld publication of this report during the last Congress so as not to inject it into the presidential election. Now that the election is over and the 107th Congress is well underway, it is appropriate to release this report and begin working on legislation to solve the other problems identified by our oversight but upon which we were unable to achieve consensus.

Specifically, I am introducing legislation to require victim agencies—the agencies whose classified information is lost—to

produce a written ''damage statement'' which specifies the level of classification of the material alleged to have been revealed, and justifies the classification level by describing the potential harm to national security from such revelations. The legislation further requires the prosecution team to consider the ''damage statement'' before any final decision is made as to whether the case should be taken to trial or a plea bargain should be offered. I also strongly believe, but will not attempt to mandate through legislation, that key instructions from Main Justice (Internal Security Section, etc.) to the U.S. Attorney's Office with responsibility for prosecuting the case, including charging authority and plea bargain authority, should be in writing. These written instructions should be shared with the investigating agency or agencies and the victim agency so they have an opportunity for input before any final decisions are made.

The findings and recommendations included in this report are based on a review of more than 6,000 pages of documents from the FBI, the Department of Defense and its subcomponents, the Department of Justice and information submitted to the court during the sentencing process. The Subcommittee conducted three open hearings, three closed hearings, two ''on-the-record'' Senators' briefings, and numerous staff interviews, which resulted in hearing from more than 30 individuals who played key roles in the conduct of the case. The information presented here is derived from unclassified documents and testimony, or relies upon unclassified extracts from classified documents.

SUMMARY OF DR. PETER H. LEE'S ESPIONAGE ACTIVITIES

Dr. Peter Lee is a naturalized U.S. citizen who worked for TRW Inc., a contractor to Lawrence Livermore National Laboratory, from 1973 to 1976. Dr. Lee worked at Lawrence Livermore from 1976 to 1984, and at Los Alamos National Laboratory from 1984 to 1991. He returned to TRW from 1991 until December 1997, when he was dismissed in the wake of his plea agreement for passing classified information to the Chinese.[12]

According to his October 1997 confession to the FBI, Dr. Lee traveled to China from 22 December 1984 to 19 January 1985 (while he was employed by Los Alamos National Laboratory).[13] On 9 January 1985, Dr. Lee met with Chen Nengkuan, a PRC scientist employed by the China Academy of Engineering Physics (CAEP), in a hotel room in Beijing. Chen told Dr. Lee that he had classified questions to ask, and that Dr. Lee could answer just by nodding his head yes or no.[14] Chen drew a diagram of a hohlraum (a device in which lasers are fired at a glass globe to ''create a small nuclear detonation which is then studied and used in the design of nuclear weapons),''[15] and asked the classified questions, which Dr. Lee, by his own admission, knew were classified but answered anyway.[16]

The following day, Dr. Lee accompanied Chen to a hotel in Beijing where another group of PRC scientists was waiting. These scientists were also from the China Academy of Engineering Physics, which is ''responsible for all aspects of the PRC's nuclear weapons program.''[17] Among the scientists Dr. Lee briefed was Yu Min, who has been called ''the 'Edward Teller' of the PRC nuclear weapons program.''[18] For two hours, Dr. Lee answered questions and drew diagrams, including several hohlraums. Dr. Lee also ''discussed problems the U.S. was having in its nuclear weapons testing program.''[19] Dr. Lee further admitted discussing with the Chinese scientists at least one portion of a classified document he authored in 1982. Although the document, titled ''An Explanation for the Viewing Angle Dependence of Temperature from Cairn Targets,'' was subsequently declassified in 1996,[20] revealing its contents in 1985 was an illegal act that could be expected to provide substantial assistance to the Chinese from 1985 to 1996 and to harm U.S. national security.

Dr. Lee again visited China, while he was employed by TRW, from 30 April to 22 May 1997.[21] Although Dr. Lee claimed on his travel request form, and in a 25 June 1997 interview with FBI Agent Gilbert Cordova, that the visit to China had been a pleasure trip for which he paid all his own expenses, the truth was that Dr. Lee traveled as a guest of the Chinese Institute of Applied Physics and Computational Mathematics (IAPCM), which is part of the China Academy of Engineering Physics.[22]

During this May 1997 trip, Dr. Lee gave a lecture at the PRC Institute of Applied Physics and Computational Mathematics in Beijing. The lecture covered his work for TRW in support of the Radar Ocean Imaging Project, and was attended by nearly 30 top PRC scientists.[23] When asked about the applicability of his work to anti-submarine warfare, Dr. Lee showed the scientists a surface ship wake image (which he had brought from the U.S. to show them), drew a graph, explained the physics underlying his work, and told the Chinese where to filter the data within the graph to enhance the ability to locate the ocean wake of a vessel.[24] A few days later, Dr. Lee gave the same lecture in another city, using the graphs that the Chinese had saved from his first lecture and had brought to the second lecture for his use.[25]

Upon his return from the PRC, Dr. Lee filled out a TRW Post-Travel Questionnaire in which he denied that there ''were any requests from Foreign Nationals for technical information,'' and denied that there were any attempts to persuade him to reveal or discuss classified information.[26]

On 5 August and 14 August 1997, Peter Lee was interviewed by FBI agents at a Santa Barbara, California, hotel. During these interviews, Dr. Lee admitted that he had lied on his travel form about the purpose of his trip to China in May, and that he had lied about receiving requests for technical information. However, he continued to insist that he had paid for the trip to the PRC with his own money.[27]

After the two FBI interviews, Dr. Lee contacted a Chinese official named Gou Hong by e- mail on 25 August 1997, and requested that Gou provide Lee with receipts indicating that Lee had paid for the trip to the PRC, that the receipts contain the names of Lee and his wife in English, and that they show that Lee paid cash for the trip.[28] On 3 September 1997, Dr. Lee provided the FBI with copies of hotel and airline receipts for the May 1997 trip which stated that Lee had paid for the trip in cash. Based on a review of e-mail transmissions and telephone conversations between Lee and Gou, however, the FBI concluded that these receipts were false.[29]

On 7 October 1997, Dr. Lee was interviewed and polygraphed by the FBI. The polygraph examiner believed that Lee showed deception when he answered ''no'' to the following questions: (A) Have you ever deliberately been involved in espionage against the United States? (B) Have you ever provided classified information to persons unauthorized to receive it? (C) Have you deliberately withheld any contacts with any non-U.S. intelligence service from the FBI?[30] After being told that he had failed the polygraph on these questions, Dr. Lee made a videotaped confession in which he admitted ''having passed classified national defense information to the PRC twice in 1985, and to lying on his post-travel questionnaire in 1997.''[31]

During this same interview, Dr. Lee also repeatedly confessed that he intentionally revealed classified information during his 1997 anti-submarine lectures in China. Dr. Lee was not prosecuted for these revelations, and the judge was not adequately informed of these admissions at sentencing.

On 8 December 1997, Dr. Lee pleaded guilty to a two count information that he violated: (1) 18 USC 793(d)—Attempt to communicate national defense information to a person not entitled to receive it, and (2) 18 USC 1001—False statement to a government agency.[32] According to the press release from the office of U.S. Attorney Nora Manella, Dr. Lee ''admitted that he knew the information was classified, and that by transmitting the information he intended to help the Chinese.''[33] The offenses to which Lee pleaded guilty could have resulted in a maximum sentence of 15 years in federal prison and a fine of $250,000. Under the terms of the agreement, the Government asked for a ''short period of incarceration,'' a formulation that was negotiated by the trial attorney and approved by Mr. John Dion in the Internal Security Section, but was not approved by Principal Deputy Assistant Attorney General Keeney, the DoJ official with final authority, who advised the Subcommittee that he would not have approved the plea agreement had he known that it would request only a short period of incarceration as an opening position.[34]

On 26 March 1998, Dr. Lee was sentenced by U.S. District Court Judge Terry Hatter to one year in a community corrections facility, three years of probation, 3,000 hours of community service, and a $20,000 fine. The sentence was based upon a sealed plea agreement from 8 December 1997.[35] The plea agreement and other key documents in the case were unsealed at the request of the Subcommittee in late 1999.[36]

Every DoJ official interviewed by the Subcommittee expected Dr. Lee to receive jail time, during which they planned to seek his further cooperation. When he received no jail time, all leverage was lost by the government.

Analysis of the Nuclear Weapons Design Revelations

The importance of Dr. Lee's 1985 disclosures is highlighted by the 17 February 1998 ''Impact Statement'' from the Department of Energy which concludes that:

''the [Inertial Confinement Fusion] data provided by Dr. Lee was of significant material assistance to the PRC in their nuclear weapons development program. . . . For that reason, this analysis indicates that Dr. Lee's activities have directly enhanced the PRC nuclear weapons program to the detriment of U.S. national security.''[37]

The ''Impact Statement'' further notes that ''the ICF Program, when developed in conjunction with an already existing nuclear program, could assist in the design of more sophisticated nuclear weapons.''[38]

The trial attorney wanted to prosecute under Section 794 for the 1985 revelations, but was overruled by Main Justice as well as his supervising attorney.[39] In his 12 April 2000 written statement to the Subcommittee, the Internal Security Section (ISS) line attorney with primary responsibility for the Peter Lee case, explained why he did not feel it appropriate to pursue a 794 charge on the 1985 disclosures.

''In my estimation, both then and now, the sole weakness in the case was the questionable significance of the information Lee compromised, both in 1985 and in 1997. As to Lee's 1985 disclosure, I knew, for instance, that the Department had never prosecuted a case under 794 where the compromised information, as in the case of Lee's 1985 disclosure, had been declassified prior to the crime

being discovered. Let me emphasize this: the information Lee admitted disclosing in 1985 had been declassified.'' [40]

This analysis may be correct as far as it goes, but there were other factors and issues that should have been considered. Dr. Lee's confession, though carefully crafted to limit his exposure, simply confirmed much, but not all, of what the FBI already knew about his espionage activities. The FBI knew well before they confronted Dr. Lee that he had likely been compromising anti-submarine information since the early 1990s,[41] and that in the early 1980s Dr. Lee had allegedly given the Chinese classified information that greatly assisted their nuclear weapons program.[42] One scientist the FBI consulted in trying to evaluate the extent of Dr. Lee's revelations said, ''It seems likely that Peter Lee at least partially compromised every project, classified or unclassified, he was involved with at Livermore, [Los Alamos National Laboratory], and TRW.'' [43]

At a later stage of the proceeding, Dr. Lee admitted that he had given the PRC scientists additional information which had not been declassified. Had the Internal Security Section awaited fuller development of the facts, it might not have declined prosecution under 794 on grounds of subsequent declassification. The Government would have been able to corroborate Dr. Lee's confession and to prove that he had done more than he confessed to. As the prosecuting attorney noted during his 5 April 2000 appearance before the Subcommittee, ''. . . in the many cases I had with a cooperating defendant or a defendant who pled guilty who was debriefed, I never had the kind of information to corroborate what was said as I did in this case.'' [44]

The ISS line attorney's statement regarding the ''questionable significance of the information Lee compromised'' in 1985 is flatly contradicted by the DoE ''Impact Statement'' of 17 February 1998 which states that Dr. Lee did serious harm to U.S. national security. Had the ISS line attorney waited for the experts to evaluate the case, he would have known that a 794 charge should be given much greater consideration than it got.

During testimony before the Subcommittee, the ISS line attorney who handled the case stated that it would have been impractical to wait for a damage assessment which, in his experience, normally takes more than a year. In fact, however, there were two assessments available within less than 90 days of the start of plea negotiations. Dr. Thomas Cook's ''Declaration of Technical Damage to United States National Security Assessed in Support of United States v. Peter Hoong-Yee Lee'' was available in February 1998, as was the Department of Energy ''Impact Statement.''

The Government had spent six years and considerable amounts of money investigating Dr. Lee's espionage activities, had obtained a confession that substantiated much of the information it already had from other sources, and had not charged Dr. Lee with a crime and therefore did not have a speedy trial issue to contend with. Consequently, there was no reason why the Government could not wait for a complete analysis by competent experts of Dr. Lee's espionage activities. The failure to obtain such an analysis prior to entering a plea agreement seriously undermined the Government's ability to prosecute Dr. Lee under section 794, and was a major factor in the unsatisfactory disposition of the case.

In his testimony before the Subcommittee on 12 April 2000, the ISS line attorney who handled the Lee case further argued that the Government would have had a hard time proving that the classified nuclear weapons design information that Dr. Lee provided to the Chinese was related to the national defense, an element of proof that would have been necessary to sustain a charge under 18 USC 794. In response to a question from Senator Sessions, the attorney said that the information Dr. Lee revealed in 1985 ''was classified SECRET, but I'm not sure it would have been ultimately found to be national defense information at the time he compromised it.''

When pressed by Senator Sessions to explain how nuclear weapons design information could be deemed not related to the national defense, the attorney referred to the Supreme Court's opinion in Gorin v. United States.[46] Any reliance on the Gorin decision in the context of the Peter Lee case is misplaced. The Gorin case was decided in January 1941, well before the advent of nuclear weapons. The Court's opinion, written by Justice Reed, makes clear that the information in the Lee case would have been found to be ''national defense information.'' In the words of the Court:

''National defense, the Government maintains, ''is a generic concept of broad connotations, referring to the military and naval establishments and the related activities of national preparedness.'' We agree that the words ''national defense'' in the Espionage Act carry that meaning.'' [47]

When the Supreme Court held, as it did in Gorin, that reports ''as to the movements of fishing boats, suspected of espionage and as to the taking of photographs of American war vessels'' [48] constituted national defense information, there can be no doubt that nuclear weapons design information would be encompassed by the term.

The DoJ attorney also cited the decision of the Second Circuit Court of Appeals in United States v. Heine.[49] That case has no applicability to this matter since all the information given to a German automobile corporation was publicly available at the time of disclosure.[50]

During the sentencing hearing, Dr. Lee's lawyer, Mr. James Henderson, tried to downplay the significance of the 1985 revelations through character witnesses who claimed that the disclosures were not related to nuclear weapons but to energy production.[51] These witnesses did not have access to the text or tape of Dr. Lee's confession which detailed the extent of his revelations.[52] Dr. Cook and the authors of the 17 February 1998 DoE ''Impact Statement'' had access to Dr. Lee's confession and were in a position to evaluate the extent of damage and of the espionage. In view of these facts it was surprising that the ISS attorney advanced the argument:

''that Lee could claim that he made the disclosures to encourage China not to conduct nuclear weapons tests in the field, and he would likely be supported by internal Government documents or even testimony of former U.S. Government or Livermore officials that that was actually one of the reasons the U.S. Government declassified the information beginning in 1990.

''In other words, Lee would have been able to credibly argue that his actions were in the national interest.'' [53]

Any claim by Dr. Lee that his actions were in the national interest would be totally unfounded. Individual scientists do not have the latitude to make determinations—during the course of lectures in Beijing hotel rooms—as to whether or not it is in the national interest to help the Chinese develop more sophisticated nuclear weapons.

The prosecuting attorney made this very point at the sentencing hearing when he said, ''It is not up to the whim of an individual scientist to determine if something is classified. . . . This is one of the nation's top scientists from one of the nation's top research nuclear weapons facilities giving a two hour lecture regarding classified information to the top nuclear scientists of China.'' [54]

Dr. Lee very likely could have been prosecuted under 18 USC 794, the harshest of the espionage statutes, for his nuclear weapons design revelations. As Senator Sessions said at the Subcommittee's 5 April 2000 hearing:

''I don't think [the prosecuting attorney] would have had a problem getting a conviction on that. [Dr. Lee] confessed to it, number one. Number two, I don't think any jury is going to believe that he was there for his health and a casual conversation to have two different meetings in Beijing hotel rooms with top Chinese scientists. There is no business for that, and anyone with common sense would understand it.'' [55]

In the context of the prosecuting attorney's efforts to proceed under 794 and Senator Sessions' strongly expressed views, there is a strong argument that a 794 prosecution should have been brought.

Internal DoJ Mis-communication and a Lack of High Level Supervision

Unfortunately, the case never went to trial. By late November 1997, the Internal Security Section attorney had completed his analysis of the case, concluding that Dr. Lee should be offered a plea under 18 USC 793 or section 224(b) of the Atomic Energy Act of 1954 for the 1985 compromise, in combination with a charge under section 1001 for the false statements on his travel form.[56] When it became apparent that ''Lee was balking at a plea with a potential 10-year exposure for the 1985 incident,'' the attorney recommended to Mr. Dion that ''although the section 794 case for that incident in 1985 had problems, it was sufficiently robust that we could ethically use it as leverage.'' [57] Mr. Dion testified that he called the prosecuting attorney and authorized him to:

''seek a plea of guilty by Lee to a violation of 18 USC Section 793(d) for his 1985 disclosures and to a violation of the false statement statute, 18 USC Section 1001. As such a plea would require Lee to waive the 10-year statute of limitations, [the prosecuting attorney] was authorized to advise counsel that no final decision had been made as to the prospect of charging Lee with a violation of Section 794.'' [58]

The prosecutor, who was emphatic in his testimony that his instructions were to accept a plea under 793 and 1001, or nothing,[59] obtained a plea on both counts, but had to concede to only a ''short period of incarceration'' to secure Dr. Lee's agreement.[60] Principal Deputy Assistant Attorney General John Keeney told the Subcommittee that, ''. . . I was not aware, so far as I recall, that it would call for only a short period of incarceration or would charge only an attempted 793 charge. Had this been our opening position in plea negotiations, I doubt that I would have approved it, particularly, the 'short period of incarceration.' '' [61] He then tried to justify DoJ's handling of the case by saying that ''this was the best that could be hoped for given the sentencing practices of the courts in the Central District of California.'' [62]

Had Dr. Lee cooperated, as he was required to do under the plea agreement, it might have been possible to achieve an acceptable disposition in the case even with the weak plea agreement. Had Dr. Lee told the whole truth and provided whatever counter-intelligence information he knew, that would mitigate the need to punish him with a long sentence. It might have been acceptable to balance counterintelligence information gained from a cooperating defendant against the need to punish wrongdoing. However, there is no benefit in accepting a plea contingent upon the defendant's cooperation

and then not getting that cooperation. Dr. Lee did not live up to his obligation to be truthful. The ''Position with Respect to Sentencing Factors'' that the Government submitted to the court acknowledged ''concerns that defendant has still not been completely forthcoming about the nature, quality and extent of his improper contacts with scientists of the PRC.'' [63] Dr. Lee's lack of cooperation was further highlighted in the February 1998 DoE ''Impact Statement'' where the authors note that:

''[W]e do not believe that Dr. Lee has been fully cooperative in identifying or describing other classified information he may have compromised. We believe that Dr. Lee confessed to compromising selected classified information in the hope his other, more damaging activities would not be discovered or fully investigated.'' [64]

On 26 February 1998, Dr. Lee failed an FBI-administered polygraph where he was asked whether he had lied to the FBI since his last polygraph examination regarding passing classified information.[65] When interviewed by DoE scientists in March 1998, Dr. Lee again failed to cooperate fully. As Dr. Thomas Cook pointed out during his testimony before the Subcommittee on 29 March 2000, when asked questions about what he had done, Dr. Lee ''repeatedly denied any knowledge or any interest in classified programs and publications. He was, however, the author and/or the technical editor of some of these publications which he denied knowledge of.'' [66] In view of these repeated lies and lack of cooperation, there should be no doubt that Dr. Lee did not comply with the terms of the plea agreement, and the Government could have successfully sought to breach it.

When asked by Senator Specter why he did not breach the plea agreement in view of this lack of cooperation, the prosecuting attorney explained that he could not abrogate the deal because he had nothing to fall back on,[67] and because doing so risked exposing extremely sensitive classified information he had been instructed to protect.[68] The prosecutor advised that he was told that if there was a risk of certain evidence coming out, he would have to drop the case. As the case unfolded, however, there was no risk of that evidence being disclosed. In the absence of any problem as to disclosure of the sensitive information, and had the prosecutor known he could have, or at least might have been able to proceed with the 794 prosecution, then the better course would have been to have abrogated the plea agreement on the basis of Peter Lee's failure to cooperate which could have been established without disclosing any classified information.

Due to the significance of the sensitive information about which the prosecutor was concerned, and the restrictions it placed on the prosecution of the case, it is troubling that at no time during the course of the Subcommittee's review of the case did Mr. Dion or anyone else from DoJ ever brief Congress about the information until after the prosecuting attorney raised the subject in the context of explaining why he had not sought to abrogate the plea agreement. The Classified Information Procedures Act (CIPA) specifically provides procedures whereby the Government can deal with the risks of exposing such information, even to the extent of permitting the Attorney General to decline prosecution if the risk of exposing classified information is too high. There is no evidence that the Department of Justice formally considered this sensitive information in the CIPA context.

The prosecutor's understanding of his limited authority was caused by a breakdown of communications. As he understood his authority, since Dr. Lee had waived the statute of limitations on the 793 count to accept the plea, breaching the plea would leave the Government with only the 1001 count, which was also in the plea. Therefore, the prosecutor felt he had to stick with the plea agreement because it was that or nothing.[69] Even though the prosecutor knew Dr. Lee was lying and was not cooperating, he felt he could not abrogate the plea agreement because he thought he could not charge Dr. Lee under Section 794 due to constraints imposed by the Internal Security Section at Main Justice.

Mr. Dion conceded at the Subcommittee's 12 April 2000 hearing that he did not recall discussing with the prosecuting attorney that he (Dion) might reconsider a 794 prosecution if the proposed plea agreement fell through:

Senator SPECTER: You say no final decision had been made . . . as to whether he would be charged with 794?

Mr. DION: That's correct, sir. . . .

Senator SPECTER: . . . Mr. Dion, when you say no decision had been made and I interrupted you at that point as to what would happen if the plea bargain broke down, [the prosecuting attorney] testified very emphatically that he wanted to proceed with 794 but was told that all he could do was do the best he could under the authorized plea bargain, so that is why he proceeded as he did, asking for only a short period of incarceration and not taking action when Dr. Lee lied on his polygraph and did not give further answers. But are you suggesting, if that plea bargain had broken down, that you might have reconsidered and authorized a 794 prosecution?

Mr. DION: We definitely would have reconsidered our course of action, sir.

Senator SPECTER: Well, did you tell [the prosecutor] that?

Mr. DION: I don't recall specifically if we discussed that or not. We did discuss that no final decision had been made on the 794 and that he should proceed with plea negotiations on that basis.[70]

In the face of the prosecuting attorney's testimony that he was authorized only to take the weak plea agreement or nothing, it seems clear that he was correct on what authority was communicated to him.

The prosecuting attorney was not the only one who did not understand the Internal Security Section's position with regard to a charge under Section 794. An FBI e-mail of 25 November 1997, from an attorney in the National Security Law Unit, to an FBI Supervisory Special Agent in the National Security Division, noted in relevant part that ''According to [the FBI Supervisory Special Agent], ISS/Dion said that if [Dr. Lee] doesn't accept the plea proffer, then he gets charged with 18 USC 794, the heftier charge.''

The Secretary of Defense was told the same thing. On 26 November 1997, Colonel Dan Baur prepared a memorandum for the Secretary of Defense and the Deputy Secretary of Defense, in which he relayed information on the case he had received from the FBI. Colonel Baur's memo stated that DoJ had granted the U.S. Attorney authority to offer to let Lee plead guilty under 18 USC 793 and 18 USC 1001 to avoid being charged under Section 794.[72] Furthermore, the memo noted that ''should Lee decline the offer, the U.S. Attorney will seek an indictment against him for violation of Section 794.'' When read relevant portions of these communications at the Subcommittee's 12 April 2000 hearing, however, Mr. John Dion stated that they were incorrect.[73] Clearly there was a miscommunication on this very important issue, both within the Department of Justice and between DoJ and DoD.

It is surprising and disturbing that a critical piece of information in the case exactly what the Assistant U.S. Attorney was authorized to do and under what terms he was authorized to do it could be subject to such differing interpretations and understandings. In an effort to understand how such a fundamental point could be misunderstood, the Subcommittee traced the information that appeared in Colonel Baur's memo to Secretary Cohen back to its origins. It appears that Mr. Dion spoke to the prosecutor, who then spoke to the Los Angles case Agents. Sometime thereafter, the FBI Supervisory Special Agent in Los Angles was briefed by one of the two case agents, or by both. One of these agents relayed the information to the attorney in National Security Law Unit, who passed it on to the FBIHQ Supervisory Special Agent, for subsequent relay to Colonel Baur. Whatever the actual path of the information—and wherever the mis-communication was introduced—it is clear that the information did not pass, as one might expect, from the Internal Security Section to the Department of Defense. The ISS line attorney handling the case testified that he never spoke to anyone in DoD about the plea discussions. As a consequence of this failure to communicate, the victim agency and officials within the Department of Justice were acting without a clear understanding of the actual decisions that had been made.

It is obvious that the case would have benefitted from more direct supervision by high level Justice Department officials, which would have likely reduced the confusion within the Department of Justice and between DoJ and the Department of Defense. Attorney General Reno was provided with three ''Urgent Reports'' informing her of ''(1) Peter Lee's admission on October 7, 1997, (2) his entry of a guilty plea on December 9, 1997, and (3) the court's imposition of sentence on March 26, 1998.'' [75] On 31 October 1997, as required by law, she also signed the document authorizing the use of FISA-derived information for law-enforcement purposes. She was not otherwise involved in the case, leaving the matter to subordinates. The Deputy Attorney General, Mr. Holder, was also uninvolved in the case.

Mr. John Dion was the supervisory attorney in the Internal Security Section, but one of his subordinates made the substantive decisions in this case. When questioned about allegations that Dr. Lee's revelations extended beyond what he confessed to, for example, Mr. Dion deferred, saying that one of his subordinate attorneys was ''more directly familiar with that information than I am. . . .'' [76] More direct supervision by key DoJ personnel may have ensured a better outcome in this important espionage case.

Analysis of the Anti-Submarine Warfare Revelations

It also appears that Dr. Lee should have been prosecuted in relation to the information he revealed in his May 11, 1997 briefing of Chinese scientists. Charges should have been filed under Section 794(a) which applies to ''any other major weapons system or major element of defense strategy.'' The U.S. nuclear submarine fleet, which comprises one leg of the nation's strategic triad, would qualify as a major weapons system. The potential harm from Dr. Lee's 1997 revelations was described by the Cox Committee Report:

''Lee admitted to the FBI that, in 1997, he passed to PRC weapons scientists classified research into the detection of enemy submarines under water. This research, if successfully completed, could enable the PLA to threaten previously invulnerable U.S. nuclear submarines.'' [77]

To determine whether or not the information Dr. Lee revealed would qualify for prosecution under section 794, the Government first needed to get an assessment of that information. On 14 October 1997, the Assistant

U.S. Attorney handling the case in Los Angeles contacted a representative of the Defense Criminal Investigative Service. He was referred to Dr. Donna Kulla in the Intelligence Systems Support Office where she dealt with the Radar Ocean Imaging (ROI) project on which Peter Lee worked. Dr. Kulla informed the prosecuting attorney that the information that Dr. Lee had revealed was classified CONFIDENTIAL.[78]

In mid-October, the FBI also contacted Dr. Richard Twogood, of Lawrence Livermore National Laboratory (LLNL), and asked for his opinion on the level of classification of Dr. Lee's revelations. Dr. Twogood was the Deputy Associate Director for Electronics Engineering at LLNL, and from 1988 until 1996 had been the Program Leader for the Imaging and Detection Program at LLNL. The Joint U.S./U.K. Radar Ocean Imaging Program, for which Dr. Twogood was the Technical Program Leader from 1990 through 1995, was the single largest component of LLNL's Imaging and Detection Program, and it was the one where Dr. Peter Lee worked and where he would have had access at the DoD SECRET level to the important discoveries and significant advances in the development of methods to detect submarine signatures with remote sensing radars.[79]

Dr. Twogood is an authorized derivative classifier, which means that he can make appropriate judgements about classification based on guidance written by others. Although the Navy had primary jurisdiction over the anti-submarine warfare information that Dr. Lee revealed to the Chinese, Dr. Twogood had personally written some of the classification guidance being used in the Joint U.S./U.K. program, and was therefore familiar with the importance of the information. When he reviewed the videotaped confession on 15 October 1997, Dr. Twogood noted that Dr. Lee himself admitted that he had passed CONFIDENTIAL information. Furthermore, Dr. Twogood informed the FBI that the information was at least CONFIDENTIAL and likely DoD SECRET. More importantly, in Dr. Twogood's view, Dr. Lee's disclosures went right to the heart of the most significant technical achievement of the U.S./U.K. program up until 1995.[80]

The prosecuting attorney was concerned that Dr. Twogood's position could be said to have evolved, from saying it was CONFIDENTIAL when first asked, to the later position that the information was SECRET. The prosecutor was also aware that the defense would be able to find competent scientists who would take a different view about the level of classification due to the similarity of some of the information to what was already in the public domain. These are legitimate concerns, but are not outside the realm of what prosecutors contend with in all espionage cases. They are, by no means, sufficient to justify not going forward with the prosecution.

On 28 October 1997, the ISS attorney handling the case attended a meeting with DoD officials for the purpose of determining whether there was publicly available information that could undermine an espionage prosecution for the 1997 compromise.[81] At the meeting, the DoJ attorney provided DoD officials with the draft Cordova affidavit, and made them aware that the confession had been videotaped, but he did not provide copies of the tapes and no DoD officials asked for them.[82] When asked about why he had not provided copies of the tapes to DoD personnel, the ISS attorney replied:

''Because at that point, at the initial meeting, the purpose was not to get a final classification determination or even a preliminary classification determination on this information. It was only to find out one of two things: what publicly available information might be out there that could potentially compromise a Section 794 prosecution on the 1997 compromise, and what could we say about the program generally, as we have here today, in an open trial setting.'' [83]

By 3 November 1997, the Department of Defense had compiled an extensive list of publicly available information on the topic of radar ocean imaging and provided it to the Internal Security Section. Among the documents was a printout from a LLNL website titled ''Radar Ocean Imaging,'' and prepared remarks that Dr. Twogood had presented in open session before the House Armed Services Committee in April 1994. Both of these documents contained general information about the use of radars to detect submarines.[84] Based on his assessment of these documents, the ISS attorney concluded that Dr. Lee could not be prosecuted under section 794 for the 1997 compromise. As he put it in his 12 April 2000 appearance before the Subcommittee:

''The Web site and Dr. Twogood's testimony, coupled with the fact that the underlying 1995 document was only classified under a mosaic theory, convinced me that there was no section 794 case on the 1997 compromise. In my opinion, Senators, it was not even a close call.''[85]

The ISS line attorney was wrong in concluding that the information was already publicly available.[86] Subsequent analysis showed that Dr. Lee's anti-submarine warfare revelations extended beyond what was in the public domain and therefore remained classified.

On 10 November 1997, in response to a 30 October request from the prosecuting attorney, Lawrence Livermore employee Al Heiman provided an FBI Special Agent with a copy of the Security Plan covering the detection results in the U.K./U.S. Radar Ocean Imaging program. The enclosed memorandum from Dr. Twogood described the classification guidelines established for the program. Paragraph 3 of Appendix A of the classification guideline—indicating that ''processing techniques which, when applied to unclassified or classified data, yield a significant enhancement in signature detectability which might apply to the submarine case'' should be classified SECRET—was directly applicable to the information that Dr. Lee revealed to the Chinese.[87]

On 14 November 1997, Mr. John G. Schuster, Jr., wrote the following memorandum for Navy Captain Earl Dewispelaere:

''The signal analysis techniques briefed by the subject are UNCLASSIFIED when applied to environmental data and they have been presented and published in several unclassified forums. Any application of the technique to submarine wake signatures, however, would be classified at the SECRET level, as called out in current classification guides.

''The material that was briefed appears to have been extracted from a CONFIDENTIAL document. This classification was applied based on concern that the document, taken as a whole, might suggest a submarine application even though it was not explicitly stated. Given that the CONFIDENTIAL classification cannot be explicitly supported by the classification guides and that material similar to that briefed by the subject has been discussed in unclassified briefings and publications, it is difficult to make a case that significant damage has occurred. Further, bringing attention to our sensitivity concerning this subject in a public forum could cause more damage to national security than the original disclosure.

''Based on the above, it is recommended that the disclosure of this material should not be considered as the sole or primary basis for further legal action.'' [88]

On 19 November 1997, the Schuster memorandum was sent to Mr. Dion from Navy General Counsel Steven S. Honigman, who stated that he and the Vice Chief of Naval Operations concurred with Mr. Schuster's conclusions. The Schuster memo has been described by various DoJ officials as a ''body blow'' to the prosecution because of their view that it might be ''Brady material'' or in some way exculpatory as to Dr. Lee. At minimum, it seriously complicated DoJ's case.

The ambiguous Schuster memorandum was apparently designed to later enable the Navy to take virtually any position: the signal analysis techniques are unclassified; they could be classified SECRET; the material was extracted from a CONFIDENTIAL document; significant damage may not be provable; bringing the issue to a public forum could damage national security; avoid legal action. When Mr. Schuster was questioned by the Subcommittee, he was unable to explain why the memo was written as it was or what it meant. The most charitable view of the Schuster memo is that it was misleading and should never have been written.

The Schuster memo was based on incomplete information since neither Mr. Schuster nor any other Navy or DoD personnel reviewed the video or audio tapes of Dr. Lee's confession. When that confession was reviewed at the Subcommittee's request, Mr. Schuster, along with Dr. Donna Kulla and Wayne Wilson, signed a memorandum dated 9 March 2000 stating that Dr. Lee's disclosures should have been classified CONFIDENTIAL.

Two additional memoranda were made available to the Department of Justice regarding Dr. Lee's 1997 disclosures, but were apparently insufficient to change the view of the ISS line attorney handling the case. A classified 17 November 1997 memorandum, referencing a conversation with Dr. Twogood, stated that, contrary to Mr. Schuster's opinion, what Dr. Lee revealed to the Chinese in 1997 should be considered SECRET. The memo provides substantial technical detail to make the case that Mr. Schuster was incorrect in his analysis. Lawrence Livermore followed up with another classified memorandum on 21 November 1997, citing the opinions of both Dr. Twogood and Mr. Jim Brase, who was also knowledgeable of the Radar Ocean Imaging project. Most importantly, these memoranda explain, in considerable scientific detail, how the information Dr. Lee provided to the Chinese differed in ways that made it classified from what had been on the LLNL Web site, in Dr. Lee's 1995 article, and in Dr. Twogood's April 1994 House Armed Services Committee testimony.

When questioned at a Subcommittee hearing on 29 March 2000, Mr. Schuster conceded that Dr. Twogood was the person to accurately evaluate Dr. Lee's disclosures:

Senator SPECTER: Dr. Twogood testified that [Dr. Lee] gave away the heart, the core . . . of the information. Would you disagree with that?

Mr. SCHUSTER: He was talking about the information in the program. That is not my program and I don't know that I could speak to the heart or core of that program.

Senator SPECTER: So that is beyond the purview of your expertise or knowledge?

Mr. SCHUSTER: Yes, sir, relative to the program.

Senator SPECTER: So based on your knowledge, you wouldn't have a basis for disagreeing with what Dr. Twogood said?

Mr. SCHUSTER: Not in that sense. I couldn't comment.[89]

Mr. Schuster sought to explain his 14 November 1997 memo by saying that it was his intent to give his assessment to Captain

Dewispeleare and not to the Department of Justice.[90]

Mr. Schuster testified that he never talked to anyone in the Department of Justice and had never been briefed as to how sensitive Navy and DoD information could be protected by the Classified Information Procedures Act.[91] This is in contrast to the prosecuting attorney, who testified, ''We assured the Navy that we could very confidently protect any classified information primarily because it was my analysis that the stuff was less classified, less dangerous.'' [92]

On 21 May 1999, the Navy again weighed in on the subject, writing to the Cox Committee to assert that ''the draft report mischaracterizes the substance and significance of the disclosure made by Lee during his trip to Beijing in 1997.'' [93] The letter further takes issue with the Cox Committee Report draft for creating the:

''erroneous impression that the technology Lee discussed during his 1997 Beijing trip was highly sensitive and previously unknown, and that his disclosure to the PRC caused grave harm to the national security, imperiling our submarine forces. In the considered judgement of the Navy, fortunately that is not the case.'' [94]

When questioned about this letter, Mr. Preston had no facts to support his disagreement with the conclusions of the Cox Committee Report. He conceded that none of the individuals who had been involved in responding to the Cox Committee Report had ever had access to the tapes or transcripts of Dr. Lee's confession, had made no effort to obtain them, and therefore did not know the full extent of what he revealed.[95]

FISA Issues

The loss of electronic surveillance on Dr. Lee occurred at a critical juncture that may have seriously hampered the Government's ability to collect important counter-intelligence information. When the Foreign Intelligence Surveillance Act (FISA) court order expired on 3 September 1997, it was not renewed. The FBI stated during testimony on 29 March 2000 that the FISA had not been renewed for several reasons, including concerns within the DoJ's Office of Intelligence Policy and Review (OIPR) that the information on Dr. Lee was ''too stale,'' [96] but OIPR disagrees with the FBI's characterization of what happened.[97] In view of the disagreement as to what actually happened with the FISA request, it is only possible to conclude that the FBI should have pursued the matter by making a formal written request. The Counterintelligence Reform Act, which became law at the end of the 106th Congress, will prevent future disputes over who is responsible for the loss of FISA coverage by providing a mechanism for the Director of the FBI to raise the matter directly with the Attorney General, who will be required to reply in writing. In this way, senior officials in both the FBI and the Department of Justice can be held accountable for their judgements on important espionage cases.

Additional issues

In addition to the disclosures of classified information for which Dr. Lee was charged, the Government knew that: (1) Dr. Lee asked for and received falsified travel documents from the Chinese, which he presented to the FBI on 3 September 1997,[98] (2) that his travel expenses in China were paid for by the Chinese,[99] (3) that he enlisted the assistance of Chinese officials associated with the CAEP in his attempt to deceive the FBI, and (4) that he confessed on videotape to intentionally passing classified information during his 1997 trip to China.'' [100] The only charge arising from the events of 1997, however, pertained to Dr. Lee's false statements on his Post-Travel Questionnaire submitted to TRW.[101]

It seems apparent that obtaining false documents from a Chinese official would have warranted a separate count under 18 USC 1001, and would have shown that Dr. Lee's 1997 transgressions extended beyond his lies to his employer. The Government's failure to highlight Dr. Lee's collusion with officials from the Chinese institutes where he visited resulted in an inaccurate portrait of his activities, one that was significantly less sinister than the reality of his conduct. Had this case enjoyed better communication within DoJ and better cooperation from the Navy, and a more aggressive approach by senior DoJ officials, Dr. Lee should have been charged or required to plead to at least four counts: (1) a 794 charge for the 1985 hohlraum revelations, (2) a 794 charge for the 1997 anti-submarine warfare revelations, (3) a false statements charge under 18 USC 1001 for his lies on the TRW Post-Travel questionnaire, and (4) a 1001 charge for submitting false travel documents that he got from the Chinese. Had these charges been filed, there is little doubt that the extent of Dr. Lee's espionage and attempted cover-up would have been made known. As it happened, the full range of Dr. Lee's felonious conduct was never presented to the Court.

It should be noted that Judge Hatter could have requested additional information to gain a better understanding of the case, but he did not. DoE witnesses were present and prepared to testify in camera at the sentencing hearing regarding Dr. Lee's 1985 revelations. Had the Judge heard from these expert witnesses, the harm done by Dr. Lee's significant material assistance to the PRC nuclear weapons program could have been made clear to the Court.

RECOMMENDATIONS

The single greatest problem the Government faced was its failure to come to terms with the significance of the information that Dr. Lee revealed to the PRC, both in 1985 and in 1997. Important were decisions were made without an adequate understanding of exactly what Dr. Lee had revealed and what were the consequences of those revelations. To prevent these problems from happening again, I am introducing legislation that would require victim agencies to produce a written ''damage statement'' which states the level of classification of the material alleged to have been revealed, and describes in detail the potential harm to national security from such revelations. The prosecution team should consider the ''damage statement'' before any decision is made as to whether the case should be taken to trial or a plea bargain should be offered.

The Department of Justice and the victim agency may wish to consult informally before the damage assessment is reduced to writing so that the victim agency will not unwittingly and incorrectly create Brady [102] problems and hamper any ultimate prosecution. The risks of creating potential Brady material—as might happen if an initial classification assessment were later reviewed and changed—are obvious, but the risks of proceeding to a plea without a clear written statement, made by competent officials, as to the level of classification of the material in question are even greater.

As noted previously, the Counterintelligence Reform Act, which became law in December 2000, contains a provision requiring that the Justice Department provide briefings to victim agency officials regarding the manner in which the Classified Information Procedures Act enables a prosecution to go forward without revealing additional secrets. Contemporaneous written records, particularly the Schuster memo, make it clear that the Navy was reluctant to proceed with a prosecution due to sensitivity about a public discussion of anti-submarine warfare, but the process established by CIPA could have ensured that no sensitive information was disclosed. In the absence of any risk of disclosing classified information, the Navy's general unwillingness to have anti-submarine warfare discussed in a public proceeding should have had no bearing on the Government's decision to proceed with a prosecution. The briefing process established by the Counterintelligence Reform Act will ensure that any legitimate concerns of the victim agency are addressed, and that the Justice Department will be able to distinguish between real security concerns and a general unwillingness to support a prosecution.

Although I do not intend to introduce legislation requiring it, I believe that key instructions from Main Justice (Internal Security Section, etc.) to the U.S. Attorney's Office with responsibility for prosecuting the case, including charging authority and plea bargain authority, should be in writing. These written instructions should be shared with the FBI and the victim agency so they have an opportunity for input before any final decisions are made. There can be no doubt that key officials in this case were operating under severe misunderstandings. The prosecuting attorney thought his instructions were that he had to accept a plea under Sections 793 and 1001 or nothing, while the Internal Security Section claimed that it was still open to a possible 794 prosecution. Key officials within the Department of Defense, up to and including the Secretary, were informed that if Dr. Lee refused the plea agreement, he would be prosecuted under Section 794. With so much misunderstanding, it is surprising that the prosecution did not suffer even more.

CONCLUSION

This was an important espionage case, yet remarkably little was documented during the key weeks leading up to the plea agreement in late 1997. Decision-makers within the Department of Justice and the Department of Defense clearly have discretion in executing their responsibilities, and should not be second-guessed at every turn. However, the need to strike a balance between protecting the national security—which can conceivably be achieved by not prosecuting in certain circumstances—and the equal application of the laws to ensure justice is done, requires that when judgements are made for which the reasons are not immediately apparent, the decision-makers must offer some explanation for their actions. In the absence of such a documented rationale for what may be necessary exceptions, the result is what appears to be arbitrary application of the laws, an outcome which protects neither the national security nor the law. The Government's handling of the Dr. Peter Lee case demonstrates clearly that ongoing, thorough congressional oversight is essential.

102. See Brady v. Maryland 373 U.S. 83 (1963), in which the Supreme Court declared that, regardless of the good faith or bad faith of the prosecution, the suppression of evidence favorable to the accused violated due process where the evidence is material to either guilt or punishment. This court ruling imposes an obligation on the Government to provide to the defense any evidence or information in its possession which could be favorable to the accused.

Mr. SPECTER. Mr. President, I ask unanimous consent that two letters from the Justice Department be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF JUSTICE,
FEDERAL BUREAU OF INVESTIGATION,
Washington, DC, December 19, 2001.

Hon. ARLEN SPECTER,
U.S. Senate, Washington, DC.

DEAR SENATOR SPECTER: We have no objection on national security grounds to publication of your final report on the Wen Ho Lee investigation. We have not reviewed the report for the accuracy of the facts or conclusions reflected therein.

Sincerely,

JOHN E. COLLINGWOOD,
Assistant Director, Officer of Public and Congressional Affairs.

U.S. DEPARTMENT OF JUSTICE,
FEDERAL BUREAU OF INVESTIGATION,
Washington, DC, December 20, 2001.

Hon ARLEN SPECTER,
U.S. Senate, Washington, DC.

DEAR SENATOR SPECTER: We have no objection on national security grounds to publication of your final report on the Peter lee investigation. We have not reviewed the report for the accuracy of the facts or conclusions reflected therein.

Sincerely,

JOHN E. COLLINGWOOD,
Assistant Director, Office of Public and Congressional Affairs.

Mr. SPECTER. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. One minute.

Mr. SPECTER. As promised, I yield back the remainder of my time.

VOTE ON CONFERENCE REPORT ACCOMPANYING H.R. 3061

The PRESIDING OFFICER. All time having expired, the question occurs on agreeing to the conference report to accompany H.R. 3061.

Mr. SPECTER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. REID. I announce that the Senator from Hawaii (Mr. AKAKA) is necessarily absent.

Mr. NICKLES. I announce that the Senator from North Carolina (Mr. HELMS) and the Senator from Nevada (Mr. ENSIGN) are necessarily absent.

The PRESIDING OFFICER (Mrs. CLINTON). Are there any other Sentors in the Chamber desiring to vote?

The result was announced—yeas 90, nays 7, as follows:

[Rollcall Vote No. 378 Leg.]

YEAS—90

Allen	Domenici	Lott
Baucus	Dorgan	Lugar
Bayh	Durbin	McConnell
Bennett	Edwards	Mikulski
Biden	Enzi	Miller

Fitzgerald	Smith (NH)	

NOT VOTING—3

Akaka	Ensign	Helms

The conference report was agreed to.

Mr. DURBIN. Madam President, I move to reconsider the vote.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. BREAUX. Madam President, I yield to the Senator from Pennsylvania.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Madam President, I congratulate all those who worked on this bill.

I have already extended my congratulations to my distinguished colleague, Senator HARKIN. I also thank Senator BYRD and Senator STEVENS. We have a very devoted staff. I would like to thank them. For the majority: Ellen Murray who is the majority clerk and an extraordinary worker; Jim Sourwine, Mark Laisch, Erik Fatemi, Lisa Bernhardt, Adrienne Hallett, Adam Gluck, and Carole Geagley. I did not know the majority had so many more than we do. On the minority staff, Bettilou Taylor—Senator Taylor—Mary Dietrich, Sudip Parikh, and Emma Ashburn.

This was an extraordinary bill, very complicated, $123 billion, lots of requests, lots of pages, lots of proofreading, and we are glad it is finished.

I yield the floor.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. DASCHLE. I ask unanimous consent that the Senate proceed to executive session to consider Executive Calendar Nos. 616 and 617; that the nominations be confirmed, the motions to reconsider be laid upon the table, any statements relating to the nominations be printed in the RECORD, the President be immediately notified of the Senate's action, and the Senate return to legislative session.

The PRESIDING OFFICER. Is there objection?

Mr. HARKIN. Reserving the right to object.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. I ask the leader, what nominees?

Mr. DASCHLE. I advise the Senator from Iowa that these nominees are for the First Vice President of the Export-Import Bank and for a member of the Board of Directors of the Export-Import Bank.

Mr. HARKIN. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations were considered and confirmed, as follows:

EXPORT-IMPORT BANK OF THE UNITED STATES

Eduardo Aguirre, Jr., of Texas, to be First Vice President of the Export-Import Bank of the United States for a term expiring January 20, 2005.

J. Joseph Grandmaison, of New Hampshire, to be a Member of the Board of Directors of the Export-Import Bank of the United States for a term expiring January 20, 2005.

LEGISLATIVE SESSION

The PRESIDING OFFICER. The Senate will now return to legislative session.

INVESTOR AND CAPITAL MARKETS FEE RELIEF ACT

Mr. DASCHLE. I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 74, H.R. 1088.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 1088) to amend the Securities Exchange Act of 1934 to reduce fees collected by the Securities and Exchange Commission, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. DASCHLE. I ask unanimous consent that the bill be read a third time and passed, the motion to reconsider be laid upon the table, and any statements relating to the bill be printed in the RECORD, with no intervening action.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 1088) was read the third time and passed.

PROVIDING FOR SINE DIE ADJOURNMENT OF THE SENATE AND HOUSE OF REPRESENTATIVES

Mr. DASCHLE. Madam President, I now call up H. Con. Res. 295, the adjournment resolution. I ask that the Senate vote on adoption of the concurrent resolution, with no intervention action or debate.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 295) providing for the sine die adjournment of the first session of the One Hundred Seventh Congress.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. DASCHLE. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The question is on agreeing to the concurrent resolution.

The clerk will call the roll.

Mr. REID, I announce that the Senator from Hawaii (Mr. AKAKA) is necessarily absent.

Mr. NICKLES, I announce that the Senator from North Carolina (Mr. HELMS), and the Senator from Nevada (Mr. ENSIGN), and the Senator from Kansas (Mr. ROBERTS) are necessarily absent.

The PRESIDING OFFICER (Mr. MILLER). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 56, nays 40, as follows:

[Rollcall Vote No. 379 Leg.]

YEAS —- 56

Baucus	Edwards	Lincoln
Bennett	Feingold	McCain
Biden	Feinstein	Mikulski
Bingaman	Fitzgerald	Miller
Boxer	Graham	Murkowski
Breaux	Gramm	Murray
Bunning	Hagel	Nelson (FL)
Byrd	Harkin	Nelson (NE)
Cantwell	Hollings	Reed
Carnahan	Inouye	Reid
Carper	Jeffords	Rockefeller
Chafee	Johnson	Sarbanes
Cleland	Kennedy	Shelby
Cochran	Kerry	Stabenow
Corzine	Kohl	Stevens
Daschle	Landrieu	Torricelli
Dodd	Leahy	Wellstone
Dorgan	Levin	Wyden
Durbin	Lieberman	

NAYS — 40

Allard	Domenici	Santorum
Allen	Enzi	Schumer
Bayh	Frist	Sessions
Bond	Grassley	Smith (NH)
Brownback	Gregg	Smith (OR)
Burns	Hatch	Snowe
Campbell	Hutchinson	Specter
Clinton	Hutchison	Thomas
Collins	Inhofe	Thompson
Conrad	Kyl	Thurmond
Craig	Lott	Voinovich
Crapo	Lugar	Warner
Dayton	McConnell	
DeWine	Nickles	

NOT VOTING—4

Akaka	Helms
Ensign	Roberts

The concurrent resolution (H. Con. Res. 295) was agreed to, as follows:

H. CON. RES. 295

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on the legislative day of Thursday, December 20, 2001, or Friday, December 21, 2001, on a motion offered pursuant to this concurrent resolution by its Majority Leader or his designee, it stand adjourned sine die, or until Members are notified to reassemble pursuant to section 2 of this concurrent resolution, whichever occurs first; and that when the Senate adjourns at the close of business on Thursday, December 20, 2001, or Friday, December 21, 2001, on a motion offered pursuant to this concurrent resolution by its Majority Leader or his designee, it stand adjourned sine die, or until Members are notified to reassemble pursuant to section 2 of this concurrent resolution, whichever occurs first.

SEC. 2. The Speaker of the House and the Majority Leader of the Senate, acting jointly after consultation with the Minority Leader of the House and the Minority Leader of the Senate, shall notify the Members of the House and the Senate, respectively, to reassemble at such place and time as they may designate whenever, in their opinion, the public interest shall warrant it.

Mr. DASCHLE. Mr. President, I move to reconsider the vote.

Mr. DURBIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DASCHLE. Mr. President, it was my hope that we could go immediately to the final vote on the conference report on the Defense appropriations bill. I make that recommendation. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BREAUX. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ECONOMIC STIMULUS PACKAGE

Mr. BREAUX. Mr. President and colleagues, while we are waiting some other colleagues to return to this Chamber to negotiate, I would like to make just a short comment on the economic stimulus package.

I would imagine that right now the political pundits of Washington, and really the political pundits all around the country, are already sharpening their pencils, and the editorial writers are already banging away on their typewriters, as well as the political consultants and all the special-interest groups are preparing, already, their attack ads to blame someone for the failure of this Congress to complete and pass an economic stimulus package.

Over the next several days, and possibly even over the next several weeks, we are going to hear some say: Well, it is TOM DASCHLE'S fault that we do not have an economic stimulus package because he did not bring the package to the Senate floor. We will also hear that, no, it is the Republican leader's fault because they only supported a package that helped the rich special interests. Or perhaps we will hear that, no, it is the fault of the President of the United States for not providing the leadership to bring both sides together.

The blame game has now begun. I have noticed the papers already this morning.

The Wall Street Journal said: The White House and congressional leaders fail to reach a compromise and now turn their efforts instead to casting blame for its failure.

The front page of the Washington Post this morning said: Yesterday, as both sides began engaging in a furious legislative end game designed to assign blame to the other party for failure . . .

The front page of the New York Times said the same thing, in essence. They said: The Bush administration, along with others, turned instead to partisan finger pointing over who was to blame for the impasse.

So, my colleagues and folks around the country, the blame game has already begun.

But one thing is very certain, and that is Americans cannot go to the grocery store and buy bread and buy milk with blame. It does not work.

When Congress fails to act, it is not our political parties that are hurt but the people we represent are truly the ones who are hurt.

Unfortunately, our political parties sometimes believe that they are actually helped when nothing is done so that they can blame the other side for failure and perhaps pick up a few congressional seats or perhaps even take over the White House.

Perhaps we, as members of the centrist coalition, should have gotten involved sooner. Maybe we should have offered our congressional proposal, blending the best ideas from both sides, earlier than we did. It might have helped.

Perhaps the White House should have become engaged earlier than they did. Maybe they should have been stronger in telling both sides to work together for an agreement.

Perhaps, perhaps, maybe, maybe, might have, might have, but in the end our biggest enemy was time. There simply was not sufficient time remaining to take up an extremely complicated package, only passed late last night by the House of Representatives, and to try to explain it sufficiently to colleagues in the Senate in order for people to take a rational vote on that legislation.

To those who try to blame Leader TOM DASCHLE, I say, baloney. I was there. I worked hard for an agreement. But we did not in the end—and we do not now—have the votes to pass such a package in the Senate. I know that. We all know that. And it serves no one to bring up, in the last few hours, a very complicated package only for political purposes when we know the votes are not there.

The good news is that we came very close and can use the progress that we made in these negotiations to pass a package when we return in January. Both sides moved. We moved on taxes. We moved on health coverage. But only if we allow the outside forces to poison the wells so badly that we cannot negotiate will we not be able to reach an agreement.

Both sides must realize in a divided government we must compromise or nothing will get done. Businesses will get no relief or incentives to grow. Individuals will get no stimulus checks.

Unless we come together and reach an agreement, businesses will get no relief. They will get no incentives to grow. Individuals, on the other hand, will get no stimulus checks. They will get no extended unemployment compensation. They will get no Federal assistance to buy their health insurance.

For the first time in this country's history, we had the Federal Government paying for over one-half of an unemployed worker's health insurance. Now they must pay 100 percent. We came close.

The special interests in both our Democratic Party and our Republican Party must realize that in representing their constituents, they need to be flexible. They cannot insist that those of us who care about them be forced into a ''we want it all or nothing'' situation. In that case, the ''all or nothing'' situation produces nothing.

Is ''nothing'' what they want for the people they represent? Can they tell the workers, over the holidays, that not getting $14 billion in stimulus checks and not getting $18 billion in unemployment money and not getting $21 billion more in health assistance was the right thing for them because there were other provisions that would not directly help them that was also part of the package?

Can business lobbyists say they are better off with no accelerated depreciation because they wanted it for 3 years? Or are they really better off with no AMT relief because they wanted a permanent repeal instead of only a partial repeal?

Is it not better to reach an agreement that you can get 70 percent of what you want and then fight for the remainder in the future?

Neither Medicare nor Social Security started out providing everything they

provide today. Government is a gradual thing, and that is not bad. It is what American Government does best. We evolve. We cannot be stagnant.

More and more Americans look at Washington and wonder why it does not work as it should. Why do grown men and women fight and argue when solutions need to be reached? Especially is this true as a feeling among younger voters.

Let me conclude by pointing out that in the height of the Presidential election squabble in Florida, the Gallup organization asked Americans at that time, in a national poll, about their political affiliation. Shockingly, for some Americans, the poll came back and said that 42 percent of Americans identified themselves as Independents. That was more than who identified themselves as either Democrats or Republicans.

There is a message there: Americans do not want blame as a theme song for their Government. They want results. They want results that help them, and they do not particularly care who produces it.

I hope we can all learn from this experience. The greater challenges ahead can be solved only by working for the greater good. We can only do that by working together in order to achieve it.

I yield the floor.

Mr. MILLER addressed the Chair.

The ACTING PRESIDENT pro tempore. The Senator from Georgia.

Mr. DASCHLE addressed the Chair.

The ACTING PRESIDENT pro tempore. The majority leader.

Mr. DASCHLE. Mr. President, I appreciate very much the Senator from Georgia allowing me to make a unanimous consent request.

UNANIMOUS CONSENT AGREEMENT—H.R. 3338 CONFERENCE REPORT

Mr. DASCHLE. Mr. President, we have been negotiating with a number of our colleagues regarding the Defense appropriations conference report. I would like to propound a unanimous consent request, with an expectation that it may need further clarification.

I ask unanimous consent that the Senator from Arizona, Mr. MCCAIN, be recognized; that the Senator from West Virginia, the chairman of the Appropriations Committee, be recognized; that the two subcommittee chairs, the Senator from Alaska and the Senator from Hawaii, also be recognized; and that the Senator from Michigan be recognized; that upon the recognition of those Senators and their remarks in regard to the Defense appropriations conference report, the Senate vote immediately on its final passage.

The ACTING PRESIDENT pro tempore. Is there objection?

Mrs. HUTCHISON. Reserving the right to object, I just ask the question, Will the subcommittee chairs be designating time from their time?

Mr. DASCHLE. The answer is yes. It is not necessarily in that order, I would clarify, Mr. President.

The ACTING PRESIDENT pro tempore. Is there objection?

Without objection, it is so ordered.

Mr. DASCHLE. I thank all of my colleagues.

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2002—CONFERENCE REPORT

The PRESIDING OFFICER (Mr. DODD). The clerk will report the conference report.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3338) making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes, having met, have agreed that the House recede from its disagreement to the amendment of the Senate, agree to the same with an amendment, and the Senate agree to the same, signed by all conferees on the part of the two Houses.

(The conference report is printed in the House proceedings of the RECORD of December 19, 2001.)

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. Mr. President, I am pleased to rise today to offer my unqualified support for the conference agreement that was just reported. I am pleased to present the recommendations to the Senate today as division A of this measure. The recommendations contain the result of lengthy negotiations between the House and Senate managers and countless hours of work by our staffs acting on behalf of all Members.

The agreement provides $317.2 billion, the same as the House and Senate levels, consistent with our 302(b) allocations.

In order to accommodate Members of the Senate, may I request that I be given the opportunity to now set aside my statement and yield to the Senator from Arizona for his statement. Upon his conclusion, I will resume my statement.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The Chair recognizes the Senator from Arizona.

Mr. MCCAIN. Mr. President, I am not ready to give my statement yet. I am still having my people come over with information. As a matter of fact, we haven't even gotten through the entire bill yet. I will be ready shortly.

The PRESIDING OFFICER. The Chair recognizes the Senator from Alaska.

Mr. STEVENS. Mr. President, I join the distinguished chairman of the defense subcommittee, Senator INOUYE, in presenting the fiscal year 2002 Department of Defense conference report to the Senate.

This bill enjoys my total support, and I urge all my colleagues to support this conference report, and the funds provided herein that are vital to our national security.

In addition to the base funding for the current fiscal year, this bill also includes the allocation of $20 billion in emergency supplemental funding provided by Congress immediately after the September 11 attack.

These funds fulfill the commitment made by Congress to respond to the needs of the victims of the September 11 attack. I commend the Governor of New York, the Mayor of New York City, and the two Senators from New York, for their stalwart work to ensure these funds meet the needs of their constituents.

The enhanced funding provided in Division B of this bill for homeland defense will also have a significant effect on the security of this nation.

It is appropriate that the homeland defense funding be included in this bill—in the war against terrorism, there are no boundaries.

The money in this bill to secure our borders, our airports, our ports, to protect against bioterrorism and to assist first responders will send a strong signal to our citizens, and our potential adversaries, of our determination to win this war on terrorism on every front.

Turning more specifically to the underlying defense bill in Division A, there are two matters in particular I wish to address today: missile defense and the tanker leasing initiative.

The Senate version of the bill provided the full $8.3 billion requested by Secretary Rumsfeld for missile defense programs. The House bill provided approximately $7.8 billion.

During our conference, we were informed of two major program changes in missile defense.

The Undersecretary of Defense for acquisition, on behalf of Secretary Rumsfeld, reported that the department would terminate the Navy area defense system, and the SBIRS-low satellite program.

Funding for these two programs, totaling more than $700 million, was realigned to other defense priorities within and outside missile defense.

For example, of the Navy area program funds, $100 million was reserved for termination liabilities for the program and $75 million was transferred to the airborne laser program.

From the SBIRS-low termination, $250 million is reserved for satellite sensor technology development—which could all be used for further work under the existing SBIRS-low contracts, if the department so chooses.

Addressing the significance of protecting our deployed forces, the conference agreement provides an additional $60 million over the budget request to accelerate production of the Patriot PAC–3 missile.

In his statement, the chairman of the subcommittee articulated his support for the air refueling tanker initiative, and I appreciate his kind words on my role in that effort.

Contrary to some reports, this provision was not a last minute industry bailout, hidden from public view. In fact, this responds to military need,

and unforeseen economic circumstances—and opportunities.

The effort to lease these aircraft reflects an extensive review of the Air Force's needs, and the crisis it faces in the air refueling fleet.

This lease provision, provides permissive authority for the Secretary of the Air Force to replace the 134 oldest KC–135E aircraft with new tankers.

These aircraft average 42 years of age, and have not received the comprehensive ''R'' model refurbishment.

All of these aircraft are operated by the Air National Guard, at bases throughout the Nation. The lease will provide the new tankers to the Air Force, and permit recently refurbished ''R'' models to cascade to the Guard.

This permits the National Guard to have a common fleet of aircraft, providing significant training and maintenance cost savings. They daily do the refueling operations for our Air Force planes nationally and throughout the world.

The KC–135E aircraft require extensive depot maintenance. Once every 5 years, we lose that aircraft for an average of 428 days, and many more than 600 days.

That means a squadron loses that aircraft for at least 15 months, up to 2 years.

At any one time, one third of the fleet is unavailable for service—redlined—putting that much more pressure on the rest of the force.

During peacetime, one might argue we can survive with an inadequate air refueling fleet. Now, in wartime, the price for that failure becomes clear.

Every sortie flown into Afghanistan requires at least two, and sometimes as many as four, aerial refuelings. This is the highest rate of sustained operations we have maintained since the gulf war.

In the 10 years since that conflict, we have not purchased one new tanker—we've watched the fleet age and deteriorate. I know the feeling of watching a fuel gauge determine the fate of an aircraft and crew. It is not a comfortable or pleasant one. I remember one time I ran out of fuel on landing and had to have the aircraft towed off the field.

This may sound like an arcane discussion, compared to the allure of new F–22's, or B–2 bombers, but let me give you an old transport pilot's perspective.

Our forces today have virtually no margin for error—an F–15 doesn't glide very long, and an F–18 that cannot make the carrier deck has little hope for survival.

We can buy the exciting, and needed, new weapons platforms but without the gas they'll never get home after the fight.

Some have suggested the leasing approach is not a good deal for the Government. That is simply wrong. This provision includes the most stringent requirements ever set for an aircraft leasing program.

The law states that the cost to the Air Force for the lease cannot exceed 90 percent of the fair market value of the aircraft. That means the Secretary cannot sign a contract if the lease cost would exceed that threshold.

The Secretary must report to the Congress all the details of any proposed contract in advance of signing any agreement. We will get to look at this contract before the deal is set.

Mr. President, nothing in the leasing authority provided in this bill is directive—the discretion rests solely with the Secretary of the Air Force.

I have had extensive discussions about this initiative with the Secretary, with the former Commander of the Transportation Command, Gen. Robertson, and other DOD officials.

All have endorsed this approach.

The language in this bill is the product of extensive discussions with CBO and OMB. No objection has been raised.

Secretary Rumsfeld's letter on the bill did not object to this initiative, nor did the Department's detailed appeals to the Appropriations Conference.

Since taking office, Secretary Rumsfeld has sought to chart a course to manage the Pentagon consistent with the best practices in the private sector.

This initiative seeks to do just that—give the Secretary all the tools we can to meet the Department's modernization needs, within the tight budget constraints he will face.

The airlines lease aircraft, private businesses lease aircraft, our ally Great Britain currently leases U.S. built C–17 aircraft.

In addition, Great Britain has issued a solicitation to lease air refueling tankers, and the Boeing 767 is the lead candidate.

We did not decide to choose the 767. The Air Force told us this is the right aircraft for the mission.

Gen. Jumper, the Air Force Chief, envisions moving the Air Force to a common wide body platform for a range of missions—he determined the 767 is the best platform.

Interestingly, two of our closest allies—Italy and Japan—have already signed contracts to purchase 767 tankers on a commercial basis.

Some have suggested that this provision should have opened the door to competition with Airbus.

The problem is that Airbus does not have a tanker on the world market. More telling, two of the Airbus founding partners—Britain and Italy—have both opted for the American-built tanker for their military.

Personally, I have complete confidence we can extend this authority to the Secretary of the Air Force, and he will only use it if he believes it is absolutely in the best interest of the Air Force.

I want to close by thanking again our Chairman, Senator INOUYE, for his leadership in moving this bill through committee, the floor and conference in only 15 days—an incredible achievement.

Also, our partners in the House, Chairman LEWIS and Mr. MURTHA, and the full committee chairman, Congressman BILL YOUNG and ranking member, DAVE OBEY, deserve tremendous credit for managing their bill in the House, and working out this package in conference.

Mr. President, I yield to the Senator from Texas, Mrs. HUTCHISON.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mrs. HUTCHISON. Mr. President, I thank Senator STEVENS and Senator INOUYE for the hard work they did on this bill. Since this bill was left to be the last appropriations bill passed this year, it had many difficulties. During this time, our Armed Forces were prosecuting a war on last year's budget. That is very serious and it is unacceptable. We must pass this bill today. It is a good bill.

Our armed services need the extra help that is in this bill. It provides $26 billion more in spending for the Department of Defense than was appropriated last year. That gives us the added equipment we need to be in Afghanistan and throughout the world, as we are today. It also reduces the military/civilian paygap by funding a pay raise of 5 percent across the board and up to 10 percent for targeted ranks with low-retention rates.

Thank goodness we are trying to address people who are leaving the armed services because we just can't compete with the private sector. Also, I want to mention the TRICARE For Life; $3.9 billion in this bill implements TRICARE For Life. This is something I worked on for a long time to make sure that those who have served in our military, who have done what we asked them to do for our country, will never be left without full medical care. That is something they deserve, it is something we promised, and it is a promise we must keep.

I am very pleased that, finally, Desert Storm veterans are getting the notice they deserve for the symptoms that one in seven of them have shown after returning to our country after serving in Desert Storm. One in seven of the people who served in the Desert Storm operation came back with symptoms and different stages of debilitation that they did not have when they went to serve our country.

But for years, the Department of Defense and the Department of Veterans Affairs have denied there was any kind of causal connection between these symptoms and their service. It just wasn't plausible.

I happened to learn about some research that was being done at the University of Texas, Southwestern Medical School, that did find a causal connection in a very small unit; it was the first research that really showed the causal connection between actual brain damage and service in the gulf war.

This last week, I am proud to say, the Secretary of Veterans Affairs, Secretary Principi, released a study indicating that gulf war vets are twice as

likely to get ALS; that is, Lou Gehrig's disease. To his credit, Secretary Principi immediately widened the gulf war presumption to cover victims of Lou Gehrig's disease. I have also extended for 5 years—and the President has signed the bill—the presumption that the people with these symptoms would still be able to get the benefits to which they are entitled, even though it hasn't been settled exactly what Desert Storm disease is.

So the bill before us today does have $5 million to continue the research that shows that causal connection. That will not only help keep our promise to the people who served in Desert Storm, but it will also help us understand those whom we are sending today into places where there could be chemical warfare and what we might do to give them the best protection against that chemical warfare. It will also help us to inoculate and treat those who might be affected by chemical warfare in the future. This is something I worked on in the bill, and I appreciate so much Senator INOUYE and Senator STEVENS supporting this particular cause because I think these veterans have been ignored for too long. It is time we treated them the way they deserve to be treated, and that is to give them the medical care and the research to find the cause of the debilitating disease that we see in so many of the people.

Finally, I am very pleased that the bill provides for missile defense. Clearly, we now have a cause to go forward on missile defense. I have always thought it was better to err on the side of doing more for defense, even if we weren't sure what the threats were. Now we know there are people throughout the world who will attack Americans just because we are Americans. So we must defend against that. That is what the missile defense system will prepare our country to do.

This bill provides for that. I close by saying there may be small things in this bill that people don't like. I am sure there are some things in this bill that some people would not support. But the big things are done right. It would be inexcusable for us not to fully fund the war, while we have troops on the ground fighting for the very freedom that we have in this country and that we enjoy in this country.

As we are leaving Congress to go home for the holidays with our families, we must show our appreciation to those who are in the caves in Afghanistan, in Uzbekistan and Pakistan, and who are on missions in Saudi Arabia and Kuwait, who are ready to go at the call of our country, if need be. We want to remember them. I think the most important way we can say thank you to those people is to fully fund their training, their equipment, and the support they deserve as they are going forward in the name of freedom and representing our country in the best possible way.

I thank Senator INOUYE for being the great leader that he is and Senator STEVENS for working in a bipartisan way to assure our troops that we appreciate them and we are going to give them everything they need to do the job they are doing.

I yield the floor.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. On behalf of Senator STEVENS and I, I express our gratitude to the Senator from Texas for her kind remarks.

UNANIMOUS CONSENT AGREEMENT—S. 1214

Mr. INOUYE. Mr. President, I ask unanimous consent that when the Senate considers Calendar No. 161, S. 1214, the port security bill, the only amendment in order be the Hollings-McCain-Graham substitute amendment, which is at the desk; that there be a time limitation for debate of 17 minutes to be divided as follows: 5 minutes each for Senators HOLLINGS, MCCAIN, and MURKOWSKI, and 2 minutes for Senator HUTCHISON; that upon the use or yielding back of time, the substitute amendment be agreed to, the bill, as amended, be read the third time and passed, and the motion to reconsider be laid upon the table, with no further intervening action or debate.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. INOUYE. I yield 5 minutes to the Senator from Michigan.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

The PRESIDING OFFICER. The Chair recognizes the Senator from Michigan.

Ms. STABENOW. I thank the Chair.

Mr. President, I rise to applaud a provision in the supplemental portion of the Defense appropriations conference report. This conference report includes a bill authored by myself and Senator KYL that will help honor the victims of the September 11 attacks. It is called the Unity in the Spirit of America Act, or the USA Act.

We all witnessed a great national tragedy 3 months ago. While the deaths and damage occurred in New York, Washington, and in the fields of Pennsylvania, a piece of all of us died that day. Many people came up to me in Michigan after the attacks and asked: What can I do? I have given blood, I have donated to relief efforts, but I want to do more.

We all shared in the horror and now everyone wants to share in the healing, but how? Then a constituent of mine, Bob Van Oosterhout, wrote me with an idea: Why not have the Federal Government devise a program that will encourage communities throughout the Nation to create something that will honor the memory of one of the victims lost in the attack, one by one by one. Together these local memorials to honor individuals would dot our Nation and collectively honor all of those who were lost in the attacks. What could be simpler or more moving?

From that idea came the Unity in the Spirit of America Act. Here is how it works:

Communities—they can be as small as a neighborhood block or nonprofit organizations, houses of worship, businesses or local governments—are encouraged to choose some kind of project that will unite and help their communities. It is a way they can give back to their community.

Applications and the assigning of names for each project will be handled by the Points of Light Foundation. Basically, we will see a project in a local community dedicated to one of the victims of September 11. The Points of Light Foundation will set up a Web site, applications, and procedures for this. This is privately funded. It is an opportunity for our neighbors, coworkers, and communities across the United States to decide what will be a living legacy to those who died by helping each other.

The Points of Light Foundation will track each project's progress on their Web site. The only rule is that qualified projects should be started by September 11, 2002. Then on that day, as all over America we gather to grieve over the first anniversary of the attack that enraged the world, we will be able to look over thousands and thousands of selfless acts that made our country better.

In our sadness, we can create thousands of points of light across our Nation and show the world that our resolve was not fleeting and our memories are not short. They will see the unity in the spirit of America.

I have many Members to thank for making the USA Act happen. First and foremost, I thank my chief cosponsor, Senator JON KYL, for his commitment and hard work. I thank the chairman and ranking member of the Appropriations Subcommittee on Defense, Senators INOUYE and STEVENS, for their support. I also express my gratitude to Senators MIKULSKI and BOND for their guidance in moving this legislation through the process. Finally, I thank all the cosponsors, who include our Senators from New York and Virginia.

I am very pleased we have come together on our last day in a bipartisan way to put forward this important living legacy to the victims of September 11.

Mr. President, I now yield to my colleague and friend who has been my partner in the USA Act, and that is Senator JON KYL.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. KYL. Mr. President, I thank the Senator from Michigan for her leadership in this effort. It has been a pleasure to work with her on this legislation. It demonstrates a couple of things: First, that all Americans care about the victims of the tragedy of September 11. Second, that the U.S. Government can be a facilitator but does not have to be the financier of good works on behalf of the people of the country.

At the conclusion of my remarks, I will ask to print in the RECORD a letter

from Robert K. Goodwin who is the president of the Points of Light Foundation.

The president of the Points of Light Foundation points out that there are no Federal funds used in this project but, rather, that money has been raised by people from around the country to support these projects that literally will exist in every corner of this great country. Each one of these projects will be named for one of the victims of the September 11 tragedy.

What the Points of Light Foundation will do is help coordinate so there is a common listing of all the different projects, in which part of the country they are located, and coordinating with the names of the victims. This is a good project for the American people to demonstrate their support for the country, to do good works at the same time, and to memorialize the victims of the tragedy of September 11.

I compliment the cosponsor of the legislation and the chairman and ranking member of the committee for including this legislation in the Defense appropriations bill. I appreciate our colleagues' support for this important project.

Mr. President, I ask unanimous consent that the letter from the president of the Points of Light Foundation be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

POINTS OF LIGHT FOUNDATION,
Washington, DC, December 20, 2001.

Hon. JON KYL,
U.S. Senate,
Washington, DC.

DEAR SENATOR KYL: The Points of Light Foundation would like to take this opportunity to sincerely thank you for your support and leadership of the Unity in the Spirit of America (USA). We were informed last evening that it will indeed be a part of the FY 2002 Defense Appropriations Bill. We are excited and humbled by this opportunity to create living memorials through service and volunteering, to those who perished as a result of the September 11th terrorist attacks.

Please also let me extend my gratitude to your Legislative Director, Tom Alexander. His hard work in securing the necessary support was particularly appreciated as the bill made its way through several conference committees. His continued accessibility and hands-on approach were invaluable.

As the USA Act stipulates, no federal funds will be utilized in carrying out its provisions. We are extremely pleased to inform you that we have secured significant private and corporate donations to fulfill this most worthy project. In fact, The Walt Disney Company has made a substantial commitment, paving the way for countless community-based memorial service projects, as well as an expansive national media campaign. We look forward to continuing to work closely with yourself and Senator Stabenow in cultivating this important initiative.

In closing, please accept our gratitude and best wishes for a safe, happy and healthy holiday season.

Your very truly,

ROBERT K. GOODWIN
President & CEO.

The PRESIDING OFFICER. The Chair recognizes the Senator from New Mexico.

Mr. DOMENICI. Mr. President, I ask the distinguished Senator from Michigan if I may be a sponsor of the amendment. It is a very exciting amendment that we should be considering today.

Ms. STABENOW. It will be my honor, Mr. President, to add the distinguished Senator's name.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. Mr. President, pursuant to the agreement, will the Chair recognize the Senator from Arizona?

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. MCCAIN. Mr. President, I do not yet seek recognition.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, since no one is seeking time, I ask unanimous consent that the Senator from New Mexico be allowed to speak for 5 minutes on the economic stimulus package.

The PRESIDING OFFICER. Is there objection?

Mr. REID. What is the pending business? What is the request?

The PRESIDING OFFICER. The Senator from New Mexico has asked to speak for up to 5 minutes on the economic stimulus package.

Mr. REID. I reserve the right to object and ask the Senator to amend his request so that the Senator from Georgia, Mr. MILLER, and the Senator from Nebraska, Mr. NELSON, have 5 minutes to speak on the economic stimulus package.

The PRESIDING OFFICER. Is there objection?

Mr. DOMENICI. How much time?

Mr. REID. Two Senators, 5 minutes each: Senators NELSON and MILLER.

Mr. DOMENICI. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ECONOMIC STIMULUS PACKAGE

Mr. DOMENICI. Mr. President, I rise to express my sincere disappointment with our seeming inability to consider a stimulus package; that is, a job-creating piece of legislation, for our people. Millions of Americans have lost their jobs over the last year. My fellow New Mexicans, as do all Americans, want and deserve action on this slowing economy.

Let me be very clear. While some would like a different stimulus package than the one the House passed in the early morning hours today, there are alternatives that were considered in this first session.

The House-passed bill will provide needed tax relief to millions of working Americans. It will provide tax relief to those individuals who make more than $28,000 and those who file joint returns making more than $46,000.

These are not rich people. These are hard-working Americans.

Along with provisions to encourage business investment with 30 percent depreciation and extending businesses net operating losses carry back for two years, and increasing expensing provisions for small businesses, the House-passed bill provides nearly $60 billion in tax relief to encourage growth in this weakened economy.

Further, addressing many of the concerns raised on the other side of the aisle, the House-passed bill is a significant improvement over an earlier bill in the area of providing needed help to the unemployed and dislocated workers.

The House-passed bill provides significant support for those who for reasons they do not control, find themselves without employment this holiday season—all totaled nearly $32 billion would be provided in the form of direct payments to low-income workers, extended unemployment benefits and health insurance assistance.

The House-passed bill provides cash payments for those who filed a tax return in 2000 but did not receive a rebate check earlier this year. These payments will be $300 for individuals and $600 for married couples.

The House-passed bill provides 13 weeks of extended unemployment insurance going back to those displaced from work from the beginning of this recession last March.

And including $8 billion in National Emergency Grants and Emergency Medicaid funding to the states, over $21 billion would be assist individuals and families with their health care costs immediately.

The House-passed bill is not perfect. But it is a major improvement over an earlier version, largely because of the input of a group of Senators know as the Centrists here and because of President Bush's willingness to work with them in crafting this package.

I hope that we do not let ''one man rule'' prevent us from even having a vote on this bill.

We need to pass something. But if we don't assure you I will be the first to be back here in January asking that we consider the ''payroll tax holiday'' proposal.

I will take the remaining few minutes and talk to my fellow Senators. Whatever the case and whoever could not reach accord, I believe we have to tell our fellow Americans we did not do them right in the waning days of this session. While Christmas is upon us and good will is everywhere, it is quite obvious the House and Senate, even with the President nudging and participating, did not and will not produce a stimulus package that will get America going again.

I wish we would have considered something in the Senate. I believe there was time for us to consider amendments and even vote on a stimulus package. I think that could have been worked out, and we could have passed something. I regret we have not. I say to the leadership in the Senate, they could have done better.

While I have great respect and, in some cases, admiration for our leadership, I believe in this case one-man rule prevailed, the Democratic majority

leader prevailed. He has what I would call a one-man rule because he can keep us from debating and considering the House-passed measure. He can do that all by himself. That is a very big undertaking by any one Senator, to say we are not going to consider a stimulus package this year in this Senate. That is one-man rule. That is a very big exercise of power.

While the Democratic majority leader has a very difficult job in the waning moments because of different ideas and different proposals and obviously some politics, I think we should have done better and he should have done better.

I close by saying I proposed, along with about 10 Senators, an idea for a holiday from the Social Security taxes imposed on both employee and employer, to do that for 1 month. Nobody suggested to me that is not a very good stimulus, to put before the American people a month that is picked in the near future to put $42 billion into the hands of every working man and woman and every employer across this land in a rather instant payment to them, or nonpayment to the Government, of Social Security withholding.

I believe if we start over with good will, and in a nonpartisan way, when we return because I do not believe the economy will improve and we will be back at this—I urge we consider it at a high enough level to let the country focus on this idea.

There is a lot of talk about the negative aspects of it, and most of them are untrue. If we have a chance to get this issue before a committee, or debate it in the Senate, we would have a great starting point to which we could add the social welfare aspects of the unemployment benefits, of some health care coverage, and all the other issues we are talking about. We would have as a basis a single powerful issue that would be building jobs and causing America to take a look and say we know how to do something very positive.

So I do not give up. If we are doing nothing, I assume this idea will come back and I assume, when we start thinking about it and analyze it well, it will be high on the agenda.

I say to all of my friends in the Senate, they worked very hard. I congratulate them. They worked either as a centrist member of the committee or member of the leadership, put in a lot of time, a lot of effort. I am hopeful even in the last moment it will work and somehow it will come out of the forest and be sitting there for us to look at.

If not, then I urge when we come back and consider how we stimulate, that we put this holiday back on the table with all the other things we have been considering.

I yield the floor.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. NELSON of Nebraska. Mr. President, I appreciate the opportunity to address the Chamber today and speak on a very important issue we have all been concerned about and we all have had comments about, continue to have thoughts about, and will continue to have them into the future. I speak of the stimulus package.

It is unfortunate we missed the opportunity to be able to conclude a package of the type the centrists put together based on what was supported by so many different individuals and groups. Unfortunately, the blame has already begun. So we are in a position where we are talking about would have, could have, should have. We will have an opportunity as time goes by over this holiday break to continue to talk and continue to look for solutions.

In January, something must in fact be done so we can move forward to protect the jobs of those who currently have them, help those individuals who have lost them, and help create new jobs. This is about three things: Jobs, jobs, jobs. And it is about the people who support them.

TERRORISM INSURANCE

Mr. NELSON of Nebraska. In addition to being concerned about the future of the stimulus package, there is an aspect of stimulus that is involved in another proposal that hopefully will be brought up today, and that is the terrorism insurance issue. It is not about insurers, it is about insureds. It is about the ability to be able to insure one's property, one's house, one's home, one's apartment, one's automobile. If one is a business owner, it is about insuring their storefront or their business. It is about having workers compensation insurance and liability insurance. It is about having insurance for the protection one needs.

There is a very important timeframe we must in fact look at, and that is January 1 of this coming year. I am hopeful we will be able to settle today on a bill and be able to pass something and send it on for reconciliation in conference, so we can match or in some way make it close enough to the House version that a reconciliation of the conference committee is possible, because if we fail to do that, there is a possibility, and perhaps even a strong likelihood, that on January 1 of this coming year 70 percent of the reinsurance that is currently available to direct writers will be affected. It may not provide for terrorism in the future.

I know for many people it seems sort of esoteric. It seems sort of complex and perhaps eyes-glazed-over thinking about insurance and reinsurance and whether there will be protection for terrorism or not, but it is a very real issue, a very real and present concern we must in fact have. It is not about simply insuring skyscrapers. It is about insuring small businesses. It is about apartment buildings, storefronts, and people's own personal residences, as well as their automobiles. It is about whether or not money will be available for lending or whether or not it will continue to be available for construction.

If we are concerned, as I think we are, about a worsening economy and at what point we will be able to see the economy turn around and be stimulated so it can be a robust economy, one of the things we must in fact be concerned about is anything that tips the scales against the economy we have today that can make it worse. In fact, failure to take action can make it worse by not taking the appropriate action to undergird and support it.

If we are unable to come together and make sure insurance continues to be available, as well as affordable, but certainly available to the public, if we fail to take that opportunity, then we might expect construction will be impeded, if not stopped, and that we may in fact see housing starts and other building starts stopped.

Unemployment can be affected. We could end up with more people unemployed, and the economic downturn could be accelerated. I say these things not to provide a scare tactic but simply to impress as to how important it is we solve this problem of availability of terrorism insurance in the near term so we can work for a longer term solution.

What has been offered to date is, in fact, a short-term solution, a backup, a compromise to work in the immediate term, the short term, with broad-based support. I hope we will take this up and move forward.

The PRESIDING OFFICER (Ms. CANTWELL). The Senator from Georgia.

Mr. MILLER. Madam President, I, too, will have a few remarks on the economic stimulus bill. I think a decision not to have a straight up-or-down vote on it and let the majority of this Senate prevail, regardless of the makeup of the majority, is a mistake. I know it is a loss for the country and the folks who need our help and need it immediately.

Why do we always have to act as if we are in a football game where one side, one team, has to win and the other team has to lose? Why can't we have both parties the winners, along with the American people?

Myself, when it gets down to the block, I am kind of a half-a-loaf man. Whether it is 75 percent, 65 percent, or 50 percent, when you get right down to it, that is always better than zero percent. You can eat half a loaf. Having no loaf at all may make a political point, but in the end somebody goes hungry.

This is not the House bill. I could never have supported that bill. I would never have voted for it. This compromise package does not include everything either side wanted. Instead, it represents a reasonable compromise.

Some say speeding up the reduction of the tax rates from 27 percent to 25 percent is just helping the wealthy. Nothing could be further from the truth. The folks who benefit from this are folks who earn as little as $27,000 a year, going up to $67,000 a year. For married couples, this rate reduction would help those who earn between $47,000 to $120,000 a year. Those are not the wealthy or the rich. Those are middle-income Americans. Many are our

friends and organized labor. This bill also includes a $300 rebate for those who did not get anything from the earlier tax cut.

On the health insurance area, we recognize the need to help the unemployed by providing health insurance for them. This is a very significant change. This is a dramatic change and should be welcomed by both Republicans and Democrats alike.

Some argue that the best way to give laid-off workers access to health care is to provide a 75-percent subsidy for COBRA premiums, as well as access to State Medicaid Programs. Others disagreed and preferred a broader tax credit for health insurance premiums. This package falls somewhere in between, providing a 60-percent advanceable, refundable tax credit for all health insurance.

It is not a whole loaf for anyone, but it represents a practical solution, and it is the best way to do what we all want; that is, to help the workers and help them before it is too late.

The package also includes help for State governments, something our Governors and legislators desperately need right now. It provides almost $5 billion in payments to State Medicaid Programs. This does not represent everything States or many of us wanted. I was hoping to get a fix for the upper payment limit but, again, it is half a loaf.

As it is, we have no loaf. We have no loaf at all. We do not even have a slice. Who was it who said, Let them eat cake?

I yield the floor.

The PRESIDING OFFICER (Mr. MILLER). The Senator from Arizona.

DEFENSE APPROPRIATIONS

Mr. MCCAIN. Madam President, I rise, once again, to address the issue of wasteful spending in appropriations measures; in this case, the bill funding the Department of Defense for fiscal year 2002.

In provisions too numerous to mention in detail, this bill, time and again, chooses to fund porkbarrel projects with little, if any, relationship to national defense at a time of scarce resources, budget deficits, and underfunded urgent defense priorities.

The Web site of the Senate Committee on Appropriations, in its opening sentence, states the following:

> Authorization laws have two basic purposes. They establish, continue, or modify Federal programs, and they are a prerequisite under House and Senate rules . . . for the Congress to appropriate budget authority for programs.

I will not go through all of the unauthorized programs that are in this legislation. I only mention those that relate to the committee of which I am proud to serve and be the ranking member, formally the chairman, the Commerce Committee. I and Senator HOLLINGS and members of my committee take our responsibilities very seriously.

Now we have seen, despite what apparently is the mission or the obligation of the Appropriations Committee—and that is to not appropriate funds for programs that are not authorized—just in the Commerce Committee alone, we have for the 2002 Winter Olympics, $93.3 million; port security grants, $90 million; airport and airways trust fund, payment to air carriers, $50 million; DOT Office of the Inspector General, $1.3 million; FAA operations, taken from the aviation trust fund, without authorization, $200 million.

Just as the appropriators are now taking away highway money appropriated under a formula passed by the full Senate and House and violating TEA–21, we are now taking away from the aviation trust fund for pet projects $200 million worth, to pet projects of the appropriators.

We have FAA facilities and equipment, $108.5 million; Federal Highway Administration, proposed operations, $10 million was requested by the administration, $100 million; capital grants to the National Railroad Passenger Corporation, $100 million; Federal Transit Administration capital investment gains, $100 million; restoration of broadcasting facilities, $8.25 million; National Institutes of Standards and Technology, $30 million; Federal Trade Commission, $20 million; FAA grants and aid for airports, $175 million; Woodrow Wilson Bridge project, $29 million.

Why did they have to do that? Because they took the money out of the highway funds in the Transportation appropriations bill, thereby shorting the Woodrow Wilson Bridge, so they had to add another $30 million to make up for the shortfall. Unfortunately, that was about $500 million that they took, and every other State in America—by the way, not represented by a member of the Appropriations Committee—had highway funds taken away from them.

Provision relating to Alaska in the Transportation Equity Act for the 21st century—it will be interesting to see the impact that has on the rest of America. We have the U.S. 61 Woodville widening project in Mississippi, $300,000; Interstate Maintenance Program for the city of Trenton, $4 million; international sports competition, $15.8, million, emergency planning assistance for 2002 Winter Olympics.

I have to talk for a minute before I get into the major issue, and that is the Boeing lease, and discuss the Olympics issue. It is now up to well over $1.5 billion that the taxpayers have paid.

I refer my colleagues to an article that was in Sports Illustrated magazine, December 10, 2001. The title of it is, ''Snow Job.''

I will not read the whole article. It is very instructive to my colleagues in particular and to our citizens about what has happened in the Utah Olympics. The headline is ''Snow Job.''

> Thanks to Utah politicians and the 2002 Olympics, a blizzard of federal money—a stunning $1.5 billion—has fallen on the state, enriching some already wealthy businessessmen.
>
> Is this a great country or what? A millionaire developer wants a road built, the federal government supplies the cash to construct it. A billionaire ski-resort owner covets a choice piece of public land. No problem. The federal government arranges for him to have it. Some millionaire businessmen stand to profit nicely if the local highway network is vastly improved. Of course. The federal government provides the money.
>
> How can you get yours, you ask? Easy. Just help your hometown land the Olympics. Then, when no one's looking persuade the federal government to pay for a good chunk of the Games, including virtually any project to which the magic word Olympics can be attached.
>
> Total federal handouts. The $1.5 billion in taxpayer dollars that Congress is pouring into Utah is 1½ times the amount spent by lawmakers to support all seven Olympic Games held in the U.S. since 1904—combined. In inflation-adjusted dollars.
>
> Enrichment of private interests. For the first time, private enterprises—primarily ski resorts and real estate developments—stand to derive significant long-term benefits from Games-driven congressional giveaways.
>
> Most government entities tapped for cash. With all that skill, grace and precision of a hockey team on a power play, Utah's five-member congressional delegation has used the Olympics to drain money from an unprecedented number of federal departments, agencies and offices—some three dozen in all, from the Office of National Drug Control to the Agriculture Department.
>
> Most U.S. tax dollars per athlete. Federal spending for the Salt Lake City City Games will average $625,000 for each of the 2,400 athletes who will compete. (Not a penny of it will go to the athletes.) That's a 996% increase from the $57,000 average for the 1996 Olympics. It's a staggering 5,582% jump from the $11,000 average for the 1984 Summer Games in Los Angeles.
>
> Parking lots are costing you $30 million. Some $12 million of that is paying for two 80-acre fields to be graded and paved for use as two temporary lots, then returned to meadows after the flame is extinguished.
>
> Housing for the media and new sewers are each costing you $2 million.
>
> Repaved highways, new roads and bridges, enlarged interchanges and an electronic highway-information system are costing you $500 million.
>
> Buses, many brought in from others states, to carry spectators to venues are costing you $25 million.
>
> Fencing and other security measures at the Veterans Administration Medical Center in northeast Salt Lake City—to protect patients and staff from the Olympia hordes—are costing you $3 million.
>
> A light-rail transit system that will ferry Olympic visitors around Salt Lake City is costing you $326 million.
>
> Improvement at Salt Lake City-area airports are costing you $16 million.
>
> The list goes on and on:
>
> Recycling and composting are costing you $1 million, and public education programs for air, water and waste management are costing you another $1 million.
>
> A weather-forecasting system being set up for SLOC is costing you $1 million. The money is going to the University of Utah to enable its Meterorology Department to provide data that will supplement forecasts provided to SLOC by the National Weather Service.
>
> New trees planted in Salt Lake City and other communities ''impacted'', as the funding legislation put it, by the Olympics are

costing you $500,000. Said Utah Senator Robert Bennett, who arranged for the money. ''We do the Olympics because it gets us together doing thinks like planting trees.''

''We do the Olympics because it gets us together, doing things like planting trees.''

Wow.

I want to repeat, I am all for whatever expenditure for security for the Salt Lake City Olympics. A good part of this $1.5 billion—and there is more in this appropriations bill—has nothing to do with security. It has to do with roadbuilding. It has to do with land swaps, worthless land for valuable land. It has to do with wealthy developers; it has to do with the enrichment of billionaires; and it really is quite a story. I hope every American will read that story that is in Sports Illustrated dated December 10 entitled ''Snow Job''—aptly entitled ''Snow Job.''

As I pointed out before, our nation is at war, a war that has united Americans behind a common goal—to find the enemies who terrorized the United States on September 11 and bring them to justice. In pursuit of this goal, our service men and women are serving long hours, under extremely difficult conditions, far away from their families. Many other Americans also have been affected by this war and its economic impact, whether they have lost their jobs, their homes, or have had to drastically cut expenses this holiday season. The weapons we have given them, for all their impressive effects, are, in many cases, neither in quantity nor quality, the best that our government can provide.

For instance, stockpiles of the precision guided munitions that we have relied on so heavily to bring air power to bear so effectively on difficult, often moving targets, with the least collateral damage possible, are dangerously depleted after only 10 weeks of war in Afghanistan. This is just one area of critical importance to our success in this war that underscores just how carefully we should be allocating scarce resources to our national defense.

Yet, despite the realities of war, and the responsibilities they impose on Congress as much the President, the Senate Appropriations Committee has not seen fit to change in any degree its usual blatant use of defense dollars for projects that may or may not serve some worthy purpose, but that certainly impair our national defense by depriving legitimate defense needs of adequate funding.

Even in the middle of a war, a war of monumental consequences and with no end in sight, the Appropriations Committee, Mr. President, still is intent on using the Department of Defense as an agency for dispensing corporate welfare. It is a terrible shame that in a time of maximum emergency, the U.S. Senate would persist in spending money requested and authorized only for our Armed Forces to satisfy the needs or the desires of interests that are unrelated to defense needs.

The Investor's Business Daily, on December 18, 2001, had this to say in an article titled At the Trough: Welfare Checks to Big Business Make No Sense:

Among the least justified outlays is corporate welfare. Budget analyst Stephen Slivinski estimates that business subsidies will run $87 billion this year, up a third since 1997, Although President Bush proposed $12 billion in cuts to corporate welfare this year, Congress has proved resistant. Indeed, many post-September 11 bailouts have gone to big business. Boeing is one of the biggest beneficiaries. Representative Norm Dicks, Democrat from Washington, is pushing a substantial increase in research and development support for Boeing and other defense contractors, the purchase of several retrofitted Boeing 767s and the leasing of as many as 100 767s for purposes ranging from surveillance to refueling. Boeing has been hurt by the storm that hit airlines, since many companies have slashed orders. Yet China recently agreed to buy 30 of the company's planes, and Boeing's problems predate the September 11 attack. It is one thing to compensate the airlines for forcibly shutting them down; it is quite another to toss money at big companies caught in a down demand cycle. Boeing, along with many other major exporters, enjoys its own federal lending facility, the Export-Import Bank. ExIm uses cheap loans, loan guarantees and loan insurance to subsidize purchases of U.S. products. The bulk of the money goes to big business that sell airplanes, machinery, nuclear power plants and the like. Last year alone, Boeing benefitted form $3.3 billion in credit subsidies. While corporate America gets the profits, taxpayers get the losses. . . .

As I mentioned last week when the Senate version of the Defense Appropriations bill was being debated—and now carried through the Conference Committee—is a sweet deal for the Boeing Company that I'm sure is the envy of corporate lobbyists from one end of K Street to the other. Attached is a legislative provision to the Fiscal Year 2002 Department of Defense Appropriations bill that would require the Air force to lease one hundred 767 aircraft for use as tankers for $26 million apiece each year for the next 10 years. Moreover, in Conference Committee the appropriators added four 737 aircraft for executive travel—mostly benefitting Members of Congress. We have been told that these aircraft will be assigned to the 89th Airlift Wing at Andrews Air Force Base.

Since the 10-year leases have yet to be signed, the cost of the planes cannot be calculated, but it costs roughly $85 million to buy one 737, and a lease costs significantly more over the long term.

The cost to taxpayers?

$2.6 billion per year for the aircraft plus $1.2 billion in military construction funds to modify KC–135 hangars to accommodate their larger replacements, with a total price tag of more than $30 billion over 10 years when the costs of the 737 leases are also included. This leasing plan is five times more expensive I repeat, five times more expensive to the taxpayer than an outright purchase, and it represents 30 percent of the Air Force's annual cost of its top 60 priorities. But the most amazing fact is that this program is not actually among the Air Force's top 60 priorities—it was not among their top 60 priorities—nor do new tankers appear in the 6-year defense procurement plan for the Service!

That's right, when the Air Force told Congress in clear terms what its top priorities were tankers and medical lift capability aircraft weren't included as critical programs. In fact, within its top 30 programs, the Air Force has asked for several essential items that would directly support our current war effort: wartime munitions, jet fighter engine replacement parts, combat support vehicles, bomber and fighter upgrades and self protection equipment, and combat search and rescue helicopters for downed pilots.

Let me say that again, within its top 30 programs, the Air Force has asked for several essential items that would directly support our current war effort: wartime munitions, jet fighter engine replacement parts, combat support vehicles, bomber and fighter upgrades and self protection equipment, and combat search and rescue helicopters for downed pilots.

This leasing program also will require $1.2 billion in military construction funding to build new hangars, since existing hangars are too small for the new 767 aircraft. The taxpayers also will be on the hook for another $30 million per aircraft on the front end to convert these aircraft from commercial configurations to military; and at the end of the lease, the taxpayers will have to foot the bill for $30 million more, to convert the aircraft back—pushing the total cost of the Boeing sweetheart deal to $30 billion over the ten-year lease. Mr. President, that is waste that borders on gross negligence.

I wrote a letter to the Director of OMB. Here is the answer I received:

DEAR SENATOR MCCAIN:

Thank you for your inquiry regarding the costs associated with the conversion of 767 aircraft tankers. According to the Air Force, the total cost for a program to lease 100 tankers is approximately $26 billion.

I ask unanimous consent that the letter from Mr. Mitchell Daniels, Director of OMB, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC, December 18, 2001.

The Hon. JOHN MCCAIN,
U.S. Senate,
Washington, DC.

DEAR SENATOR MCCAIN: Thank you for your inquiry regarding the costs associated with the conversion of 767 aircraft to tankers. According to the Air Force, the total cost for a program to lease 100 tankers is approximately $26 billion. I have attached a summary of assumptions and costs they have identified. Please let me know if you require any additional information.

Sincerely,

MITCHELL E. DANIELS, JR.,
Director.

Mr. MCCAIN. Mr. President, I want to read a letter that I received recently. This letter is from the Americans for Tax Reform, Council for Citizens Against Government Waste, Congressional Accountability Project, Ronnie Dugger, Ralph Nader, National Taxpayers Union, Project on Government Oversight, Public Citizen, and Taxpayers for Common Sense.

All of these organizations are on the right and the left of the political spectrum.

They wrote the following letter:

DECEMBER 19, 2001.

DEAR SENATOR: Even as veteran observers of the Congressional appropriations process, we are shocked, and outraged, by the provision in the Defense Appropriations bill that would have the Air Force lease Boeing 767s at a price dramatically higher than the cost of direct purchase. We are writing to urge you to take to the floor to speak and vote against this specific siphoning of taxpayer money to the Boeing company.

Leave aside the serious questions about whether the Air Force wants or needs the 767s, and simply consider the economics of this sugar-coated deal:

Under the Boeing lease provision, the Air Force will lease 100 Boeing 767s for use as tankers, at a pricetag of $20 million per plane per year, over a 10-year period. This $20 billion expenditure is far higher than the cost of direct purchase. The government will accrue extra expenses because it will be obligated not only to convert the commercial aircraft to military configurations; when the 10-year lease is over, it will be required to convert them back to commercial format, at an estimated cost of $30 million apiece. Senator John McCain says the cost of the lease plan is five times higher than an outright purchase would be. Senator Phil Gramm says, ''I do not think, in the 22 years I have been here, I have ever seen anything to equal this.''

''I don't think, in the 22 years I have been here, I have ever seen anything to equal this.''

The letter goes on to say:

There is no conceivable rationale for such a waste of taxpayer resources. If some in Congress believe Boeing needs to be subsidized, then they should propose direct subsidies to the company, and let Congress fully debate and vote on the issue before the American people, following comprehensive public hearings on the proposal.

This is not a partisan issue. It is a basic test of whether Congress views itself as fundamentally accountable to the public interest, both procedurally and substantively.

There will obviously be a Defense Appropriations bill passed for the coming fiscal year. But it must not be one that includes such a gross exhibition of corporate welfare. We urge you to speak and vote against the bill; and to force consideration of a revised bill, stripped of this grotesquery.

Sincerely,

RALPH NADER,
GROVER NORQUIST,
President, Americans for Tax Reform.

I have never seen Ralph Nader and Grover Norquist on the same letter in all the years I have been in this town.

The letter is also signed by the following:

THOMAS A. SCHATZ,
President, Council for Citizens Against Government Waste.

GARY RUSKIN,
Director, Congressional Accountability Project.

RONNIE DUGGER,
Alliance for Democracy (organization listed for identification only).

PETE SEPP,
Vice President for Communications, National Taxpayers Union.

DANIELLE BRIAN,
Executive Director, Project on Government Oversight.

JOAN CLAYBROOK,
President, Public Citizen.

JOE THEISSEN,
Executive Director, Taxpayers for Common Sense.

Mr. President, I guess the obvious question that would then be asked is, How did this happen? On its face it is incredible.

Let me try to illuminate my colleagues on an article of December 12 in the New York Times entitled ''Boeing's War Footing; Lobbyists Are Its Army, Washington Its Battlefield.''

I will not read the entire article.

It says:

Staggered by the loss of the largest military contract in history and the collapse of the commercial airline market, Boeing has sharply intensified its efforts in Congress and the Pentagon to win an array of other big-ticket military contracts.

Mobilizing an armada of well-connected lobbyists, sympathetic lawmakers and Air Force generals, the company argues that by financing its contracts Congress would reduce the need for thousands of layoffs and help keep Boeing, the second-largest military contractor, healthy in a time of war:

It talks about losing the joint strike fighter to Lockheed Martin.

Those events sent Boeing reeling. But like battle-tested generals on the retreat, Boeing executives swiftly moved to recover their losses in a time-tested Washington way: wooing Congress and the Pentagon to support other contracts.

Few companies can rival Boeing influence in the capital. Its Washington office, headed by Rudy F. de Leon, the deputy secretary of defense in the final year of the Clinton administration, employs 34 in-house and more than 50 outside lobbyists.

One of the Boeing lobbyists' first moves after Sept. 11 was to prod the Air Force to reconsider the 767 lease deal, which had stalled months before. Though the Air Force has said it plans to replace its 40-year-old KC–135 tankers in the next decade or two, it has preferred to spend its money on elite fighter jets like the F–22.

But the war in Afghanistan has kept dozens of KC–135's in the air almost constantly, putting pressure on the Air Force to accelerate its replacement program. James Roche, the secretary of the Air Force, and Gen. John P. Jumper, the Air Force chief of staff, signed into the lease-purchase idea because it would spread the cost out into the future, Pentagon documents show.

Boeing next had to break down resistance to lease arrangements in Congress. According to one internal Pentagon study, a lease-purchase deal for 100 767's would cost 15 percent more than simply buying the planes. Moreover, federal rules discourage such deals by requiring that most of the entire contract cost be paid in the first year. To get around that, Boeing proposed having the Air Force simply lease the aircraft without a purchase option. But that would not cover the cost of adapting them for refueling and surveillance, or of ultimately buying them, as the Air Force is expected to do.

The company recruited the Congressional delegations from Washington and Missouri—the two states where it assembles most of its aircraft—to support the plan. And in the Senate, it found a powerful ally in Ted Stevens of Alaska, the ranking Republican on the Appropriations Committee, who is a fan of lease-purchase deals for the military.

Boeing lobbyists with Congressional experience—including Mr. de Leon, who also was a staff director for the House Armed Services Committee, and Denny Miller, a former chief of staff to the late Senator Henry M. Jackson of Washington—help negotiate the lease language.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

Staggered by the loss of the largest military contract in history and the collapse of the commercial airline market, Boeing has sharply intensified its efforts in Congress and the Pentagon to win an array of other big-ticket military contracts.

Mobilizing an armada of well-connected lobbyists, sympathetic lawmakers and Air Force generals, the company argues that by financing its contracts Congress would reduce the need for thousands of layoffs and help keep Boeing, the second-largest military contractor, healthy in a time of war. ''You've got the nation's leading exporter, and one of its leading military contractors, who has been hit hard,'' said Representative Norm Dicks, a Washington State Democrat who has led the charge for Boeing on Capitol Hill. ''We can really help them.''

The push underscores a broader trend for Boeing, company officials and analysts say. The company, with most of its production in the Seattle area, has suffered a sharp downturn in commercial aircraft business, which last year generated two-thirds of its $51.3 billion in sales. Boeing is expected to announce this week that production of its 717 commercial airliners will be cut by half, to as little as one plane a month from two, company executives said. As recently as a month ago, analysis predicted that the company would end all 717 production, in part because the Sept. 11 attacks have slowed demand for commercial jets.

As a result, Boeing is looking more than ever to its military and space divisions to bolster sagging revenue.

Last week, it won a big lobbying battle when the Senate approved a sharply contested plan for Boeing to lease to the Air Force 100 new 767 wide-body jets for use as refueling tankers and reconnaissance planes. The proposal next goes before a House-Senate conference committee.

At an estimated cost of more than $20 billion over 10 years, that plan has been attacked as a costly corporate bailout by critics led by Senator John McCain, a Republican from Arizona. But supporters say that it would not only significantly offset Boeing's loss of orders from ailing commercial airlines but also help the Pentagon by accelerating the replacement of aging midair refueling tankers and reconnaissance aircraft that both have been worn down by heavy use in the war in Afghanistan.

''Near term, it's a very nice financial salve to an immediate wound,'' said Howard Rubel,

a military industry analysis at Goldman Sachs.

The 767 plan is just one of several major Pentagon programs that Boeing is prodding Congress to sustain, expand or accelerate. The company is the lead contractor on more than a dozen major contracts accounting for well over $10 billion in the 2002 Pentagon budget alone. Those include the F/A–18 fighter jet for the Navy, the V–22 Osprey tiltrotor aircraft for the Marine Corps, the AH–64 Apache Longbow helicopter for the Army and the airborne laser for the Pentagon's Ballistic Missile Defense Organization.

In addition, Boeing has been trying for years to become the dominant player in an array of new businesses, including unpiloted aircraft, battlefield and cockpit communications, surveillance technology and precision-guided numitions. The war on terrorism has only underscored the Pentagon's need for more of those systems, Boeing and its allies assert.

''What we're about to see was the reason for the merger with McDonnell Douglas in the first place,'' said Gerald E. Daniels, president of Boeing's military aircraft and missile systems division. ''With the cyclical nature of the commercial business, building strong military and space units serves to tamp down those gigantic swings.''

In 1999, two years after the merger with McDonnell Douglas, Boeing delivered 620 commercial aircraft, for revenue of $38.5 billion. By next year, analysts estimate, deliveries are expected to tally only 367, with revenue down to $26 billion.

The collapse in the commercial market resulted, of course, from the suicide hijacking attacks of Sept. 11. Air travel plummeted and airlines canceled dozens of jet orders, prompting Boeing to announce plans to lay off 30,00 workers over the next two years.

Just when it seemed Boeing's fortunes could not be worse, in October the Pentagon awarded a $200 billion contract for the Joint Strike Fighter to Boeing's larger rival, Lockheed Martin. The stealthy jet is expected to become the mainstay fighter for the Navy, Air Force and Marine Corps in the next two decades, raising doubts about Boeing's future in the tactical fighter business.

Those events sent Boeing reeling. But like battle-tested generals on the retreat, Boeing executives swiftly moved to recover their losses in a time-tested Washington way: wooing Congress and the Pentagon to support other contracts.

Few companies can rival Boeing's influence in the capital. Its Washington office, headed by Rudy F. de Leon, the deputy secretary of defense in the final year of the Clinton administration, employs 34 in-house and more than 50 outside lobbyists.

One of the Boeing lobbyists' first moves after Sept. 11 was to prod the Air Force to reconsider the 767 lease deal, which had stalled months before. Though the Air Force has said it plans to replace its 40-year-old KC–135 tankers in the next decade or two, it has preferred to spend its money on elite fighter jets like the F–22.

But the war in Afghanistan has kept dozens of KC–135's in the air almost constantly, putting pressure on the Air Force to accelerate its replacement program. James Roche, the secretary of the Air Force, and Gen. John P. Jumper, the Air Force chief of staff, signed onto the lease-purchase idea because it would spread the cost out into the future, Pentagon documents show.

Boeing next had to break down resistance to lease arrangements in Congress. According to one internal Pentagon study, a lease-purchase deal for 100 767's would cost 15 percent more than simply buying the planes. Moreover, federal rules discourage such deals by requiring that most of the entire contract cost be paid in the first year. To get around that, Boeing proposed having the Air Force simply lease the aircraft without a purchase option. But that would not cover the cost of adapting them for refueling and surveillance, or of ultimately buying them, as the Air Force is expected to do.

The company recruited the Congressional delegations from Washington and Missouri—the two states where it assembles most of its aircraft—to support the plan. And in the Senate, it found a powerful ally in Ed Stevens of Alaska the ranking Republican on the Appropriations Committee, who is a fan of lease-purchase deals for the military.

Boeing lobbyists with Congressional experience—including Mr. de Leon, who also was a staff director for the House Armed Services Committee, and Denny Miller, a former chief of staff to the late Senator Henry M. Jackson of Washington—helped negotiate the lease language.

With Senator Patty Murray, a Washington Democrat, the Boeing president, Philip A. Condit, has repeatedly met with senior lawmakers like Daniel Inouye, the chairman of the Senate Appropriations subcommittee on the military, and the Senate majority leader, Thomas Dashle. Last week, Mr. Condit returned to discuss the deal with several leading skeptics in the House, including the speaker, J. Dennis Hastert, and Representative Jerry Lewis of California, the influential chairman of the House subcommittee on defense appropriations.

A spokesman for Mr. Lewis, Jim Specht, said the Congressman remained undecided on the lease deal, but added: ''There is the concern that because of the Joint Strike Fighter contract, something has to be done to make sure we support all of our industrial base.''

All the work, however, did not win over Senator McCain, who last week accused Boeing of ''playing victim, blaming its own job cuts, many of which occurred before Sept. 11, on the tragedy itself.''

Boeing seems to have won Congressional support for accelerating purchases of C–17's, the all-purpose cargo planes it builds in Long Beach, Calif., at a former McDonnell Douglas plant. Last spring, Boeing formally asked that the Pentagon buy 60 more planes at a cost of about $150 million each. Without that increase, the Long Beach production line is scheduled to close later this decade.

Boeing has also tried to wiggle its way into the Strike Fighter deal. The company has quietly hinted that it could urge Congress to buy more unmanned aircraft or its F/A–18 to take the place of Navy and Air Force versions of the Joint Strike Fighter if Lockheed did not agree to give it a substantial piece of the work.

It has urged Senator Christopher S. Bond, a Missouri Republican, to continue promoting legislation requiring Lockheed to split the Strike Fighter work with Boeing. Senator Bond withdrew his bill for lack of support, but on Friday he won Senate funds for a study into whether the Pentagon should have two manufacturers of tactical fighter aircraft.

''I want to make sure we maintain that production line in St. Louis, because it's in the national interest,'' Mr. Bond said in an interview.

Lockheed, however, notes that it already has two major partners, the British military contractor BAE Systems and Northrop Grumman. ''There is only so much work to go around,'' said Charles Thomas Burbage, director of the fighter project for Lockheed.

Boeing, with the help of Senator Bond and Representative Richard A. Gephardt, the House Democratic leader, who comes from the St. Louis area, is also pushing the Navy to replace its aging EA6–B Prowler radar-jamming planes with an electronic-warfare version of the F–18, a move that could help keep Boeing's St. Louis plant open longer.

Unmanned aircraft are another focus of Boeing lobbying. Last month, Boeing organized a new division headed by a senior executive from its Strike Fighter program, Mike Heinz, to help it expand into a market the company estimates will top $1 billion a year.

Boeing is already building a prototype unmanned fighter for the Air Force, a project that many industry officials say is Boeing's to lose. At a recent meeting of industry executives, Darleen A. Druyun, the principal deputy assistant secretary of the Air Force for acquisition and management, spoke glowingly about the future of unmanned aerial vehicles.

''I see a very bright future for Boeing when it comes to aviation,'' she said, ''particularly in the areas of UAV's and in sales of C–17's.''

Mr. MCCAIN. Mr. President, when the Department of Defense appropriations bill was on the floor, Senator GRAMM of Texas, I, and others decided that we would do what we could to oppose this being included in the legislation.

We were prepared to engage in extended debate on this and many of the other provisions of the Defense appropriations bill. After conversations with Senator GRAMM and Senator STEVENS, I agreed to an amendment on my behalf along with Senator GRAMM that would give the President the authority not to spend the money if we found other more compelling needs for national defense, which seems like a reasonable solution to the dilemma in which we found ourselves.

(Mr. CLELAND assumed the Chair.)

Mr. MCCAIN. I will admit to a certain degree of naivety. I believed that provision would be held in conference. Obviously, I was incredibly naive. That provision, I am told, was the first to go.

So now we have a situation—even though the Air Force in its top 60 priorities did not request additional tankers, but did have plans in the next 10 years or so to purchase aircraft with refueling capability—we now have a provision in law, which I obviously will not be able to reverse, without competition.

Maybe Airbus could have provided some tankers. Maybe some airlines with excess aircraft could have provided some tankers. But no competition is allowed. It directs that it be 767s.

Now, of course, to sweeten the pot, we have four 737s which will go out to Andrews Air Force Base and be part of the aircraft that are used for ferrying VIPs and Members of Congress around the world.

I think you could make an argument that Boeing needs to be bailed out, that they are in trouble. They are a major manufacturing company. They lost out on a new fighter aircraft competition. There may be some argument to that. I might even consider cutting them a check for some money. We cut checks for a lot of other interests around here.

But there was never a hearing in the Armed Services Committee—never a

hearing in the Armed Services Committee—of a $30 billion purchase here. It was never considered by the Armed Services Committee—not once. Never did it come up. No. No, Mr. President. Again, it was stuck in an appropriations bill, stuck into an appropriations bill without a single hearing. Not even in the Appropriations Committee did they have a hearing on this.

What I am saying is, this system has run amok. This system has run amok. We are now in the situation where anyone who is not on the Appropriations Committee becomes irrelevant, particularly at the end of the year.

Where is the relevancy of the Commerce Committee when $310 million in appropriations is added on a Defense appropriations bill? Where is the relevancy when billions of dollars on a Defense appropriations bill are put in that have nothing to do with defense?

Where is the relevancy of the authorizing committees when billions and billions and billions of dollars are added without a hearing, without consideration, and without authorization?

I suggest that the Appropriations Committee change their Web site, the one I quoted earlier, that says that only authorized appropriations will be made. It says:

> Authorization laws have two basic purposes. They establish, continue, or modify federal programs, and they are a prerequisite under House and Senate rules . . . for the Congress to appropriate budget authority for programs.

I strongly recommend that the Appropriations Committee remove that from or at least add: However, in practice, that is not the case.

We now have disabled veterans who are not receiving the money that they need. It is an effort that I and the Presiding Officer have engaged in for several years now. They do not have a very big lobby around here. They do not have Rudy de Leon and Denny Miller, and a lot of high-priced lobbyists. So veterans who have disabilities are being deprived money they should rightly have, that any other person stricken with a similar disability, under any other circumstance, would receive.

We still have men and women in the military living in barracks that were built during World War II and the Korean war.

We still have a situation, at least up until the surge of patriotism as of September 11, where there has been enormous difficulty in maintaining our noncommissioned officers and our midlevel career officers.

A recent study by the U.S. Army showed the greatest exodus of Army captains in the history of the U.S. Army, which is quite interesting, to say the least.

We will not take care of these veterans, but we will put about $3 billion out of the Commerce Committee—under the Commerce Committee jurisdiction—into this Department of Defense appropriations bill. We will take care of the special interests. We will take care of the big campaign contributors.

I am sure Boeing will be extremely generous at the next fundraisers that both the Republican and Democrat Parties have. They have already been incredibly generous. And, by the way, they are very schizophrenic in their political outlook because they give pretty much the same amount of money to both parties, which shows how ideologically driven they are.

And we will get 767s. I am sure they are nice airplanes. But who is going to pay? Who is going to pay for it? The average taxpayer, because the cost to the taxpayer of this little backdoor, backroom maneuver is billions of dollars more than it should have been.

I remind you, the average lifespan of a tanker is around 35 to 40 years. That is the average lifespan because they are relatively simple airplanes. They are really flying gas stations. So they last a long time.

So what are we going to do? Pay 90 percent of the cost of the airplane and, after 10 years, pay to have it de-engineered as a tanker and give it back to Boeing, at a minimum of one-third of the life of the tanker. With a straight face, how can we possibly do this?

I had a lot of other concerns about the porkbarreling, but I want to say this. One of two things is going to happen around here in the Senate: Either the Appropriations Committee controls the entire agenda and does the things that we continue to see in ever increasing numbers—and I have been tracking it for many years; every year the Appropriations Committee adds more and more projects that are not authorized every year; and this year it is a big jump—or we are going to stop it; or we are going to have a change in the rules that comports with the Web site of the Appropriations Committee; that is, that no appropriation will be made that is unauthorized and no appropriation will exceed the authorized level either in an appropriations bill or in a conference report.

It is a pretty simple rule. And it would be subject to a point of order.

Now, there are times where appropriations have to be made, and that is where the point of order would come in. But unless we change the rules the way this body goes—I suggest to my colleagues that they understand we can have nice hearings.

We have some very interesting hearings in the Commerce Committee on a broad variety of subjects. It is great. It is the most intellectually stimulating experience I have ever had in my service on the Commerce Committee and on the Armed Services Committee, of which I have been a member since 1987.

I find it extremely enjoyable. The discussions are wonderful. I learn more about how our military is conducting their operations, how we are planning for the future. But do not think, as members of the authorizing committee, you will have the slightest effect on what is done in this body.

I am not going to take too much longer, but I will just make a reference. In 1997—since the Senator from Hawaii is here—there was a proposal put in an appropriations bill to build two ships in Mississippi. And certain waivers were made in those requirements. In return for that, those ships would operate from the State of Hawaii. About $1 billion worth of taxpayers' money was on the line.

I said, this is crazy. You can't do this. This is outrageous. Do you know what happened a few weeks ago? The company went bankrupt. There are two hulls sitting in the State of Mississippi. The taxpayers are already on the hook for $300-some million, and it will probably rise to $1 billion.

If that proposal had gone through the Commerce Committee, it never would have seen the light of day because, on its face, it was crazy. To give a 30-year or 20-year, or whatever it is, exclusivity to a cruise line in return for them being built with taxpayers' dollars, there was no way it was going to succeed. And I said so at the time.

So now the taxpayers are on the hook for $1 billion.

We are talking about real money. What is going on here? It is because we are violating the process and the rules for the way we should operate. Perhaps this Boeing deal would have gotten some consideration in a very different fashion. Probably what would have resulted is that we would have authorized the purchase of three or four 767s and then in the following year we would have authorized some more, depending on what the administration wanted. But now we are putting in 100 airplanes that weren't in the top 60 requirements the Air Force told the Congress and the American people they needed. After 10 years, one-third to one-fourth of their lifespan, we give them back. How does anybody justify this kind of procedure?

I suggest that the Senate look at itself. I can't speak for the House. The Senate ought to look at itself. What are we doing? What do we do here? I think I may be one of four or five Senators who has examined this bill. I may be one of four or five who has looked at this bill because I have about 10 staffers leafing through it trying to figure out what is in it. Everybody certainly wants to go home. I understand that. That is why I will not talk too much longer.

I said on the floor of the Senate that the Department of Defense appropriations bill would be the last bill we considered because it would have the most pork in it because everybody would want to go home and nobody would want to look at it. This is a bill that we received sometime this afternoon or late morning, this is the legislation, $343 billion. What is it full of? Does anybody know? I have had about 10 staffers trying to leaf through it and find out. We have already found billions of dollars of unauthorized projects.

This kind of behavior cannot go on. It can't go on. You will lose the confidence of the American people. You will lose their faith that you are representing them and their tax dollars and their priorities.

This is called war profiteering: On the 21st of December, the last bill, the last train loaded up, nobody has read it, and we vote for it. We all vote for it because, of course, we are in a war. We can't not do that. I won't. But the fact is, we better change the way we are doing business, and we ought to look at ourselves and see if we are proper stewards of the taxpayers' dollars.

More importantly, are we proper stewards of our Nation's defense? Are we placing our national priorities for our military and the men and women in the military and their needs first?

This is going to be a long war on terrorism. We can't afford to put all this stuff in a Defense appropriations bill that has nothing to do with defense. We can't load it up with all this pork for the Salt Lake City Olympics. We can't give sweetheart deals to cruise lines.

Early next year when we come back, I will propose a change in the rules of the Senate. I hope it will be considered by many of my colleagues. I know it probably won't be considered by those on the Appropriations Committee because now they have all the power. But I believe that this is a body of equals, of 100 equal Senators. Some are elected to our majority; some are chairmen and ranking members of committees and, obviously, have more power than others. But we are equals when it comes time to do what we should be able to do with the taxpayers' dollars.

The power is now in the hands of the Appropriations Committee and those members of the Appropriations Committees. You read these things. First you laugh, and then you cry. It is really unbelievable. I laughed when I saw $75,000 for the Reindeer Herders' Association. I cried when I saw $6 million for the airport in Juneau. We need to upgrade airports all over America.

I was very disturbed when I saw that for the byways program, last year 40 States got money for the Scenic Byways Program; this year it is 11. I was very disturbed when I saw the Transportation Appropriations Committee took $453 million out of the formula for highway fund distribution to the States and distributed it among the States of the appropriators. How do you justify that?

We debated for a week in the Senate on that formula. I didn't like the result because Arizona receives less money from Washington in our taxpayers' dollars than we send, but I accepted the verdict of the entire 100 Senators. Now hundreds of millions of dollars that should be fairly distributed under that formula were taken by the Transportation appropriators without a debate, without a hearing, and distributed to the States of the appropriators.

That kind of thing cannot continue. It cannot continue or it renders meaningless not only the nonappropriators but the debate we had. Why did we waste a week debating the TEA–21 formula. Because we thought it was important. We thought that was the way the money would be distributed. Then the Appropriations Committee takes that money and redistributes it, coincidentally, to the States of the members of the Appropriations Committee. We can't continue doing this.

I know the hour is late. I apologize to my colleagues if I have inconvenienced them. But I warned them weeks ago that the last train would be the Defense appropriations bill, and everybody would want to vote for it and leave.

I just hope that a document this big, with this much money, $343 billion in taxpayers' money, that before we vote on something such as this again, at least let's look at it and see what it contains.

I yield the floor.

Mr. HATCH. Mr. President, I want to take this opportunity to set the record straight with respect to a good deal of misinformation which has been circulating about Federal support for the 2002 Winter Olympic Games in Salt Lake City, Utah. In fact, earlier today, one of our colleagues took the floor to condemn the funding Congress has provided for the 2002 Olympics. I listened carefully to his remarks. I have to say that if his understanding of the situation were true, I could understand how he feels. Unfortunately, however, I believe he and others have relied on incomplete and distorted press accounts which are, simply, a disservice to the Olympic spirit that a majority of Americans have raced to embrace. Most of these distortions seem to have originated with an article in the December 10, 2001 edition of Sports Illustrated. The article, ironically entitled ''Snow Job,'' is in fact a snow job itself.

The thrust of the criticisms to which I refer appears to be an incorrect assumption that, in seeking support for the Olympic Games, the State of Utah is somehow attempting to enrich itself unfairly at the expense of American taxpayers. Nonsense. Poppycock. Malarky. What those who race to criticize our Olympic games fail to consider is that these are the world's Olympic Games, a time-honored tradition which our nation is so fortunate to be hosting in February. I find these slams against the Olympic Games particularly discouraging given the fact that tomorrow the Olympic torch will arrive on Capitol Hill. And I cannot fail to note that it was this very body, only days ago, that unanimously authorized the torch to be carried to our Capitol, and some are here today questioning our support for that effort.

Enthusiasm has been building across the country as the torch makes its way from Athens to Atlanta, and now from Atlanta to Washington to Salt Lake. Hundreds of thousands of spectators have been lining the streets, cheering on the torch-bearers as they carry the Olympic flame throughout the country. We have all been so heartened to see citizens from all walks of life passing the torch, honoring everyday heroes. The message of the Salt Lake 2002 Olympic Torch Relay is ''Light the Fire Within.'' The flame symbolizes the spirit and passion of individuals who inspire others. The young people who make great sacrifices to become Olympic champions are certainly heroes. The flame celebrates not only the Olympians, but people of all walks of life who have inspired others.

While the Torch Relay is only a part of the Olympics, it is symbolic of the fire and passion for excellence that the games are all about. it is ironic that a publication which has staked its reputation on America's passion for athleticism now just weeks before the opening ceremony seeks to diminish the glory of the games by sensationalizing an issue that has been scrutinized and laid to rest months ago. It is also personally discouraging to me that one of our colleagues would seize this one article, one story among a vast sea of positive journalism on the Olympics, as a populist club in a years-long crusade to curb unwise and unneeded Federal spending. Good motive. Wrong target.

Those of our colleagues who are interested in a fair and balanced analysis of Olympic spending should consult the November, 2001 General Accounting Office, GAO, report, ''Olympic Games Costs to Plan and Stage the Games in the United States.'' And if you have any problem getting a copy of the report, let me know and I'll send it right over. The GAO study debunks many of the criticisms and draws an accurate picture which should put into proper perspective many of the misconceptions that are circulating. As any fair-minded reader can glean from the extensive GAO analysis, the Sports Illustrated article compares apples to oranges when calculating the costs of the various Olympic planning events that have taken place in this country. For example, critics of Olympic spending often compare transportation improvements in Utah to those in Lake Placid, a small rural community.

The article also fails to take into consideration the passage of time and the changing scope of the Olympics as the international communities' participation in the Olympics has grown. Most disappointing, the article to fails to demonstrate an understanding of federal funding of state highway projects and the costs associated with highway projects already in the planning stages for federal funding.

Earlier, our colleague decried that the Olympic Games will cost about $1.5 billion. Wrong again. Actually, it is over that amount. But as the GAO report makes perfectly clear, Federal support only accounts for 18 percent of that total. In truth, as the GAO analysis makes clear, the total projected cost, both public and private, of staging the 2002 Winter Olympic and

Paralympic Games, excluding additional security requirements resulting from the September 11, 2001 terrorist attacks, is $1.9 billion. Of this total, GAO estimates that $342 million will be provided by the federal government, 18 percent. GAO also documents that the State of Utah will provide $150 million. That is eight percent, or almost half the Federal amount provided by the 50 States for this international effort.

Local governments alone are providing four percent, or $75 million. And the Salt Lake Organizing Committee has raised the vast majority of the funding, $1.3 billion. That is 70 percent. This represents the hard work of hundreds of people who have spent weeks and months raising private donations. This is a true public-private partnership, which shows America at its best. So why are we not racing to praise this effort, rather than condemn it? The GAO report levels the playing field by making more accurate funding comparisons with previous Olympic Games held in the United States. Rather than using a dollar to dollar comparison, a distorted calculation, the GAO report uses a percentage comparison, a better gauge to assess the true costs to the Federal government.

For the edification of my colleagues, I would like to point out that a second report will be published shortly that compares the 2002 Winter Salt Lake Winter Olympics with Olympic games in other countries. This report will be even more enlightening with regard to total cost growth for the Olympic games and to the extent other governments have subsidized the Olympics. The GAO report indicates that while the total costs for staging the U.S. Olympic games, particularly the winter games, have grown, the percentage of federal participation has remained fairly constant taking into consideration increasing security requirements due to the bomb incident in Atlanta and events since September 11, 2001.

In fact, the Sports Illustrated article attempts to throw a negative spin on security spending for the Olympics by stating that ''Surprisingly, all but $40 million of the $240 million in security spending was approved before September 11.'' Authors of the article fail to appreciate that a great majority of the security money was dedicated before September 11 because the intelligence community had knowledge of the growing terrorist threat in the world.

After September 11, the fact that security required little revision is testimony to the thoroughness in Olympic security planning and preparation. For any of my colleagues who still remain unconvinced, I urge you to review the GAO report and obtain a true picture of federal support for the Olympic Games.

I also want to address specifically the issue of federal funding for an area that has received the most attention in the press and elsewhere, yet is perhaps the least understood. This concerns federal funding for Utah transportation projects over the last five years. It has been a popular parlor game to criticize funding for Olympic transportation costs. Many naysayers have rushed to judgment incorrect judgment I might add assuming that any construction project underway in Utah must be a direct result of the Olympic Games and that the funding must be coming from sources outside Utah.

Nothing could be further from the truth. The indiscriminate and arbitrary inclusion of all transportation costs in federal funding figures for the 2002 Olympics have dramatically skewed the numbers to incorrectly support the allegation that Utah has gotten more than its fair share of Federal transportation dollars because of the Olympics. In fact, the Sports Illustrated article is particularly guilty of this erroneous assumption.

The article's $1.5 billion price tag for the Salt Lake Olympics includes well over $800 million in transportation projects that were not designed specifically for the Olympics. Let me address the three largest projects that have attracted considerable attention and set the record straight.

First, let me address the North/South Light Rail in Salt Lake City. Since 1983, the Utah Transit Authority has planed a light rail system to handle the increased traffic in and around Salt Lake City on a daily basis. The system design calls for two connected light rail lines one running north and south from downtown Salt Lake City south to Sandy City, and a second east/west line connecting downtown with Salt Lake International Airport and the University of Utah. The system is designed to be built in phases with the first phase winning approval by the Federal Transit Administration, FTA, through a rigorous competitive process, in 1996.

Under this process, FTA is required to rank proposed projects according to a number of objective criteria and to select those projects that are ranked highest. The criteria address such areas as ridership, mobility improvements, environmental benefits, operational efficiencies, and cost effectiveness. It is important to remember that the project must meet the FTA criteria before it is ever considered for federal funding and must compete with other projects. The first phase of the program, the North/South line, was found worthy and funded by both Federal and state transportation monies. This action was completely independent of the Olympics.

The North/South line was completed in December 1999 at a total project cost of $312.5 million, of which $241.3 million was paid by the federal government. The State of Utah paid $61.2 million which represents 20 percent of the bill. This is in keeping with the traditional split for state transportation projects, the state can fund as little as 20 percent and the federal as much as 80 percent of the project costs.

It is important to note that this light rail project benefits all Salt Lake City citizens. Not only does it help the poor who are unable to afford cars but it also draws commuters out of cars thus helping the environment. Everyone benefits from greater mobility and better air quality. From the opening of the line in 1999, ridership has far exceeded expectations and it has continued to rise. Again, this project was not built or funded as an Olympic project—it was approved by the Administration and Congress based on a detailed analysis of the merits of the project itself and the long-term transportation needs of the Salt Lake Valley.

The University Connector Light Rail is the second phase of the light rail program. It will run from downtown Salt Lake City to the University of Utah. In 2000, the Administration and Congress approved a full funding grant agreement, allowing the Utah Transit Authority to begin construction. The tremendous success of the North/South light rail line was a key factor in the decision by Congress and the Administration to approve construction. Like the first phase, this phase was approved by FTA pursuant to a rigorous evaluation process. However, once the project was deemed to qualify under the normal Federal guidelines, the Administration did choose to accelerate it based on a possibility that it could be completed before the Olympics. Nevertheless, everyone, including the Congress, recognized that there was a possibility that the segment would not be completed in time for the Olympic Games and, therefore, the agreement included provisions allowing for the temporary halt of construction with resumption following the Games.

Fortunately, UTA is on schedule to complete the project and therefore the extension will be operating during the Olympics. However, it is important to note that this project was never deemed necessary for the Olympic Games by the Salt Lake Organizing Committee; in fact, operations on the line will be suspended for opening and closing ceremonies at Rice-Eccles Olympic Stadium, which is served by the University Connector. The cost of the project will be $118.5 million with $84.0 million federally funded. Without a doubt, the most misunderstood of all the Utah transportation projects is the I–15 reconstruction. This $1.59 billion project has been characterized as an Olympic project funded by the Federal government. Not true.

It must be remembered that Utah is a crossroads of the West and the I–15 interstate highway is critical to regional shipping and other transportation needs. It benefits everyone in the region, including those in California, Nevada, Arizona, New Mexico, and Idaho. The project was planned long before the Games, in the mid-1980s in fact. The I–15 improvements address additional capacity needs resulting from normal growth in the Salt Lake Valley and correct some deplorable infrastructure problems such as cracks in

roadbeds and crumbling bridges. Critics also fail to recognize that the I–15 project has been a bargain for the Federal government by any analysis. The Federal taxpayer is only funding $210 million out of a $1.59 billion project. While the Federal government has authorized another $243 million in spending for this project in Utah for advance construction authority, these additional Federal funds may not be used.

Based on current projections, the most the Federal government may contribute is 25–30 percent of the project cost well below the customary 80 percent Federal share. Instead of criticizing our State, we should be applauded. Some here today might ask, ''Why did Utah pick up the lion's share of the I–15 reconstruction?''

Utah, though a relatively small state, is seriously committed to transportation improvements as demonstrated by the dedication of state funds for transportation projects. The Utah State Legislature, during the 1997 session, established an aggressive state funding program. The program, known as the Centennial Highway Fund, CHF, will provide for over $3 billion for transportation improvements across the entire state over a ten year period. The I–15 reconstruction project is the premier project funded under the CHF program. Clearly, the annual allocation of about $200 million per year in federal highway funds is insufficient to address all of the transportation needs of the state.

I want to point out that these three transportation projects, rather than a grab of federal money based on some loose association with the Olympics, are in fact long-planned and well thought-out projects to benefit the local community. The light rail system has been nationally noted as a shining example of urban/suburban Smart Growth. And interestingly, all three projects were considered and planned as a Joint Transportation Corridor which was one of the first in the country submitted for an environmental impact assessment. Today such joint corridors are common, but the Utah projects were first among this trend.

Finally, I take great exception with the Sports Illustrated article's sensational innuendos about some Utah businessmen. Did these businessmen benefit from road improvements due to the Olympic venues held on or near their property? Undoubtedly. However, we must remember that these are businessmen who have invested in property and infrastructure over the course of many years. They have taken risks by investing in the growth of the community.

As a result, many others have benefitted from their efforts. When federal money is spent on any state transportation project, the citizens of that state benefit. Some are richer; some are poorer than others. The Sports Illustrated article holds the rest of the United States to one standard and Utah to another. I do not consider this responsible journalism.

In closing, I want to express to my colleagues and the American people my appreciation for their overwhelming support of the Olympic Games. The Salt Lake Games promise to be a fantastic family event, one that I hope that the whole nation will enjoy. We should not let populist politics in Washington douse the Olympic flame in Utah.

PROCUREMENT OF SMOKELESS NITROCELLULOSE

Mr. TORRICELLI. I would like to take the opportunity to thank Senator INOUYE and Senator STEVENS and the Defense Appropriations Staff for their cooperation in securing $2 million for the procurement of smokeless nitrocellulose in this year's Department of Defense, DoD, Appropriations Bill. Indeed, the provision included in this legislation will help ensure that our nation will continue to have at least two domestic suppliers of smokeless nitrocellulose.

The $2 million direct procurement for this vital product will reestablish Green Tree Chemical Technologies of Parlin, New Jersey as a viable competitor for the DoD industrial base. Furthermore, this purchase will enable Green Tree to be viable for the long term. It will continue to produce the qualified material for DoD programs and provide the only other production base in the United States for what is a volatile product.

Mr. CORZINE. I concur with my colleague with regard to the importance of the smokeless nitrocellulose provision included in this year's defense spending bill. In fact the importance of this provision cannot be overemphasized because Green Tree now produces the qualified nitrocellulose for the Trident II, LOSAT, TOW and HELLFIRE missile programs. Had the provision providing the $2 million procurement of nitrocellulose been omitted, these important missile programs could have been disrupted because re-qualifying DoD materials can be costly and time consuming.

Mr. CARPER. My two colleagues from New Jersey are correct in their assessment of the importance of this $2 million appropriation for smokeless nitrocellulose. Earlier this year, an anti-competitive joint venture, which would have centralized the production of this key ingredient in Defense Department programs, threatened Green Tree. Indeed, had the Federal Trade Commission not found the joint venture to be monopolistic, Green Tree would have been forced to close its New Jersey plant. The provision was inserted to the conference report to serve the same purpose as an amendment added to the Senate DoD appropriations bill to provide Green Tree with a $2 million production grant.

By including this vital provision, Congress will ensure the survival of Green Tree and enhance and sustain the competitive domestic production base for smokeless nitrocellulose which plays a key role in many DoD weapons programs.

Mr. BIDEN. I join my colleagues in thanking Senator INOUYE and Senator STEVENS for their assistance in keeping this funding in the final bill. As my colleagues have indicated, smokeless nitrocellulose is a critical precursor for the ammunition of a number of vital weapons systems. By ensuring that more than one company produces it here in the United States, we are being both fiscally responsible and prudent.

SOUTHEAST MICHIGAN HEALTH ASSOCIATION DEVELOPMENT OF A HAND HELD WATER QUALITY DETECTION DEVICE

Mr. LEVIN. Mr. President, as the Senate considers the Fiscal Year 2002 Appropriations Act for the Department of Defense, I would like to emphasize the importance of portable water quality detection equipment in homeland security. Such devices are a important tools for ensuring a safe water supply for all Americans.

In Michigan, like the rest of the country, there is a vital need to implement responsible water quality monitoring and tracking due to serious threats to public health through raw sewage discharges into its lakes and the industrial outfalls that pollute lakes such as Lake St. Clair. Since September 11, this need is even more important. We must protect sources of drinking and recreational water for our citizens by developing technologies that can identify and quantify hazardous water pollutants in near ''real time''.

Four county health departments, Wayne, Oakland, Macomb and St. Clair, together with the U.S. Army Tank Automotive Research and Development Center, TARDEC, and Wayne State University, along with the support of the Michigan Department of Environmental Quality, comprise a consortium that is proposing to prove/develop methodologies to develop field portable equipment to detect chemical and biological contaminants including warfare agents. These technologies will accomplish the objectives of protecting public health and the health of our military by providing a valuable tool that can determine water quality.

September 11 has placed a new urgency on the need to implement a field detection program to ensure safe potable drinking water supplies for civilians as well as military personnel. Funding provided in this bill is essential to the Southeast Michigan Health Association's research and I would urge the Environmental Protection Agency to make this project a priority when distributing the funds provided in this bill.

Mr. BYRD. The Senator from Michigan has a very important point. I hope that the people at the Environmental Protection Agency will take note of his remarks.

Mr. LEVIN. I thank my friend from West Virginia and the committee for their hard work in putting together this important legislation.

OFFICE OF JUSTICE PROGRAMS

Mr. LOTT. Mr. President, the supplemental spending portion of the Department of Defense Appropriations bill for fiscal year 2002, H.R. 3338, including funding for the Department of Justice Office of Justice Programs' Justice Assistance account. Among the authorized uses of these funds are research and development to support counterterrorism technologies, training for first responders, and grants for State and local domestic preparedness support. The scope of events for which our communities are attempting to prepare is broad, including release of radiological, chemical or biological agents, explosions, armed confrontations, and hostage-taking. While the details of how these situations would affect a community and the appropriate responses differ due to local circumstances, weather, and topography, similar methods for planning for, detecting, and monitoring these events may apply nationwide.

It has come to my attention that technology and supporting online services are available to communities to provide emergency responders with the information necessary to manage and mitigate damage from such terrorist acts that have the potential to endanger individuals and entire communities. These systems are capable of monitoring from a remote location the release of radiological, chemical, and biological agents over open terrain or urban environments. Taking into consideration real-time weather conditions from multiple meteorological sensors, these systems can assess the need for evacuations and the potential for human loss or harm and physical damage.

I appreciate that the Office of Justice Programs works hard, both within its research and development arm, the National Institute for Justice, and in coordination with other Departments and agencies, to develop new technologies and standardized equipment and training to assist State and local responders with their preparations for these type of events. It seems an appropriate use the funds provided by this bill to the Office of Justice Programs to assess the capabilities of such systems and their utility for State and local entities with domestic terrorism responsibilities, and to work with other departments and agencies to include such systems in standard equipment lists for domestic terrorism response. I ask the Senator from New Hampshire, who is the ranking member on the appropriations subcommittee overseeing the Department of Justice, whether he agrees with that assessment.

Mr. GREGG. I agree that new technologies of the type described by the Republican Leader may indeed prove useful to local responders. I encourage the Office of Justice Programs to consider such systems and work to include such systems in its standard equipment list for domestic terrorism response if such systems prove effective.

Mr. LOTT. I thank my distinguished colleague for his assistance in this matter.

BOEING 767 LEASING PROVISION

Mrs. MURRAY. I rise to engage the Chairman and Ranking Member of the Senate Defense Appropriations Subcommittee in a colloquy regarding the Boeing 767 leasing provision included in the fiscal year 2002 Defense Appropriations bill.

Ms. CANTWELL. I rise to join my colleague from the State of Washington to discuss this matter.

Mr. INOUYE. I would be pleased to discuss this matter with the Senators.

Mr. STEVENS. As would I.

Mr. ROBERTS. This is a matter that is important to the Nation, our national security, and the great State of Kansas. I, too, would like to join with my colleagues to review the leasing issue.

Mrs. MURRAY. I agree with my colleague from Kansas. The aging of our military air refueling tanker fleet has become a critical military operations issue-one that requires a bold solution now. The Air Force's fleet of over 500 KC–135 air refueling tankers is, on average, more than 40 years old. In fact, the oldest of these tankers—100 KC–135E models—are close to 45 years in age. New 767 air refueling tankers are already under development and could begin replacing the KC–135 Es within 2 years. There would be no up-front development costs to the military.

Ms. CANTWELL. Of equal importance is the need to support our commercial and military industrial base in the wake of the September 11 terrorist attacks. The provision included in the fiscal year 2002 Defense Appropriations bill will allow the Air Force to meet a pressing military need and ensure continued, strong demand for the Boeing 767 aircraft. In this regard, it is my understanding that the provision included in the bill permits the leasing of up to 100 purpose Boeing 767 aircraft in a commercial configuration for up to 10 years. Is that correct?

Mr. INOUYE. That is correct. And contrary to some reports, this provision is permissive in nature. I believe this provision provides the right solution at the right time to address the Air Force's needs.

Mr. STEVENS. I agree with Senator INOUYE's remarks. Not only with this provisions allow for timely delivery of critical military assets, but it requires that the leasing costs be 10 percent less than the life cycle costs of the aircraft were they to be purchased outright.

Mr. ROBERTS. It is my understanding that Italy and Japan have selected the 767 tanker for their air forces and that 767s are being modified in Wichita already. Italy intends to buy four of the tankers and Japan intends to purchase at least one. I also know that this same tanker configuration is being offered commercially to other countries to meet their in-flight fueling requirements. Is that the Senator from Alaska's understanding as well?

Mr. STEVENS. It is. There are a number of other nations and at least one private company who have expressed an interest in procuring general purpose, commercially configured tanker aircraft.

Mrs. MURRAY. Then would you say that a commercial market exists for these aircraft?

Mr. STEVENS. I would.

Mrs. MURRAY. I ask the Senator from Hawaii, would you agree that a general purpose aircraft that will meet the general requirements of many customers; that can operate as a passenger aircraft, a freighter, a passenger/freighter ''combination'' aircraft, or as an aerial refueling tanker; and is available to either government or private customers meets the definition of a general purpose, commercially configured aircraft?

Mr. INOUYE. I believe that assessment makes sense.

Mrs. MURRAY. I thank the Senator.

Ms. CANTWELL. The opportunity has been presented to the Air Force and the Boeing company to come together to make this leasing provision work for the benefit of our national security and our industrial base. I urge them to do so quickly and cooperatively.

Mr. ROBERTS. I agree and pledge my support to making this effort a successful one.

Mr. STEVENS. I thank the Senators for their remarks and for their pledges of support.

Mr. INOUYE. I join with my friend, the Senator from Alaska, to thank you for your remarks and let you know that Senator STEVENS and I will closely follow the progress of this new program.

Mr. CONRAD. Mr. President, I rise to offer for the RECORD a preliminary scoring by the Budget Committee of the conference report to H.R. 3338, the Department of Defense Appropriations Act for fiscal year 2002. I will be submitting a final, official statement for the record after CBO completes its scoring of the conference report.

Preliminarily, the conference report provides $317.207 billion in nonemergency discretionary budget authority, almost all of which is for defense activities. That budget authority will result in new outlays in 2002 of $212.907 billion. When outlays from prior-year budget authority are taken into account, nonemergency discretionary outlays for the conference report total $309.256 billion in 2002. By comparison, the Senate-passed bill provided $317.206 billion in nonemergency budget authority, which would have resulted in $309.365 billion in outlays.

In addition, H.R. 3338 includes $20 billion in emergency-designated funding. That funding represents the second $20 billion previously authorized by and designated as emergency spending under Public Law 107–38, the Emergency Supplemental Appropriations Act for Recovery from and Response to Attacks on the United States. An estimate of the impact on outlays from the

emergency funding is not available at this time.

The conference report to H.R. 3338 violates section 302(f) of the Congressional Budget Act of 1974 because it exceeds the subcommittee's Section 302(b) allocation for both budget authority and outlays. Similarly, because the committee's allocation is tied to the current law cap on discretionary spending, H.R. 3338 also violates section 312(b) of the Congressional Budget Act. The bill includes language that raises the cap on discretionary category spending to $681.441 billion in budget authority and $670.206 billion in outlays and the cap on conservation category outlays to $1.473 billion. However, because that language is not yet law, the budget committee cannot increase the appropriations committee's allocation by the amount of the pending cap increase at this time, putting it in violation of the two points of order.

In addition, by including language that increases the cap on discretionary spending, adjusts the balances on the pay-as-you-go scorecard for 2001 and 2002 to zero, and directs the scoring of a provision in the bill, H.R. 3338 also violates section 306 of the Congressional Budget Act. Finally, the bill violates section 311(a)(2)(A) of the Congressional Budget Act by exceeding the spending aggregates assumed in the 2002 budget resolution for fiscal year 2002.

The conference report to H.R. 3338 violates several budget act points of order; however, it is good bill that addresses the Nation's defense needs, including the defense of our homeland. The President and Congressional leaders from both parties agreed in the wake of the September 11 attack that more money was needed to respond to the terrorists and to protect our homeland. This report follows that bipartisan agreement and includes language that raises the cap on discretionary spending. I urge its adoption.

I ask unanimous consent that a table displaying the budget committee scoring of H.R. 3338 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

H.R. 3338, CONFERENCE REPORT TO THE DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2002 PRELIMINARY SCORING

[Spending comparisons—Conference Report, in millions of dollars]

	General purpose [2]	Mandatory	Total
Conference report:			
Budget Authority	317,207	282	317,489
Outlays	309,256	282	309,538
Senate 302(b) allocation:[1]			
Budget Authority	181,953	282	182,235
Outlays	181,616	282	181,898
President's request:			
Budget Authority	319,130	282	311,224
Outlays	310,942	282	311,224
House-passed:			
Budget Authority	317,207	282	317,489
Outlays	308,873	282	309,155
Senate-passed:			
Budget Authority	317,206	282	317,488
Outlays	309,365	282	309,647
CONFERENCE REPORT COMPARED TO			
Senate 302(b) allocation:[1]			
Budget Authority	135,254	0	135,254
Outlays	127,640	0	127,640
President's request:			
Budget Authority	(1,923)	0	(1,923)
Outlays	(1,686)	0	(1,686)
House-passed [2]			
Budget Authority	0	0	0
Outlays	383	0	383
Senate-passed [2]			
Budget Authority	1	0	1
Outlays	(109)	0	(109)

[1] For enforcement purposes, the budget committee compares the conference report to the Senate 302(b) allocation.

[2] All but $3 million of the nonemergency budget authority provided in the conference report is for defense activities.

Notes.—Details may not add to totals due to rounding. Totals adjusted for consistency with scorekeeping conventions. In addition, the conference report includes $20 billion in emergency funding related to the September 11th attacks. An estimate of the outlay impact from the emergency spending is not available at this time.

Mr. MCCAIN. Mr. President, I rise once again to address the issue of wasteful spending in appropriations measures, in this case the bill funding the Department of Defense for fiscal year 2002. In provisions too numerous to mention in detail, this bill, time and again, chooses to fund pork barrel projects with little if any relationship to national defense at a time of scarce resources, budget deficits, and underfunded, urgent defense priorities.

As I pointed out previously to this body on December 7th, the massive Department of Defense Appropriations Bill Conference Report, totaling $343 billion, would be the last business in the Senate and so it is. Not because of its level of difficulty, but because it is so easy to hide the mother of all pork projects in a large massive bill or maybe it wasn't because we found it as well as many other groups. For example, let me read a few comments.

Our Nation is at war, a war that has united Americans behind a common goal—to find the enemies who terrorized the United States on September 11th and bring them to justice. In pursuit of this goal, our servicemen and women are serving long hours, under extremely difficult conditions, far away from their families. Many other Americans also have been affected by this war and its economic impact, whether they have lost their jobs, their homes, or have had to drastically cut expenses this holiday season. The weapons we have given them, for all their impressive effects, are, in many cases, neither in quantity nor quality, the best that our government can provide.

For instance, stockpiles of the precision guided munitions that we have relied on so heavily to bring air power to bear so effectively on difficult, often moving targets, with the least collateral damage possible, are dangerously depleted after only 10 weeks of war in Afghanistan. This is just one area of critical importance to our success in this war that underscores just how carefully we should be allocating scarce resources to our national defense.

Yet, despite the realities of war, and the responsibilities they impose on Congress as much the President, the Senate Appropriations Committee has not seen fit to change in any degree its usual blatant use of defense dollars for projects that may or may not serve some worthy purpose, but that certainly impair our national defense by depriving legitimate defense needs of adequate funding.

Even in the middle of a war, a war of monumental consequences, the Appropriations Committee is intent on using the Department of Defense as an agency for dispensing corporate welfare. It is a terrible shame that in a time of maximum emergency, the United States Senate would persist in spending money requested and authorized only for our Armed Forces to satisfy the needs or the desires of interests that are unrelated to defense needs.

The Investor's Business Daily, on December 18, 2001, had this to say in an article titled At the Trough: Welfare Checks To Big Business Make No Sense, ''Among the least justified outlays is corporate welfare. Budget analyst Stephen Slivinski estimates that business subsidies will run $87 billion this year, up a third since 1997, Although President Bush proposed $12 billion in cuts to corporate welfare this year, Congress has proved resistant. Indeed, many post-September 11 bailouts have gone to big business. Boeing is one of the biggest beneficiaries. Representative NORM DICKS, Democrat from Washington, is pushing a substantial increase in research and development support for Boeing and other defense contractors, the purchase of several retrofitted Boeing 767s and the leasing of as many as 100 767s for purposes ranging from surveillance to refueling. Boeing has been hurt by the storm that hit airlines, since many companies have slashed orders. Yet China recently agreed to buy 30 of the company's planes, and Boeing's problems predate the September 11 attack. It is one thing to compensate the airlines for forcibly shutting them down; it is quite another to toss money at big companies caught in a down demand cycle. Boeing, along with many other major exporters, enjoys its own federal lending facility, the Export-Import Bank. ExIm uses cheap loans, loan guarantees and loan insurance to subsidize purchases of U.S. products. The bulk of the money goes to big business that sell airplanes, machinery, nuclear power plants and the like. Last year alone, Boeing benefitted from $3.3 billion in credit subsidies. While corporate America gets the profits, taxpayers get the losses. . . .The Constitution authorizes a Congress to promote the general welfare, not enrich Boeing and other corporate behemoths. There is no warrant to take from Peter so Paul can pay higher corporate dividends. In the aftermath of September 11, the American people can ill afford budget profligacy in Washington. If Congress is not willing to cut corporate welfare at a time of national crisis, what is it willing to cut?''

As I mentioned last week when the Senate version of the Defense Appropriations bill was being debated and—now carried through the Conference Committee there is a sweet deal for the Boeing Company that I'm sure is the envy of corporate lobbyists from one end of K Street to the other. Attached is a legislative provision to the Fiscal Year 2002 Department of Defense Appropriations bill that would require the Air Force to lease one hundred 767 aircraft for use as tankers for $26 million apiece each year for the next 10 years. Moreover, in Conference Committee the appropriators added four 737 aircraft for executive travel mostly benefitting Members of Congress. We have been told that these aircraft will be assigned to the 89th Airlift Wing at Andrews Air Force Base. Since the 10-year leases have yet to be signed, the cost of the planes cannot be calculated, but it costs roughly $85 million to buy one 737, and a lease costs significantly more over the long term.

The cost to taxpayers?

Two billion and six hundred million dollars per year for the aircraft plus another $1.2 billion in military construction funds to modify KC–135 hangars to accommodate their larger replacements, with a total price tag of more than $30 billion over 10 years when the costs of the 737 leases are also included. This leasing plan is five times more expensive to the taxpayer than an outright purchase, and it represents 30 percent of the Air Force's annual cost of its top 60 priorities. But the most amazing fact is that this program is not actually among the Air Force's top 60 priorities nor do new tankers appear in the 6-year defense procurement plan for the Service!

That is right, when the Air Force told Congress in clear terms what its top priorities were tankers and medical lift capability aircraft weren't included as critical programs. In fact, within its top 30 programs, the Air Force has asked for several essential items that would directly support our current war effort: wartime munitions, jet fighter engine replacement parts, combat support vehicles, bomber and fighter upgrades and self protection equipment, and combat search and rescue helicopters for downed pilots.

Let me say that again, within its top 30 programs, the Air Force has asked for several essential items that would directly support our current war effort: wartime munitions, jet fighter engine replacement parts, combat support vehicles, bomber and fighter upgrades and self protection equipment, and combat search and rescue helicopters for downed pilots.

This leasing program also will require $1.2 billion in military construction funding to build new hangars, since existing hangars are too small for the new 767 aircraft. The taxpayers also will be on the hook for another $30 million per aircraft on the front end to convert these aircraft from commercial configurations to military; and at the end of the lease, the taxpayers will have to foot the bill for $30 million more, to convert the aircraft back—pushing the total cost of the Boeing sweetheart deal to $30 billion over the ten-year lease. Mr. President, that is waste that borders on gross negligence.

But this is just another example of Congress' political meddling and of how outside special interest groups have obstructed the military's ability to channel resources where they are most needed. I will repeat what I've said many, many times before—the military needs less money spent on pork and more spent to redress the serious problems caused by a decade of declining defense budgets.

This bill includes many more examples where congressional appropriators show that they have no sense of priority when it comes to spending the taxpayers' money. The insatiable appetite in Congress for wasteful spending grows more and more as the total amount of pork added to appropriations bills this year—an amount totaling over $15 billion.

This defense appropriations bill also includes provisions to mandate domestic source restrictions; these ''Buy America'' provisions directly harm the United States and our allies. ''Buy America'' protectionist procurement policies, enacted by Congress to protect pork barrel projects in each Member's State or District, hurt military readiness, personnel funding, modernization of military equipment, and cost the taxpayer $5.5 billion annually. In many instances, we are driving the military to buy higher-priced, inferior products when we do not allow foreign competition. ''Buy America'' restrictions undermine DoD's ability to procure the best systems at the least cost and impede greater interoperability and armaments cooperation with our allies. They are not only less cost-effective, they also constitute bad policy, particularly at a time when our allies' support in the war on terrorism is so important.

Secretary Rumsfeld and his predecessor, Bill Cohen, oppose this protectionist and costly appropriation's policy. However, the appropriations' staff ignores this expert advice when preparing the legislative draft of the appropriations bills each year. In the defense appropriations bill are several examples of ''Buy America'' pork—prohibitions on procuring anchor and mooring chain components for Navy warships; main propulsion diesel engines and propellers for a new class of Navy dry-stores and ammunition supply ships; supercomputers; carbon, alloy, or armor steel plate; ball and roller bearings; construction or conversion of any naval vessel; and, other naval auxiliary equipment, including pumps for all shipboard services, propulsion system components such as engines, reduction gears, and propellers, shipboard cranes, and spreaders for shipboard cranes.

Also buried in the smoke and mirrors of the appropriations markup is what appears to be a small provision that has large implications on our warfighting ability in Afghanistan and around the world. Without debate or advice and counsel from the Committee on Armed Services, the appropriators changed the policy on military construction which would prohibit previous authority given to the President of the United States, the Secretary of Defense, and the Service Secretaries to shift military construction money within the MILCON account to more critical military construction projects in time of war or national emergency. The reason for this seemingly small change is to protect added pork in the form of military construction projects in key states, especially as such projects have historically been added by those Members who sit on the Military Construction Appropriations Subcommittee, at the expense, Mr. President, of projects the Commander-in-Chief believes are most needed to support our military overseas.

Does the appropriations committee have any respect for the authorizing committees in the Senate?

I look forward to the day when my appearances on the Senate floor for this purpose are no longer necessary. There is nearly $2.5 billion in unrequested defense programs in the defense appropriations bill and another $1.1 billion for additional supplemental appropriations not directly related to defense that have been added by the Chairman of the Committee. Consider what $3.6 billion when added to the savings gained through additional base closings and more cost-effective business practices could be used for. The problems of our armed forces, whether in terms of force structure or modernization, could be more assuredly addressed and our warfighting ability greatly enhanced. The public expects more of us.

But for now, unfortunately, they must witness us, blind to our responsibilities in war, going about our business as usual.

I ask unanimous consent that the list of earmarks from the fiscal year 2002 Department of Defense Appropriations Bill Conference Report be placed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FY 2002 Defense appropriations pork

[In millions]

DIVISION A	
Operation and Maintenance, Army:	
Fort Knox Distance Learning Program	2.1
Army Conservation and Ecosystem Management	4.3

Total Commerce Related Earmarks:	$1.1 Billion
Total Pork in FY 2002 Defense Appropriations Conference Report:	$3.6 Billion

Mrs. MURRAY. Mr. President. I rise to lend my strong support to the Department of Defense Appropriations Conference Report.

And I do so with great admiration and respect for the leadership demonstrated by Chairman DANIEL INOUYE and Senator TED STEVENS. They have done great work, and I encourage the Senate to embrace this appropriations conference report.

I do want to briefly address the issue of tanker replacement which has been hotly debated here on the floor. I support the tanker leasing provisions in the bill, and I am again grateful to Senator INOUYE and Senator STEVENS for their work on the Boeing 767 leasing provisions. Many Senators worked on this issue. There were many hurdles to address and overcome. And we worked through them all together in a bipartisan fashion.

I want to again quote the Secretary of the Air Force from a letter he wrote to me in early December. Secretary James Roche says and I quote,

> The KC–135 fleet is the backbone of our Nation's Global Reach. But with an average age of over 41 years, coupled with the increasing expense required to maintain them, it is readily apparent that we must start replacing these critical assets. I strong endorse beginning to upgrade this critical warfighting capability with new Boeing 767 tanker aircraft.

The record is clear. The Air Force has been a contributing partner and fully supports the tanker replacement program contained in this appropriations bill.

The existing tankers are old and require costly maintenance and upgrades. The K–135s were first delivered to the Air Force in 1957. On average, they are 41 years old. KC–135s spend about 400 days in major depot maintenance every 5 years.

The tanker replacement program contained in this bill will save taxpayers $5.9 billion in upgrade and maintenance costs.

The record is clear. We need to move forward on tanker replacement. Our aging tankers have flown more than 6000 sorties since September 11. Our ability to project force depends on our refueling capabilities. We can no longer ignore these old and expensive aircraft.

The record is also clear on my State of Washington. This will help the people of my state. Washington now has the highest unemployment rate of any state in the nation. I am here to do everything I can to help my constituents. Any Senator, including critics of the leasing provisions in this bill, would do the same thing.

But this is not just about my State. Every state involved in aircraft production will benefit.

In addition, it is in our national interest to keep our only commercial aircraft manufacturer healthy in tough times, to keep that capacity and to keep that skill set.

The Air Force has identified this as a critical need. We rely on refueling tankers. Now is the time to move forward with tanker replacement. I again commend Senator INOUYE, Senator STEVENS, Senator CANTWELL, Senator CONRAD, Senator ROBERTS and the many others who worked so hard to move this program forward.

Shortly, we are all going to go home for the holidays to be with our families. Senators can go home knowing that they have sent a very powerful message to the families of our service members. We have acted today with this bill to equip our personnel now and in the future with best equipment and the best technology available to our armed forces. I will proudly vote for this conference report.

Mr. BIDEN. Mr. President, I rise today to thank my Senate colleagues for their support of two important aviation needs and to express my disappointment that the House did not support those decisions. I know that it is always difficult to reconcile the decisions made in the Senate with those made in the House, but this case, I am very sorry to see that the Senate's wisdom was not sustained.

When the Defense Appropriations bill left the Senate, it included full-funding for two important aviation assets—C–5 avionics modernization and 10 additional Blackhawks for the Amy National Guard. Unfortunately, the bill that we have before us does not include those items. Instead, the C–5 avionics funding is cut by $70.50 million and there are only 4 Blackhawks going to the Army National Guard.

Let me first review the importance of the C–5 Avionics Modernization Program which was not only fully funded in the Senate's Defense Appropriations bill, but which both the House and Senate Armed Services Committees fully supported in their bills.

The C–5 is what the military uses when it needs to deploy quickly with as much equipment as possible. This was confirmed once again in Operation Enduring Freedom where the Air Force reports that C–5s have hauled forty-six percent of the cargo during the operation while only flying approximately twenty-eight percent of the sorties. This plane is a vital part of our military success. It is also a key player in our nation's humanitarian efforts, so critical to the long-term success of our national security strategy.

Taking $70.5 million from the President's funding request means that critical Secretary of Defense directed Flight and Navigation Safety modifications and Global Air Traffic Management modifications will be delayed by up to a year or more. Delays in installing the safety equipment continue to place aircrews at risk at a time when they are engaged around the world in the war on terrorism and humanitarian missions. Delays also prevent the C–5 from being fully employed in certain parts of the world as AMP modifications are necessary to comply with new GATM regulations.

At a time when we are asking our military to do so much, to deny our aircrews and military planners C–5s that have the safety upgrades and operational improvements that the AMP will provide does not make sense. Again, I am sorry that the House did not agree with the Senate. I hope we can reverse this problem next year by accelerating the program with increased funding. I will certainly fight to do that and I hope that other colleagues who have been supportive in the past will join me in that fight next year.

My other concern with this bill is that the Army National Guard's need for additional UH–60 Blackhawk helicopters has not been properly addressed. Today, the Army National Guard comprises fifty percent of the Army's total utility airlift capability. Unfortunately, only twenty-seven percent of the fleet is usually flyable. On a regular basis a full seventy-three percent of the utility helicopters in the Guard are grounded because of a lack of parts or safety of flight concerns! Virtually every state confronts significant shortages, and some states, like Delaware, have absolutely no modern helicopters, relying instead on one or two Vietnam-era helicopters.

This means that regular state missions cannot be executed. Pilots and maintenance personnel cannot remain proficient. These skilled personnel are

not able to do their job, get frustrated, and decide not to stay in the military. Meanwhile, the Army is simply unready in this area. In normal times, these are unacceptable realities. Today, when the Guard has been asked to do so much more, it is unfathomable to me that we would not do more to fix these problems.

The Senate recognized the need to do more and provided a first installment of ten new Blackhawk helicopters for the Army Guard. Unfortunately, this bill only provides four. Today, many in utility aviation units do not have even the bare minimum they need to stay proficient, let alone do their missions. This is certainly true in Delaware and I know it also true for at least five other states. This bill does not even allow the Guard Bureau to put one new Blackhawk in each state that needs seven to ten!

The men and women who serve in the Guard every day, both in their states and overseas, deserve to have the equipment they need to perform their missions. I am sorry the House did not agree to do more to address their aviation needs this year and I will work with my colleagues again next year to try to improve this situation.

Mr. President, this bill includes a number of important items that will benefit our military and I support it. But, I want to put my colleagues on notice that next year I will be fighting to accelerate C–5 modernization and to get additional UH–60s for the Army National Guard. The Senate spoke wisely last week in fully funding both of these aviation needs and I am sorry that the House was unwilling to sustain that wisdom.

Mr. ALLARD. Mr. President, being that I was not able to discuss the Fiscal Year 2002 Defense Authorization Act last Thursday, I wanted to take a few minutes to discuss a few aspects of this very important bill.

I strongly support the Fiscal Year 2002 Defense Authorization Act. I want to congratulate Chairman LEVIN and the Ranking Member WARNER for the good work and the way they have moved this important bill for our men and women in the military. I believe this is a balanced bill which provides a much needed and deserved increase for our military men and women. After years of declining budgets, this bill continues the increase in resources which started 2 years ago.

The bill provides $343.3 billion in budget authority, plus authorizes the $21.2 billion in emergency supplemental appropriations as requested by the President in order to respond to the terrorist attacks. The bill also adds over $779.4 million above the request for the Department of Energy's environmental cleanup programs and nuclear weapons activities.

When I became the Personnel Subcommittee Chairman in 1999, the subcommittee provided the first major pay raise for our troops in over 20 years and I am glad that this year's bill continues this trend. The bill provides a targeted pay raise effective January 1, 2002, ranging 5 to 10 percent, with the largest increase going to junior officers and non-commissioned officers.

While no member enjoys having bases closed in their State, or even the possibility of closure, it is that time that we recognize we do have excess capacity and that is time to consider another round of base closings as requested by the administration. After much negotiating, the conferees authorized a round of base closings in 2005, with established criteria based on actual and potential military value that the Secretary of Defense must use to determine which bases to recommend.

As the rulemaking member of the Strategic Subcommittee, I would like to congratulate my chairman, Senator REED, for his good work on this bill. He worked in a bipartisan and even handed manner. While we disagreed on the missile defense programs, Senator REED and I were in agreement on most of the remaining major issues before the subcommittee.

While many in Congress may disagree on funding levels of missile defense, no one can argue that ballistic missiles, armed with nuclear, biological, or chemical warheads, present a considerable threat to U.S. troops deployed abroad, allies, and the American homeland. The consequences of such an attack on the United States would be staggering; yet the United States currently has no system capable of effectively stopping even a single ballistic missile headed toward the American homeland or depolyed U.S. troops.

To end this vulnerability, the President requested a significant increase in funding for ballistic missile defense programs which was an important first step toward protecting all Americans against ballistic missile attack. The conference provided up to $8.3 billion, $3 billion more than the fiscal year 2001 level, for the continued development of ballistic missile defenses. In addition, the conferees provided flexibility for the President to use up to $1.3 billion of these funds for programs to combat terrorism.

In an effort to increase the efficiency and productivity of the missile defense programs, the administration requested to fundamentally restructure the nation's ballistic missile defense programs into six primary areas: Boost, Midcourse, Terminal Defenses, Systems Engineering, Sensor, and Technology Development. This new approach will provide the flexibility to allow programs that work to mature but the ability to cancel programs that do not. Plus, the program will provide enhanced testing and test infrastructure.

A major testing initiative included in the President's request is the 2004 Pacific missile defense test bed, the conferees supported the request, for $786 million for the including $273 million for construction primarily at fort Greely, Alaska and other Alaska locations. Beginning in 2004, the Pacific missile test bed will allow more challenging testing in a far wider range of engagement scenarios than can be accommodated today.

The conferees provided the following levels for the restructured programs: $780 million for BMD system activities including battle management, communications, targets, countermeasures, and system integration; $2.2 billion (matching the President's request) for terminal defense systems, including Patriot Advanced Capability-3 (PAC–3), Medium Extended Air Defense System (MEADS), Navy Area (which has now been cancelled by the Administration), Theater High Altitude Air Defense (THAAD), and international missile defense programs, including the Arrow program; $3.9 billion (matching the President's request) for mid-course defense systems, including ground-based (formerly known as national Missile Defense) and sea-based (formerly known as Navy Theater Wide Defense) missile defense programs; $685 million (matching the President's request) for boost phase systems, including the Airborne Laser (ABL) and Space-Based Laser (SBL); $496 million (matching the President's request) for the Space-Based Infrared System (SBIRS) and international sensor programs, including the Russian-American Observation Satellite project; $113 million (matching the President's request) for development of technology and innovative concepts necessary to keep pace with evolving missile threats;

However, the conferees did not support the President's request to transfer PAC–3, Medium Extended Air Defense System, and Navy Area programs from BMDO to the military services. The bill requires the Secretary of Defense to establish guidelines for future transfers, and to certify that transferred programs are adequately funded in the future year defense program.

Just as the President moves to reduce our nuclear forces the conferees repealed the statute that prohibits the U.S. from retiring or dismantling certain strategic nuclear forces until START II enters into force. As part of this effort, the conferees increased funding for the retirement of the Peacekeeper ICBM.

The Strategic Subcommittee also has oversight over two-thirds of the Department of Energy's budget as it relates to our nuclear forces and defense nuclear cleanup programs.

During the subcommittee's hearings, we heard from DOE that one of the major shortfalls of the Department is the conditions of the infrastructure of our DOE labs and plants, the need for a principal deputy administrator at the National Nuclear Security Administration, and an increase in DOE's environmental cleanup programs and nuclear weapons activities.

Therefore the conferees provided $6.2 billion for DOE environmental cleanup and management programs including: $3.3 billion for work at facilities with

complex and extensive environmental problems that will be closed after 2006; $1.1 billion for the Defense Facilities Closure Project; $959.7 million for construction and site completion at facilities that will be closed by 2006; $216 million ($20 million more than the President's request) for the Defense Environmental Restoration and Waste Management Science and Technology programs; and $153.5 million ($12 million more than the President's request) for Defense Environmental Management Privatization.

In regards to the National Nuclear Security Administration conferees provided $7.1 billion for managing the nation's nuclear weapons, nonproliferation and naval reactor programs, including: $1 billion for stockpile life extension and evaluation programs; $2.1 billion for focused efforts to develop the tools and knowledge necessary to ensure the safety, reliability, and performance of the nuclear stockpile in the absence of underground nuclear weapons testing. Included in this, the conferees provided $219 million to fully fund plutonium pit manufacturing and certification; $200 million to begin to recapitalize the nation's nuclear weapons complex infrastructure, much of which dates to the post-World War II era; $688 million for the naval reactors program, which supports operation, maintenance and continuing development of Naval nuclear propulsion systems.

There is one issue that I am very proud to say is included in this bill and that is the creation of the Rocky Flats National Wildlife Refuge. This effort has been done in a bipartisan manner with Congressman UDALL and more than 2 years worth of work by local citizens, community leaders, and elected officials. Its passage has ensured that our children and grandchildren will continue to enjoy the wildlife and open space that currently exists at Rocky Flats. However, even with its passage, my primary goal remains the safe cleanup and closure of Rocky Flats.

I would like to mention a few of the following high points of the bill.

Rocky Flats will remain in permanent federal ownership through a transfer from the Department of Energy to the U.S. Fish and Wildlife Service after the cleanup and closure of the site is complete;

Secondly, we understand the importance of planning for the transportation needs of the future and have authorized the Secretary of Energy and the Secretary of the Interior the opportunity to grant a transportation right-of-way on the eastern boundary of the site for transportation improvements along Indiana Street;

The third point is one of the most important directives in this Act and it states that ''nothing . . . shall reduce the level of cleanup and closure at Rocky Flats required under the RFCA or any Federal or State law.'' I believe it is important to reiterate that the cleanup levels for the site will be determined by the various laws and processes set forth in the Rock Flats Cleanup Agreement and State and Federal law; and

Fourth, we firmly believe that access rights and property rights must be preserved. Therefore, this legislation recognizes and preserves all mineral rights, water rights and utility rights-of-ways. This act does, however, provide the Secretary of Energy and the Secretary of Interior the authority to impose reasonable conditions on the access to private property rights for cleanup and refuge management purposes.

I would also like to highlight another section of the bill which encourages the implementation of the recommendations of the Space Commission, which concluded that the Department of Defense is not adequately organized or focused to meet U.S. national security space needs. There are four major sections of the provision.

The first provision requires the Secretary of Defense to submit a report on steps taken to improve management, organization and oversight of space programs, space activities, and funding and personnel resources.

The second provision requires the Secretary of Defense to take actions that ensure space development and acquisition programs are jointly carried out and, to the maximum extent practicable, ensure that offers of the Army, Navy, Marine Corps, and Air Force are assigned to and hold leadership positions in such joint program offices.

Third, the conferees request that the Comptroller General report back to Congress on the actions taken by the Secretary of Defense to implement the recommendations contained in the Commission report.

Fourth, due to the concerns of the ''tripled hatted'' nature of the Commander-in-Chief, U.S. Air Force Space Command, the bill states that the position should not serve concurrently as commander of the North American Air Defense Command and as Commander-in-Chief, U.S. Space Command. Plus, the bill provides the needed flexibility in general officer limits to ensure that the commander of Air Force Space Command will serve in the grade of general.

Finally, even though I strongly support the Fiscal Year 2002 Authorization Act, I am very disappointed that this bill ignored real shortcoming as it relates to our military's voting rights.

While my original bill went much further in implementing the Space Commission report, I believe this is a first good step and, if needed, I hope we can revisit this issue next year to ensure that space management and programs get the senior level support it deserves.

Finally, even though I strongly support this bill, I am very disappointed that this bill ignored a real shortcoming as it relates to our military voting rights.

When I introduce S. 381, my Military Voting Rights Bill, I sought to improve the voting rights of overseas military voters in six key ways. And this Senate agreed to include that bill in our version of the defense authorization. But I am severely dismayed that the conference report contained none of the most important provisions relating to military voting.

Considering the egregious acts of last November, with the memory of campaign lawyers standing ready with preprinted military absentee ballot challenge forms, we needed to respond. And yet the House of Representatives, led by the House Administration Committee, refused to accept the sections of the Senate passed bill that would most effectively ensure the voting rights of our military men and women and their families.

In September, the GAO released a 92-page report entitled ''Voting Assistance to Military and Overseas Citizens Should Be Improved.'' I will not read the entire thing, but let me read one of the summary headers: ''Military and Overseas Absentee Ballots in Small Countries Were Disqualified at a Higher Rate Than Other Absentee Ballots.''

I also have an article from the Washington Post, page A17, November 22, 2000 that reads in part '' . . . lawyers spent a contentious six hours trying to disqualify as many as possible of the absentee ballots sent in by overseas military personnel.''

Let me also read from a Miami Herald article, November 19, 2000: ''Forty percent of the more than 3,500 ballots in Florida were thrown out last week for technical reasons, and elections observers are wondering whether the State's election laws are fair, especially to military personnel.''

Two main flaws in the military voter system—flaws that we have concrete proof were exploited—could have been fixed last week by sections of the Military Voting Rights bill that the House refuses to accept.

The first section prohibits a State from disqualifying a ballot based upon lack of postmark, address, witness signature, lack of proper postmark, or on the basis of comparison of envelope, ballot and registration signatures alone—these were the basis for most absentee ballot challenges.

There has been report after report of ballots mailed—for instance form deployed ships or other distant postings—without the benefit of postmarking facilities. Sometimes mail is bundled, and the whole group gets one postmark, which could invalidate them all under current law. Military ''voting officers'' are usually junior ranks, quickly trained, and facing numerous other responsibilities. We can not punish our service personnel for the good faith mistakes of others.

And military voters who are discharged and move before an election but after the residency deadline cannot vote through the military absentee ballot system, and sometimes are not able

to fulfill deadlines to establish residency in a State. There are roughly 20,000 military personnel separated each month. Our section allowed them to use the proper discharge forms as a residency waiver and vote in person at their new polling site. This brings military voters into their new community quicker. But the House rejected this section as well.

The Senate moved to address these problems. The Houses refuses to do so. This is an issue I, and those who feel as strongly as I do, such as our nation's veteran and active duty service organizations, will continue to press.

Mr. BOND. Mr. President. I rise to raise some significant concerns about S. 1389, the Homestake Mine Conveyance Act of 2001, which has been attached to the Department of Defense-Supplemental conference report.

This legislation will have serious adverse implications for the Federal Government most notably, the National Science Foundation (NSF) and the Environmental Protection Agency (EPA)—due to its unprecedented legal protections provided to the State and the Homestake Mining Company and its potentially significant budgetary costs.

While some modifications to the original have been made to the bill to address many of the problematic legal and programmatic issues, these changes were modest at best and the bill as a whole still has significant legal, budgetary, and policy implications that could negatively impact NSF and EPA. This bill is an improvement over the original legislation introduced by the senators from South Dakota, but it is still problematic and troubling.

As the ranking member of the VA-HUD Appropriations Subcommittee, I believe in deferring to the scientific expertise and judgment of the NSF and its Science Board in determining which projects had scientific merit and deserved funding. The Congress should not be in the business of legislating what is scientifically meritorious. The Homestake legislation totally circumvents the merit review process long-established and followed by the agency.

The reality of this matter is that the South Dakota Senators are using NSF as a means to save jobs that will be lost from the closing of the mine. While I appreciate the effort to save people's jobs, it should not be done by undermining the scientific merit review process. This is simply the wrong approach and creates a new, dangerous precedent.

Further, the broad indemnification provisions in the bill, even with the proposed modifications, are sweeping. The Federal Government would also be required to provide broad indemnification to both the Homestake Mining Company and the State for PAST and FUTURE claims related to the site. The sweeping and unprecedented language is in conflict with, and greatly expands, the Federal Government's potential tort liability well beyond provided in the Federal Tort Claims Act. The Federal Government's liability with respect to environmental claims would also be potentially unlimited. It is unclear whether the bill affects Homestake's obligations under court-approved Consent Decrees (CD) that the Federal Government has already entered into. These CDs address certain remediation and natural resource damage claims. There are additional legal issues related to the Anti-Deficiency Act and tort law concerning compensation after the fact of injury.

Funding this costly project would also potentially sap funding for other current and new initiatives that have scientific merit and which the Congress and Administration fully support. Critically important scientific research initiatives such as nanotechnology, information technology, and biotechnology initiatives may be significantly impaired. Major research projects related to astronomy, engineering, and the environment could be cut back or not funded.

I hope my colleagues will be sensitized to the dangerous legal, budgetary, and policy implications of the Homestake legislation. I am extremely troubled by this legislation and hope that political pressure does not influence the ultimate outcome of the proposed project in the Homestake bill.

Mr. DASCHLE. Mr. President, I am delighted that the Congress has incorporated S. 1389, the Homestake Mine Conveyance Act of 2001, as amended, into the fiscal year 2002 Department of Defense Appropriations conference report.

This important legislation will enable the construction of a new, world-class scientific research facility deep in the Homestake Mine in Lead, SD. Not only will this facility create an opportunity for critical breakthroughs in physics and other fields, it will provide unprecedented new economic and educational opportunities for South Dakota.

Just over a year ago, the Homestake Mining Company announced that it intended to close its 125-year-old gold mine in Lead, SD, at the end of 2001. This historic mine has been a central part of the economy of the Black Hills for over a century, and the closure of the mine was expected to present a significant economic blow to the community.

In the wake of this announcement, you can imagine the surprise of South Dakotans to discover that a committee of prominent scientists viewed the closure of the mine as an unprecedented new opportunity to establish a National Underground Science Laboratory in the United States. Because of the extraordinary depth of the mine and its extensive existing infrastructure, they found that the mine would be an ideal location for research into neutrinos, tiny particles that can only be detected deep underground, where thousands of feet of rock block out other cosmic radiation.

Earlier this year, I met with several of these scientists to determine how they planned to move forward. They told me they intended to submit a proposal to the National Science Foundation for a grant to construct the laboratory. After a thorough peer review, the National Science Foundation would determine whether or not it would be in the best interests of science and the United States for such a laboratory to be built. The scientists also explained that since the National Science Foundation normally does not own research facilities, the mine would need to be conveyed from Homestake Mining Company to the State of South Dakota for construction to take place. For the company to be willing to donate the property, and for the state to be willing to accept it, both would require the Federal Government to assume some of the liability associated with the property.

The purpose of the Homestake Mine Conveyance Act of 2001 is to meet that need. It establishes a process to convey the mine to the State of South Dakota, and for the Federal Government to assume a portion of the company's liabilities. This Act will only take effect if the National Science Foundation selects Homestake as the site for an underground laboratory. Only property needed for the construction of the lab will be conveyed, and conveyance can only take place after appropriate environmental reviews and after the Environmental Protection Agency certifies the remediation of any environmental problems. If the mine is conveyed, the State of South Dakota will be required to purchase environmental insurance for the property and set up an environmental trust fund to protect the taxpayers against any environmental liability that may be incurred.

I believe this process is fair and equitable to all involved. It will enable the laboratory to be constructed and the environment to be protected.

I am not a scientist, and the decision to build this laboratory must be made by the scientific community. However, it is helpful to review some of the information I have received from the team of scientists supporting this project to better understand why we would take the unusual step of conveying a gold mine to a state with federal indemnification.

Dr. John Bahcall is a scientist at the Institute for Advanced Study in Princeton, NJ. He was awarded the National Medal of Science in 1998. He is a widely recognized expert in neutrino science and an authority on the scientific potential of an underground laboratory. Recently, I received a letter from him explaining the research opportunities created by an underground laboratory. In the letter, he explained, ''There are pioneering experiments in the fields of physics, astronomy, biology, and geology that can only be carried out in an environment that is

shielded from the many competing phenomena that occur on the surface of the earth. These experiments concern such fundamental and applied subjects as: How stable is ordinary matter? What is the dark matter of which most of our universe is composed? What new types of living organisms exist in deep underground environments from which sunlight is excluded? How are heat and water transported underground over long distances and long times?''

As Dr. Bahcall's letter makes clear, the laboratory would provide an opportunity for a wide variety of important research. For that reason, it is receiving strong support in the scientific community. For example, every six to seven years, the Nuclear Science Advisory Board and the Nuclear Physics Division of the American Physical Society develop a Long Range Plan that identifies that the major priorities of American nuclear physicists for coming years. After a series of meetings, these scientists ranked the creation of a National Underground Science Laboratory as one of their top priorities in their Long Range Plan.

In a recent letter to the National Science Foundation, members of the Nuclear Science Advisory Committee explained their support for the creation of an underground laboratory at Homestake: ''[T]here is presently an outstanding opportunity for the United States to assume world leadership at the frontier of underground science through the acquisition and development by the National Science Foundation of the Homestake mine in South Dakota to create a deep underground (7000 meter of water equivalent (m.w.e.)) laboratory. . . . In the last decade, fundamental progress has been made in underground experiments in such diverse areas as nucleon decay, atmospheric neutrino oscillations, solar neutrino oscillations, and searches for dark matter. These studies not only have increased our understanding of the fundamental properties of the universe, but have pointed to new and even more challenging frontiers of compelling scientific interest. To explore these frontiers, the next generation of experiments (e.g. solar neutrino, double beta decay, etc.) will require a deep underground laboratory to reduce cosmic ray-related backgrounds, which constitute the limiting factor for high sensitivity experiments. A National Underground Science Laboratory at a depth of 7000 m.w.e., at the Homestake Mine site would constitute a world class facility, with a dedicated infrastructure to insure [sic] U.S. leadership in underground studies well into the next century.''

While there are two other locations under consideration in the United States for the construction of an underground laboratory, scientists have stated that the Homestake Mine, because of its unique characteristics, is the best location in the country to conduct this research. Dr. Wick Haxton of the Institute for Nuclear Theory put together the team's findings in a report entitled, ''The U.S. National Underground Science Laboratory at Homestake: Status Report and Update.''

I'd like to share some of their report: ''The announcement on September 11, 2000, that the historic Homestake Gold Mine would soon close presented a remarkable opportunity for creating a dedicated multipurpose deep underground laboratory in the U.S. Among its attributes are:

Homestake has very favorable physical properties. It is the deepest mine in the U.S. The rock is hard and of high quality: even at depth there is an absence of rock bursts common at sites of comparable depth. Large cavities built at depths of 7400 and 8000 feet have been shown to be stable over periods of a decade or more. The mine is dry, producing only 500 gallons/minute of water throughout its 600 km of drifts.

Homestake has shafts that can be adapted to provide unprecedented horizontal access. The replacement cost of the Ross and Yates shafts and the No. 6 winze, which access the proposed laboratory site, is approximately $300 million. The shaft cross sections are unusually large, 15 x 28 feet, and the Yates hoist, powered by two 1250 hp Nordberg motors, can lift nearly 7 tons. This makes it possible to lower cargo containers directly to the underground site. Finally, there are several existing ventilation shafts as well as an extensive set of ramps that connect the levels, providing important secondary escape paths.

Homestake is a site with remarkable flexibility. There are drifts approximately every 150 feet in depth, allowing experiments to be conducted at multiple levels and opening up possibilities for an unusually broad range of science. Coupled with the extensive ventilation system—including a massive cooling plant with four York compressors and 2300 tons of refrigeration—this allows a wide range of experiments to be mounted, including those involving flammables, cryogens, or other substances best sequestered and separately vented.

The flexibility to accommodate a very wide range of science is important because significant advantages will accompany a single multipurpose national laboratory. There are economies of scale in infrastructure and safety, including the development of common specialized facilities (like a low-background counting facility). This reduces costs and saves human scientific capital. Concentration also produces a stronger scientific and technical environment. It allows synergisms between disciplines to grow.

The proposed principle site of the laboratory is the region at 7400 ft between the Ross and Yates shafts. The site is accessible now: extensive coring studies of the site will be performed to verify its suitability, prior to any expenditures for major construction.

The mine is fully permitted for safety and rock disposal on site, and is located in a state supportive of mining.

The mine includes surface buildings, extensive fiber optics and communications systems, a large inventory of tools and rolling stock that may be transferable to the laboratory, and skilled engineers, geologists, and miners who know every aspect of the mine.''

This is not the first time that Homestake, or other mines, have been used to support this kind of research. In fact, underground scientific research at the Homestake mine dates back to 1965, when a neutrino detector was installed in the underground mine at the 4850-foot level. Research from that experiment is acknowledged as critical to the development of neutrino astrophysics. Similar experiments have continued in the Soudan mine in Minnesota, and in underground laboratories outside of the United States, leading to important discoveries and developments in particle physics and theory.

As I've stated, the purpose of the legislation passed by the Senate is to allow the conveyance of the property needed for the construction of the laboratory from Homestake Mining Company to the State of South Dakota. I'd like to take a moment to explain why it is necessary for the Federal Government to transfer the mine to the State, and to indemnify the company and the State in order for this conveyance to take place.

The National Science Foundation, which is reviewing a $281 million proposal to construct this laboratory, does not operate its own research facilities. Instead, it provides grants to other entities to operate facilities or to conduct experiments. In keeping with this tradition, the proposed laboratory would not be owned by the Federal Government, but instead would need to be operated by an entity other than the NSF. Since it is not practical for the company to retain ownership of the site as it is converted into a laboratory, Homestake expressed a willingness to donate the underground mine and infrastructure to the State of South Dakota, together with certain surface facilities, structures and equipment that are necessary to operate and support the underground mine, provided that it could be released from liabilities associated with the transfer and the future operation of its property as an underground laboratory.

Relief from liability is necessary because the construction of the lab will require the company to forgo certain reclamation actions that it would normally take to limit its liability in the mine. For example, in connection with closing the underground mine, Homestake planned to remove electric substations, decommission hoists and other equipment, turn off the pumps that dewater the mine, and seal all openings. Were the pumps to be turned off, the mine workings would slowly

fill with water, rendering the mine unusable laboratory.

The Act establishes a specific procedure that will be followed in order for conveyance to take place and Homestake to be relieved of its liability. First, the Act does not become effective unless the National Science Foundation selects Homestake Mine as the site for a National Underground Science Laboratory. This means that conveyance procedures will not begin until it is clear that the NSF supports the construction of a laboratory. Second, a due diligence inspection of the property will be conducted by an independent entity to identify any condition that may pose an imminent and substantial endangerment to public health or the environment. Third, any condition of the mine that meets those criteria must be corrected before conveyance takes place. Homestake may choose to contribute toward any necessary response actions. However, Section 4 of this Act includes a provision that limits Homestake's contribution to this additional work, if necessary, to $75 million, reduced by the value of the property and equipment that Homestake is donating. In addition, the State, or another person, may also assist with that action. Only after the administration of the Environmental Protection Agency has certified that necessary steps have been taken to correct any problems that are identified can the conveyance proceed.

Since some of the steps required to convert the mine into a laboratory go above and beyond normal reclamation, the company is not obligated to deliver the property in a condition that is suitable for use as a laboratory. However, those portions of the mine that require the most significant reclamation, including the tailings pond and waste rock dumps, are specifically prohibited from being conveyed under this Act and will remain Homestake's responsibility to reclaim.

Under normal circumstances, the mine would close in March of 2002. Since it must be kept open beyond that date to leave open the option to construct the laboratory, Congress has already appropriated $10 million in the VA-HUD Appropriations bill to pay for expenses needed for that purpose.

It is important that all aspects of the conveyance process be completed in a timely fashion. To facilitate the construction of the laboratory, the inspections, reports and conveyance will need to proceed in phases, with the inspections being initiated after Homestake has completed the reclamation work that may otherwise have been required. While the Act sets no specific deadline for the completion of these procedures, it is important that the entire process be completed in no more than eight months from the date of passage of the Act. The timeframes in the Act for public comment on draft reports and on EPA's review of the report are intended to emphasize the need for timely action.

S. 1389 also contains important provisions to protect taxpayers from any potential liability once the transfer of the mine takes place. First, South Dakota must purchase property and liability insurance for the mine. It may also require individual experiments to purchase environmental insurance. Second, the bill requires that South Dakota establish an Environment and Project Trust Fund to finance any future clean-up actions that may be required. A portion of annual Operations and Maintenance funding must be deposited into the fund, and the state may also require individual projects to make a deposit into the fund. The insurance and trust fund provisions of this bill will help to provide a firewall between the taxpayers and any future environmental clean-up that may be required.

I want to thank all of those who have been involved in the development of this legislation. I particularly appreciate the hard work and support of Governor Bill Janklow of South Dakota. I also want to thank my colleague, Senator JOHNSON, a cosponsor of this bill, for all of his work, particularly to secure the $10 million in transition funds that will bridge the gap between Homestake's closure and the establishment of the laboratory. And, I would like to thank officials from Homestake and Barrick.

This legislation will provide an opportunity for the United States to conduct scientific research and will provide important new educational and economic opportunities for South Dakota. I thank my colleagues in Congress for their support of this bill.

I ask unanimous consent that both a letter from the Nuclear Science Advisory Committee to the National Science Foundation and a section-by-section analysis of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FISCAL YEAR 2002 DEPARTMENT OF DEFENSE APPROPRIATIONS CONFERENCE REPORT

DIVISION E—MISCELLANEOUS PROVISIONS

Title I—Homestake Mine Conveyance

Section-by-Section Analysis

Section 101. Short Title. Names bill as ''Homestake Mine Conveyance Act of 2001.''

Section 102. Findings. States that Homestake Mine has been selected by a committee of scientists as the preferred location for a National Underground Science Laboratory. While Homestake Mining Company is willing to transfer the mine to the State of South Dakota, both must be indemnified against future liability in order to do so.

Section 103. Definitions. Defines the following terms: Administrator, Affiliate, Conveyance, Fund, Homestake, Independent Entity, Laboratory, Mine, Person, Project Sponsor, Scientific Advisory Board and State.

The term ''Mine'' refers to the property to be conveyed from Homestake to South Dakota pursuant to the Act. This property consists of only a portion of Homestake's property in Lawrence County, South Dakota. The ''Mine'' is defined to include the underground workings and infrastructure at the Homestake Mine in Lawrence County, South Dakota and all real property, mineral and oil and gas rights, shafts, tunnels, structures, in-mine backfill, in-mine broken rock, fixtures, and personal property to be conveyed for establishment and operation of the laboratory, as agreed upon by Homestake and the State. ''Mine'' is also defined to include any water that flows into the Mine from any source. The real and personal property that is to be conveyed will be subject to further discussions among Homestake, the State and the laboratory. The laboratory has identified parts of the surface, real property, equipment, facilities and structures that will be necessary or useful in the operation of the laboratory. Homestake will determine if the identified property can be included in the conveyance. The definition of ''Mine'' excludes certain features, including the ''Open Cut,'' the tailings storage facility and existing waste rock dumps. These are not part of the ''Mine'' and cannot be conveyed under the Act. Homestake remains responsible for reclamation and closure of all property that is not conveyed under this Act.

Section 104. Conveyance of Real Property. The bill establishes several requirements as conditions for conveyance. Once conveyance is approved, the mine is transferred to the state ''as-is'' via a quit-claim deed.

Inspection. Prior to the conveyance, the Act provides for a due diligence inspection to be conducted by an independent entity. The independent entity is to be selected jointly by the Administrator of the EPA, the South Dakota Department of Environment and Natural Resources and Homestake. In consultation with the State and Homestake, the Administrator of the EPA will determine the methodology and standards to be used in the inspection, including the conduct of the inspection, the scope of the inspection and the time and duration of the inspection. The purpose of the inspection is to determine whether there is any condition in the Mine that may pose an imminent and substantial endangerment to public health or the environment. The inspection will not attempt to document all environmental conditions at the Mine, and will not inspect or evaluate any environmental conditions on property that is not part of the conveyance.

Report. After conducting the inspection, the independent entity must prepare a draft report on its findings that describes the results of its inspection and identifies any condition of or in the mine that may pose an imminent and substantial endangerment to public health or the environment.

This draft report must be submitted to the EPA and made available to the public. A public notice must be issued requesting public comments on the draft within 45 days. During the 45-day comment period, the independent entity shall hold at least one public hearing in Lead, South Dakota. After these steps are taken, the independent entity must submit a final report that responds to public comments and incorporates necessary changes.

Review to Report. Not later than 60 days after receiving the report, the EPA shall review it and notify the state of its acceptance or rejection of the report. The Administrator may reject the report if one or more conditions are identified that may pose an imminent and substantial endangerment to public health or the environment and require response action before conveyance and assumption by the Federal Government of liability for the mine. The Administrator may also reject the report if the conveyance is determined to be against the public interest.

Response Action. If the independent entity's report identifies no conditions that may pose an imminent and substantial threat to human health or the environment, and EPA

accepts the report, then the conveyance may proceed. If the report identifies a condition in the Mine that may pose an imminent and substantial endangerment to public health or the environment, then Homestake may, but is not obligated to, carry out or permit the State or other persons to carry out a response action to correct the condition. If the condition is one that requires a continuing response action, or a response action that may only be completed as part of the final closure of the laboratory, then Homestake, the State or other persons must make a deposit into the Environment and Project Trust Fund established in Section 7 that is sufficient to pay the costs of that response action. The amount of the deposit is to be determined by the independent entity, on a net present value basis and taking into account interest that may be earned on the deposit until the time that expenditure is expected to be made. Homestake may choose to contribute toward the response actions. However, Section 4 includes a provision that limits Homestake's contribution to this additional work, if necessary, to $75 million, reduced by the value of the property and equipment that Homestake is donating. Funds deposited into the Fund to meet this requirement may only be expended to address the needs identified in the inspection.

Once any necessary response actions have been completed, or necessary funds have been deposited, then the independent entity may certify to the EPA that the conditions identified in the report that may pose an imminent and substantial threat to human health or the environment have been corrected.

Final Review. Not later than 60 days after receiving the certification, the EPA must make a final decision to accept or reject the certification. Conveyance may proceed only if the EPA accepts the certification.

Section 105. Assessment of Property. Section 5 sets forth the process for valuing the donated property and services. For purposes of determining the amount of Homestake's potential contribution toward response actions identified in Section 4(b)(4)(C), the property being donated by Homestake is to be valued by the independent entity according to the Uniform Appraisal Standards for Federal Land Acquisition. To the extent that some property, such as underground tunnels, only has value for the purpose of constructing a laboratory, that entity is directed to include the estimated costs of replacing the facilities in the absence of Homestake's donation, and the cost of replacing any donated equipment. The valuation is to be submitted to the Administrator of the EPA, the state and Homestake in a separate report that is not subject to the procedures in Section 4(b). If it is determined that the conveyance can most efficiently be processed in several phases, then the valuation report is to accompany each of the due diligence reports.

Section 106. Liability

Assumption of liability. Upon conveyance, the United States shall assume liability for the mine and laboratory. This liability includes damages, reclamation, cleanup of hazardous substances under CERCLA, and closure of the facility. If property transfer takes place in steps, then the assumption of liability shall occur with each transfer for those properties.

Liability protection. Upon conveyance, neither Homestake nor the State of South Dakota shall be liable for the mine or laboratory. The United States shall waive sovereign immunity for claims by Homestake and the State, assume this liability and indemnify Homestake against it. However, in the case of any claim against the United States, it is only liable for response costs for environmental claims to the extent that response costs would be awarded in a civil action brought under the Federal Water Pollution Control Act, the Solid Waste Disposal Act, the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 or any other Federal environmental law. In addition, claims for damages must be made in accordance with the Federal Tort Claims Act.

Exceptions. Homestake is not relieved of liability for workers compensation or other employment-related claims, non-environmental claims that occur prior to conveyance, any criminal liability, or any liability for property not transferred, unless that property is affected by the operation of the lab.

Section 107. Insurance Coverage

Requirement to Purchase Insurance for mine. To the extent such insurance is available, the state shall purchase property and liability insurance for the mine and the operation of the laboratory to provide coverage against the liability assumed by the United States. The requirement to purchase insurance will terminate if the mine ceases to be used as a laboratory or Operations and Maintenance funding is not sufficient to operate the laboratory.

Terms of Insurance. The state must periodically consult with the EPA and the Scientific Advisory Board and consider the following factors to determine the coverage, type and policy limits of insurance: the nature of projects in the laboratory, the cost and availability of commercial insurance, and the amount of available funding. The insurance shall be secondary to insurance purchased by sponsors of individual projects, and in excess of amounts available in the Fund to pay any claim. The United States shall be an additional insured and will have the right to enforce the policy.

Funding of insurance purchase. The state may finance the purchase of insurance with funds from the Fund or other funds available to the state, but may not be compelled to use state funds for this purpose.

Porject insurance. In consultation with the EPA and the Scientific Advisory Board, the State may require a project sponsor to purchase property and liability insurance for a project. The United States shall be an additional insured on the policy and have the right to enforce it.

State insurance. The State shall purchase unemployment compensation insurance and worker's compensation insurance required under state law. The State may not use funds from the Fund for this purpose.

Section 108. Environment and Project Trust Fund

Establishment of fund. On completion of conveyance, the State shall establish an environment and Project Trust Fund in an interest-bearing account within the state.

Capitalization of Fund. There are several streams of money that will capitalize the fund, some of which have restrictions on the way they may be spent.

Annual Portion of Operation and Maintenance Spending. A portion of annual O&M funding determined by the State in consultation with the EPA and the Scientific Advisory Board shall be deposited in the Fund. To determine the annual amount, the State must consider the nature of the projects in the facility, the available amounts in the Fund, any pending costs or claims, and the amount of funding required for future actions to close the facility.

Project Fee. The state, in consultation with NSF and EPA, shall require each project to pay an amount into the Fund. These funds may only be used to remove projects from the lab or to pay claims associated with those projects.

Interest. All interest earned by the Fund is retained within the Fund.

Other funds. Other funds may be received and deposited in the Fund at the discretion of the state.

Expenditures from Fund. Funds within the Trust Fund may only be spent for the following purposes: waste and hazardous substance removal or remediation, or other environmental cleanup; removal of equipment and material no longer used or necessary for use with a project or a claim association with that project; purchases of insurance by the State (except for employment related insurance; payments for other costs related to liability; and the closure of the mine.

Federal Authority. To the extent the United States is liable, it may direct that amounts in the Trust Fund be applied toward costs it incurs.

Section 109. Waste Rock Mixing. If the State, acting in its capacity overseeing the laboratory, determines to dispose of waste rock excavated for the construction of the laboratory on land owned by Homestake that is not conveyed under this legislation, then the State must first receive approval from the Administrator before disposing such rock.

Section 110. Requirements for Operation of Laboratory. The laboratory must comply with all federal laws, including environmental laws.

Section 111. Contingency. This Act shall be effective contingent upon the selection of the Mine by the National Science Foundation as the site for the laboratory.

Section 112. Obligation in the Event of Nonconveyance. If the conveyance does not occur, then Homestake's obligations to reclaim the mine are limited to the requirements of current law.

Section 113. Payment and Reimbursement of Costs. The United States may seek payment from the Fund or insurance as reimbursement for costs it incurs as the result of the liability it has undertaken.

Section 114. Consent Decrees. Nothing in this title affects the obligation of a party to two existing consent decrees.

Section 115. Offset. Offset for title.

Section 116. Authorization of appropriations. Such funds as are necessary to carry out the Act are authorized.

The PRESIDING OFFICER. The majority leader.

UNANIMOUS CONSENT AGREEMENT—H.R. 2884

Mr. DASCHLE. Mr. President, there is a matter that has some urgency associated with it only because I know the House is waiting to receive the language. So in the interest of expediting consideration of this particular piece of legislation, I now ask unanimous consent that the Chair lay before the Senate a message from the House on H.R. 2884, that the Senate concur in the amendment of the House with a further amendment which is at the desk.

The PRESIDING OFFICER. Is there objection?

Mr. MCCAIN. Reserving the right to object, what is 2884?

Mr. DASCHLE. Mr. President, 2884 is the Victims Relief Fund, the legislation dealing with victims of terrorism.

Mr. GRAMM. What is the amendment, Mr. President?

Mr. DASCHLE. I yield to the Senator from New Jersey.

Mr. TORRICELLI. I thank the majority leader for yielding. When the Senate unanimously passed this legislation

previously, we included waiving income taxes and payroll taxes for families of the victims of September 11. The House of Representatives in their bill included only income taxes and not payroll taxes.

When the House repassed the bill and sent it to us, they included a provision that did not include payroll taxes but set a minimum of $10,000 so lower income people would receive some tax refund. The House wanted to retain the principle of not waiving payroll taxes but did want to give some refund to low-income families. This was seen as agreeable to both sides and fair.

Mr. GRAMM. Mr. President, further reserving the right to object, it is my understanding there were additional provisions such as extended unemployment, provisions of that nature. Are they in this bill?

Let me suggest the absence of a quorum so we could look at that.

The PRESIDING OFFICER. The majority leader has the floor.

Mr. DASCHLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DASCHLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DASCHLE. Mr. President, I have a unanimous consent request that is pending.

The PRESIDING OFFICER. Is there objection to the request?

Mr. BAUCUS. Reserving the right to object, is this the victims relief bill, I ask the majority leader?

Mr. DASCHLE. I answer to the Senator from Montana it is the victims relief bill.

Mr. BAUCUS. Reserving the right to object, and I shall not object, there is a disaster in the State of Montana and other higher plain States, which is a drought. I have been seeking agricultural disaster assistance. I see that is not going to happen. I ask my friend from South Dakota if he can assure me that at the first opportunity next year we will take up and consider the agricultural disaster assistance bill.

Mr. DASCHLE. Mr. President, I commend the Senator from Montana for his efforts over the course of the last several months. I have been impressing the Senate to act on disaster relief. Many farmers in South Dakota share this problem, and I have applauded the efforts made by the Senator from Montana. I appreciate his interest and his determination to see that it adequately responds to the Great Plains, the Midwest, and elsewhere.

I assure the Senator from Montana that at the first appropriate opportunity we will find a way to address the legislation and find a way in which to respond. As he recalls, we did some of that last summer. We had a good debate about how much was necessary. I think the Senator from Montana is correct in his observations that there is still a great deal more to be done. I will work with him to see that that happens.

Mr. BAUCUS. Mr. President, I thank my good friend from South Dakota. I add that this bill is very necessary to the victims relief bill, as it was reported to the Committee on Finance. I will not belabor it by going through the provisions. According to the rules, there is not time to do so. Suffice to say, this bill must pass in the next several hours because it will give much-needed relief. I thank my friend.

Mr. SCHUMER. Mr. President, reserving the right to object, and I will not object, I would like to just say that some of the provisions that are not in this bill—first, the victims relief part of the bill is very necessary. We did not want to stand in the way of that. Originally, when the victims relief bill came over to the House, it had provisions to benefit Lower Manhattan. We all know that Lower Manhattan is in real trouble because of what happened on September 11. The great fear is that businesses, large and small, will leave. The fear factor is enormous.

Over on the House side, the chairman of the Ways and Means Committee worked out a package that would help bring some relief. On this side, Senator CLINTON and I worked out a package that had tremendous support in our version of the stimulus bill from the majority leader, as well as the chairman of the Finance Committee. We had spent a great deal of time after it looked as though the stimulus bill was not going to happen, starting yesterday, and finishing about an hour and a half ago, trying to come to a compromise between the House version and the Senate version.

The chairman of the Ways and Means Committee in the other body and our staffs worked long and hard to come up with the compromise we have come up with. There are a few changes here and there that he might like, I might like, and Senator CLINTON might like, and others in New York might like, but we did come to an agreement. Unfortunately, the agreement we came to was not able to be reviewed by the Senators in this body. We just came up with it about an hour, hour and a half ago.

Unfortunately, because time is late and because the victims package has achieved that agreement, we will not stand in the way and object to removing the New York part from the bill and bringing up this other bill.

But I say this to my colleagues: We have a tremendous problem in downtown Manhattan. We are getting FEMA relief, and it is working well. The Senator from West Virginia has helped us in other areas. But tax relief to companies, big and small, to individuals, to nonprofits that don't have space right now, or that have space but are wondering whether they can stay in Lower Manhattan, is vital to New York's reblooming quickly.

I am hopeful that when we come back in January, the package that has been agreed to and worked on by the chairman of the Ways and Means Committee and many of his people, Senator BAUCUS, Senator GRASSLEY, Senator CLINTON, and myself will serve as a basis for bringing something up quickly then.

We had hoped to get something now. We have come really close—close but no cigar, they say. We are going to try to gain that cigar as soon as we come back. But make no mistake about it, we will be back. We very much need the help, and we appreciate everybody's cooperation to help us get there.

Mr. LOTT. Has the unanimous consent request been agreed to?

Mr. SCHUMER. I withdraw my objection.

The PRESIDING OFFICER. Is there objection?

Mr. ALLEN. Reserving the right to object.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. ALLEN. Mr. President, I say to the Members, this final victims package is a good package. I earlier introduced a measure to make sure we included the provisions of S. 1433,which is supported by Senator WARNER, Senator CAMPBELL, and Senator CRAIG. I am glad these ideas have been recognized, that this war we are fighting is against terrorists who target defenseless men, women, and children. The areas in which these attacks occur are combat zones.

I am glad this package has been worked out, because the last thing the families of these victims need to be worrying about is paying taxes, whether income taxes or other types of taxes—this bill addresses those concerns.

While my colleague from New York may want to add some other items to this measure—but at this late hour will not—I commend to my colleagues the fact that the police officers and firefighters who first responded to the World Trade Center attacks, as well as the Pentagon, risked their lives in hazardous conditions, breathing toxic gases, to save the lives of their fellow citizens.

In my view, those who are serving in those terrorist attack zones ought to be looked upon as the same as those who work in combat zones, and the taxes of those first responders for that month ought not be subject to income taxes. I am going to work next year to get this proper recognition for our firefighters, law enforcement officers, and rescue personnel, but I do not want to hold up this good victims' relief package which means a good deal to a lot of families who feel a very big hole in their hearts during this holiday season.

I yield the floor.

The PRESIDING OFFICER. Is there objection?

Mr. NICKLES. Reserving the right to object, and I shall not object.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Mr. President, I thank my colleague, Senator ALLEN, for his comments. I also thank my colleague, Senator TORRICELLI, for his work and the work we did in the Finance Committee. We also included the victims from the Oklahoma City bombing disaster 6 years ago in which 189 people lost their lives. Likewise, they should not have to pay taxes for that year or the preceding year. The amount of income is almost de minimis, but it is only fair.

I thank my colleagues from New York and New Jersey for their cooperation. My colleagues from New York had many additional, very interesting items—accelerated depreciation and other ideas to stimulate the economy. We are happy to work with them to try to make that happen in the near future.

I thank my colleagues for their support, and I shall not object.

The PRESIDING OFFICER. Is there objection?

If there is no objection, without objection, it is so ordered.

The majority leader.

Mr. DASCHLE. Mr. President, I ask unanimous consent that the vote on the conference report to accompany H.R. 3338 occur immediately following the remarks made by the senior Senator from West Virginia.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TORRICELLI. Will the majority leader yield?

The PRESIDING OFFICER. Is objection heard?

Mr. LOTT. Mr. President, I seek recognition, but in view of what we have just agreed to, I know the Senator from New Jersey wants to be heard. I yield the floor to him.

Mr. TORRICELLI. Mr. President, I thank the Republican leader for his courtesy. I want to say a word of thanks to all of my colleagues. I was proud to have offered this provision in the Finance Committee and again on the Senate floor.

The PRESIDING OFFICER. The Chair needs to ascertain if there is objection to the preceding unanimous consent request.

Mr. MCCAIN. I withdraw my objection.

The PRESIDING OFFICER. The objection is withdrawn. Without objection, it is so ordered.

The Chair laid before the Senate a message from the House, as follows:

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendments of the Senate to the bill (H.R. 2884) entitled ''An Act to amend the Internal Revenue Code of 1986 to provide tax relief for victims of the terrorist attacks against the United States on September 11, 2001'', with the following House amendment to senate amendments:

In lieu of the matter proposed to be inserted by the Senate amendment to the text of the bill, insert the following:

SECTION 1. SHORT TITLE; ETC.

(a) SHORT TITLE.—This Act may be cited as the ''Victims of Terrorism Tax Relief Act of 2001''.

(b) AMENDMENT OF 1986 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1986.

(c) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

TITLE I—RELIEF PROVISIONS FOR VICTIMS OF TERRORIST ATTACKS

SEC. 101. INCOME TAXES OF VICTIMS OF TERRORIST ATTACKS.

(a) IN GENERAL.—Section 692 (relating to income taxes of members of Armed Forces on death) is amended by adding at the end the following new subsection:

''(d) INDIVIDUALS DYING AS A RESULT OF CERTAIN ATTACKS.—

''(1) IN GENERAL.—In the case of a specified terrorist victim, any tax imposed by this chapter shall not apply—

''(A) with respect to the taxable year in which falls the date of death, and

''(B) with respect to any prior taxable year in the period beginning with the last taxable year ending before the taxable year in which the wounds, injury, or illness referred to in paragraph (2) were incurred.

''(2) SPECIFIED TERRORIST VICTIM.—For purposes of this subsection, the term 'specified terrorist victim' means any decedent—

''(A) who dies as a result of wounds or injury incurred as a result of the terrorist attacks against the United States on April 19, 1995, or September 11, 2001, or

''(B) who dies as a result of illness incurred as a result of an attack involving anthrax occurring on or after September 11, 2001, and before January 1, 2002.

Such term shall not include any individual identified by the Attorney General to have been a participant or conspirator in any such attack or a representative of such an individual.''.

(b) CONFORMING AMENDMENTS.—

(1) Section 5(b)(1) is amended by inserting ''and victims of certain terrorist attacks'' before ''on death''.

(2) Section 6013(f)(2)(B) is amended by inserting ''and victims of certain terrorist attacks'' before ''on death''.

(c) CLERICAL AMENDMENTS.—

(1) The heading of section 692 is amended to read as follows:

''SEC. 692. INCOME TAXES OF MEMBERS OF ARMED FORCES AND VICTIMS OF CERTAIN TERRORIST ATTACKS ON DEATH.''.

(2) The item relating to section 692 in the table of sections for part II of subchapter J of chapter 1 is amended to read as follows:

''Sec. 692. Income taxes of members of Armed Forces and victims of certain terrorist attacks on death.''.

(d) EFFECTIVE DATE; WAIVER OF LIMITATIONS.—

(1) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending before, on, or after September 11, 2001.

(2) WAIVER OF LIMITATIONS.—If refund or credit of any overpayment of tax resulting from the amendments made by this section is prevented at any time before the close of the 1-year period beginning on the date of the enactment of this Act by the operation of any law or rule of law (including res judicata), such refund or credit may nevertheless be made or allowed if claim therefor is filed before the close of such period.

SEC. 102. EXCLUSION OF CERTAIN DEATH BENEFITS.

(a) IN GENERAL.—Section 101 (relating to certain death benefits) is amended by adding at the end the following new subsection:

''(i) CERTAIN EMPLOYEE DEATH BENEFITS PAYABLE BY REASON OF DEATH OF CERTAIN TERRORIST VICTIMS.—

''(1) IN GENERAL.—Gross income does not include amounts (whether in a single sum or otherwise) paid by an employer by reason of the death of an employee who is a specified terrorist victim (as defined in section 692(d)(2)).

''(2) LIMITATION.—Subject to such rules as the Secretary may prescribe, paragraph (1) shall not apply to amounts which would have been payable if the individual had died other than as a specified terrorist victim (as so defined).

''(3) TREATMENT OF SELF-EMPLOYED INDIVIDUALS.—For purposes of paragraph (1), the term 'employee' includes a self-employed individual (as defined in section 401(c)(1)).''.

(b) EFFECTIVE DATE; WAIVER OF LIMITATIONS.—

(1) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years ending before, on, or after September 11, 2001.

(2) WAIVER OF LIMITATIONS.—If refund or credit of any overpayment of tax resulting from the amendments made by this section is prevented at any time before the close of the 1-year period beginning on the date of the enactment of this Act by the operation of any law or rule of law (including res judicata), such refund or credit may nevertheless be made or allowed if claim therefor is filed before the close of such period.

SEC. 103. ESTATE TAX REDUCTION.

(a) IN GENERAL.—Section 2201 is amended to read as follows:

''SEC. 2201. COMBAT ZONE-RELATED DEATHS OF MEMBERS OF THE ARMED FORCES AND DEATHS OF VICTIMS OF CERTAIN TERRORIST ATTACKS.

''(a) IN GENERAL.—Unless the executor elects not to have this section apply, in applying sections 2001 and 2101 to the estate of a qualified decedent, the rate schedule set forth in subsection (c) shall be deemed to be the rate schedule set forth in section 2001(c).

''(b) QUALIFIED DECEDENT.—For purposes of this section, the term 'qualified decedent' means—

''(1) any citizen or resident of the United States dying while in active service of the Armed Forces of the United States, if such decedent—

''(A) was killed in action while serving in a combat zone, as determined under section 112(c), or

''(B) died as a result of wounds, disease, or injury suffered while serving in a combat zone (as determined under section 112(c)), and while in the line of duty, by reason of a hazard to which such decedent was subjected as an incident of such service, and

''(2) any specified terrorist victim (as defined in section 692(d)(2)).

''(c) RATE SCHEDULE.—

''If the amount with respect to which the tentative tax to be computed is:	The tentative tax is:
Not over $150,000	1 percent of the amount by which such amount exceeds $100,000.
Over $150,000 but not over $200,000.	$500 plus 2 percent of the excess over $150,000.
Over $200,000 but not over $300,000.	$1,500 plus 3 percent of the excess over $200,000.
Over $300,000 but not over $500,000.	$4,500 plus 4 percent of the excess over $300,000.
Over $500,000 but not over $700,000.	$12,500 plus 5 percent of the excess over $500,000.
Over $700,000 but not over $900,000.	$22,500 plus 6 percent of the excess over $700,000.
Over $900,000 but not over $1,100,000.	$34,500 plus 7 percent of the excess over $900,000.
Over $1,100,000 but not over $1,600,000.	$48,500 plus 8 percent of the excess over $1,100,000.
Over $1,600,000 but not over $2,100,000.	$88,500 plus 9 percent of the excess over $1,600,000.
Over $2,100,000 but not over $2,600,000.	$133,500 plus 10 percent of the excess over $2,100,000.
Over $2,600,000 but not over $3,100,000.	$183,500 plus 11 percent of the excess over $2,600,000.
Over $3,100,000 but not over $3,600,000.	$238,500 plus 12 percent of the excess over $3,100,000.
Over $3,600,000 but not over $4,100,000.	$298,500 plus 13 percent of the excess over $3,600,000.
Over $4,100,000 but not over $5,100,000.	$363,500 plus 14 percent of the excess over $4,100,000.
Over $5,100,000 but not over $6,100,000.	$503,500 plus 15 percent of the excess over $5,100,000.
Over $6,100,000 but not over $7,100,000.	$653,500 plus 16 percent of the excess over $6,100,000.
Over $7,100,000 but not over $8,100,000.	$813,500 plus 17 percent of the excess over $7,100,000.
Over $8,100,000 but not over $9,100,000.	$983,500 plus 18 percent of the excess over $8,100,000.
Over $9,100,000 but not over $10,100,000.	$1,163,500 plus 19 percent of the excess over $9,100,000.
Over $10,100,000	$1,353,500 plus 20 percent of the excess over $10,100,000.

''(d) DETERMINATION OF UNIFIED CREDIT.—In the case of an estate to which this section applies, subsection (a) shall not apply in determining the credit under section 2010.''.

(b) CONFORMING AMENDMENTS.—

(1) Section 2011 is amended by striking subsection (d) and by redesignating subsections (e), (f), and (g) as subsections (d), (e), and (f), respectively.

(2) Section 2053(d)(3)(B) is amended by striking ''section 2011(e)'' and inserting ''section 2011(d)''.

(3) Paragraph (9) of section 532(c) of the Economic Growth and Tax Relief Reconciliation Act of 2001 is repealed.

(c) CLERICAL AMENDMENT.—The item relating to section 2201 in the table of sections for subchapter C of chapter 11 is amended to read as follows:

''Sec. 2201. Combat zone-related deaths of members of the Armed Forces and deaths of victims of certain terrorist attacks.''.

(d) EFFECTIVE DATE; WAIVER OF LIMITATIONS.—

(1) EFFECTIVE DATE.—The amendments made by this section shall apply to estates of decedents—

(A) dying on or after September 11, 2001, and

(B) in the case of individuals dying as a result of the April 19, 1995, terrorist attack, dying on or after April 19, 1995.

(2) WAIVER OF LIMITATIONS.—If refund or credit of any overpayment of tax resulting from the amendments made by this section is prevented at any time before the close of the 1-year period beginning on the date of the enactment of this Act by the operation of any law or rule of law (including res judicata), such refund or credit may nevertheless be made or allowed if claim therefor is filed before the close of such period.

SEC. 104. PAYMENTS BY CHARITABLE ORGANIZATIONS TREATED AS EXEMPT PAYMENTS.

(a) IN GENERAL.—For purposes of the Internal Revenue Code of 1986—

(1) payments made by an organization described in section 501(c)(3) of such Code by reason of the death, injury, wounding, or illness of an individual incurred as the result of the terrorist attacks against the United States on September 11, 2001, or an attack involving anthrax occurring on or after September 11, 2001, and before January 1, 2002, shall be treated as related to the purpose or function constituting the basis for such organization's exemption under section 501 of such Code if such payments are made—

(A) in good faith using a reasonable and objective formula which is consistently applied, and

(B) in furtherance of public rather than private purposes, and

(2) in the case of a private foundation (as defined in section 509 of such Code), any payment described in paragraph (1) shall not be treated as made to a disqualified person for purposes of section 4941 of such Code.

(b) EFFECTIVE DATE.—This section shall apply to payments made on or after September 11, 2001.

TITLE II—OTHER RELIEF PROVISIONS

SEC. 201. EXCLUSION FOR DISASTER RELIEF PAYMENTS.

(a) IN GENERAL.—Part III of subchapter B of chapter 1 (relating to items specifically excluded from gross income) is amended by redesignating section 139 as section 140 and inserting after section 138 the following new section:

''SEC. 139. DISASTER RELIEF PAYMENTS.

''(a) GENERAL RULE.—Gross income shall not include any amount received by an individual as a qualified disaster relief payment.

''(b) QUALIFIED DISASTER RELIEF PAYMENT DEFINED.—For purposes of this section, the term 'qualified disaster relief payment' means any amount paid to or for the benefit of an individual—

''(1) to reimburse or pay reasonable and necessary personal, family, living, or funeral expenses incurred as a result of a qualified disaster,

''(2) to reimburse or pay reasonable and necessary expenses incurred for the repair or rehabilitation of a personal residence or repair or replacement of its contents to the extent that the need for such repair, rehabilitation, or replacement is attributable to a qualified disaster,

''(3) by a person engaged in the furnishing or sale of transportation as a common carrier by reason of the death or personal physical injuries incurred as a result of a qualified disaster, or

''(4) if such amount is paid by a Federal, State, or local government, or agency or instrumentality thereof, in connection with a qualified disaster in order to promote the general welfare,

but only to the extent any expense compensated by such payment is not otherwise compensated for by insurance or otherwise.

''(c) QUALIFIED DISASTER DEFINED.—For purposes of this section, the term 'qualified disaster' means—

''(1) a disaster which results from a terroristic or military action (as defined in section 692(c)(2)),

''(2) a Presidentially declared disaster (as defined in section 1033(h)(3)),

''(3) a disaster which results from an accident involving a common carrier, or from any other event, which is determined by the Secretary to be of a catastrophic nature, or

''(4) with respect to amounts described in subsection (b)(4), a disaster which is determined by an applicable Federal, State, or local authority (as determined by the Secretary) to warrant assistance from the Federal, State, or local government or agency or instrumentality thereof.

''(d) COORDINATION WITH EMPLOYMENT TAXES.—For purposes of chapter 2 and subtitle C, a qualified disaster relief payment shall not be treated as net earnings from self-employment, wages, or compensation subject to tax.

''(e) NO RELIEF FOR CERTAIN INDIVIDUALS.—Subsections (a) and (f) shall not apply with respect to any individual identified by the Attorney General to have been a participant or conspirator in a terroristic action (as so defined), or a representative of such individual.

''(f) EXCLUSION OF CERTAIN ADDITIONAL PAYMENTS.—Gross income shall not include any amount received as payment under section 406 of the Air Transportation Safety and System Stabilization Act.''

(b) CONFORMING AMENDMENTS.—The table of sections for part III of subchapter B of chapter 1 is amended by striking the item relating to section 139 and inserting the following new items:

''Sec. 139. Disaster relief payments.

''Sec. 140. Cross references to other Acts.''.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending on or after September 11, 2001.

SEC. 202. AUTHORITY TO POSTPONE CERTAIN DEADLINES AND REQUIRED ACTIONS.

(a) EXPANSION OF AUTHORITY RELATING TO DISASTERS AND TERRORISTIC OR MILITARY ACTIONS.—Section 7508A is amended to read as follows:

''SEC. 7508A. AUTHORITY TO POSTPONE CERTAIN DEADLINES BY REASON OF PRESIDENTIALLY DECLARED DISASTER OR TERRORISTIC OR MILITARY ACTIONS.

''(a) IN GENERAL.—In the case of a taxpayer determined by the Secretary to be affected by a Presidentially declared disaster (as defined in section 1033(h)(3)) or a terroristic or military action (as defined in section 692(c)(2)), the Secretary may specify a period of up to one year that may be disregarded in determining, under the internal revenue laws, in respect of any tax liability of such taxpayer—

''(1) whether any of the acts described in paragraph (1) of section 7508(a) were performed within the time prescribed therefor (determined without regard to extension under any other provision of this subtitle for periods after the date (determined by the Secretary) of such disaster or action),

''(2) the amount of any interest, penalty, additional amount, or addition to the tax for periods after such date, and

''(3) the amount of any credit or refund.

''(b) SPECIAL RULES REGARDING PENSIONS, ETC.—In the case of a pension or other employee benefit plan, or any sponsor, administrator, participant, beneficiary, or other person with respect to such plan, affected by a disaster or action described in subsection (a), the Secretary may specify a period of up to one year which may be disregarded in determining the date by which any action is required or permitted to be completed under this title. No plan shall be treated as failing to be operated in accordance with the terms of the plan solely as the result of

disregarding any period by reason of the preceding sentence.

''(c) SPECIAL RULES FOR OVERPAYMENTS.—The rules of section 7508(b) shall apply for purposes of this section.''.

(b) CLARIFICATION OF SCOPE OF ACTS SECRETARY MAY POSTPONE.—Section 7508(a)(1)(K) (relating to time to be disregarded) is amended by striking ''in regulations prescribed under this section''.

(c) CONFORMING AMENDMENTS TO ERISA.—

(1) Part 5 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1131 et seq.) is amended by adding at the end the following new section:

''SEC. 518. AUTHORITY TO POSTPONE CERTAIN DEADLINES BY REASON OF PRESIDENTIALLY DECLARED DISASTER OR TERRORISTIC OR MILITARY ACTIONS.

''In the case of a pension or other employee benefit plan, or any sponsor, administrator, participant, beneficiary, or other person with respect to such plan, affected by a Presidentially declared disaster (as defined in section 1033(h)(3) of the Internal Revenue Code of 1986) or a terroristic or military action (as defined in section 692(c)(2) of such Code), the Secretary may, notwithstanding any other provision of law, prescribe, by notice or otherwise, a period of up to one year which may be disregarded in determining the date by which any action is required or permitted to be completed under this Act. No plan shall be treated as failing to be operated in accordance with the terms of the plan solely as the result of disregarding any period by reason of the preceding sentence.''.

(2) Section 4002 of Employee Retirement Income Security Act of 1974 (29 U.S.C. 1302) is amended by adding at the end the following new subsection:

''(i) SPECIAL RULES REGARDING DISASTERS, ETC.—In the case of a pension or other employee benefit plan, or any sponsor, administrator, participant, beneficiary, or other person with respect to such plan, affected by a Presidentially declared disaster (as defined in section 1033(h)(3) of the Internal Revenue Code of 1986) or a terroristic or military action (as defined in section 692(c)(2) of such Code), the corporation may, notwithstanding any other provision of law, prescribe, by notice or otherwise, a period of up to one year which may be disregarded in determining the date by which any action is required or permitted to be completed under this Act. No plan shall be treated as failing to be operated in accordance with the terms of the plan solely as the result of disregarding any period by reason of the preceding sentence.''.

(d) ADDITIONAL CONFORMING AMENDMENTS.—

(1) Section 6404 is amended—

(A) by striking subsection (h),

(B) by redesignating subsection (i) as subsection (h), and

(C) by adding at the end the following new subsection:

''(i) CROSS REFERENCE.—

''For authority to suspend running of interest, etc. by reason of Presidentially declared disaster or terroristic or military action, see section 7508A.''.

(2) Section 6081(c) is amended to read as follows:

''(c) CROSS REFERENCES.—

''For time for performing certain acts postponed by reason of war, see section 7508, and by reason of Presidentially declared disaster or terroristic or military action, see section 7508A.''.

(3) Section 6161(d) is amended by adding at the end the following new paragraph:

''(3) POSTPONEMENT OF CERTAIN ACTS.—

''For time for performing certain acts postponed by reason of war, see section 7508, and by reason of Presidentially declared disaster or terroristic or military action, see section 7508A.''.

(d) CLERICAL AMENDMENTS.—

(1) The item relating to section 7508A in the table of sections for chapter 77 is amended to read as follows:

''Sec. 7508A. Authority to postpone certain deadlines by reason of Presidentially declared disaster or terroristic or military actions.''.

(2) The table of contents for the Employee Retirement Income Security Act of 1974 is amended by inserting after the item relating to section 517 the following new item:

''Sec. 518. Authority to postpone certain deadlines by reason of Presidentially declared disaster or terroristic or military actions.''.

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to disasters and terroristic or military actions occurring on or after September 11, 2001, with respect to any action of the Secretary of the Treasury, the Secretary of Labor, or the Pension Benefit Guaranty Corporation occurring on or after the date of the enactment of this Act.

SEC. 203. APPLICATION OF CERTAIN PROVISIONS TO TERRORISTIC OR MILITARY ACTIONS.

(a) DISABILITY INCOME.—Section 104(a)(5) (relating to compensation for injuries or sickness) is amended by striking ''a violent attack'' and all that follows through the period and inserting ''a terroristic or military action (as defined in section 692(c)(2)).''.

(b) EXEMPTION FROM INCOME TAX FOR CERTAIN MILITARY OR CIVILIAN EMPLOYEES.—Section 692(c) is amended—

(1) by striking ''outside the United States'' in paragraph (1), and

(2) by striking ''SUSTAINED OVERSEAS'' in the heading.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending on or after September 11, 2001.

SEC. 204. CLARIFICATION OF DUE DATE FOR AIRLINE EXCISE TAX DEPOSITS.

(a) IN GENERAL.—Paragraph (3) of section 301(a) of the Air Transportation Safety and System Stabilization Act (Public Law 107–42) is amended to read as follows:

''(3) AIRLINE-RELATED DEPOSIT.—For purposes of this subsection, the term 'airline-related deposit' means any deposit of taxes imposed by subchapter C of chapter 33 of such Code (relating to transportation by air).''.

(b) EFFECTIVE DATE.—The amendment made by this section shall take effect as if included in section 301 of the Air Transportation Safety and System Stabilization Act (Public Law 107–42).

SEC. 205. TREATMENT OF CERTAIN STRUCTURED SETTLEMENT PAYMENTS.

(a) IN GENERAL.—Subtitle E is amended by adding at the end the following new chapter:

''CHAPTER 55—STRUCTURED SETTLEMENT FACTORING TRANSACTIONS

''Sec. 5891. Structured settlement factoring transactions.

''SEC. 5891. STRUCTURED SETTLEMENT FACTORING TRANSACTIONS.

''(a) IMPOSITION OF TAX.—There is hereby imposed on any person who acquires directly or indirectly structured settlement payment rights in a structured settlement factoring transaction a tax equal to 40 percent of the factoring discount as determined under subsection (c)(4) with respect to such factoring transaction.

''(b) EXCEPTION FOR CERTAIN APPROVED TRANSACTIONS.—

''(1) IN GENERAL.—The tax under subsection (a) shall not apply in the case of a structured settlement factoring transaction in which the transfer of structured settlement payment rights is approved in advance in a qualified order.

''(2) QUALIFIED ORDER.—For purposes of this section, the term 'qualified order' means a final order, judgment, or decree which—

''(A) finds that the transfer described in paragraph (1)—

''(i) does not contravene any Federal or State statute or the order of any court or responsible administrative authority, and

''(ii) is in the best interest of the payee, taking into account the welfare and support of the payee's dependents, and

''(B) is issued—

''(i) under the authority of an applicable State statute by an applicable State court, or

''(ii) by the responsible administrative authority (if any) which has exclusive jurisdiction over the underlying action or proceeding which was resolved by means of the structured settlement.

''(3) APPLICABLE STATE STATUTE.—For purposes of this section, the term 'applicable State statute' means a statute providing for the entry of an order, judgment, or decree described in paragraph (2)(A) which is enacted by—

''(A) the State in which the payee of the structured settlement is domiciled, or

''(B) if there is no statute described in subparagraph (A), the State in which either the party to the structured settlement (including an assignee under a qualified assignment under section 130) or the person issuing the funding asset for the structured settlement is domiciled or has its principal place of business.

''(4) APPLICABLE STATE COURT.—For purposes of this section—

''(A) IN GENERAL.—The term 'applicable State court' means, with respect to any applicable State statute, a court of the State which enacted such statute.

''(B) SPECIAL RULE.—In the case of an applicable State statute described in paragraph (3)(B), such term also includes a court of the State in which the payee of the structured settlement is domiciled.

''(5) QUALIFIED ORDER DISPOSITIVE.—A qualified order shall be treated as dispositive for purposes of the exception under this subsection.

''(c) DEFINITIONS.—For purposes of this section—

''(1) STRUCTURED SETTLEMENT.—The term 'structured settlement' means an arrangement—

''(A) which is established by—

''(i) suit or agreement for the periodic payment of damages excludable from the gross income of the recipient under section 104(a)(2), or

''(ii) agreement for the periodic payment of compensation under any workers' compensation law excludable from the gross income of the recipient under section 104(a)(1), and

''(B) under which the periodic payments are—

''(i) of the character described in subparagraphs (A) and (B) of section 130(c)(2), and

''(ii) payable by a person who is a party to the suit or agreement or to the workers' compensation claim or by a person who has assumed the liability for such periodic payments under a qualified assignment in accordance with section 130.

''(2) STRUCTURED SETTLEMENT PAYMENT RIGHTS.—The term 'structured settlement payment rights' means rights to receive payments under a structured settlement.

''(3) STRUCTURED SETTLEMENT FACTORING TRANSACTION.—

''(A) IN GENERAL.—The term 'structured settlement factoring transaction' means a transfer of structured settlement payment rights (including portions of structured settlement payments) made for consideration by means of sale, assignment, pledge, or other form of encumbrance or alienation for consideration.

''(B) EXCEPTION.—Such term shall not include—

''(i) the creation or perfection of a security interest in structured settlement payment rights under a blanket security agreement entered into with an insured depository institution in the absence of any action to redirect the structured settlement payments to such institution (or agent or successor thereof) or otherwise to enforce such blanket security interest as against the structured settlement payment rights, or

''(ii) a subsequent transfer of structured settlement payment rights acquired in a structured settlement factoring transaction.

''(4) FACTORING DISCOUNT.—The term 'factoring discount' means an amount equal to the excess of—

''(A) the aggregate undiscounted amount of structured settlement payments being acquired in the structured settlement factoring transaction, over

''(B) the total amount actually paid by the acquirer to the person from whom such structured settlement payments are acquired.

''(5) RESPONSIBLE ADMINISTRATIVE AUTHORITY.—The term 'responsible administrative authority' means the administrative authority which had jurisdiction over the underlying action or proceeding which was resolved by means of the structured settlement.

''(6) STATE.—The term 'State' includes the Commonwealth of Puerto Rico and any possession of the United States.

''(d) COORDINATION WITH OTHER PROVISIONS.—

''(1) IN GENERAL.—If the applicable requirements of sections 72, 104(a)(1), 104(a)(2), 130, and 461(h) were satisfied at the time the structured settlement involving structured settlement payment rights was entered into, the subsequent occurrence of a structured settlement factoring transaction shall not affect the application of the provisions of such sections to the parties to the structured settlement (including an assignee under a qualified assignment under section 130) in any taxable year.

''(2) NO WITHHOLDING OF TAX.—The provisions of section 3405 regarding withholding of tax shall not apply to the person making the payments in the event of a structured settlement factoring transaction.''.

(b) CLERICAL AMENDMENT.—The table of chapters for subtitle E is amended by adding at the end the following new item:

''Chapter 55. Structured settlement factoring transactions.''.

(c) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by this section (other than the provisions of section 5891(d) of the Internal Revenue Code of 1986, as added by this section) shall apply to structured settlement factoring transactions (as defined in section 5891(c) of such Code (as so added)) entered into on or after the 30th day following the date of the enactment of this Act.

(2) CLARIFICATION OF EXISTING LAW.—Section 5891(d) of such Code (as so added) shall apply to structured settlement factoring transactions (as defined in section 5891(c) of such Code (as so added)) entered into on or after such 30th day.

(3) TRANSITION RULE.—In the case of a structured settlement factoring transaction entered into during the period beginning on the 30th day following the date of the enactment of this Act and ending on July 1, 2002, no tax shall be imposed under section 5891(a) of such Code if—

(A) the structured settlement payee is domiciled in a State (or possession of the United States) which has not enacted a statute providing that the structured settlement factoring transaction is ineffective unless the transaction has been approved by an order, judgment, or decree of a court (or where applicable, a responsible administrative authority) which finds that such transaction—

(i) does not contravene any Federal or State statute or the order of any court (or responsible administrative authority), and

(ii) is in the best interest of the structured settlement payee or is appropriate in light of a hardship faced by the payee, and

(B) the person acquiring the structured settlement payment rights discloses to the structured settlement payee in advance of the structured settlement factoring transaction the amounts and due dates of the payments to be transferred, the aggregate amount to be transferred, the consideration to be received by the structured settlement payee for the transferred payments, the discounted present value of the transferred payments (including the present value as determined in the manner described in section 7520 of such Code), and the expenses required under the terms of the structured settlement factoring transaction to be paid by the structured settlement payee or deducted from the proceeds of such transaction.

SEC. 206. PERSONAL EXEMPTION DEDUCTION FOR CERTAIN DISABILITY TRUSTS.

(a) IN GENERAL.—Subsection (b) of section 642 (relating to deduction for personal exemption) is amended to read as follows:

''(b) DEDUCTION FOR PERSONAL EXEMPTION.—

''(1) ESTATES.—An estate shall be allowed a deduction of $600.

''(2) TRUSTS.—

''(A) IN GENERAL.—Except as otherwise provided in this paragraph, a trust shall be allowed a deduction of $100.

''(B) TRUSTS DISTRIBUTING INCOME CURRENTLY.—A trust which, under its governing instrument, is required to distribute all of its income currently shall be allowed a deduction of $300.

''(C) DISABILITY TRUSTS.—

''(i) IN GENERAL.—A qualified disability trust shall be allowed a deduction equal to the exemption amount under section 151(d), determined—

''(I) by treating such trust as an individual described in section 151(d)(3)(C)(iii), and

''(II) by applying section 67(e) (without the reference to section 642(b)) for purposes of determining the adjusted gross income of the trust.

''(ii) QUALIFIED DISABILITY TRUST.—For purposes of clause (i), the term 'qualified disability trust' means any trust if—

''(I) such trust is a disability trust described in subsection (c)(2)(B)(iv), (d)(4)(A), or (d)(4)(C) of section 1917 of the Social Security Act (42 U.S.C. 1396p), and

''(II) all of the beneficiaries of the trust as of the close of the taxable year are determined to have been disabled (within the meaning of section 1614(a)(3) of the Social Security Act, 42 U.S.C. 1382c(a)(3)) for some portion of such year.

A trust shall not fail to meet the requirements of subclause (II) merely because the corpus of the trust may revert to a person who is not so disabled after the trust ceases to have any beneficiary who is so disabled.''

''(3) DEDUCTIONS IN LIEU OF PERSONAL EXEMPTION.—The deductions allowed by this subsection shall be in lieu of the deductions allowed under section 151 (relating to deduction for personal exemption).''.

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years ending on or after September 11, 2001.

TITLE III—TAX BENEFITS FOR AREA OF NEW YORK CITY DAMAGED IN TERRORIST ATTACKS ON SEPTEMBER 11, 2001

SEC. 301. TAX BENEFITS FOR AREA OF NEW YORK CITY DAMAGED IN TERRORIST ATTACKS ON SEPTEMBER 11, 2001.

(a) IN GENERAL.—Chapter 1 is amended by adding at the end the following new subchapter:

''Subchapter Y—New York Liberty Zone Benefits

''Sec. 1400L. Tax benefits for New York Liberty Zone.

''SEC. 1400L. TAX BENEFITS FOR NEW YORK LIBERTY ZONE.

''(a) SPECIAL ALLOWANCE FOR CERTAIN PROPERTY ACQUIRED AFTER SEPTEMBER 10, 2001.—

''(1) ADDITIONAL ALLOWANCE.—In the case of any qualified New York Liberty Zone property—

''(A) the depreciation deduction provided by section 167(a) for the taxable year in which such property is placed in service shall include an allowance equal to 30 percent of the adjusted basis of such property, and

''(B) the adjusted basis of the qualified New York Liberty Zone property shall be reduced by the amount of such deduction before computing the amount otherwise allowable as a depreciation deduction under this chapter for such taxable year and any subsequent taxable year.

''(2) QUALIFIED NEW YORK LIBERTY ZONE PROPERTY.—For purposes of this subsection—

''(A) IN GENERAL.—The term 'qualified New York Liberty Zone property' means property—

''(i)(I) to which section 168 applies (other than railroad grading and tunnel bores), or

''(II) which is computer software (as defined in section 167(f)(1)(B)) for which a deduction is allowable under section 167(a) without regard to this subsection,

''(ii) substantially all of the use of which is in the New York Liberty Zone and is in the active conduct of a trade or business by the taxpayer in such Zone,

''(iii) the original use of which in the New York Liberty Zone commences with the taxpayer after September 10, 2001, and

''(iv) which is acquired by the taxpayer by purchase (as defined in section 179(d)) after September 10, 2001, and placed in service by the taxpayer on or before the termination date, but only if no written binding contract for the acquisition was in effect before September 11, 2001.

The term 'termination date' means December 31, 2006 (December 31, 2009, in the case of nonresidential real property and residential rental property).

''(B) EXCEPTIONS.—

''(i) ALTERNATIVE DEPRECIATION PROPERTY.—The term 'qualified New York Liberty Zone property' shall not include any property to which the alternative depreciation system under section 168(g) applies, determined—

''(I) without regard to paragraph (7) of section 168(g) (relating to election to have system apply), and

''(II) after application of section 280F(b) (relating to listed property with limited business use).

''(ii) QUALIFIED LEASEHOLD IMPROVEMENT PROPERTY.—Such term shall not include qualified leasehold improvement property.

''(iii) ELECTION OUT.—If a taxpayer makes an election under this clause with respect to any class of property for any taxable year, this subsection shall not apply to all property in such class placed in service during such taxable year.

''(C) SPECIAL RULES RELATING TO ORIGINAL USE.—

''(i) SELF-CONSTRUCTED PROPERTY.—In the case of a taxpayer manufacturing, constructing, or producing property for the taxpayer's own use, the requirements of clause (iv) of subparagraph (A) shall be treated as met if the taxpayer begins manufacturing, constructing, or producing the property after September 10, 2001, and before the termination date.

''(ii) SALE-LEASEBACKS.—For purposes of subparagraph (A)(iii), if property—

''(I) is originally placed in service after September 10, 2001, by a person, and

''(II) sold and leased back by such person within 3 months after the date such property was originally placed in service,

such property shall be treated as originally placed in service not earlier than the date on which such property is used under the leaseback referred to in subclause (II).

''(D) ALLOWANCE AGAINST ALTERNATIVE MINIMUM TAX.—The deduction allowed by this subsection shall be allowed in determining alternative minimum taxable income under section 55.

''(b) 5-YEAR RECOVERY PERIOD FOR DEPRECIATION OF CERTAIN LEASEHOLD IMPROVEMENTS.—

''(1) IN GENERAL.—For purposes of section 168, the term '5-year property' includes any qualified leasehold improvement property.

''(2) QUALIFIED LEASEHOLD IMPROVEMENT PROPERTY.—For purposes of this section—

''(A) IN GENERAL.—The term 'qualified leasehold improvement property' means any improvement to an interior portion of a building which is nonresidential real property if—

''(i) such building is located in the New York Liberty Zone,

''(ii) such improvement is made under or pursuant to a lease (as defined in section 168(h)(7))—

''(I) by the lessee (or any sublessee) of such portion, or

''(II) by the lessor of such portion,

''(iii) such portion is to be occupied exclusively by the lessee (or any sublessee) of such portion,

''(iv) such improvement is placed in service—

''(I) after September 10, 2001, and more than 3 years after the date the building was first placed in service, and

''(II) before January 1, 2007, and

''(v) no written binding contract for such improvement was in effect before September 11, 2001.

''(B) CERTAIN IMPROVEMENTS NOT INCLUDED.—Such term shall not include any improvement for which the expenditure is attributable to—

''(i) the enlargement of the building,

''(ii) any elevator or escalator,

''(iii) any structural component benefiting a common area, and

''(iv) the internal structural framework of the building.

''(C) DEFINITIONS AND SPECIAL RULES.—For purposes of this paragraph—

''(i) COMMITMENT TO LEASE TREATED AS LEASE.—A commitment to enter into a lease shall be treated as a lease, and the parties to such commitment shall be treated as lessor and lessee, respectively.

''(ii) RELATED PERSONS.—A lease between related persons shall not be considered a lease. For purposes of the preceding sentence, the term 'related persons' means—

''(I) members of an affiliated group (as defined in section 1504), and

''(II) persons having a relationship described in subsection (b) of section 267; except that, for purposes of this clause, the phrase '80 percent or more' shall be substituted for the phrase 'more than 50 percent' each place it appears in such subsection.

''(D) IMPROVEMENTS MADE BY LESSOR.—

''(i) IN GENERAL.—In the case of an improvement made by the person who was the lessor of such improvement when such improvement was placed in service, such improvement shall be qualified leasehold improvement property (if at all) only so long as such improvement is held by such person.

''(ii) EXCEPTION FOR CHANGES IN FORM OF BUSINESS.—Property shall not cease to be qualified leasehold improvement property under clause (i) by reason of—

''(I) death,

''(II) a transaction to which section 381(a) applies, or

''(III) a mere change in the form of conducting the trade or business so long as the property is retained in such trade or business as qualified leasehold improvement property and the taxpayer retains a substantial interest in such trade or business.

''(3) REQUIREMENT TO USE STRAIGHT LINE METHOD.—The applicable depreciation method under section 168 shall be the straight line method in the case of qualified leasehold improvement property.

''(4) 9-YEAR RECOVERY PERIOD UNDER ALTERNATIVE SYSTEM.—For purposes of section 168(g), the class life of qualified leasehold improvement property shall be 9 years.

''(c) INCREASE IN EXPENSING UNDER SECTION 179.—

''(1) IN GENERAL.—For purposes of section 179—

''(A) the limitation under section 179(b)(1) shall be increased by the lesser of—

''(i) $35,000, or

''(ii) the cost of section 179 property which is qualified New York Liberty Zone property placed in service during the taxable year, and

''(B) the amount taken into account under section 179(b)(2) with respect to any section 179 property which is qualified New York Liberty Zone property shall be 50 percent of the cost thereof.

''(2) RECAPTURE.—Rules similar to the rules under section 179(d)(10) shall apply with respect to any qualified New York Liberty Zone property which ceases to be used in the New York Liberty Zone.

''(d) TAX-EXEMPT BOND FINANCING.—

''(1) IN GENERAL.—For purposes of this title, any qualified New York Liberty Bond shall be treated as an exempt facility bond.

''(2) QUALIFIED NEW YORK LIBERTY BOND.—For purposes of this subsection, the term 'qualified New York Liberty Bond' means any bond issued as part of an issue if—

''(A) 95 percent or more of the net proceeds (as defined in section 150(a)(3)) of such issue are to be used for qualified project costs,

''(B) such bond is issued by the State of New York or any political subdivision thereof,

''(C) the Governor of New York designates such bond for purposes of this section, and

''(D) such bond is issued during calendar year 2002, 2003, or 2004.

''(3) LIMITATION ON AMOUNT OF BONDS DESIGNATED.—The maximum aggregate face amount of bonds which may be designated under this subsection shall not exceed $15,000,000,000.

''(4) QUALIFIED PROJECT COSTS.—For purposes of this subsection—

''(A) IN GENERAL.—The term 'qualified project costs' means the cost of acquisition, construction, reconstruction, and renovation of—

''(i) nonresidential real property and residential rental property (including fixed tenant improvements associated with such property) located in the New York Liberty Zone, and

''(ii) public utility property located in the New York Liberty Zone.

''(B) COSTS FOR CERTAIN PROPERTY OUTSIDE ZONE INCLUDED.—Such term includes the cost of acquisition, construction, reconstruction, and renovation of nonresidential real property (including fixed tenant improvements associated with such property) located outside the New York Liberty Zone but within the City of New York, New York, if such property is part of a project which consists of at least 100,000 square feet of usable office or other commercial space located in a single building or multiple adjacent buildings.

''(C) LIMITATIONS.—Such term shall not include—

''(i) costs for property located outside the New York Liberty Zone to the extent such costs exceed $7,000,000,000,

''(ii) costs with respect to residential rental property to the extent such costs exceed $3,000,000,000, and

''(iii) costs with respect to property used for retail sales of tangible property to the extent such costs exceed $1,500,000,000.

''(D) MOVABLE FIXTURES AND EQUIPMENT.—Such term shall not include costs with respect to movable fixtures and equipment.

''(5) SPECIAL RULES.—In applying this title to any qualified New York Liberty Bond, the following modifications shall apply:

''(A) Section 146 (relating to volume cap) shall not apply.

''(B) Section 147(c) (relating to limitation on use for land acquisition) shall be determined by reference to the aggregate authorized face amount of all qualified New York Liberty Bonds rather than the net proceeds of each issue.

''(C) Section 147(d) (relating to acquisition of existing property not permitted) shall be applied by substituting '50 percent' for '15 percent' each place it appears.

''(D) Section 148(f)(4)(C) (relating to exception from rebate for certain proceeds to be used to finance construction expenditures) shall apply to construction proceeds of bonds issued under this section.

''(E) Financing provided by such a bond shall not be taken into account under section 168(g)(5)(A) with respect to property substantially all of the use of which is in the New York Liberty Zone and is in the active conduct of a trade or business by the taxpayer in such Zone.

''(F) Repayments of principal on financing provided by the issue—

''(i) may not be used to provide financing, and

''(ii) are used not later than the close of the 1st semiannual period beginning after the date of the repayment to redeem bonds which are part of such issue.

The requirement of clause (ii) shall be treated as met with respect to amounts received within 10 years after the date of issuance of the issue (or, in the case of refunding bond, the date of issuance of the original bond) if such amounts are used by the close of such 10 years to redeem bonds which are part of such issue.

''(G) Section 57(a)(5) shall not apply.

''(6) SEPARATE ISSUE TREATMENT OF PORTIONS OF AN ISSUE.—This subsection shall not apply to the portion of the proceeds of an issue which (if issued as a separate issue) would be treated as a qualified bond or as a bond that is not a private activity bond (determined without regard to subsection (a)), if the issuer elects to so treat such portion.

''(e) EXTENSION OF REPLACEMENT PERIOD FOR NONRECOGNITION OF GAIN.—Notwithstanding subsections (g) and (h) of section 1033, clause (i) of section 1033(a)(2)(B) shall be applied by substituting '5 years' for '2 years' with respect to property which is compulsorily or involuntarily converted as a result of the terrorist attacks on September 11, 2001, in the New York Liberty Zone but only if substantially all of the use of the replacement property is in the City of New York, New York.

''(f) NEW YORK LIBERTY ZONE.—For purposes of this section, the term 'New York Liberty Zone' means the area located on or south of Canal Street, East Broadway (east of its intersection with Canal Street), or Grand Street (east of its intersection with East Broadway) in the Borough of Manhattan in the City of New York, New York.''

(b) CLERICAL AMENDMENT.—The table of subchapters for chapter 1 is amended by adding at the end the following new item:

''Subchapter Y. New York Liberty Zone Benefits.''

TITLE IV—DISCLOSURE OF TAX INFORMATION IN TERRORISM AND NATIONAL SECURITY INVESTIGATIONS

SEC. 401. DISCLOSURE OF TAX INFORMATION IN TERRORISM AND NATIONAL SECURITY INVESTIGATIONS.

(a) DISCLOSURE WITHOUT A REQUEST OF INFORMATION RELATING TO TERRORIST ACTIVITIES, ETC.—Paragraph (3) of section 6103(i) (relating to disclosure of return information to apprise appropriate officials of criminal activities or emergency circumstances) is amended by adding at the end the following new subparagraph:

''(C) TERRORIST ACTIVITIES, ETC.—

''(i) IN GENERAL.—Except as provided in paragraph (6), the Secretary may disclose in writing return information (other than taxpayer return information) that may be related to a terrorist incident, threat, or activity to the extent necessary to apprise the head of the appropriate Federal law enforcement agency responsible for investigating or responding to such terrorist incident, threat, or activity. The head of the agency may disclose such return information to officers and employees of such agency to the extent necessary to investigate or respond to such terrorist incident, threat, or activity.

''(ii) DISCLOSURE TO THE DEPARTMENT OF JUSTICE.—Returns and taxpayer return information may also be disclosed to the Attorney General under clause (i) to the extent necessary for, and solely for use in preparing, an application under paragraph (7)(D).

''(iii) TAXPAYER IDENTITY.—For purposes of this subparagraph, a taxpayer's identity shall not be treated as taxpayer return information.

''(iv) TERMINATION.—No disclosure may be made under this subparagraph after December 31, 2003.''.

(b) DISCLOSURE UPON REQUEST OF INFORMATION RELATING TO TERRORIST ACTIVITIES, ETC.—Subsection (i) of section 6103 (relating to disclosure to Federal officers or employees for administration of Federal laws not relating to tax administration) is amended by redesignating paragraph (7) as paragraph (8) and by inserting after paragraph (6) the following new paragraph:

''(7) DISCLOSURE UPON REQUEST OF INFORMATION RELATING TO TERRORIST ACTIVITIES, ETC.—

''(A) DISCLOSURE TO LAW ENFORCEMENT AGENCIES.—

''(i) IN GENERAL.—Except as provided in paragraph (6), upon receipt by the Secretary of a written request which meets the requirements of clause (iii), the Secretary may disclose return information (other than taxpayer return information) to officers and employees of any Federal law enforcement agency who are personally and directly engaged in the response to or investigation of any terrorist incident, threat, or activity.

''(ii) DISCLOSURE TO STATE AND LOCAL LAW ENFORCEMENT AGENCIES.—The head of any Federal law enforcement agency may disclose return information obtained under clause (i) to officers and employees of any State or local law enforcement agency but only if such agency is part of a team with the Federal law enforcement agency in such response or investigation and such information is disclosed only to officers and employees who are personally and directly engaged in such response or investigation.

''(iii) REQUIREMENTS.—A request meets the requirements of this clause if—

''(I) the request is made by the head of any Federal law enforcement agency (or his delegate) involved in the response to or investigation of any terrorist incident, threat, or activity, and

''(II) the request sets forth the specific reason or reasons why such disclosure may be relevant to a terrorist incident, threat, or activity.

''(iv) LIMITATION ON USE OF INFORMATION.—Information disclosed under this subparagraph shall be solely for the use of the officers and employees to whom such information is disclosed in such response or investigation.

''(B) DISCLOSURE TO INTELLIGENCE AGENCIES.—

''(i) IN GENERAL.—Except as provided in paragraph (6), upon receipt by the Secretary of a written request which meets the requirements of clause (ii), the Secretary may disclose return information (other than taxpayer return information) to those officers and employees of the Department of Justice, the Department of the Treasury, and other Federal intelligence agencies who are personally and directly engaged in the collection or analysis of intelligence and counterintelligence information or investigation concerning any terrorist incident, threat, or activity. For purposes of the preceding sentence, the information disclosed under the preceding sentence shall be solely for the use of such officers and employees in such investigation, collection, or analysis.

''(ii) REQUIREMENTS.—A request meets the requirements of this subparagraph if the request—

''(I) is made by an individual described in clause (iii), and

''(II) sets forth the specific reason or reasons why such disclosure may be relevant to a terrorist incident, threat, or activity.

''(iii) REQUESTING INDIVIDUALS.—An individual described in this subparagraph is an individual—

''(I) who is an officer or employee of the Department of Justice or the Department of the Treasury who is appointed by the President with the advice and consent of the Senate or who is the Director of the United States Secret Service, and

''(II) who is responsible for the collection and analysis of intelligence and counterintelligence information concerning any terrorist incident, threat, or activity.

''(iv) TAXPAYER IDENTITY.—For purposes of this subparagraph, a taxpayer's identity shall not be treated as taxpayer return information.

''(C) DISCLOSURE UNDER EX PARTE ORDERS.—

''(i) IN GENERAL.—Except as provided in paragraph (6), any return or return information with respect to any specified taxable period or periods shall, pursuant to and upon the grant of an ex parte order by a Federal district court judge or magistrate under clause (ii), be open (but only to the extent necessary as provided in such order) to inspection by, or disclosure to, officers and employees of any Federal law enforcement agency or Federal intelligence agency who are personally and directly engaged in any investigation, response to, or analysis of intelligence and counterintelligence information concerning any terrorist incident, threat, or activity. Return or return information opened to inspection or disclosure pursuant to the preceding sentence shall be solely for the use of such officers and employees in the investigation, response, or analysis, and in any judicial, administrative, or grand jury proceedings, pertaining to such terrorist incident, threat, or activity.

''(ii) APPLICATION FOR ORDER.—The Attorney General, the Deputy Attorney General, the Associate Attorney General, any Assistant Attorney General, or any United States attorney may authorize an application to a Federal district court judge or magistrate for the order referred to in clause (i). Upon such application, such judge or magistrate may grant such order if he determines on the basis of the facts submitted by the applicant that—

''(I) there is reasonable cause to believe, based upon information believed to be reliable, that the return or return information may be relevant to a matter relating to such terrorist incident, threat, or activity, and

''(II) the return or return information is sought exclusively for use in a Federal investigation, analysis, or proceeding concerning any terrorist incident, threat, or activity.

''(D) SPECIAL RULE FOR EX PARTE DISCLOSURE BY THE IRS.—

''(i) IN GENERAL.—Except as provided in paragraph (6), the Secretary may authorize an application to a Federal district court judge or magistrate for the order referred to in subparagraph (C)(i). Upon such application, such judge or magistrate may grant such order if he determines on the basis of the facts submitted by the applicant that the requirements of subparagraph (C)(ii)(I) are met.

''(ii) LIMITATION ON USE OF INFORMATION.—Information disclosed under clause (i)—

''(I) may be disclosed only to the extent necessary to apprise the head of the appropriate Federal law enforcement agency responsible for investigating or responding to a terrorist incident, threat, or activity, and

''(II) shall be solely for use in a Federal investigation, analysis, or proceeding concerning any terrorist incident, threat, or activity.

The head of such Federal agency may disclose such information to officers and employees of such agency to the extent necessary to investigate or respond to such terrorist incident, threat, or activity.

''(E) TERMINATION.—No disclosure may be made under this paragraph after December 31, 2003.''.

(c) CONFORMING AMENDMENTS.—

(1) Section 6103(a)(2) is amended by inserting ''any local law enforcement agency receiving information under subsection (i)(7)(A),'' after ''State,''.

(2) Section 6103(b) is amended by adding at the end the following new paragraph:

''(11) TERRORIST INCIDENT, THREAT, OR ACTIVITY.—The term 'terrorist incident, threat, or activity' means an incident, threat, or activity involving an act of domestic terrorism (as defined in section 2331(5) of title 18, United States Code) or international terrorism (as defined in section 2331(1) of such title).''.

(3) The heading of section 6103(i)(3) is amended by inserting ''OR TERRORIST'' after ''CRIMINAL''.

(4) Paragraph (4) of section 6103(i) is amended—

(A) in subparagraph (A) by inserting ''or (7)(C)'' after ''paragraph (1)'', and

(B) in subparagraph (B) by striking ''or (3)(A)'' and inserting ''(3)(A) or (C), or (7)''.

(5) Paragraph (6) of section 6103(i) is amended—

(A) by striking ''(3)(A)'' and inserting ''(3)(A) or (C)'', and

(B) by striking ''or (7)'' and inserting ''(7), or (8)''.

(6) Section 6103(p)(3) is amended—

(A) in subparagraph (A) by striking ''(7)(A)(ii)'' and inserting ''(8)(A)(ii)'', and

(B) in subparagraph (C) by striking ''(i)(3)(B)(i)'' and inserting ''(i)(3)(B)(i) or (7)(A)(ii)''.

(7) Section 6103(p)(4) is amended—

(A) in the matter preceding subparagraph (A)—

(i) by striking ''or (5),'' the first place it appears and inserting ''(5), or (7),'', and

(ii) by striking ''(i)(3)(B)(i),'' and inserting ''(i)(3)(B)(i) or (7)(A)(ii),'', and

(B) in subparagraph (F)(ii) by striking ''or (5),'' the first place it appears and inserting ''(5) or (7),''.

(8) Section 6103(p)(6)(B)(i) is amended by striking ''(i)(7)(A)(ii)'' and inserting ''(i)(8)(A)(ii)''.

(9) Section 6105(b) is amended—

(A) by striking ''or'' at the end of paragraph (2),

(B) by striking ''paragraphs (1) or (2)'' in paragraph (3) and inserting ''paragraph (1), (2), or (3)'',

(C) by redesignating paragraph (3) as paragraph (4), and

(D) by inserting after paragraph (2) the following new paragraph:

''(3) to the disclosure of tax convention information on the same terms as return information may be disclosed under paragraph (3)(C) or (7) of section 6103(i), except that in the case of tax convention information provided by a foreign government, no disclosure may be made under this paragraph without the written consent of the foreign government, or''.

(10) Section 7213(a)(2) is amended by striking ''(i)(3)(B)(i),'' and inserting ''(i)(3)(B)(i) or (7)(A)(ii),''.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to disclosures made on or after the date of the enactment of this Act.

TITLE V—NO IMPACT ON SOCIAL SECURITY TRUST FUNDS

SEC. 501. NO IMPACT ON SOCIAL SECURITY TRUST FUNDS.

(a) IN GENERAL.—Nothing in this Act (or an amendment made by this Act) shall be construed to alter or amend title II of the Social Security Act (or any regulation promulgated under that Act).

(b) TRANSFERS.—

(1) ESTIMATE OF SECRETARY.—The Secretary of the Treasury shall annually estimate the impact that the enactment of this Act has on the income and balances of the trust funds established under section 201 of the Social Security Act (42 U.S.C. 401).

(2) TRANSFER OF FUNDS.—If, under paragraph (1), the Secretary of the Treasury estimates that the enactment of this Act has a negative impact on the income and balances of the trust funds established under section 201 of the Social Security Act (42 U.S.C. 401), the Secretary shall transfer, not less frequently than quarterly, from the general revenues of the Federal Government an amount sufficient so as to ensure that the income and balances of such trust funds are not reduced as a result of the enactment of this Act.

The amendment (No. 2689) was agreed to.

(The text of the amendment is printed in today's RECORD under ''Amendments Submitted and Proposed.'')

Mr. TORRICELLI. I express my thanks to Senator DASCHLE, Senator LOTT, Senator BAUCUS, Senator GRASSLEY, Senator NICKLES, and so many Members of the Senate who made this possible. I know during this Christmas season that the plight and distress of the families of those who lost their lives in Virginia, New York, New Jersey, and Pennsylvania will be in all of our thoughts. That really is not enough.

Charities have raised an enormous amount of money, but it has not gotten to the victims' families. There is a victims' fund this Government has raised, but it has not yet gotten to these victims' families. This tax relief offers real and immediate benefits. It has the promise that as American citizens give funds to charities, the funds from those charities will not in turn be taxed as they get to the widows, the parents, or other relatives. It holds the promise that there will be a refund given to many of these families.

Offering financial relief is little solace given such enormous pain, but it is of some help. Families who have buried their loved ones are also paying mortgages, tuition, and buying groceries. This is real help.

I am grateful to the Members of the Senate who have helped pass this legislation. I am grateful to Chairman THOMAS of the House Ways and Means Committee who has been with us as an architect in its passage.

I express on behalf of all the families for whom this means so much in this holiday season their gratitude to all of you who have made this possible. I yield the floor.

The PRESIDING OFFICER (Ms. CANTWELL). The majority leader.

Mr. DASCHLE. Madam President, I thank both Senators from New Jersey for their extraordinary work in getting us to this point. This was not easy, and I am grateful to them for their persistence, their leadership, and their efforts. This would not have happened were it not for their direct involvement to this moment. I say the same to the Senators from New York for the tremendous work they have done assisting us in getting to this point as well.

The PRESIDING OFFICER. The Republican leader.

Mr. LOTT. Madam President, I will be brief because I know we want to finish up the debate on the Defense appropriations conference report and get a recorded vote. There are Senators who would like that to occur sooner rather than later, so I will not belabor the point.

I am glad we worked out the agreement on the victims' disaster of September 11. I appreciate the cooperation all the way around. One can tell by the discussion that one of the reasons some of these other meritorious items were not added is that once we had one, there would be two, three, four, and we could not get all those worked out in the short time we had, and we stood the chance of losing the victims' tax provisions. I am glad we did that.

Also, I understand many of these provisions, including the New York provision, are in the stimulus package that has been voted on by the House. We are going to eventually get a stimulus package, and I hope and expect that provision will be in the bill.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. CORZINE. I thank the Chair.

Madam President, I, too, thank the Senate and the leadership of Senator DASCHLE, Senator LOTT, the chairman of the House Ways and Means Committee, Senator BAUCUS, and others who have worked with us to allow this victims' relief effort to come to pass.

Nothing can be more sincere and heartfelt during this holiday season than to respond with this legislation for families who have lost so much.

I thank the Senate for its efforts.

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2002—CONFERENCE REPORT—Continued

Mr. DASCHLE. Madam President, it is my understanding we now have agreement to go directly to the vote on the conference report to H.R. 3338. I appreciate everyone's cooperation in that regard and I ask that the Senate proceed. For the interest of all Senators, this will be the last vote of the day.

The PRESIDING OFFICER. Is there further debate?

The Senator from West Virginia.

Mr. BYRD. I will take 30 seconds. I had agreed, in the interest of letting Senators catch their planes, to having the vote and then have my statement concerning the homeland defense part appear in the RECORD as though spoken before the vote. That unanimous consent was not agreed to and others spoke. The Senator from Arizona spoke. It was my understanding we would all give up that privilege and we would vote without speaking. Others have spoken. I am not going to stand in the way of Senators going home on this occasion, so I want to make it clear I did not object in the beginning so everybody who had speeches could make them.

I am willing to give up my speech right now. It is a great speech, but I will make it after the vote. I wanted to call it to the attention of the Senate that I kind of begrudgingly agreed to that request.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

Mr. DASCHLE. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The question is on agreeing to the concurrent resolution.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. REID. I announce that the Senator from Hawaii (Mr. AKAKA) is necessarily absent.

Mr. NICKLES. I announce that the Senator from Missouri (Mr. BOND), the Senator from Nevada (Mr. ENSIGN), and the Senator from North Carolina (Mr. HELMS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 94, nays 2, as follows:

[Rollcall Vote No. 380 Leg.]

YEAS—94

Allard	Durbin	Mikulski
Allen	Edwards	Miller
Baucus	Enzi	Murkowski
Bayh	Feingold	Murray
Bennett	Feinstein	Nelson (FL)
Biden	Fitzgerald	Nelson (NE)
Bingaman	Frist	Nickles
Boxer	Graham	Reed
Breaux	Grassley	Reid
Brownback	Gregg	Roberts
Bunning	Hagel	Rockefeller
Burns	Harkin	Santorum
Byrd	Hatch	Sarbanes
Campbell	Hollings	Schumer
Cantwell	Hutchinson	Sessions
Carnahan	Hutchison	Shelby
Carper	Inhofe	Smith (NH)
Chafee	Inouye	Smith (OR)
Cleland	Jeffords	Snowe
Clinton	Johnson	Specter
Cochran	Kennedy	Stabenow
Collins	Kerry	Stevens
Conrad	Kohl	Thomas
Corzine	Kyl	Thompson
Craig	Landrieu	Thurmond
Crapo	Leahy	Torricelli
Daschle	Levin	Voinovich
Dayton	Lieberman	Warner
DeWine	Lincoln	Wellstone
Dodd	Lott	Wyden
Domenici	Lugar	
Dorgan	McConnell	

NAYS—2

Gramm
McCain

NOT VOTING—4

Akaka	Ensign
Bond	Helms

The conference report (H.R. 3338) was agreed to.

Mr. REID. Madam President, I move to reconsider the vote.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LOTT. Madam President, if I may take just one moment. I see Senator DASCHLE is getting ready to propound some unanimous consent requests.

Let me take a moment to say to the managers of the legislation and the chairman and ranking member of the committee, I know this has not been easy. There have been a lot of great ideas on both sides of the aisle as to how we could improve it or change it. You have been tenacious, you stuck with it, and you produced a good piece of legislation that is important for our country, important for our men and women in uniform.

This very morning the President called and said he was pleased with the result and he appreciates the leadership the Senate gave in this area.

I commend all of you, Senator INOUYE, Senator STEVENS, and Senator BYRD, for the work that has been done here.

I yield the floor.

The PRESIDING OFFICER. The majority leader.

Mr. DASCHLE. Madam President, I concur in the comments made by the Republican leader. We should note that this completes our work on all 13 appropriations bills. I commend both the chair and the ranking member for their work in getting us to this point. This was not easy, especially this year. It would not have happened were it not for the tremendous effort made by each of the subcommittee chairs. I note especially the efforts of the Senator from Hawaii on the Defense appropriations bill, the largest of all bills with which we had to contend.

I congratulate them. I thank them. I note, again, the great work they have done in getting us to this point.

UNANIMOUS CONSENT REQUEST—H.R. 3210

Mr. DASCHLE. Madam President, I have a unanimous consent request to propound at this time. There will be many other unanimous consent requests made over the course of this afternoon. We will certainly notify Senators as they are propounded so that those who have an interest in a particular issue can be in the Chamber when we make them. Let me begin.

I ask unanimous consent the Senate proceed to Calendar No. 252, H.R. 3210, and the only amendment in order be a Dodd-Sarbanes-Schumer substitute amendment, that the substitute be considered and agreed to, the bill, as amended, be read a third time and passed, and the motion to reconsider be laid upon the table, with no intervening action or debate.

The PRESIDING OFFICER. Is there objection?

The Senator from Kentucky.

Mr. MCCONNELL. Madam President, reserving the right to object—I will object—I have a different approach in mind on this which I would like to propound.

The PRESIDING OFFICER. Objection is heard.

Mr. DASCHLE. Madam President, the Republican leader and I have agreed that we would keep the remarks involving these unanimous consent requests to a minimum at this point to accommodate those Senators who are still waiting to speak on the Defense appropriations conference report. I would like to respect our earlier commitment to them that they would have the opportunity to make their remarks. But we will certainly entertain these unanimous consent requests without extended comments. I appreciate everyone's cooperation in that regard.

Mr. MCCONNELL. Madam President, will the leader yield for a question?

Mr. DASCHLE. Yes.

Mr. MCCONNELL. I was simply going to suggest that he modify his unanimous consent request. I was not going to make a speech.

Mr. DASCHLE. I would be happy to entertain the modification.

Mr. MCCONNELL. I was going to suggest the majority leader modify his unanimous consent request to adopt one amendment on each side with regard to liability only.

Mr. DASCHLE. Madam President, I appreciate the recommendation and proposal made by the Senator from Kentucky. I know this has been the subject of a good deal of discussion. There is no doubt the issue of liability will be a matter that will have to be addressed. But if we open it up to any amendment at this late hour, there is little likelihood we can complete our work in time for us to be able to go to conference before the holidays begin.

For that reason, I would have to object.

UNANIMOUS CONSENT REQUEST—H.R. 3529

Mr. LOTT. Madam President, I ask unanimous consent that the Senate now proceed to the consideration of H.R. 3529, which is the stimulus package received from the House. I further ask unanimous consent that there be 60 minutes for debate equally divided in the usual form; further, I ask that at the expiration or yielding back of that time, the bill be read a third time and the Senate proceed to a vote on passage of the bill, with points of order waived.

Before the Chair rules on this unanimous consent request, I add that if there is any additional debate time—if 2 or 3 hours would be needed—I will certainly amend my unanimous consent request to accommodate more debate.

The PRESIDING OFFICER. Is there objection?

Mr. DASCHLE. Madam President, I offer an alternative and make it a proposal that we amend the unanimous consent request made by the distinguished Republican leader as the following: That the amendment include a substitute amendment that I have at the desk which would extend unemployment insurance coverage for 13 weeks, and that the bill, as amended, be read a third time and passed.

Mr. LOTT. Madam President, reserving the right to object, I want to make sure I understand the proposal: That we would not have a vote on that addition but to just include it in the package. Is that correct?

Mr. DASCHLE. Madam President, we have already indicated, of course, to all of our colleagues that we would not have any additional rollcall votes today. We would have to accommodate this request with simply a voice vote on the substitute.

Basically, what we are suggesting is that since we cannot reach agreement on the overall economic stimulus, the one piece for which there is general agreement is the need to extend unemployment insurance. We did it three times in the early 1990s, recognizing that the limited regular benefit period of time was inadequate for a lot of those who are out of work.

Again, without getting into extended remarks, I would simply, by explanation, note that would be the intent of this unanimous consent request, which is to substitute economic stimulus with the 13-week extension.

Mr. LOTT. Madam President, under those conditions, I would have to object.

Let me just say that if we can set it up in a way to have a rollcall vote on that rather than a voice vote to make that very substantial change, I think we need to do both, and therefore I would have to object to that modification.

Mr. DASCHLE. Madam President, I yield the floor.

Mr. LOTT. I yield the floor.

The PRESIDING OFFICER. Objection is heard.

The Senator from Hawaii.

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2002—CONFERENCE REPORT

Mr. INOUYE. Madam President, pursuant to the unanimous consent agreement, I would like to proceed with my statements.

The PRESIDING OFFICER. The Senator is recognized.

Mr. INOUYE. Madam President, I am happy to rise today to offer my unqualified support for the conference agreement on H.R. 3338, the Department of Defense Appropriations Bill for Fiscal Year 2002.

I am pleased to present the recommendations to the Senate today, as division A of this bill.

The recommendations contained herein are the result of lengthy negotiations between the House and Senate managers and countless hours of work by our staffs acting on behalf of all members.

The agreement provides $317.2 billion, the same as the House and Senate levels, consistent with our 302b allocations.

As in all conference agreements, neither side, nor any individual member had every issue go his or her way. It represents a compromise.

It is one that protects the interests of both houses while clearly meeting our national defense reponsibilities.

For the information of all Senators, I should point out that the bill provides more funding for our men and women in uniform than was recommended by either body.

I want to note to all my collegues that this would not have been possible without the tremendous cooperation that I have received from Senator STEVENS and his able staff led by Steve Cortese with Ms. Margaret Ashworth, Kraig Siracuse, Alycia Farrell, and Mr. John Kem, on detail from DOD.

The Senate owes all of them a debt of gratitude. I want to also note the efforts of my staff, Charlie Houy, David Morrison, Gary Reese, Susan Hogan, Tom Hawkins, Bob Henke, Lesley Kalan, and Mazie Mattson who have devoted so much time to preparing the committee's recommendations for this bill.

The Defense appropriations bill as recommended by the conference committee provides a total of $317,623,747,000 in budget authority for mandatory and discretionary programs for the Department of Defense. This amount is $1,923,633,000 below the President's request.

The recommended funding is below the President's request by nearly $2 billion because the Congress has already acted to reallocate $500 million for military construction and $1.2 billion for nuclear energy programs under the jurisdiction of the Energy Water Subcommittee.

The total discretionary funding recommended in division A of this bill is $317,206,747,000. This is less than $2 million below the subcommittee's 302B allocation.

This measure is consistent with the objectives of this administration and the Defense Authorization Conference Report which passed the Senate.

In addition, we believe we have accommodated those issues identified by the Senate which would enhance our nation's defense while allowing us to stay within the limits of the budget resolution.

Our first priority in this bill is to provide for the quality of life of our men and women in uniform.

In that vein, we have fully funded a five percent pay raise for every military member as authorized.

We recommend additional funding for targeted pay raises for those grades and particular skills which are hard to fill.

We believe these increases will significantly aid our ability to recruit, and perhaps more importantly, retain much needed military personnel.

We have also provided $18.4 billion for health care costs. This is 46.3 billion more than appropriated in FY 2001 and nearly $500 million more than requested by the president.

This funding will ensure that tricare costs are fully covered.

It will also increase our military hospital funding to better provide for their patients and, by providing funding for ''TRICARE FOR LIFE'', we fulfill a commitment made to our retirees over 65.

This will ensure that those Americans who were willing to dedicate their lives to the military will have quality health care in their older years.

This is most importantly an issue of fairness.

It fulfills the guarantee our nation made to the men and women of our military when they were on active duty.

We also believe it will signal to those willing to serve today that we will keep our promises. In no small part we see this as another recruiting and retention program.

In title two, the bill provides $105 billion for readiness and related programs. This is $8.2 billion more than appropriated for fiscal year 2001. The bill reallocates funding from the Secretary of Defense to the military services for the costs of overseas deployments in the Balkans.

This is the way the Pentagon funds the Middle East deployments. The conferees have agreed to leave a small amount in the appropriation for unforeseen emergencies.

For our investment in weapons and other equipment, the recommendation includes $60.9 billion for procurement, nearly $500 million more than requested by the President. The funding here will continue our efforts to recapitalize our forces.

The agreement fully supports the Army's transformation goals and purchases much needed aircraft, missiles and space platforms for the Air Force.

For the Navy, the bill provides full funding for those programs that are on track and ready to move forward.

In the case of shipbuilding, the conferees strongly support the need to address our growing shortfalls in ship construction. The agreement provides more funding that in either House or Senate bill and $150 more than requested.

In some cases, contract delays have allowed the conferees to recommend reallocating funds for other critical requirements.

Included in that, the committee has recommended $700 million for procurement to support our national guard and reserve forces.

The conference funds 10 UH–60 helicopters for the National Guard and Army Reserve. It also provides four C–130's for our Air National Guard and Reserves.

The agreement adds funding for additional trainer aircraft for the Navy. It fully funds the requirements for the F–22, the JSF and the F/A–18.

In funding for future investment for research and development, the measure recommends $48.9 billion, nearly $1.5 billion more than the amounts appropriated for fiscal year 2001. Regarding missile defense, the bills is very close to the level requested by the President.

Last week, the Pentagon announced that it was terminating the Navy' area wide missile defense program. Additionally, we were informed that the Pentagon is restructuring its space based on infrared—low program. These two adjustments allowed the conferees to reduce funding for missile defense.

However, similar to the provision in the Senate and the authorization bill, the committee provides $478 million in additional funding that can be used for counter terrorism programs.

This is a balanced bill that supports the priorities of the administration and the Senate.

In order to cut spending by nearly $2 billion, some difficult decisions were required. The bill reduces funding for several programs that have been delayed or are being reconsidered because of the secretary's strategic review, the nuclear posture review, and the quadrennial defense review.

The bill also makes adjustments that are in line with the reforms championed by the administration:

A concerted effort was made at reducing reporting requirements in the bill;

The bill also reduces funding for consultants and other related support personnel as authorized by the Senate.

As requested, the bill provides $100 million for DOD to make additional progress in modernizing its financial management systems.

Finally, the bill places a cap on legislative liaison personnel which the Secretary of Defense has indicated are excessive.

I would like to take a few minutes to discuss an item that some have mischaracterized.

The bill provides discretionary authority to the Defense Department to lease tankers to replace the aging KC–135 fleet. This is a program that is strongly endorsed by the Air Force as the most cost effective way to replace our tankers.

Despite what has been claimed, the language in the bill requires that the lease can only be entered into if the Air Force can show that it will be 10 percent cheaper to lease the aircraft than to purchase them. In addition, it stipulates that the aircraft must be returned to the manufacturer at the end of the lease period.

No business sector has suffered more from the events of 9–11 than has our commercial aircraft manufacturers. The tragic events of that day have drastically reduced orders for commercial aircraft.

We have been informed that Boeing, for example, will have to lay off approximately 30,000 people as a direct consequence of the terrorist attack. We have provided funding to support the aircraft manufacturers as a result of that tragedy.

We are including funds elsewhere in this bill to help in the recovery in New York and the Pentagon. The leasing authority which we have included in Division A allows us to help assist commercial airline manufacturers while also solving a long-term problem for the Air Force.

I strongly endorse this initiative which was crafted by my good friend Senator STEVENS with the support of several other Members, including Senators CANTWELL, MURRAY, ROBERTS, and DURBIN. I believe it deserves the unanimous support of the Senate.

Today is December 20th. Nearly one quarter of the fiscal year has passed.

The Defense Department is operating under a continuing resolution which significantly limits its ability to efficiently manage its funding.

I don't need to remind any of my colleagues that we have men and women

serving half way around the world defending us.

Less than one percent of Americans serve in today's military. These few are willing to sacrifice themselves for us. They deserve our support.

One hundred days ago our Nation was shocked and hurt by a surprise attack. This is the bill, Mr. President, that allows us to respond to that attack.

It is also the measure we need to show our military forces that we support them.

This bill is urgently needed to fight and win this war and to demonstrate to the world our resolve.

I urge all my colleagues to support this bill.

The PRESIDING OFFICER (Mr. CORZINE). The Senator from Washington is recognized.

Ms. CANTWELL. Mr. President, I add my congratulations to the chairman of the subcommittee and the ranking member for their hard work on a very important piece of legislation.

I also ask unanimous consent to have printed in the RECORD a letter by Air Force Chief of Staff John Jumper and Secretary of the Air Force James Roche basically explaining in detail their need for the 767 tanker fleet and why the activities and events after September 11 have accelerated the interest in the replacement options that were a part of this legislation.

DECEMBER 18, 2001.

EDITOR-IN-CHIEF,
The Washington Post,
Washington, DC.

There being no objection, the letter was ordered to be printed in RECORD, as follows:

DEAR EDITOR: Robert Novak's Dec 16, 2001 column, ''Boeing Boondoggle,'' wrongly implies the Air Force doesn't have a position on leasing Boeing 767s for use as tanker aircraft. Our position, previously explained to Mr. Novak, is clear: we need to modernize our aging tanker fleet, and we owe it to our warfighters and taxpayers to consider all reasonable options, including leasing or buying 767s.

Air refueling enables America to project power anywhere in the world. Today, in the US-led global war on terrorism, that mission is mostly done with an aircraft designed and first built during the Eisenhower administration. We have flown more than 3500 refueling sorties in Operation Enduring Freedom and more than 2700 refueling sorties in support of air patrols over American cities since the September 11 attacks. These operations, along with a mission focus on homeland security, are forcing the Air Force to assess accelerating replacement options.

Incorporating new 767 aircraft into our fleet will dramatically enhance America's aerial refueling capability. Benefits include increased fuel offload, near-term aircraft availability, and mission realiability—all with far lower support costs. The 767 has also attracted the interest of Italy and Japan, allies with similar needs.

Should Congress approve a leasing option to put new tankers in service, we will analyze business conditions and determine the most cost-effect modernization path available. Leasing may enable the Air Force to avoid significant up-front acquisition cash outlays, and it could allow us to accelerate retirement of the oldest, least reliable tankers in the fleet, saving more than $3 billion in repair and maintenance costs. If a cost-benefit analysis favors another approach, we would pursue that alternative.

America's air refueling fleet is indispensable, and modernization is essential to future mission success. The 767 is the right platform to jumpstart tanker modernization, and we are committed to leveraging our resources to make the best overall arrangement for our citizens.

JOHN P. JUMPER,
General, USAF, Chief of Staff.
JAMES G. ROCHE,
Secretary of the Air Force.

Ms. CANTWELL. Mr. President, I also ask unanimous consent to have printed in the RECORD information about how the DOD process for reviewing the need for the 767 tanker replacement was started over 2 years ago, culminating in a report and analysis of, February 2001 that these tankers were in fact needed and not done behind closed doors but the process was followed.

There being no objection, the material was ordered to be printed in the RECORD. as follows:

Planning for the Air Force replacement of its KC–135 tanker fleet has been ongoing for years. The DoD's Joint Requirements Oversight Committee (JROC) has validated a Mission Needs Statement for this replacement, culminating a two year DoD review process.

In response, Boeing in February of 2001 submitted a proposal to the Air Force for the purchase of new 767 tankers—this is neither a new, nor a ''behind closed doors'' issue.

The Air Force Secretary and Chief of Staff have been visible and vocal (letters, press statements) is their support for the need to begin to modernize the tanker fleet. More specifically, they have been clear on the desirability of leasing 767 tankers in order to get them deployed (and old high cost tankers retired) in operationally significant quantities and within projected budgets over the next decade.

Ms. CANTWELL. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. CARPER. Mr. President, I rise because we have passed the 13th conference report on the 13 appropriations bills.

As we prepare to return to our home States, everyone here in the Chamber and everyone in the Senate can find some aspect of the conference report on Defense to which to object.

In the end, what we have to do is consider the work as a whole—as a complete body of work—and make our judgments on it as not any one single item or issue but the whole notion of how we protect our Nation's interests across the globe. On that, this measure deserves my support, and has gotten my support, and obviously the support of a majority of our colleagues.

As we dispose of the conference report on the Defense appropriations bill, I regret that we leave behind other issues involving security for our country at home. I want to mention those today.

I hope before we adjourn at the end of this day, we will have had the opportunity to bring to this floor several measures that will be brought up by unanimous consent, and I hope with no objection. One of those deals with the security of our ports. As it turns out, for the hundreds of ports across and around our Nation where ships travel in and out of them every single week, the security we provide for those ports and for the people who live in the areas around those ports is inadequate.

The opportunity for someone to bring terrorist devices into our ports and into heavily populated areas possibly is very real. It is one that we currently do not address well, and we need to.

The Senate Commerce Committee, under the leadership of Senator HOLLINGS, has reported out legislation, I believe unanimously, on port security. It needs to come before this body and to be considered before we ultimately adjourn.

Secondly, on the issue of airport security, aircraft security has been debated and I think satisfactorily addressed by the House and Senate and by the President.

Many people in this part of the country, and around the country, travel by railroad. We leave undone, at least at this moment, issues that ought to be addressed with respect to rail security, the security of people who are traveling on railroads as passengers around our Nation.

Again, the Commerce Committee, under the leadership of Senator HOLLINGS, has reported out, I believe unanimously, legislation dealing with rail security. It is an important issue, and not just for those of us in the Northeast corridor; it is an important issue for our Nation. And we know, as the Presiding Officer does, there are hundreds of thousands of people who travel literally every day through tunnels that go in and out of New York, under Baltimore, and under this city that are not too secure, are not well ventilated or well lit, and are not well protected.

This measure would help to address that, along with better surveillance of our bridges, providing better and more adequate security aboard our trains. My hope is that before we leave this day, before the Senate sets this day, we will have taken up this measure by unanimous consent and approve it in the Senate.

There was objection a few moments ago to another unanimous consent request which was made with respect to antiterrorism reinsurance. Other nations around the globe have been the target of terrorist attacks, and damage has been suffered from those attacks for many years. For us, fortunately, the experience of September 11 had never visited this country before. We have not had to trouble ourselves with determining how we provide adequately for insurance in the event of a terrorist attack.

Other countries deal with this differently. In Israel and the United Kingdom, which have had terrorist attacks

for many years, those countries have their own approach. In Israel, for example, the country provides the insurance for the terrorist attacks. The Banking Committee and the Commerce Committee both have sought to craft legislation to say there ought to be a backstop with respect to antiterrorism legislation, that initially the insurance companies themselves should put up money and absorb the losses, to the tune of $10 or $15 billion, but after that there should be a sharing of the costs that grow out of terrorist attacks. The Federal Government should share that. It is unfortunate we were not able to proceed with this legislation today, and it is imperative we take it up as soon as we return.

The last point is with respect to other unfinished business. When terrorists attacked us on September 11, they didn't just take people's lives in New York, the Pentagon, and in Pennsylvania; they struck a body blow to our economy. We are still reeling, to some extent, from that body blow. The work of the Federal Reserve on monetary policy helps us with respect to that body blow.

The fact that energy prices have fallen so much helps us with respect to that body blow. The fact that we are spending, frankly, a lot of money with deficit spending, in order to fight terrorism here and across the country and around the world, provides stimulus to the economy and helps to reduce the length of time under which we will likely have a recession.

There is one other thing we could have done, and ought to have done, besides the terrorism reinsurance proposal that has been objected to, and that was to pass an economic recovery plan. That, I think, had broad bipartisan support by Democrats and Republicans. It would have accelerated depreciation and gotten businesses back into the business of making capital investment. It would have provided a payroll tax holiday for businesses and employees as well. It would have provided extensions of unemployment insurance and helped folks on the health insurance side. It would have helped States that are reeling at this point in time. Unfortunately, we have not had the opportunity to debate that today and to pass a true bipartisan plan.

So we go home with half a loaf. We go home with half a loaf, but, as the Presiding Officer knows, we will come back next month. And as we come back next month, my hope is, if we have not dealt satisfactorily with railroad security and port security today, if we have not dealt with antiterrorism reinsurance today, as it appears we will not, that once we return we will take that up.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Mr. President, I ask unanimous consent that when I complete my request for the unanimous consent, the Senator from West Virginia be recognized. He has time under the previous bill already, but I would like him to be recognized as soon as I finish.

The PRESIDING OFFICER. Is there objection?

Mr. BROWNBACK. Reserving the right to object, I have one unanimous consent request I would like to make regarding an immigration bill before, if possible, the Senator from West Virginia speaks.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. Reserving the right to object, the Senators may be unaware, but under the previous order, I was to be recognized after the vote; right?

Mr. REID. Right.

The PRESIDING OFFICER. It was the understanding of the Chair that Senators INOUYE and STEVENS were to be recognized after the vote. And the Senator agreed to delay his statement, but the time had not been allotted to him specifically.

Mr. BYRD. Mr. President, I know what my rights are, and I know what the order said. I just have not pressed my rights. But I have no objection to the Senator making his request. I will not, however, stand aside for the Senator's request, but I will be here when he makes his request.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Is my consent granted then, Mr. President?

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

UNANIMOUS CONSENT REQUEST—H.R. 3448

Mr. REID. Mr. President, I ask unanimous consent that the Senate now proceed to H.R. 3448, which is at the desk.

The PRESIDING OFFICER. The clerk will report the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3448) to improve the ability of the United States to prevent, prepare for, and respond to bioterrorism and other public health emergencies.

The PRESIDING OFFICER. Is there objection to proceeding to the measure at this time?

The Senator from Oklahoma.

Mr. NICKLES. I shall not object. I thank my colleague from West Virginia for his patience and tolerance, and also my colleague from Nevada for his assistance in moving this forward, as well as Senator DASCHLE and Senator LOTT. And I congratulate Senator FRIST and Senator KENNEDY for the work they have done in putting together this bipartisan Bioterrorism Preparedness Act.

The PRESIDING OFFICER. Is there objection to proceeding to this measure at this time?

Without objection, the Senate will proceed to the measure.

The Senator from Nevada.

Mr. REID. Mr. President, I say also that the Senator from West Virginia and I worked very hard on homeland security, which featured a lot of these matters in this legislation that will quickly be approved. And it was real money. This is not; this is an authorization. I am glad we are going to get this, but it would have been better had we done Senator BYRD's bill and mine.

Mr. President, I understand Senators FRIST, KENNEDY, and GREGG have a substitute amendment at the desk, which is the text of S. 1765. I ask unanimous consent that the amendment be considered and agreed to, the motion to reconsider be laid upon the table, that the bill, as amended, be read three times and passed, and the motion to reconsider be laid upon the table.

Mr. BYRD. Mr. President, I reserve the right to object. I do not know what this bill is about.

Mr. REID. Did the Senator from West Virginia hear my statement I just made?

Mr. BYRD. I could hardly hear anything, as a matter of fact.

Mr. REID. What I did say, I say to Senator BYRD, is that this is the authorization on which Senators KENNEDY and FRIST have worked. And I did say that the legislation you offered—with me being second in charge of that legislation—was real money, appropriated money, which would have done these things that this only authorizes. I am glad this is going to be authorized, but it is too bad we are not here celebrating real money for the people.

Mr. BYRD. I object to this bill. I object to this being considered at this time.

Mr. REID. Mr. President, I ask unanimous consent that my consent to lay this bill down be vitiated.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The Senator from Oklahoma.

Mr. NICKLES. Mr. President, I will just state to my friend and colleague from West Virginia, he is very much my friend, and I know he has a Defense appropriations speech, and I look forward to hearing his comments on that, and then I look forward to working with him to kind of show him some of the provisions on which Senators FRIST, KENNEDY, and GREGG, and others have worked. I believe there are 75 or more cosponsors on this bill. I think it is a good bill, a bipartisan bill, strongly supported by both sides.

I will work with my colleague from West Virginia to acquaint him with that. I hope and expect we can pass it a little later this afternoon.

The PRESIDING OFFICER (Mr. DAYTON). Under the previous order, the Senator from West Virginia is recognized.

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2002—CONFERENCE REPORT

Mr. BYRD. Mr. President, I have been more than patient. Under the majority leader's order earlier, I was to

have spoken on this subject, the Defense Department appropriations bill. Under his order, I was to be recognized after the vote so as to accommodate Senators that they might catch their planes.

Now there were other consents offered which I heard. I didn't object to them, but I believe the record will show that I was to be recognized immediately after the vote for the statement which I wanted to make on the homeland defense section of the DOD appropriations bill. I have been very patient.

I understand the problems of the two leaders. I have been majority leader before I have been minority leader, and I have been majority whip. I understand all their problems. This is the end of the year. Everybody wants to get away for Christmas. I don't want to interject myself in between someone's wish to catch a plane. But I have been very patient. I have let other consent orders come up without objecting because my speech isn't all that important. But I wanted to make it.

Now we are hearing consents offered for bills. I don't know who is watching the place on this bill. The distinguished Senator from Kansas is going to make a request on a bill. I want to be here when he makes it. He is entitled to make his request. But time is fast fleeting when this Senator is going to stand aside and just continue to wait and let everybody else speak, let everybody else object to the order of speaking, and just stand aside and let it be done.

That is not a big thing. It won't change the history of the world one way or the other. But I just want to say this: Next year, the chairman of the Senate Appropriations Committee is not going to stand aside for every other Senator's convenience in times like this.

I shall proceed.

The Senate has considered the conference report for the fiscal year 2002 Defense Department appropriations bill. It is a good bill, but it could have been much better. As Senators are aware, included in this legislation is the final allocation of the $40 billion emergency supplemental funding approved by this Senate just 3 days after the tragic attacks on the World Trade Center Towers and on the Pentagon. Quite simply, we wanted to respond to the attacks that occurred on September 11 and take steps to prevent attacks from occurring in the future. We didn't just want to respond to the attacks that had already occurred, but we wanted to take steps that could prevent attacks from occurring in the future.

Just a few days ago, the Senate had before it a broader package, one that fulfilled the $20 billion commitment made by the President and the Congress to New York and the other attacked communities; one that provided the Defense Department with substantial funding for its mission overseas—we wanted to give the President every dollar he asked for, $21 billion—and one that met the many pressing needs for our homeland defense: Improved hospital capacity to respond to terrorist attacks, wide distribution of smallpox vaccine, more border agents, improved safety at airports and train stations, safer mail, better trained and equipped police and firefighters.

That package, which was supported by a majority of this Senate in direct response to the September 11 disaster, succumbed to partisan politics. It fell when Republicans in this Chamber raised a procedural 60-vote point of order against the provision because they believed it was too expensive. They were within their rights to object. They were within their rights to propose a 60-vote point of order. But I don't understand how we can place an arbitrary price tag on protecting the safety of our citizens.

Never in my memory can I recall a time when Congress became so partisan over a disaster response, whether it be from earthquakes, floods, tornados, fires, never before can I remember our lining up so rigidly along political party lines when it came to providing the American people with funds to recover from disaster.

Unfortunately, the Senate minority and the White House used the 60-vote point of order against the homeland defense package. As I say, they have a perfect right to make that point of order. That is within the rules.

We all recognize that you can't beat 60 votes when you only have 51 at most on this side. Our Republican friends didn't want to help us get the 60 votes. So it must be dismaying to the people who have heard so much about the pledges of bipartisanship, so much about a new tone in Washington, to see what should have been a united, bipartisan approach to defending our homeland dissolve into a partisan dispute.

That is truly a shame. Since that vote, however, we have stepped back and worked on the smaller compromise plan that is before the Senate this afternoon. While it is not as comprehensive as the plan first proposed earlier this month, the allocation of the $20 billion emergency supplemental funding in this legislation provides support and resources that are needed right now for homeland defense, for national security, and for the recovery of New York City and the other communities directly affected by the September 11 attacks.

For those communities, the supplemental provides $8.2 billion. This brings the total commitment to the recovery effort to $11.2 billion, when previously released funds are included. The bulk of this funding, $4.35 billion, will fund debris removal at the World Trade Center site, repair public infrastructure such as the damaged subways and commuter trains, and assist individuals with expenses for housing, burial, and relocation. Another $2 billion will work to restore the economic health of the area.

This funding, to be provided in the form of community development block grants, will give businesses a much needed hand as they attempt to recover from the terrorist attacks. Other funding will improve security at transportation hubs and reimburse hospitals in New York that provided critical care on September 11 and for many days after.

Some of the money will help children who continue to be haunted by the ghosts of the terrorist attacks. As do the businesses and the communities, these children need to be made whole again. This money will assist in that effort.

As part of this supplemental allocation, the Defense Department will receive an additional $3.5 billion. When included with the funding in the regular Defense Appropriations bill, the Pentagon will receive a $43 billion increase over last year. This is the single largest one-year increase in Defense spending in more than two decades. It gives the military the resources necessary to battle terrorism overseas. It makes sure that our brave men and women who put themselves in harm's way will not fall short because of fiscal constraints. This package also provides for $775 million for repairs and reconstruction efforts at the Pentagon. As we rebuild Lower Manhattan, we must also repair the Pentagon.

Finally, we have provided in this allocation $8.3 billion for defense efforts here at home. In the days and weeks that have followed the terrorist attacks, committees on both sides of this Capitol have heard from experts, from federal, state, and local officials, and from regular Americans who are concerned for their safety at home. We cannot ignore the gaps in our homeland defenses. We cannot put off until tomorrow investments that must be made today. The $8.3 billion for homeland defense that is included in this legislation takes immediate steps to bolster our local police and fire departments. It provides critical funding to expand hospital capacity and to train doctors and nurses on what to do in case of a biological, chemical, or nuclear attack. The funding closes some of the holes in our Northern Border and in our seaports. Under the leadership of the distinguished Senator from South Carolina, Mr. HOLDINGS, we had $50 billion for port security. These things were knocked out under that 60-vote point of order. We are not going to forget that. It provides funds for improved cockpit security, to hire additional sky marshals and to purchase explosives detection equipment. It provides funds for the Postal Service to protect postal workers and purchase equipment to make our mail safer. The funding that we have included in this package will help Americans to know that we are not standing idly by, ignoring what are such obvious needs in our homeland defenses. We will take steps today to protect Americans and to try to prevent the tragedy we witnessed in September from occurring again.

This package is a compromise. It is not a be-all and end-all package. This money will not fill all of the gaps that exist. But what this package will do is move us forward. It will fund those initiatives that we need to begin now, and lay the groundwork for priorities that every Senator knows await us in the spring.

I want to thank my good friend, Senator STEVENS, for his work on this package. We would not be standing here today if not for his steadfast efforts. I also want to thank our House counterparts, Chairman BILL YOUNG of Florida. My, what a fine Congressman he is and a fine chairman of the Appropriation Committee now. I am sure that BILL YOUNG wanted to do more, but under the constraints that were upon him, he could not do more.

I also thank Congressman DAVID OBEY of Wisconsin. He is always a stalwart. He stood up for homeland defense. He tried in the House to move it forward and increase it, but he didn't have the votes. They and their staffs, led by Jim Dyer and Scott Lilly, worked closely with us to develop this package, and I appreciate their commitment to this successful conclusion.

As I mentioned earlier, with the Senate's passage of this conference report, Congress will have completed work on each of the 13 individual appropriations bills. I congratulate Senator INOUYE and Senator STEVENS, and their staffs, Charlie Houy and Steve Cortese, for crafting what I believe is a good Defense bill. I also am pleased that we were able to pass the thirteen individual bills on a partisan basis, with an average vote in the Senate of 91–6. We did not have to resort to an omnibus bill as has been the case in some years past. And we worked to protect the prerogatives of Congress. We did not invite the White House to sit at the table and negotiate these bills. That is not the role of the executive branch, nor should it be. The Constitutional Framers vested the power of the purse in this legislative branch—the people's branch—and we have a firm grasp on the strings. I only hope that Congress never sees fit to loosen that hold and give away what is the greatest single power afforded to this branch of government by the Framers, in their great wisdom.

Mr. President, before closing, I want to thank the members of my committee staff who have been so earnest and dedicated in their efforts this year. My staff director, Terry Sauvain, and my deputy staff director, Charles Kieffer, have done a remarkable job on these bills. They stayed at night. They stayed into the wee hours of the morning. They worked on the nuts and bolts. They worked and they grappled with problems and answered questions from disgruntled Senators and people on the outside and people on the inside. I don't see how they have been able to maintain their sanity. I congratulate them for the good work they did. This is their first year in these positions, and they have certainly set a high standard for the years to come.

I also want to thank Edie Stanley and Kate Eltrich for their assistance, as well as the staffs of our 13 subcommittees. These appropriations bills are not written by magic. Rather they are the product of hard work, determination, and an understanding of the intricacies of each piece of legislation. The Senate is blessed to have such a fine group of men and women dedicated to the service of the nation.

I also want to thank members of my personal staff who have been invaluable to me. My Chief of Staff, Barbara Videnieks, may Administrative Assistant, Ann Adler, my Legislative Director, Jane Mellow, my Press Secretary, Tom Gavin, my legislative assistant, David McMaster, and the entire Byrd team have done an outstanding job on these bills.

Mr. President, the fiscal year 2002 Department of Defense appropriations bill is a good bill. I urge all Senators to support it.

Mr. President, I ask unanimous consent to have printed in the RECORD a document entitled ''Compromise on $20 Billion Defense/New York/Homeland Defense Funding.''

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMPROMISE ON $20 BILLION DEFENSE/NEW YORK/HOMELAND DEFENSE FUNDING

The amendment allocates $20 billion as follows:

Defense: $3.5 billion ($3.8 billion below President).

New York/NJ/DC/MD/VA: 8.3 billion ($1.9 billion above the President).

Homeland Defense: 8.3 billion ($3.9 billion above the President).

UI/COBRA: 0.0 billion ($2 billion below President).

When combined with the $20 billion allocated by the President, the amendment results in the following allocation of the $40 billion approved in the September 18th supplemental (P.L. 107–38):

Defense: $17.5 billion ($3.5 billion below the President).

New York/NJ/DC/MD/VA: 11.2 billion ($1.8 billion above the President).

Homeland Defense: 9.8 billion ($4.0 billion above the President).

Foreign Aid allocated by President: 1.5 billion (same as the President).

UI/COBRA: 0.0 billion ($2 billion below the President—in stimulus).

Unallocated: 0.0 billion ($0.3 billion below the President).

Highlights of the $20 billion:

New York and other communities directly impacted by September 11th attacks ($8.2 billion): Examples follow:

FEMA Disaster Relief, which funds debris removal at the World Trade Center site, repair of public infrastructure such as the damaged subway, the damaged PATH commuter train, all government offices and provides assistance to individuals for housing, burial expenses, and relocation assistance, receives $4.35 billion.

Community Development Block Grants—$2 billion to help New York restore their economy.

Amtrak Security—$100 million for security in Amtrak tunnels.

Mass Transit Security—funding of $105 million for improving security in the New York and New Jersey subways.

New York/New Jersey Ferry Improvements—$100 million for critical expansion of interstate ferry service between New York and New Jersey. Prior to the September 11th attacks, 67,000 daily commuters used the PATH transit service that was destroyed.

Hospital Reimbursement—$140 million to reimburse the hospitals of New York that provided critical care on September 11th and the weeks and months that followed.

Workers Compensation/Job Training—$175 million that would help New York process workers compensation claims for the victims of the September 11th attacks. $59 million is provided for job training, environmental health and other programs.

Federal Facilities—$325 million for the costs of keeping Federal agencies operating that were in or near the World Trade Center, such as the Social Security Administration, the Occupational Safety and Health Administration, the Pension and Welfare Benefits Administration, the Commodity Futures and Trading Commission, the Secret Service, the Bureau of Alcohol, Tobacco and Firearms, the Securities and Exchange Commission, the Internal Revenue Service, the U.S. Marshals Service, the EEOC, the General Services Administration, the Food and Drug Administration, and the National Labor Relations Board.

Emergency Highway repairs—$85 million for damaged roads in New York City, including $10 million in FEMA for local roads.

Mental Health Service for Children—$10 million that would help New York schools provide mental health services to the children of the victims of the World Trade Center bombing.

Law enforcement reimbursements—$229 million for New York ($71.8 million), New Jersey ($50.7 million), Maryland ($39 million) and Virginia ($62.5 million) and Pennsylvania ($5 million) to improve counter terrorism capacity of law enforcement and fire personnel for States directly impacted by the attacks on September 11th. $68 million is provided for the Crime Victims Fund.

District of Columbia—$200 million for the District and for the Washington Metro for improved security.

Small Business Disaster Loans—$150 million.

National Monuments Security—$80 million for improved security at national parks and monuments such as the Statue of Liberty and the Washington Monument, the Smithsonian, the Kennedy Center and other facilities.

Department of Defense—$3.5 billion, including funding to repair the Pentagon.

Homeland Defense ($8.3 billion):

Examples follow:

Bioterrorism/Food Safety $3.0 billion, including $479 million for food security:

Provides $1.0 billion for upgrading our state and local public health and hospital infrastructure.

Provides $156 million for CDC capacity improvements and disaster response medical systems at HHS.

Provices $244 million for security improvements and research at the CDC and NIH and for mental health services.

Provides $593 million for the National Pharmaceutical Stockpile.

Provides $512 million to contract for smallpox vaccine to protect all Americans.

USDA Office of the Secretary: $81 million for enhanced facility security and operational security at USDA locations.

Agricultural Research Service: $40 million for enhanced facility security and for research in the areas of food safety and bioterrorism.

Agricultural Research Service Buildings and Facilities: $73 million for facility enhancements at Plum Island, NY, and Ames, IA, which includes funding necessary to complete construction on a bio-containment facility at the National Animal Disease Laboratory at Ames, IA.

Animal and Plant Health Inspection Service: $119 million for enhanced facility security, for support of border inspections, for pest detection activities, and for other areas related to bio-security and for relocation of a facility at the National Animal Disease Laboratory.

Food Safety Inspection Service: $15 million for enhanced operational security and for implementation of the Food Safety Bio-Terrorism Protection Program.

Food and Drug Administration: $151 million for food safety and counter-bioterrorism, including support of additional food safety inspections; expedited review of drugs, vaccines, and diagnostic tests; and enhanced physical and operational security.

State and Local Law Enforcement—$400 million.

FEMA firefighting—$210 million to improve State and local government capacity to respond to terrorist attacks.

Postal Service—$500 million to provide equipment to cope with biological and chemical threats such as anthrax and to improve security for Postal workers.

Federal Antiterrorism Law Enforcement (excluding amounts for New York)—$1.7 billion.

$745 million for the FBI.

$19 million for the U.S. Marshals.

$78 million for Cyber security.

$31 million for Federal Law Enforcement Training Center for training of new law enforcement personnel.

$16 million for the Bureau of Alcohol, Tobacco and Firearms.

$60 million for overtime and expanded aviation and border support for Customs.

$73 million for the Secret Service.

$209 million for increased Coast Guard surveillance.

$95 million for Federal courts security.

$70 million for Justice Department Legal Activities.

$109 million for EPA for anthrax cleanup costs and drinking water vulnerability assessments.

$66 million for EPA for bioterrorism response teams and EPA laboratory security.

$25 million for the FEMA Office of National Preparedness.

$30 million for the IRS.

$27 million for Olympic security.

Airport/Transit Security—$0.6 billion, including:

$175 million for Airport Improvement Grants.

$308 million for FAA for cockpit security, sky marshals and explosives detection equipment.

$50 million for FAA research to expedite deployment of new aviation security technologies.

$18 million for transit security.

$50 million for Essential Air Service.

Port Security improvements—$209 million, including $93 million for DOT and $116 million for Customs.

Nuclear Power Plant/Lab/Federal Facility Improvements—$0.8 billion.

$143 million for Energy for enhanced security at U.S. nuclear weapons plants and laboratories.

$139 million for the Corps of Engineers to provide enhanced security at over 300 critical dams, drinking water reservoirs and navigation facilities.

$30 million for the Bureau of Reclamation for similar purposes.

$36 million for the Nuclear Regulatory Commission to enhance security at commercial nuclear reactors.

$50 million for security at the White House.

$26 million for GSA and the Archives to improve federal building security.

$109 million for NASA for security upgrades at the Kennedy, Johnson and other space centers.

$256 million for improved security for the Legislative Branch.

Nuclear Non-proliferation—$226 million for the safeguarding and acquisition of Russian and former Soviet Union missile nuclear materials and to help transition and retrain Russian nuclear scientists.

Border Security—$0.7 billion.

$135 million for Customs for increased inspectors on the border and for construction of border facilities, with emphasis on the northern border.

$549 million for the Immigration and Naturalization Service.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. First, let me commend the Senator from West Virginia. Over the years, I have seen him accomplish many feats. None would be more outstanding than what he has done on homeland security for the City of New York. Like Horatio at the bridge, he stood there against all forces, particularly with respect to the executive branch, and otherwise, and made sure we at least got some semblance of homeland security started. It is on account of Senator BYRD of West Virginia.

Mr. BYRD. Mr. President, I thank the Senator for his kind words. I want to say this: If I were out in the streets of a big city and, for some reason, got into a street brawl, I would want Senator HOLLINGS with me. If that ever happened to me, I would say: Senator HOLLINGS, where is he? He is the man I want with me in a tough situation.

Mr. HOLLINGS. And if I were lost on a lonely, dusty road amongst the hills, I would want Senator BYRD with me.

PORT AND MARITIME SECURITY ACT OF 2001

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, under the unanimous consent agreement, can we turn to S. 1214 and ask the clerk to report?

The PRESIDING OFFICER. The clerk will state the bill by title.

A bill (S. 1214) to amend the Merchant Marine Act of 1936 to establish programs to ensure greater security for U.S. Seaports, and for other purposes.

The PRESIDING OFFICER. Under the previous order, the Senator from South Carolina is recognized for 5 minutes.

Mr. HOLLINGS. In my 5 minutes, I thank the distinguished Senator from Arizona, my ranking member—this is really a bipartisan initiative—Senator GRAHAM of Florida who has been a leader in this regard and also Senator HUTCHISON of Texas.

I also thank the distinguished director of the Commerce, Science, and Transportation Committee, Mr. Kevin Kayes; Mr. Carl Bentzel, the expert on port security who has been working on this over the past several years; and Mr. Matthew Morrissey.

We actually reported the bill before September 11 of this year. We have been working diligently to take care of the concerns on both sides of the aisle and both sides of the Capitol. We think this measure can pass expeditiously, as soon as the House returns.

Following the terrorist attacks of Sept. 11, we have worked hard to improve the security of America's transportation system, starting with the airline security bill just signed into law. However, protecting America from terrorist threats is only as effective as the weakest line of defense. That means every mode of transportation must be secured, including maritime transportation.

The United States has more than 1,000 harbor channels and 25,000 miles of inland, intracoastal, and coastal waterways. Those waterways serve 361 ports and have more than 3,700 terminals handling passengers and cargo. The U.S. marine transportation system each year moves more than 2 billion tons of domestic and international freight, imports 3 billion tons of oil, transports 134 million passengers by ferry, and hosts more than 7 million cruise ship passengers. Of the more than 2 billion tons of freight, the majority of cargo is shipped in huge containers from ships directly onto trucks and railcars that immediately head onto our highways and rail systems. However less than 2 percent of those containers are ever checked by Customs or law enforcement officials. The volume of maritime trade is expected to more than double by the year 2020, making maritime security even more important for the future. This is a gaping hole in our national security that must be fixed—and it must be fixed before enemies of the United States try to exploit our weakness.

Before discussing the specifics of our bill, I want to read an excerpt from a chilling story published October 8 in the The Times of London:

Intelligence agencies across the world are examining Osama bin Laden's multimillion [dollar] shipping interests. He maintains a secret fleet, under a variety of flags of convenience, allowing him to hide his ownership and transport goods, arms, drugs, and recruits with little official scrutiny.

Three years ago, nobody paid much attention to a crew unloading cargo from a rusting freighter tied up on the quayside in Mombasa, Kenya. The freighter was part of Osama bin Laden's merchant fleet and the crew were delivering supplies for the team of suicide bombers who weeks later would blow up the U.S. embassies in Kenya and Tanzania. Bin Laden's covert shipping interests were revealed at the trial of the bombers, but until now security services have been slow to track down how many vessels he operates.

Lloyd's List International reported that a NATO country's intelligence service has identified more than 20 merchant vessels believed to be linked to Osama bin Laden. Those vessels are now subject to seizure in ports all over the world. Some of the vessels are thought to be owned outright by bin Laden's business interests, while others are on long-term charter.

Several weeks ago, a suspected member of the Al Qaeda terrorist network

was arrested in Italy after he tried to stow-away in a shipping container heading to Toronto. The container was furnished with a bed, a toilet, and its own power source to operate the heater and recharge batteries. According to the Toronto Sun, the man also had a global satellite telephone, a laptop computer, an airline mechanics certificate, and security passes for airports in Canada, Thailand and Egypt.

These two stories really bring home this issue of seaport security. Except for those of us who live in port cities like Charleston, Americans often do not think about their ports—the ports that load industrial and consumer goods onto trucks and railroad cars heading directly to their hometowns. Therefore, security provided through our seaports ultimately affects landlocked communities in the heartland of the United States. Of the cargo imported and exported into the United States, 95 percent arrives through our seaports; the balance is shipped through land and air borders. The potential damage and destruction that can be accomplished through security holes at our seaports potentially exceeds any other mode of transportation. And yet we have failed to make seaport security a priority.

Many of our busiest seaports are not only near large cities, they are in the core of cities like Charleston, Boston, Miami, and Seattle. These seaports have been the historic hubs of economic growth, and, in some cases, they have existed for close to four centuries. By comparison, our rail infrastructure is 150 years old and most of our aviation infrastructure is less than 60 years old. The port areas in many cities have become increasingly attractive places to live because many people want a view of the water, and to live near the coast. So we are facing a major problem: the number of people who want to live close to the waterfront is growing rapidly, but the open nature of our seaports exposes them to risks associated with maritime trade, including the transport of hazardous materials.

Most Americans would be surprised to discover there is no unified federal plan for overseeing the security of the international borders at our seaports. And that's what seaports are: international borders that must be protected as well as our land borders with Canada and Mexico. Yet we have failed to make them secure. The U.S. Coast Guard and Customs Service are doing an outstanding job, but they are outgunned. In the year 2000, we imported 5.5 million trailer truckloads of cargo. Due to that volume, seaports, according to the Customs Service, are only able to inspect between 1 to 2 percent of containers. In other words, potential terrorists and drug smugglers have a 98 percent chance of randomly importing illegal and dangerous materials.

When traveling by airplane, we walk through metal detectors, our luggage is X-rayed, and Customs officials may interview us and check our bags. The inspection rate is 100 percent. At our land border crossings, every single car and truck driver is stopped and interviewed, or at least reviewed by the federal government. Again, the inspection rate is 100 percent. However, at a U.S. seaport, a person has a 98 percent chance of importing a 48–foot truckload of cargo with no inspection at all. One marine container can carry more heroin than is used in the United States in one year. Some of these containers can carry as much as 30 tons, or 60,000 pounds of cargo. A medium sized tanker can carry as much as 32 million gallons of petroleum or hazardous materials. Nearly one-quarter of all hazardous materials are moved via water, most of it in bulk form via huge tankers. These shipments of oil or hazardous materials—most of them carried by foreign vessels—are especially dangerous targets for terrorists. Following the terrorist attacks of September 11, we must take action to better secure our maritime borders.

The Congress recently approved a new law that spends $3.2 billion to improve security at our airports. The highway reauthorization bill—TEA–21 passed in 1998—directed $140 million a year for five years to improve roads and security infrastructure at our land borders. We annually fund the Border Patrol to guard against illegal entry at our land borders. At U.S. seaports, the federal government provides officers from the U.S. Coast Guard, U.S. Customs Service, and the Immigration and Naturalization Service—but the federal government invests nothing in security infrastructure at our seaports. We leave that up to the state-controlled port authorities and private marine terminal operators. Thus, we have essentially abrogated the federal responsibility of our international seaport borders to states and the private sector.

Like airline security, seaport and international border security is one of the prime responsibilities of the federal government. We must meet the challenge head-on with enough resources to address these serious issues of national security, and to help our partners at the state and local levels protect their own communities. While these security holes at our seaports may be less obvious to the public, they do exist. Because of the magnitudes of the cargoes, the proximity of cargo delivery to large populations, and the transportability that water confers to certain hazardous materials or oil, seaports lacking adequate security are more vulnerable to attack and sabotage than our airports or land borders.

A couple years ago, Senator BOB GRAHAM convinced President Clinton to appoint a commission to look at seaport security. At the time, the main focus of port security was stopping illegal drugs, the smuggling of people, and cargo theft. While those problems still exist, the new—and very real—threat of terrorism strikes right at the heart of our national defense.

The Interagency Commission on Crime and Security at U.S. Seaports issued a report in September 2000 that said security at U.S. seaports ''ranges from poor to fair.'' Let me repeat that: 17 federal agencies reviewed our port security system and found that it is in poor shape.

According to the Commission:

> Control of access to the seaport or sensitive areas within the seaports is often lacking. Practices to restrict or control the access of vehicles to vessels, cargo receipt and delivery operations, and passenger processing operations at seaports are either not present or not consistently enforced, increasing the risk that violators could quickly remove cargo or contraband. Many ports do not have identification cards issued to personnel to restrict access to vehicles, cargo receipt and delivery operations, and passenger processing operations.
>
> At many seaports, the carrying of firearms is not restricted, and thus internal conspirators and other criminals are allowed armed access to cargo vessels and cruise line terminals. In addition, many seaports rely on private security personnel who lack the crime prevention and law enforcement training and capability of regular police officers.

The report also found that port-related businesses did not know where to report cargo theft and other crimes, and that federal, state and local law enforcement agencies responsible for a port's security rarely meet to coordinate their work.

That is what our legislation does—it creates mechanisms to integrate all these different security agencies and their security efforts at our seaports and the railways and highways that converge at our seaports. Our seaport security bill also directly funds more Customs officers, more screening equipment, and the building of important security infrastructure.

Each agency is good at what they do individually. But they will be even stronger working together, sharing information and tactics, and coordinating security coverage at our seaports. More teamwork between these federal, state and local agencies—along with our security partners in the private sector—will produce a more secure seaport environment that is stronger than the sum of each agency's individual efforts.

S. 1214, the Port and Maritime Security Act of 2001, requires the Secretary of Transportation to chair a National Maritime Security Advisory Committee. The Secretary is required to request participation of the U.S. Customs Service and invite the participation of other federal agencies with an interest in crime or threats of terrorism at U.S. seaports. The bill also authorizes the establishment of subcommittees, including a subcommittee comprised of Federal, State, and local government law enforcement agencies to address port security issues, and law enforcement-sensitive matters.

The Committee is required to advise on long-term solutions for maritime and port security; coordination of information-sharing and operations

among federal, state and local governments, and area and local port and harbor security committees; conditions for maritime security loan guarantees and grants; and the development of a National Maritime Security Plan. Given the varied nature and geographical structure of our port system, it will be important to consider private sector input. A one-size-fits-all approach will not work because we are looking at a wide variety of waterside facilities and maritime transportation-related infrastructure.

The bill will mandate, for the first time ever, that all ports and waterfront facilities have a comprehensive security plan approved by the Secretary of Transportation. An element of port security often overlooked are the intermodal means for transporting cargo from the ships: railroads, highways, and barges. The bill requires that all the modes of transportation converging at the port be covered by a port's security plan. To make the entire waterfront environment more secure, any facility that might pose a threat to the public must tender security plans to the Coast Guard for review and approval.

However, we will do more than just mandate security plans. We will have security experts to assess waterfront and port security, and provide those assessments to the individuals in charge of making security plans. Assessment information will be invaluable in helping the industry use the best information in order to complete effective security plans. The bill requires the Secretary to incorporate existing programs and practices when reviewing and approving security plans. The Department of Transportation will have to take into account the different security practices of our different ports. The Department must recognize and harmonize existing security practices to avoid duplicating costs. However, recognition of existing practices should not require the Department to endorse or approve faulty security.

At the seaport level, the bill will establish local port security committees at each U.S. seaport. The section would require membership of these committees to include representatives of the port authority, labor organizations, the private sector, and Federal, State, and local governments and law enforcement. The Committees would be chaired by the Coast Guard Captain of the Port, and meet 4 times per year. The Committees would be responsible for coordinating planning and other port security activities; making recommendations for the port security evaluations; annually reviewing security plans; and conducting a field security exercise at least once every 3 years. These committees will play a vital role—day to day and month to month—coordinating the actions of law enforcement and the private sector in combating threats of terrorism and crime.

The bill requires the Secretary of Transportation, in coordination with the Director of the FBI, ensure that all area maritime counter-terrorism and incident contingency plans are reviewed, revised, and updated no less than once every three years. The Secretary shall ensure that local port security committees conduct annual simulation exercises for all such plans, and actual practice drills at least once every three years. The plans should be comprehensive and address terrorist threats to waterfront facilities and adjacent areas, and also cover elements of prevention and protection as well as response. I would hope that the Secretary would take steps to ensure that area maritime counter-terrorism and incident contingency plans are coordinated with security plans.

The bill creates standards and procedures for training and certifying maritime security professionals. The bill requires the Secretary of Transportation and the Federal Law Enforcement Training Center, ''FLETC,'' to establish a Maritime Security Institute for training security personnel, in accordance with internationally recognized law enforcement standards. I look forward to working with the Department of Transportation and the FLETC to establish an Institute to strengthen and professionalize maritime law enforcement and security forces. I have worked with FLETC to establish a facility in Charleston, South Carolina to train Border Patrol personnel. I also look forward to working with the Secretary and FLETC to establish the Maritime Law Institute.

The legislation requires the Secretary of Agriculture, Secretary of the Treasury, Secretary of Transportation, and the Attorney General to work together to establish shared dockside inspection facilities at seaports for Federal and State agencies. At some U.S. ports, federal investigators and inspectors do not have any space available to conduct inspections, and they have to route the cargo to other places before inspection. In other words, it would be similar to Customs officials at JFK airport asking arriving international passengers to take a cab to the Customs headquarters downtown in order to have their bags inspected. That is just not right.

To improve seaport security tactics, the bill directs the Secretary of Transportation to immediately establish domestic maritime safety and security teams for the purpose of responding to terrorist activity, criminal activity, or other threats to U.S. ports, especially in strategically important ports. The units shall consist of personnel trained in anti-terrorism, drug interdiction, navigation assistance, and facilitating responses to security threats. I want to thank Senator EDWARDS for his work on this security team initiative. I was pleased that we were able to include in the bill two other amendments authored by Senator EDWARDS: one promotes research and development funds for non-intrusive scanning technology; the second establishes standards for locking marine containers. These amendments will contribute greatly to increasing security at our seaports.

Ports, terminals, waterfront facilities, and adjacent facilities will be required to immediately implement interim security measures, including securing their perimeters. The Secretary of Transportation will then prescribe regulations for the aforementioned parties to follow when designing the required maritime security plans. An important point is that the regulations will require ports to control and limit personnel access to security-sensitive areas. Ports also will be required to limit cars and trucks in security-sensitive areas, restrict firearms and other weapons, coordinate local and private law enforcement, and develop an evacuation plan. While the bill requires security programs to be individually tailored due to the varied nature of different ports, the Department of Transportation regulations will still require certain elements to be incorporated. In implementing new regulations, I would hope that the Department would review the feasibility of establishing a nationwide credentialing process. If we can harmonize identification procedures, we can eliminate duplication and reduce costs.

The Secretary of Transportation will write regulations to designate controlled access areas in the Maritime Facility Security Plan for each waterfront facility and other covered entities, and require ports to limit access to security-sensitive information, such as passenger and cargo manifests. The regulations may require physical searches of persons entering controlled access areas or exiting such areas, security escorts, and employment history and criminal background checks for individuals with unrestricted access to controlled areas or sensitive information. An individual will be eligible to work in such positions if they meet the criteria established by the Secretary, and a background check does not reveal a felony conviction within the previous 7 years, or release from prison during the previous 5 years. An individual that otherwise may have been disqualified from a security-sensitive position may still be hired if the employer establishes alternate security arrangements acceptable to the Secretary. The bill would allow the Secretary to access FBI, fingerprint, and other crime data bases to conduct the background investigations, and transmit the results to port authorities or other covered entities. The bill also would require the Secretary and the Attorney General to establish and collect reasonable fees to pay expenses incurred for the background checks.

The intent of conducting criminal background checks of port employees, employers and other maritime transportation-related employees or employers, is not to upset any of the existing work relationships or dynamics. Rather the background checks are intended to identify legitimate criminal

and national security risks. The Secretary of Transportation will write regulations outlining how background checks should be conducted, and will be responsible for conducting the background checks. In the aviation security bill, we created a Deputy Secretary for Transportation Security. The person in that position should be responsible for implementing the national security check program.

The Secretary also will determine which areas are controlled-access areas. Clearly, not all areas in ports are security risks areas justifying designation as such. I would suggest that controlled access areas include areas where ships tie up carrying combustibles, or storage areas for combustibles or explosives, areas where security admit credentialed persons into the port or terminal areas, or areas in the port or terminal where containers are opened or exposed. However, the Secretary should determine where risk or threat resides, and create a way to check the backgrounds of individuals who pose a national security or criminal threat by virtue of their presence in areas requiring a greater degree of control. Individuals subject to potential disqualification from positions with access to ocean manifests or segregated controlled access areas must be given full and adequate due process, and collected information must be protected from disclosure and only revealed to the extent that it is pertinent to security considerations.

The bill would give the Secretary of Transportation additional authority to address security risks arising from foreign ports, such as enhanced enforcement against vessels arriving from such port, travel advisories for passengers, suspension of the right of a United States vessel to enter such port, and authority to assist foreign port authorities to maintain an appropriate level of security. The Secretary of Transportation would be authorized to work through the Secretary of State to notify foreign countries of security problems with their ports, and to publish a list of ports with insufficient security that would be posted prominently at U.S. ports, on passenger tickets, and as a travel advisory by the State Department. The Secretary of Transportation, after consultation with the Secretary of the Treasury, may prohibit or prescribe conditions of port entry into the U.S. for any vessel arriving from a port listed as not secure. In particular, I would like to commend both Senator KERRY, who chairs the Coast Guard Subcommittee, and Senator BREAUX, who chairs the Surface Transportation and Merchant Marine Subcommittee, for their efforts on this front.

Senators KERRY and BREAUX authored another critical section of this bill: the Sea Marshal program. The bill would authorize the Coast Guard to board vessels in order to deter, prevent, or respond to acts of terrorism or otherwise provide for the safety and security of the port and maritime environment. We would authorize $13 million over five years for this new Coast Guard enforcement. The provision in question also requires the Secretary to evaluate the potential of using licensed U.S. merchant marine personnel to supplement the law enforcement efforts of the U.S. Coast Guard.

The bill would authorize the President, without prior notice or a hearing, to suspend the right of any vessel or person of the United States to enter from a foreign port or depart to a foreign port in which a condition exists that threatens the safety or security of passengers, vessels, or crew traveling to that port, or if a public interest requires the suspension of trade between the United States and that port. The bill would authorize the imposition of civil penalties of up to $50,000 for violating the law.

S. 1214 will require that we know more in advance about the cargo and crew members coming into the United States. The more we know about a ship's cargo, and where it originated, the better our Customs agents and other law enforcement officers can target the most suspicious containers and passengers. Even with more screening equipment, we are still going to have an inadequate number of inspections. So targeting the highest risk cargo will be crucial.

The bill requires ships to electronically send their cargo manifests to the port before gaining clearance to enter. While denying vessel clearance to land is within the authority of Customs, I would urge that it be used only in the most extreme cases, and that enforcement alternatives for handling offending cargo interests be pursued in order not to disrupt all the other legal cargoes on-board a vessel. Unloading cargo will be prohibited if it is not properly documented. Advanced import information is regularly transmitted by nearly 90 percent of the ocean shippers. But for the shippers who are not transmitting that information, we will require it. By giving Customs advance cargo information, we can better screen imported cargo.

Specifically, the legislation requires carriers, including non-vessel-owning common carriers, to provide by electronic transmission, cargo manifest information in advance of port entry or clearance. However, the Secretary of Treasury may exclude classes of vessels for which the Secretary concludes these manifest requirements are not necessary, and in some cases such as trucking, where the electronic transmission may not be possible. Customs should use its authority to require electronic transmission, but recognize, because of the nature of certain categories of transport, that it may not be possible to conduct electronic transmissions in every situation. The bill also outlines the cargo and route information that must be transmitted to Customs.

The bill prohibits the export of cargo unless properly documented, and no marine terminal operator may load, or cause to be loaded, any cargo that is not documented. The bill requires the U.S. Customs Service to be notified of improperly documented cargo that has remained in a marine terminal for more than 48 hours, and authorizes that cargo to be searched, seized, and forfeited. Undocumented cargo should not sit in port areas for extended periods of time. Specifically, shippers who file Shippers Export Declarations (SED) by paper shall be required to provide a copy of the SED to the carrier; shippers who file their SEDs electronically shall be required to provide the carrier with a complete master bill of lading or equivalent shipping instructions, including the Automated Export System number. While it is important that we obtain certain crucial pieces of information about cargo, Customs should recognize that certain elements of cargo information, such as weight discrepancies, may fluctuate and shippers should not be held responsible for 100 percent accuracy. The bill creates civil penalties for violating documentation requirements.

An important part of the legislation creates new requirements for the documentation and electronic transmission of passenger information in advance of entry or clearance into a port. It is imperative that the United States have advanced information on foreign passengers and crew members to ensure that we are not admitting security risks. Evidence indicates that materials used in terrorist attacks in Kenya and Tanzania were shipped by vessels owned and operated by Osama bin Laden. More information—and more credible information—about foreign entrants will be vital given the volume of vessels, cargo and crew members entering into U.S. waters. In establishing such regulations, Customs should work with all federal agencies to harmonize data reporting requirements to ensure that entrants into the United States only need to file one form. Policies such as INS pre-qualification of crew members between specific pre-approved train routes between the United States and Canada should be allowed to continue. Such policies ensure advance compliance, and stimulate regular cross-border operation, while not jeopardizing security.

I am also pleased that we were able to accept an amendment authored by Senator CLELAND to allow the Commissioner of Customs to develop a pilot program to pre-clear cargo coming into the United States if it is determined that such program would improve the security and safety of U.S. ports. However, before implementation of such a program, Customs must determine that it would not compromise existing procedures for ensuring the safety of these ports and the United States. The pilot program should be used to determine whether we can successfully shift the evaluation of cargo and cargo security to points outside the United States, and also ensure that the subsequent delivery of cargo is accomplished in a

way that protects against tampering and maintains the integrity of the cargo seal.

The bill directs the Customs Service to improve reporting of imports, including consigned items and goods, of in-bond goods arriving at U.S. seaports. Current policies can sometimes allow goods to travel into the United States, and travel for, in some instances, up to 37 days, without recording formal entry. The bill will require the reporting of in-bond movements prior to arrival to ensure advance filing of information identifying the cosignor, consignee, country of origin, and the 6–digit harmonized tariff code. The new information must be electronically filed by the importer of record, or its agent. This information will better enable Customs to track cargo and to intercept any suspicious cargoes in a more timely fashion. This reporting is not intended to reflect formal entry, but will allow Customs to use their targeting system on in-bond cargoes, where current policies make it difficult to enter relevant targeting data.

Within 6 months of the bill's enactment, the bill would require a report that evaluates the feasibility of establishing a general database to collect information about the movements of vessels, cargo, and maritime passengers in order to identify criminal threats, national and economic security threats, and threats of terrorism. The Secretary would submit a report of the findings to Congress. Among several requirements, the report must estimate potential costs and benefits of using public and private databases to collect and analyze information, including the feasibility of establishing a Joint Inter-Agency Task Force on Maritime Intelligence. Additional information, and coordination of information will be crucial in allowing law enforcement to evaluate threats in advance of U.S. arrival, ultimately, policies allowing us to identify risks abroad will help us avoid being forced to rely on policies of deterrence and prevention on U.S. soil.

Perhaps most importantly, we need to give seaport authorities the resources to get the job done. It would be great if we could simply declare our ports to be more secure. However, it takes money to make sure the international borders at our seaports are fully staffed with Customs, law enforcement, and Immigration personnel. It takes money to make sure they have modern security equipment, including the latest scanners to check cargo for the most dangerous materials. And it takes money to build the physical infrastructure of a secure port.

Our bill will provide $219 million over four years directly to these important national security functions. Cargo ships currently pay a tax on the gross registered tonnage the ship can carry. That tax rate, in current law, is scheduled to decline beginning in 2003. Our bill will simply extend the existing tax rate—which has been imposed since 1986—until 2006. All those revenues will be directed to help beef up security. These tax revenues will have to be appropriated, but they can only be spent on the programs authorized by this seaport security bill.

However, the funds provided directly by the tonnage tax extension are insufficient to cover all of the port security needs. So the bill includes additional authorizations of $965.5 million that Congress can appropriate as our colleagues come to realize the important security needs that must be met in the defense of our nation. Absent the realization of these authorized funds, Congress will be imposing an unfunded mandate on states and the private sector to secure our nation's maritime border.

The money will help pay for many of the items previously mentioned, and additionally will be focused on building infrastructure at our seaports, including gates and fencing, security-related lighting systems, remote surveillance systems, concealed video systems, and other security equipment. The bill will directly fund and authorize $390 million in grants to local port security projects. Specifically, the bill amends the Merchant Marine Act of 1936 to provide grants for security projects, of which the federal government will pay up to 75 percent. Projects under $25,000 would not have a matching requirement, and the Secretary may approve federal contributions above 75 percent to a project the Secretary deems to have high merit.

The bill also will fund loan guarantees that, according to regular credit risk premiums for federal loans, could cover as much as $3.3 billion in long term loans to port authorities acting to improve their security infrastructure. The loans could not cover more than 87.5 percent of the actual cost of a security infrastructure project, and can extend for up to 25 years. The loan guarantee mechanism allows the federal government to leverage funds by extending credit to cover loans for security infrastructure, and can help port authorities reduce their capital costs for security infrastructure by amortizing it over time. Ultimately, this policy will help us build an infrastructure at our maritime borders in the most cost-effective way. The bill makes directly available and authorizes $166 million to cover the credit risks of loans extended under this provision.

U.S. Customs officers must be able to screen more than just 2 percent of the cargo coming into our seaports. Investing in new screening technologies will help human screeners inspect more cargo, and detect the most dangerous shipments. To increase the amount of cargo screened, the bill authorizes $145 million for FY02 for additional Customs personnel, and to help Customs update their computer systems consistent with the requirements of this bill. Especially important is that the bill directly funds and authorizes $168 million to purchase non-intrusive screening and detection equipment for the U.S. Customs Service.

While we cannot expect to screen every marine container entering into the United States, we need to provide some expectation of inspection, or create some level of deterrence to dissuade smugglers from using the intermodal system to smuggle cargo. We are so busy investing in a anti-ballistic missile defense system, we fail to see perhaps even a greater threat: a cargo container equipped with a digital global positioning system can be delivered anywhere in the United States for less than $5,000. Why would the enemies of America spend millions on a rocket launcher and go up against the U.S. Air Force and U.S. Navy when they could spend $5,000 to ship a container full of explosives or other dangerous materials that has only a two percent chance of being inspected?

The bill also will authorize $75 million to establish a grant program to fund the development, testing, and transfer of technology to enhance security at U.S. seaports. The screening technology would focus on finding explosives or firearms, weapons of mass destruction, chemical and biological weapons. The grants may not exceed 75 percent of the research program.

This bill is the product of bipartisan compromise. I want to thank the Administration for their efforts to produce this legislation. The Maritime Administration, Coast Guard and Office of the Secretary all played a vital role in helping draft the bill. I had intended to work to include legislation that would increase various maritime criminal statutes. Unfortunately, in the crush of time we were unable to clear these amendments. I think that both Senator MCCAIN and I agree that these amendments are really important to be included in final legislation on seaport security, and I will work with him, and Chairman LEAHY and Ranking Member HATCH of the Judiciary Committee to include provisions updating our maritime criminal laws.

The bill would require the Secretary of Transportation to prepare and publish a National Maritime Transportation Security Plan for prevention and response to maritime crime and terrorism. The plan would include an allocation of duties among federal departments and agencies and among state and local governments and agencies; procedures and techniques for preventing and responding to acts of crime or terrorism; and designation of the federal official who shall be the Federal Maritime Security Coordinator for each area for which an Area Maritime Security Plan is required and prepared. Additionally, the bill would also require the Secretary of Transportation to establish Area Maritime Security Committees comprised of members appointed by the Secretary. Each Area Maritime Security Committee would be required to prepare a maritime security plan, and work with state and local officials to enhance contingency

planning. Each Area Maritime Security Plan must be submitted to the Secretary of Transportation. The plans are required to outline how to respond to an act of maritime crime or terrorism in or near the area, describe the area covered by the plan, and describe in detail how the plan is integrated with other security plans. This requirement is similar to the planning requirements that we mandated in the Oil Pollution Act for oil spill response, and will help ensure that we have local, regional and national level responses to maritime crime and terrorism. The bill would also authorize the Secretary of Transportation to issue regulations establishing requirements for vessel security plans and programs for vessels calling on United States ports, would also authorize the Secretary of Transportation, in consultation with the Attorney General, to require crewmembers aboard vessels calling on the United States ports to carry and present upon demand such identification as the Secretary determines.

The bill would require the Secretary of Transportation and the Secretary of Treasury to establish a joint task force to work with ocean shippers in the development of a system to track data for shipments, containers, and contents. The Secretaries also would work with the National Institute of Standards and Technology to develop enhanced performance standards for inbond seals and locks for use on or in containers used for water-borne cargo shipments.

The bill includes a number of reporting requirements to assess our progress on seaport security. I would like to thank Senator NELSON of Florida for his amendment asking for a Coast Guard and Navy study on the feasibility of creating a Center for Coastal and Maritime Security. We all look forward to the results of this important study.

We have made dramatic improvements to this bill since it was first approved by the Commerce Committee before the terrorist attacks. And I want to thank Senator MCCAIN for working with me to co-sponsor this manager's amendment to the previous version of our seaport security bill, S. 1214. Senator MCCAIN does not have many seaports in Arizona, but he understands that the cargo, materials and people who come through our seaports make their way quickly inland on trains and highways. So even if you are living in the desert, the security of our seaports affects all of us. I also would like to recognize and thank Rob Freeman of Senator MCCAIN's staff, who invested hours of time and effort to finalize this product.

I also must recognize the extraordinary efforts of Senator BOB GRAHAM, who began working to improve port security long ago and put this issue on our radar screen. Senator GRAHAM's home state of Florida has been wrestling with issues of crime, theft and drug smuggling at its seaports for many years. And while the federal government failed to address these problems, the state of Florida invested millions of dollars of its own resources to improve port security, which has helped the communities surrounding those ports. But they will still need much more. The states should not carry the entire burden of protecting the international boarders at our seaports. And yet, the problems had become so severe, that the state of Florida, led in part by BOB GRAHAM, decided it had to act on its own. Senator GRAHAM's leadership was vital as we developed this seaport security bill long before the terrorist attacks of September 11. I would also like to thank the fine work of Senator GRAHAM's staffer, Tandy Barrett, she also worked very hard on this legislation.

The initiatives in S. 1214 can help protect America and its citizens from potential terrorist threats against seaports and intermodal connections throughout the country. These initiatives will not make maritime transportation immune from attack. But this bill takes the necessary preventative steps to better protect the American public. I urge my colleagues to support this legislation that is vital to protecting our national security.

Mr. MCCAIN. Mr. President, once again I thank Chairman HOLLINGS for his efforts to address identified safety and security problems at our Nation's seaports. The legislation before us today is designed to address port security lapses that have been under review by the Senate Committee on Commerce, Science, and Transportation for the past two years. After hearings earlier this year and last year, the Commerce Committee reported out S. 1214 in August. The bill is intended to provide both the guidance and funding needed to improve seaport security. I commend Chairman HOLLINGS' leadership on this very important issue to transportation safety and security.

It is widely reported that transportation systems are the target of 40 percent of terrorist attacks worldwide. Since September 11, we have been working on a bipartisan basis to address the nation's most pressing needs in the wake of the terrorist attacks. The Senate Commerce Committee has been conducting a series of hearings to gain the information we need to help us evaluate potential transportation security risks and determine how best to respond to those potential risks.

While it is impossible to precisely quantify, there is no question that an attack on any one of our nation's 361 seaports would have far-reaching effects. With 95 percent of our Nation's foreign trade moving through our seaports, the impact of such an attack would ripple through our Nation. Businesses nationwide would face problems getting supplies and exporting finished goods. Our entire economy would be impacted.

Both the Hart-Rudman Report on Homeland Security and the Interagency Commission on Crime and Seaport Security found our seaports to be vulnerable to crime and terrorism. While there is no way to make our Nation's seaports completely crime free and impenetrable to terrorist attacks, the bill before us today is a very strong first step in closing the gaps in national security that now exist at our seaports.

I want to point out to my colleagues that the Commerce Committee had acted on S. 1214 prior to the September 11 attacks. As a result of the attacks, members of the committee and others have worked together to further modify the legislation to provide direction and funding to the agencies involved to focus their efforts not only on decreasing crime in our seaports, but to also increase protection against terrorist attacks.

In our efforts to increase our nation's seaport security, we have worked to take into account not only the wide range of threats and crimes surrounding our seaports, but also the unique nature of our ports. As I have said before, a ''one-size-fits-all'' approach will not work. Our ports are complex and diverse in both geography and infrastructure. This is why we have worked to ensure this provides for direct local input into the development of security plans for their ports, as well as for response plans for local responders should an attack occur.

S. 1214 would help address a wide range of security shortcomings at our Nation's seaport that were identified in the Interagency Commission on Crime and Security in U.S. Seaports that was issued September 2000. According to the Commission's report, seaport crime encompasses a broad range of crimes, including the importation of illicit drugs, contraband, and prohibited or restricted merchandise; stowaways and alien smuggling; trade fraud and commercial smuggling; environmental crimes; cargo theft; and the unlawful exportation of controlled commodities and munitions, stolen property, and drug proceeds. These crimes are violations of federal law, and therefore, the primary responsibility for enforcement falls to Federal agencies. This bill would give those agencies the authority and funding needed to make up for these shortcomings.

Additionally, the bill would provide much needed improvements in preventing terrorist attacks at our Nation's seaports. While seaports represent an important component of the nation's transportation infrastructure, seaports' level of vulnerability to attack is high, and such an attack, as I just mentioned, has the potential to cause significant damage. The commission found little control over the access of vehicles and personnel to vessels, cargo receipt and delivery operations, and passenger processing operations. The main problem they were able to identify was the lack of a generally accepted standard for physical, procedural, and personnel security at

seaports that left seaports wide open for attack. This bill will allow the Department of Transportation, along with Federal, state and local law enforcement to take actions to close the security holes at ports nationwide.

The bill would authorize $1.18 billion for seaport safety and security. The bill would require, for the first time ever, the Department of Transportation to assess the security status of U.S. seaports and require each port and related facility to submit security plans for review and approval. The bill would also improve advance reporting requirements for entry into the United States, provide more funding for screening equipment, facilitate law enforcement coordination at U.S. seaports, and authorize grants and loan guarantees to seaports and marine terminal operators to help finance the purchase of security equipment and defray the costs of security infrastructure.

I want to mention that while the Congress has already worked to approve aviation security legislation, and we are now moving forward on port security, both Chairman HOLLINGS and I remain committed to continuing our agenda during the next session to address transportation security issues in all modes of transportation, including railroads and buses.

I urge my colleagues swift approval of this critical legislation.

Mr. KERRY. Mr. President, allow me to congratulate our distinguished chairman of the Commerce Committee, Senator HOLLINGS, for his outstanding work in putting together S. 1214, The Maritime and Port Security Improvement Act. I also wish to congratulate Senators GRAHAM and MCCAIN for all of their hard work in moving this very important legislation that is crucial to homeland defense.

I also wish to recognize Carl Bentzel of the Commerce Committee for his years of hard work in putting this legislation together.

I thank Senator HOLLINGS for including several provisions from S. 1589, the Port Threat and Security Act of 2001, in the final version of his bill. If I may, I would like to discuss the provisions from S. 1589 that were included in the final version of S. 1214.

Senator BREAUX and I recently held oversight hearings before our respective Subcommittees on the Coast Guard and its role in improving maritime security after the terrible attacks of September 11. As Senators HOLLINGS and BREAUX well know, even before September 11 our maritime and port security was in sorry shape. However, the attacks on New York and Washington made it clear we need to go farther afield to guard against terrorism and other crimes.

We need to improve our base of information to identify bad actors throughout the maritime realm. A provision of the bill would help us identify those nations whose vessels and vessel registration procedures pose potential threats to our national security. It would require the Secretaries of Transportation and State to prepare an annual report for the Congress that would list those nations whose vessels the Coast Guard has found would pose a risk to our ports, or that have presented our government with false, partial, or fraudulent information concerning cargo manifests, crew identity, or registration of the vessel. In addition the report would identify nations that do not exercise adequate control over their vessel registration and ownership procedures, particularly with respect to security issues. We need hard information like this if we are to force ''flag of convenience'' nations from providing cover to criminals and terrorists.

This is very important as Osama bin Laden has used flags of convenience to hide his ownership in various international shipping interests. In 1998 one of bin Laden's cargo freighters unloaded supplies in Kenya for the suicide bombers who later destroyed the embassies in Kenya and Tanzania. To that end, the bill requires the Administration to report on actions they have taken, or would recommend, to close these loopholes and improve transparency and registration procedures, either through domestic or international action—including action at the International Maritime Organization.

This legislation would also establish a national Sea Marshal program to protect our ports from the potential use of vessels as weapons of terror. Sea Marshals have recently been used in San Francisco and Los Angeles, and is supported strongly by the maritime pilots who, like airline pilots, are on the front lines in bringing vessels into U.S. ports. Sea Marshals would be used in ports that handle materials that are hazardous or flammable in quantities that make them potential targets of attack. The Coast Guard has taken a number of steps including using armed Coast Guard personnel to escort a Liquid Natural Gas, LNG, tankers into Boston since September 11. Prior to September 11 these vessels were escorted by Coast Guard vessels into the port but no armed guards were present on the vessel. I strongly believe that having armed personnel, such as Sea Marshals, on these high interest vessels is very important and will considerably increase security in our nation's ports, including Boston. The ability of terrorists to board a vessel and cause a deliberate release of LNG or gasoline for that matter is very real. Sea Marshals will make it much more difficult for this to happen. The Secretary of Transportation would be responsible for evaluating the potential use of Federal, State, or local government personnel as well as documented United States Merchant Marine personnel to supplement Coast Guard personnel as Sea Marshals. In addition it is my hope that the Secretary will establish training centers around the country for the Sea Marshal program. I further believe that the U.S. Merchant Marine Academy or any of the State maritime academies would make excellent locations for such training centers.

Lastly, this legislation would allow the President to prohibit any vessel, U.S. flagged or foreign, from transporting passengers or cargo to and from a foreign port that does not have adequate security measures as determined by the Secretary of Transportation. I would like to remind my colleagues that a similar provision exists in the airline industry and I see no reason why the President should not have the power to suspend vessel traffic to and from ports with inadequate security, just like he can now do with international airports. The stakes are simply too high Mr. President, we cannot allow shipping containers to enter this country unless adequate security exists in foreign ports to prevent weapons of mass destruction from being loaded. In addition we should not allow cruise ships carrying U.S. passengers to visit foreign passenger ports that do not have adequate security.

I again wish to congratulate Senator HOLLINGS on this landmark legislation and to thank him for including several provisions from S. 1589. This legislation will ensure that the United States has the tools, the information, and the personnel to guard against waterborne threats to our Nation and our citizens.

Mr. BREAUX. Mr. President, as many of my colleagues might know, my State of Louisiana depends heavily on maritime trade and transportation. After all, Louisiana is darn near close to being underwater, so I always have had an affinity for things that float.

Louisiana is fortunate to have the Mississippi River, along which barges haul grain, wheat and corn from the heartland of America, and coal from Wyoming. Our fortune extends to the fisheries resources of the Gulf of Mexico and our oil and gas resources in the outer continental shelf. We have invested in maritime-related oil and gas technologies to make that exploration as safe as possible. The Port of New Orleans, Lake Charles, and South Louisiana—as well as the other Louisiana ports—are major seaports handling containerized bulk and breakbulk cargoes, as well as passengers. The shipbuilding and repair industries employ thousands, as does the marine construction and dredging industry.

My constituents live close to waterways and the the Gulf of Mexico, and in many cases earn their living from our marine transportation system and its associated industries. So, as the Chairman of the Surface Transportation and Merchant Subcommittee—and as a resident of a State that relies so much on the smooth operation of its waterways and ports—maritime security is one of my primary concerns.

The security of our commercial sea and river ports has rarely been the focus of our national security plans. We have invested millions of dollars to

protect our airports and our land borders, but very little toward making sure that the goods and people arriving at our ports do not jeopardize our security. We know that Osama bin Laden controls a network of ships that hides his ownership. We have to assume that other terrorists and terrorist networks do, too. Therefore it is imperative that we take a more active Federal role in protecting the international boundaries of our seaports.

There is no unified Federal plan for overseeing security at the international borders of our sea ports. Right now the responsibility of building secure sea and river ports rests with states like Louisiana, its port authorities, and the private sector. That was a poor model for national security when we were fighting drugs and international smuggling—and it is totally inadequate after September 11 as we face the threat of terrorism.

That is why we must pass S. 1214, the Port and Maritime Security Act.

For the first time we will require Federal approval of port security programs. These plans will have to meet rigorous standards for security infrastructure, screening equipment, evacuation plans, access controls, and background checks for workers in security-sensitive areas.

We also will require more information about the cargo and passengers arriving at our ports. Right now we do not know enough about the ships and the cargo that call 24 hours a day. We need to change that immediately. We will require that ships electronically transmit their cargo manifests—and if the manifest does not match the cargo, it will not be unloaded. We also will check crew and passenger manifest information to identify people who could pose a security threat. My Subcommittee held a hearing on rail and maritime security in the aftermath of the events of September 11. At that hearing we heard testimony that the Republic of Panama had issued more than one thousand false documents that allow unauthorized personnel to operate on-board their vessels.

More information—and more reliable information—is the key to fighting crime and terrorism. The more we know about these ships, including who owns them and where they have been, the better we can target our law enforcement resources at our ports to check on the most suspicious loads. We need to know who is on these ships, and, eventually, be able to quickly check the names with a computer database of known terrorists or other associates of international criminal organizations.

This bill will require Federal, State and local law enforcement officials to better coordinate the sharing of that information. If a local police officer arrests someone for breaking into a secure area of the port, timely sharing of that information with State and Federal officials might help identify the person as part of a larger international network. It is critical that Customs agents work with the local police, that the State police work with Immigration officials, and that the FBI work with local port authorities. That type of cooperation will dramatically improve port security. Seaports have many different agencies and jurisdictions. So this bill attempts to harmonize their efforts, and will require the Coast Guard, in their role as Captain of the Port, to lead the coordination of law enforcement.

The businesses that operate in seaports also play a crucial security role. They must be brought into a cooperative environment in which a port's law enforcement information is communicated and shared confidentially with privately-hired security officers. In return, private security officers must have a direct line to share information with Federal, State, and local authorities.

To verify that the cargo loads match the manifests, we will need more Customs officials to check that cargo. Incredibly, only 2 percent of the cargo containers arriving at our ports are ever checked by Customs officials. That is a huge hole in our national security system that must be fixed. We seek to close this security hole by directly granting and authorizing more than $168 million for the purchase of non-intrusive screening and detection equipment to be used by U.S. Customs officers. These Customs officers are on the front lines of protecting our country from the importation of illegal and dangerous goods. We must give them the latest technology and the most modern cargo screening equipment available.

We also must help the private sector and the port authorities meet these national security challenges. This problem would be must more simple to solve it the United States had national seaports under the control of the Federal Government—or if the Federal Government directly funded seaport infrastructure. However, that is not the case. Maritime infrastructure is owned by States and by the private sector. But the Federal Government has a role to play here for homeland security. We cannot force States and the private sector to comply with security mandates, yet not provide funding. The legislation will directly fund and authorize $390 million in grants to local port security projects. The bill also will fund loan guarantees that could cover as much as $3.3 billion in long term loans to port authorities acting to improve their security infrastructure. Upgrading that infrastructure means installing modern gates and fencing, security-related lighting systems, remote surveillance systems, concealed video systems, and other security equipment that contributes to the overall level of security at our ports and waterfront facilities.

Some of our shipping companies may worry that these new procedures requiring more security and customs checks will slow the flow of international commerce. But as we did in the airline security bill, we can strike the balance between increased security and the convenience of our open country and economy. In Louisiana, our sea and river ports are a way of life, and an integral part of our economy. We have some of the largest seaports in America, and the Mississippi River runs through the heart of Louisiana. The river is a super-highway of commerce that helps drive our State's economy.

Security and the protection of our people from harm always will be our primary goal. However, we must do it in a way that does not dramatically slow the movement of goods that run our just-in-time-delivery economy. The answer to that problem is technology.

New scanners are now on the market that can x-ray and scan an entire 48-foot cargo container. Customs currently depends primarily on gamma-ray systems that are adequate for seeing through small vehicles or loosely-packed crates. But more powerful X-ray based machines—already used in Israel, the Netherlands, and Hong Kong—can pierce several inches of steel and peer through more densely packed boxes. These machines can see everything from false compartments down to the buttons on a remote control. And they can be programmed to spot ''density signatures'' that indicate explosive and nuclear materials. The more the Federal Government, ports and the private sector invest in using this new scanning technology, the fewer cargo containers and boxes will have to be opened and searched by hand. That will increase the efficiency of international commerce and trade—while at the same time making our nation more secure.

Investing in scanners is even more critical when you consider that the expanding global economy raises the volume of seaborne shipping by 7 to 10 percent each year. In other words, the amount of goods arriving and departing through our seaports is expected to double by 2020. While that increased trade will benefit our economy, it also poses a national security threat if we are unable to keep pace with the growing volume of goods and people passing through our ports.

That is why the private sector must get behind our efforts—and behind this bill. Before September 11, port security was something of an afterthought. We are now facing new threats. The more we invest in the infrastructure of making our ports secure, the less likely that your key products and supplies will be delayed at the ports due to increased security. As public officials, our primary duty is to protect public safety and national security. If the private sector engages and cooperates with our efforts, there will be less impact from that tightened security upon the free flow of goods and supplies through our major seaports. That is a public-private partnership that can work—and protect America at the same time.

We have made the investments at our airports and at our land borders to counter threats of terrorism and other international criminal organizations. It is now time to invest in the security of the international borders at our seaports, in order to protect our nation and our local seaport communities.

Mr. NELSON of Florida. Mr. President, I rise to thank Chairman HOLLINGS and ranking member MCCAIN for agreeing to include in S. 1214, the Port and Maritime Security Act, a Coast Guard and Navy study to evaluate the merits of establishing a Center for Coastal and Maritime Security.

The events of September 11 cruelly illustrated the challenges we face in providing comprehensive and reliable security for our homeland. There is no challenge more daunting than the integration of our Federal, State and Local law enforcement agencies and their coordinated efforts with our Armed Forces to protect our vast and complex maritime and industrial areas.

My amendment directs the administration to seriously consider establishing an institution that can provide integrated and coordinated training for the organization, planning and execution of security systems necessary to protect our vulnerable ports and coasts from potential terrorist attacks.

I am grateful for the inclusion of language directing this study because the U.S. Navy's Coastal Systems Station in Panama City, Florida is uniquely staffed with coastal security experts to help the Coast Guard conduct this assessment. In analyzing the costs and benefits of a Coastal and Maritime Security Center, I urge the Coast Guard to work closely with the Coastal Systems Station to ensure the best possible recommendation for the Administration and Congress.

Mr. President, I am confident that the study directed by this language will conclude that an investment in interagency integrated education and training to improve the protection of our ports and harbors is in the very best interests of our national security.

Mr. GRAHAM. Mr. President, this bill would take a significant step toward securing our Nation against future terrorist actions.

Just as we have unanimously decided to bolster security at our airports, we must also improve the overall security and cargo processing operations at U.S. seaports.

If nothing else, September 11 has demonstrated the need to do more to secure our Nation from terror—whether it comes from land, sky or sea. Before discussing the specifics of this legislation, it is important to describe the circumstances that have caused the security crisis at our seaports.

Seaports represent an important component of the Nation's transportation infrastructure.

Each year, thousands of ships, and millions of passengers, enter and leave the United States through seaports.

It is estimated that 95 percent of the cargo that enters the country from noncontiguous countries does so through the Nation's 361 coastal and inland ports.

Alarmingly, less than 2 percent of this enormous number of cargo containers are actually inspected.

Over the next 20 years, the total volume of imported and exported goods at seaports is expected to increase threefold.

Waterborne cargo alone contributes more than $750 billion to the U.S. gross domestic product and creates employment for 13 million people.

Despite the massive volume of cargo that moves through our Nation's ports, there are no Federal security standards or guidelines protecting our citizens from potentially lethal cargo.

The Federal Government does not provide the resources for technology that an adequately screen cargo moving through our ports, leaving them vulnerable to criminal activity—from smuggling to cargo theft to terrorism.

Security at our maritime borders is given substantially less Federal consideration than airports or land borders.

At U.S. seaports, the Federal Government invests nothing in infrastructure, other than the human presence of the U.S. Coast Guard, U.S. Customs Service and the Immigration and Naturalization Service, and whatever equipment those agencies have on-hand to accomplish their mandates.

Physical infrastructure is provided by State or local controlled port authorities, or by private sector marine terminal operators.

There are no controls, or requirements in place, except for the minimal standards promulgated by the Coast Guard for the protection of cruise ship passenger terminals.

Essentially, where seaports are concerned, we have abrogated the Federal responsibility of border control to the State and private sector.

In the face of these new challenges, it appears that the U.S. port management system has fallen behind the rest of world.

We lack a comprehensive, nationwide strategy to address the security issues that face our seaport system.

In early 1998—in response to the almost daily reports of crime and narcotics trafficking at Florida seaports, and following the day I spent working with the Customs Service at Tampa's Port Manatee on October 14, 1997—I began an investigation of the security situation at seaports throughout the nation. At that time, and perhaps even more so today, I was very concerned that our seaports, unlike our airports, lacked the advanced security procedures and equipment that are necessary to prevent acts of terrorism, cargo theft and drug trafficking.

Based on this workday, and subsequent investigation, I asked President Clinton to establish a Federal commission to evaluate both the nature and extent of crime and the overall state of security in seaports and to develop recommendations for improvement.

In response to my request, President Clinton established the Interagency Commission on Crime and Security in U.S. Seaports on April 27, 1999.

In October 2000, the Commission issued its final report, which outlines many of the common security problems discovered in U.S. seaports. Among other conclusions, the Commission found that: one, intelligence and information sharing among law enforcement agencies needs to be improved at many ports; two, that many ports do not have any idea about the threats they face, because vulnerability assessments are not performed locally;

Three, that a lack of minimum security standards at ports and at terminals, warehouses, and trucking firms leaves many ports and port users vulnerable to theft, pilferage, and unauthorized access by criminals; and four, advanced equipment, such as small boats, cameras, vessel tracking devices, and large scale X-rays, are lacking at many high-risk ports.

Our legislation addresses the problems of our seaports by instructing the Attorney General to coordinate the reporting of seaport related crimes with State law enforcement officials, so as to harmonize the reporting of data on cargo theft.

The bill would also increase the criminal penalties for cargo theft.

To address the lack of minimum security standards at America's seaports, the bill would require security programs to be developed by each port or marine terminal.

Each security program will be submitted to the Security of Transportation for review and approval.

These security programs would require maintenance of both physical and procedure security for passengers, cargoes, crew members, and workers; provisions for establishing secure areas within a waterfront; creation of a credentialing process to limit access to restricted areas so only authorized individuals gain admittance; restriction of vehicular access; development of an evacuation process from port areas in the event of a terrorist attack or other such emergency; and establish security awareness for all employees.

Our bill requires the Coast Guard, in consultation with the appropriate public and private sector officials and officials and organizations, develop a system of providing port security-threat assessments for U.S. seaports. The bill would authorize $60 million over 4 years to carry out this provision.

The Seaport Commission report found that current inspection levels of containerized cargo are insufficient to counter potential security risks.

This bill will authorized $168 million over five yeas, for the Customs Service to purchase non-intrusive screening and detection equipment for use at U.S. seaports.

It would also authorize $145 million for 1,200 new customs inspector positions, and 300 new customs agent positions.

The bill would also create a research and development grant program to provide grants up to 75 percent of the cost of construction, acquisition or deployment of technology to help develop non-intrusive inspection technologies.

The bill would authorize $15 million annually for fiscal year 2002 to fiscal year 2006 for this purpose.

Implementing the provisions of the Port and Maritime Security Act of 2001 will produce concrete improvements in the efficiency, safety, and security of our Nation's seaports, and will result in a demonstrable benefit for those who are currently pay tonnage duties.

This legislation is long overdue—that became all too apparent the morning of September 11. Not only is it required to facilitate future technological advances and the anticipated increases in international trade, but it would ensure that we have the sort of security controls necessary to protect our borders from threats of illegal aliens, drug smuggling and terrorism.

As we work to lift our Nation's fear of travel in our skies, we must also move to guarantee their safety on our seas.

This bill does not affect just those states with ports.

Each day 16,000 containers arrive in the United States. A single container can hold 30 tons.

These containers are either transported by truck or by rail throughout the United States.

To illustrate my point, I have a chart here which depicts a normal route of a cargo container entering the Port of Los Angeles and arriving in New York.

These containers travel across America, often more than a dozen States before reaching their destination.

Our seaports are our first line of defense in preventing a potential tragedy.

Seaports play one of the most critical roles in expanding our international trade and protecting our borders from international threats.

The ''Port and Maritime Security Act'' recognizes the importance of our seaports and devotes the necessary resources to move ports into the 21st century.

I urge my colleagues to look towards the future by supporting this critical legislation—and by taking action to protect one of our most valuable tools for promoting economic growth.

Mr. CLELAND. Mr. President, I rise today to express my strong support for S. 1214, the Port Security and Improvement bill. This legislation is overdue and absolutely needed in broadening our response to the threat of terrorism.

The Report of the Interagency Commission on Crime and Security in U.S. Seaports, issued in the fall of 2000, indicates that ''the state of security in U.S. seaports generally ranges from poor to fair, and in a few cases, good.'' Now that this country is acutely aware of the repercussions of overlooking transportation security weaknesses, Congress would be severely remiss if we did not act promptly to improve on the ''poor to fair'' rating at our ports.

I believe that technology can play an important role in ensuring the integrity, safety, and security of goods coming into this country via ship. To that end, my amendment that is included in S. 1214 establishes a pilot program run and defined by the Customs Service to examine different technologies and how they can be employed to verify that a container's contents are what they say they are and that they have not been tampered with during transport. Shippers and transporters using effective such technologies could then enter U.S. ports on an expedited basis. With 95 percent of foreign trade entering or leaving the U.S. via ship, allowing a quicker entrance by certain ''trusted shippers'' will allow a quicker conveyance to American consumers.

Already, I have seen outstanding demonstrations from people all over this country of their detection technologies and how they can be used to improve security. My amendment is a challenge to these innovators to develop such technologies for use in the shipping world.

Additionally, I have heard testimony from maritime experts that America needs to find ways to ''push its borders back.'' By ''pushing back'' our borders the intention is to ensure the integrity and inspection of goods entering the country at points farther out from our physical borders. If this process can be taken care of in a foreign port, confidence in the integrity of the goods increases and time is saved by domestic inspectors who can use their resources elsewhere. My amendment would allow the securing of goods in the port of origin so that when these goods arrive in the U.S. we can be assured of their safety.

I thank Senator HOLLINGS for his help with my amendment, and I look forward to working with Customs to implement this program, which I believe will be helpful to get goods to market in safe but timely manner.

NUCLEAR DEVICES DETECTION

Mrs. FEINSTEIN. Mr. President, I am encouraged that the Senate is poised to pass legislation bolstering security at our Nation's 361 seaports. I thank the members of the Senate Commerce Committee for their hard work on this bill.

While often out of the public eye, ports and harbors across the United States are America's economic gateways. Every year, U.S. ports handle over 800 million tons of cargo, valued at approximately $600 billion. If you exclude border commerce with Mexico and Canada, our ports handle 95 percent of U.S. trade. Two of the busiest ports of the nation are in California, at Long Beach and Oakland.

Yet, just 1 or 2 percent of the 11 million shipping containers reaching our ports are inspected each year. The Federal Government has taken steps to beef up security along our northern and southern borders. And we are addressing aviation security. But just about everything that arrives by ship is waved through.

This bill will strengthen law enforcement at our ports by establishing a federal port security task force and providing more funding for local efforts to boost port security. It is crucial that we increase cargo surveillance and inspections. And it is crucial that we provide our Customs agents and other port security forces with the equipment needed to detect chemical, biological, and nuclear weapons of mass destruction, WMD.

Osama bin Laden has stated that he considers it his ''religious duty'' to obtain such weapons.

Earlier this month, the director general of the International Atomic Energy Agency warned, ''The willingness of terrorists to commit suicide to achieve their evil aims makes the nuclear terrorism threat far more likely than it was before September 11th.'' According to the Agency, there have been 175 cases of trafficking in nuclear material since 1993 and 201 cases of trafficking in medical and industrial radioactive material. Sadly, it is no longer beyond the pale to imagine that bin Laden and his associates might try to smuggle a nuclear device or so-called ''dirty bomb'' onto a cargo ship entering one of our busy seaports and then detonate it.

I was prepared to offer an amendment to make it quite clear that references in the bill to chemical, biological, or other weapons of mass destruction include nuclear devices.

Mr. HOLLINGS. If the senior Senator from California will yield, I assure her that is our intent. Where was authorize activities or funding to step up surveilliance, inspection, and detection of WMDs at our seaports, we would want to target any kind of nuclear devices as well as chemical and biological weapons.

So, for instance, any authorizations in the bill for the purchase of detection equipment could be used to buy radiation pagers for the Customs agents who inspect cargo, or for radiation detectors on cargo X-ray machines, or to retrofit existing X-ray machines with sensitive sodium iodide detectors.

Mrs. FEINSTEIN. I thank the chairman for his clarification. It is absolutely vital that we upgrade our detection technology. Oakland's Howard Marine Terminal, for instance, is less than once-half mile from Jack London Square, a major tourist attraction. Ships that travel into and out of the Port of Oakland terminal pass within 400 yards of the Square.

Immediately following the September 11th attacks, a 920-foot tanker carrying 33 million gallons of liquefied natural gas (LNG) was prevented from entering Boston Harbor. The tanker was kept 6 to 8 miles offshore while authorities figured out a way to safeguard the Harbor. It was not until November 4—with Coast Guard escorts—that the tanker was allowed into the harbor.

Mr. HOLLINGS. The Senator from California has raised good points. I appreciate her interest in the matter and

her willingness to reach an accommodation with the Commerce Committee. We certainly want to interdict any nuclear devices as assuredly as we want to interdict other WMDs.

PORT AND MARITIME SECURITY ACT COLLOQUY

Mr. HOLLINGS. Mr. President, we worked hard with the Administration to incorporate many of their suggested changes in this bill to sharpen the policy and create a better legislative product. I had intended to work with Chairman LEAHY of the Judiciary Committee to modernize and update some of our maritime criminal laws to reflect the realities following the attacks of September 11th, and to strengthen our laws to protect against maritime terrorism. Unfortunately, the Administration did not consult or share with the Judiciary Committee the changes in criminal laws and other matters within the Judiciary Committee's jurisdiction that were provided to me. I would like to ask the Chairman of the Judiciary Committee, if he would be willing to work to work with me and Senator McCain next year to consider whether new criminal provisions are necessary to enhance seaport security?

Mr. LEAHY. Mr. President, I am also very concerned that we develop policies to more adequately protect our maritime vulnerabilities and protect the public from the threats emerging as a result of maritime trade. I would be happy to work with Chairman HOLLINGS and Ranking Member MCCAIN next year to evaluate whether any gaps in our criminal laws to protect our maritime safety and seaport security exist and the appropriate steps we should take to close those gaps and at the same time ensure that the rights of port employees are protected.

Mr. President, I have also expressed to Chairman HOLLINGS my concerns that we properly limit access to and use of sensitive law enforcement information relating to background checks which are provided for in this bill. Chairman HOLLINGS has assured me that the bill sets strict and appropriate limits as to both when such access will be required and how the information will be used once obtained. Additionally, the Chairman understands my continuing concern over the need for appropriate due process protections for employees of ports at all levels who may be subject to background checks. These would include a hearing that would consider mitigating and extenuating circumstances related to the individual in question. Am I correct that it is the intent of the Chairman to ensure that the Department of Transportation and the nation's ports carry out background checks with proper safeguards in place that ensure due process protections for employees. And will the Chairman commit to work with me to that end? I would like to ask Chairman HOLLINGS if he could explain these provisions?

Mr. HOLLINGS. Mr. President, we have included the important protections and limitations for such use in access in the bill. Background checks will be limited to those employees who have access to sensitive cargo information or unrestricted access to segregated ''controlled access areas,'' that is defined areas within ports, terminals, or affiliated maritime infrastructure which present a critical security concern. Such controlled access areas could be: locations where containers will be opened, points where vessels containing combustible or hazardous materials are berthed and port security stations. In addition, under this bill the use of background information, once it is obtained, will be restricted to the minimum necessary to disqualify an ineligible employee. In other words, only the minimum amount of law enforcement information necessary to make eligibility decisions will be shared with port authorities or maritime terminal operators.

Moreover, this legislation ensures appropriate due process protections for port employees who may be subject to a background check. In the legislation the Secretary is required to establish an appeals process that includes notice and an opportunity for a hearing for individuals found to be ineligible for employment as prescribed in Section 106. I also agree that this process should evaluate any extenuating and mitigating circumstances. I will work to ensure that we accomplish these objectives as the port security legislation moves forward.

SECURITY OF INLAND WATERWAYS

Mr. WYDEN. Mr. President, I rise to engage the distinguished chairman of the Commerce Committee in a colloquy on very important legislation he has sponsored—the Port and Maritime Security Act of 2001. This legislation, which I am pleased to have cosponsored, would establish new Federal safeguards for the security of our ports and maritime commerce. I would appreciate the chairman clarifying whether the intent of this legislation is to cover not only the security of ports but also inland waterways such as the Columbia-Snake River system. This is an important issue for the Pacific Northwest region because dams on the Columbia and Snake Rivers are not only critical for maritime transportation in our region but also a major source of our region's energy. Barges pass through the locks on these dams every day carrying gasoline and other explosive cargoes that could disrupt our waterways or energy production and even put residents downstream at risk of flooding if these cargoes exploded while in transit through one of the navigation locks. So I would ask my Chairman whether the authority provided to the Coast Guard and S. 1214 includes evaluating not just security for ports but also inland waterways like the Columbia/Snake River system?

Mr. HOLLINGS. I appreciate the Senator helping to clarify this point. I know it is especially important for the Senator's home State of Oregon and the Pacific Northwest region. The answer to the Senator's question is yes, the intention is to cover all areas affected by maritime transportation and commerce. The legislation covers not only seaports but also ''public or commercial structures located within or adjacent to the marine environment'' including navigation locks.

Mr. WYDEN. I thank the Senator for his clarification. I also ask him whether under his legislation, the Coast Guard would have authority to oversee dangerous cargoes transported along the Columbia/Snake River system as well as cargoes in port?

Mr. HOLLINGS. Under the legislation, the Secretary of Transportation would issue regulations for security programs for cargo as well for protecting passengers, crew members and other workers. The authority for security of cargo is broad enough to cover not only cargoes in port but also dangerous cargoes anywhere in the maritime navigation system including those in transit through navigation locks.

Mr. WYDEN. I thank the chairman again for answer and commend him for his leadership on this important issue.

FREIGHT RAIL SECURITY

Mr. ROCKEFELLER. Mr. President, will my friend, the distinguished chairman of the Senate Commerce Committee, the Senator from South Carolina, yield for the purpose of engaging in a colloquy?

Mr. HOLLINGS. I will be happy to yield for the purpose.

Mr. ROCKEFELLER. I thank the distinguished chairman of the Commerce Committee.

Mr. President, I would like to ask the Senator from South Carolina if he would agree that in the aftermath of the terrorist attacks of September 11th, this nation came to a number of stark realizations about our vulnerabilities and the overall state of our security?

We have become aware that glaring security gaps exist throughout our nation's transportation system. The Senator from South Carolina has been a leader in focusing the Senate's attention on the need to improve the safety of our ports, and he has been steadfast in his support for additional protections for our nation's rail passengers. I hope that he will agree with me that as important as improving the security in those areas is, our job is not complete until we pay similar attention to the security of our freight rail system.

One of the most serious vulnerabilities in the nation's transportation system is possibility that terrorists may target hazardous materials being transported across this nation's vast and largely unsecured freight rail network. I am sure the Senator is aware that several studies conclude that the chemical industry is particularly vulnerable to terrorist attacks, and point to the shipment of hazardous materials by rail as one of

the most serious threats to the industry. In fact, I believe that a study requested by the Senator's Appropriations Subcommittee and due to be published this month, will come to this very conclusion.

I do not mean to suggest that transportation of chemicals or other hazardous materials should be curtailed. While the transportation of hazardous materials poses risks to human health, the expeditious movement of certain products, like chlorine for municipal water systems, is absolutely essential for the protection of human health.

The railroad and chemical industries have acknowledged the risks, and have taken strides toward improving the security of their facilities, hazardous materials shipments, and rolling stock since the September 11th attacks. These security improvements, and additional security enhancements that are planned, will be inordinately costly, perhaps reaching as high as $150 million in this calendar year, and another $150 million in 2002. I hope the Senator will agree that the extraordinary and unforeseen nature of the costs being incurred by hazardous materials shippers, tank car owners, and railroads, combined with the benefit to human health and public safety that these security enhancements represent, justifies a program of short-term federal grants to reimburse or defray some of the post-September 11th security-related expenses these companies are incurring.

If the Senator from South Carolina does agree with the need to improve our nation's rail security, and understands the unprecedented outlays that railroads and shippers have made or will make in the near future, would he commit to this Senator to hold whatever hearings deemed necessary, and to schedule a prompt mark-up in the Commerce Committee early in 2002 for legislation of mine to require the Secretary of Transportation to conduct a comprehensive terrorism risk assessment, and to set up a Rail Security Fund to make the types of grants that we have discussed here today?

Mr. HOLLINGS. I thank the Senator for his comments on the state of our nation's transportation security, and I agree with his assertion that a complete treatment of our security needs would include legislation to improve the security of our rail network. I am aware that the need for the safe and expeditious rail transportation of chemicals and other hazardous materials is essential for our nation's economy, and that the movement of some chemicals, including chlorine, is necessary for the preservation of public health.

I am aware also of the security improvements that have been undertaken by railroads and hazardous materials shippers. I agree that the security-related expenses are extraordinary, and that in the interest of protecting the general public from the effects of a terrorist attack on hazardous materials shipped by rail, the federal government should help these companies on a short-term basis to defray their post-September 11th security-related expenses. I will promise the Senator from West Virginia that the Commerce Committee will take up the issue of rail security as early as possible during the next session of the Congress.

Mr. ROCKEFELLER. I thank the Senator from South Carolina, and I thank the Presiding Officer.

BUS SECURITY ACT

Mr. CLELAND. Mr. President, I appreciate the chairman's leadership in promoting safety in all modes of passenger and cargo transportation. In the Commerce Committee executive session on October 17, the committee addressed the important issue of passenger rail safety. The committee approved funding for the upgrading of Amtrak tunnels and bridges primarily along the much-used Northwest corridor. While I support and applaud the goal of increasing passenger rail safety and security—in fact I strongly support this legislation—at the same committee session I raised the issue of intercity bus security. Attention became acute on this issue after the October 3 incident on a Greyhound bus that resulted in the death of seven people. Since that event, there have been other attempts to cause mayhem on buses, but thankfully, none have resulted in deaths. With over 774 million intercity bus passengers annually with companies serving over 4,000 communities, we cannot wait to act on securing this important mode of transportation.

Mr. HOLLINGS. I appreciate the fact that the Senator from Georgia brought this matter to the committee's attention. Bus security is in fact an important issue which unfortunately cannot be appropriately addressed before the end of this year. I applaud the initiative of the Senator from Georgia and leadership on this issue and, in particular, his introduction of S. 1739, which establishes a competitive grant program to allocate funding to bus companies to increase security and safety and creates a research and development program for new technologies to increase bus security and safety. It is my intention to consider this legislation on the markup calendar of the Commerce Committee's first executive session of 2002.

Mr. CLELAND. I applaud the chairman's decision to advance the issue of bus safety. With bus terminals often sharing facilities with both airports and rail stations, omitting this critical component of the equation leaves a hole in the system. This mode of transportation is the largest domestic passenger service provider, and it has grown without the aid of federal support. Now that they need assistance to supplement their own efforts and protect our citizenry, it is time for Congress to act. This industry is made up of many small businesses, which may not be able to survive if assistance is not given to help boost security in order to bring passengers back to bus travel. Otherwise, these businesses may have to increase the cost to the customer to pay for the necessary security upgrades.

Mr. HOLLINGS. As chairman of the Commerce Committee, I am very aware of the need of the bus community. It is an important segment of our transportation infrastructure. I look forward to working with my colleague from Georgia on his legislation at the earliest opportunity in 2002.

Mr. CLELAND. I thank the Senator for his support and attention to this matter, and I look forward to working with you in the future on this issue of national importance.

Mr. SCHUMER. Mr. President, I seek unanimous consent to say a few words about the Port and Maritime Security Act of 2001 and the herculean efforts of the Senate Commerce Committee Chairman, Senator HOLLINGS, to get it passed.

In the aftermath of September 11, most of the legislation considered in this chamber has been reactive in nature. This bill, like Senator BYRD's homeland security package, is decidedly different.

This bill is designed to prevent a terrorist attack on one of our nation's most vulnerable pieces of infrastructure—our ports. This bill anticipates the possibility of an attack, and sets out to make that impossible. This is exactly the kind of legislation that we were sent to Congress to pass.

Yet it would not have passed without the dogged efforts of Senator HOLLINGS, who forced the issue as most members of Congress were leaving town.

Finally, I would just like to comment on Senator HOLLING's use of David Stockman's The Triumph of Politics, in his remarks today. I too remember those days in the early 1980's, when the Laffer Curve and trickle-down economics were coming into vogue. I was a young congressman then, and I didn't believe it would work.

I still don't. And I share the chairman's disbelief that even after September 11—when our Nation's vulnerabilities have been so explicitly exposed and the need for additional security resources has been made so evident— we would again travel down that path.

Mr. President, I thank the Chairman for his efforts on this vital piece of legislation.

PORT SECURITY, S. 1214

Mr. MURKOWSKI. Mr. President, I rise today to thank Chairman HOLLINGS and Senator MCCAIN for accepting my amendment to this important bill will promote security at our Nation's seaports.

America's ports provide invaluable links between American productivity and markets both here at home and abroad.

Ports are a critical cog in the wheels of our economy. But quite frankly, our ports are vulnerable.

History has taught us lessons in vulnerability before, whether it be the USS *Maine* in Havana Harbor, the attack on Pearl, or the USS *Cole* in Yemen, ships and shipping are always a risky proposition, especially in the confines of port.

These lessons have new meaning in today's reality of war.

A single attack, on a single ship, in a single U.S. port could render the entire facility immobile.

What does that mean? No exports of U.S. autos. No freighters carrying ore on the Great Lakes. No grain barges up or down the Mississippi Rover. Simply put, No trade.

And perhaps most troubling, no energy.

In my State the Port of Valdez, at the end of the Alaska Pipeline, is responsible for providing much of the West Coast and Hawaii with its oil. And in Kenai, the facility sees billions of cubic feet of Liquified Natural Gas transferred each year.

What would happen if these ports were closed by some horrific act? How could we move our Nation's domestically produced energy?

These facilities and others around the U.S. demand our best efforts to protect them.

But a large, and unfortunately growing, role for our ports is the importation of foreign-produced energy, crude oil, refined petroleum products and liquified natural gas.

As imported energy becomes a larger share of the U.S. energy supply, we become more vulnerable to terrorist attacks.

The energy trade itself creates new terrorist targets.

In the aftermath of September 11th, the Coast Guard was forced to suspend LNG shipments in to Boston Harbor for fear of those ships being used for terror.

What else is aboard those foreign flagged supertankers that enter our ports from the Middle East?

What is hidden in the holds? Biohazards? Chemical warfare?

What else has that crew been trained to do?

These situations take on a new sense of reality after September 11.

My colleagues are well aware of my efforts to reduce our dependence on foreign oil and foreign supertankers by using our own domestic resources.

The longer we wait, the more vulnerable we become.

The majority leader has used parliamentary tactics to subvert the will of the Senate and delay voting on our energy independence.

That is a debate that still lies before us.

But for today, as long as we remain dependent, we must do all we can to protect the safety of those ships and that energy.

My amendment which is now included in this bill makes certain that those who are the most knowledgeable in this most critically-important aspect of port operations are full participants in the effort to ensure port security.

It further ensures that when we talk port security, that we're talking about our Nation's energy security.

I greatly appreciate the willingness of the Chairman, Mr. HOLLINGS, and the Ranking Republican, Mr. MCCAIN, to accept this amendment.

This amendment will make a strong and much needed bill even stronger.

Mr. EDWARDS. Mr. President, I rise today to support the Port and Maritime Security Act of 2001 and to speak about the need to protect our seaports from terrorist attacks.

Our seaports are critically important to our national, and global, economy. Our seaports enable us to export our goods to the rest of the world and allow us to import the goods we do not produce domestically. Ninety-five percent of all U.S. overseas trade is conducted through our 361 public seaports. Roughly 45,000 cargo containers enter the U.S. every day.

Our seaports are also an important component of our national security. In the interest of promoting trade, we accept increasing traffic in and around our seaports as ships, crew and cargo move goods between our nation and others. Yet even as we do this, we must recognize that the very volume of cargo moving through our seaports makes it difficult to adequately guard against a potential terrorist attack.

Traditionally, our seaports are viewed as highly vulnerable targets for terrorist attacks. They are open spaces, full of traffic, and difficult to monitor. Yet an attack against one of our larger seaports could dramatically impact our domestic economy by destroying cargo, eliminating jobs, and shutting off trading routes to other shippers.

Unfortunately, we have let our guard down with respect to our seaports by failing to adequately address the potential for a terrorist attack. We know how important our seaports are to our national and global economy, yet at best, inspectors are able to examine only about two percent of the cargo that passes through our seaports. This means that the vast majority of cargo entering our seaports is not inspected before the containers are allowed to move throughout the country. We can, and must, do better.

We must improve the quality of and deployment of detection technology and we must make sure that those who guard our seaports are equipped to prevent an attack. We have technology that scans containers to look for suspicious materials and shipments. It is in place right now, but not at all our seaports and not even at all of the largest seaports. We need to expand the deployment of this type of technology, and make sure all our seaports are equipped with the best available scanning technology. We must also make sure that the Coast Guard has the manpower and equipment it needs to protect our coast and ports and to respond in the event of an attack.

I am so pleased that we are passing the Port Security Bill. This is an extremely important piece of legislation and an important component of our national defense.

I would like to take this moment to thank Chairman HOLLINGS for working with me on several amendments I had to this important bill.

When the Commerce Committee held hearings on port security back in July, I raised several issues with the witnesses about the security of our ports and the ability to protect against a possible terrorist threat. I have been working since then to develop legislation to address some of the concerns I had that were confirmed at the hearing.

When the Commerce Committee marked up its port security bill in early August, I received assurances from Chairman HOLLINGS that we would continue to work to make sure my concerns were addressed when the bill came to the Senate floor. At that time, we of course had no idea that our country was only a month away from such a horrendous terrorist attack.

But I am pleased that we are now taking up this bill. It will make our seaports and our nation safer. And I want to again thank the Chairman and Ranking Member for working with me on these amendments and for including them in the final bill.

Specifically, these amendments will: improve our ability to safely handle cargo entering our country; provide the Coast Guard with additional anti-terrorism resources to protect domestic ports; and provide for the most modern security technology to be deployed in seaports.

My first amendment is an anti-tampering amendment that will ensure that the cargo we accept in our country has not been altered or interfered with. The amendment improves port security by allowing Customs to work with ocean shippers to better coordinate the tracking of cargo in our ports and across our country. It will improve security by enabling Customs to better assist shippers in preventing cargo tampering and cargo theft. It will also improve security by enabling Customs to track containers as they move cross-country to ensure that they are not diverted for criminal or terrorist purposes.

My second amendment establishes Port and Maritime Security Teams, teams of Coast Guard personnel with training in anti-terrorism, drug interdiction, and navigation assistance. These units will operate high-speed boats that are equipped to patrol our coastal waters and respond immediately to terrorist or other criminal threats to our coast and seaports. Similar teams are already used to protect U.S. vessels in foreign ports, my amendment brings them to our domestic defense.

My final amendment will ensure that the best available technology is deployed in our seaports to improve security, identify threats, and prevent terrorist attacks. The grant program would cover technologies to deal with such security risks as: explosives, firearms, weapons of mass destruction, chemical and biological weapons, drug and illegal alien smuggling, and trade fraud. This amendment is so important, because the type of cargo and containers that move through seaports are entirely different than what moves through our airports, and we need to make sure we are developing technology that recognizes those differences. Only about 2 percent of the cargo entering our seaports is inspected, without better technology, we are leaving ourselves too vulnerable to those who would exploit our seaports for terrorist or criminal activity.

Again, I would like to express my thanks to Chairman HOLLINGS and Senator MCCAIN for helping make sure that these amendments were included in the final bill and for making sure that we take aggressive action to protect our seaports.

AMENDMENT NO. 2690

The PRESIDING OFFICER. Under the previous order, there is an amendment in order. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from South Carolina [Mr. HOLLINGS], for himself, Mr. MCCAIN, and Mr. GRAHAM, proposes an amendment numbered 2690.

(The text of the amendment is printed in today's RECORD under ''Amendments Submitted.'')

Mr. HOLLINGS. Mr. President, I urge the adoption of the amendment. It is a managers' amendment agreed to by Senators MCCAIN, GRAHAM, HUTCHISON, and myself.

The PRESIDING OFFICER. The question is on agreeing to amendment No. 2690.

The amendment (No. 2690) was agreed to.

Mr. HOLLINGS. I urge passage of the bill, as amended.

The PRESIDING OFFICER. Does the Senator yield back all time?

Mr. HOLLINGS. I yield back all time.

The PRESIDING OFFICER. All time having been yielded back, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall the bill pass?

The bill (S. 1214) was passed.

Mr. HOLLINGS. Mr. President, may I be recognized?

The PRESIDING OFFICER. The Senator from South Carolina.

ECONOMIC STIMULUS

Mr. HOLLINGS. Mr. President, with respect to the stimulus bill, let's go right to the point. It really was not a stimulus at all. Over a month ago, Joseph Stiglitz wrote an article entitled ''A Boost That Goes Nowhere.'' I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Nov. 11, 2001]

A BOOST THAT GOES NOWHERE

(By Joseph Stiglitz)

The United States is in the midst of a recession that may well turn out to be the worst in 20 years, and the Republican-backed stimulus package will do little to improve the economy-indeed it may make matters worse. In the short term, unemployment will continue to rise and output will fall. But the U.S. economy will eventually bounce back—perhaps in a year or two. More worrying is the threat a prolonged U.S. recession poses to the rest of the world.

Already we see inklings of the downward spiral that was part of the Great Depression of 1929: Recession in Japan and parts of East Asia and bare growth in Europe are contributing to and aggravating the U.S. downturn.

Emerging countries stand to lost the most. Globalization has been sold to people in the developing world as a promise of unbounded prosperity—or at least more prosperity than they have ever seen. Now the developing world, especially Latin America, will see the darker side of its links to the U.S. economy. It used to be said that when America sneezed, Mexico caught a cold. Now, when America sneezes, much of the world catches cold. And according to recent data, America is not just sneezing, it has a bad case of the flu.

October unemployment figures show the largest monthly increase in two decades. The gap between the United State's potential gross domestic product—what it would be if we had been able to maintain an unemployment rate of around 4 percent—and what is actually being produced is enormous. By my calculations, it is upwards of $350 billion a year! This is an enormous waste of resources, a waste we can ill afford.

It is widely held that every expansion has within it the seeds of its own destruction—and that the greater the excesses, the worse the downturn. The Great Boom of the 1990s had marked excesses. Irrational optimism has been followed by an almost equally irrational pessimism. Consumer confidence is at its lowest level in more than seven years. The low personal savings rate that marked the Great Boom may put even more pressure of consumers to cut back consumption now.

It seemed to me that we were headed for a recession even before Sept. 11. In the coming months we will have the numbers that make clear that we are squarely in one now. The economic cost of the attacks went well beyond the direct loss of property, or even the disruption to the airlines. Anxieties impede investment. The mood of the country discourages the consumption binge that would have been required to offset the reduction in investment.

In any case, monetary policy—the Federal Reserve's lowering of short-term interest rates to heat up the economy—has been vastly oversold. Monetary policy is far more effective in reining in the economy than in stimulating it in a downturn, a fact that is slowly becoming apparent as the economy continues to sink despite a massive number of rate cuts; Tuesday's was the 10th this year.

The Bush administration's tax cut, which was also oversold as a stimulus, is likely to haunt the economy for years. Now the consensus is that a new stimulus package is needed; the president has ordered Congress to have one on his desk by the end of the month. Much of the stimulus debate has focused on the size of the package, but that is largely beside the point. A lot of money was spent on the Bush tax cut. But the $300 and $600 checks sent to millions of Americans were put largely into savings accounts.

What worries me now is that the new proposals—particularly the one passed by the Republican-controlled House—are also likely to be ineffective. The House plan would rely heavily on tax cuts for corporations and upper-income individuals. The bill would put zero—yes, zero—into the hands of the typical family of four with an annual income of $50,000. Giving tax relief to corporations for past investments may pad their balance sheets but will not lead to more investment now when we need it. Bailouts for airlines didn't stop them from laying off workers and adding to the country's unemployment.

The Senate Republican bill, which the administration backs, in some ways would make things even worse by granting bigger benefits to very high earners. For instance, the $50,000 family would still get zero, but this plan would give $500,000 over four years to families making $5 million a year—and much of that after (one hopes) the economy has recovered. It directs very little money to those who would spend it and offers few incentives for investment now.

It would not be difficult to construct a program with a much bigger bang for the buck:

America's unemployment insurance system is among the worst in the advanced industrial countries; give money to people who have lost their jobs in this recession, and it would be quickly spent.

Temporary investment tax credits also would help the economy. They are like a sale—they induce firms to invest now, when the economy needs it.

In every downturn, states and localities have to cut back expenditures as their tax revenues fall, and these cutbacks exacerbate the downturn. A revenue-sharing program with the states could be put into place quickly and would prevent these cutbacks, thus preserving vitally needed public services. Many high-return public investments could be put into place quickly—such as renovating our dilapidated inner-city schools.

This may all sound like partisan (Democratic) economies, but it's not. It's just elementary economics. If you really don't think the economy needs a stimulus, either because you think the economy is not going into a tailspin or because you think monetary policy will do the trick, only then would you risk a minimal-stimulus package of the kind the Republicans have crafted in both the House and Senate.

But what matters is not just how I or other economists see this: It matters how markets, both here and abroad, see things. The fact that medium- and long-term bond rates (that is, bonds that reach maturity in five or 10 years or more) have not come down in tandem with short-term rates is not a good sign. Nor is the possibility that the interest rates some firms pay for borrowing for plant and equipment may actually have increased.

In 1993, a plan of tax increases and expenditure cuts that were phased in over time, providing, reassurances to the market that future deficits would be lower, led to lower long-term interest rates. It should come as no surprise, then, that the Bush package, with its tax decreases and expenditure increases, would do exactly the opposite. The Federal Reserve controls the short-term interest rates—not the medium- and long-term ones that firms pay when they borrow money to invest, or that consumers pay when they borrow to buy a house, which are still far

higher than the short-term rate, which now stands at its lowest level in 40 years. Whatever monetary policy does in lowering short-term rates can be largely undone by an administration's misguided fiscal policy, which can increase that gap between short and long rates; that gap has widened considerably.

Worse still, America has become dependent on borrowing from abroad to finance our huge trade deficits; and the reduction in the surplus is likely to exacerbate this (on average, the two move together). If foreigners become even less confident in America, they will shift their portfolio balance, putting more of the money elsewhere. That adjustment process itself could put strain on the U.S. economy. Before the terrorist attacks, confidence abroad in America and the American economy had eroded, with the bursting of the stock and dot-com bubbles. The two remaining pillars of strength were the quality of our economic management and our seeming safety. Both of these have now been questioned—and the stimulus package likely to become law has nothing to allay foreigners' fears.

As a former White House and then World Bank official, I have had the good (or bad) fortune to watch downturns and recessions around the world. Two features are worth noting.

First, standard economic models perform particularly badly at such times, they almost always underestimate the magnitude of the downturn. One relies on these models only at one's peril. The International Monetary Fund and the U.S. Treasury badly underestimated the magnitude of the Asian downturns of 1997—and this mistake was at least partly responsible for the disastrous IMF policies prescribed in Indonesia, Thailand and elsewhere.

Second, there are long lags and irreversibilities: Once it is clear that the downturn is deep, and a stronger dose of medicine is administered, it takes six months to a year for the effects to be fully felt. Meanwhile, the consequences can be severe. The bankrupt firms do not become unbankrupt and start functioning again.

Downturns are likely to be particularly severe when the economy is hit by a series of adverse shocks. Market economies such as ours are remarkably robust. They can withstand a shock or two. But even before terrorism came ashore, America had been hit badly. The attacks added political uncertainty to the already great economic uncertainty.

So here we are, facing a major downward spiral. This is where eroding confidence in economic management comes into play. John Maynard Keynes, the founder of modern macroeconomics, (including the notion of the stimulus) emphasized the importance and vagaries of *investers'* ''animal spirits''—that is, the unpredictability of their optimism and pessimism. But expectations, rational or irrational, about the future are of no less importance to consumers. Those who are worried about losing their jobs are more likely to cut back on their spending and to save the proceeds from any tax cuts.

It was great fun being part of the Great Expansion. Every week brought new records—the lowest unemployment rate in a quarter-century, the lowest inflation rate in two decades, the lowest misery index in three. The good news fed on itself, and the confidence helped fuel the expansion. We took credit where we could, but I knew that much of this was good luck—and the Clinton administration and Fed not messing things up.

Now, every week brings new records in the other direction—the largest increase in unemployment and decline in manufacturing in two decades, the first quarterly fall in consumer prices in nearly a half-century, the slowest growth in nominal GDP in any two consecutive years since the 1930's. Americans love records, but unfortunately, these new ones are contributing to the already pervasive sense of anxiety. The Bush administration will not try to claim credit for these new records; rather, it will blame Sept. 11. Osama bin Laden is a convenient excuse, but the data will show his murderous henchmen were aiding and abetting at best: The economy was already sliding toward recession.

I wish I could be more optimistic about our economy's prospect. I worry that all of this naysaying will simply contribute to the downturn. Perhaps I am wrong, and the economy will, on its own, recover quickly.

But perhaps I am right. Then, without an effective stimulus, the U.S. economy will sink deeper into recession, and the rest of the world with it. An ineffective stimulus could be even worse: It would harm budgetary prospects, raising medium- and long-term interest rates. And when we see the false claims for what they are, confidence in our economy and in our economic management will deteriorate further. We have had a first dose of this particular medicine. We hardly need another.

Mr. HOLLINGS. Mr. President, earlier this week USA Today had an editorial entitled ''Shopping for 2002 Votes, Dems, GOP Raid Surplus.''

I will read the last sentence:

In Washington, putting on a great show of activity to demonstrate concern for anyone's economic hurt may seem to be smart politics. But sometimes the best thing the government can do is nothing. This is one such time.

I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the USA-Today, Dec. 17, 2001]

SHOPPING FOR 2002 VOTES, DEMS, GOP RAID SURPLUS

DESPITE SIGNS OF ECONOMIC RECOVERY, CONGRESS INSISTS ON 'STIMULUS'.

What's wrong with this picture?

Just two weeks ago, the White House announced that not only have last winter's predictions of massive budget surpluses evaporated, but major deficits are predicted for at least the next three years, as well.

State governors from both parties are warning that homeland-security needs are going unaddressed for lack of funding.

Yet, instead of recognizing these new realities, Congress and the White House are spending the last days before their holiday recess trying to enact a hugely expensive ''economic stimulus'' package that is packed with tax cuts and social spending. And they're doing so even as the economy is showing signs of recovering on its own.

Stimulus clearly is not more dangerous than the lack of one. yet, instead of spiking the idea, congressional Democrats and Republicans are seeking a compromise. Not because the economy needs a jolt, but because each party sees it as an opportunity to score some points in the 2002 congressional campaigns:

House Republicans, on a largely party-line vote, passed a $100-billion package of tax cuts targeted overwhelmingly at corporations and individuals with incomes in the top 5% of the nation, coincidentally among the biggest sources of political contributions. The biggest tax breaks for business weren't targeted at job creation but at refunding taxes already paid as long ago as 1986. Many of the cuts for individuals—questionable during a budget squeeze in any case—wouldn't take effect until 2003, when the recession is likely to be long over.

Senate Democrats are headlining a $600 tax rebate for working-poor families that didn't earn enough to benefit from last summer's income-tax rebates, as well as a one-month holiday from payroll taxes. It's a nice appeal to their blue-collar political base, but normally fractious economists almost all agree it's no stimulus: Repeated studies show one-shot cash windfalls are likely to go to reduce debt or bolster savings, not to spending that would stimulate the economy. Similarly, extending unemployment benefits and helping to pay for health insurance sound like noble objectives—but backdoor welfare, even if needed, is no kick-start for a troubled marketplace.

The Bush administration murmurs piously about compromise, but what the president and his aides are hinting at looks a lot like the old Washington game: doling out the political bonbons for both sides to claim victory, with little concern for economic justification.

Meanwhile, the money just isn't there. The return to red ink is so abrupt that the Treasury asked Tuesday for a hike in the government's borrowoing limit, to a whopping $6.7 trillion. The current ceiling, $5.95 trillion and just three months ago headed rapidly downward, may be reached as soon as February.

In Washington, putting on a great show of activity to demonstrate concern for anyone's economic hurt may seem to be smart politics. But sometimes the best thing the government can do is nothing. This is one such time.

Mr. HOLLINGS. Mr. President, the Wall Street Journal printed an article earlier this week on Monday entitled, ''The Stimulus Fiasco.'' I ask unanimous consent this article be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Dec. 17, 2001]

THE STIMULUS FIASCO

In the not-so-epic battle over fiscal ''stimulus,'' the shouting has all come down to this: The White House is demanding that the 27% income-tax rate, be cut to 25%, while Senate Majority Leader Tom Daschle is insisting on a mere 26%. Only in Washington would anyone believe that either one is going to make much economic difference.

If this is all that the politicians can come up with, we have a modest proposal: Pack it in. The economy will be better off if President Bush calls the whole thing off and instead focuses on abosrbing the lessons of this political fiasco.

Not that we expect this to happen. The point of this exercise long ago stopped being economic growth and became political advantage. Mr. Bush wants to be able to sign something—anything—he can call ''stimulus'' to show voters he isn't like his father and cares about more than foreign policy. Mr. Daschle knows this, so he wants to deny Mr. Bush any tax cuts that might actually stimulate in favor of loading up on tax rebates, jobless benefits, health-care subsidies and other things that will redistribute income to his political constituencies. And it looks as if he's going to prevail.

This is clear from Mr. Bush's latest counter-offer last week to Mr. Daschle dictating the terms of his own surrender. Gone was the across-the-board acceleration of individual income-tax rates that he originally wanted and that his own economists believe would be the best economic medicine. Mr. Bush is still requesting some corporate tax

relief, such as a temporary speedup in depreciation and scaling back the corporate alternative minimum tax. But these will only pad business balance sheets for a while and do little to alter long-term incentives. Meanwhile, the President gave in to Mr. Daschle on tax rebates for low-in-come Americans who didn't get them last summer—that is, for people who pay little or no income tax anyway.

What really matters now is not whether a deal is struck this week but what lessons Mr. Bush learns from his looming defeat. We'd suggest at least two. The first is that only thing bipartisan abut Mr. Daschle is his smile. Like his mentor, George Mitchell, who destroyed Mr. Bush's father, Mr. Daschle wants to make Mr. Bush a one-term President. Rumors abound that the South Dakotan plans to run himself, but even if he doesn't he represents a Senate Caucus loaded with other potential candidates (John Kerry, Joe Lieberman, John Edwards, Hillary Clinton, Joe Biden).

All of them are pursuing the Daschle strategy of wrapping their arms around a popular President on the war. But on domestic policy they are competing against one another for advantage among the Democratic Party's liberal interest groups. This critical mass of Presidential ambition is inevitably pulling the entire Democratic Senate to the left. In the stimulus debate, it explains why Mr. Daschle established the absurd condition that any ''bipartisan'' compromise had to be supported by two-thirds of all Senate Democrats. That means any 17 Democrats can kill anything, and there are more than enough Caucus liberals to do that.

If Mr. Bush wants to know where Democrats will go next, all he had to do was watch Mrs. Clinton a week ago Sunday on NBC's ''Meet the Press.'' While praising Mr. Bush to the skies on the war, she also came out for repealing the tax cuts that the Congress already passed this summer. By not fighting harder to accelerate all of his rate cuts now, the President has left himself open to a three-year defensive battle to keep what he's already won.

Mr. Bush might as well recognize this now and plan accordingly. The only way he will get anything done in the Senate between now and 2004 is to move public opinion on the issues or beat Democrats at the polls in 2002. The worst habit in this environment is to negotiate with yourself, which is what has happened to Mr. Bush on ''stimulus.'' The President first gave Democrats $40 billion in new spending, but got no tax promises in return. Then he conceded on jobless benefits, but also got nothing, then on tax rebates, for which Mr. Daschle seems to have handed him only the token one-percentage point cut in the 27% rate.

The second lesson is that Mr. Bush's economic team failed him. Counselor Larry Lindsey gave him outdated Keynesian advice, assuring him against all evidence that tax rebates would spur growth. Treasury Secretary Paul O'Neill has provided no direction that we've noticed, offering only tentative counsel on policy and tripping over his own tongue on the politics. If this team were running the war in Afghanistan, the Marines would be the ones surrounded at Tora Bora.

The silver lining is that the economy may recover on its own without any fiscal stimulus. Ed Hymen of the ISI Group says he sees more signs of recovery by the week, oil prices are down and the Fed has provided ample liquidity (maybe too much if you look at the 10-year Treasury bond rate that hasn't fallen with Fed easing). This means Mr. Bush can afford to reject the phony stimulus that is now emerging from Congress. But in the long run he owes Americans coping with hard times a better domestic political strategy and a stronger economic team.

Mr. HOLLINGS. I will read the last sentence:

But in the long run [Mr. Bush] owes Americans coping with hard times a better domestic political strategy and a stronger economic team.

That is the first time I heard the Wall Street Journal ask for a stronger economic team. The reason is because we are in deep trouble.

We ended up last fiscal year, which ended just 3 months ago, on September 30 with a deficit of $141 billion. That was not as a result of September 11.

I ask unanimous consent to print in the RECORD a Wall Street Journal editorial dated August 16.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Aug. 16, 2001]

NASDAQ COMPANIES' LOSSES ERASE 5 YEARS OF PROFIT

(By Steve Liesman)

Mounting losses have wiped out all the corporate profits from the technology-stock boom of the late 1990s, which could make the road back to the previous level of profitability longer and harder than previously estimated.

The massive losses reported over the most recent four quarters by companies listed on the Nasdaq Stock Market have erased five years' worth of profits, according to figures from investment-research company Multex.com that were analyzed by The Wall Street Journal.

Put another way, the companies currently listed on the market that symbolized the New Economy haven't made a collective dime since the fall of 1995, when Intel introduced the 200-megahertz computer chip, Bill Clinton was in his first term in office and the O.J. Simpson trial obsessed the nation. ''What it means is that with the benefit of hindsight, the late '90s never happened,'' says Robert Barbera, chief economist at Hoenig & Co.

The Wall Street Journal analysis looked at earnings excluding extraordinary items going back to September 1995 for about 4,200 companies listed on Nasdaq, which is heavily weighted toward technology stocks but also includes hundreds of financial and other growth companies. For the most recently reported four quarters, those companies tallied $148.3 billion in losses. That roughly equaled the $145.3 billion in profit before extraordinary items these companies have reported since September 1995. Because companies have different quarter-ending dates, the analysis doesn't entirely correspond to calendar quarters.

Large charges that aren't considered extraordinary items were responsible for much of the red ink, including restructuring expenses and huge write-downs of inventories and assets acquired at high prices during the technology bubble.

Analysts, economists and accountants say these losses raise significant doubts about both the quality of past reported earnings and the potential future profit growth for these companies. Ed Yardeni, chief investment strategist at Deutsche Banc Alex. Brown, said the losses raise the question of ''whether the Nasdaq is still too expensive. These companies aren't going to give us the kind of awesome performance they did in the '90s, because a lot of it wasn't really sustainable.''

The Nasdaq Composite Index stood at around 1043 in September 1995, soared to 5048.62 in March 2000 and now stands at 1918.89. Because companies in the Nasdaq Composite Index now have a cumuluative loss, for the first time in memory the Nasdaq's value can't be gauged using the popular price-earnings ratio, which divides the price of stocks by their earnings. That means it is impossible to say whether the market is cheap or expensive in historical terms.

The extent of the losses surprised a senior Nasdaq official, who asked not to be named. ''I wouldn't have thought they were that high,'' he said.

Nasdaq spokesman Andrew MacMillan, while not disputing the losses, pointed to the $1.5 trillion in revenue Nasdaq companies generated over the past year, saying that represented ''a huge contribution to the economy, to productivity, and to people's lives . . . regardless of what's happening to the bottom line during a rough business cycle.''

Satya Pradhuman, director of small-capitalization research at Merrill Lynch, says the recent massive losses tell a story of a market where investors became focused on revenue instead of earnings. With billions of dollars in financing chasing every glimmer of an Internet idea, Mr. Pradhuman says, a lot of companies came to market long before they were ready.

''The underwriting was very aggressive, so earlier-stage companies came to market than the kind of companies that came to market five or 10 years ago,'' he adds. He believes there is plenty of potential profitability out there in this crop of young companies, But, he notes, ''only among those that survive.''

The data show that the very companies whose technology products were supposed to boost productivity and help smooth out the business cycle by providing better information have been among the hardest-hit in this economic slowdown. ''Management got caught up with how smart they were and completely forgot about the business cycle and competition,'' says Mr. Yardeni. ''They were managed for only ongoing success.''

To be sure, some of Nasdaq's largest star-powered companies earned substantial sums over the period. Intel led the pack with $37.6 billion in profit before extraordinary items since September 1995, followed closely by Microsoft's $34.6 billion in earnings. Together, the 20 most profitable companies earned $153.3 billion, compared with losses of $140.9 billion for the 20 least profitable. Included in the losses was a $44.8 billion write-down of acquisitions by JDS Uniphase and an $11.2 billion charge by VeriSign, also to reduce the value on its book of companies it had bought with its high-price stock.

These charges lead some analysts and economies to believe that including these losses overstates the magnitude of the decline. According to generally accepted accounting principles, these write-offs are treated as regular expenses. But corporate executives say they should be treated as one-time items. ''It's an accounting entry rather than a true loss,'' maintains Bill Dudley, chief U.S. economist at Goldman Sachs Group.

Removing these unusual charges, the losses over the most recently reported four quarters shrink to $6.5 billion on a before-tax basis. By writing down the value of assets, companies have used the slowdown to clean up their balance sheets, a move that should allow them to move forward with a smaller expense base and could pump up future earnings.

''It sets the table for future dramatic growth,'' says independent accounting analyst Jack Ciesielski. Because of the write-downs, ''when the natural cycle begins again,

the returns on assets and returns on equity will look fantastic.'' But Mr. Ciesielski adds that this benefit will be short-lived.

Cicso Systems in the first quarter took a $2.25 billion pretax inventory charge. This quarter, it partly reversed that write-down taking a gain of $187 million from the revaluation of the previously written-down inventory. The reversal pushed Cisco into the black.

But Mr. Barbera warns that investors shouldn't be so quick to ignore the unusual charges. For example, during good times it wasn't unusual for companies to book large gains from investments in other companies. Now that the value of those investments are under water, companies are calling the losses unusual. ''If they are going to exclude the unusual losses, then they should exclude the unusual gains,'' says Mr. Barbera.

Mr. HOLLINGS. I read from the article:

The Wall Street Journal analysis looked at earnings excluding extraordinary items going back to September 1995 for about 4,200 companies listed on Nasdaq, which is heavily weighted toward technology stocks, but also includes hundreds of financial and other growth companies. For the most recently reported four quarters those companies tallied $148.3 billion in losses. That roughly equaled the $145.3 billion in profit before extraordinary items these companies have reported since September 1995.

It is as if the last 5 years never occurred. What did I have to listen to as a long-time member of the Budget Committee? Surpluses as far as the eye can see, they said in June when the President signed the $2.3 trillion tax cut. I want to say it right as a Senator saying we ought to be increasing revenues, paying our way.

I see the distinguished former Governor of Florida in the Chamber. We could not get by as Governors in our States unless we had a triple-A credit rating. None of these industries are going to expand and come to us at all.

What really hearkened this particular Senator because we never seem to learn. The same act, same scene 20 years ago: David Stockman, the head of President Reagan's economic team, the Director of his Office of Management and Budget, in his book, ''The Triumph of Politics,'' talks about the Trojan horse, growth-growth, Kemp-Roth, and what we had entitled ''voodoo No. 1.'' Now we have voodoo No. 2. Referring to voodoo No. 1 on page 342, at the end of the year in November after they passed the tax cuts, we immediately went into recession, which is exactly what has happened in the year 2001.

I quote:

[President Reagan] had no choice but to repeal, or substantially dilute, the tax cut.

Can you imagine that?

He had no choice but to repeal, or substantially dilute, the tax cut. That would have gone far toward restoring the stability of the strongest capitalist economy in the world. It would have been a great act of statesmanship to have admitted the error back then, but in the end it proved too mean a test. In November 1981, Ronald Reagan chose not to be a leader but a politician, and in so doing he showed why passion and imperfection, not reason and doctrine, rule the world. His obstinacy was destined to keep America's economy hostage to the errors of his advisers for a long time.

That is exactly our dilemma now. For those who regret the non-passage of the stimulus bill, go to Sunday school and thank the Good Lord because—as Stiglitz said and as the USA Today said and as the Wall Street Journal said and now as Dave Stockman said 20 years ago—we ought to be removing those tax cuts, repealing that $2.3 trillion.

It is not the confidence of consumers, it is the confidence of the market. The money boys who really govern the economic affairs of this country—the $2 trillion is still going to be lost.

How much are we up? I ask unanimous consent to print in the RECORD, the deficit to the penny as included by none other than the Secretary of Treasury.

It is entitled the Public Debt to the Penny. That is the Secretary of the Treasury. I ask unanimous consent that this document be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Mr. HOLLINGS. We are already $76 billion in the red in addition to the $141 billion we ended up in the red this last fiscal year. We had to listen to Alan Greenspan say, ''Oh, wait a minute; we might pay off the debt too quick.''

We had $5.6 trillion and surpluses as far as the eye could see, and now what do they need to do? They need to increase the debt limit. They asked us the other day, let us increase the debt limit.

The debt limit, according to the budget and economic outlook for fiscal years at the beginning of the year, they said, and I quote: ''Under those projections, the debt ceiling would be reached in 2009.'' That is what they told us 11 months ago, that in 2009 the debt limit was going to be reached. The first order of business when we come back in January and February is to increase the debt limit, all on account of a rosy scenario, all on account of—what do they call it?—voodoo number two.

We better sober up and start paying the bill in Washington.

I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa.

LACK OF ACTION ON STIMULUS BILL

Mr. GRASSLEY. Mr. President, I am happy to be able to have some time to comment on the fact the Senate is not bringing up the stimulus package. It is to my chagrin, after all the hard work Senator BAUCUS and I have put into these negotiations. Albeit what we have in front of us is not a product of a conference committee, it is still a White House bipartisan compromise, a White House Centrist compromise, that would get a majority vote of the Senate if we had actually had an opportunity to vote on it.

In normal circumstances, I would not be one to say we ought to pass a House bill. These are, however, not normal times and this is not a normal process. Some will say this is a House product that needs to be amended and debated. That assertion, while technically accurate, does not capture the essence of our situation today or right now that we are in a war on terrorism.

The House bill is really the product of an agreement between the White House and Senate Centrists so I am going to call the House bill what it really is. It is a White House Centrist agreement, if you are looking for a bipartisan, bicameral product the President will sign. The President said he would sign this. This agreement is the only game in town.

To anyone opposing this agreement, including the Democrat leadership, I ask them to show me where they are being bipartisan. All I have seen from the leadership throughout this process is an iron fist cloaked in a velvet glove.

Today, we did witness, with the objection to consideration of the stimulus package, the iron fist clothed in an eloquent velvet glove, displayed once again, similar to what we have done on other issues like insurance and like a stimulus package earlier on.

Today that iron fist smashed the White House Centrist agreement. The American people will not be well served by the destruction of the White House Centrist agreement. All it means is that after 3 months of long meetings, committee action, floor debates, we, the Senate, will not deliver to the American people.

The House has delivered. The President has delivered. One has to wonder, then, why are we stuck? If we can get a bipartisan majority in the Senate, action by the House and a signature by the President, why does a partisan minority of the majority party decide to thwart the will of the people? Why, especially now?

Our Nation is in a state of war on terrorism. Our President is necessarily occupied as Commander in Chief to run that war. Why, on a matter of economic stimulus and aid to dislocated workers, did the President have to come to the Hill yesterday to try and break a logjam? Why did the Democratic leadership give his effort the back of their hand? Why did the bipartisan objectives go by the wayside? I will take a few minutes to talk about how we got here.

Shortly after September 11, we started out with meetings with Chairman Greenspan and other economic policymakers. For the most part, they were called by the good chairman of the Senate Finance Committee, Senator BAUCUS. In that period, right after September 11, the President took first steps and took the risk by committing to a stimulus package, fully aware we might be going in the budget ''red'' if we did.

We should not discount this leadership by the President. Certainly it took courage, and it was the right thing to do. Chairman Greenspan also took the lead and gave the ''Greenspan green light'' to pursue a stimulus package. It seemed everyone realized our responsibility was to heed the President's directive and Greenspan's advice. Both of these men said Congress should address the economic slowdown. They told us the slowdown started over 1 year ago. Subsequently, the National Board of Economic Research told us the economy might have recovered but for the September 11 attack.

The President took the lead in meeting needs of dislocated workers. He proposed extension of unemployment insurance benefits. He also proposed providing health care benefits through the National Emergency Grants.

In addition, the President proposed, as a concession to the other party, a new round of rebate collection to those who do not pay income tax.

Was there any reciprocation, any movement from the Democratic leadership? No.

President Bush, much to the consternation of many in the Republican Party, took capital gains tax off the table because it was not well received by Democrats. Was there any reciprocation on the part of the Democratic leadership? No.

This is not to say we did not agree on some things. Bonus depreciation, for instance, was agreed to by each side. Although we did not have it in our caucus position, Republicans agreed with Democrats on liberalizing the net operating loss rules and expensing for small business.

I do not also discount the ideologically based opposition to accelerating the reduction of the 27 percent bracket, but it is amazing to me that many on the other side see taxpayers in the 27 percent bracket as rich people.

A 2 percent rate cut for single folks earning between $27,000 and $65,000 is seen as a tax cut for the very wealthy by the Democrat leadership. Likewise, a married couple with incomes between $45,000 and $109,000 are considered rich. I recognize this tax cut proposal was difficult for the Democratic leadership to accept. After a series of bipartisan, bicameral talks, the House went its own way with a bill; too heavy for me on corporate AMT. It passed by just two votes.

The Senate Democratic leadership responded in kind. The result was a Democratic Caucus partisan position paper reduced to legislation they rammed through our Finance Committee on a party line vote. That bill dead ended in the Senate. The reason is the bill was designed for partisan point making. Its partisan design was its weakness in an institution like the Senate where one only gets things done on a bipartisan basis. That design guaranteed its failure.

We could have ended there, but the President forced us back into action. Frankly, the House also yielded on a very bad bill they first passed.

The result was a quasi-conference environment to work out differences. By virtue of this quasi-conference, my friends JAY ROCKEFELLER and MAX BAUCUS, our chairman, and I spent many long hours debating the merits of economic stimulus and aid to dislocated workers. In many ways, the discussions were vigorous exchanges of views with our House colleagues. A lot of that discussion was healthy, and some of it helped move the process along.

Little real progress was made. Once again, the President intervened and endorsed the Senate Centrist position. Eventually, the House leadership came toward the Centrist position because they wanted to find a way to get a bill through the Senate, and that can only be done if it is done on a bipartisan basis. Even with movement to the Centrist position, the quasi-conference was at an impasse. Senator DASCHLE's edict about 3 weeks ago that one-third of his caucus could veto a stimulus plan came into clear focus. The sentiments of the House or White House, let alone the sentiments of Joe Six-pack out there

working every day to pay taxes, were less important than the opinion of a minority of the Democratic Senators, which would be as few as 18. The failure to obtain a super-majority in the Democratic caucus then imperiled this Centrist package, this Centrist bipartisan package.

In the end, the impasse came not from tax cuts. Republicans moved far off their priorities so that tax cuts were not the deal breaker. The impasse was not over unemployment benefits. Republicans had largely moved to the Democratic position. The impasse was not over the amount of the health care benefit package. Again, though the benefit came in the form of a tax credit, Republicans moved toward a Democratic position on the costs of health care benefits.

Bizarre as it may seem, the whole agreement broke down over some ideological position on the eligibility of people for health insurance for the unemployed through just COBRA. The impasse came down not over whether to help these workers. The White House Centrist agreement covered these workers with a tax credit. The Senate Democratic bill covers these workers with a new entitlement. Basically, a super-majority of Democrats would not agree to let laid-off workers have the choice of where they wanted to get their health care benefits. But they could still get their health care benefits with the same tax credit.

The bottom line is the White House-Centrist agreement does not meet the two-thirds litmus test set for the Democratic caucus by the leader.

One has to wonder, why leave all of these good things in the White House-Centrist agreement on the Senate cutting room floor, as just happened about an hour ago? We have before the Senate revolutionary social policies. For the first time, Members have sign-able legislation that guarantees health care benefits for laid-off workers—the biggest change in policy for dislocated workers since unemployment insurance was passed in the 1930s.

We have, in the bill that was objected to, extended unemployment benefits as we have done several times in the last 50 years. We have a robust stimulus package with 30 percent bonus depreciation. We have an extension of expiring tax provisions for 2 years. We have the victims of terrorism tax relief and tax incentives to build New York City once again.

All of these are good provisions which enjoy broad bipartisan support. They are the foundation of the White House-Centrist agreement. Yet because of this ideological fixation, all of these good things now go by the wayside until we return 1 month from now on January 23. While we are going to be enjoying Christmas, these dislocated workers who could have been guaranteed health benefits and further unemployment compensation are going to go away empty handed.

I will look at each key player in the process and see how much movement there has been. Common sense says those who want a deal will show movement. By the same token, those who do not want a deal will not move.

Start with the President. As I said, he made several key moves. He put the dollars on the table, knowing it would complicate the fiscal year 2002 budget. He took capital gains off the table. He put the payroll tax rebates on the table. He put the unemployment insurance and health care benefits on the table. Finally, he endorsed even a plan that went much further in the case of health care benefits, from $3 billion up to $19 billion. That is in the White House-Centrist agreement.

When you look at the record, it is clear to me that the President of the United States wanted a deal, an economic security package for dislocated workers and to help create jobs for those who do not have jobs.

At the House of Representatives, I agree that the first bill, as I said before, from that body was too heavy on the corporate alternative minimum tax. But the chairman of the Ways and Means Committee made many gestures to the other side. For instance, he did not pick and choose among extenders. He included the payroll tax rebate that many of his Members in the other body opposed. The chairman of the Ways and Means Committee increased the resources for unemployment compensation and health care benefits. If you doubt me on the seriousness of that movement, ask many in my caucus their opinion of those proposals. If you look at the record, the House Republicans moved and ultimately ended up as part of the White House-Centrist agreement.

Senate Republicans had a caucus position very close to the President's plan. Like the President, Senate Republicans, especially our leader, Senator LOTT, constantly worked to try to get a deal. As the President moved, so did the Senate Republican caucus position move. That is in the Record.

That brings us to the last and ultimate critical player. Obviously, that is the Senate Democratic leadership. I ask, where has the Senate Democratic leadership really moved? At every stage of the process, whether it is the Finance Committee action, whether the action on the floor, or even the quasi-conference, ultimately we find this leadership position always saying ''no''. Everyone else was saying ''yes''.

Now there is a good game being talked by the other side. They say they want an agreement. That is the elegant velvet glove they are noted for, but where is the action? The action today was ''no'' on unanimous consent request. But look at the whole last 3 months on this issue. Where have they moved? If you want an agreement, you have to see movement. There has been none.

One has to ask, with so many good provisions in this White House-Centrist agreement, why should the Democratic leadership want to kill it? The President has expressed that polling data, political consultants, and union officials had a big impact on the Senate Democratic leadership strategy.

I ask unanimous consent to have printed in the RECORD an editorial from the Wall Street Journal that states in depth what the consultants say.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal]

PRESIDENT DASCHLE

One of the more amusing Washington themes of late has been the alleged revival of the Imperial Presidency, with George W. Bush said to be wielding vast, unprecedented powers. Too bad no one seems to have let Senate Majority Leader Tom Daschle in on this secret.

Because from where we sit Mr. Daschle is the politician wielding by far the most Beltway clout, and in spectacularly partisan fashion. The South Dakotan's political strategy is obvious if cynical: He's wrapping his arms tight around a popular President on the war and foreign policy, but on the domestic front he's conducting his own guerrilla war against Mr. Bush, blocking the President's agenda at every turn. And so far he's getting away with it.

Mr. Bush has asked Congress to pass three main items before it adjourns for the year: Trade promotion authority, and energy and economic stimulus bills. Mr. Daschle has so far refused to negotiate on any of them, and on two he won't even allow votes. Instead he is moving ahead with a farm bill (see below) the White House opposes, and a railroad retirement bill that is vital to no one but the AFL–CIO.

Just yesterday Mr. Daschle announced that ''I don't know that we'll have the opportunity'' to call up an energy bill until next year. One might think that after September 11 U.S. energy production would be a war priority. In September alone the U.S. imported 1.2 million barrels of oil a day from Iraq, which we soon may be fighting, the highest rate since just before Saddam Hussein invaded Kuwait in 1990.

But Mr. Daschle is blocking a vote precisely because he knows Alaskan oil drilling has the votes to pass; earlier this autumn he pulled the bill from Senator Jeff Bingaman's Energy Committee when he saw it had the votes. So much for the new spirit of Beltway cooperation.

We're not so naive as to think that war will, or should, end partisan disagreement. But what's striking now is that Mr. Daschle is letting his liberal Old Bulls break even the agreements they've already made with the White House. Mr. Bush shook hands weeks ago on an Oval Office education deal with Teddy Kennedy, but now we hear that Mr. Kennedy wants even more spending before he'll sign on. Mr. Daschle is letting Ted have his way.

The same goes for the $686 billion annual spending limit that Democrats struck with Mr. Bush after September 11. That's a 7% increase from a year earlier (since padded by a $40 billion bipartisan addition), and Democrats made a public fanfare that Mr. Bush had endorsed this for fear some Republicans might use it against them in next year's elections. But now Mr. Daschle is using the issue against Mr. Bush, refusing to even discuss an economic stimulus bill unless West Virginia Democrat Bob Byrd gets his demand for another $15 billion in domestic spending.

Mr. Byrd, a former majority leader who thinks of Mr. Daschle as his junior partner,

may even attach his wish list to the Defense spending bill. That would force Mr. Bush to either veto and forfeit much-needed money for defense, or sign it and swallow Mr. Byrd's megapork for Amtrak and Alaskan airport subsidies.

All of this adds to the suspicion that Mr. Daschle is only too happy to see no stimulus bill at all. He knows the party holding the White House usually gets most of the blame for a bad economy, so his Democrats can pad their Senate majority next year by blaming Republicans. This is the same strategy that former Democratic leader George Mitchell pursued in blocking a tax cut during the early 1990s and then blaming George H.W. Bush for the recession. Mr. Mitchell's conigliere at the time? Tom Daschle.

It is certainly true that Republicans have often helped Mr. Daschle's guerrilla campaign. Alaska's Ted Stevens is Bob Byrd's bosom spending buddy; he's pounded White House budget director Mitch Daniels for daring to speak the truth about his pork. And GPO leader Trent Lott contributed to the airline-security rout by letting his Members run for cover.

The issue now is whether Mr. Bush will continue to let himself get pushed around. Mr. Daschle is behaving badly because he's assumed the President won't challenge him for fear of losing bipartisan support on the war. But this makes no political sense: As long as Mr. Bush's war management is popular, Mr. Daschle isn't about to challenge him on foreign affairs.

The greater risk to Mr. Bush's popularity and success isn't from clashing with the Daschle Democrats over tax cuts or oil drilling. It's from giving the impression that on everything about the war, Tom Daschle might as well be President.

Mr. GRASSLEY. Mr. President, I also ask unanimous consent to have printed in the RECORD a portion of a November 13 memo from Democracy Corps regarding the economic stimulus proposals.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

POLITICS AFTER THE ATTACK—A REPORT ON DEMOCRACY CORPS' NEW NATIONAL SURVEY AND FOCUS GROUPS

* * * * *

THE ECONOMIC STIMULUS

Voters do not currently bring a strong partisan filter to the various economic proposals being considered. Nonetheless, a majority support every Democratic proposal; in fact, two-thirds favor every Democratic proposal but one (the tax rebate). Overall, the Democratic proposal does better than the Republican—particularly those features that have led the public debate, like the Alternative Minimum Tax.

Across the Democratic and Republican packages, the strongest support is for unemployment benefits for the newly unemployed; delaying tax cuts for the wealthiest one percent in order to fund rebuilding and Social Security; funding ready-to-go infrastructure to create jobs; accelerating already scheduled broad middle class tax cuts; Cobra health insurance for the newly unemployed; and tax incentives for business if clearly linked to new investment.

The public rallies to four elements of the Democratic plan. The starting point is the immediate construction program, including airport improvements and school modernization to create jobs. That has the broadest support (85 percent) and nearly the most intense—48 percent strongly supportive.

There is strong support for delaying the tax cuts for the top one percent (those earning more than $375,000 a year) in order to fund the rebuilding and security and to make sure we do not keep borrowing from the Social Security trust fund. Two-thirds of the electorate favors this proposal, but most important, more than half (51 percent) strongly favor it—the highest for any Democratic proposal. One person noted that they used to laugh about the ''Social Security lock box,'' ''Well, there it goes. . . . Well, that's all our money.'' That sentiment reverberated across the groups: ''It's not their money anyhow''; ''that's what we paid into for our own security, [and] that's not something they should say, well, we got this money here, we can use it however we want.'' And some said, ''I mean don't delay, just eliminate that tax cut for these people.''

Cobra coverage health care for the newly unemployed stands out, on its own, as a very important thing to do at this moment. People understand the rising cost of health care and how expensive coverage can be for anyone.

It is important to underscore that three-quarters of the public favors a Democratic proposal for business tax incentives to encourage investment in new plants and equipment. The public wants tax breaks, including for business, if the provision is linked to investment, not simply consumption. People are looking for initiatives, consistent with this new period. One of the participants observed, ''The tax cut is tied to investment to encourage them to move forward, not just a blanket.''

Unemployment benefits for the newly unemployed are immensely popular. When offered by the Republicans and targeted at those who have lost their jobs after September 11th, 85 percent favor the idea, including 53 percent who strongly favor it. Presented with an expansive Democratic proposal—extending benefits to 26 weeks, while raising weekly benefits and covering part-time employees—more than two-thirds support it, but less enthusiastically.

In the focus groups, many participants worried that such an expansive proposal might re-open the old welfare system. That is why the unemployment proposals should be part of a broad Democratic economic package.

On taxes, voters offer a fairly consistent posture, whether offered by Democrats or Republicans. They support business tax cuts, even a capital gains tax cut, when it includes the wording, ''in order to encourage investment.'' Voters seem to support an accelerated schedule for tax cuts aimed at the middle class—such as the marriage penalty. But there is little enthusiasm for the tax rebate whether proposed by Democrats or by Republicans—just 56 percent. The weak reaction to the rebate reflects our earlier observations—a citizenry focused on addressing the community's crisis and long-term needs, rather than simply throwing money at individuals to consume now.

Cuts in corporate tax rates, with no immediate spur to investment, gets little support (46 percent). Repeal of the Alternative Minimum Tax, providing $25 billion in tax cuts for large businesses wins the support of only 28 percent. When presented specifically with tax cuts for IBM, GE and General Motors, voters are simply incredulous. Now the leading element of the House Republican package, this is likely to shape public perceptions of the Republicans' approach to the economy. This may become one of the substantive elements in the public's desire to balance the President's direction.

Mr. GRASSLEY. I was not in on the meetings with the Democratic consultant, so I do not know if it is was true or not, but Members can read it and make their own determination.

The theory from the articles is the political strategy of the Democratic leadership is to covertly thwart any stimulus and aid to dislocated workers. It is good to keep these issues as ''issues'' to beat up on the President next year and on Republicans, particularly if the economy does not recover. If the economy does recover, what is lost except stimulative tax relief and some worker aid? Better to keep the issue than to act now is the way it turns out.

So goes the theory, then. Apply the iron fist, but do it covertly, using the velvet glove so as to escape responsibility for your actions.

I hope this is a cynical political theory, but that it is not true. If it is, and only the Democratic leadership really knows if it is true. If it is true, it is sad and it is disappointing. If true, it is politics at its worst. I only hope the articles are not true. There is no better authority on this subject than the former distinguished majority leader, Senator George Mitchell, he said it best in an interview with John McLaughlin. Senator Mitchell said: Good policy results in good politics. Not the other way around. You don't get good policy because of good politics but good politics because of good policy.

I hope the Senate Democratic leadership heeds Senator Mitchell's advice here and doesn't get it backwards. I hope the press accounts and rumors around the Hill are not true. But we will have to wait and find out. Regrettably we are not taking up this consensus economic stimulus bill. That says to the workers dislocated because of September 11, at a time when we are in a war environment, that they can not have anything for Christmas. They do not have the 13 more weeks of unemployment compensation; they do not have the additional health insurance.

To reiterate, as most of you know, Senator DASCHLE has radically modified the economic stimulus proposal that the Democrats first tried to pass in the Senate.

Surprisingly, it looks a lot like our White House-Centrist stimulus package. It has adopted many measures initially promoted by Republicans. Perhaps some good has come from all these weeks of discussion.

I'd like to talk about some of the differences between the White House-Centrist package and the altered Democrat stimulus plan.

I want to explain why I believe our bipartisan package is better for America.

Let's start with the White House-Centrist plan's tremendous commitment to displaced workers.

Our unemployment insurance proposal represents an unprecedented commitment to American workers. We would provide up to 13 weeks of additional unemployment benefits to eligible workers who exhaust their regular benefits between March 15, 2001 and December 31, 2002.

An estimated 3 million unemployed workers would qualify for benefits averaging $230 a week. These benefits would be 100 percent federally funded at a cost of nearly $10 billion.

Our proposal would also transfer an additional $9 billion to state unemployment trust funds.

This transfer would provide the states with the flexibility to pay administrative costs, provide additional benefits, and avoid raising their unemployment taxes during the current recession.

The United States enjoyed a growing economy and declining unemployment for much of the previous decade. But, the economic slowdown that began last year—which was exacerbated by the terrorist acts on September 11—has resulted in substantial layoffs.

The unemployment rate has risen from 4.0 percent in November 2000 to 5.7 percent in November 2001.

By historical standards, the current unemployment rate is still substantially below the level at which Congress deemed it necessary to enact extended unemployment benefits.

Over the past 50 years, the federal government has provided temporary extended unemployment benefits only six other times. The average unemployment rate during those times was 7.3 percent.

Based on this historical record, the President originally suggested that extended unemployment benefits should be limited to those states that have a disaster declaration in effect as a result of September 11, or have a 30 percent increase in their unemployment rate.

However, a number of our colleagues on both sides of the aisle insisted that we provide immediate assistance to every state regardless of their unemployment rate. We have agreed to do exactly that in our proposal.

Unfortunately, some on the other side of the aisle continue to insist this is not enough. They insist we should go further by requiring every state to provide specific benefits and establish specific eligibility criteria as a condition of receiving federal assistance. We could not agree to these demands.

The Federal Government has always left decisions about benefit levels and eligibility criteria to the States.

The changes sought by those on the other side of the aisle would destroy this historic relationship and undermine the flexibility needed by the states to respond to their unique circumstances.

I would now like to discuss our bipartisan plan's commitment to providing health care for dislocated workers.

Now, Democrats have been saying since October that Republicans don't care about helping workers with health insurance. Senator DASCHLE himself said yesterday that his Republican colleagues, and I quote, ''so far have refused to come to the table and negotiate seriously.''

Mr. President, nothing could be farther from the truth. Since October when President Bush first called on Congress to pass a stimulus package, I have worked closely and seriously with both Democrats and Republicans to come up with a meaningful, bipartisan approach to helping people impacted by the events of September 11.

Compared to where we started on the issue of health care, we have come a very long way. Let me give you a little history first.

When this debate began, our proposal relied on the National Emergency Grant program to deliver health benefits to workers at a cost of about $3 billion. Over time, that number grew, and I said publicly that we could double, or even triple, that number.

I also invited the Democrats to modify the grant criteria to make the program more responsive to the needs of workers without health insurance.

They refused. But that didn't stop us from staying at the negotiating table.

Next, we proposed giving workers a refundable, advanceable tax credit towards the purchase of health insurance equal to 50 percent of the policy's cost.

And when Democrats objected to that, claiming that the credit was too small and that sicker people would have trouble buying policies in the individual market, we came back with yet another offer, which is reflected in this bill.

The new proposal, endorsed by the White House, the House of Representatives, and the centrists in this body, takes a three-pronged approach to getting health insurance assistance to people in need.

It goes farther and wider than any proposal on the table to date, and gets more help, to more people, more quickly than any other proposal to date.

What's more, it represents a giant leap in spending on health care. It includes over six times as much money for temporary health insurance assistance as our original Republican proposals.

And still the Democratic leadership tells us we are not negotiating seriously.

Mr. President, the White House/centrist proposal spends approximately $19 billion on temporary health insurance help in 2002. And it does it the right way, by using existing programs along with new ones designed to get people they help they need quickly.

Now let me take a minute to describe our three-pronged approach.

First, the White House/centrist proposal provides a refundable, advanceable tax credit to all displaced workers eligible for unemployment Insurance, not just those eligible for COBRA. The value of the credit is 60 percent of the premium, up from 50 percent in our original proposal. The credit has no cap, and is available to individuals for a total of 12 months between 2001 and 2003.

Individuals can stay in their employer COBRA coverage, or they can choose policies in the individual market that may better fit their family's needs. This only makes sense. Locking people into COBRA, as the Democratic leadership insists, forces people to stay with policies that may be too expensive for them to keep, even with a subsidy.

Our goal was to give dislocated workers access to all the health insurance choices available to them in the private marketplace, and we've done that in a responsible way.

This bill also includes a major, new insurance reforms to protect people who have had employer-sponsored coverage and go out into the private market for the first time after being laid off.

It makes the COBRA protections available to people who have had only 12 months of employer-sponsored coverage, rather than 18 months, as under current law. By doing this, we greatly expand the group of displaced workers who cannot be turned down for coverage or excluded because of a pre-existing condition.

The new 12 month standard is especially important for people with chronic conditions who have difficulty obtaining affordable coverage. It is a major step, and I'm surprised that the Democratic leadership doesn't want to take us up on these sweeping new reforms.

Let me turn to the mechanics of tax credit proposal. It is easier to implement than the direct subsidy approach of the Democratic leadership.

While their proposal requires employers to shoulder the burdens, our proposal relies on existing state unemployment insurance systems. So under this bill, workers will be able to access the credit, and begin applying it to their health insurance premiums in a timely way. Here's how it works:

Newly dislocated workers will receive vouchers from their state unemployment offices or ''one stop'' centers when they apply for unemployment insurance. Workers can then take those vouchers and submit them, along with their contribution to the premium, to their employer or insurer. Afterwards, insurers would submit the vouchers to the Treasury Department for reimbursement.

This approach works because it relies on existing systems to deliver the new benefits, and as a result delivers those benefits in a fast and reliable way.

I ask my colleagues: why would anyone insist on a mechanism that just won't work as well? I don't understand it.

The second prong of our proposal is $4 billion in enhanced National Emergency Grants for the States, which can be used to help all workers—not just those eligible for the tax credit—pay for health insurance. States have flexibility under our approach, and can use these grants to enroll their workers in high risk pools or other state-run plans, or even in Medicaid.

To address concerns raised by Democratic colleagues, our enhanced National Emergency Grant program requires all States to spend at least 30

percent of their grant funds on temporary health insurance assistance. In addition, we've included protection for states: a minimum grant level of $5 million for any state that meets the grant criteria.

Finally, the third prong of the proposal responds to Democratic requests by including $4.3 billion for a one-time temporary State health care assistance payment to the States to help bolster their Medicaid programs.

As we know, the Medicaid program is an important safety net program for low-income children and families and disabled individuals. Medicaid is a joint Federal and State program and accounts for a large part of State budgets.

So, in this time of budget constraints due to the recession, States are struggling to make ends meet.

As a result of the unique and extraordinary economic situation we now face, a number of states are considering scaling back Medicaid services, including my own state of Iowa. This provision provides a one-time, emergency cash injection that will help States avoid Medicaid cutbacks.

This feature was not part of our original plan, and I recognize that many of my colleagues have concerns about it. In fact, I share their reservations, and that is why I'm emphasizing that this is not simply a garden-variety increase in Medicaid funding, but a temporary, emergency payment.

The nation is calling for bipartisan compromise, and in that spirit, we've agreed to add this to our proposal.

Mr. President, we have made tremendous steps toward the Democratic position in order to find bipartisan compromise on health care. Those steps have not been reciprocated by the Democratic leadership.

Displaced workers deserve to be treated with respect by this body, and I believe those workers have earned a vote on this bill.

I would now like to discuss the individual income tax rate reductions in the White House-Centrist plan and the resuscitated Daschle plan.

The original House stimulus bill would have accelerated the reduction of the 27 percent rate to 25 percent which is scheduled to go into effect in 2007. The White House-Centrist package has adopted this approach.

Now, the revamped Democrat plan would reduce the 27 percent rate to 26 percent in 2002, and would not reduce the rate to 25 percent until 2006. Recall that the original Democrat plan did not provide one red cent of rate relief for working Americans.

Now think about this. The 1 percent higher rate under the Democrat plan will operate as a 4 percent rate increase until the 27 percent rate is finally lowered to 25 percent 4 years from now. That makes a huge difference to Americans who are struggling to make ends meet. Let's take a look at who will benefit from our plan's rate reduction.

The reduction of the 27 percent rate will benefit singles with taxable income over $27,000, heads of household with taxable income over $36,250, and married couples with taxable income over $45,000.

These are not wealthy individuals. These are middle class working Americans.

I have a chart which shows the median income of a four person family for every State in the Nation. Median income is the amount of income right in the middle, with half the incomes above it and half below it.

This chart shows that the average median income for a four person family in the United States is $62,098.

Now, reduction of the 27 percent rate will benefit married couples with taxable income over $45,000. So it will benefit working people who earn well below the national median income level.

This chart also lists those states that have a family median income that is higher than the national average. And look at where these people live.

Connecticut, New Jersey, Delaware, Michigan, Rhode Island, California, Washington State. These are the states where a family of four will benefit the most from our proposed tax cut.

The Democrat's revamped alternative would impose an additional 4 percent tax rate on these incomes over the next 4 years. That should concern representatives from those states.

For example, consider that an additional 4 percent tax on New Jersey's $78,000 median income results in more than $1,300 in additional taxes.

Michigan is the same: an additional $900 of tax. Washington State is hit with nearly $800 in additional tax.

These are significant numbers for a working family with two children. They would spend this money to meet their families' needs, which would stimulate the economy more than a bunch of liberal Democrat spending programs.

Mr. President, I ask unanimous consent that this chart be printed at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection it is so ordered.

(See Exhibit 1.)

Mr. GRASSLEY. The more surprising figures are shown in the next chart, which shows States with median income below the national average.

Recall that I said reducing the 27 percent rate to 25 percent will benefit married couples with taxable income over $45,000. Now look at the median income distributions on this chart.

There is not one State on here that has a median family income of less than $45,000.

So you can see that our proposal will benefit everyone, not just an elite few, from a few selected states.

Mr. President, I ask unanimous consent that my second chart be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection it is so ordered.

(See Exhibit 2.)

Mr. GRASSLEY. The Treasury Department has estimated that White House-Centrist plan's acceleration of the 27 percent rate reduction will yield $17.9 billion of tax relief in 2002 for over 36 million taxpayers, or one-third of all income tax payers.

Business owners and entrepreneurs account for 10 million, or 30 percent, of those benefitting from the rate reduction.

When you refuse to accelerate the rate cuts you harm farmers and small business persons. This is because most small business owners and farmers operate their businesses as sole proprietorships, partnerships or ''Sub S'' corporations.

The income of these types of entities is reported directly on the individual tax returns of the owners. Therefore, a rate reduction for individuals reduces taxes for farms and small businesses.

That is why the additional rate reduction under the White House-Centrist plan is so important. In 2002 alone, it injects $17.9 billion of stimulus into our ailing economy and small businesses.

So what would a small business do with these tax savings? Well, considering that most of the recent job growth has come from small businesses, I believe they would hire more people and make more business investments.

We know that 80 percent of the 11.1 million new jobs created between 1994 and 1998 were from businesses with less than 20 employees.

And 80 percent of American businesses have fewer than 20 employees.

This is what I refer to as the ''80–80 Rule'' for supporting rate reductions.

In addition, lowering taxes now would increase a business' cash flow during the current economic slowdown. The higher cash flow would increase the demand for investment and labor.

But don't just take my word for it. Take it from an October 2000 report by the National Bureau of Economic Research, a very well-regarded non-partisan organization, entitled ''Personal Income Taxes and the Growth of Small Firms.''

This report reaches the unambiguous conclusion that when a sole proprietor's marginal tax rate goes up, the rate of growth of his or her business enterprise goes down.

Simply stated, high personal income tax rates discourage the growth of small businesses. And right now, that is the last thing we need.

That is why it is important to do rate reductions the right way, and fully accelerate the 27% rate reduction. We are simply accelerating a decision this Senate made last summer.

We should have confidence in our decision. We know that tax cuts are stimulative.

When working Americans have more of their own income, they feel more financially secure and are more comfortable with spending.

A full reduction of the 27 percent rate to 25 percent is much more stimulative than a reduction that is deferred to 2007, as called for under the Democrat plan.

In closing, let me say who really loses when the Senate loses its right to vote on the White House-Centrist bill. It is our displaced workers, it is our fellow Americans who still have a job and the security of our jobs base; and it is the soundness of our nation's economy.

The Senate Democrat Leadership will not allow an up or down vote on our bipartisan White House-Centrist stimulus package. Why? Because it would pass. We have a majority of Senators who support this package.

Instead, the Senate Democrat Leadership has created a ''make-believe boogey-man'' over the issue of how health care benefits should be delivered to unemployed. But the majority of this Senate does not agree with them.

But voting on this issue and helping the economy recover is not really what is on their minds. It is not their political objective.

The Senate Democratic leadership is playing political brinkmanship, hoping that the American public buys into their excuses for inaction.

The Senate Democratic Leadership keeps their fingers crossed, hoping that our economic difficulties will last until next fall so they can blame it on the President in their campaign ads.

But the blame doesn't go to the President. He has bent over backwards to accommodate their demands. And it still is not enough. The Senate Democratic leadership would rather move the goal post than agree to a solution.

This is not what we were elected by to do. This is not in service of our country. It is in no one's best interest.

We are at war. Our economy is in crisis. And the only impediment to recovery is the refusal of the Senate Democratic leadership to allow this Senate to pass this economic stimulus package. A majority of our members will vote for this bill.

I hope the Senate leadership hears the pleas of the American people and stops blocking this bill through procedural technicalities. The Senate should be allowed to do its job.

The PRESIDING OFFICER. The Senator from Nevada.

TO EXTEND THE AVAILABILITY OF UNEMPLOYMENT ASSISTANCE IN THE CASE OF THE TERRORIST ATTACKS ON SEPTEMBER 11

Mr. REID. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of Calendar No. 274, S. 1622.

The PRESIDING OFFICER. The clerk will report the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 1622) to extend the period of availability of unemployment assistance under the Robert T. Stafford Disaster Relief and Emergency Assistance Act in the case of victims of the terrorist attacks of September 11, 2001.

There being no objection, the Senate proceeded to consider the bill.

Mr. REID. Mr. President, I alert the Senator from New York and the Senator from Virginia; we can get this unanimous consent if they save their speeches for much later.

I ask unanimous consent the bill be read the third time, passed, the motion to reconsider be laid upon the table, and any statements relating thereto be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 1622) was read the third time and passed, as follows:

S. 1622

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. EXTENSION OF UNEMPLOYMENT ASSISTANCE.

Notwithstanding section 410(a) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5177(a)), in the case of any individual eligible to receive unemployment assistance under section 410(a) of that Act as a result of the terrorist attacks of September 11, 2001, the President shall make such assistance available for 52 weeks after the major disaster is declared.

TERRORIST VICTIMS' COURTROOM ACCESS ACT

Mr. REID. Mr. President, I ask unanimous consent the Judiciary Committee be discharged of further consideration of S. 1858, and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 1858) to permit closed circuit televising of the criminal trial of Zacarias Moussaoui for the victims of September 11th.

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 2691

Mr. REID. I ask consent the Senate now proceed to the consideration of the Allen amendment that is at the desk, the amendment be agreed to, the bill be read the third time, passed, the motion to reconsider be laid upon the table, and any statements be printed in the RECORD.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Nevada [Mr. REID], for Mr. ALLEN, proposes an amendment numbered 2691.

The amendment is as follows:

(Purpose: To clarify the requirements of the trial court)

On page 2, line 5, strike ''including'' and insert ''in''.

On page 2, line 6, after ''San Francisco,'' insert: ''and such other locations the trial court determines are reasonably necessary,''.

The PRESIDING OFFICER. Is there objection to the various requests of the Senator from Nevada?

Without objection, it is so ordered.

The amendment (No. 2691) was agreed to.

The bill (S. 1858), as amended, was read the third time and passed, as follows:

S. 1858

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''Terrorist Victims' Courtroom Access Act''.

SEC. 2. TELEVISING OF THE TRIAL OF ZACARIAS MOUSSAOUI FOR THE VICTIMS OF SEPTEMBER 11TH.

(a) IN GENERAL.—Notwithstanding any provision of the Federal Rules of Criminal Procedure to the contrary, in order to permit victims of crimes associated with the terrorist acts of September 11, 2001 to watch criminal trial proceedings in the criminal case against Zacarias Moussaoui, the trial

court in that case shall order closed circuit televising of the proceedings to convenient locations, in Northern Virginia, Los Angeles, New York City, Boston, Newark, and San Francisco, and such other locations the trial court determines are reasonably necessary, for viewing by those victims the court determines have a compelling interest in doing so and are otherwise unable to do so by reason of inconvenience and expense of traveling to the location of the trial.

(b) PROCEDURES.—Except as provided in subsection (a), the terms and restrictions of section 235 of the Antiterrorism and Effective Death Penalty Act of 1996 (42 U.S.C. 10608) shall apply to the televising of court proceedings under this section.

FOREIGN OPERATIONS EXPORT FINANCING, AND RELATED PROGRAMS APPROPRIATIONS ACT, 2002—CONFERENCE REPORT

Mr. REID. Mr. President, I submit a report of the committee of conference on the bill (H.R. 2506) and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2506), making appropriations for foreign operations, export financing, and related programs for the fiscal year ending September 30, 2002, and for other purposes, having met, have agreed that the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment, and the Senate agree to the same, signed by a majority of the conferees on the part of both Houses.

The PRESIDING OFFICER. The Senate will proceed to the consideration of the conference report.

(The conference report can be found in the House proceedings of December 19, 2001.)

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. Mr. President, with American troops on the ground in Afghanistan, with an uneasy coalition of nations confronting an unprecedented war on terrorism, and with the possibility of all-out war looming over the Israelis and the Palestinians, the Foreign Operations Appropriations conference report before us today comes at a pivotal moment in our nation's history. Given the volatility of the situation in the Middle East in the midst of America's war on terrorism, it is vital that Congress and the Administration present a united foreign policy front to the rest of the world. For that reason, I will vote for the FY 2002 Foreign Operations conference report, I do so reluctantly and with reservation—and I do not often vote for Foreign Operations appropriations bills.

I believe it is time—I believe it is past time—to rethink our foreign aid policy and how relates to our national security priorities. September 11 was a wake up call on many fronts. As a result of the attack on America, we have made sweeping changes in our concept of national security. We have learned that national security also means homeland defense. We have learned that airplanes can be bombs and that letters in the mail can be lethal. We have learned that we must change our definition of defense to encompass defending our domestic infrastructure as well as defending against ballistic missile threats.

These changes reflect the realization that the September 11 terrorist attacks on U.S. soil may not be an isolated incident. At this moment, there may be people planning other terrorist acts against our homeland. We have already experienced three terrorism alerts in the U.S. since September 11. Almost daily, we hear grim predictions of what the future may bring. We are living in an age of global instability, disenfranchised and desperate peoples, and widespread proliferation of weapons of mass destruction. The volatility of the current world situation is without precedent.

And yet, in many ways, the major instrument of our foreign policy—the Foreign Operations Appropriations Act—reflects a distressing attitude of business-as-ususal. I do not fault the authors of this bill. Senator LEAHY and Senator MCCONNELL have done an excellent job in balancing the priorities of the Administration with the concerns of Congress and the needs of our allies throughout the world. They have done so with care and skill, and they are to be commended for their work.

No, the fault, I believe, lies with our inability as a nation to relinquish long held conventional wisdom about foreign aid and recognize that the changing global environment requires a revamping of our foreign policy. We must move away from using dollars to symbolize the strength of our relations with other countries, and instead focus our energies—and our resources on promoting a new understanding of foreign policy that complements and enhances our global war on terrorism.

Nowhere is this more true than in the Middle East, where renewed violence and antipathy have brought Israel and the Palestinian Authority to the brink of open warfare. Since September 29, 2000, the Israeli-Palestinian conflict, fueled by generations of hatred, has claimed nearly 1,000 lives. For the past 15 months, the unending cycle of violence has pitted the home-made bombs and deadly suicide missions of the Palestinians against the heavy armor and missile attacks of the Israelis. Many, perhaps most, of the victims have been young people barely on the cusp of adulthood. The sad fact is that the next generation of leaders of the Israelis and the Palestinians are being sacrificed to the blood feud of their elders.

The United States, like the rest of the world, has looked on this ceaseless carnage in horror. We have expressed dismay, regret, sorrow, and anger. We have wrung our hands in despair. We have condemned the violence in the strongest terms. But we have not suited our words to any meaningful action. In this bill, our foreign assistance to the Middle East virtually ignores the spiraling violence in the region. This bill provides $5.1 billion dollars in foreign assistance to the Middle East, primarily Israel and Egypt, a level almost identical to last year's funding. It is as if nothing has changed. There are no strings on the money. There is no requirement that the bloodshed abate before the funding is released. There is no motivation for Egypt to step up its effort to mediate between the sides, and there is no incentive whatsoever for Israel and the Palestinians to make meaningful progress toward a peaceful settlement of their differences.

In short, we are doing little more than offering a tacit acknowledgment that the United States is powerless to stop the bloodshed. We are sending the wrong signal to the Middle East. By not using our foreign assistance dollars as an instrument to effect change in the Mideast, we are inadvertently helping to fuel the continued cycle of violence. And what has this hands-off policy produced? Empty promises, escalating violence, and the prospect of war instead of peace between Israel and the Palestinians.

Now what? Where does the so-called peace process go from here? Can we really expect the Israelis to exercise restraint following the most recent escalation of violence against their citizens? Is there any point in urging Yassar Arafat to seize and punish the terrorists within his control when he is obviously unable to live up to his promises? Is there any hope that the Israelis and Palestinians will be able to re-engage in meaningful discussions in the foreseeable future?

In the current poisonous environment, neither side has any incentive to resume peace talks. To give his expressions of dismay any credibility, Mr. Arafat will have to conduct a swift and sweeping crackdown on the leaders of the Palestinian terrorist cells—something he has never been able to accomplish in the past. And even if Mr. Arafat could deliver on his promises, it will take masterful leadership on the part of Israeli Prime Minister Ariel Sharon to restrain his military options and to place Israel's settlements in disputed areas on the negotiating table—two difficult but necessary prerequisites for peace.

The Israelis and the Palestinians, riven by generations of hatred, cannot hope to accomplish these goals on their own. It is time for Egypt—with the assistance of Saudi Arabia and Jordan—to exercise its considerable influence in the region and place long term security interests over short term internal political costs. Such leadership will not be easy. President Mubarak will have to make hard choices and steel himself and his government against the predictable political backlash from the more radical elements of his own country. But President Mubarak's leadership is necessary to temper the emotions of his fellow members of the Arab League.

The United States has a similarly difficult task before it. Despite our clear alliance with Israel, the U.S. must regain the role of honest broker. We must stop rewarding the status quo with an uninterrupted flow of foreign aid dollars and instead use foreign assistance as a tool to leverage peace.

We are certainly not doing so now. Just a few weeks ago, the State Department confirmed the intended sale of 53 advanced anti-ship missiles to Egypt. Egypt contends that these missiles are needed to protect its borders, but the fact is, these deadly accurate missiles have the range to threaten Israel's ports and shipping. Given the tinderbox that is the Middle East today, why is the United States contemplating sending these weapons into the region at this time?

Meanwhile, we routinely sell advanced aircraft and missiles to Israel as part of our foreign assistance package. Some of these U.S.-made high-tech weapons have been used to target and assassinate Palestinian terrorists. Just days ago, we again saw television images of Israeli-operated, American-made jets and helicopters launching missiles at buildings used by the Palestinian Authority. You can be sure those images were seen throughout the Arab world. How can we demand peace on one hand when we are providing instruments of destruction with the other?

Israel and the United States are the staunchest of allies. No one should question our support of Israel's right to exist. But support need not translate into enabling. The United States, the Middle East, and the world would be better served if we changed our policy in the Middle East to reflect reality, not rhetoric. The Palestinians must stop the cycle of violence. The Israelis must practice restraint. The United States must back up its words with action.

We have a road map to restart the Middle East peace process, the Mitchell Report. This blueprint, drawn up by former Senator George Mitchell and issued last April, is a step-by-step plan to end the violence and resume negotiations between the Israelis and the Palestinians. The Mitchell Report is often cited as a practical and workable solution. It has strong support in both the Administration and the Congress. But to date, it is doing little more in real terms than gathering dust on a shelf. To date, there has been no incentive on either side to make the hard decisions that are required to actually implement the steps of the Mitchell Report.

It is time for the United States to provide some incentive. It is time to try to implement the Mitchell Report. Just as we must hold the Palestinians responsible for increasing the violence, so must we hold the Israelis responsible for the inflammatory expansion of settlements in disputed areas. The Mitchell Report provides a clear and unbiased insight into the realities of the dispute between the Israelis and the Palestinians. It is remarkable in its fairness and even-handedness in holding both sides accountable for their transgressions. Our foreign assistance policy should do no less. I call on the Administration and this body to take a fresh look at how we apply our foreign assistance to the Middle East before we take up another foreign policy measure in the Senate.

And when we take that fresh look at our Middle East policy, we should look at all facets—all facets—of our relationship both with Israel and its Arab neighbors. For example, if we are quick to condemn Iran for the transfer of missile technology to North Korea, how can we stand silent in the face of Israel's sale of advanced weapons and components to China—weapons that are based on U.S. technology or developed in Israel with U.S. tax dollars? China may not be in the same category as North Korea, but it defies logic to think that the sale of advanced American weapons technology to China is in the security interests of the United States. Foreign policy decisions do not exist in a vacuum. Our support for Israel affects the Arab world's policies toward the U.S. The weapons systems that Israel sells to China could effect China's capability to inflict harm on the United States. With the new urgency to protect our homeland, these are significant issues that should be dealt with honestly and openly in future foreign assistance programs.

In light of September 11, the P–3 incident of April 1 has almost faded from many memories. That was 5 months before 9–11, and our service men and women were put in harm's way by a brutal regime, which summarily executes dissidents and independence-seeking nationalists in Tibet and other occupied lands. Have the recipients of our fungible foreign aid dollars and other friends and allies been arming this potential adversary of ours, which in turn provides chemical and biological weapon delivery systems to terrorist-sponsoring states? The answer is yes. China is a known proliferator of chemical weapons and ballistic missiles capable of delivering chemical and biological warheads, and Britain, France, Russia, and Israel have been selling weapons and transferring advanced military and dual-use technologies to China. Regrettably, our record is not clean either. Our excessively profit-motivated corporations have also transferred technologies to the PRC, sometimes as the price of doing business there and sometimes even voluntarily. China is known to have provided missiles capable of being equipped with chemical and biological warheads to Iraq. Iraq is a terrorist state, a manufacturer and user of chemical and biological weapons, and a sponsor of terrorist groups. China has provided ballistic missiles to Saudi Arabia, to Syria, to Iran, and to Libya. It has provided nuclear weapons to Syria, to Japan, and to Iraq. It provided chemical weapons to Syria. It provided them to Iran.

Could these weapons be used against our personnel and our allies in the event of a future confrontation? The answer is yes. Are these weapons sales to China in the interests of American national security? Of course not. I was one of the initiators of the enabling legislation of the U.S.-China Security Review Commission, a bipartisan Congressional commission. One of its specific mandates is to analyze the transfer of our advanced military and dual-use technology by trade, procurement, or other means to China. The Commission is looking into technology transfers to the PRC through third parties. Another specific mandate to

The Commission is to look at the proliferation of weapons of mass destruction. The basic purpose of the Commission is to assess the impact of these and other acts on the national security interests of the United States. The Commission is to report its findings and recommendations to Congress and the President in May. I look forward to the report today, the United States is embroiled in a war of its own in the Middle East. Until recently, the Israeli-Palestinian conflict had largely vanished from the headlines, displaced by the specter of hand-to-hand combat between American troops and Taliban forces in Afghanistan. But the importance of seeking a peaceful solution to the violence between the Palestinians and the Israelis is no less urgent than it has always been. The recent terrorist attacks against innocent Israeli citizens and the possibility that Israel will launch its own war against Palestinian terrorists is all the proof—all the proof—that we need.

If this cycle of violence continues unabated, if the Israelis and the Palestinians are unable to come to terms themselves, then the United States should intervene by conditioning future foreign assistance to the Middle East—to all the major players, including Egypt, including Israel, including Jordan and including the Palestinians—on implementation of the Mitchell Report or something very like it.

U.S. interests are not served by the perpetuation of violence between the Israelis and the Palestinians. No one should be more cognizant of this fact than the citizens of Israel, where precious lives have once again fallen victim to Arab extremists bent on wreaking havoc. No one should be more cognizant of this fact than Yassar Arafat, who time and again has failed to moderate the extremist Palestinians who are determined to sabotage any movement toward peace. No one should be more cognizant of this fact than the United States, which has spent billions upon billions of tax dollars and sponsored countless rounds of peace talks, to no apparent avail.

The path to peace in the Middle East is a two-way street, and like most roads in that ancient part of the world, the path is steep and the path is rocky

and the path is difficult to traverse. But, with faith and perseverance, it need not be a dead end street. There is no ideal solution to the travail in the Middle East. There is no right answer, there is no fair solution, there is no justice for all those who have suffered. There is only accommodation and acceptance, giving ground and restraining hatred. But there is no other solution.

If the Palestinians and the Israelis continue to pursue hatred and revenge, the future of Israel will be written in blood, as the past pages are written in blood, and the dreams of a new Palestinian state will lie shattered in the dust. If the players in this tragedy cannot bring themselves to accept that fact, the United States should use its every tool—every tool—and I am including dollars, I am including the instrument of foreign assistance—to pressure the sides to negotiate a peace. To do otherwise makes us little more than an accessory to the violence.

Mr. President, these are strong words. They are intended to be. These are perilous times. This is not the time to mince words. As we saw on September 11, and as we all fear we may see again, allowing hatred to rage unfettered in the Middle East places our very homeland in jeopardy. The war that we are waging against terrorism is the first and most urgent step in protecting our homeland. But defeating the terrorists is only the first step. We must also work to eradicate terrorism, eradicate the causes, if we can. Abandoning conventional wisdom in these unconventional times and using our foreign assistance dollars to effect change instead of making a pro forma allotment of funds is the best, and perhaps the only, means that we have at hand to help shape a peaceful future for the Middle East.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. CORZINE). The Republican leader.

Mr. LOTT. Mr. President, I see the Senator from Louisiana will be seeking recognition in a moment. I will be relatively brief.

Let me say to Senator BYRD from West Virginia, I stayed on the floor because even in all the tumult here this afternoon, as we were trying to get final agreement on a number of bills or establish disagreement, I learned that Senator BYRD was going to give a speech on foreign policy issues. I have heard him speak on this subject before and found it very interesting, thoughtful, and thought provoking. That is why I stayed and listened because I wanted to hear what the Senator from West Virginia had to say in this area.

As I suspected, I found it interesting and useful. I hope the administration will review these remarks, and I hope those in the Middle East who are involved in a very dangerous situation on all sides will take into consideration what has been said there.

For years I have been concerned that our policy didn't always make sense. We seemed to be giving money to all sides with no assurances and sometimes not even participation by those who received that aid. I have always thought it was almost contradictory, maybe even hypocritical. This is a volatile part of the world. It is a place where the pages of history do reflect conflict and bloodshed. We all hope and pray for a peaceful solution.

I do think it is going to take an extraordinary effort. First, the Palestinians have to be prepared to accept peace and security with Israel. Israel has to be prepared to seek a negotiated peace agreement. All have to be participants, including other Arab countries in the world receiving aid from America. And America has to be prepared to press these points on them.

I say to Senator BYRD, I appreciate his taking the time. More Senators should think about this subject and express themselves. We should take a look at our foreign operations appropriations process more closely, maybe consider making some changes next year.

We also need to take advantage of this time in which we find ourselves with support from countries that have not traditionally been our allies, a number of people who are working with us against whom we had been taking unilateral sanction actions. We should review all of that. The world is different now. It is an opportunity, as we move forward in fighting terrorism, completing the action in Afghanistan, and looking at where terrorism may be in other parts of the world. It is going to be an opportunity for this administration, under the leadership of President Bush and Secretary Powell and his other advisers, such as Condoleezza Rice, to change our thinking and to improve our position and our relationship with a number of countries around the world.

I thank Senator BYRD for his remarks this afternoon. I do commend them to all Senators when they have an opportunity.

Mr. BYRD. Will the distinguished Republican leader yield?

Mr. LOTT. I am glad to yield to Senator BYRD.

Mr. BYRD. I thank the leader for his comments and his observations. I thank him for remaining on the floor, and I thank him for what I accept to be an observation that we do need to use our foreign aid dollars as a tool to help bring about peace in the Middle East.

I am not attempting to take sides one way or the other. We give $3 billion to Israel every year. We give $2 billion to Egypt—$5 billion. And we seem to give this without asking the question. We ought to require both Israel and Egypt to work hard for peace and to be willing to give a little here and give a little there or else this money isn't going to be paid.

Could the leader imagine with me what we could do in this country for the American people with $5 billion more every year; what that would do for homeland security, $5 billion a year; what it would do for New York City? We give these dollars practically without asking a question. I think both those countries look upon this $5 billion—$3 billion in the case of Israel, $2 billion in the case of Egypt—I think they virtually look upon these $5 billion as entitlements. They put these figures into their budgets. They apparently have no doubts that the moneys are going to come. And the way we have been operating for several years, those moneys have come.

I think it is time to put some strings on those moneys: If you want this money to help, we want you to work for peace.

That is what I am saying today. I am not attempting to take any sides. But we hand this taxpayers' money out to the tune of $5 billion a year. That is $5 for every minute since Jesus Christ was born. We ought to make those dollars work for peace, and we can make them work for peace. That is what I am asking.

I thank the distinguished Republican leader.

Mr. CONRAD. Mr. President, I rise to offer for the RECORD the Budget Committee's official scoring for the conference report to H.R. 2506, the Foreign Operations, Export Financing, and Related Programs Appropriations Act for fiscal year 2002.

The conference report provides $15.346 billion in discretionary budget authority, which will result in new outlays in 2002 of $5.537 billion. When outlays from prior-year budget authority are taken into account, discretionary outlays for the conference report total $15.106 billion in 2002. By comparison, the Senate-passed version of the bill provided $15.524 billion in discretionary budget authority, which would have resulted in $15.138 billion in total outlays. H.R. 2506 is within its Section 302(b) allocation for both budget authority and outlays. In addition, it does not include any emergency designations.

I ask unanimous consent that a table displaying the Budget Committee scoring of H.R. 2506 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

H.R. 2506, CONFERENCE REPORT TO THE FOREIGN OPERATIONS, EXPORT FINANCING, AND RELATED PROGRAMS APPROPRIATIONS ACT, 2002

[Spending comparisons—Conference Report, in millions of dollars]

	General purpose	Mandatory	Total
Conference report:			
Budget Authority	15,346	45	15,391

Outlays	−32	0	−32

[1] For enforcement purposes, the budget committee compares the conference report to the Senate 302(b) allocation.

Notes.—Details may not add to totals due to rounding. Totals adjusted for consistency with scorekeeping conventions.

Mr. BIDEN. Mr. President, the Foreign Operations appropriations bill is one of the most important appropriations related to national security that Congress makes during the course of the year. It is a little known fact to most Americans, but foreign assistance is among the first lines of defense in ensuring the safety and security of each and every American here and abroad.

Through this appropriation we fund anti-terrorism activities, we provide money to give jobs to Russian nuclear physicists who would otherwise be offering their services to whatever terrorist organizations were willing to pay them, we fund our antinarcotics efforts and provide money to combat the spread of deadly diseases before they reach our shores. Mr. President, we are in no way devoting the necessary resources to the front line.

I thank the Chairman and Ranking Member of the Foreign Operations Appropriation sub-Committee. They did the best they could with the allocation they were given. I know that if he had his druthers the chairman would have been working with a much bigger number. I do not intend to criticize the hard work that the subcommittee has done. And I will acknowledge that for its part, the Senate Budget Committee certainly exceeded the administration's grossly inadequate request when it made the initial allocation. I applaud that. And I applaud the fact that the conferees understood the importance of the Non-proliferation, AntiTerrorism, Demining and Related Programs, fully funding vitally important accounts such as those for Nonproliferation and Disarmament, the Comprehensive Nuclear Test Ban Treaty Organization Preparatory Commission, Antiterrorism, Terrorist Interdiction and the International Science and technology Centers.

What I would say to my colleagues, however, is that the conference report, although it is slightly more than the administration's request, makes it clear that we need to do much, much more. We need to stop thinking about foreign assistance as a handout, as welfare for the developing world, and consider it a strategic investment in America's security.

The tragic events of September 11 were a wake-up call. The United States is not isolated from the rest of the world in a sea of invulnerable tranquility. As we stand here today, there are radicals preaching anti-American sentiments around the globe. They are saying that democracy breeds corruption, and that globalization is the reason for poverty. These radicals take advantage of the desperation of the poor and the hopeless.

Poverty and ignorance are one of the most fertile breeding grounds of terrorism. By now my colleagues are aware of the fact that many members of the Taliban, the same group of radical fiends that harbored Osama bin Laden, were refugees in Pakistan who were too poor to afford school. They were educated in radical seminaries that they attended free of charge. Where were we and the rest of the international community with an alternative for these children? We were absent. It did not concern us. It was not our problem.

On the other side of the world in Mali, a Washington Post article dated September 30 states that Muslim missionaries have taken ''hundreds of recruits'' abroad for religious training. The story states that radical Islamic religious movements are gaining popularity due to corruption and rising poverty. Are we going to ignore the warning signs in west Africa as well? Will we let Mali, an emerging democracy struggling to hold on by the skin of its teeth, become a source of turmoil, unrest and violence? The government there is trying to do the right things in terms of economic and market reform. We should be empowering the Agency for International Development and the State Department to provide the country with the ability to make the transition to democracy in such a way that all people benefit. This appropriation in no way provides enough money to adequately do so.

Those who are hopeless and disaffected swell the ranks of terrorist organizations. Autocratic politically repressive regimes, where discontent and disagreement cannot be expressed, are fertile grounds for terrorist recruitment. In countries that prohibit free speech, freedom of association and political choice, violence becomes the only means through which to affect political change. The United States foreign policy apparatus has the mandate to push for change in these countries. It lacks the means to do so to the extent necessary.

I say to my colleagues that we have got to take heed. The problems in other countries are our problems. We need to engage, and it is impossible to do so on the cheap. We cannot adequately engage the world with the monies allocated in this appropriation. The United States cannot hope to participate meaningfully in the reconstruction of Afghanistan out of these meager funds. The cost of that alone is projected to be as much as $18–20 billion over the next 5 years. A cost which we must be prepared to share among the donor community.

As we speak there are students in the very schools in Pakistan that I spoke of learning to hate America. As we speak there are anti-Western sentiments being preached to people in some mosques in west Africa. What are we doing to expose them to American values and ideals so that they will not be the perpetrators of violence against U.S. citizens in the future?

The United States cannot be all things to all people everywhere. We cannot cure the ills of the world. And I do not believe that eliminating poverty will be the silver bullet that eradicates terrorism. There is no silver bullet or magic potion that will achieve that aim. But let's consider the state of our efforts today. President Bush has declared a war on terrorism. He has stated that we must fight terrorism on all fronts. I submit that foreign assistance is one important tool in our arsenal. We have just been rudely and shockingly awakened to the fact that we need to take advantage of each of these tools.

There is nothing we can do which would 100 percent guarantee that America will not be attacked by terrorists again. What we can do is mitigate the threat. We can help the UN and the government of Pakistan provide alternatives to the madrassass that refugee children in Pakistan attend because there is no other form of education available. We can help eliminate poverty and corruption in developing countries that radical elements seize on as a reason to attack so called western values and democracy.

The United States is spending a billion dollars a month on the war in Afghanistan. I do not begrudge a penny of that money. We must do whatever it takes for however long it takes to wipe Al-Qaida from the face of the earth. However, I strongly believe that we must do all we can to prevent ever having to fight such a war again. One of the ways we can do this is to invest more in preventative measures. We must foster the spread of democracy, bolster the judicial and law enforcement capabilities of developing countries and help strengthen the economies where necessary. What we have done to date is clearly not enough.

Mr. GRAHAM. Mr. President, I rise today to speak in support of adoption of the conference report on the Fiscal Year 2002 appropriations bill for Foreign Operations H.R. 2506.

The annual Foreign Operations appropriations bill is the primary legislative vehicle through which Congress reviews the U.S. foreign aid budget and influences executive branch foreign policy making generally. It contains the largest share—over two-thirds—of total U.S. international affairs spending.

I regret that I was forced to vote against the original Senate version of this bill on October 24th, after the Senate rejected my attempts to restore

funding for the Andean Regional Initiative to the level which the administration had requested.

The Andean Regional Initiative represents our best strategy for fighting terrorism in this hemisphere. President Andres Pastrana and his administration have been leading a valiant fight against the narcotraffickers who have been threatening the economy, the society, the very civilization of the Republic of Colombia for more than two decades now.

In 2000, Congress approved the first installment of our commitment to Plan Colombia. President Bush correctly requested $731 million for Fiscal Year 2002, which would have broadened our involvement beyond military support and expanded this assistance to Bolivia, Ecuador and Peru.

The Senate bill would have cut this important strategic initiative by 22 percent, from $731 million to $567 million, which would endanger the progress we have made.

The conferees have agreed to fund the initiative at $660 million, which represents a reduction of $71 million from the President's request, but that is $93 million above the Senate's level.

While I remain concerned about what the impact will be on the program at the level of funding, it is an improvement to the Senate's position, so I am willing to vote for this conference report.

I also want to emphasize my support for other important priorities that are funded by this conference report—priorities that I in no way intended to disavow when I voted against the Senate version of the bill.

They include $2.04 billion in military grants and $720 million in economic grants for Israel in Fiscal Year 2002.

We have no stronger ally in the global war on terrorism than the State of Israel, and this aid recognizes Israel's key role in helping us protect our interests in the Middle East and around the world. I am profoundly grateful for the support and assistance that our good friends have provided, and I have no doubt that their assistance will continue well into the future.

They include a 22 percent increase in disaster aid, to $235 million.

The Global Fund to Fight HIV/AIDS, Malaria, and Tuberculosis—a new initiative for Fiscal Year 2002—receives $435 million from the Child Survival and Health Programs Fund and $40 million in other accounts.

They include $3.5 billion for the Agency for International Development (AID). This is $350 million above the administration's request and $210 million above fiscal year 2001.

And finally, there are several terrorism-related issues addressed in the Foreign Operations bill, including direct funding for two counter-terrorism programs; increased resources to meet physical security needs at USAID's overseas missions; aid restrictions for countries engaged in terrorist activities, and aid allocations for nations helping combat terrorism.

I am pleased to support the conference report, and I encourage my colleagues to do so.

Mr. LEAHY. Mr. President, we are about to pass the foreign operations conference report for fiscal year 2002. I want to again thank Senator MCCONNELL, Chairman BYRD, and Senator STEVENS for their support throughout this process.

I also want to recognize Chairman KOLBE, who worked extraordinarily hard to get this conference report passed in the House, and Congresswoman LOWEY, who was extremely helpful. This was a collaborative effort in every sense of the word.

Mr. President, the attacks of September 11th hold important lessons that are relevant to this conference report. They showed us how our security is directly and indirectly linked to events and conditions around the world.

With the exception of the cost of deploying our Armed Forces, the $15.3 billion in this conference report is what we have available to protect our security outside our borders.

These funds are used to combat poverty, which engulfs a third of the world's people who barely survive, and often succumb, on less than $2 per day. The misery, despair and ignorance that poverty breeds is unquestionably one of the reasons for the resentment felt by so many people toward the United States.

The funds in this conference report are used to protect the environment and endangered wildlife, to strengthen democracy and the rule of law, and to help prevent the proliferation of chemical, biological, and nuclear weapons.

We support agriculture research at American universities, and we promote exports through loans and guarantees for American companies competing in foreign markets.

Mr. President, we call these programs ''foreign assistance.'' They are held up as proof of America's generosity. But anyone paying attention can see that is only part of the story. These funds directly, and indirectly, protect our economy, our democracy, our national security. It is in our self-interest, plain and simple.

This conference report contains 1 percent of the total federal budget. On a per capita basis that amounts to about $40 per American citizen per year—the cost of a pair of shoes.

To use another example, next year we plan to spend about $150 million on children's education in poor countries where many children, especially girls, receive only a few years of schooling. That is less than most American cities spend on children's education, yet that is all we have for the whole world.

A year ago, some might have asked what children's education in Afghanistan or other countries has to do with America's security. Today it should be obvious. People who are educated, who can earn money to feed and clothe their families, and participate meaningfully in the political process, are not training to be terrorists.

For years, organizations working on the front lines in poor countries have appealed to the Congress and the administration to significantly increase the amount of funding to address the inter-related problems of population growth, poverty, political and economic instability, corruption, environmental degradation, narco-trafficking, and terrorism. Year after year, the Congress and the administration have turned a deaf ear.

Is it any wonder that Afghanistan today is a destroyed country that became a haven for terrorists?

Part of the problem is misconceptions about the foreign operations budget. People think it's some kind of give-away, when in fact, we use it to protect our security.

Mr. President, since September 11th, a large majority of the American public, and a broad, bipartisan cross-section of Members of Congress—Democrats and Republicans, liberals and conservatives—have called for substantial increases in funding to address the causes of poverty and disillusionment that persists not only in many Muslin countries, but among a third of the world's population.

We can no longer pretend that spending 1 percent of our $2 trillion Federal budget is a serious response to these national security needs. The widening gap between rich and poor nations is the best evidence of that.

Many have made these points before. Today they are a common refrain. Senators FEINSTEIN, GORDON SMITH, and I have introduced a resolution calling for tripling the foreign assistance budget. Others have proposed similar legislation. There have been numerous speeches, editorials, and other commentary.

Yet we have yet to see any effective response from the political process. Our foreign assistance budget—I would prefer to call it our international security budget—has fallen in real terms since the 1980s. Rumor has it that the President's fiscal year 2003 budget request for International Affairs will be at about the fiscal year 2002 level—in other words, business as usual, despite the lessons of September 11.

That would be extraordinary short sighted. We cannot possibly deal a lasting blow to international terrorism without a multi-prong strategy—addressing the social and economic causes of terrorism and conflict with foreign assistance, diplomacy, and law enforcement, and when necessary, military force.

Mr. President, the security of an American citizen is worth a lot more than the price of a pair of shoes, yet that is how much we are spending on the prevention part of this strategy. It is, frankly, ludicrous.

We argue over a few million dollars to alleviate the suffering in refugee camps, which are fertile grounds for terrorist recruits. We debate about another $5 or $10 million to help the

world's poorest families start businesses, to work their way out of poverty. We rob Peter to pay Paul to get a few more millions for children's education or programs to improve health care. We struggle, year after year, to increase funding for family planning and reproductive health to the level it was six years ago.

Have we so soon forgotten the lessons of September 11? We are the richest, most powerful nation in history, yet we continue to act as though the rest of the world barely matters to us.

We cannot put those lessons into effect without Presidential leadership. If President Bush, today, were to ask every American to support a tripling of our foreign operations budget, and he explained why it is important too our national security and to combating international terrorism, does anyone think the Congress would not respond or that the public would object? The polls show unequivocally that the public understands these issues.

This conference report is the best we could do with what we had, and we owe a debt of gratitude to Chairman BYRD and Senator STEVENS. But we need a multi-prong strategy if we are going to combat international terrorism and protect our other security around the world. I hope someone in the White House is listening, because this is what the President should be saying to America and the world.

Mr. President, I want to briefly mention a few of the important provisions in this conference report.

It provides sufficient funding for the Export Import Bank to support export financing well above the fiscal year 2000 level. This is of great importance to American companies who compete for markets in developing countries.

It provides increases for the Foreign Military Financing and International Military Education and Training programs.

It includes additional funding for international peacekeeping and for assistance for the former Yugoslavia, including Serbia, Montenegro, and Macedonia.

It includes $475 million for the prevention and treatment of HIV/AIDS, including $50 million for the Global Fund to combat AIDS, TB and malaria. This falls short of what our country should be providing, but it is a significant increase above last year's level.

The conference report also increases funding for other infectious disease and children's health programs. These programs are desperately needed to strengthen the capacity of developing countries to conduct surveillance and respond to diseases like polio and measles. But they are equally important for combating the spread of biological agents used in acts of terrorism, like anthrax.

It includes $625 million for the Andean Counterdrug Initiative. This is in addition to the $1.3 billion for Plan Colombia that we appropriated last year. We include several conditions on our assistance to the Colombian Armed Forces, and on the aerial spraying of chemical herbicides which are used to eradicate coca.

The conference report provides $34 million for the UN Population Fund, and $446.5 million for USAID's family planning and reproductive health programs. Although still less than what the United States was providing for these activities in the mid-1990's, it is an increase above the fiscal year 2001 level. With 100 million new births each year—95 percent of which are in developing countries many of which cannot feed their people today, these programs are of vital importance in combating poverty.

The conference report contains the usual earmarks for the Middle East countries. It also continues various limitations or restrictions on assistance to several governments beyond those I have already mentioned, where there is a history of corruption or human rights violations that have gone unpunished.

Mr. President, I want to again thank Senator MCCONNELL for his invaluable help.

Mr. LEVIN. Mr. President, we have before us, the foreign operations, export financing, and related programs bill, H.R. 2506, for fiscal year 2002. This bill is the primary legislative means by which this body can review the U.S. foreign aid budget. That has always been an important task, but the events of September 11th have only enhanced the importance of examining our priorities and international commitments as we seek to stop international terrorism while continuing to promote democracy, the rule of law and free markets throughout the world.

The events of September 11th have caused the United States to re-examine its relations with many nations including Armenia and Azerbaijan. For nearly a decade, our relations with these two nations has been shaped by section 907 of the FREEDOM Support Act, 102–511. Section 907 has restricted aid to Azerbaijan until it ceases the blockade and use of force against Armenia and Nagorno-Karabagh. Section 907 has been seen as a vital tool in the efforts to encourage Armenia and Azerbaijan to resolve the dispute over Nagorno-Karabagh in a peaceful manner.

In spite of the vital role section 907 has played in trying to end the blockade of Nagorno-Karabagh, H.R. 2506 will allow the President to waive section 907 only with respect to our immediate crisis, the international was against terrorism. It is my hope that the President will not use this waiver given the important role section 907 plays in encouraging a cessation of this blockade that threatens the peace and stability of the entire Caucasus region.

I am heartened by the fact that Congress will review the waiver to section 907 in the FY 2003 Foreign Operations Appropriations bill and will be closely monitoring Azerbaijan's actions and progress in the Nagorno-Karabagh peace process.

In addition, I am particularly pleased that Armenia will receive significant military financing and training assistance and it is my hope that in the long run, this balanced approach will speed the Nagorno-Karabagh process.

I would like to express my gratitude to Senators LEAHY and MCCONNELL for their hard work with regard to this bill. In addition, I would like to recognize the input of those individuals and organizations from the Armenian-American community who understand the importance of America's efforts to combat terrorism in the aftermath of September 11th.

Mr. MCCONNELL. Mr. President, I thank my colleagues for their patience as the final negotiations on the FY 2002 foreign operations bill came to a conclusion only this week.

The conference report reflects a compromise between both sides of the aisle in the Senate, and with our House colleagues. Let me take a brief moment to underscore a few accomplishments in the bill:

Conferees accepted the Senate amendment—which was painstakingly reached with the help of Senator BROWNBACK—permitting counter terrorism assistance to Azerbaijan, while protecting the integrity of section 907 of the FREEDOM Support Act. This will ensure that America's war on terrorism can be waged effectively—but not at the expense of the ongoing negotiations between Armenia and Azerbaijan. I thank all the conferees for understanding the delicate balance struck on this important issue, and I want to recognize the unabashed patriotism of the Armenia-American community in supporting the Senate's language.

Conferees accepted, with modifications, the Senate amendment providing $10 million for programs and activities to promote democracy, human rights, the rule of law, women's development, and press freedoms in countries with a significant Muslim population, and where such programs would be important to America's war on terrorism. I strongly urge the administration to act quickly in supporting activities relating to the welfare and status of Afghan women, and to explore initiating women's development programs along border areas where Afghan refugees are located.

Conferees maintained, with modifications, House language requiring the President to report to Congress on whether the Palestinian Liberation Organization, PLO, has lived up to its 1993 commitments to renounce the use of violence against Israel. My colleagues may recall that the Senate did not offer a similar provision—at the request of Secretary of State Colin Powell—but inclusion of this provision in the conference report could not be more timely. I am disheartened and sickened by continued incidents of terrorism against the people of Israel. The stakes are high for Chairman Arafat, and his political life is on the line.

Arafat needs to get a grip on the extremists he has given free reign on the West Bank and Gaza. As we say in Kentucky, you reap what you sow.

Finally, I want to express my continued frustrations with Egypt over its less than enthusiastic support for America's war against terrorism, lackluster performance to further the peace process between Palestinians and Israelis, and continued anti-American and anti-Semitic drivel in its government-controlled press. I have said it before, and I will say it again: the Egyptians need to be a better ally to the United States. It is not acceptable to purchase No-Dong missiles from North Korea. It is appalling to accuse the United States of fattening up the people of Afghanistan before slaughtering them. And it is beyond the realm of human decency that the song ''I hate Israel'' by Shaaban Abdel Rahim is a popular hit in Egypt. Each of these actions will be carefully considered during next year's appropriations process.

Let me close my remarks by thanking Chairman BYRD, Senator STEVENS, and all the members of the Foreign Operations Subcommittee for their support of this bill. My staff and I look forward to working with Senator LEAHY and his capable crew—Tim Rieser and Mark Lippert—on the Fiscal Year 2003 foreign aid bill early next year. Finally, I extend my heartfelt thanks to Jennifer Chartrand, Billy Piper, and Paul Grove for their hard work throughout this challenging year.

Mrs. FEINSTEIN. Mr. President, I rise to express my sincere disappointment that the foreign operations conference report before us includes a provision that will suspend the certification process worldwide. This goes far beyond what this Senate passed just weeks ago.

The certification process is this Nation's best—and in many cases, only—mechanism to persuade problem nations to work with us as we try to stem the flow of illegal narcotics across our borders and onto our streets.

The purpose of the certification profess is not to punish any one individual country, but rather to hold all countries to a minimum standard of cooperation in the war against illegal drugs. In that regard, I believe it is the most effective system we have available to us. There simply is no alternative.

Many have tried to turn the certification issue into a simplistic clash between the United States and Mexico. To be sure, in the past that relationship has received the most attention.

But in fact, there are more than 30 countries that undergo an annual certification review under current law—including countries like Afghanistan, Syria, Iran, Burma, and even China.

Afghanistan, for instance, has been decertified 10 out of 12 times they have faced review. As a result, U.S. aid has been withheld from the Nation.

Burma, also, has been decertified 10 out of the 12 times it has faced review.

It is interesting to note that Mexico has never once been decertified.

So this is not a U.S.-Mexico issue. This is an issue affecting our global efforts to reduce the supply of drugs to the United States. Suspending the certification process worldwide means that countries failing to cooperate in the drug war will face no penalty for that failure. And that is a step we should not be taking.

Now is not the time to be letting up on the war on drugs.

The connection between terrorist and narcotics traffickers is real, and closer than ever before.

In Colombia, in Afghanistan, and in other places around the world, drug money helps terrorist organizations carry out violent, destructive, and even deadly acts of terror against citizens of the United States and other countries.

The Drug Enforcement Administration estimates that last year, Afghanistan supplied 70 percent of the world's opium. Money from the drug trade in Afghanistan helped keep the Taliban in power, and some of that money undoubtedly made it to the al Qaeda organization.

In Colombia, the FARC narco-terrorists make millions every year in extortion and protection money from drug traffickers. This money helps them maintain control over an area within Colombia the size of Switzerland, and funds activities that include kidnaping and even murder.

Even beyond the drug-terror connection, the drug trade around the world is ever-developing. Supplies of many drugs are near or at all time highs. In the last few years alone, the drug known as Ecstasy has become a virtual phenomenon among young people in this country, and is smuggled into the United States from countries as diverse as Mexico and the Netherlands, Belgium and Israel.

If anything, this administration and this Congress should be taking the certification process even more seriously—not moving to abandon it wholesale.

If anything, the real threat of decertification should be used more often as a tool to modify the behavior of problem nations, not less often.

To do as this conference report does and completely stop the certification process for all nations will essentially remove the one good means we have of encouraging foreign nations to work with us in reducing the supply of illegal drugs to the United States.

This moratorium is a mistake, plain and simple.

I do want to again stress that a partial moratorium is warranted, particularly for the government of Mexico. I believe that Mexican President Vicente Fox has shown a clear willingness to work with the United States in the drug war, much like the government of Colombia has over the last few years in the battle against strong drug cartels.

That is why a temporary moratorium on the certification process in this hemisphere makes some sense. And that is why I did not object to such a moratorium when this issue first came up on the floor of the Senate.

But expanding the moratorium to countries that have shown far less cooperation, and continue to do little to keep drug traffickers from producing drugs or moving drugs through their territory, is a step backward in the war against drugs.

I feel very strongly about this issue, and it is my belief that this provision may very well be an attempt by the opponents of the certification process to begin the process of dismantling certification altogether.

Well, let's just say that while I am happy to work with my colleagues to consider reasonable ways to address the certification issue—especially, in cases like Mexico, where the record may warrant changes—I intend to make sure that next year's foreign operations legislation does not reflect such a poorly conceived approach to this issue.

BIOTERRORISM

Mr. BYRD. While the Republican leader is on the floor, if I may change the subject, Senator PAT ROBERTS of Kansas proposed to me earlier seeking unanimous consent to pass a bioterrorism bill.

Mr. LOTT. Yes, bioterrorism.

Mr. BYRD. At that point, I didn't know about the bill and didn't know anything about it. I objected. I thought he was going to remain around. But I want to say to the Senate Republican leader that I have no objection. I have had my staff look at it, and I am advised by the staff and on reading this measure and contemplating it and understanding it, I certainly have no objection if the leader wants to call it up. That is the bill in which PAT ROBERTS of Kansas is interested.

Mr. LOTT. That is the bioterrorism legislation, I might say to the Senator from West Virginia. It has been very laboriously worked through by Senator CRAIG, Senator KENNEDY, and Senator FRIST. This is an area where we need to do more. This is only authorization. It would still be subject to the appropriations process. But it does authorize a great deal more activity in very critical areas such as public health service. And, of course, Senator ROBERTS also worked to get a food aspect of that in agriculture. Agriculture terrorism is an area where we have to be concerned, too.

I think it is good legislation. I appreciate Senator BYRD's making that observation and agreeing that we could move it. Once Senator REID returns to the floor, we will renew our unanimous consent request at that time.

Mr. BYRD. PAT ROBERTS came to my office earlier this year and explained the need for this kind of program.

Mr. LOTT. We need to do it because he has been in my office several times explaining it. I would like to get it done because I have heard enough to be convinced.

Mr. BYRD. I remove my objection.

VICTIMS' TAX RELIEF

Mr. LOTT. Mr. President, I do want to say on other matters that we passed this afternoon and on which we didn't get to comment too much, I am glad we did what we did with regard to victims' tax relief, the spouses who lost loved ones in the Twin Towers and at the Pentagon. I met with a group of them, most of them women, but a man also.

It was one of the most cheerful things I have experienced. These are women, most of them young women with children, some of them pregnant, some of them with no income right now; some of them hadn't gotten much in terms of charitable assistance. I was floored to learn that we taxed charitable contributions or receipts to individuals who had been hit by a disaster such as this. I think we should say as to the funds they receive from charitable contributions, these spouses who have lost their loved ones, not only should they not have to pay taxes on the charity they receive but no American should.

I have gone back and checked on the history now and found out how that happened. At one point there was a budget need for $10 billion. So they said, we can just do a tax on charitable receipts for 5 years and that will take care of this $10 billion hole.

So I am glad we did that. I appreciate that there were Senators from all over the country on other issues, such as Senator BAUCUS and the Senator from New York, who were willing to put aside very important issues to them to make sure we didn't leave this issue on the table.

TERRORISM REINSURANCE

Mr. LOTT. Mr. President, another issue I was very sorry we couldn't work out was the terrorism reinsurance. We should have moved that today. We should have moved it a month ago.

What happened was Senator GRAMM, Senator DODD, and Senator SARBANES came to agreement on a bill in the committee of jurisdiction, the Banking and Financial Services Committee. It had some limits on liability. But then it was basically taken away from those Senators, and they were told we were not going to do it that way.

The bill that Senator DASCHLE asked consent to move this afternoon did not have any limits on attorney's fees or any prohibitions on punitive damages. And Senator MCCONNELL then said: We should move the bill, but we should have at least a vote on whether or not there should be any limits on liabilities. That is all we were asking, not that it just be included, which it should have been because that was what was in the committee, but that we have an opportunity to vote on that.

And, by the way, as an old whip, I had counted the votes, and the votes were here in the Senate to pass that bill with no punitive damages allowed and some limits on liability.

Otherwise, we would have lawsuits being settled and attorney fees and punitive damages coming out of the Federal Treasury if we had a terrorist attack that invoked this terrorism reinsurance.

So I hope we don't have a situation at the end of the year where buildings will not be able to be built because they won't get loans because there won't be terrorism insurance. Maybe too much won't happen between now and the end of January or early February, but we need to address this issue. When we do, it should have some reasonable tort reform included, as the Federal tort claims law now provides.

One other brief point, and I will yield so others may speak. Mr. President, in the 29 years I have been in Congress, the House and the Senate, we have worked through a lot of difficult issues. We have committee action, we pass things in the House and Senate, we have intense negotiations in conference, but at some point we bring it to a conclusion and we pass it.

I have never seen an issue that more work went into than this stimulus package with no result. The President was personally involved. The President personally made concessions. The House and the Senate were involved. We set up a system of negotiators involving Senator BAUCUS, Senator GRASSLEY, and Senator ROCKEFELLER. We finally had a bill before us this afternoon that would provide stimulus for the economy, tax incentives for businesses, big and small, and for individuals to be able to keep a little more of their taxes, lowering the 27 percent tax bracket down to 25, helping people who make as low as $28,000 for an individual, and $40,000 for a couple—not exactly wealthy people, and not even middle income, if you get down to it—and assistance for unemployed, increased benefits for them, and a new precedent of health insurance coverage.

We could not even get it up to a vote. I believe if we would have had a vote on that issue today, there would have been 60 votes to override a point of order. I would not want to have to go back to my State and explain how I voted against a bill that provided additional unemployment compensation, health insurance coverage for the unemployed, expensing for small business men and women, and rate cuts for middle-income individuals. I don't think I could have defended that. Therefore, I would have voted for it, and I believe 60 or more Senators would have voted for it. But it is here.

I hope the economy begins to show continued growth. There is good news for the third week in a row. Unemployment claims are down. We have a robust, dynamic economy in America. Maybe it won't be needed. But if we come back in late January and February and it is still stumbling along, and we are not seeing positive signs of real recovery, we are going to have to revisit this issue.

We should also revisit the issue Senator DOMENICI raised—the payroll tax holiday—and put that in place of some of the other provisions in this bill. This bill is pretty expensive already. I think we need to take some things out of this bill. That would provide a quick, immediate impact on the economy. If we didn't collect that 12.4 percent payroll tax for 1 month on individuals and employers, that would have an impact immediately. So that may be something to which we will have to return.

There will be a lot of accusations back and forth as to why we didn't get it done, but I will say I think for the American people, no matter how it happened, it is a shame we didn't complete work on that piece of legislation.

I hope next year we will start on a positive note and pass a national energy policy bill, and pass an agriculture bill that has better policy in it than the one we considered, and also pass trade legislation that would help the economy. I think we can do those things, a lot of other good things, and a stimulus bill if the economy calls for it.

I yield the floor.

Mr. REID. Mr. President, on behalf of Senator BYRD, I yield back the 17 minutes he has. It is my understanding that Senator Lott has the authority to yield back the time of Senator MCCONNELL on the foreign operations bill.

Mr. LOTT. Yes, and I do so.

The PRESIDING OFFICER. Under the previous order, the conference report to accompany H.R. 2506 is agreed to and the motion to reconsider is laid upon the table.

Under the previous order, the Senator from Virginia is recognized for up to 5 minutes.

Mr. ALLEN. Mr. President, I spoke to Senator BAUCUS, and I know he has a measure he wants to discuss and, without objection, I would actually defer to Senator BAUCUS for his remarks he wanted to make if I may follow right behind Senator BAUCUS.

Ms. LANDRIEU. Reserving the right to object, I inquire of the Senator from Virginia and the Senator from Montana about the timeframe they are speaking of because I wanted to address the Senate on a matter different from the subject about which they want to speak.

Mr. BAUCUS. Mr. President, if I might answer the question posed, it is my intention that the matter I intend to bring up will probably consume 4, 5 minutes maximum.

Mr. REID. Mr. President, if I may ask the courtesy of my friends, Senator LOTT and I have something we have been trying to do all day. It will take a short time, a unanimous consent request.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Virginia?

Ms. LANDRIEU. I do object, Mr. President.

The PRESIDING OFFICER. Objection is heard.

Mr. ALLEN. Mr. President, I say to my friend from Montana, I would have liked to yield 5 minutes, but I had better take them.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

TERRORIST VICTIMS COURTROOM ACCESS ACT

Mr. ALLEN. Mr. President, I rise to discuss a bill we just passed, S. 1858. I thank my colleagues for their support: Senator KERRY, Senator NICKLES, Senator KENNEDY, and Senators WARNER, HATCH, and CLINTON. Particularly, I thank Senator NICKLES for he was of great help in getting this measure passed.

S. 1858 deals with the upcoming trial of Zacarias Moussaoui. Moussaoui has been charged in a six-count indictment with undertaking ''the same preparation for murder'' as the perpetrators of the September 11 attacks, but his alleged participation had been thwarted by his arrest the previous month in Minnesota. Now this measure is one that is helpful to all of us in that he is the only suspect with any direct connection with the most vile and horrific terrorist attack in our history.

There will be substantial interest in the trial of Mr. Moussaoui on the part of those who have been left behind, especially the families and loved ones of thousands who were killed on that dreadful day. By some estimates, there are as many as 10,000 or 15,000 victims who may have an interest in viewing this historic legal proceeding that will take place in the U.S. District Court for the Eastern District of Virginia in Alexandria.

The current policy of the Federal Judicial Conference does not permit the televising of court proceedings. I am supporting legislation that would give Federal judges such discretion. But until that legislation passes, we will not be able to address the interests of victims' families to view the proceedings in the Moussaoui trial.

In the past, exceptions have been made through congressional action, most notably allowing the closed circuit transmission of the trials of Timothy McVeigh and Terry Nichols from Denver to Oklahoma City, so that families in Oklahoma could witness the proceedings. That is where Senator NICKLES was especially empathetic and knowledgeable about how much this means to the victims' families.

This legislation, S. 1858, is modeled on the law that allowed the Oklahoma City victims to witness the McVeigh and Nichols trials, and this bill will extend the same compassionate access or benefit to the numerous victims and families of September 11.

The legislation calls for the closed circuit broadcast of the court proceedings to convenient locations in Northern Virginia; Los Angeles and San Francisco, CA; New York City; Boston; and Newark, NJ. Also ''with the amendment in such other locations as the court shall determine to be desirable,'' to use the exact language, and other locations the court may find desirable in their discretion.

The reason for the six places is that these are the sites of the terrorist attacks: the Pentagon and the World Trade Center, and the others are the sites where commandeered aircraft either departed or intended to arrive. Unfortunately, they did not. These locations obviously would have the greatest number of interested people and have victims in this attack.

The legislation allows those who the court determines to have a compelling interest but who are unable to attend because of expense and convenience or simply a lack of space in the courtroom to witness the trial.

The courtroom in Alexandria, VA, holds fewer than 100 people, and the sheer number of victims and others who meet the standard make it impossible for them to observe in person. While there is a great, deep wound for the larger society, the wound is deepest and most deeply and painfully felt by the survivors and families who lost loved ones.

I am glad we recognize in the Senate that we owe it to those victims' families to allow them to see this open proceeding which is directly related to the horrific event of September 11 that took the lives of their loved ones. In doing so, for those who want to watch the trials—others may not—for those who want to, it will begin to help them heal.

It is a right approach that a compassionate nation wants to provide to these victims' families. I thank the Senators for their support, not of this legislation but for their support of the families of these victims.

I yield back the remainder of my time. Thank you, Mr. President.

ORDER OF PROCEDURE

Mr. REID. Mr. President, I ask unanimous consent that following my unanimous consent requests the Senator from Montana be recognized for up to 5 minutes, the Senator from Louisiana for up to 5 minutes, and the Senator from Ohio for 10 minutes, as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

PUBLIC HEALTH SECURITY AND BIOTERRORISM RESPONSE ACT OF 2001

Mr. REID. Mr. President, with the attention of the Senator from Mississippi, Mr. LOTT, I ask unanimous consent that the Senate now proceed to H.R. 3448, which is at the desk.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H. R. 3448) to improve the ability of the United States to prevent, prepare for, and respond to bioterrorism and other public health emergencies.

There being no objection, the Senate proceeded to consider the bill.

Ms. LANDRIEU. I am very concerned about help for for-profit hospitals if they must deal with bioterrorist attack. Their services are critical, and they face the same challenges as other hospitals. They should be eligible for Stafford Act assistance under certain circumstances.

Mr. KENNEDY. I understand the concerns of my colleague. In many places for-profit hospitals are the only providers. I will work with her to address these legitimate needs in conference.

FOOD SAFETY

Mr. DURBIN. Mr. President, I am pleased that the sponsors of the bill recognize the importance of strengthening our Nation's protections for food safety and of addressing potential bioterrorist threats against our food supply. Among the bill's provisions are new authorities for the Food and Drug Administration to require the maintenance of food records, to inspect such records, and to detain unsafe foods.

I would appreciate clarification regarding the standard of serious adverse health consequences or death, which applies to the authorities for inspection of records and administrative detention, among others. It is my understanding that some have suggested that foodborne pathogens such as salmonella, listeria monocytogenes, shigella dysenteriae, and cryptosporidium parvum, which in 1993 sickenened over 400,000 people in Wisconsin who drank contaminated water, may not pose a threat of serious adverse health consequences to healthy adults. Most of these pathogens have been identified by the CDC as possible biological agents that could be used in an attack against our citizens, and they could clearly pose a threat of serious adverse health consequences or death to vulnerable populations, such as children, pregnant women, the elderly, transplant recipients, persons with HIV/AIDS and other immunocompromised persons.

Do the sponsors intend for the standard in this bill, cited in the sections on inspection of records, administrative detention, debarment, and marking of refused articles, to enable the Food and Drug Administration to act when a foodborne pathogen presents a threat of serious adverse health consequences or death to such vulnerable populations mentioned above, even if healthy adults may not face the same risk? And do the sponsors agree that the pathogens I mentioned previously may present such a risk of serious adverse health consequences or death? I believe we must ensure that the law is fully protective of all American consumers. I hope that the sponsors share my concerns.

Mr. KENNEDY. Will the Senator from Illinois yield?

Mr. DURBIN. I am happy to yield to the Senator from Massachusetts.

Mr. KENNEDY. First, I commend my colleague for his longstanding advocacy for food safety. He has been a

leader, both in the House of Representatives and here in the Senate, in seeking the resources, the authority and the public awareness which will reduce the yearly epidemic of foodborne illness. The CDC has estimated that foodborne diseases cause approximately 76 million illnesses, 325,000 hospitalizations, and 5,000 deaths in the United States each year.

I also point out that he has played an instrumental role, with our colleagues, Senator MIKULSKI, Senator COLLINS, and Senator CLINTON, in assuring that food safety is addressed in this legislation.

In response to my colleague's inquiry, I fully concur with his interpretation of the food safety provisions in our legislation. It is precisely our intent, with respect to the food safety sections of this bill, that the standard of serious adverse health consequences or death with respect to these provisions in this bill should be understood to enable the FDA to protect all Americans, including vulnerable populations such as children and the elderly.

I agree that there are instances where foodborne pathogens, such as those mentioned by my colleague, whether accidentally or deliberately introduced into food, may threaten some more vulnerable individuals but not the healthy adult population. For that reason, my colleague is correct that the agency would be able to exercise these food safety authorities to protect such vulnerable populations.

Mr. FRIST. Will my colleague yield?

Mr. KENNEDY. With pleasure.

Mr. FRIST. I concur with Senator KENNEDY's remarks regarding this standard as it applies to the food safety provisions in this bill. As 21 C.F.R. 7.41 regarding health hazard evaluation makes clear, the FDA evaluation will take into account a list of factors, one of which is ''an assessment of hazard to various segments of the population, including children, livestock, etc. who are expected to be exposed to the product being considered with particular attention paid to the hazard to those individuals who may be at greatest risk.''

I believe these provisions will help protect the safety and security of our food supply.

Mr. DURBIN. I appreciate my colleagues' willingness to clarify these important points, and join them in supporting this important legislation.

ANTITRUST EXEMPTION

Mr. WELLSTONE. Mr. President, I am a cosponsor of this legislation because it is extremely important, but as I noted when the bill was originally introduced, I am concerned about the scope of the antitrust exemption.

I have three concerns in particular: There is no opportunity for public comment prior to the granting of an exemption; the period of exemption is too long; and the criteria for granting the exemption are too broad with respect to competitive impact on areas not directly related to the agreement.

Mr. KENNEDY. I understand my colleague's concerns and commend him for his commitment to protecting consumers. His concerns are legitimate and I will work to improve these provisions in response to his concerns in the conference.

COMBATING BIOTERRORISM

Mr. JEFFORDS. Mr. President, and my distinguished colleagues, I am pleased that we are moving so quickly on legislation to combat bioterrorism—this is certainly a timely issue.

I would like to engage my colleagues in a colloquy to clarify our commitment to another important issue—the security of our Nation's water supply. At the end of October of this year, I was joined by the ranking member of the Environment and Public Works Committee in introducing S. 1593 and S. 1608. S. 1593 authorizes the Administrator of the Environmental Protection Agency to establish a grant program to support research projects on critical infrastructure protection for water supply systems. S. 1608 establishes a program to provide grants to drinking water and wastewater facilities to meet immediate security needs.

I understand that the gentleman from Tennessee, the gentleman from Massachusetts and the gentleman from New Hampshire support the modified provisions of these bills. Is that correct?

Mr. FRIST. That is correct.

Mr. KENNEDY. Yes, that is correct.

Mr. GREGG. Yes, that is correct because in the interest of time, we are unable to change the bill prior to conference.

Mr. SMITH. I too would like to thank Senator FRIST, Senator KENNEDY, and Senator GREGG for agreeing to work with us to ensure these two proposals are included in the bioterrorism proposal. I regret that with the end of session quickly approaching, there is no time to incorporate these provisions into the underlying bill. As we all recognized in our support for these proposals, since the September 11 attacks, Americans throughout the country have become concerned about the security of our Nation's water supply. While it is widely believed that our water supply is safe, there are a few vulnerabilities that must be addressed. Our bills would provide resources for research into security at facilities and assessment tools while also providing seed money to encourage additional spending on security measures.

Mr. JEFFORDS. Our colleagues on the House side also recognized this need by including water security provisions in the bioterrorism bill, H.R. 3448, that was passed by the House on December 12. I would like my colleagues' assurance that during conference they will press for adoption of the modified versions of S. 1593 and S. 1608.

Mr. KENNEDY. I intend to press for adoption of these provisions. The security of our Nation's water supply is crucial to the health and well-being of our citizens.

Mr. GREGG. I concur, and I intend to press for adoption of these provisions.

Mr. FRIST. I agree and you have my commitment to do the same.

Mr. SMITH. I again would like to thank my colleagues for agreeing to fight for these provisions during conference. It was with great reluctance that Senator JEFFORDS and I agreed to allow S. 1765 to be brought to the floor without our legislation included so that we can move forward on this important bill and conference it with the House. However, it is important that these immediate needs be addressed and that our proposals be included in the final legislation. I look forward to working with my colleagues to ensure that the provisions we agreed to that comprise the modified versions of S. 1593 and S. 1608 are included in the bioterrorism bill.

Mr. JEFFORDS. Finally, I want to commend Senators KENNEDY, FRIST, and GREGG and say that I am looking forward to working with them during the conference on these measures.

Mr. KENNEDY. Mr. President, I urge the Senate to approve this important bipartisan legislation to respond to one of the most severe dangers our country faces, the grave threat of bioterrorist attacks. I commend my colleagues Senator FRIST and Senator GREGG for their impressive continuing leadership on this vital issue.

We are all well aware of the emergency we face. In recent weeks, a handful of anthrax cases stretched our health care system to the breaking point. A larger attack could be a disaster, and the attack of the past weeks has clearly sounded the alarm. The clock is ticking on America's preparedness for a future attack. We've had the clearest possible warning, and we can't afford to ignore it. We know that lives are at stake, and we're not ready yet.

The Department of Health and Human Services has made anthrax vaccine available to workers at risk for exposure to the deadly spores, but there has been few plans to distribute the vaccine and inform workers about the risks and benefits of vaccination. In a major outbreak, our public health agencies and hospitals would be strained to the breaking point by the task of providing vaccinations against anthrax, smallpox, or other deadly plagues to thousands or even millions of Americans. Some cities have already developed plans and procedures for providing care to patients affected by bioterrorism, but too few communities are adequately prepared.

The needs are great. A summit meeting of experts on bioterrorism and public health concluded that $835 million was needed just to address the most pressing needs for public health at the State and local levels.

The National Governors Association has said that States need $2 billion to improve readiness for bioterrorism. John Hopkins Hospital is spending $7.5 million to improve its ability to serve as a regional bioterrorism resource for

Baltimore. Equipping just one hospital to this level in each of 100 cities across America would cost $750 million.

The Appropriations Committee has recognized the importance of significant investments in bioterrorism preparedness. The Department of Defense conference bill provides as important down payment for the Nation's needs for bioterrorism preparedness. I commend Senator BYRD, Senator STEVENS, Senator INOUYE, Senator HARKIN, and Senator SPECTER for their impressive leadership in this area. In particular, they have begun to address the basic issue of State and local preparedness and the readiness of hospitals to deal with bioterrorism by providing $1 billion for these purposes.

The need for help at the State and local level is especially urgent. In the first 3 weeks of October alone, state health departments spent a quarter billion dollars responding to the anthrax attack. Many departments were forced to put aside other major public health responsibilities.

Massachusetts has suspended many public health activities other than bioterrorism, and has fielded over 2,000 calls from worried residents, each one taking half an hour of time for personnel. South Dakota has had to suspend an investigation of serious food poisoning outbreak to investigate rumors of anthrax attacks, even though no actual attack appears to have occurred. The Georgia Health Department has spent 3,000 person-hours just in 1 week on anthrax.

Hospitals across the country have immediate needs. According to the American Public Health Association, hospitals are hard-pressed even during a heavy flu season, and could not cope with a lethal contagious disease like smallpox.

The Bioterrorism Preparedness Act we are proposing will address these deficiencies. It provides new resources for bioterrorism preparedness to the States under a formula that guarantees help to each State. These resources will be available to improve hospital readiness, equip emergency personnel, enhance State planning, and strengthen the ability of public health agencies to detect and contain dangerous disease outbreaks.

The need is great at the State and local level, but gaps need to be addressed at the Federal level too.

So far, we have had only a handful of patients diagnosed with anthrax, but our resources have been stretched to the breaking point. We can't afford further delays in meeting these critical needs.

Ft. Detrick, one of our two national reference laboratories, processed over 19,000 samples after the attacks began, and they are already stretched to the limit.

The story was the same at CDC. Usually, a few dozen CDC experts respond to a disease outbreak. But CDC assigned nearly 500 specialists to the anthrax attacks. One out of eight employees at CDC headquarters in Atlanta is working on the current outbreak. Staffers worked round the clock and slept in hallways and only 18 cases of actual illness was known.

In a recent article, CDC Director Koplan summed up the situation this way:

> Right now, we are working flat out. I keep thinking, if you know you;re in a marathon, you pace yourself for a marathon; if you know you're in a sprint, ou pace yourself for a sprint. But our guys are sprinting, and the sprint distance is long over. We're sprinting a marathon.

The diversion of resources to anthrax has also led to the neglect of other important health priorities. According to a recent article in the Chicago Tribune, CDC has had to postpone programs to prevent meningitis among college students. They've delayed the development of vaccines urgently needed to combat diseases in the developing world. They've deferred activities to contain the spread of deadly infections resistant to antibiotics. Hawaii is facing a serious outbreak of dengue fever. When local health authorities asked CDC to analyze lab samples, they were told that no facilities were available due to the anthrax outbreak. Instead, the Hawaii doctors had to send their important samples to a lab in Puerto Rico for analysis.

Dr. David Satcher, the Surgeon General, recently said that the country ''should be ashamed of the condition of the laboratories of the CDC.'' These vital national resources, he said, were without power for 15 hours during the early days of the anthrax outbreak. Computers are covered in plastic to protect them from leaky roofs, and termites have chewed holes through laboratory floors.

Dr. Satcher is right to call this problem a national disgrace. We cannot continue to expect the CDC to do a first class job, if we provide only third-rate facilities.

Clearly, our legislation is an important downpayment on preparedness. But we must make sure that our commitment to achieving full readiness is sustained in the weeks and months to come.

Since September 11, the American people have supported our commitment of billions of dollars and thousands of troops to battle terrorism abroad. But Americans also want to be safe at home. We have an obligation to every American that we will do no less to protect them against terrorism at home than we do to fight terrorism abroad.

Federal stockpiles of antibiotics, vaccines, and other medical supplies are an essential part of the national response. We have a strategic petroleum reserve to safeguard our energy supply in times of crisis. We need a strategic pharmaceutical reserve as well, to ensure that we have the medicines and vaccines stockpiled to respond to bioterrorist attacks. Our legislation establishes this reserve, and authorizes the development of sufficient smallpox and other vaccines to meet the needs of the entire U.S. population.

The legislation will also help protect the safety of the food supply, through increased research and surveillance of dangerous agricultural pathogens.

Our legislation draws on the work and suggestions of numerous colleagues on both sides of the aisle. One of the important areas addressed in the legislation is the threat of agricultural bioterrorism. Deliberate introduction of animal diseases could pose rave dangers to the safety of the food supply. Such acts of agricultural bioterrorism would also be economically devastating. The outbreaks of ''mad cow'' disease in Europe cost over $10 billion, and the foot and mouth outbreak cost billions more. We must guard against this danger.

Protecting the safety of the food supply is a central concern in addressing the problem of bioterrorism. Senator CLINTON, Senator MIKULSKI, Senator HARKIN, Senator COLLINS, and Senator DURBIN have all contributed thoughtful proposals about food safety. Our bill will enable FDA and USDA to protect the Nation's food supply more effectively.

We are grateful for the leadership of other Senators who have made significant contributions to this legislation. Senator BAYH and Senator EDWARDS contributed important proposals on providing block grants to States, so that each State will be able to increase its preparedness. Their proposals ensure that each state will receive at least a minimum level of funding.

We are also grateful for the contributions that many of our distinguished colleagues have made to meet the special needs of children. Senator DODD, Senator COLLINS, Senator CLINTON, Senator DEWINE and Senator MURRAY have emphasized the crucial needs of children in any plan to deal with bioterrorism. The legislation includes significant initiatives to provide for the special needs of children and other vulnerable populations.

The events of recent weeks have also shown the importance of effective communication with the public. Our legislation incorporates proposals offered by several of our colleagues on improving communication. Senator CARNAHAN has recognized the importance of the internet in providing information to the public. The legislation includes the provisions of her legislation to establish the official Federal internet site on bioterrorism, to help inform the public.

Senator MIKULSKI also contributed provisions on improving communication with the public. A high-level, blue-ribbon task force can provide vitally needed insights on how best to provide information to the public. Senator MIKULSKI also recommended ways to ensure that states have coordinated plans for communicating information about bioterrorism and other emergencies to the public.

The Centers for Disease Control and Prevention have a leading role in responding to bioterrorism. Senator CLELAND has been an effective and skillful advocate for the needs of the CDC. Our legislation today incorporates many of the proposals in his legislation on public health authorities.

Hospitals are also one of the keys to an effective response to bioterrorism. We must do more to strengthen the ability of the Nation's hospitals to cope with such attacks. Senator CORZINE has proposed to strengthen designated hospitals to serve as regional resources for bioterrorism preparedness. I commend him for his thoughtful proposals, which we have incorporated in the legislation.

We must also ensure that we monitor dangerous biological agents that can be used for bioterrorism. There is a serious loophole in current regulations, and we are grateful for the proposals offered by Senator DURBIN and Senator FEINSTEIN to achieve more effective control of these pathogens.

In a biological threat or attack, mental health care will be extremely important. We are indebted to Senator WELLSTONE for his skillful and compassionate advocacy for the needs of those with mental illnesses. In the event of a terrorist attack, thousands of persons would have mental health needs, and our legislation includes key proposals by Senator WELLSTONE to meet these needs.

Mobilizing the Nation's pharmaceutical and biotech companies so that they can fully contribute to this effort is also critical. Senator LEAHY, Senator HATCH, Senator DEWINE, and Senator KOHL made thoughtful contributions to the antitrust provisions of the bill, which will help encourage a helpful public-private partnership to combat bioterrorism.

This legislation is urgent because the need to prepare for a bioterrorist attack is urgent. I urge my colleagues to approve this legislation, so that the American people can have the protection they need.

Mr. FRIST. Mr. President, I am thankful to be able to come to the floor today, along with many of my colleagues, to announce the Senate passage of the Frist-Kennedy Bioterrorism Preparedness Act of 2001. Over the past several weeks, we have been working in a bipartisan manner to address this critical issue, and I am grateful for the work of Senators GREGG, KENNEDY, and others. Everyone has worked very hard to get us to this point, and I will continue to work with them in conference to ensure final passage of this crucial legislation.

I am also thankful for the work of my colleagues to ensure that there is an appropriate level of funding for bioterrorism preparedness and response activities that will be available immediately. I commend Senators STEVENS, BYRD, SPECTER, INOUYE, and ROBERTS and others for their strong support in securing the necessary funding. With the passage of the latest appropriations bills, we have secured well over $2.5 billion for bioterrorism activities in addition to those provided for agroterrorism. I am also pleased with the level of funding for State and local preparedness and response activities—at least $1 billion—which is one of my top priorities.

However, our efforts cannot end when the funding is secured. We must provide greater guidance and authorities through an authorization bill, which is why final passage of a bioterrorism authorization bill is equally important. Both the House and the Senate have signaled the need for increased authorization with the passage of the Tauzin-Dingell Public Health Security and Bioterrorism Response Act of 2001 and the Frist-Kennedy Bioterrorism Preparedness Act of 2001. We must work together in conference to ensure final passage.

A variety of increased authorizations are necessary to protect our food supply, prevent agroterrorism, develop appropriate countermeasures, and ensure appropriate State and local preparedness and response. For example, in the Frist-Kennedy Bioterrorism Preparedness Act of 2001, we have greatly expanded the ability to protect our Nation's food supply by increasing authorities for the Department of Agriculture and the Food and Drug Administration.

We need to ensure that our food supply is safe. With 57,000 establishments under its jurisdiction and only 700–800 food inspectors, including 175 import inspectors for more than 300 ports of entry, the Food and Drug Administration (FDA) needs increased resources for inspections of imported food.

Our legislation grants FDA needed authorities to ensure the safety of domestic and imported food. It allows FDA to use qualified employees from other agencies and departments to help conduct food inspections. Any domestic or foreign facility that manufactures or processes food for use in the U.S. must register with FDA. Importers must provide at least four hours notice of the food, the country of origin, and the amount of food to be imported. FDA's authority is made more explicit to prevent ''port-shopping'' by marking food shipments denied entry at one U.S. port to ensure such shipments do not reappear at another U.S. port.

This bill also gives additional tools to FDA to ensure proper records are maintained by those who manufacture, process, pack, transport, distribute, receive, hold or import food. The FDA's ability to inspect such records will strengthen their ability to trace the source and chain of distribution of food and to determine the scope and cause of the adulteration or misbranding that presents a threat of serious adverse health consequences or death to humans or animals. Importantly, the bill also enables FDA to detain food for a limited period of time while FDA seeks a seizure order if such food is believed to present a threat of serious adverse health consequences or death to humans or animals. The FDA may also debar a person who engages in a pattern of seeking to import such food.

This important legislation also includes several measures to help safeguard the nation's agriculture industry from the threats of bioterrorism. Toward this end, it contains a series of grants and incentives to help encourage the development of vaccines and antidotes to protect the nation's food supply, livestock, or crops, as well as preventing crop and livestock diseases form finding their way to our fields and feedlots.

It also authorizes emergency funding to update and modernize USDA research facilities at the Plum Island Animal Disease Laboratory in New York, the National Animal Disease Center in Iowa, the Southwest Poultry Research Laboratory in Georgia, and the Animal Disease Research Laboratory in Wyoming. Also, it funds training and implements a rapid response strategy through a consortium of universities, the USDA, and agricultural industry groups.

No one has worked harder on these agricultural provisions than my colleague Senator ROBERTS. I know he understands deeply the threat that we face in these areas and has helped provide real leadership in pointing the way to solutions.

Additionally, the Frist-Kennedy ''Bioterrorism Preparedness Act of 2001'' expands our nation's stockpile of smallpox vaccine and critical pharmaceuticals and devices. The bill also expands research on biological agents and toxins, as well as new treatments and vaccines for such agents and toxins.

Since the effectiveness of vaccines, drugs, and therapeutics for many biological agents and toxins often may not ethically be tested in humans, this crucial legislation ensures that the FDA will finalize by a date certain its rule regarding the approval of new priority countermeasures on the basis of animal data. Priority countermeasures will also be given expedited review by the FDA.

Because of the limitations on a market for vaccines for these agents and toxins, our legislation gives the Secretary of HHS authority to enter into long-term contracts with sponsors to ''guarantee'' that the government will purchase a certain quantity of a vaccine at a certain price.

This legislation also provides a limited antitrust exemption to allow potential sponsors to discuss and agree upon how to develop, manufacture, and produce new priority countermeasures, including vaccines, and drugs. Federal Trade Commission and the Department of Justice approval of such agreements is required to ensure such agreements are not anti-competitive. I appreciate the work of Senator HATCH and his advice in crafting the antitrust language.

These FDA authorities and market incentives—which can only be provided

by additional authorizing legislation—are critical to the rapid development of vaccines and other countermeasures. I want to thank Senators HUTCHINSON and COLLINS for their important work with this portion of the bill.

Both the House and Senate bills also include protections, similar to those currently provided to those who join the National Guard, to help protect the employment rights of medication volunteers within the National Disaster Medical Response System (NDMS). The bills also extend necessary liability protections to those volunteers. Senator ENZI provided beneficial advice about how to craft this portion of the legislation.

Moreover, both bills contain additional measures to assist with the tracking and control of biological agents and toxins. With respect to the control of biological agents and toxins, the Secretary of Health and Human Services is required to review and update a list of biological agents and toxins that pose a severe threat to public health and safety and to enhance regulations regarding the possession, use and transfer to such agents or toxins.

Again, these needed protections will not go into effect until we pass authorizing language.

Although the ''Public Health Threats and Emergencies Act of 2000'' established basic grant programs to assist with strengthening the public health infrastructure, the language was based on the assumption that each year five more states would receive enough money to be prepared for a bioterrorist attack. Given the recent set of events, we cannot wait 10 more years for our public health infrastructure to be strengthened.

We must put in place a mechanism to ensure that every state has sufficient funding to improve their public health infrastructure so that they are able to respond to a potential biological attack.

I agree that we must provide resources necessary to develop smallpox and other needed vaccines, drugs, and biologics to counter potential biological agents. But it is even more important that we provide needed resources to those who will be on the front-lines in responding to a potential attack. Hospitals and other medical facilities must become better prepared to respond and to deal with the public health emergency after such an attack. And doctors, nurses, firefighters, police, and emergency medical response personnel need better training and equipment to combat biological threats and provide needed treatment.

Therefore, the two new grant programs included in the ''Bioterrorism Preparedness Act''—the State Bioterrorism grant program and the Designated Bioterrorism Response Medical Center program—are essential.

Finally, our legislation would also ensure that we enhance coordination among local, state and federal agencies responsible for responding to a biological attack, and that this response appropriately deals with the special needs of children and other vulnerable populations.

Almost half of all public health departments serve jurisdictions whose emergency response plans do not address incidents of bioterrorism. Agencies have not determined a single list of biological agents likely to be used in a biological attack, several agencies have not been consulted in crafting the list or determining an overall emergency response plan, and agencies have developed programs to provide assistance to state and local governments that are similar and potentially duplicative.

The Bioterrorism Preparedness Act of 2001 establishes an Assistant Secretary for Emergency Preparedness at HHS to coordinate all functions with the Department relating to emergency preparedness, including preparing for and responding to biological threats or attacks. It also creates a federal interdepartmental Working Group on Bioterrorism that consolidates and streamlines the functions of two existing working groups first established under the ''Public Health Threats and Emergencies Act of 2000.''

Recent reports regarding the treatment of children during the anthrax scare, including the cutaneous anthrax case in a 7 month old boy, have highlighted the need to more fully address the special needs of children when responding to bioterrorism attacks. Within the Frist-Kennedy ''Bioterrorism Preparedness Act of 2001,'' numerous provisions were added to specifically address this critical issue, with the emphasis on streamlining the language so that the children's health and welfare issues were considered in concert with the general provision of services. These provisions include a specific reference that the vaccines, therapies and medical supplies within the stockpile appropriately address the health needs of children and other vulnerable populations; requiring the Working Group to take into consideration the special needs of children and other vulnerable populations; establishing the National Task Force on Children and Terrorism—an advisory committee of child health experts on infectious disease, environmental health, toxicology, and other relevant professional disciplines—to offer advice to the Secretary; along with other crucial additions. I want to thank Senators DODD, DEWINE, COLLINS, and CLINTON for their assistance in crafting appropriate language to address the special needs of children and other vulnerable populations.

Along with my colleagues, I am appreciative of the steps we have taken thus far to ensure that we are prepared to respond to biological threats or attacks, and I look forward to continuing to work with them to ensure final passage of bioterrorism authorization legislation. I want to thank Senator JEFFORDS and Senator BOB SMITH for their input and advice regarding water safety and how we should more adequately protect our nation, Senators SESSIONS and SHELBY for their important input on the various training activities, and Senator LIEBERMAN for his crucial input regarding our disease surveillance and coordination infrastructure. I look forward to continuing to work with all of the Senators and their staff.

I must also commend Senator KENNEDY again for his efforts. He has been a true partner on this bill and the Frist-Kennedy ''Public Health Threats and Emergencies Act of 2000,'' which we signed into law last year.

Finally, I want to thank my staff—Allen Moore, Dean Rosen, Helen Rhee, Craig Burton, Allison Winnike, and Shana Christrup—as well as the staff of other Senate offices for all of their efforts, including Vince Ventimiglin, Katy French and Steve Irizarry of Senator GREGG's staff; David Nixon, David Bowen, David Dorsey, and Paul Kim of Senator KENNEDY's staff; John Mashburn of Senator LOTT's staff; Stacey Hughes of Senator NICHLES' staff; Abby Kral of Senator DEWINE's staff; Claire Bernard and Priscilla Hanley of Senator COLLINS' office; Kate Hull of Senator HUTCHINSON's staff; Raissa Geary of Senator ENZI's staff; Laura O'Neill of Senator SESSION's office; Debra Barrett and Jim Fenton of Senator DODD's staff; and Bruce Artim and Patty DeLoatche of Senator HATCH's staff. Their tireless work has been essential in assisting us in getting this far.

Mr. LIEBERMAN. Mr. President, I rise to discuss the Senate's action this evening on bioterrorism. Today, the Senate has taken an important step toward improving the Nation's ability to prepare for, and respond to, the threat of bioterrorism by adopting legislation, authored by Senator KENNEDY and Senator FRIST, and of which I am a cosponsor. The Senate bill, S. 1765, recognizes that any meaningful improvement in this area must begin with improvements in the Nation's public health system, a fact underscored by a series of hearings conducted by the Committee on Governmental Affairs on bioterrorism earlier this year. As a result of those hearings, I believe that there are several areas in which the Senate bill could be further strengthened especially in terms of the way the Federal Government's efforts to combat bioterrorism are organized. In anticipation of Senate consideration, I prepared an amendment to the original Kennedy/Frist bioterrorism bill, S. 1715, to address these concerns. However, given Senate's interest in acting on this important measure before adjournment, I agreed to defer offering this amendment at this time. I do, however, believe that the underlying issues need to be addressed

Specifically, I would like to see additional attention given to bioterrorism within the Centers for Disease Control and Prevention, CDC. The underlying bill recognizes the need to strengthen

CDC bioterrorism role. Currently, CDC's bioterrorism activities are currently coordinated by the Bioterrorism Preparedness and Response Program within the National Center for Infectious Diseases. While many of the agents of concern are infectious diseases, many are not, including toxins and chemical agents. Even more to the point, many of the elements of the CDC bioterrorism program actually reside in other Programs and Centers. The pharmaceutical stockpile program resides within the National Center of Environmental Health. The Health Alert Network is in the Public Health Practices Program. Surveillance and detection activities are in the Epidemiology Program Office. Coordination of these activities, competition for resources, and line authority is a major problem. The importance and unique nature of the bioterrorism mission also requires creation of a separate ''intellectual'' center.

The underlying bill also recognizes both the importance of expanding the role of HHS within the Government to provide leadership on bioterrorism preparedness and response. In addition, it recognizes the need to coordinate such activities within the many parts of HHS, including FDA, CDC, OEP, NIH, etc. The amendment would codify basic government management responsibilities and tools for the new Assistant Secretary position including agency performance measures, performance evaluation capability, technology verification.

Detection is key to responding to bioterrorism attacks. Although health agencies have surveillance systems, they do not rely upon standard methodologies or real-time data collection. Though some States and localities have also begun to incorporate ''syndromic'' indicators, this practice is not widespread or standardized and they are not integrated into other health data systems. CDC is working on development of a new internet-based system, the National Electronic Disease Surveillance System, NEDSS, but its deployment is many years in the future. The amendment establishes an accelerated deployment schedule, including the development of data collection and reporting protocols, in consultation with state and local health agencies.

CDC has initiated an internet-based Health Alert Network to provide real-time information to state and local health officials. Unfortunately, a number of States are not yet included in the network and very few county and municipal health departments are included. The amendment would establish an accelerated schedule for deployment.

Lack of interoperability of communication systems, and more recently in IT systems, is a long-standing problem in emergency response among federal agencies, much less between federal and state agencies. The underlying bill recognizes the need for better interagency coordination through the creation of an interagency working group. The amendment would specifically charge the group with addressing interoperability of IT and communication systems and give the Secretary of HHS authority to provide technical and financial support to resolve such problems.

The amendment would require the Secretary of HHS to contract with the Institute of Medicine to analyze the response of the public health system of the recent anthrax attacks and provide a ''lessons-learned'' report to help guide improvements at the federal, state, and local level.

Finally, I would note that the House bill also recognizes the need to improve our public health surveillance and communications systems. The House bill also seeks to incorporate performance measures as part of expanded bioterrorism program in a manner similar to what I propose. Now that Senate has acted, I look forward to working with the conferees to ensure that our Nation is prepared for meeting this new threat.

I ask unanimous consent that the amendment that I was prepared to submit, be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO.—

On page 11, between lines 19 and 20, insert the following:

''(d) NATIONAL CENTER FOR BIOTERRORISM.—There is established within the Centers for Disease Control and Prevention a National Center for Bioterrorism, to develop, manage, and provide scientific and medical capabilities to prepare for, and respond to, bioterrorism attacks, including—

''(1) analyzing and applying intelligence and threat assessment information to the preparation, development and stockpile of vaccines, antibiotics and other pharmaceuticals, medical training, and other preparation and response capabilities;

''(2) detecting biological and chemical agents, detecting and conducting surveillance, and making a diagnosis of related diseases;

''(3) disease investigation and mitigation; and

''(4) the provision of guidance to Federal, State, tribal, and local officials, concerning preparation for and response to bioterrorism attacks.''.

On page 13, strike line 3.

On page 13, line 7, strike the period and insert a semicolon.

On page 13, between lines 7 and 8, insert the following:

''(3) coordinate the standards and interoperability of information technology and communications systems within the Department of Health and Human Services and among Federal, State, tribal, and local health officials and health service providers relevant to emergency preparedness and biological threats or attacks;

''(4) develop and maintain advanced health surveillance systems to provide early warning of natural disease outbreaks or bioterrorist attacks to Federal, State, tribal, and local health officials and to aid response management; and

''(5) develop and maintain a program to continuously evaluate the capabilities and vulnerabilities of the national health and emergency preparedness plans and systems to identify and respond to natural disease outbreaks or bioterrorist attacks, including the establishment of performance measures.

''(c) EVALUATION GROUP AND EXERCISES.—

''(1) IN GENERAL.—The Assistant Secretary for Emergency Preparedness shall establish an evaluation group, to be composed of at least 10 individuals who are experts on public health preparedness and bioterrorism from both within and without the federal government, to test and evaluate the capabilities and vulnerabilities of the national health and emergency preparedness plans and systems to identify and respond to natural disease outbreaks or bioterrorist attacks on a continuous basis, including the conduct of local, regional, and national-scale exercises.

''(2) ANNUAL REPORT.—At least annually, the evaluation group established under paragraph (1) shall prepare and submit to the Secretary and to the Committee on Health, Education, Labor and Pensions, the Committee on Governmental Affairs, and the Committee on Appropriations of the Senate and the Committee on Energy and Commerce, Committee on Government Reform, and the Committee on Appropriations of the House of Representatives a report concerning the results of the tests and evaluations conducted under paragraph (1).

''(d) PERFORMANCE MEASURES.—

''(1) IN GENERAL.—Not later than 1 year after the date of enactment of this title, the Assistant Secretary for Emergency Preparedness, in cooperation with the evaluation group established under subsection (c)(1), shall establish a system of performance measures to evaluate responses to bioterrorism threats and vulnerabilities. Such system shall establish benchmarks and evaluate the corresponding roles and performances of agencies with responsibilities for bioterrorism responses in Federal, State, tribal, and local governments.

''(2) REPORT.—Not later than 30 days after the date on which the system is established under paragraph (1), the Assistant Secretary for Emergency Preparedness shall prepare and submit to the Secretary, and to the appropriate committees of Congress, a report concerning the performance measures and evaluations developed as a part of the system.

''(3) REVISIONS.—The Assistant Secretary for Emergency Preparedness, in cooperation with the Evaluation Group, shall periodically review and revise the performance measures developed under paragraph (1) and promptly report any revisions to the Committee on Health, Education, Labor and Pensions, the Committee on Governmental Affairs, and the Committee on Appropriations of the Senate and the Committee on Energy and Commerce, the Committee on Government Reform, and the Committee on Appropriations of the House of Representatives.

''(e) TECHNOLOGY VERIFICATION.—The Assistant Secretary for Emergency Preparedness shall establish a technology verification group from among relevant agencies of the Federal Government, including the Department of Defense, the Centers for Disease Control and Prevention, the Federal laboratories, and the National Institute for Standards and Technology. Such group, in consultation with appropriate representatives of the private sector, shall—

''(1) evaluate, test, and verify the performance of promising technologies for reducing and responding to bioterrorism threats;

''(2) make recommendations to relevant Federal, State, and local agencies for the acquisition of successful technologies that can significantly reduce bioterrorism threats; and

''(3) prepare and submit to the Committee on Health, Education, Labor and Pensions,

the Committee on Governmental Affairs, and the Committee on Appropriations of the Senate and the Committee on Energy and Commerce, the Committee on Government Reform, and the Committee on Appropriations of the House of Representatives, a report concerning the recommendations made under paragraph (2).

On page 17, between lines 8 and 9, insert the following:

''SEC. 2815. NATIONAL HEALTH SURVEILLANCE SYSTEM.

''(a) ESTABLISHMENT.—

''(1) IN GENERAL.—The Secretary, acting through the Assistant Secretary for Emergency Preparedness, shall establish a National Health Surveillance System that utilizes computerized information systems and the Internet to provide early warning of natural disease outbreaks or bioterrorist attacks to Federal, State, tribal, and local health officials and assist such officials in response management.

''(2) USE OF EXISTING SYSTEMS.—Such system, to the maximum extent feasible, shall utilize existing health care data systems of primary care providers, health insurance and reimbursement programs, and other sources of health information including those maintained by Federal, State, tribal and local health agencies.

''(b) DATA AND INFORMATION STANDARDS.—Not later than 12 months after the date of enactment of this title, the Assistant Secretary for Emergency Preparedness, in cooperation with medical providers and State and local public health officials, shall identify the nature and manner of health surveillance data to be compiled for purposes of subsection (a) and shall establish standards and procedures to ensure the standardization and interoperability of such data.

''(c) COLLECTION AND ANALYSIS CAPABILITY.—As soon as practicable, but not later than 36 months after the date of enactment of this title, the Assistant Secretary for Emergency Preparedness shall establish the mechanisms and information systems necessary for the collection and rapid real time evaluation of data transmitted for purposes of subsection (a) concerning public health and bioterrorist emergencies, and provide such evaluations on at least a daily basis to Federal, State, tribal, and local public health and emergency authorities.

''(d) ASSISTANCE TO STATE AND LOCAL HEALTH AGENCIES AND HEALTH CARE PROVIDERS.—The Assistant Secretary for Emergency Preparedness may provide technical, material, and financial assistance to State, tribal, and local public health agencies, health providers, and other entities that the Assistant Secretary recommends participate in the surveillance system developed under this section.

''(e) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $120,000,000 for fiscal year 2002 to carry out this section.

''SEC. 2816. NATIONAL HEALTH ALERT NETWORK.

''(a) IN GENERAL.—The Secretary, acting through the Assistant Secretary for Emergency Preparedness, shall establish and maintain a National Health Alert Network, that utilizes, to the maximum extent practical, advanced information and Internet technology.

''(b) REQUIREMENTS.—The network established under subsection (a) shall—

''(1) be capable of the timely transmission of emergency medical information and information identifying potential and ongoing public health and bioterrorism emergencies to all appropriate Federal health authorities, to all State and local public health authorities, and to hospitals and other medical practitioners in affected areas; and

''(2) include data on the medical nature of the emergency, recognition of disease symptoms, the possible scope of infections, recommended treatments, the sources and availability of appropriate medicines, and such other data as may be recommended by the Secretary.

''(c) IMPLEMENTATION OBJECTIVES.—Not later than 180 days after the date of enactment of this title, the Secretary shall ensure that all State public health departments are connected to the network established under subsection (a). Not later than 1 year after such date of enactment, the Secretary shall ensure that all municipal public health agencies in municipalities with populations larger than 250,000 persons, as well as all county and tribal public health agencies, are included in the network.

''(d) ASSISTANCE TO STATE AND LOCAL HEALTH AGENCIES.—The Secretary may provide technical, material, and financial assistance to State and local public health agencies, health providers, and other entities that the Assistant Secretary for Emergency Preparedness recommends for participation in the network.

''(e) REPORTING REQUIREMENT.—The Secretary shall prepare and submit to the appropriate committees of Congress reports describing the progress made by the Secretary in implementing the network described in subsection (a). Such reports shall be submitted—

''(1) not later than 1 year after the date of enactment of this title;

''(2) at such times as the Secretary determines to be appropriate after the completion of each phase of the implementation objectives described in subsection (c); and

''(3) annually thereafter as determined appropriate by Congress.

''(f) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $100,000,000 for fiscal year 2002 to carry out this section.''.

On page 19, line 3, strike ''Section'' and insert ''(a) IN GENERAL.—Section''.

On page 21, line 8, strike ''and''.

On page 21, line 11, strike the period and insert ''; and''.

On page 21, between lines 11 and 12, insert the following:

''(11) coordinate and standardize data and communication systems and requirements to ensure the interoperability and seamless data transmission necessary to prepare for, identify, assess, and respond to health emergencies and bioterrorist attacks, including the National Health Surveillance System and the National Health Alert Network.

On page 23, between lines 16 and 17, insert the following:

''(c) TECHNICAL ASSISTANCE AND GRANTS TO ENSURE INTEROPERABILITY.—

''(1) IN GENERAL.—The Secretary, in consultation with the working group, may provide technical and financial assistance to a public or private entity to ensure the interoperability and seamless transmission of data and communications deemed necessary to prepare for, identify, assess, or respond to a health emergency or bioterrorism attack.

''(2) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $25,000,000 for fiscal year 2002 to carry out this subsection.''.

(b) FORMAL INQUIRY INTO ANTHRAX ATTACKS AND BIOTERRORISM PREPAREDNESS.—

(1) IN GENERAL.—Not later than 45 days after the date of enactment of this Act, the Secretary of Health and Human Services shall enter into a contract with the Institute of Medicine of the National Academy of Sciences for the conduct of a formal independent inquiry into the response of the United States to anthrax attacks throughout the United States Postal System and the state of preparedness for other biological and chemical threats, including the recommendations described in paragraph (2).

(2) COMPLETION AND REPORT.—The inquiry conducted under paragraph (1) shall be completed not later than 270 days after the date on which the contract under such paragraph is awarded. Not later than 30 days after the date on which such inquiry is completed, the Secretary of Health and Human Services shall submit to the appropriate committees of Congress a report concerning the results of such inquiry, including the recommendations of the Institute of Medicine concerning the preparedness of the United States for future bioterrorism attacks (including recommendations for both occupational and public safety).

Mr. BIDEN. Mr. President, the final day of a legislative session often brings a flurry of activity as bills get unjammed, compromises emerge, and the Senate produces progress on important issues. Depending upon one's perspective, these last-minute actions include both good things and bad things. Nevertheless, I think we all can agree that today's passage of the Bioterrorism Preparedness Act is a real accomplishment in improving America's homeland defense. This bill authorizes $3.25 billion for comprehensive measures to take the first step in improving our nation's capability, in the event of a biological weapons attack, to respond quickly, contain the attack, and treat the victims. I want to applaud Senators KENNEDY and FRIST for coming together in a bipartisan spirit and displaying real leadership in drafting this bill.

When Sam Nunn testified in early September before the Foreign Relations Committee on the threat posed by biological weapons, he was very clear—bioterrorism is a direct threat to the national security of the United States and we need to invest the necessary resources to counter this threat accordingly. As troubling as the recent spate of anthrax by mail attacks was, we were very fortunate that this was a comparatively small-scale attack. Eighteen Americans contracted inhalation or cutaneous anthrax; unfortunately, five individuals died. The next time a biological weapons attack occurs, we may not be so fortunate in dealing with a small number of victims who emerge over a period of weeks and months. Instead, we may face thousands of victims flooding local emergency rooms and overwhelming our hospitals in a matter of hours.

Let's be real here—the anthrax attacks, as small-scale as they may have been, have greatly stressed our national public health infrastructure. One out of eight Centers for Disease Control employees at their headquarters in Atlanta is working on the current anthrax outbreak, forcing the CDC to sideline other essential core activities for the time being. Folks, what we have just been through is small potatoes compared to what we potentially will face. Plain and simple, we can't afford to be so under-prepared in the future.

Among Sam Nunn's recommendations for countering biological terrorism, he declared, ''We need to recognize the central role of public health and medicine in this effort and engage these professionals fully as partners on the national security team.'' There are many good things in this bill, ranging from the expansion of the National Pharmaceutical Stockpile to efforts to enhance food safety, but I am especially pleased that the Bioterrorism Preparedness Act provides direct grants to improve the public health infrastructure at the state and local level. Our doctors, nurses, emergency medical technicians, and other public health personnel are our eyes and ears on the ground for detecting a biological weapons attack. We can't afford not to do everything we can to make sure they have the necessary tools and resources in containing any BW attack. This bill goes a long way toward fulfilling that core commitment.

So I am very pleased the Senate today has passed the Bioterrorism Preparedness Act and I look forward to a quick reconciliation of this bill with counterpart House legislation early next year. When this bill was introduced, I had expressed my serious concern that it was ignoring the international aspects to any effective response to potential bioterrorism. As Chairman of the Foreign Relations Committee, I know that we cannot address the threat of bioterrorism within the borders of the United States alone. A biological weapon attack need not originate in the United States to pose a threat to our nation. A dangerous pathogen deliberately released anywhere in the world can quickly spread to the United States in a matter of days, if not hours. The scope and frequency of international trade, travel, and migration patterns offer unlimited opportunities for pathogens to spread across national borders and even to move from one continent to another. Therefore, I continue to believe we need to view all infectious disease epidemics, wherever they occur, as a potential threat to all nations.

It is for this reason that, when the Bioterrorism Preparedness Act was being drafted, Senator HELMS, the distinguished Ranking Member on the Foreign Relations Committee, and I had worked together in seeking to insert provisions in this bill to enhance global disease monitoring and surveillance. With Senator KENNEDY's strong backing, we had sought to ensure the full availability of information (i.e., disease characteristics, pathogen strains, transmission patterns) on infectious epidemics overseas that may provide clues indicating possible illegal biological weapons use or research. Even if an infectious disease outbreak occurs naturally, improved monitoring and surveillance can help contain the epidemic and tip off scientists and public health professionals to new disease that may be used as biological weapons in the future.

The World Health Organization (WHO) established a formal worldwide network last year, called the Global Alert and Response Network, to monitor and track infectious disease outbreaks in every region of the world. The WHO has done an impressive job so far working on a shoestring budget. But this global network is only as good as its components—individual nations. Many developing nations simply do not possess the personnel, laboratory equipment or public health infrastructure to track disease patterns and detect traditional and emerging pathogens. In fact, these nations often just seek to keep up in treating those who have already fallen ill.

Doctors and nurses in many developing countries only treat a small fraction of the patients who may be ill with a specific infectious disease—in effect, they are only witnessing the tip of a potentially much larger iceberg. According to the National Intelligence Council, governments in developing countries in Africa and Asia have established rudimentary or no systems at all for disease surveillance, response or prevention. For example, in 1994, an outbreak of plague occurred in India, resulting in 56 deaths and billions of dollars of economic damage as trade and travel with India ground to a halt. The plague outbreak was so severe because Indian authorities did not catch the epidemic in its early stages. Authorities had ignored or failed to respond to routine complaints a flea infestation, a sure warning signal for plague.

Owing to the lack of resources, developing nations are the weak spots in global disease monitoring and surveillance. Without shoring up these nations' capabilities to detect and contain disease outbreaks, we are leaving the entire world vulnerable to either a deliberate biological weapons attack or an especially virulent naturally occurring epidemic.

For all of these reasons, Senator HELMS and I had worked together in proposing language to authorize $150 million in FY 1001 and FY 2003 to strengthen the capabilities of individual nations in the developing world to detect, diagnose, and contain infectious disease epidemics. The proposed title would have helped train entry-level public health professionals from developing countries and provide grants for the acquisition of modern laboratory and communications equipment essential to any effective disease surveillance network. Upon first glance, $150 million is chump change in a bill that authorizes more than $3 billion. But I have been assured by public health experts that $150 million alone can go a long ways in making sure that developing countries the basic disease surveillance and monitoring capabilities to effectively contribute to the WHO's global network. The bottom line is that these provisions would have offered an inexpensive, common-sense solution to a problem of global proportions.

I was greatly disappointed, therefore, when the White House expressed resistance to the language Senator HELMS and I had worked out and sought to drop it from the final bill. While voicing support for our ideas, the White House believed that the Bioterrorism Preparedness Act should only focus on domestic defenses against bioterrorism and was not the appropriate vehicle for the international programs we proposed.

I strongly disagreed. It doesn't make sense to draw artificial boundaries between ''domestic'' and ''international'' responses to bioterrorism. I have already pointed out that pathogens deliberately released in an attack anywhere in the world can quickly spread to the United States if we are unable to contain the epidemic at its source. The National Intelligence Council has concluded that infectious diseases are a real threat to U.S. national security. To ignore the international arena in favor of domestic solutions alone just doesn't make any sense.

Therefore, when the Bioterrorism Preparedness Act was introduced in November without any provisions to enhance global disease surveillance, I announced my intention to introduce an amendment to ensure this bill would enhance the capabilities of developing nations to track, diagnose, and contain disease outbreaks resulting from both BW attacks and naturally occurring epidemics. This week, the Senate leadership chose to move this bill under an unanimous consent procedure. I initially objected because I strongly believed the Senate should have an opportunity, at the very least, to vote on an amendment to incorporate global disease surveillance activities in the Bioterrorism Preparedness Act. But I understand the urgency of the moment. There is no greater vulnerability in our nation's defenses than against the threat of bioterrorism and it is the responsibility of Congress to act quickly to correct this deficiency.

Therefore, I have chosen, for now, to cease my effort to include this amendment in this bill. Office of Management and Budget Director Mitch Daniels today sent me a letter where he expresses appreciation for the proposals contained in this amendment and recognizes that ''International public health has a critical role to play in protecting the United States and our global partners''. Furthermore, Daniels highlights the Administration's intention to engage in discussions with myself and other interested colleagues on these proposals when the Congress reconvenes in January. I ask for unanimous consent that the full text of this letter be included at the end of this statement in the CONGRESSIONAL RECORD.

I expect the Administration to follow up on this letter by planning and budgeting for improved global pathogen surveillance in Fiscal Year 2003. The need is urgent and our ability to lessen the threat posed by bioterrorism is real.

The steps we take to combat bioterrorism overseas can keep diseases from reaching our shores and will give us vital early warning of new diseases and strains for which we must prepare.

Let me again salute today's passage by the Senate of the Bioterrorism Preparedness Act. While it does not include every essential proposal in enhancing our nation's bioterrorism defenses, it still accomplishes a great deal. If this bill becomes law, which I have no reason to doubt, it is my hope that the Congress will follow up next year with the necessary appropriations to carry out the programs authorized in this bill.

Let me close with an excerpt of testimony from the Foreign Relations Committee hearing on bioterrorism in September from Dr. D.A. Henderson, the man who spearheaded the international campaign to eradicate smallpox in the 1970's. Today, he is the director of the newly-formed Office of Emergency Preparedness in the Department of Health and Human Services, which has the mandate to help organize the federal government's response to future bioterrorist attacks. Dr. Henderson was very clear on the value of global disease surveillance: ''In cooperation with the WHO and other countries, we need to strengthen greatly our intelligence gathering capability. A focus on international surveillance and on scientist-to-scientist communication will be necessary . . .''

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC., December 20, 2001.

Hon. JOSEPH R. BIDEN, Jr.,
U.S. Senate,
Washington, DC.

DEAR SENATOR BIDEN: I very much appreciate the important proposals contained within Title VI of the Kennedy-Frist bioterrorism bill. International public health has a critical role to play in protecting the United States and our global partners from the threat of infectious disease.

As you are aware, the Administration supports the version of the Kennedy bill that does not include Title VI. These issues are critical, however, and I would very much like to resolve them outside the context of the current bioterrorism bill. Your willingness to discuss these matters in the future is critical to the movement of this important piece of legislation and I would welcome the opportunity to engage in these discussions at the beginning of the next session.

Thank you very much for your consideration of this request.

Sincerely,

MITCHELL E. DANIELS, Jr.,
Director.

ADDITIONAL BIOTERRORISM PREPAREDNESS ISSUES

Mr. HATCH. I would like to commend my colleagues, Senators FIRST, KENNEDY, and GREGG for their work in crafting the bipartisan Bioterrorism Preparedness Act. The Act takes a significant step forward in providing the necessary tools to combat future acts of bioterrorism.

Mr. FRIST. I thank the gentleman from Utah for his comments. On behalf of myself, Senator KENNEDY, and Senator GREGG, I also want to thank him for his significant contributions to the legislation, and for his support for this measure.

Mr. HATCH. I understand that there are efforts currently underway to pass this legislation by unanimous consent before the Senate adjourns for the year, and I strongly support those efforts. Because we are trying to clear this measure under a tight time frame, I also understand that there will not be an opportunity to make modifications to the text of the legislation prior to final Senate passage.

Mr. KENNEDY. That is correct.

Mr. FRIST. My friend from Utah is correct.

Mr. HATCH. Before Congress passes a final anti-bioterrorism law, I believe there are several important issues that must be addressed. Because there will not be an opportunity to address these matters before the Senate passes anti-bioterrorism legislation, I strongly believe that the House-Senate conference committee should: (1) permit the approval of priority countermeasures solely based on data from animal studies; (2) clarify the Health and Human Service Secretary's role and authority in distribution, and use of, priority countermeasures and other medical responses to bioterrorist attacks; and (3) provide additional enforcement provisions with respect to prohibiting the unlawful shipment, transportation, and possession of biological agents and toxins.

These issues have not been sufficiently addressed in the legislation before us. We must all recognize that this language the Senate is about to adopt has not been the subject of any congressional committee mark-up. While the extraordinary situation confronting our nation regarding biological attacks requires expeditious action, we also must ensure that there is flexibility in the conference committee to guarantee that novel and, frankly, evolving issues, concerning bioterrorism are adequately addressed. This is what happened during the House-Senate conference of the U.S.A. Patriot Act and, with diligence, we can duplicate that success again.

Mr. GREGG. I agree that the conference committee should address each of the issues that you have raised. I will actively work to ensure that these provisions are included.

Mr. KENNEDY. I concur with my colleague from New Hampshire.

Mr. FRIST. I also agree that these important issues should be addressed during a conference with the House of Representatives and we will call on the Senator from Utah to participate in discussions concerning these issues.

Mr. GREGG. I agree with my colleague from Utah that additional specificity with respect to the language on animal trials would be desirable, particularly with respect to clarifying that the FDA has the authority to promptly promulgate a final rule in this area. I also believe that the Secretary of Health and Human Services should have clear authority to prioritize the distribution of scarce countermeasures under certain circumstances. Finally, I believe there is great value in considering the inclusion in a final bill of intermediate enforcement authority with respect to the unlawful shipment, transport, possession, or other use of biological agents or toxins.

Mr. FRIST. I agree with Senator GREGG. The Senator from Utah can be assured that these issues will receive my active support during conference consideration of this measure.

Mr. KENNEDY. I also agree with Senator GREGG. I thank the Senator from Utah for bringing these important issues to the attention of the Senate. I will look forward to working with him in resolving these issues during the conference.

Mr. HATCH. I also request that my colleagues support the inclusion of provisions to establish an animal terrorism incident clearinghouse.

Mr. GREGG. I will actively support this provision.

Mr. FRIST. I concur with my colleague from New Hampshire.

Mr. KENNEDY. I also believe that this issue should be given serious consideration.

Mr. HATCH. I thank my colleagues for their comments. I look forward to working with them during the conference to ensure that this important legislation is passed by Congress so that our nation can be better prepared to meet the threat of bioterrorism and public health emergencies.

WATER SUPPLY SECURITY

Mr. JEFFORDS. Mr. President, and my distinguished colleagues, I am pleased that we are moving so quickly on legislation to combat bioterrorism—this is certainly a timely issue.

I would like to engage my colleagues in a colloquy to clarify our commitment to another important issue—the security of our Nation's water supply. At the end of October of this year, I was joined by the Ranking Member of the Environment and Public Works Committee in introducing S. 1593 and S. 1608. S. 1593 authorizes the Administrator of the Environmental Protection Agency to establish a grant program to support research projects on critical infrastructure protection for water supply systems. S. 1608 establishes a program to provide grants to drinking water and wastewater facilities to meet immediate security needs.

I understand that the Senator from Tennessee, the Senator from Massachusetts and the Senator from New Hampshire support the modified provisions of these bills. Is that correct?

Mr. FRIST. That is correct.

Mr. KENNEDY. Yes, that is correct.

Mr. GREGG. Yes, that is correct because in the interest of time, we re unable to change the bill prior to conference.

Mr. SMITH of New Hampshire. I too would like to thank Senator FRIST, Senator KENNEDY and Senator GREGG for agreeing to work with us to ensure these two proposals are included in the bioterrorism proposal. I regret that with the end of session quickly approaching, there is not time to incorporate these provisions into the underlying bill. As we all recognized in our support for these proposals, since the September 11th attacks, Americans throughout the country have become concerned about the security of our nation's water supply. While it is widely believed that our water supply is safe, there are a few vulnerabilities that must be addressed. Our bills would provide resources for research into security at facilities and assessment tools while also providing seed money to encourage additional spending on security measures.

Mr. JEFFORDS. Our colleagues on the House side also recognized this need by including water security provisions in the bioterrorism bill, H.R. 3448, that was passed by the House on December 12th. I would like my colleagues' assurance that during conference they will press for adoption of the modified versions of S. 1593 and S. 1608.

Mr. KENNEDY. I intend to press for adoption of these provisions. the security of our nation's water supply is crucial to the health and well-being of our citizens.

Mr. GREGG. I concur, and I intend to press for adoption of these provisions.

Mr. FRIST. I agree and you have my commitment to do the same.

Mr. SMITH of New Hampshire. I again would like to thank my colleagues for agreeing to fight for these provisions during conference. It was with great reluctance that Senator JEFFORDS and I agreed to allow S. 1765 to be brought to the floor without our legislation included so that we can move forward on this important bill and conference it with the House. However, it is important that these immediate needs be addresed and that our proposals be included in the the final legislation. I look forward to working with my colleagues to ensure that the provisions we agreed to that comprise the modified versions of S. 1593 and S. 1608 are included in the bioterrorism bill.

Mr. JEFFORDS. Finally, I want to commend Senators KENNEDY, FRIST, and GREGG and say that I am looking forward to working with them during the conference on these measures.

AMENDMENT NO. 2692

Mr. REID. Mr. President, I understand Senators FRIST, KENNEDY, and GREGG have a substitute amendment at the desk which is the text of S. 1765. I ask unanimous consent that the amendment be considered and agreed to and the motion to reconsider be laid upon the table; that the bill, as amended, be read a third time and passed, the motion to reconsider be laid upon the table; that the Senate insist on its amendment, request a conference with the House on the disagreeing votes of the two Houses, and that the Chair be authorized to appoint conferees on the part of the Senate, without intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2692) was agreed to.

(The text of the amendment is printed in today's RECORD under ''Amendments Submitted and Proposed.'')

Mr. LOTT. Mr. President, I thank Senator REID for moving this very important Bioterrorism Preparedness Act forward. I commend Senators FRIST, KENNEDY, and GREGG for their work. We intend to work with the House and get this passed quickly when we return. I thank Senator REID.

Mr. REID. I appreciate everyone's cooperation.

The Presiding Officer (Mr. CORZINE) appointed Mr. KENNEDY, Mr. DODD, Mr. HARKIN, Ms. MIKULSKI, Mr. JEFFORDS, Mr. GREGG, Mr. Frist, Mr. ENZI, and Mr. HUTCHINSON conferees on the part of the Senate.

MORNING BUSINESS

Mr. REID. Mr. President, I ask unanimous consent that the Senate now proceed to a period for morning business, with Senators allowed to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

TERRORISM INSURANCE

Mr. DASCHLE. Mr. President, it was regrettable today that we were unable to gain unanimous consent to take up H.R. 3210, the House terrorism insurance bill, and amend it with a substitute offered by the Senator from Connecticut, Mr. DODD. We made a good-faith effort to address a pressing need, but we found that some of our colleagues insisted on the consideration of amendments that would make it impossible to complete work on this issue in the short time this session of Congress had remaining.

In the wake of September 11th, a number of insurance companies are declining to provide coverage from losses that would result from a terrorist attack. Those policies that are available are often priced so high that they are unaffordable. Senator DODD's proposal would have given them the safety net they need to keep insuring against terrorist risks. In turn, that coverage would allow builders to keep building, businesses to keep growing, and, hopefully, prevent against further economic setbacks.

Our amendment was the product of extensive bipartisan negotiations. It was developed with extensive consultation with a number of Senate Democrats and Republicans—including Senator GRAMM—as well as the White House and the Treasury Department. I am especially appreciative of the enormous commitment of time and energy by the Senator from Connecticut, Mr. DODD, the Chairman of the Banking Committee, Mr. SARBANES, the Chairman of the Commerce Committee, Mr. HOLLINGS, the senior Senator from New York, Mr. SCHUMER, the junior Senator from New Jersey, Mr. CORZINE, and many others from both sides of the aisle.

While we were unable to reach agreement on every point, the proposal incorporated line-by-line suggestions by our colleagues from both sides of the aisle and the Administration. It represented a compromise.

It requires substantial payments by insurance companies before the federal government provides a backstop. The proposal would require the insurance industry to retain the responsibility to pay for up to $10 billion in losses in the first year, and up to $15 billion in losses in the second year or around 7 percent and 10 percent of their annual premiums for each affected company. This legislation would ensure stability in the insurance market so that businesses can afford to purchase insurance.

As this session of Congress drew to a close, and we were forced to operate in an environment that required unanimous consent agreements to do our business, I regret that we were unable to complete our work on this legislation.

Accordingly, the Senate will keep a watchful eye on the insurance market in the coming weeks, and we will take the appropriate action to respond to any problems that arise from the failure to gain approval for the measure we sought to pass today.

Mr. DODD. Mr. President, 3 months ago, our nation suffered devastating terrorist attacks. We are now confronted with one of the many aftereffects of the terrible events of September 11th on our nation. We are faced with the prospect that insurance protecting America's buildings, businesses, homes and workers from terrorist acts will no longer be available.

It is generally accepted that roughly 70 percent of insurance contracts are scheduled to be renewed by year's end. Already, many insurers have announced their intention to withdraw terrorism coverage from new insurance policies.

This is simply because primary insurers, who deal directly with policyholders, have been unable to, in the short term, purchase reinsurance from an unstable reinsurance market. Reinsurers are currently unwilling to write coverage in the face of future catastrophic losses equal in magnitude to those suffered at the World Trade Center.

Without the ability to purchase reinsurance, primary insurers cannot actuarially price policies that incorporate the assumption of catastrophic terrorist losses.

They are faced with two choices. They can seek permission from state

regulators to exclude terrorist acts from all of their policies. Or they can charge incredibly high premiums—rates are nearly certain to go up 500 to 1000 percent of what is presently required. No shareholder could be reasonably expected to allow their insurance company to underwrite the seemingly immeasurable exposure of a terrorist act without drastically raising rates.

Without federal action, we risk either the possibility that our Nation's economy will remain defenseless from a terrorist attack or the possibility that insurance companies will charge unaffordable rates to every American insurance consumer.

Several of us endeavored to draft legislation to provide a short-term remedy aimed to bring stability to the insurance market, to protect taxpayers, and to ensure that bank lending, construction, and other activities vital to our economic health would not be jeopardized.

It is deeply regrettable that this legislation will not be considered by the Senate prior to the end of this session. It is particularly regrettable because the reason that this legislation was not considered had nothing to due with the core issue of terrorism insurance; it had to do with liability reform. Deep-seated differences on the issue created an impasse. That is most unfortunate.

The legislation that Senator SARBANES, Senator SCHUMER and I offered was a modest proposal. It is based on three principles that must be included in any bill on this subject matter.

First, it makes the American taxpayer the insurer of last resort. The insurance industry maintains front-line responsibility to do what it does best: calculate risk, assess premiums, and pay claims to policyholders.

Second, it promotes competition in the current insurance marketplace. Competition is the best way to ensure that the private market assumes the entire responsibility for insuring against the risk of terrorism, without any direct government role, as soon as possible. This bill is a temporary measure only, lasting for 24 months at most.

Third, it ensures that all consumers and businesses can continue to purchase affordable coverage for terrorist acts. Without action, consumers may be unable to get insurance or the insurance available will be unaffordable.

I intend to watch the markets and the economy closely in the coming days and I am prepared to revisit this issue early next year if the need arises.

Mr. LIEBERMAN. Mr. President, I have one simple message regarding the terror insurance legislation. We need to act now, before we adjourn, and we need to get this right. I fear that if we don't act, or don't get this right, we will need to return early in January to address this problem. Unfortunately, it is now obvious that we won't enact this critical legislation. This is irresponsible.

Let me say clearly, my colleague from Connecticut, Senator DODD, should be commended for his valiant effort to secure an agreement. It is not his fault that this did not get done. He has had his eyes focused clearly on the goal line every day on this bill. He has been practical, energetic, tough, and patient. We are not able to act before we leave, but I want to congratulate Senator DODD for his valiant effort.

Let me explain why this issue is so important.

As part of their property and casualty insurance, many businesses have insurance against the costs that arise if their business is interrupted.

If we don't pass an effective terror insurance bill, the government will, in effect, cause massive interruption in the business community. We will create the interruption.

We could have avoided this result by passing this legislation.

Property and casualty insurance is not optional for most businesses.

Not every business owner buys life insurance, but nearly every business buys property and casualty insurance, to protect its property, to protect it against being sued, and to protect its employees under the state workers compensation laws.

Property and casualty insurance is required by investors and shareholders.

It is required by banks that lend for construction and other projects. We all know that home mortgage companies require the homeowners to maintain homeowners property insurance, and it's the same with business lending.

Maintaining property and casualty insurance is mandated as part of the fiduciary obligation to the business.

And if property and casualty insurance for major causes of loss is not available, businesses face a difficult choice about going forward with construction projects, and other ventures.

If no insurance is available, banks won't lend and the business activity that is depending on the loans will stop.

The impact on the real estate, energy, construction, and transportation sectors will be severe.

Insurance companies must be able to ''underwrite'' their policies. This means that they need to be able to assess their exposure or risk of a claim. They need to know if their exposure to claims is acceptable, excessive, or indeterminate.

In the case of claims for damages caused by terrorist strikes, there is no way to assess their risk and no way to underwrite the policy. There are too many uncertainties.

There is only one experience and the experience could not be more troubling.

One thing that is certain, as it was not before September 11, is that losses from terrorist acts can cost tens of billions of dollars. In fact, under worst-case scenarios, losses could easily reach hundreds of billions of dollars.

I recently introduced legislation focusing on the need to develop medicines to treat the victims of a bioterror attack. The Dark Winter exercise simulated a smallpox bioterror attack and it found that 15,000 Americans could die and 80 million could die worldwide. This is why it is so important to develop medicines we can use to contain the infections and deaths. My point here is that we could well have claims much larger than we had with the World Trade Center attack.

There are hundreds of insurers in any given market. It is a highly competitive industry.

But when reinsurers are not renewing their contracts without terrorism exclusions, many if not most of these companies will not be able to provide terrorism coverage—at any cost.

At the business decision level, each individual insurance company considering whether to issue policies that cover terrorism must assess the costs that might result if the terrorists succeed in massive and horrific attacks, perhaps in many areas at which the insurance company may insure various businesses.

Because no one knows where the terrorists might strike, insurers must ask questions like:

How much insured property value are we covering in a given location?

How many workers are we covering under workers' compensation laws, keeping in mind that workers' compensation death claims vary by state but are as high as $1 to 2 million dollars per claim in some jurisdictions, including here in the District.

What would we lose on business interruption claims if damage in a metropolitan area causes a large number of businesses to be shut down by the civil authorities?

What about multiple attacks in different locations?—keeping in mind the coordinated events on September 11.

Unfortunately, at the individual insurer level, capital is finite, and the companies that insure commercial businesses have already taken a major hit due to the September 11 losses, as well as having lost their reinsurance for terrorist acts.

Even a hypothetical good-sized company, one that would be in the top half dozen or so commercial insurers in the U.S., with perhaps 5 percent of the commercial lines market and capital of $7 or $8 billion, would have to ask, do we want to roll the dice on our very survival by writing terrorism coverage?

Because that is what they would be doing absent this legislation, particularly if they incurred a disproportionate share of the losses.

For example, if one or more events caused even $100 billion in insured losses, not that much more than the WTC, and they were lucky enough to have only 3–5 percent of the losses, they'd be severely crippled but might survive. But if their share of the losses was 8–9 percent, they'd be out of business.

That is not a risk that an insurance company can reasonably take. If we do

not pass this legislation, therefore, insurers will be forced to take whatever steps they consider necessary to ensure they do not drive themselves into bankruptcy.

Make no mistake about it. The insurance industry can protect itself by reducing its exposure to terrorism going forward.

There is nothing we can do in the Congress, within the limits of our Constitution, to require insurance companies to write policies.

They don't have to write policies.

If they don't write policies, the companies may not be as profitable in the short run, but they will at least be protecting themselves against insolvency, as any business has to do.

State regulators are already considering terrorism exclusions, as they must do, consistent with their responsibilities to oversee the solvency of the insurance industry.

And absent exclusions, in states where they might not be approved for one reason or another, the insurers will have no choice but to limit their business.

If insurance companies are permitted to write policies with no coverage for claims connected to terrorism, then businesses will have to decide if they will self-insure against these losses. Many of them will conclude that they cannot accept this exposure.

It is clear, therefore, that when we fail to pass this legislation, it will be both the insurance industry and everyone they insure that loses. Insurance companies can protect themselves by not writing policies, or writing only policies without any coverage for acts of terror. But companies that need insurance coverage may have even harsher options.

What will be the effect on individual businesses and ultimately the economic recovery if we do not pass this legislation?

At the individual company level, if a business in what appears to be a potential target area can only buy insurance with a terrorism exclusion, the owners would have to consider whether they want to commit new capital or even sell their current equity interests.

Banks would have to ask whether they could make new loans or perhaps even default existing loans and mortgages, based on their determinations that insurance without coverage for terrorism was unsatisfactory.

If insurers could not exclude terrorism and were forced to reduce their writing generally, the problem could be even worse, at least in whatever areas or for whatever types of business were considered most at risk.

Companies would find that they could not get coverage for their properties or their liability exposure or their workers' compensation liabilities, because insurers were no longer able to provide it.

This is why the real estate industry and a cross section of the business community have been pushing for this legislation.

So, the issue is how we enable insurance companies to determine that the risk of terrorist claims is a risk that they can assume.

That is what this legislation is all about, defining the risk so that insurers can assess and put a price on it.

This legislation is about facilitating insurance companies' ability to continue to write property and casualty insurance policies.

It is about providing business owners with the opportunity to buy insurance against terror claims and doing so in the private market to the extent that is possible.

This is, of course, not the first time we have faced this kind of an issue. The Federal Government has a history of partnering with the insurance industry to provide coverages for risks that are too big, too uninsurable, for the industry alone.

Current examples are the flood, crop, and nuclear liability programs, and in the past we've seen partnerships on vaccine liability and riot reinsurance. From an insurability standpoint, it is beyond dispute that these risks are far more insurable than terrorism, yet we continue to struggle on this bill.

First, the existing programs cover fortuitous or accidental events, unlike terrorism, in which the risk is manmade, with the perpetrators measuring success by how much damage they can cause and how many people they can kill. Second, the dollar exposures are far less under the existing programs. Average annual losses on these programs, flood, crop, and nuclear liability, are probably only about $5 billion combined, a full order of magnitude lower than the losses on September 11 alone.

Some might debate whether we should have passed the existing programs, or whether they are operated efficiently. But there should be no debate about the need for a terrorism program, and we have structured this one the right way, with retentions and loss sharing by the industry so the incentives are there for efficient operations.

This legislative effort has failed in part because there are some who would use this legislation as an opportunity to enact wide-ranging reform of the tort claims system. While I have supported tort reform in the past, it is clear that these reforms are not possible now. If these reforms are attached to the bill, as was the case in the House-passed bill and as proposed in the Senate, the bill will die. This is what has happened.

This legislative effort has failed in part because there are some who would use this legislation as an opportunity to use this legislation as an excuse to enact a wide-ranging and unprecedented venture in Federal regulation of the insurance industry. Some would, for example, seek to impose Federal Government price controls on the property and casualty insurance policies.

If such controls are added to this bill, it is clear that the bill will die. Price controls are obviously unacceptable to many in the Senate and clearly unacceptable to the other body.

A vote for price controls is a vote to collapse the property and casualty insurance market.

Price controls in this sector would distort markets, create incentives to vacate the marketplace, and stifle competition.

We do know that the cost of property and casualty insurance will rise.

The current rates do not contemplate claims for acts of terror. Like it or not, there will have to be price increases to cover the risk of terrorism. The World Trade Center attack was the biggest manmade casualty loss in history. It was the biggest by a multiple of 40 or 50.

The previous biggest manmade loss was the LA riots, which cost less than a billion dollars. The current estimates are that WTC will cost $40 to $50 billion or more.

The WTC losses exceeded the insurance industry's total losses for commercial property & liability coverage, general liability, and workers' compensation combined for the entire 2000 year.

Insurance companies cannot now cover this loss, and restore reserves, without price increases.

Insurance industry is one of the most competitive industries in the U.S.

If rates are rising too high, companies will be falling all over themselves to enter or re-enter the market.

But so far, all signs point in the opposite direction, with insurers and reinsurers running as fast as they can from this—hardly an indication that they're gouging and planning on realizing egregious profits.

There's a state regulatory system in place that can clamp down on rates if insurers overreach—and the bill leaves the state regulators with the full authority to disapprove rates that are excessive.

I can't think of a better way to do the opposite of what we want to do, to prevent the return of a terrorism insurance marketplace, than to impose price controls.

It is clear that the price of terror insurance will be less because of the Federal guarantee. If insurance companies were forced to write terror insurance without this guarantee, they would have to set a worst-case-scenario price. They would have to protect the company from insolvency. It is clear that these rates would make the insurance unaffordable.

Again, however, the problem is that companies would not be able to set a price because of the indeterminate nature of the risk.

This legislative effort has failed in part because there are some who would use this legislation as an opportunity to require the insurance companies to repay the government for its expenditures. This is the case in the House-passed bill.

While requiring payment is intuitively attractive, the financial assistance and payback mechanism in their

bill would discourage the return of a healthy private marketplace.

One of our most important objectives is to encourage the return to the marketplace of insurers and reinsurers. The problem with the House bill's financial assistance and payback approach is that it mutualizes the losses within the program itself, reducing incentives for private innovation in the development of pooling and reinsurance mechanisms. If we're going to sunset this program, we can't provide for mutualization of losses throughout its duration and then expect that there will be a healthy reinsurance market to the day after it terminates.

Even if we did not adopt the other body's first dollar mutualization concept, our objective of building a healthy marketplace, real work practicality considerations, and public policy all argue for not requiring industry payback.

First, a payback requirement would be contrary to our objective of developing a healthy marketplace. A payback requirement would, from day one, raise the specter that in the event of substantial terrorism losses, insurers would not only have to pay their share of the losses but would also have to go to their regulators for substantial rate increases to repay the government—with no guarantees that such rate increases would be allowed. That is not the way to facilitate a healthy marketplace.

Second, from a practical standpoint, let's also recognize that under our bill any government payments would not really go to insurers, that any repayments would not really come from insurers, and that it is the public in either event that will bear the cost of this program.

The government payments are all keyed to amounts paid to claimants, and any repayments would or at least should be funded by policyholders, either indirectly through subsequent rate increases or directly through policyholder surcharges.

Therefore, as long as an insurer's rates for terrorism coverage are based only on its deductible and quota share, government payments would not give a windfall to the insurers. That is of course how rates should be determined, since the state insurance commissioners will have the authority to disapprove excessive or unfairly discriminatory rates.

It is of course the public that will also bear the cost of this program whether or not we require insurers to pay back the government. The costs of any such repayments would ultimately be paid by commercial businesses, which would in turn pass the costs back to the customers, employees, and shareholders, which is to say back to the public.

Finally, from a public policy standpoint, I would refer you to the very simple fact that it is losses caused by terrorist attacks on our country that we are talking about here. It is the responsibility of the government to protect the people against attacks from without and within, and to the extent that terrorists succeed in causing losses that exceed our bill's insurance industry retentions, it is because the government has failed in this most fundamental responsibility. Of all the various programs through which the government and the insurance partner together to provide coverage for risks thought to be uninsurable, this one stands out as presenting the best case for a taxpayer role.

In terms of price, we know that every cent of any funds the Federal government contributes to pay claims will go to the insured, not to the insurance companies.

There is no Federal payment to any insurance company that does not go through to the victims.

This makes it very hard to understand the arguments some have made in the other body about the insurance companies repaying the amounts that the Federal government might contribute.

If the government contributions are passed through to the victims, what is the benefit to the insurance companies that needs to be paid?

Do the companies then increase their rates to cover the cost of the repayment?

If repayment is required, it would have to come, directly or indirectly, from the victims, not the insurance companies.

There are some who would seek to add provisions to the legislation focused on ''cherry-picking,'' that is seeking to reduce the risk of the portfolio of clients and load it with lower risk clients.

Insurance, like other financial services, is a very competitive business—and there are a variety of opportunities for large and small businesses to get coverage, with hundreds of insurers operating in any given market.

For the largest businesses, which are probably most at risk due to the staggering workers' compensation exposures they present, in addition to traditional insurers, there are sophisticated offshore, excess and non-admitted markets they can tap into, as well as other risk-spreading devices.

For the smaller companies, if coverage isn't available from standard private market insurers, most states have legislatively mandated market plans to provide workers' compensation and property insurance.

The insurance industry also has a long history of working together to form pools and reinsurance arrangements so risks that are too difficult for one company can be handled as they've done for aircraft, including those that were hijacked on September 11.

They can do this if we pass this bill to provide them the financial backstop they need.

The fact is that we do not have the expertise to step into this complex arena and set the controls to determine how coverage should be provided and to whom.

Since insurance regulation began, it's been the states that have done the job, and until such time as we're ready to change that and enact a federal regulatory scheme, we should be very careful about our involvement.

At the state level, insurance departments in each state are much closer to their markets, and they have the expertise and the leverage to assess the availability of insurance and to take appropriate steps if there are problems.

I am very disappointed in the failure to enact this legislation. I have supported my Connecticut colleague, Senator DODD, and will continue to work with him to enact this legislation as soon as possible in January. That we have failed to act in this session and may well see unfortunate consequences.

NEXTWAVE SETTLEMENT

Mr. HATCH. Mr. President, I rise to address the issue of wireless spectrum and the importance of its availability and utilization in a struggling economy. On November 28, 2001, the Administration forwarded proposed legislation to Congress to codify a proposed settlement in the NextWave wireless spectrum bankruptcy litigation. We needed to pass this legislation before December 31st in order to avoid nullifying the agreement. Unfortunately, it appears we will not be able to address this settlement before the end of the year because members of this body have expressed their intention to block its consideration on the floor. It is not certain that a similar settlement can be arranged next year—which leaves a significant financial return to the U.S. Treasury in doubt and denies viable industry actors access to essential wireless spectrum which could be a vital tool in jumpstarting the economy.

This is not the first time I have voiced my concerns about the NextWave spectrum controversy. In a letter to then Chairman Kennard of the Federal Communications Commission in October of 2000, I warned him that a premature re-auction of the NextWave licenses would be imprudent while litigation was still pending in the D.C. Circuit. The legal questions went directly to the possessory interests of the spectrum and the validity of the FCC's action to automatically cancel NextWave's licenses upon filing for bankruptcy. The FCC ignored my warning and, in so doing, created untold practical problems and a myriad of legal liability issues.

On June 22 of this year, the D.C. Circuit ruled in favor of NextWave, holding that the FCC violated Section 525 of the Bankruptcy Code. This order essentially nullified Auction 35 in which the FCC preemptively re-auctioned the spectrum licensed to NextWave. Presently, both sides have filed for certiorari with the Supreme Court to ask for

the final disposition of this case. However, there is no certainty that the Supreme Court will agree to review the case, or if it does, when or to whom it will ultimately award the licensing rights to the spectrum. In fact, given the D.C. Circuit's opinion and legal reasoning, there is a substantial likelihood that the FCC will not prevail, which may be why they were able to reach the settlement of this issue.

After extensive negotiations, the interested parties, including the Office of Management and Budget, the U.S. Department of Justice, and the FCC, reached a comprehensive Settlement Agreement to govern the disposition of the licenses in question and provide for their release into the marketplace and financial return to the Treasury.

This proposal is a chance to bring closure to litigation that has dragged on, and which, in all likelihood, could result in a net loss to the government if it were to continue. We have an opportunity to finalize this settlement, return money to the Treasury and release valuable spectrum for commercial use—something that is essential to help this struggling economy.

The current litigation has been prolonged unnecessarily. To continue it now, in my view would be a mistake, and the American taxpayer could be the loser. I certainly hope that the American taxpayer ultimately is not the victim of Congressional inaction.

FARM BILL

Mr. BAUCUS. Mr. President, I rise today to share my dissappointment about the farm bill with you. It is vital that we get a strong bill passed before we adjourn this year and, unfortunately, that isn't going to happen. To put it simply: Our farmers and ranchers deserve more from their representatives.

As long as I have been in the Senate, I have never seen the agricultural community more united than they were yesterday in invoking cloture and getting the Senate farm bill passed the floor this year.

The farm bill we passed out of committee is a good bill. It is not a great bill. But it's a good step in the right direction. We had the opportunity to work together to make this bill as comprehensive, full of common sense, and strong as possible. My sleeves were rolled up and I was dedicated to passing the farm bill this year. And I'm still dedicated to passing a bill when we get back next month.

We need to support our Nation's agricultural producers. Now. We can't wait until the current bill expires. We rely on our producers for a safe and affordable food supply. Now they are relying on us for survival.

Our agricultural producers are suffering. Years of low prices and drought have made it nearly impossible for farmers and ranchers to break even.

Low prices and drought have been disastrous not only to agricultural producers, but also to the surrounding rural communities. When producers are hurting, they can't invest in our economy. Agriculture is the backbone of Montana's economy. And the backbone of rural America's economy. The ripple effect is being felt throughout the country.

To help with the ongoing drought, it is important that we provide our farmers and ranchers with natural disaster assistance. I included more than $2 billion towards disaster assistance in my economic stimulus bill, but that bill has fallen to the same fate as the farm bill—it's at a stalemate this year. I'm dedicated to including disaster assistance in the farm bill, in another economic stimulus bill, or any other vehicle I see available. The assistance isn't something our ag community can wait for and I'll keep working to see that they don't have to.

The Senate's failure to pass a farm bill this year not only hurts our producers, it hurts our lenders and our rural businesses as well. The bill that we passed by the Senate Agriculture Committee includes a Rural Development Title that would have provided rural economies with much needed support. It's long overdue that we provide stability for our agricultural producers and our rural economies.

Lenders in Montana and across the country are getting nervous as the lean years of production are starting to add up. Their nervousness is compounded now that we failed to act this year.

The time has come. We can no longer wait to repair the current farm bill. The health and stability of our producers, of our rural communities, and of America is up to us. Our Nation depends upon our agricultural producers for a safe, affordable, and abundant food supply. Now our producers are depending on us to provide them with a safety net they can rely upon. The time is now. We must all dedicate ourselves to getting back to work on the farm bill in January. We must work together to pass a strong, stable, and comprehensive farm bill quickly.

Mr. VOINOVICH. Mr. President, over the past 2 weeks, the Senate has engaged in what is probably a first in the history of this body: it has worked to complete a task before a deadline. Even as appropriations bills remained unfinished 3 months into the fiscal year, we have, for the past couple of weeks, debated a farm bill a full 9 months before the current authorization lapses.

As admirable as it is to work ahead of schedule, this has been an unnecessary exercise. There is no reason that the Senate has had to debate the farm bill when these programs don't expire until the end of the fiscal year.

I joined in the successful effort here in the Senate to postpone debate on the farm bill until next year. It is my hope that we will do a better job at writing a bill that will address the needs of our farmers in a fiscally responsible way, rather than rushing a bill through Congress for the sake of passing a bill.

The only reason we have debated this bill a year ahead of schedule is because some fear that the fiscal year 2003 budget resolution won't have enough room in it to load up whatever farm bill the Senate considers with all the spending the majority desires.

Indeed, according to an article in the December 8th edition of Congressional Quarterly, ''lobbyists fear that if Congress waits until 2002, when the current authorization bill expires, then the $73.5 billion in new spending for agriculture programs over the next 10 years that was set aside by this year's budget resolution might vanish.''

Senator KENT CONRAD, the Chairman of the Senate Budget Committee, who clearly must understand our country's financial condition, has said, ''the money is in the budget now. If we do not use the money . . . it is very likely not going to be available next year.''

That does not sound like ''need'' to me, it sounds like opportunism, and opportunism is not sufficient reason for the majority to rush through a bill this important and this expensive.

I agree with the analysis of Senator LUGAR, the Agriculture Committee's Ranking Member, who correctly stated on the Senate floor last Tuesday, December 11, that, ''Proponents of the bill, S. 1731, fastening on to a budget resolution adopted earlier this year, said we have pinned down $172 billion over 10 years, $73.5 billion over baseline, over the normal expenditures that have been occurring year by year in the agriculture bills . . . I and others have pointed out that [the money] really is not there.''

Now, I take a back seat to no one in terms of my concern for the American farmer. When I was governor of Ohio, agribusiness was my number one economic development initiative.

Many people, even Ohioans, don't realize that food and agribusiness means more than $73 billion to Ohio's economy each year. In fact, one in six Ohioans is employed in one aspect of agriculture or another.

I gave agriculture more attention and priority than any governor in memory, and I continue my close relationship with Ohio's agribusiness community.

Nevertheless, I could not support the majority's farm bill as written, and honestly, I am disappointed at the apparent lack of respect some of my colleagues seem to have for the American farmer.

Every farmer worth his salt knows that if he or she wants to stay in business, they have to be fiscally responsible and make tough choices. They know that the United States has to do so as well. They understand that the majority's farm bill did not focus on proper planning and making the right choices, but rather ''getting while the getting is good.''

Some here in Washington think that viewpoint epitomizes the American

farmer, but for anyone in this body to think that the American farmer is only concerned about ''what's in it for him,'' is an insult to their patriotism and their own understanding of fiscal responsibility.

Let me make it abundantly clear, this bill was written and has been debated without any regard for the other obligations our nation now faces. It is heedless of America's national security needs and it does nothing to acknowledge the long-term fiscal responsibilities of our Nation. Instead, the Majority's Farm Bill really just helps the nation's agricultural conglomerates.

When Congress passed the last farm bill in 1996, it did so with the intention that it would gradually phase out the heavy reliance on subsidies characteristic of previous farm bills and move towards a more market-oriented approach. That bill was named Freedom to Farm.

However, had S. 1731 passed, it would have increased federal spending by over $70 billion over ten years, putting us back to where we were prior to Freedom to Farm, when farmers were more dependent on the federal government.

I remain supportive of market-based farm policies, but I believe important improvements must be made to the current system that will allow our farmers to adapt to a global marketplace. Unfortunately, that same marketplace has kept U.S. prices and income low for the past three to four years due to ever increasing world supplies coupled with low export demand.

The cost has been outrageous, with Congress appropriating more than $32 billion in emergency spending since Fiscal Year 1999 to offset low prices and assist farmers who suffered losses due to natural disasters. I have to ask: What happened to Freedom to Farm?

I have opposed these emergency measures, not only because they were not offset, which has added to our current budget crisis, but also because ''stop gap'' emergency measures only meet a temporary need, and do nothing to help the long-term outlook for the American farmer.

Unfortunately, the majority, in their bill, attempted to rectify this situation by making these emergency payments essentially permanent.

In a December 14 editorial titled ''A Piggy Farm Bill,'' the Washington Post labeled S. 1731 ''obscene,'' and pointed out that billions indeed have been made available in the past few years in ''emergency'' payments, however, the Post goes on to say ''the effect of the new bill would be to regularize those [payments], thereby abandoning the five-year experiment in supposed market reform.''

Another contention that I have with the majority's bill, is that passage of S. 1731 as written could very well have put the U.S. in violation of our obligations under the World Trade Organization and weakened our demands that Europe and other countries cut subsidy payments to their agricultural producers.

In an article that appeared in the December 18 edition of the Financial Times, former U.S. Secretary of Agriculture Mike Espy, noting Congress' apparent willingness to abandon a market-based approach to agriculture, stated ''It's very awkward. Here we are involved in a global effort to reduce subsidies, and this [bill] flies in the face of that effort.''

Current Agriculture Secretary, Ann Veneman, said in the same article that the legislation would ''exacerbate overproduction and perpetuate low commodity prices,'' which would undermine our ability to expand into new foreign markets.

That's because the majority's farm bill would put in place counter-cyclical payments, which pay farmers a subsidy as the price of their commodity falls. This approach most assuredly would run afoul of the WTO treaty.

What's more, the subsidies under the majority's proposal would go to millions of farmers and quite a few wealthy individuals and even some Fortune 500 corporations.

Again, the Financial Times article references an organization known as The Environmental Working Group, which has on its web-site a compilation of more than 2.5 million farmers who receive subsidies. Of that total, the largest farms get the most amount.

To quote the news article, ''just 1,290 farms have each received more than $1 million in the past five years; Tyler Farms of Arkansas, which grows cotton, rice and soybeans, led the list at more than $23 million. In addition, 11 Fortune 500 companies, including Chevron and International Paper, also received farm subsidies. In contrast, the average farm in the bottom 80 percent got just $5,830.''

While I would have voted against the bill proposed by the majority, the Cochran-Roberts Amendment that was considered on Tuesday provided a workable alternative.

Instead of creating a counter-cyclical program, the Cochran-Roberts Amendment would have created farm savings accounts for producers to participate in on a voluntary basis, with matching funds provided by the USDA. This money would help farmers make ends meet during the lean years and would be a great improvement over the current practice of relying on touch-and-go so-called ''emergency'' supplemental farm spending bills.

While I am still concerned with the expense of the Cochran-Roberts Amendment, it evenly divides its spending over the first and last five years, and is thus more fiscally responsible than the Majority's proposal which frontloads $45.3 billion of their $73.5 billion bill in the first five years. Unfortunately, the Cochran-Roberts amendment was defeated along party lines.

So we were left with the bill pushed by the majority with a price tag we cannot afford. It will most assuredly exceed the $73.5 billion, 10-year spending increase allowed by the fiscal year 2002 Budget Resolution.

As we near the end of this year, we find ourselves facing challenges that could never have been predicted a year ago. An economic slowdown that began in the spring of 2001 has now been deemed a full-fledged recession; a recession that was exacerbated by the events of September 11.

As Americans have responded generously to the needs of the victims and their families, the federal government has acted quickly and significantly as well. We've passed a $40 billion emergency supplemental bill, as well as $5 billion in grant funding to help prevent the collapse of the airline industry. In addition, we could spend another $100 billion for an economic stimulus package soon after we return from recess.

Add all that to the $25 billion that Appropriators and the White House agreed this summer to spend over and above the fiscal year 2002 budget resolution that Congress passed, and we could spend some $170 billion over the budget resolution.

To put that in perspective, $170 billion represents 30 percent of all the regular discretionary spending Congress enacted in fiscal year 2001.

Given this amount of spending, the Senate is poised to spend every last tax dollar, all of the Medicare surplus and the entire $174 billion projected Social Security surplus. Even that won't be enough.

To cover all of this spending, including the spending in the majority's farm bill if it passed, the federal government would have to issue tens of billions of dollars in new debt this fiscal year depending on the size of the stimulus bill, any additional defense spending we pursue, plus the inevitable emergency supplementals Congress will pass between now and the end of the fiscal year.

It's amazing that a few months ago, people here were worried we would run out of debt to repay. Now, we are in a far different situation.

In fact, Treasury Secretary O'Neill sent a letter to the Majority Leader last week requesting that the government's debt ceiling be raised. The Secretary indicated that the current borrowing limit of $5.95 trillion will be reached by February and that the administration requests that the national debt ceiling be raised to $6.7 trillion.

As recently as August, the administration projected that the current borrowing limit would not be reached until September 2003. This is disturbing.

I am pleased we are not going forward with a farm bill that we cannot afford at a time of fiscal crisis, and that we are not going forward with a bill that is frankly not in the best interest of our farmers and definitely not in the best interest of the American people. It is unfortunate, though, that we spent two weeks debating the majority's farm bill, when there are three

other pieces of legislation that I believe we should have been considering instead.

Our number one priority should be an economic stimulus bill, or ''jobs bill'' as it should be called.

Just last week, I was part of a six-member bipartisan group of senators who were invited to the White House by the President to discuss the stimulus bill and the package that the Centrist Coalition has been working on for the past seven weeks. After the meeting, President Bush announced his support for our stimulus package; a package that responds to the needs of those who are currently unemployed by extending benefits and health care coverage.

It also provides rebate checks to those Americans who pay Social Security taxes but who did not qualify for rebate checks earlier this year. It would truly be a wonderful holiday present for the working men and women of America as well as the nation itself since people would receive extra cash to help pay their holiday bills, and their spending would help spur the U.S. economy.

The bill also contains other stimulus functions, including 30 percent depreciation bonuses to encourage investment; a reduction in the 27 percent tax rate to 25 percent; and tax incentives to encourage small business owners to increase investment.

I won't sugarcoat the fact that it will take a lot of money to jumpstart our $10 trillion economy, and our approach may cost up to $100 billion. However, I believe that it is necessary to get our nation out of the recession we're in.

That's why I am somewhat dismayed that the Majority Leader did not bring the stimulus bill to the floor for consideration during these past couple of weeks. Early this morning the House passed a responsible bill based on the Centrist package which the President has agreed. It's a compromise package that reflects much of what the Majority Leader has said he wanted. However, that wish list seemed to shift when it became clear that a genuine willingness to compromise existed. The American public have expected us to pass such a bill, and I am disappointed that we have not yet done so.

The second bill we should consider is a terrorism reinsurance bill. This legislation would provide government backing to help cover the costs of damages incurred in the event of an act of terrorism. Without it, we are going to see many businesses with enormous increases in their insurance costs. And that's for companies that can get insurance.

As a result, projects that are on the table or in the planning process will not go forward and the economy will suffer.

There is a bipartisan proposal that is being worked on, and I can see no reason why we should not have pushed to get this bill onto the floor of the Senate before the end of the year.

The third bill is a comprehensive energy bill, one that will help our economy and harmonize our energy needs with our environmental needs.

While national energy policy is being held hostage to the demands of environmental groups, the United States must continue to rely on energy sources in the Middle East. Surely I don't have to remind my colleagues of the political instability that exists in this area of the world.

The most glaring example of how the lack of an energy policy is affecting us is the fact that we currently rely on Iraq for more than 750,000 barrels of oil per day. As my colleagues know, Iraq is a hotbed of terrorism, and I have no doubt the manufacturer of weapons of mass destruction, run by a man who would dearly like to inflict pain upon the United States if given the ability.

We have to put the interests of the American people in front of politics and special interest groups. I say to my colleagues that it is better to be able to know that we can rely upon ourselves to meet our energy needs than to rely on Saddam Hussein. We need to stand up and do the right thing and pass a comprehensive energy policy now, and to me, it is incredible that the Majority Leader placed it on the back-burner in favor of a farm bill that we can consider later this fiscal year.

Our farmers understand the need to enact these three bills because they use energy, because they feel the pinch of a soft economy, and, because farmers know the right thing to do.

It is my hope that we will be able to address these three issues quickly when we return next year and that we will do a better job of prioritizing all of the necessary work this body undertakes.

There was no compelling reason why we needed to consider the Farm Bill one week before Christmas. In fact, with one year left on the authorization of the Freedom to Farm Act, we will have almost all of 2002 to work on this legislation.

When we return next year, and after we take up the critical issues like energy, stimulus and terrorism insurance, we should follow the President's suggestion and sit down with real numbers and put together a farm bill that is fair to America's farmers, the men and women who really need help; fair to the American taxpayer; and fiscally responsible. I also would encourage my colleagues to take a look at other farm bill alternatives, such as Senator LUGAR's proposal, and the proposal put forth by Senators COCHRAN and ROBERTS. I believe they are on the right track.

Right now, we are facing tough times that affect all Americans, including farmers, and the Senate needs to make tough choices because that is what our constituents have elected us to do.

The majority's farm bill, S. 1731, was the wrong bill at the wrong time. We shouldn't have wasted precious time on flawed legislation. Our farmers deserve a bill that has been fully vetted, following a thoughtful and comprehensive debate. Sadly, S. 1731 offered our farmers precious little in that regard as the majority focused more on getting a bill done than getting the right bill done.

It is my hope that in the months ahead, we will craft a Farm Bill that will help farmers succeed while reflecting the other pressing fiscal needs that also face our nation. I look forward to working with my colleagues to enact such legislation.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Financial Times, Dec. 18, 2001]

US AGRICULTURAL BILL WILL GO AGAINST THE GRAIN WORLDWIDE

PROPOSALS TO INCREASE SUBSIDIES FOR FARMERS COULD VIOLATE WTO RULES

(By Edward Allen)

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From Financial Times, Dec. 18, 2001]

U.S. AGRICULTURAL BILL WILL GO AGAINST THE GRAIN WORLDWIDE: PROPOSALS TO INCREASE SUBSIDIES FOR FARMERS COULD VIOLATE WTO RULES

(By Edward Alden)

Five years ago, when the US Congress last passed a major bill to reform its farm policy, it pledged to wean farmers from two generations of government subsidies and reintroduce market pressures into US agriculture.

This week, the Senate is set to follow the House of Representatives in declaring that experiment a failure. Instead, Congress is close to approving legislation that will increase federal subsidies to farmers by more than $70bn over the next decade.

The sharp turnround has undermined the Bush administration's preparations for the launch of a new round of world trade talks that is supposed to cut sharply government supports for agriculture. The increase in subsidy payments to farmers could put the US in violation of World Trade Organisation rules, and will seriously weaken the credibility of US demands that Europe cut its farm subsidies.

''It's very awkward,'' said Mike Espy, a former secretary of agriculture. ''Here we are involved in a global effort to reduce subsidies, and this flies in the face of that effort.''

Over the past decade, the US government has tried to persuade farmers that their future lies in opening up markets for farm products abroad.

But instead, US exports fell sharply following the 1998 Asian financial crisis and commodity prices plummeted. This led Congress to approve billions of dollars in emergency payments to US farmers over the past three years. ''We have seen that export markets do not serve as a reliable safety net in and of themselves,'' said Tom Harkin, the Iowa senator who is the chief sponsor of the Senate bill. The new farm bill will entrench that philosophy by institutionalising so-called counter-cyclical payments—subsidies that rise as crop prices fall.

Such subsidies, which have the perverse effect of encouraging increased production when prices are falling, run directly counter to what the US has tried to achieve in the WTO. The Bush administration admitted earlier this year these counter-cyclical payments fall into the so-called amber box of

subsidies that must be reduced under WTO rules.

If crop prices continue to fall, automatically increasing government payments to farmers, the US could run up against the Dollar 19.1bn per year that is the maximum allowed under these restrictions.

The administration and some critics in Congress have tried to fight back.

Ann Veneman, agriculture secretary, said earlier this month the new farm bill would ''exacerbate overproduction and perpetuate low commodity prices'', and would compromise US efforts to open new markets abroad. Pat Roberts, the Kansas senator who was the chief author of the 1996 farm reform, was blunter.

He charged last week that the powerful farmers who will reap a windfall in new subsidies ''view the farm bill as an ATM machine'', the American term for automatic cash dispensers. The administration and its outmanned supporters in Congress are hoping to delay final passage of the bill until next year when the government will produce new budget numbers. Those figures, which will show the federal surplus vanishing as a result of recession, tax cuts and the war on terror, could create pressure to curb farm spending.

The bloated farm bill legislation has indeed cast an embarrassing new light on rural America's dependency on the federal government.

The Environmental Working Group, a nonprofit organisation, last month posted on its website a comprehensive list of the subsidies received by more than 2.5m American farmers.

The data, obtained under US freedom of information laws, shows that a small number of large farmers gets the vast majority of federal payments. Just 1,290 farms have each received more than Dollars 1m in the past five years; Tyler Farms of Arkansas, which grows cotton, rice and soybeans, led the list at more than Dollars 23m.

In addition, 11 Fortune 500 companies, including Chevron and International Paper, also received farms subsidies. In contrast, the average farm in the bottom 80 per cent got just Dollars 5,830.

The new bill would only increase that trend by linking payments firmly to production, thereby rewarding the country's largest farmers.

Other agricultural exporting countries like Australia and many Latin American nations are dismayed by the direction of US farm policy. Warren Truss, Australia's agriculture minister, said during a visit to Washington last week that the new bill would ''entrench a mentality of farm subsidies in the US.

''It is obvious that the US which once proudly boasted it had the most efficient farmers in the world, has now degenerated to a situation where US farmers are dependent upon the taxpayers for around half their income.''

The European Union, however, has been noticeably quiet on the farm bill debate. As the world's largest provider of agricultural subsidies—at least for the moment—the EU has the most to gain from a bill that will do much to erase any US claims to free market virtue.

Said one EU agricultural official: ''It has certainly taken the heat off us.''

FAITH-BASED INITIATIVE

Mr. DASCHLE. Mr. President, unfortunately, during this holiday season there has been a decline in charitable donations. In the land of plenty, having children going hungry during the holiday season is simply heartbreaking. But today too many charitable organizations are facing new funding constraints and cutting back on items like food vouchers. Many of us in Congress have been interested in looking for ways to resolve these problems and strengthen the partnership between charities and the Federal Government.

Senators LIEBERMAN and SANTORUM have been working throughout the year to develop just such a solution. Throughout their process they have consulted with my staff and the White House to ensure that the final product would be a consensus bill that would enjoy bipartisan support. I am pleased that the outlines to an agreement are now within reach. Had the Senate had more time, I would be very interested in seeing the package that has emerged introduced and debated by the full Senate.

The Lieberman-Santorum package is comprised of two limited components: one, a tax and technical assistance section; and two, a social services section that includes a title on equal treatment for non-governmental providers, authorization for a capital compassion fund, a program on mentoring for children of prisoners, and appropriations for funding Social Services Block Grants and Maternity Homes.

I am pleased that Senators LIEBERMAN and SANTORUM were able to resolve most of the problems that caused many to oppose H.R. 7. Their compromise package eliminated privatization and the voucherization of federal social service programs, as well as preemption of state and local civil rights laws. Their package also remained silent on Federal funding of pervasively sectarian organizations and expansion of the Title VII exemption.

I also support many of the tax and spending provisions that have been proposed. In particular, research shows that provisions like the IRA-rollovers and food and book donation provisions are effective in inducing new charitable giving. Additionally, increased funding for the Social Services Block Grant is an important provision to ensure that at long last we fulfill our commitment to providing adequate resources for community programs.

While much hard work has already been done on all sides to get a bill that can pass, some concerns remain with provisions of this package. Given the slowing economy and OMB Director Daniels' statement that the budget will be in deficit this year and for several years to come, the Senate must be careful about any new tax and spending measures that are unpaid for.

Therefore, while I strongly support increasing funding to charities, the changing economic outlook demands that fiscal responsibility be adhered to when enacting new tax cuts. As we move into the fiscal year 2003 budget cycle, I look forward to working with Senators LIEBERMAN and SANTORUM, as well as the White House, to identify workable offsets.

It is my hope that the work that Senators LIEBERMAN and SANTORUM have done will not go to waste. I believe that next year we can build on the bipartisan process that Senators LIEBERMAN and SANTORUM have created to resolve these outstanding issues. Once we do that I am confident the Senate will be able to quickly move a consensus bill. Finally, let me applaud Senators LIEBERMAN and SANTORUM for their work and dedication to this important issue.

JUDICIAL NOMINATIONS

Mr. BIDEN. Mr. President, as a former Chairman of the Senate Judiciary Committee, I would like to shed a bit of the light of history on the Committee's record this year with regard to judicial nominations. The first year of an Administration is always difficult, with a new Administration settling in and the need in the Senate to confirm a host of non-judicial officials to serve in that new Administration. As a result, the Senate's duty to ''advise and consent'' in judicial nominations is all the more difficult to fulfill. I was privileged to serve as Chairman of the Judiciary Committee the last two times a new Administration came into the White House. In 1993, when President Clinton arrived, we worked hard and confirmed 28 judges that first year, with the White House and the Senate controlled by the same party. In 1989, when the first President Bush took office, with an opposing Senate, we managed only 15 judicial confirmations in the first year.

This year, the White House got a late start on its executive branch nominees, due to the election battle. For this and other reasons, no judges were confirmed while the Republicans held the Senate this year. Since June, when the Democrats took control of the Senate, the White House and the Senate have been controlled by different parties, normally a recipe for stagnation on judicial confirmations. Still, by the end of this year, if all goes as expected, we will have confirmed more judges—more than twice the number confirmed in 1989, and even more than we accomplished in 1993, when the White House and the Senate were held by the same party. And as the guy who was running the Judiciary Committee in 1989 and 1993, I can tell you that we were not sitting on our hands back then. And clearly the Committee has not been dawdling this year.

Now, some people would come back and say ''well, what about appeals courts? Appellate judges are far more important than district court judges.'' As a matter of fact, we have confirmed more nominees to the appeals courts since June than were confirmed in all of 1993 or 1989.

Some people will come back and say ''but Joe, you know what really matters is whether the number of vacancies is growing or shrinking. Are we filling the slots?'' That's true—what

really matters is not the whole number of judges confirmed, but whether we are making progress on filling the vacancies that have opened up on the federal bench. Again, let's look at the numbers. In 1993, with the White House and Senate in the same hands, we barely managed to reduce the number of vacancies, by 3 slots. In 1989, with the White House and the Senate split between the Republicans and the Democrats, the number of vacancies grew over the course of the year by 14 slots—the Senate could not keep pace with the retirements and resignations of federal judges. (It's worth noting as well that, during the entire recent period when the Committee was chaired by the Republicans, judicial vacancies grew by 65 percent). By contrast, this year, we will have reduced the number of vacancies by 20, or 18 percent. And that's only since June. With the White House and the Senate controlled by different parties. And with the September 11 attacks happening right smack in the middle of that period!

I should point out that another hurdle was thrown into the Senate confirmation process this year, which was not there in previous years. The White House announced that it would no longer vet potential nominees with the American Bar Association's Standing Committee on the Judiciary. As a result, now the ABA's evaluation of nominees must happen as part of the Senate confirmation process, after the candidate has been nominated by the White House. This step adds weeks to any confirmation.

I should also point out that, not only did September 11 disrupt just about everything that was happening in this country, but it particularly affected the Senate; we had to turn immediately to legislation necessary to authorize the war on terrorism. Moreover, the arrival of anthrax on Capitol Hill displaced many Senators and staff, including Judiciary Committee staff. My own Judiciary Committee staff has not had access to their judicial nominations files—not to mention their office—for the past two months.

Despite all of these disruptions and delays, which I did not face when I chaired the Committee, and which the Republicans did not face during the past 6 years when they controlled the Committee, we will have confirmed more judges by the end of this year than in the first year of the Clinton Administration, and more than twice as many as in the first year of the first Bush Administration. And we will have significantly reduced the number of judicial vacancies from in just 6 months. So, let my friends on the other side of the aisle tone down their rhetoric, and consult their history books.

TECHNOLOGY AND TERRORISM

Mr. HATCH. Mr. President, it is becoming increasingly clear that American technological supremacy will be an invaluable asset in our efforts to combat international terrorism and protect our citizens from further attack. The technological advantages we now enjoy—in weapons, in communications infrastructure, and in detection systems—must be both aggressively pursued and zealously guarded.

For example, the recent anthrax attacks in this country highlight the need for the prompt deployment of effective technology to track the origins of the dangerous biochemical substances that threaten our security. This lack of important information hampers our ability to track down, capture, and punish terrorists and their supporters. The technology to accomplish this goal exists, and can be quickly and inexpensively modified to law enforcement and public safety requirements. However, the government needs to make this a priority.

Although we have long held concern for the impact of hazardous materials on the public, the terrorist attack of September 11 and subsequent attacks require a heightened response. The weaponization of Chemical, Biological, Radiological and Nuclear (''CBRN'') materials demands an accounting of these high-risk materials, particularly as they accumulate at seemingly innocent locations. Tracking CBRN materials is an important step in anticipating and preventing their misuse and thereby thwarting terrorist activity.

We currently have the capability for sophisticated materials management that connects people, places, processes, and products in a manner critical to security. The federal and local governments should work to put in service high-risk material tracking systems that provide the basis for powerful, instantaneous decision making. The government control centers can observe the global position of hazardous materials provided by producers and users in all our allied nations. In less accessible locations, the information could be collected through satellite technology.

Such a hazardous materials management system should: provide for data collection and for authorization at customs operations and border controls; use sophisticated bar code and embedded chip data transmitting devices; employ handheld capabilities to manage field operations and material logistics; have multi-language capability and global reach; integrate with e-solutions and Defense Department Enterprise Resource Planning systems; and make use of data mining and knowledge management principles.

Our Nation should immediately move to identify and track the movement or accumulation of CBRN materials. We must monitor CBRN materials at all global locations, including where they are produced, transported, used, staged and/or stored. And we must track, consolidate and analyze the CBRN material movements as the basis for a legitimate solution to the threats posed to Americans and our citizens abroad.

At the same time that we use technology to better protect Americans, we must make certain that our technological infrastructure is protected from attack. To that end, critical infrastructure should undergo automated electronic testing of their internal and external network assets on a frequent and recurring basis. This testing should include written or electronic reports detailing the methods of testing used and the results of all tests performed, so that trend-line analysis of network security posture can be conducted.

The Policy on Critical Infrastructure Protection: Presidential Decision Directive 63 (''PDD–63'') provided a starting point for addressing cyber risks against our Nation. This directive identified the critical sectors of our economy and assigned lead agencies to coordinate sector cyber security efforts. This directive presents the vision that ''the United States will take all necessary measures to eliminate swiftly any significant vulnerability to both physical and cyber attacks on our critical infrastructures, including especially our cyber systems.''

I believe that we can prepare a defense for our critical infrastructure much like we prepared for problems associated with the year 2000 computer bug. First, we need, as the President recently appointed, an executive agent for cyberspace security, who has the power necessary to cause mandatory private and public interaction and coordination. Second, we must consider empowering and funding each PDD–63 lead agency to establish quantitative baselines of the external and internal network security posture of their portion of critical industries. This can be done through automated electronic testing. Third, we must identify vulnerable critical systems within the critical infrastructures and secure them to the extent possible through software updates, patches, and other correcting configuration issues. Fourth, we should mandate continued automated electronic reassessment of systems, especially after upgrades or patches are applied. This will provide quantitative views of security over time. We must also enforce electronic documentation of reassessments and hold businesses and vendors accountable for failure to adhere to security mandates. Finally, we must expand our domestic partnerships to global public/private partnerships, including both coalition governments and multinational corporations. I would also think that the broadening of mandates in these partnerships should consider standards for layered security, penetration testing, and demonstrate a commitment to the development and installation of wireless equivalency protocols.

We must make use of every tool at our disposal in our fight against terrorism. We must take advantage of American ingenuity and our technological supremacy as we work to rid the world of terrorism. In addition, it is critical that we protect our critical

technological infrastructure from those who would use our technology against us.

CHANGES TO THE 2002 APPROPRIATIONS COMMITTEE ALLOCATION AND BUDGETARY AGGREGATES

Mr. CONRAD. Mr. President, section 314 of the Congressional Budget Act, as amended, requires the chairman of the Senate Budget Committee to adjust the budgetary aggregates and the allocation for the Appropriations Committee by the amount of appropriations designated as emergency spending pursuant to section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended. The 2001 Emergency Supplemental Recovery and Response to Terrorist Attacks (Public Law 107–38) contains funding that will result in $13.397 billion in outlays in fiscal year 2002. Because all budget authority in this measure was appropriated in fiscal year 2001, the adjustment made here is for outlays only.

Pursuant to section 302 of the Congressional Budget Act, I hereby revise the 2002 allocation provided to the Senate Appropriations Committee in the concurrent budget resolution in the following amounts.

Pursuant to section 311 of the Congressional Budget Act, I hereby revise the 2002 budget aggregates included in the concurrent budget resolution in the following amounts.

I ask unanimous consent to print tables 1 and 2 in the RECORD, which reflect the changes made to the committee's allocation and to the budget aggregates.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TABLE 1.—REVISED ALLOCATION FOR APPROPRIATIONS COMMITTEE, 2002

[In millions of dollars]

	Budget authority	Outlays
Current Allocation:		
General Purpose Discretionary	549,444	537,907
Highways	0	28,489
Mass Transit	0	5,275
Conservation	1,760	1,232
Mandatory	358,567	350,837
Total	909,771	923,740
Adjustments:		
General Purpose Discretionary	0	13,397
Highways	0	0
Mass Transit	0	0
Conservation	0	0
Mandatory	0	0
Total	0	13,397
Revised Allocation:		
General Purpose Discretionary	549,444	551,304
Highways	0	28,489
Mass Transit	0	5,275
Conservation	1,760	1,232
Mandatory	356,567	350,837
Total	358,567	937,137

TABLE 2.—REVISED BUDGET AGGREGATES, 2002

Adjustments: Emergency funds,	300	75
Revised allocation: Budget Resolution	1,520,019	1,498,600

ZIMBABWE

Mr. LEAHY. Mr. President, I want to take a few moments to discuss the deteriorating situation in Zimbabwe. Over the past several months, we have all watched with alarm as President Mugabe has placed his desire to remain in power above the best interests of his own people. In the process, Mr. Mugabe's government has destroyed the rule of law, contributed to food shortages, committed violations of human rights, and wrecked the economy—causing unemployment to rise to more than 60 percent.

The issue has received most of the attention is land reform. There is no question that land reform is badly needed to ensure long-term prosperity in Zimbabwe. As late as 1999, the process appeared to be moving in the right direction: Zimbabwe had presented a detailed plan for the inception phase of a land reform effort, the World Bank had made a $5 million pledge to assist with the resettlement of poor farmers, and several bilateral donors, including the United States, made pledges of assistance.

However, in an attempt to deflect attention from a failing economy, a misguided military intervention in the Congo, widespread government corruption, and a host of other domestic problems, President Mugabe decided to support the sudden occupation of large farms. In the wake of this ill-conceived policy, several farmers have been killed, the independence of the judicial system has been seriously undermined, and agricultural production has been sharply reduced, contributing to widespread food shortages throughout the country.

As the land seizure crisis continues, other forms of harassment and political violence in Zimbabwe—carried out primarily by members of the ZANU–PF party against members of the Movement for Democratic Change (MDC), journalists, and other critics of the government—have steadily escalated. A number of recent events clearly indicate that the situation is a risk of spiraling out of control: the MDC office in Bulawayo was invaded and burnt down with a petrol bomb, as the police stood by and watched; there are reports that MDC members have been illegally taken into custody and tortured; the government announced the humanitarian organizations will not be permitted to distribute food aid in rural areas where it is acutely needed; and after two journalists were arrested, the minister of information compared the international media to terrorists and began notifying foreign journalists that they would not be allowed to work in the country for the foreseeable future.

There are also serious concerns about the upcoming Presidential election scheduled for early next year. As a Gallup poll shows President Mugabe running behind MDC candidate Morgan Tsvangirai, many outside observers believe that Mr. Mugabe and ZANU–PF will stop at nothing to remain in power, and are engaged in activities to undermine the democratic process and illegally alter the outcome of the election. In addition to the campaign of harassment and violence against MDC supporters, the government has prevented non-governmental organizations from carrying out voter education campaigns and has refused to allow observers from international organizations, including the European Union, to monitor the elections. Moreover, the government is pushing through electoral reforms that will effectively withhold absentee ballots from Zimbabweans living abroad, with the exception of diplomats and soldiers, and require voters to present proof of residency. These are measures that could eliminate thousands from the voter rolls.

Because of the serious situation in Zimbabwe, I have joined with Senator FEINGOLD and sponsored a provision which was included in FY 2002 Foreign Operations Appropriations Conference Report that requires U.S. executive directors to international financial institutions to vote against loans, except those for basic human needs or democracy-building purposes, to the Government of Zimbabwe, unless the Secretary of State determines and reports that the rule of law has been restored.

I would also like to point out that earlier this session the House and Senate passed S. 494, the Zimbabwe Democracy and Economic Recovery Act of 2001, and I look forward to President Bush signing it into law, as soon as possible. S. 494 contains several provisions similar to section 560 in the Foreign Operations Conference Report, although section 560 does not provide waiver authority.

Mr. President, I continue to strongly support the Administration's request for assistance to Zimbabwe for health care programs, strengthening civil society that is not affiliated with the ruling party, peace corps activities, and humanitarian purposes. However, the

request for funds to restart the International Military Education and Training is premature, and would send the wrong message at this critical juncture.

BANKRUPTCY OF AMERICAN CLASSIC VOYAGES AND THE FAILURE OF ''PROJECT AMERICA''

Mr. MCCAIN. Mr. President I want to bring to the attention of may colleagues a short article that appeared in Sunday's New York Times that points out just how awry a project based on pork barrel politics can go. The article, title ''A Venture in Ships Is a Rare Zell Flop,'' gives a short chronicle of the rise and fall of American Classic Voyages (AMCV), its largest shareholder, and the government support for American Classic Voyages that has now left the taxpayers holding the proverbial bag for a whopping $366.9 million in defaults on title XI maritime loan guarantees.

On October 19, 2001, American Classic Voyages (AMCV) voluntarily filed a petition for reorganization under Chapter 11 of the U.S. Bankruptcy Code. The petition lists total assets of $37.4 million and total liabilities of $452.8 million. The cruise line's reorganization petition indicated it has more than 1,000 creditors, including the Department of Transportation. The Department of Transportation in this case, means the American taxpayer whose exposure on a total of six title XI maritime loan guarantees made to AMCV totals $366,897,000. The loans cover five vessels that were in service in Hawaii, the East Coast, and the Northwest Coast and the partially completed ''Project America'' vessel at Northrup Grumman's Ingalls Shipbuildings in Pascagoula, Mississippi.

In order for my colleagues to fully understand what this article in the business section of the New York Times represents, we really need to look back at the brief history of the American Classic Voyages rise and the political push for AMCV's ''Project America.'' The ''Project America'' initiative included building two 1,900 passenger cruise ships that were to enter service in Hawaii in 2004 and 2005. These were to be the largest cruise ships ever built in the United States. To help push the program, the U.S. Maritime Administration (MARAD), in the face of strong political support for the project, approved a $1.1 billion title XI loan guarantee for the construction of these two vessels on April 8, 1999.

The New York Times article reports just how that political pressure was felt at MARAD when it quotes a former top MARAD official who insisted on anonymity saying. ''We were supported to be promoting shipbuilding.'' ''The maritime trade unions wanted jobs. So there was a lot of political support.''

''Project America'' did indeed receive considerable political support over the last several years as noted further in the New York Times article: ''In 1996 and 1997, American Classic executives met with members of Congress, labor leaders and shipyard owners in an all our effort to promote the project in Washington.'' My colleagues may recall that this promotion paid off in the form of political support which translated into language being included in the Fiscal Year 1998 Department of Defense Appropriation Bill granting a legal monopoly for American Classic Voyages to operate as the only U.S.-flagged operator among the Hawaiian islands.

My colleagues may recall that I questioned the merits of the ''Project America'' at the time the special legislation was considered and went as far as to introduce an amendment to the fiscal year 1998 Department of Defense appropriations bill to remove the monopoly language. Based on the information available at the time, I believed then that the project was more likely to fail than to succeed and I called the monopoly language, and I quote an ''egregious example of porkbarrel spending,'' and asked ''How many times has the U.S. Senate so blatantly set up a monopoly set-aside for any individual or business?'' I would ask now, how many times will we do this in the future?

There were early warnings signs that something was going seriously wrong with the project. During the first year of construction, ''Project America'' fell a year to a year-and-one-half behind schedule. Both American Classic Voyages and Ingalls Shipbuilding were crying foul over construction problems and months of non-binding mediation over contract disputes led to no resolution. Accusations of default came from both sides. However, on September 21 of this year a resolution was announced. Yet, here we are three months later and it is still unclear who was at fault as both sides have refused to discuss the dispute. This is important since, the settlement agreement between Ingalls and AMCV, which was reviewed and agreed to by the U.S. Maritime Administration, kept the American taxpayer holding all the risk.

To highlight just how critical the problems with Project America were at the time this agreement was reached, I want to read from a two-page summary on the status of the project at that time that a lobbyist representing American Classic Voyages inadvertently faxed to my office. It highlights the lagging construction schedule, the claims for additional payments by Ingalls, and the problems of dealing with a yard used to doing work under the typically higher-cost DOD procurement standards.

One statement in the summary hints at AMCV's recognition that a shipyard accustomed to dealing with the U.S. Navy was ill-prepared for the commercial project, is very telling of how the customer views the shipyard's ability to meet the demands of commercial work. The faxed summary reads, ''For U.S. shipyards to succeed in commercial construction, they must use commercial procedures to maintain costs and ensure timely delivery schedules. Cost increases and schedule delays have significant impact on commercial customers—increased capital costs, higher marketing costs, lost revenue from employment of the vessel, and market uncertainties.''

In March 1999, the contract for Project America was signed with great fanfare in the rotunda of this very building and now we have one of the signatories calling into question the shipyard's ability to succeed at commercial ship construction. If a customer of the shipyard is questioning Ingalls Shipbuilding's ability to meet its obligations, shouldn't MARAD also have raised this question before it approved the settlement agreement that allowed for the continuation of the project?

We all know the answer now.

In signing off on the Settlement Agreement between AMCV and Northrop Grumman's Ingalls Shipbuilding, MARAD, on behalf of the taxpayer, agreed to assume the outstanding Title XI debt of $185 million on the first of the two cruise ships under construction at Ingalls in the event of an AMCV bankruptcy and complete the vessel, after the issue of the remaining Title XI debt of $350 million. Fortunately, AMCV filed bankruptcy before the remaining debt was issued. Otherwise, MARAD would have been legally obligated to complete the vessel at an additional loss to the taxpayers.

On October 29, MARAD formally announced that it was not legally required to fully fund the construction of the first ship at Ingalls Shipbuilding. However, in a sign of just how deep the political support of AMCV is, and despite the overwhelming evidence that the project was in serious trouble and was unlikely ever to be completed, 14 members of Congress signed a letter urging Secretary Mineta to reconsider and move to complete construction of the Project America vessel. This would involve an additional $350 million in Title XI loan guarantees and the vessel, upon completion, would be sold by MARAD.

It is important to note, that with more than 80,000 new cruise ship berths coming on line in the next four years, MARAD expects that the vessel would sell for $150 to $200 million less than it would cost the American taxpayer to build.

This week, MARAD will pay out $267.4 million in the first of several payments to be made to American Classic Voyages' creditors. The remaining $105.7 million will be paid off in the next 30 days as required waiting periods expire. I note for my colleagues this totals $366.7 million of the American taxpayers' money. And what do we have to show them for these expenditures? A growing U.S.-flagged cruise

ship fleet? NO. A growing and competitive U.S. shipbuilding industry? NO. More U.S. mariner jobs at sea? NO.

As a matter of act we have just the opposite. We have a smaller U.S.-flagged cruise ship fleet, struggling shipyards, and fewer mariners at sea than ever before. As I have said many times before, we owe it to the taxpayer to do better and make wiser decisions.

AMCV is but one example to Title XI loan guarantee defaults. The Title XI maritime loan guarantee program has experienced many problems and suffered financial difficulties throughout its history. Since the beginning of this year, the program has cost taxpayers more than $339.1 million due to defaults.

Let me provide some background for the record: Title XI of the Merchant Marine Act of 1936 authorizes the Secretary of Transportation to make loan guarantees to finance the construction, reconstruction, or reconditioning of eligible export vessels and the modernization and improvement of shipyards. Under regulations governing the Title XI loan guarantee process, applicants must meet certain economic soundness criteria before receiving a commitment from MARAD. Even with controls in place, loan defaults during the 1980's reached into the billions of dollars and the program was halted. In 1986, the worst year on record, defaults in pay-outs of $1.2 billion.

The title XI program was revived in 1993 following the enactment of the Federal Credit Reform Act and the National Shipbuilding and Shipyard Conversion Act. According to figures recently provided by MARAD, the title XI program has cost taxpayers $400 million in default payments since 1993. Of that cost, MARAD has been able to recover roughly 10 percent or $40 million through the disposition of assets.

Currently, the title XI program has an outstanding loan guarantee portfolio of approximately $4.7 billion consisting of 86 projects covering more than 100 vessels, several hundred barges, and 7 shipyard modernization projects. What that means is the American taxpayer could, as happened in the 1980's, be burdened with billions of dollars in debt if an industry downturn occurs. With that much at risk, I think we owe it to the American taxpayers to do all we can to ensure that adequate protections are in place.

Our Nation has had a strong and proud maritime history. I fear our maritime future, in the U.S. however, is jeopardized due to a dependence on government programs that do not foster a progressive and competitive attitude in what has clearly become a global market. This is especially true of our larger shipyards.

According to MARAD, the purpose of the title XI program is to promote the growth and modernization of the U.S. merchant marine and U.S. shipyards. Yet, there is little if any evidence that either has occurred. Since 1993, when the title XI program was resurrected following the heavy loan losses in the 1980s, the program has cost taxpayers $400 million in default pay-outs and an additional $296.4 million in appropriated funds as required by the Federal Credit Reform Act.

Over the same period, the number of vessels in our oceangoing fleet shrank considerably. The number of bulk carriers in the U.S. merchant fleet dropped from 81 to 71, the number of container ships dropped from 85 to 75, and the number of tankers dropped from 205 to 154.

If the tale of AMCV's losses is not enough to stop pork barrel spending on pet projects that unfairly put taxpayers' dollars at risk, the figures on the U.S. fleet size should clearly show us that a program that artifically props up a U.S. shipbuilding industry that is struggling to find its way in a tough world market is not working.

I am sure my colleagues know I oppose any program that unnecessarily burdens American taxpayers and subsidizes industry. But, I am not alone in this view. I encourage my colleagues to look at the Administrations' FY 2002 budget request and its ''Explanation of Program Changes'' for Title XI Loan Guarantee Program. It states, ''In an effort to trim corporate subsidies, the President's Budget seeks no new funding for the Maritime Guaranteed Loan Subsidy Program.''

I wrote to President Bush in June to express my support for his proposal to zero-out the title XI program. In a response to my letter prepared for the President by Mitchell Daniels, Director of the Office of Management and Budget, Mr. Daniels stated: ''The Administration concurs with your view that the Maritime Administration's Maritime Guaranteed Loan Program constitutes an unwarranted corporate subsidy.''

The problems with AMCV's loan guarantees raise serious questions that should be answered before we allow additional taxpayer funding to be committed in the form of loan guarantees. I have written to the Department of Transportation Inspector General (IG), Kenneth Mead, twice this year requesting his office look into Title XI loan guarantee defaults, including American Classic Voyages, and MARAD's oversight of the title XI program.

I understand that the Inspector General has directed such investigations to get underway. I hope he will be able to determine if MARAD has acted appropriately to protect the taxpayer in these matters. We need to learn if Ingalls, Northrop Grumman, and American Classic voyages fully and accurately presented the difficulties they faced in building Project America to MARAD while seeking to both secure and restructure the title XI loan guarantee for this project.

I want to close by making one last point on the New York Times article. It quotes AMCV's largest investor saying, ''Everyone talks about taxpayers' losses. But they never mention the fact that others lost significant amounts of money as well.'' That may be true; however, unlike investors who chose to put their money at risk on American Classic Voyages, the American taxpayer did not have a choice. They depend on us to do the right thing, but instead they have been saddled with an expenditure $366.7 million. I don't personally know all of AMCV's investors, but I would be willing to bet they won't make this same mistake again. The question then becomes ''will we?''

I ask unanimous consent to print the New York Times article in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 16, 2001]

A VENTURE IN SHIPS IS A RARE ZELL FLOP

(By Leslie Wayne)

Sam Zell may have the Midas touch when it comes to investing in real estate. But his efforts on the high seas—with cruise ships—have ended in a debacle that has cost him over $100 million and taxpayers at least three times that.

Mr. Zell is the chairman and largest shareholder of American Classic Voyages, which filed for bankruptcy protection in October. This came after the failure of an ambitious project by Mr. Zell to build two 1,900-passenger cruise ships, the first that were to be constructed in this country in 40 years. It also came despite a boatload of government aid to Mr. Zell, including $1.08 billion in federal loan guarantees. When it came to playing the Washington game, Mr. Zell walked away a big winner in the mid-1990's. His cruise ship plan—called Project America—wrapped up patriotism and politics and allowed him to construct his two huge ships by putting government money, not his, at risk. He also secured a 30-year monopoly on all cruise-ship traffic within the Hawaiian islands.

Helping him get this sweet deal were Senator Trent Lott, the Republican minority leader, who wanted to land a big project for the Ingalls shipyard in his home state of Mississippi, and Senator Daniel K. Inouye, the Hawaii Democrat, who engineered the exclusivity pact. Mr. Zell's ships, American-made and with American crews, would be the only ones allowed to sail port-to-port within Hawaii; others must stop at foreign ports first, eating up time.

''Obviously, I lost a lot of money,'' Mr. Zell said. ''Everyone talks about the taxpayer losses. But they never mention the fact that others lost significant amounts of money as well. Shareholders lost a lot of money, and that's very unfortunate.''

Last year, with American Classic shares trading at $36, Mr. Zell's 3.8 million shares were worth $137 million. This fall, the shores were delisted from Nasdaq when they were trading at 45 cents, chopping Mr. Zell's stake to $1.7 million. The government, meanwhile, is looking at losses of $367 million from American Classic, which also operates four paddlewheel steamboats through its Delta Queen Steamboat subsidiary.

The failure has incurred the wrath of Senator John McCain, Republican of Arizona, who called for an investigation, which the inspector general of the Transportation Department has undertaken.

Rob Freeman, a staff member of the Senate Commerce Committee, where Mr. McCain is the ranking Republican, said: ''It was a bad idea. The taxpayer took all the risk.''

Mr. Zell got such government largess by being the right person in the right place

when the United States Maritime Administration wanted to revive the domestic shipbuilding industry, which had been beaten down by lower-cost foreign competitors. Without aid, American Classic executives say, their project would never have gotten off the ground.

''We were supposed to be promoting shipbuilding,'' said a former top Maritime Administration official, who insisted on anonymity. ''Inouye and the whole state wanted to grow the cruise business. The maritime trade unions wanted jobs. So there was a lot of political support.''

Mr. Zell never lobbied the administration directly; his top executives did. In 1996 and 1997, American Classic executives met with members of Congress, labor leaders and shipyard owners in an all-out effort to promote the project in Washington. That effort was backed by campaign contributions from Mr. Zell and American Classic to Mr. Lott, Mr. Inouye and other crucial members of Congress.

It paid off. The $1.08 billion loan guarantee was the largest the Maritime Administration had ever approved, and it allowed American Classic to enter debt markets that would otherwise be closed to it—and at rates comparable to government debt. American Classic was also allowed to buy an old foreign-made ship and use it for Hawaii cruises while the two new ship were under construction, giving the company an exemption from a law prohibiting foreign carriers from that route.

But the souring economic picture of 2001 halted these ambitions. By last summer, the company had cash-flow problems, and the downturn in tourism after the terrorist attacks pushed it over the edge. ''Sept. 11 just put it away,'' Mr. Zell said. http://www.nytimes.com

THE JUSTICE DEPARTMENT'S DETENTION OF OVER 1,100 INDIVIDUALS IN CONNECTION WITH THE SEPTEMBER 11 INVESTIGATION

Mr. FEINGOLD. Mr. President, I was pleased to hear the Attorney General's announcement of the first indictment of a co-conspirator to the terrorist attacks on our Nation on September 11. Zacarias Moussaoui, who was detained by the FBI for carrying a false passport before September 11 and has been in custody since that time, has been indicted by a federal grand jury in Virginia. I commend the Justice Department, the FBI, and our intelligence services, for their tireless work in seeking to bring Moussaoui and other terrorists to justice.

We have known about Mr. Moussaoui since a few short days after September 11, but we still do not know the identities of hundreds of other individuals still held in detention, the vast majority of whom have no link to September 11 or al-Qaida.

And so I rise today to speak about the Justice Department's detention of these individuals in connection with its investigation of the September 11 attacks and the administration's continued refusal to provide a full accounting of who these people are and why they have been detained.

On October 31, along with Senator LEAHY, Senator KENNEDY, Representative CONYERS, Representative NADLER, Representative SCOTT, and Representative JACKSON-LEE, I sent a letter to Attorney General Ashcroft requesting basic information about the detention of over 1,100 individuals in connection with the investigation of the September 11 attacks. We wanted to know who is being detained and why; the basis for continuing to hold individuals who have been cleared of any connection to terrorism; and the identity and contact information for lawyers representing detainees. We also wanted information regarding the government's efforts to seal or close proceedings and its legal justification for doing so.

I thank and commend Senator LEAHY, the distinguished Chairman of the Judiciary Committee, for his efforts and leadership. Chairman LEAHY held four oversight hearings on the Justice Department's actions, including one hearing that I chaired focusing on the Department's detention of individuals. Those hearings culminated with the testimony of the Attorney General himself before the Committee.

I come to the floor today because I remain dissatisfied with the Administration's response to our request for information about the detainees. Seven weeks after our letter, the Department of Justice has given flimsy and contradictory excuses but no convincing legal justification for keeping secret the identities of the over 550 people it now holds in custody for minor immigration violations.

In addition, the Department has not yet provided any information on perhaps hundreds of additional people who have been detained. These people might still be being held on state or local charges, or without charges, or they might have been released. Nor has the Department given definite information on the number of individuals held as material witnesses.

After our hearings last week, I am more convinced than ever that Congress and the American people are entitled to this information to assess the Justice Department's assertions that everyone in custody has access to legal counsel and is being treated fairly.

In the days and weeks after the attacks, the Department made announcements about the status of the investigation, including tallies of the number of individuals detained. In fact, on October 25, the Attorney General announced that ''[t]o date, our anti-terrorism offensive has arrested or detained nearly 1,000 individuals as part of the September 11 investigation.''

In early November, however, the Department reversed course and decided it would no longer publicly release comprehensive tallies of the number of individuals detained in connection with the September 11 investigation and that it would limit its counts to those held on federal criminal or immigration violations. Thus, it would no longer keep track of those held on state or local charges, nor would it indicate how many people have been released after being detained or have been held without charges being filed.

s÷According to some recent news reports relying on sources in the Justice Department, other than Zacarias Moussaoui, none of the over 1,100 individuals who have been detained are believed to be involved with the September 11 attacks. It now appears that the Department believes that at least Mr. Moussaoui is connected to September 11. And only 10–15 of the detainees are believed to have any links to the al-Qaida organization. Furthermore, according to senior Justice Department officials quoted in the press, apart from Moussaoui, not a single one of the over 550 people detained on immigration charges is linked to al-Qaida. This leads us to a simple, critical question: Who are the remaining hundreds of people and why have they been detained?

The Attorney General undoubtedly faces an enormous challenge: He must work to find the perpetrators of the September 11 attacks and bring them to justice, while, at the same time, protect Americans from future attacks. I fully support our law enforcement officials in their tireless efforts to leave no stone unturned as they investigate the September 11 attacks and strive to protect our nation from future attacks.

But, as the Attorney General moves forward in our fight against terrorism, he has a responsibility to ensure that the constitutional foundations of our nation are not eroded. The torch of Lady Liberty must continue to shine on our Nation.

This is not just an abstract or theoretical concern. Our Constitution protects the people of this country from the arbitrary or unfair deployment of the awesome power of the Federal Government. The Federal Government has the power to ruin the lives of innocent people. The checks and balances of our Constitution are crucial in protecting the governed from an unfair government.

While the Justice Department recently began releasing some information about the people who have been detained on federal criminal charges or immigration violations, we still do not have a full picture of who is being detained and why. And there are reports that detainees have been denied their fundamental right to due process of law, including access to counsel, and have suffered serious bodily injury. We simply cannot tell if those cases are aberrations or an indication of systemic problems, if the Justice Department will not release further information about those being held in custody.

The Attorney General has repeatedly and emphatically asserted that he is acting with constitutional restraint. He even went so far as to suggest last week that those who question his actions are giving aid and comfort to the terrorists. I reject that charge in the strongest terms. And I further believe that the Department of Justice has a responsibility to release sufficient information about the investigation and the detainees to allow Congress and the

American people to decide whether the Department has acted appropriately and consistent with the Constitution. It is not disloyal to view the government's assertions with skepticism. It is the American way.

Just before Thanksgiving, in response to our October 31 letter, the Department provided copies of the complaints or indictments for about 46 people held on federal criminal charges. It also provided similar information on about 49 people held on immigration violations, but edited out their identities. Then, three weeks ago, the Attorney General announced the number and identities of all persons held on federal criminal charges and the number, but not the identities, of persons held on immigration charges. The total number of detainees is roughly 600 individuals. But the Department continues to refuse to identify the over 550 persons held for immigration violations, or provide the number and identity of persons held without charge, the number and identities of persons held on state or local charges, or even the number of material witnesses.

In statements to the press and in the Attorney General's and his associates' testimony before Congress, the Justice Department has cited a number of reasons for its refusal to provide additional information.

Very troubling is the Department's assertion that those being held for immigration violations have violated the law and therefore ''do not belong in the country.'' Without full information about who is being detained and why, we cannot accept blindly this suggestion that each and every immigration detainee does not deserve to be in the country. Do all of these immigration violations merit detention without bond and deportation? I doubt it, as the hearing on detainees the Judiciary Committee held showed that some are very minor violations, which under normal circumstances can be cleared up with a phone call or by completing some additional paperwork.

Another reason the Attorney General has cited for refusing to disclose information about detainees is that he does not want to aid Osama bin Laden in determining which of his associates we have in custody. Yet, the Attorney General and Assistant Attorney General Michael Chertoff have said nothing prevents the detainees from ''self-identifying.'' This, it strikes me, entirely undercuts the argument that giving out this information will help bin Laden. If the Justice Department really thought it would, it would never permit self-identification and would not have released the names of those 93 individuals who have been charged with Federal crimes.

Nor would the Department have released the name of Zacarias Moussaoui and the basis for his detention. The public has known about Moussaoui and his alleged role in September 11 and al-Qaida since shortly after the attacks. The Department never tried to keep his identity or why he was being detained a secret or try to prevent its disclosure.

Moreover, the claim that detainees can self-identify rings somewhat hollow, since we heard during the hearing on detainees that some of these individuals have been denied access to lawyers or family, for days or weeks at a time. Ali Al-Maqtari, a Yemeni national married to a U.S. citizen, testified that for most of the nearly two months he was detained, he was allowed only one phone call, of no more than 15 minutes, per week. He was never charged with perpetrating, aiding or abetting terrorism or with any crime whatsoever, and was eventually released on bond.

Dr. Al Bader Al-Hazmi was held incommunicado—denied access to his lawyer or family—for seven days. After nearly two weeks in detention, Dr. Al-Hazmi was released with no charges filed against him.

Tarek Mohamed Fayad is an Egyptian national and dentist residing in California. He was picked up by the FBI on September 13 and then transferred to the Brooklyn Detention Center in New York City, where he remains to this day. According to the Wall Street Journal, it took his lawyer one month before she was able to locate and talk to him.

Unfortunately, there could be many more cases like these three I have mentioned. But if the Justice Department will not tell the public who is in detention, we can never know the circumstances of their cases.

It is apparent that the option of 'self-identification' is not a real option. Indeed, it borders on the fanciful to suggest that all the detainees are in a position to self-identify. Rather, there are serious questions about whether the Department has denied those detained their due process rights, including access to counsel.

The Department has also said that it is prohibited by law from disclosing the information. But when I questioned both Assistant Attorney General Chertoff and later the Attorney General himself, they admitted that there is no law that provides for a blanket prohibition on the disclosure of information about individuals who have been detained.

The Attorney General cited a section of the Privacy Act, as justification for not providing this information. The Privacy Act, however, only applies to citizens and legal permanent residents. It does not apply to aliens who are not legal permanent residents. From the information provided by the Department thus far, we know the vast majority of the detainees are not permanent residents.

Furthermore, case law under the Freedom of Information Act explicitly allows the government to release private information about even citizens and legal permanent residents where that information reflects on the performance of the agency.

And that's exactly why this information has been requested. There are serious questions about whether individuals who have been detained have been denied their constitutional right to due process of law. And the kind of information we have requested will help Congress evaluate whether the Justice Department has deprived any detainee of his or her constitutional rights. We seek this information not to embarrass or harass the detainees but to provide oversight of the Justice Department's treatment of them.

To make matters worse and further thwart public or congressional scrutiny of the Department's actions, we also learned during the oversight hearings that the Attorney General has taken the extraordinary step of closing all immigration proceedings involving about 550 of the 1,100 or more individuals who have been detained. This means no visitors, no family and no press are allowed. As Mr. Al-Maqtari's attorney Michael Boyle has said, this secrecy taints the proceedings, even when, in cases like Mr. Al-Maqtari's, the FBI has cleared the immigrant of any link to terrorism whatsoever. This should give us all pause. People innocent of any connection to terrorism are being branded terrorists and being evaluated in secret proceedings. This is not right.

In sum, the various reasons cited by the Department for not disclosing information about the detainees are contradictory and lack legal justification. I once again urge the Administration to release basic information about the people now held in federal custody, except for the identities of material witnesses. And the Administration should also give us whatever help it can in identifying people who may be held in state custody. Rather than expending its resources trying to keep these detentions secret, the Administration should show that it has confidence in what it is doing by opening up its actions to public scrutiny.

This is not simply a question of constitutional rights, it is a question of effective law enforcement. It became clear during our hearing on the detainees that the roadblocks to individuals consulting with counsel not only cause great hardship to the detainees and violate their rights, but also hinder the investigation and waste the resources of law enforcement on people who have no connection with terrorism. As Mr. Goldstein, an attorney for Dr. Al-Hazmi, testified:

> Dr. Al Hazmi's attorneys had notified the appropriate law enforcement agencies and the Department of Justice in writing, requesting the whereabouts of their client and expressing their desire to communicate with him. Despite these efforts—and despite Dr. Al Hazmi's repeated requests to consult with his counsel—Federal authorities stonewalled and continued to interrogate Dr. Al Hazmi in the absence of his counsel.

Mr. Goldstein added:

> By denying Dr. Al-Hazmi access to his retained counsel, Federal law enforcement officials not only violated my clients rights,

they deprived themselves of valuable information and documentation that would have eliminated many of their concerns. Their obstructionism prolonged the investigative process, wasting valuable time and precious resources.

I was gratified that a number of my colleagues expressed concern about the treatment of Mr. Al Maqtari and Mr. Al-Hazmi, and particularly about the difficulties they had in communicating with counsel. I have focused in recent weeks on the issue of access to counsel because I believe this issue is at the center of how our justice system is treating these detainees. This is the issue that takes the concern over the fate of the detainees from an abstract debate over civil liberties versus security to a very specific and very important inquiry about how our government actions affect the lives of hundreds of people.

What happened to Mr. Al Maqtari and his wife Tiffany had a severe impact on their well being. What has happened to hundreds of other detainees has similarly affected them. We are not just engaged in a hypothetical law school exam question or a mock crisis where we each play a role. We are talking about taking the liberty of real people, with real families and real lives. It is not enough to say that some liberties have to be sacrificed in these difficult times. Rather, we must be able to determine whether the actions of the Department have been reasonable, and whether the sacrifices that are being requested are justified.

That is where lawyers come in. With a lawyer, a detainee can much more readily answer concerns about his behavior, provide documents to show his whereabouts during crucial periods, and generally provide information to show that he is not a terrorist. Lawyers can help determine whether the extreme step of detention without bond is warranted. And they can explain what is going on to the detainee and the public. I asked the Attorney General at our hearing to take steps to ensure that everyone under detention who wants a lawyer can obtain one. And I asked him to determine how many of the detainees are not represented by counsel. I hope he will follow through on our discussion. It is essential that anyone who is being held have counsel and be able to communicate with counsel.

The Attorney General has said reasoned discourse should prevail. I agree. But in order to have that reasoned discourse, the Justice Department should provide Congress and the American people with enough information to promote a fair and open dialogue and make our oversight meaningful. Our hearings showed that not all the detainees have adequate access to counsel. They showed, at least, that the Congress has reason to test and examine the Administration's assertions that everyone's constitutional rights are being respected in this investigation. By continually saying in the face of this evidence that we should take its assertions about the treatment of the detainees on faith, the Administration furthers the appearance that it has something to hide.

I hope that we are not in some sense following those who rounded up over 120,000 Japanese Americans and thousands of German and Italian Americans during World War II. The rhetoric we hear today rings awfully familiar. We must not return to the time when immigrants who provided so much to our nation were suddenly branded ''enemy aliens'' and deprived of their liberty and other fundamental rights.

Let us not repeat these mistakes of history. I again call on the Administration to fulfill its responsibility to protect the Constitution in its pursuit of liberty and justice for all. It can begin by identifying those now held in Federal Custody and providing the other information requested in our October 31 letter.

INVESTOR AND CAPITAL MARKETS FEE RELIEF ACT

Mr. SARBANES. Mr. President, I rise to address an issue which I believe may merit the attention of the Securities and Exchange Commission following enactment of H.R. 1088, the Investor and Capital Markets Fee Relief Act.

That bill has two main impacts. It authorizes the commission to raise the salaries of its staff to levels that are on a par with the compensation paid by other Federal financial regulators. Our securities markets are the envy of the world. It is important that the regulator of those markets be in a favorable position to attract and retain qualified employees. Enacting pay parity contributes towards this goal and will result in enhanced supervision of the securities markets.

In addition, the bill reduces certain fees charged to investors and issuers. Section 11 of the bill provides an effective date for reduction of transaction fees on the later of, one, the first day of fiscal year 2002; or two, 30 days after the date on which a regular appropriation to the Commission for such fiscal year is enacted. Because the regular appropriation to the Commission (H.R. 2500) was signed into law on November 28, 2001, Public Law 107–77, the effect of Section 11 is to provide an effective date for transaction fee reduction of December 28, 2001, regardless of when the bill is enacted.

The legislation was passed by the Senate on December 20, 2001, and still must be signed by the President. Thus, the industry will have at most only a few days to comply with the law. I have been informed by some market participants that this may not allow them adequate time to re-program and test their computers to make certain that the transition to the new fee structure goes smoothly and without flaws.

I believe it would be appropriate, and consistent with the intent of this legislation, for the commission to review this situation and determine whether it is necessary or appropriate in the public interest, and consistent with the protection of investors, to use the commission's general exemptive authority to extend the effective date for the reduction of transaction fees for a brief period as may be reasonably necessary in order for market participants to comply with the new law fully and without disruption.

Mr. GRAMM. I believe that the commission can and should alleviate this problem. When the Senate passed its version of fee reduction legislation in March, the bill, S. 143, provided for a delay of 30 days in the effective date for transaction fee reduction in order to provide securities firms and markets the necessary time to adjust their computer systems to accommodate the rate change. This language was changed when the bill was passed by the House in June, in order to comply with budget-scoring requirements. At that time, it was envisioned that congressional action on the bill would be completed well before the start of the new fiscal year in October, and that the effective date provision would not cause administrative problems for the securities industry.

It is not our intention to impose an administrative requirement that would be impossible for industry to meet. In order to comply with congressional intent and to make this provision workable, I hope that the commission will consider using its general exemptive authority under Section 36 of the Securities Exchange Act of 1934 to extend the effective date for reduction of transaction fees.

Mr. KERRY. Mr. President, I speak today on S. 1499, the American Small Business Emergency Relief and Recovery Act of 2001. This legislation provides help to small businesses hurt by the events of September 11th and to small businesses suffering in the weakened economy. Senator BOND and I have spent months trying to uncover who is behind the serial holds that have been placed on this emergency legislation and work out disagreements.

This bill hasn't been ''hustled through,'' as some contend. It was drafted with the input of small business organizations, trade associations and SBA's lending and counseling partners through more than 30 meetings and conference calls—conference calls because we couldn't ask folks to fly in the immediate weeks after the attacks. It is cosponsored by 18 of the Small Business Committee's 19 members. And overall 62, senators, including 20 Republicans, have joined me in cosponsoring S. 1499.

On the House side, the Committee on Small Business passed the companion to S. 1499. We attempted to move this bill quickly because it is emergency legislation. It is a good bill because it can do a lot for a lot of people. It is being held because of shameful politics.

I say let's bring this bill up for a vote. Small businesses have a right to know exactly who is working against them and who is working for them.

So what happened? On October 15th, when this legislation had cleared both cloakrooms for passage, the Administration had the Republican cloakroom put a last-minute hold on the bill so the Administration could announce its approach the next day. The next morning, the Administration lifted its hold, but a new hold was immediately placed by the junior Senator from Arizona, which he stated in the press was on behalf of the Administration. Last week, the Senator from Arizona lifted his hold, and I thank him for that, but unfortunately, we then learned that there was one or more anonymous Republican holds on the bill. This approach makes it very difficult to try to work out objections. Two other Republican senators told me that their objections were solely based on the Administration's problems with the bill. Therefore, I directed my staff to meet with the Administration, learn their concerns and try to reach a compromise so that this bill could pass before the recess.

Last night, Senator BOND and I joined our staffs as they met with representatives of the Administration for the eighth time. I am very disappointed to report that the Administration came to the table and said that, although we had made some progress, it would not negotiate further. The ultimatum was for us to strike entire sections and provisions critical to the relief provisions of our bill.

Specifically the Administration's representatives said:

''We cannot work with you on Section 6.'' That is the entire stimulus portion of S. 1499. As such, we were asked to eliminate the provision that would make it less expensive for small businesses to get loans and provide incentives to lenders to make these loans. We were told that, in their view, there is no credit crunch for small businesses.

''We cannot work with you on Section 10.'' Section 10 establishes a fund to help small businesses that were shut out of their Federal work sites or have suffered delays in accessing those sites because of national security measures. We offered to set it up in any way they thought it could work and to reduce its $100 million authorization level, but the Administration refused to work with us on that section.

''We cannot work with you on refinancing non-SBA business debt.'' This was an important part of the disaster relief that S. 1499 targets to those at ground zero in NY and VA, those located in airports and those adversely affected by Federal security actions. The Administration was unwilling to make this help available to these disaster victims.

The administration can not go further in providing an incentive to small business lenders by reducing the lenders' loan fee by more than one-tenth of one percent. Despite numerous articles in reputable newspapers such as the New York Times, it is the Administration's view that lenders do not need incentives to make small business loans in this economic downturn. Senator Bond and I, as well as the 61 other cosponsors of S. 1499 believe that both lenders and small business borrowers need a break to encourage these loans to be made. With this capital, small businesses will stay in business and continue to employ people. Without it, we can expect greater business failures and bankruptcies.

Senator BOND and I asked them to meet us halfway, and they said no. We asked them to give us alternative language, and they didn't give us any. We spent more than 20 hours negotiating on this bill and it appears as if the Administration never had any intention of finding common ground. It appears as if it was an exercise in delay.

Let me describe briefly where I disagree with the administration about how to help small businesses battling bankruptcy and employee layoffs triggered by the terrorist attacks and economic downturn. The administration believes that all assistance should be delivered through the SBA's disaster loans, which are administered through only four regional offices. From talking to small businesses and SBA lenders, Senator BOND and I have concluded that small businesses would be better served through a combination of disaster loans and government guaranteed loans. Government guaranteed loans are almost five times cheaper than what the administration has proposed, have less exposure for the taxpayer, and can reach more small business owners because they are delivered through more than 5,000 private sector lenders who know their communities and have experience making SBA loans. Our proposal combines public and private sector approaches to ensure small businesses receive the maximum amount of assistance.

We will never agree on each other's approach, mostly because the administration has told us in meeting after meeting that it does not believe there's a credit crunch and that small businesses are not having difficulty in accessing credit. They don't acknowledge articles, surveys and testimonials that state it has become harder and more expensive for small businesses, particularly minority and women-owned small businesses, to get loans over the past year.

They ignore the surveys by the Federal Reserve that say, ''40 percent of domestic banks reported tighter standards [when lending to small businesses] over the past three months, up from 32 percent in August.'' Please keep in mind that this survey was released in October and doesn't even capture the affects of September 11.

They ignore articles from economic authorities such as the Wall Street Journal. I read this last week on the floor but think it is absolutely worth repeating. Wall Street Journal, Tuesday, November 6th, 2001. Here are the words of Mr. John Rutledge, Chairman of Rutledge Capital in New Canaan, CT, and a former economic advisor to the Reagan administration:

> Interest rate reductions alone are not enough to jump-start this economy. We need to make sure cheaper credit reaches the companies that need it. . . . The Fed is cutting interest rates—but the money isn't reaching capital-starved small businesses because Treasury regulators are cracking down on bank loans. Credit rationing, not interest rates, is the real problem with the economy. . . . This problem didn't start on September 11th. For more than a year U.S. banks have been closed for business lending. Unless the current Bush administration takes steps to restore bank lending to small businesses and heal the asset markets now, the economy will stay weak.

They ignore surveys published in the American Banker. On October 31, a survey of 80 lenders of all sizes by Phoenix Management Services found that 42 percent ''would be less likely to lend to small businesses, which they view as more risky because they foresee no improvement in the economy until late 2002 at the earliest.'' The article from November validated what before was characterized as ''less likely to lend to small businesses,'' by reporting lenders had actually ''tightened their standards'' to small firms by more than 40 percent.

Still, the administration maintains there's no credit crunch and that provisions in S. 1499 to provide improved access to credit are too expensive and unnecessary.

The administration has also raised concerns about the cost of the legislation, which has been unofficially scored by Congressional Budget Office at $860 million. Let me be clear, that's million, not billion. $860 million to help all of our Nation's small businesses. Yet the administration objects to this, when they have sent up requests for billions in tax cuts for a select few large corporations, and when the administration's approach costs almost five times as much to help fewer small businesses. The bill's $860 million cost is too much to invest in the nation's small businesses, according to the administration's position.

I regret very much for small businesses and their employees that their needs are being trivialized. I admire Senator BOND and the Chairman of the House Committee on Small Business for showing leadership in their party to help small businesses. I am very glad that we can work in such a strong bipartisan fashion to fight for small businesses. I thank the 62 members of this body who have come together in a bipartisan fashion to support this legislation and our nation's small businesses.

Let me note here that the White House said in our meetings that 62 cosponsors ''means nothing—that it happens all the time up here.'' I find that cavalier considering that, according to the Congressional Research Service,

only 13 out of 1,839 bills introduced in the 107th Congress have more than 60 cosponsors.

The support for this bill is strong and bipartisan. I am very sorry that those Senators supporting S. 1499 have not had the chance to cast a vote in favor of this emergency legislation before they go home for the holidays and visit with the small businesses in their states. Small businesses deserve some good news. As for right now, we can only tell them what I told the administration in our meetings last night: When we come back in January, we intend to file cloture on this bill and take a vote.

In closing, let me thank the many groups who have fought so hard on behalf of their members to get this legislation enacted. They have demonstrated all that is great about grassroots action and active involvement in the political and legislative process.

In addition to including for the record the list of these groups, I also ask unanimous consent to have printed articles and letters from small business groups regarding the current credit crunch, the need for equitable adjustment provisions for our small business contractors and other provisions of S. 1499 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1499 SUPPORTERS

Airport Ground Transportation Association, American Bus Association, American Subcontractors Association, Associated General Contractors of America, Association of Women's Business Centers, CDC Small Business Finance, Chicago Association of Neighborhood Development Organizations, Citizens Financial Group, RI, Clovis Community Bank, CA, Coastal Enterprises, ME.

A CREDIT CRUNCH IMPERILS THE ECONOMY

(By John Rutledge)

When the Federal Open Market Committee meets today it won't be arguing over whether we are in recession. The economy is weaker today than at any time since 1982. It will almost certainly end the meeting by voting to reduce interest rates again. This will bear the same results as all the previous rate cuts this year: none.

Interest rate reductions alone are not enough to jump-start this economy. We need to make sure cheaper credit reaches the companies that need it. Credit rationing, not interest rates, is the real problem with the economy.

The Fed's monetary stimulus has been hijacked by the bank regulators. these credit highwaymen aren't bad guys, they are just doing their jobs. The Treasury Department's Office of the Comptroller of the Currency (OCC), which is charged with regulating federally chartered banks, has a different agenda from the Fed. Its job is to protect bank capital, period. It does so with an army of bank examiners, who wield the blunt instrument of credit rationing inside banks. For more than a year, these regulators have been diverting bank reserves into Treasury securities instead of business loans, in hopes of restoring bank capital that was damaged by technology lending. Companies that rely on banks for working capital have been sucking air.

To restore growth we need a functioning banking system. This will require a level of coordination the Treasury and the Fed have seldom achieved. But the current consensus for growth could give President Bush the political Roto-Rooter he needs to clear out the conduit.

This problem didn't start on Sept. 11. For more than a year U.S. Banks have been closed for business lending. The story reads a lot like the real-estate blowout of the early 1990s that ended with Resolution Trust Corp. auctions, except this time it was undisciplined technology investments that did us in. In the three years leading up to 2000, commercial banks loaned enormous sums of money to telecom, cable and technology companies to finance, capital-spending programs. These loans weren't backed by assets, but were based on projections that all three sectors would have sales growth rates several times that of the economy for many years to come.

Last summer it became clear that sales growth would not meet those heady projections. Instead of the 14% growth projected by analysts for telecoms this year, for example, actual sales will shrink. Companies without revenues don't make interest payments. And so by the fall of 2000, OCC teams were forcing regional banks to downgrade loans and reduce business lending.

The Fed is cutting interest rates—but the money isn't reaching capital-starved small businesses because Treasury regulators are cracking down on bank loans.

Here's the catch. The loans to technology companies were generally unrecoverable. The tech firms had spent the funds on current operating expenses or to purchase assets with lots of goodwill but little resale value. So the banks turned to the one place they could get money back: reducing the revolving credit facilities of their small business customers.

I got a personal glimpse of all this last October, when a team of bankers visited our office to inform us their bank had decided to reduce the credit rating of, as well as cash-flow loans to, one of the private companies we own, in preparation for a bank examiner audit the following week. Our loan went from a ''five'' to a ''six'' on their 10-point internal risk management system, which meant the company could no longer use its acquisition credit line. This caused the company to halt discussions with an acquisition target and to book the costs incurred up to that point as current expenses.

Other companies had it worse, with reduced revolving credit facilities and increased fees. Some companies, under pressure from their banks to raise equity capital, have been forced to sell control in an illiquid equity market. Others have been forced into filing for bankruptcy protection or liquidation.

Deprived of working capital, U.S. companies have been trying to shrink their way to solvency, by reducing inventory, stretching vendors and laying off workers. This has created the sharpest drop in industrial output in 20 years.

Ironically, when the Fed became alarmed at the shrinking economy and began to cut interest rate sin January, the bank examiners, who report to a different master, tightened further. The business loan market is far tighter today than it was then. Two years ago banks were willing to lend a good company four to five times Ebitda, or earnings before interest, taxes, depreciation and amortization. Today banks quote a market of just over two times Ebitda but money is not, in fact available even at that level.

A further irony is that although banks have refused to lend to businesses, they have been throwing money at the consumer through mortgage and equity credit lines. This has produced a two-speed economy that has left many companies unable to produce products or to ship orders for lack of working capital. Stimulating consumer spending won't solve this problem; we need a functioning bank market.

The last period of nonprice credit rationing was the 1990–92 credit crunch. It caused tremendous damage to the economy and cost the first President Bush his re-election bid. It ended only after the RTC had finished its auctions and the property and banking markets had stabilized.

The lesson of that experience—that the economy is only as healthy as its balance sheets—is as true today as it was a decade ago. Unless the current Bush administration takes steps to restore bank lending to small businesses and heal the asset markets now, the economy will stay weak.

The White House can do three things to put the economy back on sound footing.

First, it should bring the Fed and the Comptroller of the Currency together to coordinate efforts to restore bank lending. This can be done very quickly and would not require new legislation.

Second, it should introduce legislation to transfer the regulation of federally chartered banks from the Treasury to the Fed, which would make monetary policy function more smoothly and prevent future credit-crunch situations.

Third, the White House should make it, clear to Congressional Democrats that the price for support of their huge spending projects is fast action on a lower capital-gains tax rate and further action to lower marginal income tax rates, both of which would increase asset market values and improve bank capital.

Forceful action to Roto-Rooter the business loan pipeline is one thing we can do to make the economy grow again.

[From The American Banker, Wed., Nov. 14, 2001]

(By Rob Garver)

The slowdown in lending activity, evident through much of the year, sharpened in recent months through diminished demand and tighter lending standards even as banks addressed a new round of credit quality problems in their loan portfolios.

According to the Federal Reserve Board's latest survey of senior loan officers, which was released Tuesday, nearly half the banks had lowered internal ratings on at least 5% of their commercial lending portfolios.

Internal loan ratings reflect a bank's assessment of the risk that the borrower will default. The most likely borrowers to be downgraded in the three-month period through October were commercial airlines and nondefense aerospace firms, followed

closely by travel and leisure-related businesses such as hotels and restaurants. The survey of the chief credit officers of 57 domestic banks and 22 U.S. branches of foreign institutions also found that most U.S. banks tightened their underwriting standards for commercial loans, and that commercial borrowers, for their part, were less willing to go into debt. Terms and conditions for consumer loans tightened slightly, the survey found, and demand for consumer loans fell.

The survey, taken four to six times a year, typically contains a number of ''special questions'' in addition to standard queries about loan terms, conditions, and demand. The special questions, which usually address typical issues, focused on the recent downgrading of commercial credits and the changes in the loan market as a result of the Sept. 11 terrorist attacks on New York and Washington.

After noting that debt rating agencies ''have revised their ratings for a substantial number of firms'' recently, the survey asked banks what portion of their commercial loan portfolios, by dollar volume, had been downgraded in the past three months.

Among domestic institutions, 10.5% said they had downgraded less than 1% of their portfolios, while 40.4% reported downgrading between 1% and 5%. Banks that downgraded between 6% and 20% of commercial loans made up 42.1% of the total, and an additional 7% of respondents reported downgrading between 21% and 30%.

The standard elements of the survey, which deal with underwriting standards and loan demand, found that 50.9% of banks had tightened their standards for large and midsize firms. For loans to small firms, 40.4% reported higher standards.

The tightening of standards most frequently took the form of premiums charged for making risky loans, and higher interest rates. Loans to large firms were also likely to have tighter loan covenants, while loans to small firms were likely to carry higher collateralization requirements.

The main reasons for the tougher underwriting standards were a ''less favorable or more uncertain economic outlook'' and a ''worsening of industry-specific problems.''

While banks were tightening their standards, commercial borrowers were reducing their demand for loans, the survey found. Loan demand from large and middle-market firms was down at 72% of banks in the survey, while demand form small businesses was down 55.4%. The most common reason reported for the decreased demand was a reduced investment by customers in their plants and equipment.

After noting that, in the aftermath of the attacks, the Securities and Exchange Commission had relaxed its rules on stock repurchases by public companies, the survey asked if demand for loans to finance such repurchases had increased, and if banks had altered the terms of such loans. In both cases, more than 90% of respondents reported little or no change.

The survey also asked if the dislocation of businesses after Sept. 11 had affected liquidity in the secondary loan market. Two-thirds of the respondents reported decreased loan trading volume, and 64.4% reported that since the attacks, bid-ask had widened.

[From the Arizona Daily Star]

KYL ACCUSED OF BLOCKING AID BILL

(By Tiffany Kjos and Aaron J. Latham)

Arizona Sen. Jon Kyl and an anonymous lawmaker are being accused of blocking a bill that would provide low-income loans to small businesses suffering as a result of the country's economic downturn.

The bill would provide financial help through existing loan programs administered by the Small Business Administration: 7(a) working capital loans; and 504 loans for equipment and building improvements. It would also lower fees for borrowers and SBA lenders.

Sen. John Kerry, a Democrat from Massachusetts and chairman of the Senate small-business committee, introduced the bill more than two months ago in hopes of moving it through quickly. It has 60 co-sponsors in the Senate and dozens of backers in small-business associations.

''I'm asking my Republican colleague to stop obstructing this legislation,'' Kerry said.

The Congressional Budget Office estimates the bill's cost at $860 million, but it would result in $25 billion in government-guaranteed loans and venture capital for businesses, Kerry said. If the bill passes, Congress would have to figure out where the money would come from.

''As each day passes, more and more small businesses are left behind, facing financial hardships that are forcing them to close their doors as a result of inadequate disaster assistance, stifled availability of loans and limited access to capital,'' Kerry said.

Kyl, a Republican, has said the bill is too expensive, and he told the Washington Post he is not blocking the bill but acting as an agent for the Republican steering committee in reviewing it.

Kyl's anonymous colleague on the bill can remain unidentified because Senate rules allow members to oppose legislation without going public.

The federal government already has in place a disaster loan program that offers low-interest loans to businesses that suffered directly or indirectly as a result of the Sept. 11 attacks. The Small Business Emergency Relief and Recovery Act of 2001 would help those firms, plus any small business that needs money to survive in the lagging economy.

Like thousands of other small businesses across the country, Tucsonan Maggie Johnson has seen a dropoff since Sept. 11. Johnson's Malkia African Arts & Gifts at 272 E. Congress St. is filled with African masks, fabric and clothing, Egyptian beaded scarves, and colorful greeting cards she makes by hand.

''I'm not selling necessities. I'm selling things people buy with their disposable income. And everyone's sitting on their disposable income now,'' she said.

The consumer response to the attacks was immediate and nationwide, she said.

''People are pulling back, retrenching—waiting is a good word,'' she said. ''They're spending money on things they have to have, food and basics.''

The U.S. Chamber of Commerce is a strong supporter of the measure. Giovanani Coratolo, director of small-business policy for the Washington, D.C.-based group, was careful not to criticize Kyl but did not say the chamber has been working hard to get the bill through the Senate.

''We respect his opinion but we are not with him on this,'' Coratolo said. ''We've been actively working to get co-sponsors and, quite frankly, it could have 80 co-sponsors, (but) he is still determined to block it.''

Normally the chamber would not endorse legislation that would expand the government's role in small business, Corato said—but these are special circumstances.

''Given the times and what we see from small businesses, there's a lot of hurting going on and they do need help. They're not looking for handouts. They're looking for access to capital that will give them the ability to help them hang in there,'' he said.

Coratolo said the opposition's strategy has been to run out the clock. The Senate will probably adjourn by the end of this week and not return until late January, Coratolo said.

''Small businesses need the relief now, and actually they needed it last month,'' he said. ''The existing programs and loan programs that were meant to act as a safety net—some are not there and some don't reach out far enough to help those that really need the help.''

SBA loans are guaranteed by the government, so lenders are more apt to give them, Kerry said.

While he opposes the small-business bill, Kyl is backing a $500 per person tax credit for travel-related expenses.

''Sen. Kyl has a travel incentive bill going through that's $10 billion, but he says our bill is too expensive. Understanding how important small businesses are to our economy, we are not denying that travel is important as well, but we do need to get these small businesses some assistance,'' said Dayna Hanson, Kerry's press secretary for the small-business committee.

Kerren Vollmer, who owned Nava-Hopi Tours in Flagstaff with her husband, Roger, agrees. The couple closed their bus tour business Oct. 26 because so many people canceled their travel plans after Sept. 11. The Vollmers owned 10 tour buses and operated charter tours as well as regular trips to Phoenix and the Grand Canyon from Flagstaff.

''You still have to run regular schedules,'' she said. ''You can't quit just because you have only three or four people.''

Vollmer is a lifelong Republican who voted for Kyl, ran for county superintendent, and has worked in the voting precinct. She tried to contact Kyl's office but received no response.

''I've sent e-mail, I've sent him a fax, begging him, offering to talk with him or any of his staff, this is what's going on,'' Vollmer said. ''When it's your own senator, it hurts. Because I don't feel like he even recognizes what's going on under his own nose.''

Vollmer said the company tried to get a disaster loan but couldn't even get the application, even with the help of the Arizona Department of Revenue and the local community college's small business development center. Whether the latest measure will make it through the Senate is very much up in the air, Coratolo said.

''Am I optimistic? It's about a 50-50 chance, and if it does, it will be by the skin of its teeth,'' he said. ''Sen. Kyl has been very, very effective at blocking it.''

THE NATIONAL ASSOCIATION OF GOVERNMENT GUARANTEED LENDERS, INC.,

December 20, 2001.

Hon. JOHN KERRY,

Chairman, Senate Committee on Small Business and Entrepreneurship, Russell Senate Building, Washington, DC.

DEAR SENATOR KERRY, On behalf of the members of the National Association of Government Guaranteed Lenders (NAGGL), the SBA's 7(a) lending partners, thank you for your continuing efforts to improve capital access for small businesses in this time of sharply heighted need. We strongly support your efforts and the efforts of Senator Bond to enact S. 1499.

It is clear, especially in light of events of September 11, that banks' profits continue to plunge. According to a November 30 article in the Washington Post, ''Earnings for the nation's banks dropped nearly 10 percent in the third quarter because of the largest increase in expected loan losses in more than a decade.'' The report goes on to say that ''the dip in earnings can be partly attributed to losses from the Sept. 11 terrorist attacks, with more expected to be reported in the fourth quarter.''

This drop in profits has resulted in an every-tightening credit crunch, as can be inferred from just the headline of a November 14 Wall Street Journal article that reads, ''Banks Tighten Credit, Loan Standards In Past Months Amid Uncertain Outlook.'' This article cities a Federal Reserve study that ''aids fuel to growing concerns that an unwillingness among bankers to lend is threatening to choke off investment, hampering chances of a quick economic recovery.''

In this economic climate, it has become exceedingly difficult for even the most qualified small businesses to access the capital they need for survival, and to help spur the American economy to recovery and renewed prosperity.

This is why the passage of S. 1499 is so important. While the SBA's Disaster Loan Program is a necessary ingredient of economic recovery, it cannot possibly provide the sweeping help that the 7(a) program can, and S. 1499 addresses this problem. S. 1499 creates a more attractive 7(a) program for cautious lenders, and a more affordable 7(a) program for hurting borrowers for one year's time—when both of them need it most. And it utilizes private sector lenders that are already in place and ready to provide necessary capital immediately.

We encourage you and your Senate colleagues to expeditiously pass S. 1499 while it is still possible to help small businesses and the American economy in their time of greatest need.

Sincerely,

ANTHONY R. WILKINSON,
NAGGL President & CEO.

A PLEA FOR SENSIBLE GUN SAFETY LEGISLATION

Mr. LEVIN. Mr. President, on April 27, 1999, we paused in the Senate to observe a moment of silence in tribute to those who died at Columbine High School and to express our sympathy for their loved ones. Since the Littleton tragedy, over 60,000 people have been killed by guns, criminals continue to gain easy access to guns and, according to the Brady Campaign, there is an unlocked gun in one of every eight family homes. Several strong pieces of gun safety legislation have been introduced in the 107th Congress to address these problems. None, however has been adopted. In fact, none has even been voted on in the Senate.

In 1994, the Brady law established the National Instant Criminal Background Check System, NICS. This check system allows federally licensed gun sellers to determine whether a person is allowed to buy a gun. Since its inception, NICS checks have prevented more than 156,000 felons, fugitives and others not eligible from purchasing a firearm without infringing upon any law-abiding citizen's ability to purchase a gun.

However, a loophole in the law allows unlicenced private gun sellers to sell guns without conducting a NICS check. A 1999 study by the Bureau of Alcohol, Tobacco and Firearms found 314 cases of fraud at gun shows, involving 54,000 guns. Felons and suspected terrorists have reportedly used gun shows to purchase firearms, and smuggle them out of the United States. On April 24, 2001, Senator REED introduced the Gun Show Background Check Act. I cosponsored that bill because I believe it is an important tool to prevent guns from getting into the hands of criminals and foreign terrorists. This bill, which is supported by major law enforcement organizations including the International Association of Chiefs of Police, simply applies existing law governing background checks to persons buying guns at gun shows. We should stand with our Nation's law enforcement community and take this common sense step to reduce gun violence.

In January, regulations issued by the Department of Justice directed the FBI to retain NICS check information for a 90-day period. This 90-day period allows local law enforcement and the FBI to check NICS for illegal guns sales, identify purchasers using fake IDs and screens for gun dealers misusing the system. However, in June, the Attorney General proposed reducing the length of time that law enforcement agencies can retain NICS data to 24 hours. This is simply not a sufficient amount of time for law enforcement to audit and review the NICS database for patterns of illegal activity. This change will create another potential loophole for criminals to purchase guns.

I was greatly concerned by the Attorney General's action and I was pleased to cosponsor the ''Use NICS in Terrorist Investigations Act'' introduced by Senators KENNEDY and SCHUMER. This legislation would reinstate the 90-day period for law enforcement to retain and review NICS data. The need for this legislation was highlighted just a couple of weeks ago when the Attorney General denied the FBI access to the NICS database to review for gun sales to individuals they had detained in response to the September 11th terrorist attacks and refused to take a position on an amendment which would authorize that access. I believe it is imperative that law enforcement is given the authority to review the NICS database. The Schumer-Kennedy bill is commonsense legislation that deserves floor action.

The Brady law has been effective in keeping guns out of the hands of criminals, but the number of children killed in suicides, unintentional deaths and school violence remains unacceptably high. This is the case because kids still have all too easy access to guns. Young children are too often killed or severely injured because adults do not store their firearms properly. A recent National Institute for Justice survey found that 20 percent of all gun-owning households had an unlocked and loaded gun in the home. To prevent easy access to guns, Senator DURBIN introduced the Children's Firearm Prevention Act. Under this bill, adults who fail to lock up a loaded firearm or an unloaded firearm with ammunition would be held liable if the weapon is taken by a child and used to kill or injure themself or another person. The bill also increases the penalties for selling a gun to a juvenile and creates a gun safety education program that includes parent-teacher organizations, local law enforcement and community organizations. This bill is similar to a bill President Bush signed into law during his tenure as the Governor of Texas. I support this bill and hope the Senate will act on it during this Congress.

We know kids and criminals should not have access to guns, but there are certain types of guns that simply do not belong on the street. One example is .50 caliber sniper guns. These weapons are among the most powerful weapons legally available. In fact, according to one rifle catalogue, a .50 caliber manufacturer touted his product's ability to wreck ''several million dollars, worth of jet craft with one or two dollars worth of cartridge.'' This is a disturbing assertion, particularly in the wake of September 11th. Even more disturbingly, there are fewer restrictions placed on purchases of long-range .50 caliber sniper weapons than there are on handguns. In fact, according to a 1999 GAO report, since the end of the Gulf War, .50 caliber sniper guns have ended up in the hands of many suspected terrorists, including al-Qaeda. Senator FEINSTEIN's Military Sniper Weapon Regulation Act would change the way .50 caliber guns are regulated by placing them under the requirements of the National Firearms Act. This is a necessary step to assuring the safety of Americans.

More than 2 years ago, two young men brought terror to Columbine High School. Of the four guns used by the two Columbine shooters, three were reportedly acquired at a gun show. The teenage shooters took full advantage of the gun show loophole, which allowed their friend to buy them two rifles and a shotgun without ever submitting to a background check. The tragedy in Littleton, Colorado struck a chord with every American. About a month ago, it was discovered in New Bedford, Massachusetts that a 17-year-old was plotting a massacre at his school. He told police he wanted the event to be like the 1999 slaughter at Columbine High School. Since the events of September 11th, several states, including my home state of Michigan, have experienced significant increases in applications for concealed weapons permits and background checks for gun permits. The gun show loophole remains open, law enforcement lacks access to the NICS database, kids continue to gain access to guns and .50 caliber military sniper guns remain uncontrolled. It is long past time to adopt sensible gun safety legislation.

LEGISLATION IN BEHALF OF VETERANS

Mr. SPECTER. Mr. President, I have sought recognition to comment briefly on legislation acted upon during the first session of the 107th Congress which will make a dramatic difference in the lives of hundreds of thousands of

service members and veterans, and in the lives of every American. Four bills relating to veterans benefits now await the President's signature. These bills, coupled with another major piece of legislation adopted by the Congress immediately prior to Memorial Day of this year, will substantially enhance veterans' benefits in the areas of health care, education, homeless assistance, disability compensation, and other areas. They are a testament to the good which can come when House and Senate, Republicans and Democrats, come together to achieve a common end.

The first bill now awaiting the President's signature, the ''Veterans' Compensation Rate Amendments of 2001'', H.R. 2540, provides a 2.6 percent increase in the rates of veterans' disability compensation and survivors' compensation. The increase, effective December 1, 2001, reflects inflation which occurred during the preceding 12 months, and is the same percentage increase Social Security recipients most recently received. H.R. 2540 will ensure that the purchasing power of compensation and survivor benefits is not compromised by inflation.

A second bill, the ''Veterans Education and Benefits Expansion Act of 2001'', H.R. 1291, is a comprehensive bill which enhances education, disability compensation, housing, burial, and other benefits that veterans have earned through service to the Nation. The education provisions of H.R. 1291 build on legislation, S. 1114, which I introduced earlier this year, by increasing the Montgomery GI Bill, ''MGIB'', monthly educational assistance benefit from $672 to $985, a 47 percent increase, over the next 3-year period. With the opportunity to ''buy-up'' an additional $150 per month in benefits as a result of legislation I authored during the 106th Congress, veterans the potential will now exist for a monthly benefit in excess of $1,100 per month for veterans attending school in the Fall of 2003. Such a benefit level will pay the average cost of tuition, fees, books, room and board, and travel expenses at a 4-year public college or university. These improvements are not just good for veterans; they are good for the Nation. The national security dictates that the services attract well-qualified, highly motivated men and women to serve. As was most recently recognized by the United States Commission on National Security/21st Century, enhancements in Montgomery GI Bill benefits are necessary to attract such recruits.

The ''Veterans Education and Benefits Expansion Act of 2001'' will further enhance educational assistance benefits by providing needed flexibility to students by allowing veterans to claim benefits on an accelerated basis so that they can pay the significant ''up front'' expenses of high-cost technology courses. It will also expand distance learning and independent study benefits. Further, this legislation incorporates provisions from a bill authored by Senator THOMPSON to allow certain Vietnam-era veterans the ability to use benefits, and it expands work-study opportunities available to veterans while they're attending college. And it will provide increased educational assistance benefits to the spouses and children of service members killed in the line of duty or who are permanently disabled as a result of service. Finally, this legislation preserves the suspended education entitlement of service members or reservists who had to leave school as a result of being called to active duty, such as a call to active duty participation in Operation Enduring Freedom.

In addition to these improvements in educational assistance benefits, the ''Veterans Education and Benefits Expansion Act of 2001'' keeps faith with veterans who served in past conflicts by expanding the eligibility of Vietnam and Gulf War veterans for presumptive compensation based on exposures and experiences which occurred during those conflicts. A Persian Gulf War veteran will now be eligible for compensation if he or she has a medically unexplained, chronic, multi-symptom illnesses such as chronic fatigue syndrome or irritable bowel syndrome, in addition to undiagnosed illnesses already covered in law. Further, this legislation gives VA explicit authority to compensate Gulf War veterans for any diagnosed condition. Given the Secretary's December 10, 2001, announcement of the increased prevalence of Lou Gehrig's disease among Gulf War veterans, this provision is particularly timely.

For veterans who served in the Vietnam war, the ''Veterans Education and Benefits Expansion Act of 2001'' will repeal the 30-year limit on the time period during which a Vietnam veteran must have contracted a respiratory cancer if he or she is to be presumed eligible for compensation based on exposure to Agent Orange. According to a recent National Academy of Science/Institute of Medicine report, there is no scientific evidence which suggests an upper limit can be placed on respiratory cancer latency. Given this, I believe the formerly-existing 30-year limit was arbitrary; this bill removed it. I owe thanks to Mr. Joseph R. Mancuso, a Vietnam veteran from Pennsylvania who was stricken by, and who, very sadly, has succumbed to, lung cancer for bringing this legal anomaly to my attention. This provision is a memorial to him. I just wish the Congress might have acted while Mr. Mancuso was still alive.

I should mention a few of this legislation's other important provisions. It increases VA's home loan guaranty to enable veterans living in high-cost regions of the country to afford a home with little or no down payment. It increases burial benefits available to the families of veterans who die due to a service-connected cause, and it increases grants provided to severely disabled veterans so they may purchase an automobile or make modifications to their homes to accommodate disabilities. The legislation also expands outreach and information services for departing service members, veterans, and family members, and it streamlines the eligibility determination process for low-income, disabled veterans seeking non service-connected pension benefits.

A third major piece of veterans' legislation which now awaits the President's signature, the ''Homeless Veterans Comprehensive Assistance Act of 2001'', H.R. 2716, is an additional step toward achieving the goal of ending chronic homelessness among America's veterans. This legislation would authorize VA to provide grants and per diem payments of up to $60 million in 2002, rising to $75 million in 2003, to entities which provide outreach, rehabilitative, vocational counseling and training, and transitional housing services to homeless veterans. It would expand mental health services, and direct each VA primary care facility to develop and carry out a plan to provide mental health services to veterans who need them. This legislation would also authorize the provision of dental care to homeless veterans by VA in recognition of the fact that such care is a necessary prerequisite if a homeless veteran is to gain, or regain, meaningful employment. Finally, this bill would ensure proper oversight of these programs through the creation of a VA Advisory Committee on Homeless Veterans.

A fourth and final bill which is now pending executive action, the ''Department of Veterans Affairs Health Care Programs Enhancement Act of 2001'', H.R. 3447, would address a number of critical issues affecting veterans' health care. First, this legislation addresses the looming, and in some places already-present, VA nursing shortage by permanently authorizing the Employee Incentive Scholarship Program, a program which allows VA to provide up to $10,000 per year, for up to three years, to employees engaged in full-time academic studies. Additionally, this legislation reduces the minimum period of employment required for eligibility in the program from two years to one year, and extends authority to increase the award amounts based on federal national comparability increases in pay. Further, in an effort to encourage nurses who have already completed school to come work for VA, the bill would permanently authorize the Employee Debt Reduction Program, EDRP, extend to five the number of years that a VA employee might participate in the EDRP, and increase the gross award limit to any participant to $44,000. The EDRP program allows VA to assist employees with the repayment of education debt, and it allows VA to compete with private sector health care systems that offer similar programs. Finally, this legislation creates the National VA Commission on Nursing, which will consist of experts

in the nursing profession as well as economists and education professionals. The Commission will report findings and recommendations relating to nurse recruitment and retention and other nurse employment issues within two years.

The ''Department of Veterans Affairs Health Care Programs Enhancement Act of 2001'' also contains elements of a bill, S. 1188, which I introduced earlier this year to provide priority access to VA care to poor veterans residing in relatively high cost areas like Philadelphia or Pittsburgh. Currently, VA provides priority access to care, and it waives co-payments, only for veterans whose incomes are below a nationally-determined annual amount. This ''one-size-fits-all'' formula does not take into account local variations in the cost of living. As a consequence, veterans in high-cost areas, typically urban areas, who are poor by most standards, do not qualify for priority access for VA care. And they must pay the full amount of co-payments charged to other, much better off, veterans. This legislation would relieve much of the burden of co-payments on, and raise the relative priority for VA health care of, these near-poor veterans.

The ''Department of Veterans Affairs Health Care Programs Enhancement Act of 2001'' also addresses other important health issues. It provides service-dogs, trained to accomplish tasks such as opening doors and retrieving clothing, to disabled veterans. It directs VA to focus its attention on the maintenance of special programs in each geographic region of the country, and it creates a program for chiropractic care in the VA. Finally, this legislation authorizes the construction of a power plant in Miami, FL, that was destroyed over one year ago by a fire that left two employees critically injured.

Finally, I note the enactment of the ''Veterans' Survivor Benefits Improvements Act of 2001,'' Public Law 107–14, which was signed by the President on June 5, 2001. This legislation retroactively increased insurance benefits provided to, and guaranteed additional health care coverage for, the survivors of service members killed in the line of duty. This legislation also expanded health care coverage to the spouses of veterans who have permanent and total disabilities due to military service and to the spouses of veterans who have died as a result of wounds incurred in service. Further, this Act extended life insurance benefits to service members' spouses and children, and authorized, and directed, VA to conduct outreach efforts to contact these survivors, and other eligible dependents, to apprize them of the benefits to which they are entitled. Finally, the ''Veterans' Survivor Benefits Improvements Act of 2001,'' made technical improvements to Montgomery GI Bill education benefits, and make other purely technical amendments to title 38, United States Code.

This first session of the 107th Congress has produced five outstanding bills benefitting veterans. The enhancements contained within them send an unmistakable message to Americans that this Nation values military service and honors those who risk their lives so that we may be free. I complement all those who worked so hard to make these legislative accomplishments a reality.

THE EQUAL PROTECTION OF VOTING RIGHTS ACT OF 2001

Mr. TORRICELLI. Mr. President, when the Voting Rights Act was signed into law over 30 years ago, many thought it was the end of a long journey to recognize that the ideals on which this country was founded were more than just abstract notions. The Voting Rights Act and before it the 14th amendment were definitive expressions by our Nation's government that liberty and equality in theory is only as meaningful as liberty and equality in practice. As my colleague from Connecticut noted yesterday in this Chamber, Thomas Paine captured the essence of our Nation's democracy when he stated that the right to vote is ''the primary right by which all other rights are protected.''

The immediate consequence of the 2000 elections and its unsettling aftermath was a realization that even 30 years after the Voting Rights Act became law, the Nation's election system was not what people thought it was. The election brought to light many problems with the Nation's voting system, including the impact that outdated voting machines, undertrained poll workers, and poorly-designed ballots can have on an election.

Throughout the past year, Congress and the Nation have evaluated how best to ensure that future elections are ones in which Americans can have faith in the results. I have spent countless hours devoted to the subject. A year ago last week, Senator MCCONNELL and I introduced one of the first bills seeking to improve election systems and procedures. Others soon followed with their own ideas about how to best bring about change to what we had learned was a clearly flawed system.

With so much at stake, the process has not been without disagreement and at times it seemed that little would be changed. Both the House of Representatives and the Senate, however, have finally made progress in crafting bipartisan legislation seeking to make elections more fair for all Americans. The House of Representatives has passed legislation supported by a majority of both parties. Yesterday, Senators DODD, MCCONNELL, BOND, SCHUMER and I introduced bipartisan legislation to modernize the Nation's election procedures.

The Equal Protection of Voting Rights Act of 2001 represents a balance between establishing national standards for voting and giving States the flexibility to make improvements tailored to their State's needs. First, this bill creates a permanent Federal system of analysis and assistance. This legislation establishes an Election Administration Commission, consisting of two commissioners from each party who will serve 4-year terms. The commission will bring expertise to modernizing elections and provide States and localities with advice for their enhancing voting procedures. This permanent commission was the cornerstone of election reform legislation that Senator MCCONNELL and I introduced over a year ago and I am extraordinarily pleased to see it included in this landmark legislation.

Second, this legislation establishes three minimum national requirements for voting procedures to ensure that voting across the Nation is uniform and nondiscriminatory. These minimum national standards include requiring States and localities across the Nation to utilize voting systems that enable voters to verify how they voted and ensure accessibility to language minorities and individuals with disabilities, requiring States and localities to provide for provisional balloting, and requiring States and localities to establish a statewide voter registration list with the names and addresses of eligible voters.

Perhaps most importantly, however, this legislation provides $3 billion in Federal grants for States and localities to update voting systems, improve accessibility to polling places, and train poll workers, among other things. States and communities must show that they comply with the three national requirements to be eligible for the grants. An additional $400 million is authorized for providing early funds so that States and localities can implement some improvements quickly; $100 million of the bill's funding is directed to provide grants to make polling places physically accessible to those with disabilities. This funding ensures that for the first time in our Nation's history, the Federal Government will contribute our share to the cost of administering elections for Federal office.

I hope that this legislation completes our Nation's journey to ensuring that all eligible Americans are able to cast their vote fairly, accurately, and without interference. To some, this legislation may not be perfect, but I can assure my colleagues that it is the result of reasoned compromise and is a balanced response to all that our Nation has learned from the 2000 elections. I hope that when my colleagues and I return in January, we can work with the Senate leadership to ensure that bringing this legislation to the Senate floor is one of our top priorities.

EXPIRATION OF TRADE PROVISIONS

Mr. BAUCUS. Mr. President, in the whirlwind of activity that always accompanies the end of a legislative session, many critical legislative decisions are made and critical legislation passes. Often it takes some time to tote up the wins and losses and arrive at a final evaluation of what has been achieved and what remains to be done.

Despite the efforts of those in the Senate, one of the losses for the session is the expiration of three key trade programs, the Generalized System of Preferences (GSP), the Andean Trade Preferences Act (ATPA), and Trade Adjustment Assistance program.

What is surprising about the expiration of these programs is all three of them have nearly universal support. They expire not because of a legitimate difference in policies and not because the programs have served their purpose. They expire because of political maneuvering in the House.

In my view, it always reflects poorly on the Congress when needed programs expire due to political machinations or simply lack of attention. It sends poor signals to those that depend on these programs. In this case, the U.S. companies that import products under GSP and ATPA and the foreign countries we are attempting to aid through these programs can hardly avoid the impression that these programs are a low priority for Congress.

In the case of ATPA, there are those that believe that expiration will spur a rapid move to expand ATPA. I support an expansion of ATPA, but I believe such brinkmanship is far more likely to result in a long break in ATPA than it is a quick expansion.

Fortunately, in the case of both GSP and ATPA it is possible to extend these tariff benefits retroactively. If the U.S. importers are able to shift funds and wait, there is a good chance they will ultimately receive the promised benefits from these programs.

Sadly, this is not the case with the expiration of the Trade Adjustment Assistance program. This program provides income support and training benefits to workers who have lost their jobs due to trade. It provides them the opportunity to train for a new job and rebuild their lives. Given that they are unemployed, they are generally not in a position to absorb a three month or a six month break in benefits.

I understand that the Department of Labor plans to advise the state agencies that work with them to administer TAA plan to advise those agencies to keep paying benefits because they expect the program to be reauthorized. The Department of Labor's advise is sound; indeed, I hope to win passage for a considerable expansion of TAA.

Unfortunately, there is no guarantee that state agencies will keep operating based upon this federal promise and borrow money from other programs to support TAA. In fact, in at least 5 states, state law prohibits such fund shifting.

This raises the prospect that some of the 35,000 TAA recipients around the United States will receive a very nasty Christmas present—the unexpected halt of the benefits on which they depend to rebuild their lives and support their families.

Mr. President, I believe Congress is sometimes criticized unfairly. Sometimes, however, the rush of events diverts attention from some of the glaring errors we make.

The stubborn obstinance of some of the other body to extend TAA is, in my view, a shameful example of playing politics with the interest of those citizens that can least afford it. I hope this example is not lost on journalists, editorial writers, and, ultimately, voters. Someone should be held accountable.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of this year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred in May 1995 in West Palm Beach, FL. A gay man was robbed and brutally murdered. The attacker, Ronald Knight, 27, was convicted of first-degree murder, armed robbery, and a hate crime in connection with the incident.

I believe that government's first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

THE NATIONAL MUSEUM OF AFRICAN AMERICAN HISTORY AND CULTURE PRESIDENTIAL COMMISSION

Mr. CLELAND. Mr. President, I rise today to discuss legislation that establishes the National Museum of African American History and Culture Presidential Commission. On Monday, December 17, 2001, the Senate passed, with my support, H.R. 3442 which establishes the National Museum of African American History and Culture Presidential Commission. The Presidential Commission will develop and recommend a legislative plan of action for creating a national museum on the National Mall that recognizes the unique historical and cultural legacy of African Americans. The U.S. House of Representatives passed the legislation, introduced by Representative JOHN LEWIS, on December 11, 2001 by voice vote.

The African American legacy is one of gradual steps that have moved this group of Americans from slavery to full partnership in our society and culture. African Americans have played a central part in the development of our country's democratic institutions and our commitment to individual freedom and equal rights. Despite this history, there is currently no national museum located in Washington, D.C. on the National Mall devoted to telling the African American story. I believe this museum is the next stage in recognizing the burdens born by African Americans and celebrating their unique contributions to our nation.

Many notable African Americans have made contributions in the areas of science, medicine, the arts and humanities, sports, music and dance. It is right to honor this legacy on a national level. I believe that by establishing this museum this nation will be able to finally honor the legacy of African Americans properly. By placing this museum on the National Mall, we will finally place the history of African Americans in a national light, where it belongs.

The legislation creates a 23 member commission made up of individuals who specialize in African American history, education and museum professionals. The commission has nine months to present its recommendations to the President and Congress regarding an action plan for creating a national museum honoring African Americans. The Commission will decide the structure and make-up of the museum, devise a governing board for the museum, and among other action items, will decide whether to place the museum within the Smithsonian's Arts and Industries Building, which is the last existing space on the National Mall.

This museum will commemorate and honor the 400 years of African American history in this country and beyond. Legislation was introduced just about every session of Congress between 1919 and 1929 to create a memorial building to house exhibits demonstrating the achievements of African Americans in art, science, invention and all aspects of life. I am both proud and pleased to be associated with this project and look forward to seeing this legislation signed into law by the President in the near future.

THE POLICE CORPS PROGRAM

Mr. LOTT. It is my understanding there are concerns with the Police Corps Program. It appears that funding from within the current fiscal year is not being made available to certain States.

Mr. GREGG. I appreciate the minority leader's concerns with Police Corps. I have been told that OMB and the Department of Justice have rectified this situation. Both organizations have agreed that any funds available for Police Corps in fiscal year 2002 and unexpended balances from prior fiscal years will be made available for new programs if currently eligible participants have not used the funding provided for their State.

Mr. STEVENS. I have the same understanding. OMB and Justice have decided that available funds can be used from the current balances. I am glad this issue has been worked out.

Mr. KERRY. I very much appreciate the comments of Senators LOTT, STEVENS, and GREGG concerning the Police Corps program, which provides scholarships on a competitive basis to students who earn their bachelor's degrees, complete approved Police Corps training, and then serve for four years on patrol with law enforcement agencies in areas of great need. The Police Corps gives States funding to provide residential police training and to provide local and State agencies that hire Police Corps officers $10,000 a year for each of an officer's first 4 years of service. The fiscal year 2002 Senate Commerce, Justice, State and Judiciary Appropriations bill, under the leadership of Chairman HOLLINGS and Ranking Member GREGG, included $30 million for the Police Corps program. However, I was very disappointed that this amount was reduced to $14.435 million in the conference report, which included legislative language that the Police Corps program has sufficient unobligated balances available to allow the program to maintain its activities in fiscal year 2002 at the prior year level.

I am very concerned that the Office of Justice Programs is not planning to provide appropriate funding for the Police Corps program in fiscal year 2002. It is my understanding that the Office of Justice Programs' plan for the Police Corps program could limit the ability of local law enforcement agencies to address violent crime by decreasing the number of officers with advanced education and training who serve on community patrol in high-crime areas. This could negatively affect the Police Corps program in my home State of Massachusetts, which is currently updating its training curriculum to provide the rigorous physical and moral police training that will help Police Corps recruits work effectively in high-crime areas within Massachusetts. As our nation remains on high alert due to recent terrorist attacks, the Police Corps program will play a crucial role in training future policemen and policewomen to stop terrorist activities before they hurt innocent Americans.

It is my understanding that there are unobligated funds available to provide the Police Corps program with the funding necessary to increase the number of recruits above the modest demonstration level of approximately 25 trainees per state per year and to assist in resolving the current backlog of funding requests for the program.

I believe that the Department of Justice should provide such funds as are necessary to maintain the current level of activity in Police Corps operations and to begin to resolve the current backlog of funding requests for the program. I look forward to working with Chairman HOLLINGS, Ranking Member GREGG and others to assure that the Police Corps program is treated fairly by the Office of Justice Programs this year and in future years, and to insure that this important program receives adequate funding in the future.

BIOTERRORISM

Mr. NELSON of Florida. Mr. President, I rise to recognize the important achievement the Senate has made today in defending our homeland. Just over two months ago, my state of Florida was the site of the first in a series bioterrorist attacks on our Nation that culminated here in Washington, DC. While the repercussions evolving out of the anthrax attacks on our mail system pale in comparison to the enormous tragedy of September 11, the families of those who suffered tragic deaths after being exposed to anthrax laced letters and those of us who continue to be displaced on Capitol Hill understand the very real dangers associated with the elusive threat of bioterrorism.

In the wake of the anthrax attacks, we, as a Nation, began to realize that we were not fully prepared to effectively and comprehensively respond to biological threats. The attack in Boca Raton, FL elicited an array of missteps and symptoms of inadequate preparation at all levels of government. Because Floridians, and Americans, had never faced such a threat before, the necessary communication lines had not been formed and many emergency responders were not properly equipped to handle this new type of crisis. The Bioterrorism Preparedness Act of 2001, passed by the Senate today, is an important first step at increasing our ability to respond to, and prevent, future biological attacks at the Federal, State, and local levels. It will enhance our ability to detect an attack by improving disease surveillance systems and public health laboratories. It will improve our ability to treat victims of an attack by increasing hospital capacity for disease outbreaks. It will also enhance our ability to contain an attack by expanding pharmaceutical stockpiles and accelerating the development of new treatments. Finally, this bill seeks to target future bioterrorist threats in a comprehensive manner by protecting our food sources and other potential targets.

I would like to take this opportunity to highlight a portion of the bill that I believe is essential to our Nation's coordinated prevention and response initiative. Like many Americans, I sought out additional information about the threat of bioterrorism after anthrax was discovered in Florida, New York, New Jersey, and Washington, DC. In the course of my research efforts, I had the opportunity to visit with some of the professors, researchers, and scientists that work for the University of South Florida Center for Biological Defense. The Center for Biological Defense is a joint project of the University of South Florida College of Public Health and the Florida Department of Health. The Center focuses on a full spectrum of studies and programs, ranging from research and development to outreach and educational seminars. The Center has implemented a multifaceted approach to biological defense research that utilizes a number of universities throughout the state of Florida to implement its studies and projects. The Center for Biological Defense has laboratory programs that are dedicated to improving surveillance systems, developing early detection capabilities, rapidly identifying pathogens, and fully understanding the factors that affect the toxicity of biological agents. Moreover, the Center concentrates on efforts to enhance health care preparedness, to strengthen hospital hygiene and containment capabilities, and to coordinate vital educational and training programs for emergency management and health professionals, which has proven to be a crucial component of the response efforts to the anthrax contamination occurring over the course of the past 2 months.

While the preeminent focus of the Bioterrorism Preparedness Act of 2001 is on our government agencies and their crucial missions, a portion of this bill recognizes our Nation's universities as a critical component of the United States bioterrorism defense plan. Centers across the Nation, like Florida's Center for Biological Defense, do critical bio-defense work at the local, State, and national level everyday. In fact, it is these programs that have coordinated first responder training programs, developed products capable of identifying biological contamination on site, and developed new techniques for containing disease and preventing the spread of contagious pathogens. I am delighted that the Senate has been proactive in acknowledging the tremendous value of these programs in an effort to encourage their receipt of additional Federal grants in the future.

I am pleased that I was able to be part of the effort to draft and pass the Bioterrorism Preparedness Act of 2001 and I am thankful to my fellow Senators for ensuring the passage of this vital bi-partisan legislation prior to the holiday recess. I look forward to passing a final version of this bill at the conclusion of the conference between the House and Senate, as I believe that implementation of this bill will not only ensure our preparedness for any future biological threats, but will also quell the concerns and fears of the American people.

MTBE

Mr. SMITH of New Hampshire. Mr. President, for the third day this week, I have come to the floor to speak about MTBE.

This is the gas additive that has become a huge concern for millions

across the Nation because of the contamination it has caused.

That is certainly true of many communities throughout New Hampshire where it has become a crisis. And the crisis will continue to escalate unless it is dealt with.

I was pleased last week when the majority leader made a commitment to me that the Senate will vote on MTBE legislation before the end of February.

Until the day of that vote arrives, I will continue to come to the floor to remind Senators of the terrible impact that MTBE is having on the Nation. And remind them why it is important that we act now.

In 1990, the Clean Air Act was amended to include a clean gasoline program. That program mandated the use of an oxygenate in our fuel—MTBE was one of two options to be used.

The program with MTBE is that when it is leaked or spilled, it moves through the ground very quickly and into the water table.

Many homes in New Hampshire and across the nation have lost use of their water supply because of MTBE contamination.

Many others have had to install expensive water treatment systems in order to drink the water or even shower.

According to the New Hampshire Department of Environmental Services, there may be up to 40,000 private wells with some MTBE contamination. Of those, up to 8,000 may have MTBE contamination over state health standards.

So far this week, I have talked about the problems faced by families and small businesses throughout the regions of New Hampshire.

Today I want to talk about the Sojka family who have a home on Cobbetts Pond in Windham.

The water supply for the home is a deep, bedrock on-site well.

Just about two years ago, the Sojkas began noticing that the water had a strange odor and that it left a residue on their hands.

So they did a little test of their own to see if there really was anything unusual with their water. Their son Brian filled up a bowl full of tap water and let it sit overnight. They were horrified with their finding next morning. The water had a slick oily film floating on top—the same water that the family had been drinking, bathing in, and cleaning their food with.

As a result, the Sojkas had their water tested. The test revealed MTBE contamination at a level twice as high as the State standard.

They contacted the State of New Hampshire for help—by now, it had become quite common for the state to get this type of request.

The state began providing bottled water to the family. Just like the Miller family I spoke of yesterday, the Sojka's pointed out similar concern—that while bottled water is fine for drinking, it doesn't help with other daily needs such as: bathing; washing fruits and vegetables; and cooking.

Within a few months of the initial tests at the Sojka home, the MTBE contamination levels in the well jumped up by almost 8,000 percent.

Unbelievable contamination!

Last summer, the State installed an elaborate and cumbersome water treatment system on the Sojka's property. Unlike the Millers that I spoke of yesterday, who had a system installed in their home, the system needed for the Sojka's was too large to fit in the home

The State had to build a shed separate from the house for the commercial water treatment system. The system consists of an enormous commercial air stripper and two 6 cubic foot carbon units.

Such a system costs in the neighborhood of $20,000.

Fortunately for the family, the state is providing the system and cost of operation and maintenance to the tune of an additional $5,000 per year.

Can you imagine having a large chuck of your back yard being occupied by a commercial water treatment system.

It is terrible that this has to happen to any family. And it is horribly wrong for federal mandate to cause such pain.

This problem isn't unique to New Hampshire—it exists in Maine, California, Nevada, Texas, New York, Rhode Island, and on and on.

We would be delinquent in our duties as United State Senators if we were to sit back and do nothing about this.

We must act soon.

I have a bill that has been reported out of committee two years in a row that will address these problems.

Mr. President, the time to act is now—it is time to help out the families who have fallen victim to a Federal mandate.

Mr. CLELAND. Mr. President, the far-reaching education package before us today makes significant strides toward meeting three of America's most important education goals: improved student achievement, increased accountability, and enhanced teacher quality. I am very pleased that the conference report includes two of the amendments I offered to the Senate BEST Act—my Immigrants to New Americas amendment and my amendment to establish a National Center for School and Youth Safety. I thank the distinguished managers of the Senate bill, Senator KENNEDY and Senator JEFFORDS, for their support and their willingness to assist me. I also want to express my appreciation to the staff of the Senator from Massachusetts for the courtesies and counsel they showed to me and to my staff.

Finally, I want to thank the ''education team'' on my own staff, led by Lynn Kimmerly, my superb deputy legislative director, and Donni Turner, my outstanding chief staff counsel, who helped not only in developing and winning support for my amendments but in analyzing and advising me on all of the details of this landmark legislation. They have served our State and our Nation well, and our country's children will be the beneficiaries.

My Immigrants to New Americans language addresses the explosion of immigrants coming to this country over the past decade. Information from the 2000 Census shows that the impact from this wave of immigration is having a dramatic impact on schools and communities across America, including non-traditional immigrant communities in states like Wisconsin, Iowa, Nebraska, Oklahoma, Georgia and the Carolinas. My amendment will provide resources to these communities to help ensure that these children—and their families—are being served appropriately. Specifically, it would expand the use of funds under the Emergency Immigrant Education set-aside to include activities which, one, assist culturally and linguistically diverse children achieve success in America's schools and, two, allow local educational agencies to partner with community-based organizations to provide the families of these children access to comprehensive community services.

My second amendment incorporated in this landmark legislation addresses the deeply troubling issue of violence at Columbine and Heritage High and in other schools across the country. My School Safety Enhancement Amendment, based on the best research in the field of school violence prevention, would create a National Center for School and Youth Safety tasked with the mission of providing schools with adequate resources to prevent incidents of violence. The National Center would offer emergency assistance to local communities to respond to school safety crises, including counseling for victims, assistance to law enforcement to address short-term security concerns, and advice on how to enhance school safety and prevent future incidents. It would also operate a toll-free, anonymous nationwide hotline for students to report criminal activity and other high-risk behaviors, such as substance abuse, gang or cult affiliation, depression, or other warning signs of potentially violent behavior. Finally, the National Center would compile information about the best practices in school violence prevention, intervention, and crisis management. The goal of the National Center for School and Youth Safety is to involve the entire community—parents, school officials, law enforcement officers, and local governments and agencies—to make them aware of the resources, grants and expertise available to enhance school safety and prevent school crime.

In closing, I would like to quote former British Prime Minister Benjamin Disraeli, who once said: ''Upon the education of the people of this country, the fate of this country depends.'' One of the most important investments this nation can make is an investment in the education of its future leaders. It is my fervent hope that

Members of Congress, on both sides of the aisle, will see the wisdom in investing adequate dollars to carry out the worthy goals of this critically important piece of legislation—improved student achievement, increased accountability, and enhanced teacher quality. It is an investment in the future of America, and the future, after all, is in very small hands.

ON REAUTHORIZATION OF THE PROMOTING SAFE AND STABLE FAMILIES PROGRAM

Mr. GRASSLEY. Mr. President, the Senate recently passed legislation reauthorizing an important child welfare program known as Promoting Safe and Stable Families. Under the auspices of this Social Security Act grant program, States are able to provide services to at-risk families to prevent the need for children to enter the foster care system.

Four types of services are included in the program: family preservation; community-based family support; time-limited family reunification; and adoption promotion and support. In addition, the program provides funding for state court improvement projects. I cannot proceed without praising Iowa's court improvement project which, under the leadership of Judge Terry Huitink and Judge Stephen Clarke, has produced valuable research to streamline the court process for children waiting to be adopted. The Iowan project also provides training for judges in order to increase understanding of the needs of children in the foster care system.

The reauthorization passed by the Senate ensures that money will be available for the next five years at an annual minimum of $305 million per year. An additional $200 million is authorized to be spent from discretionary funds determined annually by Senate appropriators. I am also pleased the 2002 Senate Labor, Health and Human Services, and education appropriations legislation included $70 million in discretionary spending for the Safe and Stable program, for a total funding level of $375 million in fiscal year 2002. In fact, I and some of my Senate colleagues are sending a letter to President Bush tomorrow requesting that full funding of $505 million for the program be included in the Administration's fiscal year 2003 budget.

The Promoting Safe and Stable Families program is a valuable weapon in the fight against child abuse and neglect. The Federal Government spends billions of dollars each year to provide services to children who have already been placed in the foster care system. Much less money is spent on providing services before removal from the home is necessary. In fact, the Congressional Budget Office estimates that between 1999 and 2003, money spent on removing children from their homes and placing them in foster and adoptive homes will exceed by nine times the amount of money spent on services and prevention. Furthermore, annual spending during this period for removal and placement is expected to increase by thirty-five percent, from $4.8 billion to $6.5 billion, while annual spending for prevention and services is expected to increase by only nine percent, from $0.57 billion to $0.62 billion.

More than one hundred thirty thousand children are waiting to be adopted out of foster care in the United States, and at least 4,500 of those children live in Iowa. Each child deserves a loving family and a safe environment. Promoting Safe and Stable Families grants provide critical services to vulnerable families and children, and I am pleased the Senate fulfilled its duty and acted to reauthorize the program.

Ms. CANTWELL. Mr. President, I rise today in support of the Enhanced border Security Act of 2001. We must take the long term steps to strengthen the security at our borders. I want to commend my colleagues, Senators KENNEDY and FEINSTEIN, BROWNBACK and KYL, for their tireless work to address border security issues.

The bill we will be voting on today, the Enhanced Border Security Act of 2001, was a product of the thoughtful merging of two bills. As an original cosponsor of Senators KENNEDY and BROWNBACK's initial version of this bill, I have worked closely with the four principal sponsors to integrate the best of each of these two pieces of legislation, and have been very please with the outcome of this effort.

This bill addresses what I consider to be one of the most important issues in our fight against terorism—how we can effectively secure our borders from terrorists. This bill address border security by increasing the number of border patrol and immigration personnel at the borders; improving the quality and sharing of identity information; improving the screening of foreign nations seeking to enter the U.S. on visas; and improving awareness of the comings and goings of these foreign nationals as they enter or exit our country.

As a member of the Judiciary Committee, I have been honored to work closely with Senators KENNEDY and FEINSTEIN to find ways to better protect our borders and provide necessary support to the men and women who work for the State Department, the Immigration and Naturalization Service and the U.S. Customs Agency.

I, along with many of my colleagues, am currently pressing for funding to triple the number of Immigration and Naturalization Service and U.S. Customs personnel on our northern border and improve border technology, the authorization for which was included in the USA Patriot Act. In the past, a severe lack of resources at our northern border has compromise the ability of border control officials to execute their duties. I am pleased that Congress made the tripling of these resources a priority for national security, and I will continue to fight for full funding of this measure. This bill also addresses these needs by increasing INS inspectors and border patrol staffing each by 200 persons per year for the fiscal year 2002–2006. The bill also authorizes $150 million in spending for improving technology and facilities at our borders.

The Enhanced Border Security Act of 2001 addresses several other critical issues. In hearings this session before the Immigration Subcommittee and the Technology and Terrorism Subcommittee, as well as the full Judiciary Committee, we heard repeated calls for better sharing of law enforcement and intelligence information as it relates to admitting aliens into the United States. The bill addresses this problem by mandating INS and Department of State access to relevant FBI information within one year. I am pleased that the authors of the bill have included provisions to protect the privacy and security of this information, and require limitations on the use and repeated dissemination of the information.

Two of the most important provisions of this legislation address international cooperation in enhancing border security. Protecting U.S. borders requires the assistance and cooperation of our closest allies. Indeed, we share an interest in protecting our respective borders. Citizens of several countries, including most European countries, Japan and Canada, can enter the U.S. without visas. And this is as it should be. But the U.S. must, with new urgency, continue to engage Canada, Mexico and other countries that may be interested in sharing law enforcement and intelligence information to protect our respective borders. We must improve information sharing, and must improve the technology to make sure information is shared with the right people and in a timely manner.

In October, we passed a major anti-terrorism bill that contained a number of provisions that will enable our law enforcement community and the intelligence community to obtain and share vital information regarding persons who are a threat to the U.S. One of the most important new tools I was pleased to have had included in USA Patriot Act is a requirement that State and Justice develop a visa technology standard to help secure our border and make certain each individual who seeks entry into our country on a visa is the person he or she claims to be and there is no known reason to keep that person out.

We must work with our allies to take advantage of this technology standard to improve interoperability on an international scale. We should do what we can to eliminate technological barriers to information-sharing regarding dangerous individuals and to address our mutual concern for border security. To this end, this bill requires the Department of State to report to Congress within six months on how best we

can undertake ''perimeter'' screening with our partners, Canada and Mexico. Further, the bill requires the Department of State, the Immigration and Naturalization Service and the Office of Homeland Security to report to Congress within 90 days on how best to facilitate sharing of information that may be relevant to determining whether to issue a U.S. visa. Our borders are only as secure as the borders of those countries whose citizens we allow into our country without a visa.

The provisions we have achieved in the USA Patriot Act laid the foundation for more specific provisions to assure the best use of technology to improve the security at our borders. This bill fulfills the promise of the USA Patriot Act to assure information sharing will be thoughtfully implemented in short order.

With the enactment of the USA Patriot Act of 2001, the federal government committed to developing a visa technology standard that would facilitate the sharing of information related to the admissibility of aliens into the United States. I proposed this language recognizing that, for many years, the U.S law enforcement and intelligence communities have maintained numerous, but separate, non-interoperable databases. These databases are not easily or readily accessible to front-line federal agents responsible for making the critical decisions of whether to issue a visa or to admit an alien into the United States.

To build on and fulfill the goals of establishing this standard, this bill will do three things. First, it will require technology be implemented to track the initial entry and exit of aliens travelling on a U.S. visa. We know now that several of the terrorists who attacked America on September 11th were traveling on expired visas. We have had the law in place for several years now, but due to concerns about maintaining the flow of trade and tourism across our borders—concerns I share—the provisions of Section 110 have not been fully implemented. Technology will address those concerns, allowing electronic recordation and verification of entry and exit data in an instant.

Second, I believe it is necessary to require the Department of State and Justice to work with the Office of Homeland Security to build a cohesive electronic data sharing system. The system must incorporate interoperability and compatibility within and between the databases of the various agencies that maintain information relevant to determining whether a visa should be issued or whether an alien should be admitted into the United States. This legislation will require interoperable real-time sharing of law enforcement and intelligence information relevant to the issuance of a visa or an alien's admissibility to the U.S. The provision will require that information is made available, although with the appropriate safeguards for privacy and the protection of intelligence sources, to the front-line government agents making the decisions to issue visas or to admit visa-holding aliens to the United States.

Keeping terrorists out of the U.S. in the first place will reduce the risks of terrorism within the U.S. in the future. Aliens known to be affiliated with terrorists have been admitted to the U.S. on valid visas simply because one agency in government did not share important information with another department in a timely fashion. We must make sure that this does not happen again.

Until now, we had hoped that agencies would voluntarily share this information on a realtime and regular basis. This has not happened, and although I know that the events of September 11 have led to serious rethinking of our information-sharing processes and procedures, I think it is time to mandate the sharing of fundamental information.

Advancements in technology have provided us with additional tools to verify the identity of individuals entering our country without impairing the flow of legitimate trade, tourism, workers and students. It is time we put these tools to use.

Improving our national security is vitally important, but I will not support measures that compromise America's civil liberties. The bill we are voting on today includes a number of safeguards to protect individuals' rights to privacy. The bill provides that where databases are created or shared, there must be protection of privacy and adequate security measures in place, limitations on the use and re-dissemination of information, and mechanisms for removing obsolete or erroneous information. Even in times of urgent action, we must protect the freedoms that make our country great.

I urge a favorable vote.

TRIBUTE TO COMMISSIONER JOHN F. TIMONEY

Mr. BIDEN. Mr. President, I rise today to pay tribute to the long and distinguished career of one of our Nation's top police executives, Philadelphia Police Commissioner John F. Timoney.

Commissioner Timoney will leave the Philadelphia Police Department in early January, and I want to highlight some of his achievements. I believe John's record of achievement will benefit America's police officers for years to come.

John Timoney immigrated to the United States from Ireland at the age of 13. In 1969, after graduating from high school, he joined the ranks of the New York Police Department. He spent the first twelve years of his career as a patrol officer and later a narcotics investigator on the streets of Harlem and the South Bronx. As his reputation for integrity, innovation, and perseverance grew, he rose through the department's management structure, eventually assuming the position of Chief of Department, the highest ranking uniformed position in the department. It was during Mr. Timoney's tenure in the upper echelons of the NYPD that New York's crime rate began to drop precipitously, due in no small part to the new management structure he instituted, merging the Housing and Transit Police Department with the NYPD. In 1996, upon his departure from the NYPD, then-Chief Timoney had accrued over 65 Department Medals, including the prestigious Medal of Valor.

After retiring from the NYPD, John entered the world of private security consulting, and offered his expertise and advice to law enforcement authorities all across the country and around the world. He served as Vice Chairman of the Irish Commission on Domestic Violence, and he advised Britain's Patton Commission, which focused on policing Northern Ireland.

In March of 1998, Philadelphia Mayor Ed Rendell appointed John Commissioner of the Philadelphia Police Department. His tenure in that position was marked by the same commitment to excellence and improvement which characterized his career in New York. John brought the innovative Compstat system to Philadelphia, and helped to reinvigorate the department. Running a department of 7,000 officers and 900 civilian employees is no easy task, and Commissioner Timoney's efforts to modernize the department have been rewarded by a decline in Philadelphia's crime rate.

While I thank John profusely for what he has done to make the streets safer for millions of New Yorkers and Philadelphians, I rise today for another reason: to thank Commissioner Timoney for the lessons that his expertise and experience have taught the entirety of the law enforcement community. While his achievements as a cop on the beat deserve our thanks, I want to make special mention of the contribution he has made to our understanding of how police departments can better employ their resources to combat crime across the country.

Commissioner Timoney's career in the upper echelons of law enforcement have been marked by two major paradigm shifts. Without them, law enforcement would not be nearly as successful. And because Commissioner Timoney's work represents what I think is the best of law enforcement—because I believe that we at the Federal level ought to encourage and promote police departments around the nation to promote just this kind of progress—I want to draw special attention to it.

First, Commissioner Timoney was at the forefront of efforts to get both the New York and Philadelphia Police Departments to embrace Compstat, a high-tech system which allows police departments to monitor and analyze crime data better, empowering them to re-deploy resources as needed.

Compstat was revolutionary policing in both New York and Philadelphia, contributing to dramatic crime reductions in both cities.

Second, Commissioner Timoney has been an outspoken proponent of community policing, which was an integral portion of 1994's crime bill. The Commissioner has set a high standard in the practice of policing multi-ethnic and multi-racial communities by empowering precinct captains and other officers in local areas to develop constructive relationships with members of the communities they police. I've always believed that the more integrated cops are with the communities they serve the better. Commissioner Timoney has lived that principle, and the great accomplishments of his career are due in no small part to his promotion of community policing.

I am grateful to be able to call John Timoney a friend. The people of Philadelphia will miss his law enforcement expertise, the police officers of his department will miss his extraordinary leadership, and the nation's law enforcement executives will lose one of their brightest lights. Good luck in your future endeavors John. A grateful and safer nation thanks you for your service.

WHISPERS OF LIBERTY

Mr. HATCH. Mr. President, I would like to take a minute to bring to the attention of this great body the words of Rachel Bennett. Rachel is a 13-year old constituent who has written ''Whispers of Liberty,'' a moving poem about the events of September 11. These terrorist attacks had a profoundly sobering effect on most of the world. As Americans we were forcefully reminded of the ideals and principles which unite us as a nation. I have read and heard many explain the significance and aftermath of September 11, but few have done so as well as Rachel. She poignantly reminds us of the dreams that were shattered by the terrorists, while at the same time she reminds us of the values and ideas that have rallied Americans to help one another deal with these tragedies. I would like to read this poem for the record:

WHISPERS OF LIBERTY

(By Rachel Bennett)

How could a moment
So change everything?
A speechless nation
Cried out in despair
In unison as one.
How could in a moment
So many lives be put out,
Like a field of flowers
Closing in the mid of summer
Never to bloom again?
And in that moment,
How many chances
Of being a grandfather,
A husband, a mother
Of knowing the joys
Of life and love
Be gone?
Like a candle
Doused with tears of despair,
Our nation wept
For the twin brothers
Who know lie in a
Silent reverie
As two lions
Suddenly tamed
A ghastly graveyard
Of pride and greatness.
Yet buried within
The solid and proud
Red, white, and blue
Of American pride.
A stoic symbol
Of freedom and unity
In a world
Of stricken terror.
Its red, the blood of
The innocent whose
Lives were stolen from them;
Its white,
Purity and strength;
And its blue, the melancholy tears
Of sadness.
These bands of red
And white
Bring us together
As one.
A single
Voice declaring freedom
And a fearless life
For all the world.
Strength resonating
From the richness
Of the colors
Bind us together
In a single dance
Of peace and
A single whispered word—
Liberty.

WILLIAMSON, WEST VIRGINIA

Mrs. CLINTON. Mr. President, I rise today to express my deepest gratitude to and admiration for the citizens of Williamson in Mingo County, West Virginia for their generosity and sacrifice on behalf of others. Their donation of approximately $26,000 to the ''Families of Freedom Scholarship Fund,'' to aid the children of those lost in the terrorist attacks on our country over three months ago, is symbolic of the tremendous compassion and unity of the American people. I would like to thank the citizens of Williamson on behalf of all the families who will be able to take advantage of this scholarship fund. They have reached deep into their hearts and pockets to send the children affected by the September 11 attacks a truly beautiful gift.

Earlier this month, I met with Williamson Mayor Estil ''Breezy'' Bevins, Fire Chief Grover ''Curt'' Philips and Police Chief Roby Pope when they presented $26,000 in donations in Senator BYRD's office. Shortly after September 11, the City Council voted to donate $5,000 to the victims of the attacks on the World Trade Center. Over $15,000 was collected on September 14 through a ''boot drive'' where police officers, firefighters and others took to the streets to stop cars to collect money. As I told Mayor Bevins, Williamson's trememdous efforts and energy symbolize the spirit of ''small-Town America.''

I suggested that the town consider sending their donations to the ''Families of Freedom Scholarship Fund,'' which former President Clinton and former Majority Leader Bob Dole chair together. The Fund provides educational assistance for the children and spouses of those killed or permanently disabled in the terrorist attacks of September 11. I would like to thank my friend and colleague Senator ROCKEFELLER for contacting my office to seek guidance on directing the donations. I am very grateful to Senators BYRD and ROCKEFELLER for joining me in receiving the people of Williamson's donation earlier this month.

This small town in southern West Virginia, thousands of miles away from the Twin Towers, has experienced its own share of adversity, including a devastating flood in 1977. Perhaps Williamson's struggle to overcome its own set of hurdles has made the citizens there especially sympathetic to the tremendous obstacles that the people of New York City are facing. At the same time as Williamson has reached out to those affected by the terrorist attacks in New York City, they are working to tackle financial difficulties in their own backyard and I applaud their efforts. An aggressive economic development effort is underway to secure a wood products park, most aquaculture and a stronger market for coal.

Many Americans have felt a personal need in their everyday lives to reach out to their neighbors, coworkers or even strangers to offer assistance, both large and small. We saw it in New York with people standing in line for hours to donate blood, and with families donating food to rescue workers who were toiling around the clock, or companies who wanted to contribute funding and resources. ''What can I do to help?'' is a common, if not universal refrain that Americans have spoken, or thought quietly to themselves, since the attacks. The people of Williamson have matched those noble words with action, and New Yorkers thank them from the bottom of our hearts for their outpouring of compassion.

Winston Churchill once said, ''We make a living by what we get. We make a life by what we give.'' During this time of tremendous grief and anxiety that's being felt in all corners of the world, the citizens' of Williamson efforts to ensure that children who have been affected by these terrible attacks are not forgotten will provide comfort to many and inspiration for us all.

RETIREMENT OF U.S. ATTORNEY JAMES TUCKER

Mr. COCHRAN. Mr. President, one of the best and most respected attorneys to have ever served in our State as an assistant U.S. Attorney is retiring. James Tucker has served the U.S. Department of Justice in the Southern District of Mississippi for 30 years.

I have an enormous amount of respect and appreciation for the way James Tucker has carried out the important responsibilities of his job. He

was a true professional in every respect. He was completely honest and trustworthy, and he was tenacious in bringing to justice those who violated the laws of the United States.

I commend him for a job well done and wish him much continued success and satisfaction in the years ahead.

I ask unanimous consent that an article from the Clarion Ledger of December 17, highlighting his illustrious career be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TOP CORRUPTION FIGHTER LEAVING POST

(By Jerry Mitchell)

Mississippi's top corruption fighter over the past 30 years—Assistant U.S. Attorney James Tucker—is leaving the U.S. attorney's office to go into private practice.

''If you could combine honor, integrity, courage and expertise in the same person, what you'd have is James Tucker,'' Attorney General Mike Moore said ''they don't make 'em that way anymore. He is the ultimate professional.''

Jan. 3 will mark Tucker's last day of work at the U.S. attorney's office, where he has worked since 1971. After that, he'll join the Butler Snow law firm in Jackson, where he'll be part of the litigation division.

Tucker said he is sad to be leaving on one hand but is enthused about his new job. ''After 30 years with the Department of Justice, it hurts a little to cut the string, but I'm looking forward to a challenging new career.''

A no-nonsense retired Naval Reserve officer, Tucker has shunned the limelight, despite taking on very public prosecutions of Mississippi public officials, including Operation Pretense, which led to convictions of 43 county supervisors and 11 vendors on corruption charges.

His long list of those prosecuted has included members of the Mississippi Senate, the Highway Commission, the Public Service Commission and the Jackson City Council.

His work also helped put former Biloxi Mayor Pete Halat behind bars on federal charges in connection with the 1987 killing of Halat's former law partner, Vincent Sherry and his wife, Margaret.

''I've always had strong feelings about public officials violating the trust,'' Tucker said. ''I always felt if I had the power to right those kinds of wrongs, I ought to do it.''

In 1983 and 1998, the Provine High School graduate received the highest award an assistant U.S. attorney can receive from the Justice Department—the Superior Performance Award.

''That's one of my great honors,'' Tucker said, ''winning that award twice.''

Perhaps better than an award was the comment he said he received the other day from a current county supervisor: ''He said, 'You don't realize it, but what y'all did in Pretense has helped us honest supervisors for years and years and will for years to come. Because of that, we can threaten people with another Pretense if they fool around (with corruption).' ''

Moore credited Tucker with cleaning up corruption in Mississippi: ''He's helped return integrity to public office.''

Tucker's expertise has helped pave the way for many other lawyers, including Moore, who first go to know Tucker when as a district attorney in Pascagoula he pursued corruption cases against local supervisors.

''He really helped me through those tough times, and he's continued to be my friend,'' Moore said. ''He was a mentor to me.''

Defense lawyer John Colette of Jackson said what makes Tucker special is his ability to remain calm, even amidst a storm, such as during the 1990 trial of Newton Alfred Winn, convicted in connection with the disappearance of Jackson socialite Annie Laurie Hearin.

But that calmness belies a quiet ruthlessness, he said.

As someone has remarked, Colette said, Tucker is the kind of prosecutor who slits the throat of a defense lawyer, who doesn't realize it until his head is in his lap.

Now that Tucker's gone, he joked, ''I'm going to start trying all my cases in federal court.''

What may say the most about Tucker is that he has the admiration of not only the defense bar, but judges as well, Colette said.

''He's probably the most competent prosecutor I ever heard,'' said U.S. District Judge William H. Barbour Jr. ''The district was lucky to have him for so many years.''

Even as Mississippi has changed U.S. attorneys in the Southern District, Tucker has remained as the chief of the criminal division.

Former U.S. Attorney Brad Pigott said he relied on Tucker during his tenure.

''He's an ideal public servant,'' Pigott said. ''He's personally modest and quiet. I've spent some time with him in the foxhole, I can vouch for his integrity in every way. He deserves a very wonderful reputation.''

Defense lawyers say Tucker helped provide continuity to the sometimes revolving door of the U.S. attorney's office, serving once as interim U.S. attorney.

''Many people, including me, felt that with him there, there was somebody to talk to who would listen,'' said defense lawyer Tom Royals of Jackson.

''It's a real loss to our justice system to see James Tucker leave,'' said defense lawyer Dennis Sweet of Jackson. ''He's a tremendous lawyer, and he's been tremendously fair. I just hope whoever replaces him does as good a job for the U.S. attorney's office as he has.''

Current U.S. Attorney Dunn Lampton said he is certainly going to miss Tucker. ''He's an institution,'' Lampton said. ''He knows more off the top of his head than you can find out doing research in books.''

Because of Tucker, Lampton said he never worried about the criminal side of his office.

Now he'll have to find a replacement, which he'll probably choose from within his office, he said. ''We'll all have to work together to take up the slack.''

Those outside legal circles also praise Tucker.

''There was a time when James Tucker was the only defense standing between us and total corruption in Mississippi,'' said veteran journalist Bill Minor, who wrote about Tucker in his new book, Eyes on Mississippi: A Fifty-Year Chronicle of Change. ''In my estimation, he ranks among the true heroes that I've known over my 54-year career.''

Former Public Safety Commissioner and FBI agent Jim Ingram said Tucker will be sorely missed by all of Mississippi. ''Almost all of us can be replaced. He can't.''

ADDITIONAL STATEMENTS

RECOGNIZING THE CAREER OF DENIS GALVIN UPON HIS RETIREMENT FROM THE NATIONAL PARK SERVICE

● Mr. BINGAMAN. Mr. President, I would like to take a moment to recognize and thank Denis Galvin, the Deputy Director of the National Park Service, who will be retiring at the end of this year after a career of almost 40 years with the Park Service. The Committee on Energy and Natural Resources has jurisdiction over national park issues, and we have been fortunate to have had the opportunity to work closely with Mr. Galvin over the years.

Since beginning his tenure with the Park Service in 1963 as a civil engineer at Sequoia National Park, Mr. Galvin has held several positions with the Park Service throughout the country, including a period in the Southwest Regional Office in Santa Fe. He also worked for several years in Boston in the Northeast Regional Office, and as the Director of the Denver Services Center, the planning, design, and construction arm of the Park Service. Since 1985 Mr. Galvin has held two positions that brought him into frequent contact with the Congress and our Committee, as the Associate Director for Planning and Development from 1989 to 1997, and twice as the Deputy Director of the National Park Service, from 1985 to 1989, and again from 1997 until now.

In his capacity as Associate Director and Deputy Director, Mr. Galvin has been involved in every major policy issue facing the National Park Service. He has been one of the National Park Service's greatest resources, and his knowledge and judgment about national park issues is very much respected, both within the agency and here in Congress. Whenever the Committee held a hearing on an especially important legislative issue affecting the National Park Service, we would often request that Mr. Galvin testify, so that the members of the Committee could benefit from his expertise and advice. Because of his broad and varied background, he could speak with as much knowledge on the merits of particular construction project within a park as he could on general policy issues affecting the entire park system.

I would like to recognize his efforts, especially in his role in the National Park Service leadership, to maintain and protect the integrity of the National Park System. The Park Service has been fortunate to have had many strong and far-sighted leaders in its history. We have been extremely fortunate that Denis Galvin has continued in that great tradition. As he embarks on a new chapter in his life I would like to take this opportunity to thank Denny for all of his assistance to me and to other members of the Senate, and I extend my best wishes upon his retirement.●

TRIBUTE TO CARAN KOLBE MCKEE

● Mr. GRASSLEY. Mr. President, I rise to pay tribute to a loyal friend and trusted advisor who left my staff in late August. Caran Kolbe McKee came to work for me 14 years ago. She served the people of Iowa in a number of capacities in my office. In every case, Caran demonstrated remarkable leadership qualities, steadfastness of purpose, and the kind of problem-solving

ability that can make our Government work for the people in the best way possible.

Caran came to the Senate in 1987, when she joined my staff as assistant press secretary. Two years later, she became my press secretary. During this time, she dealt with a range of important issues, including the Gulf War, Supreme Court nominations, whistleblower protections, a farm bill, civil rights legislation, a campaign to apply labor and employment laws to Congress, and the budget battle of 1990. She made certain that Iowans had access to accurate and timely information through the news media and fostered a better understanding of the way in which the issues addressed by Congress affect the lives of individuals and families.

In 1994, Caran took on new challenges as a special assistant. She developed initiatives and reached out to the grassroots. Caran brought to her work a great appreciation for the people who make Iowa the extraordinary place that it is. She grew up on a farm in Western Iowa, graduated from Iowa State University, and maintains many close family ties in Iowa.

Caran is the kind of person who is always looking ahead and making a plan to improve things for others no matter what their stage and place in life. Just last week, President Bush signed into law legislation re-authorizing the Drug Free Communities Act, a bill I sponsored in the Senate. During his remarks, the President took time to recognize a coalition I launched in Iowa to address our state's growing drug problem. Called ''Face It Together''—or FIT—it is the first-ever community-based, statewide anti-drug coalition. The goal is to help Iowans work together to keep their neighborhoods, schools, workplaces and communities drug-free. I hope to see this productive effort continue in the years ahead. No individual deserves more credit for making FIT a reality and a success than Caran Kolbe McKee. Her vision for the project, gift for bringing people together and dedication to making the program happen were vitally important.

In recent years, Caran also managed my correspondence with Iowans. In the Senate, I work hard to made the process of representative government work. I keep in close touch with Iowans by returning home when the Senate is not in session. And since 1981, I have conducted a meeting in each of Iowa's 99 counties at least one time every year. I am committed to an active dialogue with constituents, so at town meetings I always say representative government is a two-way street. While I have come to them for a meeting about the issues, they also have a responsibility to write to me expressing concerns and views and asking questions. Well, each and every one of these letters or e-mail messages deserves and receives as answer from me. Caran made sure that Iowans who wrote or called received a reply that was not just a piece of paper but a substantive, informative response. In this way, she helped representative government work for the people in a fundamental, meaningful way.

Caran Kolbe McKee was a true public servant. She was a mentor to many of her fellow staff members. And she was an inspiration for the way she handled challenges—both professional and personal—with compassion, strength and courage. Now Caran has decided to spend more time with her family. She will be greatly missed, but I admire her decision and wish her the very best. Above all, I extend to her my deepest thanks.●

RETIREMENT OF NOAA SPECIAL AGENT IN CHARGE, EUGENE PROULX

● Mr. HOLLINGS. Mr. President, I rise today to express appreciation and congratulations to Eugene Proulx on the occasion of his retirement as the Special Agent in Charge of the Southeast Enforcement Division of NOAA's National Marine Fisheries Service. For over 28 years, Gene has dedicated himself to the protection of our nation's oceans and living marine resources. His service of 3 years with the United States Coast Guard and 25 years with the National Marine Fisheries Service's Office for Law Enforcement (OLE) have been exemplary, and he is being appropriately honored for this service at an event to be held on December 21st in the Southeast region.

His commitment and leadership with the OLE have been reflected through his service as a Special Agent, National Training Coordinator, Assistant Special Agent in Charge, Deputy Special Agent in Charge, and as Special Agent in Charge and Acting Chief. Gene's service as a Special Agent in Charge included assignments in both the Southwest and Southeast Divisions in addition to his many years of service as an agent at various duty posts in the Northeast Division as well as several assignments to Headquarters in Silver Spring as both an agent and as the Acting Chief of the Office for a period of three months.

Gene has been the example of a public servant who routinely gives 100 percent towards his responsibilities. His enthusiasm, dedication and energy level are widely known. His corporate knowledge, fisheries expertise, common sense, interpersonal skills and gracious humility are all traits that are exemplary and have facilitated his contributions to NOAA and our nation's resource missions. The accomplishments of the Office of Law Enforcement in the areas of Vessel Monitoring Systems, Sanctuaries Enforcement, Accreditation, and Cooperative Enforcement were all strongly facilitated through the support of Gene's vision and leadership.

Gene's work with the national Cooperative Enforcement program and the State Joint Enforcement Agreements have provided a long-lasting foundation for this important program. In particular, the state of South Carolina and its fisheries resources have benefited greatly through his work. In large part, Gene was responsible for convincing South Carolina that working jointly with NMFS could serve to substantially improve protection of our fishery resources far beyond the level we could achieve working separately. His initiative led to a Joint Enforcement Agreement that is improving the management and protection of South Carolina's precious marine resources. This program has proven so successful that it is now the ''gold standard'' model of marine resource enforcement, and it is being established in coastal states around the nation. These cooperative programs and relationships will be the legacy of Gene's leadership.

In closing, although we hate to see him go, I once again wish to congratulate Agent Proulx on his exemplary career. Through his tireless efforts, he has made a difference in protecting the marine resources of South Carolina and the Nation.●

IN MEMORY OF THE HONORABLE DERAN KOLIGIAN

● Mrs. BOXER. Mr. President, I rise today to recognize the recent passing of Fresno County Supervisor Deran Koligian, an extraordinary public servant and Californian who died on December 11th at the age of 74, after a two-year battle with cancer.

Deran Koligian was a Fresno County icon, having served as a Supervisor for two decades. He faithfully served his constituents up until the day of his death.

Deran Koligian set a high standard of integrity and decency. He was a man of great determination and dedication who worked tirelessly for Fresno County and California and was loved and respected by so many. He was a farmer, a World War II veteran, a family man and an honorable Fresno County Supervisor. He will be greatly missed by all.

I ask that the Fresno Bee editorial from December 13, 2001, be printed in the RECORD. And, on behalf of the Senate, I extend our thoughts and prayers to the Koligian Family on the loss of an extraordinary man.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Fresno Bee, Dec. 13, 2001]

DERAN KOLIGIAN—A POWERFUL VOICE IN FRESNO COUNTY, STATE POLITICS FALLS SILENT

The odds suggest we shall not soon see the likes of Deran Koligian in public life. The longtime Fresno County supervisor, who died Tuesday at the age of 74, embodied a rare set of skills and virtues. He was a bluntly honest farmer, a man of the soil who so deeply loved his roots he lived his entire life on his family's original 40-acre homestead. He was also a talented and shrewd politician, in the very best sense: clear about his philosophy and

objectives, civil in his behavior and capable of inspired compromise when conditions demanded it.

Koligian spent most of his adult life in public service. He enlisted in the Army at age 18, fought in the Philippines in World War II, and came home to attend Fresno State. The family farm sustained him, but could not contain him. He served many years on local school boards and was first elected to the county Board of Supervisors in 1982. In doing so, he became the first Armenian-American elected to public office in the county.

Defending Valley agricultural lands against urban encroachment was among Koligian's most important principles. He almost single-handedly pushed Fresno's growth away from his district, mostly lying to the west of Freeway 99, and out to the northeast. He was immensely popular among farmers for his defense of agriculture. He wasn't able to stop westward sprawl completely—no one individual could—but it is only recently that significant residential development has taken place on his turf.

Koligian was deeply opposed to the county using bonds to raise money for capital expenditures, arguing that it was fiscally irresponsible. He usually managed to persuade the rest of the board to support that position. It was one of the bones of contention between Koligian and The Bee, and he won the argument more often than he lost.

But—as with most of his adversaries—we always had a deep respect for Koligian. His combination of honesty and political savvy is one we do not often see, and we are all the poorer for that.●

HONORING DR. DONALD J. COHEN

● Mr. LIEBERMAN. Mr. President, today I honor Dr. Donald J. Cohen, a doctor, an author, an outstanding psychiatrist, a true professional, and caregiver and friend to the thousands of people who had the good fortune of knowing him. Today I grieve for my friend, as he recently passed away after only 61 short years on this Earth. I could think of no better tribute to this great man than to name the very program he envisioned so many years ago to help the victims of violence-related stress in his honor. Thus, I submitted an amendment to the Labor, Health and Human Services appropriations bill to amend Section 582 of the Public Health Service Act to rename this critically important grant program, the ''Donald J. Cohen National Child Traumatic Stress Initiative.'' I am proud to say that this amendment has been accepted by both the House and Senate and for that I thank my colleagues.

Dr. Cohen did more in his 61 years than most anyone else could ever hope to accomplish in a lifetime. He started at Brandeis University in 1961 on the course to a medical career and then went on to graduate from Yale University School of Medicine in 1966. Over the following 35 years, Dr. Cohen dedicated his life to helping children and adolescents. Donald spent virtually all of his adult life working tirelessly to develop and promote programs to assist children. I recently learned from my colleague, Senator DODD, that Dr. Cohen was the first person to suggest a special health insurance program for children that ultimately became the Childrens' Health Insurance Program. Today, this program throughout the Nation provides health care for millions of children who would otherwise go without the basic care they need to grow up healthy and flourish.

Dr. Cohen was a well-respected and world-renowned physician and teacher. Over the course of his illustrious career, he held many faculty positions at the Yale University School of Medicine, culminating with his appointment as the child Psychiatrist-in-Chief of the Yale Children's Hospital and Director of the Child Study Center at Yale School of Medicine. He held these positions for the past 18 years, which, as anyone in medicine will tell you, is an incredible testimony to his stature and leadership.

He has been honored by the Institute of Medicine, the National Academy of Sciences, the National Commission on Children, and the American Psychiatric association for his outstanding work. He received numerous lifetime research awards, including the Strecker Award from the Institute of the Pennsylvania Hospital and the Agnes Purcell McGavin Award for Prevention from the APA. He was recognized as a Sterling Professor of Child Psychiatry, Pediatrics and Psychology. He served as President of the International Association of Child and Adolescent Psychiatry and Allied Professions since 1993 and published over 300 papers and books. Dr. Cohen was also awarded a Doctor of Philosophy, Honoris Causa, from the Bar Ilan University in Israel.

As you can see, Dr. Donald Cohen was quite a remarkable man. So many people have been touched in some way by this great man's dedication.

It can be said that Dr. Cohen indeed achieved what most of us strive for, to make a difference. For those of us who knew him, for those of us in whose life Donald made a difference, his passing comes painfully too soon. We mourn and pray that Donald's soul will be embraced in the warmth of eternal life and that God will comfort and strengthen Phyllis, his wife, their children and grandchildren, and all of the family, friends, colleagues and patients who will miss him. I know the spirit and warmth of Dr. Donald J. Cohen will burn on in the hearts of those who grieve him. It is with spirit that I ask my colleagues to honor this man with the dedication of the Donald J. Cohen National Child Traumatic Stress Initiative.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Ms. Evans, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 9:33 a.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has agreed to the amendment of the Senate to the bill (H.R. 2199) to amend the National Capital Revitalization and Self-Government Improvement Act of 1997 to permit any Federal law enforcement agency to enter into a cooperative agreement with the Metropolitan Police Department of the District of Columbia to assist the Department in carrying out crime prevention and law enforcement activities in the District of Columbia if deemed appropriate by the Chief of the Department and the United States Attorney for the District of Columbia, and for other purposes.

The message also announced that the House has agreed to the amendment of the Senate to the bill (H.R. 2657) to amend title 11, District of Columbia Code, to redesignate the Family Division of the Superior Court of the District of Columbia as the Family Court of the Superior Court, to recruit and retain trained and experienced judges to serve in the Family Court, to promote consistency and efficiency in the assignment of judges to the Family Court and in the consideration of actions and proceedings in the Family Court, and for other purposes.

The message further announced that the House has agreed to the amendment of the Senate to the concurrent resolution (H. Con. Res. 289) directing the Clerk of the House of Representatives to make technical corrections in the enrollment of the bill H.R. 1.

The message also announced that pursuant to section 3(b) of the Public Safety Officer Medal of Valor Act of 2001 (42 U.S.C. 15202), the Speaker has appointed the following members on the part of the House of Representatives to the Medal of Valor Review Board for a term of 4 years: Mr. Tim Bivens of Dixon, Illinois and Mr. William J. Nolan of Chicago, Illinois.

The message further announced that the House has passed the following bill, without amendment:

S. 1741. An act to amend title XIX of the Social Security Act to clarify that Indian women with breast or cervical cancer who are eligible for health services provided under a medical care program of the Indian Health Service or of a tribal organization are included in the optional medicaid eligibility category of breast or cervical cancer patients added by the Breast and Cervical Prevention and Treatment Act of 2000.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2739. An act to amend Public Law 107–10 to authorize a United States plan to endorse and obtain observer status for Taiwan at the annual summit of the World Health Assembly in May 2002 in Geneva, Switzerland, and for other purposes.

H.R. 2751. An act to authorize the President to award a gold medal on behalf of the Congress to General Henry H. Shelton and to provide for the production of bronze duplicates of such medal for sale to the public.

H.R. 2869. An act to provide certain relief for small businesses from liability under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and to amend such Act to promote the cleanup and reuse of brownfields, to provide financial assistance for brownfields revitalization, to enhance State response programs, and for other purposes.

H.R. 3275. An act to implement the International Convention for the Suppression of Terrorist Bombings to strengthen criminal laws relating to attacks on places of public use, to implement the International Convention of the Suppression of the Financing of Terrorism, to combat terrorism and defend the Nation against terrorist acts, and for other purposes.

H.R. 3525. An act to enhance the border security of the United States, and for other purposes.

H.R. 3529. An act to provide tax incentives for economic recovery and assistance to displaced workers.

At 12:05 p.m., a message from the House of Representatives, delivered by Ms. Kelaher, one of its clerks, announced that the House has agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3338) making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes.

The message also announced that the House has passed the following joint resolutions, in which it requests the concurrence of the Senate:

H.J. Res. 79. A joint resolution making further continuing appropriations for the fiscal year 2002, and for other purposes.

H.J. Res. 80. A joint resolution appointing the day for the convening of the second session of the One Hundred Seventh Congress.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 295. Concurrent resolution providing for the sine die adjournment of the first session of the One Hundred Seventh Congress.

At 12:28 p.m., a message from the House of Representatives, delivered by Ms. Kelaher, one of its clerks, announced that the Speaker has signed the following enrolled bills:

H.R. 643. An act to reauthorize the African Elephant Conservation Act.

H.R. 645. An act to reauthorize the Rhinoceros and Tiger Conservation Act of 1994.

H.R. 2199. An act to amend the National Capital Revitalization and Self-Government Improvement Act of 1997 to permit any Federal law enforcement agency to enter into a cooperative agreement with the Metropolitan Police Department of the District of Columbia to assist the Department in carrying out crime prevention and law enforcement activities in the District of Columbia if deemed appropriate by the Chief of the Department and the United States Attorney for the District of Columbia, and for other purposes.

H.R. 2657. An act to amend title 11, District of Columbia Code, to redesignate the Family Division of the Superior Court of the District of Columbia as the Family Court of the Superior Court, to recruit and retain trained and experienced judges to serve in the Family Court, to promote consistency and efficiency in the assignment of judges to the Family Court and in the consideration of actions and proceedings in the Family Court, and for other purposes.

S. 1438. An act to authorize appropriations for fiscal year 2002 for military activities of the Department of Defense, for military constructions, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes.

The enrolled bills were signed subsequently by the president pro tempore (Mr. BYRD).

At 12:43 p.m., a message from the House of Representatives, delivered by Ms. Kelaher, one of its clerks, announced that the House has passed the following bills, without amendment:

S. 1202. An act to amend the Ethics in Government Act of 1978 (5 U.S.C. App.) to extend the authorization of appropriations for the Office of Government Ethics through fiscal year 2006.

S. 1714. An act to provide for the installation of a plaque to honor Dr. James Harvey Early in the Williamsburg, Kentucky Post Office Building.

S. 1793. An act to provide the Secretary of Education with specific waiver authority to respond to conditions in the national emergency declared by the President on September 14, 2001.

The message also announced that the House has passed the following bills and joint resolution, in which it requests the concurrence of the Senate:

H.R. 1432. An act to designate the facility of the United States Postal Service located at 3698 Inner Perimeter Road in Valdosta, Georgia, as the ''Major Lyn McIntosh Post Office Building''.

H.R. 2561. An act to increase the rate of special pension for recipients of the medal of honor, to authorize those recipients to be furnished an additional medal for display purposes, to increase the criminal penalties associated with misuse or fraud relating to the medal of honor, and for other purposes.

H.R. 3423. An act to amend title 38, United States Code, to enact into law eligibility of certain veterans and their dependents for burial in Arlington National Cemetery.

H.R. 3487. An act to amend the Public Health Service Act with respect to health professions programs regarding the field of nursing.

H.R. 3504. An act to amend the Public Health Service Act with respect to qualified organ procurement organizations.

H.R. 3507. An act to authorize appropriations for the Coast Guard for fiscal year 2002, and for other purposes.

H.J. Res. 75. A joint resolution regarding the monitoring of weapons development in Iraq, as required by United Nations Security Council Resolution 687 (April 3, 1991).

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 279. Concurrent resolution recognizing the service of the crew members of the USS Enterprise Battle Group during its extended deployment for the war effort in Afghanistan.

H. Con. Res. 292. Concurrent resolution supporting the goals of the Year of the Rose.

MEASURES REFERRED

The following bills and joint resolution were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 38. An act to provide for additional lands to be included within the boundaries of the Homestead National Monument of America in the State of Nebraska, and for other purposes; to the Committee on Energy and Natural Resources.

H.R. 2561. An act to increase the rate of special pension for recipients of the medal of honor, to authorize those recipients to be furnished an additional medal for display purposes, to increase the criminal penalties associated with misuse of fraud relating to the medal of honor, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 2739. An act to amend Public Law 107–10 to require a United States plan to endorse and obtain observer status for Taiwan at the annual summit of the World Health Assembly in May 2002 in Geneva, Switzerland, and for other purposes; to the Committee on Foreign Relations.

At the request of Mr. BIDEN, the name of the Senator from Louisiana (Ms. LANDRIEU) was added as a cosponsor of S. 1819, a bill to provide that members of the Armed Forces performing services in the Republic of Korea shall be entitled to tax benefits in the same manner as if such services were performed in a combat zone, and for other purposes.

S. 1858

At the request of Mr. ALLEN, the names of the Senator from Oklahoma (Mr. NICKLES), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Virginia (Mr. WARNER), and the Senator from New York (Mrs. CLINTON) were added as cosponsors of S. 1858, a bill to permit the closed circuit televising of the criminal trial of Zacarias Moussaoui for the victims of September 11th.

S. 1859

At the request of Mr. SCHUMER, the name of the Senator from New York (Mrs. CLINTON) was added as a cosponsor of S. 1859, a bill to extend the deadline for granting posthumous citizenship to individuals who die while on active-duty service in the Armed Forces.

S. CON. RES. 3

At the request of Mr. FEINGOLD, the name of the Senator from Nebraska (Mr. HAGEL) was added as cosponsor of S. Con. Res. 3, a concurrent resolution expressing the sense of Congress that a commemorative postage stamp should be issued in honor of the USS *Wisconsin* and all those who served aboard her.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. LUGAR:

S. 1861. A bill to authorize the extension of nondiscriminatory treatment (normal trade relations treatment) to the products of Russia; to the Committee on Finance.

Mr. LUGAR. Mr. President, at the request of the Administration, I rise today to offer legislation to repeal the Jackson-Vanik amendment to Title IV of the 1974 Trade Act and to authorize the extension of normal trade relations to the products of the Russian Federation.

Congress passed the Jackson-Vanik amendment as a means to deny Permanent Normal Trade Relations to communist countries that restricted emigration rights and were not market economies. Jackson-Vanik continues to apply to the Russian Federation today despite the findings of successive Administrations that Russia had come into full compliance with requirements of freedom of emigration, including the absence of any tax on emigration. Furthermore, although Russia's transformation has been imperfect, substantial progress has been made toward the creation of a free-market economy.

Since the fall of the Soviet Union, there have been dramatic changes in all aspects of life in Russia. It is clear that the Jackson-Vanik amendment played a role in bringing about these changes and in promoting freedom of emigration in many countries in the former Soviet Union.

But, the time has come to move beyond the Cold War era.

Since 1991, Congress has authorized the removal of Jackson-Vanik restrictions from Estonia, Latvia, Lithuania, the Czech Republic, the Slovak Republic, Hungary, Bulgaria, Romania, Kyrgyszstan, Albania, and Georgia. Because Russia continues to be subject to Jackson-Vanik conditions, the Administration must submit a semi-annual report to the Congress on that government's continued compliance with freedom of emigration requirements. The Administration reports that this requirement continues to be a major irritant is U.S. relations with Russia. The changed circumstances that have permitted the removal of other communist countries from Title IV reporting now apply equally to Russia.

I understand there remain those with concerns about extending nondiscriminatory treatment to the products of the Russian Federation. But I would simply point out that the U.S. and Russia concluded a bilateral trade agreement on June 17, 1992 and that Russia is currently in the process of acceding to the World Trade Organization. In other words, the time has come to take the next step in the U.S.-Russian bilateral relationship, namely, Permanent Normal Trade Relations. It is for that purpose that I introduce this legislation today.

By Mr. GRAHAM:

S. 1863. A bill to amend the Internal Revenue Code of 1986 to clarify treatment for foreign tax credit limitation purposes of certain transfers of intangible property; to the Committee on Finance.

Mr. GRAHAM. Mr. President, today I am introducing legislation that will clarify the proper tax treatment of intangible assets transferred to foreign corporations. This bill is necessary to avoid trapping unwary taxpayers who relied on Congressional intent when it made changes to this area of the tax code in 1997.

Transfers of intangible property from a U.S. person to a foreign corporation

in a transaction that would be tax-free under Code section 351 or 361 are subject to special rules. Pursuant to section 367(d), the U.S. person making such a transfer is treated as 1. having sold the intangible property in exchange for payments that are contingent on the productivity, use, or disposition of such property and 2. receiving amounts that reasonably reflect the amounts that would have been received annually over the useful life of such property. The deemed royalty amounts included in the gross income of the U.S. person by reason of this rule are treated as ordinary income and the earnings and profits of the foreign corporation to which the intangible property was distributed are reduced by such amounts.

Prior to the Taxpayer Relief Act of 1997 (the ''1997 Act''), the deemed royalties under section 367(d) were treated as U.S.-source income and therefore were not eligible for foreign tax credits. The 1997 Act eliminated this special ''deemed U.S. source rule'' and provided that deemed royalties under section 367(d) are treated as foreign-source income to the same extent that an actual royalty payment would be so treated. The 1997 Act reflected a recognition that the previous rule was intended to discourage transfers of intangible property to foreign corporations, relative to licenses of such intangible property, but that the enhanced information reporting included in the 1997 Act made it unnecessary to continue to so discourage transfers relative to licenses.

The 1997 Act intended to eliminate the penalty provided by the prior-law deemed U.S. source rule under section 367(d) and that had operated to discourage taxpayers from transferring intangible property in a transaction that would be covered by section 367(d). Prior to the 1997 Act, in order to avoid this penalty, taxpayers licensed intangible property to foreign corporations instead of transferring such property in a transaction that would be subject to section 367(d). With the 1997 Act's elimination of the penalty source rule of section 367(d), it was intended that taxpayers could transfer intangible property to a foreign corporation in a transaction that gives rise to deemed royalty payments under section 367(d) instead of having to structure the transaction with the foreign corporation as a license in exchange for actual royalty payments.

The 1997 Act's goal of eliminating the penalty treatment of transfers of intangible property under section 367(d) is achieved only if the deemed royalty payments under section 367(d) not only are sourced for foreign tax credit purposes in the same manner as actual royalty payments, but also are characterized for foreign tax credit limitation purposes in the same manner as actual royalty payments. Without a clarification that the deemed royalty payments under section 367(d) are characterized for foreign tax credit limitation purposes in the same manner as an actual royalty, there is a risk in many cases that such deemed royalties would be characterized in a manner that leads to a foreign tax credit result that is equally as disadvantageous as the result that arose under the penalty source rule that was intended to be eliminated by the 1997 Act. The bill I am introducing today provides the needed clarification of the foreign tax credit limitation treatment of a deemed royalty under section 367(d), ensuring that the penalty that was intended to be eliminated with the 1997 Act is in fact eliminated.

The bill clarifies that the deemed income inclusions under section 367(d) upon a transfer of intangible property to a foreign corporation are characterized for purposes of the foreign tax credit limitation rules in the same manner as an actual royalty is characterized. The tax treatment of such a transfer of intangible property to a foreign corporation thus would be the same as the tax treatment that applies if the intangible property is made available to the foreign corporation through a license arrangement.

The bill's provision would be effective for income inclusions under section 367(d) on or after August 5, 1997, which is the effective date of the 1997 Act provision eliminating the special deemed U.S. source rule under section 367(d). Like the 1997 Act provision, the bill's provision would be effective for transfers made, and for royalties deemed received, on or after August 5, 1997.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1863

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CLARIFICATION OF TREATMENT OF CERTAIN TRANSFERS OF INTANGIBLE PROPERTY.

(a) IN GENERAL.—Subparagraph (C) of section 367(d)(2) of the Internal Revenue Code of 1986 (relating to transfer of intangibles treated as transfer pursuant to sale of contingent payments) is amended by adding at the end the following new sentence: ''For purposes of applying the various categories of income described in section 904(d)(1), any such amount shall be treated in the same manner as if such amount were a royalty.''.

(b) EFFECTIVE DATE; WAIVER OF LIMITATIONS.—

(1) EFFECTIVE DATE.—The amendment made by this section shall take effect as if included in the amendments made by section 1131(b) of the Taxpayer Relief Act of 1997.

(2) WAIVER OF LIMITATIONS.—If refund or credit of any overpayment of tax resulting from the application of the amendment made by this section is prevented at any time before the close of the 1-year period beginning on the date of the enactment of this Act by the operation of any law or rule of law (including res judicata), such refund or credit may nevertheless be made or allowed if claimed therefor is filed before the close of such period.

By Ms. MIKULSKI (for herself, Mr. HUTCHINSON, Mr. KERRY, Mr. JEFFORDS, Mr. GREGG, Mr. DASCHLE, Mr. FRIST, Mr. KENNEDY, Ms. COLLINS, Mr. LIEBERMAN, Mr. ENZI, Mrs. CLINTON, Mr. WARNER, Mr. JOHNSON, Mr. ROBERTS, Mrs. LINCOLN, Mrs. HUTCHISON, Mrs. MURRAY, Mr. SMITH of Oregon, Mr. SARBANES, Mr. HAGEL, Mr. TORRICELLI, Mr. COCHRAN, Mr. DAYTON, Mr. CHAFEE, Mr. GRAHAM, Mr. LUGAR, Ms. CANTWELL, Mr. HATCH, Mr. LEAHY, Mrs. CARNAHAN, Mr. ROCKEFELLER, Ms. STABENOW, Mr. CORZINE, Mr. SCHUMER, Mr. INOUYE, Mr. MILLER, MR. WELLSTONE, Mr. HARKIN, Mr. SANTORUM, Mr. REED, and Mr. BOND):

S. 1864. A bill to amend the Public Health Service Act to establish a Nurse Corps and recruitment and retention strategies to address the nursing shortage, and for other purposes; considered and passed.

Ms. MIKULSKI. Mr. President, I rise to introduce the Nurse Reinvestment Act. This bill is a down payment to help address the nursing shortage in this country by bringing more people into the nursing profession and by retaining nurses. This bill combines the Nursing Employment and Education Development Act, S. 721, introduced by Senator TIM HUTCHINSON and myself and the Nurse Reinvestment Act, (S. 1597), introduced by Senators KERRY and JEFFORDS. We have all worked together to bring this important legislation before the Senate today.

This bill is sorely needed, because we have a nursing shortage. In Maryland, 15 percent of the nursing jobs are vacant. Last year, it took an average of 68 days to fill a nurse vacancy, and we need about 1,600 more full-time nurses to fill those vacancies. There were 2,000 fewer nurses in Maryland in 1999 than there were in 1998. The shortage exists across the United States, and will get worse in the future. Nationwide, we need 1.7 million nurses by the year 2020, but only about 600,000 will be available. The need for this bill was clear at the Subcommittee on Aging's hearing on the nursing shortgage earlier this year.

We depend on nurses every day to care for millions of Americans, whether in a hospital, nursing home, community health center, hospice, or through home health. They are the backbone of our health care system. If we don't effectively address the crisis in nursing, those hospitals, nursing homes and clinics will soon be on life support.

This bill is a down payment. It doesn't address the fact that nurses are underpaid, overworked, and undervalued, but it does focus on education and other important areas. This bill seeks to help bring men and women into the nursing profession, and help them to advance within it. The bill does this under five major approaches:

Creates a National Nurse Service Corps Scholarship Program, which provides scholarships in exchange for at least two years of service in a critical nursing shortage area or facility

Provides grants for outreach at primary and secondary schools; scholarships or stipends to nursing students from disadvantaged backgrounds, education programs for students who need assistance with math, science, or other areas; dependent care and transportation assistance; establishment of partnerships between schools of nursing and health care facilities to improve access to care in underserved areas

Creates state and national public awareness and education campaigns to enhance the image of nursing, promote diversity in the nursing workforce, and encourage people to enter the nursing profession

Creates ''career ladder'' programs with schools of nursing and health care facilities to encourage individuals to pursue additional education and training to enter and advance within the nursing profession

Enables Area Health Education Centers, AHECs, to expand their junior and senior high school mentoring programs for nurses and develop ''models of excellence'' for community-based nurses

Trains individuals to provide long-term care to the elderly and expands educational opportunities in gerontological nursing

Creates internship and residency programs that encourage mentoring and the development of specialties

Provides grants to improve workplace conditions, reduce workplace injuries, promote continuing nursing education and career development, and establish nurse retention programs

Provides scholarships, loans, and stipends for graduate-level education in nursing in exchange for teaching at an accredited school of nursing, to help ensure that we have enough teachers at our nursing schools.

Creates a National Commission on the Recruitment and Retention of Nurses to study and make recommendations to the health care community and Congress on how to address: the nursing shortage in the long-term, nursing recruitment and retention, career advancement within the profession and attracting individuals into the profession.

This bill is about nursing education, but it's also about empowerment. We can empower people to have a better life and go into a career to save lives.

The bill will empower the single mom who has been working in a minimum wage job to forge a better life for herself and her family. It will help her get a scholarship to help pay for tuition, books, and lab fees, and by funding child care programs to help her balance work and family.

The bill will empower the nurse who has a baccalaureate degree, but wants to get a Master's degree so she can teach nursing at a community college. It will help her get loans or scholarships and living stipends to pursue that degree.

This bill will also fund partnerships between schools of nursing and health care facilities to train individuals who will provide long-term care for the elderly. Our population is aging, more than 70 million Americans will be over age 65 by 2030. This means more people will need care provided by nurses and other individuals specifically trained to care for the unique health needs of older Americans.

I look forward to the Senate's speedy passage of this important legislation and to working with our colleagues in the House of Representatives to enact a strong bill that gets behind our Nation's nurses. I also want to thank Senators KENNEDY, GREGG, and FRIST for their hard work in moving this legislation forward, as well as Senators LIEBERMAN and CLINTON for their important contributions to this bill.

Mr. HUTCHINSON. Mr. President, I am proud to be a lead cosponsor of the legislation we are introducing today to address the critical shortage of nurses in our country. After holding two hearings earlier this year to examine the nurse shortage and its impact on our health care delivery system. I introduced S. 721, the Nurse Employment and Education Development Act, NEED Act. This bipartisan legislation seeks to encourage individuals to enter the nursing profession, provide continued education and opportunities for advancement within the profession, and to bolster the number of nurse faculty to teach at our nursing schools. Most importantly, its legislation would establish a Nurse Service Corps, which would provide financial assistance to individuals for nurse education in exchange for 2 years of service in a nurse shortage area.

The NEED Act won unanimous approval by the Senate Health, Education, Labor and Pensions Committee on November 1, and I am pleased that it has served as the basis for the legislation we are introducing today.

The nursing profession is suffering from a serious decline in practicing nurses due to a shrinking pipeline. The nursing profession as a whole is aging, the average age of Registered Nurses is 43.3 years, while nurses under age 30 comprise less than 10 percent of today's nurse workforce. Large numbers of nurses are retiring or leaving the profession, and only a small number of nurses and nurse educators are taking their place. By the year 2020, when millions of Baby Boomers will retire, it is projected that nursing needs will be unmet by at least 20 percent. For this reason, we need to employ innovative recruitment techniques, including a Nurse Service Corps, public service announcements, and outreach efforts at elementary and secondary schools to promote nursing as a viable, fulfilling career option. To address the needs of the elderly, the bill will provide grants for gerontological education and training.

Hospitals, nursing homes, community health centers and other health care facilities are desperately seeking nurses to fill vacant positions so they can continue to provide safe, quality health care. In Arkansas, hospitals have reported over 750 nursing vacancies. To encourage nurses to stay and advance within the profession, the nursing bill provides for a career ladder program and encourages hospitals and other employers to develop innovative retention strategies. The bill also encourages speciality training and mentors through an internship and residency program, in order to fill the void created by experienced nurses leaving the profession.

Finally, the bill addresses the critical need for nurse educators. The number of nursing school graduates in Arkansas is at its lowest in a decade, and nursing students have been turned away because of the lack of faculty to teach them. There are approximately four hundred nurse faculty vacancies in nursing schools nationwide. Therefore we include two provisions, a nurse faculty fast-track loan repayment program and a stipend and scholarship program, both of which provide financial assistance to masters and doctoral students who will teach at an accredited school of nursing for each year of assistance.

This has been a team effort. I want to thank Senators MIKULSKI, KERRY, and JEFFORDS for their contributions to this important legislation, and I urge my colleagues to support its passage.

Mr. KERRY. Mr. President, I am pleased to join my colleagues Senators JEFFORDS, HUTCHINSON and MIKULSKI in re-introducing the Nurse Reinvestment Act. This legislation will increase the number of nurses in our country, and also ensure that every nurse in the field has the skills he or she needs to provide the quality care patients deserve.

We are in the midst of a serious nursing workforce shortage. Every type of community, urban, suburban and rural, is touched by it. No sector of our health care system is immune to it. Across the country, hospitals, nursing homes, home health care agencies and hospices are struggling to find nurses to care for their patients. Patients in search of care have been denied admission to facilities and told that there were ''no beds'' for them. Often there are beds, just not the nurses to care for the patients who would occupy them.

Our Naiton has suffered from nursing shortages in the past. However, this shortage is particularly severe because we are losing nurses at both ends of the pipeline. Over the past five years, enrollment in entry-level nursing programs has declined by 20 percent. Lured to the lucartive jobs of the new economy, high school graduates are not pursuing careers in nursing in the numbers they once had. Consequently, nurses under the age of 30 represent only 10 percent of the current workforce. By 2010, 40 percent of the nursing

workforce will be over the age of 50, and nearing retirement. If these trends are not reversed, we stand to lose vast numbers of nurses at the same time that they will be needed to care for the millions of baby boomers enrolling in Medicare.

The Nurse Reinvestment Act will support the recruitment of new students into our Nation's nursing programs. The bill will fund national and local public service announcements to enhance the profile of the nursing profession and encourage students to commit to a career in nursing. Our legislation will also expand school-to-career partnerships between health care facilities, nursing colleges, middle schools and high schools to show our youth the value of a nursing degree.

Our legislation will ensure that barriers to higher education do not dissuade Americans who are interested in nursing from pursuing a degree in the field. The Nurse Reinvestment Act will support education for students who need help getting-up to speed on math, science and medical English. Our legislation will also ensure that there is support for single moms and dads with children who need a hand in daycare or a lift in getting to their classroom because they are without transportation.

Still, is it not enough to simply encourage more individuals to enter the nursing profession, we must also ensure that our schools of nursing have enough professors to teach them. The Nurse Reinvestment Act provides for a fast-track facility development program, which encourages master's and doctoral students to rapidly complete their studies through loans and scholarships. Individuals receiving financial assistance through the fast-track faculty program must agree to teach at an ascredited school of nursing in exchange for this assistance.

In addition to recruiting new nurses, our legislation will reinvest in nurses who are already practicing by providing them with education and training at every step of the career ladder and at every health care facility in which they work. It will ensure that nurses can obtain advanced degrees, from a B.S. in Nursing to a PhD in Nursing. It will enable nurses to access the specialty training they require to learn how to treat a specific disease or utilize a new piece of technology. Our bill will also help colleges and universities develop curriculum in gerontology and long-term care so that nursing students can pursue concentrations, minors and majors in this growing field of health care and be ready to apply their knowledge to the current and future senior population.

To assist institutions in providing advanced education and training for nurses across the career ladder, our bill will strengthen the partnerships between colleges of nursing and health care facilities. Grants will be available to support such initiatives as the teaching of a course in gerontology in the conference rooms of a hospital or nurusing home. Grants will also support the use of distance learning technology to extend education and training to rural areas, and specialty education and training to all areas.

The Nurse Reinvestment Act will authorize, for the first time in history, a National Nurse Service Corps. Separate from, though modeled after, the National Health Service Corps, the NNSC will administer scholarships to students who commit to working in a health care facility that is experiencing a shortage of nurses. In urban, suburban and rural communities across the country, where facilities turn away patients due to staff shortages, the NNSC will send qualified nurses to serve and provide the care that patients deserve.

Our country boasts the best health care system in the world. But, that health care system is being jeopardized by the shortage plaguing our nursing workforce. Indeed, state-of-the-art medical facilities are of no use if their beds go unfilled and their floors remain empty because the nurses needed to staff them are not available. The Nurse Reinvestment Act not only seeks to increase the numbers of new nurses in our country, but also ensures that all nurses have the skills they need to provide the high quality care that makes our health care system the best in the world.

Mr. JEFFORDS. Mr. President, I am especially pleased that the Senate is scheduled to consider and vote on the Nurse Reinvestment Act. When we pass this measure, it will represent a good day for the future of nursing in America and a good day for the future for patient-care. I want to take this opportunity to tell our colleagues a little about this legislation and to congratulate and complement my fellow Senators who worked so hard to see this effort through. My good friend from Massachusetts, Senator KERRY, was the original sponsor of the Nurse Reinvestment Act and with me crafted an innovative set of solutions to the nursing shortage problem. Since then, this bill has been strengthened significantly by the inclusion of a complimentary measure authored by my colleagues on the HELP Committee, Senator HUTCHINSON and Senator MIKULSKI. The measure we are considering today has been benefited by this collaboration.

As I have stated before, we are facing a looming crisis in this country. The size of our nursing workforce remains stagnant, while the average age of the American nurse is on the rise. Over the past five years, enrollment in entry-level nursing programs has declined by 20 percent. Nurses under the age of 30 represent only 10 percent of the current workforce. By 2010, 40 percent of the nursing workforce will be over the age of 50, and nearing retirement. In Vermont we are facing an even greater crisis because these numbers are worse. Only 28 percent of nurses are under the age of 40 and Vermont schools and colleges are producing 31 percent fewer nurses today than they did just five years ago.

We have a compelling need to encourage more Americans to enter the nursing profession and to strengthen it so that more nurses choose to stay in the profession. All facets of the health care system will have a role to play in ensuring a strong nursing workforce. Nurses, physicians, hospitals, nursing homes, academia, community organizations and state and federal governments all must accept responsibility and work towards a solution. Part of the responsibility to launch that effort begins with us today as we make a decision on the vote for the Nurse Reinvestment Act.

The Nurse Reinvestment Act expands and improves the federal government's support of ''pipeline'' programs, which will maintain a strong talent pool and develop a nursing workforce that can address the increasingly diverse needs of America's population. The Nurse Reinvestment Act provides for a comprehensive public awareness and education campaign on a national, state and local level that will bolster the image of the profession, encourage diversity, attract more nurses to the workforce, and lead current nurses to take advantage of career development opportunities.

The legislation creates a National Nursing Service Corps Scholarship Program authorized at $40 million that will provide scholarships to individuals to attend nursing schools in exchange for a commitment to serve two years in a health facility determined to have a critical shortage of nurses. This scholarship program is designed to greatly help the recruitment of nursing students by providing them tuition, other reasonable and necessary educational fees and a monthly stipend paid to the student.

The Act also authorizes the ''Nurse Recruitment Grant Program'' to support outreach efforts by nursing schools and other eligible healthcare facilities to inform students in primary, junior and secondary schools of nursing educational opportunities and to attract them to the nursing profession. The grant program provides appropriate student support services to individuals from disadvantaged backgrounds and creates community-based partnerships to recruit nurses in medically underserved rural and urban areas. Further, the ''Area Health Education Centers Program'' will award grants to nursing schools that work in partnership in the community to develop models of excellence.

The ''Career Ladder Programs'' will assist schools of nursing, health care facilities or partnerships of the two to develop programs that will encourage current nursing students in active nurses alike, to pursue further education and training. This will be achieved through scholarships, stipends, career counseling, direct training and distance learning programs.

And, in light of our aging baby-boomer generation, specific grants are offered to schools and health care facilities so that they might place a further emphasis upon encouraging students to study long-term care for the elderly.

In addition to the provisions that were included in the original bill I cosponsored with my colleague Senator KERRY, there are provisions added by our colleagues which, I am happy to have included in this final piece of legislation. Those provisions will provide for the development of internship and residency programs to encourage the development of specialties and student, loan, stipend and scholarship programs for those who would like to seek a masters or doctorate degree at a school of nursing. The final bill was also strengthened by provisions added through the efforts of Senator LIEBERMAN and Senator CLINTON.

Once again, I want to applaud my colleagues Senator KERRY, Senator MIKULSKI and Senator HUTCHINSON for their tireless work on the Nurse Reinvestment Act and for the work of their staffs. In particular, I want to recognize the efforts of Kelly Bovio in Senator KERRY,'s office, Kate Hull in Senator HUTCHINSON's office and Rhonda Richards with Senator MIKULSKI. This effort was also advanced with the help of Sarah Bianchi and Jackie Gran who are members of Senator KENNEDY's staff, Steve Irizarry with Senator GREGG and Shana Christrup with Senator FRIST. Finally, in my own office, I want to note the efforts of Philo Hall, Angela Mattie, Eric Silva and Sean Donohue.

Adequate health care services cannot survive any further diminishing of the nursing workforce. All patients depend on the professional care of nurses, and we must make sure it will be there for them. I urged my colleagues to join me and the bill's cosponsors in support of this measure.

Mr. FRIST. Mr. President, I rise today to discuss the introduction of a very important bill to address the nursing workforce shortage. At the beginning of November, we reported two different bills from the Senate HELP Committee designed to address the nursing shortage in this country, the Hutchinson-Mikulski ''Nursing Employment and Education Development Act'' and the Kerry-Jeffords ''Nursing Reinvestment Act.'' I was an original cosponsor of the Hutchinson legislation and a strong supporter of that bill. At that time, I voiced my concern that we are marking up two rather similar proposals to deal with the nursing shortage, and I requested that the differences be worked out before the bill was discussed on the Senate floor. I am happy today to report the the final reconciliation is complete, and we have a consensus bill that firmly addresses the nursing workforce shortage issue. I thank Senator HUTCHINSON for his hard work in ensuring that we could reach this point.

We are in the midst of a direct care workforce shortage. Not only are fewer people entering and staying in the nursing profession, but we are losing experienced nurses at a time of growing need. Today, nurses are needed in a greater number of settings, such as nursing homes, extended care facilities, community and public health centers, professional education, and ambulatory care facilities. Nationwide, health care providers, ranging from hospitals and nursing homes to home health agencies and public health departments, are struggling to find qualified nurses to provide safe, efficient, quality care for their patients. That's why it is important to have a new Nursing Corps, which will provide scholarships to qualified individuals in exchange for direct care service in a variety of settings as well as to allow others to know about the numerous possibilities within the profession by authorizing public service announcements.

Though we have faced nursing shortages in the past, this looming shortage is particularly troublesome because it reflects two trends that are occurring simultaneously: 1. A shortage of people entering the profession; and 2. The retirement of nurses who have been working in the profession for many years. Over the past five years, enrollment in entry-level nursing programs has declined by twenty percent, mirroring the declining awareness of the nursing profession among high school graduates. Consequently, nurses under the age of thirty represent only ten percent of the current workforce. By 2010, forty percent of the nursing workforce will be older than fifty years old and nearing retirement. If these trends continue, we stand to lost vast numbers of nurses at the very time that they will be needed to care for the millions of baby boomers reaching retirement age. To deal with the increased need for nurses to care for the elderly, this bill has a provision to assist with both the necessary training and educational development of gerontological nurses as well as to strengthen the ability of nurses to obtain additional training and certification through the career ladders program.

Further, greater efforts must be made to recruit more men and minorities to this noble profession. Currently, only ten percent of the registered nurses in the United States are from racial or ethnic minority backgrounds, even though these individuals comprise twenty-eight percent of the total United States population. In 2000, less than six percent of the registered nurses were men. We must work to promote diversity in the workforce, not only to increase the number of individuals within the profession, but also to promote culturally competent and relevant care. Within the combined nursing shortage bill, one grant program directly addresses the need to increase funding for the training of minority and disadvantaged students to make it easier for individuals to enter the nursing profession.

Even if nursing schools could recruit more students to deal with the shortage, many schools could not accommodate higher enrollments because of faculty shortages. There are nearly four hundred faculty vacancies at nursing schools in this country. And, an even greater faculty shortage looms in the next ten to fifteen years as many current nursing faculty approach retirement and fewer nursing students pursue academic careers. Therefore, I strongly support the two provisions to assist with faculty development and training, the fast track nursing faculty loan program and the stipend and scholarship program.

In addressing these direct care staffing shortages, we must work together to develop innovative solutions to address this growing issue. As reported in the Memphis Commercial Appeal on May 10, there are steps that Congress can take to increase funding for specific programs and reduce regulatory requirements. However, a comprehensive strategy must also include other sectors of the health care system, hospitals, health care professionals, educators, and the general public, to successfully deal with this looming shortage. That's why it is important to also include a provision to deal with developing retention strategies and best practices in nursing staff management.

I am extremely supportive of this legislation, and I want to thank Senator HUTCHINSON again for his hard work in addressing this critical issue. I also want to commend my other colleagues, including Senator MIKULSKI, for her efforts. Senator HUTCHINSON clearly has shown tremendous leadership in this area. He understands the need to address the nursing shortage issue, and he is largely responsible for getting us to this point today.

Mr. KENNEDY. Mr. President, it is a privilege to join my colleagues in introducing the Nurse Reinvestment Act. Our goal in this bipartisan legislation is to do as much as we can to alleviate the nursing shortage experienced by health care facilities across the United States. Increasing the number of nurses is an essential part of the ongoing effort to reduce medical errors, improve patient outcomes, and encourage more Americans to become and remain nurses.

The Nation's nurses provide care for Americans at the most vulnerable times in the lives. We must act now to halt the decline in the number of nurses. Enrollment in schools of nursing is falling, and the average age of the nursing workforce is rising. Across the country, communities are losing vast numbers of nurses, just as we need more to care for the millions of aging baby boomers and deal with the many medical challenges facing our hospitals.

The current shortage means that too many nurses now have to care for too many patients at once, undermining the high quality of care that nurses want to give, and patients deserve. A

recent survey by the American Nurses Association showed that 75 percent of nurses believe that the quality of nursing care at their facility has declined. More than half of those surveyed said that the time they can spend with patients has decreased. A nurse in Massachusetts said that she would not go the hospital where she worked, if she needed care.

Nationally, the shortfall is expected to rise to 20 percent in the coming years. Yet nurses themselves are already seriously questioning the quality of bedside treatments now being provided on intensive care units, in emergency rooms, and at the bedsides of patients where they work.

Their questions are call for help. This legislation can be significant in strengthening the nursing profession, and responding to the urgent need.

The Nurse Reinvestment Act will recruit new students into schools of nursing through outreach programs, public awareness and education campaigns, and area health education centers. It establishes a national nurse service corps, which will offer scholarships to bring individuals into the profession and place them in medically underserved areas and facilities. The Act expands school-to-career partnerships to show youths the high value and importance of a nursing degree. It invests in today's nurses by providing education and training at every step of the career ladder, and by helping them obtain advanced degrees, from a B.S. in Nursing to a Ph.D. in Nursing. It includes provisions developed by Senator LIEBERMAN and Senator CLINTON to help health care facilities retain nurses.

Our country has the best health care system in the world. But that system is being jeopardized today by the shortages plaguing the nursing workforce. Even our best medical facilities are in deep trouble if their beds go unfilled and their floors remain empty because there are no nurses to staff them.

I commend Senator MIKULSKI, Senator KERRY, Senator HUTCHINSON, and Senator JEFFORDS for their leadership in this initiative. Bringing more nurses into the profession will help to ensure that nurses are ready and able to provide the highest quality of care to their patients. The Nurse Reinvestment Act is a significant step that Congress can take to support the Nation's nurses, and I urge my colleagues to support it.

Mr. LIEBERMAN. Mr. President, I am proud to be an original cosponsor of the Nurse Reinvestment Act of 2001. I want to congratulate my colleagues, particularly Senators MIKULSKI, HUTCHINSON, KERRY and JEFFORDS, for their extraordinary efforts to put together this excellent bill. I also want to thank the Committee for including the provisions of the LIEBERMAN-ENSIGN ''Hospital Based Nursing Initiative Act of 2001'' in the bill.

By now, everyone knows that the nation faces a critical shortage of nurses. The shortage has already severely impacted states in many areas of the country, including Connecticut, and I fear it will jeopardize our ability to provide quality health care to patients. A recent report by the Government Accounting Office projected that the growing national nursing shortage will hit a peak in ten years.

While pay is a major factor cited in the report, it is not the primary reason nurses are leaving the profession. The study also cites poor or unsafe working conditions, lack of respect from physicians and patients, barriers to participation in the hospital administration decision-making process, lack of opportunity to continue their education, and lack of recognition for accomplishments. We must do more to attract new people to the nursing profession and retain the quality nurses who currently provide us care. The Nurse Reinvestment Act will do just that.

I want to take just a minute to talk about the specific provisions that were part of the ''Hospital Based Nursing Initiative Act.'' This legislation contained two proposals to help retain nurses in the hospital setting: a competitive grant program that would provide funding to hospitals that actively work to retain their nurses and a scholarship program for registered nurses who hold an associates or diploma degree who wish to obtain a bachelor's degree in nursing.

As part of the Nurse Reinvestment Act, these incentives have been broadened to apply to the nursing workforce in all health care facilities, providing a critical stimulus for these facilities to retain their nurses.

While the ominous projections about the growing nursing shortage looms over the health care industry, it is clear that now is the time to act. I am encouraged that Congress is acting quickly and decisively to actively add to the nurse workforce and to provide critical incentives to keep nurses on the job.

By Mrs. BOXER:

S. 1865. A bill to authorize the Secretary of the Interior to study the suitability and feasibility of establishing the Lower Los Angeles River and San Gabriel River watersheds in the State of California as a unit of the National Park System, and for other purposes; to the Committee on Energy and Natural Resources.

Mrs. BOXER. Mr. President, I am pleased to be introducing today a bill that will take an important first step in restoring the San Gabriel River and Lower LA River, which run through Los Angeles, CA. These two rivers have suffered from years of abuse and neglect. For far too long, we have channeled, redirected, constricted, polluted, and simply ignored these two rivers. The result is that substantial portions of these rivers look nothing like their natural form. Instead of soft bottoms covered with aquatic grasses, stream banks lined with trees and bushes, and waters teaming with fish, these rivers have cement bottoms, cement banks, and little remaining wildlife.
