House of Representatives

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. SUNUNU).

DESIGNATION OF THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC, February 7, 2002.

I hereby appoint the Honorable John E. SUNUNU to act as Speaker pro tempore on this day.

J. DENNIS HASTERT,
Speaker of the House of Representatives.

PRAYER

The Chaplain, the Reverend Daniel P. Coughlin, offered the following prayer:

This is the day, Lord, You have made. We are glad and rejoice in it.

This morning, Lord, at the National Prayer Breakfast, President George W. Bush and many Members of Congress, with over 3,800 individuals from all walks of life, representing over 170 nations, joined in prayer and fellowship to Your honor and glory.

How inspiring it is, Lord, for people of faith to gather and manifest again the rich heritage of America’s commitment to religious freedom.

We praise You, Lord God, and we thank You, for You continue to inspire people to build a truly better world, a world in which freedom is ordered to truth and goodness, while religion is celebrated openly with a wide expression of faith perspective. Rooted in various religious traditions, Your people give You glory because moral norms give them life, direction and great fruitfulness in works of justice and service.

This prayer breakfast was a vision of the globalized world come together for prayer. Government leaders confessing their human limitations, looking to You, Almighty God, for strength and guidance to bring peace to the world.

Continue to bless the work begun by the National Prayer Breakfast, because it brings to life the prayer and vision of Jesus, who came not to be served but to serve, now and forever. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day’s proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. GIBBONS. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker’s approval of the Journal.

The SPEAKER pro tempore. The question was taken; and the ayes appeared to have it.

The SPEAKER pro tempore. Pursuant to clause 8, rule XX, further proceedings on this question will be postponed.

The point of no quorum is considered withdrawn.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from New York (Mr. MCNULTY) come forward and lead the House in the Pledge of Allegiance.

Mr. MCNULTY led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

CONGRATULATING DR. MICHAEL ALESSANDRI FOR HIS WORK WITH AUTISTIC INDIVIDUALS AND THEIR FAMILIES

(Ms. ROS-LEHTINEN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ROS-LEHTINEN. Mr. Speaker, I have often spoken about the importance of funding research for autism and its related spectrum disorders.

Today I congratulate a scholar who for over 20 years has been dedicated to working with individuals who have autism and their families, Dr. Michael Alessandri. Michael has consulted nationally and abroad on developing educational programs on autism spectrum disorder. But perhaps it is Dr. Alessandri’s inherent commitment to educating individuals with autism that has enabled him to touch the lives of so many, especially in my congressional district. South Florida families living with autism are fortunate to have Michael leading the battle at the University of Miami Center for Autism and Related Disabilities, which under his direction was named the National Autism Program of the Year in 1999 by the Autism Society of America.

Please join me in congratulating Dr. Michael Alessandri and the University of Miami’s CARD for their contributions to the field of autism research.

BRING OUR CHILDREN HOME

(Mr. LAMPSON asked and was given permission to address the House for 1 minute.)

Mr. LAMPSON. Mr. Speaker, as of today, Jeff Koons, a custodial parent in New York, has not spoken with his son Ludwig for 2 months. Jeff and Ludwig were supposed to spend the holidays together in Rome. Jeff went to Rome, but was denied access to his son by the noncustodial mother, Ilona Staller. He...
was not even allowed to talk with him on the phone.

Nothing is being done. Ms. Staller is clearly in violation of all agreements and court orders. Ludwig is in great danger, as he is being raised in a pornographic compound in Rome, Italy. Yet there is no law or authority outside of Ludwig’s rights. It is absolutely critical that Jeff, at the very least, be allowed contact with his son. It is critical to Ludwig’s welfare.

Mr. Speaker, this body, the administration, the State Department, and the Justice Department must do something now. These children must be returned to our home, the United States of America. Ludwig Koons can wait no longer. Bring our children home.

YUCCA MOUNTAIN

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, yesterday in the Washington Post John W. Bartlett, an engineer who headed the Yucca Mountain project for the DOE from 1978 to 1983 wrote: “The rock formations were found to be far inferior to that originally expected in terms of preventing contamination.”

Mr. Bartlett is not the only former DOE official opposed to Yucca Mountain project when it comes time, and Mr. Abraham is quoted saying that Yucca Mountain was a mistake, it will be too late for the American people.

ALTERNATIVE MINIMUM TAX

(AMT) REPEAL

(Mr. GARY G. MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GARY G. MILLER of California. Mr. Speaker, I have here the National Taxpayer Advocate’s Annual Report to Congress.

As my colleagues well know, the National Taxpayer Advocate is an independent agent within the IRS that helps complainants resolve their tax problems. It should interest Members of this body that the very agent within the IRS tasked with helping our con-

stituents has suggested that we abolish the alternative minimum tax.

As my colleagues well know, the AMT was the subject of considerable debate when this body voted to pass not one but two stimulus bills. As I re-
call, my colleagues on both sides of the aisle agreed that eliminating the AMT would only help the wealthy.

I ask my colleagues to consider that a mother of five who earned $45,000 in 2000 had to pay $1,850 in AMT alone.

That is a lot of money. I find it dis-
concerting that members of this body would oppose commonsense tax reform that would help the economy and real-

ly help their constituency.

I do not take any word from anybody, and I do not expect Members to accept by his name will humble themselves report for yourself. Unless the oppo-

nents of the AMT are prepared to call the National Taxpayer Advocate the handmaiden of the wealthy, then I think it is time that we heed the Tax Advocate’s recommendations and eliminate the AMT.

NATIONAL PRAYER BREAKFAST

(Mr. PENCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PENCE. Mr. Speaker, my wife, Karen, and I just returned from celebrating, along with 3,800 other citizens of both political parties, the 50th Na-

tional Prayer Breakfast here in Wash-

ington, D.C. It was truly an inspiring morning. I offer congratulations to the organizers, in both political parties, with the National Prayer Breakfast for this inspiring event.

We gathered, Mr. Speaker, because it is a chance to honor heroes, like Lisa Beamer and the New York firefighters whom we heard from today. We gather because it is obviously a tradition begun with President Dwight David Ei-

sonhower and that we are reminded so poignantly today by leaders of both parties and eloquently by our Presi-

dent and the Chief of Naval Operations, we gather as Americans because we be-

lieve that if His people who are called by His name will humble themselves, pray and seek His face, He will today, as He always has, hear from heaven, forgive our sins and heal our land.

PROVIDING FOR CONSIDERATION OF H.R. 3394, CYBER SECURITY RESEARCH AND DEVELOPMENT ACT

(Mr. DIAZ-BALART, Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 343 and ask for its immediate consideration.)

The Clerk read the resolution, as fol-

lows:

H. RES. 343

Resolved. That at any time after the adop-
tion of this resolution the Speaker may, pur-

pose in clause 8 of rule XVIII. Amend-

dered on the bill and amendments thereto to

At the conclusion of consideration of the bill

the National Prayer Breakfast for

February 7, 2002

CONGRESSIONAL RECORD — HOUSE

February 7, 2002

Mr. Speaker, it disturbs me to think that the Energy Secretary is willfully ignoring the concerns of his own ex-

perts. Unless the DOE stops the Yucca

Mountain project when it comes time, there is no authority enforcing Mr.

Bartlett, an engineer who headed the Yucca Mountain project for the DOE

said that Yucca Mountain as a waste

repository is not reasonable in his view and should be put in mothballs. Former

senior DOE geologist Jerry Szymanski has found that an earthquake could

dramatically elevate the water table, poten-

tially flooding the repository.

The Nuclear Waste Technical Review Board and the GAO have also said that the DOE’s science is weak to moderate

and that recommendation is not pru-

dent or practical.

Mr. Speaker, it disturbs me to think that the Energy Secretary is willfully ignoring the concerns of his own ex-

perts. Unless the DOE stops the Yucca

Mountain project when it comes time, and Mr. Abraham is quoted saying that Yucca Mountain was a mistake, it will be too late for the American people.

PROVIDING FOR CONSIDERATION OF H.R. 3394, CYBER SECURITY RESEARCH AND DEVELOPMENT ACT

(Mr. DIAZ-BALART, Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 343 and ask for its immediate consideration.)

The Clerk read the resolution, as fol-

lows:

CONGRESSIONAL RECORD — HOUSE
specialists using off-the-shelf technology to attack U.S. information systems. The group of NSA specialists were able to attack and penetrate government and commercial sites.

The next year, failure of the Galaxy 4 communications satellite led to other demonstrations that a cyberattack could have on our information systems. The failure of Galaxy 4 disrupted credit card purchases, ATM transactions, 90 percent of the Nation's payers and emergency communications. Subsequently, it was decided that the United States is vulnerable to cyberattacks, not enough has been done to safeguard this sensitive information system.

This is of grave concern for the safety of the Nation. Just this past Tuesday it was reported that since September 11 there has been a series of cyberattacks that have targeted the Pentagon, the Department of Energy, NASA and other agencies, resulting in the theft of vast quantities of national secrets. One of the groups went as far as declaring a "cyber jihad" against the United States.

We need only look 90 miles off the coast of Florida to see the possibility of future attacks. Speaking to this past year the Director of the Defense Intelligence Agency testified before the Senate Permanent Select Committee on Intelligence that the Cuban regime could institute information warfare or computer network attacks that could seriously disrupt the United States military.

That regime, which is the only one of the seven states on the State Department's list of terrorist nations in our hemisphere, is believed to share information with other terrorist states such as Iran, Libya and Iraq. With its significant ties to fellow terrorist nations in the Middle East, the Cuban regime has the ability to serve as a type of forward operating location for terror in our hemisphere.

The potential for cyberwarfare is real, and the underlying legislation that we are going to address to date helps to address that threat. H.R. 3394 is a bipartisan piece of legislation designed to increase research efforts which are needed to fill the void in this critical area. The legislation will task the National Science Foundation and the National Institute of Standards and Technology to coordinate a partnership with academic institutions to ensure that information systems are secure in the United States.

This partnership will face the emerging threat by increasing the amount of cybersecurity research being supported by the Federal Government and by increasing the number of cybersecurity researchers in the Nation. The bill will provide $378 million over 5 years to implement new academic programs, provide grants and fellowships, providing for the emergence of our Nation's technological infrastructure.

The underlying legislation, as I stated before, is a product of bipartisan ship. It was reported out of the Committee on Science by voice vote. It is a very important bill that focuses on obviously a very important subject matter. As I stated before, Mr. Speaker, it is an open rule. It is a fair rule. I urge my colleagues to support both the rule and the underlying legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. HASTINGS of Florida. Mr. Speaker, I yield myself such time as I may consume and I thank the gentleman from Florida for yielding me the customary 30 minutes.

Mr. Speaker, I rise in support of the Cyber Security Research and Development Act and in support of the rule. I want to especially congratulate the Committee on Science chairman, the gentleman from New York (Mr. BOEHLEN), and the ranking member, the gentleman from Texas (Mr. HALL), for their very hard work on this bill and for their recognition of the importance to the country of the necessary investments in research that this bill funds.

Mr. Speaker, we all know that in 21st century America there is barely a thing that we do that does not involve the computer. From simple e-mail from a parent to a child in college, to computer-guided missiles that fall precisely on their targets, computers are the very backbone of our society today. Currently, the vulnerability of our Nation's technological lifeblood is a concern to the very backbone of our society today.

In college I was a science major, and I well know the importance of research and development in helping to solve this country's most difficult problems. I also had the distinct honor to serve in Congress on the Committee on Science, and I can tell you, Mr. Speaker, we have a serious problem on our hands, and it is up to the emerging scientists and engineers to fix it.

Why are they not doing it now? Because the Federal Government is not providing enough resources nor offering the proper incentives. This bill is a step forward to change this pattern for years to come.

For just a moment I want to discuss a portion of the bill relating to minority participation in the programs created by this bill. I was going to offer an amendment, and I shall not in light of discussions that I had with the Chair of the Black Caucus, and report language that seemingly covers some of what I had in mind.

In particular, I want to commend the Chair of the Congressional Black Caucus, the gentleguernian from Texas (Ms. EDDIE BERNICE JOHNSON), for her very hard work on this issue.

A report of the National Science Foundation reveals that blacks, Hispanics and Native Americans comprise 23 percent of the population, but earn on a whole only 14.2 percent of the bachelor's degrees, 8.1 percent of the master's degrees and 5 percent of the doctorate degrees in science and engineering. This bill gives the NSF and the National Institute of Standards and Technology the tools to correct the imbalances uncovered in their own studies showing, as throughout government, that minorities are being hired at a pace that they should, and that the process itself is so extraordinary that it makes it difficult for people to even accomplish the standards that are set forth.

Mr. Speaker, we are to ensure American security from terrorist threats, we will need to mobilize all of the human resources available. That includes minority Americans.

Again, I congratulate the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON), the gentleman from New York (Chairman BOEHLEN), the ranking member, the gentleman from Texas (Mr. HALL), and the rest of the Committee on Science for their recognition of that need and their attempts to address it.

Mr. Speaker, this is a necessary bill. It has earned the bipartisan support of the Committee on Science, and I would suggest that it deserves the same bipartisan support here on the floor of the House of Representatives.

Mr. Speaker, I yield back the balance of my time.

Mr. DIAZ-BALART. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker. I again reiterate my strong support for the underlying legislation, as well the rule before us.

Mr. Speaker, I have no further requests for time, I yield back the balance of my time, and I move the previous question on the resolution.

The SPEAKER pro tempore (Mr. SUNUNU). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes had it.

The vote was taken by electronic device, and there were—yeas 392, nays 0, not voting 43, as follows:

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 586. An act to amend the Internal Revenue Code of 1986 to provide that the exclusion from gross income for foster care payments shall also apply to payments by qualified placement agencies, and for other purposes.

The message also announced that the Senate has passed without amendment in which the concurrence of the House is requested, a joint resolution of the House of the following title:

H.J. Res. 82. Joint resolution recognizing the 91st birthday of Ronald Reagan.

The message also announced that the Senate has passed bills of the following titles in which the concurrence of the House is requested:

S. 1275. An act to amend the Public Health Service Act to provide programs for the prevention, treatment, and rehabilitation of stroke.

S. 1276. An act to amend the Public Health Service Act to provide grants for public access defibrillation demonstration projects, and for other purposes.

The message also announced that the Senate has passed bills of the following titles in which the concurrence of the House is requested:

S. 1274. An act to amend the Public Health Service Act to provide programs for the prevention, treatment, and rehabilitation of stroke.

S. 1275. An act to amend the Public Health Service Act to provide grants for public access defibrillation demonstration projects, and for other purposes.

The message also announced that the Senate has passed bills of the following titles in which the concurrence of the House is requested:

S. 1274. An act to amend the Public Health Service Act to provide programs for the prevention, treatment, and rehabilitation of stroke.

S. 1275. An act to amend the Public Health Service Act to provide grants for public access defibrillation demonstration projects, and for other purposes.

The message also announced that the Senate has passed bills of the following titles in which the concurrence of the House is requested:

S. 1274. An act to amend the Public Health Service Act to provide programs for the prevention, treatment, and rehabilitation of stroke.

S. 1275. An act to amend the Public Health Service Act to provide grants for public access defibrillation demonstration projects, and for other purposes.
the Nation’s ability to conduct research and educate students.

Similarly, the attacks of September 11 have turned our attention to the Nation’s weaknesses, and, again, we find our capacity to conduct research and to educate have to be enhanced if we are to counter our foes over the long run. No less than the Cold War, the war against terrorism will have to be waged in the laboratory as well as on the battlefield.

And I would add that I am pleased that the Committee on Science, which was created in response to the Sputnik launch, will help lead the effort to ensure our Nation’s laboratories are up to the challenge.

One of the most critical problems our Nation’s researchers need to focus on is how to protect our Nation’s computers systems and networks from attack. For a while, most Americans have been focused exclusively on the hijackings and the bombings and bioterrorism. The experts tell us that the Nation is also profoundly at risk from cyber terrorism. That is a new word that has entered our vocabulary, unfortunately, but it is one we have to be constantly aware of, and we have to prepare.

In fact, virtually all the tools of our daily lives are connected to and rely upon computer networks, a cyberattack could knock out electricity, drinking water and sewage systems, financial institutions, assembly lines, nations, and a host of activities. And it is just naming a few. We must improve our ability to respond to these threats, and our response must go beyond immediate defensive measures. That is not good enough.

We need to conduct the research and development necessary to make computers and networks much harder to break into and much less subject to damage when they are violated. That will require a focused, well-funded research and development effort in cybersecurity, something we are sorely lacking now.

In fact, expert witnesses at our Committee on Science hearings have described the current state of cyber security research as woefully underfunded, understaffed, timid, unimaginative and leaderless. That is not good enough. H.R. 3394 will change all of that.

Our bill capitalizes on the expertise of two well-run Federal agencies with historic links to both academia and in- dustry necessary to jump-start our cybersecurity efforts.

Under the bill the National Science Foundation will fund the creation of new cybersecurity research centers, undergraduate and master’s degree programs and graduate fellowships. The National Institute of Standards and Technology will create new program grants for partnerships between academia and industry, new postdoctoral fellowships and a new program to encourage senior researchers in other fields to work on computer security.

The result over the next several years will be to promote new research that produces innovative, creative approaches to computer security, to draw more researchers into the field, and to develop a cadre of students who will become the next generation of cybersecurity researchers.

This bill is focused, targeted, and it will be successful. As with the programs that were created in response to Sputnik, the programs in H.R. 3394 will ensure that we make the long-term investment in research and students needed to develop the tools that will protect our cyberattacks.

I want to emphasize, Mr. Chairman, that this bill will provide funding for a wide range of research, a range far larger even than the illustrative list that is even in the legislation. For example, research would include work on firewall and antivirus technology, vulnerability assessment, operations and control systems management, and management of the interoperable digital certificates.

I also want to note that in addition to providing funding and programming, this bill provides Federal leadership. The National Science Foundation will have the responsibility of making sure that the Nation’s overall research and educational enterprise is producing the knowledge in students we need to combat cyberterrorism.

I have been asked by some, “Cannot the private sector just take care of this?” Unfortunately, the answer is no. After the events of September 11, the private sector has little incentive to invest heavily in cybersecurity because the market is more concerned with speed and convenience. That is not my personal conclusion, that is what the industry leaders in cybersecurity have said in testimony before our committee.

In addition, we need to invest in our universities which will work with private industry to do the basic research needed to come up with radically new approaches to protecting our computer systems and to attract the students who will keep the field healthy in the future.

That is why H.R. 3394 is endorsed by leading industry groups including the National Association of Manufacturers, and the Information Technology Association of America, as well as a wide range of groups representing educational institutions.

The bill is designed to report, is also supported by the administration, which provided much guidance as H.R. 3394 moved through our committee.

So I urge my colleagues to follow the lead of the Committee on Science, which approved this bill without dissent. Years from now we will see H.R. 3394 as the measure that galvanized the Federal Government, industry and academia into eliminating the cybersecurity weaknesses that today threaten our economy and our basic public services. I urge support for this important bill.

Mr. Chairman, I reserve the balance of my time.

Mr. HALL of Texas, Mr. Chairman, I yield myself such time as I may consume.

(Mr. HALL of Texas asked and was given permission to revise and extend his remarks.)

Mr. HALL of Texas, Mr. Chairman, I rise in support of the Cyber Security Research and Development Act. It is a bill that committee has worked in a bipartisan manner, and I think it fills a very important gap in our current information technology research programs, namely the need for improved security for our computers and digital communication networks.

I, of course, congratulate and thank the Committee on Science chairman, the gentleman from New York (Mr. BOEHLERT). He has done a very good job of laying out the thrust of the bill, and I also thank him for his leadership and thank him for working so closely with me and with others on our side of the dock to bring this bill to this stage.

I also want to acknowledge the work of my colleague, the gentleman from Washington (Mr. BAIRD), a clinical psychologist before he came to the Congress, a man whose unusual ability and is knowledgeable about research and development. Actually, it was a provision pertaining to the National Institute of Standards and Technology, his provisions that originated in his bill that we have used in this bill.

Many systems that are vital to the Nation such as electric power grids, transportation and financial services, all of these rely on the transfer of information through computer networks.

The trend in recent years of interconnecting computer networks has had some unintended consequences, one of them being making access of these very critical systems easier for criminals and actually potentially easier for terrorists, and that is something that we are very aware of today.

As a result, there have been an increased number of assaults on network systems. Computer viruses, attacks by computer hackers, and electronic identification theft have become more common. The events of last fall, as the chairman stated, have made us all realize just how vulnerable we are to attack, and we now understand that we have to enhance the protection of the Nation’s physical and electronic infrastructure.

Mr. Chairman, H.R. 3394 establishes substantial new research programs also at the National Science Foundation and the National Institute of Standards and Technology. The goal of both of these multiyear programs is not only to conduct basic research but also to expand the community of computer security researchers.

These programs will support graduate students. They will support postdoctoral researchers and senior researchers, and encourage stronger ties between universities and industry.

The key to ensure information security for the long term is to establish a
vigorous and creative basic research effort focused on the security of networked information systems. H.R. 3394 will make a major contribution toward accomplishing this goal.

Mr. Chairman, I commend this measure to my colleagues and ask for their support and ask for its passage by this House.

Mr. Chairman, I reserve the balance of my time.

Mr. BOEHLERT. Mr. Chairman, I am pleased to yield 3 minutes to the distinguished gentleman from Michigan (Mr. SMITH), who is the chairman of the Subcommittee on Research of the Committee on Science and has been a leader in this overall effort.

Mr. SMITH of Michigan. Mr. Chairman, we learned from the September 11 attack and from the information gathered in Afghanistan to expect the unexpected.

Part of the new commitment to homeland security is improving the security of our Nation's computer and networking infrastructure. In the past decade this networking has been firmly embedded in our economy, and we have become more dependent on these technologies. Whether it is delivering agricultural products or supporting banking and financial markets, moving electricity along interconnected grids, providing government services or maintaining our national defense, we have become dependent on computer networks for our economic and national security.

The networks I think also are a potent symbol of our open society and free markets which thrive on the uninhibited flow of information. However, the technological advancement in computers and software and the networking and information technology which is a bill, H.R. 3394, which is coming before this body in the next several weeks, the potential threat of cyberattack is real and growing. Terrorists will always probe for our weakest points. We must remain vigilant and confront these real threats.

As we become even more dependent on computer networks and as terrorists become more technologically sophisticated, we should anticipate the possibility of attacks launched on cyberspace.

Computer viruses, computer hackers, electronic identification theft are just a few of the new challenges we face. What is needed is this bill, which moves forward with a comprehensive plan to address the growing linkages between national security and cybersecurity.

We need to engage the best minds in America to make us immune from these kinds of attacks.

H.R. 3394 provides for that. It authorizes research programs at the National Science Foundation and the National Institute of Standards and Technology to decrease the vulnerability of our computer systems and address emergency problems related to computer networking and infrastructure.

Mr. Chairman, I think it is very important that we have coordination among all government agencies in this effort, especially the military complex, if we are to be efficient, effective and if we are to succeed.

We need this kind of legislation to move ahead; and I just want to commend the gentleman from Texas (Mr. HALL), because under the chairmanship of Mr. HALL, I want to urge all my colleagues to support it.

Mr. HALL of Texas. Mr. Chairman, I yield the balance of my time to the gentleman from Washington (Mr. BAIRD), for purposes of control.

The CHAIRMAN. Without objection, the gentleman from Washington (Mr. BAIRD) will control the time.

There was no objection.

Mr. BAIRD. Mr. Chairman, I yield myself such time as I may consume.

I would like to begin by commending and thanking the gentleman from New York (Mr. BOEHLERT) and the gentleman from Michigan (Mr. SMITH) for their leadership on this matter. I am tremendously honored that they have chosen to include my computer security bill, which establishes a research and development program on computer and networking infrastructure, and I am pleased to report that the National Institute of Standards and Technology in today's bill.

The chairman's legislation will address long-term needs in securing the Nation's information infrastructure as well as securing or strengthening the security of networked computer systems of Federal agencies.

Because of September 11, focus and attention has been focused in an unprecedented way on increasing our security against terrorism. Today, security has to mean more than locking doors and installing metal detectors. In addition to physical security, virtual systems that are vital to the Nation's economy must be protected. Telecommunications and computer technology are targets from far away by enemies who can remain anonymous, hidden in the vast maze of the Internet. Examples of systems that rely on computer networks include the electric power grid, rail networks, and financial transaction networks.

I should commend the gentleman from New York (Mr. BOEHLERT), particularly, and former chair of the committee, the gentlewoman from Maryland (Mrs. MORELLA), for their foresight. September 11 they had both had the foresight to conduct numerous hearings on the issue of computer security. It is that kind of forward thinking that we need and now in the post-September 11 time have the opportunity to implement some of these measures that came forward in those hearings.

The vulnerability of the Internet computer viruses, denial of service attacks and defaced Web sites is well known. The general public. Such widely reported and indeed widely experienced events have increased in frequency over time. These attacks disrupt business and government activities, sometimes resulting in significant recovery costs. We have yet to face a catastrophic cyberattack thus far; but Richard Clarke, the President's new terrorism czar, has said that the government must make cybersecurity a priority or we face the possibility of what he termed a "digital Pearl Harbor."

Potentially vulnerable computer systems are largely owned and operated by the private sector, but the government has an important role in supporting the research and development activities that will provide the tools for protecting information systems. An essential component for ensuring improved information security is a vigorous and creative basic research effort, especially the military complex. Such lack of funding has resulted in the lack of a critical mass of researchers in the field and has severely limited the focus of research. The witnesses at the hearings advocated increased and sustained research funding from the Federal Government to support both expanded training and research on a long-term basis.

The chairman's bill will provide the resources necessary to ensure the security of business networks and the safety of America's computer infrastructure. I would like to thank the staff of the Committee on Science for their good work on this, as well as my own staff member, Brooke Jamison. I would urge all Members to support this important measure.

Mr. Chairman, I reserve the balance of my time.

Mr. BOEHLERT. Mr. Chairman, I am pleased to yield 3 minutes to the distinguished gentleman from Michigan (Mr. EHLERS), a scientist in his own right and a legislator of the first order. He is the chair of our key Subcommittee on Environment, Technology and Standards; and I am pleased to yield the time to him.

(Mr. EHLERS asked and was given permission to revise and extend his remarks.)

Mr. EHLERS. Mr. Chairman, I appreciate this opportunity to rise in support of H.R. 3394, a piece of legislation that is badly needed.

Many of the citizens of this land do not understand the broad dimensions of the problems of cybersecurity. I was privileged a few years ago to write a report for the cybersecurity of NATO parliamentary assembly but which was under the chairmanship of the gentleman from New York (Mr. BOEHLERT) at that time, and it was a real eye-opener to look into all of the dimensions of cybersecurity, both hardware and software.

On the hardware end, we are extremely vulnerable as a Nation in many ways, particularly to a high-level nuclear explosion, which would probably have no direct casualties but...
could wipe out most of the computers and microprocessors in this Nation.

This bill addresses primarily the other dimension of security and that is the software problem. We have been very fortunate as a Nation that most of the breaches of security that have taken place so far have been carried by hackers, pranksters and petty thieves; but we are extremely vulnerable in many other ways due to the proliferation of computers in our country, and I am not referring just to the proliferation of computers which have essentially invaded our homes, our businesses in numerous quantities. They are vulnerable in different ways; but any time one attaches a computer to a network, they are vulnerable to activities that take place on that network.

We have gained tremendously as a Nation through the use of computers and networks, but we have not taken account of the tremendous opportunities for breaches of security. It is essential that we train our people to deal with these; but above all, we must begin by doing more research in how we can deal with breaches of security. We know so little about it that we are at a disadvantage and we are at the mercy of the hackers, the pranksters, the thieves and, indeed, of other countries.

It is essential that this bill pass; that we begin the process of developing a superstructure and an infrastructure to deal with cybersecurity. We need more researchers, and we need more people who are capable of dealing directly with problems that occur.

We have heard mention of the electronic grid and other such things as this; but it can appear in much more minor ways, simply denial of service which costs our economy billions of dollars each year. Recently, I had a call from someone who had received an e-mail sent by way of a government department's computer. A hacker had gotten into that computer and used this government's agency computer to send out millions of e-mails to prevent service from major entities in this country.

So I urge that we join together and we pass this bill and also be sure to alert the American public of the nature of cyberterrorism, cybersecurity and that we deal with this problem.

Mr. BAIRD. Mr. Chairman, I reserve my time.

The CHAIRMAN. Without objection, the gentlewoman from Maryland (Mrs. MORELLA) will control the majority's time.

There was no objection.

Mrs. MORELLA. Mr. Chair, I am pleased to yield 2½ minutes to the gentleman from Illinois (Mr. WELLER).

Mr. WELLER. Mr. Chairman, I come to the floor and first want to commend the gentleman from New York (Mr. BOEHLENT) and the gentleman from Texas (Mr. HALL) for their bipartisan efforts to address an issue that is so very important to our Nation's economy and Nation's infrastructure.

We are at war today. We are at war against terrorism, and one of the lessons of September 11 is no more complacency. Clearly our Nation's IT infrastructure is one area where we historically have been very, very complacent; and as we work to win this war on terrorism and to strengthen our homeland security, and clearly this legislation, the Cyber Security Research and Development Act, is part of our efforts to strengthen our Nation's homeland security.

Our infrastructure is important. We use it in our everyday lives, whether it is our banking, insurance, our schools, our businesses, how we operate our utilities, and serve our Nation's infrastructure; and all of it is in jeopardy of a cyberattack.

All of us have learned, I believe, over the last several years the creativity of those who hack into our computer systems, those who create computer viruses for malicious destruction, in one of the ways, simply denial of service which costs our economy billions of dollars of damage and costs to our Nation as well as our global economy. Unfortunately, very little research and development has been conducted in this important area of homeland security, finding better ways to protect our Nation's information technology systems.

The private sector historically has little incentive to invest because the market emphasizes speed and convenience. Yet the Federal Government historically has not filled the gap. This legislation is important legislation and deserves bipartisan support and enlists our Nation's universities as well as research institutions to find solutions to protect and secure our Nation's IT infrastructure.

There is also more we need to do. I think we are all disappointed after the House passed an economic stimulus package that the accelerated depreciation component that this House passed was not included in action in the other body. The House passed the accelerated depreciation which would help our businesses and private sector also acquire the hardware and software to protect their IT systems will eventually be included in a stimulus package that we send to the President and get this economy moving again.

Mr. BOEHLENT. Mr. Chairman, I yield 4½ minutes to the distinguished gentlewoman from Maryland (Mrs. MORELLA), who is one of the leaders of the Committee on Science in so many areas, but particularly interested in this important area.

Mrs. MORELLA. Mr. Chairman, it is with great pleasure that I rise as a co-sponsor of H.R. 3394, and I thank the gentleman from New York (Mr. BOEHLENT) not only for his laudatory words but for his leadership as chairman of the Science Committee in crafting this legislation and providing for defense of the homeland, as well as enlisting the cooperation of academia, business interests, and providing for defense of the homeland, and we must also take steps to protect our virtual world.

As numerous hearings conducted in the House Committee on Science have shown, it is clear that we have two major problems in cyberspace. The first is that we have too little cybersecurity research being conducted by too few researchers and too few students to lead to the breakthroughs that we need. The second is quite simply too little computer networks have given us great freedom and access, they have also created a new vulnerability. Our reliance on these networks creates a potential threat and the economic and social consequences to an attack in cyberspace cannot be ignored. In the past few months, we have been confronted with a number of physical well-being and have taken numerous steps to plug the many holes in our society's lax security practices. However, along with securing our borders and providing for defense of the homeland, we must also take steps to protect our virtual world.

As is often the case with legislation between academia, business interests, and providing for defense of the homeland, we must also take steps to protect our virtual world.

As numerous hearings conducted in the House Committee on Science have shown, it is clear that we have two major problems in cyberspace. The first is that we have too little cybersecurity research being conducted by too few researchers and too few students to lead to the breakthroughs that we need. The second is quite simply too little computer networks have given us great freedom and access, they have also created a new vulnerability. Our reliance on these networks creates a potential threat and the economic and social consequences to an attack in cyberspace cannot be ignored. In the past few months, we have been confronted with a number of physical well-being and have taken numerous steps to plug the many holes in our society's lax security practices. However, along with securing our borders and providing for defense of the homeland, we must also take steps to protect our virtual world.

As numerous hearings conducted in the House Committee on Science have shown, it is clear that we have two major problems in cyberspace. The first is that we have too little cybersecurity research being conducted by too few researchers and too few students to lead to the breakthroughs that we need. The second is quite simply too little computer networks have given us great freedom and access, they have also created a new vulnerability. In the past few months, we have been confronted with a number of physical well-being and have taken numerous steps to plug the many holes in our society's lax security practices. However, along with securing our borders and providing for defense of the homeland, we must also take steps to protect our virtual world.
and government laboratories to further collaborative efforts. And it creates fellowships and scholarships to assure that we are training a sufficient number of new scientists to replace our current workforce and meet our future needs.

H.R. 1259 and H.R. 3394 represent two sides of the same cybersecurity coin. Implementation of current technology without inquiries into the next generation of countermeasures and best practices for research development without evaluation and use. Last session, the House overwhelmingly approved the first step toward protecting our virtual presence with the passage of 1259, and today I urge my colleagues to take the second. Research into cybersecurity is vital to the health of our Nation. This bill provides the necessary tools.

I look forward to its passage and to working with Chairman BOEHLERT and Ranking Member HALL, in getting both H.R. 1259 and 3394 through the Senate and into law.

Mr. BOEHLERT. Mr. Chairman, I yield 2 minutes to the gentleman from Virginia (Mr. GOODLATTE), the distinguished chair of the House Republican High Technology Working Group, cochair of the Congressional Internet Caucus, and a real leader in all aspects of information technology.

Mr. GOODLATTE. Mr. Chairman, I thank the chairman for his kind words, but I especially thank him for his leadership on this issue. I also thank the gentleman from Texas (Mr. HALL), the ranking Democrat; the gentleman from Texas (Mr. SMITH), the chairman of the Subcommittee on Crime, on which I serve; and the other coponsors of this legislation for their leadership in getting this done.

This is a serious problem in this country. We are vulnerable in many, many ways to cybercrime and cyberterrorism. This legislation will help to cure that problem. We are not doing enough in the area of research in this area. We are most certainly not doing enough in the area of producing enough people to work in government and in the private sector to make sure that the computer infrastructure of this country is protected against hackers and criminals and terrorists. This legislation is going to provide more resources for those colleges and universities and other institutions that do this research and train the people.

In this area, I have a university in my district, James Madison University, which has been identified by the National Security Agency as an institution of excellence in doing research and, more importantly, education in this area. But when they sit down to write the curriculum on how to prevent cybercrime, to teach people how to work for companies or the government in protecting that computer infrastructure, that curriculum does not even change on an annual basis, does not even change on a monthly basis. It changes on a weekly and daily basis as new information about viruses and other types of computer activity used by criminals and terrorists take place.

So I am strongly supportive of this legislation. I look forward to developing the country to educate people and provide the literally tens of thousands of new jobs we are going to need in this country in this field, and this legislation lays the groundwork. I commend the gentleman from New York and others for bringing this legislation, and I strongly urge my colleagues to support it.

Mrs. MORELLA. Mr. Chairman, I thank the gentleman from Virginia for his comments, and I yield 4 minutes to the gentleman from Texas (Mr. SMITH), Chair of the Subcommittee on Crime, who helped to author this bill.

Mr. SMITH of Texas. Mr. Chairman, I thank the gentlewoman from Maryland and my colleague for yielding me this time.

Mr. Chairman, I support this legislation that increases the cybersecurity networks at our universities, businesses, and national laboratories. The facts speak for themselves. Last month, the CERT Coordination Center at Carnegie Mellon University reported that breaches in security of computer systems more than doubled from the year 2000 to 2001: 52,000 incidents were reported in 2001, up from 22,000 the year before. By comparison, in 1995, the number of incidents reported was only 2,400.

Last spring, the Subcommittee on Crime, of the Committee on the Judiciary, that I chair, held a series of hearings on cybercrime. We heard testimony from local, State, and Federal officials, as well as individuals from the private sector. A common theme emerged: the demand for highly trained and skilled personnel to investigate computer crimes is tremendous.

This is compounded by the rapid advances in technology which make continual training an absolute necessity.

In this new age we must have training both for a new generation of cyberwarriors, whose most important weapon is not a gun but a laptop, and for private sector companies who must continually protect their Internet presence. This bill seeks to expand what many States and cities are already doing: investing in cybersecurity training initiatives.

Mr. Chairman, in my hometown, the University of Texas at San Antonio has established the Center for Information Assurance and Security, CIAS. The CIAS will be the hub of a city initiative to research, develop, and address computer protection mechanisms to prevent and detect intrusions of computer networks.

This collaborative effort of CIAS brings together the best and brightest from the public sector, such as the Air Force Information Warfare Center, Air Intelligence Agency, and the FBI. The private sector, with such cybersecurity companies as Ball Aerospace, Digital Defense, SecureLogix, SecureInfo, and Symantec, also are contributing to this effort.

With funding provided in this bill, UTSSA and dozens of other universities will be able to train the next generation of cyberwarriors, cyberdefenders, and what we call “white hat netizens.” This legislation supports the work at UTSA and other universities for students who want to pursue computer security studies.

While the benefits of the digital age are obvious, the Internet also has fostered an environment where hackers retrieve private data for amusement, individuals distribute software illegally, and viruses circulate with the sole purpose of debilitating computers. Mr. Chairman, a well-trained and highly skilled force of cyberprotectors is urgently needed, and I hope my colleagues will support this legislation.

Mr. BOEHLERT. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, as we wrap up this debate, I know a lot of people are wondering what is the big deal about cybersecurity; and my own wife, Marianne, who is frequently at the computer when I am home, says that we have to do a better job of explaining the importance of this, and she is absolutely right.

So much of what we do in this Nation is dependent upon the security of our computer systems. Everything is dependent upon computer technology today: our financial networks, our communication systems, our electric power grid, our water supply. The list goes on and on. If we have a 15-year-old hacker penetrate that system, that is mischief. But when we have a terrorist with a potential to penetrate that system and misuse it, that is serious business.

What we are about is very serious business: to train skilled people and to place emphasis on protecting our cybersystem in every way, shape, or manner. That is why I am so pleased that the administration has worked so well with us; that this Committee on Science has done what it does traditionally on a bipartisan basis, with people like the gentleman from Washington (Mr. BAIRD), the gentleman from Texas (Mr. HALL), and the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON) working with our side.

We are all in this together. We want to produce a product that is best for this Congress and best for America; and we have done so, and I am proud to be identified with it.

Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. BAIRD. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would just like to close as well by reiterating my thanks to Chairman BOEHLERT, Chairwoman MORELLA, Ranking Member HALL, as well as the committee staff.
Chairman BOEHLERT has stated it perfectly well: the American public often takes for granted our information infrastructure; but a coordinated attack on, for example, air traffic control, electrical power systems, or other major vital links in our information infrastructure, particularly if timed to coincide with a more conventional or even a more unconventional attack, could wreak havoc on our society and would clearly cost lives.

The importance of this bill cannot be overstated, and I commend the Chair and the ranking member for their leadership and appreciate the opportunity to work with them.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time for general debate has expired.

The bill shall be considered by sections as an original bill for the purpose of amendment, and pursuant to the rule, each section is considered read.

During consideration of the bill for amendment, the Chair may accord priority in recognition to a Member offering an amendment that he has printed in the designated place in the CONGRESSIONAL RECORD. Those amendments will be considered read.

The Clerk will designate section 1.

The text of section 1 is as follows:

H.R. 3394

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled:

SEC. 1. SHORT TITLE.

This Act may be cited as the “Cyber Security Research and Development Act”.

SEC. 2. FINDINGS.

The Congress finds the following:

(1) Revolutionary advancements in computing and communications technology have interconnected government, commercial, scientific, and educational infrastructures—including power, natural gas and petroleum production and distribution, telecommunications, transportation, water supply, banking and finance, health care, emergency and government services—in a vast, interdependent physical and electronic network.

(2) Exponential increases in interconnectivity have facilitated enhanced communications, economic growth, and the delivery of services critical to the public welfare, but have also increased the consequences of or prolonged failure.

(3) A Department of Defense Joint Task Force concluded after a 1997 United States information warfare exercise that the results of “clearly leave us and the government lacking for preparation for a coordinated cyber attack on our critical military and civilian infrastructure”.

(4) Computer security technology and systems implementation lack—

(A) sufficient long term research funding;

(B) adequate coordination across Federal and State government agencies and among government, academia, and industry;

(C) sufficient numbers of outstanding researchers in the field; and

(D) incentives for the design of commercial and consumer security solutions.

(5) Accordingly, Federal investments in computer and network security research and development must be significantly increased to—

(A) improve vulnerability assessment and technological and systems solutions;

(B) expand and improve the pool of information security professionals, including researchers, in the United States workforce; and

(C) better coordinate information sharing and collaboration among industry, government, and academic research projects.

SEC. 3. DEFINITIONS.

For purposes of this Act:

(1) the term “Director” means the Director of the National Science Foundation;

(2) the term “institution of higher education” has the meaning given that term in section 101(a)(1) of the Higher Education Act of 1965 (20 U.S.C. 1001).

SEC. 4. NATIONAL SCIENCE FOUNDATION RESEARCH.

(a) COMPUTER AND NETWORK SECURITY RESEARCH GRANTS.—

(1) IN GENERAL.—The Director shall award grants for basic research on innovative approaches to enhance computer and network hardware and software that are aimed at enhancing computer security. Research areas may include—

(A) authentication and cryptography;

(B) computer forensics and intrusion detection;

(C) reliability of computer and network applications, middleware, operating systems, and communications infrastructure; and

(D) privacy and confidentiality.

(2) MERIT REVIEW; COMPETITION.—Grants shall be awarded under this section on a merit-reviewed competitive basis.

(3) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the National Science Foundation to carry out this subsection—

(A) $35,000,000 for fiscal year 2003;

(B) $40,000,000 for fiscal year 2004;

(C) $46,000,000 for fiscal year 2005;

(D) $52,000,000 for fiscal year 2006; and

(E) $60,000,000 for fiscal year 2007.

(b) COMPUTER AND NETWORK SECURITY RESEARCH CENTERS.—

(1) IN GENERAL.—The Director shall award multiyear grants, subject to the availability of appropriations, to institutions of higher education (or consortia thereof) to establish multidisciplinary Centers for Computer and Network Security research; and

(A) the ability of the applicant to generate increased numbers of students to such programs in computer and network security; and

(B) the capacity of the applicant to attract and provide adequate support for undergraduate and graduate students and postdoctoral fellows to pursue computer and network security research; and

(C) the extent to which the applicant will partner with government laboratories or for-profit entities, and the role the government laboratories or for-profit entities will play in the research undertaken by the Center.

(2) APPLICATIONS.—The Director shall convene an annual meeting of the Centers in order to foster collaboration and communication between Center participants.

(3) USE OF FUNDS.—Grants awarded under this section shall be used for activities to—

(A) support the creation of new research laboratories or for-profit entities; and

(B) provide opportunities for faculty to conduct cutting-edge, multidisciplinary research in computer and network security.

(4) MERIT REVIEW; COMPETITION.—Grants shall be awarded under this subsection on a merit-reviewed competitive basis.

(5) CRITERIA.—In evaluating the applications submitted under paragraph (4), the Director shall consider, at a minimum—

(A) the ability of the applicant to generate innovative approaches to computer and network security and effectively carry out the research program;

(B) the experience of the applicant in conducting research on computer and network security and the capacity of the applicant to foster new multidisciplinary collaborations;

(C) the capacity of the applicant to attract and provide adequate support for undergraduate and graduate students and postdoctoral fellows to pursue computer and network security research; and

(D) postdoctoral fellows to pursue computer and network security research projects;

(E) providing opportunities for faculty to work with local or Federal Government agencies, private industry, or other academic institutions for activities that enhance the ability of an institution of higher education (or consortium thereof) to provide high-quality undergraduate and master’s degree programs in computer and network security and to recruit and retain increased numbers of students to such programs. Activities may include—

(F) establishing degree and certificate programs in computer and network security; and

(G) establishing collaborations with other academic institutions that seek to establish, expand, or enhance programs in computer and network security;
(G) establishing student internships in computer and network security at government agencies or in private industry;

(H) establishing or enhancing bridge programs or fellowship programs in computer security research and instructional capacity, and

(I) any other activities the Director determines will accomplish the goals of this subsection.

(4) SELECTION PROCESS.—(A) APPLICATION.—An institution of higher education (or a consortium thereof) seeking funding under this subsection shall submit an application to the Director at such time, in such form, and containing such information as the Director may require. The application shall include, at a minimum—

(i) a description of the applicant’s computer and network security research and instructional capacity, and in the case of an application from a consortium of institutions of higher education, a description of the role that each member will play in implementing the proposal;

(ii) a comprehensive plan by which the institution or consortium will build instructional capacity in computer and information security;

(iii) a description of relevant collaborations with government agencies or private industry that inform the instructional program in computer and network security;

(iv) a survey of the applicant’s historic student enrollment and placement data in fields related to computer and network security and a study of potential enrollment and placement for students enrolled in the proposed computer and network security program; and

(v) a plan to evaluate the success of the proposed computer and network security program and post-graduation assessment of graduate school and job placement and retention rates as well as the relevance of the instructional program to graduate study and to the workplace.

(B) AWARDS.—(i) The Director shall ensure, to the extent practicable, that grants are awarded under this subsection in a wide range of geographic areas and categories of institutions of higher education.

(ii) The Director shall award grants under this subsection for a period not to exceed 5 years.

(5) ASSESSMENT REQUIRED.—The Director shall evaluate the program established under this subsection no later than 5 years after the establishment of the program. In so doing, the Director shall evaluate the extent to which the grants achieved their objectives of increasing the quality and quantity of students pursuing undergraduate or master’s degrees in computer and network security.

(6) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the National Science Foundation to carry out this subsection—

(A) $1,500,000 for fiscal year 2003;

(B) $1,250,000 for fiscal year 2004;

(C) $1,250,000 for fiscal year 2005;

(D) $1,250,000 for fiscal year 2006; and

(E) $1,250,000 for fiscal year 2007.

(d) GRADUATE RESEARCH FELLOWSHIPS PROGRAM SUPPORT.—Computer and network security shall be included among the fields of specialization supported by the National Science Foundation’s Graduate Research Fellowships program under section 10 of the National Science Foundation Act of 1950 (42 U.S.C. 1862).
an application to the Director at such time, in such manner, and containing such information as the Director may require.

(b) Under this subsection, the Director shall periodically review the portfolio of research projects supported under the program established by subsection (a) during the 5th year of the program. Such review shall include an assessment of the scientific quality of the research, independence of the research results obtained to the goals of the program established under subsection (d)(3)(A), and the progress of the program in promoting the development of a substantial, national, academic research community working at the leading edge of knowledge in the field.

The Director shall submit to Congress a report on the results of the review under this paragraph no later than six years after the initiation of the program.

(f) Definitions.—For purposes of this section—

(1) the term ‘computer system’ has the meaning given that term in section 20(d)(1); and

(2) the term ‘institution of higher education’ has the meaning given that term in section 101 of the Higher Education Act of 1965 (20 U.S.C. 1001).

SEC. 9. COMPUTER SECURITY REVIEW, PUBLIC MEETINGS, AND INFORMATION.

Section 20 of the National Institute of Standards and Technology Act (15 U.S.C. 278g-3) is amended by adding at the end the following new subsection:

(1) by redesignating subsection (d) as subsection (e); and

(2) by inserting after subsection (c) the following new subsection:

(d) As part of the research activities conducted in accordance with subsection (b)(4), the Institute shall—

(1) conduct a research program to address emerging technologies associated with assembling a networked computer system from components while ensuring it maintains desired security properties; and

(2) carry out research and support standards development activities associated with improving the security of real-time computing and telecommunications systems for use in process control; and

(3) carry out multidisciplinary, long-term, high-risk research on ways to improve the security of computer systems.

SEC. 10. INTRAMURAL SECURITY RESEARCH.

Section 20 of the National Institute of Standards and Technology Act (15 U.S.C. 278g-6) is further amended by—

(A) in subsection (c), by striking subsection (d) and inserting in its place—

(1) conduct a research program to address emerging technologies associated with assembling a networked computer system from components while ensuring it maintains desired security properties; and

(2) carry out research and support standards development activities associated with improving the security of real-time computing and telecommunications systems for use in process control; and

(3) carry out multidisciplinary, long-term, high-risk research on ways to improve the security of computer systems.

SEC. 11. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Secretary of Commerce for the National Institute of Standards and Technology for the purposes of carrying out this section, $70,000,000.

Mr. BOEHLERT (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of the bill be printed in the Record and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. Are there any amendments to the bill?

If not, under the rule, the Committee directs—

Mr. FORBES, Mr. Chairman, I rise today in strong support of the Cyber Security Research and Development Act, which will help the United States reduce its vulnerability to cyberattacks by terrorists and criminal organizations.

Cyber attacks may not bring the large scale death and destruction of attacks by biological or chemical agents or other weapons of mass destruction, but they are just as real a threat...
to the American people. They hold the power to disrupt our way of life, harm people’s personal interests, and cause tremendous losses for businesses.

Computers have become increasingly ubiquitous. More than half of all American use the Internet at home, and a million people go online for the first time each month. Computer-based technology powers the way we bank, the way we shop, and the way we exchange information. And, this makes nearly every American vulnerable to cyber threats.

The Cyber Security Research and Development Act will reduce that vulnerability in two ways. First, it will improve our research efforts so that we can stop cyber terrorists before they strike. Too few of our most gifted minds are working on this area of research. The funding available in this bill will power partnerships between the government and academia to remedy this Second, H.R. 3394 will improve our education programs so that average Americans can spot threats and react quickly.

As a member of the Science Committee, I heard the testimony of research experts who indicated how great the threat is and how much could be achieved to defeat it if we dedicated ourselves to this goal. That is why I am pleased to be a cosponsor of this legislation, and I urge my colleagues to support it today.

Mr. RODRIGUEZ. Mr. Chairman, I rise today in support of H.R. 3394, the Cyber Security Research and Development Act. This bill would strengthen our nation’s ability to protect the critical infrastructure that supplies our water, keeps the electricity on in our homes, and ensures that our law enforcement officials can detect the critical infrastructure that supplies our nation. It will help protect our nation’s free from hackers, viruses and other forms of cyber terrorism.

This bill would provide the nation with needed research and development on cyber terrorism. Homeland security starts at the local level and this bill would allow communities throughout the United States to educate and train qualified information professionals in their community and encourage research that would give the government and private industry the tools to protect our nation’s critical infrastructure.

Ms. HART. Mr. Chairman, I rise today in support of H.R. 3394, the Cyber Security Research and Development Act. H.R. 3394, seeks to address the vulnerability of the computer systems and networks that have become a part of all our daily lives. It is all to clear to us, that we must be proactive and defend these systems from simple hackers to coordinated terrorist attacks.

At hearings last year in the Science Committee, we heard updates on research and development in that field. The news was sobering. The information we were provided was that too little research being conducted in this area, too few researchers were prepared to meet the needs of securing our systems, too few students going into fields relating to cyber security, and there was inadequate coordination between government, academia and industry. This must change and we have great resources in western Pennsylvania to help deliver these changes.

Carnegie Mellon University (CMU), just outside of my district, has been a leader in the field of cyber security. In 2001, the National Security Council named them as a “Center of Excellence in Security Education.” Also, the CERT Coordination Center, a government-fund computer security research team at CMU, helps to track the risks and frequencies of cyber crimes. According to the Center, there were 52,658 security breaches and attacks last year, up 50 percent from the previous year. The Center also got reports of 2,437 cyber vulnerabilities, more than double the figures from the previous year. While having success with students in the field of cyber security, they, too, have expressed that deficiencies exist for cyber security. This includes the lack of undergraduates and graduates who can provide the necessary research.

The “Cyber Security Research and Development Act” provides help for these areas by making grants available under National Science Foundation (NSF) for: research in innovative computer and network security; establishment of Centers for Computer and Network Security research in partnership with other universities; enabling universities to offer fellowships; and research in industry and other opportunities for doctoral degrees. H.R. 3394 also provides grants to the National Institute of Standards and Technology (NIST) for: support for high-risk, cutting edge research by academics working with industry; and for the establishment of a fellowship to increase the number of researchers in computer and network security.

This important legislation will provide us with the necessary investment in cyber security and needed support of existing resources, so that we are not without the necessary experts to protect our critical computer infrastructure from terrorist attacks.
Messrs. AKIN, HEFLEY and NORWOOD changed their vote from "yea" to "nay." So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for.

Mr. SOLIS. Mr. Speaker, during rolloc vote No. 13 on February 12, 2002, the voting machine malfunctioned and did not record my vote. Had it registered my vote, I would have voted "yea."

THE JOURNAL

The SPEAKER pro tempore (Mr. PICKERING), pursuant to clause 8 of rule XX, the pending business is the question of the Speaker's approval of the Journal.

The question is on agreeing to the Speaker's approval of the Journal of the last day's proceedings.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. KOLBE. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The roll call vote was taken by electronic device, and there were—ayeis 363, noes 33, answered "present" 1, not voting 38, as follows:

[Roll No. 14]
Mr. ARMEY. Mr. Speaker, I thank the gentlewoman for her reiteration of that.

Now, we are planning to complete final passage on campaign finance reform on Wednesday, or go over until Thursday, if necessary?

Mr. ARMEY. Mr. Speaker, the gentlewoman again is correct. We hope we can complete that work on Wednesday night. I think the Members should be prepared to work on that bill on Thursday.

Ms. PELOSI. If we complete action on campaign finance reform on Wednesday, will there be any votes on Thursday?

Mr. ARMEY. Mr. Speaker, if the gentlewoman will continue to yield, if we complete our work on Wednesday night, we would probably have to start our district work period on Thursday and get Members home a day early.

Ms. PELOSI. Therefore, one would infer from the gentleman’s remarks that even if we complete campaign finance reform on Thursday, there would be no other business that day?

Mr. ARMEY. That is correct.

Ms. PELOSI. If we go into Thursday. Mr. ARMEY. If the gentlewoman would yield further, the gentleman from California (Mr. DREIER) has just reminded me that Thursday is Valentine’s Day, and, given his many romantic interests, he needs the entire day to deliver valentines.

Mr. DREIER. Mr. Speaker, I object.

Ms. PELOSI. Mr. Speaker, finally, as the distinguished majority leader knows, we are in an economic recession, and millions of workers have lost their jobs. The Senate has completed action on 12 weeks of extended benefits for these workers. When will the majority schedule that bill for House consideration?

Mr. ARMEY. Mr. Speaker, I thank the gentlewoman for the inquiry, and I understand her concern about all the difficulties people have being out of work. That, of course, is why we have sent two real economic stimulus bills that really would have created real jobs for thousands of American citizens and we really are disappointed that the Senate, under Senator DASCHLE’s leadership, could do nothing but send back the benefit extensions. We have that under consideration.

Mr. ARMEY. That is still the continuing hope of many of us that perhaps we might send back something that would actually, in fact, do something to help people go back to work, and that perhaps with Senator DASCHLE’s meager beginning in this area, he might be able to bring more substantive legislation to his body.

So I cannot at this point give a definitive answer.
It is our hope that we could perhaps build on this little beginning from the other body and achieve some substantive legislative results in this very important area of public policy.

PARLIAMENTARY INQUIRY

Ms. PELOSI. Mr. Speaker, I wish to respectfully point out that the actions in the Senate, but it is my understanding that the House rules forbid us from addressing any individual in the Senate or in the manner it was brought up here. Is that not correct, Mr. Speaker?

The SPEAKER pro tempore (Mr. LATOURETTE). Is the gentlewoman making a parliamentary inquiry?

Ms. PELOSI. Yes, I am.

The SPEAKER pro tempore. The rules of the House present Members from characterizing either action or inaction by a Senator or by the other body.

Ms. PELOSI. I thank the Speaker for that clarification.

Mr. Speaker, your word to the majority leader, I think that if the package he was talking about was this job creation package is the one that gave $250 million back to Enron retroactively, then I think the public will understand that is something that was unacceptable in a bipartisan way in this body.

I hope that we will be able to find bipartisan relief for those who have been caught in this recession, and the very least that we can do before we go off on a 13-day break is to complete action on 13 weeks of extended benefits for the workers, as the other body has done. I urge the majority to consider doing that next week before we leave.

Mr. ARMEY. Mr. Speaker, I thank the gentlewoman. My final response would be that if indeed it was the volition of this body to do only the very least we can do, we would, in fact, take up the very least that was done by the other body. But it is our hope we can improve on that and actually do something that would be of real value in the real lives of really unemployed American citizens. We do not believe that we should content ourselves with doing only the very least we can do.

So we will try, in fact, to do something more, put together a bill that could be beneficial in people's lives, and hope that the other body could find some way to deal with it in a manner that would look something like legislative effectiveness.

Ms. PELOSI. Mr. Speaker, reclaiming my time, it may seem the least that we can do, but if you are out of work, these 13 weeks extended benefits make all the difference in the world. I agree we are doing much more.

In a matter of hours, maybe 72, of the tragedy in New York, we bailed out the airlines. That was important, it was necessary, and we had to do that. We did it with a promise, though, that relief for the workers in that industry would be on the way soon. Now we are months later, indeed into a new year, a new session of Congress, and we still do not see action on behalf of the workers who lost their jobs, while we put billions in relief for the industry.

I further urge what may seem like the least, I am not talking about this as the total package, but as an absolute emergency measure for these families caught in this recession. I continue to urge the majority to take up the Senate bill ASAP, certainly before we go out on a 13-day break.

Mr. Speaker, I thank the distinguished majority leader for his information on the schedule.

□ 1215

ADJOURNMENT TO TUESDAY, FEBRUARY 12, 2002

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that when the House adjourns on Friday, February 8, 2002, it adjourn to meet at 12:30 p.m. on Tuesday, February 12, for morning hour debates.

The SPEAKER pro tempore (Mr. LATOURETTE). Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR

WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENT PROCESS FOR CONSIDERATION OF H.R. 1542, INTERNET FREEDOM AND BROADBAND DEPLOYMENT ACT OF 2001

(Mr. DREIER asked and was given permission to address the House for 1 minute.)

Mr. DREIER. Mr. Speaker, today, a “Dear Colleague” letter was sent to all Members notifying them of an amendment filing deadline of 4:00 p.m., Monday, February 25, for Members wishing to offer amendments to H.R. 1542, the Internet Freedom and Broadband Deployment Act of 2001, which the distinguished majority leader just mentioned.

Any Member who wishes to offer an amendment should submit 55 copies of the amendment and one copy of a brief explanation of the amendment by 4 p.m. on Monday, February 25, to the Committee on Rules upstairs in room H–312 in the Capitol.

Amendments should be drafted to the text of the bill as reported by the Committee on Energy and Commerce, which is available on the Web sites of both the Committee on Energy and Commerce and the Committee on Rules.

Members should use the Office of Legislative Counsel to ensure that their amendments are properly drafted and should check with the Office of the Parliamentarian to be certain that their amendments comply with Rules of the House.

SUPPORT HATE CRIMES LEGISLATION

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, because of Enron hearings regarding the situation dealing with the Enron collapse, I will not be able to join my colleagues in advocating for a very important legislative initiative. I am here to enthusiastically support the gentlewoman from California (Ms. WOOLSEY) as we look to pass the Local Law Enforcement Hate Crimes Prevention Act of 2002, and the gentleman from Michigan (Mr. CONYERS), the ranking member of the Committee on the Judiciary.

Just this week we had an individual in my community who may have been viewed as being different and was murdered, and we are still looking to determine who killed Hugo Cesar Barajas and how he was killed, because he was different and because he had a different lifestyle. We must believe in everyone and support human dignity. I have asked for this to be investigated as a hate crime.

Mr. Speaker, this legislation is imperative. We must pass this legislation now to provide dignity to all in this Nation.

HONORING DALE THOMPSON FOR TEN YEARS OF SERVING THE COMMUNITY OF FORT BAPTIST CHURCH IN FORT SMITH, ARKANSAS

(Mr. BOOZMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOOZMAN. Mr. Speaker, I rise today to honor a distinguished Member of the Northwest Arkansas community, Pastor Dale Thompson.

Dale Thompson is in the beginning of his 10th year of service at the First Baptist Church in Fort Smith, Arkansas. At the age of 15, Dale began preaching and was ordained to the gospel ministry in 1971 after graduating from Oklahoma Baptist University. While serving his first pastorate, Dale continued his studies and received his masters of Biblical Arts from Luther Rice University.

Dale has been helping people for the past 25 years as a pastor in Arkansas and Oklahoma; and since 1974, he has ministered at churches in the third district of Arkansas. He has served as a member of the executive board of the Arkansas State Convention and is the
past president of the Pastors Conference of the Arkansas Board of Trustees of Southeastern Baptist Theological Seminary in Wake Forest, North Carolina.

Dale is currently serving the community as the pastor of the 6,000-member First Baptist Church in Fort Smith. Since his tenure at the church began 10 years ago, the church has grown by 2,451 members. This number is sure to continue to grow as long as Pastor Thompson remains actively involved in his community.

Mr. Speaker, I thank my colleagues for allowing me the opportunity to honor Dale Thompson. He is a committed servant and deserves our praise.

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker’s announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

H.R. 1343, THE LOCAL LAW ENFORCEMENT HATE CRIMES PREVENTION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. WOOLSEY) is recognized for 5 minutes.

Ms. WOOLSEY. Mr. Speaker, I rise today in the wake of the Republican leadership to bring the Conyers bill, H.R. 1343, the Local Law Enforcement Hate Crimes Prevention Act, to the House floor. Congress must take action against crimes that are motivated by hate. That is why I organized these speeches today to promote H.R. 1343. I appreciate all of my colleagues who have taken their precious time to come down to the House floor to join in on this discussion.

Hate crime offenses are more serious than comparable crimes that do not involve prejudice, because they are intended to intimidate an entire group. These crimes have a particularly damaging effect on victims, their families, and the communities they are part of. Victims oftentimes feel powerless, isolated, depressed and suspicious. Fear is another pervasive victim response, fear for their personal safety and for the safety of their families.

Family members share some of the long-term effects of hate crime victims. They may feel guilty for not protecting their family member who has been victimized. Like those actually targeted by the hate crimes, families may feel isolated or helpless. Their effectiveness on the job or at home or in school is also affected. When the perpetrator is arrested and convicted, but not given a full consideration and a harsh penalty, families actually lose faith in the justice system. Light sentencing may also cause further disillusionment.

In addition to the psychological effects hate crimes have on families, Mr. Speaker, there are particular concerns as well depending on the crime and there may be repair bills or medical bills or funeral expenses. Trials and court appearances can prolong the grieving process, as can parole hearings. If there is media coverage of a hate crime, a family may find itself dealing publicly with intensely personal issues.

Currently, the Justice Department’s civil rights division lists nine killings across the country as possible hate crime incidents in terrorist attacks on September 11. Many families of post-September 11 murder victims believe that police are reluctant to recognize and pursue hate crimes, which is a complaint that African American victims have made for years. These outrages from victims and their families signal that hate crimes need to be taken more seriously.

It is unbelievable that Congress has yet to pass significant legislation that will strengthen hate crimes law. And it is unbelievable that when there is a bill already crafted that would elevate hate crimes law that Congress has the opportunity to debate, it has not been brought to the House floor.

Mr. Speaker, I support the Conyers Local Law Enforcement Hate Crimes Protection Act because it would offer real solutions by strengthening existing Federal hate crimes law. This legislation allows the United States Department of Justice to assist in local prosecutions, as well as investigate and prosecute cases in which violence occurs because of the victim’s sexual orientation, disability, or gender. H.R. 1343 would also eliminate obstacles to Federal involvement in many cases of assault or murder based on race or religion.

Mr. Speaker, this bill is too important to ignore as families across our country continue to fall victim to hate crimes. We have over 200 bipartisan Members of the House of Representatives who have signed on to H.R. 1343, and we ask the leadership to bring this issue before the House to show Americans that hate crimes are taken seriously.

This Congress has a responsibility to fight against hate and this bill will provide that commitment. I look forward to hearing the rest of my colleagues on this issue.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. GANSKE) is recognized for 5 minutes.

(Mr. GANSKE addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CONYERS) is recognized for 5 minutes.

Mr. CONYERS. Mr. Speaker, the Conyers-Woolsey hate crimes bill is approaching that critical mass where we will soon have the 218 votes. This Special Order is generated to pick up the last dozen cosponsors that we would like to have to have the bill brought forward as quickly as possible.

The Members will recall that there has been hate crimes legislation since 1968, and what we do is take away some of the restrictions which would prevent us from bringing in Federal jurisdiction to aid local law enforcement. This bill does not supplant the law enforcement at the local level. We assist them in working in a cooperative spirit with them.

Particularly, we take away the existing Federal jurisdictional requirements that a Federal act is impeded upon as a result of the incident. For example, voting, interstate commerce, or some other Federal nexus is required to trigger the bill under its current legal status. What we do is to say for crimes of gender, sex, sexual orientation, we remove a Federal requirement because a hate crime is a hate crime whether there is a Federal nexus or not.

Many States have hate crimes legislation, except for the fact that 21 of them are admittedly very weak. Five States have none at all. What we are doing is in the wake of September 11, we remove this to say that there has been a dramatic increase of hate crimes activity. The lawyers on the Committee on the Judiciary have discovered with the Council for Islamic Relations that there are nearly 1,500 reported cases, frequently of people who mistook American descent and were not, but they were clearly crimes that would fall into this category that we find so offensive.

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Texas (Ms. JACKSON-LEE) is recognized for 5 minutes.

(Ms. JACKSON-LEE of Texas addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mrs. JONES) is recognized for 5 minutes.

(Mrs. JONES of Ohio addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

BRINGING TO HOUSE FLOOR H.R. 1343, THE LOCAL LAW ENFORCEMENT HATE CRIMES PREVENTION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. CLAY).

Mr. Speaker, the Conyers-Woolsey hate crimes bill is approaching that critical mass where we will soon have the 218 votes. This Special Order is generated to pick up the last dozen cosponsors that we would like to have to have the bill brought forward as quickly as possible.

The Members will recall that there has been hate crimes legislation since 1968, and what we do is take away some of the restrictions which would prevent us from bringing in Federal jurisdiction to aid local law enforcement. This bill does not supplant the law enforcement at the local level. We assist them in working in a cooperative spirit with them.

Particularly, we take away the existing Federal jurisdictional requirements that a Federal act is impeded upon as a result of the incident. For example, voting, interstate commerce, or some other Federal nexus is required to trigger the bill under its current legal status. What we do is to say for crimes of gender, sex, sexual orientation, we remove a Federal requirement because a hate crime is a hate crime whether there is a Federal nexus or not.

Many States have hate crimes legislation, except for the fact that 21 of them are admittedly very weak. Five States have none at all. What we are doing is in the wake of September 11, we remove this to say that there has been a dramatic increase of hate crimes activity. The lawyers on the Committee on the Judiciary have discovered with the Council for Islamic Relations that there are nearly 1,500 reported cases, frequently of people who mistook American descent and were not, but they were clearly crimes that would fall into this category that we find so offensive.

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Texas (Ms. JACKSON-LEE) is recognized for 5 minutes.

(Ms. JACKSON-LEE of Texas addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mrs. JONES) is recognized for 5 minutes.

(Mrs. JONES of Ohio addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)
So what we are saying is now is the time as we move forward in a democratic way under a semi-war circumstance that we make these final improvements to the bill, and we are hoping that it can be done as expeditiously as possible.

My thanks to the gentlewoman from California (Ms. WOOLSEY), for her indefatigable efforts in this; and I am very proud that she is working with us.

Mr. Speaker, I yield to the gentleman from Missouri (Mr. CLAY).

Mr. CLAY. Mr. Speaker, let me thank the gentlewoman from Michigan (Mr. CONyers) for his leadership on this issue. We certainly appreciate his leadership and sponsorship of the bill.

Mr. Speaker, I rise in strong support of H.R. 1343, the Local Law Enforcement Hate Crimes Prevention Act. Consideration of this bill is long overdue, and its passage is absolutely critical. I urge the House Republican leadership to allow the bill to come to the floor for a vote.

H.R. 1343 gives law enforcement officers at all levels of government the tools they need to deal with these terrible acts of hate-based violence. This legislation also sends a message to the world that crimes committed against people because of who they are or what they believe are particularly evil and particularly offensive and will not be tolerated in this country.

These types of crimes are committed not just against individuals, not just against a single person, but against society and against all Americans. These crimes are not only meant to hurt the unfortunate individual who falls victim to such acts, but they are also meant to intimidate, harass, and menace others who were not directly attacked.

A few years ago a man filled with hate shot up a Jewish community center in Los Angeles, wounding children and teachers in a place that was supposed to be a protective sanctuary for children. As the capture of the man said he had shot at those children because he wanted to send a message. He said he wanted to send a wake-up call to America to kill Jews.

By passing this bill we will be rejecting such messages and committing the full measure of our justice system to ending such hateful violence.

The SPEAKER pro tempore (Mr. LA TOURTE). The gentleman's time has expired.

ORDER OF BUSINESS

Mr. CONYERS. Mr. Speaker, may the gentleman from Missouri (Mr. CLAY) exercise now that he had under his own name in his own right?

The SPEAKER pro tempore. It would be the Chair's normal course to go to the Republican side of the aisle; but if there is no objection, the gentleman is on the floor for 5 minutes.

Is there an objection to the gentleman from Missouri (Mr. CLAY) to have his 5 minutes right now?

There was no objection.

HATE CRIMES PREVENTION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. CLAY) is recognized for 5 minutes.

Mr. CLAY. Mr. Speaker, this bill also honors the memory of James Byrd, who was horrifically dragged to his death behind a pickup truck simply because his killer did not like the color of his skin. It honors Matthew Shepherd, who was beaten and tied to a fence post and left to die in near freezing weather because he was gay. It honors not only the victims of high-profile crimes, it honors the thousands of people whose lives have been scarred by similar acts of hate and violence.

Hate crimes legislation is not a partisan issue. It is not about political posturing. It is not about us versus them. This is an issue that transcends politics.

I urge the House leadership to allow a vote on this important measure, and I urge all of my colleagues to support H.R. 1343.

Mr. Speaker, at this time I would like to yield the balance of my time to the gentlewoman from California (Ms. WATSON).

Ms. WATSON of California. Mr. Speaker, I stand in support of H.R. 1343, the Local Law Enforcement Hate Crimes Prevention Act. I am so pleased to see that this issue is coming up to the forefront here nationally.

In California we worked long and hard and had a task force that looked at hate crimes up and down the State. We compiled valuable information that assists law enforcement in identifying hate crimes and enforcing the law.

The events of September 11 have continued to demonstrate the destructive power of hate to tear apart the unity of America. In the wake of the terrorist attacks, the Arab American Anti-Discrimination Committee has investigated, documented and referred to Federal authorities over 500 instances.

Moreover, the Council on American-Islamic Relations has compiled over 1,400 complaints of hate attacks directed against American Muslims. This is a 51 percent increase in reported crimes.

These instances include the murders of a Muslim Pakistani store owner in Dallas, Texas, and Indian American gas station owner in Mesa, Arizona, where a suspect was arrested shouting, "I stand for America all the way."

The Department of Justice, however, has opened only approximately 250 investigations of hate crimes directed against institutions or people who appeared to be Arab or Middle Easterners. September 11 and the Arab American situation only represents the tip of a proverbial iceberg.

Hate crimes against any group requires education and enforcement decisions. This loophole is particularly significant given the fact that five States have no hate crime laws on the books, and another 21 States have extremely weak hate crimes laws. H.R. 1343 will remove these hurdles so the Federal Government will no longer be handicapped in its efforts to assist in the investigation and prosecution of hate crimes.

KLAMATH BASIN TRAGEDY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. HERGER) is recognized for 5 minutes.

Mr. HERGER. Mr. Speaker, each of us remembers last summer's dramatic national headlines about the several Federal biologists who turned off 100 percent of the water to hundreds of family farmers in the Klamath Basin of northern California and southern Oregon and shut down an entire community.

This week the National Academy of Sciences, perhaps the most highly respected scientific body in this country, has concluded, quote, "There was no scientific or technical information to justify that decision." Let me repeat that statement, Mr. Speaker. There was no scientific or technical information to justify the decision that stripped 1,500 family farmers of their livelihoods, drove a community of 70,000 to the brink of economic collapse, and caused irreparable social harm and changed the lives of thousands of people forever.

All of this was done, Mr. Speaker, because the U.S. Fish and Wildlife Service and the National Marine Fisheries Service biologists merely theorized that withholding water deliveries would benefit the fish. There were no certain facts to back up those theories. There was no hard evidence, no historical proof, only guesswork. In fact, the historical proof told them the opposite, but they consciously chose to ignore it.

And the steps they said had to be taken, the Academy's report tells us, are probably harmful.

How could the Academy have reached such a vastly different conclusion? Because, Mr. Speaker, the Klamath Basin tragedy is nothing short of scientific sabotage. The radical environmentalists have hijacked the Endangered Species Act, a well-meaning species protection measure, using it as a political tool, a bludgeon against rural Americans to advance a radical political agenda.
lands and the greatest snow on Earth. 

Visitors from across the globe will be welcome to Utah. 

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Utah (Mr. MATHESON) is recognized for 5 minutes.

Mr. Speaker, I stand today to plead with my colleagues that they take a hard look at how the Endangered Species Act is being used as a political tool, and to recognize that it is no longer working as a species protective tool. Many of us have long observed this happening. 

This week’s National Academy of Sciences study lends incredible proof for the Nation to see. Our farmers must be made whole for the economic losses that they have sustained. The administration must act immediately to ensure full water deliveries. We must also demand updates in the law that will ensure the greatest level of safety possible during the Olympic Games. Utah will welcome the world with its preparation and security.

In every preparation, the Olympic efforts have not been accomplished by one individual. They have taken the sacrifice and dedication of all the citizens of Utah, but in the end, they will not be Utah’s games. They will be America’s games. It will be the triumph of our Nation that in the face of great tribulation we did not shrink; we did not fear to go forward in the effort. We demonstrated great courage by pressing on and opening our hearts and our country to the world. America will welcome the world with its unity and resolve.

As the Winter Olympic Games for 2002 have taken on a particular significance as a symbol of global unity and peace, the moral value of the games has become apparent. In order to protect the value and integrity of such international competitions, and of amateur athletics in general, we must not allow the practices like the use of performance-enhancing substances to tarnish the spirit of such significant events. We should expect, in fact we should demand, that Olympic athletes, that all athletes, compete free of performance-enhancing substances.

ELIMINATING INCOME TAX ON UNEMPLOYMENT COMPENSATION BENEFITS

The SPEAKER pro tempore (Mr. LATOURRETE). Under a previous order...
of the House, the gentleman from Pennsylvania (Mr. GEKAS) is recognized for 5 minutes.

Mr. GEKAS. Mr. Speaker, yesterday, I introduced a piece of legislation that would have the result of eliminating income taxation of unemployment compensation benefits. Since 1986 that had been a part of the tax structure of our country, that even those who have lost their jobs and have received and started to receive unemployment compensation benefits would have had to include those benefits in their gross income for tax purposes.

My bill would eliminate that from now on. Actually the bill would call for elimination of tax on unemployment benefits starting retroactively to January of 2001 so that the entire tax year of 2001 would be one in which there would be no income tax applicable to unemployment compensation benefits. This has the happy circumstance and coincidence of also covering all the people who lost their jobs after September 11, and we know what happened to the economy as a result of that terror jolt that happened across the world.

So here we have a prospect of eliminating a vexatious tax, and it has some admirable consequences. Number one, it fits in perfectly with President Bush’s first announced support of extending unemployment compensation, which is going to occur, we are sure. Secondly, it is consistent with his desire to cut taxes as an economic stimulus tool. So here we have perhaps just a modest number of dollars that will remain in the pockets of our unemployed; but that in itself, that modest amount, can act as additional wherewithal for an unemployed person to use for his family, so that the tax cut that is employed also acts as an economic stimulus. So we have the best of all worlds.

The bill standing by itself, I aim to make a subject of a “Dear Colleague” to entertain such co-sponsors as possible; but I have a larger scenario in mind. The other body has passed, we believe, an unemployment compensation extension of 13 weeks to the current system of unemployment comp. When that reaches the House, I aim to add or try to add my bill as an amendment to the extension of unemployment benefits and thus be able to complete the entire issue in one fell swoop.

This unemployment compensation benefit tax cut, as I want to call it, should meet with approval from every sector of our economy and from our employer base and from our IRS operatives as well. This will be better way that some of the people in which they are engaged can be eliminated and proper credit be given to unemployment compensation benefits.

One other note, Mr. Speaker. If this should not pass and become law before April 15, it means that the tax paid for the year 2001 would not be able to include credit for the taxes paid by unemployed people on their benefits.

We have the pure understanding that if it passes after April 15 the individuals who can benefit from this could file an amended return; and thus we are sure that whatever reduction in their tax would be applicable for the year 2001 would be garnered by them whether it is passed before April 15 or after April 15.

I invite my colleagues on both sides of the House to join with me in this effort to rid the unemployed from a vexatious and unfair tax. It is simply unfair and is part of the practice of taxing unemployment compensation benefits.

STIMULATING THE ECONOMY

The SPEAKER pro tempore. Under the Speaker’s announced policy of January 3, 2001, the gentleman from Texas (Mr. PAUL) is recognized for 60 minutes as the designee of the majority leader.

Mr. PAUL. Mr. Speaker, dealing with the slumping economy will prove very bit as challenging to the Congress as fighting terrorism. No one challenges the need to protect American citizens from further terrorist attacks, but there is much debate throughout the country as to how it should be done and whether personal liberty here at home must be sacrificed.

Many are convinced that our efforts overseas might escalate the crisis and actually precipitate more violence. A growing number are becoming concerned that our efforts to preserve security will result in the unnecessary sacrifice of that which we have pledged to protect, our constitutionally protected liberty.

A similar conflict also exists once government attempts to legislate an end to a recession. In the 1970s, wage and price controls were used to suppress inflation and to help the economy without realizing the futility of such a policy. Not only did it not work, the economy was greatly harmed. Legislation per se is not necessarily harmful; but if it reflects bad policy, it is.

The policy of wage and price controls makes things worse and represents a serious violation of people’s rights. Today, we hear from strong advocates of higher taxation, increased spending, higher budget deficits, tougher regulations, bailouts and all kinds of subsidies and support programs as tools to restore economic growth. The Federal Reserve recognized early on the severity of the problems, and over the past year lowered short-term interest rates in an unprecedented 11 times, dropping the Fed funds rate from 6% percent to 1%.

This has not helped, and none of these other suggestions can solve the economic problems we face either. Some may temporarily help a part of the economy, but the solution to restoring growth lies not in more government but less. It is precisely too much government and especially manipulation of credit by the Federal Reserve that precipitated the economic downturn in the first place.

Increasing that which caused the recession cannot possibly at the same time be the solution. The magnitude of the distortions of the 1980s brought on by artificially low interest rates orchestrated by the Fed on top of 30 years of operating with a flat currency worldwide suggests that this slow down will not abort quickly. The Japanese economy has been in a slump for over 10 years and shows no signs of recovery.

The world economies are more integrated than ever before. When they are growing, it is a benefit to all; but in a contraction, globalization based on flat money and an international government assures that most economies will be dragged down together. Evidence is abundant that most countries of the world are feeling the pressure of a weakening economy.

Many of our political and economic leaders have been preaching that more consumer spending can revitalize the economy. This admonition, of course, fails to address the reality of a record high $7.5 trillion, and rising, consumer debt. “Today a party, tomorrow an economic hangover” has essentially been our philosophy for decades; but there is always a limit to deficit spending, whether it is private or government. And, the short-term benefits must always be paid for in one form or another later on.

Those who felt and acted wealthy in holding the dot-com and Enron stocks were brought back to earth with a shattering correction. There is a lot more of this type of correction yet to come in the financial sector. In recessions, to remain solvent consumers ought to tighten the belts, pay off debt and save. In a free market, this would lower interest rates to once again make investments attractive.

The confusing aspect of today’s economy is that consumers and even businesses continue profligate borrowing in spite of the problems. Interest rates, instead of rising, are pushed dramatically downward by the Federal Reserve creating massive amounts of new credit. This new credit, according to economic law, must in time push the value of the dollar down and general prices up. When this happens and the dollar is threatened on exchange markets, the cost of living is pushed sharply upward. The Federal Reserve is then forced then to raise interest rates, as they did in 1979, when the rates hit 21 percent.

Even before any need to tighten, interest rates may rise or not fall as expected. This has just happened in the mortgage market discounts for debt quality and future depreciation of the dollar.

The Fed cannot control these rates, and they cannot control where the new
credit they create goes. This means that resorting to or trusting in the Fed to bail out the economy and accommodate a congressional spending is fool-hardy and dangerous. This policy has led to a record default for U.S. corporate bonds, and worldwide $110 billion of bonds were defaulted on last year.

Monetary inflation is the chief cause of recessions. Therefore, we must never expect that this same policy will reverse the economic dislocations it has caused. For over a year the Fed has been massively inflating the money supply, and there is no evidence that it has done much good. This continuous influx of new credit, instead, delays the correction that must inevitably come, the liquidation of bad debt and the reduction of overcapacity.

This is something Japan has not accomplished in 12 years of interest rates of around 1 percent. The market must be left to allocate the misdirected investments and allow the sound investments to survive.

There are other policies that will assist in a recovery that the Congress could implement: all taxes ought to be lowered, government spending should be reduced, controls of labor costs should be removed, and onerous regulations should be reduced or eliminated. We should not expect any of this to happen unless the people and the Congress decide that free market capitalism and sound money are preferable to a world flat money. Whether this downturn is the one that will force that major decision upon us is not known, but eventually we will have to make it. Welfareism and our expanding growing foreign commitments, financed seductively through credit creation by the Fed, are not viable options. Transferring wealth to achieve a modicum of economic equality and assuring the role and assurance of the standard of living for most citizens. In the process, dependency on the government develops and Congress attempts to solve all the problems with a much more visible hand than ADAM SMITH recommended.

The police efforts overseas and the effort to solve the economic dislocations here at home cannot be carried out without undermining the free-dom that we all profess to care about. Sadly lacking in the Congress is a conviction that free markets, that is, truly free markets, and sound money can provide the highest standard of living for the greatest number of people. Instead, we operate with a system that compromises free markets and causes economic injury to a growing number of people while rewarding special interests and undermining the principles of liberty.

Unfortunately, the policy of mone-
yary inflation is most harmful to the poor and the middle class, especially in the early stages. Since rejecting the current system and endorsing eco-

nomic freedom diminishes the power and influence of politicians, it is difficult to get political support for such a program. The necessary changes will not come until ordinary people wake up to the reality and insist that the Congress pursue only those goals permitted under the Constitution.

Instead of moving in the direction of free markets, the problems that Western countries face, the more gov-

ernment programs are demanded. If one looks at Europe, the United States, or even Japan, as their economies weaken, government involvement in the economy increases. But in China and Russia, where the horrible condi-
tions that communism caused, iron-

ically made those two countries move toward freer markets when they encountered serious problems. Even the central banks of these two countries today are holding gold, while Western central banks are selling.

The reason for this is that the con-

ventional wisdom of the West’s polit-
cal and economic leaders is that there is a third way that is best, or an alter-

ever native to the extremes of too much freedom, laissez-faire capitalism, and too little freedom, authoritarianism, socialism, and communism. But this is a myth. One can only justify interven-
tion in the market on principle or against it.

There is always the hope that gov-

ernment will be prudent and limit its intrusion in the economy with low taxes, minimal regulations, a little infla-

tion, and only a few special interest favors. Yet the record is clear. Any sign of distress prompts government action for any and every conceivable problem. Since each action by the gov-

ernment not only fails in its attempt to solve the problem it addresses, it creates several new problems in addi-
tion while prompting even more gov-

ernment intervention.

Here in the United States, we have seen the process at work for several decades with steady growth in the size and scope of the Federal bureaucracy and the corresponding reduction of our personal liberties. This principle also applies to overseas intervention. One episode of meddling in the affairs of other nations leads to several new episodes, often of lesser import, of our attention and funding. This system leads to a huge bureaucratic govern-

ment manipulated by politicians and generates an army of special interests that flood the system with money and demands. To achieve and maintain po-

itical power in Washington, these pow-

erful special interests must be satis-

fied.

This is a well-known problem and prompts some serious-minded and well-

intentioned Members to want to legis-
late campaign finance reforms. But the reforms proposed would actually make the whole mess worse. They would reg-

ulate access to the Members of Con-
gress and dictate how private money is spent in campaigns. This merely cur-
tails liberty while ignoring the real problem: a government that ignores the Constitution naturally passes out largess.

Even under today’s conditions, where money talks in Washington, if enough Members would just refuse either to ac-
cept or be influenced by the special in-

terests, government favors would no longer be up for sale. If special interest politicians are far from perfect, the solution is having a government of limited size acting strictly within the framework of the Constitution. No matter how strictly campaign finance laws are written, they will fail if the rule of law is not restored and if Cong-

ress refuses to stop being manipulated by the special interests.

Most people recognize the horrible mess that Washington is in and how cam-
paign is being run by special interest influence the system. But the reforms proposed only deal with the symptoms and not the cause. There is a sharp disagree-

ment in what to do about it, but no one denies the existence of the problem. It is hard for most people to look at the welfare state is out of control and should not be in existence anyway. Therefore, they misdirect our atten-
tion toward campaign finance reform, rather than deal with the real problem. Very few in Washington, however, recognize the dire consequences to eco-

nomic prosperity that welfareism, warfarism, and inflationism cause. Most believe that the occasional recess-

ion, can be will do only harm if the government intervention. Each rebound required more spending, more debt, and easy credit than the previous recovery did. And with each cycle the government got bigger and more intrusive.

Bigger government with more mone-
tary debasement and deficit spending means a steady erosion of the free mar-

ket and personal freedoms. This is not tolerated because the people enjoy or even endorse higher regulations and fewer freedoms. It is toler-

ated because most people believe that their financial and economic security is the responsibility of the government. They believe they are better off with government intervention. Since the free market, having been taught for decades that it is necessary for gov-

ernment to put a human face on cap-

italism.

Extreme capitalism, that is, freedom, we have been told, is just as dangerous as extreme socialism. As long as this belief prevails, our system will con-

inue in its inexorable march towards
fascist-type socialism. However, support for today's policies is built on the fallacy that material wealth and general prosperity are best achieved with this third way: interventionism, while avoiding the dangers of communism and socialism. This is coupled with the firm belief that the government and the unions have the wisdom and the ability to protect freedom will be minimal and limited and that the very rich can be adequately taxed and regulated to help the poor.

This is a fallacy because more freedom will be lost than is expected and the productivity of the market will suffer more than anticipated. Once this realization occurs, it will suddenly be discovered that the apparent wealth of the Nation is a lot less than calculated. An economy that depends on ever-increasing rates of monetary inflation will appear much healthier and the people much richer than is the actual case. Owners of the dot-com companies or the Enron stocks know what it is like to feel rich one day and very poor the next.

This is not a unique experience, but one that should be expected and is predictable. Countries that inflate their currencies must adjust their values periodically with sudden devaluations which destroy the pseudowealth of the middle class and the poor. The wealthy, more often than not, can protect themselves from the sudden shocks to the monetary system. However, they must protect from the insidious loss of liberty that accompanies these adjustments, and eventually everyone suffers.

Our dollar system is quite similar to the Argentine and Mexico peso systems that periodically make sudden and painful adjustments. But ours is different in one respect because the dollar is accepted as the reserve currency of the world, the paper gold of the world financial system. This gives us license to inflate, to devalue, for short periods of time. And we can avoid sudden and sharp devaluations since the world's currencies are defined by our dollar.

But this does not permit the ultimate devaluation that will bring a significant increase in the cost of living to all Americans but hurt the poor and the middle class the most. This special status of the dollar only makes the problem of the illusion of wealth much worse. A sudden devaluation no longer due to our perceived military and economic strength, it appears that our wealth is much greater than it actually is. Because of our unique position as the economic powerhouse of the world, we are able to borrow more than anyone else. Foreigners loan us enormi- tant sums as our current account deficits soar out of sight.

The U.S. now has a foreign debt of over $2 trillion. Perceptions and illusions and easy credit allow our consumers to spend even in recessions by rolling up even more debt in a time when market forces are saying that borrowing should decrease and the debt burden lessen. Our corporations follow the same pattern, keeping afloat with more borrowing.

Ideas regarding the national debt have been transformed. Presidents Jefferson and Jackson deplored government debt and opposed against it. Like both detection and removal of fractional banking, which they knew inevitably would be used to liquidate the real debt through the mischievous process of monetary debasement.

Today, few decry the debt, except for the purpose of political demagoguery when convenient. The concern about deficits expressed by liberal big spenders does not merit credibility. But even conservative spenders now are less likely to decry deficits, and some actually praise them. Just recently, the conservative Institute for Policy Innovation announced in a national press release, “National debt can lead to a growing economy and it produces steady long-term growth, greater security and a higher standard of living.” This would not be so bad if it came from a typical Keynesian think tank; but this is the growing conventional wisdom of many conservatives whose goal it is to generate government revenue. It is not to drain tax dollars from productive enterprises while placing these funds in the hands of politicians whose prime job is to serve special interests.

Deficits are a political expedience that also forces the Federal Reserve to inflate the currency while reducing in real terms the debt owed by the government by depreciating the value of the currency. Those who would belligerently express the deficit and national debt are merely supporting a system of big government, whether it is welfare or warfare or both.

Debt per se is not the only issue. It is also because the debt always encourages the growth in the size of government, allowing it to be seductively financed through inflation or borrowing, is what makes it so bad. Just because it is less painful at first and payment is delayed, we should not be tempted to endorse this process. If liberty is our goal and minimal government a benefit to a growing economy, we must always reject debt and deficits as a legitimate tool for improving the economy and the welfare of the greatest number of people. The principle of authoritarian government is endorsement whenever deficits are legitimized. All those who love liberty must reject the notion that deficits and debt perform a useful function.

It is possible this recession may end in a few months, as the optimists predict. But if it does, other problems are only delayed. The fundamental correction will still be necessary to preserve the productivity of a market economy. If we do not change our ways, the financial bubble will just go back to inflating again. The big correction, like that which Argentina is now experiencing, with rapid disappearance of paper wealth, will eventually hit our economy. The longer the delay, the bigger will be the bust and greater the need to our freedoms and institutions.

Since we are moving toward the big correction, we are going to see a lot more wealth removed from our balance sheets and our retirement accounts. The rampant price inflation that results will erode the purchasing power of all fixed-income retirement funds, like Social Security, and mean a lower standard of living for most people. The wealth is not real and the trust funds, like Social Security, hold no actual wealth. A pension fund with dot-coms and Enron stock hold no wealth either. Unfortunately, the stocks and bonds remaining are worth a lot less than most people realize.

The Social Security System depends on the value of the dollar and on future taxation. The Fed can create unlimited amounts of money that Congress needs, and Congress can raise taxes as it wants, but this policy guarantees that the dollar cannot maintain its purchasing power, and that there will not be enough young people to tax in the future. Increasing benefits under these circumstances can only be done at the expense of the dollar. Catching up with the current system of money and taxation is equivalent to a person on a treadmill who expects to get to the next town. It does not work.

The economic loss is bad enough, but whether it is fighting the war on terrorism, acting as the world's policeman or solving the problems of vanishing wealth, the real insult will come from the freedoms we lose. These freedoms, vital to production and wealth formation, are necessary and represent what the American dream is all about. They are what made us the richest Nation in all of history, but this we will lose if Congress is not careful with what it does in the coming months.
Mr. Speaker, if nothing else, the knowledge that we are now vulnerable from outside attacks is shared by all Americans. The danger is clear and present, and everybody wants something done about it. There is, however, no unanimity as to the cause of the attacks, who is responsible, and what has to be done. The President has been given congressional authority to use force against ‘those responsible for the recent attacks launched against the United States.’

A large majority of Americans are quite satisfied that his efforts have been carried out with due diligence, but a growing number of Americans are becoming aware that antiterrorist efforts both at home and abroad will have unintended consequences that few anticipated, and that in time will not be beneficial to U.S. security and will undermine our liberties here at home. Let me name a few potential dangers we face.

Number one, there is a danger that the definition of terrorism will become so vague and broad that almost any act internationally or domestically will qualify. If our response in Afghanistan becomes the standard for all countries in the region, negotiated settlements of conflicts will become a thing of the past; acts of terror occurring on a regular basis around the world, whether involving Northern Ireland and Britain, India and Pakistan, the Palestinians and Israel, Turkey and Greece, or many other places. Traditionally, the United States has always urged restraint and negotiations. This approach may end if our response in Afghanistan sets the standard.

Number two, another danger is that the administration may take it upon itself to broadly and incorrectly interpret H.J. Res. 64, the resolution granting authority to the President to use force to retaliate against only those responsible for the recent attacks launched against the United States. Congress did not authorize force against all terrorist attacks throughout the world if the individuals involved were not directly involved in the September 11 attacks. It would be incorrect and dangerous to use this authority to suppress uprisings throughout the world. This authority cannot be used to initiate an all-out attack on Iraq or any other nation we might find displeasing, but that did not participate in the September 11 attacks.

Number three. An imprecise definition of who is or who is not a terrorist may be used to justify massively expanding our military might around the world. For every accused terrorist, there will be a declared freedom fighter. To always know the difference is more than one can expect. Our record in the past 50 years for choosing the right side in many conflicts is poor, to say the least. Many times there is no right side from the viewpoint of American security, and our unnecessary entanglements have turned out to be the greatest threat to our security.

Number four. There is a risk that our massive deployment of troops in many countries of the world may contribute to a greater conflict. We are today in the middle of a dangerous situation between Pakistan and India over Kashmir, where nuclear weapons, and both of whom we generally finance. Exposing ourselves to such risk, while spending endless sums supporting both sides, makes no sense.

Number five. Our pervasive military presence may well encourage alliances that would have been unheard of a few years ago. Now that we have committed ourselves internationally to destroying Afghanistan and rebuilding it, with a promise that we will be there for a long time, might encourage closer military alliances between Russia and China, and even others like Pakistan, Iran and Iraq, and even Saudi Arabia, countries all nervous about our military permanency in this region. Control of Caspian Sea oil is not a forgotten long-term goal for Russia, and it will not be gracefully conceded to United States oil interests. If these alliances develop, even U.S. control of the Persian Gulf oil could be challenged as well.

Number six. Limits exist on how extensive our foreign commitments should be. It is difficult to be everywhere at one time, especially if hostilities break out in more than one place. For instance, if we were to commit our troops in the northern part of the former Yugoslavia, Hussein, and Iran were to decide to help Iraq at the same time the North Koreans were to decide to make a move, our capacity to wage war in both places would be limited. Already we are short of bombs from the current Afghanistan war. We had to quit flying sorties over our own cities due to costs, while depending on NATO planes to provide AWACS cover of U.S. territory. In addition, our financial resources are not unlimited, and any significant change in the value of the dollar as well as our rapidly growing deficits could play a significant role in our ability to pay our bills.

Number seven. In the area of personal liberty, we face some real dangers. Throughout our history, starting with the Civil War, our liberties have been curtailed, and the Constitution has been flouted. Although our government continued to grow with each crisis, many guaranteed liberties were restored. War was precise and declared, and when the war was over, there was a desire to return to normalcy.

With the current war on terrorism, there is no end in sight, and there is no precise enemy. We have been forewarned that this fight will go on for a long time. This means that a return to normalcy after the sacrifices that we are making with our freedoms is not likely. The implementation of a national ID system, increased surveillance, easy-to-get search warrants and loss of financial and medical privacy will be permanent. If this trend continues, the Constitution will become a much weaker document.

Number eight. A danger exists that the United States is becoming a police state. Just a few decades ago, this would have become unimaginable. As originally designed, the American Republic, police powers were to be the prerogative of the States, and the military was not to be involved. Unfortunately today most Americans welcome the use of military forces in our public places, especially the airports. Each before September 11, more than 80,000 armed Federal bureaucrats patrolled the countryside checking for violations of Federal laws and regulations. That number since September 11 has increased by nearly 50 percent, and it will not shrink. Military takeover of homeland security looks certain. Can freedom and prosperity survive if the police state continues to expand? I don’t think it. It never has before in all of history, and this is a threat that Congress should not ignore.

Number nine. There is a danger that personal privacy will be a thing of the past before September 11. There were attacks on the privacy of all Americans for good reasons, or so it was argued. The attacks included plans for national ID cards, a national medical data bank, and know-your-customer-type banking regulations. The need for enforcement powers for the DEA and IRS routinely prompted laws that violated the fourth amendment. The current crisis has emboldened those who already were anxious to impose restrictions on the people. With drug and tax laws, and now with antiterrorist legislation sailing through Congress, true privacy enjoyed by a free people is fast becoming something that we will only read about in textbooks. Reversing this trend will not be easy.

Number ten. Flying commercial airlines will continue to be a hassle and dangerous. Even travel by other means will require close scrutiny by all levels of government in the name of security. Unfortunately, the restrictions and rules on travel on all American citizens will do little, if anything, to prevent another terrorist attack.

Number eleven. The economic ramifications of our war on terrorism are difficult to ascertain, but could be quite significant. Although the recession was obviously not caused by the attacks, the additional money spent and the effects of all regulations on travel on all Americans will certainly have an impact on the recovery. When one adds up the domestic costs, the military costs and the costs of our new regulations, we can be certain that deficits are going to grow significantly, and the Federal Reserve will be required to increase interest rates to control the dangerous monetary policy of inflation. This policy will result in higher rather than lower interest rates, a weak dollar, and certainly rising prices. The danger of our economy spinning out of control should not be lightly dismissed.

Number twelve. In this crisis, as in all crises, the special interests are motivated
to increase their demands. It is a convenient excuse to push for the benefits they were already looking for. Domestically this includes everyone from the airlines to the unions, insurance companies, travel agents, State and local governments, and anyone who can justify the claim that it is difficult spending the military-industrial complex to hide their glees with their new contracts for weapons and related technology. Instead of the events precipitating a patriotic fervor for liberty, we see enthusiasm for more spending, more dependency, greater deficits, and military confrontations that are unrelated to the problems of terrorism. We are supposed to be fighting terrorism to protect our freedoms, but if we are not careful, we will lose our freedoms and precipitate more terrorist attacks.

Lastly, not much empathy is being expressed for members of the Taliban that we now hold as prisoners. The aptly is easily understood. It is not just as a Nation we should set a good example under the rules of the Geneva Convention, but if we treat the Taliban prisoners inhumanely, there is the danger it will be surely used as an excuse to treat American prisoners in the same manner in the future. This certainly is true when we use torture to extract information, which is now being advised. Not only does that reflect on our own society as a free Nation, but torture notoriously rarely generates reliable information. This danger should not be ignored. Besides, we have nothing to gain by mistreating prisoners who have no knowledge of the September 11 attacks. The idea that those captured are terrorists responsible for the September 11 attacks begs an obvious question.

Mr. Speaker, many realists who see the world as it really is and who recognize the dilemma we face in the United States to preserve our freedoms in this time of crisis are independent and pessimistic, believing little can be done to reverse the tide against freedom. Others who share the same concern are confident that efforts to preserve the true spirit of the Constitution can be successful. Maybe next month or next year or at some later date, I am convinced in time the love of liberty can be rejuvenated. Once it is recognized that government has no guarantee of future success, promoting dependency and security can quickly lose its allure.

\end{center}

The Roman poet, Horace, 2,000 years ago spoke the truth; “Adversity has the effect of eliciting talents which in times of prosperity would have lain dormant.” Since I believe we will be a lot less prosperous in the not-too-distant future, we will have plenty of opportunity to elicit the talents of many Americans.

Leonard Read, one of the greatest champions of liberty in the 20th century, advised optimism:

“In every society there are persons who have the intelligence to figure out the requirements of liberty and the character to walk in its ways. This is a scattered fellowship of individuals—mostly unknown to you and me—bound together by a love of ideas and a hunger for the plain truth of things.”

Mr. Read was convinced that this remnant would rise to the occasion and do the necessary things to restore virtue and excellence to a people who had lost their way. Liberty would prevail.

Let us not believe there is not enough hate or anger to silence the cries for liberty or to extinguish the flame of truth and justice. We must have faith that those who now are apathetic, anxious for security at all costs, forgetful of the true spirit of American liberty, and neglectful of the Constitution, will rise to the task and respond accordingly.

\begin{center}
\textbf{LEAVE OF ABSENCE}
\end{center}

By unanimous consent, leave of absence was granted.

\begin{center}
\textbf{SPECIAL ORDERS GRANTED}
\end{center}

By unanimous consent, permission to address the House, following the legislative program and any special orders herebefore entered, was granted to:

(The following Members (at the request of Ms. WOOLSEY) to revise and extend their remarks and include extraneous material:)

Ms. WOOLSEY, for 5 minutes, today.

Ms. NORTON, for 5 minutes, today.

Ms. JACKSON-LEE OF Texas, for 5 minutes, today.

Mrs. JONES of Ohio, for 5 minutes, today.

Mr. CONYERS, for 5 minutes, today.

Mr. MATHESON, for 5 minutes, today.

Ms. WATSON OF California, for 5 minutes, today.

Mr. CLAY, for 5 minutes, today.

(The following Members (at the request of Mr. PAUL) to revise and extend their remarks and include extraneous material:)

Mr. GANSKE, for 5 minutes, February 14.

Mr. HERGER, for 5 minutes, today.

Mr. GEKAS, for 5 minutes, today.

\begin{center}
\textbf{SENATE BILLS REFERRED}
\end{center}

Bills of the Senate of the following titles were taken from the Speaker’s table and referred as follows:

S. 1274. An act to amend the Public Health Service Act to provide programs for the prevention, treatment, and rehabilitation of the Committee on Energy and Commerce.

S. 1275. An act to amend the Public Health Service Act to provide grants for public access defibrillation demonstration projects, and for other purposes; to the Committee on Energy and Commerce.

\begin{center}
\textbf{ADJOURNMENT}
\end{center}

Mr. PAUL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o’clock and 31 minutes p.m.), the House adjourned until tomorrow, Friday, February 8, 2002, at 10 a.m.

\begin{center}
\textbf{EXECUTIVE COMMUNICATIONS, ETC.}
\end{center}

Under clause 8 of rule XII, executive communications were taken from the Speaker’s table and referred as follows:

5067. A letter from the Assistant Secretary for Communications and Information, Department of Commerce, transmitting the Department’s report entitled, “Current and Future Spectrum Use by the Energy, Water, and Railroad Industries”; to the Committee on Energy and Commerce.

5068. A letter from the Senior Legal Advisor to the Bureau Chief, Mass Media Bureau, Federal Communications Commission, transmitting the Commission’s final rule—Amendment of Section 73.202(b), Table of Allocations, FM Broadcast Stations (Burgin and Science Hill, Kentucky) [MM Docket No. 01–110, RM–9927, RM–10358] received January 16, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

5069. A letter from the Senior Legal Advisor to the Bureau Chief, Federal Communications Commission, transmitting the Commission’s final rule—Amendment of Section 73.202(b), Table of Allocations, FM Broadcast Stations (Burlin and Science Hill, Kentucky) [MM Docket No. 00–173, RM–9961, RM–10328] received January 16, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

5100. A letter from the Senior Legal Advisor to the Bureau Chief, Mass Media Bureau, Federal Communications Commission, transmitting the Commission’s final rule—Amendment of Section 73.202(b), Table of Allocations, FM Broadcast Stations (McConnelsville, Ohio) [MM Docket No. 00–172, RM–9962] received January 16, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

5111. A letter from the Senior Legal Advisor to the Bureau Chief, Federal Communications Commission, transmitting the Commission’s final rule—Amendment of Section 73.202(b), Table of Allocations, FM Broadcast Stations (Sabinal, Texas) [MM Docket No. 01–117, RM–10174] received January 16, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

5121. A letter from the Senior Legal Advisor to the Bureau Chief, Mass Media Bureau,
Federal Communications Commission, transmitting the Commission’s final rule—Anncaled or Supplementary Use of Digital Tele-
vision Capacity by Noncommercial Licensees (MM Docket Nos. 01-138 and 01-139) received January 16, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

413. A letter from the Senior Legal Advis-
or to the Mass Media Bureau, Federal Communications Commission, transmitting the Commission’s final rule—Amendment of Section 73.2032(b), Table of Al-
lotments, AM Broadcast Stations (Blythwood, Madras, Prineville and Bend, Oregon) (MM Docket No. 98-47, RM-9870, RM- 9871) received January 16, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

414. A letter from the Senior Legal Advis-
or to the Mass Media Bureau, Federal Communications Commission, transmitting the Commission’s final rule—Amendment of Section 73.2032(b), Table of Al-

415. A letter from the White House Liai-
sion, Department of Justice, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Gov-
ernment Reform.

416. A letter from the Attorney/Advisor, Department of Transportation, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

417. A letter from the Associate Adminis-
trator for Human Resources and Education, National Aeronautics and Space Administra-
tion, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

418. A letter from the Associate Adminis-
trator for Human Resources and Education, National Aeronautics and Space Administra-
tion, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

419. A letter from the Acting General Coun-
el, Office of National Drug Control Pol-
icy, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

420. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Depart-
ment’s final rule—Special Local Regulations for Marine Events; Fireworks Displays, Pas-
taego River, Baltimore, Maryland (CGD01-00-036) (RIN: 2115-AE26) received February 4, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infra-
structure.

421. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Depart-
ment’s final rule—Safety Zone; Fort Hue-
neme Harbor, Ventura County, California (COTP Los Angeles-Long Beach 01-013) (RIN: 2115-AE26) received February 4, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infra-
structure.

422. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Depart-
ment’s final rule—Security zone; Belfair, Washington (MM Docket No. 01-22) (RIN: 2115-AE26) received February 4, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infra-
structure.

423. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Depart-
ment’s final rule—Security zone; Lake Michigan, Navy Pier, Chicago Harbor, Chicago, Illinois (CGD01-01-139) (RIN: 2115-AE26 and 2115-AE26) received February 4, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infra-
structure.

424. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Depart-
ment’s final rule—Security zone and Anchor-
age Regulations; Chicago Harbor, Chicago, Illinois (CGD01-01-138) (RIN: 2115-AE26) received February 4, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infra-
structure.

425. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department’s final rule—Standard Instrument Approach Procedures; Miscell-
aneous Amendments [Docket No. 30272; Amend. No. 2074] received February 4, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infra-
structure.

426. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department’s final rule—Standard Instrument Approach Procedures; Miscell-
aneous Amendments [Docket No. 30273; Amend. No. 2074] received February 4, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infra-
structure.

427. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department’s final rule—Standard Instrument Approach Procedures; Miscell-

**DISCHARGE PETITIONS—ADDITIONS OR DELETIONS**

The following Members added their names to the following discharge petitions:

Petition 4, by Mr. RANDY ‘DUKE’ CUNNINGHAM on House Resolution 271: Ken Bentsen.
The Senate met at 10 a.m. and was called to order by the Honorable Richard J. Durbin, a Senator from the State of Illinois.

PRAYER

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Almighty God, who blesses the Nation whose people pray for their leaders, on this special day of unified prayer, we thank You for hearing and answering the prayers of the American people for the President and Vice President and their families, the members of the Cabinet, the Justices of the Supreme Court, the Joint Chiefs of Staff of the military, the Members of the House of Representatives, and the Members of the Senate. Here in this historic Chamber, we specifically pray for President pro tempore Robert Byrd, for Tom Daschle, Harry Reid, Trent Lott, and Don Nickles. In 1 Timothy 2:1, You remind us that we are to make requests, prayers, intercessions, and thanksgiving for those in authority. We claim that at this very moment You are releasing supernatural strength, wisdom, and vision in these leaders. May they never forget that they are being sustained by You because of the prayers of millions of Americans around the clock. May these leaders never feel alone or dependent only on their own strength. We truly believe that prayer is the mightiest force in the world. You are our Lord and Saviour. Amen.

PLEDGE OF ALLEGIANCE

The Honorable Richard J. Durbin led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The Presiding Officer. The clerk will please read a communication to the Senate from the President pro tempore (Mr. Byrd).

The assistant legislative clerk read the following letter:

U.S. Senate, President pro tempore, Washington, DC, February 7, 2002.

To the Senate:

Under the provisions of rule 1, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable Richard J. Durbin, a Senator from the State of Illinois, to perform the duties of the Chair.

Robert C. Byrd, President pro tempore.

Mr. Durbin thereupon assumed the chair as Acting President pro tempore.

RESERVATION OF LEADER TIME

The Acting President pro tempore. Under the previous order, the leadership time is reserved.

RECOGNITION OF THE ACTING MAJORITY LEADER

The Acting President pro tempore. The Senator from Nevada is recognized.

SCHEDULE

Mr. Reid. Mr. President, today the Senate is going to continue work on the farm bill.

ORDER OF PROCEDURE

Mr. President, I ask unanimous consent that the vote on the Dorgan amendment occur at 10:15 a.m. today and that the time be equally divided between Senator Durbin and the manager of the bill for the Republicans. The Acting President pro tempore. Is there objection?

The Chair hears none, and it is so ordered.

Mr. Reid. Following that vote, Senator Dorgan will be recognized to offer the Dorgan-Grassley amendment regarding payment limitation. We already have an agreement in effect that the debate will take 1 hour 45 minutes. Following the vote in relation to the Dorgan amendment, Senator Lugar will offer his payment mechanism amendment under a 2-hour time agreement. We also expect to get agreement on a finite list of amendments.

I say to all Senators, the Dorgan-Grassley amendment and the Lugar amendments are very important amendments. That is the reason we have the extended debate time on both of them. Disposing of these two amendments will move us a long way toward finishing this legislation.

Last night the majority had 12 amendments and the Republicans had just a few more. Staff has been working on these through the night and we are going to try to come up with a finite list very quickly.

AGRICULTURE, CONSERVATION, AND RURAL ENHANCEMENT ACT OF 2001

The Acting President pro tempore. Under the previous order, the Senate will now resume consideration of S. 1731, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1731) to strengthen the safety net for agricultural producers, to enhance resource conservation and rural development, to provide for farm credit, agricultural research, nutrition, and related programs, to ensure consumers abundant food and fiber, and for other purposes.

Pending:

Daschle (for Harkin) amendment No. 2471, in the nature of a substitute.

Daschle motion to reconsider the vote on Daschle (for Harkin) amendment No. 2471 (listed above) was not agreed to.

Durbin/Lugar amendment No. 2621, to restrict commodity and crop insurance payments to land that has a cropping history.

This ‘bullet’ symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
The PRESIDING OFFICER (Mr. REDD). The Senator from Indiana.

AMENDMENT NO. 2821

Mr. LUGAR. Mr. President, I am pleased that in a few moments the Senate will vote on the Durbin amendment that restores benefits to legal immigrants in our country. We had a good debate last evening which illuminated the fact that there are as many as 500,000 Americans who are able to meet the criteria of having lived in this country 5 years or having had a work experience for 4 years who—and most importantly their children—due to confusion of the regulations frequently have not had the Food Stamp Program and the proper nutrition that might come from that. But we are going to change that. It is a strong bipartisan force.

The President of the United States has spoken forcefully on these issues and has commended the activity that is encapsulated so well in the amendment of the distinguished Senator from Illinois.

I am pleased to join him in hoping that we will have if not, a unanimous vote, a nearly unanimous vote. It is both a humanitarian cause and a fairness cause and a considerable extension of the nutrition safety net for all Americans.

This seems to me to be a very important objective of this farm bill because we have the Senate Committee of Agriculture, Nutrition, and Forestry and we have taken the nutrition title very seriously.

The Senator from Illinois has found ways that we can enhance that title very substantially. I commend that effort and ask all Senators to vote in favor of this amendment.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Illinois, Mr. DURBIN.

Mr. DURBIN. Mr. President, I, first, thank my colleague from the State of Indiana. This is a great day. We have this great alliance of two adjoining States—Illinois and Indiana—for the good of people all across the United States. I thank the Senator for his very kind words.

Before I address the merits of the bill, the substance, there are two modifications which have been proposed. I would like to offer one from Senator DORGAN, and I ask the Senator from Indiana if he would do the same for Senator GRAMM of Texas, who has offered a modification.

Modifications to Amendment No. 2821

Mr. President, I send this modification to the desk of the amendment which has been offered. I ask unanimous consent it be reported.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is so modified.

The modification is as follows:

On page 2, strike line 13 and replace with the following:

"(a) DEFINITIONS.—

On page 2, after line 21 insert the following:

"(8) IN GENERAL.—The term "considered planted" shall include cropland that has been prevented from being planted at least 8 out of the past 10 years due to disaster related conditions as determined by the Secretary."

Mr. DURBIN. Let me make a correction for the benefit of Senator CONRAD. He offered this modification. I believe, not Senator DORGAN. I believe the Senator from Indiana may offer a modification on behalf of the Senator from Texas.

Mr. LUGAR. I thank the distinguished Senator from Indiana. Further Modification to Amendment No. 2821

Mr. President, I do send to the desk the modification from Senator GRAMM.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is so modified.

The modification is as follows:

On page 6 strike lines 4 through 12 and insert the following:

"(M) FOOD STAMP EXCEPTION FOR CERTAIN QUALIFIED ALIENS.—

"(i) With respect to eligibility for benefits for the specified Federal program described in paragraph (3)(B), paragraph (1) shall not apply, subject to the exclusion in clause (ii), to an alien who is continuously residing in the United States as a qualified alien for a period of 5 years or more beginning on the date on which the qualified alien entered the United States.

"(ii) No alien who enters the country illegally and remains in the United States illegally for a period of one year or longer, or has been in the United States as an illegal alien for a period of one year or longer, regardless of their status upon entering the country or their current status as a qualified alien, shall be eligible under clause (i) for benefits for the specified Federal program described in paragraph (3)(B).

"(iii) Clause (ii) shall not apply to a qualified alien who has continuously resided in the United States for a period of 5 years or more as of the date of enactment of this Act."

Mr. DURBIN. Mr. President, let me say at the outset that the modification requested by Senator CONRAD is one that merely defines a term within the bill and does it in a fashion that I think is entirely reasonable. It says that if land has not been cropped or planted because it has been in a disaster status, certainly, that will not be covered by the amendment which I have limiting the opportunities for Federal payment. This is entirely reasonable. I am happy to accept it.

On the modification offered by the Senator from Texas, Mr. GRAMM, I have agreed to this, even though I have serious misgivings about it. But I have the assurance of the Senator from Texas, and all Senators who are now engaged in this debate, that they will continue to look at this extremely closely as we approach the conference committee to make certain we have done something that is fair and reasonable.

But it is in the spirit of moving this forward for the 260,000 legal immigrants who are not able to receive Government subsidies or Government support. We make specific exceptions which I described yesterday in the debate.

The second part of this amendment takes the savings of $1.4 billion and uses it to provide eligibility for food stamps for legal immigrants. This is something that was in place in 1996. It is a change which has worked a great hardship, particularly on poor children across America. I remind all listening to the debate, we are only talking about legal immigrants being eligible for this relief.

President Bush in his budget message has endorsed this concept. Even former Speaker Gingrich, who was the author of the original legislation prohibiting food stamps, has come to the position that we should change it. We now have the appropriate moment in time to move forward with what is a very humane and positive thing for children across America, particularly for families of legal immigrants.

We do two things in this legislation. We provide for a limitation on Government spending when it comes to farm programs so that new land is not brought into production to take advantage of Federal programs. We take the savings from that amendment and use it to provide food stamps for children across America.

Last night it was my great fortune to be at an event honoring former Senators George McGovern and Bob Dole for their work in the field of nutrition and their cooperation over many decades. They pointed with great pride to the creation of the Food Stamp Program which has been the School Lunch Program and a few other commitments by the Federal Government, helped the poorest of the poor in America to receive basic nutrition and sustenance. The purpose of this Durbin amendment, supported by Senators HARKIN, LUGAR, WELLSTONE and many others, is to continue in that tradition.

I yield the floor.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I stress again that the amendment is identical to President Bush's budget proposal. I think all Senators appreciate that. I want to establish that again.

Secondly, I want to establish that the amendment does not affect in any way a producer's eligibility for conservation programs. It applies only to...
commodity programs and crop insurance. I point out that the land which exists in the Conservation Reserve Program would be eligible, and the answer is, yes, CRP land specifically is exempted from the commodity programs and crop insurance.

These questions have been raised because they are material to the savings in the bill that are now to be applied for this important food stamp reform.

Having said that, I commit to the amendment again to Senators, and I am hopeful we will have a strong vote in support.

Mr. HARKIN. Mr. President, this amendment is an important expansion of the commitment nutrition title and I am proud to be a co-sponsor of the Durbin amendment along with Senator LUGAR and others. It builds on our provisions to restore benefits to legal immigrant children without the 5 year waiting period and apply more reasonable food stamp eligibility rules to working, tax paying immigrants. The amendment will correct an aspect of welfare reform that went too far.

Legal immigrants have made countless contributions to our country as many are now in trouble. They are disproportionately represented in the service jobs that have been hardest hit in the current recession. So now is an opportune time to make improvements to immigrant eligibility in the Food Stamp Program.

I also want to focus on children for a minute. We have also heard that from 1994 to 1998, 1 million poor citizen children of parents, legal and non-citizen, were added to the program...a 74 percent decline for this group. These are children who are entitled to participate in the program but whose parents were confused about eligibility.

Do not be mistaken, this issue affects most States in our country. For example, more than half of all low-income children in California live with a non-citizen adult. Some of these children are citizens and others are immigrants. Between 70 percent and 80 percent of low income children in Arizona, Nevada, Texas, Colorado, Florida, Idaho, and New York live in families with a non-citizen. In my own State of Iowa, approximately 14 percent of low income children live in families with a non-citizen. We have seen time and again that in households where there are Food Stamp eligible children who live with a non-citizen adult, often time adults do not seek out the assistance for the child.

Taken together, the 1998 bill that restored benefits to some children which I supported, along with this amendment and our immigrant provisions in the reauthorization will immediately help to prevent many children from going to bed hungry at night. Their parents, will also be able to participate in the program once they have worked in this country for at least 4 years or have resided in the U.S. for at least 5 years.

Now, for anyone who argues that people would move to this country to wait five years to receive a "generous" food stamp benefit, I want to remind all of us that the average household received a benefit of $175 per month in 2000. A family of 3 working 30 hours a week in a minimum wage job got just over $250 per month. That same family working 40 hours per week at $7.50 an hour received under $70 per week. In fact, USDA just reported that food stamp recipients spend about 70 percent of their monthly benefits the first week and 90 percent by the end of the second week. People who participate in the Food Stamp Program are not living "high on the hog" and they are certainly not coming to this country for that benefit.

Now, others before me have mentioned that 18 States spend their own funds to provide food assistance to legal immigrants made ineligible by welfare reform. Under this proposal, those States would now be able to devote their State dollars to other worthwhile and much needed initiatives.

Finally, I, too, want to commend the President for including this provision in his 2003 budget proposal and Newt Gingrich who indicated that welfare reform went too far. We have also heard that from the hog bill.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. Mr. President, I ask unanimous consent that Senators LEVIN and CORZINE be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Indiana has 2 minutes.

Mr. LUGAR. Mr. President, I yield the balance of my time to the Senator from North Dakota.

Mr. HARKIN. Mr. LUGAR, I move to reconsider the vote.

Mr. HARKIN. I move to lay that motion on the table.

Mr. LUGAR. I move to reconsider the vote.

Mr. HARKIN. I move to lay that motion on the table.

The amendment (No. 2621), as modified, was agreed to.

Mr. LUGAR. I move to reconsider the vote.

Mr. HARKIN. I move to lay that motion on the table.

Mr. LUGAR. I move to reconsider the vote.

The amendment (No. 2621), as modified, was agreed to.

Mr. HARKIN. I move to reconsider the vote.

Mr. LUGAR. I move to reconsider the vote.

The amendment (No. 2621), as modified, was agreed to.

Mr. HARKIN. I move to reconsider the vote.

Mr. LUGAR. I move to reconsider the vote.

Mr. HARKIN. I move to reconsider the vote.

The amendment (No. 2621), as modified, was agreed to.
Mr. DORGAN. Mr. President, I will be sending an amendment to the desk on behalf of myself, the Senator from Iowa, Mr. GRASSLEY, and joined by co-sponsors Mr. HAGEL, Mr. JOHNSON, Mr. LUGAR, Mr. FITZGERALD, Mr. NELSON, Mr. BURKHIN, Mr. WELSTONE, Mr. DURBIN, Mr. TANDERUP, Mr. KOHL, and Mr. BROWNBACK. I send the amendment to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The clerk will report.

The text of the amendment is as follows:

The Senator from North Dakota, [Mr. DORGAN], for himself, Mr. GRASSLEY, Mr. HAGEL, Mr. JOHNSON, Mr. LUGAR, Mr. FITZGERALD, Mr. NELSON of Nebraska, Mr. ENSHIN, Mr. WELSTONE, Mr. DURBIN, Mr. TANDERUP, Mr. KOHL, and Mr. BROWNBACK, proposes an amendment numbered 2826 to amendment No. 2471.

Mr. DORGAN. I ask unanimous consent reading of the amendment be dispensed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(The text of the amendment is printed in today's CONGRESSIONAL RECORD under "Amendments Submitted."

Mr. HARKIN. I understand there is one hour 45 minutes evenly divided.

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. HARKIN. I ask unanimous consent that the Senator from Arkansas, Mrs. LINCOLN, be in control of the time in opposition to the amendment.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DORGAN. Mr. President, I am pleased today to offer the amendment. I ask I be allowed as much time as I may consume, following which I expect Senator GRASSLEY, who has worked with me in constructing this amendment, will be recognized.

This amendment is about limitation on payments in the farm program. We always have people coming to the floor of the Senate talking about the requirement to help family farmers in our country. The reason I support a farm bill, the reason I flight so hard to try to get good farm policy, is to help family farmers.

What do I mean by family farmers? I am talking about people out there living under a yard light trying to raise a family and trying to operate a family farm and raise food. They go to town and buy their supplies. I am talking about a network of food producers scattered across this country that represents, in my judgment, food security for our country.

This issue of helping family farmers with a safety net in the form of farm program payments during tough times is something that has become much different over a long period of time. It is not the case that we are fighting over farm program payments for family farmers. There is some of that in the farm bill, but all of us recognize there is in this farm bill substantial payments to some of the biggest operators in the country that have nothing to do with families, nothing to do with family farming.

Let me cite some examples of who gets farm program payments. Fortune 500 companies get payments under the farm program; the farm program is about families there. City dwellers who have millions of dollars, who need the farm program the least and do not have anything to do with the family farm, get farm program payments. Chase Manhattan Bank is one of the largest lenders to colleges and universities—the list goes on forever.

This is about family farming, in my judgment, that those who support this amendment, and there are many in the Chamber, are always asked the question: If you talk about family farmers, what do you mean by family? Define a family farm, they say. I defy you to tell me what it is.

If we took 10 minutes, we could agree on what it is not. Michelangelo once sculpted David. They asked: How did you sculpt David? He said: Easy; I took a block of marble and chipped away everything that was not David.

We can chip away everything that is not a family farm and have a decent idea of what a family farm is not. Is it a New York bank operating land in one of our States? I don't think so. Is a family farmer a piece of ground owned by somebody who has lived in Los Angeles for 40 years and the only time that person has come back to the family farm area is for Thanksgiving; twice in 40 years; is that a family farmer? I don't think so.

Is that where you want farm program payments to go? Or do you want, in small towns on Saturday night, to have a vibrant Main Street where people come to town to buy supplies and park their vehicles? They are families living on the farm, farming our land and raising our food, producing our food and doing it by creating a network of broad-based economic ownership on America's farms. Is that what we are talking about? I think so.

What is this amendment? This amendment provides a $275,000 payment limit. Some will roll their eyes and say: Are you kidding me? Two hundred seventy-five thousand dollars and you think that is a limit? They will say it ought to be much larger than that. We will have trouble getting this passed today because there are people who want it much higher and some want no limits at all.

We propose $275,000. On direct and countercyclical payments there is a $75,000 limit; marketing loan gains and loan deficiency payments, a $150,000 limit; a husband and wife allowance, $50,000—for a total limitation of $275,000.

Now this Senate bill has a $500,000 limit, but it does not get rid of triple entities so you can collect more than that. Current law is $460,000, which means you can collect more than that because of triple entity rules and other things. The House bill is $550,000, and again we allow triple entities and so on. So these are not real limits. Ours is a real limit.

We just talk about payments going to a tax ID, and we determine who the taxpayer is here—the law is not about taxes but it is determining who the individual is—and we have a limitation.

We have seen a lot of these stories—incidentally, these are the kinds of stories which I think will ruin the climate in which we do farm bills in the future. If we do not do something about this, the American people and taxpayers generally are going to say that is not why we are paying taxes. We really support family farms. We believe family farms are important for America. But we believe we are not paying taxes so you can transfer money to the tune of millions, hundreds of millions, perhaps billions of dollars, to those who need it least and ought not be getting farm payments.

This talks about a farm operation, a 61,000-acre spread, $30.8 million in sales last year, receiving $38 million in federal crop subsidies in 5 years. Is that what we are here for? Is that what this is about? Is that what family farmers? I do not think so. That is not why I am interested in this business.

Here is a letter from a North Dakota farmer, a person I have known for some while. He is a good farmer. His son also started farming.

Dear Senator Dorgan: I know you are aware of the really large operations in rural areas that are getting the big farm payments. I feel strongly against these large operations in the current law. I hope you can fix this in the farm bill.

The biggest operations keep getting the bulk of the farm benefits while the small farmers are getting squeezed out of the rural areas. When this happens, the family farm operation can't compete with the larger enterprises because of the financial disadvantages. Cash rents go up because of the huge payments to these big operations, causing smaller farms to quit.

In my judgment, if our goal is not to preserve a network of family producers on America's farms, then we don't need a farm program, we don't need a Department of Agriculture; get rid of it all.

The Department of Agriculture started under Abraham Lincoln and had nine employees. Now it has become this behemoth organization. But if we want to try to increase the production and assist family farmers over price valleys because they are too small to be able to survive these precipitous international price drops for their crops, if our goal isn't to do that, get rid of the whole thing.

If that is our goal—and I believe it ought to be; I believe that is why the American people support a farm program—then let's shape this farm program in a way that really does target the help to family producers. We do not talk much about family farmers and why I believe passionately about what this issue should mean to our country. In Europe they
Grassley will be recognized next, on our side, as soon as an opponent is recognized.

The PRESIDING OFFICER (Ms. Stabenow). Under the order, time is equally divided. The Senator from Arkansas controls the time in opposition to the amendment.

The Senator from Arkansas.

Mrs. LINCOLN. Madam President, I rise today in opposition to the under-lying amendment on payment limitations. It seems to me that lately there has been a lot of talk about this issue in newspapers, in the Halls of Congress, and in rural coffee shops around the country. We have all heard the horror stories about plutocrats getting rich off the Federal dole, some of which my colleague has mentioned.

Most of these stories are generated by groups that claim to represent the interests of the family farmer but, in truth, could not care less about the family farmer. Instead, they wouldn’t shed a tear to see American agriculture dead and buried and the land that our fathers have farmed left to lie fallow forever.

It is shameful enough that those who spread these stories claim to do so in the best interest of the family farmer. Instead, they wouldn’t shed a tear to see American agriculture dead and buried and the land that our fathers have farmed left to lie fallow forever.

I am proud that Arkansas is home to thousands of these families, and I am committed to serving their needs. While it may be that the agriculture society it once was, there are still areas of our country, like much of my State, where agriculture is the economy, where whole communities celebrate harvests with festivals—rice festivals and cotton festivals—where farmers take great pride in producing our country’s food supply. That is why these false impressions bother me so much. It is not to penalize anybody. It just says: Here is the kind of economy we want. Here is what we want to invest in for America’s future. Here is what we want to do to help family farmers in our country.

Let me conclude by saying I represent a farm State. There are some in my State who will be aggrieved by this amendment. They are the ones who would be affected by the limit. This is important and good public policy. For these farmers, we can provide the best possible price supports during tough times to families who are farming America’s land. That is the purpose. It is not to penalize anybody. It is just to invest as best we can in those family farmers struggling during these tough times. We do not want to see any farmer who has managed to exist for years, and to say to them: We care about you; we care about the future; we want you to hang on because we want family farming as a part of America’s future.

Mr. President, I yield the floor. I reserve the remainder of our time.

I assume the opponents have an equal amount of time.
Farm Bureau, the American Soybean Association, the Agricultural Retail Association, the Wheat Growers, Barley Growers, Corn Growers, the Cotton Council, Grain, Sorghum, Sunflower, Rice Millers, Peanut Farmers, Canola, and U.S. Rice Producers Group.

I am content that this letter be printed in the RECORD. There being no objection, the letter was ordered to be printed in the RECORD, as follows:

February 6, 2002.

Hon. Tim Hutchinson,
U.S. Senate, Dirksen Senate Office Building,
Washington, DC.

Dear Senator Hutchinson: The organizations listed below represent a significant majority of the production of food and fiber in the United States. We are writing to urge you and your colleagues to oppose amendments to new farm legislation, which would further reduce limitations on farm program benefits below levels included in the Committee's bill (S. 1731). In testimony presented to Congress concerning new farm legislation virtually every commodity and farm organization opposed payment limitations.

One objective of new farm legislation is to improve the financial safety net available to farmers and to eliminate the need for annual emergency assistance packages. Farm benefits were made more restrictive than those in S. 1731, a significant number of farmers will not benefit from the improved safety net. Simply stated, payment limits bite hardest when commodity prices are lowest. The addition of new crops (i.e., peanuts and soybeans) to the list of those eligible for fixed and counter-cyclical payments by aggregating 5 years of data and failing to account for the sharing of those payments to individuals in families, cooperatives, partnerships and corporations listed as recipients.

The existing limitations in S. 1731 on direct payments, new counter-cyclical payments and marketing loan gains are not insignificant. Further, the regulations requiring recipients to meet actively engaged criteria remain in place and are enforced by the Department of Agriculture.

We strongly urge the Senate to defeat the Grassley and Dorgan amendments as well as any other proposals to limit eligibility for economic assistance during times of low prices when farmers need it most.

Thank you for your consideration of our views.

Mrs. Lincoln. Madam President, this letter points out one of the worst things about payment limits, that they bite hardest when commodity prices are lowest.

How would farmers be hurt? One way they would be hurt is because this amendment would discontinue availability of generic commodity certificates which offer farmers better access to the marketing loan program.

Marketing loan support is most important when prices are low. Let's say there is a year in which the global market is swamped, in large part because of foreign production. If prices are lower, the value of loan deficiency payments would be higher, and farmers would hit their new payment limitation sooner. This means that a larger portion of their crop is now unavailable for sale.

For example, if prices are so low, they cannot possibly recoup their cost of production through the market. If they are lucky, they only fall into deeper debt. If they are unlucky, then they are forced to defaul on their loans and the bank seizes whatever assets they have: their equipment, their land, their house.

Generic certificates would offer these farmers more access to the marketing loan program.

The 1985 farm bill created the marketing loan program with no payment limitations. Later, Congress decided in its infinite wisdom that, even though farmers were going out of business and people were leaving farms and rural towns in dramatic numbers, it had made it too easy for farmers to make a handsome living. So it decided to place dollar limits on payments, even though it unfairly disadvantaged farmers who, with higher value crops, reached these limits much faster than farmers of other crops. But it was apparent that to do that would quickly put even more people out of business, so Congress tried to cushion the blow by allowing farmers to apply for payments through up to three entities. This allowed people who farmed with their wives and children to get enough support to keep the family farm viable.

So, from the beginning, the 3-entity rule was put in place to avoid the massive bankruptcies that would otherwise result. The 3-entity rule was imposed without it. But even though farmers continued to go out of business, and rural communities continued to decline, Congress decided to lower payment limits again. Then, Congress passed Freedom to Farm and all heck broke loose. Prices plummeted, farmers began dropping like flies, and Congress was forced to begin passing emergency relief bills—4 years in a row—to keep rural America from falling stone dead.

Now, in the wake of all this, comes this amendment which wants to lay that one last straw on the camel's back by taking away the 3-entity rule—the one thing that has kept thousands of farmers hanging on. And it comes at a time when farmers are suffering about as bad as they ever have. It comes at a time when virtually every farmer and every farm organization is coming to Congress in droves begging, pleading with Congress to do something. And, remember, it isn't just farmers of the high-value crops like cotton and rice who are in need.

It's also the corn farmers, soybean farmers, wheat farmers, and farmers of just about every other crop. They are all suffering. And this is very important to remember, because this amendment will hurt these farmers, too— even the farmers of specialty crops; they don't participate in these programs.

Specialty crop farmers will be significantly hurt because tightened payment limitations force farmers to reduce plantings of the program crops. In many parts of the country where they grow specialty crops, places such as California and the Far West, Florida, and many of the Atlantic States, and many of the Mountain states, much of the land that is currently planted in program crops will soon be switched to specialty crops. When that happens you will see the prices of these specialty crops dive even lower than they are now, and then these farmers will be forced out of business.
So it’s not just farmers of rice and cotton. Nevertheless, it is this disparity in cost of production between the high-value crops such as rice and cotton and the lower value crops that provides the clue to understanding why this amendment is so dangerous, and would still impose upon the farmers in my State and to farmers across the country. Yet, this point is only one of the many mysteries and myths that cloud this issue.

I would like to try to paint a clearer picture, to provide some clarity to this confusion, and perhaps it would be easiest to do this by pointing out what freedom to farm sought to accomplish.

The premise behind freedom to farm was that farmers had become addicted to subsidies, and that they needed to be liberated into the glorious free market that we would soon create within the ambit of the World Trade Organization. Farmers were told they needed to make their operations more market-oriented; that they needed to learn to respond to free market signals.

We set in motion a plan to wean farmers from government support.

We gave them planting flexibility. We told them we would negotiate away the trade barriers. We assured competitors that we would erect no barriers to block them. We told them the world would follow our example if only we would lead by example and unilaterally disarm.

Well, we disarmed. We began to lower our barriers to trade, and the world did not follow. The result has been 6 years of disaster. Prices have plummeted in virtually every commodity, even while input costs continue to rise. Farmers are going out of business and rural towns are heading for the abyss.

So we, in Congress, have tried to respond with a new farm bill. Chairman HARKIN has introduced a very good bill that seeks to answer the needs of our farmers. I compliment him on his hard work and his patience in bringing us a bill from the Senate Agriculture Committee that does just that in its diversity and its attention to assisting farmers. It is a bill that renews the Government’s commitment to farmers in the rural economy, one that offers a bedrock, strong safety net.

But let us not lie to ourselves. This is not a complete fix, by any stretch. Prices are still in the tank. It will take some time for those prices to rebound, even if the rural economy responds immediately and positively to our new farm policy. Until then, our farmers will continue to struggle under the burden of low prices.

How low have the prices sunk? As this next chart shows, the price of cotton last year sank to its lowest level in more than two decades.

For rice—shown on our next chart—the story is even worse. Last year rice prices sank to a level lower than they were in 1947. Yet cotton and rice farmers still have to wrestle with an ever-rising cost of production.

As this next chart shows—and it is actually my favorite chart—input costs have risen steadily while prices have remained flat or even dropped. This point is never mentioned in those horror stories that we see in newspapers and on the Web sites. Talking about the unbelievable amounts of money these farmers are getting, we never hear one word of what these producers are spending.

Farmers need more support and higher prices because their costs are forever rising. Let’s think about what this means. What products do we buy in our daily lives, that is, the price of vanilla, the price of rice, the price of chocolate, wine, etc.? These prices are just as low today as they were in 1947? Imagine trying to support your family in the 21st century—with the cost of housing as it is today, with energy prices shooting through the roof, as they did last year, with cars, clothes, everything you can think of that you have to buy costing as much as they do today—imagine doing all of that on the amount of money your father or grandfather earned in 1947. You could not do it.

That is what rice farmers face. And that is what cotton farmers face. And that is what soybean farmers and corn farmers and wheat farmers and all of the others face, too.

That is why every organization, representing every program crop, and several others on top of all of that, strongly oppose this amendment. They know they will have to continue to face the squeeze between plummeting farm prices and ever rising farm costs of production. Yet even as they are squeezed, we tell our farmers they must still go out and wrestle with the heavily distorted global marketplace—a marketplace distorted beyond recognition by foreign subsidies so high that they would be unrecognizable to us.

We tell our farmers they must still find ways to be market oriented, to be more responsive to the market signals—in a word: to be more competitive. What does any business have to do to become more competitive? It must find ways to lower its per unit cost of production. To do this, most businesses find it necessary to increase their economies of scale. That is how the marketplace works. That is what our farmers in Arkansas have had to do.

Mr. Greg Day, a constituent of mine who farms in Grady, AR, used to farm cotton on only 1,700 acres. But because of the decline of the farm economy, because of the changing world in which he lives, he has had to double his acreage to 3,400 acres in order to spread out his costs, just to maintain the level of revenue he needs to keep his head above water.

And now adding on an amendment that tells him that we want to discourage the very course of action he has had to follow to survive. It says to farmers: Do not do what you have to do to become more competitive. It is, if Congress is, on the one hand, telling farmers to participate in the real business world where the most competitive survive, but, on the other hand, telling them not to do what will make them more competitive.

Congress has sent contradicting signals to farmers because it is still clouded by these false pictures, these myths of what is the average farmer.

The other myth that we seem to keep promulgating is this mythic, old-fashioned notion that, while the rest of us live in the 21st century, farmers ought to make a living as our grandfathers did 75 or 100 years ago. But our grandfathers were never asked to meet the regulations of today’s EPA or the Corps of Engineers and wetland regulations. Our grandfathers were never asked to meet the regulations for chemical application, for pesticide application, or the other really positive ideas that have come out of agriculture in ways that we can be more efficient and more sensitive to the environment. Our grandfathers never operated under those restrictions.

And that myth imagines that we ought to stamp out anybody and anything that looks too big, anything that looks too global, anything that looks too corporate. But, colleagues, there are not big, faceless corporations surviving in our small towns from the big cities and pushing our families off the farms, eating up all the land, and ruining the rural landscape. That is just another myth as well.

Many of those mentioned by my colleague—large banks, millionaires—some of them are landowners through a default on loans. Some of them are large landowners because they are age-old families. Some of them have acquired land because they purchased it.

The farm families who are farming these lands are the same families who were farming it back when our grandfathers were farming. They are just families like yours and mine. There are fewer of them, unfortunately, but not because big corporations from big office towers, with wealthy shareholders, took their place. There are fewer farmers because, for too long, we have let inadequate policy low prices push them out. And you do not remedy this situation by outlawing the farmers who grow higher value crops and who need bigger farms. If you do that, then all we will have accomplished in this body is to create a policy that puts both the smaller farmer and the bigger farmer out of business.

Smaller farmers are not going out of business because bigger farmers are not driving them out. It is a disproportionate share of Government support. Smaller farmers are going out of business because the world is changing, because we have a global marketplace, because there is global competition from more heavily subsidized farmers in other countries.

You are not going to fix that by simply saying: We don’t want bigger farms. You are not going to fix the North Dakota wheat farmer’s problems by putting the Arkansas rice farmer out of business. The Iowa grain farmer isn’t going to do better because the Iowa grain farmer isn’t going to do better because the Louisiana cotton farmer went out of business.

February 7, 2002 CONGRESSIONAL RECORD — SENATE S447
But this amendment will make it so much harder on the Arkansas rice farmer and the Louisiana cotton farmer to make ends meet, just as it will eventually hurt soybean farmers in Missouri and Maryland, and corn farmers in Indiana and Kansas, and what farmers do so on. All of these farmers are in this boat together. That is why all of these commodity organizations are banding together to oppose this amendment.

Simply put, approving this amendment will accomplish nothing more than targeting these cotton and rice farmers and making it harder for them to get the farm support they need to simply survive. Who would farm in my State then? It will not be any of the farmers whose stories I have told you today. And it will not be their children.

I come from a seventh generation farm family. I am a sister, daughter, and granddaughter of a rice farmer. My grandfather passed on to his grandchildren what had been in our family for generations. Of the nine grandchildren he had, only two of us still want to try and make a go at farming. Once they drop out, the Lambert family will be out of farming perhaps for good. These newspaper articles that have spread misinformation about me and many others never tell that side of the story. These interest groups, Web sites that claim to speak on behalf of the family farmer, all of these editorial writers who publish arguments as if they know anything about farming, they never tell you about the farmer who cannot afford to get out because all of his debt and his only assets are both tied up in land, but who cannot afford to keep farming either because every year a little bit more of his grandfather’s legacy slips away into red ink.

They never tell you about the town that will dry up because Congress, in its infinite wisdom, decided to play God and arbitrarily decide that all the farmers in that town should go out of business because somebody up in Washington did not like how they got bigger because that same Congress also told us to act like an ordinary business and get more efficient.

Who is going to keep revenue coming into that rural town that is drying up? Who is going to provide jobs and keep the property tax bases low so there is money to fund the schools? You cannot think we can afford to take the risk necessary to find out.

I urge my colleagues to oppose this amendment and reserve the remainder of our time.

The PRESIDING OFFICER. Who yields time? The Senator from North Dakota.

Mr. DORGAN. Madam President, when I read the list of the cosponsors, I was mistaken to read Senator COCHRAN’s, but I was not a cosponsor of this amendment. The amendment was originally drafted to be submitted as a second-degree amendment to the Cochran amendment to the commodity title in December. I read from a list that included his name on the bottom. He certainly is not a cosponsor. It was my mistake. My apologies to Senator COCHRAN.

I ask unanimous consent that Senator COCHRAN’s name be stricken from the RECORD in that section where I identified cosponsors. He is not and has not been a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DORGAN. I yield as much time as he may consume to the Senator from Iowa.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Madam President, how much time do we have?

The PRESIDING OFFICER. Forty minutes.

Mr. GRASSLEY. I take the opportunity at this point to yield to the Senator from Nebraska.

Mr. HAGEL. Madam President, I thank my distinguished colleague, the senior Senator from Iowa.

I rise this morning as a cosponsor of the Dorgan-Grassley amendment. We have heard and will hear this morning about large farms, small farms, medium-sized farms, baby farms, grandpa farms, a lot of farms. The fact is, large farms gain additional subsidies for every new acre they buy and every new bushel of grain they produce. In fact, the taxpaying, the Federal Government, subsidizes this transaction.

Recently, the North Platte, Nebraska Telegraph wrote an excellent editorial pointing out the problems with the current farm payment system. I ask unanimous consent to print the full text of this editorial in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1.)

Mr. HAGEL. The North Platte Nebraska Telegraph editorial stated in part:

Fortified with subsidy money, the largest farms continue to plant millions of acres of crops, bidding up the price of land to do so. That creates more surpluses, low grain prices, continued low grain prices and a false land market.

Present farm policy discourages small and medium-sized farms and it discourages young people from entering the business.

Those of us in farm country recall the difficulties of the 1980s and what the agricultural community in this country experienced. Partly that was a result of a false floor as a result of inflation in bidding up land prices. When it crashed, everything crashed. I suspect we are heading for such a time, unless we correct and address exactly what the North Platte Telegraph talked about in their editorial.

Consider that since passage of the 1996 farm bill, we have spent a total of $62.3 billion in direct payments to producers, and that in fiscal year 2000, 63 percent of that $62.3 billion in direct payments to producers went to the largest 10 percent of farmers. I don’t know, because I wasn’t around 70 years ago when we established a farm policy in this country, but I think I do understand that there was some intent not for this kind of misplacement of taxpayers’ dollars to continue. The point is, this was never the intent of farm policy 70 years ago.

A recent poll conducted by land grant universities showed that 81 percent of farmers want stricter payment limits. In my State of Nebraska, 85 percent agreed with tougher limits. This year, the Nebraska Farm Bureau for the first time voted to support payment limits.

The amendment we are proposing would still allow for very generous farm payments, but it would remove the loopholes that allow a handful of large farms to receive unlimited payments. This amendment will make certain that Federal commodity payments are structured to help those who need it, those whom those programs were in fact intended to help—the real farmers. It will also help ensure that those programs are actually involved in agricultural production. That would be novel.

That, again, was the original purpose, the intent of farm support programs. This is the kind of reform I believe strengthens a new farm bill.

My colleague from North Dakota, Senator DORGAN, made an interesting point in referencing the Washington Post editorial.

The PRESIDING OFFICER. The Senator has used his 5 minutes.

Mr. HAGEL. I ask unanimous consent for an additional 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HAGEL. The question might be asked, what does the Washington Post know about farm policy? That is a legitimate question. Probably very well. The point made in that editorial is a very real point in that the continued support of the Congress, representatives of the people of this country, to pay for another $63 billion in additional farm subsidy programs isn’t going to continue to be there. Until we bring some reality and common sense to our system, to our program, then political capital becomes more difficult each year to sustain that subsidy program.

It is worth noting also that this payment limitation reform would save $1.3 billion, according to CBO. And some of those savings would be reinvested in agriculture—increasing funding for the Beginning Farmers and Ranchers Loan Program—that is very important for new farmers and ranchers—expanding the Crop Insurance Program, which is, in fact, the way to eventually go in sustainable and sustaining the viability of farmers to produce and survive and prosper. It would boost nutrition programs.
Farm support programs are vital, of course, to our farm families and our agricultural communities. We are not arguing that point. But without real payment limitation reform, we will continue to weaken the same farmers we claim to help.

I appreciate the work done by my colleagues from North Dakota and Iowa and others on this issue and support their efforts to bring some accountability and common sense to agricultural policy.

I urge my colleagues to support the Dorgan-Grassley amendment. I am proud to stand with their efforts today. I yield the floor.

EXHIBIT 1

[From the North Platte Telegraph, Dec. 16, 2001]

TO TOO FEW, TOO MUCH—GOVERNMENT NEEDS TO LIMIT FARM SUBSIDIES

As the U.S. Senate debated the farm bill this week, there was at least one thing on which senators seemed to agree: federal farm payments to the largest farmers are too large.

Even farm-state senators decry the problem. Nebraska Sens. Ben Nelson and Chuck Hagel, along with colleagues from Iowa and the Dakotas, have worked on amendments to curb the excess.

The problem, simply stated, is that more than two-thirds of federal farm payments go to fewer than 10 percent of farms. Fortified with subsidy money, the largest farms nationwide continue to plant millions of acres, driving up the price of land to do so. That creates more surpluses, low grain prices and a false land market.

On hearing the news, the first thought is to urge that subsidies be eliminated. That would take care of the abuse and save taxpayers money.

But farm subsidies are necessary. With abundant farmland and hardworking and talented farmers, the United States constantly produces more food than its people can consume.

The excess goes to buyers in other nations. But when foreign markets for farm products fall to materialize, such as in 1999 when Asian economies collapsed, U.S. farmers need federal assistance. That help is vital here in Nebraska, where the economy is dependent on agriculture.

The challenge of federal subsidies is in their design. The law is complex. Flaws are magnified.

Here’s a flaw everyone agrees on: virtually unlimited farm payments make for too few farmers.

Once, farming was a lifestyle choice. Now, it has become a big business. Unlimited federal farm payments make the problem worse.

Present farm policy discourages small and medium-sized farm operations, and it discourages young people from entering the business.

For years, farmers and city folks alike have grumbled about the farm program. That grumbling has been amplified by an environmental group willing to get the facts.

At www.ewg.org, the Environmental Working Group lists virtually every farmer in the nation who received federal dollars during the past five years. It lists every dollar the farmer received—and from what federal program.

The list is a stunning achievement, assembled from public records by diligent people. And the content is stunning.

Click on the legislation for Nebraska and you can see the money received by more than 35,000 farmers.

From 1996 to 2000, the largest farmer received $2.65 million. The 10th largest got about half that amount, $1.32 million. Many received sizable sums. The 100th largest got $625,000.

Hagel, along with senators from North Dakota, South Dakota and Iowa, has proposed an absolute maximum cap of $275,000 in any one year. Iowa farms are big enough to net $2.5 million in profits during three years, they would get nothing.

Those limits aren’t enough. Only a fraction of the nation’s farmers could net $2.5 million in three years. Limiting the maximum payment in any one year to about $275,000 would cut funds for only the largest 100 or so.

Farmers, speaking through a poll taken a few months ago, said a limit of about $60,000 would be fine.

While that limit would drastically cut into large-scale agribusinesses that have grown up around the farm program during times of record-low grain prices, it is a worthy target.

BIG WINNERS IN FARM SUBSIDY POLICIES

(These figures, taken from the Environmental Working Group Web site, show the top-50 recipients of federal farm subsidies in Nebraska for the last four years.)

Here are the recipients of federal farm aid between the years 1996 and 2000.

Rank, name, location, and total:

1. C J Farm Partners, Oxford, $2.6 million.
2. Kaliff Farms, York, $2.5 million.
3. Bartlett Partnership, Bartlett, $1.8 million.
4. Danielski Hvesting, Valentine, $1.7 million.
5. Niobrara Farms, Atkinson, $1.7 million.
6. H J Farming, Friend, $1.6 million.
7. Merrill Land Co., Gen Partner, Ogallala, $1.4 million.
8. Glenn Enting & Sons, Edgar, $1.3 million.
9. Osangowski Bros., Bellwood, $1.3 million.
10. Reynolds Farms, Broken Bow, $1.3 million.
11. Western Neb Farm Comp, Venango, $1.3 million.
12. Woztassewski Brothers, Wood River, $1.2 million.
14. Kason Farms, North Platte, $1.2 million.
15. Marsh Farms, Hartington, $1.1 million.
16. Safranek, Irrigation, Merna, $1.1 million.
17. Schulz-Pinch, Paxton, $1.1 million.
18. Shanle Bros, Albion, $1 million.
20. Heine Farms, Ordway, $1 million.
21. Craig & Terry Ebberson, Coleridge, $1 million.
22. Owl Canyon Farms, Madrid, $1 million.
24. Wallinger Farm, Stuart, $988,312.
27. Pospisil Farms, Friend, $973,419.
29. Orville Hoffschneider & Sons, Waco, $954,950.
30. Bender Bros, Lindsay, $941,679.
31. Rowen J Kemp & Sons, Shickley $941,600.
32. Board Of Regents U of N Lincoln, $920,646.
33. Kirkholm Farms, South Sioux City, $914,320.
34. Cruise Farms Ptnr, Pleasanton, $912,150.
35. Wallin Brothers Gen Ptnr., Imperial, $908,041.
36. Adams Farm Partnership, Broken Bow, $899,111.
37. Bettger Bros, Fairmont, $870,963.
38. Stanek Brothers, Walthill, $870,553.
40. B T R Partnership, Nebraska City, $868,185.
41. Alfs Farms Ptnr, Shickley, $865,645.
43. Terryberry Farms G-p., Imperial, $847,856.
44. Andersen Farms, Inc, Dakota City, $847,260.
45. D & B Farms Partnership, Holdrege, $830,156.
46. Hobbs Farms, Ewing, $815,213.
47. Robin & Barb Irvine, Ravenna, $805,978.

The PRESIDING OFFICER. Who yields time? The Senator from Arkansas.

Mrs. LINCOLN. I yield 10 minutes to the Senator from Arkansas, Mr. HUTCHINSON.

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. HUTCHINSON. I thank the Chair. Madam President, I thank the Senator from Arkansas for her excellent statement in opposition to this amendment. I rise in strong opposition.

This past weekend I was in Lawrence County, AR, at a farm auction in Portia where three farmers were selling out. They were selling their equipment. They put it up for auction. As I stood there and heard their stories, these were not—and I emphasize to my colleagues these were not—small farmers, depending on how you define "small." They had a lot of acreage but did not have a lot of income. In fact, the story was they could not make the cash flow, and they were calling it quits.

They told me that within a 6-mile radius of where that farm auction was going on there had been 10 other farmers who had auctioned their farms off, they had gone out of business in the previous month. So when we hear what my colleague calls plutocrats, a few getting these vast amounts of money, it simply does not reflect the reality of rural Arkansas. It does not reflect the reality of what my constituents are facing when we see these Web pages and see how much was received in payments. It does not reflect their net income. It does not tell us what their input cost was. It does not tell us the reality farmers in the delta, the poorest part of this country, are facing today.

Farm programs are not and they have never been considered means testing programs. They were never supposed to be for the benefit of a certain economic class or based upon the size of the farm or upon the size of a person’s house or what their bank account balance might be or how much they paid in income taxes or some other measure of financial condition.

That is not the way our farm program was intended to operate. It was to ensure that Americans have a safe, reliable, and affordable food supply and that farmers, who are some of the most technologically advanced and environmentally sound producers in the world, are able to compete.
It has worked. Is it perfect? No. Are there inequities? Yes. Are there competitions between regions of the country? Yes. But it has provided this country a cheap, affordable, reliable, safe, and environmentally protected food supply. And the very bankruptcy of this amendment are seeking to do is to absolutely pull the rug out from under the producers who have provided this great condition in this country.

In Arkansas, agriculture is 25 percent of the State’s economy, but that does not even tell the story because it does not account for the thousands of jobs that are related to agricultural production, such as bankers, car dealers, implement dealers, schools, restaurants, and may I say even churches that are dependent upon the survival of the farm economy. Farming is the life-blood of my State, as it is with many rural States.

The farm program and the subsidies have been made necessary by a market that is not functioning properly for several reasons: due to high foreign subsidies, high foreign tariffs, and very strict domestic environmental regulations.

Senator CONRAD has reminded us many times that in the European Union producers receive an average of about $360 per acre while U.S. producers receive an average of about $80 per acre, one-sixth what they get in Europe. U.S. agricultural products are subjected to an average tariff of about 60 percent, whereas agricultural products coming into the U.S. are only subjected to an average tariff of 14 percent. Whether it is subsidies, whether it is the tariffs, or whether it is the environmental regulations—the very stringent environmental regulations, the most stringent in the world with which our producers must comply—they are at this great disadvantage in competition. We have to sustain and preserve these programs.

The United States has two choices: We can support our farmers and retain our position as the world’s most productive and environmentally sound producer of agricultural products or we can cede this important market to our European competitors or Third World developing nations and become as reliant on foreign food as we are right now on foreign oil.

In Arkansas, as a member of the Armed Services Committee, this is not just saving rural Arkansas, this is not just preserving a farm economy; it is a national security issue because if we rip the heart out of our agricultural programs, our farm programs in this country with the kind of payment limitation amendment before us today, we will eventually subject ourselves and make ourselves reliant upon and dependent upon foreign agricultural products, suppliers, and producers.

It appears many of the environmental groups have chosen to support this effort in the hope that if you get the commodity title of the farm bill through this amendment, more money will be available for conservation programs. We need to think about that a little bit.

If we take our productive lands out of production or force our producers into bankruptcy, other countries that are more highly subsidized or Third World developing nations that do not have any type of environmental regulations in place will simply put more land in production, and the end result for our world will be a less environmentally safe place. Is that the world we want to turn into? We are going back and forth, I ask my colleagues to take a second look before they support a misguided, though well-meaning, amendment. I ask my colleagues to vote against the Dorgan-Grassley payment limitation amendment.

The Senator from South Dakota.

Mr. JOHNSON. Madam President, I thank my friend from Iowa for yielding me this time. I rise to offer support for this bipartisan amendment Senator Dorgan and Senator GRASSLEY have sponsored.

This is truly an astonishing debate. People all around America must be under extreme pressure to finish the conference quickly, compromise in such a way that we will not see the elimination of this amendment in conference, and it will be disastrous for Southern agriculture.

The means test this amendment imposes would require every farmer to take his or her tax return to an FSA office to prove eligibility. Adding another level of redtape and bureaucracy will only compound the problem, limit the support, and make the implementation of our new farm bill almost impossible. Who is that going to benefit? Certainly not the farmers.

This amendment will overwhelm FSA employees who will be asked to implement new farm laws in record time and administer these new limitations.

There are different regions of the country with different needs, but this arbitrary limitation is nothing less than war on Southern farmers. It is aimed at Southern farmers.

Senator JOHNSON is recognized for 5 minutes.

Mr. JOHNSON. Madam President, I am glad I was in Lawrence County this weekend. I was glad I was there to see firsthand the suffering, to see farmers who are calling it quits, to see the ads in the newspapers saying four more farmers are quitting today, to see hundreds of farmers lined up to see if they could buy a bargain, because they cannot afford new implements, to see if they could buy from those who are going out of business.

I do not know what they may face in Iowa, Nebraska, North Dakota, or South Dakota, but I know what they are facing in Arkansas. I know what they are facing in the South, and it is not as it has been portrayed by the Washington Post.

I ask my colleagues to take a second look before they support a misguided, though well-meaning, amendment. I ask my colleagues to vote against the Dorgan-Grassley payment limitation amendment.
shaking their heads as they listen to this debate about whether a business that is being subsidized to the tune of $275,000 by the taxpayers should regard that as inadequate, and that we should be told we are pulling the rug out from under a business because they are only getting a $275,000 taxpayer-paid subsidy, that they need a $550,000 subsidy in order to cashflow.

Has it really come to this? Is this what American agricultural policy is all about, half-million-dollar subsidies and anything less is regarded as somehow inadequate? This is amazing. I think it is time for us to recognize the current structure of the farm program payments has in fact failed rural communities and family-sized farmers and ranchers.

The advocates of the amendment, including myself, would suggest that anyone who wishes to farm the entire county is free to do so. This is a free country. Farm however much they wish, and there should be some reasonable limitation as to how much the taxpayers ought to be expected to assist with their cashflow, and $275,000 strikes me as a generous level of support. That is what this amendment is all about.

We are talking about modifications to the 1996 farm bill, which I believe especially hurts beginning farmers because it increases the cost of getting started in farming. As long as huge farms are protected by larger and larger Government checks every time they add another farm, they will bid those Government payments into higher cash rents and higher land purchase prices. By reducing the number of middle-sized and beginning farmers, the current payment structure has deprived rural communities and institutions of the population base they need in order to thrive.

I believe the single most effective thing Congress can do to strengthen the fabric of rural communities and family farms across the Nation is to stop subsidizing megafarms that drive their neighbors out of business by bid- ding land away from everybody else.

This amendment aims to place some commonsense payment limitations on the various price supports contained in the farm bill proposal.

The question of implementation was raised. There are farm program payment limits now that need to be implemented. To do so, we have to change that. We simply put the limitation levels at a far more reasonable level.

The distribution of benefits from farm programs has been a hot topic in recent months, as we find that almost half of farm program payments are going to families who make over $135,000 per year. We need to modify that. We need to recognize what we are doing is not working.

I, too, am concerned that the millions of dollars going to individual megafarm operators and absentee landowners will eventually ruin public support for the farm program.

Today, with our amendment, we have an opportunity to close those loopholes that exist in the farm bill that allow enormously large operators to receive millions of dollars in taxpayer subsidies.

It is our duty, I believe, to tighten the rules on who qualifies for farm programs and to make sure those people who do receive benefits are, in fact, actively farming.

First, it would limit an individual's or entity's total amount of direct payments and countercyclical payments to $75,000 in any fiscal year.

The current farm bill permits individuals to receive $80,000. The House farm bill allows individuals to still $125,000; and the Senate bill, as it is before us, allows a $100,000 payment.

Second, our amendment limits an individual's or entity's total amount of payments under a marketing assistance, or LDPs, to $150,000 per crop per year.

Third, our amendment puts some real teeth into the application of the triple entity rule, which virtually doubles the statutory payment limitation for certain entities.

Our amendment tracks the new limitations on farm program payments through sole proprietorships or individuals, entities, partnerships, or other arrangements directly to the individuals.

With the implementation of a direct attribution of benefits, we eliminate the application of the triple entity rule to participate in multiple entities for the purpose of merely having more and more subsidies from the farm program.

To address situations where a husband and wife are indeed both active on the farm, we allow for a $50,000 add-on over the combined total of limits for individuals, resulting in this $275,000 limit. Simply put, our amendment cuts by 50 percent the huge subsidies permitted under the House farm bill proposal, and under the 1996 farm bill the total payment limit is $460,000. Under the Senate farm bill it is $500,000; and under the House bill, it is $550,000. We come up with $275,000.

Savings from the payment limits go to an array of needed areas: to help beginning farmers, to help with rural development, to help with nutrition and commodities programs, and to assist with crop insurance—almost $1.3 billion over the lifetime of this effort.

If we want to have a farm program that has credibility with the Nation at large, and if we want to direct farm benefit programs to the people who most need them, we need to pass this amendment. I believe that is one of the key reforms that is required for a farm program to have the kind of public support it deserves to have in this Nation. I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mrs. LINCOLN. Madam President, I yield 5 minutes to the distinguished Senator from Alabama.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Alabama.

Mr. SESSIONS. Madam President, I appreciate the opportunity to talk on this issue. Our phones have been ringing off the hook from farmers in Alabama. I think in the last day or so, we have had in excess of 60 calls. There are very concerned about this amendment, and it has become clear it has a real potential to damage agriculture, particularly in the southern region.

The fact is that cotton, one of Alabama's top cash crops—the cash crop—is expensive to grow. $350 an acre. The cost of a new cotton picker is $300,000-plus. That is a significant investment. As the years have gone by, cotton farmers have realized they cannot make a living on 200 acres, and they cannot pay the cost of their equipment and all the investment in producing cotton on smaller acreage farms.

What has happened is they have leased farms from elderly people who don't want to have the ability to farm, but renting their land produces some income for them in their retirement age. Widows who do not choose to farm the land make a little income from renting. Then there is the whole infrastructure around the farm.

My personal history has been in the farm community. That is where I grew up. The first 12 years of my life, my father had a county store. He had a grist mill in that store and actually ground their own corn for farmers in the neighborhood. He sold them horse collars and nails and everything else, including all their groceries, as they did their farming in the community.

Later, he bought a farm equipment company, sold International Harvester equipment—hay balers, bush cutters, cotton pickers, and all the tractors and line of equipment that go with that, pickup trucks and so forth.

There are a lot of people involved in agriculture. For us to go in and try to limit the size of farms in an odd way by not allowing them to receive the same benefit that a smaller farm does is a mistake if we think that is going to somehow create more small farms.

What will happen? We are going to lose a lot of the infrastructure that goes with agriculture in our rural areas. It will impact the farm equipment dealer. It will impact the grocery store. It will impact the hardware store for the feed seller, fertilizer seller, the herbicide dealer—all of that infrastructure will be reduced.

I am concerned that through a backdoor effort that some have various reasons to support—they believe this does not impair their region and some because they believe it will reduce production in America and therefore somehow help in other ways—all of these are back-door efforts that ought not to be accomplished in this method.

If we want to debate, let's debate. I don't believe this is the way to accomplish it. I think this amendment will
have a tremendous adverse impact, particularly on the farmers who are calling me. I have talked to them personally. I have been traveling the State and talking with farmers personally. They are very concerned about this amendment. It could hurt substantially.

I join with the remarks of Senator HUTCHINSON and Senator LINCOLN and appreciate their eloquent thoughts. I wanted to share that additional in-sight. I also appreciate the insight of Senator HARKIN who will be speaking on this amendment as well.

We are at a point where we can do some real damage to agriculture in Alabama and the South. I urge the Senate not to do that. I urge Senators to vote no on this amendment.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. I yield 7 minutes to the distinguished Republican leader of this legislation, Senator LUGAR.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Madam President, this is a modest amendment. I stress “modest.” In the event that Senators still wish to discuss the issue, I will have another amendment for the record which has a much more striking possibility for reform.

Nevertheless, this is important. I am surprised at the vehemence and difficulty in the debate I have heard thus far. I am trying to determine, at least in my State, what the implication will be from the amendment. I went, as many have, to the Environmental Working Group Web site and reviewed a printout of the last 5 years, 1996 to 2000, and who in Indiana might even be slightly affected by this.

The Web site points out there were 98,835 recipients of farm subsidies in Indiana during that period of time. There are 6, out of 98,000, who would be affected by this.

Our State is not inconsequential in agriculture. As a matter of fact, with the number of farmers we have, it does not rank, as it turns out, in the top 5 States that receive farm subsidies, but we receive quite a bit. To find there are only 6 entities that could slightly be affected by this seems to me to make my point because 98,000-plus others would not be affected.

This is not unique to the State of Indiana. I am trying to determine, in the Union, to go to the top 10 percent.

I examined the Web site for the State of Arkansas, having heard the eloquence of my distinguished colleague from Arkansas. There the skewing of the payments is slightly greater: 73 percent of the money goes to just 10 percent of the farms. The database indicates 4,822 recipients average $430,000 each in a 5-year period of time. That took up 73 percent of the money. Arkansas, as a matter of fact, received slightly more money than Indiana during the 5-year period of time—something close to $2.8 billion as opposed to $2.7 billion, with only half as many farmers.

Leaving aside that anomaly of the farm bill, I then went to the same database to try to find out how many farm-ers would be affected. In Arkansas, as I pointed out, only 6 would be above the $275,000 times 5, which would be the relevant standard for the 5 years that are given here, 1996 to 2002. The printout in Arkansas indicates there are 583 farms that would have been affected in the 1996-2000 period. That is quite a few more than six. Therefore, I understand the eloquence of the distinguished Senators from Arkansas who have received calls from each of the 583 recipients who have jammed the switchboard.

Let me accept the fact that this is quite a quantum leap, there are 48,000 farmers in Arkansas. These farmers represent slightly more than 1 percent of the farmers of that State.

I agree that the farm bill will have to face the fact we have a system which is so skewed toward the extraordinarily wealthy, toward the huge farms. I am not one to go into demagoguing because a farm is big, but I think taxes are often proportionate to property. If that bigness is rewarded by extraordinary millions of dollars of farm subsidies while, at the same time, all of us plead for the family farmer for retention of that tradition, this honest person trying to till the soil, when in fact we are talking about entities that are sophisticated. Thank goodness that is so. I pray each one of our farms will become more so in world competition.

However, it is another thing to move from a system that is more sophisticated and competitive to the thought that we ought to subsidize, in a very skewed way, the wealthiest of all farm entities. I think that is fundamentally wrong. I hope it is stopped.

This amendment is only going to clip at the top. Six farms in Indiana, for example. We are not unique. Taking a look at data in South Dakota, fewer than two dozen farms would find problems. That State receives about the same amount of dollars, as Indiana, and a great many fewer farmers likewise. Even then, in the skewing of South Dakota, the top 10 percent get 55 percent of the payments, somewhat more leveled off, but well over half at just 10 percent. Again and again this is an interest in whether the money that would be saved, even from this small clipping, would increase the initiatives for future agriculture and food systems in our agriculture bill from $120 million of research a year to $225 million beginning in fiscal year 2003 and continuing through 2006. In terms of overall agriculture—all the farmers of this country, the competitiveness of our system—clearly that is a better expenditure than putting the farm payments already have extraordinary success and who are accumulating more as we proceed.

I thank the Chair.

Mr. FITZGERALD. Madam President. I rise today in support of the Dor-gan-Grassley amendment regarding payment limitations.

Last year, as many as twenty Fortune 500 companies received farm sub-sidies, while hard-working family farmers struggled to survive near record low commodity prices. The U.S. Department of Agriculture reports the largest 18 percent of farms receive 74 percent of federal farm program pay-ments, and the Associated Press recently reported that over 150 people would save more than $1 million in farm subsidies in 2000. In 1999, 47 percent of farm payments went to large commercial farms, which had an average household income of $135,000.

I believe that these payments disproportionate need to help, and one of the things that we are going to make sure of is to restruc-ture the farm program. One year is that the money goes to the people it is meant to help,” he concluded.

Recently, I joined my colleagues Senators GRASSLEY and DORGAN as an original co-sponsor of the pending amendment to cap annual federal farm payments at $225,000 per individual and $275,000 per married couple.

This amendment would help ensure that only active farmers receive farm payments. Common sense should dictate that you should be required to be an active participant in “farming” to receive “farm” payments. This require-ment should help ensure that corpora-tions and multimillionaire tycoons no longer feed at the federal trough. If you don’t till the soil or drive a combine at harvest, you shouldn’t be taking ad-vantage of a program intended for farmers who need the assistance.

While the current farm bill establishes caps on government payments to farmers, unfortunately, these payments and the farm program next year is $225 million per individual and $225,000 per married couple.

This amendment would help ensure that only active farmers receive farm payments. Common sense should dictate that you should be required to be a farmer to qualify for farm payments. The payment amount should be limited to $225,000 per individual and $275,000 per married couple.

Common sense should dictate that you should be required to be an active participant in “farming” to receive “farm” payments. This requirement should help ensure that corporations and multimillionaire tycoons no longer feed at the federal trough. If you don’t till the soil or drive a combine at harvest, you shouldn’t be taking advantage of a program intended for farmers who need the assistance.

While the current farm bill establishes caps on government payments to farmers, unfortunately, these payments and the farm program next year is $225 million per individual and $225,000 per married couple.
costs add to producers’ cost of production and decrease their competitiveness in world markets. If large commercial farmers know that they can only receive a fixed amount of federal farm payments, they will be less likely to drive up prices and be less likely to outbid their neighbors or young beginning farmers at farmland auctions.

Large farm subsidy payments to super-wealthy individuals and companies has driven up scrutiny of our farm programs and threatens to undermine public support for these programs. I believe this amendment to the farm bill is a positive step not only toward ensuring those families who most need federal assistance receive it, but also to reaffirming public confidence that farm programs are vital to our nation’s agricultural community.

We owe it to our nation’s farmers to ensure that farm payments are going to those who need them. We owe it to taxpayers to protect their investment in our agricultural economy. The amendment proposed today is a positive step towards ensuring more fairness in our valuable farm subsidy programs.

Mr. DURBIN. Madam President, I rise today as a supporter and a cosponsor of the amendment introduced by Senators DORGAN and GRASSLEY.

The Dorgan-Grassley amendment would limit the amount of direct and counter cyclical payments to $75,000 annually, limit marketing loans and loan deficiency payments to $150,000 annually; and provide a husband and wife allowance of $50,000 annually. Also, I might add, individuals who earn more than $2.5 million in adjusted gross income (net) would not be eligible for payments.

In short, the proposal would reduce the ceiling on annual crop payments to individual farmers from $460,000, under current law to $275,000. Furthermore, the amendment is expected to save approximately $1.2 billion over 10 years. The Dorgan-Grassley amendment would limit the amount of individual payments to $275,000 per year per producer, and $500,000 per family farm. In other words, if a farm was single or a couple, the payment limitation would be $275,000 per year per producer. If a farm was a family farm, the payment limitation would be $500,000. The House-passed version of the farm bill exacerbates this situation. It raises the payment limitation to $550,000 per year without closing the loopholes—loopholes that allow large producers to receive much more than that. A comprehensive review of past farm payments show that 10 percent of the producers—with the largest farms—received almost 70 percent of the total assistance. How can we support millions in government assistance to a very few rich farmers in a very few States?

The House-passed version of the farm bill exacerbates this situation. It raises the payment limitation to $550,000 per year without closing the loopholes—loopholes that allow rural reverse Robin Hoods to continue sucking government payments away from family farms and onto million-dollar plantations. The bill that we are debating today in the Senate provides for a limit of $500,000 per year, again preserving the loophole that allows a few producers to receive much more. The Dorgan-Grassley amendment not only closes the loopholes but also limits total benefits to $275,000 per year per producer.

Current law and both the House and Senate version of the farm bill also allow for payments to go to absentee landlords not living on their farms or involved in their day-to-day operation. The Dorgan-Grassley amendment fixes that injustice and restricts recipients of federal payments to provide 1,000 hours per year in work related to the operation of that farm. Further, individuals with more than $2.5 million in adjusted gross income will not be eligible for assistance. I cannot believe that anyone would oppose this provision. Who advocates making farm payments to farmers who don’t farm, or even live on a farm? Who is in favor of providing income security for individuals with some of the highest incomes in the Nation?

Agriculture is the backbone of America’s rural economy, and for Wisconsin it is the backbone of the State’s economy. Nearly 18,000 small- and medium-sized dairy farms make up Wisconsin’s rural landscape. Their survival in a volatile marketplace is one of our top priorities. I am pleased that the Senate version of the farm bill recognizes the importance of dairy and creates a safety net for producers during periods of depressed prices. One important component of that dairy program is that payments are limited to a producer’s first 8 million pounds of production—that is the average production from a herd of about 400 cows. While I would have liked to see a lower cap—Wisconsin’s average herd size is closer to 70 cows—this provision will help to target payments to those who really need the assistance.

The same cannot be said of payments made to producers of traditional row crops under the 1996 Freedom to Farm bill. It was estimated that a single producer of row crops to a maximum of $460,000 in government payments per year. However, loopholes in the law have allowed large producers to receive much more than that. A comprehensive review of past farm payments show that 10 percent of the producers—with the largest farms—received almost 70 percent of the total assistance. How can we support millions in government assistance to a very few rich farmers in a very few States?

First, this amendment will reduce already-existing payment limitations. A limit on the total annual payments a person can receive has been in the 1970 farm bill and has remained in place since. Under current law, payments are limited to $460,000 per farm. The Senate Farm Bill would slightly increase this payment limitation to $500,000.

Farm groups object to any further reduction in the payment limitation—as the Dorgan-Grassley amendment proposes—because of the high input costs that large farms with high value crops have. For individual farmers, the Dorgan-Grassley amendment would limit payments to $225,000. For married couples, the limit would be $275,000. I believe this is a reasonable amount.

Right now, about 10 percent of the farms get 60 percent of the government payments. Last year, the Federal government paid California farmers $780 million in subsidies, with primarily large cotton and rice-producing farms receiving 51 percent of the money. But only 9 percent of California’s farmers get crop payments.

Second, the Dorgan-Grassley amendment requires the person receiving the payment to be a farmer. A tenant must supply at least 50 percent of the labor or the money, whichever is less, for a farm in order to collect a payment. This means family members receiving payments have to be actively farming, not living in New York City and listed as a “farmer” for the sole purpose of doubling the current payment limitation.

These farm payments are real dollars paid for by taxpayers. And there have

need to strengthen our homeland defense, we have even more of an obligation to spend our farm dollars wisely. Now is the time to make sure farm payments go only to farmers who need the money to farm—not to millionaires who need to make mortgage payments on their city penthouses. The Dorgan-Grassley amendment restores integrity to our farm programs, reduces pressure on land rents and prices, dampens overproduction and raises farm income for our small- and medium-sized family farmers.

I am proud to support this amendment in the name of taxpayers and struggling family farmers in Wisconsin and across our nation, and I urge my colleagues to do the same.

Mr. FEINSTEIN. Madam President, I rise in support of the amendment offered by Senator DORGAN and Senator GRASSLEY that would limit farm support payments.

The best way to think about this amendment is to understand its three components. The amendment would:

(1) Establish a payment limitation ensuring that government support will provide only a true safety net for the needy farmer;

(2) Require individuals receiving farm support payments to be farmers; and

(3) Exclude millionaires from receiving any farm payment.

First, this amendment would reduce already-existing payment limitations. A limit on the total annual payments a person can receive has been in the 1970 farm bill and has remained in place since. Under current law, payments are limited to $460,000 per farm. The Senate Farm Bill would slightly increase this payment limitation to $500,000.

Farm groups object to any further reduction in the payment limitation—as the Dorgan-Grassley amendment proposes—because of the high input costs that large farms with high value crops have. For individual farmers, the Dorgan-Grassley amendment would limit payments to $225,000. For married couples, the limit would be $275,000. I believe this is a reasonable amount.

Right now, about 10 percent of the farms get 60 percent of the government payments. Last year, the Federal government paid California farmers $780 million in subsidies, with primarily large cotton and rice-producing farms receiving 51 percent of the money. But only 9 percent of California’s farmers get crop payments.

Second, the Dorgan-Grassley amendment requires the person receiving the payment to be a farmer. A tenant must supply at least 50 percent of the labor or the money, whichever is less, for a farm in order to collect a payment. This means family members receiving payments have to be actively farming, not living in New York City and listed as a “farmer” for the sole purpose of doubling the current payment limitation.

These farm payments are real dollars paid for by taxpayers. And there have
been a flood of newspaper articles recently to shed light on exactly who is receiving them.

Third, under this amendment, an owner or producer will not be eligible for a payment or loan if the owner’s income for the previous 3 taxable years exceeds $2.5 million. Nothing in current law prevents millionaires from receiving federal payments. Farm groups object to this because they object to any “net income” test.

This amendment would save $1.295 billion over 10 years, which will alternatively fund the following:

$810 million for various nutrition programs, including: $250 million to raise the standard deduction for food stamp eligibility to households with children. $315 million to increase the shelter expense deduction. And $34 million to help with participant expenses in education and training programs.

$330 million for the Initiative for Future Food and Agriculture Systems, which will stimulate the capacity of California benefits from. This initiative provides competitive grants for biotechnology, genomics, food safety, natural resources, and farm profitability.

$161 million for research and development of new crops, increase crop insurance initiatives. $5 million for Beginning Farmer & Rancher Ownership Loan Account Funds. And $46 million for Non-program farm Loan Deficiency Payment eligibility and to Restore Beneficial Interest with regards to LDPs for the 2001 crop.

I will vote for payment limits to restrict millionaires from receiving federal farm payments when they obviously do not need them. I believe we should ensure farm payments provide a safety net for the truly needy.

Mr. KERRY. Madam President, I rise today in support of Senator DORGAN’s amendment to the farm bill, S. 1731. This amendment closes a loophole that in the past allowed people who are not farmers to collect subsidy payments. I support farm policy that requires a farmer to supply at least 50 percent of the labor or 1000 hours of work, whichever is less, in order to collect a farm subsidy. In addition this amendment includes a net income test so that farmers who have adjusted gross income of over $2.5 million three years in a row are not eligible for federal payments.

Senator DORGAN’s amendment ensures that farm aid will target the people who need it the most, the small family farmers that actually work the land and are the lifeblood or our rural communities. It is a pleasure to support this amendment.

The PRESIDING OFFICER. Who yields time? The Senator from Georgia.

Mrs. LINCOLN. How much time remains on our side?

The PRESIDING OFFICER (Mrs. CLINTON). The Senator has 13 minutes. Mrs. LINCOLN. I yield 5 minutes to the distinguished Senator from Georgia.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. MILLER. Madam Chairman, I have tremendous respect for my colleagues from Iowa, North Dakota, and Indiana. But I must rise in strong opposition because it would not only cripple the agricultural community across this Nation, it would wipe out agriculture as we know it in the South. Passage of this amendment would result in many traditional family farmers going out of business in many States.

Do you know what this amendment says to the South? It says: Hold still, little catfish, all I’m going to do is just gut you. Hold still. It says to the South: Step right up. Here’s a new and improved farm bill. But because you had to expand and because you had to diversify to stay in business, you are not going to be eligible.

This amendment punishes the rules in the eighth inning. A change in the rules this late in the game would create tremendous strains on producers to meet the new compliance standards. The Farm Service Agency is already overwhelmed by many of the new programs included in this bill. This amendment would result in increased costs, both to the Government and to farmers.

Supporters of this amendment say that these payments go to the few and the big. I could not disagree more. This amendment punishes the farmer and his family who depend solely on the farm for their livelihood. In my part of the country, this amendment has a substantial operation just to make ends meet. Don’t let these big numbers fool you; these farmers each year take risks equal to or greater than those of their brethren with smaller operations. In fact, I would argue that they are in greater need of support because they are forced to be big in order to be competitive.

Some argue that these payments go to a small number of big farms. Those who say that need to look at the USDA statistics manual. It shows that by far the same big farms produce 80 percent of our agricultural products. We should be supporting those who are fueling this economic engine, not hobby farmers who paint a Norman Rockwell picture of rural America that has passed us by.

We pay a lot of lip service to wanting this country to compete internationally. In fact, it would be a double-barreled shotgun. I plead with this Senate not to pull the trigger. If you vote for this amendment, you will.

In fact, this amendment would give less support to southern farmers than the current farm bill. It would limit individual rights to pursue an adequate way of life in many regions of the country, and it would result in widespread failure for thousands of American family farmers. Let’s face it, this amendment is a poison pill. I urge my colleagues to oppose this amendment.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Madam President, I yield myself 8 minutes.

Madam President, today in New Hartford, IA, at a local cooperative, the price of our corn would be $1.79.
The price of our soybeans would be $3.96. So, obviously, with these historically low prices, we have to have a farm bill, a farm safety net. I want my colleagues to know I take into consideration the plight of the family farmer when I support legislation such as this. 

Since it was a social engineering, this might be social engineering, I thought I ought to start with my explanation of a family farm. It could be a 30-acre truck farm in New Jersey. It could be several thousands of acres of ranching in Wyoming, where it takes 20 acres to feed a cow-calf unit. A family farm, to me, is a farm, not judged by size, not judged by income—a family farm is determined by, first, whether or not the family controls the capital; second, the family does most or all the labor—and I would include in that those people getting dirt under their fingernails most of the time—and, third, that they are going to make all the management decisions.

That is not the definition of a nonfamily farm. It could be a corporate farm, but I don't want to denigrate the word “corporate.” Anyway, a corporate farm, a nonfamily farm, is where somebody provides the capital, they hire the management, and somebody else does the labor.

So we are talking about, in our family, where I don't get to help much but I try to help, my son does most of the work. He has an 18-year-old son in high school who helps, and once in awhile in the spring and in the fall, there is a neighbor, a young neighbor man who works in town, who will come out and maybe work into the night 1 or 2 hours a night, for that person to earn a little more money but also to help bring the crop in quickly, because you have to. 

That is the kind of family farm I talk about when I talk about the family farm. I don't denigrate anybody else's definition of a family farm. I just want you to understand what I am talking about.

When I talk about targeting farm programs to medium and small family farmers, I am not talking about something that is new. I am doing it in what is my understanding of the historical approach of farm programs for 70 years. The first 40 years of that 70 years we didn't have dollar limitations, but we really had lost—when 30 percent of the people were farming, we had a lot of small family farms. There was not any need to put a dollar limit on it. But in 1981, they put a $50,000 limit on it. There were people who figured out, How can I get around the $50,000? How can I get around the $40,000? 

You could write a bill, with the English language the way it is, that is perfect, that covers every instance. So we come back now and come back in a way that I think is historically targeting the farm program towards the medium and smaller farmers.

I did not write anything Senator LINCOLN said, because she said there are some groups out there trying to hit family farmers pretty hard while they claim to defend the family farm. But I want Senator LINCOLN to understand where I am coming from and what I define as the family farm. I don't want to be doing something by subterfuge as do people who really want to hurt the family farm. I simply believe that $225,000 is enough.

But, more importantly, I have to ask the question: If we don't do this, where will it stop? The 1996 farm bill, even with the $500,000 limit, had other ways in which you could get up to $460,000, and the limits that the bill that is before us sets this at $500,000. The House version is even worse. A Republican version, let me say, is even worse—$550,000. That doesn't even include the back-door things that can be used, such as through generic certificates that can go way above these already high limits to bring in the millions and millions that have been talked about here for some units.

I think we have to be very concerned in agriculture today we want a safety net for farmers. A sound safety net for farmers is good for everything that Senator HUTCHINSON said about social and economic stability. It is all about national security as well. But we are spending lots of taxpayer money.

We have to maintain urban support for our farm safety net. Maybe you can say if we pass this bill that we might not have to worry about it again for 10 years. But if you go on for 10 years with these limits and with the bad publicity about what farm programs have been receiving because 10 percent of the farmers are getting 60 percent of all the benefit, where are Senator LINCOLN and I going to be, if we are fortunate to be in the Senate, when the next farm bill comes up if we lose public support because of the outrageous payments that are being received?

We have to start asking ourselves: When is enough enough? How long will farmers have to spend lots of money in this interest from different geographic areas of this Nation.

With this amendment, our farmers in the South—particularly Louisiana farmers who have cotton, and soybeans, particularly our cotton farmers—would be hard hit by this amendment because cotton is an expensive crop to grow. These price caps will be very detrimental to family farmers in Louisiana.

In addition, this amendment, while it attempts to put on price caps, would not necessarily help farmers in other parts of the country. It would simply hurt the farmers in the South and in Louisiana.

Cotton and rice are very expensive crops to grow. We need to have these crops covered when the price turns down.
Finally, while price supports drift over to the larger farmers, it is also the larger farmers who produce most of the crops under the program. I realize some of these numbers are very large, but so is the underlying acreage under production, and so are the ownership interests in those farms.

I support Senator LINCOLN and oppose the amendment on the floor.

I thank the Chair.

The PRESIDING OFFICER. Who yields time to the Senator from North Dakota.

Mr. DORGAN. Madam President, how much time is remaining on our side?

The PRESIDING OFFICER. A minute and 35 seconds.

Mr. DORGAN. Madam President, I respect those who disagree with this amendment. They make compelling arguments from their standpoint.

But I would just ask this: If payment limits are not appropriate at any point, then will we end up at some point with no farmers farming in America but only the largest agrifactories from California to Maine and still be making payments? For what purpose?

My interest in trying to help family farmers survive during tough times is to save you matter because you live out in the country. You are living under a yard light, trying to raise a family and raise crops, taking all the risks, and we want you to be part of our economic future. We want to have broad-based economic ownership on American family farms. That promotes food security in our country. It promotes the kind of cultural and economic society we want. It is not a case of just picking and choosing because we don’t have enough money. Let us have the best price support possible, and when we run out of money, we run out of money. That is the purpose of having a payment limit amendment.

The PRESIDING OFFICER. The Senator is out of time.

Mr. DORGAN. Madam President, is the Senator from Oklahoma ready to be recognized?

Mr. GRASSLEY. The Senator from Arkansas is going to yield time.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. LINCOLN. Madam President, I would like to add to what the Senator said.

Obviously, the problem with the bill is that looking clearly devalues the land for the farmers we represent. The banks are not allowing them to borrow money on the land any longer.

Out of the 130 loans that were presented to one of our local bankers, only 3 of them have been approved. They are waiting to see what happens with this farm bill, particularly this amendment.

Madam President, at this time I yield time to my distinguished colleague and neighbor, the Senator from Mississippi.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. COCHRAN. Madam President, I am pleased the Senate is working to pass a farm bill. We need to complete action on this bill as soon as possible to send a signal that we could have a new farm bill implemented for the 2002 crop-year.

One of the primary objectives of new farm legislation should be to improve the predictability and effectiveness of the financial safety net available to farmers and to eliminate the need for annual emergency assistance. Unfortunately, the payment limitation amendment that we are debating now will have the opposite effect.

If this amendment is adopted, it will be a very serious and unfair—even punitive—act that will be catastrophic for southern agricultural interests. The costs of production of cotton and rice are much higher than corn or soybeans. According to agricultural economics analysts at Mississippi State University, the cost of producing 1 acre of cotton is approximately $550, while the cost of producing 1 acre of corn is about $350, and for soybeans it is only about $130 per acre.

On a 1,000-acre cotton farm, the production costs would be $200,000 a year higher than for corn, and $450,000 higher than for soybeans. This amendment clearly would be unfair to farmers who produce high-cost crops such as cotton and rice. Since 1985, the marketing loan program has been the centerpiece of our Nation’s farm policy. It provides reliable and predictable income support for farmers while allowing U.S. commodities to be competitive in the global market. If this amendment is adopted, the marketing loan program will be undermined and essentially will become useless.

It is expected by the prognosticators that farm commodity prices will remain low and some farm income will be $8 billion less this year than last year. Considering this bleak forecast for our farm economy, it does not stand to reason that Congress should impose new rules and regulations that unduly restrict Government assistance at this time of serious economic distress.

Many southern farmers work larger tracts of land because the tight profit margins lead to efforts to enhance efficiency through economies of scale. And cooperative farming also helps improve efficiency for some.

I heard the complaint that as much as 80 percent of the payments go to only 20 percent of the farmers. But these farmers are producing 80 percent of our Nation’s farm output. If limitations on support are made more restrictive, a significant number of farmers will not be able to participate in the farm program. If this amendment is adopted, I predict the pressures for emergency assistance will build and will end up being more costly in the future.

Madam President, I strongly urge the Senate to reject this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. GRASSLEY. Madam President, I yield 5 minutes to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Madam President, I yield 5 minutes to my colleague from Iowa for his amendment, and also Senator DORGAN as well.

I have great respect for Senator COCHRAN. When it comes to agricultural policy, I look to Senator COCHRAN for advice. I just happen to disagree with him on this amendment. I am going to vote for his substitute. But I do think a limitation is in order.

I was kind of shocked to find out that, in some cases, some farms have been farming the Government quite well, and they make more money from the Government than they do from the marketplace. There has to be some limit. If not, are we going to allow people to just make millions off these programs?

To a lot of us, this agricultural policy is kind of arcane, and maybe it is hard to understand. If you are not from an agricultural State and you do not wrestle with it a lot, it is kind of difficult to understand. I have tried to understand a few things: A few people are doing a lot and getting a lot of money from the Federal Government. That does not mean that their net is good. They may lose a lot of money. They may get a lot of money from the Federal Government and lose a lot of money. I do not doubt that that happens. It happens a lot.

But how much should Uncle Sam be writing in checks to individual farmers and their families? Shouldn’t there be a limit? I happen to think there should be a limit.

I know I have some constituents who are listening right now who are very disappointed in what I am saying because it is going to cost them a lot of money if this amendment is adopted. They have told me that. I respect them. And some of them are family farmers. But there has to be some limit.

I made my career in business. I did not get Government help and did not want Government help. But if we are getting Government help, there still should be some limit on what Uncle Sam is going to do.

Looking at some of the charts—just looking at the top 10 farm subsidy recipients—my colleague says, a couple of those are co-ops, but they were averaging almost $10 million a year. And it goes on down to different farms. Maybe some of those are individual farms, but they are in the millions and dollars a year.

Should Uncle Sam be writing checks to different groups, organizations, family farms, and so on, in the millions? I just happen to think a couple of Oklahomans getting in the millions. I do not think we should do that.

Let’s look at the present farm bill. The present farm bill has basically a
cap of about $460,000. You have the flexibility contracts of $80,000, loan deficiency payments of $150,000. That is $230,000. You can have two other farm entities and get half of those again, and so that is another $115,000. Adding $135,000 to that total, $460,000.

But also under the present farm bill some people may say, wait a minute, I thought some people were getting millions. You have no limits on what are called certificate gains, so you can get well above $460,000. That is present law. That is the reason we find some recipients doing quite well. I say “doing quite well,” meaning getting a lot of money. They may not be doing very well, but they get a lot of money from Uncle Sam.

Looking at the proposal by Senator HARKIN, the underlying bill, they can do better. Present law is $460,000. Now that level goes up from $75,000 to $100,000. So now it is $250,000. You still have the two other farms that can get 50 percent of the current $250,000. So the combination of three farming entities can get $500,000.

Also, under Senator HARKIN’s bill, there are no limits on the certificate gains, no caps, so they can get more than $500,000. So if you look at the charts from the Environmental Working Group that say some people are making this much, they can get a lot more under the Harkin bill than they could last year, and there’s still no cap. So you have almost unlimited payments. If somebody happens to be farming—and you have market prices below loan prices—they can get hundreds of thousands of dollars.

Let’s look at the Grassley amendment. The Grassley amendment says we ought to have a limitation. So he has flexibility contracts at $75,000, loan deficiency payments of $150,000, for a total of $225,000, and if you made another $250,000, that would be a total of $475,000. But guess what. The certificate gains are included in that $275,000, whereas under the Harkin bill, and under present law, the certificate gains are not counted.

So there is a cap under present law. Under the Harkin bill, there is no cap. This is saying $275,000. Well, $275,000 is a lot of money. Granted, if somebody is losing $400,000, they may say: I am still losing money.

I am sympathetic to that. I just don’t think there should be an unlimited amount we are going to be writing in checks. Somebody can say: Write us a check for $5 million; I just lost $6 million. Where are we going to stop? I am not a big fan, as some people know, of loan guarantees, whether we are talking about steel or airplanes. I have some reservations about the Federal Government making loan guarantees, subsidizing business, and so on.

The amendment of the Senator from Iowa makes good sense. I urge my colleagues to adopt it.

I ask unanimous consent to print in the RECORD a chart that shows the percentage of payments made by income. It shows the upper 1 percent getting 19 percent of the payments, and the upper 10 percent getting 67 percent of payments in agriculture.

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

\[
\begin{array}{|c|c|c|c|}
\hline
\text{Percent of recipients} & \text{Total payments} & \text{Payment per recipient} \\
\hline
\text{Top 1} & 19 & $13,470,787,263 & $558,698 \\
\text{Top 2} & 20 & $20,841,609,894 & $432,210 \\
\text{Top 3} & 21 & $26,561,273,217 & $387,219 \\
\text{Top 4} & 22 & $34,321,034,227 & $303,355 \\
\text{Top 5} & 23 & $44,662,381,921 & $227,887 \\
\text{Top 6} & 24 & $56,229,393,454 & $209,040 \\
\text{Top 7} & 25 & $70,654,046,911 & $188,473 \\
\text{Top 8} & 26 & $87,689,776,851 & $175,357 \\
\text{Top 9} & 27 & $108,324,537,288 & $162,786 \\
\text{Top 10} & 28 & $129,583,849,890 & $150,045 \\
\text{Top 11} & 29 & $151,345,524,091 & $139,148 \\
\text{Top 12} & 30 & $173,564,686,841 & $129,679 \\
\text{Top 13} & 31 & $200,045,027,648 & $120,552 \\
\text{Top 14} & 32 & $220,103,624,478 & $114,581 \\

\text{Top 20} & 38 & $373,985,365,971 & $91,219 \\
\hline
\end{array}
\]

Mr. NICKLES. I yield the floor and thank my colleagues.

The PRESIDING OFFICER. Who yields the floor to?

Mrs. LINCOLN. Madam President, how much time remains?

The PRESIDING OFFICER. There is no time remaining in opposition. There is 1 minute 36 seconds remaining on the proponents’ side.

The Senator from Iowa.

Mr. GRASSLEY. Madam President, I yield myself the remaining time on our side.

We have an opportunity to do what has been a part of farm programs for 70 years: try to target the safety net for farmers to medium and smaller family farmers. We have an opportunity to save the taxpayers the money that would go to big corporate farms. We have an opportunity to bring money into the Food Stamp Program, and we are adjusting the formulas to reflect higher payments for shelter and for utilities and for heating homes so that the Northeast of the United States will be able to help some of their low-income people to a greater extent than they have been through the present formula, the Food Stamp Program. That is the use of the money.

The most important thing is targeting assistance to family farmers. The legislation before us disproportionally benefits the Nation’s largest farmers and in most cases nonfamily farmers. In fact, this farm bill unnecessarily increases payment limitations established in the present farm program which already allows up to $460,000.

We have a chance to do a very good thing from the standpoint of bipar-
The motion to lay on the table was agreed to.

AMENDMENT NO. 2827 TO AMENDMENT NO. 2471

The PRESIDING OFFICER. Under the previous order, the Senator from Indiana is recognized to offer an amendment regarding payment mechanism. The Senator from Indiana is to be accorded prior to a vote in relation thereto.

The Senator from Indiana...

Mr. LUGAR. Mr. President, I alert all Members and staff as they prepare to go to lunch, we will have a debate for the next 2 hours and vote at approximately 3:05.

This amendment is a radical adjustment. I am hopeful Senators will be alert to the particulars as well as to the general philosophy of the amendment. It deals with the commodity title. As I have stated on other occasions, the other titles of the bill have had strong bipartisan support. As a matter of fact, we have improved them in the amendment process, especially a nutrition bill that Senator DURBIN addressed this morning in his amendment.

My criticism of the commodity area of the farm bill is substantial. It comes down to the first point that we are debating time in which our Nation is apparently in deficit finance, which means essentially we are spending more money as a government than we are taking in. That means each dollar of additional deficit comes from the Social Security trust fund. Most lament that; both parties, through a lockbox strategy or through pledges, want that saccrosanct and recognize the public as a whole does not like the idea of the Social Security trust fund being invaded. That dislike is compounded by predictions that it will occur perhaps for many years, not simply for the year we are in or, as a matter of fact, the year we just concluded.

I make that point not to say we should not proceed with the farm bill. We are going to do that. I support that. However, we have better be thoughtful and prudent. I am suggesting that the current commodity title that lies before the Senate, plus or minus whatever adjustment amendments are brought to it, is about a $41 billion expenditure over 5 years of time, which is expanded into the 5 years of time. The Secretary of Agriculture already has expressed objection on the part of the administration to that.

The amendment I will offer today is a $25 billion payment for a 5-year period, as opposed to $44 billion. This is for 5 years. It is a very substantial change. It is a prudent change, in my judgment.

Now my second point I want to make is, if the first was not imperative enough in terms of deficit finance and money we do not have, the money that would be spent in the Daschle-Harkin bill would go—as we have heard again and again in the debate, approximately two-thirds of the money would go to approximately 10 percent of the farmers.

It is even more concentrated than that. In this bill, we have had in the past, and this bill, essentially deal with the basic row crops of cotton, rice, soybeans, corn, and wheat. That has been the case since the New Deal days in the 1930s and still remains the case in this bill. There are smaller amounts of money, from time to time, to vegetable crops—to dairy, to tobacco, to peanuts—but essentially the money is on the row crops.

That means that essentially six States receive half of the money because these are large States and they have row crops as opposed to agriculture of different sorts. So the bill is highly skewed. It is not original in that respect. That has been true of this legislation for many years. Nevertheless, we compound that problem in this bill.

To lay it out so all of us can understand it, 60 percent of farmers, more or less, do not receive any subsidies; 40 percent receive all the subsidies. Of the $25 billion in this amendment, 40 percent of those receive two-thirds of the subsidies.

As I illustrated in debating the last amendment with regard to the limitation of $275,000 for a husband and wife or $225,000 for a single farmer, in my State of Indiana, we have a very different result than was the case in the State of Arkansas, the proponents of the legislation. But in either case there are very few people who benefit—who receive, actually, more than $275,000 now. Only six farmers in Indiana, apparently 583 in the last iteration in Arkansas. We have 98,000 recipients of subsidies in Indiana; Arkansas has 48,000. So any way you look at it, 6 or 583, those particular farmers receive extraordinary sums of money, which which skew the payment situation in a way that strikes most persons who are talking about retaining the family farm and supporting the modest farmer as very strange.

If in fact our intent was to save the family farmer, to cashflow those farms that are in trouble, it would appear that we could probably do better than have one-third of the money going to 90 percent of the farmers. As a matter of fact, it becomes more progressive in the other way as you proceed down through the ranks.

So I add that thought. Not only are we in deficit finance, but we have a formula, that, by its very nature, is going to reward those who are very large. Some would say, Why is that a bad idea? Is it not the American ideal, as a matter of fact, to succeed, to accumulate more land, to have more crops? Indeed, it is. The basic question is not one of merit. No one is being prohibited from the marketplace. The question is whether subsidies that were meant to save family farms contribute to that process.

The third point I want to make is there is strong evidence that our past farm bills—the immediate one we are working on now, the bill of 1996, the one of 1991 before that—have offered incentives to produce more. Why is that bad? Because we almost guarantee that, absent a huge weather problem or a total breakdown in the world trading system because of war or pestilence or disaster, we will have more of each of the basic row crops almost every year.

There are good incentives, in fact, to produce more, because the level of production brings its reward in higher subsidies. Therefore, Senators come to the floor and lament the fact that prices have never been so low. Well of course. The very bills that we are passing almost guarantee they will be stomped down every year. It is impossible to think of a scenario in which we are more likely to have this problem.

Mr. President, I got so carried away in my arguments, I failed to call up the amendment. So, as I will do that at this point, hopefully having whetted the appetite of the Chair.

I call up the Lugar amendment and ask the clock start running on debate time.

The PRESIDING OFFICER. The clerk will report the amendment. The legislative clerk read as follows:

The Senator from Indiana [Mr. LUGAR] proposes an amendment numbered 2827 to amendment No. 2471.

Mr. LUGAR. I ask unanimous consent the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

[The text of the amendment is printed in today's RECORD under "Amendments Submitted."

Mr. LUGAR. Mr. President, the dilemma for the small farmer is compounded because, in essence, as overproduction occurs, prices remain very low. As a result, it is not surprising that many farmers and, in fact, 100,000 farmers and, in fact, 98,000 farmers, actually, more than $275,000 now. Only six farmers in Indiana, apparently 583 in the last iteration in Arkansas. The Senate is recognized to offer a substitute amendment. If they produce on those premises. If they produce on those premises. If they produce on those premises. If they produce on those premises.
definition. So this has led to a certain expansion, in some States, in which this would be counterintuitive.

But the heart of the matter is that about 350,000 farmers out of the 1.9 million who do at least $1,000 or more, those 350,000 roughly five-sixths of the bill, all of it, in terms of crops or livestock. So essentially some have said farm policy is aimed toward them.

But at that point, very clearly, Senators hold on. That leaves 1.6 million entities out there, and some of these are family farmers. I know them. They are my constituents.

I would simply say the degree of concentration, often lamented, continues fairly rapidly. It does so, in part, because our farm bills, with very generous subsidies, support loans from banks and they have apparently led to an increase in land values in most States. That I witnessed with regard to estimates to land values on property in Indiana from 1956 onward. I have had responsibility for that farm. It is exciting to watch. Thank goodness we did not have to buy and sell during that time; we could simply watch the change on a balance sheet.

But clearly it was an exciting experience throughout the 1970s, watching land values, as Purdue estimated them, go up and go up, sometimes by double digits in a single year. So as I took a look at my 604 acres and began to multiply by 2 or 3 those values, that was pretty exciting.

It was pretty depressing; after Paul Volcker and others put the skids on interest rates to take the Federal Government off in a different way, the change of farmland in Indiana plunged by as much as 50 percent to 70 percent.

That kind of jarring situation, many farmers who have lived a long time have become used to. But we are now, much more mildly than in the 1970s, but progressively, seeing those land values increase. For the general public, this seems strange.

The general public looks in on farming, and they ask: Why are farmers coming into the Senate pointing out that the prices have never been so low? The prospects have rarely been so dim with people lined up at the country banker falling to get loans, and all the signs are that even farmers who appear to be fairly prosperous are near bankruptcy.

The USDA illustrates this fine point. They point their finger as you look at the balance sheet farm of American agriculture, the assets have been rising throughout the last 5 years. As a matter of fact, the net worth of farmers has been increasing. How can this be if operating results are so dismal?

In the first instance, results have not been that dismal. In the year we just finished, 2001, it appears that cash income is $59 billion for all of American agriculture. That is plus-$59 billion—not negative. But the real change comes in the asset value of farmland. With the pricing of land moving up, it is apparent that on paper the net worth of farmers is increasing substantially.

I make that point because many bankers, as you visit with them—as the distinguished Presiding Officer certainly has—would say we are counting on these farm bills to keep those values up. Why do you think we are prepared to loan more money or even any money to farms while farmland is not only retaining its value but nevertheless has a robust quality to it?

We then get into a problem in which farmers say: Hang on. Whatever may be the justice or injustice of the farm bill, if you tinker around with that bill very much, you are going to create anxiety with country bankers. They may not make loans. At that point, then, we have a real problem.

It is not my purpose today to try to precipitate a decline in land values. That would be destructive not only of my own farm but to all my neighbors. I just observe, however, that without describing a bubble phenomenon—because it is not that: farms are not running down in asset value situations—there is value there. But we need to be thoughtful in terms of our policies as to how much steam we want to generate into what some would call false values—increases clearly not justified by the forces that are moving from coming from those properties.

The dilemma, of course, for the young farmer we have talked about, we have a section in our farm bill that tries to address credit for young farmers—is an especially important one. If we are to have entry of our young people. As most have pointed out, the average age of farmers seems to increase every year. Demographers indicate it has been true for quite some time, it has been proceeding towards the high 50s. That is not a healthy situation. That is not a healthy situation for a growing, prosperous industry, but it reflects the realities of young people coming through our agricultural schools.

The vast majority go into what might be loosely called agribusiness—not production farming. They are dealing with products that come from that, or marketing, or the espousal of farm interests in foreign trade, what have you. These are valuable skills. But the number of persons heading back to head up these family farms to keep the continuity going appears to be fairly limited. Some years are better than others. But for some years, there appears to be very few candidates for that.

One reason is it is very hard for a young farmer to get credit and to establish a landhold. If you are in a family farm now, that is your best bet. As inheritance tax reforms have occurred, many of us have pointed out they needed to occur because the family farmer is 15 times more likely to be visited by the inheritance tax than other ordinary citizens. The assets are tied up in the land, in the buildings, the visible assets. But if a family can work that out, there is some possibility for the young person. These are fairly small numbers of people. It is disturbing that but one that current farm bills, I believe, have accelerated.

There is also the fact that as we discussed the last amendment on limits, some concerned out farmers, in fact, are renting land from those who have estates, or elderly persons, retired farmers, and others. Indeed, a lot of renting goes on.

The 120-page USDA booklet indicates that 42 percent of farmers who are now involved in production are renting land. Only 58 percent own the land they are farming. That is a fairly large number.

Our farm bills have the tendency to raise the rents in the same way that they have raised the land values; in the same way they raise the possibility for larger loans for expansion or for accumulation of other farmland. None of these trends are new and none should be comforting. Many farmers, as well as Senators, say that is just the way the world works. These are trends that are in place, and we are only going to tweak the system a little bit and hopefully not disturb it a lot, although some Senators have greater ambitions for the farm bill.

They believe, in fact, that a very sizable change is going to occur if over a 10-year period of time, as the House of Representatives looks at it, you put $73.5 billion of additional money into American agriculture on top of the baseline of the regular programs we now have. So a lot of our debate in November and December revolved around the $73.5 billion, as Budget Chairman  said it is. The Bush administration said: Well, we are going to acknowledge that it is there now, and in this year, and so forth. But there now appears to have been an argument over the situation. But some of us looking into this—I am one of them—said it wasn’t in November, and it isn’t there now. We do not have the money, and, therefore, we have to be thoughtful about it.

I simply add that everybody—the President and Senators, with particular emphasis, when it comes to a farm bill. The question we are discussing today is not whether we should have a bill or not.

The amendment that I have offered substituting for the total commodity package, still, by my own admission, is that it is going to cost $25 billion over 5 years—not $44 billion over 5 years but $25 billion. But it is still a sizable sum.

The basic difference in my approach is that I take seriously the thought that we ought to have equity in the payments. By that, I mean it ought to be available to any farm family wherever that family may be in America and whatever that family produces.
That would be a revolutionary step. That is what I am proposing. I started by saying 60 percent of farmers are outside the game altogether. I want to bring them in.

They will occasionally come in when we believe disaster brought about by weather, usually, or some other problem. Therefore, we need relief.

On an ad hoc basis, the Senate from time to time in the appropriations process plugs in some money for what is known as specialty crops or crops other than these five major row crops. From time to time, we have done something for livestock but not very much. We had a debate yesterday about the EQIP program. This has been a way of trying to bring some money so that manure could be controlled and other environmental issues, and, also, some marketing of people waiting to make those changes, so that will be helpful both to production in livestock as well as the environmental and the counties that surround it. But at the same time, livestock people, particularly the pork dilemmas of 2 or 3 years ago when prices reached rock bottom, have not gotten the subsidy.

Sometimes people have wondered historically, why not? They were back in the 1930s when all this began to be passed out. Why haven’t we been in that tradition? But, nevertheless, some, by diversifying, have corn farms, say, and get the money in that route, by spreading at least the risk, and they have imbibed in the farm subsidies in some fashion. All I am saying is, there is no equity, farm by farm, in the farm bill as we have known it. So I want to provide that.

I want to say, in essence, three things. One is that my bill would send money to any farm entity that has at least $20,000 of gross agricultural income coming from it, not the $1,000 which has been the definition of the family farmer. That is too low. It picks up what I think is clearly the so-called hobby farms or the almost incidentally farms that have been a long time. Some might say: But $20,000 is not much of an activity. Nevertheless, in some parts of the country—and given the history of some farms—that appears to me, and to many economists who have looked at the subject, a reasonable threshold point.

So let’s say I am a farmer—male or female—on a farm anywhere in America, producing anything I want to produce, and I can sell it for $20,000. I vote under my amendment, for a $7,000 payment from the Federal Government each year for 4 years, starting with fiscal year 2003, and going through 2006, so long as I continue in the business, I would have to do the $20,000 each of the 4 years. This would not be a historical record but an actual record that I am a farmer and I am doing that kind of business.

And the argument here is that what if you have a situation in which there are two factors here—one a landlord and one a tenant or two farm families, one owns the land and the other provides the machinery and some of the labor, or the land one entity could qualify for the $7,000 payment if both are at risk. If the landlord is simply getting the rent, without risk, then the landlord does not get the $7,000. The tenant gets the $7,000. He has the risk. So it is a question of being at risk and with at least $20,000 of income. Then you receive $7,000.

I make the point that this finally, then, gets us to the threshold question of why we have farm bills and why we have income security. My idea is that we have a genuine safety net, a policy that does not distort land values, does not deplete land values, does not deplete the taxpayer, greater equity to all farmers, the State will get more income security. My idea is that we provide income security for the vast majority of farmers in this way. It means the large farmer still gets the $7,000. We will not be having a debate about $275,000, however. That really moves off into past history. I am talking $7,000 for each family farm at this point.

That raises the question for skeptics of all programs: Why do you send $7,000 to a person in America because he or she is a farmer? We have settled that, he said. I suggest, several times, that we understand there are abnormal risks from weather, from foreign trade, from all the vagaries of history. It may or may not be totally just to those people who make their money at the retail store on Main Square or to those who venture capital into new businesses and lose it or to a whole lot of people who make livings in various ways, but what we are saying is we believe it is important to have a safety net.

What I am saying is, it should be just that, a safety net, not an incentive to produce more and, thus, depress prices, or an incentive to accumulate land using abnormal land values to borrow money, knowing that at some point this cascades is almost bound to lead to difficulty.

It ought not to be a program that excludes young farmers and one that is purely prejudiced against those who choose not to be farmers. Another weak program in which six States receive 50 percent of the money. This really does indicate in every State there are agricultural interests, but they are diverse and they are different. Where there are more farmers, the State will get more money. That is true of distributions of all sorts.

Having sort of recited the outline of where I am headed with this, let me say I believe the amendment I have offered will achieve each of the goals I have in mind: less money paid by the taxpayer, greater equity to all farmers, a genuine safety net, a policy that does not distort land values, does not depress prices, and, finally, does not lead to real problems with our trading partners, whether it be in the WTO or any other trading arrangement.

We debated that issue yesterday as to whether the current text of the farm bill costs $120 billion. We are going up against the $19 billion cap. In my judgment, and that of many others, we risk that. The FAPRI group—the research people at Iowa State and Missouri—said there is a 30.3-percent chance that will occur in 2002, as a matter of fact, this does jeopardize American agriculture.

We can say we do not care what the rest of the world thinks about all this and, after all, that the Europeans are subsidizing in a big way—maybe some others—but we need every dollar of export income. We cannot have countervailing suits or retaliatory mechanisms that abnormally affect certain crops as countries try to find where we are vulnerable and arbitrarily knock down prices. That is what they are trying to hit the whole system.

Furthermore, we are the leaders in world trade. We are the people who really want to expand this. We have to do that if we are genuinely thought about the future of agriculture. To take some type of a myopic view that we simply deal with ourselves, leads, finally, to the fact that is all we will be doing, and it is a limited market.

Beyond even the extra incentives, prices will inevitably go down and stay down because there is no outlet in terms of American agricultural genius.

Let me point out that agricultural subsidies have been distributed according to acreage. Some have said that is the way it ought to be: You do more, you get more. I understand that. To some extent, I recognize, as the President does, that this has led to a situation of roughly two-thirds of the population going into the farms. USDA—more graphically getting down to this 350,000 I talked about—says 47 percent of all the money went to them, almost half to a very isolated group of people. They are very good farmers, but if that is the purpose of the farm bill, that is not what the rhetoric we have been hearing would bring about.

The Daschle-Harkin bill spends the bulk of $120 billion on new fixed farm payments, on new counter cyclical payments, on higher base loan rates for program crops. It, likewise, extends, for dairy, the milk price support of $9.90 per hundredweight through 2006. It also creates a national income support program. Overall, the dairy provisions are expected to cost $2.3 billion over and above the baseline.

A new target price is created for peanut producers, and that is expected to cost $1.2 billion over 10 years, and nearly $700 million more than the House-passed peanut provisions. The CBO projects the Daschle-Harkin bill may cost $120 billion over 10 years,
but its actual cost could be 25 percent or even 50 percent larger if commodity prices fail to rise. That is a pretty good bet. I don’t see how they rise under these conditions.

I am going to have another amendment in the debate that will suggest we take the average payments of the last 3 years of the farm bill. Those have included not only the regular payments, baseline, AMTA, and so forth, but the supplemental legislation we passed each summer. These have all yearly sums of money all told. I am going to offer an amendment that will suggest that the payments, if we adopt the Harkin-Daschle approach, shall not exceed that average of the last 3 years, just so there are some stoppers with regard to some fiscal sanity in this bill.

This becomes an entitlement. If you are out there and you produce the bushel, you expect to get the loan or the payment and not a lecture that, after all, we only budgeted $120 billion.

That is not a part of this amendment, part of the next one, in the event I am not successful with this amendment. But if I am successful with this amendment, we have solved the problem. As I pointed out before, I think what the cost is going to be at that point, nor any incentive to overproduce. In fact, it is very likely that prices will rise as people make rational decisions on what to plant.

Let me conclude this initial presentation by pointing out, for those who have not followed it from the beginning, that this is a complete substitute for the commodities title of the bill. That means all the programs involved in the commodities title would no longer be there and, in fact, in place is a payment of $7,000 to each farmer in America or each entity at risk of $7,000 for a 4-year period of time, providing the safety net I believe we want, with strong sanctions against overproduction in a very predictable and equitable manner. I yield the floor and suggest the absence of a quorum. I ask unanimous consent that the order for the quorum call be rescinded.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, I am pleased to announce I have received a letter from the Council for Citizens Against Government Waste, dated February 7, 2002. The letter states:

DEAR SENATOR LUGAR: On behalf of the more than one million members and supporters of the Council for Citizens Against Government Waste, I am writing to inform you of our support for your amendment to S. 1731, the Farm Bill, which would replace current crop program payments with fixed annual equity payments to eligible farmers beginning in 2003.

Your amendment provides equitable Federal assistance to all U.S. farmers and ranchers, and it saves taxpayers approximately $20 billion over the next five years. Current farm policy allocates every year very large subsidy dollars to the top 10 percent of subsidy recipients, while completely shutting 60 percent of farmers out of subsidy programs.

Your amendment provides a more equitable farm program, a significant improvement over the present system, which provides the overwhelming percentage of government payments to larger farmers rather than smaller farms that are most in need of assistance.

[The Council for Citizens Against Government Waste] will consider a vote on your amendment in the 2002 Congressional Ratings. It is signed by Mr. Thomas Schatz, president.

I yield the floor and suggest the absence of a quorum, with the time equally charged against both sides. The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, USDA’s Economic Research Service estimates that in calendar year 2000, the latest year for which this data is available, there were, in fact, 764,000 farms in America with an annual gross farm income of $20,000 or more. I cite that figure to give some idea of the number of farms that, given this threshold, we are discussing in this amendment.

As I mentioned, on some of these farms there are at least two entities—maybe more—sharing production risk and having $20,000 at stake in terms of gross income. Each of these entities would qualify for a $7,000 payment. This means that those who have been successful in getting out of the current program there could be, under the widest interpretation, as many as $1.3 million payments of $7,000 a year.

That is the basis upon which we arrive at the $25 million sum for all of the commodity section over a 5-year period of time. I make that point simply to undergird, for Senators who are listening to the argument, the financial aspects.

I think it is of interest as to how this works out in real life. I cite once again the Environmental Working Group Web site with regard to my home State of Indiana. For the years 1996 to the year 2000, it breaks down the annual payments, not the 5-year total but the annual payments of farmers in my State. I cited earlier that in this particular situation, almost 100,000 farms receiving some payment have been identified. It is interesting that in Indiana about 75,800 of these farms received no more than $5,000 or an annual basis during this period and this means, even if one extrapolates up into the next group, $5,000 to $10,000 where there were 9,500 more farmers, splitting that in half, roughly 80 percent of the farmers of Indiana, 80 percent who were receiving farm payments, received less than $7,000 in this period of time. That is why $7,000 per farm entity makes a significant difference to a large majority of the farmers in my State.

I think most Senators will find, if they do the arithmetic, $7,000 for a farm entity of $20,000 at risk, $20,000 gross but the farmer at risk, means anywhere from three-quarters upwards of 50 percent of farmers in the Senator’s State will do better under my amendment than under the Daschle/Grazzini bill.

I hope Senators understand that, I am certain at some point farmers will understand that and farmers presumptively will hold Senators responsible for looking after their interests.

So to underline the obvious, again, my statement is that roughly 75 to 80 percent of farmers who now would receive $7,000 in each of 4 years if they continue in farming will do better than the payments they would receive under the farm bill that is now before us. Clearly, if we are deeply interested in the majority of America, especially those farmers who are most in jeopardy of losing their enterprises, we will be interested in this group. This is the safety net that is provided by my amendment.

I yield the floor, and I ask unanimous consent that the time be equally divided against both sides.

The PRESIDING OFFICER (Mr. Edwards). Without objection, it is so ordered.

The Senator from Iowa.

Mr. HARKIN. Mr. President, I yield the floor, and I ask unanimous consent that the time be equally divided against both sides.

The PRESIDING OFFICER. The Senator from Iowa has 52 minutes, and the Senator from Indiana has 50 minutes.

Mr. HARKIN. Mr. President, I yield myself such time as I may consume.

Mr. President, I have, as the Senator from Indiana knows, great respect for him. We have had a great working relationship on the Agriculture Committee. I daresay, without any fear of contradiction, that perhaps in most, if not almost all, of the present focus that we have on agricultural research and the changes that were made in research were because of the leadership of our good Senator Lugar.

My friend from Indiana has been unafraid in what I call pushing the envelope in trying to think outside the box on agriculture, and maybe in some ways we find ourselves in a box on agriculture, I might be best to admit that. We have over 60 years of Federal farm programs that have been designed, in essence, to try and support our farmers, our farm families, during periods of low prices, during periods when their income would fall basically due to no fault of their own.

A lot of times my urban friends will ask me why do I have all of these farm
programs. There is not the same thing for a hardware store, or the dry cleaning shop, or a number of other main street businesses. I always have to bring them through the process of why we are where we are, and that agriculture is really unlike a Main Street business. There are so many variables beyond the farmer's control.

We know the classic ones, of course: weather, the droughts, the hail, the rain, the cold, the heat, whatever it might be. Those vagaries of weather. Now, to a certain extent we have over the years attempted to protect the farmer from those vagaries with different forms of insurance programs. What we found through the history of some foods that is true.

There is some food that is not too the largest variety and the most quantity of food, especially wholesome food. We built up quite well overall. It is true we have an elaborate system of support programs. If we were starting over and we had a clean slate, we might start to do it that way again, as the Senator is talking about. We are not starting with that clean slate. We have to take into account what has happened with land prices, what has happened in the local communities, what this would mean if we were to yank the rug out of all of a sudden from under these programs.

If our experience under the last farm bill, under the Freedom to Farm bill, had been different and we had some other programs this way, increased would be phased down and eliminated, maybe this would have been the right approach. We saw that was not going to happen under Freedom to Farm. So all of these programs have been woven into the fabric of our farms, but of our rural communities, our schools, our businesses, our colleges, our transportation.

Earlier we mentioned the value of land. Some may argue, rightfully so, we have a land bubble out there; we have prices of land, and the value of the commodity for that land cannot support that price. This is not speculative land, land near a city waiting to be developed to some extent. Some of the payments we have put out there in the past, in the last farm bill and the one before that and the one before that, going back for quite a ways, have had a more perverse effect than what we intended. It has, in fact, increased the price of land beyond what the productive capacity of that land could support. This has not created a good situation.

We just had a vote on payment limitations, which I support. What has happened—see it in my own State the way the farm program is structured—the bigger you are, the more you get; the smaller you are, the less you get. The payments go to the larger farmers. They then go out and bid up the value of the land above what the smaller farmers can get, or a beginning farm can do, and you get bigger and bigger farms.

Since I was a kid, I have been watching farms get larger in my backyard. I come from a town of 150 people. I still live there. All the farms around my hometown are getting bigger all the time. Some of that was inevitable, due to mechanization, better equipment, better seed, better fertilizer, better control over pests. So the production kept going. That kept the price of our food very cheap in this country. It was inevitable that farmers would not stay with 40 acres and a mule; farms would get bigger.

Over the last few years—I don't know if I could use a cutoff date, maybe 15 or 20 years—our farm programs have accelerated the process and have added to it and have made it worse, exacerbated it. We do have a land bubble. One might say we should not have a land bubble; land ought to be worth what it can produce or whatever it can bring or whatever the market proposes but not based upon Government payments. I can accept that argument.

What I cannot accept is pulling the rug out right now. We cannot do that. That has been built up quite a system, also, of nutriment in our rural areas and our small towns.

We have done research and to support APHIS, the Animal and Plant Health Inspection Service, and others, to help us in our continual battle against the infestation of either disease or pests in our crops and livestock. Put all of these things together and that individual farmer has literally no control over the marketplace, none whatsoever.

It has often been said the farmer is the only person who buys retail and sells wholesale and pays the freight. It is true. That has basically been true throughout the years; different now than we had 30, 40, or 50 years ago.

Our programs change, but they have the essential underpinning of ensuring that, No. 1, we will have an adequate supply of food and fiber for the citizens of this country, that we will have that food and fiber in a way that will ensure no one goes hungry in this country. On that side of the ledger we have built up quite a system, also, of nutrition programs. The most famous is school lunch. But there are a lot of others. So we made it possible for this country to be the best fed and to have the largest quantity and the most quantity at the cheapest prices of all sorts of food, especially wholesome food. There is some food that is not too wholesome, but at least in the wholesome foods that is true.

Since I am a farmer, we have dairy programs. We found through the history of the dairy programs, when we had the spring flush, prices would go to nothing. A lot of farmers found that they could not make it. But in the middle of the winter, the price of milk would skyrocket and kids would be left without milk. We wanted to even this out. We came up with dairy programs to even that out. They have worked quite well overall.

In rural America, it is often said most farmers live poor and die rich. That has basically been true through the years; different now than we used to have. The farm they have is their retirement. If we pull that out from underneath them, it will be like all the people with their pensions in Enron. Pull the rug out from underneath our farmers, let them pay their mortgages, and if we have treated them like Ken Lay treated the people at Enron. We do not want to do that. That would devastate our public schools that rely on the property tax in rural areas and our small towns.

So what do you do, then, if that is the situation? Do we take a drastic turn, as my friend from Indiana wants to do? I hope not. That would be devastating. In other words, what we ought to do is try to work within the structure that we have and start to move this engine a little bit, just to move it a little bit, and start to change the way we do support agriculture. The bill before the Senate is a balanced bill in that regard. Yes, we do spend more money on commodity programs. We do because farmers need it.

The Department of Agriculture estimated a couple weeks ago there will be a 20-percent drop in net farm income this year unless we come in with some kind of a payment. I ask anyone listening or watching to think of your own situation. What would you do for your family if this year you had a 20-percent drop in your net income? What would you do with your kids? What would happen to your kids if this would happen to your car? What would happen? Think of the farmers with a net income drop of 20 percent this year. I wish it were not so, but that is the fact.

So we have more money on the commodity programs this year. However— and this is a big but—this bill, developed with a lot of bipartisan input, through the committee process, amended on the floor as it has been amended and probably will be in the next couple of days, this bill puts more money into commodity programs but we spend more on a broader agricultural constituency. We provide new—and more—conservation spending. That is
income to farmers in a way that has never been done before.

Before, we would say to the farmer: If you take your land out of production, we will pay you for it. That has sort of reached its limits. So now we say to the farmer: You be a good steward of the soil, you keep your soil from running off; you, livestock producer, make sure you don’t have the manure runoff that is killing fish in the streams and fouling underground water; you, row cropper, cropping the hills, put in some buffer strips along the streams, put in some grass waterways; you on the plains, cut down on the wind, put in some windbreaks, do things like that, rather than plowing up the land; do ridge tilling, hold the soil down—we will pay you for it.

That is a conservation security program to begin paying farmers to be good stewards.

Many farmers are already doing that and this bill would not cut them out. This is to encourage them to do anything different. They would just have to continue what they are doing and they will get paid for it.

That is a change. There are some in this Chamber—there were some in our community who say some who do not want to do that. The Cochran-Roberts bill that was offered as a substitute bill would remove that. They would not do anything different. They would just have to continue what they are doing and they will be paid for it.

We have an energy title in this bill to try to start moving in that direction. $550 million, half a billion dollars in 5 years—I hope we can keep it—again, to begin to develop that, whether it is diesel or hydraulic fluids, grease, or ethanol. We haven’t even scratched the surface on that in this country. We can do a lot more with ethanol, and the feed co-products can be used in feedlots.

Biomass energy—we have a project in Iowa right now that we started a few years ago. I was able to get a modest change in the law to allow biomass production on conservation reserve program land, we set aside 4,000 acres in southern Iowa to grow switch grass. That switch grass is cut and then it is taken over to the Ottumwa, IA, coal-fired powerplant and put right in there with the coal to burn at the powerplant.

So, a pound of switch grass has more BTUs than a pound of coal. The problem is, a pound of switch grass is this big, and a pound of coal is that big. But they burned it last year in the boiler. It worked just fine. So now John Deere is working on developing new kinds of equipment to cut the switch grass and put it in little bundles so it will make it easier to transport and put in the furnaces. Biomass energy, renewable every year. It will clean up the environment and give farmers some additional source of income.

Wind energy—the largest wind farm in the world is located in Iowa. Interestingly enough, it was built by Enron. But it is there. So there are provisions in our bill to allow new energy titles in our bill to begin to promote that and give a new market for farm products.

That is what we have to do. We have to find new markets for what these farmers grow. One of the biggest markets of all is energy. That can absorb a lot of our commodities—is the energy market. So why should we be paying all this money to Saudi Arabia and the Mideast or go up and drill in the Arctic National Wildlife Refuge, where there are plenty of people living in the smaller community. But if you do not have good schools, decent jobs, decent recreation, and decent transportation, then things aren’t equal. So people tend to gravitate towards larger communities.

I think our view for the future is of enlivening and rebuilding rural America, and enabling younger people to go into farming. We have some of the finest agricultural schools in America—including those in Indiana and Iowa. When you go to those agricultural schools, you see young people who are smart. They know how to do things. A lot of them have experience working on...
the farms—maybe their family farms, or lives in a rural area. They are tak-
ing animal or plant science courses, or farm management courses. Ask any
one of them if they are going to go into farming, and if they are going to be a
farmer—only a very few, if they have parents free and clear that they
hope to inherit—will they say yes. But if their parents have a little bit of
land and they are renting more land, they are not going to be farmers. They
are going to go into some kind of management, or some kind of agribusiness
management. But they are not going to be a farmer.

Ask them if they want to be a farmer. Would you like to be a farmer? Would you like to have land out there and do the things your parents and grandparents did? Almost 100 percent say yes. But the decks are stacked against them.

I hope that is what we can look at as to how to revise and rebuild some of these things. One thing I said earlier is that we need to clarify this and think this adds to this debate. But I hope that all in all we will not approve of the amendment. I yield the floor.

The PRESIDING OFFICER. The Sen-
ator from Indiana.

Mr. LUGAR. Mr. President, I thank the distinguished chairman for his gen-
erous comments about my work and about my amendment, even though he has risen in opposition.

Let me be a little more direct in what I said earlier when I told the Senator that I heard the most from are the other fifth. That may be true of the distinguished Senator from Iowa. Understandably, they are more aggressive, more articu-
late, and they have greater resources. If fact, their influence with the major
farm groups seems to be substantially greater than the other three-quarters or four-fifths of my farmers.

But, nonetheless, for Senators who are trying to decide what kind of jar-
ring change this makes, I think it makes a sizable change for a large ma-
jority of farmers. Others would have to accommodate to the fact that they are already more successful, and the safety net was not meant for them specifi-
cally.

Let me also mention that although I admit to the fact that all the money we are talking about is in deficit fi-
nance, I still indicated that I am pre-
pared to advocate spending money. I think this is the way we can start. I may have left some confusion, and I want to clarify this—I am in favor of. That would include all the titles the chair-
man talked about, plus the commodity title comes out to $25 billion in my amendment for 5 years at a time. The commod-
ity portion of that turns out to be a net increase of only $7 billion. That is true because we are phasing out a whole raft of programs but not adopting many programs that are in the Daschle-Harkin bill escalating the current baseline.

It is a fair question to always ask. Even if on paper the economics and the equities are right, what sort of jarring effect does this have on society? Prob-
ably people who want to walk around this a bit. Of course, that is the purpose of their debate: to define what we have to try to find. At least some-
thing is likely to be better not only for farmers—I think this amendment is
better for three-quarters of the farm-
ers—but also for taxpayers and for the general fiscal condition of the country. We are in a war and recession.

I would simply ameliorate the asso-
ciations made that this is likely to be very jarring. Perhaps if I think there will be changes, but I think they are constructive. Essentially, we move the money in a safety net to a large majority of farmers, those whom I think are probably most in need and are most likely to go out of farming, as a matter of fact, without some type of subsidy.

The distinguished chairman and I have generally agreed—and we had wit-
nesses before the committee—that there is some equity at least in paying these farmers only if somebody is actu-
ally farming. That is one provision. In order to receive the $7,000, you have to produce $20,000 of gross income from
the farming operation. You can’t drop out for 2 or 3 years and on the basis of past history continue to collect the money.

I am not going to argue about the philosophy of the AMTA payments and the idea that those would be phased out from one type of farm philosophy to another. It may not have worked out that way. But that was the general idea. I am not talking about a phase-
out, but the idea that you really need to farm and be a productive farmer at all to a farm entity to collect the money.

I think that makes more sense to the American people as opposed to the many stories of moneys going to per-
sons who have been out of the farming business for some time but had a his-
tory that fits these last farmers.

Mr. President, I yield the floor.

Mr. HARKIN. Mr. President, if I may respond to my friend, I understand what he is saying. Only a fifth of the farms in Indiana would be affected by this. It is probably about the same, I suppose, in Iowa. I do not know. But I still see that, again, these tend to be the bigger farms that have a lot of land. I still submit this could cause deflationary values, and even though those at the bottom are getting a little bit more, their land prices might be affected by the bigger ones. So if those land prices go down, I think it might have a cascading effect on them.

I say to my friend—I think we dis-
cussed this in the past—some land prices may be inflated by farm pro-
grams, but if the support has to be brought down, I think it has to be brought down over maybe a several year period of time, or something such as that. That is why I was hoping to get away from some kind of direct pay-
ment system to a countercyclical pay-
ment that is only based on prices at the bottom and to con-
servation, put more into energy, and put more into programs that require producers to act.

If there is something you have to do, then you can get paid for it, but it does not build into the land value. Because if you sell it to somebody else, and they do not do it, they do not get the payment. We have to try to get off the programs that continue to provide for an artificial land bubble out there—it is there; we have to recognize it but we have to be very careful about how we try to bring it down to some level in regard to what the productive capacity of that land is.

The PRESIDING OFFICER. The Sen-
ator from Indiana.

Mr. LUGAR. Mr. President, I appreci-
ate this colloquy with the distin-
guished Senator because I think we are probably dealing with values and issues which are very important even in the midst of an empty Chamber. I am hope-
ful my colleagues are listening in from time to time to this dialog.

The dilemma we face, it seems to me, is not that the land values are going to
come down, but rather that farmers will now have to plant for actual markets as opposed to planting for the Government. I think the prices, in fact, have some chance, under my idea, of going up again, in large part because I believe the policies we might adopt in the Daschle-Harkin bill are likely to depress prices. The hope is that will not be so and maybe world conditions or weather conditions, or something, might change. But it seems to me there is a halting of overproduction and lower prices. That affects big farmers as well as small farmers.

As I take a look at my own operation, we are somewhere in between. I sort of fit into the group that, according to the Environmental Working Group, would get about $9,000 a year under the current situation. I think the Web site lists the Lugar farm as 22nd in the batting order in Marion County, but that is in the Indianapolis area where there are just 240-some farms involved. But it is roughly $9,000 a year over a 5-year period of time we are talking about. It is a 604-acre farm, probably in the top sixth barely of the size of farms in the State.

This is sort of the cutting edge when I am talking about the beneficiaries being maybe 80 percent. We are a little above that, and so, as a result, we are likely to make money.

My own view is that I am likely to make more because I think that probably the price of corn is more likely to go up, likewise the price of soybeans; therefore, in regular markets, as opposed to markets that are subsidized or have artificial stimulants in them, I am going to make more money. I think that will sustain my land value without a bubble and will make that price a healthier one. Of course, there are other factors in land values: proximity to cities, whether highways go through them, as the chairman knows—all sorts of reasons why that happens. But, nevertheless, our two States—Iowa and Indiana—have many characteristics. During my more recent experiences in Iowa in 1995 and 1996, I discovered that going county by county.

I am sympathetic to the thought that change which is really ridiculous ought not to be entertained. It seems to me we are at a point where the idea that I have brought forward benefits a very large majority of farmers, and I think without harm to those who are more efficient because my guess is they are the most from the higher prices. They, by and large, have lower costs through research and through the methods they have adopted. This is likely to lead to more of a golden age for agriculture than what might be sort of the situation where many of us have been describing.

Mr. HARKIN. If my friend would yield for a little colloquy, I just ask my colleague again if he will elaborate a little longer on why the prices would tend to keep up a little bit more under the scenario that I just described. I would think they would go down. But why does the Senator think the prices will go up?

Mr. LUGAR. My theory is that less will be planted; fewer acres of corn will be planted and fewer acres of soybeans will be planted. I believe the current system, plus the additions that your bill would provide, offer incentives to plant more acres, I believe they offer incentives to change methods, and the research that we are both for, that is going to lead to higher yields—besides more acres—more bushels, and lower prices. That could change if we had a worldwide boom and our exporting thing works or El Nino knocked out half of one country’s production. So these things happen from time to time.

My guess is, to answer the Senator truthfully, many farmers, despite the Freedom to Farm, still have incentives to do basic row crops. That is where the money is.

Mr. LUGAR. Do they go up again, in large part because I have some chance, under my idea, of going to corn. So you get these huge fluctuations.

Mr. HARKIN. Yes. So we are trying to keep at least some stability in there so you do not have those wild swings in prices.

Mr. LUGAR. I will make another radical suggestion. This is purely anecdotal from our farm experience. But I planted, over the last 18 years, 60 acres of black walnut trees. This is on acreage that I found was submarginal. We used to plant more, but it appears that sort of is a grandfather’s dream. I will not be there.

But you have, at least it seems to me—by all the calculations by the formulas we use by measure year by year—more of a return from the walnut trees than I am getting from the corn. That is a very long-range vision.

Mr. HARKIN. Sometime down the road.

Mr. LUGAR. Yes. You asked for alternatives. Clearly, there are a good number of people who are family farmers who intend or at least hope that their farms will be family farms for a long time. They are doing alternative planting.

Mr. LUGAR. Yes. You asked for alternatives. Clearly, there are a good number of people who are family farmers who intend or at least hope that their farms will be family farms for a long time. They are doing alternative planting.

Mr. LUGAR. Yes. You asked for alternatives. Clearly, there are a good number of people who are family farmers who intend or at least hope that their farms will be family farms for a long time. They are doing alternative planting.

Mr. HARKIN. I agree, to the extent there are alternatives people can use. Obviously, though, as the Senator has said, the return you get off that is sometime down the road, not right now.

And I think, just again, being a little bit parochial about it, in our area of the country, in the upper Midwest, there is a reason why we plant corn and beans. It is very suitable for that. There is some wheat, a little bit, some smaller grains, maybe up in Minnesota, the northern part up there, but in our area we are corn and beans. We plant those crops because that is what the land is productive for in that area of the country. It is very hard. We don’t grow rice. Wheat is OK. We can get wheat, but that will just depress the price of wheat. We could grow wheat. But there is just not much else.

Mr. LUGAR. I will make another radical suggestion. This is purely anecdotal from our farm experience. But I planted, over the last 18 years, 60 acres of black walnut trees. This is on acreage that I found was submarginal. We used to plant more, but it appears that sort of is a grandfather’s dream. I will not be there.

I am sure for the Senator as well—we had orchards. We had a lot of orchards, vegetable gardens, a short growing season. It was OK for the family, but to really make a living out of it wasn’t too viable. So we are sort of stuck on corn, beans, maybe alfalfa, some hay, things like that, some sorghum—basically corn and beans. And then you have all your land tied up. You have your land and then your machinery, your equipment. You have all that fixed cost already there. I haven’t big enough. I put out a lot of money in it, and it doesn’t do much to plant black walnut trees. I can’t get much money out of that to do that.
I ask the Senator to think about something that was said to me at one time. I don’t know if it is true, but it made sense to me economically—why agricultural economics is a little bit different.

The farmer is sitting out there—think about your own land—the farmer is sitting out there, fixed land, has his equipment. Let’s just take the farmer who doesn’t have all the land paid for, may own some, and rent some. That is usually the case. He has equipment, some owned, probably some he is still paying for. If the price of the commodity he is growing—let’s say in this case corn or beans—goes down, the normal thought process is, other people would say, if the price goes down, the farmer would be a darn fool to plant any more of that.

But the farmer goes out and plants more corn. Is he a darn fool? My response is, no. Because what he is thinking is: OK, I have my land out there. I have my equipment, I have my fixed costs. The marginal cost of planting an additional acre always approaches zero. He doesn’t know that, but that is what it is. So if I plant 100 acres, my cost may be whatever. If I add a 100 acres, the cost to plant that additional 10 acres is not as much as the first 100. If I plant an additional acre on the side of that, its cost is even less because I already have my equipment and all that stuff. The time involved is not that much.

The farmer says, I have all that equipment. So if the price is down, I have to produce more. So if I was getting $2.50 for my corn, and now I am getting $1.50, I will just grow more corn.

So it really is a perverse economic kind of thing, sort of counter intuitive—I ask my friend from Indiana if that might not be the case—because farmers don’t have control over everything. If I controlled everything, like General Motors, I could say, yes, I will cut down production. But each individual farmer out there with that fixed land, the equipment, his costs, his sunk costs, he says: If prices are down, I had better grow more.

Does the Senator from Indiana have some sense that that happens sometimes?

Mr. LUGAR. I would respond to my friend from Indiana if that might not be the case—because farmers don’t have control over everything. If I controlled everything, like General Motors, I could say, yes, I will cut down production. But each individual farmer out there with that fixed land, the equipment, his costs, his sunk costs, he says: If prices are down, I had better grow more.

Mr. HARKIN. I understand. The Senator from Nevada.

Mr. LUGAR. At least three-quarters of those receiving payments in Iowa get less than $7,000. The Senator’s one-fifth? Ours is one-third.

Mr. LUGAR. At least three-quarters receiving less than $7,000.

Mr. HARKIN. We have about 160,000 farmers or entities receiving payments. Iowa farmers who get more than $7,000 are about 55,000 out of that 160,000—that is about a third—farmers getting less than $7,000. Farmers getting more than $15,000 are just under 30,000; and farmers getting less than $15,000, fewer than 130,000. It would be 105,000 farmers getting less than $7,000, and about 55,000 would be getting more than that.

Mr. Harkin. That is true.

Mr. LUGAR. The educational process for the young, as well as loans, and this important energy research. Clearly, if our country adopted an energy policy that featured the biomass, the ethanol, or other products that come from that, we would have a different farm scene. I pray that will occur, as does the Senator. But it won’t, really, without a great deal of effort on our part.

These are hopeful signs for the future. I think we both agree, we don’t want to bump up against the WTO ceilings because that really would jeopardize our export position. And I have my personal belief that gives us back that apparent. I have a lot of government still here: $7,000 for maybe 1.3 million entities is a lot of government but, at the same time, a level that I think will not perversely accelerate the land value, overproduction, and really finally does cost a lot less money at a time that we are in deficit finance.

I appreciate the Senator’s thoughtful objections to this, but I persist nonetheless and ask for support of the amendment.

The PRESIDING OFFICER. Who yields time?

Mr. LUGAR. Mr. President, I suggest the absence of a quorum with the time remaining.

Mr. HARKIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. The Senator from Idaho has 2 minutes 8 seconds; the Senator from Iowa controls 14 minutes 26 seconds.

Mr. LUGAR. I thank the Chair.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. Mr. President, I say to my friend from Indiana, I want to be honest, so for the record, according to my staff who did this research, about two-thirds of those receiving payments in Iowa get less than $7,000. The Senator’s one-fifth? Ours is one-third.

Mr. LUGAR. Mr. President, I have determined from conversing with the two managers of the bill that they are going to yield back their time on this amendment. That being the case, I ask unanimous consent that the time be considered yielded back and that following 5 minutes for the Senator from
New Jersey on an unrelated matter, the Senate begin voting on the Lugar amendment. The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from New Jersey.

The remarks of Mr. TORRICELLI are printed in the day's RECORD under "Morning Business."

The PRESIDING OFFICER. The question is on agreeing to the Lugar amendment No. 2827.

Mr. HARKIN. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from Texas (Mr. GRAMM), the Senator from Tennessee (Mr. THOMPSON), the Senator from Arizona (Mr. MCCAIN), and the Senator from New Mexico (Mr. DOMENICI) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yea 11, nays 85, as follows:

[Rollcall Vote No. 19 Leg.]

The amendment (No. 2827) was rejected.

Mr. HARKIN. Mr. President, I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. JOHNSON). Without objection, it is so ordered.

VISIT TO THE SENATE BY THE PRESIDENT OF ROMANIA

Mr. HELMS. Mr. President, I ask unanimous consent that it be in order for the Senate to stand in recess in honor of the distinguished guest we have today. He is the President of Romania. He is in his second term. His name is Ion Iliescu. Welcome, Mr. President.

RECESS

Mr. HELMS. Mr. President, I ask unanimous consent that the Senate stand in recess for about 6 or 7 minutes.

There being no objection, the Senate, at 4:05 p.m., recessed until 4:10 p.m. and reassembled when called to order by the Presiding Officer.

AGRICULTURE, CONSERVATION, AND RURAL ENHANCEMENT ACT OF 2001—Continued

Mr. HARKIN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HARKIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To permanently reenact chapter 12 of title 11, United States Code)

At the appropriate place, insert the following:

SEC. 4. REENACTMENT OF FAMILY FARMER BANKRUPTCY PROVISIONS.

(a) REENACTMENT.—Notwithstanding any other provision of law, chapter 12 of title 11, United States Code, is reenacted.

(b) CONFORMING REPEAL.—Section 363(f) of Public Law 99–554 (100 Stat. 3124) is repealed.

(c) EFFECTIVE DATE.—This section shall be deemed to have taken effect on October 1, 2001.

Mrs. CARNAHAN. I ask unanimous consent Senator CARNAHAN of Arkansas be added as a cosponsor to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. CARNAHAN. Mr. President, let me commend the two managers of this bill, Senator HUTCHINSON of Arkansas, and Senator LUGAR. Trying to forge a consensus on a farm bill is a daunting task. The work is absolutely critical for family farmers in Missouri and throughout the Nation.

This amendment is designed specifically to help ailing family farmers. It will make permanent chapter 12 of the bankruptcy law. Chapter 12 offers an expedited bankruptcy procedure to family farmers in an effort to accommodate their special needs. It was first enacted in 1986 and has been extended several times since then—in fact, twice last year.

The provisions of chapter 12 allow family farmers to reorganize their debts as opposed to liquidating their assets. These provisions can be invaluable to farmers struggling to stay in business during difficult times. Unfortunately, chapter 12 expired on October 1 of last year. The Carnahan-Hutchinson amendment seeks to make permanent these bankruptcy provisions and reinstate them retroactively to the date when they last expired. The retroactivity will ensure there are no gaps in availability of these procedures.

The larger bankruptcy reform bill currently pending before the House-Senate conference committee includes a permanent extension of chapter 12. Nevertheless, America’s family farmers should not have to wait for us to complete our work on the bankruptcy reform bill. Farmers and farm groups across Missouri have urged me to try to get these provisions reenacted as quickly as possible. They stress how important chapter 12 can be during tough times.

This amendment is also important because the retroactivity will eliminate uncertainty for farmers who have cases already pending or reenacted.

Legislation extending these provisions passed the House of Representatives twice last year by votes of 411 to 1 and 408 to 2. These laws were both subsequently approved by the Senate by unanimous consent. It is my hope we can approve this amendment and complete our work on the farm bill quickly.
I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. HUTCHINSON. Mr. President, I commend Senator CARNAHAN for her excellent statement and for introducing this amendment. I am proud to be a cosponsor.

Earlier today I filed amendment No. 2828 which did precisely this, making permanent chapter 12 provisions and making them retroactive. Obviously, there is no need to pursue that amendment. I am very pleased to be able to cosponsor this amendment with Senator CARNAHAN. I look forward to its quick passage as well.

I was very disappointed earlier today in the payment limitation amendment being adopted and the consequences I believe will it have for southern agriculture. I know other parts of the country do not face that problem and will not see the impact we will see in Arkansas, Mississippi, Alabama, and across the South. Consequences will be real and severe. That is why the permanent extension of the chapter 12 bankruptcy for farmers is so essential. It is unfortunate it is so essential.

We talk of our farm bill having a safety net. That safety net expired last year, and the enactment of chapter 12 bankruptcy is critical. The temporary basis of past law has Members again seeking to protect our Nation’s farmers. This law was enacted on a temporary basis because Congress did not know whether it would work. We now know it does work and it should be permanently enacted. It was passed back in 1986. In the past 14 years, 20,000 American farmers have filed to reorganize their debts under its protection. It was designed to help farmers who receive more than half of their income from farming and have total debts of less than $1.5 million. It hopefully allows them to stay in farming. It has worked very well.

It is unfortunate so many of our farmers are being forced into bankruptcy. I join my colleagues in pointing out this disturbing fact. I ask those same colleagues to join me in doing something. Between 1999 and 2001, the Farm Service Agency in Arkansas has seen a 28-percent increase in filings for chapter 12 bankruptcy. I mentioned earlier I attended one of those farm auctions this weekend. The newspaper ad announcing the auction said: Three more times sell their property also. This sends these farmers spiraling toward collapse because it nearly eliminates the chance farmers could work themselves out of their financial situation.

This legislation is currently tied up in the bankruptcy reform conference. It has been for months. All the while, farmers are going out of business, forced to sell their equipment, and sell their assets, and sell their property.

Our country is in a recession. The agricultural community has been in a recession for several years. Many commodity prices are at their lowest point in nearly 50 years. In the past, we have supported short-term, short-sighted extensions. It is time to permanently enact these provisions. In this time of economic uncertainty, forcing farmers to liquidate their assets is not the answer. The answer is permanent enactment of chapter 12 bankruptcy, allowing farmers the ability and freedom to reorganize their debt and stay in farming.

Once again, I thank Senator CARNAHAN for filing and offering this amendment. I am glad to cosponsor the amendment. I hope for its quick passage as well.

Mr. LEAHY. Mr. President, I am pleased to cosponsor this amendment by Senator CARNAHAN to retroactively renew family farmer bankruptcy protection and make Chapter 12 a permanent part of the Bankruptcy Code. I commend Senator CARNAHAN for her continued leadership in protecting family farms across the country.

Unfortunately, too many family farmers have been left in legal limbo in bankruptcy law across the country since Chapter 12 of the Bankruptcy Code expired on October 1, 2001. Congress needs to move quickly to restore this safety net for America’s family farmers.

This is the third time in the last year that this Congress must act to retroactively restore basic bankruptcy safeguards for family farmers because Chapter 12 is still a temporary provision despite its first passage into law in 1986. If our family farmers do not deserve these lapses in bankruptcy law that could mean the difference between foreclosure and farming.

In 2000 and into last year, for example, the Senate, then controlled by the other party, failed to take up a House-passed bill to retroactively renew Chapter 12 and, as a result, family farmers lost Chapter 12 bankruptcy protection for 8 months. The current lapse of Chapter 12 has lasted more than 4 months. Enough is enough. It is time for this Congress to make Chapter 12 a permanent part of the Bankruptcy Code to provide a stable safety net for our nation’s family farmers.

In the current bankruptcy reform conference, I am hopeful Congress will update and expand the coverage of Chapter 12 as Senator FEINGOLD has proposed in the Senate-passed reform bill.

In the meantime, the Senate should take the lead and quickly restore and make permanent this basic bankruptcy protection for our family farmers across the country by adopting the CARNAHAN amendment.

Mr. GRASSLEY. Mr. President, I am a strong supporter of Chapter 12. I wrote it; I believe in it. But I believe it belongs in the bankruptcy bill which is currently in conference. I hope that the Majority Leader will step up to the plate and help move this conference along. The bankruptcy bill contains many provisions that would make life better for farmers and it would be a serious mistake not to enact the bankruptcy bill soon.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Mr. President, I join with the Senator from Arkansas and the Senator from Missouri in supporting this amendment and the Senator from Arkansas. This is something sorely needed. I hope it will have strong support.

I hear a lot about this in the countryside. Quite frankly, in these tough times, more and more I think we will need the benefit of chapter 12.

As I understand it, this does go back retroactively to last September, if I am not mistaken, and it will cover a number of farmers using chapter 12 proceedings and making it permanent. At least it lets them know it is going to be there from now on and we will not have to keep reauthorizing it. I ask to be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, I join the Senator from Iowa in commending the distinguished Senators from Missouri and Arkansas for a very constructive amendment. I am hopeful it will have universal support.

Let me add a point of procedure. Senator HATCH wants to speak on the amendment. He is not visible for the moment. At a certain proper time, I will consult with the chairman. We may want to set this amendment aside so we have floor activity. I know of no opposition, but Senator HATCH is still to be heard from, so we want to reserve the opportunity for him to speak if possible.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mrs. CARNAHAN. Mr. President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.
February 7, 2002

Mrs. CARNAHAN. Mr. President, I ask unanimous consent that Senator LEAHY be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. CARNAHAN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mrs. CARNAHAN. Mr. President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER (Mr. REID). Without objection, it is so ordered.

Mrs. CARNAHAN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is there further debate?

Mr. HARKIN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. REID). Without objection, it is so ordered.

Mr. REID. Mr. President, I have conferred with Senators LUGAR and HARKIN, the two managers of this legislation. I ask unanimous consent that the vote on or in relation to the Carnahan amendment occur at 5:40 today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that the pending amendment, that of Senator CARNAHAN, be set aside and that Senator CRAPO be allowed to offer his amendment. For the information of Members, he would offer this amendment, speak until 5:40. There are other Members who probably wish to speak on this amendment. Then the agreement between Senator CRAPO and the two managers and I would be that when the debate is finished on his amendment this evening, the amendment would be laid aside and we would take it up again next week.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CRAPO. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2533

Mr. CRAPO. Mr. President, I call up amendment No. 2533.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Idaho [Mr. CRAPO], for himself and Mr. CRAIG, proposes an amendment numbered 2533.

Mr. CRAPO. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To strike the water conservation program

Strike section 215.

Mr. CRAPO. Mr. President, this amendment strikes section 215 of the Water Conservation Program from this bill. I have introduced this amendment on behalf of not only myself but Senators CRAIG, SENATOR DOMENICI, Senator THOMAS, Senator ENSIGN, Senator AL-LARD, Senator CAMPBELL, Senator HAGEL, Senator ENZI, Senator BURNS, and Senators HATCH and BENNETT of Utah.

This amendment is essentially a debate over whether the Federal Government allocates an unprecedented move into the management, allocation, and use of water nationwide through the farm bill.

Historically we have had some very successful programs in the farm bill, including the allocation of water and water rights, and this is an unprecedented move of the Federal Government into the management, allocation, and use of water rights and, frankly, a move that will put the Federal Government in control of water rights in return for giving farmers the permission to participate in the CRP.

Third, the States already have programs and operations in place that enable them to address the questions of water use for species management. In fact, in my State of Idaho, we are working very aggressively in salmon and steelhead recovery efforts to work with private property owners and water rights holders to make certain we are able to get water to the species that need it with harming the agricultural community and the other interests of water users, and we are doing so very successfully.

In fact, with permission, I would like to read briefly from a letter to me from former Senator Kempthorne, now Governor Kemethorne of the State of Idaho. I ask unanimous consent to read from this letter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRAPO. Mr. President, this letter, sent by Governor Kemethorne on December 11, says:

The water conservation program—

The water proposals I am talking about right now in this bill are not consistent with the laws of the 18 Western States, including those of the State of Idaho. In addition, the goal of implementing water quantity and water quality improvement demonstrated to be required for species listed under the Endangered Species Act can largely be achieved under existing State laws.

My point is that the objective of this language we are talking about is certainly worthwhile: getting water, quantity and quality, for the species that need them. The States already have programs in place to achieve these objectives, and it is achieved very successfully in Idaho.
Governor Kempthorne goes on to point out:  
In Idaho, the U.S. Bureau of Reclamation has been able to rent water from the State water supply bank from willing sellers pursuant to State law for almost a decade. More recently, the Bureau has rented water while in the Lemhi River, a tributary of the Salmon River, for the benefit of fish species. Again, under the auspices of State law in cooperation with willing sellers.

My point again is that State law already provides mechanisms for the objectives of this water language to be achieved. We do not need to insert the Federal Government into the control of water rights. We do not need to condition participation in a very successful conservation program and pressure being brought to bear to force farmers to give up their water rights either temporarily or permanently.

I will make another point and then yield the floor because I know there are other Senators concerned about this matter and who want to speak about it. The point is this: We have all had a first course under the Endangered Species Act with its implementation and management. A very critical question has been raised about this language with regard to what happens if it is adopted and a farmer, in order to participate in this program, agrees to temporarily give up his or her water rights, thinking: I can get those water rights back at some point when I determine I would like to say it is time to return to them.

What if a species has become dependent on water? Under the Endangered Species Act, section 9, the question arises: Does that become a taking? Does there need to be a NEPA analysis before the Federal Government can return the water rights to this farmer? Does it have to go through an analysis of section 9 of the Endangered Species Act and under NEPA and other provisions of Federal law to determine whether other Federal law would be violated by the return which is contingent on water language?

Those are the kinds of questions that must be answered, but they are the kinds of questions that also raise clearly the problem that is addressed in terms of the Federal Government beginning to assert itself into this process.

Mr. President, I know we have a limited time right now, so I am going to conclude my remarks. I know there are a number of other Senators who will seek time. I have been told to remind them all we only have about 15 minutes of debate remaining.

I yield the floor.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. CAMPBELL. Mr. President, I rise to support Senator CRAPO's amendment to strike the language in the Conservation Reserve Enhancement Program.

Before the holiday recess, we debated a slight decreased version of Senator REID's proposal. The holidays gave us sufficient time to look over the language and to get feedback.

I can tell my colleagues that in my State our Governor, our attorney general, the Colorado Farm Bureau, and literally every rancher and farmer I talked to during the break strongly oppose this language. Sensitively, there have included some very controversial language. I have great respect for Senator REID and consider him a close friend, but I think this is just dead wrong. The recent change cannot cure the flawed provision.

First of all, some might refer to Senator REID's proposal as a mere extension of CREP, a program that can only be extended if it already exists, but water rights should not be part of the Conservation Reserve Enhancement Program. Therefore, the addition of water rights is a fundamental change to the existing program. Such a change should require hearings, study, or some level of congressional inquiry, and yet there has been none to date.

Our constituents expects it to be fully informed. Shouldn't the first that most of us have heard of creating what is effectively a new program, how can we possibly be fully informed? We cannot, and I simply cannot vote for something that can hurt farmers in my State with so many unknown effects.

I carefully reviewed the language letting the States hold water rights rather than the Secretary of Agriculture, as Senator REID recently proposed.

At first glance, this might sound reasonable, properly deferring to the primacy of State water courts in the West. However, the new language requires the Secretary of Agriculture to review and approve the interest of the State's program.

Again, the United States waived its sovereign immunity and consented to deferring to State adjudication of water rights. In 1993, the U.S. Supreme Court reaffirmed that law ensuring that Federal claims are subject to State water courts. Senator REID's language would make a change to CREP and would bring the Federal Government back into the equation. Whether intentional or not, the USDA review and approval requirements mean to a sleight-of-hand Federal regulation of a precious State resource resulting in de facto Federal involvement.

Again, this dramatic change to the CREP creates too many questions. First and foremost, why should water be included in this farm bill? Second, this new program would give priority to a State program that addresses endangered, threatened, or "species that have been called threatened or endangered." Senator CRAPO alluded to this.

It may also include those that "may become threatened." I do not have to remind my friends from the West of the controversy currently surrounding the Canadian lynx and the fish in the Klamath basin and my State of Colorado, too. Species that were actually endangered and, in some cases, we are finding out now, in the case of the lynx, they were not really endangered. There were dumbed statistics to make them look endangered.

Before granting discretion to affect "species that may become threatened," we should determine how many problems this kind of corrective action should be taken.

Senator CRAPO mentioned the question, if we lease water to the Federal Government and they use it for a different purpose than the farmer used it. If it creates a purpose different purpose than the farmer had in mind, an actual endangered species habitat, would that, under the Endangered Species Act, supersede the rancher's and farmer's ability to get the water rights back when the lease is over? That is a question we should ask ourselves.

My colleagues have stressed this language would not disrupt water rights because it only affects "willing sellers."

What about the downstream farmer? In the West, all of us know that water is used more than once.

I have a small ranch. I think I am about four in the use of the water. The wastewater is then flowed on people who are downstream or have areas of ranching territory lower than others. Could they be also rely on that water to feed their crops or their livestock? Could they be also in danger? I think they could.

In Colorado, much as in all the rest of the West, water is treated apart from the land. It is considered a property right. It can be taken from the land and sold separately, which it often is. So long as the change does not in some way water rights, this language, because of the way we reuse the water over and over, could certainly jeopardize junior rights holders.

Coloradans is an arid State. Its strained water supply has been over appropriated. In other words, the demand for water exceeds our supply. That is what we are always in court about and always fighting about. Even more challenging, Colorado's population is projected to grow 63 percent in the next 25 years. The growth is only superseded by the growth in Nevada and Arizona. We are the third fastest growing State. I certainly would oppose any action to jeopardize any State's rights to use the water it legally owns.

In order to meet water needs, communities have entered into water compacts. I believe this language leaves too many questions about what happens to inter-basin compacts, interstate compacts, and international compacts. Both the Colorado and the New Mexico and other compacts in Colorado. We have nine rivers that flow out of Colorado. All of them are subject to these compacts. The two major rivers I
mentioned are subject to compacts with another nation, Mexico, as they receive water from both of those resources.

In closing, many of my colleagues like to say they are moving a farm bill because that is what farmers want. The group, Environmental Defense, was quoted today in Congress Daily concerning Senator Reid’s language, and I would like to remind my colleagues they are purportedly acting pursuant to the farmers’ interests and what the farmers want.

Well, I know the Farm Bureau has gone on record as opposing this language. The Farm Union was in my office also opposing this language, and I oppose this language. So I hope my friends recognize the real long-term dangers that could exist for water users in all the Western States if the Reid language is included.

I yield the floor.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. CRAIG. Mr. President, I am pleased to join with my colleagues from the West and my partner from Idaho, Mike Craig, to support an amendment to strike a section from this bill that deals with the very critical issue of western water. This area is being called the water conservation program.

I will submit for the RECORD a letter from the President of the American Farm Bureau. Basically, he puts it rather clearly:

The American Farm Bureau Federation board of directors in a special meeting on Tuesday, December 18, 2001, voted to oppose Senate passage of the farm bill if it contains the water language that your amendment is intended to strike.

I ask unanimous consent that the American Farm Bureau letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AMERICAN FARM BUREAU FEDERATION,

Hon. MICHAEL CRAPO,
U.S. Senate, Russell Senate Office Building,
Washington, DC.

Dear Senator CRAPO: I am writing to convey the strongest support possible of the American Farm Bureau Federation for your amendment to strike the Reid water rights language from the conservation title of S. 1731. This language poses an extraordinary new threat to agriculture and the ability of farmers and ranchers to remain economically viable.

The water provisions in the bill set a dangerous precedent that would erode historic state water law. Additionally, it will expand the scope of the Endangered Species Act to cover a new category of species that are not in fact threatened or endangered. These changes are unacceptable to agriculture and will affect agricultural producers well beyond those who participate in the Conservation Reserve Program.

The American Farm Bureau Federation board of directors in a special meeting on Tuesday, December 18, 2001, voted to oppose Senate passage of the farm bill if it contains the language that your amendment is intended to strike.

Sincerely,

BOB STALLMAN,
President.

Mr. CRAIG. I am not sure one can get much clearer than the language of Bob Stallman as he talks for the thousands and thousands of members of the Farm Bureau across the Nation and, most importantly, in the 18 Western States that are most dramatically affected by the Reid provision.

A long while ago, long before the President or I even thought about coming to the Senate—or maybe our parents even thought they might have sons that would come to the Senate—this Congress decided the best way to solve water problems in the arid Western States and western territories was to allow those States and their governments to make those determinations. Why? Because water was so very precious and only the Western States with their perspective could determine the allocation of water. It was never true this side of the Mississippi where there was 30 or 40 or 50 inches of rainfall on an annual basis. Water was viewed sometimes as a problem, not an asset or not a rare commodity, but that is not true in Idaho, Arizona, Colorado, New Mexico, California, or Wyoming where water is truly a scarce commodity. Over decades of time, our States have carefully and cautiously allocated that water.

My colleague from Idaho, and the Senator from Colorado, spoke about some of the methods, the compacts, the water laws, and also the sensitivity that water had to be left instream to take care of endangered species, and those decisions had been made in the States where they most appropriately ought to be made to assure that critical balance in the aridity of the West, of where the water was, how it got allocated and how it got used.

Never before have we attempted to reach over State law by the character of the Reid amendment and create a rather perverse incentive that said we will reward you if you will take land out of production and, by the way, in doing so, you have to put your water in a waterbank to be reallocated.

I do not believe that is the right or the prerogative of the Federal Government in any of its policies under any circumstance. That is the right of the States, the State legislators, their State water boards of resources, and the methods by which they have established water allocation historically and currently. That is why it is critically important that the Craig amendment pass. It is so very important for all of the West that that happen and that we never allow our Government in any way to infringe upon those rights.

In Idaho, as is true of those other 17 States, we are very sensitive to the needs of wildlife and the needs of the human species, as it relates to the needs of agriculture and the consumptive uses versus the conservation uses. We have worked constantly to strike that balance, and we do so today.

Water use and water allocation are a dynamic process in our States, as it must be because it is a rare commodity constantly in demand by someone for another purpose and another use. This city and those who work in these Halls do not collectively have the understanding that our colleagues in the West have for these unique purposes.

That is why I stand in support of the Crapo/Craig amendment this evening and hope our colleagues will join with us in its passage to change the provision of the Reid water language in S. 1731, better known as the water conservation program. I believe that proposal is a war on western water rights and western prerogative. Let us not get it started. Let us snuff it out before the first shot is fired.

I yield the floor.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. ALLARD. Mr. President, I am opposed to the Reid provision in the farm bill and stand in support of the Crapo amendment to remove that provision.

May I inquire as to how much time remains?

The PRESIDING OFFICER. There is approximately 1 minute before the vote under the previous order.

Mr. ALLARD. Mr. President, I ask unanimous consent that I be recognized immediately to vote to speak on the Crapo amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLARD. Mr. President, briefly I want to talk about the fact we have not had any hearings on this particular issue. I do not know how many Senators who come from a different part of the country than those of us in the West have come up to me and said: We do not understand your water law.

Granted, it is complicated and it varies a little bit from State to State. Due to that complexity, I don’t think we are doing the Members of the Senate any service by rushing this matter through and not having proper hearings and giving everybody an opportunity to understand the full impact of this piece of legislation.

The U.S. Supreme Court has clearly given the States the sovereignty in the area of water adjudication. We are talking about a property right. My State of Colorado has recognized water as a property right. We have sometimes referred to it as the “doctrine of prior appropriation” or perhaps simply the “Colorado water doctrine.” Many Western States have followed suit and the laws have been put in place in the State of Colorado.

VOTE ON AMENDMENT NO. 2808

The PRESIDING OFFICER. Under the previous order, the Senate will now vote on an agreeing to a resolution of the Senate from Missouri. The yeas and nays have been ordered. The clerk will call the roll.
The legislative clerk called the roll.

Mr. FITZGERALD (when his name was called). Present.

Mr. REID. I announce that the Senator from Vermont (Mr. JEFFEDS) is necessarily absent.

Mr. NICKLES. I announce that the Senator from Kentucky (Mr. BUNNING) would vote “yea.”

The PRESIDING OFFICER (Ms. CANTWELL). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 93, nays 0, as follows:

[Rollcall Vote No. 20 Leg.]

**YEAS—93**

Akaka  Dorgan  Lugar
Allard  Durenberger  McCain
Allen  Edwards  Mikulski
Baucus  Ensign  Miller
Bayh  Enzi  Mortkowski
Bennett  Feingold  Murray
Biden  Feinstein  Nelson (FL)
Bingaman  Feingold  Nelson (NE)
Bond  Graham  Nickles
Boxer  Grassley  Reed
Breaux  Gregg  Reid
Brownback  Hagel  Roberts
Burns  Harkin  Rockefeller
Byrd  Hatch  Santorum
Campbell  Helms  Sarbanes
Cantwell  Hollings  Schumer
Carnahan  Hutchinson  Sessions
Carper  Hutchison  Shelby
Chafee  Inhofe  Smith (NH)
Cladell  Inouye  Smith (OR)
Clinton  Johnson  Snow
Coehlan  Kennedy  Specter
Collins  Kerry  Stabenow
Conrad  Kohl  Stevens
Couritz  Kyl  Thomas
Craig  Landrieu  Thurmond
Crano  Leahy  Torricelli
Daschle  Levin  Voinovich
Dayton  Lieberman  Warner
DeWine  Lincoln  Wellstone
Dodd  Levin  Wyden

**ANSWERED “PRESENT”—1**

Fitzgerald

**NOT VOTING—6**

Bunning  Domenici  Jefords  Thompson

The amendment (No. 2830) was agreed to.

Mr. REID. I move to reconsider the vote.

Mr. HARKIN, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. REID. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. ALLARD. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

**AMENDMENT NO. 2553**

Mr. ALLARD. Madam President, before we had the vote, I was talking about my support of the Crapo amend-

ment, of which I am a cosponsor, because of the need I felt to remove the Reid amendment from the farm bill. At the time, I was making the point that water issues in the West are very complicated.

There is an issue that has come to the floor of the Senate that has not had any hearings in committee and has not had any kind of study.

Before we move forward with this kind of a proposal from the Senate, we ought to have thorough hearings and study so the Members of the Senate can understand the implications of this type of amendment, particularly out West where we deal with and are under a completely different set of water laws than those parts of the country that have more water.

For those of us in semiarid States, water is a property right. The responsibility of managing water has been made the responsibility of the States. This has gone to the Supreme Court. The Court has found that, yes, that is a proper role; States should assume that responsibility.

The Reid amendment to the farm bill could literally devastate my State of Colorado. It is a very serious problem because we are a State that relies on our irrigation and our agriculture.

One of the largest agricultural-producing counties in the country is in the State of Colorado. They rely on irrigated agriculture and having a reliable source of water.

The practical effect of this language could mean that farmers end up giving their water rights to the Federal Government when they sign up for participation in the Conservation Reserve Program.

This language, if it is left in the farm bill, could potentially dewater Colorado and other Western States. It would dewater States such as Colorado that rely on beneficial use and State water laws to allocate a very scarce commodity—water.

Water is the essential substance of life. The farmer depends on it to grow enough food to meet our national food needs. The city depends on it to survive. Commerce depends on it to deliver goods to customers, to restock store shelves, and to continue as a viable business, providing jobs and security.

In Colorado has a unique system in water law. We have our own water courts. We are the only prior appropriation State that does not have a permit system. Appropriators in Colorado must make a claim first and then seek a “decree” water right in court.

In Colorado, we have actually even set up a different set of courts. It does not go through the regular court system. We have a different set of courts that just deal with water rights. When somebody applies for a right to use water, they need to have the right to file a suit in court. They have the right to have there attorneys in that court but there are engineers, hydrologists, all sorts of scientists who come in and discuss the impact of the diversion of that water for one reason or another.

This requires considerable study. Each individual case is different. And these individual cases—usually the circumstances are never the same—have to be decided on a case-by-case basis.

Why many of us get so concerned about the Federal Government and a Federal law is that this treats everything as a blanket process. The Federal Government does not go through that process. They just collect the water off the CRP land, and there is no study as to what impact it has on private property rights.

The Colorado Constitution, which the Supreme Court has said has a sovereign right on water issues, says: “The right to divert the unappropriated waters of any natural stream shall never be denied.”

These are not mere words. This is a collective ideology over over 100 years of practical use. Many have brought an excellent point regarding beneficial use. Beneficial use is an integral part of western water law. When the farmer allows the Government to take the water, it is possible that the farmer could lose the right to use the water under the State’s beneficial use laws. It is possible that this law would result in an unintentional loss of water rights, water rights terminated through the operation of State law.

Let me offer a scenario. A farmer decides to go into the CRP, and it is the CRP where the Federal Government would take the water. Suppose he goes in for 10 years. He has not been using that water so, under our State law, he would lose the right to use that water. Or the other question comes up. Does that right transfer to the Federal Government and remain with the Federal Government even though he has brought his land out of the CRP and back into production?

That is why it is very important that we proceed with hearings and study. The U.S. Supreme Court has clearly given the States sovereignty in the matter of water adjudication. This ill-founded amendment attempts to give the Federal Government a new water right that it simply is not entitled to, nor should it be granted by Congress.

My home State is united in opposition to this usurpation of water: the Colorado Commissioner of Agriculture, the Colorado Department of Natural Resources, the Colorado Farm Bureau, and the Attorney General. There is bipartisan concern in my State, and agricultural groups from all aspects of Colorado have raised concerns with me about this particular amendment.

The Colorado groups are not alone. The list of those deeply concerned with this particular amendment.

Mr. REID. The amendment ties the water rights to endangered species. We have
seen this combination before. Land, water, and the Endangered Species Act create a mix that is often disadvantageous for property rights and property owners. We have seen this, for example, in the Klamath River Basin in Oregon. Unfortunately, we are not sure what will happen to water rights when a river owner dies; the farmer’s deal with the Government ends. I raised this point. We don’t know because the proposal is silent on what has to take place upon termination of the enrollment period. Does the Government keep the water?

As we know, the Endangered Species Act requires consultation for any Federal action that affects species. That requirement could be applied to transfer of water rights back to the landowner on termination of the agreement.

Does the landowner have to establish that there is no longer a need for the water by the listed species? The landowner is placed in an expensive and dangerous position of proof—a difficult proposition that, if not answered, could mean the landowner loses his water right.

When water habits and availability of water to the land are changed, this alters the character of the land. In a region that receives far too little rain to depend on skies for moisture, a deprecation of water, no matter how permanent, could change the very nature of the ground itself.

Again, I would like to cite, in this context, my own personal experience. I grew up on a ranch. We had many hay meadows, and they were watered with flood irrigation. No longer is that feasible. The landowner has to decide now whether to irrigate. They quit the surface right irrigation. It dried up all the springs that were feeding into this river that ran through the place. As a result, we see that river dries up and is bone dry.

I see my colleague from Iowa wants to be recognized for a minute. I yield to my colleague from Iowa.

Mr. HARKIN. I thank the Senator for yielding without losing his right to the floor.

Madam President, I ask unanimous consent that the following list I will send to the desk be the only first-degree amendments in order to S. 1731; that they be subject to second-degree amendments which must be relevant to the Senate; and that to which it is offered; that upon the disposition of all amendments, the bill be read a third time and the Senate then proceed to the consideration of Calendar No. 199, H.R. 2666, the House companion; that all after the enacting clause be stricken and the text of S. 1731, as amended, be inserted in lieu thereof; that the bill be advanced to third reading and the Senate then vote on passage of the bill; that upon passage, the Senate insist on its amendment and request a conference with the House on the disagreeing votes of the two Houses; and that the Chair be authorized to appoint con-

ferees with a ratio of four to three;

that S. 1731 be returned to the calendar, with this action occurring with no intervening action or debate.

Mr. REID. Madam President, reserving for the right to object, for the information of Senators, tomorrow we have a number of people who have agreed to come to the floor. I am sure that we will have more when the Senate CONRAD at 9:30; Senator SANTORUM at 10; Senator LINCOLN at 10; and Senator FEINSTEIN at or about 12.

I am not asking that this be part of the unanimous consent request but just to alert everybody, tomorrow there will be amendments offered. The two leaders will agree on when we will vote. There will be no votes tomorrow, as has been announced. Tomorrow we will be open for business to try to move this bill along.

I withdraw my reservation.

The PRESIDING OFFICER. Without objection, it is so ordered.

The list is as follows:

Baucus: Disaster assistance.
Bingaman: Peanuts (amendment No. 2573).
Bond: Relevant (2).
Boxer: Regional equity.
Boxer: Relevant (2).
Bunning: Relevant (2).
Burns: CRP (2).
Byrd: Relevant (2).
Carnahan: Relevant.
Collins: Relevant.
Conrad: Relevant.

Santorum: Puppy Mills protection.
Santorum: Country of origin labeling.
Stevens: Organic labeling.
Stevens: USDA study/salmon.
Thompson: Relevant.
Wellstone: Relevant.
Mr. HARKIN. I thank the Senator for yielding.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. ALLARD. Madam President, the point I was making is that we have to be very careful in how we use our water or we could have a lot of far-reaching ramifications that have had some inadvertent effects on fish and wildlife and plant species that survive in that particular area, which simply may not be met with a ready, easy transfer of water to the Federal Government without a serious study of those ramifications. There is a serious lack of fair and open discussion on this issue. I remind my colleagues again, there was little congressional investigation or involvement when this language was inserted into the bill, and the committee responsible for many of the details simply were not involved in the discussion.

One must also ask the question: What is the purpose of the Conservation Reserve Program? Our debate is focused on many things, but not once have Members had the opportunity to discuss until now whether or not the purpose of the Conservation Reserve Program is for endangered species. This program also allows for a permanent transfer of water rights. CRP has always been limited to a certain number of years.

The Reid language also expands the basic coverage afforded to the protection of species under the Endangered Species Act. This is an important point. Not only will endangered species and threatened species be covered, but the Reid program would cover sensitive species, too.

What is a sensitive species? At this time everyone should be reminded that the Endangered Species Act has no classification or definition of sensitive species. What happens to the other uses of the water source? Participation in the program could lead to increased delivery costs to mutual users. The costs of operating ditch companies could increase as cost share participants leave the program. Downstream users could also be affected. Participation in the program could lead to underground recharge problems.

The language is simply too vague. It does not specify sources of water eligible to participate in the program. Not only could the use of surface water and CRP, but it could apply to ground water as well; a whole different set of issues become pertinent.
Ground water use and set-asides affect neighboring use.

My point is, this is a very complicated issue. It has a lot of ramifications. Without careful study, this could be the wrong action to be taken. It could have just the opposite effect of what the sponsor would like to accomplish.

I rise in support of the Crapo amendment. I thank my colleagues and yield the floor.

Mr. RAGEL. Mr. President, I rise to support the Crapo amendment to strike the proposed Water Conservation Program from the farm bill that we are debating today on the Senate floor.

The creation of the Water Conservation Program, as proposed in this current legislation, would set a very dangerous farm policy precedent. It would open the door to federal government infringement on state water rights. There would be many unintended consequences for agriculture producers—the people we are trying to assist today.

This proposal is a threat to private property rights and conflicts with individual state water laws and programs. As Nebraska Governor Mike Johanns said:

To tie state-administered water rights into such a program creates another federal nexus whereby the federal government can leverage water away from our agricultural producers and water users permanently. . . Nebraska simply cannot agree to any such program.

Governor Johanns clearly identified the dangers of the current legislation.

All states care about water conservation and wildlife protection. For example, the State of Nebraska is currently working with Wyoming and Colorado, and the U.S. Fish and Wildlife Service to craft a Cooperative Agreement for endangered species management on the Platte River. States do not need more federal dictates and regulation.

As one irrigation district manager in western Nebraska put it: "There would be significant consequences with this water conservation proposal as it is written in this legislation. The process of evaluating these impacts would be very complicated. Each state has different laws and issues."

Additionally, the current proposal has not been debated in the House or Senate Agriculture Committees, or in the oversight committees responsible for the Endangered Species Act. This issue deserves significant study, review and analysis before we move forward with federal legislation.

There are too many problems in this proposal—too many questions yet to be answered. We should not impose additional, unnecessary restrictions on water and property rights for our states and our citizens. I urge my colleagues to support the Crapo amendment to strike the Water Conservation Program from the underlying bill.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. THOMAS. Madam President, I will be brief. I will come back on Monday or Tuesday and talk more about it. I rise, too, in support of the Crapo amendment.

Certainly for those of us in the West there is nothing more important than water rights and how we handle those water rights, nothing more important to us than the concept of State allocation of water adjudication. And this threatens that, it preempts State water rights. It has the possibility of doing that. That could result in permanent acquisition of the water rights, which is something that any of us want to see happen.

It extends authority of the Endangered Species Act to USDA. Certainly we have enough difficulties with the way the Endangered Species Act is handled now. This is the last one of the issues. It proposes radical changes to CRP without addressing the reform of the Endangered Species Act. These two issues do not fit together and are very inconsistent.

Furthermore, it never was discussed in the committee. I happen to be a member of the Agriculture Committee. This was never debated during consideration of the bill. There are a number of us on the floor who certainly would have fought vigorously to keep this language out of the bill.

Madam President, I will not take any more time. Some of my colleagues want to speak. I will be back to talk more about those impacts and believe this amendment will have. Again, I support the Crapo amendment. I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BURNS. Madam President, I rise to support the Crapo amendment.

From the statements that have been made with regard to having water language in the agriculture bill at all, it is pretty indicative of what has happened since the legislation was introduced. There has been no hearing on this legislation. It started out as a version of S. 1737. The bill never had a hearing. It has never seen the light of day. It has never seen any lighthearted. Any time that happens in the Senate, most of us fear not what is in it but what is not in it.

This summer, we had a crisis in the Klamath Basin in southern Oregon, southeastern Oregon, and northern California. Anybody who depends on water for irrigation and their farm operations should be very concerned about this amendment.

We have heard a lot of Western Senators make statements, but this is not only a problem that is confined to the West. We now have a little argument over a river that runs between Alabama and Georgia. As populations grow, we will hear of more conflicts in areas where water law or water policy has never before been considered.

Last weekend, of course, all the papers were full of Enron, but there was a very interesting article in Monday's Washington Post with regard to a National Science Foundation study that was released. It was very critical of the science that was a part of the decision to shut off the water to the agricultural interests in the Klamath Basin.

Madam President, 1,500 farmers were denied water for irrigation projects. Crops burned up. We have seen filings of bankruptcy, people losing their farms because in farming, a tenacious endeavor, one cannot afford to see one crop miss or they will not have anything at all because of the Endangered Species Act.

That made me wonder about a lot of other studies the Government has done. Are they credible? And what kind of responsibility have we taken on as a Government to make sure that the science is correct to the best of our knowledge?

Ever since, any legislation that comes before this body that has to do with the Endangered Species Act as it relates to water raises many questions.

Congress has had a longstanding policy that water rights, even water rights for conservation, even water that would be classified as preservation, also had to come from the States involved. It is a State's right of controlling and adjudicating its own resources. This Government has never even taken a look at that until the beginning of the last administration when we had a Secretary of Interior who was very forthright in his belief that the Federal Government should control all water resources across this country.

This is a part of the farm bill that is most troubling to most of us. We will have more to say on this before we vote on this amendment, which comes up on Tuesday. I assume that is the tentative schedule.

We see new terms entered in this issue. We know what an "endangered specie" is. We have a definition of a "threatened specie." But this is the first time we have heard the term "sensitive specie." Most difficult category is those who serve in this body.

As we look at what happened in the Klamath Basin, as we look at another little item that happened in Washington State when there was a deliberate planting of the Canadian lynx hair to prove this was habitat for another specie that is on the threatened list and yet has not been classified as endangered just to control the use of the land, we have to look with a very suspicious eye at what we are doing to this country and its ability to produce food and fiber for its citizens.

Can that agenda be so treacherous as to deny us, the American people, the ability to clothe and feed ourselves? Can we do anything but what we are doing to this country and its ability to produce food and fiber for its citizens?

Can that agenda be so treacherous as to deny us, the American people, the ability to clothe and feed ourselves? Can we do anything but what we are doing to this country and its ability to produce food and fiber for its citizens?
From that standpoint alone, I ask my colleagues who represent States where agriculture plays a major role in their economy to take a look at this and ask themselves: Is this farm policy? Is this food security policy? I can see no way that one can find a positive answer.

Any time we have big brother, who has the big checkbook, standing in the wings to control the lifeblood of any crop, whether it falls from the sky, whether it runs down our streams, or whether it comes from homesteading. That means those who are going to be living on it, who are then going to be in the hands of the government, sometimes a government that is insensitive to what we have to put up with in the production of food and fiber for this country.

So as the weekend rolls on and as we take time to study this issue, I think it is a question for this body. Do we pass legislation that has never had a hearing, that has never been presented before any committee, and then wonder about what is being raised tonight? Remember, we are doing business that will affect people with real faces, with real investments, in the real world. It is not some harebrained idea that has been generated in this 17 square miles of logic-free environment because it does have a true effect on every person who lives in this country, not just us who live in the West but everybody who lives in this country.

I thank the Chairman for allowing me this time. I will have more to say at a later date.

I yield the floor.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. ENZI. Madam President, I rise to support the amendment that is offered by my colleague from Idaho, Mr. CRAPO, a water lawyer. Yes, water is important enough in the West that there are people who make it an occupation. It is that complicated and it is that important. His amendment would strike section 215 of the farm bill and leave intact the current conservation programs that are administered by the Secretary of Agriculture.

I commend the Senator from Idaho for his leadership in this matter and for the excellent foresight he shows in working to block the Federal Government from intervening into an area that is extremely critical to the survival of the Western United States.

Now one has probably noticed how many Western Senators have come to this Chamber. That is because we know some problems with water. We want to make sure those fights we have been having for a long time are still fights between States, because we know that is a fair fight and a fight with the Federal Government is not.

Mark Twain is the one who said in the West whiskey is for drinking and water is for fighting over. He was really right.

The first principle that must be understood in dealing with water in the West is that availability of water has always been the West’s limiting factor for development. If one looks at a map of the private and Federal lands in the West, one will see a fairly good description on productive and nonproductive lands. Early settlers built their homes where they could get water to plant their crops and raise their livestock; at least as soon as they understood the West, they did.

A lot of the settlement that came from the East. One of my old friends, one of the first people I met when I moved to Gillette, WY, was a homesteader. He has since passed away, but I loved him telling me about his first selection of land. There were people who could be paid who would help pick the best land.

But nobody who came West had much money. So rather than pay one of these people this bounty to help him select the good land, he picked good land because it did not have to be flooded out every year.

After the first year, he gave up his first homestead and picked some good bottomland. Bottomland in Wyoming and South Dakota does not have to be flooded out that much water, and he learned that his first year. He tells about this piece of property on which he did finally homestead. He had to get water from a neighbor to drink. He had to haul the water by wagon 3 miles to get it to this place. We are talking some dry land.

In fact, availability of water was so important to early settlers, when Wyoming ratified its State constitution in 1890, the State claimed State ownership of all water rights as part of the State constitution, and that was accepted as part of our Statehood. The Federal Government said: Wyoming, we will let you own your water.

Later, when all the productive lands were settled, the bulk of the remaining lands were portioned out by the Federal Government mainly between the Forest Service and the Bureau of Land Management.

We also have a third category, and that is the national parks. The Bureau of Land Management and the national parks are administered by the Interior Department, and the forest lands are handled by the Department of Agriculture. There is a good reason for that. The national parks, of course, are very different in some maintenance that is required, and I do not know of anybody who ever wants to change that. So those are not productive lands.

The Bureau of Land Management lands are the lands that were left over from homesteading. That means those are the lands people found were too dry or too rocky or too steep to be usable. So those are not productive lands.

Then, of course, there are the Forest Service lands, those lands over which the Department of Agriculture because those were supposed to be productive. Those were usable lands, and usable for a number of activities. Besides the recreation we greatly enjoy today, there was grazing and timbering. When we created a new agency a little bit later then to develop the water resources on this public land, we had the Bureau of Reclamation to make sure that we efficiently used the vast resources found in places such as the State of Wyoming.

The next principle that must be understood as to why it is so important to strike section 215 is because of the western water law was built on a much different foundation than the current laws enforced in the East.

We are amazed at the rain that happens out here. Washington, DC, occasionally gets more rain in a period of a few consecutive days than the State of Wyoming gets in an entire year. Almost all of Wyoming is considered desert, high desert, mountain desert. The desert definition is less than 15 inches of rainfall a year.

Part of the reason we do not get much rainfall, of course, is the mountain ranges that this water comes over before it ever gets to us drops out so much of the moisture. I remember being in Seattle and seeing T-shirts that said: “Here you can take your goldfish for a walk.” Or “Kids here do not get a suntan, they rust.”

After I saw some of the rain, I realized it was a little different place than Wyoming where we are more interior and have a little less rain. While a good portion of the country, particularly the East, is trying to figure out how to drain the water off, we are trying to figure out how to save every last drop. We have come up with some rather innovative ways of doing that.

We are also in a drought, so water is even more important this year than it has been. This is the third year of a drought, though. There are some communities with the Federal Government when there is a continuing drought because we really only provide for—and can imagine—one year of drought. So if people are given advantages in one year of a drought, they are not eligible in the next year.

I mentioned that we are going into the third year. There are lakes in Wyoming that have dried up. Nobody gets any water out of them anymore. The streams are much smaller than usual. Wyoming streams and rivers are different than in some other areas of the country. We call it a creek or a stream when it is about 2 feet to 20 feet wide. Anything over 20 feet is a river in Wyoming. We do not have much water. We are the headwaters of a lot of places, but when there is a drought every last drop is important.

I want to explain a little bit about the water law. Although there are variations from State to State, the basic eastern water law follows a doctrine known as riparian rights. Under this doctrine, landowners who border waterways are guaranteed certain rights that allow them
to use whatever amount of water they need for any reasonable use. Because riparian rights adhere to the ownership of the land, these rights do not need to be exercised to be kept alive. By simply obtaining a water use permit, much as someone would get a building permit, landowners can initiate new water use at any time they want and in doing so can force other users to adjust to their needs. This is more or less the main water use principle that underlies the water law in 29 States.

Water, on the other hand, is based on a doctrine of prior appropriation. Under State law, an individual owns the right to use water based on the time the water was first appropriated and used, and then that interest is only valid for the amount of water appropriated for that particular use.

Let me give an example. Say that rancher one settles along Crazy Woman Creek at the foot of the Wyoming Big Horn Mountains. We have a lot of interesting creek names. He drew enough water in his first year to water 50 head of cattle and to irrigate two pastures. The next year his neighbor moved in and used enough water to irrigate his two pastures and to water his livestock. Now in this case, rancher one, settler one, would be able to claim a prior use and his neighbor would have to guarantee enough water remains in Crazy Woman Creek to ensure the first settler can irrigate his two pastures and water his 50 head of cattle before settler two gets any water.

Furthermore, in the following year the first settler decided to irrigate a third pasture in order to feed an additional 25 head of cattle, his second ap- propriation of water would have to follow the appropriated rights already established by settler two the year before.

To add to this confusion, once a per- son has water to beneficial use as well as irrigating land or watering livestock, and complies with the statutory requirements, that water right remains valid only so long as it continues to be used. If a water right lays dormant for too long, the right is considered abandoned and is lost. All of those rights shift.

Do not worry if the system sounds complicated. After more than 150 years of more and more water users and more and more uses, the ability to sort out the rights of Western water users is a science all its own. And I have not even thrown in the complica- tion of Indian water rights which have a historic precedent and are the subject of a lot of water law.

I will say, however, if you were to talk to any of the farmers and ranchers whose families first settled areas that still apply the prior use doctrine, you would quickly begin to grasp the fact that every one of them knows when their rights were under the law, how much water they can use, how much water they will need, and how any dis- ruption of the use system will decimate the ecosystem and the land’s ability to sustain life.

What does this have to do with the amendment? It has everything to do with the amendment. As soon as the Federal Government intervenes in the State water system, it acquires the water rights under section 215, that water right under the supremacy clause of the U.S. Constitution would suddenly move to the front of the line for when that water right would be available for use. In other words, it would trump all other rights.

The land use and water balance that had been established over the past one and a half centuries would then be completely turned on its ear. The impact would immediately be felt by family farms and ranches that would lose productivity, jobs, homes, and wildlife. Migrating birds would lose their habitat.

Don’t let anyone kid you that ranches and farms are not habitat for wildlife. Private ranches and farms in the West are some of the most produc- tive and vibrant wildlife habitat you will ever find. Every time we put a ranch out of business in Wyoming it would take another 40-acre tract of land. The people are so crowded together. Forty acres may seem to be a lot in the rest of the country, but for wildlife that is not a lot of room. It is not even a lot of room for people in the West. We would lose critical wildlife habitat. They would be overrun by people.

In addition, many streams in the West are currently overallocated with junior and senior water rights. Individuals with junior water rights would lose complete access to water if the Federal Government held senior water rights. Water delivery schedules would be upset; some areas could get flooded while others would come up dry at critical times, and you do not believe that Federal ownership of water rights would have such a dev- astating impact, I will point out again the travesty that occurred in Oregon and California’s Klamath Basin.

Farmers, whose rights to the water were established by Federal statute, had them taken away from them through a policy that the National Academy of Sciences reports was based on speculation. It was not based on science. It was not based on good policy. It was not based on practicality. I guess it was based on bad politics.

As I said at the beginning of my statement, water is extremely impor- tant to the future of the West and to Wyoming. I urge my colleagues to sup- port the amendment offered by my colleague, the water attorney from Idaho, and to leave in place the conservation program as currently administered by the Secretary of Agriculture.

If we were to implement section 215 as it stands today, it would have a devast- ating impact on all the downstream water users, and it would preempt the balance carefully established in State water law. It would do so to satisfy a policy that not even the National Academy of Sciences claims is sup- ported with adequate science.

I mentioned before there are fights between States. We just finished a 25- year fight with the State of Nebraska. How do we do with how much water we have to release from Wyoming into Ne- braska. It is settled by a water comp- pact that has a few intricacies that re- sulted in 25 years of legal battles. That particular compact would be upset, and it is not just the protection that is built in there is for migrating whooping cranes. Sometimes when we make an effort, we are not sure of the unintended con- sequences.

Once again, I remind Members what Mark Twain said: In the West, whiskey is for drinking and water is for fighting over.

We prefer to be fighting between States than fighting with an unfair Federal Government. Please help eliminate this unfair section.

I yield the floor.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. CRAIG. Madam President, I have been listening for the last good number of minutes as my colleague from Wyo- ming gave what was not only an elo-quent but true and most entertaining explanation about the validity of the Crapo amendment and why this Senate should pass it.

There is no question in my mind or any westerner who lives in the high desert States of the Great Basin, all the way to the Mississippi River, of the criticality of water and why States over long periods of time have been very cautious in not only its allocation but its relationship to the human spe- cies. I hope the explanation of the Senator from Wyoming serves us all well as we consider this amendment.

It appears there is no one else in the Chamber at this moment to debate the Crapo amendment, so I ask unanimous consent it be set aside for the purpose of offering another amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2835 TO AMENDMENT NO. 2471

Mr. CRAIG. Madam President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. Craig) proposes an amendment numbered 2835 to amendment No. 2471.

Mr. CRAIG. I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the fol- lowing:

SEC. 1022. STUDY OF PROPOSAL TO PROHIBIT PACKERS FROM OWNING, FEEDING, OR CONTROLLING LIVESTOCK.

(a) In general.—Not later than 270 days after the date of enactment of this Act, the
Secretary of Agriculture shall complete a study to determine the impact that prohibiting packers described in subsection (b) from owning, feeding, or controlling livestock intended for slaughter more than 14 days prior to slaughter would have on—

(1) livestock producers that market under contract, grid, basis contract, or forward contract;

(2) rural communities and employees of commercial feedlots associated with a packer; 

(3) private or cooperative joint ventures in packing facilities:

(4) livestock producers that market feeder livestock to feedlots owned or controlled by packers;

(5) the market price for livestock (both cash and future prices);

(6) the ability of livestock producers to obtain credit from commercial sources:

(7) specialized programs for marketing specific cuts of meat;

(8) the ability of the United States to compete in international livestock markets; and

(9) future investment decisions by packers and the potential location of new livestock packing operations.

(b) PACKERS.—The packers referred to in subsection (a) are packers that slaughter more than 2 percent of the slaughter of a particular class of livestock slaughtered in the United States in any year.

(c) CONSIDERATION.—In conducting the study under subsection (a), the Secretary of Agriculture shall—

(1) consider the legal conditions that have existed in the past regarding the feeding by packers of livestock intended for slaughter; and

(2) determine the impact of those legal conditions.

(d) EFFECTIVENESS OF OTHER PROVISION.—The section entitled “PROHIBITION ON PACKERS OWNING, FEEDING, OR CONTROLLING LIVESTOCK,” amending section 202 of the Packers and Stockyards Act, 1921 (7 U.S.C. 195), shall have no effect.

Mr. CRAIG. Madam President, as we debated the farm bill before the Christmas recess, I voted to support an amendment offered by Senator GRASSLEY and Senator JOHNSON, and Senator JOHNSTON, from South Dakota. Reportedly at stake are about 3,000 jobs in a South Dakota packing plant, and 4,000 jobs associated with the Premium Standard Farms of Missouri. I also know of significant consequences to the economy and jobs in the State of Colorado. In this current time of such a sensitive economy in agriculture, I believe 10,000 more people without jobs is not a correct path to walk down.

In my State of Idaho, it could significantly impact the relationship between certain producers in my State and certain packers.

Given the questions I have asked about a ban on packer ownership of livestock, I cannot lend my support to the Grassley-Johnson-Wellstone language. I urge my colleagues to consider my amendment requiring a speedy but thorough review of the potential impact of a ban on packer ownership, control of ownership, and the word “ownership,” and the word “control” are key to all of these relationships.

Under my amendment, the USDA would conduct a study in cooperation with the livestock industry—all of those within the industry—to determine the impact that prohibiting packers from owning, feeding, and controlling livestock intended for slaughter more than 14 days prior to slaughter would have on producers, rural communities, private or cooperative joint ventures in packing facilities, marketing prices for livestock, the ability of producers to obtain credit, specialized marketing programs, the ability of packers to compete in foreign markets, and the assurance that producers seeking investment could be put at very serious risk.

These economists also point out that packers who enter into marketing agreements with producers are better able to obtain financing for their operations. I know of several instances of those relationships where those very contracts allow the producer to gain the necessary financing with his financial institution. Without these agreements, financing for growth and capital investment may be substantially threatened. Lenders would not have the assurances that producers seeking loans had a market for their animals.

Congress would be taking a critical risk management tool away from producers in certain instances. Is this what the ban’s proponents hoped to accomplish for their livestock constituents? I really don’t think that was the intent. And I must tell you, Mr. President, when I initially voted for the ban, that was clearly not my intent.

Still other economists have offered a response to this economic analysis. The very intensity of the ongoing debate over this issue raises the question: Why throw support to a measure that was clearly not my intent?

I have visited with Senator GRASSLEY. We have been working cooperatively to get a better understanding and that we believe would meet the test of the court. Senator GRASSLEY is working with the Farm Bureau at this moment to do so. That amendment might well be available tomorrow or early next week, and I will take a look at it to see whether it fits my concerns and the concerns of a variety of other interests and relationships as they relate to the new dynamics of the livestock industry.

I have certainly not give Senator GRASSLEY and Senator JOHNSON and others the benefit of the doubt if that language can be arrived at. But if it can’t be—and let me tell you, legal
language is left to the beholder and the interpreter at the time—it is clear that a test needs to be run. This Senate deserves a clear determination or interpretation of what all of this means. That is exactly the intent of the amendment that I offer this evening.

Let me make this important issue with the foresight that a thorough review can offer rather than to seek to undo damage apparent in the glaring light of hindsight. Literally, we could destroy thousands of contractual relations even in important markets and future markets if this language is not clear and clearly understood in the law itself. Lawsuits, court orders, interpretations of or arbitrary decisions made as a result of language that is not clearly understood is not what this Senate should be about in the crafting of good farm policy for the livestock industry.

That is the intent of my amendment. I hope my colleagues will read it, understand it, and ask their support.

Mr. President, I see the chairman of the Agriculture Committee is in the Chamber at this moment. With that consideration, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent the order for the quorum be suspended.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I support this legislation. I commend Senator HARKIN, Senator LUGAR and all our colleagues on the Agriculture Committee for their hard work on it and I welcome the opportunity to discuss its important provisions to deal more effectively with the challenge of nutrition and hunger in our society.

It is long past the time for Congress to end the gap in the nation’s nutrition safety net. Hunger is a silent crisis affecting families across America today. No corner of our land is immune from this crisis.

Thirty one million Americans, including twelve million children, suffered from hunger last year. Over seventeen million Americans participated in the food stamp program but four out of ten eligible did not receive benefits. Last year, 23 million Americans, including 9 million children, sought emergency food relief through America’s Second Harvest—an increase of more than 2 million and that increase took place during a time of unprecedented economic prosperity in the nation.

The average food stamp benefit is 81 cents a meal and it should be available to everyone who truly needs it. The need for action is especially urgent in this current serious downturn in the economy.

Too many individuals and families in America have trouble putting food on the table. Their plight is all too clear in the stories of real people:

A mother in Springfield, MA, asked, “Should my kids sit in the dark or should they go hungry? One of my kids has multiple handicaps, so I have to pay the utilities that heat and light. But, then we have no food.”

Karen Norman, a mother in Worcester, MA, explained, “I used to donate food to the food pantry. I always thought, ‘There’s someone out there who needs it.’ Now, I see pictures of when I had a very nice life. Now I make brunch because I don’t have enough to give my kids breakfast and lunch. When I leave the kitchen I can hear my five-year-old say to my eight-year-old, ‘How come we have breakfast and lunch?’ and my eight-year-old says, ‘We have to stretch out the food.’ Then at night she’ll cry, ‘I’m hungry! I’m hungry!’ I’m sorry, but I’m hungry.

Their plight is unacceptable, but it is all too common with the national data collected in reports by the Greater Boston Food Bank, the Food Bank of Western Massachusetts, and America’s Second Harvest.

Nationwide participation in the Food Stamp Program has declined by 34 percent since 1996 four times faster than the decline in the poverty rate. This means that over 2 million fewer people who live in poverty are obtaining food stamps today. Over a quarter of the food stamp participants between 1994 and 1998 resulted in welfare reform and its elimination of food stamp eligibility for legal immigrants which made them ineligible for food stamps and discouraged their U.S. citizen children from obtaining food stamps.

The results are predictable. The Department of Agriculture has determined that 5 million adults and 2.7 million children live in households that do not have access to food. Women and children are disproportionately hurt. Last year, over half of all food stamp participants were children. Sixty-eight percent of the children were of school age and 70 percent of adult participants were women. The most vulnerable are recent immigrants, children, and the elderly, and they are the ones who face the greatest difficulty.

The nutrition provisions in this bill are a significant step to reduce hunger in America. It restores food stamp benefits for all legal immigrant children and persons with disabilities. It is clear that the people now most in need of nutritional assistance are immigrants who entered the United States legally. For the first thirty years of the Food Stamp Program, legal immigrants were eligible for food stamps. It was unfair for Congress to exclude them in 1996 and it is time for us to close this unconscionable gap.

While hunger and malnutrition are serious problems for people of all ages, their effects are particularly damaging to children. Hungry and undernourished children are more likely to become anemic and to suffer from allergies, asthma, infections, and other health problems. They are also more likely to have behavioral problems and difficulty in learning. When children arrive at school hungry, they cannot concentrate or succeed. Our investments in education and early learning will not have the full positive impact that they should.

The nutrition title of this bill includes a number of important policy provisions, including changes in the Food Stamp Program to improve access and simplify administration. These reforms are vital to ensure that low income families receive the nutrition assistance they need. Excessive requirements for reporting income, counting assets, calculating expenses for deductions, and determining on-going eligibility can be an overwhelming burden for families who lack transportation or child care, or who have rigid family work schedules. These requirements often make it difficult or impossible for low income families to participate. Given current economic conditions, an effective and efficient Food Stamp Program is now more important than ever.

The bill also provides states more options for helping families make the transition from welfare to work. Current food stamp law allows a 3-month state option for a transitional food stamp benefit. This bill raises this state’s six-month Medicaid transitional benefit for food stamps. It simplifies state record keeping, increases state flexibility, and helps welfare families make the transition to work.

The bill ends the child penalty under current food stamp law. Just as the marriage penalty in our tax code unfairly penalizes some couples, the existing food stamp law unfairly limits nutritional assistance for many families.

To address this problem by indexing the food stamp standard deduction to family size, so that every family in deep poverty will receive the maximum current food stamp benefit, regardless of family size.

The bill helps single parents struggling to make ends meet. It ensures that the food stamp law treats child support payments like income, by disregarding 20 percent of these payments from family income. This measure is consistent with last year’s overwhelming approval of a plan by the House of Representatives to encourage states to see that child support actually benefits the children in low-income families.

In addition, this bill improves access to school meal information, helping to see that families know the help available. Less than one-third of the people who seek emergency hunger relief are currently receiving food stamps.
even though three-fourths are eligible for the relief. This bill will help rural families apply for food stamps online or by telephone. It eliminates the need to travel to food stamp offices. In addition, the bill also supports stronger public-private partnerships to distribute information about nutrition assistance programs.

Finally, the bill increases federal support for emergency food programs, which have had sharp increases in requests for help in the past year. Many food banks find themselves unable to meet the heavy new demands. America’s Second Harvest reports that 23.3 million people—equal to the combined population of the 10 largest U.S. cities—received emergency hunger relief last year—two million more than in 1997. One-in-five local charitable agencies were already facing problems that threatened their ability to serve hungry people in their communities—before the current economic crisis.

For all of these reasons, it is critical that we maintain the $6.2 billion funding level for the nutrition title of this bill. This amount is urgently needed and it must be part of the final bill. The policy changes that will be accomplished will make an enormous difference in the lives of many families. Fewer children will go to bed hungry and arrive at school hungry and unfed.

The current downturn in the economy means that even more families, including farm families, are facing the impossible choice between feeding their children and paying the rent, a choice no person should have to make. We have the resources to make the modest investment that is necessary. Once again, I commend Senator Harkin and Senator Lugar for their skillful work and I urge my colleagues to support the needed funding levels for nutrition.

CAMPAIGN FINANCE REFORM

Mr. TORRICELLI. Mr. President, it would appear that after more than a decade of discussions about campaign finance reform, the House of Representatives and the Senate may be nearer an accord on a historic change of how Federal elections are conducted in the United States. It is none too soon. Confidence in our political process has been undermined, the integrity of the Congress itself has been questioned and the system is badly in need of repair.

We are very indebted to a number of people in this institution and different institutions around the country, but in a strange irony, at a stroke before midnight, one of the elements that has been driving reform is undermining a critical component of the change.

Much of what America knows about the way the system has come through the media. Across the Congress today, the Broadcasters Association, led by scores of lobbyists representing millions of dollars of donations of the very type and scale that we seek to control, is undermining the bill.

Campaign finance reform, as passed by this Senate and the legislation pending in the House, includes a critical component for controlling and reducing the cost of television advertising.

The amendment, widely accepted in both Houses of Congress, is based on the proposition that controlling the amount of money raised must be met by an ability to control the amount of money spent on campaign fundraising without helping with the cost of campaigns will simply result in a diminished national political debate. Candidates will raise less money, and if the cost of advertising remains as high, we will lose the competitive debate, the exchange of ideas so vital to our democracy.

As any candidate for Federal office in the United States is painfully aware, the cost of campaigns is the cost of television advertising. Eighty-five percent of the cost of a Senate campaign goes to the television networks.

Under the amendment as passed by this institution, the networks would be required to sell time at the lowest unit rate available; that is, whatever rate they have set for their customers and sold at their lowest cost they must make available to a candidate for Federal office.

This provision was in previous Federal law since 1971, but in 1990 an FCC audit found that 80 percent of the stations had failed to give the lowest rate available. During the 2000 elections, a typical candidate had 65 percent of their advertising sold at that lowest rate.

With my amendment now placed in the McCain-Feingold bill, passed by this Senate by a 69-to-31 vote on a bipartisan basis, that provision is now strengthened. It becomes mandatory, and it has the best chance of controlling these costs.

The chart on my left shows the scale of the problem: The percentage of ads actually sold at the lowest unit rate in the fall of 2000. Congress believed it made this a requirement before, but it was not enforced in the majority of cases.

Let’s look at a few examples: Minneapolis, WCCO, 95 percent of the ads sold were not at the lowest rate; Detroit, WXYZ, 89 percent were not sold at the lowest rate. In my own market in northern New Jersey, WNBC New York, 78 percent were not sold at the lowest rate.

In the year 2000, the buying of these television ads cost candidates $1 billion. This chart indicates as well the deluge of these ads, the amount of them now being placed on television.

Very simply, if we cannot hold in the McCain-Feingold bill and the Shaheen-Meehan bill in the House this element of controlling cost, this vital promise that is campaign finance reform will be broken. It must be raising and it must be spending, and I ask the television networks to forget the excess profits on the Federal airwaves, licensed by the Federal Government for the public good. Be part of reform. Don’t undermine the reform. Let’s change the system now for everybody’s benefit.

Mr. President, I yield the floor.

HAPPY BIRTHDAY, SENATOR HERB KOHL

Mr. BYRD. Mr. President, I rise today to offer a tribute on the occasion of the birthday of one of our colleagues in the Senate, that of Senator Herb Kohl, Senior Senator from the State of Wisconsin. I have known Senator Kohl, for many years, since he first came to the Senate in 1989, and over that period of time, my respect and admiration for Senator Kohl has grown as I have watched him learn the role of a legislator and master the methods and the means of becoming a fine United States Senator.

Senator Kohl is hard-working, tenacious, and will fight to the end for the interests of this institution and those of his state. A few years ago when the Senate was debating legislation regarding the dairy industry, I remarked that Senator Kohl was the Stonewall Jackson of Wisconsin, standing firm for the interests of the dairy farmers in his state. When it comes to fighting for his state, or other issues of importance to him, such as measures to help and protect our nation’s children, there is no one to outshine him in dedication for the values he holds dear. That is one of the distinguishing characteristics of a good Senator.

But Herb Kohl is more than just a fine United States Senator, he is a good and decent man. His hallmark is honesty, modesty, a man of few words, but words of great meaning and words that deserve being heard. He is consistently kind to the people who work around him, especially his staff, who will follow him faithful through thick and thin. His word is his bond, and to this Senator, there is no greater tribute than recognition of that fact.

Senator Kohl represents what is best about Senator, and about Americans generally. He is a son of a family whose parents came to this country during the last century without an ability to speak the English language. From those humble beginnings, they and their son and other family members built a successful grocery business in Milwaukee, Wisconsin, that became successful and grew to have national recognition. If you drive around
the Washington, D.C. metropolitan area, you will notice Kohl stores, and they are evidence of the contribution Senator Kohl and his family have made to the commercial strength of this country.

The first of success that Senator Kohl has known have been the result of constant effort, a solid education in the Wisconsin public schools, and an understanding that hard work, honesty, intellectual clarity, and dedication to strong values are the key components to a successful career, whether in the business world or public service.

So, I want to honor Senator Kohl on this special day and pay him the recognition that he is due for all his work on behalf of the people of Wisconsin and all who serve here in the United States Senate.

TRIBUTE TO DR. DAVID SATCHEr

Mr. REID. Mr. President, I rise today to pay tribute to a public servant who will soon complete his tenure as the 16th Surgeon General of the United States. Dr. David Satcher has served this Nation with distinction and performed the duties of the position of Surgeon General in an exemplary manner.

Dr. Satcher was born in Anniston, AL on March 2, 1941. He and his wife Nola have raised four children. Dr. Satcher graduated from Morehouse College in Atlanta in 1963 and received his M.D. and Ph.D. from Case Western Reserve University in 1970. He has completed numerous fellowships and holds many honorary degrees and distinguished honors. He has taught students, chaired Departments, and served as President of the Meharry Medical College in Nashville, Tennessee. As a public servant, he served as the Director for the Centers for Disease Control and Prevention and Administrator of the Agency for Toxic Substances and Disease Registry before assuming his current position as Surgeon General. During the period February 1998 through January 2001, Dr. Satcher simultaneously served as Assistant Secretary for Health and Surgeon General of the United States.

Dr. Satcher is a learned, well-educated man of great accomplishment. Yet, in spite of his many degrees and awards, he set a simple goal of wanting to be a Surgeon General remembered for listening to the American people. He not only listened to those whose voices could be heard, but extended his reach to those who for far too long have suffered silently, those in our nation suffering with mental illness.

I first became acquainted with Dr. Satcher during his confirmation. I remember asking him to consider addressing the issue of suicide and its impact on the Nation. I was concerned about what role as a nation could do in an effort to prevent the nearly 30,000 people who commit suicide each year in this country.

Dr. Satcher convened a meeting, and I was concerned about what we as a nation could do in response. Dr. Satcher and I shared our perspective which needed to be heard.

He called upon the non-profit community, experts in research, clinical practitioners, and just as importantly, listened to the American people. In my judgment, he not only listened, but he listened to the American people. In my judgment, he not only listened, but he acted as well.

Dr. Satcher demonstrated time and time again his ability to engage the public and the private sectors to come together as we examined health problems facing our nation and sought solutions on how to address them. In the suicide prevention effort, Congress called for the development of a national strategy to guide our national response. Dr. Satcher embraced this challenge, provided the necessary leadership and vision to bring it about, and recognized from the outset that government alone could not provide the complete solution that they, and the American people, would need to singularly define the solution. He called upon the non-profit community, experts in research, clinical practitioners, and just as importantly, listened to the American people. In my judgment, he not only listened, but he acted as well.

In closing, I wish to thank Dr. Satcher for his courageous work and dedicated public service. I am particularly grateful for his efforts in raising awareness and educating Americans about mental illness and suicide in America. We are a better nation as a result of his service as Surgeon General. He will be remembered by this Senator as the Surgeon General who listened to the American people. In my judgment, he not only listened, but he acted as well.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator Kennedy in March of last year. The Local Law Enforcement Act of 2001 modernized our categories of current hate crimes legislation removing a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred April 6, 1997 in Tyler, TX. Two men attacked another man who was the wrong color to be gay. The attackers, Billy Glenn Adams, 30, and James Dean Dickerson, 33, were charged with aggravated assault in connection with the incident.

I believe that government’s first duty is to defend its citizens. I perceive a slippage in the American people’s perception of the country’s commitment to supporting gay rights. The attacks, the assailants, the jury’s acquittal, the slippage in the American people’s perception of the country’s commitment to supporting gay rights.

Hate crimes legislation I introduced with Senator Kennedy in March of last year. The Local Law Enforcement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

BLACK HISTORY MONTH

Mrs. CARNAHAN. Mr. President, every February our nation pauses to recognize the tremendous contributions of African-Americans to the history of our nation. In 1926, Dr. Carter G. Woodson established Negro History Week because he saw that most of the contributions African-Americans had made to American culture and industry were being ignored by historians.

We have come a long way since 1926. More and more of our history books acknowledge the contributions of African-Americans. Our schools have made it part of their curriculum. Libraries and museums create exhibits. Televison executives highlight the contributions of African-American actors and screenwriters and our celebration of Black history has been expanded to an entire month. But we still have a long way to go.

We need Black History Month because people may not be aware of African-Americans who have added to the richness and greatness of our country. It is appropriate that as we stand in our nation’s Capitol, which was built by the back-breaking labor of free and slave African-Americans, we talk about the contributions African-Americans
Tribute to the New England Patriots—NFL Champions

Mr. Smith of New Hampshire. Mr. President, I rise today to pay tribute to the Robert Kraft Family, Coach Bill Belichick and the New England Patriots team on their achievement as victors of Super Bowl XXXVI.

The people of New Hampshire and the entire New England region are proud of the exemplary accomplishments of the Patriots organization. The talented players and coaches of the team have demonstrated that hard work, perseverance and unity are the foundation of success.

I commend the New England Patriots for the benchmark that they have created for all Americans who seek to achieve the highest of standards in their lives. Each player on the team cast aside ego and self promotion for the good of the team realizing the best talents individually transformed into a power house of skill and sense of purpose.

I applaud the contributions of the New England Patriots organization including the team owners, the Robert Kraft Family who have steadfastly stood by the Patriots since the origination of the franchise in 1962. I congratulate Robert Kraft and his family for this tremendous achievement and wish them well as the franchise grows and flourishes.

On behalf of the citizens of New Hampshire, I want to sincerely thank the players and coaches of the New England Patriots for providing sports fans with some of the best football competition seen in the United States in years. We will not easily forget the excitement of the talented skill and ability of kicker Adam Vinatieri during game winning field goals at the Oakland Raiders snow bowl game one of the most exciting of his career. The thrill of his dramatic kick more recently as the clock ticked down to 7 seconds at Super Bowl XXXVI.

I commend the efforts of the mastermind of the operation, Coach Bill Belichick and the National Football League Championship team for their efforts, accomplishments and contributions to the New England region. We are all very proud of you and thank you for being the best of the best in a very competitive and talented industry. It is truly an honor and a privilege to represent you in the United States Senate.

More Evidence That Background Checks Work

Mr. Levin. Mr. President, in 1994, the Congress passed the Brady Law, which requires Federal Firearm Licensees to perform criminal background checks on gun buyers. However, a loophole in this law allows unlicensed private gun sellers to sell firearms without conducting a background check.

In April of last year, Senator Reed introduced the Gun Show Background Check Act which would close this loophole in the law. The Reed bill, which is supported by the International Association of Chiefs of Police, extends the Brady Bill background check requirement to all sellers of firearms at gun shows. I cosponsored that bill because I believe it is critical for all we can do to prevent guns from getting into the hands of criminals and terrorists. A recent report from Americans for Gun Safety demonstrates how successful the Brady law has been in this regard already. It is important to extend its provisions to firearms sales at gun shows.

According to Bureau of Justice Statistics numbers cited in the AGS report, in 2000 alone, Brady bill background checks blocked more than 153,000 felons and other illegal firearms purchasers from buying a gun. In addition, these checks were typically conducted without placing unreasonable burdens on gun buyers. According to the study, 72 percent of background checks were completed within minutes and 95 percent were completed within two hours. The study provides yet further evidence in support of common sense legislation to close the gun show loophole.

Extending Unemployment Benefits to Workers

Mr. Kohl. Mr. President, in past recessions Congress has been quick to extend benefits for the unemployed. Every recession over the past thirty years resulted in a extension of unemployment benefits. Helping unemployed workers has never been a partisan issue, both Democrats and Republicans have worked to help unemployed workers in times of economic difficulty. During the recession of the early 1990’s we extended a total of 33 weeks of additional benefits. Current data shows this recession started last March, and we are only now taking steps to finally extend unemployment benefits. We have waited too long, but I am glad the day for action has come at last. I hope the other body will be able to quickly pass this legislation so that this delayed assistance will not be delayed any longer.

While I am relieved the Senate has acted, I was disappointed we were not able to do more for workers. Helping people maintain health coverage while out of work would have gone a long way to making working families feel more secure. Covering part-time workers and the newly hired, and providing the States with the necessary funds to make those reforms, also would have helped this country on the road to economic recovery.

While some of my colleagues believe that what we have done today will have little or no positive impact on the economy, I disagree. Extending benefits puts money into the hands of people who really need it, and people who will be forced to spend it. The money we send out will be spent on groceries,
Mr. BAUCUS. Mr. President, for the past 6 months Congress has been discussing the best ways to stimulate the economy. Even though we are no longer working on an economic stimulus bill, we face a real crisis that will negatively affect our economy. We face unemployment and people through difficult times. It is an insurance plan that workers and employers contribute to for emergencies just like today. American workers have paid for these benefits, they have earned them, and they deserve this extension.

RESTORING TEA 21 FUNDING LEVELS

Mr. BAUCUS. Mr. President, for the past 6 months Congress has been discussing the best ways to stimulate the economy. Even though we are no longer working on an economic stimulus bill, we face a real crisis that will negatively affect our economy. We face unemployment and people through difficult times. It is an insurance plan that workers and employers contribute to for emergencies just like today. American workers have paid for these benefits, they have earned them, and they deserve this extension.

THE FEDERAL REFORMULATED FUELS ACT

Mr. JEFFORDS. Mr. President, I ask unanimous consent that documentation important for the legislative history of S. 950, the Federal Reformulated Fuels Act, be printed in the RECORD.

The first is a supply impact analysis of that legislation. The analysis concludes there is a significant probability that total gasoline production capacity would increase under the provisions of S. 950. The second is an estimate by the Congressional Budget Office of the effects of any private-sector mandates included within that bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Hon. Jim Jeffords, Chairman, Committee on Environment and Public Works, U.S. Senate, Washington, DC

DEAR MR. CHAIRMAN: This is in response to your letter of December 20, 2001, co-signed with Senator Bob Smith, requesting technical and economic analyses regarding the elimination of MTBE as a gasoline additive. We are enclosing two documents that are responsive to your request. The first is a draft report prepared by PACES Consultants, under contract with the Environmental Protection Agency, entitled, Economic Analysis of U.S. MTBE Production Under the MTBE Ban.

The second document is a draft EPA staff analysis of the economic analysis of S. 950—The Federal Reformulated Fuels Act of 2001. This analysis, which was prepared in October 2001 by EPA staff who have technical expertise in matters relating to motor vehicle fuels, has never been released and should not be construed to be administrative policy. The analysis draws extensively from the findings of the above-mentioned PACE report.

As you know, the issue of MTBE is related to a current Clean Air Act provision that requires the production of reformulated gasoline. It is my understanding that Congress designed this provision to promote the use of renewable fuels, enhance energy security, support the agricultural economy, and improve the environment. EPA welcomes the opportunity to work with the Congress to foster these important goals.

Again, thank you for your writing. If you have questions about these documents, please feel free to contact me or your staff may contact Don Mineta in the Office of Intergovernmental and Congressional Relations at (202) 564-3668.

Sincerely yours,

CHRISTINE TODD WHITMAN.

Enclosures.

SUPPLY IMPACT ANALYSIS OF S. 950—THE FEDERAL REFORMULATED FUELS ACT OF 2001

There are four primary provisions in S. 950 that could have an impact on gasoline supply in the U.S. These include the nationwide ban on MTBE, rescinding the 1 psi RVP waiver for ethanol blended into conventional gasoline, the additional air toxics requirements, and the provision of grant money to support the conversion of merchant MTBE plants to the production of other gasoline blendstocks. Implementation of each of these provisions is discussed below. The evaluation of the financial support for the conversion of merchant MTBE plants to the production of other gasoline blendstocks is combined with that of the ban on MTBE use.

A. NATIONWIDE MTBE BAN

Due to the attention that has been placed on the MTBE issue over the last several years, there have likely been different MTBE ban scenarios that have been put forward and a considerable amount of analysis already performed for at least some scenarios. Differences in how bans would be implemented, however, can cause significant differences in the impact of what they will have on the gasoline supply. What follows is a summary of a recent analysis conducted for a nationwide ban on MTBE use which mirrors relatively closely the MTBE ban provisions in S. 950.

Table A-1 shows the sources of the MTBE used in U.S. gasoline and estimated 2000 production volumes (from Pace Consultants).

The total MTBE volume of 263,000 bbl/day represents approximately 1.5% of the U.S. gasoline consumption. However, MTBE contains only about 80% of the energy density of gasoline. Consequently, on a energy equivalent basis this MTBE volume represents approximately 2.5% of total U.S. gasoline consumption.

TABLE A-1—YEAR 2000 PRODUCTION VOLUME OF MTBE (BARRELS/DAY) IN THE U.S.

In support of EPA’s analysis of restrictions on the use of MTBE, we hired Pace Consultants, a knowledgeable and reputable firm, to conduct an analysis of the economics of converting the different types of MTBE plants currently in operation or under construction to produce in MTBE, versus the plant completely shutting down.

MTBE plants react isobutylene with methanol to make MTBE. MTBE plants fall into two broad categories: those which use isobutylene which already exists or which can be produced at very low cost from existing, coal-based, and petrochemical processes to produce isobutylene at significant cost from other chemicals. Captive or refinery based
MTBE plants and ethylene based MTBE plants fall into the first category, as their isobutylene is being produced in the process of making gasoline in the refinery or butadiene in the chemical plant. Propylene oxide based MTBE plants produce isobutylene from tertiary butyl alcohol, but do so using an expensive chemical process. Thus, they are produced in this case only as a by-product, as they are plant.

Domestic and overseas natural gas liquids (NGL) based MTBE plants fall into the latter category. They produce isobutylene via three processes from a mixture of normal butane and isobutane obtained from natural gas processing.

If an MTBE plant converts to alkylate production, it produces 80% more gasoline in terms of energy content than it did when producing MTBE. Again, this assumes that the conversion would produce the same amount of isobutylene as before. The loss in energy comes from the fact that isobutylene is combined with this isobutylene in the production of alkylate, versus the addition of methanol in the production of MTBE. Isobutene contains more energy than methanol, so the product does as well.

If an MTBE plant converts to iso-octane production, it produces 15% less gasoline equivalent volume than it did when producing MTBE. Again, this assumes that the conversion would produce the same amount of isobutylene as before. The loss in energy comes from the fact that isobutylene is reacted with itself to form iso-octane (feedstock is essentially lost with the isobutylene in the reaction). Thus, the energy content of methanol is lost relative to MTBE production.

Although alkylate and iso-octane both contain no aromatics and have relatively high octane (90-100) and low RVP, making them attractive fuel blending components. The Pace study suggests that it would be economic for the vast majority of MTBE production plants to be converted to either iso-octane or alkylate production if MTBE were banned. Below we discuss the likely fate of each type of MTBE plant, plus imports.

Pace projected that captive, refinery based MTBE plants will likely convert to either iso-octane or the isobutylene will be used to produce alkylate in a refinery’s existing alkylate plant. Isobutylene has been converted to alkylate at refineries prior to a refinery’s decision to produce MTBE and this would be the preferred route if MTBE were banned, due to the higher volume of iso-octane produced per MTBE plant. Pace concluded that the MTBE unit would likely be converted to produce iso-octane. Thus, as a lower limit for our analysis we have presumed that all these MTBE units converted MTBE plant would process the same amount of isobutylene as before. The conversion of MTBE to iso-octane production, given their low feedstock costs. This was observed already with an MTBE plant in Alberta, Canada, that recently converted to producing iso-octane.

Pace projected that merchant, NGL based MTBE plants would face the greatest challenge to stay in business. If they were to stay in business, Pace projected that they would convert MTBE units to alkylate production. Historical alkylate price premiums over premium gasoline would not support conversion to alkylate production. In recent months, alkylate and propylene/ethylene production, which have been consistently higher. Furthermore, under a complete MTBE ban, demand for clear, high-octane blending components will increase, and MTBE units should increase accordingly. This was in fact the case in all refining studies of California under their MTBE ban. Pace observed significant flows of alkylate from the Gulf Coast to California. Consequently, for this analysis of a nationwide MTBE ban, due to the uncertainty, has projected the case that all of these plants would shut down or in the best case that all would convert to alkylate production. Under the actual provisions in S. 950, the best case is more likely to occur. This is due to the $750 million it would provide to help convert merchant MTBE plants. This subsidy should be sufficient to ensure production capacity of these plants remains available.

Finally, Pace projects that most foreign natural gas based MTBE plants are likely to convert to iso-octane production, given their low feedstock costs. This was observed already with an MTBE plant in Alberta, Canada, that recently converted to producing iso-octane.

Table A-2 summarizes the results of this analysis. As can be seen, we project that the impact on supply from a nationwide MTBE ban ranges from a loss of approximately 84,000 bbl/day to gain of approximately 91,000 bbl/day, or roughly a gain or loss of approximately 15% of the gasoline volume on an energy equivalent basis. Given the $750 million in grants made available to help convert merchant MTBE plants, we believe that the supply impact is more likely to fall towards the upper end of this range than the low end. The grants should be sufficient to ensure that the production capacity of the NGL-based MTBE plants remains in the gasoline supply.

This analysis reflects only the changes in MTBE and gasoline hydrocarbon volume. The changes in ethanol volume that go along with this were not quantified in the Pace analysis. The RVP of gasoline, which is under the oxygenate mandate, which S. 950 allows states to opt out of, is likely that a significant amount of ethanol used would be utilized to fulfill the RVP performance requirements. For example, Mathpro, in refinery modeling performed for EPA, projected that 50-65% of California gasoline would be shipped. Thus, the RVP replacement mandate for MTBE were banned and the RFG oxygenate mandate were waived.

Finally, Pace concluded that most foreign natural gas based MTBE plants are likely to convert to iso-octane production, given their low feedstock costs. This was observed already with an MTBE plant in Alberta, Canada, that recently converted to producing iso-octane.

EPA, projected that 50-65% of California gasoline was shipped. Thus, the RVP grade of gasoline for blending with ethanol to meet the RVP requirements, which S. 950 allows states to opt out of, it is likely that a significant amount of ethanol used would be utilized to fulfill the RVP mandate for MTBE were banned and the RFG oxygenate mandate were waived.

The 1.0 psi RVP waiver for ethanol blending in California was also under consideration. Due to its hygroscopic nature it is not possible to ship ethanol blends through the common carrier fuel distribution system, thus, ethanol blending in California would not support conversion to alkylate production. In recent months, alkylate and propylene/ethylene production, which have been consistently higher. Furthermore, under a complete MTBE ban, demand for clear, high-octane blending components will increase, and MTBE units should increase accordingly. This was in fact the case in all refining studies of California under their MTBE ban. Pace observed significant flows of alkylate from the Gulf Coast to California. Consequently, for this analysis of a nationwide MTBE ban, due to the uncertainty, has projected the case that all of these plants would shut down or in the best case that all would convert to alkylate production. Under the actual provisions in S. 950, the best case is more likely to occur. This is due to the $750 million it would provide to help convert merchant MTBE plants. This subsidy should be sufficient to ensure production capacity of these plants remains available.

Finally, Pace projects that most foreign natural gas based MTBE plants are likely to convert to iso-octane production, given their low feedstock costs. This was observed already with an MTBE plant in Alberta, Canada, that recently converted to producing iso-octane.

Thus, the RVP grade of gasoline for blending with ethanol to meet the RVP requirements, which S. 950 allows states to opt out of, it is likely that a significant amount of ethanol used would be utilized to fulfill the RVP mandate for MTBE were banned and the RFG oxygenate mandate were waived.

This analysis reflects only the changes in MTBE and gasoline hydrocarbon volume. The changes in ethanol volume that go along with this were not quantified in the Pace analysis. The RVP of gasoline, which is under the oxygenate mandate, which S. 950 allows states to opt out of, it is likely that a significant amount of ethanol used would be utilized to fulfill the RVP performance requirements. For example, Mathpro, in refinery modeling performed for EPA, projected that 50-65% of California gasoline was shipped. Thus, the RVP grade of gasoline for blending with ethanol to meet the RVP requirements, which S. 950 allows states to opt out of, it is likely that a significant amount of ethanol used would be utilized to fulfill the RVP mandate for MTBE were banned and the RFG oxygenate mandate were waived.
C. EXISTING AND ADDITIONAL AIR TOXICS

CONTROL

It is difficult to quantify the impact on gasoline supply of the existing MSAT standards plus the new air toxics standards which are in effect. The current MSAT standards require refiners to maintain the toxics emission performance of their 1998-2000 RFG and conventional gasoline into the future. The current Tier 2 standards require refiners to maintain the toxics emission performance of their 1997-2000 RFG and conventional gasoline into the future. In the context of S.950, this means that if MTBE is removed from primarily RFG, refiners producing RFG must maintain their toxics emission performance.

In general, this historical performance has been well beyond what is required by the RFG regulations. Removing MTBE increases toxics emissions. Motor vehicle fuel, even meeting the lower sulfur levels which will be required in the future and lower olefin levels which should accompany the sulfur reductions. Substituting alkylate and iso-octane for MTBE helps, but may not be sufficient to maintain toxics performance. Adding ethanol along with alkylate and iso-octane should be sufficient for most refiners to compensate for MTBE removal, once the Tier 2 sulfur standards take effect.

Another possibility is that most refiners should be able to meet some of their aromatics (the gasoline blendstock highest in aromatics and benzene) from RFG to conventional gasoline. This would ease compliance with the lower sulfur standards for their RFG. However, some refiners may still have to reduce benzene or aromatic levels below current levels. Some refiners are also more dependent on MTBE use than others.

Despite this uncertainty, any impact of the MSAT standards are likely to affect RFG supply more than total gasoline supply. Much of the MTBE used in conventional gasoline today compared to RFG. The levels of sulfur and olefins in conventional gasoline will also be dropping in the near future. Thus, it is very difficult to find it very easy to comply with the MSAT standards for their conventional gasoline even with an MTBE ban. Refiners facing difficult meeting their MSAT standards for RFG would not decrease total gasoline production, but could shift some of their RFG production to conventional gasoline. Thus, the relevant issue with the Tier 2 standards is the impact on RFG supply, not total gasoline supply.

The new toxics performance standards in S. 950, as they appear to be written, would be imposed in addition to the current MSAT standards. As a result, refiners with cleaner than average RFG would not have to increase production to meet the Tier 2 standards.

We have not analyzed the impact of a regional toxics standard of this type, particularly in conjunction with the MSAT standards. However, as was the case with the MSAT standards, the impact of the regional toxics standards would be to make it relatively more difficult to produce RFG than conventional gasoline. Total gasoline supply would probably be little affected, but RFG supply could be affected. More analysis is needed before any quantitative estimates could be made.

D. OVERALL IMPACT

Due to the lack of available analysis to quantify the impact on the new toxics emission requirements on gasoline supply, we cannot provide a quantitative overall estimate of the impact of the S. 950 on gasoline supply. However, the combination of alkylate and iso-octane production from current MTBE production is likely to be in excess of the alkylate and iso-octane use, should more than compensate for the loss of MTBE volume. Thus, based on this first order analysis, total gasoline production capacity could actually increase. The toxics standards primarily affect RFG production relative to conventional gasoline production. Thus, whether production increases must await further analysis. However, there appears to be a significant probability that total gasoline production capacity would increase under the provisions of S. 950.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,

HON. JAMES JEFFORDS,
Chairman, Committee on Environment and Public Works, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the enclosed cost estimate for S. 950, the Federal Reformulated Fuels Acts of 2001. CBO completed a federal cost estimate and an assessment of the bill’s effects on state, local, and tribal governments on November 9, 2001.

If you wish further details on this statement, we will be pleased to provide them. The CBO staff contacts are Lauren Marks and Richard Farmer, who can be reached at 202-512-8576.

Sincerely,
BARRY B. ANDERSON
(FOR Dan L. Crippen, Director).

Enclosure.

CONGRESSIONAL BUDGET OFFICE PRIVATE-SECTOR MANDATES STATEMENT

S. 950—Federal Reformulated Fuels Act of 2001

Summary: S. 950 contains several private-sector mandates to be unfunded under the Mandates Reform Act (UMRA). The bill would impose mandates on domestic refiners and importers of certain motor fuels, and on manufacturers of methyl tertiary butyl ether (MTBE). The most costly mandate would ban the use of MTBE in motor vehicle fuel by the year 2006. CBO estimates that the direct costs of such a ban would amount to about $950 million a year starting in fiscal year 2006, declining to about $600 million a year by 2008. Consequently, the aggregate direct costs of all the mandates in the bill would be well in excess of the annual threshold established by UMRA ($113 million in 2001, adjusted annually for inflation).

S. 950 also would authorize an annual appropriation of $250 million to the Environmenal Protection Agency (EPA) to invest in the health effects of ozone and air toxics. CBO estimates that the total cost of the MTBE ban would amount to about $950 million annually starting in 2006 and decline after a few years to about $600 million annually.

At this time, ten states, including California and New York, have acted to completely phase-out the use of MTBE in gasoline. CBO’s estimate of the cost to refiners and importers has been adjusted for the fact that those states, which account for more than 40 percent of the U.S. total annual gasoline sales, will already be in compliance with the ban by the time the bill’s provisions would go into effect.

Eliminate the Ethanol Waiver

Under the RFG program gasoline sold in the summer months must meet a Reid vapor pressure (RVP) standard that is stricter than that for other gasoline. RVP, measured in pounds per square inch (psi), indicates how quickly a substance evaporates. Gasoline with a high RVP evaporates more readily at a higher temperature, allowing components of gasoline, thereby, to react with formation to escape into the atmosphere.

S. 950 would eliminate the statutory waiver that allows conventional gasoline blended with up to 10 percent ethanol to have a vapor pressure that is lower than gasoline without ethanol. Consequently, currently, conventional gasoline blended with ethanol is...
allowed to have an RVP of 10 psi, making it more evaporative than other fuels. Under the bill, ethanol-blended fuels would have to achieve an RVP of 9 psi. To accommodate the changes, refiners who blend ethanol would reduce their use of other highly evaporative components in gasoline, such as butane. It is likely that these refiners (located mainly in the Midwest) would continue their use of ethanol, since that additive receives federal and state subsidies. According to the Energy Information Administration, it would cost about 0.4 cents per gallon of gasoline to eliminate enough butane to lower the RVP of ethanol-blended gasoline to 9 pounds per square inch. CBO therefore expects that the cost to refiners each year from every five years, which is the period of time over which the EPA expects the testing to take place.

Appropriation or other Federal financial assistance provided in the bill related to private-sector mandates: S. 950 would authorize the appropriation of $750 million to the Environmental Protection Agency over the 2002-2007 time period to assist refiners and manufacturers of MTBE to convert facilities to produce substitute fuel additives instead of MTBE.

Estimate prepared by: Lauren Marks and Richard Farmer.

Estimate approved by: David Moore, Deputy Assistant Director for Microeconomics and Financial Studies Division.

ADDITIONAL STATEMENTS

HONORING ALLISON CHURCH OF CORBIN, KENTUCKY

Mr. BUNNING. Mr. President, today I ask my colleagues to join me in honoring the most recent accomplishment of Allison Church of Corbin, KY.

Allison, a junior at Corbin Independent High School, has been chosen as one of only 350 students nationwide to be a participant in this year’s National Youth Leadership Forum on Defense, and Diplomacy, which will take place later in February right here in our Nation’s capital. Allison earned this distinction based upon her excellent academic record, extensive involvement in extracurricular activities, and expressed interest in a career related to national security. I commend Allison for her strong commitment to her studies, school, and country’s protection.

After the horrific attacks perpetrated on September 11, 2001, I can see no better time than the present for our nation’s youth and future leaders to be learning about the importance of such topics as international diplomacy, defense, and intelligence. I believe Allison will learn valuable political and social tools which she will carry with her for the rest of her life. I thank Allison for proudly representing Corbin Independent High School and the entire Commonwealth of Kentucky.

10TH ANNIVERSARY OF THE VERMONT SMALL BUSINESS DEVELOPMENT CENTER

Mr. LEAHY. Mr. President, I rise today to commend the Vermont Small Business Development Center, commonly known as the Vermont SBDC, for its impressive first ten years of operation.

In 1992, this new partnership of government, education, and business was established in Vermont to help spur the state’s economy. The parties involved were the U.S. Small Business Administration, the Vermont Agency for Community Development, the Vermont State Colleges, and Vermont’s twelve Regional Development Corporations.

With a staff of five and a lean budget, the SBDC set out to accomplish its statewide mission: to help Vermont small businesses and entrepreneurs. In its first year of operation, nearly 3,000 hours of free business counseling were provided to 736 clients. The positive impact of SBDC activities in just its first three years of existence is attested to by the economic impact assessment revealed by SBDC at the time.

Over the past 10 years, the SBDC has provided more than 44,000 hours of counseling to 11,000 clients. Over half were women, and half were new business startups. In addition, over 15,000 Vermonters have attended SBDC business seminars.

Evaluation is a critical component to the SBDC. The annual impact assessment implemented in 1996 measured the economic impact that SBDC clients were having in Vermont. It found that SBDC clients created jobs at twice the rate of other Vermont businesses. It is not surprising that client satisfaction was rated at 97 percent.

In 1998, the SBDC was recognized by the U.S. Small Business Administration, SBA, as the Outstanding National SBDC; a wonderful feat for an organization that accomplishes so much for so little. In fact, last year’s economic impact assessment revealed that SBDC clients have led to the addition of over $3.2 million in incremental tax revenues to the Vermont treasury. Considering the current state match contribution of about $300,000, that equates to more than 1 returns on the state’s investment.

The impressive achievements of SBDC must be viewed in light of the active role of the various partners that support it. Since its inception, SBDC has been housed at Vermont Technical College, which also provides facilities for workshops and seminars. The SBA provided the initial seed funding and by validating SBDC’s effectiveness continues to provide federal funding. The Vermont Agency for Commerce and Community Development provides matching state funds and is an integral partner in the SBDC network. The Agency considers SBDC a primary component of their economic development strategy. The Vermont Regional Development Corporations (RDC) are the local partners which ensure that services are provided uniformly throughout the state. SBDC counselors are housed at the twelve RDC centers around the state.

Leveraging resources and working with other organizations has been the hallmark of the SBDC over the years. Private sector and other external network partners have been absolutely essential for service delivery. The SBDC works with countless external organizations on a daily basis to form a broad delivery and support network. For example, approximately 60 percent of referrals for SBDC counseling and business planning assistance come from the banking community and other lenders.

In the face of potential reduction of funding, clients and friends of the SBDC are coming together to emphasize the benefit and contributions of the SBDC. Together, they are sending the message that now is not the time to cut SBDC resources. Rather, a challenging economy is the time to invest in partnerships like the SBDC. At return rates of 9 to 1 it is difficult to justify not providing the funding necessary to maintain the resources needed to meet market need.

Once again, I am proud of the initiative and hard work SBDC has contributed to making our state a national leader among small business development organizations. Small business is truly the backbone of Vermont’s business community. And Vermont is an example of how small states can leverage their limited resources for the maximum benefit of their citizens. Over the years, SBDC has found ways to partner with the federal government, the private sector, and higher education to double its available funding, provide free quality services to businesses, help develop businesses and economic independence, and at the same time provide a return on investment that more than pays for the program. I congratulate them on their tenth anniversary.

TRIBUTE TO PETER HAMBLETT

Mr. SMITH of New Hampshire, Mr. President, I rise today to pay tribute to Peter Hamblett of Dover, NH, on being named as the 2002 Volunteer of the Year by the Greater Dover Chamber of Commerce.

Peter was the recipient of the Volunteer of the Year award in 2001 and is an exemplary member of the community in Hillsborough County. His volunteerism includes: member, Dover Rotary Club, activist in Main Street program in Dover, member, Board of Directors for
S486

CONGRESSIONAL RECORD — SENATE

February 7, 2002

the United Way of the Greater Seacoast, member of the New Hampshire Bankers Association and member of South Church in Portsmouth. Peter has also served on the Boards of Strawbery Banke and the Manchester Boys and Girls Club.

I commend Peter for his tremendous energy and contributions to the community at large in Dover. In addition to his volunteer service to community groups, he also serves on the Greater Dover Chamber of Commerce Government Affairs and Waterfront Committees.

The City of Dover and the State have benefitted greatly by Peter’s efforts and selfless dedication. The citizens of the greater Dover area are most fortunate to have a talented and volunteer such as Peter. I congratulate Peter on this well deserved recognition and wish him the very best. It is truly an honor and a privilege to represent him in the United States Senate.

TRIBUTE TO JACK RICE

- Mr. SARBANES. Mr. President, I rise today to honor an outstanding public servant, Jack Rice. For sixty-six years of exemplary Federal service, as a Machinist, General Foreman at the Coast Guard Yard in Baltimore, Jack consistently provided high quality work to the Coast Guard and deserves recognition for his service.

Throughout his long career with the Federal Government, Jack Rice distinguished himself as a highly skilled tradesman who was committed to the Coast Guard and his trade. His vast knowledge and extensive experience as a Marine Machinist made him a valuable source of information for the Coast Guard Yard as it sought to achieve high quality production of Coast Guard ships. Among the many important projects that he made significant contributions to was the design, construction, and procurement of the Yard’s 4000HP water brake, a computer-controlled dynamometer. His insight also proved essential to the architects and facility managers that built and outfitted the building that currently houses this equipment.

Jack Rice’s innovative approach to his position will be missed. When the Yard’s new Machine Shop was in need of advancement and tools, Jack diligently reviewed excess equipment lists from other agencies. Through his efforts, the Yard was able to maintain state-of-the-art techniques while simultaneously achieving significant savings for the Coast Guard and the Federal Government.

Jack Rice also played a key role in advocating that the Coast Guard Yard receives the necessary resources from the Federal Government to accomplish its important missions. I was fortunate to have the opportunity to work with Jack on these efforts. The Coast Guard and our country owe him a debt of gratitude for helping to ensure that the Coast Guard is adequately prepared to defend our coastlines, particularly during these difficult times.

In addition to his service to the Coast Guard, Jack has contributed endless hours to promoting the development of skilled tradesmen. In particular, as Chairman of the Baltimore City Public Schools Manufacturing Advisory Committee, he advised the school system about the latest trade technology and provided valuable suggestions to the Board as it developed a curriculum that would effectively prepare students for a career involving a trade. He also played a key role in the organization of the job and information fairs that have been extremely successful at informing students and their parents about the need for skilled labor and the benefits of selecting a career in the trades.

For 36 years, Jack Rice exemplified the Coast Guard Yard’s motto, “Service to the Fleet.” Without a doubt, he played a large part in helping the Yard earn its reputation as a top quality workforce which produces top quality products.

It is my firm conviction that public service is one of the most honorable callings, one that demands the very best, most dedicated efforts of those who have the opportunity to serve their fellow citizens and country.

Throughout his career, Jack Rice has exemplified a steadfast commitment to the honor, respect, and dignity of his fellow tradesmen, and has earned the respect of his peers and the Yard. For his many years of hard work and dedication and wish him well in the years ahead.

MAGGIE L. WALKER GOVERNOR’S SCHOOL OF RICHMOND, VA

- Mr. WARNER. Mr. President, on May 4 through 6, 2002 more than 1200 students from across the United States and the District of Washington, D.C. to compete in the national finals of the “We the People . . .” The Citizen and the Constitution program, administered by the Center for Civic Education. “We the People” is the most extensive educational program in the country developed specifically to educate young people about the Constitution and the Bill of Rights.

I am proud to announce that the class from Maggie L. Walker Governor’s School in Richmond, VA will represent the Commonwealth of Virginia in this national event. These young Virginians have worked diligently to reach the national finals and through their experience have gained a deep knowledge and understanding of the fundamental principles and values of our constitutional democracy.

The 3-day national competition is modeled after hearings in the United States Congress. The hearings consist of oral presentations by high school students before a panel of adult judges on constitutional topics. The students’ testimony is followed by a period of questioning by the judges who probe their depth of understanding and ability to apply their constitutional knowledge.

The class from Maggie L. Walker Governor’s School is currently conducting research and preparing for their upcoming participation in the national competition in Washington, D.C.

I wish these young “constitutional experts” the best of luck at “We the People . . .” national finals. They represent the future leaders of our Nation.

WHITNEY R. HARRIS INSTITUTE FOR GLOBAL LEGAL STUDIES

- Mrs. CARNAHAN. Mr. President later today, Washington University, in St. Louis, MO, will be dedicating the Whitney R. Harris Institute for Global Legal Studies. This Institute is a fitting tribute to a man who has devoted his life to the concept of international law.

As a young naval officer, Mr. Harris was selected to join the team of 24 U.S. prosecutors during the trial of Nazi war criminals at Nuremberg because of his expertise in German intelligence matters. The trial was without precedent in the legal history of the United States Congress. The hearings consisted of questioning by the judges who probe the need for skilled labor and the benefits of selecting a career in the trades.

For 36 years, Jack Rice exemplified the Coast Guard Yard’s motto, “Service to the Fleet.” Without a doubt, he played a large part in helping the Yard earn its reputation as a top quality workforce which produces top quality products.

It is my firm conviction that public service is one of the most honorable callings, one that demands the very best, most dedicated efforts of those who have the opportunity to serve their fellow citizens and country.

Throughout his career, Jack Rice has exemplified a steadfast commitment to the honor, respect, and dignity of his fellow tradesmen, and has earned the respect of his peers and the Yard. For his many years of hard work and dedication and wish him well in the years ahead.

MAGGIE L. WALKER GOVERNOR’S SCHOOL OF RICHMOND, VA

- Mr. WARNER. Mr. President, on May 4 through 6, 2002 more than 1200 students from across the United States and the District of Washington, D.C. to compete in the national finals of the “We the People . . .” The Citizen and the Constitution program, administered by the Center for Civic Education. “We the People” is the most extensive educational program in the country developed specifically to educate young people about the Constitution and the Bill of Rights.

I am proud to announce that the class from Maggie L. Walker Governor’s School in Richmond, VA will represent the Commonwealth of Virginia in this national event. The class from Maggie L. Walker Governor’s School is currently conducting research and preparing for their upcoming participation in the national competition in Washington, D.C.

I wish these young “constitutional experts” the best of luck at “We the People . . .” national finals. They represent the future leaders of our Nation.

TRIBUTE TO KERRY FORBES

- Mr. SMITH of New Hampshire. Mr. President, I rise today to pay tribute to the former Governor of Massachusetts, Governor Kerry Forbes, for his distinguished service to our nation.

For decades, Governor Forbes was a dedicated public servant who exemplified the highest ideals of public service. He was a true leader who worked tirelessly to improve the lives of all Massachusetts residents.

Governor Forbes made significant contributions to the Commonwealth during his tenure. He was instrumental in establishing the Massachusetts Transportation Authority, which played a crucial role in the development of our transportation infrastructure. He also worked to improve the state’s education system, including the implementation of the Massachusetts Educational Reform Act.

Governor Forbes was a strong advocate for environmental protection and was a leading voice in the fight against global climate change. He implemented several initiatives to reduce pollution and promote renewable energy, including the establishment of the Massachusetts Climate Protection Fund.

In his personal life, Governor Forbes was known for his commitment to his family and his community. He was a devoted husband and father, and he was a strong supporter of his local church and various charitable organizations.

Governor Forbes’ legacy will continue to inspire future leaders for generations to come. He leaves behind a legacy of dedication, integrity, and service to our state and nation.

In conclusion, Governor Forbes’ contributions to Massachusetts and the United States are immeasurable. He is a true American hero, and I am honored to pay tribute to him today.

Thank you, Mr. President, for the opportunity to express my thoughts on this important occasion.
to Kerry Forbes of Dover, NH, on being named as the 2002 Citizen of the Year by the Greater Dover Chamber of Commerce.

A true champion of the community at large, Kerry has been involved in numerous volunteer programs including: member of the Dover Economic Commission that oversaw the creation of the Enterprise Industrial Park and the creation of the Dover Economic Development Loan Fund, volunteer counselor at the Seaborn Hospital, board member of the Strafford Rivers Conservancy, member of the Greater Dover Chamber of Commerce, member Board of Directors of the Dover Main Street Program and member of the Dover Rotary Club.

The citizens of the greater Dover area and the State have benefitted greatly by Kerry’s efforts and talents. I commend Kerry for the exemplary leadership and spirit of service which he has consistently exhibited while serving his community and congratulating him for this prestigious recognition. It is truly an honor and a privilege to represent him in the United States Senate.

MESSAGES FROM THE HOUSE
At 1:41 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 3394. An act to authorize funding for computer and network security research and development and research fellowship programs, and for other purposes.

ENROLLED BILL SIGNED
At 3:31 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

The enrolled bill was signed subsequently by the President pro tempore (Mr. BYRD).

MEASURES REFERRED
The following bill was read the first and the second times by unanimous consent, and referred as indicated:

H.R. 3394. An act to authorize funding for computer and network security research and development and research fellowship programs, and for other purposes; to the Committee on Commerce, Science, and Transportation.

ENROLLED BILL PRESENTED
The Secretary of the Senate reported that on today, February 7, 2002, she had presented to the President of the United States the following enrolled bill:

REPORTS OF COMMITTEES
The following reports of committees were submitted:

By Mr. KERRY, from the Committee on Small Business and Entrepreneurship, without amendment:

S. 396: A bill to provide for national quadrennial summits on small business and State economic development, to establish the White House Quadrennial Commission on Small Business, and for other purposes. (Rept. No. 107–136).

EXECUTIVE REPORTS OF COMMITTEES
The following executive reports of committees were submitted:

By Mr. LEAHY for the Committee on the Judiciary.

Michael J. Melloy, of Iowa, to be United States Circuit Judge for the Eighth Circuit.

David L. Bunning, of Kentucky, to be United States District Judge for the Eastern District of Kentucky.

James E. Gritzner, of Iowa, to be United States District Judge for the Southern District of Iowa.

Robert E. Blackburn, of Colorado, to be United States District Judge for the District of Colorado.

Cindy K. Jorgenson, of Arizona, to be United States District Judge for the District of Arizona.

Richard J. Leon, of Maryland, to be United States District Judge for the District of Columbia.

Jay C. Zainey, of Louisiana, to be United States District Judge for the Eastern District of Louisiana.

Thomas P. Colantuono, of New Hampshire, to be United States Attorney for the District of New Hampshire for the term of four years.

James K. Vines, of Tennessee, to be United States Attorney for the Middle District of Tennessee for the term of four years.

James Duane Dawson, of West Virginia, to be United States Marshal for the Southern District of West Virginia for the term of four years.

William Carey Jenkins, of Louisiana, to be United States Marshal for the Middle District of Louisiana for the term of four years.

Ronald Richard McMillin, Jr., of Kentucky, to be United States Marshal for the Western District of Kentucky for the term of four years.

David Reid Murtaugh, of Indiana, to be United States Marshal for the Northern District of Indiana for the term of four years.

Nehemiah Flowers, of Mississippi, to be United States Marshal for the Southern District of Mississippi for the term of four years.

Arthur Jeffrey Hedden, of Tennessee, to be United States Marshal for the Eastern District of Tennessee for the term of four years.

David Glenn Jolley, of Tennessee, to be United States Marshal for the Western District of Tennessee for the term of four years.

Michael Wade Roach, of Oklahoma, to be United States Marshal for the Western District of Oklahoma for the term of four years.

Brian Michael Ennis, of Nebraska, to be United States Marshal for the District of Nebraska for the term of four years.

Chester Martin Keely, of Alabama, to be United States Marshal for the Northern District of Alabama for the term of four years.

John William Loyd, of Oklahoma, to be United States Marshal for the Eastern District of Oklahoma for the term of four years.

David Donald Viles, of Maine, to be United States Marshal for the District of Maine for the term of four years.

Johnny Lewis Hughes, of Maryland, to be United States Marshal for the District of Maryland for the term of four years.

Larry Wade Wagster, of Mississippi, to be United States Marshal for the Northern District of Mississippi for the term of four years.

(Nominations without an asterisk were reported with the recommendation that they be confirmed.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS
The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. KERRY (for himself and Mr. BOND):

S. 1914. A bill to amend title 49, United States Code, to provide for increased surcharge for transportation provided by certain motor carriers, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mrs. LINCOLN:

S. 1915. A bill to amend the Internal Revenue Code of 1986 to treat natural gas distribution lines as 10-year property for depreciation purposes; to the Committee on Finance.

By Mr. DAYTON:

S. 1916. A bill to provide unemployed workers with health coverage assistance; to the Committee on Finance.

By Mr. JEFFORDS (for himself, Mr. SMITH of New Hampshire, Mr. REID, Mr. INHOFE, Mr. BAUCUS, Mr. WARNER, Mr. GRAHAM, Mr. BOND, Mr. VOSNOVICH, Mr. VELAZQUEZ, Mr. RUSSELL, Mr. GRAHAM, Mr. CRAPO, Mrs. BOXER, Mr. CHAFEE, Mr. SPORKETT, Mr. WYDEN, Mr. CARPER, Ms. CAMPBELL, Mrs. CLINTON, and Mr. CONROY):

S. 1917. A bill to provide for highway infrastructure investment at the guaranteed financing level contained in Transportation Equity Act for the 21st Century; to the Committee on Environment and Public Works.

By Ms. COLLINS (for herself, Mr. FRIST, Mr. LIEBERMAN, Mr. DEWINE, Mr. ROBERTS, Mr. SESSIONS, Mr. CARPER, and Mr. BREAUX):

S. 1918. A bill to expand the teacher loan forgiveness programs under the guaranteed and direct student loan programs for highly qualified teachers of mathematics, science, and special education, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. WELSTON:

S. 1919. A bill to amend the Employee Retirement Income Security Act of 1974 to provide for improved disclosure, diversification, and individual account access, and accountability under individual account plans; to the Committee on Health, Education, Labor, and Pensions.

By Mr. NELSON of Florida:

S. 1920. A bill to require that the Attorney General conduct a study regarding the ability of the Federal Bureau of Investigation to prevent and combat international crimes involving children, and for other purposes; to the Committee on the Judiciary.
February 7, 2002

By Mrs. HUTCHISON (for herself, Mr. LOTT, and Mr. CRAIO):

S. 212. A bill to amend the Internal Revenue Code of 1986 and the Employee Retirement Income Security Act of 1974 to provide greater protection of workers’ retirement plans, to prohibit certain activities by persons providing auditing services to issuers of public securities, and for other purposes; to the Committee on Finance.

By Mr. HUTCHISON (for himself, Ms. MIKULSKI, and Mr. ENZI):

S. 222. A bill to direct the Secretary of Health and Human Services to expand and intensify programs with respect to research and related activities concerning elder falls; to the Committee on Commerce, Science, and Transportation.

By Mr. DASCHLE:

S.J. Res. 31. A joint resolution suspending certain provisions of law pursuant to section 258(a)(2) of the Balanced Budget and Emergency Deficit Control Act of 1985; to the Committee on the Budget pursuant to Section 258(a)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985, for not to exceed five days of session.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. CAMPBELL, (for himself, Mr. DODD, and Mr. BROWNBACK):

S. Res. 206. A resolution urging the Government of Ukraine to ensure a democratic, transparent, and fair election process leading up to the March 31, 2002, parliamentary elections; to the Committee on Foreign Relations.

ADDITIONAL COSPONSORS

S. 91

At the request of Mrs. MURRAY, her name was added as a cosponsor of S. 91, a bill to amend the Native American Languages Act to provide for the support of Native American Language Survival Schools, and for other purposes.

S. 238

At the request of Mr. FRIST, the name of the Senator from Connecticut (Mr. DODD) was added as a cosponsor of S. 238, a bill to reduce health care costs and promote improved health care by providing supplemental grants for additional preventive health services for women.

S. 243

At the request of Mrs. MURRAY, her name was added as a cosponsor of S. 243, a bill to provide for the issuance of bonds to provide funding for the construction of schools of the Bureau of Indian Affairs of the Department of the Interior, and for other purposes.

S. 281

At the request of Mr. HAGEL, the name of the Senator from Missouri (Mrs. COOK) was added as a cosponsor of S. 281, a bill to authorize the design and construction of a temporary education center at the Vietnam Veterans Memorial.

S. 503

At the request of Mrs. MURRAY, her name was added as a cosponsor of S. 503, a bill to amend the Safe Water Act to provide grants to small public drinking water systems.

S. 540

At the request of Mr. DeWINE, the names of the Senator from Kansas (Mr. BROWNBACK) and the Senator from New York (Mr. SCHUMER) were added as cosponsors of S. 540, a bill to amend the Internal Revenue Code of 1986 to allow as a deduction in determining adjusted gross income the deduction for expenses in connection with services as a member of a reserve component of the Armed Forces of the United States, to allow employers a credit against income tax with respect to employees who participate in the military reserve components, and to allow a comparable credit for participating reserve component self-employed individuals, and for other purposes.

S. 627

At the request of Mr. GRASSLEY, the name of the Senator from Massachusetts (Mr. THOMAS) was added as a cosponsor of S. 627, a bill to amend the Internal Revenue Code of 1986 to allow individuals a deduction for qualified long-term care insurance premiums, use of such insurance under cafeteria plans and flexible spending arrangements, and a credit for individuals with long-term care needs.

S. 722

At the request of Mr. FRIST, the name of the Senator from Wyoming (Mr. THOMAS) was added as a cosponsor of S. 722, a bill to amend the Communications Act of 1934 to prohibit telemarketers from interfering with the caller identification service of any person to whom a telephone solicitation is made, and for other purposes.

S. 808

At the request of Mr. BAUCUS, the name of the Senator from Idaho (Mr. CRAPO) was added as a cosponsor of S. 808, a bill to amend the Internal Revenue Code of 1986 to repeal the occupational taxes relating to distilled spirits, wine, and beer.

S. 1021

At the request of Mrs. MURRAY, her name was added as a cosponsor of S. 1021, a bill to reauthorize the Tropical Forest Conservation Act of 1998 through fiscal year 2004.

S. 1140

At the request of Mr. HATCH, the name of the Senator from Colorado (Mr. ALLARD) was added as a cosponsor of S. 1140, a bill to amend chapter 1 of title 9, United States Code, to provide for greater fairness in the arbitration process relating to motor vehicle franchise contracts.

S. 1196

At the request of Mrs. MURRAY, her name was added as a cosponsor of S. 1196, a bill to provide a budgetary mechanism to ensure that funds will be available to satisfy the Federal Government’s responsibilities with respect to negotiated settlements of disputes related to Indian water rights claims and Indian land claims.

S. 1379

At the request of Mr. KENNEDY, the name of the Senator from California (Mrs. FEINSTEIN) was added as a cosponsor of S. 1379, a bill to amend the Public Health Service Act to establish an Office of Rare Diseases at the National Institutes of Health, and for other purposes.

S. 1469

At the request of Mr. GRAHAM, the name of the Senator from Nevada (Mr. REID) was added as a cosponsor of S. 1469, a bill to clarify the accounting treatment for Federal income tax purposes of deposits and similar amounts received by a tour operator for a tour arranged by such operator.

S. 1768

At the request of Mr. KENNEDY, the name of the Senator from Missouri (Mrs. CARNAHAN) was added as a cosponsor of S. 1768, a bill to enhance the border security of the United States, and for other purposes.

S. 1793

At the request of Mrs. MURRAY, her name was added as a cosponsor of S. 1793, a bill to amend title XIX of the Social Security Act to include medical assistance furnished through an urban Indian health program operated by an urban Indian organization pursuant to a grant or contract with the Indian Health Service under title V of the Indian Health Care Improvement Act in the 100 percent Federal medical assistance percentage applicable to the Indian Health Service.

S. 1796

At the request of Mr. DURBIN, the names of the Senator from Rhode Island (Mr. REED) and the Senator from Nebraska (Mr. NELSON) were added as cosponsors of S. 1796, a bill to expand aviation capacity in the Chicago area.

S. 1967

At the request of Mr. LIEBERMAN, the name of the Senator from Georgia (Mr. CLELAND) was added as a cosponsor of S. 1967, a bill to establish the National Commission on Terrorist Attacks Upon the United States, and for other purposes.

S. 1999

At the request of Mr. BROWNBACK, the names of the Senator from Mississippi (Mr. LOTT) and the Senator from Idaho (Mr. CRAIO) were added as cosponsors of S. 1999, a bill to amend title 18, United States Code, to prohibit human cloning.

RES. 68

At the request of Mrs. MURRAY, her name was added as a cosponsor of S. Res. 68, a resolution designating September 6, 2001 as “National Crazy Horse Day.”

AMENDMENT NO. 2533

At the request of Mr. CRAPO, the names of the Senator from Utah (Mr. HATCH) and the Senator from Utah (Mr.
BENNETT) were added as cosponsors of amendment No. 2533.

AMENDMENT NO. 2821
At the request of Mr. DURBIN, the names of the Senator from Michigan (Mr. LEVIN), the Senator from New Jersey (Mr. CORZINE), the Senator from Maine (Mr. SPECTER) and the Senator from Iowa (Mr. HARKIN) were added as cosponsors of amendment No. 2821.

At the request of Mr. SPECTER, his name was added as a cosponsor of amendment No. 2821 supra.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS
By Mr. KERRY (for himself and Mr. BOND):
S. 1914. A bill to amend title 49, United States Code, to provide a mandatory fuel surcharge for transportation provided by certain motor carriers, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Mr. KERRY, Mr. President, today I am pleased to introduce the Motor Carrier Fuel Cost Equity Act, which is much-needed legislation. My bill is designed to improve the ability of independent truck drivers to recover fuel costs from high fuel costs by requiring that motor carriers charge a fuel surcharge when the price of diesel fuel rises above $1.15 and pass-through this surcharge to the payer of the fuel costs. My bill will level the playing field for small operators, which comprise nearly 80 percent of the motor carrier industry, without any cost or regulatory requirement for the Federal Government.

There are approximately 350,000 independent truck drivers, known as owner-operators, who haul freight either on a per-load contractual basis or by leasing their truck and driving services to a motor carrier, freight forwarder or other shipping broker. Owner-operators essentially are independent contractors. Sometimes they provide their services directly to a shipper, but more often owner-operators contract out their services to a motor carrier company which negotiates its own contract with a shipper and then pays the owner-operator to provide the transportation service.

Fuel surcharges are a long-established method of permitting motor carriers, airlines and even taxis to recover increased costs of fuel to the shipper. The terms of transport with a motor carrier company which negotiates its own contract with a shipper should allow the parties to set their own surcharge formula. The final surcharge must be sufficient to fully compensate the person who pays for the fuel. That’s only fair, but it allows the motor carriers and truckers the greatest degree of flexibility in negotiating the terms of transport.

While national diesel fuel costs have recently fallen below the $1.15 threshold, we know well that fuel costs can increase suddenly. America’s independent truckers, which form the backbone of truck transportation in this country, deserve the ability to protect themselves during these periods of high diesel fuel prices.

I am proud to be joined by Senator BOND in introducing this bill today. I am also pleased that Congressman R-RAHALL has introduced similar legislation on the House side. He has worked hard on this bill for several years now, and I look forward to working closely with him as we move forward on this legislation.

By Mrs. LINCOLN:
S. 1915. A bill to amend the Internal Revenue Code of 1986 to treat natural gas distribution lines as 10-year property for depreciation purposes; to the Committee on Finance.

Mrs. LINCOLN. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

The amendment ordered to be printed in the RECORD, as follows.

S. 1915

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. NATURAL GAS DISTRIBUTION LINES TREATED AS 10-YEAR PROPERTY.

(a) In General.—Subparagraph (D) of section 168(h)(3) of the Internal Revenue Code of 1986 (relating to classification of certain property) is amended by striking “and” at the end of clause (i) and by inserting “and” after the period at the end of clause (ii) of such subparagraph.

(b) Alternative Minimum Tax Exception.—Subparagraph (B) of section 56(a)(1) of the Internal Revenue Code of 1986 is amended by inserting after the item relating to subparagraph (D) of such paragraph the following:

“(D)(ii) 20.”

(c) Effective Date.—The amendments made by this section shall apply to property placed in service after the date of the enactment of this Act.

By Mr. JEFFORDS (for himself, Mr. SMITH of New Hampshire, Mr. REID, Mr. INHOFE, Mr. BAUCUS, Mr. WARNER, Mr. GRAHAM, Mr. BOND, Mr. VOINOVICH, Mr. LIEBERMAN, Mr. CRAPO, Mrs. BOXER, Mr. CHAFEE, Mr. SPECTER, Mr. WYDEN, Mr. CARPER, Mr. CAMPBELL, Mrs. CLINTON, and Mr. CORZINE):
S. 1917. A bill to provide for highway infrastructure investment at the guaranteed funding level contained in the Transportation Equity Act for the 21st Century; to the Committee on Environment and Public Works.

Mr. JEFFORDS. Mr. President, I ask unanimous consent that the Highway Funding Restoration Act as cosponsored by Senators SMITH of New Hampshire, REID, INHOFE, BAUCUS, WARNER, BOXER, CAMPBELL, CARPER, CRAPO, CLINTON, SPECTER, LIEBERMAN, VOINOVICH, GRAHAM of Florida, WYDEN, CORZINE, BOND, and CHAFEE, be printed in the RECORD. The bill provides for highway infrastructure investment at the guaranteed funding level contained in the Transportation Equity Act for the 21st Century.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1917
Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.
This Act may be cited as the “Highway Funding Restoration Act”.

SEC. 2. FEDERAL-AID HIGHWAY PROGRAM OBLIGATION CEILING.

Section 112 of the Transportation Equity Act for the 21st Century (23 U.S.C. 104 note; 112 Stat. 115, 113 Stat. 1758) is amended by adding at the end the following:

“(k) Restoration of Obligation Limitation for Fiscal Year 2003.—Notwithstanding any other provision of law, the obligations for Federal-aid highway and highway safety construction programs for fiscal year 2003—

“(1) shall be not less than $27,746,000,000; and

“(2) shall be distributed in accordance with this section.”.

By Ms. COLLINS (for herself, Mr. FRIST, Mr. LIEBERMAN, Mr. DEWINE, Mr. ROBERTS, Mr. SESSIONS, Mr. CARPER, and Mr. BREAUD):
S. 1918. A bill to expand the teacher loan forgiveness programs under the guaranteed and direct student loan programs for higher qualified teachers of mathematics, science, and special education, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

Ms. COLLINS. Mr. President, I rise today with my colleagues, Senators FRIST, LIEBERMAN, DEWINE, ROBERTS, and SESSIONS to introduce the Math, Science, and Special Education Teacher Recruitment Act of 2002. I particularly want to thank the Senator from Tennessee for his tireless efforts and his leadership on this issue. The legislation we have before us today is, in large part, a product of his commitment to affordable education. I would also like to thank the Senator from Connecticut for his assistance and his dedication to solving America’s teacher shortage.
The legislation we are introducing is designed to recruit teachers with an expertise in math, science, or special education to work in schools with high concentrations of low-income students by offering substantial assistance with their student loan payments.

All across America, public schools are struggling to fill teaching positions with qualified teachers. In the 2001-2002 school year, administrators had to hire an estimated 200,000 new teachers just to maintain the current teacher-student ratio. Although universities continue to produce a greater number of teachers each year, the profession is losing too many of its most qualified and experienced personnel to retirement. In Maine, for example, 30.2 percent of teachers are over the age of 50. With such a large proportion of the profession nearing retirement, additional replacements will be needed in the next few years. The national teaching shortage is expected to continue throughout the next decade, making it more and more difficult for schools to find qualified instructors.

Attracting new faculty is difficult enough, but finding applicants with backgrounds in math, science, or special education will be particularly demanding. Among first year teachers, approximately 55 percent graduated from college with a bachelor's in general education. Many more graduated with liberal arts degrees or majors unrelated to the curriculum they teach. The result is a system where only 38 percent of public school teachers hold subject-matter specific degrees.

In Maine, the shortage of qualified applicants is most severe with regard to math, science, special education, and foreign languages. Eighty nine percent of our high schools reported a shortage in math teachers, and 87 percent reported a shortage of science teachers. With the recent developments in technology and computing, it is becoming more important than ever that our schoolchildren enter the workforce with a firm grasp of math and science. Yet, it is more and more difficult to attract math and science specialists to the teaching profession. As for special education, the Council for Exceptional Children reports that 50,000 special education positions were unfilled or filled by teachers without a full certification.

Because this teacher shortage is a burden on suburban school districts with ample resources, you can imagine the strain it puts on high poverty school systems. Problems are amplified in high-need areas: Teachers are likely to be the least experienced, often just out of school, they are less likely to hold a masters degree, and they are less likely to have majored in their field of instruction.

To help deal with this epidemic, Senator KIRK and I put together a proposal that would expand the current loan forgiveness program for math and science teachers who are willing to teach in high-poverty areas. Under the Act, teachers who commit to teach for five consecutive years in a low-income/high-need area would be eligible for $17,500 in loan forgiveness instead of the current benefit of $5,000. To meet the pressing need for special educators, the proposal would also make special education loan forgiveness available for the first time. We expect this legislation will expand upon the successes of the current program and encourage a greater number of college graduates to enter the teaching profession. We are confident that it will encourage more of the best qualified teachers to consider teaching in high need areas.

We are delighted that the President has included $45 million in his budget for a similar proposal. Once again, President Bush has chosen to make education a priority, and I look forward to working with my colleagues and the Administration on this important piece of legislation.

Mr. President, I rise to speak about a bill being introduced today by Senator COLLINS, a bill that would expand loan forgiveness for math, science and special education teachers. I am proud to be a cosponsor of this legislation.

At this time, I would like to share with you some startling statistics regarding the status of teaching skills in our country. More than 1 in 4 high school math teachers and nearly 1 in 5 high school science teachers lack even a minor in their main teaching field. About 56 percent of high school students taking physical science are taught by out-of-field teachers, as are 27 percent of those taking math. And these percentages are much greater among high-poverty areas. Among schools with the highest minority enrollments, for example, students have less than a 50 percent chance of getting a science or math teacher who hold a degree in either of his or her subjects. Moreover, a third of these students are taught by out of field teachers. One survey taken among 40 large urban schools, for instance, showed that more than 90 percent of them had an immediate need for a certified math or science teacher.

This shortage of strong math and science teachers is having a direct effect on the performance of our students. The most recent NAEP science section results showed that the performance of fourth- and eighth-grade students remained about the same since 1996, but scores for high school seniors changed significantly: up six points for private school students and down four for public school students, for a net national decline of three points. Moreover, a whopping 92 percent of two-year grade students are not proficient in science and the achievement gaps among eighth-graders are appalling: Only 41 percent of white, 7 percent of African-American and 12 percent of Hispanic students are proficient.

The disappointing overall results for seniors on the science section of the NAEP prompted Education Secretary Rod Paige to call the decline "morally significant." He warned, "If our graduates know less about science than their predecessors four years ago, then our hopes for a strong 21st century workforce are dimming just when we need them most." I couldn't agree with him more.

An enormous improvement in mathematics and science education at the K-12 level is necessary if today's students want good jobs and the United States will remain competitive in the world economy. With globalization, that means that the good jobs will go to the people who can do them best. If those people are not in the United States, then those jobs will also not be in the United States. At present, the law allows 185,000 immigrants to enter the United States on H-1B visas each year in order to take jobs that cannot be filled by workers in the United States.

We have to do more to make sure that our students are learning math and science skills. Moreover, if we want good jobs and the United States to stay competitive, we must improve the quality of our Nation's math and science teachers. These sentiments are echoed by the National Research Council in its 2001 report. The Council notes: If the Nation is to make the continuous improvements needed in teaching, we need to make a science out of teacher education—using evidence and analysis to build an effective system of teacher preparation and professional development.

President Bush has taken note of the startling statistics I shared with you today, and that is why he has provided $45 million in his budget to expand loan forgiveness for math and science teachers from $5,000 to $17,500 for those teachers who commit to teach for 5 consecutive years in high-need schools. The President also provided this expansion of loan forgiveness for special education teachers in his budget.
cause a child to forever stray from the life sciences and run toward the liberal arts.

Our society needs more engineers, more technicians, more doctors and more scientists. We as a society should do all we can to encourage kids to enter these professions. That means we have to start early and make sure that those individuals who have the ability to shape their knowledge actually encourage them to become future scientists, not dissuade them from ever considering having kids enter the profession. As thousands of Enron employees saw much of their life savings vanish, it exposes serious gaps in the world of retirement security for older Americans.

In the 1970s, we recognized the need to protect what was then becoming a serious retirement security threat. That is, employer-provided pension plans, or so-called "defined benefit" plans. In ERISA, the Employee Retirement Income Security Act, we took steps to protect the security of such plans. We created a system for insuring them against default and we put in place portfolio diversification rules to help assure their solvency. No more than 10 percent of assets in a defined benefit plan, that is, in a traditional pension plan, may be held in the employer's company stock. The Federal Government has not thus far taken steps to provide similar protections with respect to other retirement savings accounts, for example, 401(k) plans. This is because, until relatively recently, such plans were much fewer in number, and they had largely been viewed as a supplement to workers' social security and defined benefit plans.

The world of retirement security has changed, however, and it is still changing. Now, traditional defined benefit, or pension, plans have essentially given way to defined contribution plans, such as 401(k)s, as the primary retirement security vehicle after social security. These plans have been popular with mobile younger workers, and a boon to employers who have enjoyed substantial cash and administrative savings by switching out of their traditional pension plans and into these new ones.

In 1984, there were 30 million defined benefit participants and 7.5 million participants in 401(k) plans. By 2001, this relationship was reversed, with just 20 million defined benefit participants and 42 million 401(k) participants. In a 1998 survey, 57 percent of U.S. households said that the only pension plan available to them was a 401(k) plan. That percentage undoubtedly has increased since then.

Meanwhile, measures to ensure the integrity of these 401(k) plans have not kept pace with their proliferation and importance. Such plans clearly carry the potential for additional disasters remains high. Recent reports indicate some 20 major corporations at which the 401(k) plan is more than 60 percent invested in company stock. When the 401(k) portfolios of employees are overinvested in the company's stock and that company's stock crashes, the individual losses suffered by workers and retirees whose entire retirement savings are obliterated are only a piece of the story. The human and capital costs to society of such failures are multiplied many times over. Family members who themselves may be struggling will find that they are forced to pitch in to help their loved ones. Retirees will be forced to spend many additional years in the workplace to recover even a portion of their lost security. Individuals without family or savings to see them through will turn to government for support.

It's important to remember that these retirement plans come with a huge price tag for taxpayers. Under current law, pension plans that meet certain standards net considerable tax advantages for both the companies that sponsor them and the individuals who participate in them. These provisions cost the taxpayers an estimated $100 billion per year in foregone revenue. In my view, that is money well invested. But we do our best to ensure that we are reaching our actual policy goal.

The primary policy rationale for tax favored treatment of these plans today is that they promote retirement security for millions of Americans. There is hardly a more important policy goal. While traditional pension plans are carefully regulated and offer a certain level of risk involved while promoting that goal, 401(k) and similar plans currently offer no such protections. Our support for 401(k)'s is not matched by adequate disclosure, portfolio diversification and accountability measures. The huge risks of individual underexposure to company stock have been demonstrated in no uncertain terms, yet the danger continues with no appropriate government response, despite the major public investment.

That is the reason that I am introducing the Retirement Security Protection Act of 2002. The legislation is designed to maximize the flexibility and benefits that retirement savings plans provide for both employers and employees, while maximizing the risk of future Enrons.

First, my proposal seeks to improve the flow of information between plan sponsors and participants, particularly for those plans with significant employer stock holdings.

Second, I am proposing that employers take steps to safeguard their employees' retirement by providing them and the government with an estimate of the extent to which their retirement is dependent on employer stock and property. Employers will be required to reduce that level of dependency across all retirement plans by the year 2008. Companies that sufficiently limit the amount of employer stock in their plans as a whole are deemed to meet the 20 percent standard.

While my plan uses the same, 20 percent diversification target as other proposals, it also encourages and rewards employers who sponsor traditional pension plans by allowing them to maintain higher levels of company stock in their defined contribution 401(k) plans. It also seeks to spur innovation by permitting employers to obtain a waiver from the Department of
Labor for alternative approaches that manage the risk associated with defined contribution plans.

Finally, I propose broadening the liability for plan losses resulting from illegal behavior and improving the remedies available to those who have been hurt by such behavior.

Our compact with American working families is meant to assure them the kind of security in their retirement years they have worked so hard to achieve. I urge my colleagues to join me in that.

I ask unanimous consent that a summary of the bill be printed in the Record.

There being no objection, the summary was ordered to be printed in the Record, as follows:

RECORD, as follows:

pant who has been with company for more
licly-traded companies, permits any partici-
employers are exempt and the Department of
whole are deemed to meet the 20% standard.
amount of employer stock in their plans as a
native approaches that manage the risk as-
benefit plans to maintain higher levels of
sification across employees
through (1) improved disclosure require-
information: Plan sponsors and administrators
stress the importance of account diversifica-
restrictions on the sale of that stock and that
improved disclosure requirements, (2) new rules to promote plan diver-
and resolving abuses.

FULL AND ACCURATE DISCLOSURE
1. Annual plan statements: Defined con-
company stock: Requires 30 days advance
employee stock contributions to
transfer employer stock contributions to
other funds. (Maintains the current 10-years participation requirement for employer
contributions to ESOPs). The Department of
Labor is directed in recommendations on
the application of diversification rights
to non-publicly traded company stock within
retirement plans.

4. Lockdown protections for plans with
company stock: Requires 30 days advance
written notice of plan “lockdowns”, limits such events to 10 business days, and directs
the Secretary of Labor to prescribe regula-
tions to provide for exemptions in case of
genuine emergency. Company executives
cannot impose lockdowns during the
lockdown period. Plan fiduciaries are liable
for violations of their fiduciary duty that re-
sult in plan or participant losses during a
lockdown.

STRONGER ACCOUNTABILITY
1. Expanding: Expands the liabil-
ity for breach of fiduciary duty to knowing
participants in the breach (e.g. Arthur Ander-
son in the Enron case) and stipulates that
both the plan and the individual participants
have the right to be made whole in court,
including recovery of attorney’s fees;
2. Fiduciary insurance: Requires all
defined contribution fiduciaries to maintain suffi-
cient insurance or bonding to cover financial losses resulting from breach of fiduciary duty;
3. Employee oversight: Requires employ-
ers that offer defined contribution pension plans to appoint an employer and employee
trustee to oversee such plans;
4. No employer coercion. Makes it illegal
for employers to require employees to waive
their statutory pensions rights as part of any
employment-related agreement (such as a
termination or severance package);
5. Auditor independence: Bars company
auditors from also auditing the pension plans;
6. Whistleblower protections. Expands
legal protections for pension plan whistle-
blowers by extending existing protections to
persons other than participants or bene-
ficiaries, including the burden of proof on
employers to explain their actions, and ex-
panding relief available for violations of whistleblower protections;
7. Insurance options: Requires the
Department of Labor to study the current
insurance options and to recommend plan
options to employees;
8. Labor Department assistance: The De-
partment of Labor shall establish an office of
Worker Advocate, sole purpose of which is to
act as a liaison to those employees receiving
private
to eventually track her down and re-
turn her to her distraught parents. The
process of finding the girl exposed
flaws in the FBI’s ability to prevent
and combat these crimes when they occur
in foreign jurisdictions.

My legislation would require the At-
torney General, in cooperation with the
Secretary of State, to evaluate the
way in which the FBI investigates
international crimes involving chil-
dren. The Attorney General would be
required to report back to the Congress
with recommendations for improving
the FBI’s practices and procedures for
investigating international crimes in-
volving children. The bill also directs the
Attorney General to coordinate inform-
ation with the International Crimi-
nal Police Organization, the world’s
preeminent organization whose mission
is preventing or detecting inter-
national crime, whenever such an in-
vestigation starts.

I urge my colleagues to review
and pass this legislation as soon as pos-
sible. Action must be taken to improve
the way in which these crimes are in-
vestigated. Our kids need better pro-
tection from predators and we need to
close this loophole in our laws to
prevent crimes being committed on
foreign soil. By expanding our
investigative ability into foreign juris-
dictions, we will be able to bring these
perpetrators to justice.

By Mrs. HUTCHISON (for herself,
Mr. LOTT, and Mr. CRAIG):
S. 1921. A bill to amend the Internal
Revenue Code of 1986 and the Employee
Retirement Income Security Act of 1974 to provide
greater protection of workers’ retirement plans, to prohibit
the taking of assets held in retirement plans from predators,
and to provide additional benefits to persons providing
aiding services to issuers of public
bills; to the Committee on Finance.

Mr. CRAIG. Mr. President, I rise in
support of the Pension Plan Protection Act, being introduced today by
the Senator from Texas, Mrs. HUTCHISON,
and others. I am pleased to be an origi-
nal cosponsor of this important bill and commend the Senator for her lead-
ership in this important endeavor.

This bill will help employees and protec-
t their families and their retirement
nest eggs. It will require employers to
in the same as the rank-and-file during
and commit international crimes involving chil-
dren, and furnish evidence to; to the
Committee on the Judiciary.

Mr. 1920. A bill to require that the At-
torney General conduct a study regarding
the ability of the Federal Bureau of
Investigation to prevent and combat
international crimes involving chil-
dren, and furnish evidence to; to the
Committee on the Judiciary.

Mr. NELSON of Florida. Mr. Presi-
dent, today I introduced the Inter-
national Child Safety Improvement
Act of 2002. This legislation is intended
to improve the Federal Bureau of In-
vestigation’s ability to prevent and
combat international crimes involving
children.

The number of people who use the
Internet to meet children and commit
criminal acts, including sexual acts, is on
the rise. Some of these cases occur in
other countries, but involve
American kids.

Just over a year ago, a 15-year-old
girl from Mulberry, FL disappeared
only to be found in Greece living with
an alleged German sex offender. The 35-
year-old German man had met this
young girl through the Internet and
enticed her to run away from home.
Law enforcement was able to
in foreign jurisdictions.

This is a bill that critics should be-
come law quickly. It includes most of
the reforms recommended by the Presi-
dent and representing the export judg-
ment of a Cabinet-level, interagency
task force. It also includes additional improvements. These protections will be strong, but measured. Unlike some other ideas being floated today, these reforms are not arbitrary. They are fair and uniform, but not one-size-fits-all. They keep the focus where it belongs: empowering, informing, and informing workers.

I realize that other legislation may still be forthcoming, regarding accounting practices, securities management, or other issues. But that should not delay us from acting now on reforms that we all know are needed. Workers should not be left vulnerable for one unnecessary day while the Congress holds endless hearings in search of a “perfect” package.

I urge my colleagues to act promptly and pass this pro-worker bill.

By Mr. HUTCHINSON (for himself, Ms. MIKULSKI, and Mr. ENZI) S. 1922. A bill to direct the Secretary of Health and Human Services to expand and intensify programs with respect to research and related activities concerning elder falls; to the Committee on Health, Education, Labor, and Pensions.

Mr. HUTCHINSON. Mr. President, today, I am pleased to introduce the Elder Fall Prevention Act of 2002, along with my colleagues Senator MIKULSKI and Senator ENZI.

Many people do not realize that over 60 percent of fall-related deaths in our country occur among persons 75 or older. Fall victims, especially the elderly, are prone to sustain hip fractures which can be devastating to their health—in fact, 25 percent of individuals who sustain hip fractures die within one year from the time the injury occurred.

In Arkansas, falls are the second leading cause of deaths from unintentional injuries. Based on data collected by the Centers for Disease Control, 91 Arkansans died because of a fall-related injury in 1998 alone.

Not only is this a serious public health issue, it is also a fiscal issue, because billions of Medicare and Medicaid dollars are spent each year to treat fall victims. It is estimated that over $32 billion will be spent by the Medicare and Medicaid programs for fall-related injuries in the year 2020.

The Elder Fall Prevention Act will provide needed resources for education, research and demonstration projects aimed at reducing the risk of falls, identifying vulnerable populations, and preventing repeat falls. The congressionally-chartered National Safety Council, which is a leader in fall prevention efforts, will be spearheading several of these initiatives, along with the Centers for Disease Control, the Administration on Aging, the Agency for Health Research and Quality, and other organizations.

Falls are preventable. I urge my colleagues to support the Elder Fall Prevention Act of 2002 in order to make

seniors, family members, caregivers, and employers more safety conscious, to prevent unnecessary deaths, and to provide seniors with peace of mind and a safe environment.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

SEC. 2. FINDINGS.

The Congress finds as follows:

(1) Falls are the leading cause of injury deaths among people over 65.

(2) Sixty percent of fall-related deaths occur among persons 75 and older.

(3) Twenty-five percent of elderly persons who sustain a hip fracture die within 1 year.

(4) Hospital admissions for hip fractures among the elderly have increased from 231,000 admissions in 1988 to 322,000 in 1999.

(5) The costs to the Medicare and Medicaid programs and society as a whole from falls by elderly persons continue to climb much faster than inflation and population growth. Direct costs alone will exceed $322,000,000,000 in 2020.

(6) The Federal Government should devote additional resources to research regarding the prevention and treatment of falls in residential as well as institutional settings.

(7) A national approach to reducing elder falls, which focuses on the daily life of senior citizens in residential, institutional, and community settings is needed. The approach should include a wide range of organizations and individuals including family members, health care providers, social workers, architects, employers and others.

(8) Reducing preventable adverse events, such as elder falls, is an important aspect to the agenda to improve patient safety.

SEC. 3. PURPOSES.

The purposes of this Act are—

(A) improve the identification of elders with a high risk of falls;

(B) improve data collection and analysis to identify fall risk and protective factors;

(C) develop strategies that are proven to be effective in reducing subsequent falls by elderly fall victims;

(D) expand proven interventions to prevent elder falls;

(E) improve the diagnosis, treatment, and rehabilitation of elderly fall victims;

(F) conduct research concerning barriers to the adoption of proven interventions with respect to the prevention of elder falls (such as medication review and vision enhancement); and

(G) evaluate the effectiveness of community programs to prevent assisted living and nursing home falls by elders.

SEC. 4. PUBLIC EDUCATION.

(a) in General.—Subject to the availability of appropriations, the Secretary of Health and Human Services shall—

(1) conduct research and surveillance activities related to the community-based and populations-based aspects of elder fall prevention through the Director of the Centers for Disease Control and Prevention;

(2) conduct research related to elder fall prevention in health care delivery settings and clinical treatment and rehabilitation of elderly fall victims through the Director of the Agency for Healthcare Research and Quality; and

(3) ensure the coordination of the activities described in paragraphs (1) and (2).

(b) Grants.—The Secretary of Health and Human Services shall award grants to qualified organizations and institutions to enable such organizations and institutions to provide professional education for physicians and allied health professionals in elder fall prevention.

SEC. 5. DEMONSTRATION PROJECTS.

Subject to the availability of appropriations, the Secretary of Health and Human Services, acting through the Director of the Centers for Disease Control and Prevention and in consultation with the Director of the Agency for Healthcare Research and Quality, shall carry out the following:

(1) Oversee and support demonstration and research projects to be carried out by the National Safety Council in the following areas:

(A) A multi-State demonstration project assessing the utility of targeted fall risk screening and referral programs.

(B) Programs targeting newly-discharged fall victims who are at a high risk for second falls, which shall include, but not be limited to modification projects for elders with multiple sensory impairments, video and web-enhanced fall prevention programs for caregivers in multifamily housing settings, and development of technology to prevent and detect falls.

(2) (A) Provide grants to qualified organizations and institutions targeting to carry out fall prevention programs in residential and institutional settings.

S. 1922

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Elder Fall Prevention Act of 2002.”
By Mr. LOTT (for Mr. McCAIN):

S. 1923. A bill to provide for increased corporate average fuel economy standards, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Mr. MCCAIN. Mr. President, today, I am introducing the “Fuel Economy and Security Act of 2002.” This legislation would reduce our Nation’s oil consumption and provide our dependance on foreign oil. By increasing Corporate Average Fuel Economy, CAFE, standards for passenger cars and light trucks, this legislation would also expand the current CAFE credits system by allowing credit trading between automotive manufacturers, as well as other industries that emit greenhouse gases. Increasing CAFE standards, coupled with this new trading system, would strengthen our nation’s security, while significantly reducing greenhouse gas emissions over the next decade and beyond.

The terrorist attacks waged on this country on September 11, 2001, have brought into focus the need to reduce our dependence on all foreign oil, but most importantly, oil from the Persian Gulf. Compared with the United States’ daily oil production of 6 million barrels, this country imports 9 million barrels of oil per day, 2.6 million barrels of which come from the Persian Gulf. This bill would result in daily oil savings by 2020 that are more than what the United States currently imports from that region. The cumulative oil savings between 2007 and 2020 would be approximately 62 billion barrels. This savings from increased fuel economy is essential if we are to increase our energy independence and national security.

Last year, the National Academy of Sciences, NAS, issued a report that concluded that the benefits resulting from CAFE since its implementation in 1978 clearly warrant government intervention to ensure fuel economy levels beyond what may result from market forces alone. The NAS panel found that CAFE has led to marked improvements in reducing greenhouse gas emissions, fuel consumption, and dependence on foreign oil.

The debate over CAFE is complex because it requires striking a careful balance among many factors, including the environment, consumer preferences, and domestic employment. It is also important to consider the need for powerful and durable vehicles in rural America. I believe this bill would achieve a balance of many of these competing interests by providing adequate lead time to implement aggressive CAFE increases; furthering efforts to reduce greenhouse gases; and factoring in the ability of automobile manufacturers to meet annual standards based on existing technology. This bill would increase fuel economy standards by combining the dual-fleet CAFE structure, which currently restricts manufacturers to meet separate fuel economy standards for their light trucks and passenger cars. The bill requires that manufacturers’ fleets average 36 miles per gallon by 2016. Combining the fleets eliminates the often-criticized “SUV loophole” and provides flexibility to automobile manufacturers in designing their fleets.

Reducing fuel consumption will accomplish the critical goal of reducing greenhouse gas emissions. At the recent Auto Show, and at the recent annual meeting in New York, it was reported that out of 142 nations, the U.S. ranked 51st on an environmental sustainability index that measures overall progress toward environmental sustainability for the evaluated countries. Alarming, the U.S. ranked 133rd out of 142 on reducing greenhouse gas emissions, one of the key indicators used to determine the sustainability index. The Committee on Commerce, Science, and Transportation has held several hearings to address the complex issue of greenhouse gas emissions. The bill I am introducing today, focuses on one of the major industrial greenhouse gas emitters, the automotive industry. While this bill proposes significant increases in the fuel economy of vehicles, it also expands the options that a manufacturer has to meet these requirements. Title II of this legislation proposes to establish a national registry and trading system for registering greenhouse gas emissions reductions. The registry would support the trading of credits established in both the CAFE system, and other voluntary trading practices.

To further ensure that automakers improve fuel economy and do not rely solely on purchasing credits from the registry to satisfy CAFE requirements, the bill has limited the amount of credits that can be purchased.

I believe this bill provides a realistic approach to reducing our nation’s dependence on foreign oil and preserving our climate for future generations. I seek my colleagues’ careful consideration of this proposal. I ask unanimous consent that a copy of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1923

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SECTION 1. SHORT TITLE.

This Act may be cited as the “Fuel Economy and Security Act of 2002.”

SEC. 2. TABLE OF CONTENTS.

The table of contents for this Act is as follows:

Sec. 1. Short Title.
Sec. 2. Table of Contents.
Title I—Improved fuel economy for vehicles
Sec. 101. Average fuel economy standards for passenger automobiles and light trucks.
Sec. 102. Replacement of dual fuel credit with registry for trading credits.
Sec. 103. Elimination of 2-fleet rule.
Sec. 104. Elimination of dual fuel credit.
Sec. 105. High occupancy vehicle exemption.
Title II—Market-based Initiatives for Greenhouse Gas Reduction
Sec. 201. Market-based initiatives.
Sec. 202. Implementing panel.
Sec. 203. Definitions.
Title III—Vehicle Safety
Sec. 301. Roof crush standard.
Sec. 302. Safety rating labels.

TITLE I—IMPROVED FUEL ECONOMY FOR VEHICLES

SEC. 101. AVERAGE FUEL ECONOMY STANDARDS FOR PASSENGER AUTOMOBILES AND LIGHT TRUCKS.

(a) Increased Standards.—Section 32902 of title 49, United States Code, is amended—

(1) by striking “NON-PASSENGER AUTOMOBILES.”—” in subsection (a) and inserting “PRESCRIPTION OF STANDARDS BY REGULATION.”—” and

(2) by striking “(except passenger automobiles)” in subsection (a) and inserting “(except passenger automobiles and light trucks)”;

(3) by striking subsection (b) and inserting the following:

“(b) STANDARDS FOR PASSENGER AUTOMOBILES AND LIGHT TRUCKS.—

IN GENERAL.—The Secretary of Transportation, after consultation with the Administrator of the Environmental Protection
Agency, shall prescribe average fuel economy standards for passenger automobiles and light trucks manufactured by a manufacturer in each model year beginning with model year 2007 in order to achieve a combined average fuel economy standard for model year 2016 of 35 miles per gallon. In prescribing average fuel economy standards under this section, the Secretary shall prescribe appropriate annual fuel economy standards increase that increase the applicable average fuel economy standard annually during the model year period beginning with model year 2007.

(2) DEADLINE FOR REGULATIONS.—The Secretary shall promulgate the regulations required by paragraph (1) in final form no later than 24 months after the date of enactment of the Energy Policy Act of 2002.

(3) DEFAULT STANDARDS.—If the regulations required by paragraph (1) are not promulgated in final form within the period required by paragraph (2), then the average fuel economy standard for passenger automobiles and light trucks manufactured by a manufacturer is—

(A) for model year 2012, a standard (expressed in miles per gallon) that represents 5 percent of the difference between—

(i) 36 miles per gallon; and

(ii) the average fuel economy for passenger automobiles and light trucks manufactured by a manufacturer in model year 2006; and

(B) 36 miles per gallon for model year 2016 and thereafter.

(b) DEFINITION OF LIGHT TRUCKS.—

(1) IN GENERAL.—Section 32901(a) of title 49, United States Code, is amended by adding at the end the following:

(17) ‘‘light truck’’ means an automobile that the Secretary decides by regulation—

(A) is manufactured primarily for transporting not more than 10 individuals; and

(B) is rated at no more than 10,000 pounds gross vehicle weight;

(C) is not a passenger automobile; and

(D) does not fall within the exceptions from the definition of ‘‘medium duty passenger vehicles’’ in section 8601 of title 49, Code of Federal Regulations.

(2) DEADLINE FOR REGULATIONS.—The Secretary of Transportation—

(A) shall issue proposed regulations implementing the amendment made by paragraph (1) not later than 1 year after the date of the enactment of this Act; and

(B) shall issue final regulations implementing the amendment not later than 18 months after the date of the enactment of this Act.

(c) EFFECTIVE DATE.—Regulations prescribed under paragraph (1) shall begin applying with model year 2007.

(d) APPLICABILITY OF EXISTING STANDARDS.—This section does not affect the regulation of section 32902 of title 49, United States Code, to passenger automobiles or non-passenger automobiles manufactured before model year 2007.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary of Transportation to carry out the provisions of chapter 529 of title 49, United States Code, $25,000,000 for each of fiscal years 2003 through 2010.

SEC. 103. ELIMINATION OF 2-FLEET RULE.

(a) IN GENERAL.—Section 32904 of title 49, United States Code, is amended by adding at the end the following:

(1) May be applied to any of the 3 model years immediately following the model year for which the credits are earned; or

(2) transferred to the registry established under section 201 of the Fuel Economy and Security Act of 2002.

(b) LIMITATION.—A manufacturer may not use credits purchased through the registry to offset more than 10 percent of the fuel economy standard applicable to any model year.

SEC. 104. ELIMINATION OF DUAL FUEL CREDIT.

Section 32905 of title 49, United States Code, is repealed.

SEC. 105. HIGH OCCUPANCY VEHICLE EXCEPTION.

(a) IN GENERAL.—Notwithstanding section 108(a) of the Clean Air Act (42 U.S.C. 7583(e)(1)), the Secretary of Transportation for the United States may, for the purpose of promoting energy conservation, permit a vehicle with fewer than 2 occupants to operate in high occupancy vehicle lanes if it is a hybrid vehicle or a vehicle with a rechargeable energy storage system.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) apply to model years 2007 and later.

SEC. 106. MARKET-BASED INITIATIVES.

(a) ESTABLISHMENT OF REGISTRY FOR VOLUNTARY REDUCTIONS.—

(1) The Secretary of Commerce, through the Undersecretary for Technology, shall establish a national registry for greenhouse gas trading industry under which emission reductions from the applicable baseline are assigned unique identifying numerical codes by the registry. Participation in the registry is voluntary, and any entity in the United States that register its emission results, including emissions generated outside of the United States, on an entity-wide basis with the registry, and may utilize the services of the registry.

(b) PURPOSES.—The purposes of the national registry are—

(1) to encourage voluntary actions to reduce greenhouse gas emissions and increase energy efficiency, including increasing the fuel economy of passenger automobiles and (2) to increase the reliance by United States markets on petroleum produced outside the United States used to provide vehicular fuel; and

(2) to enable participating entities to record voluntary greenhouse gas emissions reductions in a consistent format that is supported by third party verification.

(c) REGISTRATION.—Any entity conducting business outside of the United States, on an entity-wide basis with the registry.

(d) PUBLIC AWARENESS.—The national registry shall carry out the following functions:

(1) RESEARCH.—Provide referrals to approved providers for advice on

(A) designing programs to establish emissions baselines and to monitor and track greenhouse gas emissions;

(B) establishing emissions reduction goals based on international best practices for specific industries and economic sectors.

(2) MARKET DEVELOPMENT.—Adopt a uniform format for reporting emissions baselines and reductions established through—

(A) the Director of the National Institute of Standards and Technology for greenhouse gas baselines and reductions generally; and

(B) the Secretary of Transportation for credits under section 32903 of title 49, United States Code.

(3) RECORD MAINTENANCE.—Maintain a record of all emission baselines and reductions verified by qualified independent auditors.

(4) ENCOURAGE PARTICIPATION.—Encourage organizations from various sectors to monitor emissions, establish baselines and reduction targets, and implement efficiency improvement and renewable energy programs to achieve those targets.

(5) PUBLIC AWARENESS.—Recognize, publicize, and promote participants that—

(A) commit to monitor their emissions and set reduction targets;

(B) establish emission baselines; and

(C) report on the amount of progress made on their annual emissions.

(6) TRANSFER OF REDUCTIONS.—The registry shall—

(A) accept for transfer of ownership of any reductions realized in accordance with the program; and

(b) LIMITATION.—A manufacturer may—

(1) may be applied to any of the 3 model years immediately following the model year for which the credits are earned; or

(2) transferred to the registry established under section 201 of the Fuel Economy and Security Act of 2002.

(2) LIMITATION.—A manufacturer may not use credits purchased through the registry to offset more than 10 percent of the fuel economy standard applicable to any model year.

(a) IN GENERAL.—A manufacturer may apply credits purchased through the registry established by section 201 of the Fuel Economy and Security Act of 2002 toward any model year after model year 2006 under subsection (d), subsection (e), or both.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) apply to model years 2007 and later.

(a) IN GENERAL.—Notwithstanding section 108(a) of the Clean Air Act (42 U.S.C. 7583(e)(1)), the Secretary of Transportation for the United States may, for the purpose of promoting energy conservation, permit a vehicle with fewer than 2 occupants to operate in high occupancy vehicle lanes if it is a hybrid vehicle or a vehicle with a rechargeable energy storage system.

(b) HYBRID VEHICLE DEFINED.—In this section, the term ‘‘hybrid vehicle’’ means a motor vehicle or a light truck as defined in section 32901(a)(17) of title 49, United States Code.

(1) which—

(A) draws propulsion energy from onboard sources of stored energy which are both—

(i) an internal combustion or heat engine using combustible fuel; and

(ii) a rechargeable energy storage system; or

(B) recovers kinetic energy through regenerative braking and provides at least 13 percent maximum power from the electrical storage device;

(2) which, in the case of a passenger automobile—

(A) for 2002 and later model vehicles, has received a certificate of conformity under section 206 of the Clean Air Act (42 U.S.C. 7525) and meets or exceeds the equivalent qualifying California low emission vehicle standard under section 243(e)(2) of the Clean Air Act (42 U.S.C. 7583(e)(2)) for that make and model year; and

(B) for 2004 and later model vehicles, has received a certificate that such vehicle meets the Tier II emission level established in regulations prescribed by the Administrator of the Environmental Protection Agency under section 202(i) of the Clean Air Act (42 U.S.C. 7521(i)) for that make and model year vehicle; and

(3) which is manufactured.

(c) ALTERNATIVE FUEL DEFINED.—In this section, the term ‘‘alternative fuel’’ has the meaning such term has under section 301(2) of the Energy Policy Act of 1992 (42 U.S.C. 13211(2)).
(2) require that the registry be notified of any such transfer within 30 days after the transfer is effected.

(e) FUTURE CONSIDERATIONS.—Any reductions in greenhouse gas emissions that are measured, verified, and recorded under this Act shall be counted toward the mandatory program established under this Act only to the extent that such reductions were not counted prior to the date of enactment of this Act.

SEC. 202. IMPLEMENTING PANEL.

(a) ESTABLISHMENT.—There is established within the Department of Commerce an implementing panel.

(b) COMPOSITION.—The panel shall consist of—

(1) the Secretary of Commerce or the Secretary’s designee, who shall serve as Chairperson;

(2) the Secretary of Transportation or the Secretary’s designee; and

(3) 3 experts in the field of greenhouse gas emissions reduction, certification, and trading, including—

(A) the Department of Energy;

(B) the Environmental Protection Agency;

(C) the Department of Agriculture;

(D) the National Aeronautics and Space Administration;

(E) the Department of Commerce; and

(F) the Department of Transportation.

(c) EXPERTS AND CONSULTANTS.—Any member of the panel may secure the services of experts and consultants in accordance with the provisions of section 30128. Improved crashworthiness standards.

(d) DUTIES.—The panel shall—

(1) establish and operate the implementing program established under this section.

(2) promulgate—

(A) standards for certification of registries and operation of certified registries; and

(B) standards for measurement, verification, and recording of greenhouse gas emissions and greenhouse gas emission reductions.

(3) maintain, and make available to the public, a list of certified registries.

(4) issue rulemakings on standards for measuring, verifying, and recording greenhouse gas emissions and greenhouse gas emission reductions proposed to the panel by certified registries in accordance with a standard process established by the Secretary of Transportation.

(5) process and authorize any dispute arising out of such a determination.

(6) require that the registry be notified of any such transfer within 30 days after the transfer is effected.

(7) establish an appeals process, that may incorporate an arbitration option, for resolving any dispute arising out of such a determination.

(f) CAFE STANDARDS.CREDITS.—The Secretary of Transportation shall, in accordance with section 32903 of title 49, United States Code, for inclusion in the registry, the Secretary shall by rule establish an appeals process, that may incorporate an arbitration option, for resolving any dispute arising out of such a determination.

(g) CERTIFICATION OF REGISTRIES.—The standards promulgated by the panel shall provide for, in the case of certified registries—

(1) ensuring that certified registries accurately measure, verify, and record greenhouse gas emissions and greenhouse gas emission reductions, taking into account—

(A) boundary issues such as leakage and shifting utilization; and

(B) such factors as the panel determines to be appropriate;

(2) ensuring that—

(A) certified registries do not double-count greenhouse gas emissions and greenhouse gas emission reductions; and

(B) if greenhouse gas emission reductions are recorded in more than 1 certified registry, such double-recording is clearly indicated;

(3) determining the ownership of greenhouse gas emission reductions and recording and tracking the transfer of greenhouse gas emission reductions among entities (such as through assignment of serial numbers to greenhouse gas emission reductions);

(4) measuring the results of the use of carbon sequestration and carbon recapture technologies;

(5) measuring greenhouse gas emission reductions resulting from improvements in—

(A) power plants;

(B) automobiles (including types of passenger automobiles and light trucks, as defined in section 32901(a)(16) and (17) respectively, produced in the same model year);

(C) carbon re-capture, storage and sequestration, including organic sequestration and manufactured emissions injection, and storage;

(D) other sources;

(6) measuring prevention greenhouse gas emissions through the rulemaking process and based on the latest scientific data, sampling, expert analysis related to measurement and projections for prevented greenhouse gas emissions in tons including—

(A) organic soil carbon sequestration practices;

(B) forest protection and re-forestation activities which adequately address the issues of permanence, leakage and verification; and

(7) such other measurement, verification, and recording standards as the panel determines to be appropriate.

(h) CERTIFICATION OF REGISTRIES.—Except as provided in subsection (h), a registrant that desires to be a certified registry shall submit to the panel an application that—

(1) demonstrates that the registrant meets each of the certification standards established by the panel under subsections (d) and (e); and

(2) meets such other requirements as the panel may establish.

(i) AUTOMOBILE INDUSTRY.—The Secretary of Transportation shall, in accordance with section 32903 of title 49, United States Code, annually report to the Congress on the status of the program established under this section. The report shall include an assessment of the level of participation in the program and amount of progress being made on emission reductions targets.

SEC. 203. DEFINITIONS.

In this title:

(1) GREENHOUSE GAS.—The term ‘‘greenhouse gas’’ includes—

(A) carbon dioxide;

(B) methane;

(C) hydrofluorocarbons;

(D) perfluorocarbons;

(E) nitrous oxide; and

(F) sulfur hexafluoride.

(2) BASELINE.—The term ‘‘baseline’’ means—

(A) the greenhouse gas emissions, determined on an entity-wide basis for the participant’s most recent previous 3-year average annual average of greenhouse gas emissions prior to the date of enactment of this Act; or

(B) if data is unavailable for that 3-year period, the greenhouse gas emissions of September 30, 2002, or (as close to that date as such emissions levels can reasonably be determined). In promulgating regulations under this Act, the panel shall account greenhouse gas emission reductions or offsetting actions taken by any entity before the date on which the registry is established.

(3) CERTIFIED REGISTRY.—The term ‘‘certified registry’’ means a registry that has been certified by the panel as meeting the standards promulgated under section 202(e) and, for the automobile industry, the Secretary of Transportation.

(4) GREENHOUSE GAS EMISSIONS.—The term ‘‘greenhouse gas emissions’’ means the quantity of greenhouse gases emitted by a source during a period, measured in tons of greenhouse gases.

(5) GREENHOUSE GAS EMISSION REDUCTION.—The term ‘‘greenhouse gas emission reduction’’ means a quantity equal to the difference between—

(A) the greenhouse gas emissions of a source during a period; and

(B) the greenhouse gas emissions of the source during a baseline period of the same duration as determined by the registry and entitled as owning sources.

(6) KYOTO PROTOCOL.—The term ‘‘Kyoto protocol’’ means the Kyoto Protocol to the United Nations Framework Convention on Climate Change (in force as on February 16, 1992).

(7) PANEL.—The term ‘‘panel’’ means the implementing panel established by section 202(a).

(8) REGISTRANT.—The term ‘‘registrant’’ means a private person that operates a database, recording quantities of greenhouse gas emissions and emissions reductions of sources owned by other entities.

(9) SOURCE.—The term ‘‘source’’ means a source of greenhouse gas emissions.

TITILE III—VEHICLE SAFETY

SEC. 301. ROOF CRUSH SAFETY STANDARD.

(a) IMPROVED CRASHWORTHINESS.—Subchapter II of chapter 301 of title 49, United States Code, is amended by adding at the end the following:

‘‘30128. Improved crashworthiness’’.

Within 3 years after the date of enactment of this Act and biennially thereafter, the panel shall report to the Congress on the status of the program established under this section. The report shall include an assessment of the level of participation in the program and amount of progress being made on emission reductions targets.
makes and models of passenger motor vehicles (1) through (3) of subsection (a) to the following: 

SEC. 302. SAFETY RATING LABELS.

Section 23202 of title 49, United States Code, is amended—

(1) by redesignating paragraphs (3) and (4) of subsection (a) as paragraphs (4) and (5), respectively;

(2) by inserting after paragraph (2) of subsection (a) the following:

"(3) overall safety of the driver and passengers of the vehicle in a collision;"; and

(3) by striking subsection (b) and inserting the following:

"(b) MOTOR VEHICLE SAFETY INFORMATION—

"(1) GENERAL.—In carrying out subsection (a), the Secretary shall establish test criteria for use by manufacturers in determining damage susceptibility, crash-worthiness, and the overall safety of vehicles for drivers and passengers.

"(2) PRESENTATION OF DATA.—The Secretary shall prescribe a system for presenting information developed under paragraphs (1) through (3) of subsection (a) to the public in a simple and understandable form that facilitates comparison among the makes and models of passenger vehicle vehicles.

"(3) LABEL REQUIREMENT.—Each manufacturer of a new passenger motor vehicle (as defined in section 23202(a)(8)) manufactured after September 30, 2005, and distributed in commerce for sale in the United States shall cause the information required by paragraph (2) to appear on, or adjacent to, the label required by section 3 of the Automobile Information Disclosure Act (15 U.S.C. 1292(b))."

By Mr. DASCHLE:

S.J. Res. 31. A joint resolution suspending certain provisions of law pursuant to section 258(a)(2) of the Balanced Budget and Emergency Deficit Control Act of 1985; to the Committee on the Budget pursuant to section 258(a)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985, for not to exceed five days of session.

Mr. DASCHLE. Mr. President, I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. Res. 31

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress deems that the conditions specified in section 254(c)(1) of the Balanced Budget and Emergency Deficit Control Act of 1985 are met and the implementation of the Congressional Budget and Impoundment Control Act of 1974, chapter 11 of title 31, United States Code, and part C of the Balanced Budget and Emergency Deficit Control Act of 1985 are modified as described in section 258(b) of the Balanced Budget and Emergency Deficit Control Act of 1985.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 205—URGING THE GOVERNMENT OF UKRAINE TO ENGAGE IN DEMOCRATIC, TRANSPARENT, AND FAIR ELECTION PROCESS LEADING UP TO THE MARCH 31, 2002, PARLIAMENTARY ELECTIONS

Mr. CAMPBELL (for himself, Mr. DODD, and Mr. BROWNSACK) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. Res. 205

Whereas Ukraine stands at a critical point in its development to a fully democratic society, and the parliamentary elections on March 31, 2002, its third parliamentary elections since becoming independent more than 10 years ago, will play a significant role in demonstrating whether Ukraine continues to proceed on the path to democracy or experiences further setbacks in its democratic development;

Whereas the Government of Ukraine can demonstrate its commitment to democracy by conducting a genuinely free and fair parliamentary election process, in which all candidates have access to free outlets in the print, radio, television, and Internet media, and nationally televised debates are held, thus enabling the various political parties and electoral blocs to compete on a level playing field and the voters to acquire objective information about the candidates;

Whereas a flawed election process, which contravenes commitments of the Organization for Security and Cooperation in Europe (OSCE) on democracy and the conduct of elections, could potentially slow Ukraine’s efforts to integrate into Western institutions;

Whereas in recent years, government corruption and harassment of the media have raised concerns about the commitment of the Government of Ukraine to democracy, human rights, and the rule of law, while calling into question the ability of that government to conduct fair elections;

Whereas, since its independence in 1991, has been one of the largest recipients of United States foreign assistance;

Whereas $151 million in financial assistance to Ukraine was provided under Public Law 107-115 (the Kenneth M. Ludden Foreign Operations, Export Financing, and Related Programs Appropriations Act for Fiscal Year 2001), a $16,000,000 reduction in funding from the previous fiscal year due to concerns about the conduct of an election campaign in an ambiguous manner and could lead to arbitrary sanctions against media operating in Ukraine;

Whereas the Ukrainian Parliament (Verkhovna Rada) on December 13, 2001, rejected a draft Law on Political Advertising and Agitation, which would have limited free speech in the campaign period by denying too many discretionary powers to government bodies, and posed a serious threat to the independent media;

Whereas the Department of State has dedicated $1,700,000 in support of monitoring and assistance programs for the 2002 parliamentary elections;

Whereas the process for the 2002 parliamentary elections has reportedly been affected by apparent violations during the period prior to the official start of the election campaign on January 1, 2002, and whereas monthly reports for November and December of 2001 released by the Committee on Voters of Ukraine (CVU), an independent, nongovernment organization that was established in 1994 to monitor the conduct of national election campaigns and balloting in Ukraine, cited five major types of violations of political rights and freedoms during the precampaign phase of the parliamentary elections, including—

(1) use of government position to support particular political groups;

(2) government pressure on the opposition and on the independent media;

(3) free goods and services given in order to sway voters;

(4) coercion to join political parties and pressure to contribute to election campaigns; and

(5) distribution of anonymous and compromising information about political opponents;

Resolved, That the Senate—

(1) acknowledges the strong relationship between the United States and Ukraine since Ukraine’s independence more than 10 years ago, while understanding that Ukraine can only become a full partner in Western institutions when it fully embraces democratic principles;

(2) expresses its support for the efforts of the Ukrainian people to promote democracy, the rule of law, and respect for human rights in Ukraine;

(3) urges the Government of Ukraine to enforce impartially the new election law, including provisions calling for—

(A) the transparency of election procedures;

(B) access for international election observers;

(C) multiparty representation on election commissions;

(D) equal access to the media for all election participants;
Mr. CAMPBELL. Mr. President, as Chairman of the Commission on Security and Cooperation in Europe, I today am introducing a resolution urging the Government of Ukraine to allow election monitors from the OSCE, other participating states of OSCE, and private institutions and organizations, both foreign and domestic, full access to all aspects of the parliamentary election process, including—

(A) access to political events attended by the public during the campaign period;
(B) access to voting and counting procedures at polling stations and electoral commission meetings on election day, including processing of the release election results on a precinct by precinct basis as they become available; and
(C) access to postelection tabulation of results needed to be processed of election challenges and complaints.

Ukraine’s success as an independent, democratic state is vital to the stability and security in Europe, and that country has, over the last decade, enjoyed a strong relationship with the United States. The Helsinki Commission has monitored closely the situation in Ukraine and has a long record of support for the aspirations of the Ukrainian people for human rights and democratic freedoms. Ukraine enjoys goodwill in the Congress and remains one of our largest recipients of assistance in the world. Clearly, there is a genuine desire that Ukraine succeed as an independent, democratic, stable and economically successful state. It is against this backdrop that I introduce this resolution, as a manifestation of our concern about Ukraine’s direction at this juncture. These parliamentary elections will be an important indication of whether Ukraine moves forward rather than backslides on the path to democratic development.

Indeed, there has been growing cause for concern about Ukraine’s direction over the last few years. Last May, I chaired a Helsinki Commission hearing: “Ukraine at the Crossroads: Ten Years After Independence.” Witnesses at that hearing testified about problems confronting Ukraine’s democratic development, including high-level corruption, the controversial conduct of authorities in the investigation of murdered investigative journalist Heorhiy Gongadze and other human rights problems. I had an opportunity to meet Mrs. Gongadze and her daughters who attended that hearing.

While there has been progress over the last few months with respect to legislation designed to strengthen the rule of law, it is too early to assert that Ukraine is once again moving in a positive direction.

With respect to the upcoming elections, on the positive side we have seen the passage of a new elections law which, while not perfect, has made definite improvements in providing safeguards to meet Ukraine’s international commitments. However, there are already concerns about the elections, with increasing reports of violations of political rights and freedoms during the pre-campaign period, many of them documented in reports recently released by the non-partisan, non-governmental OSCE/Partnership for Peace Commission on Voters of Ukraine, CVU.

It is important for Ukraine that there not be a repeat of the 1999 presidential elections which the Organization for Security and Cooperation in Europe (OSCE) stated were marred by violations of the Ukrainian election law and failed to meet a significant number of commitments on the conduct of elections set out in the 1999 OSCE Copenhagen Document. Therefore, this resolution urges the Ukrainian Government to enforce impartially the new election law and to meet its OSCE commitments on democratic elections and to address issues identified by the OSCE report on the 1999 presidential election such as state interference in the campaign and pressure on the media.

The upcoming parliamentary elections clearly present Ukraine with an opportunity to demonstrate its commitment to OSCE principles. The resolution we introduced today is an expression of the importance of these parliamentary elections, which could serve as an important stepping-stone in Ukraine’s efforts to become a fully integrated member of the Europe-Atlantic community of nations.

**TEXT OF AMENDMENTS**

**SA 2826.** Mr. DORGAN (for himself, Mr. GRASSLEY, Mr. HAGEL, Mr. JOHNSON, Mr. LUGAR, Mr. FITZGERALD, Mr. NELSON of Nebraska, Mr. ENSEN, Mr. WELSTONE, Mr. DURBIN, Mr. TORDICHI, Mr. KOHL, and Mr. BROWNBACK) proposed an amendment to amendment SA 2471 submitted by Mr. DACSHLE and intended to be proposed to the bill (S. 1731) supra; which was ordered to lie on the table.

**SA 2827.** Mr. LUGAR proposed an amendment to amendment SA 2471 submitted by Mr. DACSHLE and intended to be proposed to the bill (S. 1731) supra.

**SA 2828.** Mr. HUTCHINSON submitted an amendment intended to be proposed to amendment SA 2471 submitted by Mr. DACSHLE and intended to be proposed to the bill (S. 1731) supra; which was ordered to lie on the table.

**SA 2829.** Mrs. FEINSTEIN submitted an amendment intended to be proposed to amendment SA 2471 submitted by Mr. DACSHLE and intended to be proposed to the bill (S. 1731) supra; which was ordered to lie on the table.

**SA 2830.** Mr. CARNABAN (for herself, Mr. HUTCHINSON, Mr. HARKIN, Mr. LEAHY, and Mr. JOHNSON) proposed an amendment to amendment SA 2471 submitted by Mr. DACSHLE and intended to be proposed to the bill (S. 1731) supra.

**SA 2831.** Mr. GREGG submitted an amendment intended to be proposed to amendment SA 2471 submitted by Mr. DACSHLE and intended to be proposed to the bill (S. 1731) supra; which was ordered to lie on the table.

**SA 2832.** Mr. MILLER (for himself and Mr. CLELAND) submitted an amendment intended to be proposed to amendment SA 2471 submitted by Mr. DACSHLE and intended to be proposed to the bill (S. 1731) supra; which was ordered to lie on the table.

**SA 2833.** Mr. BAUCUS submitted an amendment intended to be proposed to amendment SA 2471 submitted by Mr. DACSHLE and intended to be proposed to the bill (S. 1731) supra; which was ordered to lie on the table.

**SA 2834.** Mr. LEAHY submitted an amendment intended to be proposed to amendment SA 2471 submitted by Mr. DACSHLE and intended to be proposed to the bill (S. 1731) supra; which was ordered to lie on the table.

**SA 2835.** Mr. CRAIOG proposed an amendment to amendment SA 2471 submitted by Mr. DACSHLE and intended to be proposed to the bill (S. 1731) supra.

**SEC. 165. PAYMENT LIMITATIONS; NUTRITION AND COMMODITY PROGRAMS.**

(a) PAYMENT LIMITATIONS.--

**IN GENERAL.**—Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended to read as follows:—

**SEC. 1001. PAYMENT LIMITATIONS.**—

(1) BENEFICIAL INTEREST.—The term ‘beneficial interest’ means an interest in an entity that is at least—

(A) 10 percent; or

(B) a lower percentage, which the Secretary shall establish, on a case-by-case basis, as needed to achieve the purposes of this section and sections 1001A through 1001F, including effective implementation of section 1001A(b).
"(2) Counter-cyclical Payment.—The term ‘counter-cyclical payment’ means a payment made under section 114 or 158D of the Federal Agriculture Improvement and Reform Act of 1996.

"(3) Direct Payment.—The term ‘direct payment’ means a payment made under section 113 or 158C of the Federal Agriculture Improvement and Reform Act of 1996.

"(4) Entity.—

"(A) IN GENERAL.—The term ‘entity’ means

(i) an entity that (subject to the requirements of this section and section 1001A) is eligible to receive a payment under subsection (b) or (c);

(ii) a corporation, joint stock company, association, limited partnership, charitable organization, a grantor of a revocable trust, or other similar entity (as determined by the Secretary); and

(iii) an entity that is participating in a farming operation as a partner in a general partnership or as a participant in a joint venture.

"(B) Exclusion.—Except in section 1001F, the term ‘entity’ does not include an entity that is a general partnership or joint venture.

"(5) Individual.—The term ‘individual’ means

(A) a natural person, and minor children of the natural person (as determined by the Secretary), that (subject to the requirements of this section and section 1001A) is eligible to receive a payment under subsection (b) or (c); and

(B) an individual participating in a farming operation as a partner in a general partnership or as a participant in a joint venture, a grantor of a revocable trust, or a participant in a similar entity (as determined by the Secretary).

"(6) Loan Commodity.—The term ‘loan commodity’ has the meaning given the term in section 102 of the Federal Agriculture Improvement and Reform Act of 1996.

"(7) Secretary.—The term ‘Secretary’ means the Secretary of Agriculture.

"(8) Limitations on Direct and Counter-Cyclical Payments.—Subject to subsections (d) through (i), the total amount of direct payments and counter-cyclical payments that an individual or entity may receive, directly or indirectly, in any fiscal year shall not exceed $85,000.

"(9) Limitations on Marketing Loan Gains, Marketing Payments, and Commodity Certificate Transactions.—

"(A) IN GENERAL.—Subject to subsections (d) through (i), the total amount of the payments and benefits described in paragraph (2) that an individual or entity may receive, directly or indirectly, in any crop year shall not exceed $125,000.

"(B) Payments and Benefits.—Paragraph (1) shall apply to the following payments and benefits:

(A) MARKETING LOAN GAINS.—

(i) Any gain realized by a producer from repaying a marketing assistance loan under section 131 or 158G(a) of the Federal Agriculture Improvement and Reform Act of 1996 for a crop of any loan commodity or peanuts, respectively, at a lower level than the original loan rate established for the loan commodity or peanuts under section 132 or 158G(d) of that Act, respectively.

(ii) FORFEITURE GAINS.—In the case of settlement of a marketing assistance loan under section 131 or 158G(a) of that Act, any loan that had been settled by repayment instead of forfeiture.

(B) LOAN DEFICIENCY PAYMENTS.—Any loan deficiency payment received for a loan commodity or peanuts under section 135 or 158G(e) of that Act, respectively.

(C) COMMODITY CERTIFICATES.—Any gain realized from the use of a commodity certificate issued by the Commodity Credit Corporation, as determined by the Secretary, including the use of a commodity certificate for the settlement of a marketing assistance loan made under section 131 or 158G(a) of that Act.

(D) SETTLEMENT OF CERTAIN LOANS.—Notwithstanding the establishment of section 158G of the Federal Agriculture Improvement and Reform Act of 1996, if the amount of payment described in subsection (c)(2) attributed directly or indirectly to an individual or entity for a crop year reaches the limitation described in subsection (c)(1),

(i) the portion of any unsettled marketing assistance loan made under section 131 or 158G(a) of that Act attributed directly or indirectly to the individual or entity shall be settled through the repayment of the total loan principal, plus applicable interest; and

(ii) the Secretary may refuse to provide to the producer for the crop year any additional marketing assistance loans under section 131 or 158G(a) of that Act.

(E) PAYMENTS TO INDIVIDUALS AND ENTITIES.—

"(1) INTERESTS WITHIN THE SAME ENTITY.—

All individuals or entities that are owners of a beneficial interest in the entity for a fiscal or corresponding crop year, the total amount of payments and benefits described in subsections (b) and (c) may receive directly or indirectly may not exceed $50,000.

"(2) ALL INTERESTS OF AN INDIVIDUAL OR ENTITY.—

All interests of an individual or entity may not receive, directly or indirectly, through all ownership interests of the individual or entity from all sources, payments for a fiscal or corresponding crop year that exceed the limitations established under subsections (b) and (c).

(F) MARRIED COUPLES.—During a fiscal and corresponding crop year, the total amount of payments and benefits described in subsections (b) and (c) that a married couple may receive directly or indirectly may not exceed—

"(1) the limits described in subsections (b) and (c); plus

"(2) if each spouse meets the other requirements established under this section and section 1001A, a combined total of an additional $50,000.

"(G) PUBLIC SCHOOLS.—The provisions of this section that limit payments to any individual or entity shall not be applicable to land owned by a public school district or land owned by a State that is used to maintain a public school.

"(H) TIME LIMITS.—The Secretary shall promulgate regulations that establish time limits for the various steps involved with notice, hearing, decision, and the appeals procedure in order to ensure expeditious handling and settlement of payment limitation disputes.

"(I) GOOD FAITH RELIANCE.—Notwithstanding any other provision of law, an action taken by an individual or other entity in good faith on action or advice of an authorized representative of the Secretary may be accepted as meeting the requirements of this section, to the extent that the Secretary determines it is desirable in order to provide fair and equitable treatment.

(2) SUBSTANTIVE CHANGE.—Section 1001A(a) of the Food Security Act of 1985 (7 U.S.C. 1988-1(a)) is amended—

(A) in the section heading, by striking ‘‘PREVENTION OF CREATION OF ENTITIES TO QUALIFY AS SEPARATE PERSONS’’ and inserting ‘‘SUBSTANTIVE CHANGE’’; and

(B) by striking a semicolon and all that follows through the end of paragraph (2) and inserting the following:

‘‘(a) SUBSTANTIVE CHANGE.—

‘‘(1) IN GENERAL.—The Secretary may not approve, for purposes of determining the clarification of the limitations under this section) any change in a farming operation that other- wise will increase the number of individuals or entities to which the limitations under this section are applied unless the Secretary determines that the change is bona fide and substantive.

‘‘(2) FAMILY MEMBERS.—For the purpose of paragraph (1), the addition of a family mem-

ber to a farming operation under the criteria established under subsection (b)(3)(B) shall be considered a bona fide and substantive change in the farming operation.’’;

(C) in the first sentence of paragraph (3)—

(i) by striking ‘‘as a separate person’’; and

(ii) by inserting ‘‘as determined by the Secretary’’ before the period at the end; and

(D) by striking paragraph (4).

(3) ACTIVELY ENGAGED IN FARMING.—Sec-

tion 1001(b) of the Food Security Act of 1985 (7 U.S.C. 1308-1(b)) is amended—

(A) by striking paragraph (1) and inserting the following:

‘‘(1) IN GENERAL.—To be eligible to receive, directly or indirectly, payments or benefits (as described in subsections (b) and (c) of section 1001 as being subject to limitation) with respect to a particular farming operation an individual or entity shall be actively engaged in farming with respect to the operation, as provided under paragraphs (2), (3), and (4).’’;

(B) in paragraph (2)—

(i) in subparagraph (A), by striking subclauses (II) and inserting the following:

‘‘(II) personal labor and active personal management (in accordance with subparagraph (F));’’;

(ii) by striking subparagraph (B) and insert-

ing the following:

‘‘(B) ENTITIES.—An entity (as defined in section 1001(a)) shall be considered as ac-

tively engaged in farming with respect to a farming operation if—

‘‘(i) the entity separately makes a signifi-

cant contribution (based on the total value of the farming operation) of capital, equip-

ment, or land;

‘‘(ii) the stockholders or members that collect-

ively own at least 10 percent of the beneficial interest in the entity make a significant contribution of personal labor or active personal management to the operation; or

‘‘(iii) in the case of a corporation or entity in which all of the beneficial interests are held by family members (as defined in paragraph (3)(B))—

(aa) any stockholder (or household com-

pried of a stockholder and the spouse of the stockholder) who owns at least 10 percent of the beneficial interest and makes a signifi-

cant contribution of personal labor or active personal management; or

(bb) any combination of stockholders who collect-

ively own at least 10 percent of the beneficial interest and makes a significant

contribution of personal labor or active personal management; and

‘‘(iii) the standards provided in clauses (ii) and (bb) of subparagraph (A), as applied to the entity, are met by the entity.’’; and

(iii) by adding at the end the following:

‘‘(E) ACTIVELY PERSONAL MANAGEMENT.—For an individual to be considered as pro-

viding active personal management under this paragraph on behalf of the individual or
entity, the management provided by the individual shall be personally provided on a regular, substantial, and continuous basis through the direction supervision and direction of:

(i) activities and labor involved in the farming operation; and
(ii) on-site services that are directly related and necessary to the farming operation.

(F) Significant Contribution of Personal Labor or Active Personal Management.

(i) In general.—For an individual to be considered to be providing a significant contribution of personal labor or active personal management under this paragraph on behalf of the individual or entity, the total contribution of personal labor and active personal management shall be at least equal to the lesser of—

(1) 1,000 hours annually; or
(2) 50 percent of the commensurate share of the total number of hours of personal labor and active personal management required to conduct the farming operation.

(ii) Minimum Number of Labor Hours.—For the purpose of clause (i), the minimum number of labor hours required to produce each commodity shall be equal to the number of hours that would be necessary to conduct a regular, substantial, and continuous farming operation for the production of each commodity that is comparable in size to an individual or entity’s commensurate farming operation for the production of the commodity, based on the minimum number of hours per acre required to produce the commodity in the State where the farming operation is located, as determined by the Secretary.

(C) in paragraph (3)—

(i) by striking subparagraph (A) and inserting—

(‘‘(A) LANDOWNERS.—An individual or entity that is a landowner contributing the owned land and that meets the standard provided in clauses (ii) and (iii) of paragraph (2)(A), if—

(I) the landowner shares the land;

(ii) the tenant is actively engaged in farming; and

(iii) the share received by the landowner is commensurate with the share of the crop or income received as rent; or

(iv) the landowner makes a significant contribution of personal labor or active personal management on the land for which payments are received and ceased to make the contribution as a result of a disability, as determined by the Secretary; or

(II) the owner or spouse of the landowner formerly made a significant contribution of personal labor or active personal management on the land for which payments are received and ceased to make the contribution as a result of a disability, as determined by the Secretary; or

(B) IN GENERAL.—During each of fiscal years 2002 through 2006, the Office of Inspector General for the Department of Agriculture shall conduct a review of the administration of the requirements of this section and sections 1001, 1001B, 1001C, and 1001E in at least 6 States.

(ii) Minimum Number of Counties.—Each State review described in subparagraph (A) shall cover at least 5 counties in the State.

(C) Report.—Not later than 90 days after completing a review described in subparagraph (A), the Inspector General for the Department of Agriculture shall issue a final report to the Secretary of the findings of the Inspector General.

(2) EFFECT OF REPORT.—If a report issued under paragraph (1) reveals that significant problems exist with the administration of the payment limitation requirements of this section and sections 1001, 1001B, 1001C, and 1001E in a State and the Secretary agrees that the problems exist, the Secretary shall—

(A) initiate a training program regarding the payment limitation requirements; and

(B) require that all payment limitation determinations regarding farming operations in the State be issued from the headquarters of the Farm Service Agency.

(iii) Minimum Amount of Payment.—Section 1001B of the Food Security Act of 1985 (7 U.S.C. 1308-2) is amended—

(A) by striking “person” each place it appears and inserting “individual or entity”;

(B) by striking paragraphs (1) and (2) and inserting—

(1) REPORT TO CONGRESS.—No later than 180 days after the date of enactment of this Act, the Secretary of Agriculture shall conduct a review of the administration of the requirements of section 1001B of the Food Security Act of 1985 (7 U.S.C. 1308-3) and report to Congress on the findings of the review.

(2) EFFECT OF REPORT.—If a report issued under paragraph (1) reveals that significant problems exist with the administration of the payment limitation requirements of section 1001B of the Food Security Act of 1985 (7 U.S.C. 1308-3), the Secretary of Agriculture shall provide a report to the Committee on Agriculture, Nutrition, and Forestry of the Senate that describes—

(A) how State and county office employees are trained regarding the payment limitation requirements of section 1001B of the Food Security Act of 1985 (7 U.S.C. 1308-3) and the procedures used by State and county office employees to identify potential violations of the payment limitation requirements;

(B) the general procedures used by State and county office employees to identify potential violations of the payment limitation requirements;

(C) the requirements for State and county office employees to report serious violations of the payment limitation requirements, including violations of section 1001B of that Act to the county committee, higher level officials of the Farm Service Agency, and to the Office of the Inspector General; and

(D) the sanctions imposed against State and county office employees who fail to report or investigate potential violations of the payment limitation requirements.

(b) Adjusted Gross Income Limitation.—The Food Security Act of 1985 is amended by inserting after section 1001E (7 U.S.C. 1308-5) the following:

SEC. 1001F. ADJUSTED GROSS INCOME LIMITATION.

(a) DEFINITIONS.—In this section—

(1) ADJUSTED GROSS INCOME.—The term ‘‘adjusted gross income’’ means adjusted gross income of an individual or entity.

(2) AS DEFINED.—As defined in section 62 of the Internal Revenue Code of 1986 and implemented in accordance with procedures established by the Secretary.

(b) Basing Earned Income Directly or Indirectly from Agricultural and Nonagricultural Sources.—In the case of an individual or entity that does not have adjusted gross income for each of the 3 preceding taxable years, the Secretary shall establish rules that provide the individual or entity with an effective adjustment for the applicable year.

(c) CERTIFICATION.—To comply with the limited gross income under subsection (b), an individual or entity shall provide to the Secretary—

(1) a certification by a certified public accountant or another third party that is acceptable to the Secretary that the average adjusted gross income of the individual or entity does not exceed $2,500,000; or

(2) information and documentation regarding the adjusted gross income of the individual or entity through other procedures established by the Secretary.

(3) COMMENSURATE REDUCTION.—In the case of a payment or benefit made in a fiscal year or corresponding crop year to an entity that has an average adjusted gross income of $2,500,000 or less, the payment shall be reduced by an amount that is commensurate with the direct and indirect ownership interests in the entity or entity of the individual or entity who has an average adjusted gross income in excess of $2,500,000 for that fiscal year or corresponding crop year.

(d) General Partnerships and Joint Ventures.—For purposes of this section, a joint partnership or joint venture shall be considered an entity.

(c) Food Stamp Program.—(1) Increase in Benefits to Households with Children.—Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by striking paragraph (1) and inserting the following:

1 STANDARD DEDUCTION.—

(A) IN GENERAL.—Subject to the other provisions of this paragraph, the Secretary shall allow for each household a standard deduction that is equal to the greater of—

(i) the applicable percentage specified in subparagraph (D) of the applicable income standard of eligibility established under subsection (c)(1); and

(ii) the minimum deduction specified in subparagraph (E).

(B) Guam.—The Secretary shall allow for each household in Guam a standard deduction that is—

(i) equal to the applicable percentage specified in subparagraph (D) of twice the income standard of eligibility established under subsection (c)(1) for the 48 contiguous States and the District of Columbia;
“(ii) not less than the minimum deduction for Guam specified in subparagraph (E).

(C) HOUSEHOLDS OF 6 OR MORE MEMBERS.—The income standard of eligibility established under subsection (vi) for a household of 6 members shall be used to calculate the standard deduction for each household of 6 or more members.

(D) NON-FARMABLE PERCENTAGE.—For the purpose of subparagraph (A), the applicable percentage shall be—

(1) 8 percent for each of fiscal years 2002 through 2006;

(2) 8.25 percent for each of fiscal years 2005 and 2006;

(3) 8.5 percent for each of fiscal years 2007 and 2008; and

(4) 8.75 percent for fiscal year 2009; and

(v) 9 percent for each of fiscal years 2010 and 2011.

(E) MINIMUM DEDUCTION.—The minimum deduction shall be $134, $229, $189, $269, and $118 for the 48 contiguous States and the District of Columbia, Alaska, Hawaii, Guam, and the Virgin Islands of the United States, respectively.

(2) EXCESS SHELTER EXPENSE DEDUCTION.—

(A) IN GENERAL.—Section 2(7)(B) of the Food Stamp Act of 1977 (7 U.S.C. 2025(h)(3)) is amended by striking—

(1) by redesignating subparagraph (A) as subparagraph (B); and

(2) by inserting the following:

“(vi) for fiscal year 2002, $354, $566, $416, and $279 per month, respectively;

(vii) for fiscal year 2002, $396, $524, $556, $458, and $307 per month, respectively; and

(viii) for fiscal years 2004 and each fiscal year thereafter, the applicable amount for the preceding fiscal year, as adjusted to reflect changes for the 12-month period ending the preceding November 30 in the Consumer Price Index for All Urban Consumers published by the Bureau of Labor Statistics of the Department of Labor.”.

(B) PROSPECTIVE AMENDMENTS.—Effective October 1, 2009, section 5(e)(7)(B) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)(7)(B)) is amended—

(i) in clause (v), by striking “and” at the end; and

(ii) by striking clause (vi) and inserting the following:

“(vi) for fiscal year 2012, $458, $729, $604, $458, and $307 per month, respectively; and

(vii) for fiscal years 2013 and each fiscal year thereafter, the applicable amount for the preceding fiscal year, as adjusted to reflect changes for the 12-month period ending the preceding November 30 in the Consumer Price Index for All Urban Consumers published by the Bureau of Labor Statistics of the Department of Labor.”.

(3) PARTICIPANT EXPENSES.—Section 6(b)(4)(A)(ii)(I) of the Food Stamp Act of 1977 (7 U.S.C. 2025(h)(3)) is amended by striking “, except that the State agency may limit such reimbursement to each participant to $25 per month”.

(4) BURAL REIMBURSEMENT.—Section 16(b)(3) of the Food Stamp Act of 1977 (7 U.S.C. 2025(h)(3)) is amended by striking “such total amount shall not exceed an amount representing $25 per participant per month for costs of transportation and other actual costs (other than dependent care costs) and” and inserting “the amount of the reimbursement for dependent care expenses shall not exceed”.

(5) EFFECTIVENESS OF CERTAIN PROVISIONS.—Section 413 and subsections (c) and (d) of section 433, and the amendments made by sections 413 and subsections (c) and (d) of section 433, shall have no effect.

(d) LOAN DEFICIENCY PAYMENTS.—

(1) ELIGIBILITY.—Section 136 of the Federal Agriculture Improvement and Reform Act of 1996 (7 U.S.C. 7235) (as amended by section ) is amended by striking subsection (a) and inserting the following:

“(a) In general.—The Secretary may make loan deficiency payments available to—

(1) producers on a farm that, although eligible for a marketing assistance loan under section 131 with respect to a loan commodity, agree to forgo obtaining the loan for the covered commodity in return for payments under this section; and

(2) effective only for the 2000 and 2001 crop years, producers that, although eligible to obtain such a marketing assistance loan under section 131, produce a loan commodity.”.

(2) BENEFICIAL INTEREST.—Section 135(e)(1) of the Federal Agriculture Improvement and Reform Act of 1996 (7 U.S.C. 7235(e)(1)) is amended by striking “$275,000,000 shall be for farm ownership loans under subsection (a);” and inserting “$255,000,000 shall be for farm ownership loans under subsection (a);”.

(3) REPORTS.—

“(C) by deducting the cost or basis of livestock, timber, and the Virgin Islands of the United States, Federal Dispensary of Puerto Rico, the District of Columbia, Alaska, Hawaii, Guam, and the Virgin Islands of the United States, respectively.

(2) EXCESS SHELTER EXPENSE DEDUCTION.—/
SEC. 112. EQUITY PAYMENTS TO AGRICULTURAL PRODUCERS.

(a) In General.—Each producer of an agricultural commodity (as determined by the Secretary) shall receive an amount that equals $7,000 for each of the 2003 through 2006 crops or, in the case of milk, the 2003 through 2006 calendar years.

(b) Additional Payments.—Equity payments described in paragraph (a) under this section shall be in addition to any price support loan, marketing loan gain, or loan deficiency payment that the producer receives for the applicable taxable year.

(c) Ineligible Entities.—An entity shall be ineligible to receive an equity payment under this section if the entity is—

(1) an agency of the Federal Government, a State, or a political subdivision of a State;

(2) an issuer of any type of security on a national securities exchange (as those terms are defined in section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c)); or

(3) another entity, as determined by the Secretary.

(d) Verification.—The Secretary shall determine which individuals or entities are eligible for an equity payment under this section by using social security numbers or taxpayer identification numbers.

(e) Payment Limitation.—(1) In General.—Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended by striking paragraph (1) and inserting the following:

"(1) Equity Payments.—"(A) In General.—"An individual or entity (as defined in the Equity in Farming Act) may not receive directly or indirectly more than $7,000 in equity payments under that Act.

(B) Administration.—Sections 1001A(b), 1001B, and 1001C shall apply to an individual or entity that receives a payment described in subparagraph (A).

(2) Conforming Amendments.—(A) Section 1002 of the Food Security Act of 1985 (7 U.S.C. 1308b) is amended by striking paragraph (4) and inserting the following:

"(4) Payments to Individuals and Entities.—"

"(A) Interests within the Same Entity.—All individuals or entities that are owners of an entity, including shareholders, may not receive directly or indirectly through all sources, payments for a fiscal or corresponding crop year that exceed the limitation established under paragraph (1)."

"(B) All Interests of an Individual or Entity.—An individual or entity may not receive, directly or indirectly, through all ownership interests of the individual or entity from all sources, payments for a fiscal or corresponding crop year that exceed the limitations established under paragraph (1)."

"(C) Eligible Production.—The producers on a farm shall be eligible for a marketing assistance loan under subsection (a) for any quantity of a loan commodity produced on the farm.

(2) Availability of Nonrecourse Marketing Assistance Loans.—Section 131 of the Agricultural Market Transition Act (7 U.S.C. 7251) is amended by striking "2002" and inserting "2005"; and

(3) Loan Rates for Marketing Assistance Loans.—Section 132 of the Agricultural Market Transition Act (7 U.S.C. 7252) is amended to read as follows:

"SEC. 132. LOAN RATES FOR MARKETING ASSISTANCE LOANS.

(a) Wheat.—The loan rate for a marketing assistance loan under section 131 for wheat shall be 90 percent for the 2003 crop,
percent for the 2004 crop, and 80 percent for the 2005 crop, of the simple average price received by producers of sunflower seed, individually, as determined by the Secretary, during the marketing years for the immediately preceding 5 crops of sunflower seed, individually, excluding the year in which the average price was the highest and the year in which the average price was the lowest in the period.

(‘‘b) FEED GRAINS.—
(1) CORN.—The loan rate for a marketing assistance loan under section 131 for corn shall be 90 percent for the 2003 crop, 85 percent for the 2004 crop, and 80 percent for the 2005 crop, of the simple average price received by producers of corn, as determined by the Secretary, during the marketing years for the immediately preceding 5 crops of corn, excluding the year in which the average price was the highest and the year in which the average price was the lowest in the period.

(2) OTHER OILSEEDS.—The loan rates for a marketing assistance loan under section 131 for other oilseeds determined by the Secretary at such level as the Secretary determines is fair and reasonable in relation to the loan rate available for soybeans, except in no event shall the rate established for oilseeds be less than the rate established for soybeans on a per-pound basis for the same crop.

(d) RECOUPMENT LOAN PROGRAM FOR SILAGE.—Section 403 of the Food Security Act of 1985 (7 U.S.C. 1444–1) is repealed.

(2) PEANUT QUOTA.—Section 155 of the Agricultural Market Transition Act (7 U.S.C. 7271) is amended—
(1) in subsection (g), by striking ‘‘2002’’ each place it appears and inserting ‘‘2005’’; and
(2) by striking subsections (h) and (i) and inserting the following:

3) PHASED REDUCTION OF LOAN RATE.
For each of the 2003, 2004, and 2005 crops of quota and additional peanuts, the Secretary shall lower the loan rate for each succeeding crop in a manner that progressively and uniformly lowers the loan rate for quota and additional peanuts to $0 for the 2006 crop.

(c) CROPS.—This section shall be effective only for the 1996 through 2006 crops.

(f) SUGAR PROGRAM.—Section 156 of the Agricultural Market Transition Act (7 U.S.C. 7272) is amended—
(1) in subsection (g), by striking paragraph (1) and inserting the following:

1) LOANS.—The Secretary shall carry out this section through the use of recourse loans:

2) in subsection (f), by striking ‘‘2003’’ each place it appears and inserting ‘‘2005’’; and
(3) by redesignating subsection (1) as subsection (j); and
(4) by inserting after subsection (h) the following:

2) PHASED INCREASE IN QUOTA.
For each of the 2003, 2004, and 2005 crops of quota peanuts, the Secretary shall increase the marketing quota and allotment for each succeeding marketing year in a manner that progressively and uniformly increases the marketing quota to anticipate the elimination of the marketing quota for the 2006 crop.

SEC. 124. COMMODITY CREDIT CORPORATION CHARTER ACT.
(a) IN GENERAL.—Section 5 of the Commodity Credit Corporation Charter Act (15 U.S.C. 1413) is amended—
(1) by striking subsection (a); and
(2) by redesignating subsections (b) through (g) as subsections (a) through (f), respectively;

(b) CONFORMING AMENDMENT.—Section 619 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1738r) is amended by striking 5(c) of the Commodity Credit Corporation Charter Act and inserting ‘‘section 5(e) of the Commodity Credit Corporation Charter Act (15 U.S.C. 1413(e))’’.

(c) CROPS.—The amendments made by this section apply beginning with the 2006 crop.
SEC. 360. REALLOCATING SUGAR QUOTA IMPORT SHORTFALLS.

(a) IN GENERAL.—Notwithstanding any other provision of law, not later than June 1 of each year, the United States Trade Representative, in consultation with the Secretary, shall determine the amount of the quota of cane sugar used by each qualified supplying country for that fiscal year, and shall reallocate the unused quota for that fiscal year among qualified supplying countries on a first come basis.

(b) METHOD FOR ALLOCATING QUOTA.—In establishing the tariff-rate quota for a fiscal year, the Secretary shall consider the amount of the preceding year’s quota that was not used and shall increase the tariff-rate quota allowed by an amount equal to the amount not used in the preceding year.

(c) QUALIFIED SUPPLYING COUNTRY.—The term ‘qualified supplying country’ means one of the following 40 foreign countries that is allowed to export cane sugar to the United States under an agreement or any other country with which the United States has an agreement relating to the importation of cane sugar:

- Argentina
- Australia
- Barbados
- Belize
- Bolivia
- Brazil
- Colombia
- Congo
- Costa Rica
- Dominican Republic
- Ecuador
- El Salvador
- Fiji
- Gabon

(2) CANE SUGAR.—The term ‘cane sugar’ has the same meaning as the term has under part VII.

SA 2831. Mr. GREGG submitted an amendment intended to be proposed to amendment SA 2471 submitted by Mr. DASCHLE and intended to be proposed to the bill (S. 1731) to strengthen the safety net for agricultural producers, to enhance resource conservation and rural development, to provide for farm credit, agricultural research, nutrition, and related programs, to ensure consumers abundant food and fiber, and for other purposes; which was ordered to lie on the table; as follows:

On page 128, line 8, strike the period at the end and insert a period and the following:

“SEC. 1. TERMINATION OF TOBACCO PRICE SUPPORT PROGRAM.

(a) PART 1. PRICE SUPPORT.—Section 101 of the Agricultural Act of 1949 (7 U.S.C. 1411) is amended—

(1) in the first sentence of subsection (a), by striking ‘‘tobacco (except as otherwise provided herein), corn,’’ and inserting ‘‘tobacco;’’

(2) by striking subsections (c), (g), (h), and (i); and

(3) in subsection (d)(3)—

(A) by striking ‘‘, except tobacco,’’; and

(B) by striking ‘‘and no price support shall be made available for any crop of tobacco for which marketing quotas have been disapproved by producers;’’ and

(4) by redesignating subsections (d) and (e) as subsections (e) and (d), respectively.

(b) TERMINATION OF TOBACCO PRICE SUPPORT AND NO NET COST PROVISIONS.—Sections 106, 106A, and 106B of the Agricultural Act of 1949 (7 U.S.C. 1445–1, 1445–2) are repealed.

(c) DEFINITION OF BASIC AGRICULTURAL COMMODITY.—Section 408(c) of the Agricultural Act of 1949 (7 U.S.C. 1428(c)) is amended by striking ‘‘tobacco.’’

(d) REVIEW OF BURLINGTON TOBACCO IMPORTS.—Section 3 of Public Law 96–59 (7 U.S.C. 625) is repealed.

(e) POWERS OF COMMODITY CREDIT CORPORATION.—Section 5 of the poration Charter Act (12 U.S.C. 714) is amended by inserting ‘‘other than tobacco’’ after ‘‘agricultural commodities’’ each place it appears.

(f) TRANSITION PROVISIONS.—

(1) LIABILITY.—The amendments made by this section shall not affect the liability of any person under any provision of law as in effect before the effective date of this section.

(2) TOBACCO STOCKS AND LOANS.—The Secretary shall issue regulations that require—

(A) the orderly disposition of tobacco stocks; and

(B) the repayment of all tobacco price support loans by not later than 1 year after the effective date of this section.

(3) CROPS.—This section and the amendments made by this section shall apply with respect to the 2002 and subsequent crops of the kind of tobacco involved.

SEC. 1. TERMINATION OF TOBACCO PRODUCTION ADJUSTMENT PROGRAMS.

(a) DECLARATION OF POLICY.—Section 2 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1282) is amended by striking ‘‘tobacco.’’

(b) DEFINITIONS.—Section 301(b) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1301(b)) is amended—

(1) in paragraph (3)—

(A) by striking subparagraph (C); and

(B) by redesignating subparagraph (D) as subparagraph (C);

(2) in paragraph (6)(A), by striking ‘‘tobacco;’’

(3) in paragraph (7), by striking the following:

‘‘tobacco (flue-cured), July 1—June 30; ‘‘tobacco (other than flue-cured), October 1—September 30.’’

(4) in paragraph (10)—

(A) by striking subparagraph (B); and

(B) by redesignating subparagraph (C) as subparagraph (B);

(5) in paragraph (11)(B), by striking ‘‘and tobacco;’’
(n) **ADVANCE RECIPE LOANS.**—Section 13(a)(2)(B) of the Food Security Improvement Act of 1986 (7 U.S.C. 1333a-1(a)(2)(B)) is amended by striking “tobacco and
(o) **TOBACCO FIELD MEASUREMENT.**—Section 1112 of the Omnibus Budget Reconciliation Act of 1987 (Public Law 100-203) is amended by striking subsection (c).
(p) **LIQUIDATION CROPS.**—In the amendments made by this section shall not affect the liability of any person under any provision of law as in effect before the effective date under subsection (q).
(q) **CROPS.**—This section and the amendments made by this section shall apply with respect to any of the following crops of the kind of tobacco involved:

SECTION 1. **PROHIBITION OF FEDERAL INSURANCE, REINSURANCE, OR NON-INSURANCE ASSISTANCE FOR TOBACCO.**

(a) **CROP INSURANCE.**—

(1) **DEFINITION OF AGRICULTURAL COMMODITY.**—Section 518 of the Federal Crop Insurance Act (7 U.S.C. 1518) is amended—

(A) by striking the section heading and all that follows through “as used in this title, means” and inserting the following:

“SEC. 518. DEFINITION OF AGRICULTURAL COMMODITY. (a) **DEFINITION.**—In this title, the term ‘agricultural commodity’ means:

(B) by adding at the end the following:

“(b) **NONINSURED CROP DISASTER ASSISTANCE PROGRAM.**—In the same manner as provided in section 815 of the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2001 (Public Law 106-387; 114 Stat. 1354A-51), the-Secretary may make emergency financial assistance available under this section to cover losses to a crop of tobacco, except that the quantity and economic losses as were covered by the Federal Crop Insurance Act of 1980 (7 U.S.C. 1502) during the 2000 crop year; or

SEC. 4. **MARKET LOSS ASSISTANCE FOR APPLE PRODUCERS.**

(a) **IN GENERAL.**—The Secretary of Agriculture shall use $100,000,000 of funds from the Commodity Credit Corporation to provide payments for market losses to apple producers for 2001 losses in a county that has received an emergency designation by the Secretary on or before December 31, 2001, of which $12,000,000 shall be available for the American Indian livestock program under section 806 of the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2001 (Public Law 106-387; 114 Stat. 1354A-51).

(b) **ADMINISTRATION.**—The Secretary shall make assistance available under this section in the manner used in administering the Commodity Credit Corporation, or a contract of insurance made by the Corporation, or a contract of insurance made by the Corporation, in accordance with the same provisions relating to the quantity and economic losses as were available under the Federal Crop Insurance Act of 1980 (7 U.S.C. 1502) during the 2000 crop year; or

SEC. 5. **MARKET LOSS ASSISTANCE FOR ALFALFA PRODUCERS.**

(a) **IN GENERAL.**—The Secretary of Agriculture shall use $400,000,000 of funds from the Commodity Credit Corporation to provide payments for market losses to alfalfa producers for 2001 losses in a county that has received an emergency designation by the Secretary on or before December 31, 2001, of which $12,000,000 shall be available for the American Indian livestock program under section 806 of the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2001 (Public Law 106-387; 114 Stat. 1354A-51).

(b) **ADMINISTRATION.**—The Secretary shall make assistance available under this section in the manner used in administering the Commodity Credit Corporation, or a contract of insurance made by the Corporation, or a contract of insurance made by the Corporation, in accordance with the same provisions relating to the quantity and economic losses as were available under the Federal Crop Insurance Act of 1980 (7 U.S.C. 1502) during the 2000 crop year; or

SEC. 6. **MARKET LOSS ASSISTANCE FOR DRIED CvALENTS.**

(a) **IN GENERAL.**—The Secretary of Agriculture shall use $300,000,000 of funds from the Commodity Credit Corporation to provide payments for market losses to dried beet producers for 2001 losses in a county that has received an emergency designation by the Secretary on or before December 31, 2001, of which $12,000,000 shall be available for the American Indian livestock program under section 806 of the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2001 (Public Law 106-387; 114 Stat. 1354A-51).
SEC. 04. COMMODITY CREDIT CORPORATION.

The Secretary shall use the funds, facilities, and authorities of the Commodity Credit Corporation to carry out this subtitle.

SEC. 05. COMMODITY PROMOTION AND EDUCATION EXPENSES.

(a) IN GENERAL.—In addition to funds otherwise available, not later than 30 days after the date of enactment of this Act, out of any funds not otherwise appropriated, the Secretary of the Treasury shall transfer to the Secretary of Agriculture to pay the salaries and expenses of the Department of Agriculture in carrying out this subtitle $50,000,000, to remain available until expended.

(b) PROCEDURE.—The Secretary shall be entitled to receive, shall accept, and shall use to carry out this section the funds transferred under subsection (a), without further appropriation.

SEC. 06. REGULATIONS.

(a) IN GENERAL.—The Secretary may promulgate such regulations as are necessary to implement this subtitle.

(b) PROCEDURE.—The promulgation of the regulations and administration of this subtitle shall be made without regard to—

(1) the notice and comment provisions of section 553 of title 5, United States Code;

(2) the Statement of Policy of the Secretary of Agriculture effective July 24, 1971 (36 Fed. Reg. 13604), relating to notices of proposed rulemaking and public participation in rulemaking; and

(3) chapter 35 of title 44, United States Code (commonly known as the “Paperwork Reduction Act”).

(c) CONGRESSIONAL REVIEW OF AGENCY RULEMAKING.—In carrying out this section, the Secretary shall use the authority provided under section 808 of title 5, United States Code.

SEC. 07. EMERGENCY REQUIREMENT.

The entire amount necessary to carry out this subtitle is designated by Congress as an emergency requirement pursuant to section 252(e) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901(e)).

SA 2834. Mr. LEAHY submitted an amendment intended to be proposed to amendment SA 2471 submitted by Mr. DASCHLE and intended to be proposed to the order of the Senate that 1) to strengthen the safety net for agricultural producers, to enhance resource conservation and rural development, to provide for farm credit, agricultural research, nutrition, and related programs, to ensure consumer food and fiber, and for other purposes; which was ordered to lie on the table; as follows:

On page 965, strike line 1 and insert the following:

Subtitle D—Organic Products Promotion

SEC. 09. SHORT TITLE.

This subtitle may be cited as the “Organic Products Promotion, Research, and Information Act of 2002”.

SEC. 1082. DEFINITIONS.

In this subtitle—

(1) AGRICULTURAL COMMODITY.—The term “agricultural commodity” means—

(A) agricultural, horticultural, viticultural, or agricultural raw agricultural products; (B) livestock and the products of livestock; (C) the products of poultry and bee raising; (D) the products of forestry;

(2) BOARD.—The term “Board” means the National Organic Products Board established under section 1084(b).

(3) COMMODITY PROMOTION LAW.—The term “commodity promotion law” means any law, rule, or order issued by the Board under the order, including paid advertising, to present a favorable image of organic products to the public to improve the competitiveness of organic products, and for other purposes; and

(4) CONGRESS.—The term “Congress” means the Congress of the United States.

(5) CONGRESSIONAL REVIEW OF AGENCY RULEMAKING.—In carrying out this section, the Secretary shall use the authority provided under section 808 of title 5, United States Code.

(6) CORPORATE.—The term “corporate” means any type of test, study, or analysis designed to increase the position of organic products on a national or international basis.

(7) IMPORTER.—The term “importer” means a situation in which an agricultural product is grown, handled, and marketed in another country.

(8) INFORMATION.—The term “information” means all of the States.

(9) MARKET.—The term “market” means a situation in which an agricultural product is sold or otherwise disposed of in a particular period of time.

(10) MARKETING.—The term “marketing” means any activity that is done by a person who is a producer, handler, retailer, or importer of agricultural products.

(11) NATIONAL.—The term “national” means any activity that is done by a person who is a producer, handler, retailer, or importer of agricultural products.

(12) ORGANICALLY.—The term “organically” means any activity that is done by a person who is a producer, handler, retailer, or importer of agricultural products.

(13) ORGANIC INDUSTRY.—The term “organic industry” means any activity that is done by a person who is a producer, handler, retailer, or importer of agricultural products.

(14) PERSON.—The term “person” means any individual, firm, partnership, corporation, association, cooperative, or any other legal entity.

(15) PROMOTION.—The term “promotion” means any activity that is done by a person who is a producer, handler, retailer, or importer of agricultural products.

(16) PROGRAM.—The term “program” means any activity that is done by a person who is a producer, handler, retailer, or importer of agricultural products.

(17) RESEARCH.—The term “research” means any activity that is done by a person who is a producer, handler, retailer, or importer of agricultural products.

(18) SECRETARY.—The term “Secretary” means the Secretary of Agriculture.

(19) STATE.—The term “State” means—

(A) any State;

(B) the District of Columbia;

(C) the Commonwealth of Puerto Rico; and

(D) any other territory or possession of the United States.

(20) SUSPEND.—The term “suspend” means to issue a rule under section 553 of title 5, United States Code, to temporarily prevent the operation of the order during a particular period of time.

(21) TERMINATE.—The term “terminate” means to issue a rule under section 553 of title 5, United States Code, to cancel permanently the operation of the order.

(22) UNITED STATES.—The term “United States”, when used in a geographical sense, means all the States.

SEC. 1083. ISSUANCE OF ORDERS.

(a) ORDER.—

(1) IN GENERAL.—To effectuate the purpose of this subtitle, the Secretary may issue, and amend from time to time, an order applicable to—

(A) producers of organic products;

(B) the first handlers of organic products (and other persons in the marketing chain, as appropriate); and

(C) the importers of organic products.

(2) NATIONAL SCOPE.—The order shall be national in scope.

(b) PROCEDURE FOR ISSUANCE.—

(1) DEVELOPMENT OR RECEIPT OF PROPOSED ORDER.—A proposed order with respect to organic products may be—

(A) prepared by the Secretary at any time on or after January 1, 2004; or

(B) submitted to the Secretary on or after January 1, 2004 by—

(i) an association of producers of organic products;

(ii) any other person that may be affected by the issuance of the order with respect to organic products.

(2) CONSIDERATION OF PROPOSED ORDER.—If the Secretary determines that the proposed order is consistent with and will effectuate the purpose of this subtitle, the Secretary shall—

(A) publish the proposed order in the Federal Register; and

(B) give due notice and opportunity for public comment on the proposed order.

(3) PROVISION OF FINAL ORDER.—After notice and opportunity for public comment under paragraph (2) regarding a proposed order, the Secretary shall—

(A) take into consideration the comments received in preparing a final order; and

(B) ensure, to the maximum extent practicable, that the final order is in conformity with the terms, conditions, and requirements of this subtitle.

(c) ISSUANCE AND EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in paragraph (2), if the Secretary determines that the order is consistent with and will effectuate the purpose of this subtitle, the Secretary shall issue the final order.

(2) EXCEPTION.—Paragraph (1) shall not apply in a case in which an initial referendum is conducted under section 1087(a).

(3) EFFECTIVE DATE.—The final order shall be issued and shall take effect not later than 270 days after the date of publication of the proposed order that was the basis for the final order.
SEC. 1084. REQUIRED TERMS IN ORDER.

(a) IN GENERAL.—The order shall contain the terms and conditions specified in this section.

(b) BOARD.—

(1) ESTABLISHMENT.—The order shall establish a National Organic Products Board to carry out a program of generic promotion, research, and information relating to organic products that effectuates the purposes of this subtitle.

(2) BOARD MEMBERSHIP.—

(A) NUMBER OF MEMBERS.—

(i) IN GENERAL.—The Board shall consist of the number of members determined by the Secretary, after consultation with the organic products industry.

(ii) ALTERNATE MEMBERS.—In addition to the members described in clause (i), the Secretary may appoint alternate members of the Board.

(B) APPOINTMENT.—

(i) IN GENERAL.—The Secretary shall appoint members of the Board (including any alternate members) from among producers, first handlers, and importers of organic products that elect to pay the assessment described in section 1086, and others in the marketing chain, as appropriate.

(ii) MEMBERS OF THE PUBLIC.—The Secretary may appoint 1 or more members of the general public to the Board.

(C) NOMINATIONS.—The Secretary may make appointments from nominations made in accordance with the method described in the order.

(D) GEOGRAPHICAL AND INDUSTRY REPRESENTATION.—To ensure fair and equitable representation of organic producers and others covered by the order, the composition of the Board shall reflect—

(i) the geographical distribution of the production of organic products in the United States; and

(ii) the quantity or value of organic products covered by the order imported into the United States; and

The Board shall—

(A) review the geographical distribution in the United States of the production of organic products in, variations in the scale of organic production operations in, and quantity or value of organic products imported into, the United States; and

(B) report to the Secretary the reapportionment of the Board membership to reflect changes in that geographical distribution of production, variations in scale of organic production operations, or quantity or value imported.

(4) NOTICE.—

(A) VACANCIES.—The order shall provide for notice of Board vacancies to the Secretary; and

(B) MEETINGS.—

(i) IN GENERAL.—The Board shall provide prior notice of meetings of the Board to—

(I) the Secretary, to permit the Secretary, or a designated representative of the Secretary, to attend the meetings; and

(II) the public.

(ii) ATTENDANCE.—A meeting of the Board shall be open to the public.

(5) TERMS OF OFFICE.

(A) IN GENERAL.The members and any alternate members of the Board shall each serve for a term of 3 years, except that the members and any alternate members initially selected to carry out the order in accordance with paragraph (b)(3) shall serve for terms of not more than 2, 3, and 4 years, as specified by the order.

(B) LIMITATION ON CONSECUTIVE TERMS.—A member or alternate member may serve not more than 2 consecutive terms.

(C) CONTINUATION OF TERM.—Notwithstanding subsection (a), each member or alternate member shall continue to serve until a successor is appointed by the Secretary.

(D) VACANCIES.—A vacancy arising before the expiration of a term of office of an incumbent member or alternate of the Board shall be filled in a manner provided for in the order.

(6) COMPENSATION.—

(A) IN GENERAL.—Members and any alternate members shall serve without compensation.

(B) TRAVEL EXPENSES.—If approved by the Board, members or alternate members shall be reimbursed for reasonable travel expenses, which may include a per diem allowance or actual subsistence incurred while away from their homes or regular places of business in the performance of services for the Board.

(7) INFORMATION ACTIVITIES.—The order shall require the Board established under the order to submit to the Secretary for approval a budget of the estimated annual expenses and disbursements of the Board to be paid to administer the order.

(8) SUBMISSION.—The budget shall be submitted—

(A) prior to the beginning of the fiscal year, and

(B) as frequently as is necessary after the beginning of the fiscal year.

(9) TO PAY THE COST OF—the activities with

(A) ASSESSEMENTS.—Expenses incurred under paragraph (2) and other expenses for the administration, maintenance, and functioning of the Board as authorized by the Secretary.

(B) CONTRACTS AND AGREEMENTS.—Any funds borrowed by the Board shall be expended only for startup costs and capital outlays.

(10) LIMITATION ON SPENDING.—For fiscal years beginning 3 or more years after the date of the establishment of the Board, the Board may not expend for administration (except for reimbursements to the Secretary for travel, maintenance, and functioning of the Board in a fiscal year that exceeds 15 percent of the assessment and other income received by the Board for the fiscal year.

(11) CONTRACTS AND AGREEMENTS.—Any funds borrowed by the Board shall be expended only for startup costs and capital outlays.

(12) AFTER PROVIDING PUBLIC NOTICE AND AN OPPORTUNITY TO COMMENT, to the Secretary for approval a budget of the estimated annual expenses and disbursements of the Board to be paid to administer the order.

(13) TO PAY THE COST OF—Any funds borrowed by the Board shall be expended only for startup costs and capital outlays.
CONGRESSIONAL RECORD — SENATE
February 7, 2002

S058

(i) assessments collected under section 1086;
(ii) earnings obtained from assessments; and
(iii) other income of the Board.

(2) REQUIREMENTS.—Each contract or agreement shall provide that any person that enters into the contract or agreement with the Board shall—
(A) develop and submit to the Board a proposed activity together with a budget that specifies the cost to be incurred to carry out the activities described in subparagraph (B);
(B) keep accurate records of all of transactions of the person relating to the contract or agreement;
(C) account for funds received and expended in connection with the contract or agreement;
(D) file periodic reports to the Board of activities conducted under the contract or agreement; and
(E) make such other reports as the Board or the Secretary considers relevant.

(g) RECORDS OF BOARD.—

(1) IN GENERAL.—The order shall require the Board—
(A)(i) to maintain such records as the Secretary may require; and
(ii) to make the records available to the Secretary for inspection and audit;
(B) to collect and submit to the Secretary, at any time the Secretary may specify, any information the Secretary may request;
(C) to keep records and disbursement of all funds in the possession, or under the control, of the Board; and
(D) to make public to the participants in the order the minutes of Board meetings and actions of the Board.

(2) AUDITS.—The order shall require the Board to have—
(A) the records audited by an independent auditor at the end of each fiscal year; and
(B) a report of the audit submitted directly to the Secretary.

(h) PERIODIC EVALUATION.—

(1) IN GENERAL.—In accordance with section 501(c) of the Federal Agriculture Improvement and Reform Act of 1996 (7 U.S.C. 7611(c)), the order shall require the Board to provide for the independent evaluation of all generic promotion, research, and information activities carried out under the order.

(2) REPORT.—The results of an evaluation described in paragraph (1), with any confidential business information expunged, shall be made available for public review by producers, first handlers, importers, and other participants in the order.

(i) CONFORMING AMENDMENT.—Section 501(a) of the Federal Agriculture Improvement and Reform Act of 1996 (7 U.S.C. 7601(a)) is amended—
(A) in paragraph (17), by striking "or" at the end;
(B) in paragraph (18), by striking the period at the end and inserting "; or"; and
(C) by adding at the end the following:

"(18)(Section 1804(h) of the Organic Products Promotion, Research, and Information Act of 2002.")

(j) BOOKS AND RECORDS OF PERSONS COVERED BY ORDER.—

(1) IN GENERAL.—The order shall require that producers, first handlers and other persons in the marketing chain, as appropriate, and importers covered by the order shall—
(A) maintain records sufficient to ensure compliance with the order and regulations;
(B) submit to the Board any information required by the Board to carry out the responsibilities of the Board under the order; and
(C) make the records described in subparagraph (A) available for inspection during normal business hours, for inspection by employees or agents of the Board or the Department, including any records necessary to verify information required under subparagraph (B).

(2) TIME REQUIREMENT.—Any record required to be maintained under paragraph (1) shall be maintained for such time period as the Secretary may prescribe.

(k) OTHER INFORMATION.—The Secretary may use, and may authorize the Board to use, the information provided pursuant to this subsection with respect to persons subject to the order that is collected by the Department under any other law.

(l) CONFIDENTIALITY OF INFORMATION.—

(1) IN GENERAL.—In any case provided in this subtitle, all information obtained under paragraph (1) or as part of a referendum under section 1087 shall be kept confidential by all officers, employees, and agents of the Department and of the Board.

(2) DISCLOSURE.—Information referred to in subparagraph (A) may be disclosed only if—
(i) the Secretary considers the information relevant; and
(ii) the information is revealed in a judicial proceeding or administrative hearing;
(iii) I N GENERAL .—I n general, the Board may reveal information only if—
(B) the information was not made available to the public under subparagraph (A) during a state of emergency declared by the President; or
(C) O THER EXCEPTIONS.—The Board may reveal information—
(i) if the information is revealed in a judicial proceeding or administrative hearing;
(ii) if the publication, by direction of the Secretary, of—
(3) N OTE.—This subsection shall not apply to disclosures required under any other law.

(3) OTHER INFORMATION.—This subsection shall not authorize the withholding of information from Congress.

SEC. 1085. PERMISSIVE TERMS IN ORDER.

(a) EXEMPTIONS.—The order may contain—
(1) authority for the Secretary to exempt from the order any de minimis quantity of organic products otherwise covered by the order; and
(2) authority for the Board to require satisfactory safeguards against improper use of the exemption.

(b) DISCLOSURE OF PAYMENT AND REPORTING SCHEDULES.—The order may contain authority for the Board to designate different payment and reporting schedules to recognize differences in organic product industry marketing practices and procedures used in different production and importing areas.

(c) AMENDMENTS.—

(1) IN GENERAL.—The order may contain authority to develop and carry out research, promotion, and information activities designed to enhance the profitability of or make more efficient the marketing or use of organic products in domestic and foreign markets.

(b) APPLICABLE AUTHORITY.—Section 1084(e) shall apply with respect to activities authorized under this subsection.

(d) RESERVE FUNDS.—The order may contain authority to reserve funds from assessments collected in any fiscal year to pay for the cost of a referendum among persons that, during the representative period determined by the Secretary, engaged in—
(A) the production or handling of organic products; or
(B) the importation of organic products.

(2) PROCEDURE.—The results of the referendum shall be determined in accordance with subsection (e).

(g) INITIAL REFERENDUM.—Not later than 3 years after the date on which assessments were first carried out under the order, and at least once every 4 years thereafter, for the purpose of ascertaining whether the persons covered by the order favor the continuation, suspension, or termination of the

SEC. 1086. ASSESSMENTS.

(a) IN GENERAL.—A producer, first handler, or importer of an organic product may elect to pay an assessment under the order.

(b) PAYMENT.—If a first handler or importer of an organic product elects to pay an assessment, the assessment shall be as appropriate—

(1) paid by first handlers with respect to the organic product produced and marketed in the United States; and
(2) paid by importers with respect to the organic product imported into the United States, if the imported organic product is covered by the order under section 1085(f).

(c) COLLECTION.—Any assessment collected under the order shall be remitted to the Board at the time and in the manner prescribed by the order.

(d) LIMITATION ON ASSESSMENTS.—Not more than 1 assessment may be collected on a first handler or importer under subsection (a) with respect to any organic product.

SEC. 1087. REFERENDA.

(a) INITIAL REFERENDUM.—

(1) IN GENERAL.—For the purpose of ascertaining whether the persons covered by the order favor the order going into effect, the Secretary shall conduct an initial referendum among persons that, during a representative period determined by the Secretary, engaged in—
(A) the production or handling of organic products; or
(B) the importation of organic products.

(2) PROCEDURE.—The results of the referendum shall be determined in accordance with subsection (e).

(g) SUBSEQUENT REFERENDUM.—Not later than 3 years after the date on which assessments were first carried out under the order, and at least once every 4 years thereafter, for the purpose of ascertaining whether the persons covered by the order favor the continuation, suspension, or termination of the
order, the Secretary shall conduct a refer-
endum among persons that, during a re-
presentative period determined by the Sec-
retary, have engaged in—
(1) the production or handling of organic
products; or
(2) the importation of organic products.
(c) ADDITIONAL REFERENDA.—For the pur-
pose of ascertaining whether persons covered
by the order favor the continuation, suspen-
sion, or termination of the order, the Sec-
retary shall conduct additional referenda:
(1) at the request of the Board; or
(2) at the request of 10 percent or more of
the number of persons eligible to vote under
subsection (b).
(d) OPTIONAL REFERENDA.—The Secretary
may conduct a referendum at any time to de-
termine whether the continuation, suspen-
sion, or termination of the order is favored by persons eligi-
ble to vote under subsection (b).
(e) APPROVAL OF ORDER.—The order may
provide for the approval of the order in a refer-
endum by a majority of persons voting in the referendum.
(f) MANNER OF CONDUCTING REFERENDA.—
(1) IN GENERAL.—A referendum conducted
under this section shall be conducted in the manner determined by the Secretary to be appro-
imate.
(2) ADVANCE REGISTRATION.—If the Sec-
retary determines that an advance registra-
tion of eligible voters in a referendum is nec-
essary by the voting period to facilitate the
conduct of the referendum, the Secretary
may institute the advance registration proce-
sure.
(A) by mail;
(B) in person through the use of national
and local offices of the Department; or
(C) by such other means as may be pre-
scribed by the Secretary.
(g) RESULTS OF REFERENDA.—The notice
shall explain any registration and voting procedures es-
tablished under this subsection.
(h) ADDITIONAL REFERENDA.—The results
of referenda conducted under this section shall be
made available to the public.
SEC. 1088. PETITION AND REVIEW OF ORDERS.
(a) GENERAL.—A person subject to the
order, any provision of the order, or any obli-
gation imposed in connection with the order,
shall be filed not later than 2 years after the
effective date of the order, provision, or obli-
gation to which the person is subject.
(b) REVIEW.—
(1) COMMENCEMENT OF ACTION.—The district
court of the United States for any district in
which a violation is alleged to have occurred
under subsection (a) resides or carries on business
shall have jurisdiction to review the final
ruling on the petition of the person, if a com-
plaint for that purpose is filed not later than
20 days after the date of the entry of the
final ruling by the Secretary under sub-
section (a)(3).
(2) PROCESS.—Service of process in a pro-
ceeding may be made on the Secretary by de-
ivering a copy of the complaint to the Sec-
retary.
(3) REMANDS.—If the court determines that
the rule is not in accordance with law, the
court shall remand the matter to the Sec-
retary with directions—
(A) to make such ruling as the court deter-
mines to be in accordance with law; or
(B) to take such further action as, in the
opinion of the court, the law requires.
(c) EFFECTIVE PROCEEDINGS.—The pendency
of a petition filed under subsection (a) or an action commenced
under subsection (b) shall not operate as a
stay of any agency action authorized by
law to be taken to enforce this subtitle, includ-
ing any rule, order, or penalty in effect
under this subtitle.
SEC. 1089. ENFORCEMENT.
(a) JURISDICTION.—The district courts of
the United States shall have jurisdiction spe-
cifically to enforce, and to prevent and re-
strain a person from violating, the order
issued, or any regulation promulgated, under
this subtitle.
(b) REFERRAL TO ATTORNEY GENERAL.—A civil
action authorized to be brought under
this section shall be referred to the Attorney
General for appropriate action, except that
the Secretary shall not be required to refer
such action to the Attorney General if the
Secretary determines that the admin-
istration and enforcement of this sub-
title would be adequately served by—
(A) providing a written notice or warning to
the person that committed the violation;
or
(B) conducting an administrative action
under this subtitle.
(c) CIVIL PENALTIES AND ORDERS.—
(1) CIVIL PENALTIES.—A person that will-
fully violates the order or regulation pro-
mulgated by the Secretary under this sub-
title may be assessed by the Secretary a civil
penalty of not less than $1,000 and not more
than $10,000 for each violation.
(2) CEASE-AND-DESRST ORDERS.—In addition
to, or in lieu of, a civil penalty, the Sec-
retary may enter an order requiring a person
to cease and desist from violating—
(A) the order; or
(B) any regulation promulgated under this
subtitle.
(d) NOTICE AND HEARING.—No order assess-
ing a penalty or cease-and-desist order may
be issued by the Secretary under this sub-
title unless the Secretary provides notice
and an opportunity for a hearing on the
record with respect to the violation.
(e) FURTHER PROCEEDINGS.—If a per-
son against whom an order is issued files an ap-
peal from the order with the United States
court of appeals, as provided in subsection
(d).
(f) REVIEW BY COURT OF APPEALS.—
(1) IN GENERAL.—A person against whom an
order is issued under subsection (c) may ob-
tain review of the order by—
(A) filing, not later than 30 days after the
person receives notice of the order, a notice of
appeal in—
(i) the United States court of appeals for the
circuit in which the person resides or carries
on business;
(ii) the United States Court of Appeals for
the District of Columbia Circuit; and
(B) simultaneously sending a copy of the
notice of appeal by certified mail to the Sec-
retary.
(2) RECORD.—The Secretary shall file with the
court a certified copy of the record on which
the Secretary has determined that the per-
son has committed a violation.
(g) ADDITIONAL REMEDIES.—The remedies
provided in this section shall be in addition to,
and not exclusive of, other remedies that
may be provided by law.
SEC. 1090. INVESTIGATIONS AND POWER TO SUB-
POENA.
(a) INVESTIGATIONS.—The Secretary may
make such investigations as the Secretary
considers necessary—
(1) for the effective administration of this
subtitle; or
(2) to determine whether any person sub-
ject to this subtitle has engaged, or is about
to engage, in any action that constitutes or
will constitute a violation of this subtitle or
an order or regulation issued under this
subtitle.
(b) SUBPOENAS, OATHS, AND AFFIRMA-
TIONS.—
(1) IN GENERAL.—For the purpose of any in-
vestigation under subsection (a), the Sec-
retary may administer oaths and affirma-
tions, issue subpoenas with or without the
testimony of witnesses, take evidence, and re-
quire the production of any records or docu-
ments that are relevant to the inquiry.
(2) SCOPE.—The attendance of witnesses and
the production of records or documents
may be required from any place in the
United States.
(c) CIVIL PENALTIES.—
(1) IN GENERAL.—In the case of contumacy
by, or refusal to obey a subpoena issued to,
any person, the Secretary may invoke the
time, place, or character of the jurisdiction of which the investigation or
proceeding is carried on, or where the person
resides or carries on business, in order to require the attendance and testimony of the person or the production of records or documents.

(2) ACTION BY COURT.—The court may issue an order requiring the person to appear before the Secretary to produce records or documents or to give testimony regarding the matter under investigation.

(d) CONTEMPT.—Any failure to obey the order of the court may be punished by the court as a contempt of the court.

(e) Process.—Process in any case under this section may be served—

1. In the judicial district in which the person resides or carries on business; or

2. Wherever the person may be found.

SEC. 1091. SUSPENSION OR TERMINATION.

(a) MANDATORY SUSPENSION OR TERMINATION.—The Secretary shall suspend or terminate an order or a provision of an order if the Secretary determines that—

(1) an order or a provision of an order obstructs or does not tend to effectuate the purpose of this subtitle; or

(2) an order or a provision of an order is not favored by persons voting in a referendum conducted under section 1087.

(b) REFERENCE TO SUSPENSION OR TERMINATION.—If, as a result of a referendum conducted under section 1087, the Secretary determines that an order is not approved, the Secretary shall—

1. not later than 180 days after making the determination, suspend or terminate, as the case may be, collection of assessments under the order; and

2. as soon as practicable, suspend or terminate, as the case may be, activities under the order in an orderly manner.

SEC. 1092. AMENDMENTS TO ORDERS.

The provisions of this subtitle applicable to an order shall be applicable to any amendment to an order, except that section 1087 shall not apply to an amendment.

SEC. 1093. EFFECT ON OTHER LAWS.

Except as otherwise expressly provided in this subtitle, this subtitle shall not affect or preempt any other Federal or State law authorizing promotion or research relating to an organic product.

SEC. 1094. REGULATIONS.

The Secretary may promulgate such regulations as are necessary to carry out this subtitle and the power vested in the Secretary under this subtitle.

SEC. 1095. AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—There are authorized to be appropriated such sums as are necessary to carry out this subtitle.

(b) LIMITATION ON EXPENDITURES FOR ADMINISTRATIVE EXPENSES.—Funds made available to carry out this subtitle may not be expended for the payment of expenses incurred by the Board to administer the order.

SA 2835. Mr. CRAIG proposed an amendment to amendment SA 2471 submitted by Mr. DASCHEL and intended to be proposed to the bill (S. 1731) to strengthen the safety net for agricultural producers, to enhance resource conservation, and rural development, to provide for farm credit, agricultural research, nutrition, and related programs, to ensure consumers abundant food and fiber, and for other purposes; as follows:

At the appropriate place, insert the following:

SEC. 1022. STUDY OF PROPOSAL TO PROHIBIT PACKERS FROM OWNING, FEEDING, OR CONTROLLING LIVESTOCK.

(a) IN GENERAL.—Not later than 270 days after the date of enactment of this Act, the Secretary of Agriculture shall complete a study to determine the impact that prohibiting packers described in subsection (b) from owning, feeding, or controlling livestock intended for slaughter more than 14 days prior to slaughter would have on—

1. livestock producers that market under contract, grid, basis contract, or forward contract;

2. rural communities and employees of commercial feedlots associated with a packer;

3. private or cooperative joint ventures in packing facilities;

4. livestock producers that market feeder livestock to feedlots owned or controlled by packers;

5. the market price for livestock (both cash and future prices);

6. the ability of livestock producers to obtain credit from commercial sources;

7. specialized programs for marketing specific cuts of meat;

8. the ability of the United States to compete in international livestock markets; and

9. future investment decisions by packers and the potential location of new livestock packing operations.

(b) PACKERS.—The packers referred to in subsection (a) are packers that slaughter more than 2 percent of the slaughter of a particular type of livestock in the United States in any year.

(c) CONSIDERATION.—In conducting the study under subsection (a), the Secretary of Agriculture shall—

1. consider the legal conditions that have existed in the past regarding the feeding by packers of livestock intended for slaughter;

2. determine the impact of those legal conditions.

(d) EFFECTIVE OF OTHER PROVISION.—The section entitled—

PROHIBITION ON PACKERS OWNING, FEEDING, OR CONTROLLING LIVESTOCK.

amending section 202 of the Packers and Stockyards Act, 1921 (7 U.S.C. 192), shall have no effect.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. DORGAN. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Thursday, February 7, 2002, at 10:30 a.m., in open and closed session, to receive testimony on the Conduct of Operation Enduring Freedom.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. DORGAN. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet on Thursday, February 7, 2002, at 10:45 p.m., to hold a hearing titled, "What’s Next in the War on Terrorism."

COMMITTEE ON INDIAN AFFAIRS

Mr. DORGAN. Mr. President, I ask unanimous consent that the Committee on Indian Affairs be authorized to meet on Thursday, February 7, 2002, at 10 a.m., in room 485, Russell Senate Building to conduct an oversight hearing on legislative proposals relating to the statute of limitations on claims against the United States related to the management of Indian tribal trust fund accounts.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. DORGAN. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet to conduct a markup on Thursday, February 7, 2002, at 10 a.m., in SD226.

Agenda

Nominations

Michael Melloy, of Iowa, to be U.S. Court of Appeals Judge for the Eighth District of Bankruptcy for the Ninth Circuit, to fill a vacancy.

Mr. DORGAN. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet to conduct a markup on Thursday, February 7, 2002, at 10 a.m., in SD226.
Circuit; Robert Blackburn to be U.S. District Court Judge for the District of Colorado; David L. Bunning to be U.S. District Court Judge for the Eastern District of Kentucky; James Gritzner to be U.S. District Court Judge for the Southern District of Iowa; Cindy Jorgensen to be U.S. District Court Judge for the District of Arizona; Richard Leon to be U.S. District Court Judge for the District of Columbia; and Jay Zainey to be U.S. District Court Judge for the Eastern District of Louisiana.

To be Deputy State Attorney: Thomas P. Colantuono for the District of New Hampshire and James K. Vines for the Middle District of Tennessee.

To be United States Marshal: James D. Dawson for the Southern District of West Virginia; Brian Michael Ennis for the District of Nebraska; Nehemiah Flowers for the Southern District of Mississippi; Johnny Lewis Hughes for the District of Maryland; William C. Jenkins for the Middle District of Louisiana; Randy Merlin Johnson for the District of Alaska; David Glenn Jolley for the Western District of Tennessee; Chester Martin Keely for the Northern District of Alabama; John William Loyd for the Eastern District of Oklahoma; Ronald R. McCubbin for the Western District of Kentucky; David R. Murtaugh for the Western District of Indiana; Michael Wade Roach for the Western District of Oklahoma; Eric Eugene Robertson for the Western District of Washington; David Donald Viles for the District of Maine; and Larry Wade Wagster for the Northern District of Mississippi.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DORGAN. Mr. President, I ask unanimous consent that the committee on Intelligence be authorized to meet to conduct a hearing on “The Nomination of Charles W. Pickering to be U.S. Court of Appeals Judge for the Fifth Circuit.”

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. DORGAN. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Thursday, February 7, 2002, at 2 p.m., in Dirksen room 226 or, if possible, Hart room 210.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGE OF THE FLOOR

Mrs. LINCOLN. I ask unanimous consent of Dr. Phillip Owens, a fellow from my staff who is from Aurora, AR, be granted the privilege of the floor during the remainder of the farm debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

RADIO FREE AFGHANISTAN ACT

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 293, S. 1779.

The ACTING PRESIDENT pro tempore. The clerk will report the bill by title.

The legislative clerk read as follows: A bill (S. 1779) to authorize the establishment of “Radio Free Afghanistan,” and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Foreign Relations, with an amendment to insert the part printed in italic.

S. 1779

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SECTION 1. SHORT TITLE.

This Act may be known as the “Radio Free Afghanistan Act.”

SECTION 2. ESTABLISHMENT OF RADIO FREE AFGHANISTAN.

(a) REQUIREMENT OF A DETAILED PLAN.—Not later than 15 days after the date of enactment of this Act, RFE/RL, Incorporated, shall submit to the Broadcasting Board of Governors a report, with a detailed plan for the provision by RFE/RL, Incorporated, of surrogate broadcasting services in the Dari and Pashto languages to Afghani- stan. Such broadcasting services shall be known as “Radio Free Afghanistan”.

(b) GRANT AUTHORITY.—

(1) In general.—Effective 15 days after the date of enactment of this Act, or the date on which a report required by subsection (a) is submitted, whichever is later, the Broadcasting Board of Governors is authorized to make grants to support Radio Free Afghanis- tan. Such broadcasting services shall be known as “Radio Free Afghanistan”.

(2) SUPersedes existing limitation on total annual grant amounts.—Grants made to RFE/RL, Incorporated, during the fiscal year 2002 for support of Radio Free Afghanistan may be made without regard to section 308(c) of the United States International Broadcasting Act of 1994 (22 U.S.C. 6207(c)).

(c) AVAILABLE AUTHORITY.—In addition to the authorities applicable to carry out United States Government broadcasting activities under the United States Information and Educational Exchange Act of 1948, the United States International Broadcasting Act of 1994, the Foreign Affairs Reform and Restructuring Act of 1998, and other provisions of law consistent with such purpose may be used to carry out the grant authority of subsection (b).

(d) STANDARDS; OVERSIGHT.—Radio Free Afghanistan shall adhere to the same standards of professionalism and accountability, and shall be subject to the same oversight mechanisms, as other services of RFE/RL, Incorporated.

SEC. 3. AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—In addition to such amounts as are otherwise available for such purposes, the following amounts are authorized to be appropriated to carry out United States Government broadcasting activities under the United States Information and Educational Exchange Act of 1948, the United States International Broadcasting Act of 1994, the Foreign Affairs Reform and Restructuring Act of 1998, and this Act, and to carry out other authorities in law consistent with such purposes:

(1) For “International Broadcasting Operations”, $3,000,000 for the fiscal year 2002.

(2) For “Broadcasting Capital Improvements”, $9,000,000 for the fiscal year 2002.

(b) AVAILABILITY OF FUNDS.—Amounts appro- priated pursuant to subsection (a) are author- ized to remain available until expended.

SEC. 4. REPEAL OF BAN ON UNITED STATES TRANSMITTER IN KUWAIT.

Section 226 of the Foreign Relations Au- thorization Act, Fiscal Years 1997 and 1998 (Public Law 105-236; 108 Stat. 423), is re- pealed.

Mr. REID. Mr. President, I ask unanimous consent that the committee amendment be agreed to and the bill, as amended, be read a third time; the Foreign Relations Committee be discharged from further consideration of H.R. 2998 and that the Senate turn to its immediate consideration; that all after the enacting clause be stricken; the text of S. 1779, as amended, be inserted in lieu thereof, the bill, as amended, be read a third time and passed, the motion to reconsider be laid upon the table, that any statements related thereto be printed in the RECORD, and that S. 1779 be returned to the calendar.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The committee amendment was agreed to.

The bill (H.R. 2998), as amended, was read the third time and passed.

ORDERS FOR FRIDAY, FEBRUARY 8, 2002

Mr. REID. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 9:30 a.m. tomorrow. However, there will be no rollcall votes tomorrow. However, there will be amendments offered. We have a tentative list of individuals who will offer amendments tomorrow. It should go into the early afternoon. The next rollcall vote will occur Monday at about 5:45 p.m.

ADJOURNMENT UNTIL 9:30 A.M. TOMORROW

Mr. REID. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 7:21 p.m., adjourned until Friday, February 8, 2002, at 9:30 a.m.
EXTENSIONS OF REMARKS

RECOGNIZING THE 91ST BIRTHDAY OF RONALD REAGAN

SPEECH OF HON. BENJAMIN A. GILMAN OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 6, 2002

Mr. GILMAN. Mr. Speaker, today marks the 91st birthday of our fortieth President of the United States, Ronald Reagan.

Born in the U.S.S.R., Ronald Reagan, a 1932 graduate of Eureka College, appeared in a total of 53 movies, his best roles being in Brother Rat (1938), Dark Victory (1939), and Kings Row (1941), and served as President of the Screen Actor’s Guild.

During World War II, he made training films for the Air Force and served as a spokesman for the General Electric Company from 1952 to 1962, hosting and occasionally acting on the television series, General Electric Theater.

Shifting from his Democratic Party affiliation, Reagan moved into Republican politics and emerged during the 1964 presidential election as a Goldwater Conservative. In 1966, he was elected governor of California, serving two terms from 1967 to 1975, successfully carrying out a generally conservative agenda. Although he failed in bids for the Republican presidential nomination in 1968 and 1976, in 1980, Reagan easily beat Jimmy Carter in the election with promises of reducing taxes and government regulation while building up the military. Four years later, he defeated Walter Mondale by a landslide, confirming the success of his first term in office.

In 1981, Reagan was shot and wounded in an assassination attempt by a mentally disturbed man, John Hinckley Jr. While in office from 1981 to 1989, Reagan fulfilled his political and economic promises, including the signing of a Social Security reform bill that aimed at a long-term strengthening of the system.

In foreign affairs, he was dedicated to freedom and democracy and adamantly opposed to the Cold War and communism everywhere. His commitment to bringing an end to the “evil empire” significantly contributed to the collapse of the Soviet Union in 1991.

In recent years, the publication of new material—including the love letters written by the President to his wife, and the radio addresses which he delivered from 1977 until 1980—have led to a long overdue reassessment of our 40th President by historians and by the general public. Ronald Reagan’s vision and leadership helped bring about a better nation and a better world, and it is long overdue that we received appropriate credit for his contributions.

Americans across the nation have long held President Reagan in high regard, and he became known for his skill at inspiring his audience. He was eloquent and effectively expressed his philosophies to all people. He united our nation after what many considered the most turbulent time in history, and in times of tragedy, such as the Challenger explosion, his words of sympathy and consolation eased the grief of our nation.

President Reagan’s skills as the “great communicator” may have obscured the fact that he was a genuine visionary. When President Reagan took office, America and the Soviet Union held the world under a sword of Damocles, with the threat of nuclear war never far from our minds. President Reagan fully grasped the most valuable of all lessons of history—the lesson that negotiations are futile if we do not go to the bargaining table from a position of strength.

Though President Reagan faced challenges at home from many who disagreed with this belief, he never wavered. The fruit of his efforts, the 1988 Arms Control Treaty, heralded our final victory in the Cold War, and ushered in the era of “Pax Americana.”

Today, President Reagan faces the most serious threat of his life as he battles against Alzheimer’s disease. May his family receive the same solace and strength from the knowledge that his friendship to all Americans, including those of us in this chamber, always keep in our thoughts and prayers, the “Gipper.”

His birthday today is a reminder to all of us of just how precious life is, and an appropriate time to commemorate the genuine contributions of this great American hero. Mr. Speaker, I am honored to associate my name with these legislative initiatives which honor one of the great Americans of the 20th century, our 40th President, Ronald Reagan.

IN SUPPORT OF S–CHIP COVERAGE FOR UNBORN CHILDREN

HON. BOB SCHAFFER
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. SCHAFFER. Mr. Speaker, I rise today to commend the Bush Administration and Secretary of Health and Human Services Tommy Thompson for the recently proposed rule to expand the State Children’s Health Insurance Program (S–CHIP) to cover health care for low-income pregnant women and their unborn children.

The Department’s action is consistent with the intent of the S–CHIP program, which is to ensure low-income children who do not qualify for Medicaid receive health care coverage. The baby is wholly dependent on the mother. Thus, making them ineligible for Medicaid.

Prenatal care under S–CHIP. I urge Secretary Thompson to act quickly to enact the new rule.

In Colorado, approximately 3,400 pregnant mothers and their unborn children would qualify for S–CHIP under the new proposed rule. These uninsured mothers are within the 134–185 percent range of the federal poverty level, thus making them ineligible for Medicaid.

Without health insurance, it is highly likely these women would never receive adequate prenatal care, thus placing their baby at risk for potential health problems and complications at birth.

Including both the mothers and their babies, the new S–CHIP rule would essentially be providing health care for 6,800 individuals in Colorado alone. Once the babies are born, they are immediately eligible for continued health care under S–CHIP. It only makes sense to extend appropriate health care to the baby while still in the womb. There should be no differentiation between the child prior to birth and just after birth as some liberal pro-abortion groups are notorious for doing.

Mr. Speaker, I would like to briefly address some of the incredulous arguments being made against the new S–CHIP rule by just those people who classify a “fetus” as somehow less of a person from a newborn baby. I find it hypocritical for anyone to oppose extending health care to the unborn child on the grounds it should only be extended to pregnant women. It is absolutely ridiculous to separate the life of the unborn baby from the life of the mother in regard to expanding health care coverage. The baby is wholly dependent on the mother. Thus, taking into consideration the S–CHIP focus on health care for children, it is completely within the scope of the S–CHIP program to extend coverage to the unborn child, and by doing so, the mother, as well.

Mr. Speaker, thank you for allowing me this time to discuss the newly proposed S–CHIP rule and the great effects it will have on women and babies across this country. Many states, including Colorado, are already seeking to extend S–CHIP coverage to unborn babies, so I urge Secretary Thompson to enact this new rule quickly. There is no good reason to oppose it.

Mr. GEORGE MILLER of California. Mr. Speaker, I rise today to invite my colleagues to join me in recognizing Vallejo Fighting Back Partnership’s selection as the 2001 Outstanding Coalition Award by CADCA (Community Anti-Drug Coalitions of America).

In the late 1980s, residents of Vallejo, California, became concerned about the city’s growing crime rate—a problem blamed mainly on the prevalence of drug and alcohol use in the community. In 1988, city officials began to examine programs and strategies that would help reduce drug and alcohol use, including the Robert Wood Johnson Foundation’s plan to start more than a dozen Fighting Back Partnerships coalitions across the nation. The coalitions, which would be established in mid-sized communities to reduce the demand for drugs and alcohol, were going to be given funding for a two-year planning period, followed by a $3 million grant to carry out a five-year strategic plan.

Although more than 400 communities sent in applications to start a Fighting Back coalition, in 1989 Vallejo emerged as one of the original 14 sites. One of the pivotal moments in Fighting Back’s history occurred in the mid-1990s when the coalition—with the help of its partners—developed a sophisticated five-year strategic plan that focused on substance abuse reduction in relation to three areas: neighborhoods, treatment and youth. Fighting Back’s primary goals in each area were—and still are—as follows: Revitalize neighborhoods that have deteriorated because of alcohol and drug-related crime and violence; increase the availability for treatment, especially for those with no money or health insurance; work with schools and organizations to reduce the demand and availability of tobacco, alcohol and other harmful substances among youth.

To date, there are several indicators that Fighting Back has made significant progress in achieving its goals. In 1997, the Robert Wood Johnson extended the coalition’s funding for another five years—an unprecedented move by the foundation at the time. Meanwhile, recent community reports and surveys show across-the-board reductions in neighborhood crime and drug use in Vallejo. Furthermore, the number of residents in certified treatment facilities has increased from 690 to 729, according to the latest statistics available. To date, more than 150 organizations and those communities to reduce the demand for drugs and alcohol, were going to be given funding for a two-year planning period, followed by a $3 million grant to carry out a five-year strategic plan. 7th Congressional District. Ms. Elizabeth Brown Calleton. Ms. Calleton has served as the President and CEO of Planned Parenthood of Pasadena for nearly twenty-two years and has been a positive force in this Congressional District for much longer.

Ms. Calleton began her journey with Planned Parenthood of Pasadena as an Administrative Assistant in 1972 after having received her undergraduate degree in government from Smith College and her masters degree in public law and government from Columbia University in 1962. She quickly rose to the position of Associate Director in 1974 and shortly thereafter in 1979 became the Executive Director or what is today known as the President and CEO of Planned Parenthood of Pasadena.

Her commitment to enhancing the lives of women in our community has never wavered. Over the last thirty years she has served on no less than seven boards and committees which are devoted to improving the status of women in the 27th Congressional District and throughout our nation. As the President and CEO of Planned Parenthood of Pasadena she has dedicated herself to ensuring that women have accessible family planning options and she has worked tirelessly to position women's health issues at the top of our national agenda.

I know I am not alone when I say that the women of California's 27th Congressional District could not find a stronger and more loyal ally than Elizabeth Brown Calleton. So I ask all members to join me in wishing congratulations to Ms. Calleton for her unending service to our community. I am sure that each person positively affected by Ms. Calleton's service will join me in wishing her much joy in the years to come and thank her for her time, her energy, and her efforts.

**IN RECOGNITION OF NATIONAL BURN AWARENESS WEEK, FEBRUARY 3 TO 9, 2002**

**HON. STEVE CHABOT**

**OF OHIO**

**IN THE HOUSE OF REPRESENTATIVES**

**Thursday, February 7, 2002**

Mr. CHABOT. Mr. Speaker, I ask our colleagues to join me in recognizing the importance of National Burn Awareness Week that was observed February 3–9, 2002. Burn Awareness Week provides an opportunity to educate children and families about the risks that lead to unfortunate and tragic accidents, particularly for the youngest and most vulnerable—our babies and children. The children of Cincinnati who have been the victims of burn accidents have been benefiting from the service of the Shriners Hospitals for Children since 1968 when the Cincinnati burn center first opened.

Unfortunately, infants and young children face greater risks from burn injuries than adults or older children. They rely more on the adults around them to ensure their environment is safe and free from potential burning causing hazards. That is why in addition to treating over 20 percent of all pediatric burns in the nation at their four national burn centers in Boston, Galveston, Cincinnati and Sacramento, Shriners Hospitals focus on education and prevention of burn injuries.

The Shriners Hospitals for Children is a unique charitable organization that has never sought nor received federal, state, local or third party funding of any kind. Additionally, Shriners Hospitals are distinctive in that they offer full physical, psychological, and emotional care to all the children they treat.

With the 2002 budget for the 22 orthopaedic and burn hospitals totaling over half a billion dollars, and with an active patient roster at over 156,000 children, it is obvious how important the Shriners Hospitals are to the health of our children. The Shriners Hospitals are 100 percent free, despite the fact that they will spend $1.5 million dollars on children every 24 hours in 2002.

In recognition of Burn Awareness Week, Mr. Speaker, I ask my colleagues to commend such charitable organization as the Shriners Hospitals that contribute greatly to the care, education, and research necessary to treat and work to prevent children’s burn accidents.

**RECOGNIZING THE 1ST BIRTHDAY OF RONALD REAGAN**

**SPEECH OF**

**HON. BARBARA LEE**

**OF CALIFORNIA**

**IN THE HOUSE OF REPRESENTATIVES**

**Wednesday, February 6, 2002**

Ms. LEE. Mr. Speaker, I sincerely do wish former President Reagan and his wife well on his birthday and my thoughts and prayers are with them as he deals with the terrible disease of Alzheimer’s; however, the resolution went well beyond a simple birthday wish. I could not in good faith cast a vote for a bill that stated that the Reagan Administration ensured re-named economic prosperity when millions of Americans were hurt by its economic policies and the federal government incurred massive deficit spending.

**PAYING TRIBUTE TO THEODORE “TED” MAKRIS**

**HON. SCOTT McINNIS**

**OF COLORADO**

**IN THE HOUSE OF REPRESENTATIVES**

**Thursday, February 7, 2002**

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to pay tribute to Mr. Theodore “Ted” Makris and recognize his contributions to this nation. Now a resident of Pueblo West, Colorado, Ted began his service as a soldier during the Vietnam War when he joined the Army and served in Southeast Asia. During his tour, Ted was stationed in the province of Quang Loi, and like many young Americans, was involved in fierce fighting for the control of South Vietnam.

Ted was recently decorated with an award long overdue for wounds sustained in combat. On September 15, 1967, Ted was wounded during an enemy engagement. Suffering from numerous shrapnel wounds to his body, Ted refused medical treatment and continued to fight amongst his fallen and wounded comrades. After several days of constant prodding from his commanders, he finally relented to leave the battlefield and receive treatment for his wounds.

When a member of our armed forces is killed or wounded in combat, he or she receives the Purple Heart medal for their sacrifice. Ted refused the medal once in 1967 and still refuses it today. Despite his objection and belief the he does not deserve the decoration, his wife Jan has persisted. She, along with family friend Brigadier General Philip Erdie, worked diligently to see that Ted received the medal over the long course of his dedication and commitment to his country. The medal was presented to Ted at his home in late December by General Erdie.

Mr. Speaker, it is a great privilege to recognize Theodore “Ted” Makris before this body of Congress, and thank him for his dedication and service during the war. If it were not for servicemen such as Ted, America would not enjoy the many freedoms that we have today. He served selflessly in a time of great need, bringing credit to himself and to this great nation. Thanks Ted for your service.

**TRIBUTE TO FREDERICK WITTENBURG**

**HON. CHET EDWARDS**

**OF TEXAS**

**IN THE HOUSE OF REPRESENTATIVES**

**Thursday, February 7, 2002**

Mr. EDWARDS. Mr. Speaker, on Thursday, January 31, 2002, Central Texans were saddened and diminished by the death of Frederick Wittenburg, Jr. of Lometa. Fred Wittenburg was a warrior. For three decades, he fought for the disadvantaged, the elderly, the homeless, and neglected children. He devoted those thirty years to improving the communities of the Texas Hill Country and the lives of its people as Executive Director of the Hill Country Community Action Association.

Fred joined President Lyndon Johnson’s War on Poverty in 1966, administering a brand new community action agency that provided a wide range of services in Llano, Mason, Mills and San Saba Counties. In 1968, he became Executive Director of the growing organization, expanding its services to Bell, Coryell, Hamilton, Lampasas and Milam Counties. He tirelessly raised local funds for Hill Country Programs to provide and expand services to those who needed them.

Fred Wittenburg was born in Belton, Texas in November 1930, one of four children. His parents moved to Goldthwaite, where Fred attended elementary school. Always active in sports and extracurricular activities, he graduated from high school in the Lometa School System in 1948, and was recognized as the Senior Class “Best All Around Boy.”

He attended St. Edward’s University in Austin for two years and then transferred to Texas Tech University in Lubbock. A Red Raider through and through, Fred was a member of the Silver Key Fraternity and the Saddles Tramp service organization. It was in a line at the campus bookstore that he met a freshman named Mary Alice Close, who would become his bride and share his life for nearly fifty years.

In thirty years as Executive Director of the Hill Country Community Action Association, Fred’s dedication to the war on poverty and his commitment of “building people and communities” were reflected in the commitment and energy of his staff, one of his most enduring legacies.
When Fred retired as Director in 1996, he left a dynamic organization providing Senior Centers, Head Start, family planning, nutrition and day care services, and housing, energy crisis and rural transportation assistance to more than 30,000 people in thirteen Central Texas counties.

In his 1964 State of the Union speech, President Johnson described Americans living “on the outskirts of hope,” and he declared an unconditional War on Poverty. “It will not be a short or easy struggle, no single weapon or strategy will suffice, but we shall not rest until the war is won.”

Fred Wittenburg heard President Johnson’s words, took them to heart, and made that war on poverty his life’s work.

An old saying tells us, “When eating a fruit, think of the person who planted the tree.” Through his long and distinguished career of service to others, Fred Wittenburg planted thousands and thousands of trees. And, the people of the Central Texas Hill Country will enjoy the fruit of those trees and think of him for generations to come.

PERSONAL EXPLANATION

HON. BOB RILEY
OF ALABAMA
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. RILEY. Mr. Speaker, I was unavoidably detained for Roll Call No. 8, H. Res. 342, on ordering the previous question. Had I been present I would have voted yea.

I was also unavoidably detained for Roll Call No. 9, S. 1888, to correct a Technical Error in the Codification of Title 36 of the United States Code. Had I been present I would have voted yea.

I was also unavoidably detained for Roll Call No. 10, H. Con. Res. 312, expressing the sense of the House of Representatives that the scheduled Tax Relief Provided by the Economic Growth and Tax Relief Reconciliation Act of 2001 passed by a Bipartisan Majority in Congress should not be suspended or repealed. Had I been present I would have voted yea.

I was also unavoidably detained for Roll Call No. 11, H. Res. 82, Recognizing the 91st birthday of Ronald Reagan. Had I been present I would have voted yea.

FEBRUARY SCHOOL DISTRICT OF THE MONTH

HON. CAROLYN McCARTHY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mrs. McCARTHY of New York. Mr. Speaker, I have named the Rockville Centre Union Free School District as School District of the Month in the Fourth Congressional District for February 2002. The schools in the district are Francis F. Wilson, Jennie E. Hewitt, Floyd B. Watson, Riverside and William S. Covert Elementary Schools, and South Side Middle and High Schools.

I decided to honor the entire Rockville Centre school district for their commitment to helping the victims and their families of the September 11 tragedy. I commend their determination to make the world a better place.

Dr. William Johnson is the Superintendent of Schools in the Rockville Centre School District. Primarily serving the residents of Rockville Centre, the school district also includes portions of the neighboring South Hempstead community. The administrators of the schools are: Joann F. Waldman, Principal; Floyd B. Watson Elementary School; Darren Raymar, Principal, William S. Covert Elementary School; Carol Burris, Principal, South Side High School; Thomas Ricupero, Principal, South Side Middle School; Ann Messenger, Principal, Jennie E. Hewitt Elementary School; Patricia Bock, Principal, Riverside Elementary School; and Ann Peluso, Principal, Francis F. Wilson Elementary School.

All five of the elementary schools contributed to the various relief funds through a wide-range of events such as fundraisers, exhibits and collections. Students at Hewitt and Watson Elementary Schools responded immediately to President Bush’s request for one dollar from every child to be sent to starving children in Afghanistan. Covert Elementary School will donate half of the proceeds from its annual Variety Show to their local World Trade Center fund. Wilson Elementary School ran a coin campaign and donated the proceeds, totaling over two thousand dollars to the American Red Cross.

Furthermore, the Rockville Centre school district has excelled on the academic front. Several schools in the district have recently received individual awards for outstanding educational standards.

Riverside Elementary School recently became the recipient of the Pathfinder Award, a prestigious distinction given by the Business Council of New York State for most improvement on state-wide English and Math exams. Two students from South Side High School are semifinalists in the nationwide Intel Science Talent Search, where the winners receive college scholarships. In 1998, South Side High School was named Blue Ribbon School.

The unity and generosity of these children and their families is amazing. I am very proud of all of the Rockville Centre students and their benevolent efforts. Congratulations on this honor, and keep up the good work.

TRIBUTE TO ROSEMARY HOLGUIN COLUNGA

HON. JOE BACA
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. BACA. Mr. Speaker, I rise today in memory of a woman who was very special to me, to my aide, Ruby Ramirez, and to the entire Colton community. I rise to pay tribute to the life of Rosemary Holguin Colunga, beloved community activist, volunteer and leader.

Rosemary was active in every kind of community organization from her high school days until her death. Rosemary was a woman who dedicated her life to the people of her community. She had visions of opening doors for those less fortunate making sure that everyone had a chance in life.

Rosemary, herself, was no stranger to hardship. She was born on September 6, 1937 in San Bernardino, California, the second child of Jose Ramon and Catherine Holguin Colunga. Shortly afterwards, her parents moved to the City of Colton to raise their children, and Rosemary would remain a member of the Colton community for the rest of her life. She attended Garfield-Woodrow Wilson High School, but she had to drop out of school due to an illness. Never one to be defeated by life, Rosemary regained her health and earned her high school diploma from San Bernardino Valley College going on to earn an Associates Degree in Liberal Arts. She also the first, and only, female president of general secretarial course at Skadron Business College.

While Rosemary’s education prepared her for a career in business, her heart belonged to service. In 1968 she began working for the anti-poverty programs for the San Bernardino County, and later coordinated community services for the City of Bloomington. Rosemary was pivotal in bringing Loma Linda University’s low-income neighborhood to open a clinic for area residents.

After working for the City of Bloomington for nine years, Rosemary moved to her own neighborhood of South Colton to become the Facility Coordinator for the City of Colton at the Luque Multi-Service Center at Veterans Memorial Park. The Luque Center was located in a low-income area, but this did not stop Rosemary from bringing every available program to the center that was offered upftown. If any of the programs were unavailable at her center, then she would just take the people upftown where they could enjoy the services in her typical “can-do” spirit.

Her community involvement did not stop with her career. Service was a way of life for Rosemary. Rosemary became the president of Woodrow Wilson’s PTA when no one else wanted to take on the responsibility even though she had no children of her own. Rosemary was determined not to let the students go without community leadership. She was also the first, and only, female president of Los Padrinos, a community organization. Rosemary was also active in her local Catholic parish as a lecturer, Eucharistic minister and sang in the choir. Her fellow parishioners remember that her beautiful voice that brought tears to their eyes, because she was singing “from her heart.”

Rosemary was particularly devoted to the very young and the very old of her community. She organized outings for the senior citizens of South Colton such as sight seeing, shopping and gambling. She truly loved spending time with the seniors referring to them as “my Viejitos.” The youth of her community were always seeking Rosemary’s advice and she spent endless hours counseling, scolding and working with them at the centers. Many members of the Colton community count Rosemary as one of their mentors.

Rosemary’s service to her community did not go unnoticed during her lifetime. She received accolades and awards from countless organizations, the late Congressman George Brown, Lt. Governor Cruz Bustamante, State Senator Nell Soto, the City of Colton, and the Colton Joint Unified School District. Rosemary was also honored by her Assemblyman John Longville and received the “Woman of the Year 2000” award, which she always considered her greatest accomplishment.
Rosemary passed away on February 2, 2002 surrounded by her loving family. She was preceded in death by her brother Ramon Holguin Colunga, and is survived by brother William Holguin Colunga, and sisters Elvira Colunga Hernandez, and Olivia Colunga Gonzalez. She also leaves behind nine nieces and nephews and seventeen great nieces and nephews. Her family, innumerable friends and the entire community will miss her greatly.

And so Mr. Speaker, I submit this loving memorial to be included in the archives of the history of this great nation. For women like Rosemary leave a legacy of lives filled with dedication to the people of their community. She is the fabric from which our nation was created.

**BIOENERGY INVESTMENT AND OPPORTUNITY (BIO) ACT**

**HON. JOHN R. THUNE**

**OF SOUTH DAKOTA**

**IN THE HOUSE OF REPRESENTATIVES**

**Thursday, February 7, 2002**

Mr. THUNE. Mr. Speaker, recently, I hosted two value-added agriculture round-table discussions in South Dakota to hear about the progress and concerns that farmers are having with value-added agriculture. A program that was brought to my attention that has been very helpful to ethanol and biodiesel plants is the Bioenergy Program. In South Dakota, the Bioenergy Program is currently used by Dakota Ethanol of Wentworth, Heartland Grain Fuels of Aberdeen, Briun Enterprises of Scotland and PJP Enterprises of Humboldt.

The program is important because it stimulates industrial consumption of agricultural commodities by promoting their use in bioenergy production. Bioenergy producers that increase their consumption of eligible commodities receive payments to offset part of the cost of buying the additional commodities. According to USDA, the Bioenergy Program for FY 2001 resulted in a production increase of 141.3 million gallons of ethanol and 6.4 million gallons of biodiesel.

Today I have introduced the Bioenergy Investment and Opportunity (BIO) Act. The bill would authorize and expand the United States Department of Agriculture (USDA) Bioenergy Program through FY 2011.

By authorizing the Bioenergy Program we will promote value-added agriculture and increase production of bioenergy, such as ethanol and biodiesel, expanding industrial consumption of agricultural commodities. The program was initiated by an Executive Order of President Clinton and has been continued by President Bush, but it expires at the end of FY 2002.

Under the current program, USDA makes up to $150 million in payments annually. The BIO Act would increase the payments to $200 million annually. The Commodity Credit Corporation (CCC) makes cash payments to bioenergy producers by compensating them for a portion of their increased commodity purchases made to expand existing production of bioenergy and to encourage the construction of new production facilities.

Mr. Speaker, increased bioenergy production helps strengthen the income of soybean, corn, and other producers and lessens U.S. dependence on traditional energy sources. As I introduce the BIO Act today, I ask for the support of the other Members of this House and the Administration in continuing and expanding this important program.

**PRESIDENT BUSH INSISTS ON MORE TAX CUTS FOR THE WEALTHY EVEN AS ECONOMISTS SHOW THAT THE RICH ARE GETTING RICHER AND PAYING LESS IN TAXES**

**HON. GEORGE MILLER**

**OF CALIFORNIA**

**IN THE HOUSE OF REPRESENTATIVES**

**Thursday, February 7, 2002**

Mr. GEORGE MILLER of California. Mr. Speaker, I would encourage Members of the House and all Americans to pay attention to two very disturbing stories this week that illustrate the tremendous burdens on working families that this Congress continues to fail to address.

Yesterday, the House voted a symbolic and politically motivated resolution upholding the grossly unfair and deficit-producing tax windfall for wealthy Americans that President Bush insisted on last year. Over the course of that year, the economy has faltered, millions have lost their jobs or significant parts of their income, and we have rearranged our spending priorities because of the need to combat terrorism. Despite all of this, however, Washington is still not reconciled to the idea that we should spend a trillion and a half dollars in tax cuts mainly aimed at the wealthiest Americans.

That Bush tax law has exacerbated the growing inequality of incomes in America that has become an emblem of the Enron decade of the ’90s. According to economist Edward N. Wolff of New York University, wealth in America is more highly concentrated today than at any time since 1929.

While the number of Americans earning over a million dollars more than doubled in the last half of the ’90s, the percentage of their income that the wealthiest paid in federal income taxes actually fell by 11 percent, thanks to tax changes.

Meanwhile, those who earned less paid more in taxes, according to the Internal Revenue Service.

And now President Bush wants even more permanent tax cuts for the wealthiest Americans.

Yet, while this House has time for legislation to expand tax cuts for the wealthiest, it has failed to pass legislation to benefit the millions or workers who have lost their jobs and exhausted their unemployment benefits. The Center for Budget and Policy Priorities has just released a report showing that two million working men and women will lose their unemployment benefits if Congress does not extend the first half of this year alone, adding to hundreds of thousands who lost unemployment insurance benefits last year and tens of thousands more who were denied any benefits. As a result, the number of exhaustees who have been denied any additional weeks of benefits in the first quarter of this year is higher than in any other first quarter since the early 1970s. That is a crisis that the federal government can and should respond to but has as of now failed to do so.

Mr. Speaker, these are very, very disturbing trends: more wealth for the wealthiest, and more tax cuts for wealthiest; growing income disparity and higher taxes for the middle class working family; no extended benefits for the unemployed and no coverage for millions of workers who paid into unemployment insurance but got no benefits when they lost their jobs.

The federal government spend tens of millions of dollars trying to instruct people overseas how to build democracy in their countries, and one of the basic lessons we teach them is that you cannot build political democracy without economic justice. Frankly, the policies of this Congress are so inconsistent with any concept of economic justice that we should be concerned about the effect on our own democracy.

Attached is an article from today’s New York Times.

*(From the New York Times, Feb. 7, 2002)*

MORE GET RICH AND PAY LESS IN TAXES

*(By David Cay Johnston)*

The number of Americans with million-dollar incomes more doubled from 1995 to 1999, as their income tax cuts, which involved new tax credits for children and education expenses. So, as a group, the portion of their income going to taxes rose. For those with million-dollar incomes, the share of their income that went to taxes fell to 27.9 percent in 1999, from 31.4 percent in 1995. For those Americans who did not make more than $1 million, the portion of their income going to taxes edged up in those years, to 12.8 percent from 12.5 percent. About 205,000 taxpayers made $1 million or more in 1995, and 67,000 made more than $87,000 in 1995. The average income of those who made $1 million or more rose by $568,000 to $3.2 million.

Critics of the latest Bush administration economic stimulus and tax cut plan announced this week, regarded the latest figures as evidence that the wealthy have reaped too many breaks.

“Congress cut taxes on rich people in 1997,” Robert McIntyre, director of Citizens for Tax Justice, a nonprofit Washington organization with labor union backing, said. “The rate that they pay fell by quite a bit, while they didn’t do much for everyone else and their taxes went up a little. The law did what Congress intended. Their intent was to make sure the wealthier people paid less in taxes and they weren’t worried about the rest of the people.”

President Bush, who won a major tax cut from Congress last year, and his supporters argue that permanent tax cuts encourage investment, which results in more jobs and economic growth.

“We need to pass a bill that will help workers and help stimulate the economy,” Mr. Bush told reporters on Friday.

The president’s new tax cut plan appeared to die on Tuesday when Senator Tom
Daschle, Democrat of South Dakota and the majority leader, moved to shelve it. Those making a million dollars or more, just one of every 625 taxpayers in 1999, more than doubled that proportion. The income of taxpayers making less than $1 million also rose, though not as sharply. The income of everyone making less than a million dollars averaged $35,500 in 1995, a 22 percent increase, the data, using adjusted gross incomes, showed. The tax returns of a million-dollar incomes at higher levels increased.

William Beech, an economist at the Heritage Foundation in Washington, which supports lower tax rates to foster economic growth, said that these figures may be misleading. The data fail to capture the growing number of the working poor, and their meager incomes, because many of them are immigrants who work off the books, he said. "The reported income that the I.R.S. picks up from tax returns reflects people who are making the economic rounds. The people who are working in the economy, the people who are doing the work, are not picked up in the economic figures," Mr. Beech said. "If we had fully accurate reporting of income, we would see that within the poorest fifth, the median income would be falling because of the millions of people coming into the United States, who mostly earn low incomes."

He also noted that among those who file income tax returns, many of who appear poor may actually be retirees with substantial investments. But they need only modest incomes because their mortgages are paid off and their children are grown.

The stock market played a large role in creating more million-dollar annual incomes, the figures show. Capital gains over all more than tripled during the five years, with almost three quarters of the increase going to those with million-dollar incomes. The capital gains tax cut of 1997 appeared to favor the 400,000 taxpayers most of all. Harvesting 7 percent of all capital gains in 1998, these very rich Americans paid just 22 percent of their total taxes in taxes that year, down from 30 percent in 1994. Although more than half of all families are investors in the stock market, largely through 401(k)s and similar retirement plans, wealth in America is more highly concentrated today than at any time since 1929, said Professor Edward N. Wolff, a New York University economist.

In my district, the Alameda County Health Department, partners in the Alameda County State of Emergency Task Force and the faithful community will also hold day long community events to mark this occasion.

Three years ago the State of Emergency Task Force and the Alameda County Health Department helped to declare a Public Health Emergency on HIV/AIDS in the African American community. Since then, more resources have reached the community making an positive impact. In Alameda County, we are slowly seeing a decrease of new HIV infections. However, we must not slow our efforts to curb this deadly disease.

Since the first AIDS diagnosis over 20 years ago, AIDS has devastated America’s Black community. The Centers for Disease Control and Prevention (CDC) reports that for the first time in 8 years, HIV/AIDS case rates are rising in the United States. The CDC estimates 900,000 people living in the U.S. with HIV/AIDS, with approximately 40,000 new infections every year. African-Americans lead the nation in these new infections rates. Blacks represent 12% of the Nation’s population yet, they account for 47% of new AIDS cases.

Since December 2000, over 130,000 AIDS cases were reported among women in the U.S. Almost 5% of all women with AIDS are African American. And, girls make up 58% of new AIDS cases among teens in the U.S. Blacks are ten times more likely to be diagnosed with AIDS than whites and ten times more likely to die from the disease. The CDC also estimates that 30% of young, gay, black men are infected with the AIDS virus.

Including the incidence of HIV/AIDS among African Americans, Latinos, Asian Americans and Native Americans, racial minorities now represent a majority of new AIDS cases and a majority of Americans living with AIDS. It is imperative that National Black HIV/AIDS Awareness Day serve as a platform to educate people about the impact of HIV/AIDS on African-Americans and draw attention to the need for increased resources for the fight against this devastating disease.

So as we gather in the African-American community and in communities across the nation, together, we must work to increase the level of resource committed to fight this disease.

HONORING MR. WALTER J. RISCHMANN

HON. STEVE CHABOT
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. CHABOT. Mr. Speaker, I’d like to take a moment to pay tribute to a member of the
“Greatest Generation” from the First District of Ohio, Mr. Walter J. Rischmann. Born in Cincinnati, Ohio, on March 28, 1920, Walter served in the U.S. Army during World War II in campaigns in France, Italy, and North Africa, where he took part in the American advance to a key German fortress on Hill 609. This significant battle was featured in the December 27, 1945 issue of Life magazine.

Soon after returning home from the war, Walter began working for a lithography company from which he retired in January 1982. He has eight children, 19 grandchildren, and 14 great-grandchildren.

Mr. Speaker, the events of September 11 reminded us anew of how much our freedom and security depends on the heroic service and bravery of men like Walter Rischmann. On behalf of the Ohio community that Walter has devotedly served all his life, I’d like to extend my fondest regards and gratitude to this fine American.

PAYING TRIBUTE TO SUSAN SMITH

HON. SCOTT McINNIS
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to pay tribute to Susan Smith and thank her for her extraordinary contributions to her community and to her state. As a native of Colorado, Susan has dedicated herself to helping her community by selflessly giving her time and energy to a number of philanthropic endeavors. The remarkable work she has done with the people in her community, both young and old alike, is surpassed only by the level of integrity and honesty with which she has conducted herself each and every day. It is her tremendous efforts that have led to her recognition as the recipient of the Colorado Women 2002 Power of One Award, and I would like to applaud her efforts and express my thanks for all she has done.

The amount of work that Sue has done in and for her community is truly remarkable. She has served as a board member of Start-Up Education, a youth entrepreneurship program, since it relocated from Atlanta to Pueblo. She was instrumental in the start-up phase, coordinating the donation of desks, workstations, chairs and computers, as well as identifying a facility to house the program. Sue was also responsible for writing several significant contributions to her community and to her state.

Even more remarkable was the role she played in identifying a facility to house the program. Sue Smith was also responsible for writing several significant contributions to her community and to her state.

Mr. Speaker, the events of September 11 reminded us anew of how much our freedom and security depends on the heroic service and bravery of men like Walter Rischmann. On behalf of the Ohio community that Walter has devotedly served all his life, I’d like to extend my fondest regards and gratitude to this fine American.

THE SPEAKER’S TASK FORCE ON THE HONG KONG TRANSITION

HON. DOUG BEREUTER
OF NEBRASKA
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. BEREUTER. Mr. Speaker, following his visit to Hong Kong in April 1997, then-Speaker Newt Gingrich tasked this Member with the responsibility of creating the House Task Force on Hong Kong’s Transition, and of observing and reporting on Hong Kong’s status following its return to the People’s Republic of China (PRC). Former Speaker Gingrich asked the Task Force to provide the House of Representatives with quarterly reports which were done through the fifth report of February 2, 1999. Following that report Speaker Dennis Hastert concurred with this Member’s recommendation that the reports be issued on a periodic basis. The Task Force has been bipartisan in nature, with four members chosen from each party. All members of the Task Force were drawn from what was then the International Relations Subcommittee on Asia and the Pacific. They included Representative Howard Coble (R-NC), Representative Sherrrod Brown (D-OH), Representative Alcee Hastings (D-FL), Representative Eni Faleomavaega (D-AS), then-Representative Matt Salmon (R-AZ), and Representative Don Manzullo (R-IL).

On behalf of the Task Force, this Member would like to inform his colleagues that the ninth report of the Task Force on the Hong Kong Transition has been filed. It follows eight previous reports, the most recent of which was dated August 1, 2000. The report focuses on events and developments relevant to U.S. interests in the Hong Kong Special Administrative Region (HKSAR) between August 2000 and December 31, 2001.

In August 2001, this Member traveled to Hong Kong to meet with senior political officials and routinely meets with delegations from Hong Kong when they visit Washington, D.C. From these meetings, the Task Force has gleaned that the transition continues to progress satisfactorily.

Mr. Speaker, a copy of the Task Force’s ninth report is available on this Member’s internet website: http://www.house.gov/bereuter/press.htm under the “Speeches” section.

ON BEHALF OF THE UNIFORMED FIREFIGHTERS ASSOCIATION OF NEW YORK CITY

HON. CAROLYN B. MALONEY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mrs. MALONEY of New York. Mr. Speaker, I rise today with a statement from the Uniformed Fire Officers Association of New York. Captain Peter L. Gorman, President of the UFOA, asked that I present this UFOA statement to Congress in memory of the fallen firefighter and police officers of the New York City Fire Department.

The UFOA wishes to thank the Governor and the State Legislature for all you have done, almost every time we asked, for our members and their families, especially the widows and children of firefighters killed in the line of duty.

But now we believe state government has a new and even greater responsibility to the public interest, the 8 million people who live in New York City and the millions of commuters and visitors that the FDNY protects every minutes of every day. The Fire Department has been badly crippled to the attack on the World Trade Center, and it will get worse before it gets better. Now an entire city needs your help.

Fire Department lost 343 members on September 11, 2001. Of that number, 254 were members and 89 were superior officers—45 lieutenants, 20 captains, 17 battalion chiefs, 3 deputy chiefs, 2 staff chiefs, the Chief of the Department, and the First Deputy Commissioner. If that wasn’t terrible enough, our Catholic Chaplain was carried to a nearby church and laid to rest on the altar.

It is important that you know what we at the UFOA now know. Many veterans fire officers, more than ever before, are saying that they will leave soon, mainly because they feel a heightened obligation to the families. This year we will be asking you to go beyond anything we’ve asked the State Legislature, the Governor, to do before. We will be asking you to save the New York City Fire Department; to make a commitment to the restoration of a crippled emergency service that may not be able to do the job.

In August 2001, this Member traveled to Hong Kong to meet with senior political officials and routinely meets with delegations from Hong Kong when they visit Washington, D.C. From these meetings, the Task Force has gleaned that the transition continues to progress satisfactorily.

Mr. Speaker, a copy of the Task Force’s ninth report is available on this Member’s internet website: http://www.house.gov/bereuter/press.htm under the “Speeches” section.

TRIBUTE TO PHIL ROSENSTEIN

HON. SOLOMON P. ORTIZ
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. ORTIZ. Mr. Speaker, Quite often, the familiar faces we see and depend upon have a story behind them that we don’t know. Phil Rosenstein of Corpus Christi has a familiar face, one that is always reliably around when there is a civic event, or if there is a cause to be advocated.

I have been friends with Phil for several decades and he has a beautiful heart and a way of finding out what people need and how to get it to them. Everyone should know what a great man Phil is, what a great American he is, what a unique, charitable human being, what an everyday hero he is.

An orphan raised in New York City, Phil came to Corpus Christi and joined the Merchant Marine and proceeded to see the world and its place in it. He visited orphans all over the Far East, taking candy and clothing, offering financial assistance to them and most importantly, drawing attention to their plight in the United States, connecting many Asian orphans with American families.

As a Merchant marine for 40 years Phil never forgot his adopted hometown of Corpus Christi, and he combined that devotion with his love of the arts. As a Merchant Marine traveling to a host of foreign lands, Phil always set forth to find fine art and antiques that he purchased and donated to museums in the Coastal Bend. He was appointed field representative of the Corpus Christi Museum.

He was also the Mayor Luther Jones’ goodwill ambassador, representing Corpus Christi well and arranging for exchanges between Yokosuka, Japan and South Texas (Yokosuka was then the sister city to Corpus Christi).

Phil helps those who need help, particularly seniors and children. Visiting local nursing homes led him to become the Mayor’s volunteer liaison to senior citizens and senior care centers. He got them cable and purchased telephones for seniors. The Senior Community Service Awards confers an annual award to companies and agencies that have done the most for the senior community. In 1990, Phil won the award as a citizen, not a business nor a service agency.

For his service in the Merchant Marine in World War II, Phil won service medals for campaigns in the Atlantic and the Mediterranean war zones, but those who depend upon him to do good have only his love for his adopted hometown — and his love for the arts.

Mr. Speaker, we have an opportunity to pay tribute today to a woman whose life is the very embodiment of kindness, selflessness and love. Ms. Lee Bahrych is both inspirational and courageous, and a true testament to the inherent greatness that resides in all of humanity. Throughout her life, she has consistently given her time, effort and love to others, and it is with a great deal of satisfaction and pride that I pay tribute to her as we celebrate her tremendous accomplishment of being named the recipient of the Colorado Women 2002 Power of One Award.

Lee’s long list of accomplishments is as impressive as the award being bestowed upon her today. The dedication and quality with which she has conducted herself in her distinguished career in the Colorado House of Representatives, as well as in the many philanthropic endeavors she has undertaken in her lifetime is truly remarkable. After retiring from the Colorado House of Representatives in order to attend to a loved one who had fallen ill, Lee began a much-appreciated effort to beautify the State Capitol. She created an aesthetically pleasing environment while experiencing government in action. This remarkably selfless act has served to enrich the State Capitol and find an aesthetically pleasing environment while experiencing government in action.

We will not have a truly effective arsenal against HIV/AIDS until we have an effective vaccine, improved education and prevention campaigns, and increased access to retroviral treatments. But before these come to pass, we must attack the most serious obstacles to overcoming the HIV/AIDS epidemic in the African-American community — denial. It is only when patients accept the possibility that they or their partner may be infected with HIV that health care workers can consider treatment options; it is only when African-Americans accept that their community is also at risk that education and prevention campaigns will be effective.

Mr. Speaker, these disturbing statistics demonstrate that while we may have won some battles against HIV/AIDS, the war is far from over. Programs aimed at education and prevention must be expanded, and treatment options must be available to all Americans. It is my hope that National Black HIV/AIDS Awareness Day will draw attention to the effects of this terrible disease on the African-American community and remove some of the stigma associated with the disease.

Paying Tribute to Lee Bahrych

HON. SCOTT McINNIS
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. McINNIS. Mr. Speaker, it is my distinct pleasure to pay tribute today to a woman whose life is the very embodiment of kindness, selflessness and love. Ms. Lee Bahrych is both inspirational and courageous, and a true testament to the inherent greatness that resides in all of us.

During her lifetime, Lee has consistently given her time, effort and love to others, and it is with a great deal of satisfaction and pride that I pay tribute to her as we celebrate her tremendous accomplishment of being named the recipient of the Colorado Women 2002 Power of One Award.

Lee’s long list of accomplishments is as impressive as the award being bestowed upon her today. Thursday, February 7, 2002

Mr. McINNIS. Mr. Speaker, it is my distinct pleasure to pay tribute today to a woman whose life is the very embodiment of kindness, selflessness and love. Ms. Lee Bahrych is both inspirational and courageous, and a true testament to the inherent greatness that resides in all of humanity. Throughout her life, she has consistently given her time, effort and love to others, and it is with a great deal of satisfaction and pride that I pay tribute to her as we celebrate her tremendous accomplishment of being named the recipient of the Colorado Women 2002 Power of One Award.
Governors and other political leaders from the state, recording humorous, sad, dramatic and moving stories that will forever be preserved because of Lee's hard work and passion. She is also a talented woodworker, having crafted numerous pieces of fine furniture; a white water rafter, having conquered some of the toughest rivers in the world; and a mother of three successful daughters. She is truly a remarkable woman, who has lived her life in a manner befitting her remarkable character and personality.

Mr. Speaker, I am honored to stand before you today in order to bring the life of such an extraordinarily caring and compassionate woman to the attention of this body of Congress. Lee Bahrych has lived a truly remarkable life, and I, along with the people of Colorado whose lives she has so profoundly affected and enriched, are eternally grateful for everything she has done. I wish to offer her my sincere congratulations today on being named the recipient of the Colorado Women 2002 Power of One Award, and wish her all the best in her future endeavors.

CONGRATULATING NANCY PELOSI
OF DEMOCRATIC WHIP

HON. DAVID E. BONIOR
OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. BONIOR. Mr. Speaker, one of the things we all prize and value is the friendships each of us have made with our colleagues, our staff, and that work in this building and on the Hill. It is indeed a unique place where lasting friendships are made—and that is among the many things that make this a special place to work.

As Wallace Stegner once wrote, “Friendship is a relationship that has no formal shape . . . there are no rules . . . or obligations . . . or bonds, as in marriage or the family. It is held together by neither law . . . nor property . . . nor blood, there is no glue in it but mutual liking. It is therefore rare.” Nancy Pelosi is such a wonderful, bright and strong person, and I treasure her friendship. Maya Angelou once stated that “the most called-upon prerequisite of a friend is an accessible ear.” And I’m sure Nancy will master the art of lending her ear to over 200 people all at the same time!

From the moment she first arrived in 1987, it was clear that Nancy Pelosi not only had leadership skills, but that she had steadfast resolve and determination. When I look at her career, I can think of no one whose work has been dedicated to serving as a champion for the basic values of human rights, freedom and democracy.

She was one of the first Members to join the Central American working group to promote peace and democracy in the region. She was one of the first to raise our awareness about the need to invest in breast cancer and HIV/AIDS research. She wouldn’t let Congress go home in 1996 without passing a law to protect the historic Presidio park in San Francisco. She taught us that in order to tackle the basic problems we need to allow some of the and their families to plan for their future. And we need to ensure they have enough resources to raise their children.

But when she led the fight on our trade relationship with China, the world knew just how committed and focused Nancy Pelosi could be. She never, ever forgot the tens of thousands of political prisoners and dissidents that were being held in Chinese prisons for simply trying to express themselves freely. And she was undaunted for the release of dissident Wei Jing Sheng [Way Zhong Zang] from Chinese prison.

Nancy never lost sight of the basic values of democracy, and her belief, her tenacity, and her commitment to those values could not be challenged. Her words came to mind; I think we all remember the lone Chinese dissident standing in front of a tank in Tiananmen Square. Wherever that tank went, he tried to stop it. He was standing up for his belief that Chinese citizens should be treated with dignity, respect, and should have the right of free expression. Every time I see that often-played film on the news, or see that picture in a magazine, I think of NANCY.

NANCY is like that dissident; wherever there is injustice, wherever there is inhumanity, wherever there is indecency, NANCY will stand firmly in the way. She will have the courage to stand up and say, “that’s not right,” and you know what? Others will follow. That’s why she is a leader.

As our whip, NANCY will get our votes, but she will also raise our consciousness. She will remind all of us about what’s important, about why we are here, and she will never let us forget where we came from. She will lead us by example, and she will push us to be better Members and better citizens. She will, to paraphrase Eleanor Roosevelt, make us do the things we can’t. And in many ways, today’s swearing in is just another example of how NANCY has followed the words of John F. Kennedy, “Things do not happen. Things are made to happen.”

I have no doubt NANCY will help us all do the things we think we can’t, and she will make these things happen.

Congratulations to NANCY on earning the position of Democratic Whip.

EXPRESSING SENSE OF HOUSE
THAT SCHEDULED TAX RELIEF SHOULD NOT BE SUSPENDED OR REPEALED

SPEECH OF
HON. JOHN D. DINGELL
OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 6, 2002

Mr. DINGELL. Mr. Speaker, I rise in strong opposition to this farcical, time-wasting resolution.

Have we no real work to do? We have a duty to protect our great nation in times of crisis and war. We do not, however, have a duty to help our Republican colleagues look good for their fat cat buddies through an unbalanced and, frankly, unfair tax cut like the one passed last year.

The tax cut was passed; that is over. I would now, however, ask my colleagues to join me in opposing this ridiculous resolution today.

I would further ask that my colleagues join me in cosponsoring a bill introduced by my good friend from Massachusetts, Representa-
Through community action such as this, the American tradition of tolerance and acceptance will continue to thrive.

The resolution that I introduce today is modeled after the one organized by my constituents in Hayward. As the resolution states, judging people by appearance, color of skin, or religious beliefs is contrary to the fundamental principles of our country. Racism undermines our unity as a people and leads to social unrest and alienation. Therefore, there truly is no room for racism in our society.

During this time of heightened tension, we must be particularly vigilant to protect the rights of all Americans, regardless of color or creed. I applaud my constituents in Hayward, California for their campaign against racism and I am pleased to introduce this resolution on their behalf.

THE TANF REAUTHORIZATION ACT OF 2001

HON. JUANITA MILLENDER-McDONALD
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Ms. MILLENDER-McDONALD. Mr. Speaker, all too often, we forget that work-first policies do not suit all individuals. We must remember that—when we talk about adults—we are also talking about families—and families include children.

While their parents are away from home at work, children require quality—affordable—child-care. It is an unfortunate reality that many of the jobs performed by parents supported by TANF involve working late at night or at irregular hours—in fact, at the very times when it is extremely hard to find safe, affordable child-care. These circumstances are particularly difficult for families with young children and children with disabilities.

Even when the parents are able to find child-care, they often find that their jobs do not pay enough to cover food, housing and utilities. Stretching those dollars to cover the cost of child-care can be extremely difficult for low-income families.

I have co-sponsored the TANF Reauthorization Act of 2001 (H.R. 3113) because—as we continue to emphasize work as a means to achieving economic security—we must stand up for working families by making safe, quality, affordable child-care accessible to all children.

PAYING TRIBUTE TO WALT WINKLER

HON. SCOTT MCINNIS
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. MCINNIS. Mr. Speaker, it is with profound sadness that I pay tribute today to Mr. Waldemar “Walt” Winkler, a good friend of mine and a good friend to all who knew and loved him. Walt was a man of unquestioned integrity and of unparalleled morality. He will be sorely missed by each and every person whose life he touched, and I am no exception. As his family mourns his loss, I believe it is appropriate to remember Walt and pay tribute to him for his contributions to his city, his state and his country.

Walt, who was born on October 27, 1912, was an avid outdoorsman who dedicated his life to his nation and to the principles of forestry. He received a forestry degree from the University of Minnesota and worked for the U.S. Forest Service shortly after graduating. When Pearl Harbor was attacked, Walt joined the Air Force and fought bravely in the European Theatre. After returning from the war, he went back to work for the U.S. Forest Service. He was also an avid photographer, and his photo, “Medicine Bow National Forest” in 1957, was sold to the National Geographic.

Walt was not only a soldier and a trusted government employee, but he was also a dedicated volunteer. He selflessly gave his time to the Boy Scouts of America, the American Red Cross, the Rotary Club, the American Legion and the Society of American Foresters. He was also an avid painter and sportsman. He is survived by his loving wife, Jane, his son Waldemar Jr., brother Clyde, daughter-in-law Lisa Pedolsky and granddaughter Merritt.

Mr. Speaker, we are all terribly saddened by the loss of Walt Winkler, but take comfort in the knowledge that his contribution will continue to thrive. Walt Winkler’s life is the very embodiment of all that makes this country great, and I am deeply honored to be able to bring his life to the attention of this body of Congress.

ELECTION FUND FREE CHOICE AND SAVINGS ACT

HON. J.C. WATTS, JR.
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. WATTS of Oklahoma, Mr. Speaker, I am pleased to introduce legislation today that will strengthen our political parties and at the same time reduce our federal deficit.

The bill I am introducing today, the Election Fund Free Choice and Savings Act of 2002, reduces the deficit by providing that contributions made to the Presidential Election Campaign Fund must be made with after-tax additions to the contributor’s regular tax payment. This would provide for a truly voluntary contribution from the citizen rather than a regular tax payment.

Additionally, the bill provides free choice by allowing taxpayers to choose to designate contributions to the Fund to a particular political party.

For over 25 years, presidential elections have been financed largely through public funds which are raised through a voluntary tax checkoff. All Americans are familiar with the checkoff box for the Presidential Election Campaign Fund which first appeared on their tax forms in 1972. By checking the box, taxpayers allocate dollars from the Treasury to be distributed to the political parties, nominees, and party nominating conventions. The taxpayer has no voice as to whom these funds go or where these funds will be spent.

My proposal allows taxpayers who contribute to the Fund to have the option of designating a particular political party to receive their contribution. This free choice for American taxpayers would recognize the importance of America’s political parties in our electoral system. It would strengthen the parties’ ability to educate citizens, to register new voters and to promote voting in general.

Furthermore, it would assure the taxpayer that their contribution is not going to an individual who holds political views in opposition to their own.

Additionally, by requiring that contributions to the Fund be made with after-tax dollars, the federal deficit is reduced substantially. In 2000 the Fund disbursed over $200 million to candidates. In the future these funds would stay in the Treasury or the Social Security Trust Fund and help to pay down the national debt.

I encourage my colleagues to join me in cosponsoring this important reform to the Presidential Election Campaign Fund. It is a simple question of fairness and fiscal discipline that merits your support.

PERSONAL EXPLANATION

HON. MICHAEL G. OXLEY
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. OXLEY. Mr. Speaker, during today’s rollcall votes on S. 1888, H. Con. Res. 312, H.J. Res. 82, and ordering the previous question on H. Res. 342, I was in Ohio attending the funeral of a family member. Had I been present, I would have voted in favor of each of these measures.

TRIBUTE TO COLONEL PETER T. BENTLEY

HON. KEN CALVERT
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. CALVERT. Mr. Speaker, I rise today to honor and pay tribute to an individual whose dedication to the community and to the overall well-being of California’s Inland Empire and the Nation is unparalleled—Colonel Peter T. Bentley.

Calvin Coolidge, America’s 31st President, once said, “Patriotism is easy to understand in America; it means looking out for yourself by looking out for your country.” On Saturday February 9th 2002, Colonel Bentley will be honored for over 30 years of distinguished military service in which he dedicated his career in protecting fellow Americans.

Colonel Bentley is the outgoing commander of the Air Force Reserve Command’s 452nd Air Mobility Wing at March Air Reserve Base in Riverside California. The wing is the Air Force Reserve’s only unit-equipped amphibious wing with 18 C-141s, 10 KC-135Rs and more than 4,000 reservists.

With true valor and love of country, Colonel Bentley voluntarily enlisted in the United States Air Force in 1970 through Officer Training School in Lackland Air Force Base, Texas. He has served in a variety of flying, command and staff positions throughout his career in the Air Force and Air Force Reserve. He is a command pilot with more than 8,000 hours in air
refueling, cargo and troop transport aircraft. Colonel Bentley is a veteran of the Southeast Asia conflict having flown 60 combat hours there.

Throughout his career, Colonel Bentley earned numerous medals some of which include the Air Medal, National Defense Medal, Air Force Achievement Medal with one oak leaf cluster, the Armed Forces Expeditionary Medal with service star and the Vietnam Service Medal. His commitment to service and the protection of America and her citizens is an example of the greatness that exists in this Nation.

Mr. Speaker, in my district of Riverside, California we are fortunate to have dynamic and dedicated individuals who give unselfishly of their time, talents and their lives to ensure the well-being of our city, state, nation and in Colonel Peter T. Bentley’s case—world.

TRIBUTE TO REGIS COLLEGE OF WESTON, MASSACHUSETTS ON ITS 75TH ANNIVERSARY

HON. EDWARD J. MARKEY OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Thursday, February 7, 2002

Mr. MARKEY. Mr. Speaker, I rise to pay tribute to Regis College of Weston, Massachusetts on its 75th anniversary.

Founded in 1927 by the Congregation of Sisters of St. Joseph of Boston, Regis College is one of the leading Catholic liberal arts and sciences college for women. With more than 10,000 graduates world wide, the Regis college curriculum provides an intellectual base from which its students can acquire the values, ideas, techniques and habits which allow continual self-education. Regis College is committed to exploring the needs and problems of the changing world and thus shapes the liberal arts curriculum to assure graduates an excellent foundation for future success.

As a women’s college, Regis is devoted to building awareness of women's roles in society and provides a solid structure for women to develop into leaders of the future. I commend Regis College on its successes and its 75th anniversary.

THANK YOU, MARS, FOR THE RED, WHITE, AND BLUE M&M’S

HON. JAMES P. MORAN OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, February 7, 2002

Mr. MORAN of Virginia. Mr. Speaker, I stand before this chamber today to recognize the efforts of one of the Commonwealth of Virginia’s foremost corporate citizens Mars, Incorporated based in McLean, Virginia. The Mars family and Mars associates have a long history of support for this nation. Mars, Incorporated’s M&M’s were a favorite of American GIs serving in World War II. In those days, the candy was packaged in cardboard tubes, and were both sold to servicemen and included in C-rations. They were a convenient snack that existed without in any climate. Today, American servicemen and women will commonly find M&M’s in the “Meal-Ready-to-Eat” packages issued to them in the field.

Immediately following the attacks on September 11, Mars associates wanted to do something to help the rescue and recovery efforts in New York City and at the Pentagon. These plant associates came up with the idea of producing special M&M’s, in Red, White and Blue colors, to be distributed to the rescue workers carrying out their duty in lower Manhattan and at the Pentagon. Mars associates produced and sent rescue and recovery workers over 500 cases of these special M&M’s.

As word of these special candies circulated, Mars, Incorporated has been deluged with requests from consumers for the Red, White and Blue M&M’s. In response, Mars, Incorporated is partnering with the American Red Cross to develop a program through which Red, White and Blue M&M’s will be made available for retail sale with 100% of the profits going to the American Red Cross disaster relief funds. Red, White and Blue M&M’s are also on their way to military commissaries around the country.

In the same spirit, other Mars, Incorporated facilities and subsidiaries also stepped up to help. On the date of the terrorist attacks, a company promotional vehicle was in Boston. When Mars, Incorporated became aware of the attack on the World Trade Center, it immediately diverted its vehicle to New York, initially to Shea Stadium, where media reports indicated that rescue workers would be congregating after their shifts. With its working kitchen and self-contained power generation, the New York Police Department dispatched the vehicle to Ground Zero. Beginning on the evening of September 11, the vehicle and crew provided over 10,000 hot meals, along with coffee and snacks.

I stand today in salute of the efforts by Mars, Incorporated. May their actions be a guide to other corporations, demonstrating that successful corporations can also be good corporate citizens and lend a hand in our nation’s time of great need.

PAYING TRIBUTE TO STEVE SAMEK

HON. SCOTT McNINIS OF COLORADO
IN THE HOUSE OF REPRESENTATIVES

Thursday, February 7, 2002

Mr. McNINIS. Mr. Speaker, I rise to take this opportunity to recognize an outstanding individual who has dedicated his life to serve and protect the citizens of the State of Colorado. Sergeant Steve Samek of the Pueblo Police Department has faithfully served his fellow Coloradans for over twenty-six years. After a long and successful career as one of Colorado’s finest, Steve announced his retirement from the force in December of last year. As he looks forward to a new career, I would like to take this time to highlight Steve’s service to his community.

Steve has faithfully served the Pueblo Police Department in various capacities throughout his long career. As a member of the Narcotics Division, he worked to keep our streets safe and free of drugs. He trained to defend our citizens and protect their lives as a supervisor of the department’s SWAT team. Most recently, he headed the Internal Affairs Division to ensure our peace officers are responsible in the enforcement of our laws and properly execute their role in the community. I understand his retirement will not last long, since a body armor manufacturer has recently acquired his expertise and I am confident that the experience and diligence Steve has shown in his dedication to law enforcement will serve him well as he prepares to help protect his fellow officers.

Mr. Speaker, as a former law enforcement officer, I am well aware of the dangers and hazards our peace officers face today. These individuals work long hours, weekends, and holidays to guarantee our fellow citizen’s rights and protection. They work tirelessly and with great sacrifice to their personal and family lives to ensure our freedoms remain strong in our homes and communities. Their service and dedication deserve the recognition and thanks of this body of Congress and this is why I bring the name of officers like Steve Samek to light today. I wish you all the best Steve and good luck in your future endeavors. Thanks for your service to Pueblo, Colorado.

TRIBUTE TO MARTIN AND GRACIA BURNHAM

HON. TODD TIAHRT OF KANSAS
IN THE HOUSE OF REPRESENTATIVES

Thursday, February 7, 2002

Mr. TIAHRT. Mr. Speaker, today marks the 257th day that Martin and Gracia Burnham have been help captive by Muslim terrorists in the Philippines.

Martin and Gracia Burnham have devoted their lives to helping others as missionaries with the New Tribes Mission since 1985. They have been stationed in the Philippines where Martin flies medical supplies to those in need and they both help with education.

The Burnhams inspire all those they meet with their selflessness, energy, infectious laughter, gentle spirits, overwhelming faith and love of life.

It is heartbreaking for the Burnham’s loved ones to know that there is little they can do to help Martin and Gracia in their hour of greatest need—the hour that for so many others Martin and Gracia committed their lives to serving.

In closing, Monday, February 11th is the 15th birthday of Martin and Gracia’s oldest son, Jeffrey. Unfortunately it seems that Jeff, like his siblings Mindy and Zach, will have to celebrate his birthday without his parents. I ask that you join me in sending Jeff warm birthday wishes and praying that he receives the present he most wants—his parents’ safe release.

CROSSROADS MIDDLE/HIGH SCHOOL

HON. BOB BARR OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, February 7, 2002

Mr. BARR of Georgia. Mr. Speaker, Cherokee County is proud not only of its traditional school system, but also its emerging programs that reach out to students with additional needs—students who are bright and full of potential, but do not do not thrive in traditional...
routines found in contemporary middle and high schools. I recently had the pleasure of visiting one such school, and would like to take a moment to highlight CrossRoads Middle/High School for its innovative teaching skills and exemplary efforts in teaching the youth of our community.

CrossRoads is an “alternative school,” yet the staff is quick to point out “alternative” is not a label that refers to “bad” children. It is a school that provides extra needed attention for students who may have academic or behavioral problems, such as attention deficit disorder or low attendance. According to principal Jeffrey A. Garrett, “alternative doesn’t mean bad but rather a different way of approaching school.

Students at CrossRoads are held to extremely strict guidelines regarding course work, as well as behavior. All students are forced to be accountable for their actions; and if they fail to meet the strict standards, they must leave the school. The most amazing thing is, even students originally forced to attend the school are genuinely committed to change. They quickly learn to appreciate the approach at CrossRoads, which makes them accountable, and do all they can to avoid being discharged from the school.

The school has developed a clear-cut system of communication between teachers and students, providing definitive steps for handing turn assignments in early. Behavior is turned in the same day of the following week; or a week in advance. They are then required to do all they can to avoid being discharged from the school.

Students are given ample time to prepare and prove their socialization skills, and prepare to turn to learn a new academic process, improve their literacy, and their appreciation for history. They must return to move on, either back to other schools, or on to post-secondary education. CrossRoads provides a sound scholastic base of reading, math, science, and language arts. Teachers are committed to develop not only child’s mind but also his or her self-worth, leading them to reach towards their full potential as leaders of tomorrow.

CENTRAL NEW JERSEY HONORS ARTIST LAUREATE AND DEAN OF ARTISTS TOM MALLOY

HON. RUSHD. HOLT
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. HOLT. Mr. Speaker, I rise today to recognize and honor the Dean of Artists, Mr. Tom Malloy, Trenton New Jersey’s Artist Laureate, and his myriad of contributions to Central New Jersey’s cultural heritage.

Mr. Malloy was born in 1912 to sharecroppers in South Carolina. His family moved to Trenton in 1923. It wasn’t until his mid-fifties, after a career that involved work in factories and unions, Mr. Malloy began to pursue his dream of becoming an artist.

Mr. Malloy has spent the last 3 decades capturing the essence of Central New Jersey and in particular, Trenton. Hailed locally for his watercolor paintings of Trenton, he tells the city’s history and architectural qualities, the city streets. It is said that, on request, Mr. Malloy can recapture and replicate an item or event as it appeared two and even three decades ago. His astute memory and talent will do much to convey the history and character of Trenton to future generations.

Though renowned for his artistic abilities, Tom Malloy’s keen sense of history and purpose are what propels his spirit into the hearts and lives of so many. In his words, “I’m very conscious of history. If you don’t understand history, you don’t understand who you are.” At this time in our Nation’s history, when we struggle to understand where we’re going and what is happening, his words ring true. We must know from where we’ve come, to know where we’re going.

It is with great pride that I join the distinguished Mayor of Trenton, the Honorable Douglas Palmer, and the proud arts community, in honoring Tom Malloy as Artist Laureate of Trenton. This distinction is a most appropriate tribute to this New Jersey hero. Mr. Malloy is truly a treasure in New Jersey’s cultural heritage. As such, his gentle spirit, is an inspiration to all Central New Jerseyans.

Therefore, Mr. Speaker, again, I rise to celebrate and honor this true New Jersey hero and treasure. I ask my colleagues to join me in recognizing Mr. Tom Malloy as the Artist Laureate of Trenton, New Jersey.

INTRODUCTION OF ENDANGERED SPECIES LEGISLATION

HON. RICHARD W. POMBO
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 7, 2002

Mr. POMBO. Mr. Speaker, the endangered species program is supposed to be geared to protect endangered and threatened species and restore them to a secure standing in their environment. It is a complex balance of priorities and responsibilities that needs to be examined with all affected parties in mind. But, we all know that the current administration of the ESA is creating situations in which landowner’s rights are compromised and the overzealous environmental agenda is advanced without a sufficient scientific basis, instead of actually recovering the species.

Some middle ground needs to be reached in reforming the ESA rather than forcing rigorous and inflexible implementation of federal regulations that have sweeping and often unintended effects.

First and foremost, the Secretary of the Interior needs to be required to use the best available science in all of the decisions made and needs to give greater preference to information that is empirical and peer reviewed. That means that we can all have greater confidence in the decisions made under the ESA. No federal agency, and certainly not the U.S. Fish and Wildlife Service, are infallible or free from political agendas.

Mr. Speaker, I am also new emphasis on the need to use sound science in every aspect of the ESA from the listing process through recovery. Too often rhetoric and emotion are
used in place of facts. One of the pieces of legislation that I am introducing today is based on sound science. It will set up an improved petition process for the potential listing of a species; it also sets up an independent review board, free of political agendas, to evaluate the evidence and scientific findings of all petitions for listing and review jeopardy opinions affiliated with candidate species; and it will set limitations on re-petitioning so that the process can be finalized and settled without a drawn out, fruitless process that bogs down our legal and political system.

Also, the ESA needs to have stronger provisions to recognize private property rights. Private landowners must have the ability to voluntarily participate in the recovery of a species, and they especially need to have a stronger voice in public hearings. One of the other bills I am introducing will streamline the lines of communication and the process to convey information to all affected parties; and it will also establish requirements for conducting public hearings, namely that the Administrative Procedure Act has to be followed.

Actions carried out in the name of the Endangered Species Act have had unintended consequences, especially on local growth and private property rights. We need to address these occurrences to make compliance with the ESA more agreeable and ensure that unfortunate situations that recently happened in the Klamath Basin will no longer occur.

The last bill I am introducing will set requirements to designate habitat. These improved protections for endangered species habitats will help the species recover, but will also enable the Secretary of the Interior to make the best decision for all.

I urge my colleagues to support prompt passage of these bills to provide common sense reform to the ESA so that we can help threatened and endangered species, but we can also provide incentives and assurances to all Americans that the ESA will not be used as a tool of the environmental movement to lock up lands. People need to believe that their Federal Government is making decisions, which affect their lives on a daily basis, are scientifically sound and have their best interests in mind. I believe that my three bills are a step in that direction.
HIGHLIGHTS

Senate passed Radio Free Afghanistan Act.

Senate

Chamber Action

Routine Proceedings, pages S441–S511

Measures Introduced: Ten bills and two resolutions were introduced, as follows: S. 1914–1923, S.J. Res. 31, and S. Res. 205.

Measures Reported:

S. 396, to provide for national quadrennial summits on small business and State summits on small business, to establish the White House Quadrennial Commission on Small Business. (S. Rept. No. 107–136)

Measures Passed:

Radio Free Afghanistan Act: Committee on Foreign Relations was discharged from further consideration of H.R. 2998, to authorize the establishment of Radio Free Afghanistan, and the bill was then passed, after striking all after the enacting clause and inserting in lieu thereof the text of S. 1779, Senate companion measure, as amended.

Subsequently, S. 1779 was returned to the Senate calendar.

Federal Farm Bill: Senate continued consideration of S. 1731, to strengthen the safety net for agricultural producers, to enhance resource conservation and rural development, to provide for farm credit, agricultural research, nutrition, and related programs, to ensure consumers abundant food and fiber, taking action on the following amendments proposed there-to:

Adopted:

By 96 yeas to 1 nay (Vote No. 17), Durbin/Lugar Modified Amendment No. 2821 (to Amendment No. 2471), to prevent individuals illegally in the United States for more than one year from receiving food stamps.

Dorgan Amendment No. 2826 (to Amendment No. 2471), to strengthen payment limitations for commodity payments and benefits and use the resulting savings to improve certain programs. (By 31 yeas to 66 nays (Vote No. 18), Senate earlier failed to table the amendment.)

By 93 yeas, 0 nays, 1 responding present (Vote No. 20), Carnahan Amendment No. 2830 (to Amendment No. 2471), to permanently reenact the family farmer bankruptcy provisions (chapter 12 of title 11, United States Code).

Rejected:

By 11 yeas to 85 nays (Vote No. 19), Lugar Amendment No. 2827 (to Amendment No. 2471), of a perfecting nature.

Pending:

Daschle (for Harkin) Amendment No. 2471, in the nature of a substitute.

Daschle motion to reconsider the vote (Vote No. 377—107th Congress, 1st Session) by which the second motion to invoke cloture on Daschle (for Harkin) Amendment No. 2471 (listed above) was not agreed to.

Crapo/Craig Amendment No. 2533 (to Amendment No. 2471), to strike the water conservation program.

Craig Amendment No. 2835 (to Amendment No. 2471), to provide for a study of a proposal to prohibit certain packers from owning, feeding, or controlling livestock.

A unanimous-consent agreement was reached providing for the consideration of certain amendments to be proposed to S. 1731; that upon disposition of all amendments, the bill be read a third time, and the Senate then proceed to H.R. 2646, House companion measure, that all after the enacting clause be stricken and the text of S. 1731, as amended, be inserted in lieu thereof; that the House bill be advanced to third reading, and the Senate then vote on passage of the bill; that upon passage, the Senate insist on its amendment, request a conference with the House on the disagreeing votes of the two Houses, and that the Chair be authorized to appoint conferees, with a ratio of 4 to 3; and that S. 1731 be returned to the Calendar without any intervening action or debate.
A unanimous-consent agreement was reached providing for further consideration of the bill at 9:30 a.m., on Friday, February 8, 2002.

Messages From the House:

Measures Referred:

Enrolled Bills Presented:

Executive Reports of Committees:

Additional Cosponsors:

Statements on Introduced Bills/Resolutions:

Additional Statements:

Amendments Submitted:

Authority for Committees to Meet:

Privilege of the Floor:

Record Votes: Four record votes were taken today. (Total—20)

Adjournment: Senate met at 10 a.m., and adjourned at 7:21 p.m., until 9:30 a.m., on Friday, February 8, 2002. (For Senate’s program, see the remarks of the Acting Majority Leader in today’s Record on page S511).

Committee Meetings

Committee on Appropriations: Subcommittee on Transportation concluded hearings on proposed budget estimates for fiscal year 2003 for the Department of Transportation, focusing on the Transportation Security Administration, after receiving testimony from Michael P. Jackson, Deputy Secretary, and John W. Magaw, Under Secretary for Security, both of the Department of Transportation.

Committee on Armed Services: Committee met with Members of the United Kingdom’s House of Commons Defence Committee.

Committee on Armed Services: Committee concluded open and closed hearings to examine the conduct of Operation Enduring Freedom, focusing on the role of the U.S. Central Command in America’s global war on terrorism, after receiving testimony from General Tommy R. Franks, USA, Commander in Chief, United States Central Command.

Committee on Banking, Housing, and Urban Affairs: Committee concluded hearings to examine the analysis of the failure and implications of Superior Bank, FSB, Hinsdale, Illinois, focusing on causes of the failure, external audit findings, and the effectiveness of federal supervision, after receiving testimony from Jeffrey Rush, Jr., Inspector General, Department of the Treasury; Gaston L. Gianni, Jr., Inspector General, Federal Deposit Insurance Corporation; and Thomas J. McCool, Managing Director for Financial Markets and Community Investment, General Accounting Office.

Committee on the Budget: Committee continued hearings on the President’s proposed budget request for fiscal year 2003, focusing on tax relief and fiscal discipline provisions, receiving testimony from Paul H. O’Neill, Secretary of the Treasury.

Hearings continue on Tuesday, February 12.

Committee on Foreign Relations: Committee concluded hearings to examine the future of the War on Terrorism, focusing on accomplishments to date, continuing terrorist threats, weapons of mass destruction, the U.S. role in the world, world alliances, peacekeeping, and globalization, after receiving testimony from Samuel R. Berger, Stonebridge International, Washington, D.C., former National Security Advisor; Gen. George A. Joulwan, USA (Ret.), General Dynamics, Arlington, Virginia, former NATO Allied Commander; and William Kristol, Weekly Standard, McLean, Virginia, on behalf of the Project for the New American Century.

Committee on Governmental Affairs: Committee concluded hearings S. 1867, to establish the National Commission on Terrorist Attacks Upon the United States, after receiving testimony from former Representative Dave McCurdy, Electronic Industries Alliance, McLean, Virginia, on behalf of the Commission to Assess the Organization of the Federal Government to Combat the Proliferation of Weapons of Mass Destruction (WMD Commission); Norman R. Augustine, United States Commission on National Security, Bethesda, Maryland; and Richard K. Betts, Columbia University Institute of War and Peace Studies, and Maurice Sonnenberg, Bear, Stearns and Co., Inc., both of New York, New York, both on behalf of the National Commission on Terrorism.

Committee on Governmental Affairs: Committee concluded hearings to examine the conduct of Operation Enduring Freedom, focusing on the role of the U.S. Central Command in America’s global war on terrorism, after receiving testimony from General Tommy R. Franks, USA, Commander in Chief, United States Central Command.

Committee on Health, Education, Labor, and Pensions: Committee concluded hearings to examine the impact of the collapse of Enron Corporation on its 401(k) pension plan investors and the Department of
Labor's role in enforcement and regulation under the Employee Retirement Income Security Act (ERISA), focusing on related pension plan reform proposals, after receiving testimony from Senators Boxer and Corzine; Representative Bentsen; Elaine L. Chao, Secretary of Labor; Steven E. Lacey, Portland General Electric, Salem, Oregon; Alicia H. Munnell, Boston College Carroll School of Management, Boston, Massachusetts; Dallas L. Salisbury, Employee Benefit Research Institute, Washington, D.C.; James Prentice, Administrative Committee of the Enron Corporation Savings Plan, Houston, Texas; Jan Fleetham, Bloomington, Minnesota; and Karl V. Farmer, New Hampshire.

TRIBAL TRUST FUND
Committee on Indian Affairs: Committee concluded oversight hearings on certain legislative proposals relating to the statute of limitations on claims against the United States related to the management of Indian tribal trust fund accounts, including S. 1857, to encourage the negotiated settlement of tribal claims, after receiving testimony from McCoy Williams, Acting Director, Financial Management and Assurance, General Accounting Office; Philip Hogen, Associate Solicitor, Division of Indian Affairs, Department of the Interior; and Charles Tillman, Intertribal Monitoring Association, Pawhuska, Oklahoma.

Hearings recessed subject to call.

NOMINATIONS
Committee on the Judiciary: Committee ordered favorably reported the nominations of Michael J. Melloy, of Iowa, to be United States Circuit Judge for the Eighth Circuit, Robert E. Blackburn, to be United States District Judge for the District of Colorado, David L. Bunning, to be United States District Judge for the Eastern District of Kentucky; James E. Gritzner, to be United States District Judge for the Southern District of Iowa, Cindy K. Jorgenson, to be United States District Judge for the District of Arizona, Richard J. Leon, of Maryland, to be United States District Judge for the District of Columbia, Jay C. Zainey, to be United States District Judge for the Eastern District of Louisiana, Thomas P. Colantuono, to be United States Attorney for the District of New Hampshire, James K. Olson, Executive Vice President, Human Resources, Community Relations, and Building Services; and Mikie Rath, Benefits Manager; and public witnesses.

ENRON FINANCIAL COLLAPSE

Committee on Energy and Commerce: Subcommittee on Oversight and Investigations continued hearings on the Financial Collapse of Enron Corp. Testimony was heard from the following officials of Enron Corporation: Chief Risk Officer; Jeffrey McMahon, President and Chief Operating Officer; Jordan Mintz, Vice President and General Counsel for Corporate Development; Herbert S. Winokur, Jr., member, Board of Directors, Chairman, Finance Committee; and Robert Jaedicke, member, Board of Directors and Chairman of Audit and Compliance Committee; Thomas H. Bauer, Partner, Anderson LLP; Jeffrey K. Skilling, former President and CEO, Enron Corporation; and a public witness.

In refusing to give testimony, the following individuals invoked Fifth Amendment privileges: Andrew S. Fastow, former Chief Financial Officer, Enron Corporation; Michael J. Kopper, former Managing Director, Enron Global Finance; Richard A. Causey, Chief Accounting Officer and Richard B. Buy, Chief Risk Officer, both with Enron Corporation.

BUREAU OF INDIAN AFFAIRS

Committee on Government Reform: Subcommittee on Energy Policy, Natural Resources and Regulatory Affairs held a hearing on “Problems with the Bureau of Indian Affairs’ Tribal Recognition Process.” Testimony was heard from Representative Simmons; Barry T. Hill, Director, Natural Resources and Environment Division, GAO; Neal McCaleb, Assistant Secretary, Indian Affairs, Department of the Interior; and Tracy Toulou, Director, Office of Tribal Justice, Department of Justice.

DOD PROCUREMENT PROCESS

Committee on Government Reform: Subcommittee on National Security, Veterans Affairs, and International
Relations held a hearing on “The Standard Procurement System (SPS): Can the DOD Procurement Process be Standardized?” Testimony was heard from Joel Willemsen, Director, Information Technology Systems Issues, GAO; and the following officials of the Department of Defense: Robert J. Lieberman, Deputy Inspector General; Gary Thurston, Defense Contract Management Agency; Col. Jake Haynes, USA, Program Director, SPS Program Office, Defense Contract Management Agency; and Margaret Myers, Deputy Assistant Secretary, Command, Control, Communications, and Intelligence (C31).

CHILD CUSTODY PROTECTION ACT

Committee on the Judiciary: Subcommittee on the Constitution approved for full Committee action H.R. 476, Child Custody Protection Act.

COASTAL RESOURCES CONSERVATION ACT

MISCELLANEOUS MEASURES

Committee on Resources: Subcommittee on National Parks, Recreation and Public Lands held a hearing on the following bills: H. Res. 261, recognizing the historical significance of the Aquia sandstone quarries of Government Island in Stafford County, Virginia, for their contributions to the construction of the Capital of the United States; H.R. 2628, Muscle Shoals National Heritage Area Study Act of 2001; and H.R. 2643, Fort Clatsop National Memorial Expansion Act of 2001. Testimony was heard from Representatives Cramer, Wu, Baird and Mrs. Davis of Virginia; Randy Jones, Deputy Director, National Park Service, Department of the Interior; and public witnesses.

BIPARTISAN CAMPAIGN REFORM ACT

Committee on Rules: Granted, by voice vote, a structured rule providing 1 hour of debate on H.R. 2356, Bipartisan Campaign Reform Act of 2001. The rule waives all points of order against consideration of the bill. The rule provides that the bill shall be considered for debate on the legislative day following the adoption of the resolution immediately after the Pledge of Allegiance.

The rule provides that no amendment to the bill shall be in order except those printed in the Congressional Record. The rule provides that before consideration of any other amendment, it shall be in order to consider the amendments in the nature of a substitute as specified in section 2(b) of the resolution (Majority Leader, Representative Ney, Representative Shays). The rule provides that each amendment in the nature of a substitute that may be offered shall be considered in the order specified in section 2(b), shall be offered only by the Member specified or his designee, shall be considered as read, and shall each be debatable for 40 minutes equally divided and controlled by the proponent and an opponent. The rule waives all points of order against the amendments in the nature of a substitute, except clause 7 of rule XVI (prohibiting nongermane amendments) or clause 5(a) of rule XXI (prohibiting tax or tariff provisions in a bill not reported by a committee with jurisdiction over such measures).

The rule provides that if more than one amendment in the nature of a substitute is adopted, the one receiving the most affirmative votes shall be considered as adopted. In the case of a tie for the greater number of affirmative votes, only the last such amendment to receive that number of affirmative votes shall be considered as adopted.

The rule provides that after the disposition of the amendments in the nature of a substitute no other amendment shall be in order except those specified in section 3(b) of the resolution. The rule provides that the amendments specified in section 3(b) may only be offered by the Member designated in the resolution or his designee, shall be considered as read, shall be debatable for 20 minutes equally divided and controlled by the proponent and an opponent, shall not be subject to amendment, and shall not be subject to a demand for division of the question in the House or in the Committee of the Whole. The rule waives all points of order against the amendments specified in section 3(b), except clause 7 of rule XVI (prohibiting nongermane amendments) or clause 5(a) of rule XXI (prohibiting tax or tariff provisions in a bill not reported by a committee with jurisdiction over such measures).

The rule specifies that on the legislative day on which the resolution is adopted a Member must print the amendments specified in section 2(b) in the Congressional Record and make one announcement from the Floor describing each amendment by the number printed in the Congressional Record, which must include any amendment the Member intends to offer but must be limited to the number of amendments specified in section 3(b) for the bill or for each substitute specified in section 2(b).

The rule provides that if the Committee of the Whole should rise without coming to a resolution on the bill, it shall continue consideration immediately after the Pledge of Allegiance on each ensuing legislative day until the Committee reports the bill back to the House. The rule provides that any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole. The rule provides one motion to recommit
with or without instructions. Finally, the rule provides that H. Res. 203 is laid on the table.

AUTOMOTIVE RESEARCH PROGRAMS FUTURE
Committee on Science: Held a hearing on the Future of DOE’s Automotive Research Programs. Testimony was heard from David K. Garman, Assistant Secretary, Energy Efficiency and Renewable Energy, Department of Energy; and public witnesses.

Congressional Record

The public proceedings of each House of Congress, as reported by the Official Reporters thereof, are printed pursuant to directions of the Joint Committee on Printing as authorized by appropriate provisions of Title 44, United States Code, and published for each day that one or both Houses are in session, excepting very infrequent instances when two or more unusually small consecutive issues are printed at one time. Public access to the Congressional Record is available online through GPO Access, a service of the Government Printing Office, free of charge to the user. The online database is updated each day the Congressional Record is published. The database includes both text and graphics from the beginning of the 103d Congress, 2d session (January 1994) forward. It is available through GPO Access at www.gpo.gov/gpoaccess. Customers can also access this information with WAIS client software, via telnet at swais.access.gpo.gov, or dial-in using communications software and a modem at (202) 512-1800. Questions or comments regarding this database or GPO Access can be directed to the GPO Access User Support Team at: E-Mail: gpoaccess@gpo.gov; Phone 1-888-293-6498 (toll-free); 202-512-1800 (D.C. area); Fax: 202-512-1262. The Team’s hours of availability are Monday through Friday, 7:00 a.m. to 5:30 p.m. Eastern Standard Time, except Federal holidays.

The Congressional Record paper and 24x microfiche will be furnished by mail to subscribers, free of postage, at the following prices: paper edition, $197.00 for six months; $393.00 for a year; or purchased for $4.00 per issue, payable in advance; microfiche edition, $141.00 per year, or purchased for $1.50 per issue payable in advance. The semimonthly Congressional Record Index may be purchased for the same per issue prices. To place an order for any of these products, visit the U.S. Government Online Bookstore at: bookstore.gpo.gov. Mail orders to: Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15256-7954, or phone orders to (202) 512-1800, or fax to (202) 512-2250. Remit check or money order, made payable to the Superintendent of Documents, or use VISA, MasterCard, Discover, or GPO Deposit Account.

Following each session of Congress, the daily Congressional Record is revised, printed, permanently bound and sold by the Superintendent of Documents in individual parts or by sets. With the exception of copyrighted articles, there are no restrictions on the republication of material from the Congressional Record.
