The House met at 12:30 p.m. and was called to order by the Speaker pro tempore (Mr. CULBERSON).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC, March 5, 2002.

I hereby appoint the Honorable John ARNEY CULBERSON to act as Speaker pro tempore on this day.

J. DENNIS HASTERT, Speaker of the House of Representatives.

MORNING HOUR DEBATES

The SPEAKER pro tempore. Pursuant to the order of the House of January 23, 2002, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning hour debates. The Chair will alternate recognition between the parties, with each party limited to not to exceed 30 minutes, and each Member, except the majority leader, the minority leader, or the minority whip, limited to not to exceed 5 minutes.

The Chair recognizes the gentleman from Florida (Mr. STEARNS) for 5 minutes.

LEAVE NO VETERAN BEHIND WAITING FOR A MEDICAL APPOINTMENT

Mr. STEARNS. Mr. Speaker, our President often proudly uses a very enthusiastic phrase committing our Nation to better education for our young people, “Let us leave no child behind,” and rightly so. Children are the life-blood of our Nation. But today, with all of the military commitments overseas, I propose another rallying cry, leave no veteran behind waiting to get a doctor’s appointment.

Just as we must look ahead and nurture our children, we must look back in gratitude and take care of our veterans who have fought for freedom and democracy. Besides, investing in care for veterans is looking backward for timely veterans’ benefits can serve as a powerful incentive in steering young people towards armed services careers.

Not a day goes by when I do not hear from a frustrated veteran who cannot get an appointment at a VA outpatient clinic or an inpatient VA bed. I suspect the same is true for most of my colleagues. For too long too few resources have been provided to the VA health care system, resulting in understaffed, underfunded facilities.

Last week Salvatore Stanzioni, Assistant Executive Director of the Disabled American Veterans in Florida, presented to me some very disturbing trends. In my district and other parts of Florida, a wait of a year to see a primary care physician, and up to 16 months to see a specialist, is not unusual. Last Wednesday, Commander-in-Chief James Goldsmith of the Veterans of Foreign Wars shared that there are 37,000 veterans waiting for medical appointments in Florida. Intolerably, veterans are kept waiting for the most routine appointments, like diabetes or high cholesterol monitoring. If managed on a timely basis, these conditions are more comfortable to the veteran and less expensive to the American taxpayer.

Yesterday witnessed the bloodiest day of the Afghan War thus far. We mourn the nine American casualties of the downed Chinooks. In addition to those killed in battle, Defense Secretary Donald H. Rumsfeld reported that “there have been a number of wounded.” Thankfully, he relayed that “close to half of those are already back in the battle, and of the remainder, relatively few have life-threatening wounds.”

Today we ask American sons and daughters to give their blood to advance liberty and to halt terrorism, but when tomorrow comes, we show our veterans a chair in the waiting room. Especially egregious is the long wait for those who served for a long period and sustained a service-connected disability.

A Federal budget, just like that of a household or business, always faces difficult economic choices. But a household must first pay its creditors and buy necessary goods, and it buys artwork and entertainment. This is the most basic necessity of obligation. Just like a household, America ought to first meet its obligations to those whom it owes in exchange for their service.

To exacerbate matters, the government seems to shut the door on other options for health care accessibility. Alternatives have been proposed over the years on expanding VA health care options. We have debated Medicare subvention to little avail. This Thursday, the House Committee on Veterans’ Affairs and the Committee on Armed Services will again consider resource sharing between the two agencies.

Mr. Speaker, the gentleman from the First District of Florida (Mr. JEFF MILLER) knows this fight. He has not one single inpatient bed in his district. His veterans have to go to Biloxi, Mississippi, for hospitalization. Meanwhile, he has DOD facilities with available beds. Coordinating arrangements so that his veterans could use these DOD beds would solve this problem.

Mr. Speaker, we are a wartime Congress, and the Nation is in an era of renewed appreciation of soldiers, sailors, airmen and marines. Defense briefs top the headlines, and the box office movies feature current episodes on the wars in Somalia and in Vietnam. Let us embrace this mood and opportunity and commit this Congress to providing the attention and resources to the health care needs of those who have served. Yes, Mr. Speaker, let us leave
no child behind; but, similarly, let us leave no veteran behind waiting for a medical appointment.

SOCIAL SECURITY LOCKBOX

The SPEAKER pro tempore. Pursuant to the order of the House of January 23, 2002, the gentleman from Oregon (Mr. DeFAZIO) is recognized during morning hour debates for 5 minutes.

Mr. DeFAZIO. Mr. Speaker, over the last 5 years in the House, initiated by the Republican majority, something which I supported, we took a series of votes on something called the Social Security lockbox. Originally, some of my colleagues on the Democratic side opposed this. They said it was a mere gimmick on the part of the Republican majority and an attempt to restrain the social spending of the Clinton administration, and the Republican majority had no intention of safeguarding those funds.

I did not believe that, and I voted for it. I said, it makes sense to me, with the retirement of the baby boom near upon us, we should safeguard those funds. Because they are used only to pay the benefits for which they are intended by law.

Eight, ten times in the House of Representatives we voted for the lockbox, Social Security lockbox. Unfortunately, that was all superseded by a vote last March when tax cuts were voted on in the House, predicated on shaky economic assumptions that we would have huge and growing surpluses as far as the eye could see. So let us give the money back to the people. Of course, mostly to Americans who earn over $383,000 a year and have estates worth more than $5 million, but let us give it back. Over my objections and the objections of others, this rosy scenario was adopted. The Republican leadership, do not worry, the Social Security lockbox will still be there.

Here we are a year later. The lockbox is crushed, robbed, torn open, and the President has proposed in his budget to spend $1.5 trillion of the Social Security trust funds, those which were formerly intended to be placed in the lockbox, to fund tax cuts for the wealthy and other operations of the government over the next 10 years.

There is no more talk about a lockbox on the other side of the aisle with a Republican President who wants to give big tax cuts and gifts to the largest corporations and his friends. No, now they have got a new gimmick. What is it? Certificates. At taxpayer expense, we will send out to every person receiving Social Security, and, by the way, we no longer send them checks in the mail anymore because that is too expensive, but now for this special, one-time only offer, we will send out to everybody currently receiving Social Security and their survivors and others receiving Social Security benefits, saying the Social Security benefits which are being e-mailed to Americans’ bank accounts, do not worry, they will keep coming. We will ensure that. These are the same people that gave us the lockbox. Now we are going to have certificates.

Mr. Speaker, how about this certificate? This is a real certificate, and this is what the majority in the House, the Republicans, have to get serious about honoring. This is an irrefutable obligation of the United States of America. Look to this line, “This bond is uncontested in the hands of the Federal Old Age and Survivors Insurance Trust Fund Bond, supported by the full faith and credit of the United States.”

The United States has pledged the payment of the bond with respect to principal and interest. But in their rush to privatize Social Security and in their rush to give tax cuts to the most wealthy, they are questioning whether or not that is needed. In fact, Secretary O’Neill, the Secretary of the Treasury, appointed by George Bush, the President, said that this is worthless. He said, starting in 2016, when we will have to draw on the interest on these bonds, that is worthless. That means he is questioning every investor in America and around the world who thinks that U.S. Treasury Bonds are the safest haven.

I believe they are. I do not believe Secretary O’Neill when he says it is worthless. I believe he and the President and the Republican leadership here are trying to rush Congress into a hasty privatization plan which will actually accelerate the problems of Social Security in another thrust to help a few people to the disadvantage of the many.

Social Security, if we honor these bonds, with the full faith and credit of the United States Government as it says, with a Social Security trust fund which is totally 100 percent capable of paying 100 percent of the benefits through the year 2038. Starting in 2038, with conservative assumptions, not the rosy scenario that the Republican majority pushed through last year for the big tax cuts, but with conservative economic assumptions, it will have about a 25 to 27 percent problem. That is 73 percent of benefits could be paid for ever after 2038.

So we have to address that problem, that 25 to 27 percent problem starting in 36 years. But we do not address it by further reducing the trust fund, giving them to the wealthy in tax cuts, or privatizing the system in a way that reduces trust fund income for Social Security, because then we have created an even bigger problem.

Mr. Speaker, that is the real agenda here. They want to go after Social Security. They have already broken open the lockbox; now watch for the crack-erjack box top in the mail, the certificate that gives us a hollow promise.

The SPEAKER pro tempore. Pursuant to the order of the House of January 23, 2002, the gentleman from Indiana (Mr. PENCE) is recognized during morning hour debates for 5 minutes.

Mr. PENCE. Mr. Speaker, I am a strong advocate of this gimmick on the part of the Republican majority, this is an original co-sponsor of Presidential Trade Promotion Authority. I fought on the floor of this very Chamber to give this President the ability to negotiate trade deals for the United States of America and I believe the House should give the President his Trade Promotion Authority.

But the reality is, a few people to the disadvantage of the many, are being e-mailed to Americans coming. We will ensure that. These are the same people that gave us the lockbox. Now we are going to have certificates.

PROTECT U.S. STEEL MANUFACTURERS

The SPEAKER pro tempore. Pursuant to the order of the House of January 23, 2002, the gentleman from Indiana (Mr. PENCE) is recognized during morning hour debates for 5 minutes.

mountains of eastern Afghanistan are made of steel. Mr. Speaker; and the ability of the United States of America to manufacture steel, merchantable steel, is at the very essence of our ability to provide for the common defense. It is to strengthen our economy. In Indiana, 30,000 families make their livelihood in the steel industry. Increased efficiency and technological innovation combined with our hard-working employees have made the steel industry the envy of the world. Yet the policies have been rewarding uncompetitive and destructive behavior. Domestic steel production is vital to the national interest; it is vital to strengthening our economy.

I commend the President of the United States today as we anticipate his decision, selective tariffs, using section 201 of the Trade Act. It is important that we support the steel industry in America long term and preserve our ability to produce the arsenal of nations. This gives the enjoyment of freedom and hope all across the world.

PRESCRIPTION DRUGS

The SPEAKER pro tempore (Mr. CULVERSON). Pursuant to the order of the House of January 23, 2002, the gentleman from Ohio (Mr. BROWN) is recognized during morning hour debates for 5 minutes.

Mr. BROWN of Ohio. Mr. Speaker, recently the National Governors Association passed a resolution calling for action to prevent the brand-name drug industry from blocking access to lower-cost generic drugs. It turns out that the drug industry is cheating consumers out of literally billions of dollars in prescription drug savings by illegally and unethically keeping generic competitors off the market.

Choking, is it not, that the drug industry, through loopholes in the law to make sure that American consumers continue to pay higher prices than necessary for lifesaving products? We are talking about the same industry that charges Americans two and three and four times what it charges in other countries. We are talking about an industry that pulls American consumers with ads on TV and in magazines and on radio promoting a handful of drugs that just happen to be some of the most expensive drugs on the market.

As a matter of fact, the drug industry’s use of direct-to-consumer advertising to manipulate the public is just as insidious as the tricks the industry uses to keep generic competition off the market. The European Union does not permit direct-to-consumer advertising, neither does Japan nor Canada nor Israel. In fact, only one other country in the world, New Zealand, permits direct-to-consumer advertising of prescription drugs. That is because this advertising skews health care towards the newest, most expensive drugs, regardless of whether these drugs are the best alternative for patients and regardless of the impact on America’s health care bill.

The industry claims it is doing consumers a favor, that direct-to-consumer advertising is a breakthrough in consumer education. In 2000, the drug industry spent 1 percent of its industry’s 10,000 available prescription drugs. Ninety-five percent of all direct-to-consumer advertising was spent on just 50 of these 10,000 drugs. The drug industry claims its advertising is highly educational. Direct-to-consumer advertising is highly profitable, hardly highly educational.

Those 50 drugs I mentioned, the ones that were most heavily advertised in 2000, were responsible for half of the $21 billion increase in prescription drug spending. And about those 50 drugs, they are not for 50 different conditions. Most of those drugs are simply copycats of drugs.

We see ads for Vioxx and Celebrex, $239 million worth, which are alternative treatments for the same condition, arthritis. We see ads for Claritin and Zyrtec and Allegra to the tune of $227 million, all for the treatment of allergies. Billions of dollars are spent on medicines for fewer than 10 health problems. American consumers pay for those ads when we shell out two and three and four times more than consumers in any other country in the world. We pay for those ads when the 50 most heavily advertised drugs account for half of the dramatic annual increase in spending.

Prescription drug inflation is fueling double-digit increases in health care premiums, it is pushing State budgets into the red, and it is forcing seniors into poverty. And behind it all are romantic images of allergy-free people digging in their gardens and playing with their puppies.

The drug industry has a chokehold on the United States. They charge Americans more than any other consumer; they manipulate American consumers with questionable TV and print ads; and they block access to affordable medicines, even though 70 million Americans, many of them seniors, do not have the benefit of insurance and are paying hundreds of dollars out of pocket.

So where is the Bush administration? Why is George Bush not outraged about this? Where is his administration? The administration does not like to be perceived as catering to large corporations at the expense of American consumers. The administration bristles at the notion that it turned to Enron and big oil when it formulated its energy policy. They do not like it when you point out that they turned to the chemical companies when writing their environmental policy, that they turned to the insurance companies when they wrote the Patients’ Bill of Rights. And I am sure the administration would vehemently deny that their influence on prescription drug prices stems from their close ties to the drug industry. Well, the proof is in the pudding. This is a litmus test in the next year what this body does about prescription drug prices, both for the President and for every Member of Congress. We report to the American public, not to the drug industry. If the President and the Congress do not break loose from the drug industry’s chokehold, then it is reasonable to say that industry’s unbridled greed, then American voters should send us all packing.

It is as simple as that.

SOCIAL SECURITY

The SPEAKER pro tempore. Pursuant to the order of the House of January 23, 2002, the gentleman from Michigan (Mr. SMITH) is recognized during morning hour debates for 5 minutes.

Mr. SMITH of Michigan. Mr. Speaker, we are going to increase the debt limit of the United States in the next several days. Already, the debt limit of the United States, set at $5.95 trillion, is being apparently violated by having a debt greater than the debt limit set by the United States. I think we need a thorough discussion in this Chamber and in the Senate and certainly in the White House of how do we want to tax in the debt in the next 10 years. How deep do we want to go in debt? How much, if you will, mortgage do we want to leave to our children and our grandchildren.

It seems that it is reasonable to live within our means, to say that our spending today is so important that it justifies leaving a larger debt or a larger mortgage to our kids and our grandkids. If we want to spend money, then it is reasonable to say to the American people and be up-front with them that we are going to increase taxes and use those revenues for existing spending rather than, I suggest, hoodwinking the American people by increasing our borrowing. The borrowing is not as obvious as tax increases. Therefore, over the last 30 years, we have said we are going to borrow more and more as government gets larger and larger and, sadly, a lot of that borrowing has come from the trust funds.

Since 1983 when we last changed the Social Security system, and we changed it by increasing taxes and reducing benefits, we have had more revenue coming in from the Social Security tax, the so-called FICA tax, than needed to pay Social Security benefits. Just a footnote here to mention that Social Security is a system that is, and always has been, designed to tax current workers and use that money to pay current retirees. As the number of workers per retiree has diminished since we started the program in 1934, we have developed an obvious insolvency in the Social Security system.

I have heard some of my colleagues from the other side criticise some of the things the Republicans are doing. It is easy to demagogue this kind of program that so many seniors find so valuable. We now have over 50
percent of our seniors that depend on the money coming in from Social Security. So it scares the heck out of seniors when anybody suggests, that somebody is going to change Social Security.

Here are the facts: Social Security is going broke. Fifty years ago we had 40 workers for every one retiree. Today, there are three workers paying in their tax for every one retiree. The actuaries estimate that by 2025 there will be two workers paying in for every retiree. And by 2040 there will be one worker for each retiree. Can you imagine the taxes and the burden on that one worker, paying in Social Security, enough taxes to cover the Social Security benefits of one retiree? There is going to be a huge unfunded cost and the burden should not be placed on future taxpayers.

Look. Nobody is going to suggest that we stop our commitment of paying Social Security benefits. So this trust fund is only a booking record of the money that is going to come up with the money, starting in 2014 or 2015 or 2016. The only way to come up with the money is to either increase taxes or reduce benefits or increase borrowing. Increasing borrowing is the most politically likely to put our kids even further in debt. It is going to cost a lot of money; there is now an unfunded liability of $9 trillion in today’s dollars of the benefits that are needed to pay Social Security benefits over the next 75 years or above what is going to come in from the FICA tax. We need to deal with it but it depends on how we deal with it. Do you do nothing? And if you do nothing, the cost is going to be substantially greater than doing something and getting a better return on some of that money paid into Social Security.

In conclusion, Mr. Speaker, let me just say that the average retiree is going to get a 1.7 percent return on the money that they and their employer invested in Social Security. We can do better than that. There needs to be a transition to earn more for the program rather than demagoguing. Let us transition to invest more in Social Security. We can do substantially greater than doing something else with this money.

Mr. Speaker, there is a lot of talk these days about self-esteem. We do not want children to have low self-esteem. Whole curricula are developed about how to increase children’s self-esteem.

The truth is, marriage is one of the best mental health programs for children and adults. Children born or raised outside of marriage are more likely to suffer mental health problems, such as depression. Children whose parents are not married have lower school attendance, lower school performance. Teenagers whose parents are divorced are also more likely to have problems—substance abuse is more than children whose parents are married.

Married adults are significantly less likely to suffer from the problems of alcoholism and depression than non-married adults.

Mr. Speaker, I am not a mental health expert, but it seems to me that encouraging healthy marriages is a whole lot cheaper and more effective than picking up the pieces of broken marriages after it is too late.
high-level nuclear waste to Yucca Mountain proclaim that terrorists will have a more difficult time committing an act of terrorism at one singular site as opposed to 131 commercial nuclear reactors around the country.

Nonetheless, what this view does not take into account is how many opportunities terrorists will now be provided if this nuclear waste is transported through 43 States, past the homes, hospitals, and schools of over 123 million Americans. Seventy-seven thousand tons of nuclear waste will require at least 96,000 truck shipments over 3 decades, giving terrorists over 96,000 opportunities to target these shipments as the next act of heinous terrorism.

Mr. Speaker, I implore my colleagues to consider the safety and welfare of the 123 million Americans whose communities could be destroyed by transporting deadly nuclear waste throughout our entire country. Protect Americans from the next potential terrorist act. Stop Yucca Mountain.

IRAQ

(Rep. WILSON of South Carolina and Mr. HOYER were asked and given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, I rise today to express my support for President Bush in extending our war on terrorism to the countries that make up the axis of evil: Iran, Iraq, and North Korea. These countries have all been designated as state sponsors of terrorism, and all three are engaged in the proliferation of weapons of mass destruction.

Today, Iraq poses the most serious threat to America’s national security. Iraq and Iran were engaged in a war from 1980 to 1988 which killed approximately 1 million people. Just 3 years after this war was over, in 1991, Iraq invaded Kuwait. Two years after the Gulf War in 1993, Iraq tried to assassinate President George H.W. Bush when he visited Kuwait.

Iraq has consistently destabilized the Middle East over the past 20 years and is trying to acquire weapons of mass destruction which can be used against America and our allies. We should work with our allies to finally bring peace, stability, and democracy to the people of Iraq.

We must also prevent other nations from undermining our efforts to bring about a stable, democratic government in Iraq. Mr. Speaker, I fully support President Bush’s efforts to eradicating international terrorism, which threatens all free, democratic nations.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Georgia (Mr. LINDER) and the gentleman from Maryland (Mr. HOYER) will each control 20 minutes.

Mr. LINDER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to stand on behalf of awarding the Congressional Medal to former President Ronald Reagan and his wife Nancy Reagan, as amended.

The Clerk read as follows:

H. CON. RES. 305
Resolved by the House of Representatives (the Senate concurring), That the Rotunda of the Capitol for a ceremony to present a gold medal on behalf of Congress to former President Ronald Reagan and his wife Nancy Reagan (Physical preparations for the ceremony shall be carried out in accordance with such conditions as the Architect of the Capitol may prescribe).

The SPEAKER pro tempore.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Georgia (Mr. LINDER) and the gentleman from Maryland (Mr. HOYER) will each control 20 minutes.

Mr. HOYER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to stand on behalf of awarding the Congressional Medal to former President Ronald Reagan and his wife, Nancy.

I had a long-standing personal relationship with President Reagan, having traveled in his campaign plane going back to the East in 1976. He was a remarkable human being who knew who he was and what he was about, and he left office exactly as he entered it. Uninflated by the trappings of power, he came to do some things, he did them, and then he left.

On the night before he announced his candidacy for President in October of 1975, he gave a speech at the 20th anniversary celebration of the National Review. It was a remarkably confident, uplifting, and humorous speech; but toward the end of that speech, he looked at the world as we see it, and it was not all pretty.

He quoted something written 40 years earlier, or by Whittaker Chambers, a former Communist and popular writer in the 1940s and ’50s. He said, “It is idle to speak of saving western civilization because western civilization is already a wreck from within. That is why we can help a little more than snatch a fragment from the rack, or a handful of ash from the faggots, and bury them secretly in the flower pot against that day ages hence when a few men will dare to believe that there once was something else, that something else was thinkable; and that there are those who, at the dark moments, took loving care to preserve the tokens of hope and truth.”

Reagan was looking at a very, very dark picture in America, the failure to run for President, and he did not win. In some ways, it does not matter that he did not win in that race. The day after President Ford won the nomination in Kansas City, Ronald Reagan asked the friend who had followed him so ardently for the past year, and he told them that it was just the beginning, and that we would one day reach that shining city on the Hill.

Four years later, he ran for President again. It is valuable to remember what kind of circumstances the United States faced in 1980 as he ran for President. We have heard for the last 10 years that I have been here on this floor that the 1980s was a decade of greed and that he ran us into all kinds of trouble. But let us lay some facts on the table. Facts, as it has been said, are stubborn things.

When Ronald Reagan ran for President, we had interest rates of 21 percent, we had home mortgages at 17 percent, inflation at 14 percent, and double-digit unemployment. He faced these challenges on that January day when he was sworn into office, and he listed them one after the other. Then he told the American people that we can conquer this, because, after all, we are Americans.

Over the next 10 years, not Ronald Reagan and not government policy, but the American people, changed the world with a cut in taxes to take the burden of paying for government off the backs of small businesses, the creation of jobs, with a significant reduction in regulations across the board. The American people, over the next 8 or 10 years, created 4 million businesses and nearly 20 million new jobs. The revenues to the Federal Government after reducing taxes doubled from $519 billion in 1980 to $1 trillion 54 billion in 1990.

The American people are a generous sort and also increased their contributions to strangers, people they have never met, through charities from $48 billion in 1980 to around $100 billion in 1990. It is now $155 billion.

Ronald Reagan would be reluctant to take any credit for any of this. He set a tone. He set a tone for the United States, and they followed it. In the 4 years before he became President, from 1976 to 1980, communist influence had increased in 14 major areas around the world from Afghanistan to Zambia. When Ronald Reagan took office, he was facing probably the largest expansion of communist activity in the history of this past century.

As he left office, quietly, without braggart, without talking, communism was collapsing on its own. Shortly thereafter, the Berlin Wall fell, and the
whole idea of communism and socialism were both empirically and theoretically discredited. We now face expansions of freedom around the world.

He was an unassuming and decent man, and the American people saw that. They saw what he was, and they gave him two historic Presidential victories. But my favorite story about him was told by his friend of many, many years, Mike Deaver, who, while walking with Ronald Reagan on the streets of Manhattan in 1978, I believe it was, after he had run for President, and much of the world knew who he was from that campaign, he was walking down the street in Manhattan and saw someone inching toward him, wanting to get his autograph, thinking he knew who he was, but not sure.

Reagan, ever the polite gentleman, turned to him and put his hand out and said hello. The gentleman looked at Ronald Reagan and said, Could I get your autograph, Mr. Milland? Ronald Reagan said, Mike Milland, I wish you would move on. Mike Deaver said, why didn't you tell him who you were? Ronald Reagan said, I know who I am. He wanted to meet Ray Milland.

That is the kind of guy he was, the kind of President he was. He and Mrs. Reagan served to be honored with a Congressional Medal as a marvelous team in the history of this great country.

Mr. Speaker, I reserve the balance of my time.

Mr. HOYER. Mr. Speaker, I yield myself such time as I may consume.

I rise in support of the concurrent resolution to authorize a ceremony to present a Congressional Gold Medal to former President Ronald Reagan and to Nancy Reagan. I regret that President Reagan will not be present with us today.

H. R. 3591, enacted in the last Congress as Public Law 106–251, authorized presentation of this gold medal to our 40th President and our First Lady.

Mr. Speaker, President Reagan was a strong leader, both substantively in terms of policy and symbolically in terms of the image he projected to the American people. He was a significant figure at a critical point in time in our history. Ronald Reagan was clearly an effective advocate for his views, and he retained the affection of the American people throughout his Presidency. President Reagan was skilled at representing the office of the Presidency as well as his policies. He was an individual, as the gentleman from Georgia (Mr. LINDER) has said, simple, unassuming, profound in some ways and a thoroughly decent human being.

I want to take this opportunity as well to salute Nancy Reagan his wife, an active First Lady and a devoted spousal faith in the White House and in the difficult days since she has coped with the former President’s tragic Alzheimer’s disease. Nancy Reagan has been a tireless proponent of programs to prevent alcohol and drug abuse as well.

Mr. Speaker, I may disagree with the gentleman from Georgia (Mr. LINDER) in terms of some of the policies and some of the reasons for what has happened in America. We will have those kinds of differences appropriately. But what neither of us disagree on and what we both agree on is that Ronald Reagan is in fact a decent human being who cares greatly about his country, who cares about the people, who cares about freedom, and who cares about justice. He was a leader of significance, as I said earlier, a leader who made a difference, a leader who set before the world an image of freedom, a leader who was prepared to commit himself to the defense of freedom and, as a result, in my opinion, gave to those who would undermine freedom in the Kremlin and other places in the world second thoughts.

In the final analysis, I am convinced that Gorbachev, the leader of Soviet Union, looked at his people and said, Ronald Reagan, the Congress, the American people are prepared to pay the price of defending freedom and are not going to be defeated. We cannot compete, I am sure Gorbachev said, with a President, a Congress and a people with such resolve. As a result, I think, as the gentleman from Georgia (Mr. LINDER) has pointed out, shortly after the Reagan Presidency, communism was certainly in retreat, the Iron Curtain came down, the Berlin Wall, which he asked to be torn down, in fact was torn down.

So although near the close of his Presidency I differed on some policies and, frankly, agreed on others, but what we all can agree on is that this was an American who served his country well, an American who gave of himself, of his philosophy, of his intellect, of his devotion to country. Americans and America and, indeed, the world benefitted by that contribution.

I am pleased, Mr. Speaker, to rise with my gentleman from Georgia (Mr. LINDER), in support of this most appropriate use of the rotunda of the Capitol of the United States.

Mr. Speaker, I reserve the balance of my time.

Mr. LINDER. Mr. Speaker, I yield such time as he may consume to the gentleman from Nevada (Mr. GIBBONS). Mr. GIBBONS. Mr. Speaker, I thank my friend and colleague, the gentleman from Nevada (Mr. LINDER), for allowing me the time today to appear and present a few remarks on this bill.

Mr. Speaker, yesterday marked the 50th wedding anniversary of former President and First Lady Ronald and Nancy Reagan, a half a century of commitment not just to themselves and to each other but a commitment to the American people.

Mr. Speaker, today we plan for another milestone, the Congressional Gold Medal ceremony for this distinguished couple.

In the 106th Congress I, along with my good friend and colleague, the gentlewoman from Washington (Ms. DUNN), introduced legislation to award the Reagans the highest honor that Congress can bestow, the Congressional Gold Medal. Ronald and Nancy Reagan have dedicated their lives to promoting national pride and bettering the quality of life for all. Certainly the Congressional Gold Medal is a fitting tribute to their enduring commitment to public service.

Recently, I introduced House Concurrent Resolution 305 to authorize the use of the Capitol Rotunda for their Congressional Gold Medal award ceremony to be held on May 16 of this year.

The Reagans have stood as leaders and icons in our Nation’s history for years. A popular two-term governor and later as President of the United States, Ronald Reagan was dedicated to encouraging economic growth, recognizing the value of hard work and sparking hope and pride among all Americans. He believed that everyone’s abilities will take them. This principle became a guiding creed of Reagan’s Presidency as he successfully turned the tide of public cynicism and sparked a national renewal of faith and hope.

He fulfilled his pledge to restore the great confident roar of American progress, growth and optimism; and Americans once again believed in the good old-fashioned American dream.

Always standing by his side, President Reagan’s wife, Nancy, served as a great First Lady. Her distinguished leader in her own right. Perhaps her most notable and longest-lasting achievement was her “Just Say No” campaign aimed at preventing alcohol and drug abuse among our youth.

Even today, Mrs. Reagan continues to be an active public leader as a champion for increasing funding for research on Alzheimer’s disease.

Together, the Reagans have dedicated much of their lives to our Nation. Their leadership and service extended well beyond President Reagan’s tenure in office.

It has been an honor for me to lead the effort of awarding the Congressional Gold Medal to this deserving couple.

I encourage all of my colleagues to support this resolution which will allow for the Congressional Gold Medal ceremony to occur here, in the People’s House, our Nation’s Capitol.

Mr. LINDER. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Washington (Ms. DUNN).

Ms. DUNN. Mr. Speaker, today I rise in support of this resolution to allow the use of the Capitol to honor President and Mrs. Reagan.

I so much appreciate hearing the words of my colleague, the gentleman from Maryland (Mr. HOYER), who was eloquent in his description of how this Congress was able to bring home to this country and work across the aisle to achieve great things for the United States.
Two years ago the gentleman from Nevada (Mr. GIBBONS) and I sponsored a bill that awarded the Congressional Gold Medal to President Reagan and his wife and his long-time supporter, Mrs. Nancy Reagan. That bill, as the gentleman from Nevada told us, was passed unanimously; and it was signed by the President. With passage of today’s resolution we will have the privilege to present our Nation’s highest award to Mrs. Reagan this May in the Capitol Rotunda.

President Reagan delivered his second inaugural address in the Rotunda. I well remember that day because it was about one degree above zero and they actually canceled the parade to be held that day for the inauguration of the President. So President Reagan went ahead with his inaugural address, but he moved it to the Rotunda, so that has significance to us. In that address he personified our country as hopeful, big-hearted, idealistic, daring, decent, and fair. Those are the exact words I would use to describe President Reagan himself.

Together, the President and the First Lady dedicated their lives to lifting the American spirit and bettering the quality of life for all Americans. I continue and I know so many people also continue to be inspired by President Reagan’s ideals of lowering the tax burden on individual working Americans, of strengthening families, limiting the control of government and achieving peace through strength here for our United States.

In the early 1980s President Reagan’s policy and leadership lifted us out of a terrible economic situation. I well remember the record unemployment, the 21 percent interest rates, the double-digit inflation that we lived through during that time. He stated in his campaign that he would bring America back, and he did.

As we all know, the First Lady has been very instrumental in every Presidency. This is especially true of First Lady Nancy Reagan who traveled tirelessly around this Nation promoting her Just Say No campaign in order to stop substance abuse among young people. She knew she was not elected to office. She was not elected to office and yet she put to the best use the clout that she had as First Lady of this Nation to make what I believe was a lasting impact on our Nation’s youth.

President Reagan believed in the promise of the American dream. In an era of growing cynicism, they worked in their own upbeat and hopeful ways to make America a place where everybody can rise as high and as far as their ability will take them.

My best wishes go out to President and Mrs. Reagan who have just celebrated their 50th wedding anniversary. Although he has withdrawn from public life and we will be here forever to remember his accomplishments, his wife will come to receive this honor in the Rotunda on May 16. We will be there to greet her, to thank her for her constant support of this great man and the wonderful activities she herself initiated on behalf of our Nation’s youth. We will never forget their achievements.

Now it is time for us to honor these two individuals and to say thank you to our Nation’s most magnificent President and his First Lady, Nancy Reagan.

Mr. Speaker, I urge passage of this resolution.

Mr. LINDER. Mr. Speaker, I yield such time as he may consume to my colleague, the gentleman from Georgia (Mr. ISAKSON).

Mr. ISAKSON. Mr. Speaker, I thank the gentleman from Georgia (Mr. LINDER), and I thank the gentleman from Nevada (Mr. GIBBONS) for introducing House Concurrent Resolution 305, and I subscribe to everything that the gentleman from Nevada (Mr. GIBBONS) thereafter has said and the gentlewoman from Washington (Ms. DUNN) has said.

President Reagan was an unusually great President of this country. He lowered the tax burden on Americans. He in a large measure was solely responsible through his policies and his tenacity for bringing down the Berlin Wall and ending the Cold War. He was a leader of great proportion. But I rise for a different reason, not just to repeat the same.

It is really appropriate that we use the Rotunda to present this award to Nancy Reagan, and it is because she and the President are still achieving great things for our country.

Mr. Speaker, I lost my mother 4 years ago to Alzheimer’s, and I have the greatest of regard for the caregivers of American who today deal with the care and the tragedy of that disease that afflicts their loved ones. I am so proud of the President, President Reagan, in the way he, in such a dignified manner, let the American people know of his debilitating disease; and he met it with the live influence that he met every challenge, no matter how great it was, in his life.

As President of the United States, he did wonderful things for our country. And when the Gold Medal is presented, it will be for all the positive accomplishments that he made. But at this time in their lives it also recognizes a couple who are a shining beacon to millions of Americans when loved ones have been confronted with Alzheimer’s, who, as caregivers, give every moment of their day to make the life of their loved one as easy as possible.

So on the anniversary of their marriage, on their recognition of the accomplishments as First Lady and the President, it is also appropriate that we point out to the American people that even today, as a past President and a past First Lady, Ronald Reagan and Nancy Reagan are still acknowledged to be a beacon to the American people in their handling of the most difficult of diseases in the latter years of their lives.

Mr. Speaker, I commend the gentleman from Nevada (Mr. GIBBONS), and I thank the gentleman from Georgia (Mr. LINDER) for yielding me time, and I urge the support of House Concurrent Resolution 305.

Mr. HOYER. Mr. Speaker, I yield back the balance of my time.

Mr. LINDER. Mr. Speaker, I yield myself the balance of my time to urge all of our colleagues to support this resolution in honor of President and Mrs. Reagan.

Mr. Speaker, I said much about President Reagan in the opening of this conversation about his life, and let me close by honoring Mrs. Reagan. President Reagan said for many years that his life started 50 years ago yesterday, that was the day he married Nancy Reagan. She has been a full partner in all of his successes, of which there are many.

To is often the partner, the spouse, that does a lot of the work, while the person up front gets a lot of the credit. She was there from day one, 50 years ago yesterday. She deserves this tribute just as does he. I look forward to the coming here on May 16 to receive this tribute.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. CULBERSON). The question is on the motion offered by the gentleman from Georgia (Mr. LINDER) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 305, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. LINDER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

Mr. HOYER. Mr. Speaker, I yield back the balance of my time.

Mr. LINDER. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 338) authorizing the printing as a House document of a collection of memorial tributes made in honor of the late Gerald Solomon.

The Clerk read as follows:

H. Con. Res. 338
Resolved by the House of Representatives (the Senate concurring),

SECTION 1. AUTHORIZING PRINTING OF COLLECTION OF STATEMENTS IN TRIBUTE TO GERALD SOLOMON

A collection of statements made in tribute to the late Gerald Solomon, together with
related materials, shall be printed as a House document under the direction of the Joint Committee on Printing, with illustrations and suitable binding.

SEC. 2. NUMBER OF COPIES.

The number of copies of the document printed under section 1 shall be the lesser of—

(1) 114 casebound copies, of which 50 copies shall be provided to the family of the late Gerald Solomon, 1 copy shall be provided to each Senator from the State of New York, and 2 copies shall be provided to each Member of the House of Representatives from the State of New York; or

(2) such number of casebound copies as does not exceed a total production and printing cost of $25,525, with distribution to be allocated in the same proportion as described in paragraph (1).

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Georgia (Mr. LINDER) and the gentleman from Maryland (Mr. HOYER) each will control 20 minutes.

The Chair recognizes the gentleman from Georgia (Mr. LINDER).

Mr. LINDER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Jerry Solomon was my friend. He was my leader when I came here. He was the ranking Republican on the Committee on Rules. He was a tough partisan, but he was fair.

Jerry served 20 years in this body before retiring and then dying shortly thereafter. He was born in 1930 in Florida and grew up in the northern regions of upstate New York. He attended St. Lawrence University and was a Marine through and through. He spent 8 1/2 years in active and reserve duty, and one of the proud recipients of the Iron Mike Award given by Marines to Marines.

He was married to Freda, a high school sweetheart and a sweetheart on her own. They have five children and six grandchildren. They had a marvelous relationship, where Jerry got all the credit and Freda did much of the work. She was a marvelous partner for him and the two of them had a great relationship for many years.

In 1995, Jerry became the chairman of the Committee on Rules, and I was given the opportunity to serve with him on the Committee on Rules. He was a strong leader for our cause and a fair one. He was tough and fair, and you cannot say much more about a politician than that. You appreciate their toughness, but you expect their fairness.

He was outspoken on veterans issues. I recall one day in 1988 when President Reagan signed into law “Solomon’s Bill” to elevate the Veterans Administration to a full cabinet level Department. This work won him wide praise from veterans groups over the years.

Jerry was laid to rest with military honors this past year in Saratoga National Cemetery. He was the driving force behind the creation of that cemetery and helped secure the money to buy the land for the cemetery. In 1998, the gentleman from New York (Mr. McNULTY) introduced a bill to name the Saratoga National Cemetery in honor of Gerald. The bill had 88 cosponsors. However, some of the bureaucrats in the Department of Veterans Affairs were concerned because nothing like that had ever been done. After finding out, Jerry asked his colleagues from New York to withdraw the bill because he did not want any controversy associated with the cemetery.

On December 4, 2001, this House passed a measure that did, in fact, name the national cemetery in Saratoga National Cemetery. It was signed into law on January 24, 2002.

Those of us who watched him in his work as the chairman of the Committee on Rules recall him standing at the microphone, with his big expanded file that said Solomon on the front, which held his whole world worth of information and detail on all the issues that he fought for and cared for through all the years. He was the chairman of the National Defense Task Force, he was a congressional adviser to the United Nations Session on Disarmament, he was a representative to the North Atlantic Assembly, Chair of the Political Foreign Affairs Committee, Chair of the House NATO Observer Group and the U.S. Task Force on POWs and MIAs.

During the 1980s, Jerry was one of 13 House Members who served on President Reagan’s group of congressional advisers on foreign policy, national defense, and budgetary initiatives. I was privileged to introduce him at a breakfast one day, and those who knew him would appreciate when I said, “This man has devoted his life to insurance agents, milk producers, and Ronald Reagan, and not necessarily in that order.”

He was a firm and staunch fighter for what he believed in. He could always be counted on. He was a great American, an important and dedicated member of this body, and I urge my colleagues to support this measure and urge my colleagues to support it.

Mr. Speaker, I yield back the balance of my time.

Mr. LINDER. Mr. Speaker, I yield myself the balance of my time, and I urge my colleagues to support House Concurrent Resolution 338, this resolution on behalf of the printing of the remarks in honor of Jerry Solomon.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Georgia (Mr. LINDER) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 338.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

TENO RONCALIO POST OFFICE BUILDING

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3789) to designate the facility of the United States Postal Service located at 2829 Commercial Way in Rock Springs, Wyoming, as the “Teno Roncalio Post Office Building”.

The Clerk read as follows:

H.R. 3789

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TENO RONCALIO POST OFFICE BUILDING.

(a) DESIGNATION.—The facility of the United States Postal Service located at 2829 Commercial Way in Rock Springs, Wyoming, shall be known and designated as the “Teno Roncalio Post Office Building”.

(b) REFERENCES.—Any reference in a law, map, regulation, document, paper, or other record of the United States to the facility referred to in subsection (a) shall be deemed to be a reference to the Teno Roncalio Post Office Building.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Virginia (Mrs. JO ANN DAVIS) and the gentleman from Maryland (Mr. HOYER) each will control 20 minutes.

The Chair recognizes the gentlewoman from Virginia (Mrs. JO ANN DAVIS).
Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.R. 3789.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Virginia?

There was no objection.

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3789, introduced by my distinguished colleague, the gentlewoman from Wyoming (Mrs. CUBIN), designates the United States Postal Service located at 2829 Commercial Way in Rock Springs, Wyoming, as the Teno Roncalio Post Office Building.

Mr. Speaker, Mr. Roncalio was a native of Rock Springs, Wyoming, and has been a distinguished public servant for the majority of his life. He enlisted in the United States Army in 1941 and served as an infantryman in Europe, Sicily, and North Africa. After graduating from the University of Wyoming, he practiced law in Cheyenne. Mr. Roncalio represented Wyoming in this House from 1965 until 1967 and from 1971 until 1979, and I urge adoption of H.R. 3789.

Mr. Speaker, I reserve the balance of my time.

Mr. HOYER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, on behalf of the gentleman from Illinois (Mr. DAVIS), the distinguished ranking member of this subcommittee, I am pleased to join my colleague, the gentlewoman from Virginia (Mrs. JO ANN DAVIS), in the consideration of H.R. 3789, which names, as she has pointed out, a postal facility from Wyoming (Mrs. CUBIN) and the very pleased to join the gentlewoman from Wyoming as the Teno Roncalio Post Office Building.

Mr. Speaker, Mr. Roncalio was an outstanding member of this House, ran for the United States Senate unsuccessfully, as the Teno Roncalio Post Office Building.

Mr. Speaker, Mr. Roncalio was a native of Rock Springs, Wyoming, and has been a distinguished public servant for the majority of his life. He enlisted in the United States Army in 1941 and served as an infantryman in Europe, Sicily, and North Africa. After graduating from the University of Wyoming, he practiced law in Cheyenne. Mr. Roncalio represented Wyoming in this House from 1965 until 1967 and from 1971 until 1979, and I urge adoption of H.R. 3789.

Mr. Speaker, I reserve the balance of my time.

Mr. Speaker, Mr. Roncalio was a native of Rock Springs, Wyoming, and has been a distinguished public servant for the majority of his life. He enlisted in the United States Army in 1941 and served as an infantryman in Europe, Sicily, and North Africa. After graduating from the University of Wyoming, he practiced law in Cheyenne. Mr. Roncalio represented Wyoming in this House from 1965 until 1967 and from 1971 until 1979, and I urge adoption of H.R. 3789.

Mr. Speaker, I reserve the balance of my time.

Mr. Speaker, Mr. Roncalio was an outstanding member of this House, ran for the United States Senate unsuccessfully, but the people of Wyoming did not want to lose his service and reelected him for another three terms to the House of Representatives.

So on this side of the aisle are very pleased to join the gentlewoman from Wyoming (Mrs. CUBIN) and the subcommittee and full committee in supporting this appropriate recognition of his service to Wyoming and his service to the country.

Mr. Speaker, I yield back the balance of my time.

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Wyoming (Mrs. CUBIN), the distinguished sponsor of H.R. 3789.

Mrs. CUBIN. Mr. Speaker, the legislation that is before us today designates the United States Post Office in Rock Springs, Wyoming, in honor of Teno Roncalio.

Mr. Roncalio is one of those exceptional individuals who has spent his entire life serving the public and serving the people of the great State of Wyoming. It is an honor and a privilege for me to be able to present this legislation on his behalf today.

Mr. Roncalio, as the gentleman from Maryland (Mr. HOYER) stated, is a Democrat. He is from the other party than I belong to, but it never mattered to him when he was dealing with his constituents whether they were Republicans or Democrats. He represented Wyoming in the noblest of ways, in the most sincere of ways.

He is a native son of a small town in Wyoming known as Rock Springs, which is in the southwest corner of the State. It is along the Union Pacific Railroad that connected the East and the West and helped develop the West. This is where he grew up, where he attended high school, and spent most of his youth.

He later went on to graduate from the University of Wyoming. As a decorated World War II veteran, he was awarded the Silver Star for Gallantry in Action and was named to the United States Army Officer Candidates Hall of Fame.

After serving in the military, Mr. Roncalio continued on with his public service. He served in loyal service to the State of Wyoming as a U.S. Representative in this very body. He served four terms, during which time he successfully brought Wyoming’s concerns to the attention of this Nation, and he did so with great strength of heart and compassion.

As the gentlewoman from Maryland (Mr. HOYER) stated, Wyoming does have but one representative in the United States House of Representatives, so that representative has to work harder and be more passionate because we have all the issues that every other congressman has, plus issues that are unique to Wyoming as a rural State, being the lowest populated State. Mr. Roncalio was passionate in his love for the people of Wyoming.

When he served in Congress, it was a time in history when groundbreaking legislation was being adopted, such as the Voting Rights Act, the Civil Rights Act and the dawning of Medicare and Medicaid.

While he was in Congress, he worked diligently to boost Wyoming’s share of mineral royalties, which is a driving force in our State’s economy to this day.

He also sponsored legislation establishing a number of recreational areas in the State, including Flaming Gorge, Big Horn Canyon, and the Fossil Butte Monument. His contribution to environmental concerns and preserving some of the beauty of the State of Wyoming cannot be overlooked.

After leaving Congress in 1978, Teno returned to his native Wyoming where he resumed his law practice. He continues to live in the State to this day.

Please join me in acknowledging his great dedication to public service, to the State of Wyoming, to the Nation, and to all of the people that he loved.

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Virginia (Mrs. JO ANN DAVIS) that the House suspend the rules and pass the bill, H.R. 3789.

The question was taken and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.
ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair will now put the question on the motion to suspend the rules and agree to the concurrent resolution, as amended.

The vote was taken by electronic device, and there were—yeas 392, nays 0, not voting 24, as follows:

(Roll No. 47)

YEARS—392

The State of Utah and their sportscaster Dick Ebersol, Utah for hosting, in the words of NBC

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Ms. KILPATRICK. Mr. Speaker, due to business in the District, I was unavoidably delayed on, Tuesday, March 5. Had I been present, I would have voted “yea” on rollcall No. 47—H. Con. Res. 305, permitting use of the Rotunda of the Capitol for a ceremony to present a gold medal on behalf of Congress to former President Ronald Reagan and his wife Nancy Reagan.

Mr. FILNER. Mr. Speaker, on rollcall No. 47 (H. Con. Res. 305) I was conducting official business in my San Diego California district. Had I been present, I would have voted “yea.”

Ms. SANCHEZ. Mr. Speaker, during rollcall vote No. 47 on March 5, 2002 I was unavoidably detained. Had I been present, I would have voted “yea.”

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. SHIMKUS). Under the Speaker’s announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

The SALT LAKE 2002 WINTER OLYMPIC GAMES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Utah (Mr. HANSEN) is recognized for 5 minutes.

Mr. HANSEN. Mr. Speaker, I rise today to commend my home State of Utah for hosting, in the words of NBC sportscaster Dick Ebersol, “far and away the most successful Olympics, smallest winter or largest in the history of the games.” The State of Utah and their citizens were introduced to the world, and boy did they ever shine in the eyes of their national and international visitors. Never in the history of the Olympics has there been such a spirit of volunteerism exhibited by the host community. Visitors from around the world were duly impressed by the helpfulness and congeniality of the locals.
Salt Lake City, Utah, in the words of a Washington Post writer, is the “nice”
capital of the world.

Mr. Speaker, not only did my home State shine in its hosting of the Winter
Olympics, U.S. Olympians took home an unprecedented number of medals
in all events, placing the country second to Germany with 35 medals. The previous
U.S. record for winter games was 13 medals. I commend our U.S. Olympic
team for their tremendous showing. Further, since the tremendous
 Erfurt, UNESCO has designated theathlon the winter sport of the
year. (It is an effort for Mr. Speaker.)

Unfortunately, some in the press viewed the Olympics as a prime oppor-
tunity to take potshots at the

Grizzly. Grizzly is where the

Sochi. It is the place where the

USOC. It is the place where the

National Guard personnel, the

Federal, State, local law enforcement

games with some trepidation. Thanks

to the leaders of my State and the

Olympic community as a whole ap-
pologies to our country on September 11,

U.S. citizens and the international

community as a whole approached the 2002 Winter Olympic
games with some trepidation. Thanks
to the leaders of my State and the

Olympic community as a whole ap-
pologies to our country on September 11,

experts of their papers were compelled
to apologize for their off-color re-
marks.

To the gentleman who writes for the

Denver Post who has a perfect

's the best men
debate on their schemes of privatization.
Do they have something to hide?

We hear that soon we are going to
get a proposal to send certificates out
to seniors, at a cost of $14 million, that
tells them that if you are over the age of 62, your benefits will never be cut.
The first question is, What if you are
under 62? What should they assume?

We are also told that CRS and other
agencies have said that there is no
legal effect to this document. It is not
anything that anybody can rely on. Jo
Anne Barnhart, the Social Security
commissioner, suggests that the plan
does not even have the blessing of
the administration’s fund and alarm
senior leaders who did not get their certifi-
cates. I could not agree with her more.
The certificate idea is a political exer-
cise that will squander taxpayer time
and taxpayer money. It will create con-
fusion. And it is an insult to seniors
who put their faith and trust in Social
Security.

We do not need a secret plan on So-
cial Security. We do not want people
to have to go into the voting booth and elect can-
didates next fall who say,

I used to ski, Mr. Speaker; but as I look at that, it is a 77 percent drop.
You are doing 85 miles an hour in 300 feet. I have talked to a lot of the
Olympians who said, “That’s the best men’s downhill in the world.” To Mr. Paige
from Minneapolois, who has a perfect
downhill is and Grizzly has a sign up
there that says: “Know your limita-
tions. If you can’t make this, take your skis, get on the gondola and go back
down.”

I am sure the local TV people would find it very interesting to watch him
do it, and we would love to have Mr.
Paige come out. We offer him those
tickets to come out and see it.

Mr. Speaker, I did not realize the
custom is to ring a cow bell during the
Olympics and cow bells were ringing
everywhere. It was a wonderful experi-
ence for America. It reenergized us. We
could see something we felt good
about. It was emotional. The opening
ceremony was wonderful. The closing
ceremony was tremendous. The Olympi-
cians and citizens of the world were
better Olympics that ever occurred.
I agree with all the people who said that
this was the best one ever.

SOCIAL SECURITY

The SPEAKER pro tempore. Under a
previous order of the House, the gen-
tleman from Missouri (Mr. GEPHARDT)
is recognized for 5 minutes.

Mr. GEPHARDT. Mr. Speaker, I rise
to urge a full and fair debate on Social
Security. The President’s commission
issued a report. It called for sweeping changes to the So-
cial Security system. It called for the creation of private accounts. It called
for three plans to meet these goals.

Then last year, at the Cato Institute, the majority leader urged a
debate on this issue. He urged us to re-
form Social Security. He urged us to privatize Social Security. And the
President of the United States argued
the same in speeches also delivered last
week. Yet in Congress, Republicans are
refusing to have that full and fair de-
bate on their schemes of privatization.
Do they have something to hide?

We hear that soon we are going to
get a proposal to send certificates out
to seniors, at a cost of $14 million, that
tells them that if you are over the age of 62, your benefits will never be cut.
The first question is, What if you are
under 62? What should they assume?

We are also told that CRS and other
agencies have said that there is no
legal effect to this document. It is not
anything that anybody can rely on. Jo
Anne Barnhart, the Social Security
commissioner, suggests that the plan
does not even have the blessing of
the administration’s fund and alarm
senior leaders who did not get their certifi-
cates. I could not agree with her more.
The certificate idea is a political exer-
cise that will squander taxpayer time
and taxpayer money. It will create con-
fusion. And it is an insult to seniors
who put their faith and trust in Social
Security.

We do not need a secret plan on So-
cial Security. We do not want people
to have to go into the voting booth and elect can-
didates next fall who say,

I used to ski, Mr. Speaker; but as I look at that, it is a 77 percent drop.
You are doing 85 miles an hour in 300 feet. I have talked to a lot of the
Olympians who said, “That’s the best men’s downhill in the world.” To Mr. Paige
from Minneapolois, who has a perfect
downhill is and Grizzly has a sign up
there that says: “Know your limita-
tions. If you can’t make this, take your skis, get on the gondola and go back
down.”

I am sure the local TV people would find it very interesting to watch him
do it, and we would love to have Mr.
Paige come out. We offer him those
tickets to come out and see it.

Mr. Speaker, I did not realize the
custom is to ring a cow bell during the
Olympics and cow bells were ringing
everywhere. It was a wonderful experi-
ence for America. It reenergized us. We
could see something we felt good
about. It was emotional. The opening
ceremony was wonderful. The closing
ceremony was tremendous. The Olympi-
cians and citizens of the world were
better Olympics that ever occurred.
I agree with all the people who said that
this was the best one ever.

SOCIAL SECURITY

The SPEAKER pro tempore. Under a
previous order of the House, the gen-
tleman from Missouri (Mr. GEPHARDT)
is recognized for 5 minutes.

Mr. GEPHARDT. Mr. Speaker, I rise
to urge a full and fair debate on Social
Security. The President’s commission
issued a report. It called for sweeping changes to the So-
cial Security system. It called for the creation of private accounts. It called
for three plans to meet these goals.

Then last year, at the Cato Institute, the majority leader urged a
debate on this issue. He urged us to re-
form Social Security. He urged us to privatize Social Security. And the
President of the United States argued
the same in speeches also delivered last
week. Yet in Congress, Republicans are
refusing to have that full and fair de-
bate on their schemes of privatization.
Do they have something to hide?

We hear that soon we are going to
get a proposal to send certificates out
to seniors, at a cost of $14 million, that
tells them that if you are over the age of 62, your benefits will never be cut.
The first question is, What if you are
under 62? What should they assume?

We are also told that CRS and other
agencies have said that there is no
legal effect to this document. It is not
anything that anybody can rely on. Jo
Anne Barnhart, the Social Security
commissioner, suggests that the plan
does not even have the blessing of
the administration’s fund and alarm
senior leaders who did not get their certifi-
cates. I could not agree with her more.
The certificate idea is a political exer-
cise that will squander taxpayer time
and taxpayer money. It will create con-
fusion. And it is an insult to seniors
who put their faith and trust in Social
Security.

We do not need a secret plan on So-
cial Security. We do not want people
to have to go into the voting booth and elect can-
didates next fall who say,

I used to ski, Mr. Speaker; but as I look at that, it is a 77 percent drop.
You are doing 85 miles an hour in 300 feet. I have talked to a lot of the
Olympians who said, “That’s the best men’s downhill in the world.” To Mr. Paige
from Minneapolois, who has a perfect
downhill is and Grizzly has a sign up
there that says: “Know your limita-
tions. If you can’t make this, take your skis, get on the gondola and go back
down.”

I am sure the local TV people would find it very interesting to watch him
do it, and we would love to have Mr.
Paige come out. We offer him those
tickets to come out and see it.

Mr. Speaker, I did not realize the
custom is to ring a cow bell during the
Olympics and cow bells were ringing
everywhere. It was a wonderful experi-
ence for America. It reenergized us. We
could see something we felt good
about. It was emotional. The opening
ceremony was wonderful. The closing
ceremony was tremendous. The Olympi-
cians and citizens of the world were
better Olympics that ever occurred.
I agree with all the people who said that
this was the best one ever.
Ball, an expert on the subject, calls this statement flat out untrue.

Our challenge is to strengthen Social Security into the future. We need to honor our commitments. We need to strengthen the trust funds. We need to save Social Security first. America had a golden opportunity about 15 months ago. Fifteen months ago, we could have passed tax cuts to promote long-term economic growth while paying down the national debt and investing in Social Security for Americans everywhere. Instead, we rejected a commonsense approach. Today, the President’s budget breaks pledges by both parties. Both parties promised to safeguard the trust funds. The President’s budget invades them for the next 10 years. It drains $1.5 trillion from the trust funds, and plans proposed by his commission fail to explain how we will pay for privatization. And they will lead to cuts in benefits for seniors, even for individuals opting out of private accounts.

This is not a debate about numbers. It is a debate about our values. What is the value we place on Social Security? Our values call for understanding that Social Security will be solvent for the next 36 years, at a minimum. Our values call for recognizing that people have faith and trust in our most respected program. Our values call for realizing that Social Security offers economic security not just to seniors but to widows, disabled Americans, and children of parents who die before the age of 65. Our values call for keeping our intergenerational contract and commitment in the 21st century.

Our values call for keeping our word to the seniors of this country. Our values call for investing in Social Security today, not tearing it down as baby boomers retire a few years from now. I urge Republicans, be not afraid. Let us get about the task of saving Social Security first and today.

BREAKING THE CONTRACT
(By Paul Krugman)

If converting Social Security to a system of private retirement accounts is such a good idea, why don’t advocates of that conversion try, just once, to make their case without insinuating that 1+1=4?

Last week George W. Bush did it again, contrasting Social Security benefits with what retiring workers would have if they had invested all the Social Security taxes they paid. The administration has been widely criticized for misleading the public by suggesting that Social Security benefits would be cut by 25% if privatization were introduced. But Bush’s economists understand that Social Security has never been run like a simple pension fund. It’s really a social contract; each generation pays taxes that support the previous generation and expects to receive the same treatment from the next generation. You may believe that Franklin Roosevelt should never have created this system in the first place. I disagree, but in any case Social Security exists, and older Americans have upheld their end of the bargain. In particular, baby boomers have spent their working years paying quite high payroll taxes, which were used mainly to support their elders, and only secondarily to help Social Security stay afloat. And they expect to be supported in their turn.

Mr. Bush proposes to allow younger workers to place their payroll taxes in private accounts—in effect, financing his own campaign. But nervous Republican members of Congress want to send all Social Security recipients $100 a month on the first day of their retirement. They argue that Social Security is a bulwark of our national security and must be preserved at any cost.

Mr. Bush proposes to allow younger workers to place their payroll taxes in private accounts—in effect, financing his own campaign. But nervous Republican members of Congress want to send all Social Security recipients $100 a month on the first day of their retirement. They argue that Social Security is a bulwark of our national security and must be preserved at any cost.

The truth—which Mr. Bush’s economists understand—is that Social Security has never been run like a simple pension fund. It’s really a social contract: each generation pays taxes that support the previous generation and expects to receive the same treatment from the next generation. You may believe that Franklin Roosevelt should never have created this system in the first place. I disagree, but in any case Social Security exists, and older Americans have upheld their end of the bargain. In particular, baby boomers have spent their working years paying quite high payroll taxes, which were used mainly to support their elders, and only secondarily to help Social Security stay afloat. And they expect to be supported in their turn.

Mr. Bush proposes to allow younger workers to place their payroll taxes in private accounts—in effect, financing his own campaign. But nervous Republican members of Congress want to send all Social Security recipients $100 a month on the first day of their retirement. They argue that Social Security is a bulwark of our national security and must be preserved at any cost.

Those really are the only alternatives. Last year the special commission on reform of Social Security was charged with producing a plan for private accounts, came to an ignominious end—it issued a deliberately confusing report, then slunk quietly out of town. But wade through its menu of options, and you’ll find that in the end the commission grudgingly rediscovered the obvious: Private accounts won’t “save” Social Security. On the contrary, they would drain funds. The President’s budget invades them for the next 10 years. It drains $1.5 trillion from the trust funds, and plans proposed by his commission fail to explain how we will pay for privatization. And they will lead to cuts in benefits for seniors, even for individuals opting out of private accounts.

There are only two possibilities. One is default, making room for the trillions diverted into private accounts by slashing the baby boomers’ benefits. The other is to buy the baby boomers out—that is, to use money from other sources to replace the diverted funds.

Those really are the only alternatives. Last year the special commission on reform of Social Security was charged with producing a plan for private accounts, came to an ignominious end—it issued a deliberately confusing report, then slunk quietly out of town. But wade through its menu of options, and you’ll find that in the end the commission grudgingly rediscovered the obvious: Private accounts won’t “save” Social Security. On the contrary, they would drain funds. The President’s budget invades them for the next 10 years. It drains $1.5 trillion from the trust funds, and plans proposed by his commission fail to explain how we will pay for privatization. And they will lead to cuts in benefits for seniors, even for individuals opting out of private accounts.

So why is the Bush administration reviving its push for private accounts right now? Did it really learn nothing from the implosion of the reform commission? I doubt it; the administration economists aren’t fools, though loyalty often requires that they pretend otherwise.

A more likely interpretation is that this is entirely cynical subeconomy. The Bush domestic agenda is stalled, and early indications for the November election aren’t as good as Karl Rove expected. So it’s time to try a new tactic: tax cuts with visions of sugarplums, then blame Democrats for snatching the goodides away. And it doesn’t matter that the numbers don’t add up, because the plan will never be tested by reality.

The SPEAKER pro tempore (Mr. SHIMKUS). Under a previous order of the House, the gentleman from Illinois (Mr. LIPINSKI) is recognized for 5 minutes.

Mr. LIPINSKI. ...
all the rights and attributes that belonged to independent nations and a declaration that they “fiercely and confidently” committed their decision to “the Supreme Arbiter of the destiny of nations.”

Over the next 2 weeks, a constitution was drafted and an interim government was formed, despite daily reports from the front detailing the collapse of the Alamo and the subsequent advance of the Mexican army through Texas.

On March 17, 1836, the government was succeeded by the new Washington-on-the-Brazos on the news of the approach of Santa Anna. Just over a month later, independence was secured in the form of a victory over that same army by General Sam Houston, a delegate at that very convention, and his courageous fighters at the battle of San Jacinto.

Mr. Speaker, let me remind folks from my neighboring State of Tennessee that Sam Houston, along with another Davy Crockett, served in this Congress representing the State of Tennessee. In fact, I have told my colleagues from Tennessee that sometimes the best of Tennessee immigrated to Texas in the 1830s.

From the beginning, the Texas way was firmly established in the community of nations, and for 10 years she stood as an independent nation, until President James K. Polk signed the treaty admitting Texas to the United States in 1845.

Mr. Speaker, last Saturday, March 2nd, was celebrated throughout Texas. But, again, as we are a Nation at war now, I hope that this Congress and the whole country realize that we did not start this country just yesterday. We have a tradition in our Nation of freedom, and that freedom not only started with our own independence in the 1700s but it started with the Texas independence in 1836, and that is why we celebrate Texas Independence Day.

WORKING TOGETHER TO FIX SOCIAL SECURITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. SMITH) is recognized for 5 minutes.

Mr. SMITH of Michigan. Mr. Speaker, I would like to make some comments on Social Security, a very important program.

A couple of years ago, the minority leader suggested that the President and Republicans come up with their Social Security proposal, I suspect so that it could be criticized.

I would hope that the minority leader and the majority party in this House and the same with the Senate work together to come up with proposals to solve the problem, rather than demagoguery.

Mr. Speaker, in conclusion, let me say that I would hope both the Democrats, the minority leader and the majority party in this House and the same with the Senate work together to come up with proposals to solve the problem, rather than demagoguery.

PAKISTAN’S INTER-SERVICES INTELLIGENCE—ISI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. PALLONE) is recognized for 5 minutes.

Mr. PALLONE. Mr. Speaker, I come to the House floor this evening to express my serious concerns regarding Pakistan’s Inter-Services Intelligence, or ISI, which is important that the history, work and intentions of the ISI in light of the unfortunate murder of Daniel Pearl and in light of the current fight against global terrorism.

The ISI not only has ties to Omar Sheikh, the prime suspect in the murder of Daniel Pearl, but the ISI has also fostered deep connections with Islamic militant groups, particularly Jaish-e-Muhammad, operating throughout Afghanistan and Kashmir.

In the 1980s, Pakistan assisted Afghanistan in fighting off Soviet invasion. During these years, the ISI grew into the role of Pakistan’s strongest political agency on foreign policy. It was also during this time that the ISI developed and nurtured strong relationships with Islamic militants in Afghanistan and Kashmir.

Ties between the ISI and Afghan militants grew stronger, and this gave rise to the Taliban. The ties between the Taliban and the ISI remained strong for years, and to this day there are deep connections between the Pakistani ISI and what is left of the Taliban.

Ties between the ISI and Islamic militants in Kashmir grew stronger as well, and in fact, the ISI, until very recently, had a Kashmir desk, headed by Brigadier Abdullah, who was responsible for militant insurgency into India’s state of Jammu and Kashmir.

Mr. Speaker, I would like to expand on the deep, nefarious connections between the ISI in light of Daniel Pearl’s murder and recent terrorist events throughout the world. There have been reports that Brigadier Abdullah, formerly of the ISI, has aided Omar Sheikh in his travels between Afghanistan and Pakistan and has perhaps provided further support to both Omar Sheikh and another individual, Maulana Azhar.

Omar Sheikh and Maulana Azhar worked to form Jaish-e-Muhammad, an Islamic militant group that continues to operate throughout the world. There have been reports that Brigadier Abdullah, formerly of the ISI, has aided Sheikh and Azhar in their travels to Afghanistan and Pakistan and has perhaps provided further support to both Omar Sheikh and another individual, Maulana Azhar.

Omar Sheikh and Maulana Azhar served in prison together in India in 1999, when they were freed after the hijacking of an Indian Airlines flight that landed in Kandahar, Afghanistan. Mr. Speaker, I would like to note that this flight was hijacked by the method of knives and box cutters and that weapons were not available to the hijackers until the plane landed in Kandahar. Furthermore, it was after their release that Sheikh and Azhar formed Jaish and operated terrorist activities in Kashmir while in Pakistan and Afghanistan and with the help of the Pakistani ISI.
Azhari was arrested in December, 2001. However, Sheikh continued his mission of kidnapping and terrorism in hopes of Jihad; and, until the murder of Daniel Pearl, Sheikh was living freely in Pakistan. If it was not for the support of current or former officials of the Pakistani ISI, Sheikh may not have been able to succeed in his mission until this point in time and may not have succeeded in the kidnapping and tragic murder of Daniel Pearl.

It is clear that the ties between the ISI and both the Taliban and militant groups in Kashmir are deep. General Musharraf has taken it upon himself to arrest Azhar, arrest Sheikh, remove Brigadier Abdullah from the ISI and crack down on terrorists. However, more work needs to be done if Pakistan wants to take serious steps in breaking ties with the Taliban and Islamic militant groups operating in Kashmir and defusing tensions with India due to the terrorist attack on the Indian Parliament.

Although the ties between Pakistani intelligence officials and terrorists are clear, there is still much left to be investigated and publicized. Mr. Speaker, we need to approach the ISI with criticism and we need to approach Pakistan with great caution. U.S.-Pakistan ties have become closer as a result of our war in Afghanistan. However, I cannot urge us enough to proceed with caution.

The terrorist networks operating in Afghanistan, Pakistan and Kashmir are not isolated and, in fact, have significant ties to al Qaeda.

### HONORING PROJECT HOME SAFE

The SPEAKER pro tempore, Under a previous order of the House, the gentlewoman from Indiana (Ms. CARSON of Indiana) is recognized for 5 minutes.

Ms. CARSON of Indiana. Mr. Speaker, I rise tonight to give special honor to Project Home Safe and their latest firearm safety initiative, although I do it under the shadow of yet another child’s death caused by the reckless use of a firearm.

Yesterday, in Albuquerque, New Mexico, a 4-year-old boy shot and killed an 18-month-old girl with his father’s handgun while the two of them were watching a movie. Another young innocent life ended. Congress has refused to enact common-sense legislation to prevent these kinds of senseless acts.

As part of the National Shooting Sports Foundation, Project Home Safe represents one of the largest and most diverse trade associations in America. Since September last year, Project Home Safe has toured 16 States and visited over 200 communities, distributing hundreds of thousands of firearm safety devices in an effort to improve and preserve the lives of our children.

I am extremely proud of my own home state of Indiana in that it is one of only 18 States participating in this program, but the education of both children and parents about firearm safety is still lacking across the Nation.

A couple of weeks ago, a young man walked into a school in Indianapolis, Indiana, attempting to kill some 13 students. He lamented that the gun that he planned to use had a safety device on it that had already been inoperative by his father and he was unable to follow through on his threat. Sadly, guns continue to be exempt from Federal oversight, and consumer protection laws continue to be tougher on toy guns than real guns.

Mr. Speaker, I would encourage Congress to pay attention to the senseless and early deaths of our children and take some immediate measures to counteract the early demise of our children. Safety devices can prevent many of these firearms-related injuries. Every unintentional shooting involving children could have been prevented by a child-proof gun safety device.

### COMPROMISE RESULTS IN SELL-OUT OF IRON ORE INDUSTRY

The SPEAKER pro tempore (Mr. SHIMKUS). Under a previous order of the
House, the gentleman from Michigan (Mr. STUPAK) is recognized for 5 minutes.

Mr. STUPAK. Mr. Speaker, I take to the floor tonight to talk about President Bush's proposed remedies on steel imports. Unfortunately, for those of us who represent iron ore miners in northern Minnesota and northern Michigan, the remedy proposed by the President today does little to help us.

We must look back to December of last year by which the ITC, the International Trade Commission, by a six to nothing vote said illegal steel, steel products, slab steel, was being dumped in this country to the great harm of the U.S. steel industry. With slab steel, that replaces iron ore pellets. In order to make steel, we need a raw product like iron ore pellets or slab steel.

In order to corner the market, foreign countries have been dumping slab steel in this country at exorbitant amounts since 1998. Every time slab steel enters another country, it hurts our iron ore miners. In fact, up in my district, the Empire Mine has just shut down. Over 800 workers have been laid off and all the managerial and administrative people have been laid off.

So we were hoping today that President Bush would give us a strong steel remedy. We asked for 40 percent over 4 years, as allowable under U.S. law. Although the report was put forth today, and some in the media have called the tariff a quota, I believe, I believe the iron ore industry may have been sacrificed in making that compromise. We in the iron ore industry have basically been sold out.

The ITC, the International Trade Commission, caught nations cheating under import pricing; and as I said earlier, by a six to nothing vote, they agreed those imports were hurting the domestic steel and the iron ore industry.

If we take a look at what the President did today, he said we will allow 5.4 million tons of imported slabs to come into the United States, but we will not count Mexico or Canadian slab steel coming into the United States. So basically, we are at about 7 million tons a year. That is exactly what they are importing right now. So therefore, the remedy does nothing for those of us who have been harmed over the last 4 years by illegal imports. Because this import level of 7 million for slab steel has already caused mines to shut down and layoffs in northern Michigan and elsewhere, we have really won nothing with the President's proposed remedy.

If we take a look at it, Mexico has been used more than once by countries throughout the world as an export platform. By that I mean to get around the President's proposals today, his remedies today, other countries can export their product to Mexico, and then from there, into the United States. Mexico, as I said earlier, the President made an exemption for them as to steel products. Therefore, any country who wants to get around the new trade remedies proposed by the President will just ship their product to Mexico, it suddenly becomes a Mexican product, and it comes into the United States, it comes into the United States, it will be on the market. It will be on the market again in the next 30 to 60 days on the supplemental appropriation bill; and every possible piece of legislation that it is germane to, I will be offering this amendment. I and others who represent iron ore miners in Michigan, we will not sell out, we will not be shortchanged, and we will not shortchange our miners. We plan to be here day in and day out to continue to stand up for our iron ore miners.

I previously passed an amendment last year, a "melted and poured" amendment, which basically says that any steel used in the United States defense industry must be from steel that is melted and poured here in the United States. It will be put forth, a recommendation will be put forth by the Bush administration.

If we take a look at it, and in fact, one of the recent articles that appeared right after the President made his recommendations was from the California Steel Institute. They said, "We are pleased that the President recognized that slabs are different from finished products and excluded slab from the tariff measure imposed on finished steel products to avoid the potential for dumping of hand-melted slabs by countries that have legitimate needs to continue to import slabs." The vice-chair, Deanna Okun, added that a tariff on slab "would have a potentially severe impact on the domestic industry that need a reliable source of slab." Reliable source.

The iron ore industry in my district has been there for over 150 years. One cannot get much more reliable than men and women going day in and day out, working in the iron ore mines for 150 years to provide America with the raw material that is virtually nonexistent from finished steel products such as hot bands and plate. Yes, it is different, because those of us in this country use iron ore as opposed to cheap imported slabs.

I should point out the California Steel Institute that I have been commenting on here tonight, 50 percent is owned by CBRD, a Brazilian iron ore company, and the other 50 percent is owned by a Japanese company. So while California steel industries are talking about how they have no remedy or how the slab remedy proposed by the President does not hurt them, they are already foreign owned. They will use Mexico as an export platform, and they will just sidestep these proposed remedies.

The California steel industry and others who have used slab steel realize that the President's remedy is nothing, and slab was not hurt. In fact, they are pleased with the President's proposed remedy.

We in the iron ore industry and those who represent iron ore miners are not pleased. Iron mines are as reliable as the day is long. The miners have been there for us through all the world wars. They are loyal, hard-working Americans; and now they have just basically been exported out of this country.

OIL DEPENDENCE IS MAGNET FOR CONFLICT

The SPEAKER pro tempore. Under a previous order, the House, the gentlewoman from Ohio (Ms. KAPTUR) is recognized for 5 minutes.

Ms. KAPTUR. Mr. Speaker, our thoughts and prayers this evening are with the men and women of our Armed Forces who serve America's cause on the front lines in Afghanistan, fighting one front in the war against terrorism. We await their prompt return, and we extend our deepest sympathies to the families of our fallen soldiers. As we prosecute the war against terrorism, we must take affirmative steps as a Nation to drain the swamp of hatred and violence in central Asia and the Middle East, in Indonesia, Africa, and Central America.

But the real dimension of our mission must be clear. Even as our troops carry out their dangerous assignments in the four corners of our world, the Bush administration is pushing a plan for $80 million in military equipment to protect not democratic values, but an oil pipeline in Colombia. This aspect of the Bush administration foreign policy should serve to focus our attention on the urgent need for the United States to avoid a dangerous addiction to foreign oil. In fact, that historic addiction to Saudi oil, to Kuwaiti oil, to Iraqi oil, to Colombian oil, to Nigerian oil, lies on the basis of the repressive regimes whose dissidents strike out now against our country. It is an addiction that distorts our foreign policy, that drains our national wealth and demands treatment.

The treatment on the home front for this oil addiction is restoring fuel independence, energy independence for America again, and one of the most promising sources is biofuels.

I would like to submit for the Record this evening a simply magnificent article called "The New Petroleum," written by a Member of the other body, RICHARD G. LUGAR and former CIA Director R. James Woolsey. The first sentence of this article reads: "Oil is a magnet for conflict." And it talks about well over two-thirds of the world's remaining oil reserves lie in the Middle East and becoming more and more precious as this
century and millennium proceed. But then it talks about ethanol always being there as an alternative to gasoline, but never really being taken seriously, because until now, it has only been possible to produce ethanol from a tiny portion of the corn plant, the edible part.

But recent breakthroughs in genetic engineering and processing of new biocatalysts have made possible something called “cellulosic biomass,” literally using every scrap of organic material in the face of the Earth, including this country’s waste material put into our landfills, to spawn an entire new industry for our country and, indeed, countries of the world. If the hundreds of billions of dollars that now flow into a few coffers of a few nations were to flow instead to the millions of people who till the world’s fields, most countries would see substantial national security, economic, and environmental benefits.

It takes about genetically engineered biocatalysts and advancing processing technologies that can make a transition from fossil fuels to biofuels affordable, and would not the world’s security picture change dramatically. U.S. diplomacy and policies in the Middle East could be guided by a respect for democracy, rather than a need to protect oil supplies and accommodate oil-producing regimes, all of which are undemocratic.

It takes about using that, using all the corn stalks residue on the ground, harvesting that, many of the forests, where there is residual fuel, using those organics to produce fuel, and replacing a minimum of 25 percent additional.

So we would add the 8 percent, add the 25 percent, and we are moving to the point where petroleum products would be guided by a respect for democracy, rather than a need to protect oil supplies and accommodate oil-producing regimes, all of which are undemocratic.

The article referred to is as follows:

**THE NEW PETROLEUM**

(By Richard G. Lugar and R. James Woolsey)

**WHY CHANGE?**

Oil is a magnet for conflict. The problem is simple—oil is a finite resource. The sources of the world’s transportation fuel are concentrated in relatively few countries. Well over two-thirds of the world’s remaining liquid oil are located in the Persian Gulf (including the Caspian basin), leaving the rest of the world dependent on the region’s collection of predators and vulnerable to changes in oil supplies. This dependence keeps U.S. military forces tied to the Persian Gulf, forces foreign policy compromises, and sinks many developing nations into staggering debt. Instead of being a benefactor of expensive dollar-denominated oil with lower-priced commodities and agricultural products. In addition, oil causes environmental conflict. The possibility that greenhouse gases will lead to catastrophic climate change is substantially increased by the 40 million barrels of oil burned every day by vehicles.

Ethanol has always provided an alternative to gasoline. In terms of environmental impact and fuel efficiency, its advantages over gasoline substantially outweigh its few disadvantages. It has only been practical to produce ethanol from a tiny portion of plant life—the edible parts of corn or other feed grains. Corn prices have fluctuated around $100 a ton in the last few years, ranging from half to double that amount. Ethanol has thus been too expensive to represent anything but a small, subsidized niche of the transportation fuel market. In spite of recent reductions in the expense of ethanol processing, the final product costs roughly a dollar a gallon, or about twice today’s wholesale price of gasoline.

Recent and prospective breakthroughs in genetic engineering and processing, however, are revolutionizing the potential of ethanol as a transportation fuel. New biocatalysts—genetically engineered enzymes, yeasts, and bacteria—are making it possible to use various plant products (known as cellulosic biomass) to produce ethanol. This may decisively reduce cost—to the point where petroleum products would face vigorous competition.

The best analogy to this potential cost reduction is the cracking of the petroleum molecule in the early twentieth century. When natural gas liquids let us produce petroleum be used in producing high-performance gasoline, thus reducing waste and lowering cost enough that gasoline could fuel this century’s transportation systems. Genetically engineered biocatalysts and new processing techniques can similarly make it possible to utilize most plant matter, rather than a tiny fraction thereof, as fuel. Cellulosic biomass is extremely plentiful. As it comes to be used to produce competitively priced ethanol, it could replace petroleum in the world’s fuel market. If the hundreds of billions of dollars that now flow into a few coffers of a few nations were to flow instead to the millions of people who till the world’s fields, most countries would see substantial national security, economic, and environmental benefits.

**PAYING FOR ROUGHES**

Energy is vital to a country’s security and material well-being. A state unable to provide its people with adequate energy supplies or its soldiers with energy added into their fuel is often resort to force. Consider Saddam Hussein’s invasion of Kuwait, driven by his desire to control more of the world’s oil reserves, and the international response to this threat. The underlying goal of the U.N. force, which included 500,000 American troops, was to ensure continued and unfettered access to petroleum.

Oil permeates every aspect of our lives, so even minor price increases can be devastating impacts. The most difficult challenge for planners, policymakers, and alternative-energy advocates is the transportation sector, which accounts for nearly half of U.S. oil demand. The massive infrastructure developed to support gasoline-powered cars is particularly resistant to modifications. It precludes change in vaporization systems and makes America highly vulnerable to a break in oil supplies. During a war or embargo, moving quickly to mass transit or to fuel-cell or battery-powered automobiles would be impossible.

For most countries, excluding only those few that will be the new oil suppliers, the future portends growing indebtedness, driven by increasingly expensive oil imports. New demand for oil will be filled largely by the Middle East, meaning a transfer of more than $1 trillion over the next 15 years to the unstable states of the Persian Gulf alone—on top of the $90 billion they received in 1996. Dependence on the Middle East entails the risk of a repeat of the international crises of 1973, 1979, and 1990—worse. This growing reliance on Middle Eastern oil not only adds to that region’s disproportionate leverage but provides the resources with which rogue nations can support international and develop weapons of mass destruction and the ballistic missiles to carry them. Iraqi VX agent and Iranian medium-range missiles show how such regimes can export oil revenues into extensive and sophisticated armament programs.

**IS THE OIL RUNNING OUT?**

Optimists about world oil reserves, such as the Department of Energy, are getting increasingly lonely. The International Energy Agency now says that world production outside the Middle East will peak in 1999 and world production overall will peak between the years 2010 and 2020. This projection is supported by influential recent articles in Science and Scientific American. Some knowledgeable academic and industry voices put the date that world production will peak even sooner—within the next five or six years.

The optimists who project large reserve quantities of over one trillion barrels tend to base their numbers on one of three things: inclusion of heavy oil and tar sands, the exploitation of which will cost huge economic and environmental costs; puffery by OPEC nations lobbying for higher production quotas within the cartel; or assumptions about new drilling techniques that may accelerate production but are unlikely to expand reserves.
Once production peaks, even though exhaustion of world reserves will still be many years away, prices will begin to rise sharply. This trend will be exacerbated by increased demand from the world. Yergin, Dennis Eklof, and Jefferson Edwards pointed out in these pages (“Fueling Asia’s Recovery,” March/April 1998), even assuming a supply of growth, increased demand needs alone will add enough demand by 2010 (9 million barrels per day) to more than equal Saudi Arabia’s current daily production.

The nations of the Middle East will be ready to exploit the trend of rising demand and establish the Gulf states as the world’s supplier of oil. The South China Sea and shrinking supply. The Gulf states control nearly two-thirds of the world’s reserves; the states bordering the Caspian Sea have another several percent. Barring some unforeseen development, the Middle East will control something approaching three-quarters of the world’s oil in the coming century.

A NEW WORLD

If genetically engineered biocatalyst and advanced processing technologies can make a transition from fossil fuels to biofuels affordable, the world’s security picture could be different in many ways. It would be impossible for the world to take advantage of the production, manufacturing, and marketing of ethanol fuel. U.S. diplomacy and policies in the Middle East could be guided more to encourage efforts that would need to protect oil supplies and accommodate oil-producing regimes. Our intrusive military presence in the region could be reduced, both ameliorating anti-American tensions and making U.S. involvement in a Middle Eastern war less likely. Other states would also reap benefits. Ukraine, rich in fossil fuels, would be less likely to be dominated by time by oil-rich Russia. China would feel less pressure to bet on the Indo-Pakistan war and might reduce the risk of using the oil it buys at high cost and export countries to shape events would be increasingly limited.

The recent report by the President’s Committee of Advisers on Science and Technology (PCAST) predicted that U.S. oil imports will approximately double between 1996 and 2030, from 8.5 million barrels per day at a cost of $64 billion, to nearly 16 million barrels per day, at a cost of $120 billion. They estimated, however, that with concentrated efforts and increased investment in renewable fuel technologies, this could be reduced to 6 million barrels per day in 2030. The report concluded, “A plausible scenario would be that security of the United States is as at least as likely to be imperiled in the first half of the next century by the consequences of inadequacies in the energy options available to the world as by inadequacies in the capabilities of U.S. weapons systems. It is striking that the Federal government spends about 20 times more R&D money on the latter problem than on the former.”

FUEL PRODUCERS

Cellulosic ethanol could radically improve the outlook for rural areas all over the world. Farmers could produce a cash crop by simply collecting agricultural wastes or harvesting grasses or crops natural to their region. Agricultural nations with little to no petroleum production and restricted access to high-fertility soil could benefit from a new program to stimulate agricultural production. Local economic and environmental benefits would accrue to the farming community.

The production and use of ethanol derived from feed gains, the only addition of carbon dioxide to the atmosphere results from the use of fossil fuel products in planting, chemical fertilizing, harvesting, and processing. It takes only about one gallon of oil to produce eight gallons of ethanol. When ethanol is produced from cellulosic biomass, it is crucial to the economic viability of the process that lignin and other relatively lignin derived to the atmosphere.

According to a 1997 study done by five laboratories of the U.S. Department of Energy, ethanol use during 1999, for example, would result in a well under one percent of the carbon dioxide released from fossil fuel products in plant growth, harvesting, and processing. It takes only about one gallon of oil to produce seven gallons of ethanol. There is a virtual consensus among scientists: when considered as part of a complete cycle of growth, fermentation, and combustion, the use of cellulosic ethanol as a fuel, once optimized, will create no net carbon dioxide emissions to the atmosphere.
Bioengineeredugs

Ethanol’s economic viability depends on making it cheaper to produce. This can be achieved by making it out of cellulosic biomass, which includes essentially anything that grows or has grown: agricultural residues, forest residues, prairie grass, kudzu, waste wood, used paper products, even much of urban waste. Last year, about 36 percent of the energy consumed by the United States came from corn. But agricultural residues and other wastes have low or even negative value—some you are paid to haul away—while crops often cost only a few dollars of a ton. This represents a substantial savings in the raw material used in ethanol and puts it within the range of oil, even inexpensively refined oil.

Only recently have scientists developed the means to convert cellulosic biomass efficiently into ethanol. The edible portions of corn and other grains easily ferment into ethanol because of their chemical make-up. Most biomass, however, consists of more recalcitrant hemicellulose and cellulose, requiring both the breaking up of these fibers as well as the fermenting of both five- and six-carbon sugars. This all happens in nature, but two parts of it—fermenting five-carbon sugars and breaking up the fiber quickly—are technically challenging. The first is now done by genetically engineered microorganisms; this tool and other new techniques are being brought to bear on the second problem.

How far along are these developments? The current efficiency of ethanol processing is somewhat analogous to that of petroleum refining in the early 1900s: after the invention of thermal cracking made it possible to use a major share of the petroleum molecule for gasoline production but before the invention of catalytic cracking opened up an even larger share of petroleum to exploitation. In short, we have come a long way, but still have some inventing to do. The new, genetically engineered microorganisms have already taken us far toward the fermentation of ethanol from a wide range of plant material, laying the groundwork for reductions in processing costs as well.

The new microorganisms, combined with other improvements, promise fundamentally change the equation for considering ethanol a major transportation fuel. According to a recent study by Dartmouth engineering professor Lee Lynd, utilizing fundamentally engineered microorganisms have already taken us far toward the fermentation of ethanol from a wide range of plant material, laying the groundwork for reductions in processing costs as well.

Choosing to use cellulosic ethanol is not a choice to forsake more advanced automobile technology such as fuel cells and electric vehicles. Fuel cells are efficient combustion engines. For example, an average automobile gets approximately 17 miles per gallon and is driven approximately 14,000 miles per year. In contrast, fuel cells can burn gasoline now but can use cellulosic ethanol as it becomes available. Introducing FFVS into the national fleet differs radically in timing from other changes in transportation. Even if an ideal hybrid or fuel-cell vehicle came on the market, the slow rate of turnover of the nation’s cars means that many years before its introduction would make a dent in overall fuel use. But moving now to substantially increase the number of FFVS being produced would create the capability to shift to cellulosic ethanol as soon as it becomes available at attractive prices.

In addition, insofar as U.S. security and environmental concerns are more with the consumption of problem-causing petroleum fuel than with fuel in general, substituting cellulosic ethanol for gasoline improves everything from national security to protecting wildlife habitat and addressing other environmental purposes, and using for ethanol production the mown grasses with which much of this acreage is ordinarily planted, would produce enough ethanol and 25 percent of the country’s annual gasoline needs. These calculations use current automobile mileage.

Lynd notes that further mileage improvements, shifting to hybrids, and electric cars, could obviate the need for gasoline entirely, without taking land from food crops or nonagricultural uses. The coproduction of electricity and biofuels grown from alfalfa and witchgrass is especially promising. There is, in short, no basis for the argument that America does not have the land to grow and harvest this very large dent in U.S. gasoline consumption.

Biofuels must be produced in ways that enhance overall environmental quality. Sound land-use policies certainly must be followed, to protect wildlife habitat and address other environmental purposes, and using for ethanol production techniques to reforest land, reinvigorate prairies, and otherwise enhance the environment in an age of limits. The opposite may be true. Utilization of renewable fuels will make it possible for us to continue enjoying the freedom afforded by private cars, even as the production of petroleum begins to decline.

The Right Stuff?

Early this century, Henry Ford expected that ethanol, not gasoline, would be the fuel of choice for automobiles. His reasons are evident. The two fuels can be compared by examining three basic parameters—energy content, octane, and vapor pressure. Pure ethanol contains 69 percent of the energy of gasoline. A lower energy content translates into fewer miles to the gallon. In order to travel the same range, about a 30 percent larger fuel tank is needed (as is used in Brazil). Many scientists believe that optimizing engines for ethanol use will largely compensate for this difference, in part because ethanol is a simple combination of carbon, hydrogen, and oxygen, which means that fine-tuning an engine to squeeze very last drop of energy from ethanol is potentially easier.

Octane is the measure of a fuel’s ability to oxidize hydrocarbon and carbon molecules within in a fraction of a second. When the reaction is not simultaneous, incomplete, and inefficient combustion result. Ethanol has an octane rating 15 percent higher than gasoline’s. In the 1920s ethanol was briefly considered a viable alternative to stop the knocking of the new higher compression engines. However, to the detriment of public health, ethanol lost out to highly toxic tetraethyl lead, for three reasons: in contrast to ethanol, only a small amount of lead was needed as an additive; some were concerned that corn-derived ethanol would compete for land and threaten the food grains market; and since Prohibition was in effect, many were also worried about the security provided by maintaining large volumes of what is essentially 200-proof vodka. Ethanol’s ability to be an effective fuel, however, was never an issue.

A third important fuel measurement is vapor pressure, or how readily a liquid evaporates. A fuel’s vapor pressure is directly linked to the quantity of vehicle emissions, since over 40 percent of automotive emissions result from evaporation, not tailpipe emissions. Substituting ethanol for gasoline in any amount reduces tailpipe emissions and thus reduces urban smog. Pure ethanol, and any gasoline-ethanol mixture that is more than 22 percent ethanol, has a lower vapor pressure than gasoline and would therefore reduce the amount of evaporative emissions.

Somewhat confusingly, however, blends of ethanol in automotive fuel increase the vapor pressure and volatility of gasoline, making it easier to produce fuel blends containing a higher proportion of ethanol. Some studies show that low-level blends of ethanol and gasoline (like gasohol, which is ten percent ethanol) can actually worsen local air pollution, especially fuel vapor emissions. Consequently, in cities in the Northeast and California, proposals to encourage the use of ethanol blends have often fallen on deaf ears. Some observers have named these as camouflage for Midwestern corn growers at the expense of the cities.

But although low-level ethanol blends present complex issues, blends with more than 22 percent ethanol—which can be used in FFVs—do not have the vaporization problems. Moreover, with advances to refining and blending gasoline, a solution to the vaporization problem may well exist even at mixtures below 22 percent. Finally, Ethanol is compatible with both FFVs and internal combustion engine vehicles. Choosing to use cellulosic ethanol is not a choice to forsake more advanced automobile technology such as fuel cells and electric vehicles. Ethanol is compatible with both. Jeffrey Bentley, vice president of Arthur D. Little, Inc., a company recently honored by the U.S. government for its novel fuel-cell technology, stated that “ethanol provides higher efficiencies, fewer emissions, and better performance than other fuel sources, including gasoline. . . . Where ethanol is available, it will be the fuel of choice by consumers.” As both hybrids and fuel-cell vehicles will be available much earlier than cellulosic ethanol, this is because FFVS can burn gasoline now but can use cellulosic ethanol as it becomes available. Introducing FFVS into the national fleet begins to change the nation’s transportation fuel much more desirable.

Such a reduction of ethanol cost is entirely plausible for two reasons. First, a simple comparison of energy content reveals that a dry ton of biomass crops—$40 is a reasonable current comparable to about $10–13 a barrel. Agricultural wastes, in many cases, are considerably cheaper than either: many are free or have negative cost. So the overall costs of cellulosic biomass are likely to at least be in the same ballpark as those of crude oil second, further reductions in the cost of processing seem quite achievable. The current price of cellulosic ethanol is significantly higher than the equivalent price per barrel for oil. But this discrepancy reflects the maturity and sophistication of the petroleum industry, developed over the last century, as compared to the fledgling biofuels effort. Producing ethanol is not inherently more complex than refining petroleum—in fact, the contrary. The world has simply invested far more effort in the latter.

**JUMP-START**

While the private sector will provide the capital and motivation to move toward ethanol, the federal government has a vital role to play. Market forces seldom reflect national security risks, environmental issues, or other issues. The private sector often cannot fund long-term research, despite its demonstrated potential for dramatic innovation. Hence, the federal government, through investment in meritorious research, particularly in innovative programs such as genetic engineering of biocatalysts, development of dedicated energy crops, and improved processing, will help us achieve that goal.

The very small sums previously invested by the Departments of Energy and Agriculture have already spawned dramatic advances. Even efforts to expand commercial, merit-based, and peer-reviewed science and to encourage research that cuts across scientific disciplines are essential.

Research alone will not suffice to realize the and technological improvements that will lower the production costs of ethanol and other renewable fuels and let them compete directly with gasoline. At present, the United States is not funding a vigorous program in renewable technologies. The Department of Energy spends under two percent of its budget on renewable fuels; its overall investment in sustainable energy research, particularly in innovative programs such as genetic engineering of biocatalysts, development of dedicated energy crops, and improved processing, is significantly lower than the equivalent investment in petroleum research.

The United States cannot afford to wait for the next opportunity that we missed. If we do, those generations will suffer the consequences. The private sector is already investing in biofuels. The world has simply invested far more effort in the latter.

**IDENTIFYING THOSE KILLED IN OPERATION ANACONDA, AND URGING AMERICANS TO FULLY SUPPORT THE REBUILDING OF AFGHANISTAN**

The SPEAKER pro tempore (Mr. SCHAEFFER). Under a previous order of the House, the gentleman from Texas (Ms. JACKSON-LEE) is recognized for 5 minutes.

Ms. JACKSON-LEE of Texas. Mr. Speaker, having just returned from Afghanistan just a few hours ago, being on the ground and visiting with the military personnel, serving and dedicating themselves to freedom. I thought it was appropriate to come to the floor and acknowledge the cause upon which we fight, and to call the names of those in the last 72 hours who have lost their lives:

In the last 72 hours, as well, Army Chief Warrant Officer Stanley L. Harriman, 34.

It should be recognized that the American people love freedom and they love their country. I believe in democracy and justice. Those young men and women that we visited with likewise love those values and fight for them. To them I pay great tribute this evening.

I say to the American public that we must look at the battle that is continuing as we speak as a battle for the recapturing, if you will, of the virtues of democracy and justice and freedom and equality for the people of Afghanistan.

As we traveled the one road they had and saw the conditions of their major cities, and looked at the frighteningly poor people that live in 37 and percent illiteracy in their women, and thousands of children living in orphanages and burned-out and bombed-out buildings, it did not occur because of the American influence of the last couple of months, but because of the 23 years of war.

It is important for America to understand that if we are to fight terrorism and win, we must rebuild Afghanistan, its systems of government, its love for freedom, its economic structure. That must be the war we must fight today.

I will take to the floor of the House to tell Members what I saw: The conditions of women, the conditions of the people who lived there. There is no agriculture and no food. Hospital units that I visited had malnourished babies and children because there is no food.

So as Chairman Karzai has said, Afghanistan had been in hell if it had not been for the brave men and women that are fighting there today. But as we fight to rid it of the last vestiges of terrorism, let us not be doing so because we are investing dollars, so they might not only love freedom, but they may act upon freedom.

Again, I will share with the Members how the women still wear burqas and that there is no system of equality of rights for women. But we must never undermine those young men and women that fight and stand side by side because they believe in those values and virtues that we cling to in this Nation.

Hopefully, we will realize as Americans that what we fight most of all for, what should be the end result, is peace, not just in central Asia but peace in the Mideast; and the only way we can secure peace is if we engage in diplomacy and begin to put into structure constitutional rights and privileges: equality, justice, and democracy.

Mr. Speaker, we have a lot to learn, but one thing that I know for sure today is that brave men and women offered their lives so we might be free, and others around the world.
THE TWILIGHT ZONE, OTHERWISE KNOWN AS GEORGE BUSH’S AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Georgia (Ms. MCKINNEY) is recognized for 5 minutes.

Ms. MCKINNEY. Mr. Speaker, I am worried about what is happening to our great country today. I fear that many of us cannot see what is happening here. Maybe we are too close. Maybe there are even people who do not want us to believe our friends and allies in Europe and elsewhere are reporting that they are seeing disturbing developments in our country, like the fading of our fundamental constitutional rights, the creation of a war machine that threatens world peace, the spending of a generation of Americans on this war on terrorism, and even an attack on truth in government by forming the Office of Strategic Influence to lie to the rest of the world. The President even asked Hollywood to make these developments palatable to the American people.

With this as a backdrop, I would just like to ask the Members close their eyes and imagine being drawn deeper and deeper into black space. If Members keep their eyes closed and if they close them good and tight, they will be able to imagine themselves going faster and faster and deeper and deeper into a black unknown.

All of a sudden we see a bright light at a distance far away, but faster and faster and closer and closer it becomes brighter and brighter; and in the instant, with one grand motion, we can cross from the darkness into the light. But just before we make the crossing, a huge booming voice coming from nowhere, and at the same time coming from everywhere, booms all around us: "Where, and at the same time coming from nowhere, and at the same time coming from everywhere, booms all around us: "You unlock this door with the key of hearing that which is invisible, a dimension, a dimension of hearing that is not only meant to keep the books over at FBI, Rumsfeld, says we can afford it. That could only happen in the Twilight Zone."

Or that Arthur Andersen, who kept Enron’s books, could still have contracts to keep for PFI, DOJ, and the Pentagon. That could only happen in the Twilight Zone.

Wake up, America. We are not only in the Twilight Zone, we have crossed the threshold into George Bush’s America.

CONDOLENCES TO THE FAMILY AND FRIENDS OF CHIEF WARRANT OFFICER STANLEY HARRIMAN

(Mr. MCINTYRE asked and was given permission to address the House for 5 minutes and to revise and extend his remarks.)

Mr. MCINTYRE. Mr. Speaker, I would like to offer my deepest condolences to the family and friends of Chief Warrant Officer Stanley Harriman of the Third Special Forces Group of the United States Army who gave his life in the service of our country.

I join with his family and friends in paying tribute to him for the ultimate sacrifice that he has made on behalf of our Nation, and my prayers are with his family.

Stanley Harriman was a decorated soldier who willfully and enthusiastically participated in Operation Enduring Freedom. Among his many awards and decorations were two Meritorious Service Medals, three Army Commendation Medals, three Army Achievement Medals, the Valorous Unit Award, Army Superior Unit Award, two Army Good Conduct Medals, the Bronze Star, the Army Parachutist Badge, and the Special Forces Tab. Now, because of his heroic actions in recent days, he will also receive the Bronze Star and the Purple Heart.

This tragedy should remind us that our freedom and our security are neither free nor secure; they are repeatedly earned and protected by our men and women in uniform. They risk their lives so freedom may survive. Chief Warrant Officer Harriman’s courage in the face of danger reflects his character, a character born of his personal commitment to his Lord as a committed Christian and to his family as a committed husband, father, brother, and son.

We owe Chief Warrant Officer Stanley Harriman a tremendous debt of gratitude. His courage, character, and commitment to freedom are an example of love to him. It is important that we do not only remember Stanley as an excellent and dedicated soldier and Christian family man, but also as the American hero that he is.

May God bless him and his family and those who have served with him. May God bless our great country. We indeed are a better Nation because of men like Stanley Harriman and those who serve with him in our Nation’s Armed Forces.

SOCIAL SECURITY, THE SHADOW GOVERNMENT, AND THE WAR IN AFGHANISTAN

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from the District of Columbia (Ms. NORTON) is recognized for 5 minutes.

(Ms. NORTON addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)
system; but in order to meet that value of preservation of the system, we need to talk about numbers. Let us talk about a few numbers.

When that system was created 67 years ago, we had, what, 12 workers for every retired person? Today that ratio is three workers for every retired person, and in a few short years it is going to be that there are two people working for every retired person. Take a look at the math on that, Mr. Minority Leader, and take a calculation of what that means.

Moreover, take a look 67 years ago what the average age was, the average life expectancy for a male and a female, and compare it to today.

I would suggest that the difference between 67 years ago and the life expectancy today is at least a minimum of 14, perhaps 15 or 16 years. And what will it be when the generations of my children grow, another 10 years, when people are living longer?

And that is the good news. The fact is that our system is getting more and more weight put against it. We have got to come up with more and more dollars to continue the same kind of benefits. One, if we have less people putting in more people taking out, we better talk about numbers. Mr. Minority Leader. And because of the fact that some of us who are fiscally conservative want to talk about numbers, does not mean we are against Social Security.

Mr. Minority Leader, there are a number of Democrats on your side of the aisle who are fiscally conservative. There are a number of Democrats who worry about those numbers. There are a number of Democrats who put the emotion aside, the rhetoric aside and try and sit down with us and those who are interested in trying to figure out how do we work with these numbers so that we can meet the demands of the future.

Any elected official that tells you that any other elected official wants to do away with Social Security, frankly, is not telling you the truth. I have in my years of service in the United States Congress, I have yet to find one Congressman, and we have gone through hundreds of Congressmen in the years that I have been in service, I have yet to find one Congressman who has taken my face or I have heard it through an indirect conversation that has said what the minority leader said, and that is that the Republicans want to get rid of Social Security; that they have a secret plan out there for Social Security to slash the benefits of all of these people.

Mr. Minority Leader, I think your approach would be better phrased if you said, hey, look, we better sit down, both sides of this thing. We better talk numbers. Obviously, the value is preserved, and that is the thing. I think everybody agrees with that. So there should not be any argument about who wants to preserve the system.

Again, everybody that I know of in the United States Congress, and I defy the minority leader to show me somebody who does not, but everybody I know, every Congressperson wants to preserve the system. So put that argument aside. It is not an argument of preservation. It is a discussion of numbers.

How do we work with these numbers? How do we figure it out? Take a look at 67 years ago, the benefits that Social Security paid out, and take a look at the expenses that have occurred in the last 67 years without a reflective expansion of revenue coming in.

In other words, the Congresses through the years and the people of the country through the years have appropriated and approved more benefits than they have revenue coming in. Come on. You have got to deal with your family budget and you have a responsibility to deal with the budget of this country.

The best way to preserve Social Security for the future, which we all want to do, is to act with some economic sensibility. Do not mislead the people by pretending to promise them the same thing that, ever since you leave office, several years after you accomplish what you want to accomplish politically, somebody else gets stuck with the bill. That is what happened 67 years ago when 40 years of male here stacked up deficit after deficit.

Now we are back into a deficit this year, but it is not because of some kind of slight of hand. It is because we are engaged in a war and we are watching our revenue drop. We have to sit down and discuss that, just the same as Social Security. So those remarks at the beginning of this evening by the minority leader, again, some of the most partisan remarks I have seen on this floor, are clearly devised for election strategy.

It is an election year, and as we proceed closer to November, you will see, unfortunately, more and more people using the strategy of this microphone to enhance their own political self-serving interest. And I hope we can avoid that, especially when it comes to Social Security. Many of us, many Democrats that I know do not take part, do not participate in those kind of partisan discussions. They sit together in groups of people and say, how do we figure out, how do we work the numbers?

We have a problem. We have a lot more going out in Social Security over time than we have coming in. On a cash flow basis we are okay, but on an actuarial basis over time Social Security needs to have some adjustments.

I do not condemn the President of the United States. I commend the President of the United States for stepping forward and saying, get some expert help. Let me reach out to a commission, a commission made up of Republicans and Democrats, a commission made up of experts and of people who understand the needs of that generation and the needs of future generations, people that know, that are experts in accounting and economics.

That is the kind of panel that this problem will require. I do not think that the people that the minority leader is putting together, some kind of secret society out there which, of course, is obviously nothing but politically-charged language, the fact is they have come up with some suggestions. This commission has worked long and hard to try to come up with something that is constructive towards preservation of the Social Security system.

So I would hope that the minority leader would tone down these kind of partisan remarks; and instead of showing up at the microphone and firing out with this negotiation as an election year strategy, in my opinion, I think he would be much better served if he would join us and sit down and maybe he could build a consensus on the floor in person with that commission and talk about what their ideas are and what we can do to preserve the system.

Let me move on to a couple of other things that I think are very, very important.

First of all, in the last few days I have seen a media barrage, a media barrage across this country, about how aghast some people are that President Bush, the Vice President and the administration have put into place a back-up government in case a terrorist attack took out the sitting government in Washington, D.C.

Why would anybody be surprised about that? You better have a back-up plan in place. You know what happened at this U.S. Capitol on September 11? I was here. You know what kind of back-up plan we had? Zip. Zero. We were fortunate that a few brave souls, a few brave souls took a plane into the ground in Pennsylvania, because my guess is this plane would have been right here, coming through this dome in this Capitol and would have very easily wiped out the congressional leadership. That plane that hit the Pentagon very easily may have been intended to hit the White House and take out the leadership there.

Sure, we have a line of succession; but what happens to that line of succession if the Vice President, the cabinet secretaries and your different agencies, and they have no direction when in one central location are your Cabinet secretaries and your different agencies, and they have no direction from the selected government on how to run? Of course you better make up back-up plans.

In fact, some of the people, some of my colleagues here have different bills they have introduced, for example, the gentleman from Washington (Mr. BAIRD) on succession. I think it is a very legitimate and, frankly, is a responsibility of this administration, after September 11 especially, to say, hey, what if this happens again? What if they would have wiped out the
United States Congress? What if they would have wiped out the White House? Who gives direction to our government? What kind of safeguards do we have?

So I commend the administration, not only the President, but the United States and would love nothing more than to destroy this great building and the people that work in it and to disable our government. So now is the time to prepare.

So my opinion is people that have criticized this surprise me. Criticizing the President for, in effect, buying a back-up fire truck in case the fire station burns down. You ought to say, good job. Keep it up. That is the kind of forward thinking that we need to prepare this ongoing battle against terrorism and this ongoing battle against people who wish evil against the United States of America.

HONORING CHIEF WARRANT OFFICER STANLEY L. HARRIMAN

I want to move on from this and visit just for a moment about the horrible causalities that we have taken as far as in the last 48 hours or so. The deaths that were suffered were terrible, but I want to read, in fact, about the gentleman who was mentioned here, Chief Warrant Officer Stanley Harriman who lost his life in the last few hours in Afghanistan. I wanted to read a few comments out of today’s New York Times from the families.

"This is a card last month that the Chief Warrant Officer sent his wife, an e-mail message rejoicing that he had been sent to Afghanistan. "Honey, I am so excited about going to Afghanistan. I will be doing what I have trained for 16 years to do."

His survivors, which include his wife, a 6-year-old daughter and a 3-year-old son, his father, who is retired military, and he has a brother; and of this family, the commitment of this family towards the duty of their father, towards the duty of their son, towards the duty of their brother, it is an amazing family, that the duty and the preservation and the great things that we have in this country called for him to be in Afghanistan.

Let me share that card. Let me repeat a card that the Chief Warrant Officer sent to his wife, another card. He mailed a card to his wife from Kuwait which she received about one week ago. Mrs. Harriman, the wife, read from it during an interview. "I know that it is not always easy with me gone so much, but we have so much to be thankful for. We are truly blessed by God, and these trials and tribulations will only make us stronger."

Then let me say to you what his brother said, after learning of his brother's death. This is the Chief Warrant Officer’s brother, Steve. He said that “he hoped the military would not flinch at pursuing military operations to their conclusion.”

Stan would not have changed it if he could. He would do it the same way, and they continue to do what they say they are going to do, to complete the mission.”

And the key words here are "to complete the mission." We cannot allow the enemy to kill seven or nine or any number of our American soldiers over there and cut and run from our mission.

Some of you may have had the opportunity to see the movie Black Hawk Down. Those are the results, that is the kind of results where the sight of a body bag convinces many of our enemies across this world, the al Qaeda and some of the other people, that all you have to do is show the American citizens a body bag and they will cut and run. If you want to break America’s resolve, kill a few of their soldiers.

As Steve said about his brother, his brother would want the military to complete its mission. And we have a very heavy mission of putting this country, this country, this country, for the world, for the future of the world, not just for our generations and future generations of America, but for generations of all countries of this world. And that is to rid this world to the extent that we possibly can of the cancer that we discovered that has gone a lot further than we had ever imagined. That cancer had spread, and we discovered it on September 11.

Now, we have been able to locate some of that cancer, and we have got to cut that cancer out. You cannot ignore it. You cannot love it off your body. You cannot pray it off your body. All of these things help. Do not get me wrong. That all helps. But the reality is you have to go in with chemotherapy. You may have to go in with surgery. You have got to get that cancer. You cannot turn your face the other way. You have got to complete your mission.

You cannot go in and get a few cells of the cancer. You cannot go in and nip the little end off of it. You cannot even go in a take a big chunk of it but still leave some vital cells of cancer still in your body. You have got to complete the mission.

This country has taken a loss in the last few days of some very young and very brave American soldiers. But I would guess that the families of those soldiers and every one of those soldiers if they could say it today would say to the United States of America, complete your mission. Take out the enemy. Destroy those who would destroy this country. Destroy those who would destroy democracy in this world. I hope they continue to do what they say they are going to do, to complete the mission.

And the key words here are “to complete the mission.” We cannot allow the enemy to kill seven or nine or any number of our American soldiers over there and cut and run from our mission.

So I think that our resolve should be hardened. I do not think we should give any kind of message because I do not think it is true with the American citizens. I think our resolve should be hardened to complete this mission.

We learned from the past. In Somalia, it was a disgrace, our brave soldiers that fought and gave their lives. Vietnam was another example. We did not complete the mission. And you know what? We have trained people out there, we have convinced our enemies that the United States, again, all they have to do is have a death of their soldiers or torture some of their soldiers or drag them through the street like they did in Somalia, and within a couple of weeks after seeing their soldiers dragged through Somalia the president of the country will order their troops out and we will have beat the American giant.

HARRIMAN

So I want to visit a little about the President and his dedication to the completion of this mission. I noticed some criticism in the last few days of some individuals who say, number one, the President ought to inform us of the operational details of what is going on over there. Listen, we are not military experts. We are Members of the United States Congress. We have some oversight authority and so on, and we work with the administration, but what do my colleagues want done? What, do they want the President to come over every day and say, all right, here is how many helicopters we have dispatched in this portion of Afghanistan, here is where this ship is, this is what we are doing? Let the President and the military administration do their job.

I heard a complaint over the weekend on some of the news stories that we do not seem to really have a plan of where this is going. Well, I think the Vice President, Dick Cheney, did a very good job of responding to that. I think it was last evening, when he said, look, the people we are dealing with are terrorists. They are not going to meet us in some country and have a summit for peace or sign a peace treaty with us. There is not going to be some kind of long-term plan that they want to execute or cooperate in with the United States of America. There is no deterrent out there against these kind of people. They have one mission in mind; they want to destroy the United States, and they want to destroy anybody that is affiliated with the United States, and they want to destroy people that do not agree with them in any regard.
These are not the kind of people we can draw out some kind of peace plan or conclusion with short of taking them into custody or destroying them. And we cannot just stop with the al Qaeda. We have to call people what they are; we have to call it what it is. I was amazed that after the President’s speech, where he talked about North Korea, that all of a sudden some of my colleagues or some of the commentators across the country were starting to act like North Korea is a very amicable country; that the leadership, and not the people of North Korea, but the leadership of North Korea is not as evil as we portray them to be. What a misconception.

Take a look what North Korea is all about. In fact, if I was a wealthy man, I would spend my money and I would take every high school graduate in this country, if they wanted to go, and I would fly them to Korea and I would take them up to the DMZ and I would show them that separates two societies, the society of democracy and freedom against the society of communism and dictatorship and ruthlessness.

But all of a sudden, because our President and his administration, and a very able administration, DICK CHENEY and Condoleezza Rice and Donald Rumsfeld, because they say it so, we all of a sudden see them draw criticism. It was interesting that Colin Powell had to say the other day to, even some of our allies in NATO, hey, every time you pound on the United States, why not pound on Iraq.

And when the President talks about Iraq as part of the axis of evil and the evilness of Iran, do not forget the leader of Iraq, Saddam Hussein, who has poisoned his own people. He has not used chemical warfare or other kinds of poison against an enemy, but used it against his own people who disagreed with his policies. Look at the mass executions in that country. Look at the oppression against women in that country. Look at the oppression against scholars.

And let me remind my colleagues that they are not content to keep it within their own borders. North Korea is not content to stay within its own borders. Iraq is not content to stay within its own borders. They want to reach outside their borders, and they want to reach outside their borders, and they want to destroy the evidence of democracy. And we had better stand up to it.

Frankly, most of the people in America have given their support to the President and his leadership. We have got to draw the line in the sand. That is what the President has said, and he is willing to commit the American forces to complete the mission. That is what all of us need to do. But some of my colleagues stand up to the American people and say, well, where are we going and to start criticizing the administration at this point in time on our war against terrorism, when they have not sat 10 minutes as the commanding officer of the United States, our chief military officer; they have not sat for 10 minutes in a lieutenant’s chair in this mission. We need to give these people confidence. We need to give them our confidence that the job that they are doing is what needs to be done.

The cancer that is the al Qaeda, the acts of these terrorists, must be stopped. And thank goodness we finally have an administration that, despite the fact that we have taken some casualties, understands that if we are going to clear out the rats, if we are going to get in there and get those cancer cells, we are going to take casualties. There is a lot of dirty work ahead for us to get rid of this threat. But if we do not get rid of it now, the casualties we take today will be nothing, nothing compared to the many casualties we will take in the future because we did not support this administration and take out the al Qaeda while we had the opportunity to take out the al Qaeda; while we had the opportunity to do something to restrain the expansionist mode of Iraq and the ideals of Iran to want to spread this aesthetically or any kind of weapon of mass destruction against the rest of the free world.

So I would urge my colleagues to be a little slower in their criticism; study the facts a little more and do not pre-judge that somebody is not going to be some kind of tank captain out there who knows how to run the battlefield. We have experts out there that do that.

Now, I am not saying that Congress should forget or forget or release our oversight responsibilities and our budgetary responsibilities, et cetera. I am not saying that. I am just saying that I am beginning to sense that Congress and some Members of Congress are beginning to run interference on their own team. As our quarterback is getting ready to throw the ball, it is not a member of the enemy team that has broken through the line, it is some of our own people, kind of confused and running back there and asking the quarterback if he ought to be throwing the ball, right in the middle of the play. That does not work.

This country, I think, has shown very admirable dedication to what this country stands for: freedom and the protection of people throughout this world. Clearly, it has been reflected by our military, which has done an outstanding job. It has done such a good job that up to this point we have been able to limit casualties. But there comes a time to hand-to-hand combat, which is a necessary part, now when it comes to digging in real deep to get those cancer cells, we are going to have casualties.

I wish we would not have casualties. Everyone in this Chamber wishes we would not have casualties. These poor families who have suffered the worst loss a family can suffer wishes they had not suffered that. But it is my opinion that almost everybody, almost everybody comes to the same conclusion, and that is that sometimes we have to fight. We cannot run. Sometimes we have to do what is right. Sometimes we have to draw that line and when one individual steps over it, we have to stop them. Because if we do not, we will pay a very, very heavy price in the future.

Let me talk very briefly about North Korea. As my colleague at this time is our North Atlantic defense council or European council treaty organization, the North Atlantic Treaty Organization. It is very important. They have played an important part in our war in Afghanistan. Within hours after the September 11 attack against the United States of America, NATO, for the first time in its history, for the first time in its history, invoked what is called article 5.

Article 5 in the NATO agreement says if an attack against one is an attack against all. Within hours after that, NATO agreed to give the United States of America whatever was necessary, whatever the United States requested to assist them going after those people who committed atrocities of war against us. And the United States took advantage of that offer and took advantage of our membership in NATO.

We called upon our friends to help us track down the financial network that supported this from a financial point of view. We called upon our friends to help us with intelligence and to help us break up those cells, those terrorist cells, located throughout the world, including some located in the United States of America. We requested, and it was supplied, NATO AWAC aircraft. For the first time in the history of the United States, we had nine U.S. aircraft patrolling our skies while we used the AWAC aircraft over to the theater of operations.

I just recently returned from NATO meetings; and when I listened to the British, it was like listening to your own brother. The British are there. They are there 100 percent. And the British people, the ambassador over in London, told me what it was like hours after September 11. Tens of thousands of Britons came to the embassy to sign the condolence books. They could not get through the lines. They were overwhelmed and the calls were so many condolence phone calls from the British people to the American people. Tony Blair’s resolve was instant and has only strengthened. It has not weakened. He came to the assistance of the United States.

And so I want to commend NATO, but at the same time that I commend our partners in NATO, I want to remind some of our fair weather friends in NATO that this is not going to be an easy battle. Do not let these casualties be the last few hours scare you off. This, clearly, is a battle for this next century. This is a battle that determines the safety and the freedom and
the future for all of our countries, whether you are in NATO or not. This time around it was the United States of America. It was New York. It was Washington, DC. Next time it might be Paris or next time maybe a terrorist attack in the country of Luxembourg or, God forbid, some other place in this world.

We need to stick together as a team. This is not the time to pound on the United States, as Colin Powell has said. It is time to recognize who the enemy is, to acknowledge to the American people and to all world people who that enemy is, and to do something about the enemy. It is time to get a rope around that wild horse and bring it in. This cancer that is spreading throughout the world must be stopped, and it is not going to be stopped through weak knees. It is only going to be stopped through teamwork, through dedication, and, frankly, through sacrifice.

The sacrifice reflected in the last few hours by the loss of American soldiers is exactly the kind of medicine that unfortunately is going to be necessary to take that cancer off that body. So let me, in conclusion of my remarks, just repeat what I said earlier, and these are the remarks of the brother of Chief Warrant Officer Stanley Hariman, who was killed in action in the last few hours, here is what his brother says; and this is how I conclude my remarks tonight: His brother Steve said, I hope they could. He would have done it the same way. Steve said, I hope they could. He would have done it the same way. Steve said, I hope they could. He would have done it the same way.

Well, I do not know where they got that information, but now all of a sudden the President's budget that he has submitted to the Congress this year projects utilization of the Social Security trust fund for the next 10 years. I repeat. The President's budget proposes using Social Security trust fund dollars for the next 10 years. That is the economic game plan that we are under.

The Blue Dogs are suggesting that we ought to sit back, the Congress and the President, and our friends on the other side of the aisle need to sit back and roll up our sleeves and have an honest discussion about what we need to do to put our budget back in order. We need to have a serious discussion with everything on the table. The preceding speaker opened his remarks in just that vein, and there are a large number of Democrats who are willing to sit down and try to put our fiscal house back in order, but that offer has to be extended and so far it has not.

The bottom line tonight is that we are being asked to increase our debt ceiling by $750 billion. That means we are going to have to borrow or it is suggested that we need to borrow that amount of money. In the conduct of the war, we are perfectly willing, if that should be the decision of the President, to borrow the money to fight the war.

There are some that suggest that maybe, just maybe, we ought to consider paying for it, because when we borrow it today we are saying that this generation does not wish to pay for that which we are enjoying, but we are perfectly willing to send that obligation to our children and grandchildren. That is part of the discussion that we wish that we were having on this floor tonight.

I want to make it very, very clear that we, the Blue Dogs, are willing to support a temporary increase on the debt limit to meet the expenses of the war and to allow government to meet its obligations; but we suggest holding off on a long-term increase in the debt ceiling until we have a plan in place to return our country and our fiscal affairs to balance.

\[2000\]

I remind everyone that it was less than a year ago that we stood and debated on this floor of the House the economic game plan that we were going to follow for the next year and one next 10 years. I remind you that the Blue Dogs felt that we ought to be conservative with the $5.6 trillion projected surplus just in case it was not real, just in case something of an emergency nature might occur, just in case those who projected that surplus might be wrong.

We suggested that we ought to take half of that $5.6 trillion projected surplus and pay down the debt. We were told by our friends on the other side of the aisle and the administration that they were concerned about paying down the debt too quickly.

Well, do not know where they got that information, but now all of a sudden the President's budget that he has submitted to the Congress this year projects utilization of the Social Security trust fund for the next 10 years. I repeat. The President's budget proposes using Social Security trust fund dollars for the next 10 years. That is the economic game plan that we are under.

The Blue Dogs are suggesting that we ought to sit back, the Congress and the President, and our friends on the other side of the aisle need to sit back and roll up our sleeves and have an honest discussion about what we need to do to put our budget back in order. We need to have a serious discussion with everything on the table. The preceding speaker opened his remarks in just that vein, and there are a large number of Democrats who are willing to sit down and try to put our fiscal house back in order, but that offer has to be extended and so far it has not.

The bottom line tonight is that we are being asked to increase our debt ceiling by $750 billion. That means we are going to have to borrow or it is suggested that we need to borrow that amount of money. In the conduct of the war, we are perfectly willing, if that should be the decision of the President, to borrow the money to fight the war.

There are some that suggest that maybe, just maybe, we ought to consider paying for it, because when we borrow it today we are saying that this generation does not wish to pay for that which we are enjoying, but we are perfectly willing to send that obligation to our children and grandchildren. That is part of the discussion that we wish that we were having on this floor tonight.

We have made it very clear we are willing to participate in a meaningful dialogue, a meaningful debate in which we can have ideas and suggestions put forward as to how we get from where we are to where we need to be. Where we are today is we are back into deficit spending. We are back into spending the Social Security trust funds when after I think last year five times, five times we voted on this floor unanimously a lockbox on the Social Security trust fund. I guess we did not mean it.

The Blue Dogs when we were on the floor last year talking about the economic game plan that we suggested not only suggested that we take that $5.6 trillion surplus and devote half of it to paying down the debt, 25 percent of it to cutting taxes, and 25 percent of it to be spent on the priorities of this Nation.

What were those priorities? Fixing Social Security, fixing Medicare, dealing with prescription drugs, dealing with the economic problems of this country. We believe and still believe that we could do what we needed to do with that amount of revenue, and then still proposed cutting taxes by 25 percent of that proposed projected surplus.

Well, we lost. We came up 14 votes short, I believe was the number. And under our system of government, when you lose, you go on to the next round. Well, here we are up to the round being asked to increase the debt ceiling by 750 billion additional dollars. We say, whoa, let us not do that much at one time. Let us not admit that this body is incapable of working with the other body and working with the President and putting our fiscal house back in order and balancing our budget at a time certain. We are perfectly willing to deal with spending caps, with pay-go so long as everything is put on the table so we might have an open and honest dialogue and then get a vote on the issues in which we are concerned.

Now what does the debt ceiling mean to the average person watching us tonight? I know many times when you listen to us you get very confused. But, basically, it is a businessman going to their lender. It is a student going to their parents, having run up a $6,000 credit card bill. Of course, the parents will pay because they do not want the kid's credit damaged in the long run, but they will work out the arrangement that includes reducing the allowance, getting a part-time job, and getting promises for less partying, etcetera.

The worse thing that we are doing with our accumulated Federal debt is the reverse of this scenario. Parents are going to the students with their bills and expecting the youths to pay for their elders' irresponsible consumption. A businessman that reaches his credit limit at his bank needs to go to his banker and say, I need to borrow additional money. I have this great investment potential, I have got this great idea, and you convince your banker that you have a plan that will support that back support, that you have borrowed up to this point but also will pay back that which you are intending to borrow in upping your credit limit.
That is what we are trying to focus on tonight as Blue Dogs, a plan. If Members want to increase the debt ceiling, tell us how they are going to get the budget back into balance in a time certain and in a short time. The economic plan that we are under to tonight says 10 years. Ten years we will still stay in the Social Security trust fund without coming up with a plan for how we are going to fix Social Security and Medicare for the future. That is what we are going to be talking about tonight.

Mr. Speaker, I yield to the gentleman from Arkansas (Mr. BERRY), another one of the true leaders of the Blue Dog Coalition. He has been focusing not only on budget but health care matters and other matters.

Mr. BERRY. Mr. Speaker, I thank the gentleman for yielding me this time. I appreciate the gentleman’s great leadership in this House of Representatives over many years. Almost from the day he has been a great champion of fiscal responsibility. He was one of the founders of the Blue Dogs, and fiscal responsibility is our hallmark, and we are very proud of it.

Mr. Speaker, I cannot begin to tell you how surprising it is to us to hear this evening that we are here on this floor yet again tonight to talk about the fact that this country simply cannot live within its means. It is a heart-breaking thing to know that we continue to run up bills, borrow money, pass the debt on to our children and grandchildren and tell the American people everything is all right, do not worry about it. That is what is going on.

Mr. Speaker, I have to ask: When is this day going to end? How long are we going to allow this to go on? When I came into this House in 1997, that was the last time we had a vote to raise the debt ceiling. We worked hard to create a situation where we would have money to pay off the debt that this generation has accumulated, and we have nothing to show for it.

We worked hard in this House to get a balanced budget and to accumulate a little bit of a surplus and to create a situation where we would have the ability to pay off this debt. Just a year ago, in a Blue Dog meeting, the gentleman that is the director of the Office of Management and Budget, the President’s bookkeeper, the President’s accountant, came to the Blue Dogs, and I will evenning how forward I am. He said, our greatest fear is that we will have so much money that we will pay off all of the debt, and no one will have a safe place to invest their money because you will not be able to buy a United States treasury bond. I am almost embarrassed myself by laughing out loud right in front of him. I thought it was the most ridiculous statement I had ever heard because his plan was to create the situation that we have today. He told the Blue Dogs we are not interested, count us out when you talk about taking this surplus and taking half of it and paying down the debt because we do not want any part of that.

We said, let us take a fourth of it and reduce taxes. We thought we should do something about the marriage tax penalty and the estate tax, and I still think we should have. Then we said, let us try to deal with some disparate spending priorities that we feel that we need to deal with. To achieve the balanced budget and the surplus that we had at that time, we had basically window-wrecked the senior citizens health care system because we have created a situation where the health care providers in this country are not going to continue to provide health care to our seniors for the small amount of reimbursement that they got until we changed it. We are about to ruin the health care system in this country for our seniors. We do not have any money for prescription drug benefits.

We wrote a farm bill to try to balance the budget that bankrupted the entire agricultural community of this country and has cost us far more than we ever intended or a responsible farm bill would have cost us had we done it right.

The long-term interest rates in this country have not gone down, even though we have done everything that we know to do to try to drive them down, and that is an indication that Wall Street and the world’s financiers do not want any part of this.

They know that we are borrowing money that we cannot pay back. They know that we are passing an economic burden on to our children and grandchildren that they cannot bear.

What is going to happen? We have already spent all of the Social Security trust fund. We have spent all the Medicare trust fund. All the money is gone. And now we are being asked to raise the ceiling on the amount of money above that that we can borrow: “Let’s spend all the money we can get our hands on and then borrow some more to go with it.” And what are we going to have to show for it? Nothing. We have not built a road. We have not built a school. We cannot point to anything that we have accomplished.

Mr. Speaker, I carry this buckeye in my pocket. It is a relatively worthless little nut from a small bush in Arkansas. The squirrels will eat it sometimes. Nothing else will. Folklore has it that if you take that little nut and carry it in your pocket and rub it just right with your thumb, the oil from your skin will make it shiny and the shinier you get, the better your health will be. It will protect you from rheumatism. It will protect you against all kind of evil spirits. And it will bring you good health. Mr. Speaker, that is what the Medicare system is going to look like in 15 years, because we have squandered the opportunity to make Medicare and Social Security whole and make sure that they are here so that we can take care of our children and grandchildren and not get struck by a horrible tax burden.

Let me read to you what the GAO Comptroller General, David Walker, said just a few days ago: “Absent substantial reform of entitlement programs, a rapid escalation of Federal spending for Social Security and Medicare and Medicaid beginning less than 10 years from now is virtually certain to overwhelm the rest of the Federal budget.”

We are not going to be able to do anything but pay for Social Security and Medicare and pay the interest on the national debt. That is not a secure Nation. It is not a responsible Nation. It is not a responsible farm. It is not a responsible government. We are all about tonight. We are saying that to overwhelm the rest of the Federal budget with the debt on to our children and grandchildren and not even have a plan as to how we are going to deal with it. They do not even want to talk about a plan. They just say, just keep borrowing money, just keep cutting taxes more and more, and hope for the best. This same Comptroller General makes the comment that you cannot grow economically fast enough to take care of this problem once it reaches that particular spot that he was talking about.

It is time for us as a Nation and it is time for this House and this Congress to be responsible and sit down and work together for a plan that will provide for the responsible fiscal operation of this country.

Mr. STENHOLM. I thank my friend from Arkansas for those remarks. I remind everyone that we are all about tonight. We are saying that to increase our debt ceiling without a plan for getting us back into balance is irresponsible. We are prepared to vote to increase the debt ceiling short term. We do not want to see our country default on its debt. We do not want that; no one wants that. But we do believe it is irresponsible for us to blindly follow an economic game plan that has squandered $5 trillion of surplus revenue without a plan to take care of the problems of Social Security and Medicare. We think that is irresponsible. And we hope that as a majority of this House puts together their budget, this year we would hope that we could be a part of that game plan.

We are here tonight saying that if you participate in a budget process that gives us a plan to get us back into balance in a reasonable period of time and that keeps us in balance, we will support it. We will support it. But we will not support increasing the debt limit by $750 billion by not only continuing down the plan area that we are
into tonight but actually making it worse as the budget that has been presented to Congress projects to do. That, we will not do.

I yield to the other gentleman from Arkansas (Mr. Ross), one of our newer presented to Congress projects to do. Mr. ROSS. I thank the gentleman from Texas for yielding.

When I tell people I am a member of the Blue Dog Coalition, they ask me, what is the Blue Dog Coalition all about? I tell them that we are about being fiscal conservatives.

I come from 10 years in the Arkansas State Senate where I helped balance the State budget for 10 years. My wife, Holly, and I own a small business in our hometown of Prescott, Arkansas, a town of 3,400 people. We know what it is like to meet a payroll every Friday. We know what it is like to live within a balanced budget at our small town family business. And I do not think the American people expect anything less of those of us in the United States Congress, those of us that are setting out the vision and the priorities for the future of this great country. That is what the Blue Dogs are all about, being fiscal conservatives.

I can tell you something else that I am about and I think the Blue Dogs are about, and that is, we are sick and tired of all the partisan bickering that goes on in our Nation’s capital. It should not be about what makes the Democratic Party look good or bad or what makes the Republican Party look good or bad. It ought to be about doing the right thing by the people who sent us here to represent them. I believe there are extremists in both parties. The Blue Dogs are trying to bring the extreme sides of both parties to the middle to find some commonsense solutions to the problems that face us here in America.

The administration requests to raise the debt limit by another $750 billion. Last year, the administration said we would not need to raise the debt limit for at least 7 years. The administration even said that there was a danger in paying down the debt too soon. I have not been told that one out yet. And now the administration in their fiscal year 2003 budget puts us back in deficit spending by $100 billion, by creating $100 billion in new debt, and I believe that discriminates against the taxpayers. It allows our government to go further into debt, raids the Social Security trust fund. It simply authorizes the government to write another $750 billion in IOUs to the Social Security trust fund. It is a true balanced budget, to get out of the Social Security trust fund with no provision, absolutely no provision, on how that money will ever be paid back. I think that is wrong. That is why the first bill I filed as a Member of Congress was a bill to tell the politicians in Washington stop raiding the Social Security trust fund and, yes, to keep their hands off the Medicare trust fund.

Let us talk about the debt, some $5.7 trillion in debt. A lot of people do not want to talk about it. Think we should. We should not only talk about it, we ought to pay that debt down. Why? Because we are the ones that created it. At least the majority of the people in America elected the politicians that created that debt. I think it is wrong to pass it on to our children and our grandchildren.

$5.7 trillion this country is in debt tonight. What does that mean for all of us? Some people in this country think we spend too much money on food stamps. That is $2 billion a month. Some people in this country think we spend too much money on foreign aid. That is $1 billion a month. We spend $1 billion every single day in America simply paying interest, not principal, just interest, on the national debt.

How much is $1 billion? I put that in my calculator, and I get that little E—

—49 in Arkansas. Give me a week of it, and something else, we must pay back the IOUs to the Social Security trust fund. They already total $1 trillion. Let me tell you why that is important to all of us. When Social Security runs into financial difficulties in 2030, let us sit down and begin to honestly and sincerely talk about what kind of a fix we need to put in for Social Security so that it does not run into financial difficulties in 2030. Let us start reasoning together.

I do not understand, and that is what the Blue Dogs said last year, we ought to have had that discussion last year; but we did not. But it is not too late. It is never too late for reasonable men and women, elected by our constituents in our respective 435 districts. All of us get here the same way. We get elected by a majority of the people in our district. All of us are well-meaning. But every now and then you vote for something that puts in place something that we think tonight we would like to turn around.

When you had a $5.6 trillion surplus last year, and you came back in 1 year, and we go back now back into the Social Security trust fund for the next 10 years under the economic game plan we are under, I would hope our friends on the other side would not say, “there you go again.” You are saying is we think, before we increase the debt ceiling, we ought to make one more attempt to get a true balanced budget, to get out of the
Social Security trust fund and, even in an election year, have a serious debate and discussion about how we would fix Social Security.

I have got a plan that I have joined with the gentleman from Arizona (Mr. Kolbe) is a plan that makes a lot of sense. Anyone that stands on this floor and criticizes the other person's idea without offering one of their own, I do not think too highly of. But I would welcome an honest and serious debate, and I hope at some time in the future we could use some of the ideas in which the Blue Dogs have actually had a discussion about what it is that we are disagreeing on.

Tonight, for example, I would welcome someone from the other side of the aisle that would come over and say, you guys are all wet. Here is what we are doing. I would welcome that. Maybe we can get into that.

Now I would like to yield to the gentleman from Utah (Mr. Matheson). The gentleman from Utah is making a real mark here in the Congress. One of the things I have appreciated is his understanding of energy, because he kind of comes from that experience. But, also, just as my two colleagues from Arkansas have been real leaders within the Blue Dog Coalition on focusing on fiscal responsibility, so has the gentleman from Utah.

Mr. MATHESON. Mr. Speaker, I thank my colleague from Texas, and I appreciate him leading this discussion tonight. That is important to me. It is important to the Blue Dog Coalition, but it really ought to be important to all of us.

It was about 150 years ago that my great-great grandfather came to the United States from Scotland. I have to say that I believe personally am true to my Scottish ancestry when it comes to money, especially the people's money. I do not like deficits. I do not like debt.

What I first decided to run for public office, I never had heard of the Blue Dogs. I was a candidate working hard, talking about issues that I thought were important and the notion of being fiscally responsible, the notion of trying to pay down debt. That was really important to me.

As I got involved in being a candidate, suddenly I heard about this group called the Blue Dogs, and the more I heard about them, the more I said, those guys are saying a lot of the same things that seem to make sense to me, and it has been a group that I am real proud to associate with, for a number of reasons.

Number one, they have a reputation for caring very much about being fiscally responsible. Number two, they also have a reputation for just putting the cards on the table.

What I like about this group is that we try to get away from a lot of the rhetoric, and we are real open. An open discussion. As the gentleman from Texas (Mr. Stenholm) just said, if someone wants to disagree with us, that is great. Let us invite that dialogue. Let us have a discussion about how we can come together and come up with some good ideas from both parties to be fiscally responsible.

I think the Blue Dog budget that was introduced a year ago was a real response to an idea that was a good idea, and we nearly won. We nearly did. But we did not quite make it.

Now we find ourselves in a rather extraordinary circumstance compared to a year ago. It is that there are a lot of changes in what this country faces from a year ago, and we as Blue Dogs understand that we face some new expenditures in our government right now.

We face a war on terrorism that costs money, and it is a serious issue and something that we support. We face issues about homeland security that we were not thinking about a year ago, and those are going to take resources, in a short debt that, and just a lot of take care of those issues and address them in a responsible way.

To the extent that the economy is in a downturn and to the extent we face some of those issues, we understand that there may be times, and circumstances like that, when the government may have to go into some deficit in the short term, and if we are coming right up against that borrowing limit, it may be responsible to raise that up a little bit to get us through this short-term problem we face here.

But that is not what we are looking at. That is not what the administration is asking us to do. The administration is asking us to raise the debt limit by $750 billion.

We throw so many numbers around this place, I think we grow numb to the meaning of these numbers. But $750 billion in a short debt that, and just a lot of money and that is a big blank check that we are asking for, that the administration is asking for us to raise that up a little bit to get us through this short-term problem we face here.

That just does not seem to make sense. From my Southern Utah roots that does not pass the smell test. We ought to be willing to be responsible about this. Before we write a huge blank check, let us take a look at the short-term issues, as I suggested. Let us be willing to acknowledge that we ought to maybe increase the debt limit a little bit, because we have these increased expenditures that are making war on terrorism, homeland security.

The economy has been slow. We understand that. But, for crying out loud, $750 billion, that is a lot of money.

I notice that the gentleman from Arkansas (Mr. Ross) mentioned that he is a small businessman. The gentleman from Texas (Mr. Stenholm) I know has been a farmer. I am sure both of them in their lives had the experience of at times borrowing money for their business. One of the extraordinary things they have had to tell a story, a legitimate, credible story about how, if they are going to borrow that money, how they are going to put it in that business and how that business is going to create some recurring income over time to pay that loan off.

It has been my personal experience, too. I used to work in the energy business, built a couple of cogeneration projects that cost $100 million apiece. I had to go to a bank to find that money to help build that project. I will tell you, they made me jump through a lot of hoops to explain how that project, once it was built, was going to pay for itself ever time. And we got that loan, and those projects in electricity and those loans are getting paid off because we told a story that was credible, and I am glad to say it has worked out that way as well.

The same thing applies to all of us. Everybody has gone out, maybe they borrowed money to buy a car or a house. You cannot just walk in and say, well, I have no idea how I am going to pay you back, but please give me money.

Yet in terms of raising this debt limit, that is what we are talking about. I know there is a lot of uncertainty when you look out in the future. I understand the problems with long-term projections. We all have to live with that uncertainty.

But that does not mean you just ignore the future. That does not mean you do not try to give your best effort and figure out what you need to do in the future. As time goes on, you retool your plan to fit changes that you did not expect.

But what we have now is this request to raise the debt limit to $750 billion, and there is no end in sight. There is no sense of how we are going to ultimately change this pattern of deficit spending.
That is why we are here tonight. That is what we are talking about. We are trying to engage people in a dialogue.

I do not claim to have all the answers for how we are going to right this ship. I realize that it is going to be a long haul. I am going on 24 years. I have worked with my colleagues from both sides of the aisle, the gentleman from Arizona (Mr. Kolbe), in which we will ask the Committee on Ways and Means to tone down the rhetoric regarding Social Security. I will be equally hard on my colleagues, those who choose to get a little bit rambunctious with the rhetoric on Social Security, as I will be equally hard on the majority side. I am very critical of the majority for not taking up a Social Security reform plan. I think that is legitimate.

I used to get blamed for a lot of things that happened in the future. I am pointing out our belief that you do not deal with the future of Social Security by digging the hole deeper. When you have an unfunded liability in the Social Security system tonight of $22 trillion, we do not believe it is a solution to dig the hole to $23 trillion.

You do not really back up and get a running start out of a hole. When you find yourself in a hole, the first rule is to quit digging. That was the infamous words of Garfield. That is what we are saying tonight. You do not just automatically borrow additional money unless you have got a plan.

Our colleague talked about going and borrowing $100 million to finance a cogeneration plant. It was a good investment or he would not have gotten the money.

Tonight we are being asked to borrow additional money so we can pay interest on that debt without doing anything to solve the problems of this Nation. That is what Garfield and a lot of people say, well, you know, are you all not being just a little inconsistent? Some might say, how is the debt limit vote different this year from the last time? Well, let me point out how it is different. We are being asked to raise the debt limit outside of a plan for balance. The last two votes that this body had to raise the debt limit came at a time when Congress and the President were engaged in bipartisan negotiations on a balanced budget that ultimately led to the Balanced Budget Agreement of 1997. The current situation is very different. The President has submitted a budget which projects deficits financed by borrowing the Social Security surplus for the next decade. I repeat, the plan that we have been asked to put into place borrows the Social Security trust fund for the next 10 years. That is not a plan we can support.

Now, also we are going to hear, I hope we do not, but I have already heard rumblings of this, that we need to change the manner in which we determine what the numbers are. The last time this bill came up in 1997, we had a different President in the White House. The minority leader of this body said, and I quote, “We said from the beginning of this debate that we wanted to sit down, roll up our sleeves and have an honest discussion about what we are doing...”

Now, I want to repeat, we are not playing politics with this issue. We are not. We will vote for a short-term debt ceiling, provided there is a plan of how to get from where we are to where we need to be. We do not think that is something to fool the majority. We are willing to put our money where our mouth is. We are willing to vote on a temporary increase on the debt limit over whether to balance the budget or not. We want him to submit a budget that balances by CBO.”

Now, here we are in danger of again doing, as we have seen happen a few times over the years, we will either use the Office of Management and Budget, that is the Administration’s budget arm, or we will use the Congressional Budget Office, that is CBO, that is the bipartisan congressional budget arm. We agreed several years ago that we would CBO; we, Congress, agreed that CBO would be the arbiter of what the numbers are. Not saying that they are automatically right; not saying that they are any better than OMB, but since we often have different assumptions, we just agreed that we would use CBO.

Now, I hope that the majority this year will stick to what we have agreed to doing. We will use CBO, whatever they say because, remember, these are projections. Let us not slip into using OMB when it works to the advantage or CBO when it works to the advantage; let us use CBO.

Congress and the President need to sit down, roll up our sleeves and have an honest discussion about what we are going to do to put this in order with everything on the table. We need to put together an honest plan, putting the budget on a reasonable glidepath toward balance without using Social Security using CBO estimates. That is what we are trying to say tonight.

In 1995, in 1995, 48 Democrats joined with the Republican majority to insist that President Clinton submit a plan that was balanced under CBO numbers. We hope that the 148 Republicans who voted for that legislation, who are still in the House, will stay consistent. Those 48 of us on our side of the aisle do intend to stay consistent. We believe that since we, over the last 8 years, have substantially reduced our Nation’s fiscal house in order, eliminated the deficits as far as the eye could see, actually got ourselves into surplus for 1 year, that all of the pain and anguish that has been caused or was caused or was utilized in order to accomplish that goal for our country should not be squandered in 12 months.

Now, is that an overly partisan statement to make? I would hope not. I listen very carefully to my colleagues on the other side of the aisle. They say, and I believe it sincerely, as we do, that is what they want to do. But we cannot do it on this side of the aisle unless they do it. We are in the minority. When we are in the minority, we do not have 218 votes.

Now, I want to repeat, we are not playing politics with this issue. We are not. We will vote for a short-term debt ceiling, provided there is a plan of how to get from where we are to where we need to be. We do not think that is something to fool the majority. We are willing to put our money where our mouth is. We are willing to vote on a temporary increase on the debt limit.
to meet the expenses of the war. We are willing to do that. What we are not willing to do is give a $750 billion blank check to continue on an economic game plan that has already squandered $5 trillion of projected surpluses in one year. That is not reasonable. We are not willing to do that. We do not think our budget last year was unreasonable either. We put forth our best effort on the floor, and we lost. And when we lose, we go on to the next battle. Well, the next battle is now. The next battle is now.

Now, again, in case someone is just now joining us, on the debt limit, I used one example, and I will use another. On the debt limit, it is kind of like going into one of our best restaurants in Texas and enjoying one of our infamous Texas beef steaks, enjoying it, and then walking out and saying we are not going to pay for it. That is what the debt ceiling is all about. The other example is a businessman in trouble because of unforeseen difficulties, but has a good record. We have a lot of farmers in that condition right now out in the country that, through no fault of their own, are finding it difficult to pay back their banker. To go back to the banker, the banker knows they have made adjustments. They make adjustments in their economic game plan. They make adjustments in their budgets. We cut back here; we do things a little differently. We might do the same thing. That is what we are asking. We just do not believe it makes common sense to arbitrarily say to our country, we are going to borrow $750 billion on a game plan that has squandered $5 trillion of surpluses.

Now, I think it was very important that the gentleman from Utah (Mr. Matheson) a moment ago acknowledged the war. I have said three times tonight, we are perfectly willing, and we are 110 percent behind our President in the conduct of the war. Separate that issue from what we are talking about tonight. We will do what is necessary to make sure that our young men and women have the tools necessary, both now and in the future, to do what they are called on to do, and that is defend the freedom of this country. We will do that. That is not what we are talking about tonight. I hope that as we get closer and closer to that vote on the debt ceiling, that we will make changes in that economic game plan. We will be proposing how we would do it. We have already proposed how we would do it. We told our colleagues last year how we could do it, but we lost.

I want to conclude my remarks tonight by going back again to the Social Security question. I want to make it very, very clear. This is one Member on this side of the aisle that has happened to agree with the President regarding his proposal for individual accounts. I have to change my view. I have to change. I repeat: the gentleman from Arizona (Mr. Kolb) on that for the last 6 years. We have introduced, reintroduced and reintroduced for the third time our suggestion of how we can, in fact, make Social Security as sound or even sounder for our children and grandchildren. I am perfectly willing to discuss and debate that issue until the cows come home, and if we get a majority, we win; if not, nobody will beat us with a better idea.

What I am deeply concerned about is on my side of the aisle critics talking about Social Security without offering their own plan. We will find no one anywhere in the United States tonight that says that Social Security will be there for our grandchildren without making some changes. No one. No one tonight should be concerned for today and second about their Social Security check. But for my grandsons, 6½ and 4½ years old, we had better start getting concerned about their Social Security if Congress continues to not do what we need attempting to win elections with a plan to reform it.

That is why even, even if 9-11-01 had not occurred, we still would be standing here tonight saying the economic game plan that we are under, we ought to change. I repeat: even if 9-11-01 had not occurred, we would still be having the discussion that we are having tonight, based on the estimates of CBO and OMB. That is something that people need to understand.

Again, I want to make it very, very clear. The Blue Dogs have taken this hour tonight to say that we are willing to support a temporary increase to meet our expenses, but only a temporary increase; we need to keep this Congress’s feet to the fire, and we need to make the tough decisions, hopefully starting with at least beginning a dialogue on Social Security this year, without elevating the rhetoric. I hope that in the weeks ahead, and I am asking today, that the committee that deals with this in the next Congress will think about Social Security without elevating the rhetoric — two issues.

I will join with the gentleman from Arizona (Mr. Kolb) and others, the gentleman from Michigan (Mr. Smith) on the other side of the aisle, for example, the gentleman from Florida (Mr. Bright) on my side, and the gentlewoman from Missouri (Ms. McCarthy), and others who have been a part of coming up with a constructive solution; we will join. I just do not think it is too much to ask of the majority to spend a little bit of time in serious legislation on the most serious problem facing us, other than the war, and that is the future of Social Security. We are going to have a lot more to say about it in the days and weeks ahead, and I thank my colleagues for their indulgence tonight.

MESSAGE FROM THE PRESDENT

A message in writing from the President of the United States was communicated to the House by Mr. Sherman Williams, one of his secretaries.

TO FACILITATE POSITIVE ADJUSTMENT TO COMPETITION FROM IMPORTS OF CERTAIN STEEL PRODUCTS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The Speaker pro tempore (Mr. Crenshaw) laid before the House the following message from the President of the United States:

To the Congress of the United States:

In accordance with section 203(b) of the Trade Act of 1974, as amended (the “Act”), I hereby transmit documents to the Congress that describe the safeguard action that I have proclaimed on imports of certain steel products, pursuant to the authority vested in me by section 203(a)(1) of the Act and as President of the United States, and the reasons for taking that action.

GEORGE W. BUSH.

THE WHITE HOUSE, March 5, 2002.

Corrections to the Congressional Record

S. 1206. An act to reauthorize the Appalachian Regional Development Act of 1965, and for other purposes.

Leave of Absence

By unanimous consent, leave of absence was granted to:

Mr. Biscerra (at the request of Mr. Gephardt) for today on account of business in the district.

Ms. Lee (at the request of Mr. Gephardt) for today on account of business in the district.

Ms. Solis (at the request of Mr. Gephardt) for today on account of business in the district.

Ms. Waters (at the request of Mr. Gephardt) for today on account of business in the district.

Special Orders Granted

By unanimous consent, permission to address the House, following the legislative program and any special orders herebefore entered, was granted to:

(The following Members (at the request of Mr. Pallone) to revise and extend their remarks and include extraneous material):

Mr. Gephardt, for 5 minutes, today.

Mr. Lipinski, for 5 minutes, today.

Mr. Green of Texas, for 5 minutes, today.

Ms. Pallone, for 5 minutes, today.

Ms. Carson of Indiana, for 5 minutes, today.

Seneca enrolled bill signed

The Speaker announced his signature to enrolled bills of the Senate of the following titles:

H 685.
Ms. NORTON, for 5 minutes, today.
Mr. STUPAK, for 5 minutes, today.
Ms. KAPTUR, for 5 minutes, today.
Ms. JACKSON–LEE of Texas, for 5 minutes, today.
Ms. MCKINNEY, for 5 minutes, today.
Mr. MINTZER, for 5 minutes, today.
(The following Members (at the request of Mr. HANSEN) to revise and extend their remarks and include extraneous material:)
Mr. PENCE, for 5 minutes, March 6 and 7.
Mr. GANSKE, for 5 minutes, March 7.
Mr. OSBORNE, for 5 minutes, March 6.
Mr. HANSEN, for 5 minutes, today.
(The following Member (at his own request) to revise and extend his remarks and include extraneous material:)
Mr. SMITH of Michigan, for 5 minutes, today.

ADJOURNMENT
Mr. STENHOLM. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o’clock and 57 minutes p.m.), the House adjourned until tomorrow, Wednesday, March 6, 2002, at 10 a.m.

EXECUTIVE COMMUNICATIONS. ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker’s table and referred as follows:

5733. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency’s final rule—Approval and Proclamation of Air Quality Implementation Plans and Designation of Areas for Air Quality Planning Purposes: Commonwealth of Massachusetts; Carbon Monoxide Redesignation Request; Maintenance Plan, and Emissions Inventory for the Cities of Lowell, Springfield, Waltham, and Worcester [MA084-7214a; A-1; FRL-7138-7] received February 19, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

5736. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency’s final rule—Interim Final Determination that State has Corrected the Rule Deficiencies: Sanctions and Real Estate Investment Trusts, California, County Air Pollution Control District, State of California [CA 253-0321c; FRL-7139-4] received February 19, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

5737. A letter from the Acting Director, Defense Security Cooperation Agency, transmitting notification concerning the Department of the Army’s Proposed Letter(s) of Offer and Acceptance (LOA) to India for defense articles and services [Transmittal No. 02-15], pursuant to 22 U.S.C. 2776(b); to the Committee on International Relations.

5738. A letter from the Director, Defense Security Cooperation Agency, transmitting notification concerning the Department of the Army’s Proposed Letter(s) of Offer and Acceptance (LOA) to India for defense articles and services [Transmittal No. 02-14], pursuant to 22 U.S.C. 2776(b); to the Committee on International Relations.

5739. A letter from the Director, Defense Security Cooperation Agency, transmitting the Department of the Army’s proposed lease of defense articles to Greece [Transmittal No. 01-62], pursuant to 22 U.S.C. 2776(a)(1); to the Committee on International Relations.

5740. A letter from the Director, International Cooperation, Department of Defense, transmitting a copy of Transmittal No. 06-02 which informs the intent to sign a Project Arrangement between the United States and Canada concerning Vaccinia Virus (smallpox) Vaccine, for other purposes; to the Committee on International Relations.

5741. A letter from the Director, International Cooperation, Department of Defense, transmitting a copy of Transmittal No. 06-03 which informs the intent to sign a Project Arrangement between the United States and the Kingdom of Norway concerning the Lightweight Hypervelocity Missile Project, pursuant to 22 U.S.C. 2776(f); to the Committee on International Relations.

5742. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed Manufacturing License Agreement with Switzerland [Transmittal No. DTC 140-01], pursuant to 22 U.S.C. 2776(d); to the Committee on International Relations.

5743. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of defense articles or defense services sold commercial under a Cooperative Research and Development Agreement [Transmittal No. DTC 116-01], pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

5744. A letter from the President, Republic of the Marshall Islands, transmitting a report Presented to the Congress of the United States of America Regarding Changed Circumstances Arising from the U.S. Nuclear Testing Program in the Marshall Islands, pursuant to 48 U.S.C. 1681 nt.; to the Committee on Resources.

5745. A letter from the Independent Counsel, transmitting the annual report for the Office of Independent Counsel-Barrett, pursuant to 28 U.S.C. 595(a)(2); to the Committee on the Judiciary.

5747. A letter from the Associate Administrator, Regulations Unit, Internal Revenue Service, transmitting the Service’s final rule—Certain Transfers of Property to Regulated Investment Companies and Real Estate Investment Trusts [REG-142299-01] (REG-209135-88) (RIN: 1545-BA36 and 1546-AW92) received February 25, 2002, as well as 5 U.S.C. 801(a)(1)(A); to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HASTINGS of Washington: Committee on Environment and Commerce, transmitting a report concerning resolution providing for consideration of the concurrent resolution (H. Con. Res. 275) expressing the sense of the Congress that hunting seasons for migratory mourning doves should be modified so that individuals have a fair and equitable opportunity to hunt such birds (Rept. 107-364). Referred to the House Calendar.

Mr. SESSIONS: Committee on Rules. House Resolution 354. Resolution providing for consideration of motions to suspend the rules (Rept. 107-366). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions were of the following titles introduced and severally referred, as follows:

By Mr. HEOKESTRA (for himself, Mr. BORNER, Mr. MCKEON, Mr. GREENWOOD, Mr. GRAHAM, Mr. FLETCHER, Mr. DEMINT, Mr. JANSSEN, Mr. PLATTS, and Ms. HART):
H.R. 3639. A bill to reauthorize the Child Abuse Prevention and Treatment Act, and for other purposes; to the Committee on Education and the Workforce.
By Mr. GEORGE MILEK of California (for himself, Ms. PELORO, Mr. ANDREWS, Mr. FORD, Mr. KILDEE, Mr. KUCINICH, Mrs. MCCARTHY of New York, Mr. OWENS, Mr. PAYNE, Ms. RIVERS, Ms. SOLIS, Mr. TURNEY, Ms. WOOLSEY, Mr. WU, Mrs. JONES of Ohio, Mr. SANDERS, Mr. BROWN of Ohio, and Mr. DOGGETT):
H.R. 3643. A bill to amend the Employee Retirement Income Security Act of 1974 to provide for timely notification of plan participants and beneficiaries whose individual accounts hold small transfers of insider trading in employer securities; to the Committee on Education and the Workforce.
By Mr. THOMAS:
H.R. 3641. A bill to provide assistance to displaced workers by extending unemployment benefits and by providing a credit for health insurance costs, and for other purposes; to the Committee on Ways and Means, and in addition to the Committees on Energy and Commerce, and the Budget, for a period to be subsequently determined by the Speaker; in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.
By Mr. LAMPSON (for himself and Mr. URBACH):
H.R. 3842. A bill to assure that recreation benefits are accorded the same weight as hurricane and storm damage reduction benefits as well as environmental restoration benefits; to the Committee on Transportation and Infrastructure.
By Mr. BURTON of Indiana (for himself, Mr. ROBETS, Mr. DOGGETT, and Mr. GELLOTTI):
H.R. 3843. A bill to amend the Clinger-Cohen Act of 1996 to extend until January 1,
2002, a program applying simplified procedures to the acquisition of certain commercial items; to establish an exchange program between the Federal Government and the private sector to promote the development of expertise in information technology management; and to authorize telecommuting for Federal contractors, and for other purposes; to the Committee on Government Reform.

By Mr. TOM DAVIS of Virginia (for himself and Mr. HORN):
H.R. 3845. To strengthen Federal Government information security, including through the requirement for the development of mandatory information security risk and control standards; to the Committee on Government Reform, and in addition to the Committee on Government Reform, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. FOLEY:
H.R. 3845. A bill to provide that adjustments in rates of pay for Members of Congress may not exceed any cost-of-living increases under title II of the Social Security Act; to the Committee on House Administration, and in addition to the Committee on Government Reform, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. HULSIN:
H.R. 3845. A bill to amend the Immigration and Nationality Act to authorize the submission of an application for naturalization under section 328 of such Act on behalf of a child by the child's grandparent or legal guardian, if the parent who otherwise would be authorized to submit such application is deceased; to the Committee on the Judiciary.

By Mr. FRELINGHUYSEN:
H.R. 3846. A bill to direct the Director of the Federal Emergency Management Agency to designate New Jersey Task Force I as part of the National Urban Search and Rescue System; to the Committee on Transportation and Infrastructure.

By Mr. RANSER:
H.R. 3846. A bill to provide funds for the construction of new and existing facilities in Washington County, Utah, and for other purposes; to the Committee on Resources.

By Mr. HILLIARD:
H.R. 3846. A bill to designate the facility of the United States Postal Service located at 306 Pickens Street in Marion, Alabama, as the "Jimmie Lee Jackson Post Office Building"; to the Committee on Government Reform.

By Mr. HILLIARD:
H.R. 3846. A bill to designate the facility of the United States Postal Service located at 1313 Alabama Avenue in Selma, Alabama, as the "Rev. James Joseph Reeb Post Office Building"; to the Committee on Government Reform.

By Mr. KILDEE (for himself, Mr. RAHALL, Mr. BENSON, Mr. PAYNE, Mr. SMITH of North Carolina, Mr. ANDREWS, and Mr. COOPER):
H.R. 3846. A bill to encourage the negotiation of agreements with the governments of States and local entities for the development of expertise in information technology management; and to authorize telecommuting for Federal contractors, and for other purposes; to the Committee on Government Reform.

By Mr. MADDOX of Alabama (for himself):
H.R. 3846. A bill to provide for the development, launch, and operation of a synthetic aperture radar satellite in support of national and international interests; to the Committee on Science, and in addition to the Committee on Resources, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. GIFFORD of California:
H.R. 3846. A bill to establish a program administered by the Department of State to promote visits to the United States by youths from regions of conflict for training in peaceful cooperation and mutual understanding; to the Committee on International Relations.

By Mr. NEY (for himself, Mr. DEERE, Mr. REYNOLDS, and Mr. MCLINNIS):
H. Con. Res. 338. Concurrent resolution authorizing the printing as a House document of a collection of memorial tributes made in honor of the late Gerald Solomons; to the Committee on House Administration, considered.

By Mr. GONZALES (for himself, Mr. BONILLA, Mr. LAFAULCE, Mr. MENNENDEZ, Mr. SMITH of Texas, Mr. ROBONZEU, Mr. SANDLIN, Mr. BENTSEN, Mr. GREEN of Texas, Mr. NOGOSO, and Mr. ORTIE):
H. Res. 355. A resolution expressing the sense of the House of Representatives regarding the recognition of the United States Government and the governments of Mexico and Canada with regard to the North American Development Bank and the Heron Environmental Cooperation Commission; to the Committee on the Financial Services.

By Mr. HYDE (for himself, Mr. CRANE, Mr. EVANS, Mr. JOHNSON of Illinois, Mr. LAHOD, and Mr. KIRK):
H. Res. 356. A resolution supporting the goals and ideas of North American Occupational Safety and Health Week; to the Committee on Education and the Workforce.

By Mr. ROTHMAN (for himself, Mr. PAYNE of New York, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-ALLARD, Mr. ROYBAL-AL...
H.R. 2667: Mr. Tancredo.
H.R. 2674: Mr. Langevin, Mr. Turner, Ms. Lee, Mr. Schiff, Mr. Ross, and Mr. Green of Wisconsin.
H.R. 2695: Mr. Isakson, Mrs. Johnson of Connecticut, and Mr. Hayworth.
H.R. 2787: Mr. Payne, Mr. Faleomavaega, Mr. Lantos, and Mr. Meeks of New York.
H.R. 2874: Mr. Farr of California.
H.R. 2908: Mr. Shays and Mr. Cummings.
H.R. 2946: Mr. Gordon.
H.R. 2953: Ms. Harman, Mr. Rangel, and Mr. Houghton.
H.R. 3013: Mr. Owens, Mr. Wynn, Mrs. Meek of Florida, and Ms. Lee.
H.R. 3041: Mr. Clement.
H.R. 3154: Mr. Pomroy and Mr. Cardin.
H.R. 3215: Mr. Latham.
H.R. 3236: Mr. Payne and Mr. Owens.
H.R. 3238: Mr. Nadler.
H.R. 3267: Mr. Christensen, Mr. Gordon, and Ms. Norton.
H.R. 3279: Mrs. Capps and Mr. Frank.
H.R. 3321: Mr. Fossella, Ms. Scharowsky, Mr. Ballenger, Mr. King, Mr. Goode, Mr. Gucci, Mr. Allen, Ms. Millender-McDonald, Mr. Israel, Mr. McIntyre, Mr. Engel, and Mr. Rahall.
H.R. 3363: Mr. Dingell, Mr. Crowley, Mr. Filner, and Mr. Blagovich.
H.R. 3361: Mr. LaFalce, Mr. Sabo, Mr. George Miller of California, Mr. Young of Alaska, Mr. Latham, Mr. Watt of North Carolina, and Ms. Watson.
H.R. 3360: Mr. Frank and Mr. Berry.
H.R. 3375: Mr. Bior.
H.R. 3389: Mr. Hoefffel, Mr. Crenshaw, Mr. Brady of Texas, Mr. Walsh, Mr. Boucher, Mr. Stearns, Mr. Acevedo-Vila, Ms. Sanchez, Mr. Neal of Massachusetts, Mr. LaTourrette, Mr. Houghton, Mr. Brown of Ohio, Mr. Quinn, Mrs. Jo Ann Davis of Virginia, Mr. Gilman, Mrs. Roukema, Mr. Rothman, Mr. Riley, Mr. Graham, Mr. McIntyre, Mr. Gillmor, Mr. Burr of North Carolina, and Mrs. McCarthy of New York.
H.R. 3412: Mr. Foley, Mr. Rodriguez, Mr. Schaffer, Mr. Faleomavaega, Mr. Nethercutt, Mr. Taylor of North Carolina, Mr. Barr of Georgia, Mr. Wildon of Pennsylvania, and Mr. Pascrell.
H.R. 3414: Mr. McGovern.
H.R. 3424: Mr. Reinhart, Ms. Rivers, Mr. Wynn, Mr. Pomroy, Mr. Sawyer, and Mr. Cannon.
H.R. 3430: Mr. Underwood and Mr. Barr of Georgia.
H.R. 3443: Mrs. Johnson of Connecticut and Mr. Lamping.
H.R. 3450: Mr. Thompson of California, Ms. DeGette, Mr. Peterson of Minnesota, Mr. Lynch, Mr. Sawyer, Mr. Chabot, Mr. Lee, Mr. Lewis of Georgia, Ms. Delauro, and Mr. Crowley.
H.R. 3464: Mrs. Tauscher.
H.R. 3524: Mr. Lewis of Georgia.
H.R. 3661: Mr. Jones of North Carolina.
H.R. 3670: Mr. Hill.
H.R. 3686: Mr. Schaffer.
H.R. 3710: Mr. Frank.
H.R. 3713: Mr. Calvert.
H.R. 3716: Ms. Eshoo.
H.R. 3731: Mr. Foley and Mr. Stump.
H.R. 3733: Mr. Bior and Mr. Gordon.
H.R. 3747: Mr. Weiner and Ms. Berkley.
H.R. 3773: Mr. Sherwood and Mr. Chabot.
H.R. 3784: Mr. George Miller of California, Ms. Delauro, Ms. Capuano, Mr. Frost, Mr. Taylor of North Carolina, Mr. Clyburn, Mr. Meehan, Mr. Norwood, Ms. Sanchez, Mr. Allin, Mr. Thompson of Mississippi, Mr. Fleischuter, Ms. Solis, Mr. Bass, Mr. Fort, Mr. Calvert, Mr. Larsen of Washington, Mr. Castle, Mr. Harman, Mr. Tiberi, Mr. Lantos, Mr. Isakson, Mr. Wu, Mr. Tauzin, Mr. Terry, and Mr. DeMint.
H.R. 3794: Mr. Lynch, Mr. Cunningham, Mr. Weiner, Mrs. Tauscher, Mr. Pallone, and Mr. Hoefffel.
H.R. 3797: Mr. McHugh, Mr. Beshard, Mr. Ackerman, Mr. Towns, Mrs. Maloney of New York, Mrs. McCarthy of New York, Mr. Crowley, Mr. Israel, Mr. Nadler, Mr. Gilman, Mr. McNulty, Mr. Fossella, Mr. Walsh, Mr. Hinchey, Mr. King, Mr. LaFalce, Mr. Reynolds, Mr. Houghton, and Mr. Engler.
H.R. 3802: Mr. Hinson, Mr. Towns, and Mr. Stump.
H.R. 3810: Mr. Biggerly and Mr. Pickering.
H.R. 3814: Mr. Stenholm, Mr. Payne, and Mr. Stupak.

PETITIONS, ETC.

Under clause 3 of rule XII, petitions and papers were laid on the clerk's desk and referred as follows:

50. The SPEAKER presented a petition of the Legislature of Westchester County, New York, relative to Resolution No. 265 petitioning the Congress of the United States and the State of New York to develop a comprehensive plan to properly defend the Indian Point nuclear plants from all potential areas of attack; to the Committee on Armed Services.

51. Also, a petition of the Legislature of Westchester County, New York, relative to Resolution No. 266 petitioning the Congress of the United States and Entergy, the New York State Public Service Commission and all other relevant parties to immediately begin a detailed feasibility study on converting Indian Points II and III from nuclear energy to natural gas or other non-nuclear fuel; to the Committee on Armed Services.
The Senate met at 10 a.m. and was called to order by the Honorable JOHN EDWARDS, a Senator from the State of North Carolina.

PRAAYER

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Dear God, we praise You for Your love that embraces us and gives us security. Your joy that uplifts us and gives us resiliency. Your peace that floods our hearts and gives us serenity. Your Spirit that fills us and gives us strength and endurance.

Be with us, Lord, so we can maximize the hours of this week. Help us to think clearly without confusion, to speak honestly without rancor, to debate without division, and to decide courageously without contention. May our rhetoric honor You and deal with issues and not personalities. Grant the Senators Your grace to work this week as patriots who love You and count it a high privilege to serve as leaders of our beloved Nation. Amen.

PLEDGE OF ALLEGIANCE

The Honorable JOHN EDWARDS led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, March 5, 2002.
To the Senate:
Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable JOHN EDWARDS, a Senator from the State of North Carolina, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. EDWARDS thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The Senator from Nevada is recognized.

SCHEDULE

Mr. REID. Mr. President, this morning the Senate is going to resume consideration of the energy reform bill. The Senate will recess from 12:30 to 2:15 p.m. for the weekly party conferences. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the following amendments be printed:

Pending: Daschle/Bingaman amendment No. 2917, as modified, in the nature of a substitute.

The ACTING PRESIDENT pro tempore. The Senator from Nevada.

Mr. REID. Mr. President, I ask unanimous consent that the following amendment be further modified by Senator DASCHLE or his designee with the changes that are at the desk, and that no further modifications be in order to the substitute. Finally, I ask unanimous consent that following that modification the amendment be printed.

The PRESIDING OFFICER (Mr. CARPER). Is there objection? Without objection, it is so ordered. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I am pleased that the Senate is today finally proceeding to consider the Energy Policy Act of 2002. The fact that we are at this point in our deliberations is the result of a tremendous amount of work involving several committees in the Senate.

I think the committee with the largest stake in the development of this legislation is, of course, the Committee of Energy and Natural Resources, which I am privileged to chair and of which Senator MURKOWSKI is the ranking member at this point.

We have held over 50 hearings in the 106th and 107th Congresses that are related to today’s bill. I express appreciation to Senator MURKOWSKI, the ranking member, who chaired many of these hearings.

I believe we have a good understanding of the issues that are forming this debate and that are at stake in this debate. Many of the elements in...
this energy bill are not going to shake out along party lines but because of genuine differences of opinion that particular Senators have.

I anticipate we will see all sorts of combinations of sponsorship on amendments on both a party and on a regional basis, as we have done. Let me speak for a few minutes about the rationale for this energy bill. It is important to recall why we have invested so much time on the topic of energy in preparing this legislation. Why is it of particular significance for the Senate at this stage in the year 2002 to consider and pass comprehensive legislation?

I believe there are two basic answers to that question: First, energy is central to our present and our future economic prosperity. Because of its importance, improving and strengthening our national energy system can provide significant economic benefits for each American. Similarly, the vulnerabilities in our national energy system can present an economic threat to our national economic health. We need to anticipate those threats and deal with them, as we try to in this legislation.

A second basic reason we are considering energy legislation is there have been significant changes in energy markets since the last time Congress considered comprehensive energy legislation. The last major energy bill passed in Congress was the Energy Policy Act of 1992, 10 years ago. Since that time, as a nation we have moved further away from the command-and-control regulation of energy toward a system that relies more on market forces to set the price of energy. In the process of making that move, energy markets have become more competitive and dynamic but not without some significant bumps along the way.

Let me recount a few of those bumps of which we are all aware. First, consumers are now more vulnerable to the vagaries of the energy markets and to volatile prices for energy that cause repercussions throughout our economy. We saw that phenomenon at work in California last winter over a year ago and last spring. Also, the structures to regulate these emerging market forces, particularly with respect to trading in natural gas and electricity, are not fully developed. I think we all saw that with the collapse of Enron.

Gasoline supplies nationwide have become increasingly subject to local crises and spikes due to the proliferation of inflexible local fuel specifications and tight capacity for refining and for pipelines.

And, finally, the events of September 11 have caused us to reexamine the inherent vulnerabilities of the energy transmission system we have in the country. The time may be right for rethinking how we site energy infrastructure and the balance between central and distributed generation of power.

Congress does need to respond to these changes and to these challenges and to these opportunities. If we do so in a balanced and comprehensive and forward-looking way, we can develop an energy policy that will lead to new economic prosperity for the country and, hopefully, for the world. But we will not get there simply by perpetuating the energy policy approaches of the past and new technology approaches as well as greater investment in order to move to the future that we all want. That is what this bill tries to do.

The bill has three overarching goals. I have a chart that sets these out. Let me briefly go through each of them.

The first goal is to ensure a diversity of fuels and technologies for adequate and affordable supplies of energy. By this we are talking about renewable sorts of energy, as well as the more traditional sources we have depended upon. Natural gas, coal, oil, hydro-power, nuclear power—all of those issues are dealt with in this legislation, and we have provisions intended to encourage adequacy and diversity from this entire diversity of sources.

A second major goal of the legislation is to improve the efficiency and productivity of our energy use, including the reliability of our electric transmission system. Use of energy use in industry, in vehicles, appliances, and buildings. We will have a great deal of discussion during the debate about the various provisions in the bill intended to encourage more efficient use of energy. We all recognize that we waste a tremendous amount of energy, and new technology can help us to use energy much more efficiently.

The third major overarching goal is to be sure that whatever we do in the energy area is done with an eye toward protecting the environment, toward not worsening the problem of climate change. I believe we have achieved that goal. Again, we will get into a serious discussion of the details as we get into the bill.

We can achieve these goals if we both accelerate the development and introduction of new technology—and we try to do that through this legislation—and if we create flexible market conditions that empower energy consumers so they can make the right choices, the choices that benefit them but also that benefit society more generally.

This combination of technology and policy innovation in pursuit of a diversified energy system can be seen in the provisions of the bill related to this first major goal—the adequate and affordable supply of energy. Let me talk about that goal and what we have in the bill related to it.

The first part of energy supply I will discuss is renewable energy. We have put a great emphasis on renewable energy in this legislation. The Senate bill contains numerous provisions to enhance the contribution of renewable sources of energy to our future energy mix. Under what I see as pretty much a business-as-usual approach, which is reflected in the House-passed bill, H.R. 4, the contribution of our energy mix from renewables would not markedly grow over the next 20 years. The result would be an energy system, particularly for the production of electricity, that would go from being 68 percent based on coal and natural gas today, in 2002, to only 75 percent by 2020, based on those two fuels, by the year 2020.

That overdependence on those two fuels would leave our country extremely vulnerable to shortfalls in the delivery of either of these commodities and leave consumers exposed to the severe risk of price spikes. We need a more diverse way in which to produce electricity, not a less diverse way.

Such an overdependence does not make sense in light of the commitments to renewable energy that we are seeing in other countries, particularly in Europe. I have a chart that makes that point. This chart is “Commitment to Renewable Generation.” It is the percentage of increase in nonhydro renewable generation from 1990 to 1995. That was the first half of the last decade.

It shows that Spain, Germany, Denmark, the Netherlands, and France have all dramatically increased their percentage of power generated from renewable sources; the United States is barely on the chart. Even France, which is often held up as a model for its commitment to nuclear power, has outpaced the United States in development of renewable sources for electricity.

The United States needs to lead the world in renewable technologies. We have abundant domestic renewable sources. The world market for the technologies we have developed is capable of growing immensely. Renewable technology leads us to help U.S. firms achieve a strong position in winning these markets and creating new jobs domestically.

If the United States is to lead the world in renewable energy technologies, though, we need to do a better job of getting those technologies into our own economy and into our own markets.

This bill we are beginning to debate today boosts our future use of renewables in five major ways: First, the bill contains market incentives that will take the amount of electricity produced from renewable energy over the next 20 years. This chart tries to make that point very effectively. The orange band at the bottom represents the Energy Information Agency’s projection of nonhydro renewables, assuming we do not pass the legislation. We can see that from the year 2000 to the year 2020, the percentage we are generating from nonhydro renewables would not change at all, absent legislation such as this. If we consider that.

The green wedge represents the contribution we believe would be made if this Senate energy bill becomes law, as we hope very much it will. You can see
that we would be essentially tripling, or more than tripling the percentage of the electricity generated from renewable sources.

Let me talk about the specific incentives. One incentive in the bill is what we call the portfolio standard. It creates a market for new renewable sources of energy, whether they are from wind, solar, biomass, or incremental hydroelectric generation in existing dams. This is something which many States have already done. We believe this policy and one we should move to as well. One State that has moved ahead very dramatically is Texas. We commend the Senate to be aware of what has happened in Texas during the time, in fact, when our current President was Governor of that State. We believe the rest of the country should follow suit.

A second market incentive is a Federal purchase requirement for renewables. It grows to 7.5 percent for all Federal electricity purchases by the year 2010. We believe the Federal Government should lead in this area. This is an opportunity for it to do so.

The third provision is the renewable energy production incentive. There is an existing program in place to generate renewable energy. In this bill we propose to reauthorize that and extend it to include Indian lands which contain prime renewable resources.

The next provision is that when the Senate considers the energy tax incentive amendment from the Finance Committee—and we believe Senator BAUCUS and Senator GRASSLEY will be offering that amendment at some stage during the debate—we will have an important opportunity to boost the future production of renewable energy. Existing renewable tax incentives expire January 1 of this year. This package of tax incentives has come from the Finance Committee will reauthorize the highest priority incentives for 5 years. It will expand the coverage of the production tax credit to include open-loop biomass and geothermal energy.

In addition to these incentives for renewable production of electricity, the bill greatly expands the contribution of renewable fuels such as ethanol and biodiesel. Those fuels, of course, are used primarily to power vehicles of transportation.

By the year 2005, 75 percent of the Federal Government’s vehicles that can burn alternative fuels will be required to do so. That will create more market certainty for renewable fuels and for their associated infrastructure.

By 2012, 5 million gallons per year of renewable fuels will be blended into gasoline, thereby decreasing our import dependence on foreign oil.

The bill helps renewables contribute more to the energy mix also removing regulatory barriers that affect renewable energy. For example, wind and solar power can be effectively tapped by small distributed generation systems. But current practices and rules in the marketplace often discriminate against distributed generation.

This bill deals with the problem by requiring electric utilities to offer customers choices. If a customer can offset his or her electric bill by the amount of electricity that is generated and that he or she is able to sell to the local utility. This provision will facilitate the use of a wide variety of distributed generation technologies by electric customers, including renewable technologies such as solar and wind power.

This bill also requires fair transmission rules for intermittent generation. By that, I am referring to wind and solar generation in particular. Those types of generation should not be unfairly penalized because of the natural variability of these resources from day to day or hour to hour.

Finally, in addition to the easier interconnection for distributed energy production into the interstate transmission grid. It requires States to examine ways to facilitate interconnection of distributed energy in local electric distribution systems.

A fourth provision in the bill promotes the use of renewables by disseminating information about and facilitating access to areas with high resource potential. Particularly here, I am talking about public lands. There are more areas in the Nation—particularly in the West and in the State that I represent in the Senate—where we have significant untapped renewable energy potential. The bill creates a pilot program in the Department of Interior and in the Forest Service for development of wind and solar energy projects on Federal land. The bill authorizes the study of renewable energy development potential on Indian tribal lands. The bill requires an annual public publication of the availability of renewable energy resources by the Department of Energy.

A fifth and final area in which the bill helps make renewable energy a bigger part of the supply picture in the future is through enhanced research and development programs. Under this bill, these R&D programs at the Department of Energy will grow from an authorized level of $500 million in fiscal year 2003 to $733 million in fiscal 2006. Renewable energy research is the subject of the distinguished Presidential task force in 1997 as being significantly underfunded relative to its long-term promise and the benefits that we can achieve for our economy if we did better by funding this research and development. Our bill expands the research and development activity, consistent with the recommendations of that task force.

These are all measures that I have described which we believe will increase the contribution of renewables to our energy supply picture. They are balanced in our bill with a very strong commitment to the other more traditional energy supply sources. Let me briefly describe those.

Natural gas is one that is very much on our minds and very much a fuel of the future as well. I want to briefly describe what the bill will do to support natural gas production by a significant amount—what we think any of us wants—clearly that consumption is outstripping production by a significant amount—even in the year 2000, which is when that line is. If that line is, the problem becomes much worse. As a result, we are at risk of becoming, as a Nation, dependent upon imported natural gas that is brought to us by tanker. Countries on which we would rely for such gas are, as we all know, prone to political instability—as far as we can tell at this point—in the early stages of forming an OPEC-like organization for natural gas exporters. There is a cover story in the June 2001 issue of the OPEC Bulletin with a headline—a headline in the Bulletin of the OPEC—"I don’t think any of us wants to put our Nation into a position of having to deal with a natural gas cartel, in addition to the cartel that controls the price of oil now.

This bill will take several steps to try to come up with a different policy for natural gas in order to avoid that possibility. It increases funding for research to develop domestic natural gas deposits in deep water areas of the Gulf of Mexico and in harder to tap geologic formations on shore. It provides research funds to explore the potential of methane hydrates trapped on the ocean floor. The bill authorizes more funds to facilitate the permitting and leasing of Federal lands for natural gas production in places where it is environmentally acceptable. It addresses a number of developing problems in natural gas provision—conflicts over coal and hydraulically induced earthquakes—and tries to bring those conflicts to resolution before we encounter a real crisis.

But even after all these steps—and I believe each one is useful and important—that will not be enough to close the gap that we indicated earlier. The most significant thing the bill tries to do for future natural gas supply is to provide financial incentives to build a pipeline to bring from Alaska the vast reserves of natural gas that have been discovered and developed in the Prudhoe Bay region. I know my colleague from Alaska, Senator Murkowski, has championed this for some time. This is a high priority for his
State. It is a high priority for this Nation, in my view. The existing reserves are estimated to be over 30 trillion cubic feet of gas. It is estimated that the total natural gas resource in the North Slope is enormous—on the order of 100 trillion cubic feet. Because of the North Slope reserve size, the pipeline project would create a massive number of jobs in Alaska, Canada, and in the lower 48. It would require the construction of the largest gas treatment plants in the world, and the laying of about 3,600 miles of pipe. It would require an enormous amount of steel to be produced. The number of jobs that would be created also is extremely significant—350,000 to 400,000 jobs, at a time when the steel industry is suffering harm from global over-capacity of steel production and foreign dumping. A project that would require over 500 million tons of steel means real jobs for workers in communities and States that produce steel.

Since natural gas prices vary, as I indicated before, from $2 to $8 and sometimes $10 per million cubic feet, it is hard for the free market to take this challenge on by itself. At the same time, we want to rely on the private sector to the greatest extent possible. There are two major groups of potential investors in such a pipeline, and the provisions of the bill are aimed at giving each consortium a fair shot at proposing a successful project. The provisions include an expedited process for the permits, rights of way, and certificates needed for the U.S. segment of the pipeline.

There is money in any construction project, and in a construction project of this magnitude, uncertainty and delay will kill the project. The Government has an obligation on behalf of U.S. consumers to see that it exercises its role in a responsible way and in an expeditious way.

The Alaska Natural Gas Transportation Act of 1976 provided a framework for construction and operation of a gas pipeline along a designated route. Our legislation preserves this option. It also provides an alternative expedited procedure in the event the parties decide to pursue a different route. Because of the benefits this long-term supply of energy will have on the economy and the significant uncertainties in natural gas prices, I believe the Government has an interest in reducing the financial risks associated with the project. Accordingly, the bill does authorize in its present form loan guarantees for the project, as long as appropriate filings are made within 6 months after the bill becomes law.

I understood there are a number of refinements and modifications that may be sought by my distinguished ranking member on the Energy Committee as we move forward. He is also vitally interested in the project. For example, we are working together to understand the tax provision that could reduce the financial uncertainty of the economics of the project going forward. Both of us are committed to encouraging Alaska North Slope producers, the interested pipeline companies, the State of Alaska, and interested parties to begin serious negotiations on a final outline of a commercial agreement.

I believe it is important for the Senate to be proactive on this project, not sit back and hope that someday it occurs. If we do not act while there is a substantial private sector interest in building this pipeline, we will lose an important opportunity to bolster our energy security in natural gas. As a consequence, we might be hearing speeches 10, 20 years from now about our dependence upon foreign sources of natural gas that sound a lot like the speeches we will be hearing today and in the next few days with our dependence on foreign sources of oil.

Let me say a few words about oil. That is a central part of our energy mix. Clearly, we want to increase domestic production of oil and maintain domestic production of oil. The volume of rhetoric about drilling in the Arctic National Wildlife Refuge—both from the proponents and the opponents—would lead one to think that is the only place in the country where we can look for additional oil. In my view, that is false.

There are 32 million acres of the Outer Continental Shelf off the coast of Texas, Louisiana, and Mississippi that have already been leased by the Government to oil companies for exploration and back and across the Gulf of Mexico, there are outstanding prospects for increased production from National Petroleum Reserve-Alaska, which lies to the west of the Prudhoe Bay region. Under the Clinton administration, leasing was expanded in this area. Industry has made some major finds. There is no law that needs to be passed to have additional parts of this area leased. As I understand it, the Secretary of the Interior is proceeding to prepare some of that area for leasing.

If the problem is not finding areas to lease under current law, why is there not more domestic production going on in the areas that have been leased for exploration and production? In my view, an important reason might be the difference between our Federal and State royalty and tax policies relative to those in other countries with oil and gas resources.

Oil exploration and production is a worldwide business. Areas such as the ones on the map and in Alaska compete with other producing regions around the world. U.S. companies are making commitments to projects in areas that have been leased for exploration and production. We need to have a comparison of that with similar provisions encountered by companies in other countries.

Our current U.S. policies were put in place when the United States had abundant and easily accessible reserves. We have fewer such reserves now. While technology for finding oil has continued to improve, we should consider whether our tax and our fiscal policies should change to policies that change to policies that make our tax and our fiscal policies change to policies that change in the economics of exploration of oil and gas in challenging geological formations.

Our fiscal policies should also be changed to take into account the boom-and-bust nature of the industry and to provide incentives to maintain domestic production when prices are low. They might also include disincentives for buying and sitting on leases without developing them in a timely way. That is what we have seen off the coast in the gulf.

All of that I have described is a tall order. I do not believe Congress has the background it needs to revise these laws in a sensible way right now. We need to have a distinguished external group investigate these issues and make its recommendations. Setting this process in motion might prove to be useful to boost domestic production in the long run.

A second proposal to boost domestic production in the near future is provisions that would make adequate funding for the Federal programs that actually issue new leases and permits for oil and gas production. For all the rhetoric we have
Committee by Senator BYRD and Senator THOMAS, who was present a few minutes ago and I am sure will want to speak on this issue.

There is one more example of the crucial role research and development is going to play in shaping the energy future we will get me to say a few words about nuclear power because clearly research and development is also the key to the future of nuclear power in the country.

Nuclear research emits no greenhouse gases. So on that basis one would think they were an option we should be looking to for the future. But nuclear plants have other characteristics that are not as attractive. They have very high upfront capital costs compared to other generating options. That puts them at a disadvantage in the marketplace.

The nuclear waste problem is still not solved. Nuclear safety is a continuing concern for the public. Our cadre of nuclear scientists and engineers is growing older and is dwindling in size, and we are not seeing a large supply of students being trained to help us deal with nuclear issues in the future. This bill takes on these problems and would fund research and development on new nuclear plant designs that might address these problems and on a program to strengthen university departments of nuclear science and technology.

The bill also contains increased R&D funding to support oil and gas production by smaller companies and independent producers. These are the entities that account for the majority of onshore U.S. production of oil. They do not have the resources to do their own exploration and production research and development. Improving their ability to use new technology to find and produce oil and gas is a good policy for increased domestic production.

Here, too, there is room for improvement on the part of the administration. The most recent budget request we have received from them has slashed funding in the Department of Energy for these programs. My ranking member and I oppose these cuts. It is important for the Senate to take a position in favor of increased authorizations for these programs, not cutting funding for these programs, and this bill will do that.

Let me say a few words about coal. Another very important contributor to our current energy supply picture is coal. This chart makes the case very dramatically. We can see this is a chart that depicts where the electricity generation comes from by fuel. We can see that the top line is coal. So 59 percent of the electricity generated today in this country is from coal. And 70 percent of the electricity generated today in this country is from coal.

We have a tremendous coal resource. We have been called by some the Saudi Arabia of coal by some. But coal in our energy future needs to be clean, and it needs to be emission free. Coal-based generation produces more greenhouse gas emissions per Btu of energy output than does natural-gas-fired generation.

Other pollutants from coal-fired plants have been a source of regional tensions between the States where coal-fired plants are based and States downstream from those particular States.

Coal is too important a resource for us to write off. Technology holds promise for dramatically lowering, even reducing to zero, the emissions from coal-based plants.

This bill takes a very forward-looking approach to the issue. It authorizes $200 million per year for research and development and demonstration programs, based on coal gasification, on carbon sequestration, and related ultra-clean technologies for burning coal. This proposal was a result of a strong bipartisan push in the Energy...
over mergers, clarifying its authority over market-based rates, and increasing the transparency in energy market information.

One of the lessons we all learned as we watched the collapse of Enron was that we need more transparency. We need more openness in these markets, so we can see on a real-time basis what is being bought and what is being sold and at what price.

Finally, the bill begins to address the tough issue of siting new electric transmission lines. This is obviously a contentious and controversial issue. I believe the Federal Government can play a role, through FERC, in assisting in decisionmaking at the regional level, and we try to put in place a framework for the Federal Government to assist States in more effective regional coordination on all of these energy issues, including transmission siting.

On energy efficiency, this modernized electricity system is a major way to move ahead and position the country for the future. A second is to increase the efficiency of the various uses of energy across the board in vehicles, in industry, in appliances, in buildings. We will try to push that in the bill.

The bill contains provisions that directly bear on fuel efficiency of vehicles. We will have a great deal of debate on that. One mandates higher fuel efficiency in the vehicles that are purchased by Federal agencies for civilian use. We also provide a framework for the Department of Energy to assist States in expanding voluntary incentive programs. The major initiative in this area is an increase in the corporate average fuel efficiency, or economy, standards. The House-passed bill had a very weak provision on this subject. We attempt to do better.

The chart we have shows the problem we have with oil being imported into this country. The top line is total oil demand. Something in the range of 52 to 54 percent of our oil today is imported. Our total demand for oil is represented by that top line, and it is continuing to rise as we go from the year 2000 to the year 2020.

All projections are it will rise. The reason it is rising, looking at the next line down: The transportation demand line is also rising. Unless we can do something to flatten out that transportation demand line by using gasoline more efficiently, we will not do anything very significant to reduce our dependence on foreign oil.

We try to do that in this bill. As I indicated, there will be a great deal of debate about whether or not we are doing what we should do here. I believe strongly that we should strengthen or increase corporate average fuel economy standards. We are trying to do that.

This chart also reflects our projection as to what would be achieved by opening the Arctic National Wildlife Refuge to drilling. The small red line on the bottom of the chart shows that there would be increased production. The green line on the bottom is domestic oil production. It would go up if there were an opening of ANWR to drilling and development, but in our view it does not constitute a substantial solution to the problems we face.

There would be increased production standards and the ANWR issue, are issues about which we will have a great deal of debate.

We also have provisions in the bill to improve the energy efficiency of Federal buildings and schools and public housing. We have provisions to reduce energy use in manufacturing and other industries, provisions to increase efficiency for numerous consumer and commercial products, and we reauthorize the important federal grant programs that help low-income families pay their energy bills and reduce their energy costs. That is something which I think all Senators will support.

We could detail about each of these, but in the interest of time I will not do so at this point. Let me just point out that there will be an opportunity to debate these issues as we get into the amendments. The Senate addresses each of these areas. I believe that both Senators who have an interest in them will come up with consensus proposals.

Let me also talk about energy efficiency research and development. The research and development emphasis is that our increased production before the bill addresses the connection for the environment. Energy production and use are associated with a host of consequences for the environment. We need to strike the right balance among energy and the economy in order to deal with the long-term consequences for the environment and in our society in this regard. This bill addresses these issues in a number of ways.

There are provisions in the bill dealing with the legacy of past problems posed by energy production and use for the environment. These include programs to clean up orphaned and abandoned oil and gas wells and programs to develop research to remediate groundwater supplies damaged by past activities. Another way in which the bill addresses the connection is by developing and adopting new energy technologies with better environmental performance.

Probably the most important future problem on which we need to focus as part of this bill is the problem of increased concentrations of greenhouse gases in the atmosphere and the impact they are believed to have on the climate. We have various provisions in this bill that encourage an integrated strategy with our energy policy. We will have a chance later in the debate to go into those in great detail. Some of those provisions...
Mr. MURKOWSKI. Senator BINGAMAN is here to answer a question very clearly there—shows what the President claims his proposal would do.

The green line, which is harder to see because it is covered up by the red line, shows what would happen if current trends were simply to continue. The point is, it is hard to see the green line on the chart because it is almost completely covered up by the red line. Simply put, the President’s proposal would not change the trend in greenhouse gas intensity, which would likely happen at any rate based on current trends. It is perhaps a good thing. The President has indicated an interest in climate change policy—a policy that does not stop greenhouse gas intensity from increasing. The service sector, which does not produce greenhouse gases in any significant amount.

The red line, which is on this chart—you can see it very clearly there—shows what the President claims his proposal would do.

The blue line which leads up to about halfway through the chart, up to 2002, shows how greenhouse gas emission intensity has been declining in the 1990s. Greenhouse gas intensity has been declining because the part of the economy growing fastest is the service sector, which does not produce greenhouse gases in any significant amount. This is 3 times larger today than it was in 1996. When you look at trends in Federal expenditures for R&D over the last 10 years, some startling facts stand out.

First, while Federal R&D expenditures for health science at the NIH—the blue line—and basic science at the National Science Foundation—the black line—have grown during the 1990s, R&D on energy technology—the red line—has stagnated or even fallen, in real terms. Today, in real terms, we are still below where we were in 1990 in terms of support for energy science and technology. For fiscal year 2002 and fiscal year 2003, the Bush administration has proposed nothing to reverse these trends. Both budget requests proposed cuts in R&D for energy.

It is hard to see how you build a 21st century energy system on stagnant, even declining, R&D. This bill builds these budgets in a reasonable way to levels that, by 2006, will give us a robust energy R&D effort to support the goals of this bill.

As we proceed with this debate, there will be areas in which we reach bipartisan agreement and areas in which we will differ substantially. In the latter areas, we will have to make a choice between alternatives.

With respect to the areas of bipartisan agreement, I am pleased with the support that we have received from the administration for our position that electricity is an integral part of any energy bill. They have worked hard on some of these provisions. In particular, the administration is willing to take some bold policy steps to address these challenges. The country needs no less. Our national security, our future economic prosperity, and the jobs of millions of Americans are at stake as we try to shape an energy policy for these next several decades.

I look forward to the debate. I know my colleague from Alaska, the ranking member on the committee, is here to give his opening statement.

I yield the floor.

THE PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. MURKOWSKI. Mr. President, under the order, we are likely to go out at 12:30 for the luncheon recess.

THE PRESIDING OFFICER. The Senator is correct.

Mr. MURKOWSKI. Senator Bingaman has used how much time?
The PRESIDING OFFICER. Approximately 55 minutes.

Mr. MURKOWSKI. So I would have perhaps 30 minutes left. I propose that I be allowed to proceed when we come back. I have probably a little less than 55 minutes. I am somewhat reluctant to start and be interrupted. I would propose to the leader that we might use the remaining time for Senators who want to speak in morning business, and I allow to introduce my opening statement at 2 o’clock when we come back. We will probably have statements and take amendments as they come up.

Mr. REID. Mr. President, if I could respond to a friend from Alaska, what the Senator from Alaska proposes is that we go into a period of morning business until 12:30, and at 2:15, when we return, the Senator from Alaska be recognized for an hour; the Senator from South Dakota, the majority leader, or his designee would offer a modification. The Senator has suggested that he proceed at 2:15.

For the convenience of everyone, I propose that the majority leader, or his designee, at 2:15 lay down the modification, which would take a matter of a few minutes at the most, and then the Senator from Alaska would have 1 hour to present his opening statement.

Mr. MURKOWSKI. If I may respond, I certainly have no objection to the procedure of the majority leader laying down his modification. I don’t want to be bound by a time agreement. We didn’t discuss a time agreement on opening statements. It is not my intention to speak at length, but I would not like to be limited necessarily.

Mr. REID. I think that is entirely appropriate. I would like to hear the Senator from Alaska.

Mr. MURKOWSKI. I am sure the Senator would.

ORDER OF PROCEDURE

Mr. REID. Mr. President, I ask unanimous consent that the period from now until 12:30 be deemed as morning business; at 2:15 Senator DASCHLE, or his designee, be recognized to offer the modification; and, the Senator from Alaska, the ranking member on the committee, be recognized to give his opening statement.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CARPER. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Bingaman). Without objection, it is so ordered.

ENERGY POLICY

Mr. CARPER. Mr. President, I simply begin by thanking you, first, for your statement in the Chamber today, but also, more importantly, for the leadership that you, Senator MURKOWSKI, and others have demonstrated to bring us to this point today. I cannot speak for the rest of my colleagues, but I am delighted we are in the Chamber and have begun the debate. It has been long delayed, but it is an important debate on whether or not we are going to have an energy policy for this country of ours.

At the end of the Vietnam war, as a young naval flight officer, I moved from California to Delaware to enroll in the University of Delaware Business School. One of my earliest memories of coming to Delaware is sitting in line, waiting to buy gas for my car. We were in the middle of an oil embargo, and at that time you could only buy gas every other day. We did not have an energy policy in the mid 1970s. We do not have one today.

Twenty-eight years ago, some 30 percent of the oil we used in our country was imported. We had a trade balance that was pretty much even. There was not much of a deficit. Greenhouses at the time were something in which we grew plants. We did not worry about greenhouse gases; whether or not we would have a hole in the ozone layer of our atmosphere. That was 28 years ago. Today, almost 60 percent of the oil we consume comes from other places around the globe. A lot of it we buy from people who don’t like us very much and, I am advised, use some of the money we send them to try, in some cases, to hurt us or our interests.

Our trade deficit has ballooned to $300 billion, and not all of it but a good chunk of it is attributable to the oil we import. Today, when people talk about greenhouses, we still grow plants in them, but we also worry about greenhouse gases and what is going on with the hole in the ozone layer, what is going on with a rising global temperature, and what happens to our sea level in this world over the next 100 years if we do nothing about it.

The question we are going to be answering in the next couple weeks is, What kind of energy policy should we have in this Nation?

Like most of my colleagues, I would argue that the answer to that question has two parts. One part says we create more energy. And while we work to do that, in a variety of ways, the second part says we need to conserve energy.

Let me talk a little bit about both of those issues: First, the creation of more energy and, second, the conservation of energy.

I live in a State where, I am told, we actually grow more soybeans in Sussex County, DE, than any other county in the country. We also have more chickens in Sussex County than any other county in the country, including those in Arkansas. We can look to those soybeans and chickens as a source of energy, as well, as we go along.

We raise soybeans in Delaware to feed chickens. We feed them the hull of the soybean. The oil that comes out of the soybean we do all kinds of things with in this country. We create soy milk, soy sauce, cheese, something called soy diesel fuel: 20 percent soy, the rest is diesel. We can burn it in our diesel-consuming machines, and it works just fine. It is energy efficient. It works well in the machines, and it makes the diesel producing companies strain the most part, than any regular diesel fuel. In some cases, they are actually better.

We have too much soybean in this country; we have a glut of that commodity. It is a good alternative to use the soybeans that are in excess on our farms to help lessen our reliance on foreign oil.

We have figured out how we can burn animal waste to derive the Btu value, including chicken litter, in ways that are environmentally friendly.

In my State, we have the biggest independent producer of solar energy panels in the country. We are proud of the work they do at AstroPower. And it is not just at AstroPower; there are places all over this country that are relying more and more on solar energy in developing even more efficient ways to create that solar energy.

Windmill farms are becoming more common in this country. Hopefully, as we continue to perfect that technology, they will become even more efficient.

Others have spoken, and will in the weeks ahead, about geothermal energy, how we can take hot air in the summer and run it 300 feet underground to cool it off, and then use it to cool our homes in the summer; and we can take cold air in the winter, run it 300 feet underground to warm it up, and then use it to warm our homes and businesses in the winter.

Those are just some of the ideas of renewable energy that we can use, that we can rely on, that we are more relying on, and need to do more so in the future.

We also have, as Senator BINGAMAN said earlier, a lot of coal in this country. I think he said we are the “Saudi Arabia of coal.” I am privileged to represent the State of Delaware in the Senate. I was born in West Virginia. I know well they have a lot of coal there and other places around our Nation. We ought to find ways to burn that coal without doing more harm to our environment. We can do that. Clean coal technology is very promising. We need to continue those efforts.

There has been some discussion already today about natural gas. We are starting to rely more on natural gas from other places around the world. We have a lot of it in our country. But consumption is going right through the roof because we have such good environmental consequences compared to other fossil fuels we use. There are
March 5, 2002

Congressional Record—Senate
S1439

Huge finds of natural gas in the northern parts of Alaska. We ought to bring it down here and use it.

Similarly, in the Gulf of Mexico there are huge deposits of oil and natural gas that are available to us to be extracted safely and in an environmentally sound way. Those are sources on which we need to rely.

A year or so ago, I reported back to my colleagues about a trip in which I led a group of Boy Scouts from Delaware on down to Norfolk Naval Station. The trip was on a weekend a year ago last January. We visited a lot of ships and submarines. It was a lot of fun for the adults and for the young Scouts.

One of the ships we visited was the Teddy Roosevelt, a nuclear-powered carrier. It is about 1,000 feet long. It is about 25 stories high. It carries a crew of roughly 5,000 men and women. Under what conditions, what potential, so that it takes with it. It needs to refuel about once every 25 years—once every 25 years.

For us to walk away from nuclear power, as a day gone by I think is a mistake. I fully acknowledge the security concerns that revolve around nuclear power and terrorism. I acknowledge the legitimate concerns about disposal. But having said that, the potential is real, and we have only begun to realize it. I urge us not to walk away from that technology while we work to solve the issues regarding security, the environment, and disposal.

Another very promising area for creating new energy is fuel cells.

The idea that we can take hydrogen, which we have in abundance, and derive energy from that hydrogen and end up with a waste product that is water, H2O, is enticing.

This is 2002. By 2012, we will have cars, trucks and vans traveling the highways of America powered by fuel cells. We will have homes, buildings, and factories that are going to be powered by fuel cells.

In Government, if we are smart enough to, one, invest in the research and development; two, help commercialize those new technologies, including fuel cells; and, three, in addition to doing those things, if we will provide tax incentives to encourage producers to produce those more fuel and energy efficient, environmentally efficient, and friendly sources of energy, and to encourage consumers to buy them, we will do this country and this planet a real favor.

Let me talk about a couple of efforts on the conservation side. We will have a substantial debate on CAFE standards over the next few weeks. That deals with the efficiency of the cars, trucks, and vans we drive.

I would suggest we consider and keep in mind these principles as we go forward. As we seek to reduce the amount of oil that we burn, and the transportation, one, let’s work to find meaningful reductions in oil consumption by motor vehicles.

Two, let’s set measurable objectives so we actually know we are making progress and we can measure our progress against the objectives.

Three, let’s provide a reasonable time line for the auto industry to make the changes it needs to make to bring more energy-efficient vehicles to the market.

Four, let’s make sure we don’t get rid of, as collateral damage, the domestic auto industry; but when we finish our work in 10, 15 years, we know that we still have a strong and vibrant, even more strong domestic auto industry.

Fifth, we ought to set some long-range goals for car makers and truck makers with respect to oil consumption. We should defer to other entities, like NHTSA, within the Department of Transportation, to actually do the intermediate setting of goals for fuel efficiency.

Six, we need to think outside the box with respect to the auto industry so that they have some additional tools to work with to help them get to the target we are going to set.

One of those I have already mentioned is fuel cells. Fuel cells is where we are going to be in 10 or 15 years. Today, for the first time, the internal combustion engine. The bridge to the future with cars, trucks, and vans is with hybrids. We are starting to see the introduction of gas hybrid vehicles that are getting 50, 60 miles per gallon. A presentation I received from Daimler-Chrysler where they shared with us a model vehicle they could produce which gets 75 miles per gallon. It is a four-door passenger vehicle, the SX-3. They cannot sell them in this country.

It is a diesel hybrid vehicle. They can sell them in Japan and Europe.

We need to work with the auto industry to help them achieve the next tier of standards, tier 2 standards, for emissions that keep nitrogen oxide. We need to be mindful that diesel-powered vehicles, which now account for about 40 percent of the sales in Europe, can do a lot to help us reduce our reliance on foreign oil and reduce carbon dioxide emissions which lead to greenhouse gasses and global warming.

The last topic I want to address is what the Government can do: One, we can invest our money, our taxpayer money in research and development in ways that will create more energy and to conserve more energy.

We can use the buying power of the Federal Government on both the civilian and military side to help commercialize new technologies. If companies, particularly in America, are building more fuel-efficient vehicles, whether they are gas hybrids, diesel hybrids, and eventually fuel cells, we should use our buying power to commercialize those technologies in the marketplace.

Lastly, if manufacturers are going to build hybrid vehicles, fuel-cell-powered vehicles, that will enormously reduce our reliance on foreign oil and that are good for the environment, we should provide a tax incentive for producers to produce them and for us, as consumers, to buy them.

Two general points with respect to conservation: Air conditioners, we have the technology to build air conditioners that will cut our reliance on electricity or reduce our consumption of electricity by 30 percent. We can do that. We have the technology. We need to commercialize the technology. We ought to help them get to the market, and we as consumers ought to buy them.

On transmission lines, we have seen presented in our Energy Committee transmission lines which are able to transmit electricity across the country and reduce the loss of energy through those transmission lines by some 30, 35 percent below what is currently occurring. That is another thing we can do and ought to do in order to conserve energy.

Let me close with this: I am troubled, having felt for 28 years that we need a comprehensive energy policy, by the voices I hear inside this body, and outside, who say we are not going to agree on an energy policy.

In the wake of September 11, we must develop the political will to hammer out an agreement on energy policy that conserves more energy and produces more energy at a time when almost 60 percent of our oil comes from overseas, comes from some of the people who don’t like us and who use the resources we give them to threaten us.

How can we not pass an energy policy bill? We are smarter than that. We are better than that. The American people deserve better than that as well.

I yield the floor.

The PRESIDING OFFICER (Mrs. Clinton). The Senator from Texas, Mrs. HUTCHISON. Madam President, I am so pleased that finally we are going to address an energy policy for our country. It has been a long time coming.

I thought, even since before I came to the Senate, we were not looking forward enough to address the future energy needs of our country. September 11 turned an issue from a possible economic, far-reaching element that we should put into our policy think-tanks to a national security issue.

The fact is, if we do not have energy supplies within our own country, under the control of our own country, we are not going to be a country that is economically self-sufficient, strong, and stable. And we most certainly cannot prosecute this war on terrorism if we do not have a strong and stable economy.

The fact is, today we import 60 percent of our oil for national consumption. If we had a sudden closing of Middle East oil to our country, it would have a profound impact on the stability of our economy. What we cannot take, as we are looking at a fragile recovery in our economy, is another hit.

We have the chance to do what is right, to plan for the future, and to stabilize our self-sufficiency. What we need is a balanced energy policy.
We need a policy that addresses conservation, that says to Americans: You can do certain things and cut back on your consumption, and that will save millions of barrels of oil that we would need to import or millions of feet of natural gas, and yet we could be self-sufficient or whatever.

The bottom line is that we need those incentives for conservation. We need to look at alternative sources of renewable energy. That is certainly something we are just beginning to scratch the surface on, to see what the capabilities are.

Nuclear power is certainly a clean energy, and we know we can build safe nuclear powerplants. We have seen other countries that are practically totally dependent upon nuclear power, and it is a safe and environmentally sound way to produce energy. We stopped building nuclear powerplants, and, frankly, I think we need to look at ways we can safely build nuclear powerplants today. That would provide a huge energy in our country, and it would certainly be a way to become more independent.

Last but not least, we need to have more exploration and drilling in our own country. We need to have an energy policy that we can operate in our own home. So if we had a balanced approach, we would be able to become much closer to energy self-sufficiency. That is the kind of bill we need. It is not the kind of bill that will be laid before us.

The bill that will be laid before us does practically nothing for the production side and relies totally on the other two prongs—conservation and renewable energy sources—and it is not a balanced approach. We must go full throttle on all fronts.

There are two things that will be very valuable. One is in the bill, and that is to encourage production by small businesspeople with marginal well tax credits. They could actually cost nothing because the price of energy is so high right now. If the price falls below break-even, which is $15 to $18 a barrel, we need a floor for the small guys, the 15-barrel-a-day well businesses—and to put that into perspective, 15 barrels a day is barely break-even in the best of times. A normal, good well would produce 1,000 barrels or 10,000 barrels a day. We are talking about 15 barrels a day. A well like that, when the price goes to $11 per barrel, has to shut in. It cannot stay in operation. It is too small. The margins are too low, and you have to have a break-even point, which is about $15 to $18 a barrel.

So if you have a tax credit for that small driller of 15 barrels a day or less, if the price goes below $15 per barrel, you can keep those people in business; whereas, they would shut in the wells, as thousands did when the price of oil, 2 years ago, went to $11 a barrel. In fact, they’re little bitty wells have a great capacity. There are 500,000 of those around the country. Many have not been reopened because of the fluctuation and the view that if prices went down, they would have to shut in again, and they don’t want to go to the expense of reopening. If we had those 500,000 wells working and producing 10 to 15 barrels a day, that would equal 20 percent of America’s needs—the oil we import from Saudi Arabia every day.

Think of the stability for that small businessman just with a tax credit, if the price falls below break-even, which costs the Treasury nothing but keeps small business in operation and creates stability for our country for 20 percent of our oil needs. That provision has been introduced and it will be part of our debate.

We need to keep that provision, and I don’t think we will lose it. But it is a significant part of our energy bill that is very important that we pass, hopefully, within the next few weeks.

The second part is opening up ANWR, the Arctic Wildlife Refuge. There has been a lot said about the environmental concerns about drilling in ANWR, but I think people who make this argument do not understand the new technology for drilling. For example, the wildlife refuge is an area the size of Connecticut. So we can operate in a vast area. The amount we would be limited to drilling in from the House bill that has come to the Senate, and which everybody agrees is reasonable, is approximately 2,000 acres of land. A small driller of 15 barrels a day or less can operate in this. A well that will produce 15 barrels a day or less can operate in this. We are talking about 15 barrels a day. A well like that, when the price falls below break-even, which is $15 to $18 a barrel, has to shut in. It cannot stay in operation. It is too small. Other parts of the wildlife refuge do have beautiful trees and wildlife, and it would not be encroached on at all. So we are talking about. It, I think, a very environmentally safe operation—to go in and drill. If we don’t, let’s look at what happens to the environment.

In fact, the part where you would really do most of the drilling is not an area that has trees or any kind of vegetation. It is a vast area of land, and it is basically barren flat land. Other parts of the wildlife refuge do have beautiful trees and wildlife, and it would not be encroached on at all. So we are talking about. It, I think, a very environmentally safe operation—to go in and drill. If we don’t, let’s look at what happens to the environment.

If we decide not to drill in ANWR, the drilling will be done in Russia, right across the channel from Alaska. We will have a broken part of the environmental concerns in place that we have if we do it on American soil? I don’t know, but I doubt that the Russian environmental requirements would be as much as we would put on it if it were in Alaska. If Russia does this, using the same resources under the ground, that would be what we would drill from Alaska, then you will have foreign ships coming in and out right through the Alaska channel. Oil spills that could happen, if we were not in control of the requirements for those ships, could be very damaging.

So I think, environmentally, it would be much safer to drill on our shores with our environmental requirements, with our requirements on the ship that would come in and take the oil out, than to have it done 15 miles away in Russia, where we would have no control. So I think the argument is better made to do it where we can control it, where we can have requirements that would make sure it does not encroach on any kind of wildlife or wilderness area. That is why Alaskans are for drilling in ANWR. That is why the State that would be most affected very much wants this to happen.

I think it will be a huge help for our national defense if we go forward and drill in ANWR. Today, we import a million barrels a day from Iraq. Oddly enough, in September of 2001 we were importing a million barrels a day from Iraq.

Do we really want to depend on the good will of Iraq for almost 20 percent of the needs of our country—for jobs, for companies that need energy to continue? Can we really afford to have the kind of bill that we buy at the pump? Do we really want to depend on Iraq for 20 percent of our needs?

I do not think that is a prudent position. We can create the same amount of energy for the same cost with a much safer operation. I think it will be a huge help for our national defense. It is a way to reduce our dependence on any country.

We are going to have to make some sacrifices in our country to become energy self-sufficient. It is part of our effort in this war. It is a part of what we should step up to the plate and do to make sure our country is secure; that we do not depend on the good will of Iraq, Saudi Arabia, Venezuela, or anyone else who produces oil that is exported to America. We are friends with Saudi Arabia. We are friends with Venezuela. But do we really want to be dependent on any country? Do we really want to be dependent on a country that has clearly exhibited hostility to the United States as Iraq certainly has?

I hope not. I hope the Senate will pass a bill that will have the goal of creating energy self-sufficiency in our country. Only then will we be truly able to control our own economy. Only then will we not have to go begging with a tin cup to other countries to ask them not to cut back on their supply to our country.

This is not a nation that does well with a war on oil and gas. This is a nation that has taken the lead in the war on terrorism; that is standing behind our military and our President in the prosecution of this war; that is standing behind those men and women who are in harm’s way today. We do not go forward with an energy policy that protects those in the field and those at home and strengthens our freedom, our democracy, and our economy will be walking away from one of the most important responsibilities we have.

I hope we will pass an energy policy that does all that needs to be done: That creates incentives for conservation; that asks Americans to conserve;
that puts in place a program asking Americans to do certain things, not forcing them but asking them.

I hope we will look at new sources of energy, such as nuclear power, wind energy, and solar energy—all the sources that are renewable—and producing in our own country, creating the jobs in our country rather than exporting them overseas, giving good living wages to people in our country to drill for our own natural resources. That is a balanced energy package. Anything less would be an abdication of the responsibility of the Senate.

I thank the Chair, and I yield the floor.

RECESS

The PRESIDING OFFICER. Under the previous order, the hour of 12:30 p.m. having arrived, the Senate stands in recess until 2:15 p.m.

Thereupon, the Senate, at 12:34 p.m., recessed until 2:15 p.m. and reassembled when called to order by the Presiding Officer (Ms. Cantwell).

NATIONAL LABORATORIES PARTNERSHIP IMPROVEMENT ACT OF 2001—Continued

The PRESIDING OFFICER. The Senator from New Mexico.

AMENDMENT NO. 2917, AS FURTHER MODIFIED

Mr. BINGAMAN. Madam President, I ask unanimous consent that the amendment before the Senate be modified with the language that is already at the desk.

The PRESIDING OFFICER. Without objection, the amendment is so modified.

The amendment (No. 2917), as further modified, is as follows:

Strike all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Energy Policy Act of 2002".

SEC. 2. TABLE OF CONTENTS.

Sec. 1. Short title.
Sec. 2. Table of contents.

DIVISION A—RELIABLE AND DIVERSE POWER GENERATION AND TRANSMISSION

TITLE I—REGIONAL COORDINATION

Sec. 101. Policy on regional coordination.
Sec. 102. Federal support for regional coordination.

TITLE II—ELECTRICITY

Subtitle A—Amendments to the Federal Power Act
Sec. 201. Definitions.
Sec. 203. Market-based rates.
Sec. 204. Refund effective date.
Sec. 205. Transmission interconnections.
Sec. 206. Open access transmission by certain utilities.
Sec. 207. Electric reliability standards.
Sec. 208. Market transparency rules.
Sec. 209. Access to transmission by independent generators.

Subtitle B—Amendments to the Public Utility Holding Company Act
Sec. 221. Short title.

Sec. 222. Definitions.
Sec. 223. Repeal of the Public Utility Holding Company Act of 1935.
Sec. 224. Federal access to books and records.
Sec. 225. State access to books and records.
Sec. 226. Exemption authority.
Sec. 227. Affiliate transactions.
Sec. 228. Affiliation.
Sec. 229. Effect on other regulations.
Sec. 230. Enforcement.
Sec. 231. Savings provisions.

Sec. 232. Implementation.
Sec. 233. Transfer of resources.
Sec. 234. Inter-agency review of competition in the wholesale and retail markets for electric energy.
Sec. 235. GAO study on implementation.
Sec. 236. Effective date.
Sec. 237. Authorization of appropriations.

Subtitle C—Amendments to the Public Utility Regulatory Policies Act of 1978
Sec. 241. Real-time pricing standard.
Sec. 242. Adoption of additional standards.
Sec. 243. Technical assistance.
Sec. 244.Cogeneration and small power production purchase and sale requirements.
Sec. 245. Net metering.

Subtitle D—Consumer Protections
Sec. 251. Information disclosure.
Sec. 252. Consumer privacy.
Sec. 253. Unfair trade practices.
Sec. 254. Applicable procedures.
Sec. 255. Federal Trade Commission enforcement.
Sec. 256. State authority.
Sec. 257. Application of subtitle.
Sec. 258. Definitions.

Subtitle E—Renewable Energy and Rural Construction Grants
Sec. 261. Renewable energy production incentive.
Sec. 262. Assessment of renewable energy resources.
Sec. 263. Federal purchase requirement.
Sec. 264. Rural construction grants.
Sec. 265. Renewable portfolio standard.
Sec. 266. Renewable energy on Federal land.

TITLE III—HYDROELECTRIC RELENCING

Sec. 301. Alternative mandatory conditions and fishways.
Sec. 302. Charges for tribal lands.
Sec. 303. Disposition of hydroelectric assets.
Sec. 304. Annual licenses.
Sec. 305. Enforcement.
Sec. 306. Establishment of hydroelectric relicensing procedures.
Sec. 307. Relicensing study.
Sec. 308. Data collection procedures.

TITLE IV—INDIAN ENERGY

Sec. 401. Comprehensive Indian energy program.
Sec. 402. Office of Indian Energy Policy and Programs.
Sec. 403. Conforming amendments.
Sec. 404. Siting energy facilities on tribal lands.
Sec. 405. Indian Mineral Development Act review.
Sec. 406. Renewable energy study.
Sec. 408. Feasibility study of combined wind and hydropower demonstration projects.

TITLE V—NUCLEAR POWER

Subtitle A—Price-Anderson Act Reauthorization
Sec. 501. Short title.

Sec. 502. Extension of Department of Energy indemnification authority.
Sec. 503. Department of Energy liability limit.
Sec. 504. Incidents outside the United States.
Sec. 505. Reports.
Sec. 506. Inflation adjustment.
Sec. 507. Civil penalties.
Sec. 508. Effective date.

Subtitle B—Miscellaneous Provisions
Sec. 511. Uranium sales.
Sec. 512. Reauthorization of thorium reimbursement.
Sec. 513. Fast Flux Test Facility.
DIVISION B—DOMESTIC OIL AND GAS PRODUCTION AND TRANSPORTATION

TITLE VI—OIL AND GAS PRODUCTION
Sec. 601. Permanent authority to operate the Strategic Petroleum Reserve.
Sec. 602. Federal onshore leasing programs for oil and gas.
Sec. 603. Oil and gas lease acreage limitations.
Sec. 604. Orphaned and abandoned wells on Federal lands.
Sec. 605. Orphaned and abandoned oil and gas well program.
Sec. 606. Offshore developments.
Sec. 607. Coalbed methane study.
Sec. 608. Fiscal policies to maximize recovery of domestic oil and gas sources.
Sec. 609. Strategic Petroleum Reserve.

TITLE VII—NATURAL GAS PIPELINES

Subtitle A—Alaska Natural Gas Pipeline
Sec. 701. Short title.
Sec. 702. Findings.
Sec. 703. Purposes.
Sec. 704. Issuance of certificate of public convenience and necessity.
Sec. 705. Environmental reviews.
Sec. 706. Federal coordinator.
Sec. 707. Judicial review.
Sec. 708. Loan guarantee.
Sec. 709. Study of alternative means of construction.
Sec. 710. Savings clause.
Sec. 711. Clarification of authority to amend terms and conditions to meet current project requirements.
Sec. 712. Definitions.
Sec. 713. Sense of the Senate.

Subtitle B—Operating Pipelines
Sec. 721. Application of the Historic Preservation Act to operating pipelines.
Sec. 722. Environmental review and permitting of natural gas pipeline projects.

DIVISION C—DIVERSIFYING ENERGY DEMAND AND IMPROVING EFFICIENCY

TITLE VIII—FUELS AND VEHICLES

Subtitle A—CAFÉ Standards and Related Matters
Sec. 801. Average fuel economy standards for passenger automobiles and light trucks.
Sec. 802. Fuel economy truth in testing.
Sec. 803. Ensuring safety of passenger automobiles and light trucks.
Sec. 804. High occupancy vehicle exception.
Sec. 805. Credit trading program.
Sec. 806. Green labels for fuel economy.
Sec. 807. Light truck challenge.
Sec. 808. Secretary of Transportation to certify benefits.
Sec. 809. Department of Transportation engineering award program.
Sec. 810. Cooperative technology agreements.

Subtitle B—Alternative and Renewable Fuels
Sec. 811. Increased use of alternative fuels by federal fleets.
Sec. 911. Energy management requirements.
Sec. 912. Energy efficiency science initiatives.
Sec. 913. Federal building performance standards.
Sec. 914. Procurement of energy efficient products.
Sec. 915. Repeal of energy savings performance contract sunset.
Sec. 916. Energy savings performance contract definitions.
Sec. 917. Review of energy savings performance contract program.
Sec. 918. Federal Energy Bank.
Sec. 919. Energy and water saving measures in Congressional buildings.

Subtitle B—Federal Energy Efficiency
Sec. 921. Energy management requirements.
Sec. 922. Energy use measurement and accountability.
Sec. 923. Federal building performance standards.
Sec. 924. Procurement of energy efficient products.
Sec. 925. Energy labeling.
Sec. 926. Energy Star program.
Sec. 927. Energy conservation standards for central air conditioners and heat pumps.
Sec. 928. Energy conservation standards for additional consumer and commercial products.
Sec. 929. Consumer education on energy efficiency benefits of air conditioning, heating, and ventilation maintenance.

Subtitle D—Housing Efficiency
Sec. 931. Capacity requirements for energy efficient, affordable housing.
Sec. 932. Increase of CDBG public services cap for energy conservation and efficiency programs.
Sec. 933. FHA mortgage insurance incentives for energy efficient housing.
Sec. 934. Public housing capital fund.
Sec. 935. Grants for energy conserving improvements for assisted housing.

DIVISION D—INTEGRATION OF ENERGY POLICY AND CLIMATE CHANGE POLICY
TITLE X—CLIMATE CHANGE POLICY FORMULATION
Subtitle A—Global Warming
Sec. 1001. Sense of Congress on global warming.
Subtitle B—Climate Change Strategy
Sec. 1011. Short title.
Sec. 1012. Findings.
Sec. 1013. Purpose.
Sec. 1014. Definitions.
Sec. 1015. United States Climate Change Response Strategy.
Sec. 1017. Technology innovation program implemented through the Office of Climate Change Technology of the Department of Energy.
Sec. 1018. Additional offices and activities.
Sec. 1019. United States Climate Change Response Strategy Review Board.
Sec. 1020. Authorization of appropriations.
Subtitle C—Science and Technology Policy
Sec. 1031. Global climate change in the Office of Science and Technology Policy.
Sec. 1032. Establishment of Associate Director for Global Climate Change.
Subtitle D—Miscellaneous Provisions
Sec. 1041. Additional information for regulatory review.
Sec. 1042. Greenhouse gas emissions from federal facilities.

TITLE XI—NATIONAL GREENHOUSE GAS DATABASE
Sec. 1101. Purpose.
Sec. 1102. Definitions.
Sec. 1103. Establishment of memorandum of agreement.
Sec. 1104. National Greenhouse Gas Database.
Sec. 1105. Report on statutory changes and harmonization.
Sec. 1106. Measurement and verification.
Sec. 1107. Independent review.
Sec. 1108. Authorization of appropriations.

DIVISION E—ENHANCING RESEARCH, DEVELOPMENT, AND TRAINING
TITLE XII—ENERGY RESEARCH AND DEVELOPMENT PROGRAMS
Sec. 1201. Short title.
Sec. 1202. Findings.
Sec. 1203. Definitions.
Sec. 1204. Construction with other laws.
Sec. 1205. Program goals.
Sec. 1206. Authorization of appropriations.

Subtitle A—Department of Energy Programs
Sec. 1207. Program goals.
Sec. 1208. Authorization of appropriations.

Subtitle B—Department of Agriculture Programs
Sec. 1209. Program goals.
Sec. 1210. Authorization of appropriations.

Subtitle C—Fossil Energy
Sec. 1211. Enhanced fossil energy research and development.
Sec. 1212. Power plant improvement initiatives.
Sec. 1213. Research and development for advanced safe and efficient coal mining technologies.
Sec. 1214. Ultra-deepwater and unconventional resource exploration and production technologies.
Sec. 1215. Research and development for new natural gas transportation technologies.
Sec. 1216. Authorization of appropriations for Office of Arctic Energy.

Subtitle D—Nuclear Energy
Sec. 1217. Enhanced nuclear energy research and development.
Sec. 1218. University nuclear science and engineering support.
Sec. 1219. Nuclear energy research initiatives.
Sec. 1220. Nuclear energy plant optimization program.
Sec. 1221. Nuclear energy technology development programs.

Subtitle E—Fundamental Energy Science
Sec. 1222. Enhanced nuclear energy research and development.
Sec. 1223. Advanced scientific computing for energy missions.
Sec. 1224. Fusion energy sciences programs and planning.
Subtitle F—Energy, Safety, and Environmental Protection
Sec. 1225. Critical energy infrastructure protection research and development.
Sec. 1226. Pipeline integrity, safety, and reliability research and development.
Sec. 1227. Research and demonstration for remediation of groundwater from energy activities.

TITLE XIII—CLIMATE CHANGE RESEARCH AND DEVELOPMENT ACT OF 1990
Subtitle A—Department of Energy Programs
Sec. 1301. Program goals.
Sec. 1302. Department of Energy global change science research.

Subtitle B—Department of Agriculture Programs
Sec. 1304. Program goals.
Sec. 1305. Authorization of appropriations.

Subtitle C—Clean Energy Technology Exports Program
Sec. 1306. Clean energy technology exports program.
Sec. 1307. International energy technology deployment program.

Subtitle D—Climate Change Science and Information
PART I—AMENDMENTS TO THE GLOBAL CHANGE RESEARCH ACT OF 1990
Sec. 1312. Changes in definitions.
Sec. 1313. Change in committee name.
Sec. 1314. Change in national global change research plan.
Sec. 1315. Integrated Program Office.
PART II—NATIONAL CLIMATE SERVICES
MONITORING
Sec. 1341. Amendment of National Climate Program Act.
Sec. 1342. Changes in findings.
Sec. 1343. Title for regional planning.
Sec. 1344. Authorization of appropriations.
Sec. 1345. National Climate Service Plan.
Sec. 1346. InternationalPacific Research and Cooperation.
Sec. 1347. Reporting on trends.

PART III—OCEAN AND COASTAL
OBSERVING SYSTEM
Sec. 1351. Ocean and coastal observing system.
Sec. 1352. Authorization of appropriations.

TITLE XIV—MANAGEMENT OF DOE SCIENCE AND TECHNOLOGY PROGRAMS
Sec. 1401. Definitions.
Sec. 1402. Availability of funds.
Sec. 1403. Cost sharing.
Sec. 1404. Development of new measurement technologies.
Sec. 1405. External technical review of departmental programs.
Sec. 1406. Improved coordination and management of civilian science and technology programs.
Sec. 1407. Improved coordination of technology transfer activities.
Sec. 1408. Technology infrastructure program.
Sec. 1409. Small business advocacy and assistance.
Sec. 1410. Other transactions.
Sec. 1411. Mobility of scientific and technical personnel.
Sec. 1412. National Academy of Sciences report.
Sec. 1413. Report on technology readiness and barriers to technology transfer.

TITLE XV—PERSONNEL AND TRAINING
Sec. 1501. Workforce trends and traineeship grants.
Sec. 1502. Postdoctoral and senior research fellowships in energy research.
Sec. 1503. Training guidelines for electric energy industry personnel.
Sec. 1505. Improved access to energy-related research and technical careers.

DIVISION F—TECHNOLOGY ASSESSMENT
AND STUDIES
TITLE XVI—TECHNOLOGY ASSESSMENT
Sec. 1601. National Science and Technology Assessment Service.
Sec. 1602. Study of sited an electric transmission system on Amtrak right-of-way.

DIVISION G—ENERGY INFRASTRUCTURE SECURITY
TITLE XVII—CRITICAL ENERGY INFRASTRUCTURE
Subtitle A—Department of Energy Programs
Sec. 1701. Study of sited an electric transmission system on Amtrak right-of-way.

DIVISION H—RELIABLE AND DIVERSE POWER GENERATION AND TRANSMISSION
TITLE I—REGIONAL COORDINATION
SEC. 101. POLICY ON REGIONAL COORDINATION.
(a) STATEMENT OF POLICY.—It is the policy of the Federal Government to encourage the coordination of regional State energy policies to provide reliable and affordable energy services to the public while minimizing the impact of providing energy services on communities and the environment.

(b) DEFINITION OF ENERGY SERVICES.—For purposes of this section, the term ‘‘energy services’’ means—
(1) the generation or transmission of electric energy,
(2) the transportation, storage, and distribution of crude oil, residual fuel oil, refined petroleum product, or natural gas, or
(3) the reduction in load through increased efficiency, conservation, or load control measures.

SEC. 102. FEDERAL SUPPORT FOR REGIONAL COORDINATION.
(a) TECHNICAL ASSISTANCE.—The Secretary of Energy shall provide technical assistance to States and regional organizations formed by two or more States to assist them in coordinating their energy policies on a regional basis. Such technical assistance may include assistance in—
(1) assessing future supply availability and demand requirements,
(2) planning and siting additional energy infrastructure, including generating facilities, electric transmission facilities, pipelines, refineries, and distributed generation facilities to meet regional needs,
(3) identifying and resolving problems in distribution networks,
(4) developing plans to respond to surges demand for or emergency needs,
(5) developing renewable energy, energy efficiency, conservation, and load control programs.
(b) ANNUAL CONFERENCE ON REGIONAL ENERGY COORDINATION.
(1) ANNUAL CONFERENCE.—The Secretary of Energy shall convene an annual conference to promote regional coordination on energy policy and infrastructure issues.
(2) PARTICIPATION.—The Secretary of Energy shall invite appropriate representatives of Federal, State, and regional energy organizations, and other interested parties.

TITLE XVIII—CRITICAL INFRASTRUCTURE SECURITY
SEC. 111. NATIONAL COUNCIL ON CRITICAL INFRASTRUCTURE SECURITY.
(a) NATIONAL COUNCIL ON CRITICAL INFRASTRUCTURE SECURITY.—The Secretary of Energy shall consult the National Security Council, the Homeland Security Council, the departments and agencies under the control of the President, the Homeland Security Council, the National Fuel Supply Organization, and the National Natural Gas Organization in performing the functions and duties of the National Council on Critical Infrastructure Security.

(2) THROUGH PROFESSIONAL TRAINING.—The Office of Energy Policy and Infrastructure Issues of the National Council on Critical Infrastructure Security shall provide professional training for such personnel.

(3) THROUGH TECHNICAL COOPERATION.—To facilitate professional training, the Office of Energy Policy and Infrastructure Issues of the National Council on Critical Infrastructure Security shall establish a cooperative agreement with the Federal Energy Regulatory Commission, the Administrator of the Environmental Protection Agency, and the Chairman of the Council on Environmental Quality in the planning and conduct of the conference.

(4) AGENDA.—The Secretary of Energy, in consultation with the Federal entities identified in paragraph (2) and participants identified in paragraph (3) shall establish an agenda for each conference that promotes regional cooperation on energy policy and infrastructure issues.

(5) RECOMMENDATIONS.—Not later than 60 days after the conclusion of each annual conference, the Secretary shall report to the President and the Congress recommendations arising out of the conference that may improve—
(A) coordination on energy policy and infrastructure issues, and
(B) Federal support for regional coordination.

TITLE II—ELECTRICITY
Subtitle A—Amendments to the Federal Power Act
SEC. 201. DEFINITIONS.
(a) DEFINITION OF ELECTRIC UTILITY.—Section 3(22) of the Federal Power Act (16 U.S.C. 796(22)) is amended to read as follows:

"(22) ‘‘electric utility’’ means any person or Federal or State agency (including any municipal entity) that sells electricity, and such term includes the Tennessee Valley Authority and each Federal power marketing agency.

(b) DEFINITION OF TRANSMITTING UTILITY.—Section 3(23) of the Federal Power Act (16 U.S.C. 796(23)) is amended to read as follows:

"(23) ‘‘transmitting utility’’ means an entity (including any entity described in section 201(f) that owns or operates facilities used for the transmission of electric energy in—
(A) interstate commerce,
(B) for sale of electric energy at wholesale; or
(C) purchase, acquire, or take any security of any other public utility, or
(D) purchase, lease, or otherwise acquire existing facilities for the generation of electric energy or for the production or transportation of natural gas.

(2) No holding company in a holding company system that includes a transmitting utility or an electric utility company shall purchase, acquire, or take any security of, or, by any means whatsoever, directly or indirectly, merge or consolidate with a transmitting utility, an electric utility company, a gas utility company, or a holding company in a holding company system that includes a transmitting utility, an electric utility company, or a gas utility company, without first having secured an order of the Commission approving it to do so—
(A) sell, lease, or otherwise dispose of the whole of its facilities subject to the jurisdiction of the Commission, or any part thereof, or any security of, or by any means whatsoever, directly or indirectly, merge or consolidate with a transmitting utility, an electric utility company, or a gas utility company, or any facility or any part thereof with the facilities of any other person, by means whatever;
(B) purchase, acquire, or take any security of any other public utility, or
(C) purchase, lease, or otherwise acquire existing facilities for the generation of electric energy or for the production or transportation of natural gas.

(2) No holding company in any holding company system that includes a transmitting utility or an electric utility company shall purchase, acquire, or take any security of, or, by any means whatsoever, directly or indirectly, merge or consolidate with a transmitting utility, an electric utility company, or a gas utility company, without first having secured an order of the Commission approving it to do—
(3) Upon application for such approval the Commission shall give reasonable notice in writing to the Governor and State commission of each of the States in which any physical property affected, or any part thereof, is situated, and to such other persons as it may deem advisable.

(4) After notice and opportunity for hearing, if the Commission finds that the proposed disposition, consolidation, acquisition,
or control will be consistent with the public interest, it shall approve the same.  

(5) For purposes of this subsection, the terms 'electric utility company,' 'gas utility company,' 'hydro company,' and 'holding company system' have the meaning given those terms in the Public Utility Holding Company Act of 2002.

(6) Notwithstanding section 201(b)(1), facilities used for the generation of electric energy shall be subject to the jurisdiction of the Commission for purposes of this section.

SEC. 203. MARKET-BASED RATES.  
(a) APPROVAL OF MARKET-BASED RATES.—Section 205 of the Federal Power Act (16 U.S.C. 824j) is amended by adding at the end the following:  

"(d) The Commission may determine whether a regulated rate for the transmission of electric energy subject to the jurisdiction of the Commission is just and reasonable and not unduly discriminatory or preferential. In making such determination, the Commission shall consider—  

(1) whether the seller and its affiliates have, or have adequately mitigated, market power in the generation and transmission of electric energy;  

(2) whether the sale is made in a competitive market;  

(3) whether market mechanisms, such as power exchanges and bid auctions, function adequately;  

(4) the effect of demand response mechanisms;  

(5) the effect of mechanisms or requirements intended to ensure adequate reserve margins; and  

(6) other such considerations as the Commission may deem to be appropriate and in the public interest."  

(b) REVOCATION OF MARKET-BASED RATES.—Section 205 of the Federal Power Act (16 U.S.C. 824j) is amended by adding at the end the following:  

"(1) Whenever the Commission, after a hearing had upon its own motion or upon complaint, finds that a rate charged by a public utility authorized to charge a market-based rate under section 205 is unjust, unreasonable, unduly discriminatory or preferential, the Commission shall determine the just and reasonable rate and fix the same by order in accordance with this section, or order a hearing as it may think fit, in the execution of the Commission, adequately ensure a just and reasonable market-based rate."  

SEC. 204. REFUND EFFECTIVE DATE.  
Section 206 of the Federal Power Act (16 U.S.C. 824(e)) is amended by—  

(1) striking "60 days after the filing of such complaint nor later than 5 months after the expiration of such 60-day period in" the second sentence and inserting "on which the complaint is filed"; and  

(2) striking "60 days after the publication by the Commission in the Federal Register of its intention to initiate such proceeding nor later than 5 months after the expiration of such 60-day period" in the third sentence and inserting "on which the Commission publishes notice of its intention to initiate such proceeding".

SEC. 205. TRANSMISSION INTERCONNECTIONS.  
Section 210 of the Federal Power Act (16 U.S.C. 824t) is amended to read as follows:  

"TRANSMISSION INTERCONNECTION AUTHORITY  

"Sec. 210. (a) (1) The Commission shall, by rule, establish technical standards and procedures for the interconnection of facilities used for the generation of electric energy with facilities used for the transmission of electric energy in interstate commerce. The rule shall provide—  

(A) that the Commission shall ensure that an interconnection will not unreasonably impair the reliability of the transmission system; and  

(B) criteria for the apportionment or reimbursement of the costs of making the interconnection.  

(2) Notwithstanding section 201(i), a transmission provider may connect, and any necessary transmission facilities with the generation facilities of a power producer upon the application of the power producer if the power producer complies with the requirements of the rule.  

(b) Upon the application of a power producer or its own motion, the Commission may, after giving notice and an opportunity for a hearing to any entity whose interest may be affected, issue an order requiring—  

(1) the physical connection of facilities used for the transmission of electric energy with facilities used for the transmission of electric energy in interstate commerce;  

(2) such action as may be necessary to make effective any such physical connection;  

(3) such sale or exchange of electric energy or other coordination, as may be necessary, for the purposes of such order; or  

(4) such increase in transmission capacity as may be necessary to carry out the purposes of such order.  

(c) As used in this section, the term 'power producer' means an entity that owns or operates facilities used for the generation of electric energy."  

SEC. 206. OPEN ACCESS TRANSMISSION BY CERTAIN UTILITIES.  
Part II of the Federal Power Act is further amended by inserting after section 211 the following:  

"OPEN ACCESS BY UNREGULATED TRANSMITTING UTILITIES  

"Sec. 211A. (1) Subject to section 212(h), the Commission may, on its own motion, or on a complaint, require an unregulated transmitting utility to provide transmission services—  

(A) at rates that are comparable to those of the unregulated transmitting utility charges itself, and  

(B) on terms and conditions (not relating to rates) that are comparable to those under Commission rules that require public utilities to offer open access transmission services and that are not unduly discriminatory or preferential.  

(2) The Commission shall exempt from any rule or order under this subsection any unregulated transmitting utility that—  

(A) sells no more than 4,000,000 megawatt hours of electric energy per year;  

(B) does not own or operate any transmission facilities that are necessary for operating an interconnected transmission system (or any portion thereof), or  

(C) meets other criteria the Commission determines to be in the public interest.  

(3) The rate changing procedures (applicable to public utilities under subsections (c) and (d) of section 205 are applicable to unregulated transmitting utilities for purposes of this section.  

(4) In exercising its authority under paragraph (1), the Commission may remand transmission rates to an unregulated transmitting utility for review and revision where necessary to meet the requirements of paragraphs (1).  

(5) The provision of transmission services under paragraph (1) does not preclude a request for transmission services under section 211.  

(6) The Commission may not require a State utility to take action under this section that constitutes a private business use for purposes of section 141 of the Internal Revenue Code of 1986 (26 U.S.C. 141).  

(7) For purposes of this section, the term 'unregulated transmitting utility' means an entity that—  

(A) owns or operates facilities used for the transmission of electric energy in interstate commerce, and  

(B) is either an entity described in section 201(t) of the Rural Utilities Service Act, or a cooperative as defined in section 9302(1) of such Act (42 U.S.C. 19211), and  

(C) maintains a transmission system.
transmission services to the Commission, state commissions, buyers and sellers of wholesale electric energy, users of transmission services, and the public on a timely basis.

"(b) INFORMATION REQUIRED.—The Commission shall require:

(1) each regional transmission organization to maintain, and shall require transmission facilities operated by the organization.

(2) The term "nonfirm transmission service" shall require transmission service provided on an "as available" basis.

(3) The term "scheduling deviation" means deviation of the load at an electric energy that has previously been forecast in a schedule submitted by an intermittent generator to a control area operator or transmitting utility.

SEC. 210. ENFORCEMENT.

(a) COMPLAINTS.—Section 306 of the Federal Power Act (16 U.S.C. 825e) is amended by—

(1) inserting "electric utility," after "Any person;

and

(2) inserting "transmitting utility," after "licensee" each place it appears.

(b) INVESTIGATIONS.—Section 307(a) of the Federal Power Act (16 U.S.C. 825a(a)) is amended by inserting "or transmitting utility" after "any person" in the first sentence.

(c) RECORDS.—Section 313(a) of the Federal Power Act (16 U.S.C. 825n(a)) is amended by inserting "electric utility," after "Any person," in the first sentence.

(d) CRIMINAL PENALTIES.—Section 316(c) of the Federal Power Act (16 U.S.C. 825o(c)) is repealed.

(e) CIVIL PENALTIES.—Section 316A of the Federal Power Act (16 U.S.C. 825o-1) is amended by striking "section 211, 212, 213, or 214" each place it appears and inserting "Part II".

Subtitle B—Amendments to the Public Utility Holding Company Act

SEC. 221. SHORT TITLE.

This subtitle may be cited as the "Public Utility Holding Company Act of 2002".

SEC. 222. DEFINITIONS.

For purposes of this subtitle:

(1) The term "affiliate" of a company means any company, 5 percent or more of the outstanding voting securities of which are owned, controlled, or held with power to vote, directly or indirectly, by such company.

(2) The term "associate company" of a company means any company in the same holding company system as such company.

(4) The term "company" means a corporation, association, joint stock company, business trust, or any organized group of persons, whether incorporated or not, or a receiver, trustee, or other liquidating agent of any of the foregoing.

(5) The term "electric utility company" means any company that owns or operates facilities used for the generation, transmission, or distribution of electric energy for sale.

(6) The terms "exempt wholesale generator" and "foreign utility company" have the same meanings as in sections 32 and 33, respectively, of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79b-5a, 79b-5b), as those sections existed on the day before the effective date of this subtitle.

(7) The term "gas utility company" means any company that owns or operates facilities used for distribution at retail (other than by pipeline) of gas or liquid gas in compressed portable containers or distribution to tenants or employees of the company operating such facilities for their own use and not for resale) of natural gas or manufactured gas for heat, light, or power.

(8) The term "holding company" means—

(A) any company that directly or indirectly owns, controls, or holds, with power to vote, 10 percent or more of the outstanding voting securities of a public utility company or a holding company of any public utility company; and

(B) any person, determined by the Commission, after notice and opportunity for hearing, to be in a position where a consumer of electricity is not, or a receiver, trustee, or other liquidating agent of any of the foregoing.

SEC. 223. REPEAL OF THE PUBLIC UTILITY HOLDING COMPANY ACT.

SEC. 224. FEDERAL ACCESS TO BOOKS AND RECORDS.

(a) In General.—Each holding company and each associate company thereof shall maintain, and shall make available to the
Commission, such books, accounts, memora-
danda, and other records as the Commission deems to be relevant to costs incurred by a public utility or natural gas company and necessary or appropriate for the protection of utility customers with respect to jurisdictional rates.

SEC. 225. STATE ACCESS TO BOOKS AND RECORDS.

(a) In General.—Upon the written request of a State commission having jurisdiction to regulate a public utility company in a holding company system, the holding company shall exempt a person or transaction from the requirements of section 224 or 227 that State commission deems to be relevant to costs incurred by a public utility or natural gas company and necessary or appropriate for the protection of utility customers with respect to jurisdictional rates.

(b) Effect on Other Commission Authorities.—Nothing in this subtitle limits the authority of the Commission under the Federal Power Act (16 U.S.C. 791a et seq.) to require the production of books, accounts, memoranda, and other records under any other Federal law, contract, or otherwise.

(c) Holding Company Systems.—The Commission may examine the books, accounts, memoranda, and other records of any company in a holding company system, or any affiliate thereof, as the Commission deems to be relevant to costs incurred by a public utility or natural gas company and necessary or appropriate for the protection of utility customers with respect to jurisdictional rates.

(d) Confidentiality of Information.—The Commission shall promulgate a final rule to exempt from the requirements of section 224 any person that is a holding company, solely with respect to one or more—

(1) wholesale utility operations under the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2601 et seq.);

(2) exempt wholesale generators; or

(3) foreign public utility companies.

(b) Other Authority.—The Commission shall exempt a person or transaction from the requirements of section 224, if, upon application or upon the motion of the Commission—

(1) the Commission finds that the books, accounts, memoranda, and other records under any person are not relevant to the jurisdictional rates of a public utility or natural gas company; or

(2) the Commission finds that any class of transactions is not relevant to the jurisdictional rates of a public utility or natural gas company.

(c) Affiliates Transactions.—Nothing in this subtitle shall preclude the Commission or a State commission from exercising its jurisdiction under otherwise applicable law to determine whether a public utility company, public utility, or natural gas company may recover in rates any costs of an activity performed by an associate company, or any costs of goods or services acquired by such public utility company from an associate company.

(d) Recovery of Costs.—Nothing in this subtitle shall preclude the Commission or a State commission from exercising its jurisdiction under otherwise applicable law to determine whether a public utility company, public utility, or natural gas company may recover in rates any costs of an activity performed by an associate company, or any costs of goods or services acquired by such public utility company from an associate company.

(e) Court Jurisdiction.—Any United States district court located in the State in which the State commission referred to in subsection (a) is located shall have jurisdiction to enforce compliance with this section.

(f) Rulemaking.—Not later than 90 days after the effective date of this subtitle, the Commission shall promulgate a final rule to exempt from the requirements of section 224 any person that is a holding company, solely with respect to one or more—

(1) wholesale utility operations under the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2601 et seq.);

(2) exempt wholesale generators; or

(3) foreign public utility companies.

(b) Other Authority.—The Commission shall exempt a person or transaction from the requirements of section 224, if, upon application or upon the motion of the Commission—

(1) the Commission finds that the books, accounts, memoranda, and other records under any person are not relevant to the jurisdictional rates of a public utility or natural gas company; or

(2) the Commission finds that any class of transactions is not relevant to the jurisdictional rates of a public utility or natural gas company.

(c) Affiliates Transactions.—Nothing in this subtitle shall preclude the Commission or a State commission from exercising its jurisdiction under otherwise applicable law to determine whether a public utility company, public utility, or natural gas company may recover in rates any costs of an activity performed by an associate company, or any costs of goods or services acquired by such public utility company from an associate company.

(d) Recovery of Costs.—Nothing in this subtitle shall preclude the Commission or a State commission from exercising its jurisdiction under otherwise applicable law to determine whether a public utility company, public utility, or natural gas company may recover in rates any costs of an activity performed by an associate company, or any costs of goods or services acquired by such public utility company from an associate company.

SEC. 228. APPLICABILITY.

Except as otherwise specifically provided in this subtitle, no provision of this subtitle shall apply to, or be deemed to include—

(1) the United States;

(2) a State or any political subdivision of a State;

(3) any foreign governmental authority not operating in the United States;

(4) any agency, authority, or instrumentality of any entity referred to in paragraph (1), (2), or (3) acting as such in the course of his or her official capacity;

(5) any officer, agent, or employee of any entity referred to in paragraph (1), (2), or (3) acting in the course of his or her official capacity;

(6) any employee of the Commission who is appointed by the Chairman of the Federal Trade Commission, to be appointed by the Attorney General of the United States;

(7) any employee of the Commission who is appointed by the Chairman of the Federal Trade Commission, to be appointed by the Secretary of Commerce, to be appointed by the Attorney General of the United States; or

(8) any employee of the Commission who is appointed by the Secretary of Commerce, to be appointed by the Attorney General of the United States.

SEC. 229. EFFECT ON OTHER REGULATIONS.

Nothing in this subtitle precludes the Commission or a State commission from exercising its jurisdiction under otherwise applicable law to protect utility customers.

SEC. 230. ENFORCEMENT.

The Commission shall have the same powers as set forth in sections 306 through 317 of the Federal Power Act (16 U.S.C. 796–825) to enforce the provisions of this subtitle.

SEC. 231. SAVINGS PROVISIONS.

(a) In General.—Nothing in this subtitle prohibits a person from engaging in or continuing to engage in activities or transactions in which it is legally engaged or authorized to engage on the effective date of this subtitle.

(b) Effect on Other Commission Authority.—Nothing in this subtitle limits the authority of the Commission under the Federal Power Act (16 U.S.C. 791a et seq.) (including sections 224 and 227 of that Act) or the Natural Gas Act (15 U.S.C. 717 et seq.) (including section 8 of that Act).
Government and the States during the 18-month period following the effective date of this subsection—

(1) the prevention of anticompetitive practices by public utilities, including cross-subsidization and other market power abuses; and

(2) the promotion of competition and efficient energy markets to the benefit of consumers.

(b) REPORT TO CONGRESS.—Not earlier than 18 months after the effective date of this subsection the Comptroller General shall submit to the Congress a report on the results of the study conducted under subsection (a), including probable causes of its findings and recommendations to the Congress and the States for any necessary legislative changes.

SEC. 216. EFFECTIVE DATE.

This subtitle shall take effect 18 months after the date of enactment of this subtitle.

SEC. 217. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such funds as may be necessary to carry out this subtitle.

SEC. 218. CONFORMING AMENDMENTS TO THE PUBLIC POWER ACT.

(a) CONFLICT OF JURISDICTION.—Section 313 of the Federal Power Act (16 U.S.C. 796(17)(C)) is amended by adding at the end the following:

"(1) The term ‘electric utility’ includes public utilities, cooperatives, municipally owned utilities, and rural electric cooperatives, each of which generates, transmits, or distributes electric energy, and each of which is a member of the National Rural Electric Cooperative Association, as defined in section 379 of the Federal Power Act (16 U.S.C. 799).

(b) DEFINITIONS.—

(1) Section 201(g) of the Federal Power Act (16 U.S.C. 821(g)) is amended by striking "193" and inserting "2002."

(2) Section 214 of the Federal Power Act (16 U.S.C. 821m) is amended by striking "193" and inserting "2002."
“(A) shall charge the owner or operator of an on-site generating facility rates and charges that are identical to those that would be charged other electric consumers of the electric utility in the same rate class; and

(B) shall not charge the owner or operator of an on-site generating facility any additional standby, capacity, interconnection, or other rate or charge.

(2) MEASUREMENT.—An electric utility that sells electric energy to the owner or operator of the on-site generating facility shall measure the quantity of electric energy produced by the on-site facility and the quantity of electric energy consumed by the owner or operator of an on-site generating facility during a billing period in accordance with normal metering practices.

(3) ELECTRIC ENERGY SUPPLIED EXCEEDING ELECTRIC ENERGY GENERATED.—If the quantity of electric energy sold by the electric utility to an on-site generating facility exceeds the quantity of electric energy supplied by the on-site generating facility to the electric utility during the billing period, the electric utility may bill the owner or operator for the excess energy sold, in accordance with normal metering practices.

(4) ELECTRIC ENERGY GENERATED EXCEEDING ELECTRIC ENERGY SUPPLIED.—If the quantity of electric energy supplied by the on-site generating facility to the electric utility exceeds the quantity of electric energy sold by the electric utility to the on-site generating facility during the billing period—

(A) the electric utility may bill the owner or operator of the on-site generating facility for the appropriate charges for the billing period in accordance with paragraph (2); and

(B) the owner or operator of the on-site generating facility may bill the electric utility for the excess kilowatt-hours generated during the billing period, with the kilowatt-hour credit appearing on the bill for the following billing period.

(5) SAFETY AND PERFORMANCE STANDARDS.—

(A) An eligible on-site generating facility and net metering system used by an electric consumer shall meet all applicable safety, performance, reliability, and interconnection standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, and Underwriters Laboratories.

(B) The Commission, after consultation with State regulatory authorities and nonregulated electric utilities and after notice and opportunity for comment, may adopt, by rule, additional control and testing requirements for on-site generating facilities and net metering systems that the Commission determines are necessary to protect public safety and system reliability.

(e) APPLICATION.—This section applies to each electric utility during any calendar year in which the total sales of electric energy by such utility for purposes other than resale exceeded 1,000,000,000 kilowatt-hours during the preceding calendar year.

Subtitle D—Consumer Protections

SEC. 251. TOPOGRAPHY OF DEDICATION clause.

(a) OFFERS AND SOlicitATIONS.—The Federal Trade Commission shall issue rules requiring each electric utility that makes an offer to sell electric energy, or sells electric energy, to electric consumers to purchase electric energy to provide the electric consumer a statement containing the following information—

(1) a description of service being offered, including information about intermittunity of service;

(2) the price of the electric energy, including a variable charge, if any;

(3) a description of all other charges associated with the service being offered, including access charges, exit charges, back-up service charges, stranded cost recovery charges, and customer service charges; and

(4) information the Federal Trade Commission shall pro vide, if it is reasonable to do so, of assistance to electric consumers in making purchasing decisions, and concerns—

(A) that the Federal Trade Commission shall pro vide, if it is reasonable to do so, of assistance to electric consumers in making purchasing decisions, and concerns—

(B) the share of electric energy that is generated by each fuel type; and

(C) the environmental emissions produced in generating such fuel type.

(b) PERIODIC BILLINGS.—The Federal Trade Commission shall issue rules requiring any electric utility that sells electric energy to transmit the information to consumer, in addition to the information transmitted pursuant to section 115(f) of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2625(f)), a clear and concise statement containing the information described in sub section (a)(4) for each billing period (unless such information is not reasonably ascertainable by the electric utility).

SEC. 252. CONSUMER PRIVACY.

(a) PROHIBITION.—The Federal Trade Commission shall issue rules prohibiting any electric utility from using, disclosing, or permitting access to consumer information in connection with the sale or delivery of electric energy to an electric consumer from using, disclosing, or permitting access to such information.

(b) PERMITTED USE.—The rules issued under this subsection shall not prohibit any electric utility from using, disclosing, or permitting access to consumer information referred to in subsection (a) for any of the following purposes:

(1) To facilitate an electric consumer’s change in selection of an electric utility under procedures approved by the State or State regulatory authority.

(2) To initiate, render, bill, or collect for the sale or delivery of electric energy to electric consumers or for related services.

(3) To protect the rights or property of the person obtaining such information.

(4) To protect retail electric consumers from fraud, abuse, and unlawful subscription to the sale or delivery of electric energy to such consumers.

(5) For law enforcement purposes.

(6) For purposes of compliance with any Federal, State, or local law or regulation authorizing disclosure of information to a Federal, State, or local agency.

(c) AGGREGATE CONSUMER INFORMATION.—The rules issued under subsection (a) may permit a person to use, disclose, and permit access to aggregate consumer information and may require an electric utility to make such information available to other electric utilities upon request and payment of a reasonable fee.

(d) DEFINITIONS.—As used in this section:

(1) The term “aggregate consumer information” means collective data that relates to a group or category of electric consumers, from which individual consumer identities and identifying characteristics have been removed.

(2) The term “consumer information” means information that relates to the quantity, technical configuration, type, destination, or amount of use of electric energy delivered to an electric consumer.

Subtitle E—Renewable Energy and Rural Construction Grants

SEC. 261. RENEWABLE ENERGY PRODUCTION INCENTIVES.

(a) INCENTIVE PAYMENTS.—Section 1212(a) of the Energy Policy Act of 1992 (42 U.S.C. 13217(a)) is amended by striking “and all that follows through” “Secretary shall establish.” and inserting the following:

The Secretary shall establish other procedures necessary for efficient administration of the program. The Secretary shall not establish any criteria or procedures that have the effect of assuring that proposals for projects that offer a higher or lower priority for eligibility or allocation of appropriated funds on the basis of the energy source proposed.

Sec. 255. FEDERAL TRADE COMMISSION ENFORCEMENT.

Violation of a rule issued under this subtitle shall be treated as a violation of a rule under section 18 of the Federal Trade Commission Act (15 U.S.C. 57a) respecting unfair or deceptive acts or practices. All functions and powers of the Federal Trade Commission under such Act are available to the Federal Trade Commission to enforce compliance with this subtitle notwithstanding any jurisdictional limits in such Act.

Title II—State Authority

Nothing in this subtitle shall be construed to preclude a State or State regulatory authority from prescribing and enforcing additional rules, laws, or procedures regarding the practices which are the subject of this section, so long as such laws, rules, or procedures are consistent with the provisions of this section or with any rule prescribed by the Federal Trade Commission pursuant to this subtitle.

SEC. 257. APPLICATION OF SUBTITLE.

The provisions of this subtitle apply to each electric utility if the total sales of electric energy by such utility for purposes other than resale exceed 500 million kilowatt-hours per calendar year. The provisions of this subtitle do not apply to the operations of an electric utility to the extent that such operations relate to sales of electric energy for purposes of resale.

SEC. 258. DEFINITIONS.

As used in this subtitle:

(1) The term “aggregate consumer information” means collective data that relates to a group or category of electric consumers, from which individual consumer identities and identifying characteristics have been removed.

(2) The term “consumer information” means information that relates to the quantity, technical configuration, type, destination, or amount of use of electric energy delivered to an electric consumer.

The terms “electric consumers”, “electric utility”, and “State regulatory authority” have the meanings given such terms in section 3 of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2614).

Subtitle E—Renewable Energy and Rural Construction Grants

SEC. 261. RENEWABLE ENERGY PRODUCTION INCENTIVES.

(a) INCENTIVE PAYMENTS.—Section 1212(a) of the Energy Policy Act of 1992 (42 U.S.C. 13217(a)) is amended by striking “and all that follows through” “Secretary shall establish.” and inserting the following:

The Secretary shall establish other procedures necessary for efficient administration of the program. The Secretary shall not establish any criteria or procedures that have the effect of assuring that proposals for projects that offer a higher or lower priority for eligibility or allocation of appropriated funds on the basis of the energy source proposed.

Sec. 255. FEDERAL TRADE COMMISSION ENFORCEMENT.

Violation of a rule issued under this subtitle shall be treated as a violation of a rule under section 18 of the Federal Trade Commission Act (15 U.S.C. 57a) respecting unfair or deceptive acts or practices. All functions and powers of the Federal Trade Commission under such Act are available to the Federal Trade Commission to enforce compliance with this subtitle notwithstanding any jurisdictional limits in such Act.

Title II—State Authority

Nothing in this subtitle shall be construed to preclude a State or State regulatory authority from prescribing and enforcing additional rules, laws, or procedures regarding the practices which are the subject of this section, so long as such laws, rules, or procedures are consistent with the provisions of this section or with any rule prescribed by the Federal Trade Commission pursuant to this subtitle.

SEC. 257. APPLICATION OF SUBTITLE.

The provisions of this subtitle apply to each electric utility if the total sales of electric energy by such utility for purposes other than resale exceed 500 million kilowatt-hours per calendar year. The provisions of this subtitle do not apply to the operations of an electric utility to the extent that such operations relate to sales of electric energy for purposes of resale.

SEC. 258. DEFINITIONS.

As used in this subtitle:

(1) The term “aggregate consumer information” means collective data that relates to a group or category of electric consumers, from which individual consumer identities and identifying characteristics have been removed.

(2) The term “consumer information” means information that relates to the quantity, technical configuration, type, destination, or amount of use of electric energy delivered to an electric consumer.

The terms “electric consumers”, “electric utility”, and “State regulatory authority” have the meanings given such terms in section 3 of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2614).

Subtitle E—Renewable Energy and Rural Construction Grants

SEC. 261. RENEWABLE ENERGY PRODUCTION INCENTIVES.

(a) INCENTIVE PAYMENTS.—Section 1212(a) of the Energy Policy Act of 1992 (42 U.S.C. 13217(a)) is amended by striking “and all that follows through” “Secretary shall establish.” and inserting the following:

The Secretary shall establish other procedures necessary for efficient administration of the program. The Secretary shall not establish any criteria or procedures that have the effect of assuring that proposals for projects that offer a higher or lower priority for eligibility or allocation of appropriated funds on the basis of the energy source proposed.

Sec. 255. FEDERAL TRADE COMMISSION ENFORCEMENT.

Violation of a rule issued under this subtitle shall be treated as a violation of a rule under section 18 of the Federal Trade Commission Act (15 U.S.C. 57a) respecting unfair or deceptive acts or practices. All functions and powers of the Federal Trade Commission under such Act are available to the Federal Trade Commission to enforce compliance with this subtitle notwithstanding any jurisdictional limits in such Act.
Commonwealth, territory, or possession of the United States or the District of Columbia, or a political subdivision thereof, or an Indian tribal government or subdivision thereof, there are authorized to be appropriated such funds as are necessary to carry out this section.

(2) By inserting ‘‘landfill gas, incremental hydropower, ocean’’ after ‘‘wind, biomass,’’.

(e) Amount of Payment.—Section 1212(e)(1) of the Energy Policy Act of 1992 (42 U.S.C. 13317(e)(1)) is amended by inserting ‘‘or additions of new capacity at a hydropower facility’’ after ‘‘eligible for such payments’’.

(f) Sunset.—Section 1212(f) of the Energy Policy Act of 1992 (42 U.S.C. 13317(f)) is amended by striking ‘‘the expiration of’’ and all that follows through ‘‘of this section’’ and inserting ‘‘September 30, 2023.’’

(g) Incremental Hydropower.—

(1) Programs.—Subject to subsection (h), if an incremental hydropower program meets the requirements of this section, as determined by the Secretary, the incremental hydropower program shall be eligible to receive incentive payments under this section.

(2) Definition of incremental hydropower.—In this subsection, the term ‘‘incremental hydropower’’ means additional generating capacity achieved from increased efficiency or additions of new capacity at a hydropower facility in existence on the date of enactment of this paragraph.

(h) Authorization of Appropriations.—

(1) In general.—Subject to paragraph (2), there are authorized to be appropriated such sums as are necessary to carry out this section for fiscal years 2023 through 2025.

(2) Limitation on funds used for incremental hydropower programs.—Not more than 15 percent of any funds available under paragraph (1) shall be used to carry out programs described in subsection (g).

(3) Availability of funds.—Funds made available under paragraph (1) shall remain available until expended.

SEC. 263. ASSESSMENT OF RENEWABLE ENERGY RESOURCES.

(a) Resource Assessment.—Not later than 3 months after the date of enactment of this title, the Secretary of Energy shall review the available assessments of renewable energy resources available within the United States, including solar, wind, biomass, ocean, geothermal, and hydroelectric energy resources, and the extent of new assessments as necessary, taking into account changes in market conditions, available technologies, and other relevant factors.

(b) Contents of Reports.—Not later than one year after the date of enactment of this title, the Secretary of Energy shall publish a report on the assessment under subsection (a). The report shall contain—

(1) a detailed inventory describing the available amount and characteristics of the renewable energy resources, and

(2) such other information as the Secretary believes would be useful in developing such renewable energy resources, including descriptions of surrounding terrain, the availability of energy infrastructure, location of energy and water resources, and available estimates of the costs needed to develop each resource.

SEC. 264. RURAL CONSTRUCTION GRANTS.

(a) Requirement.—The President shall ensure that, of the total amount of electric energy the federal government consumes during any fiscal year:

(1) not less than 3 percent in fiscal years 2003 through 2004,

(2) not less than 5 percent in fiscal years 2005 through 2008,

(3) not less than 7.5 percent in fiscal year 2010 and each fiscal year thereafter—

shall be renewable energy. The President shall encourage the use of innovative purchasing practices, including aggregation and the use of renewable energy derivatives, by federal agencies.

(b) Definition.—For purposes of this section, the term ‘‘renewable energy’’ means electric energy generated from solar, wind, biomass, geothermal, fuel cells, or additional hydroelectric generation capacity achieved from increased efficiency or additions of new capacity at an existing hydroelectric dam.

(c) Tribal Power Generation.—To the maximum extent practicable, the President shall ensure that not less than one-tenth of the amount specified in subsection (a) shall be renewable energy that is generated by an Indian tribe. For purposes of this subsection, an Indian tribe means an Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in subsection (d) of Section 169 of the Alaska Native Claims Settlement Act (43 U.S.C. 161 et seq.), which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

SEC. 265. RURAL ELECTRIFICATION GRANTS.

(a) Requirement.—The President shall ensure that, of the total amount of electric energy the federal government consumes during any fiscal year:

(1) not less than 3 percent in fiscal years 2003 through 2004,

(2) not less than 5 percent in fiscal years 2005 through 2008,

(3) not less than 7.5 percent in fiscal year 2010 and each fiscal year thereafter—

shall be renewable energy. The President shall encourage the use of innovative purchasing practices, including aggregation and the use of renewable energy derivatives, by federal agencies.

(b) Preference.—For purposes of this section, the term ‘‘renewable energy’’ means electric energy generated from solar, wind, biomass, geothermal, fuel cells, or additional hydroelectric generation capacity achieved from increased efficiency or additions of new capacity at an existing hydroelectric dam.

(c) Definition.—For purposes of this section, the term ‘‘renewable energy’’ means electric energy generated from solar, wind, biomass, geothermal, fuel cells, or additional hydroelectric generation capacity achieved from increased efficiency or additions of new capacity at an existing hydroelectric dam.

(d) Program.—The President shall make grants based on a determination of need for purposes of increasing the amount of electric energy generated through the use of renewable energy resources, and available estimates of the costs needed to develop each resource.

(e) Use of Funds.—The President shall encourage the use of innovative purchasing practices, including aggregation and the use of renewable energy derivatives, by federal agencies.

(f) Limitation on Funds Used for Incremental Hydropower Programs.—Not more than 15 percent of any funds available under paragraph (1) shall be used to carry out programs described in subsection (g).

(g) Availability of Funds.—Funds made available under paragraph (1) shall remain available until expended.

SEC. 305. RENEWABLE PORTFOLIO STANDARD.

(a) Minimum Renewable Generation Requirement.—For each calendar year beginning with 2003, each retail electric supplier shall provide, to the extent practicable, the amount of renewable energy credits in an amount equal to the required annual percentage, specified in subsection (b), of the total electric energy sold by the retail electric supplier to electric consumers in the calendar year. The retail electric supplier shall make this submission before April 1 of the following calendar year.

(b) Required Annual Percentage.—

(1) For calendar years 2003 and 2004, the required annual percentage shall be determined by the Secretary in an amount less than the amount increased in percentage for the calendar year immediately preceding.

(2) For calendar year 2005 the required annual percentage shall be 2.5 percent of the retail electric supplier’s base amount; and for each calendar year from 2006 through 2020, the required annual percentage of the retail electric supplier’s base amount shall be .5 percent greater than the required annual percentage for the calendar year immediately preceding.

(c) Submission of Credits.—(1) A retail electric supplier may satisfy the requirements of this section by—

(A) renewable energy credits issued under subsection (a);

(B) renewable energy credits issued under subsection (a) in respect of electricity generated by the renewable energy supplier to the extent the amount of renewable energy supplied is about the amount of retail energy supplied;

(C) renewable energy credits borrowed from another entity; or

(D) renewable energy credits issued under subsection (a) that are purchased from another entity.

(2) A credit may be counted toward compliance with this section if—

(A) the retail electric supplier issues the credit to another entity, or

(B) the entity that issues the credit to the retail electric supplier.

(3) A credit may be counted toward compliance with this section if the credit is sold to another entity.

(d) Issuance of Credits.—(1) The Secretary shall establish, not later than one year after the date of enactment of this section, program to issue, monitor the sale or exchange of, and track renewable energy credits.

(2) Under the program, an entity that generates electric energy through the use of a renewable energy resource may apply to the Secretary for the issuance of renewable energy credits. The application shall include—

(A) the type of renewable energy resource used to produce the electricity;

(B) the location where the electric energy was generated;

(C) any other information the Secretary determines appropriate.

(3) (A) Except as provided in paragraphs (B) and (C), the Secretary shall issue to an entity one renewable energy credit for each kilowatt-hour of electric energy the entity generates in calendar year 2002 and any succeeding calendar year through the sixth calendar year following the year in which the entity began generating electric energy under this section.

(B) For incremental hydropower the credits shall be calculated based on a normalized capacity factor of the facilities of the entity and for each calendar year the capacity factor is not actual generation. The calculation of the credits for incremental hydropower shall not
be based on any operational changes at the hydroelectric facility not directly associated with the efficiency improvements or capacity additions.

(C) The Secretary shall issue two renewable energy credits for each kilowatt-hour of electric energy generated in calendar year 2002 and 2003 of a renewable energy resource at an eligible facility located on Indian land. For purposes of this paragraph, renewable energy generated through the use of two renewable energy resources with other fuels is eligible for two credits only if the biomass was grown on the land eligible under this paragraph.

(D) To be eligible for a renewable energy credit, the unit of electric energy generated through the use of a renewable energy resource may be used by any generator. If both a renewable energy resource and a non-renewable energy resource are used to generate the electric energy, the Secretary may issue credits based on the proportion of the renewable energy resource used. The Secretary shall identify renewable energy credits by type and date of generation.

(4) In order to receive a renewable energy credit, the recipient of a renewable energy credit must have calculated the theoretical amount of base amount that the plan will earn sufficient credits within the next 3 calendar years which, when taken into account, will enable the retail electric supplier to meet the requirements of subsection (a) for electric energy generated in calendar year 2003 and the calendar year involved; and

(2) upon the approval of the plan by the Secretary, the plan demonstrates will be earned within the next 3 calendar years to meet the requirements of subsection (a) for calendar year 2003 and the calendar year involved; and

(g) INFORMATION COLLECTION. The Secretary may collect the information necessary to verify and audit—

(1) the annual electric energy generation and renewable energy generation of any entity applying for renewable energy credits under this section,

(2) the validity of renewable energy credits submitted by a retail electric supplier to the Secretary, and

(3) the quantity of electricity sales of all retail electric suppliers during the applicable year.

(h) DEFINITIONS. For purposes of this section—

(1) The term ‘eligible facility’ means—

(A) a facility for the generation of electric energy from a renewable energy resource that is placed in service on or before January 1, 2002; or

(B) a repowering or cofiring increment that is placed in service on or after January 1, 2002 for a facility for the generation of electric energy from a renewable energy resource that was in service before January 1, 2002. An eligible facility does not have to be interconnected to the transmission or distribution system facilities of an electric utility. Such facilities must also be treated as the electric energy for the purposes of this section for the duration of the contract.

(e) INDIAN TRADING.—A renewable energy credit may be sold or exchanged by the entity to whom issued or by any other entity who acquires the credit. A renewable energy credit may be sold or exchanged by any Indian tribe. The price of such exchange is determined by the Secretary, and may be paid by the purchaser.

(5) When a generator sells electric energy generated through the use of a renewable energy resource to a retail electric supplier under a contract subject to section 210 of this Act, the retail electric supplier is treated as the electric energy for the purposes of this section for the duration of the contract.

(h) INFORMATION COLLECTION.—The Secretary may require the information necessary to verify and audit—

(1) the annual electric energy generation and renewable energy generation of any entity applying for renewable energy credits under this section,

(2) the validity of renewable energy credits submitted by a retail electric supplier to the Secretary, and

(3) the quantity of electricity sales of all retail electric suppliers during the applicable year.

(i) COST-SHARE DEMONSTRATION PROGRAM.—Within 12 months after the date of enactment of this section, the Secretary of the Interior, Agriculture, and Energy shall develop guidelines for a cost-share demonstration program for the development of wind and solar energy facilities on Federal land.

(b) DEFINITION OF FEDERAL LAND.—As used in this section, the term ‘Federal land’ means land owned by the United States that is subject to the operation of the mineral leasing laws; and is either—

(1) public land as defined in section 103(e) of the Federal Land Policy and Management Act of 1976 (42 U.S.C. 1702(e)), or

(2) a unit of the National Forest System as that term is used in section 11(a) of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1601a(a)).

(2) Upon the approval of the plan by the Secretary, the Secretary of Agriculture shall issue credits based on the proportion of the renewable energy resource or to cofire biomass that was grown on the land eligible under this subsection (a) for each calendar year in which the facilities would be compatible with the scenic, recreational, environmental, cultural, or historic values of the Federal land, and would not preclude a State from requiring additional renewable energy generation in that State.

(3) the term ‘incremental hydropower’ means net electric generation offset or increased generation of hydroelectricity that is placed in service after January 1, 2002 at a hydroelectric dam that was in service before January 1, 2002. When a generator sells electric energy generated in calendar year 2002 or 2003 at a facility for the generation of electric energy sold by the retail electric supplier to electric customers during the calendar year involved; and

(2) upon the approval of the plan by the Secretary, the plan demonstrates will be earned within the next 3 calendar years to meet the requirements of subsection (a) for calendar year 2003 and the calendar year involved; and

(g) INFORMATION COLLECTION. The Secretary may collect the information necessary to verify and audit—

(1) the annual electric energy generation and renewable energy generation of any entity applying for renewable energy credits under this section,

(2) the validity of renewable energy credits submitted by a retail electric supplier to the Secretary, and

(3) the quantity of electricity sales of all retail electric suppliers during the applicable year.

(h) DEFINITIONS. For purposes of this section—

(1) The term ‘eligible facility’ means—

(A) a facility for the generation of electric energy from a renewable energy resource that is placed in service on or before January 1, 2002; or

(B) a repowering or cofiring increment that is placed in service on or after January 1, 2002 for a facility for the generation of electric energy from a renewable energy resource that was in service before January 1, 2002. An eligible facility does not have to be interconnected to the transmission or distribution system facilities of an electric utility. Such facilities must also be treated as the electric energy for the purposes of this section for the duration of the contract.

(e) INDIAN TRADING.—A renewable energy credit may be sold or exchanged by the entity to whom issued or by any other entity who acquires the credit. A renewable energy credit may be sold or exchanged by any Indian tribe. The price of such exchange is determined by the Secretary, and may be paid by the purchaser.

(5) When a generator sells electric energy generated through the use of a renewable energy resource to a retail electric supplier under a contract subject to section 210 of this Act, the retail electric supplier is treated as the electric energy for the purposes of this section for the duration of the contract.

(h) INFORMATION COLLECTION.—The Secretary may require the information necessary to verify and audit—

(1) the annual electric energy generation and renewable energy generation of any entity applying for renewable energy credits under this section,

(2) the validity of renewable energy credits submitted by a retail electric supplier to the Secretary, and

(3) the quantity of electricity sales of all retail electric suppliers during the applicable year.

(i) COST-SHARE DEMONSTRATION PROGRAM.—Within 12 months after the date of enactment of this section, the Secretary of the Interior, Agriculture, and Energy shall develop guidelines for a cost-share demonstration program for the development of wind and solar energy facilities on Federal land.

(b) DEFINITION OF FEDERAL LAND.—As used in this section, the term ‘Federal land’ means land owned by the United States that is subject to the operation of the mineral leasing laws; and is either—

(1) public land as defined in section 103(e) of the Federal Land Policy and Management Act of 1976 (42 U.S.C. 1702(e)), or

(2) a unit of the National Forest System as that term is used in section 11(a) of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1601a(a)).

(2) Upon the approval of the plan by the Secretary, the Secretary of Agriculture shall issue credits based on the proportion of the renewable energy resource or to cofire biomass that was grown on the land eligible under this subsection (a) for each calendar year in which the facilities would be compatible with the scenic, recreational, environmental, cultural, or historic values of the Federal land, and would not preclude a State from requiring additional renewable energy generation in that State.

(3) the term ‘incremental hydropower’ means net electric generation offset or increased generation of hydroelectricity that is placed in service after January 1, 2002 at a hydroelectric dam that was in service before January 1, 2002. When a generator sells electric energy generated in calendar year 2002 or 2003 at a facility for the generation of electric energy sold by the retail electric supplier to electric customers during the calendar year involved; and

(2) upon the approval of the plan by the Secretary, the plan demonstrates will be earned within the next 3 calendar years to meet the requirements of subsection (a) for calendar year 2003 and the calendar year involved; and

(g) INFORMATION COLLECTION. The Secretary may collect the information necessary to verify and audit—

(1) the annual electric energy generation and renewable energy generation of any entity applying for renewable energy credits under this section,
section 202 of the Federal Land Policy and Management Act of 1976 (42 U.S.C. 1712); and the Secretary of Agriculture shall consider the development of wind and solar energy, as appropriate, in revisions of land and resource management plans under section 5 of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1604). Nothing in this subsection shall preclude the issuance of a right-of-way for the development of a wind or solar energy project prior to the revision of a land use plan by the appropriate land management agency.

(g) Report to Congress.—Within 24 months after the date of enactment of this section, the Secretary of the Interior shall develop procedures to coordinate with Congress recommendations on any statutory or regulatory changes the Secretary believes would assist in the development of renewable energy on Federal land. The report shall include—

(1) a five-year plan developed by the Secretary of the Interior, in cooperation with the Secretary of Agriculture, for encouraging the development of wind and solar energy on Federal land in an environmentally sound manner; and

(2) an analysis of—

(A) the best means of authorizing use of Federal land for the development of wind and solar energy, or whether such resources could be better developed through a leasing system, or other method;

(B) the desirability of grants, loans, tax credits or other provisions to promote wind and solar energy development on Federal land; and

(C) any problems, including environmental concerns, which the Secretary of Agriculture or the Secretary of Energy or the Secretary of Defense or the Secretary of Agriculture have encountered in managing wind or solar energy projects on Federal land, or believe are likely to arise in relation to the development of wind and solar energy on Federal land;

(3) a list, developed in consultation with the Secretaries of Energy and Defense, of lands under the jurisdiction of the Department of Energy and Defense that would be suitable for development for wind or solar energy, and recommended statutory and regulatory mechanisms for such development; and

(4) an analysis, developed in consultation with the Secretaries of Energy and Commerce, for development of wind, solar, and ocean energy on the Outer Continental Shelf, along with recommended statutory and regulatory mechanisms for such development.

TITLE III—HYDROELECTRIC RELICENSING

SEC. 301. ALTERNATIVE MANDATORY CONDITIONS AND FISHPATHS.

(a) ALTERNATIVE MANDATORY CONDITIONS.—Section 4 of the Federal Power Act (16 U.S.C. 797) is amended by adding at the end the following:

"(h) Whenever any person applies for a license for any project works within any reservation of the United States, and the Secretary of the department under whose supervision the proposed project falls determines that the application for such license to be necessary under the first proviso of subsection (e), the license applicant or any other party to the licensing proceeding may propose an alternative condition.

"(2) Notwithstanding the first proviso of subsection (e), the Secretary of the department under whose supervision the proposed project falls shall accept the proposed alternative condition referred to in paragraph (1), and the Commission shall include in the license such alternative condition, if the Secretary of the appropriate department determines, based on substantial evidence presented by the party proposing such alternative condition, that the alternative condition—

(A) provides no less protection for the reservation than provided by the condition deemed necessary by the Secretary; and

(B) will either—

(i) cost less to implement, or

(ii) result in improved operation of the project works for electricity production, as compared to the condition deemed necessary by the Secretary.

(3) Within 90 days after the enactment of this subsection, each Secretary concerned shall, by rule, establish a process to expeditiously resolve conflicts arising under this subsection.

(b) ALTERNATIVE FISHPATHS.—Section 18 of the Federal Power Act (16 U.S.C. 811) is amended by—

(1) inserting "(a)", before the first sentence; and

(2) adding at the end the following:

"(b)(1) Whenever the Commission shall require a licensee to construct, maintain, or operate a fishway prescribed by the Secretary of the Interior or the Secretary of Commerce under this section, the licensee or any other party to the proceeding may propose an alternative to such prescription to construct, maintain, or operate a fishway.

"(2) Notwithstanding subsection (a), the Secretary of the Interior or the Secretary of Commerce, as appropriate, shall accept and prescribe, and the Commission shall require, the proposed alternative referred to in paragraph (1), if the Secretary of the appropriate department determines, based on substantial evidence provided by the party proposing such alternative, that the alternative—

(A) will be no less effective than the fishway initially prescribed by the Secretary, and

(B) will either—

(i) cost less to implement, or

(ii) result in improved operation of the project works for electricity production, as compared to the fishway initially prescribed by the Secretary.

(3) Within 1 year after the enactment of this subsection, the Secretary of the Interior and the Secretary of Commerce shall each, by rule, establish a process to expeditiously resolve conflicts arising under this subsection.

SEC. 302. CHARGES FOR TRIBAL LANDS.

Section 10(e)(1) of the Federal Power Act (16 U.S.C. 803(e)(1)) is amended by inserting after the second proviso the following: "Provided further, that the Commission shall not issue a new or original license for projects involving tribal lands embraced within Indian reservations until annual charges required under this section have been fixed."
prescriptions under section 18 of the Federal Power Act (16 U.S.C. 811); (C) to the maximum extent possible, identification by the Commission staff in the draft environmental impact statement and review, issue additional regulations, if necessary, and conduct under the National Environmental Policy Act of all articles and license conditions the Commission is likely to include in the license; (D) coordination by the Commission and the environmental agencies of analysis under the National Environmental Policy Act for final licenses and articles and conditions recommended by Commission staff, and the final mandatory conditions and fishway prescriptions of the resource agencies; (E) procedures for ensuring coordination and sharing, to the maximum extent possible, of information, studies, data and analysis by the Commission and the resource agencies to reduce the need for duplicative studies and analysis by license applicants and other parties to the license proceeding; and (F) procedures for ensuring resolution at an early stage of the process of the scope and type of reasonable and necessary information, studies, data, and analysis to be provided by the license applicant.

(b) PROCEDURES OF THE COMMISSION.—Within 18 months after the date of enactment of this section, the Commission shall, after consultation with the interested federal agencies and states and after public comment and review, issue additional regulations governing the issuance of a license under section 15 of the Federal Power Act (16 U.S.C. 808). Such regulations shall—

(1) set a schedule for the Commission to issue a license application; (A) a tendering notice indicating that an application has been filed with the Commission; (B) advanced notice to resource agencies of the issuance of a license under section 15 of the Federal Power Act (16 U.S.C. 808); (C) a license decision after completion of the licensing process under part I of the Federal Power Act (16 U.S.C. 791 et seq.). Such data shall be published regularly, but no less frequently than every three years.

TITLE IV

COMPREHENSIVE INDIAN ENERGY PROGR. Title XXVI of the Energy Policy Act of 1992 (25 U.S.C. 3501–3506) is amended by adding after section 2606 the following:

SEC. 2607. COMPREHENSIVE INDIAN ENERGY PROGRAM.

(a) DEFINITIONS.—For purposes of this section—

(1) the term ‘Director’ means the Director of the Office of Indian Energy Policy and Programs established by section 227 of the Department of Energy Organization Act, and

(2) the term ‘Indian land’ means—

(A) any land within the limits of an Indian tribe’s reservation, pueblo, or rancheria; (B) any land not within the limits of an Indian reservation, pueblo, or rancheria whose title on the date of enactment of this section was held in trust by the United States for the benefit of an Indian tribe, (C) law or Indian Tribe subject to restrictions by the United States against alienation, or (D) a dependent Indian community; and (E) land conveyed to an Alaska Native Corporation under the Alaska Native Claims Settlement Act.

(b) INDIAN ENERGY EDUCATION PLANNING AND MAINTENANCE ASSISTANCE PROGRAM.—

(1) The Director shall establish programs within the Office of Indian Energy Policy and Programs to assist Indian tribes in meeting their energy education, research, and development, planning, and management needs.

(2) The Director may make grants, on a competitive basis, to assist Indian tribes in—

(A) renewable energy, energy efficiency, and conservation programs; and (B) studies and other activities supporting tribal acquisition of energy supplies, services, and facilities; (C) planning, constructing, developing, operating, maintaining, and ratifying tribal electrical generation, transmission, and distribution facilities; and (D) developing, constructing, and operating energy transmission facilities with transmission facilities owned and operated by a Federal power marketing agency or an electric utility that provides open access transmission service.

(3) The Director may develop, in consultation with Indian tribes, a formula for making grants under this section. The formula may take into account—

(A) the total number of acres of Indian land owned by an Indian tribe; (B) the total number of households on the Indian tribe’s Indian land; and (C) the total number of households on the Indian tribe’s Indian land that have no electricity service or are under-served; and (D) financial or other assets available to the Indian tribe from any source.

(4) In making a grant under paragraph (2), the Director shall give priority to an applicant—

(A) that has been denied a grant under paragraphs (5) and (6) of section 2606, (B) that is not served or is served inadequately by an electric utility, as that term is defined in section 3(b) of the Public Utilities Regulatory Policies Act of 1978 (16 U.S.C. 2602), (C) that has no other electric service available to it, or (D) that is served by a person, State agency, or any other non-federal entity that owns or operates a local distribution facility used for the sale of electric energy to an electric consumer.

(5) There are authorized to be appropriated to the Department of Energy such sums as may be necessary to carry out the provisions of this subsection.

(6) The Secretary is authorized to promulgate such regulations as the Secretary determines to be necessary to carry out the provisions of this subsection.

(c) LOAN GUARANTEE PROGRAM.—

(1) AUTHORITY.—The Secretary may guarantee not more than 90 percent of the unpaid principal and interest due on any loan made to any Indian tribe for energy development, including the planning, development, construction, and maintenance of electrical generation plants, and for open access delivery mechanisms for electricity produced on Indian land. A loan guaranteed under this subsection shall be made by—

(A) an Indian Tribe, or (B) any financial institution subject to the examination of the Secretary; and

(2) an Indian tribe, from funds of the Indian tribe, to another Indian tribe.

(d) GUARANTEES.—

Amounts appropriated to cover the cost of loan guarantees shall be available without fiscal year limitation to the Secretary to fulfill obligations arising under this subsection.

(3) AUTHORIZATION OF APPROPRIATIONS.—

(A) There are authorized to be appropriated to the Secretary such sums as may be necessary to carry the cost of loan guarantees, as defined by section 506(5) of the Federal Credit Reform Act of 1990 (2 U.S.C. 663(5)). (B) There are authorized to be appropriated to the Secretary such sums as may be necessary to carry the administrative expenses related to carrying out the loan guarantee program established by this subsection.

(4) LIMITATION ON AMOUNT.—The aggregate outstanding amount guaranteed by the Secretary of Energy at any one time under this subsection shall not exceed $2,000,000,000.

(5) REGULATIONS.—The Secretary is authorized to promulgate such regulations as the Secretary determines to be necessary to carry out the provisions of this subsection.
“(d) INDIAN ENERGY PREFERENCE.—(1) An agency or department of the United States Government may give, in the purchase of electricity, oil, gas, coal, or other energy products, in the production, marketing, and purchase of an energy and resource production enterprise, partnership, corporation, or other type of business organization majority or wholly owned and controlled by a tribal government.

“(2) In implementing this subsection, an agency or department shall pay no more than 10 percent of the prevailing market price for the energy product or by-product and shall obtain no less than existing market terms and conditions.

“(e) EFFECT ON OTHER LAWS.—This section does not—

“(1) limit the discretion vested in an Administrator of a Federal power marketing agency to market and allocate Federal power, or

“(2) alter Federal laws under which a Federal power marketing agency markets, allocates, or purchases power.

"SEC. 402. OFFICE OF INDIAN ENERGY POLICY AND PROGRAMS.

"Title II of the Department of Energy Organization Act is amended by adding at the end the following:

"OFFICE OF INDIAN ENERGY POLICY AND PROGRAMS—

"Sec. 217. (a) There is established within the Department an Office of Indian Energy Policy and Programs. This Office shall be headed by a Director, who shall be appointed by the Secretary and compensated at the rate equal to that of level IV of the Executive Schedule under section 5315 of Title 5, United States Code.

"(b) The Director shall provide, direct, foster, coordinate, and implement energy planning, and programs. This Office shall prepare and manage the overall strategy that sets forth the plans, programs, and delivery programs of the Department that—

"(1) promote tribal energy efficiency and utilization;

"(2) modernize and develop, for the benefit of Indian tribes, tribal energy and economic infrastructure related to natural resource development and electrification;

"(3) preserve and promote tribal sovereignty and self determination related to energy development and energy development

"(4) lower or stabilize energy costs; and

"(5) electrify tribal members’ homes and tribal lands.

"(c) The Director shall carry out the duties assigned the Secretary or the Director under title XXVI of the Energy Policy Act of 1992 (25 U.S.C. 3501 et seq.)."

"SEC. 403. CONFORMING AMENDMENTS.

"(a) Authorization of Appropriations.—Section 2603(c) of the Energy Policy Act of 1992 (25 U.S.C. 3503(c)) is amended to read as follows:

"(c) Authorization of Appropriations.—There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this section.

"(b) Authorization of Appropriations.—The table of contents of the Department of Energy Act is amended by inserting after the item relating to section 216 the following new item:

"(1) INDIAN TRIBE.—The term ‘‘Indian tribe’’ means any Indian tribe, band, nation, or other organized group or community, which is recognized as eligible for special programs and services provided for the Indians by the United States or disposed of land by the United States because of their status as Indians, except that such term does not include any Regional Corporation as defined in section 301 of the Alaska Native Claims Settlement Act (43 U.S.C. 1602(g)).

"(2) INTERESTED PARTY.—The term ‘‘interested party’’ means a person whose interests could be adversely affected by the decision of an Indian tribe to grant a lease or right-of-way pursuant to this section.

"(3) PETITION.—The term ‘‘petition’’ means a written request submitted to the Secretary for the review of an action (or inaction) of the Indian tribe that is claimed to be in violation of the approved tribal regulations;

"(4) RESERVATION.—The term ‘‘reservation’’ means—

"(A) with respect to a reservation in a State other than Oklahoma, all land that has been set aside or that has been acknowledged as having been set aside by the United States for the use of an Indian tribe, the exterior boundaries of which are more particularly described in a treaty, agreement, executive order, federal statute, secretarial order, or judicial determination;

"(B) with respect to a reservation in the State of Oklahoma, all land that is—

"(i) within the jurisdictional area of an Indian tribe, and

"(ii) within the boundaries of the last reservation of such tribe that was established by treaty, executive order, or secretarial order.

"(5) SECRETARY.—The term ‘‘Secretary’’ means the Secretary of the Interior.

"(6) TRIBAL LANDS.—The term ‘‘tribal lands’’ means any tribal trust lands or other lands owned by an Indian tribe that are within a reservation, or tribal trust lands located contiguous thereto.

"(7) Leases involving generation, transmission, distribution or energy processing facilities.—An Indian tribe may grant a lease of tribal land for electric generation, transmission, or distribution facilities, or facilities to process or refine renewable or nonrenewable energy resources developed on tribal lands, and such leases shall not require the approval of the Secretary if the lease or right-of-way is approved by the Secretary under this subsection and the term of the lease does not exceed 30 years.

"(c) Rights-of-Way for Electric Generation, Transmission, Distribution or Energy Processing Facilities.—An Indian tribe may grant a right-of-way over tribal lands for a pipeline or an electric transmission or distribution line without separate approval by the Secretary if—

"(1) the right-of-way is executed under and complies with tribal regulations approved by the Secretary and the term of the right-of-way does not exceed 30 years; and

"(2) the pipeline or electric transmission or distribution line serves—

"(A) an electric generation, transmission or distribution facility located on tribal land; or

"(B) a facility located on tribal land that processes or refines renewable or nonrenewable energy resources developed on tribal lands.

"(d) Renewals.—Leases or rights-of-way entered into under this subsection may be renewed at the discretion of the Indian tribe in accordance with the requirements of this section.

"(e) Tribal Regulation Requirements.—(1) The Secretary shall make the authority to approve or disapprove tribal regulations required under this subsection. The Sec-

"retary shall approve such tribal regulations if they are comprehensive in nature, including provisions that address—

"(A) securing necessary information from the lessee or right-of-way applicant;

"(B) term of the conveyance;

"(C) amendments and renewals;

"(D) consideration for the lease or right-of-

"way applicant;

"(E) technical or other relevant require-

"ments;

"(F) requirements for environmental review as set forth in paragraph (3);

"(G) requirements for complying with all applicable environmental laws; and

"(H) final approval authority.

"(2) No lease or right-of-way shall be valid unless authorized in compliance with the ap-

"proved tribal regulations.

"(3) An Indian tribe, as a condition of secur-

"ing Secretarial approval as contemplated in paragraph (1), shall establish an environ-

"mental review process that includes the following—

"(A) an identification and evaluation of all significant environmental impacts of the proposed action as compared to a no action alternative;

"(B) identification of proposed mitigation;

"(C) a process for environmental review that is informed of and has an opportunity to com-

"ment on the proposed action prior to tribal approval of the lease or right-of-way; and

"(D) sufficient administrative support and tech-

"nical assistance. The Secretary may carry out the envi-

"ronmental review process.

"(4) The Secretary shall review and approve or disapprove the regulations of the Indian tribe within 180 days of the submission of such regulations to the Secretary. Any disapproval of such regulations by the Sec-

"retary shall be by written document and made directly to the Indian tribe, docu-

"mentation of the payments sufficient to en-

"able the Secretary to discharge the trust re-

"sponsibility of the United States as appro-

"riate under existing law.

"(5) If the Indian tribe executes a lease or right-of-way pursuant to tribal regulations required under this subsection, the Indian tribe shall provide the Secretary with—

"(A) a copy of the lease or right-of-way doc-

"ument and all amendments and renewals thereto; and

"(B) in the case of regulations or a lease or right-of-way that pertains to the collection of fees, the Secretary may require the lessee to remit fees made directly to the Indian tribe, docu-

"mentation of the payments sufficient to en-

"able the Secretary to discharge the trust re-

"sponsibility of the United States as appro-

"riate under existing law.

"(6) The United States shall not be liable for losses sustained by any party to a lease exe-

"cuted pursuant to tribal regulations under this subsection, including the Indian tribe.

"(7)(A) An interested party may, after ex-

"haustion of tribal remedies, submit, in a timely manner, a petition to the Secretary.

"(B) The Secretary shall dismiss such petition if—

"(i) the petition has not been timely served on the Indian tribe; or

"(ii) the petition is insubstantial or does not comply with the standards established by the Indian tribe.

"(C) In a case in which the Secretary has dismissed the petition, the Secretary shall not be liable for losses sustained by any party to a lease executed pursuant to tribal regulations under this subsection, including the Indian tribe.

"(7)(A) An interested party may, after ex-

"haustion of tribal remedies, submit, in a timely manner, a petition to the Secretary. The Secretary shall dismiss such petition if—

"(i) the petition has not been timely served on the Indian tribe; or

"(ii) the petition is insubstantial or does not comply with the standards established by the Indian tribe.

"(C) In a case in which the Secretary has dismissed the petition, the Secretary shall not be liable for losses sustained by any party to a lease executed pursuant to tribal regulations under this subsection, including the Indian tribe.

"PAR. 1453—March 5, 2002

"CONGRESSIONAL RECORD — SENATE

"S1453

"(7)(A) An interested party may, after ex-

"haustion of tribal remedies, submit, in a timely manner, a petition to the Secretary. The Secretary shall dismiss such petition if—

"(i) the petition has not been timely served on the Indian tribe; or

"(ii) the petition is insubstantial or does not comply with the standards established by the Indian tribe.

"(C) In a case in which the Secretary has dismissed the petition, the Secretary shall not be liable for losses sustained by any party to a lease executed pursuant to tribal regulations under this subsection, including the Indian tribe.

"(7)(A) An interested party may, after ex-

"haustion of tribal remedies, submit, in a timely manner, a petition to the Secretary. The Secretary shall dismiss such petition if—

"(i) the petition has not been timely served on the Indian tribe; or

"(ii) the petition is insubstantial or does not comply with the standards established by the Indian tribe.

"(C) In a case in which the Secretary has dismissed the petition, the Secretary shall not be liable for losses sustained by any party to a lease executed pursuant to tribal regulations under this subsection, including the Indian tribe.

"(7)(A) An interested party may, after ex-

"haustion of tribal remedies, submit, in a timely manner, a petition to the Secretary. The Secretary shall dismiss such petition if—

"(i) the petition has not been timely served on the Indian tribe; or

"(ii) the petition is insubstantial or does not comply with the standards established by the Indian tribe.

"(C) In a case in which the Secretary has dismissed the petition, the Secretary shall not be liable for losses sustained by any party to a lease executed pursuant to tribal regulations under this subsection, including the Indian tribe.
(ii) provide the Indian tribe with a written notice of the alleged violation together with such written determination; and

(iii) prior to the exercise of any remedy or the reopening, an approval of the regulations involved and reassignment of the lease or right-of-way approval responsibility, provide the Indian tribe with a hearing and a reasonable opportunity to cure the alleged violation.

(C) The tribe shall retain all rights to appeal as provided by regulations promulgated by the Secretary of Energy, and once every 2 years thereafter, the Secretary of Energy shall transmit to the Committees on Energy and Natural Resources of the House of Representatives and the Committees on Energy and Natural Resources of the Senate a report containing information on how the benefit of that power is delivered of electric power. The costs of such technical assistance shall be funded—

(A) by the Administrator using non-reimbursable funds appropriated for this purpose, or

(B) by the Indian tribe.

(2) PRIORITY FOR ASSISTANCE. The Secretary shall prioritize the provision of discretionary assistance to Indian tribes under paragraph (1), each Administrator shall give priority in funding to Indian tribes that have limited financial capability to conduct such studies.

(3) POWER ALLOCATION STUDY. (1) Not later than 2 years after the date of enactment of this Act, the Secretary of Energy shall submit to the Committees on Energy and Commerce and Resources of the House of Representatives and the Committees on Energy and Natural Resources and Indian Affairs of the Senate a report on Indian tribes’ utilization of federal power allocations of the Western Area Power Administration, or power sold by the Southwestern Power Administration and the Bonneville Power Administration to or for the benefit of Indian tribes in their service areas. The report shall identify—

(A) the amount of power allocated to tribes by the Western Area Power Administration, and how the benefit of that power is utilized by the tribes;

(B) the amount of power sold to tribes by other Power Marketing Administrations; and

(C) existing barriers that impede tribal access to and utilization of federal power, and the benefit to tribes, and Indian tribes in developing the report provided in this section.

(2) The Power Marketing Administrations shall consult with Indian tribes on a government-to-government basis in developing the report provided in this section.

(4) AUTHORIZATION OF APPROPRIATIONS. There are authorized to be appropriated $500,000 to carry out this section, which shall remain available until expended. All costs incurred by the Secretary of Energy associated with performing the tasks required under this section shall be non-reimbursable.

TITLE V—NUCLEAR POWER

Subtitle A—Price-Anderson Act

SEC. 501. SHORT TITLE. This subtitle may be cited as the “Price-Anderson Amendments Act of 2002.”

SEC. 502. EXTENSION OF LIMIT OF EN- EGY INDEMNIFICATION AUTHORITY.

SEC. 503. DEPARTMENT OF ENERGY LIABILITY LIMIT

(a) INDEMNIFICATION OF DEPARTMENT OF EN- EGY CONTRACTORS.—Section 170 d. of the Atomic Energy Act of 1954 (42 U.S.C. 2121(d)) is amended by striking “(A),” and inserting the following:—

(2) In agreements of indemnification entered into under paragraph (1), the Secretary may—

(A) require the contractor to provide and maintain financial protection of such a
type and in such amounts as the Secretary shall determine to be appropriate to cover public liability arising out of or in connection with the contractual activity, and "(2) For purposes of this section, the term "not-for-profit" means that no part of the net earnings of the contractor, subcontractor, or supplier inures, or may lawfully inure, to the benefit of any natural person or for-profit financial protection required, in the aggregate, for all persons indemnified in connection with such contract and for each nuclear incident, including such legal costs of the contractor as are approved by the Secretary.".

(b) CONTRACT AMENDMENTS.—Section 170 d. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)) is amended by striking paragraph (3) and inserting the following:

"(3) All agreements of indemnification under which the Department of Energy (or its predecessor agencies) may be required to indemnify any person under this section shall be deemed to be amended, on the date of the enactment of the Price-Anderson Amendments Act of 2002, to reflect the amount of indemnity for public liability and any applicable financial protection required of the contractor under this subsection.

(c) LIABILITY LIMIT.—Section 170 e.(1)(B) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(e)(1)(B)) is amended by striking "and" and inserting "or".

SEC. 504. INCIDENTS OUTSIDE THE UNITED STATES.

(a) AMOUNT OF INDEMNIFICATION.—Section 170 d.(5) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)(5)) is amended by striking "$100,000,000" and inserting "$500,000,000".

(b) LIABILITY LIMIT.—Section 170 e.(4) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(e)(4)) is amended by striking "$100,000,000" and inserting "$500,000,000".

SEC. 505. REPORTS.

Section 170 p. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(p)) is amended by striking "August 1, 1986" and inserting "August 1, 2008".

SEC. 506. INFLATION ADJUSTMENT.

Section 170 t. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(t)) is amended—

(1) by renumbering paragraph (2) as paragraph (3); and

(2) by adding after paragraph (1) the following:

"(2) The Secretary shall adjust the amount of indemnification provided under an agreement of indemnification under subsection d. not less than once during each 5-year period following the 5-year period in accordance with the aggregate percentage change in the Consumer Price Index since—

"(A) such date of enactment, in the case of the first adjustment under this paragraph; or

"(B) the previous adjustment under this paragraph."

SEC. 507. CIVIL PENALTIES.

(a) CRIMINAL OR AUTOMATIC REMISSION.—Section 234A b.(2) of the Atomic Energy of 1954 (42 U.S.C. 2232a(b)(2)) is amended by striking the last sentence.

(b) LIABILITY FOR NOT-FOR-PROFIT INSTITUTIONS.—Subsection d. of section 234A of the Atomic Energy Act of 1954 (42 U.S.C. 2232a(d)) is amended to read as follows:

"(d) Funding subsection a., a civil penalty for a violation under subsection a. shall not exceed the amount of the fee paid under the contract under which such violation occurred, for any not-for-profit contractor, subcontractor, or supplier.

"(2) For purposes of this section, the term 'not-for-profit' means that no part of the net earnings of the contractor, subcontractor, or supplier inures, or may lawfully inure, to the benefit of any natural person or for-profit financial protection required, in the aggregate, for all persons indemnified in connection with such contract and for each nuclear incident, including such legal costs of the contractor as are approved by the Secretary.'.

(c) EFFECTIVE DATE.—The amendments made by this section shall not apply to any violation of the Atomic Energy Act of 1954 occurring under a contract entered into before the date of enactment of this section.

SEC. 508. EFFECTIVE DATE.

The amendments made by sections 503(a) and 504 shall not apply to any nuclear incident that occurs before the date of the enactment of this subtitle.

Subtitle B—Miscellaneous Provisions

SEC. 511. URANIUM.

(a) INVENTORY SALES.—Section 3112(d) of the USEC Privatization Act (42 U.S.C. 2297h-10(d)) is amended to read as follows:

"(d) Inventories.—In addition to the transfers authorized under subsections (b), (c), and (e), the Secretary may, from time to time, sell or transfer uranium (including natural and depleted isotopes, natural uranium hexafluoride, enriched uranium, and depleted uranium) from the Department of Energy's stockpile.

"(2) Except as provided in subsections (b), (c), and (e), the Secretary may deliver uranium in any form for consumption by users in any year in excess of the following amounts:

\[
\text{Annual Maximum Deliveries to End Users} \quad \text{Million Ibs. UO}_2\text{ equivalent}
\]

- Year: 2003 through 2009, $365,000,000
- 2010, $380,000,000
- 2011, $390,000,000
- 2012, $390,000,000
- 2013 and each year thereafter, $400,000,000.

(b) EXEMPT TRANSFERS AND SALES.—Section 3112(e) of the USEC Privatization Act (42 U.S.C. 2297h-10(e)) is amended to read as follows:

"(e) EXEMPT SALES OR TRANSFERS.—Notwithstanding subsection (d)(2), the Secretary may transfer or sell uranium—

"(1) to the Tennessee Valley Authority for use pursuant to the Department of Energy's highly enriched uranium or tritium program, to the extent that the President determines, in a record of decision, that the program can be carried out at existing operating facilities.

DIVISION—DOMESTIC OIL AND GAS PRODUCTION AND TRANSPORTATION TREE VI—OIL AND GAS PRODUCTION

SEC. 601. PERMANENT AUTHORITY TO OPERATE THE STRATEGIC PETROLEUM RESERVE.

(a) AMENDMENT TO TITLE I OF THE ENERGY POLICY AND CONSERVATION ACT.—Title I of the Energy Policy and Conservation Act (42 U.S.C. 6211 et seq.) is amended—

(1) by striking section 166 (42 U.S.C. 6246) and inserting—

"SEC. 166. There are authorized to be appropriated to the Secretary such sums as may be necessary to be paid in that fiscal year may be paid in subsequent fiscal years.

(2) by inserting after "inflation" the following:

"(3) by adding at the end the following:

"(b) AUTHORIZATION OF APPROPRIATIONS.—Section 166(a) of the Energy Policy and Conservation Act of 1992 (42 U.S.C. 2297g-1(a)) is amended—

(1) by striking "$488,333,333" and inserting "$851,000,000";

(2) by striking "inflation" and inserting "inflation" the following:

"(b) AUTHORIZATION OF APPROPRIATIONS.—

SEC. 602. FEDERAL OFFSHORE LEASING PROGRAM FOR OIL AND GAS.

(a) TIMELY ACTION ON LEASES AND PERMITS.—To ensure timely action on leases and permits, the Minerals Management Service, the Bureau of Ocean Energy Management, Regulation, and Enforcement, and the Bureau of Safety and Environmental Enforcement, shall not delay or unreasonably delay the review of applications for federal leases and permits to drill on lands otherwise available for leasing, the Secretary of the Interior shall—
SEC. 605. ORPHANED AND ABANDONED OIL AND GAS WELL PROGRAM.

(a) ESTABLISHMENT.—(1) The Secretary of the Interior, in cooperation with the Secretary of Agriculture and the Interstate Oil and Gas Compact Commission, shall work cooperatively with the states, through the Interstate Oil and Gas Compact Commission, to assist the states in quantifying and mitigating environmental risks of orphaned and abandoned wells on state and private lands.

(b) PROGRAM ELEMENTS.—The program shall include—

(1) mechanisms to facilitate identification of responsible parties wherever possible; (2) criteria for ranking critical sites based on factors such as: potential environmental harm and public visibility; and (3) information and training programs on best practices for remediation of different types of sites.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary of Energy for the activities under this section $5,000,000 for each of fiscal years 2003 through 2005 to carry out the provisions of this section.

SEC. 606. OFFSHORE DEVELOPMENT.

Section 5 of the Outer Continental Shelf Lands Act of 1953 (43 U.S.C. 1334) is amended by adding at the end the following—

‘‘(k) SUBSURFACE EXPLORATION FOR SUBSALT EXPLOITATION.—Notwithstanding any other provision of law or regulation, the Secretary may grant a request for a suspension of operations under any lease to allow the lessee to reprocess or reinterpret geologic or geophysical data beneath allochthonous salt sheets, when in the Secretary’s judgment such suspension is necessary to prevent waste caused by the drilling of unnecessary wells, and to maximize ultimate recovery of hydrocarbon resources under such lease. Such suspension shall be limited to the minimum period of time that the Secretary determines is necessary to achieve the objectives of this subsection.’’

SEC. 607. COALBED METHANE STUDY.

(a) STUDY.—The National Academy of Sciences shall conduct a study on the effects of coalbed methane production on surface and water resources and other land use priorities, and public health and safety.

(b) DATA ANALYSIS.—The study shall analyze available hydrogeologic and water quality data, along with other pertinent environmental or economic scenarios, to determine—

(1) adverse effects associated with surface or subsurface disposal of waters produced during extraction of coalbed methane; (2) dependencies of aquifers or drinking water sources associated with production of coalbed methane; (3) any other significant adverse impacts to surface or water resources associated with production of coalbed methane; and (4) production techniques or other factors that may mitigate adverse impacts from coalbed methane development.

(c) RECOMMENDATIONS.—The study shall analyze existing Federal and State laws and regulations, and make recommendations as to changes, if any, to Federal law necessary to address adverse impacts to surface or water resources attributable to coalbed methane development.

(d) COMPLETION OF STUDY.—The National Academy of Sciences shall submit the study to the Secretary of the Interior within 18 months after the date of enactment of this Act, and study shall be available to the public at the same time.

(e) REPORT TO CONGRESS.—The Secretary of the Interior shall report to Congress within 6 months of the receipt of the study on—

(1) the findings and recommendations of the study;

(2) the Secretary’s agreement or disagreement with each of its findings and recommendations; and

(3) any recommended changes in funding to address the effects of coalbed methane production on surface and water resources.

SEC. 608. FISCAL POLICIES TO MAXIMIZE RECOVERY OF DOMESTIC OIL AND GAS RESOURCES.

(a) EVALUATION.—The Secretary of Energy, in coordination with the Secretaries of the Interior, Commerce, and Agriculture, Indian tribes and the Interstate Oil and Gas Compact Commission, shall evaluate the impact of existing Federal and State tax and royalty policies on the development of domestic oil and gas resources and on revenues to Federal, State, local and tribal governments.

(b) REPORT.—The evaluation under subsection (a) shall—

(1) analyze the impact of fiscal policies on oil and natural gas exploration, development drilling, and production under different price scenarios, including the impact of the individual and corporate Alternative Minimum Tax, state and local production taxes and fixed royalty rates during low price periods; (2) assess the effect of existing federal and state fiscal policies on investment under different geological and developmental circumstances, including those needed to deepwater environments, subsalt formations, and deep and deviated wells, coalbed methane and other unconventional oil and gas formations.

(3) assess the extent to which federal and state fiscal policies negatively impact the ultimate recovery of resources from existing fields and smaller accumulations in offshore waters, especially in water depths less than 800 meters, of the Gulf of Mexico; (4) compare existing federal and state policies with tax and royalty regimes in other countries with particular emphasis on similar geological, developmental and infrastructural conditions; and

(5) evaluate how alternative tax and royalty policies, including counter-cyclical measures, could increase recovery of domestic oil and natural gas resources and revenues to Federal, State, local and tribal governments.

(c) RECOMMENDATIONS.—Based upon the findings of the evaluation under subsection (a), a report describing the findings and recommendations for policy changes shall be provided to the Congress. The Congress, the Governors of the member states of the Interstate Oil and Gas Compact Commission, and Indian tribes having an oil and gas lease approved by the Secretary of the Interior shall ensure that the public interest in receiving the economic benefits of tax and royalty revenues is balanced with the broader national security and economic interests in maximizing recovery of domestic resources. The report should include recommendations regarding actions to—

(1) ensure stable development drilling during periods of low oil and/or natural gas prices to maintain reserve replacement and deliverability;

(2) minimize the negative impact of a volatile investment climate on the oil and gas service industry and domestic oil and gas exploration and production;

(3) ensure a consistent level of domestic activity to encourage the education and retention of a technical workforce; and

(4) maintain production capability during periods of low oil and/or natural gas prices.

(d) ROYALTY GUIDELINES.—The Secretary shall establish guidelines for private resource holders to the appropriate level of royalties given the development cost, and the national interest in maximizing recovery of oil and gas resources.
(e) REPORT.—The study under subsection (a) shall be completed not later than 18 months after the date of enactment of this section. The report and recommendations required by the Energy Policy Act shall be transmitted to the President, the Congress, Indian tribes, and the Governors of the member States of the Interstate Oil and Gas Compact Commission.

SEC. 706. FEDERAL COORDINATOR.

(a) ESTABLISHMENT.—There is established as an independent establishment in the executive branch, the Office of the Federal Coordinator for Alaska Natural Gas Transportation Projects.

(b) THE FEDERAL COORDINATOR.—The Office shall be headed by a Federal Coordinator for Alaska Natural Gas Transportation Projects, who shall—

(1) be appointed by the President, by and with the advice of the Senate;

(2) hold office at the pleasure of the President;

(3) be compensated at the rate prescribed for level III of the Executive Schedule (5 U.S.C. 5339).

(c) DUTIES.—The Federal Coordinator shall be responsible for—

(1) coordinating the expeditious discharge of applications by Federal agencies with respect to an Alaska natural gas transportation project; and

(2) ensuring the compliance of Federal agencies with the provisions of this subtitle.

SEC. 707. JUDICIAL REVIEW.

(a) EXCLUSIVE JURISDICTION.—The United States Court of Appeals for the District of Columbia Circuit shall have exclusive jurisdiction to determine—

(1) the validity of any final order or action (including a failure to act) of the Commissioner under this subtitle;

(2) the constitutionality of any provision of this subtitle, or any decision made or action taken thereunder; or

(3) the adequacy of any environmental impact statement prepared under the National Environmental Policy Act of 1969 with respect to any action under this subtitle.

(b) JUDICIAL REVIEW FOR LOAN GUARANTEES.—Claims arising under this subtitle may be brought not later than 60 days after the date of the decision or action giving rise to the claim.

SEC. 708. LOAN GUARANTEE.

(a) AUTHORITY.—The Secretary of Energy may guarantee not more than 80 percent of the principal of any loan made to the holder of a certificate of public convenience and necessity issued under section 704(b) of this Act or section 9 of the Alaska Natural Gas Transportation Act of 1976 (15 U.S.C. 719g) for the purpose of constructing an Alaska natural gas transportation project.

(b) CONDITIONS.—

(1) The Secretary of Energy may not guarantee a loan under this section unless the guaranteeee has filed an application for a certificate of public convenience and necessity under section 704(b) of this Act or for an amended certificate under section 9 of the Alaska Natural Gas Transportation Act of 1976 (15 U.S.C. 719g) with the Commission not later than 6 months after the date of enactment of this Act.

(2) A loan guaranteed under this section shall be made by a financial institution under such terms, conditions, and other features as shall be determined by the Secretary.

(c) LIMITATION ON AMOUNT.—Commitments to guarantee loans may be made by the Secretary of Energy only to the extent that the Commission for good cause finds that additional time is needed.
total loan principal, any part of which is guaranteed, will not exceed $10,000,000,000.

(d) REGULATIONS.—The Secretary of Energy may issue regulations to carry out the provisions of this section.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary such sums as may be necessary to carry out this title, as determined by the Secretary, subject to the availability of appropriations, as provided in section 704 of the Alaska Natural Gas Transportation Act of 1976 and after the enactment of this title, the Secretary shall be responsible for ensuring that the projects are completed within 6 months after the expiration of the Secretary’s authority to guaranty a loan under section 708.

SEC. 710. SAVINGS CLAUSE.

SEC. 711. COMMISSION OF AUTHORITY TO AMEND TERMS AND CONDITIONS TO MEET CURRENT PROJECT REQUIREMENTS.

Any Federal officer or agency responsible for granting or issuing any certificate, permit, right-of-way, lease, or other authorization issued under section 9 of the Alaska Natural Gas Transportation Act of 1976 (15 U.S.C. 719g) may add to, amend, or abrogate any term or condition included in such certificate, permit, right-of-way, lease, or other authorization to meet current project requirements (including the physical design, facilities, and tariff specifications), to the extent such action does not compel a change in the basic design of the route or in the Alaska Natural Gas Transportation System as designed and described in section 2 of the Presidential Decision of May 12, 1977 (15 U.S.C. 719g) or the Secretary otherwise prevents or impairs in any significant respect the expeditious construction and initial operation of such transportation system.

SEC. 712. DEFINITIONS.

For purposes of this subtitle:

(1) The term “Alaska natural gas” has the meaning given such term by section 4(1) of the Alaska Natural Gas Transportation Act of 1976 (15 U.S.C. 719(1)).

(2) The term “Alaska natural gas transportation project” means any other natural gas pipeline system that carries Alaska natural gas from a point within the border of Alaska and Canada (including related facilities subject to the jurisdiction of the Commission) that is authorized under either:

(A) the Alaska Natural Gas Transportation Act of 1976 (15 U.S.C. 719-719o); or

(B) section 709 of this Act.

(3) The term “Alaska Natural Gas Transportation System” means the Alaska natural gas transportation project authorized by the Act of May 12, 1977, and any proposals for legislation to implement or amend such proposals, as described in section 2 of the President’s Decision.

(5) The term “natural gas company” means any person engaged in the transportation of natural gas in interstate commerce or the sale in interstate commerce of such gas for resale; and

(6) The term “President’s Decision” means the Decision and Report on Construction of the Alaska Natural Gas Transportation System project issued by the President on September 22, 1977 pursuant to section 7 of the Alaska Natural Gas Transportation Act of 1976 (15 U.S.C. 719c) and approved by Public Law 95-158.

SEC. 713. SENSE OF THE SENATE.

It is the sense of the Senate that an Alaska natural gas transportation project will provide significant economic benefits to the United States and Canada. In order to maximize those benefits, the Senate urges the sponsors of the pipeline project to make every effort to use steel that is manufactured or produced in North America and to negotiate a joint labor agreement to expedite construction, after consultation with the Advisory Council.

Subtitle B—Operating Pipelines

SEC. 721. APPLICATION OF HISTORIC PRESERVATION ACT TO OPERATING PIPELINES.

Section 7 of the Natural Gas Act (15 U.S.C. 717f) is amended by adding at the end the following:

“(d) Notwithstanding the National Historic Preservation Act (16 U.S.C. 470 et seq.), a transportation facility shall not be eligible for inclusion on the National Register of Historic Places unless—

(A) the Secretary of Energy, upon receipt of a request submitted by the sponsor of a pipeline project to expedite construction, has made available to the Secretary a commitment from the owner of the facility that the pipeline project will be eligible unless the owner of the facility otherwise authorizes the Secretary to include the transportation facility on the Register of Historic Places; or

(B) the owner of the facility has given written consent to such eligibility.”.

SEC. 722. ENVIRONMENTAL REVIEW AND PERMITTING OF NATURAL GAS PIPELINE PROJECTS.

(a) INTERAGENCY REVIEW.—The Chairman of the Council on Environmental Quality, in coordination with the Federal Energy Regulatory Commission, shall establish an interagency task force to develop an interagency memorandum of understanding to expedite the environmental review and permitting of natural gas pipeline projects.

(b) MEMBERSHIP OF INTERAGENCY TASK FORCE.—The task force shall consist of—

(1) the Chairman of the Council on Environmental Quality, who shall serve as the chairman of the interagency task force,

(2) the Chairman of the Federal Energy Regulatory Commission,

(3) the Director of the Bureau of Land Management,

(4) the Director of the U.S. Fish and Wildlife Service,

(5) the Commanding General, U.S. Army Corps of Engineers,

(6) the Chief of the Forest Service, and

(7) the Administrator of the Environmental Protection Agency.

SEC. 709. STUDY OF ALTERNATIVE MEANS OF TRANSPORTATION OF NATURAL GAS.

(a) REQUIREMENT OF STUDY.—If no application is filed with the Secretary of the Treasury and the Federal Energy Regulatory Commission for the issuance of a certificate of public convenience and necessity for the Alaska Natural Gas Transportation Act of 1976 (15 U.S.C. 719-719o) project within 6 months after the expiration of the Federal Energy Regulatory Commission’s authority to conduct a study under subsection (a) of section 709 of this Act, the Chairman of this Committee shall establish an interagency task force to carry out the provisions of this section.

(b) SCOPE OF STUDY.—The study shall consider the feasibility of establishing a government corporation to construct an Alaska natural gas transportation project, and alternative approaches to the construction and operation of the project.

(c) CONSULTATION.—In conducting the study, the Secretary shall consult with the Secretary of the Treasury and the Secretary of Energy (acting through the Commanding General of the Corps of Engineers) and any other appropriate Federal agencies.

(d) REPORT.—If the Secretary of Energy is required to conduct a study under subsection (a), he shall submit a report containing the results of the study, his recommendations, and any proposals for legislation to implement his recommendations to the Congress within 6 months after the expiration of the Secretary’s authority to guarantee a loan under section 708.

SEC. 713. SENSE OF THE SENATE.

It is the sense of the Senate that an Alaska natural gas transportation project will provide significant economic benefits to the United States and Canada. In order to maximize those benefits, the Senate urges the sponsors of the pipeline project to make every effort to use steel that is manufactured or produced in North America and to negotiate a joint labor agreement to expedite construction, after consultation with the Advisory Council.

Subtitle A—CAFE Standards and Related Matters

SEC. 801. AVERAGE FUEL ECONOMY STANDARDS FOR PASSENGER AUTOMOBILES AND LIGHT TRUCKS.

(a) INCREASED STANDARDS.—Section 20902 of title 49, United States Code, is amended—

(1) by striking “NON-PASSENGER AUTOMOBILES.”—” in subsection (a) and inserting “PRESCRIPTION OF STANDARDS BY REGULATION.”—”;

(2) by striking “(except passenger automobiles)” in subsection (a) and inserting “(except passenger automobiles and light trucks)”;

and

(3) by striking subsection (b) and inserting the following:

(2) STANDARDS FOR PASSENGER AUTOMOBILES AND LIGHT TRUCKS.—

(1) IN GENERAL.—The Secretary of Transportation, after consultation with the Administrator of the Environmental Protection Agency, shall prescribe average fuel economy standards for passenger automobiles and light trucks manufactured by a manufacturer in each model year beginning with model year 2007 in order to achieve a combined average fuel economy standard for passenger automobiles and light trucks for model year 2015 of at least 35 miles per gallon.

(2) ANNUAL PROGRESS TOWARD STANDARDS REQUIRED.—In prescribing average fuel economy standards under paragraph (1), the Secretary shall prescribe appropriate annual fuel economy standard increases for passenger automobiles and light trucks manufactured by a manufacturer in each model year beginning with model year 2007 and ending with model year 2015.

(3) REQUIRE THAT EACH MANUFACTURER ACHIEVE—

(A) a fuel economy standard for passenger automobiles manufactured by that manufacturer of at least 33.3 miles per gallon no later than model year 2012; and

(B) a fuel economy standard for light trucks manufactured by that manufacturer of at least 26.3 miles per gallon no later than model year 2016.

(4) DEFAULT STANDARDS.

(A) IN GENERAL.—If any manufacturer fails to achieve the fuel economy standards required by paragraph (3), the average fuel economy standard for passenger automobiles and light trucks manufactured by a manufacturer of at least 32.2 miles per gallon no later than model year 2012; and

(B) if a fuel economy standard for light trucks manufactured by that manufacturer of at least 26.5 miles per gallon no later than model year 2016.

(5) DEADLINE FOR REGULATIONS.—The Secretary shall promulgate the regulations required by paragraphs (1) and (2) in final form no later than 18 months after the date of enactment of the Energy Policy Act of 2002.

(6) DEFAULT STANDARDS.—If the Secretary fails to meet the requirements of paragraph (3), the average fuel economy standard for passenger automobiles and light trucks manufactured by a manufacturer in each model year shall be the average fuel economy standard set forth in the following tables:

<table>
<thead>
<tr>
<th>Year</th>
<th>Fuel Economy Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>2007</td>
<td>28.8 miles per gallon</td>
</tr>
<tr>
<td>2008</td>
<td>30.8 miles per gallon</td>
</tr>
<tr>
<td>2009</td>
<td>31.8 miles per gallon</td>
</tr>
<tr>
<td>2010</td>
<td>32.8 miles per gallon</td>
</tr>
<tr>
<td>2011</td>
<td>33.8 miles per gallon</td>

<tr>
<td>2015</td>
<td>37.8 miles per gallon</td>
</tr>
</tbody>
</table>
(For model year 2007 — The average fuel economy standard for passenger automobiles is 28 miles per gallon; for light trucks manufactured by a manufacturer; or (B) a combined average fuel economy standard for passenger automobiles and light trucks manufactured by a manufacturer).

(3) not later than 1 year after the date of the enactment of this Act; and

(4) by striking (the standard for passenger automobiles and light trucks manufactured by a manufacturer).

(5) by striking “the standard” in subsection (c)(1) and inserting “a standard”;

(6) by striking the last and last sentences of subsection (c)(2); and

(7) by striking “and submit the amendment to Congress when required under subsection (c)(2) of this section” in subsection (c).

(b) DEFINITION OF LIGHT TRUCKS.—

(1) IN GENERAL.—Section 32901(a) of title 49, United States Code, is amended by adding at the end of the section the following:

“(17) ‘light truck’ means an automobile that the Secretary decides by regulation—

(A) is not a passenger automobile; and

(B) is rated at not more than 10,000 pounds gross vehicle weight; and

“(C) the Administrator differs from the fuel economy changes during the life of passenger automobiles and light trucks during actual on-road performance, as determined under that paragraph; and

“(D) a statement of the percentage difference, if any, between actual on-road fuel economy and fuel economy measured by test procedures of the Environmental Protection Agency; and

“(E) a comparison between fuel economy measured, for each model in each year, and the percentage difference identified under subparagraph (B) by using uniform test methods that reflect actual on-the-road fuel economy consumers experience under normal driving conditions to no greater than 5 percent.”

SEC. 801. ENSURING SAFETY OF PASSENGER AUTOMOBILES AND LIGHT TRUCKS.

(a) IN GENERAL.—The Secretary of Transportation shall exercise such authority under Federal law as the Secretary may have to ensure that—

(1) passenger automobiles and light trucks (as those terms are defined under section 32901 of title 49, United States Code) are safe;

(2) progress is made in improving the overall safety of passenger automobiles and light trucks; and

(3) progress is made in maximizing United States employment.

(b) IMPROVED CRASHWORTHINESS.—

(1) IN GENERAL.—

The chapter II of title 301 of title 49, United States Code, is amended by adding at the end of the section the following:

“§ 30128. Improved crashworthiness

“(a) ROLLOVERS.—Within 3 years after the date of enactment of the Energy Policy Act of 2002, the Secretary, through the National Highway Traffic Safety Administration, shall prescribe a motor vehicle safety standard under this chapter that will reduce the aggressivity of light trucks by 30 percent, using a baseline of model year 2002, and will improve rollover crashworthiness of light trucks and cars, in order to protect against unnecessary death and injury.

“(b) The Secretary shall review the effectiveness of this standard every five years following final issuance of the standard and shall issue, through the National Highway Traffic Safety Administration, upgrades to the standard to reduce fatalities and injuries related to vehicle compatibility and light truck aggressivity.

SEC. 803. CREDIT TRADING PROGRAM.

(a) IN GENERAL.—Section 32903 of title 49, United States Code, is amended by adding at the end of the section the following:

“(2) PURPOSES.—The purposes of the system are:
“(A) Reducing the adverse effects of inefficient consumption of fuel by passenger automobiles and light trucks.

(B) Accelerating introduction of advanced technology vehicles into use in the United States.

(C) Encouraging manufacturers to exceed the average fuel economy standards established under subsection (f).

(D) Reducing emissions of carbon dioxide by passenger automobiles and light trucks.

(E) Decreasing the United States’ contribution to global warming and acid rain.

(F) Providing manufacturers flexibility in meeting the average fuel economy standards established by section 32902.

(G) Establishing a consumer choice.

(H) Program requirements.—The system established under paragraph (1) shall—

(A) make only credits accrued after the date of enactment of the Energy Policy Act of 2002 eligible for transfer or sale;

(B) use techniques and methods that minimize reporting costs for manufacturers;

(C) provide for monitoring and verification of credit purchases;

(D) require participating manufacturers to report monthly sales of vehicles to the Administrator of the Environmental Protection Agency; and

(E) make manufacturer-specific credit, transfer, sale, and purchase information publicly available in an annual report and monthly posting of transactions on the Internet.

(2) Credits may be traded between passenger automobiles and light trucks and between domestic and import fleets.—The system shall provide that credits earned under this section—

(A) with respect to passenger automobiles may be applied with respect to light trucks;

(B) with respect to light trucks may be applied with respect to passenger automobiles;

(C) with respect to passenger automobiles manufactured domestically may be applied with respect to passenger automobiles not manufactured domestically; and

(D) with respect to passenger automobiles not manufactured domestically may be applied with respect to passenger automobiles manufactured domestically.

(3) Report.—The Secretary and the Administrator shall jointly submit an annual report to the Congress that describes the effectiveness of the credits provided by this subsection achieving the purposes described in paragraph (2); and setting forth a full accounting of all credits, transfers, sales, and purchases for the most recent model year for which data is available.

(4) Carryback of credits.—Section 32903 of title 49, United States Code, is amended—

(A) by striking “applied to” and inserting “applied by” in subsection (a)(1); and

(B) by striking “and per fuel economy (as defined in section 32901(17) after model year 2006; and”;

(C) by redesignating subparagraph (F) of subsection (b)(1) as subparagraph (H), and inserting after subparagraph (G) the following:—

(1) a label (or a logo imprinted on a label required by the Administrator under section 32904(a)(1) that—

(1) reflects an automobile’s performance on the basis of criteria developed by the Administrator to reflect the fuel economy and greenhouses gas emissions of the vehicle and the sequences of operating the automobile over its likely useful life;

(3) permits consumers to compare performance in a manner that is both the same and not-for-profit organizations, that—

(1) has the technical capability and resources needed to complete the project successfully;

(2) has sufficient financial resources in addition to the contract amount, if necessary, to complete the contract successfully;

(3) is open to the granting of contracts; and

(4) is authorized to be appropriated to the Secretary of Transportation $10,000,000 for each of fiscal years 2003 and 2004 to carry out this section.

SEC. 809. SECRETARY OF TRANSPORTATION TO CERTIFY BENEFITS.

Beginning with model year 2005, the Secretary of Transportation shall conduct an open competition for a project to demonstrate the feasibility of multiple fuel hybrid electric vehicle powertrains in sport utility vehicles and light trucks. The Secretary shall execute a contract with the entity determined by the Secretary to be the winner of the competition under which the entity shall provide $10,000,000 to that entity in each of fiscal years 2003 and 2004 to carry out the project.

The project shall be conducted by the Secretary in consultation with the Administrator, and the Secretary shall require the entity to which the contract is awarded to—

(1) select a current model year production vehicle;

(2) extend the lifetime of the vehicle's fuel economy rating by 50 percent or more (as measured by gasoline consumption); and

(3) meet the requirements of paragraph (2) in a manner that the fuel economy and greenhouse gas emission reduction is at least 15 percent.

(2) Eligible entrants.—The competition conducted by the Secretary shall be open to any entity, consortium of nongovernmental entities, educational institutions, and not-for-profit organizations, that—

(1) has the technical capability and resources needed to complete the project successfully;

(2) has sufficient financial resources in addition to the contract amount, if necessary, to complete the contract successfully; and

(3) is open to the granting of contracts; and

(4) is authorized to be appropriated to the Secretary of Transportation $10,000,000 for each of fiscal years 2003 and 2004 to carry out this section.

SEC. 808. DEPARTMENT OF TRANSPORTATION ENGINEERING AWARD PROGRAM.

(a) Engineering research awards.—The Secretary of Transportation shall establish an engineering award program to recognize the
engineering team of any manufacturer of passenger automobiles or light trucks (as such terms are defined in section 32901 of title 49, United States Code) whose work directly results in production models that:

1. the first large sport utility vehicle, van, or light truck to achieve a fuel economy rating of 30 miles per gallon under section 32902 of such title;

2. the first mid-sized sport utility vehicle, van, or light truck to achieve a fuel economy rating of 40 miles per gallon under section 32902 of such title;

3. the first small sport utility vehicle, van, or light truck to achieve a fuel economy rating of 40 miles per gallon under section 32902 of such title;

(b) MANUFACTURER’S AWARD.—The Secretary of Transportation shall establish an Oil Independence Award to recognize the first manufacturer of domestically-manufactured (within the meaning of section 32903 of title 49, United States Code) passenger automobiles and light trucks to achieve a combined fuel economy rating of 35 miles per gallon under section 32902 of such title.

(c) REQUIREMENTS FOR PARTICIPATION IN ENGINEERING TEAM AWARDS PROGRAM.—In establishing the engineering team awards program under subsection (a), the Secretary shall establish eligibility requirements that include—

1. a requirement that the vehicle, van, or truck be domestically-manufactured or manufactured in Canada by a company that meets the meaning of section 32903 of title 49, United States Code;

2. a requirement that the vehicle, van, or truck meet all applicable Federal standards for emissions and safety (except that crash testing shall not be required for a prototype); and

3. such additional requirements as the Secretary may require in order to carry out the program.

(d) AMOUNT OF PRIZE.—The Secretary shall award a prize of not less than $10,000 to each engineering team determined by the Secretary to have successfully met the requirements of subsection (a)(1), (2), or (3). The Secretary shall not award a prize to any manufacturer to have met the requirements of subsection (b) with appropriate ceremonies and activities, and may provide a monetary award in an amount determined by the Secretary to be appropriate.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary of Transportation such sums as may be necessary to carry out this section.

SEC. 810. COOPERATIVE TECHNOLOGY AGREEMENTS.

(a) IN GENERAL.—The Secretary of Transportation, in cooperation with the Administrator of the Environmental Protection Agency, may execute a cooperative research and development agreement with any manufacturer of passenger automobiles or light trucks (as such terms are defined in section 32901 of title 49, United States Code) to implement, utilize, and incorporate in production government-developed or jointly-developed fuel economy technology that will result in improvements in the average fuel economy of any class of vehicles produced by that manufacturer of at least 5 percent greater fuel economy of that class of vehicles for model year 2000.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary of Transportation and the Administrator of the Environmental Protection Agency such sums as may be necessary to carry out this section.

SEC. 811. INCREASED USE OF ALTERNATIVE FUELS BY FEDERAL FLEETS.

(a) REQUIREMENT TO USE ALTERNATIVE FUELS.—The Secretary of Transportation (as defined in the Energy Policy and Conservation Act (42 U.S.C. 6374a(h)(3)) is amended to read as follows:

(‘‘b’’ Dual fuel vehicles acquired pursuant to this section shall be operated on alternative fuels. If the Secretary determines that all dual fueled vehicles acquired pursuant to this section cannot operate on alternative fuels that the vehicle, van, or truck meet all applicable Federal standards for emissions and safety (except that crash testing shall not be required for a prototype) the requirement in part, but only to the extent that:

(i) Not later than September 30, 2003, less than 50 percent of the total annual volume of fuel used in such dual fueled vehicles shall be from alternative fuels.

(ii) Not later than September 30, 2005, not less than 75 percent of the total annual volume of fuel used in such dual fueled vehicles shall be from alternative fuels.

(ii) Not later than September 30, 2005, not less than 95 percent of the total annual volume of fuel used in such dual fueled vehicles shall be from alternative fuels.’’)

(b) DEFINITION OF ‘DEDICATED VEHICLE’.—Section 400(g)(4)(B) of the Energy Policy and Conservation Act (42 U.S.C. 6374(g)(4)(B)) is amended by inserting after ‘‘soley on alternative fuels’’ the following:

and a three-wheeled enclosed electric vehicle having a vehicle identification number’’.

SEC. 812. EXCEPTION TO HOW PASSENGER RECIPIENT USES ALTERNATIVE FUELS.

Section 102(a)(1) of title 23, United States Code, is amended by inserting after ‘‘required’’ the following:

‘‘(E) Dual fueled vehicles acquired pursuant to this section’’.

SEC. 813. DATA COLLECTION.

Section 205 of the Department of Energy Organization Act (42 U.S.C. 7135) is amended by inserting after ‘‘the following:’’ the following:

‘‘(F) Data collection requirements to ensure compliance with this section’’.

SEC. 814. GREEN SCHOOL BUS PILOT PROGRAM.

(a) ESTABLISHMENT.—The Secretary of Energy and the Secretary of Transportation shall jointly establish a pilot program for the purpose of developing an incentive basis to eligble entities for the demonstration and commercial application of alternative fuel school buses and ultra-low sulfur diesel school buses.

(b) REQUIREMENTS.—Not later than 3 months after the date of the enactment of this Act, the Secretary shall establish and publish in the Federal register grant requirements on eligibility for assistance, and on implementation of the program established under subsection (a), including certification requirements to ensure compliance with this subsection.

(c) SOLICITATION.—Not later than 6 months after the date of the enactment of this Act, the Secretary shall solicit proposals for grants under this section.

SEC. 815. ELIGIBLE RECIPIENTS.—A grant shall be awarded under this section only—

1. to a local governmental entity responsible for providing school bus service for one or more local school systems.

2. jointly to an entity described in paragraph (1) and a contracting entity that provides school bus service to the public school systems.

(e) TYPES OF GRANTS.—

1. IN GENERAL.—Grants under this section shall be for the demonstration and commercial application of technologies to facilitate the use of alternative fuel school buses and ultra-low sulfur diesel school buses instead of buses manufactured before model year 1997 and buses manufactured before model year 1991.

2. NO ECONOMIC BENEFIT.—Other than the grant of the receipt, a recipient of a grant under this section may not receive any economic benefit in connection with the receipt of the grant.

3. PRIORITY OF GRANT APPLICATIONS.—The Secretary shall give priority to awarding grants to applicants who can demonstrate the use of alternative fuel buses and ultra-low sulfur diesel school buses instead of buses manufactured before model year 1997.

(f) CONDITIONS OF GRANT.—A grant provided under this section shall include the following conditions:

1. All buses acquired with funds provided under the grant shall be operated as part of the school bus fleet for which the grant was made for a minimum of 5 years.

2. Funds provided under the grant may only be used—

(A) to pay the cost, except as provided in paragraph (3), of new alternative fuel school buses or ultra-low sulfur diesel school buses, including State taxes and contract fees; and

(B) to provide—

(i) up to 10 percent of the price of the alternative fuel buses acquired; and

(ii) up to 15 percent of the price of the alternative fuel buses acquired, for necessary alternative fuel infrastructure if the infrastructure will be available to the grant recipient and to other local governments.

3. The grant recipient shall be required to provide at least the lesser of 15 percent of the total cost of each bus received or $15,000 per bus.

4. In the case of a grant recipient receiving a grant to demonstrate ultra-low sulfur diesel school buses, the grant recipient shall be required to provide documentation to the satisfaction of the Secretary that diesel fuel containing sulfur at not more than 15 parts per million is available for carrying out the purposes of the grant, and a commitment by the applicant to use such fuel in carrying out the purposes of the grant.

(g) BUSES.—Funding under a grant made under this section may be used to demonstrate the use of new alternative fuel school buses or ultra-low sulfur diesel school buses that—

1. have a gross vehicle weight greater than 14,000 pounds;

2. are powered by a heavy duty engine; and

3. in the case of alternative fuel school buses, emit not more than—

(A) for buses manufactured in model year 2002, 2.5 grams per brake horsepower-hour of nonmethane hydrocarbons and oxides of nitrogen and .01 grams per brake horsepower-hour of particulate matter; and

(B) for buses manufactured in model years 2003 through 2006, 1.8 grams per brake horsepower-hour of nonmethane hydrocarbons and oxides of nitrogen and .01 grams per brake horsepower-hour of particulate matter; and
SEC. 816. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Secretary of Energy for carrying out sections 814 and 815, to remain available until expended—

SEC. 817. BIODIESEL FUEL USE CREDIT.

Section 312(c) of the Energy Policy Act of 1992 (42 U.S.C. 13220(c)) is amended—

(2) by striking “NOT” in the subsection heading; and

SEC. 818. NEIGHBORHOOD ELECTRIC VEHICLES.

(2) by striking “or a dual fueled vehicle” and inserting “or a dual fueled vehicle, or a neighborhood electric vehicle”;

(3) by striking “and” at the end of paragraph (13);

(3) by striking the period at the end of subsection (p) and inserting “; and”;

(4) by adding at the end the following:

“(15) the term ‘neighborhood electric vehicle’ means a motor vehicle that qualifies as both—

(A) a low-speed vehicle, as such term is defined in section 571.9(b) of title 49, Code of Federal Regulations; and

(B) a non-diesel vehicle, as such term is defined in section 86.1703-99 of title 49, Code of Federal Regulations.”.

SEC. 819. RENEWABLE CONTENT OF MOTOR VEHICLE FUEL.

(a) In General.—Section 201 of the Clean Air Act (42 U.S.C. 7545) is amended—

(c) definitions.—For purposes of this section—

(1) the term “alternative fuel school bus” means a bus powered substantially by electricity (including electricity supplied by a fuel cell) or by liquefied natural gas, compressed natural gas, liquefied petroleum gas, hydrogen, propane, or methanol or ethanol at no less than 85 percent by volume; and

(2) the term “sulfur diesel school bus” means a school bus powered by diesel fuel which contains sulfur at no more than 15 parts per million.

SEC. 816. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Secretary of Energy for carrying out sections 814 and 815, to remain available until expended—

(1) $50,000,000 for fiscal year 2003;

(2) $60,000,000 for fiscal year 2004;

(3) $70,000,000 for fiscal year 2005; and

(4) $80,000,000 for fiscal year 2006.
(A) IN GENERAL.—The regulations promulgated to carry out this subsection shall provide for the generation of an appropriate amount of credits by any person that refines, blends, imports, or distributes biomass-based diesel fuel, that contains a quantity of renewable fuel that is greater than the quantity required under paragraph (2). Such regulations shall provide for the generation of an appropriate amount of credits for biodiesel fuel. If a small refinery notifies the Administrator that it waives the exemption provided by this Act, the regulations shall provide for the generation of credits by the small refinery beginning in the year following such notification.

(2) WAIVERS.—The Administrator, in consultation with the Secretary of Agriculture and the Secretary of Energy, may approve or deny a waiver of the requirement of paragraph (2) within 180 days after the date on which the petition is received, but may extend that period for up to 60 additional days to provide for public notice and opportunity for comment and for consideration of the comments submitted.

(3) LIFE OF CREDITS.—A credit generated under this paragraph shall be valid to show compliance—

(i) in the calendar year in which the credit was generated or the next calendar year, or

(ii) in the calendar year in which the credit was generated or the next two consecutive calendar years, if the Administrator promulgates regulations under paragraph (6).

(4) INABILITY TO PURCHASE SUFFICIENT CREDITS.—The regulations promulgated to carry out this paragraph shall include provisions allowing any person that is unable to generate or purchase sufficient credits to meet the requirements under paragraph (2) to carry out the requirements for the generation of credits by the small refinery described in clause (i) will continue in the first year in which the credit receives a waiver under section 209(b). Not later than 180 days after the date on which the petition is received; but

(i) may extend that period for up to 60 additional days to provide for public notice and opportunity for comment and for consideration of the comments submitted.

(5) VARIATIONS.

(A) IN GENERAL.—If, for any calendar year, the Administrator determines that the ability of the small refinery, as described in paragraph (4), to carry out the requirements for the generation of credits by the small refinery described in clause (i) will continue in the first year in which the credit receives a waiver under section 209(b), the Administrator shall promulgate regulations to ensure that the small refinery has the economic factors.

(B) REGULATION OF EXCESSIVE SEASONAL VARIATIONS.—If, for any calendar year, the Administrator determines that the ability of the small refinery, as described in paragraph (4), to carry out the requirements for the generation of credits by the small refinery described in clause (i), will continue in the first year in which the credit receives a waiver under section 209(b), the Administrator shall promulgate regulations to ensure that the small refinery has been notified of its obligation to propose a request for a waiver of the requirement of paragraph (2) within 180 days after the date on which the petition is received, but

(i) may extend that period for up to 60 additional days to provide for public notice and opportunity for comment and for consideration of the comments submitted.

(6) SEASONAL VARIATIONS IN RENEWABLE FUEL USE.—

(A) STUDY.—For each of calendar years 2004 through 2012, the Administrator of the Energy Information Administration, shall conduct a study of renewable fuels blending to determine whether there are excessive seasonal variations in the use of renewable fuels.

(B) REGULATION OF EXCESSIVE SEASONAL VARIATIONS.—If, for any calendar year, the Administrator determines that the ability of the small refinery, as described in paragraph (4), to carry out the requirements for the generation of credits by the small refinery described in clause (i) will continue in the first year in which the credit receives a waiver under section 209(b), the Administrator shall promulgate regulations to ensure that the small refinery has been notified of its obligation to propose a request for a waiver of the requirement of paragraph (2) within 180 days after the date on which the petition is received, but

(i) may extend that period for up to 60 additional days to provide for public notice and opportunity for comment and for consideration of the comments submitted.

(7) WAIVERS.—The Administrator, in consultation with the Secretary of Agriculture and the Secretary of Energy, may waive the requirement of paragraph (2) in whole or in part on petition by 1 or more States by reducing the national quantity of renewable fuel required under this subsection—

(i) based on a determination by the Administrator, after public notice and opportunity for comment, that the requirement of paragraph (2) will likely result in significant adverse consumer impacts, or significant economic hardships, or both, that would arise from imposing the requirements under paragraph (2) will likely result in significant adverse consumer impacts in 2004, on a national, regional or state basis. Such study shall evaluate renewable fuel supplies and prices, blendstock supplies, and supply and distribution system capabilities. Based on such study, the Secretary shall make specific recommendations to the Administrator regarding waiver of the requirements of paragraph (2) in whole or in part, to avoid any such adverse impacts. Within 270 days after enactment, the Administrator shall, consistent with the recommendations of the Secretary, waive, in whole or in part, the requirement under paragraph (2) by reducing the national quantity of renewable fuel required under this subsection.

(8) STUDY AND WAIVER FOR INITIAL YEAR OF PROGRAM.—Not later than 180 days from enactment, the Administrator shall complete a study assessing whether the renewable fuels requirement under paragraph (2) will likely result in significant adverse consumer impacts in 2004, on a national, regional or state basis. Such study shall evaluate renewable fuel supplies and prices, blendstock supplies, and supply and distribution system capabilities. Based on such study, the Secretary shall make specific recommendations to the Administrator regarding waiver of the requirements of paragraph (2) in whole or in part, to avoid any such adverse impacts. Within 270 days after enactment, the Administrator shall, consistent with the recommendations of the Secretary, waive, in whole or in part, the renewable fuels requirement under paragraph (2) by reducing the national quantity of renewable fuel required under this subsection.

(9) SMALL REFINERIES.—(A) IN GENERAL.—If, for any calendar year, the Administrator determines that the economic factors.

(B) ECONOMIC HARDSHIP.—In evaluating a hardship petition, the Administrator, in consultation with the Secretary of Agriculture, may determine whether the economic hardships, or both, that would arise from imposing the requirements under paragraph (2) will likely result in significant adverse consumer impacts or significant economic hardships, or both, that would arise from imposing the requirements under paragraph (2) will likely result in significant adverse consumer impacts or significant economic hardships, or both, that would arise from imposing the requirements under paragraph (2) will likely result in significant adverse consumer impacts or significant economic hardships, or both, that would arise from imposing the requirements under paragraph (2) will likely result in significant adverse consumer impacts or significant economic hardships, or both, that would arise from imposing the requirements under paragraph (2) will likely result in significant adverse consumer impacts in 2004, on a national, regional or state basis. Such study shall evaluate renewable fuel supplies and prices, blendstock supplies, and supply and distribution system capabilities. Based on such study, the Secretary shall make specific recommendations to the Administrator regarding waiver of the requirements of paragraph (2) in whole or in part, to avoid any such adverse impacts. Within 270 days after enactment, the Administrator shall, consistent with the recommendations of the Secretary, waive, in whole or in part, the renewable fuels requirement under paragraph (2) by reducing the national quantity of renewable fuel required under this subsection.

(10) STUDY.—Not later than 180 days after the date of enactment, the Secretary of Energy, shall complete a study assessing whether the renewable fuels requirement under paragraph (2) will likely result in significant adverse consumer impacts, or significant economic hardships, or both, that would arise from imposing the requirements under paragraph (2) in whole or in part, to avoid any such adverse impacts.

(11) PENALTIES AND ENFORCEMENT.—Section 209(b) of the Clean Air Act (42 U.S.C. 7545(d)) is amended—

(1) in paragraph (1) by striking "(n)" and inserting "(m)"; and

(2) in the second sentence, by striking "(m), (o)" and inserting "(m), (o)".

(B) PETITIONS FOR WAIVERS.—(1) PROMULGATION OF REGULATIONS.—Upon notification, accompanied by supporting documentation, from the Governor of a State that the Reid vapor pressure limitation established by paragraph (4) will increase emissions that contribute to air pollution in any area in the State, the Administrator, shall, by regulation, apply, in lieu of the Reid vapor pressure limitation established by paragraph (4), the Reid vapor pressure limitation established by paragraph (1) to all fuel blends containing gasoline and 10 percent denatured anhydrous ethanol that are sold, offered for sale, dispensed, supplied, offered for supply, transported or introduced into commerce in the area during the high ozone season.

(2) DEADLINE FOR ACTION ON PETITIONS.—The Administrator shall promulgate regulations under subparagraph (A) not later than 90 days after the date of receipt of a notification from a Governor under that subparagraph.

(3) EFFECTIVE DATE.—(1) IN GENERAL.—With respect to a State for which the Governor submits a petition under subparagraph (A), the regulations under that subparagraph shall take effect on the later of—
“(1) the first day of the first high ozone season for the area that begins after the date of receipt of the notification; or
“(2) 1 year after the date of receipt of the notification."
(4) PASSENGER AUTOMOBILE.—The term ‘‘passenger automobile’’ has the meaning given such term by section 22901(16) of title 49, United States Code.

(b) RELEASE PREVENTION AND COMPLIANCE.—Subtitle I of the Solid Waste Disposal Act (42 U.S.C. 6991 et seq.) is amended by striking section 9010 and inserting the following:

**SEC. 9010. RELEASE PREVENTION AND COMPLIANCE.**

Funds made available under section 9012 from the Leaking Underground Storage Tank Trust Fund may be used for conducting inspections, or for issuing orders or bringing actions under this subtitle—

(A) by a State (pursuant to section 9003(b)(7)) acting under—

(1) a program approved under section 9004; or

(2) State requirements regulating underground storage tanks that are similar or identical to this subtitle, as determined by the Administrator; and

(B) by the Administrator, acting under this subtitle or a State program approved under section 9004.

**SEC. 9011. BEDROCK BIOREMEDIATION.**

The Administrator shall establish, at an institution of higher education (as defined in section 101 of the Higher Education Act of 1965 (20 U.S.C. 1001)) with established expertise in bioremediation of contaminated bedrock aquifers, a resource center—

(1) to conduct research concerning bioremediation of methyl tertiary butyl ether in contaminated underground aquifers, including contaminated bedrock; and

(2) to provide for States technical assistance clearing up information concerning innovative technologies for bioremediation described in paragraph (1).

**SEC. 9012. SOIL REMEDIATION.**

The Administrator may establish a program to conduct research concerning remediation of methyl tertiary butyl ether contamination of soil, including granite or volcanic soil.

**SEC. 9013. AUTHORIZATION OF APPROPRIATIONS.**

In addition to amounts made available under section 2007(i), there are authorized to be appropriated to the Leaking Underground Storage Tank Trust Fund, notwithstanding section 9508(c)(1) of the Internal Revenue Code of 1986—

(1) to carry out section 9003(h)(12), $200,000,000 for fiscal year 2003, to remain available until expended;

(2) to carry out section 9101—

(A) $50,000,000 for fiscal year 2003; and

(B) $30,000,000 for each of fiscal years 2004 through 2008;

(3) to carry out section 9101—

(A) $50,000,000 for fiscal year 2003; and

(B) $30,000,000 for each of fiscal years 2004 through 2008; and

(4) to carry out section 9102—

(A) $100,000 for fiscal year 2003; and

(B) $50,000 for each of fiscal years 2004 through 2008;

(c) TECHNICAL AMENDMENTS.—

(1) Section 1001 of the Solid Waste Disposal Act (42 U.S.C. prev. 6901) is amended by striking the item relating to section 9004 and inserting the following:—

**Sec. 9010. Release prevention and compliance.**

**Sec. 9011. Bedrock bioremediation.**

**Sec. 9012. Soil remediation.**

**Sec. 9013. Authorization of appropriations.**

(2) Section 9001.(d)(A) of the Solid Waste Disposal Act (42 U.S.C. 6991a(A)) is amended by striking ‘‘all fuel additives except—’’ and inserting—

(3) Section 9001.(c)(1) of the Solid Waste Disposal Act (42 U.S.C. 6991b(1)) is amended by striking ‘‘all fuel additives except—’’ and inserting—

(4) Section 9001.(a) of the Solid Waste Disposal Act (42 U.S.C. 6991a(a)) is amended in the second sentence by striking ‘‘referred to’’ and all that follows and inserting—

(a) FUNDINGS.—Congress finds that—

(1) since 1979, methyl tertiary butyl ether (referred to in this section as ‘‘MTBE’’) has been used nationwide at low levels in gasoline. 

(2) Public Law 101-549 (commonly known as the ‘‘Clean Air Act Amendments of 1990’’) (42 U.S.C. 7401 et seq.) established a fuel oxygenate standard under which reformulated gasoline must contain at least 2 percent oxygen by weight.

(3) At the time of the adoption of the fuel oxygen standard, Congress was aware that significant use of MTBE could result from the introduction of that fuel additive. Congress was also aware that the use of MTBE would likely be important to the cost-effective implementation of that program.

(4) Congress is aware that gasoline and its component additives have leaked from storage tanks, with consequences for water quality;

(5) the fuel industry responded to the fuel oxygenate standard established by Public Law 101-549 by making substantial investments in—

(A) MTBE production capacity; and

(B) systems to deliver MTBE-containing gasoline to the marketplace.

(6) When leaked or spilled into the environment, MTBE may cause serious problems of drinking water quality;

(7) in recent years, MTBE has been detected in water sources throughout the United States;

(8) MTBE can be detected by smell and taste at low concentrations;

(9) while small quantities of MTBE can render water supplies unpalatable, the precise human health effects of MTBE consumption at low levels are yet unknown; and

(10) the report entitled ‘‘From Clean Air and Clean Water: The Report of the Blue Ribbon Panel on Oxygenates in Gasoline’’ and dated September 1999, Congress was urged—

(A) to eliminate the fuel oxygenate standard;

(B) to greatly reduce use of MTBE; and

(C) to maintain the environmental performance of reformulated gasoline;

(11) Congress has—

(A) reconsidered the relative value of MTBE as a gasoline additive; and

(B) decided to eliminate use of MTBE as a fuel additive;

(12) the timeline for elimination of use of MTBE as a fuel additive must be established in a manner that achieves an appropriate balance among the goals of—

(A) environmental protection;

(B) adequate energy supplies; and

(C) reasonable fuel prices; and

(13) it is appropriate for Congress to provide some limited transition assistance—

(a) to producers of MTBE who produced MTBE in response to a market created by the oxygenate requirement contained in the Clean Air Act; and

(b) in the purpose of mitigating any fuel supply problems that may result from elimination of a widely-used fuel additive.
(b) PURPOSES.—The purposes of this section are—

(1) to eliminate use of MTBE as a fuel oxygenate; and

(2) to provide assistance to merchant producers of MTBE in making the transition from producing MTBE to producing other fuel additives.

(c) AUTHORITY FOR WATER QUALITY PROTECTION FROM FUELS.—Section 211(c) of the Clean Air Act (42 U.S.C. 7545(c)) is amended—

(1) in paragraph (1)(A), by inserting “fuel or fuel additive or”—

“after “Administer any” ; and

(2) by striking “air pollution which” and inserting “air pollution, water pollution, that” ;

(3) by adding at the end the following:

“(c) SCHEDULING OR REFORMULATING GASOLINE.—The Administrator shall promulgate regulations to effect the provisions of subparagraph (A) by inserting “water quality protection, after “emission control,” and

(4) in paragraph (4)(B), by inserting “or water quality protection, after “emission control,” and

SEC. 834. ELIMINATION OF OXYGEN CONTENT REQUIREMENT FOR REFORMULATED GASOLINE.

(a) ELIMINATION.—

(1) IN GENERAL.—Section 211(k) of the Clean Air Act (42 U.S.C. 7545(k)) is amended—

(A) in paragraph (2)—

(i) in the second sentence of subparagraph (A), by striking “(including the oxygen content requirement contained in subparagraph (B))”;

(ii) in subparagraph (B); and

(iii) in subparagraph (C) as subparagraphs (B) and (C), respectively;

(B) in paragraph (3)(A), by striking clause (v);

(C) in paragraph (7)—

(i) in subparagraph (A)—

(I) by striking clause (i); and

(ii) by redesignating subparagraphs (C) and (D) as subparagraphs (B) and (C), respectively;

(D) in paragraph (8)(A), by striking clause (ii); and

(ii) by redesignating clause (ii) as clause (i); and

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) take effect 270 days after the date of enactment of this Act, except that such amendments shall take effect upon enactment in any State that has received a waiver under section 209(b) of the Clean Air Act.

(b) MAINTENANCE OF TOXIC AIR POLLUTANT EMISSION REDUCTIONS.—Section 211(k)(1) of the Clean Air Act (42 U.S.C. 7545(k)(1)) is amended—

(1) by striking “Within 1 year after the enactment of the Clean Air Act Amendments of 1990,” and inserting the following:

“A. IN GENERAL.—Not later than November 15, 1991, and

(ii) by adding at the end the following:

(2) by inserting the following:

“(B) IN GENERAL.—By the end of the calendar year next following the date of enactment of this Act, the Administrator shall promulgate regulations to control hazardous air pollutants from motor vehicles and motor vehicle fuels. Not later than July 1, 2004, the Administrator shall promulgate final regulations to control hazardous air pollutants from motor vehicles and motor vehicle fuels. Not later than July 1, 2004, the Administrator shall promulgate final regulations to control hazardous air pollutants from motor vehicles and motor vehicle fuels. Not later than July 1, 2004, the Administrator shall promulgate final regulations to control hazardous air pollutants from motor vehicles and motor vehicle fuels. Not later than July 1, 2004, the Administrator shall promulgate final regulations to control hazardous air pollutants from motor vehicles and motor vehicle fuels. Not later than July 1, 2004, the Administrator shall promulgate final regulations to control hazardous air pollutants from motor vehicles and motor vehicle fuels. Not later than July 1, 2004, the Administrator shall promote the reformulated gasoline regulations under subpart D of part 80 of title 40, Code of Federal Regulations, to
consolidate the regulations applicable to VOC-Control Regions 1 and 2 under section 80.41 of that title by eliminating the less stringent requirements applicable to gasoline designated for VOC-Control Region 2 and instead applying the more stringent requirements applicable to gasoline designated for VOC-Control Region 1.

(d) SAVINGS CLAUSE.—Nothing in this section is intended to affect or prejudice any legal claims or actions with respect to regulations issued by the Administrator prior to enactment of this Act regarding emissions of toxic air pollutants from motor vehicles.

(e) DETERMINATION REGARDING A STATE PETITION.—Section 211(k) of the Clean Air Act (42 U.S.C. 7545(k)) is amended by inserting after subsection (o) the following:

"(1) DETERMINATION REGARDING A STATE PETITION.—

(A) IN GENERAL.—Notwithstanding any other provision of this section, the Administrator shall, on the request of the Governor of a State to exempt gasoline sold in that State from the requirements of section 206 of title 21, U.S.C., shall publish the analysis in final form.

(B) F INAL ANALYSIS.—After providing a reasonable opportunity for comment but not later than 5 years after the date of enactment of this paragraph, the Administrator shall publish the analysis in final form.

"(2) EMISIONS MODEL.—For the purposes of this subsection, as soon as the necessary data are available, the Administrator shall develop and finalize an emissions model that reasonably reflects the effects of gasoline characteristics and components on emissions from vehicles in the motor vehicle fleet during the calendar year 2005.

"(3) In subparagraph (A)(ii) (as redesignated by paragraph (2)), and in the second sentence, by striking "(B)" and inserting the following:

"(E) the feasibility of developing national or region-specific fuel requirements concerning motor vehicle fuels, including—

(A) requirements relating to reformulated gasoline, volatility (measured in Reid vapor pressure), oxygenated fuel, and diesel fuel; and

(B) other requirements that vary from State to State, region to region, or locality to locality.

(2) REQUIRED ELEMENTS.—The study shall assess—

(A) the effect on the variety of requirements described in paragraph (1) on the supply, quality, and price of motor vehicle fuels available to the consumer; and

(B) the effect of the requirements described in paragraph (1) on achievement of—

(i) national, regional, and local air quality standards and goals; and

(ii) improved environmental and public health protection standards and goals; and

(C) the effect of Federal, State, and local motor vehicle fuel regulations, including multiple motor vehicle fuel requirements, on—

(i) domestic refineries; and

(ii) the fuel distribution system; and

(iii) industry investment in new capacity; and

(D) the effect of the requirements described in paragraph (1) on emissions from vehicles, refineries, and fuel handling facilities; and

(E) the feasibility of developing national or regional motor vehicle fuel standards for the 48 contiguous States that, while protecting and improving the air quality of the national, regional, and local levels, could—

(i) enhance flexibility in the fuel distribution infrastructure and improve fuel supply reliability; and

(ii) reduce price volatility and costs to consumers and producers;"
(iii) provide increased liquidity to the gasoline market; and
(iv) enhance fuel quality, consistency, and supply; and
(f) The feasibility of providing incentives, and the need for the development of national standards necessary, to promote cleaner burning motor vehicle fuel.

SEC. 902. STATE ENERGY CONSERVATION GRANTS.
(1) In general.—Not later than June 1, 2006, the Administrator of the Environmental Protection Agency and the Secretary of Energy shall submit to Congress a report on the results of the study conducted under subsection (a).
(2) Recommendations.—The recommendations made in subparagraph (A) shall be submitted to—
(A) the Governors of the States;
(B) the State energy office of the State commission or agency responsible for developing State energy conservation plans under section 362 of the Energy Policy and Conservation Act of 1975 (42 U.S.C. 6322), or, if no such agency exists, a community development organization for urban communities.

SEC. 903. ENERGY EFFICIENT SCHOOLS.
(a) Establishment.—There is established in the Department of Energy the High Performance Schools Program (in this section referred to as the “Program”).
(b) Grants.—The Secretary of Energy may make grants to the State energy office—
(1) to assist school districts in the State to improve the energy efficiency of school buildings;
(2) to administer the Program; and
(3) to promote participation in the Program.
(c) Grants To Assist School Districts.—The Secretary shall condition grants under subsection (b)(1) on the State energy office using the grants to assist school districts that have demonstrated—
(1) a need for the grants to build additional school buildings to meet increasing elementary or secondary enrollments or to renovate existing school buildings; and
(2) a commitment from the State to use the grant funds to develop high performance school buildings in accordance with a plan that the State energy office, in consultation with the State educational agency, has determined is feasible and appropriate to achieve the purposes for which the grant is made.
(d) Grants for Administration.—Grants under subsection (b)(2) shall be used to—
(1) evaluate compliance by school districts with requirements of this section;
(2) distribute information and materials to clearly define and promote the development of high performance school buildings for both new and existing facilities;
(3) organize school building programs for school board members, school personnel, architects, engineers, and others to advance the concepts of high performance school buildings;
(4) obtain technical services and assistance in planning and designing high performance school buildings; or
(5) collect and monitor data and information pertaining to the high performance school building projects.
(e) Grants To Promote Participation.—Grants under subsection (b)(3) shall be used for promotional and marketing activities, including facilitating private and public financing, promoting the use of energy savings performance contracts, working with school administrators, students, and communities, and coordinating public benefit programs.

SEC. 904. LOW INCOME COMMUNITY ENERGY EFFICIENCY PILOT PROGRAM.
(a) Grants.—The Secretary of Energy is authorized to make grants to private, non-profit community development organizations and Indian tribe economic development organizations to improve energy conservation, identify and develop alternative renewable and distributed energy supplies, and increase energy conservation in low income rural and urban communities.
(b) Purpose of grants.—The Secretary may make grants on a competitive basis to a community development organization for—
(1) investments that develop alternative renewable and distributed energy supplies;
SEC. 912. ENERGY MANAGEMENT REQUIREMENTS.

(a) ENERGY REDUCTION GOALS.—Section 543(a)(9) of the National Energy Conservation Policy Act (42 U.S.C. 8253(a)(9)) is amended to read as follows:

“(a) ENERGY REDUCTION GOALS.—Section 543(a)(9) of the National Energy Conservation Policy Act (42 U.S.C. 8253(a)(9)) is amended—

(1) by adding at the end the following:

“(3) Not later than January 1, 2003, each agency shall use, to the extent possible, benchmarks and standards for energy use that are developed by the Energy Policy Act of 1992 and other Federal agencies, and such data and standards as the Secretary shall establish by rule as part of the Federal building energy performance standards.

(b) REVIEW AND REVISION OF ENERGY PERFORMANCE STANDARDS.—Section 543(a)(9) of the National Energy Conservation Policy Act (42 U.S.C. 8253(a)(9)) is further amended by adding at the end the following:

“(b) REVIEW AND REVISION OF ENERGY PERFORMANCE STANDARDS.—Section 543(a)(9) of the National Energy Conservation Policy Act (42 U.S.C. 8253(a)(9)) is further amended by adding at the end the following:

“(b)(3) the Secretary shall submit to Congress recommendations for revising standards for Federal buildings, if the Secretary determines that the revisions are necessary to achieve energy consumption levels at least 10 percent below those of the most recent ASHRAE Standard 90.1, whichever results in the greater increase in energy efficiency.

(c) EXCLUSIONS.—Section 543(c)(1) of the National Energy Conservation Policy Act (42 U.S.C. 8253(c)(1)) is amended to read as follows:

“(c) EXCLUSIONS.—Section 543(c) of the National Energy Conservation Policy Act (42 U.S.C. 8253(c)) is amended—

(1) by adding at the end the following:

“(ii) residential buildings other than those described in subparagraph (I) or (II).
section 548(a) of the National Energy Conservation Policy Act (42 U.S.C. 8258a(a)), the head of each Federal agency shall include—

(i) a list of all new Federal buildings of the Federal agency;

(ii) a statement concerning whether the Federal buildings meet or exceed the revised standards established under this paragraph, including an explanation and comparison report that is in compliance with the measurement and verification protocols of the Department of Energy.

(2) AGENCY DETERMINATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this paragraph and to implement the revised standards established under this paragraph.

(b) ENERGY LABELING PROGRAM.—Section 305(a) of the Energy Conservation and Production Act (42 U.S.C. 6301(a)) is amended by adding at the end the following:

"(e) ENERGY LABELING PROGRAM.—The Secretary of Energy, in cooperation with the Administrator of the Environmental Protection Agency, shall develop an energy labeling program for new Federal buildings that exceed the revised standards established under subsection (a)(3) by 15 percent or more."

SEC. 914. PROCUREMENT OF ENERGY EFFICIENT PRODUCTS.

(a) REQUIREMENTS.—Part 3 of title V of the National Energy Conservation Policy Act is amended by adding at the end the following:

"SEC. 552. FEDERAL PROCUREMENT OF ENERGY EFFICIENT PRODUCTS.

(a) DEFINITIONS.—In this section:

(1) ENERGY STAR PRODUCT.—The term ‘Energy Star product’ means a product that is rated for energy efficiency under an Energy Star program.

(2) ENERGY STAR PROGRAM.—The term ‘Energy Star program’ means the program established by section 324A of the Energy Policy and Conservation Act.

(3) EXECUTIVE AGENCY.—The term ‘executive agency’ has the meaning given the term in section 4 of the Office of Federal Procurement Policy Act (41 U.S.C. 403).

(b) FEMP DESIGNATED PRODUCT.—The term ‘FEMP designated product’ means a product that is designated under the Federal Energy Management Program of the Department of Energy as being among the highest 25 percent of equivalent products for energy efficiency.

(c) PROCUREMENT OF ENERGY EFFICIENT PRODUCTS.—(1) REQUIREMENT.—To meet the requirements of an executive agency for an energy consuming product, the head of the executive agency shall, except as provided in paragraph (2), procure—

(A) an Energy Star product; or

(B) a FEMP designated product.

(2) EXCEPTIONS.—The head of an executive agency is not required to procure an Energy Star product or FEMP designated product under paragraph (1) if—

(A) an Energy Star product or FEMP designated product is not cost effective over the life cycle of the product; or

(B) no Energy Star product or FEMP designated product is reasonably available that meets the requirements of the executive agency.

(3) PROCUREMENT PLANNING.—The head of an executive agency shall incorporate into the specifications for all procurements involving energy consuming products and systems, and into the factors for the evaluation of offers received for such procurements, criteria for energy efficiency that are consistent with the criteria used for rating Energy Star products and for rating FEMP designated products under paragraph (1).

(c) LISTING OF ENERGY EFFICIENT PRODUCTS IN FEDERAL CATALOGS.—Energy Star and FEMP designated products shall be clearly identified and prominently displayed in any inventory or listing of products by the General Services Administration or the Defense Logistics Agency, and—

(b) CONFORMING AMENDMENT.—The table of contents in section 1(b) of the National Energy Conservation Policy Act (42 U.S.C. 8251 note) is amended by inserting after the item relating to section 551 the following:

"Sec. 552. Federal Government procurement of energy efficient products."

(c) REGULATIONS.—Not later than 180 days after the effective date specified in subsection (f), the Secretary of Energy shall issue guidelines to carry out section 552 of the National Energy Conservation Policy Act (as added by subsection (a)).

(d) DESIGNATION OF ENERGY STAR PRODUCTS.—The Administrator of the Environmental Protection Agency and the Secretary of Energy shall expedite the process of designating products as Energy Star products (as defined in section 552 of the National Energy Policy Act (as added by subsection (a)).

(e) DESIGNATION OF ELECTRIC MOTORS.—In the case of electric motors of 1 to 500 horsepower, there are authorized to be appropriated such sums as are necessary to designate electric motors that meet a standard designated by the Secretary. The Secretary shall designate such a standard within 120 days of the date of the enactment of this Act, after considering the recommendations of associated electric motor manufacturers and energy efficiency groups.

(f) EFFECTIVE DATE.—Subsection (a) and the amendment made by that subsection take effect on the date that is 180 days after the date of enactment of this Act.

SEC. 915. ENERGY SAVINGS PERFORMANCE CONTRACT SUSTAIN.

Section 801(c) of the National Energy Conservation Policy Act (42 U.S.C. 8287c(c)) is amended to read as follows:

"(e) ENERGY SAVINGS PERFORMANCE CONTRACT SUSTAIN.

SEC. 916. ENERGY SAVINGS PERFORMANCE CONTRACT DEFINITIONS.

(a) ENERGY SAVINGS.—Section 804(2) of the National Energy Conservation Policy Act (42 U.S.C. 8287c(2)) is amended to read as follows:

"(2) The term ‘energy savings’ means a reduction in the cost of energy or water, from the base value established through a methodology set forth in the contract, used in an existing federally owned building or buildings or other federally owned facilities as a result of—

(A) the lease or purchase of operating equipment, improvements, altered operation and maintenance, or technical services; or

(B) the increased use of existing energy sources by cogeneration or heat recovery, excluding any cogeneration process for other than a federally owned building or buildings or other federally owned facilities; or

(C) the increased efficient use of existing water sources.

(b) ENERGY SAVINGS CONTRACT.—Section 804(3) of the National Energy Conservation Policy Act (42 U.S.C. 8287c(3)) is amended to read as follows:

"(3) The terms ‘energy savings contract’ and ‘energy savings performance contract’ mean a contract which provides for the performance of services for the design, acquisition, installation, testing, operation, and maintenance or repair, of an identified energy or water conservation measure or series of measures at one or more locations.

(c) ENERGY OR WATER CONSERVATION MEASURE.—Section 804(4) of the National Energy Conservation Policy Act (42 U.S.C. 8287c(4)) is amended by adding at the end the following:

"(4) The term ‘energy or water conservation measure’ means—

"(A) an energy conservation measure, as defined in section 551(4) (42 U.S.C. 8259(4)); or

"(B) a water conservation measure that improves water efficiency, is life cycle cost effective, and involves the re-use, water recycling or reuse, more efficient treatment of wastewater or stormwater, improvements in operation or maintenance efficiency, or any other related activities, not at a Federal hydroelectric facility."

SEC. 917. REVIEW OF ENERGY SAVINGS PERFORMANCE CONTRACT PROGRAM.

Within 180 days after the date of the enactment of this Act, the Secretary of Energy shall complete a review of the Energy Savings Performance Contract program to identify statutory, regulatory, and administrative obstacles that prevent Federal agencies from fully utilizing the program. In addition, this review shall identify all areas for increasing program flexibility and effectiveness, including audit and measurement verification requirements, accounting for energy or water saving savings, contracting requirements, and energy efficiency services covered. The Secretary shall report these findings to the Committee on Energy and Natural Resources of the Senate and the Committee on Natural Resources of the House of Representatives.

SEC. 918. FEDERAL ENERGY BANK.

Part 3 of title V of the National Energy Conservation Policy Act is amended by adding at the end the following:

"SEC. 551. FEDERAL ENERGY BANK.

(a) DEFINITIONS.—In this section:

(1) BANK.—The term ‘Bank’ means the Federal Energy Bank established by subsection (b).

(b) ENERGY OR WATER EFFICIENCY PROJECT.—The term ‘energy or water efficiency project’ means a project that assists a Federal agency in meeting or exceeding the energy or water efficiency requirements of—

(A) this part;

(B) title VIII; or

(C) any applicable Executive order, including Executive Order No. 13123.

(c) DEPOSITORY.—The term ‘depository’ means—

(1) an Executive agency (as defined in section 105 of title 5, United States Code);

(2) the United States Postal Service;

(3) Congress and any other entity in the legislative branch; and

(4) a Federal court and any other entity in the judicial branch.

(d) ESTABLISHMENT OF BANK.—

(1) IN GENERAL.—There is established in the Treasury of the United States a fund to be known as the ‘Federal Energy Bank’, consisting of—

(A) such amounts as are deposited in the Bank under paragraph (2); and

(B) any interest earned on investment of amounts in the Bank under subsection (c)(2)(D); and

(C) any interest earned on investment of amounts in the Bank under paragraph (3).

(2) DEPOSITS IN BANK.—Bank shall cease existing beginning with the fiscal year following the fiscal year in which the amounts in the Bank (including—
amounts on loan from the Bank) become equal to or exceed $1,000,000,000.

"(3) INVESTMENT OF AMOUNTS.—The Secretary of the Treasury shall invest such portion of the amount as is not, in the judgment of the Secretary, required to meet current withdrawals. Investments may be made only in interest-bearing obligations of the United States.

"(c) LOANS FROM THE BANK.—

"(1) IN GENERAL.—The Secretary of the Treasury shall transfer from the Bank to the Secretary such sums as are appropriated to carry out the loan program under paragraph (2).

"(2) LOAN PROGRAM.—

"(A) ESTABLISHMENT.—

"(i) IN GENERAL.—In accordance with subsection (d), the Secretary, in consultation with the Senator of Defense, the Administrator of General Services, and the Director of the Office of Management and Budget, shall establish a program to make loans of amounts in the Bank to any Federal agency that submits an application satisfactory to the Secretary in order to pay the costs of a project described in subparagraph (C).

"(ii) COMMENCEMENT OF OPERATIONS.—The Secretary may begin such program.

"(B) ACCESSION TO APPLICATIONS FOR LOANS FROM THE BANK IN FISCAL YEAR 2002; AND

"(2) ENERGY SAVINGS PERFORMANCE CONTRACT FUNDING.—To the extent practicable, an agency shall not submit a project for which energy performance contracting funding is available and is acceptable to the Federal agency under title VIII."

"(C) PURPOSES OF LOAN.—

"(i) IN GENERAL.—A loan from the Bank may be used to pay

"(I) the costs of an energy or water efficiency project, or a renewable or alternative energy project, for a new or existing Federal building (including selection and design of the project);

"(II) the costs of an energy metering plan and metering equipment installed pursuant to section 546(e) or for the purpose of verification of the energy savings under an energy savings performance contract under title VIII; or

"(III) at the time of contracting, the costs of cofunding of an energy savings performance contract (including a utility energy service agreement) in order to shorten the payback period of the project that is the subject of the energy savings performance contract.

"(ii) LIMITATION.—A Federal agency may use not more than 10 percent of the amount of a loan under subclause (I) or (II) of clause (i) to pay the costs of administration and proposal development (including data collection and energy surveys).

"(iii) RENEWABLE AND ALTERNATIVE ENERGY PROJECTS.—Not more than 25 percent of the amount of the loan from the Bank at any time may be loaned for renewable energy and alternative energy projects (as defined by the Secretary in accordance with applicable law (including the orders)).

"(D) REPAYMENTS.—

"(i) IN GENERAL.—Subject to clauses (ii) through (iv), a Federal agency shall repay to the Bank the principal amount of a loan at any time Interest at a rate determined by the President, in consultation with the Secretary and the Secretary of the Treasury.

"(ii) WAIVER OR REDUCTION OF INTEREST.—The Secretary may waive or reduce the rate of interest required to be paid under clause (i) if the Secretary determines that payment of interest on such a loan is not necessary to fund the operations of the Bank.

"(iii) DETERMINATION OF INTEREST RATE.—The interest rate determined under clause (i) shall be at a rate that is sufficient to ensure that, beginning not later than October 1, 2007, interest payments will be sufficient to fully fund the operations of the Bank.

"(iv) INSUFFICIENCY OF APPROPRIATIONS.—

"(I) REQUEST FOR APPROPRIATIONS.—As part of the budget request of the Federal agency for each fiscal year, the head of each Federal agency shall submit to the President a request for such amounts as are necessary to make such repayments as are expected to become due in the fiscal year under this subparagraph.

"(II) SUSPENSION OF REPAYMENT REQUIREMENT.—If the Secretary determines that sufficient appropriations are not made available to a Federal agency to make repayments under this subparagraph, the Bank shall suspend the requirement of repayment under this subparagraph and in such amount repayments are made available.

"(E) FEDERAL AGENCY ENERGY BUDGETS.—Until a loan is repaid, a Federal agency budget submitted by the President to Congress for a fiscal year shall not be reduced by the value of energy savings accrued as a result of any energy conservation measure implemented in the Bank.

"(F) NO RESCSSION OR REPROGRAMMING.—A Federal agency shall not rescind or reprogram loan amounts made available from the Bank except in accordance with the guidelines issued under subparagraph (G).

"(G) GUIDELINES.—The Secretary shall issue guidelines for implementation of the loan program under this paragraph, including selection criteria, maximum loan amounts, and loan repayment terms.

"(H) SELECTION CRITERIA.—

"(i) IN GENERAL.—The Secretary shall establish criteria for the selection of projects to be awarded loans in accordance with paragraph (2).

"(ii) SELECTION CRITERIA.—

"(A) IN GENERAL.—The Secretary may make loans from the Bank only for a project that—

"(I) is technically feasible;

"(II) is determined to be cost-effective using lifecycle cost methods established by the Secretary;

"(iii) includes a measurement and management component, performance requirements, and verification protocols of the Department of Energy, to—

"(I) commission energy savings for new and existing Federal buildings; and

"(II) verify the energy savings under an energy savings performance contract under title VIII; and

"(iv) in the case of renewable energy or alternative energy projects, a simple payback period of not more than 15 years; and

"(II) in the case of any other project, has a simple payback period of not more than 10 years.

"(B) PRIORITY.—In selecting projects, the Secretary shall give priority to projects that—

"(I) are a component of a comprehensive energy management project for a Federal facility; and

"(ii) are designed to significantly reduce the energy use of a Federal facility.

"(C) REPORTS AND AUDITS.—

"(i) REPORTS TO THE SECRETARY.—Not later than 1 year after the completion of installation of a project that has a cost of more than $100,000,000, and annually thereafter, a Federal agency shall submit to the Secretary a report that—

"(A) states whether the project meets or fails to meet the energy savings projections for the project; and

"(B) for each project that fails to meet the energy savings projections, states the reasons for the failure and describes proposed remedies.

"(C) AUDITS.—The Secretary may audit, or require a Federal agency to audit, any project financed with amounts from the Bank to assess the performance of the project.

"(D) REPORTS TO CONGRESS.—At the end of each fiscal year, the Secretary shall submit to Congress a report on the operations of the Bank, including a statement of—

"(A) the total amount of loans from the Bank to each Federal agency; and

"(B) the estimated cost and energy savings resulting from projects funded with loans from the Bank.

"(E) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to such sums as are necessary to carry out this section.

SEC. 919. ENERGY AND WATER SAVING MEASURES IN CONGRESSIONAL BUILDINGS.

"(a) IN GENERAL.—Part 3 of title V of the National Energy Conservation Policy Act is amended by adding at the end:

"SEC. 554. ENERGY AND WATER SAVINGS MEASURES IN CONGRESSIONAL BUILDINGS.

"(a) IN GENERAL.—The Architect of the Capitol—

"(1) shall develop, update, and implement a cost-effective energy conservation and management plan (referred to in this section as the ‘plan’) for all facilities administered by the Congress (referred to in this section as ‘congressional buildings’) to meet the energy performance requirements for Federal buildings established under section 543(a)(1).

"(2) shall submit the plan to Congress, not later than 180 days after the date of enactment of this section.

"(b) PLAN REQUIREMENTS.—The plan shall include—

"(1) a description of the life-cycle cost analysis used to determine the cost-effectiveness of proposed energy efficiency projects;

"(2) a schedule of energy surveys to ensure complete surveys of all congressional buildings every five years to determine the cost and payback period of energy and water conservation measures;

"(3) a strategy for installation of life cycle cost effective energy and water conservation measures;

"(4) the results of a study of the costs and benefits of installation of submetering in congressional buildings; and

"(5) information packages and ‘how-to’ guides for each Member and employing authority of Congress that detail simple, cost-effective methods to save energy and taxpayer dollars in the workplace.

"(c) CONTRACTING AUTHORITY.—The Architect—

"(1) may contract with nongovernmental entities and use private sector capital to finance energy conservation projects and meet energy performance requirements; and

"(2) may use innovative contracting methods to attract private sector funding for the installation of energy efficient and renewable energy technology, such as energy savings performance contracts described in title VIII.

"(d) CAPITOL VISITOR CENTER.—The Architect—

"(1) may contract with nongovernmental entities and use private sector capital to finance energy conservation projects and meet energy performance requirements; and

"(2) may use innovative contracting methods to attract private sector funding for the installation of energy efficient and renewable energy technology, such as energy savings performance contracts described in title VIII.
“(2) shall include in the Visor Center an exhibit on the energy efficiency and renewable energy measures used in congressional buildings.”

“(d) ANNUAL REPORT.—The Architect shall submit to Congress annually a report on congressional energy management and conservation programs required under this section to describe—

“(1) energy expenditures and savings estimates for each facility;

“(2) energy management and conservation programs; and

“(3) future priorities to ensure compliance with this section.”

(b) PEAL.—Section 310 of the Legislative Branch Appropriations Act, 1999 (40 U.S.C. 166i), is repealed.

Subtitle C—Industrial Efficiency and Consumer Products

SEC. 921. VOLUNTARY AGREEMENTS TO REDUCE INDUSTRIAL ENERGY INTENSITY.

(a) VOLUNTARY AGREEMENTS.—The Secretary of Energy shall enter into voluntary agreements with one or more persons in industries that consume significant amounts of energy per unit of physical output to reduce the energy intensity of their production activities.

(b) GOAL.—Voluntary agreements under this subsection shall have a goal of reducing energy intensity by not less than 2.5 percent each year from 2002 through 2012.

(c) RECOGNITION.—The Secretary of Energy, in consultation with the Administrator of the Environmental Protection Agency and other appropriate federal agencies, shall develop mechanisms to recognize and publicize the achievements of participants in voluntary agreements under this section.

(d) DEFINITION.—In this section, the term “energy intensity” means the primary energy consumed per unit of physical output in an industrial process.

(e) TECHNICAL ASSISTANCE.—An entity that enters into an agreement under this section and continues to make a good faith effort to achieve the energy efficiency goals specified in the agreement shall be eligible to receive assistance as appropriate to assist in the achievement of those goals.

(f) REPORT.—Not later than June 30, 2008 and June 30, 2012, the Secretary shall submit to Congress a report that evaluates the success of the voluntary agreements, with independent evaluation of a sample of the energy savings estimates provided by participating firms.

SEC. 922. AUTHORITY TO SET STANDARDS FOR COMMERCIAL PRODUCTS.

Part B of title III of the Energy Policy and Conservation Act (42 U.S.C. 6291 et seq.) is amended as follows:

(1) In the heading for such part, by inserting “AND COMMERCIAL” after “CONSUMER”.

(2) In section 322(b), by inserting “or commercial” after “consumer”.

(3) In paragraphs (4), (5), and (15) of section 321, by striking “consumer” each place it appears and inserting “covered”.

(4) In section 322(a), by inserting “or commercial” after “consumer” the first place it appears in the material preceding paragraph (1).

(5) In section 322(b), by inserting “or commercial” each place it appears.

(6) In section 322(b)(1)(B) and (b)(2)(A), by inserting “or business” in the case of a commercial product” after “per-household” each place it appears.

(7) In section 322(b)(2)(A), by inserting “or businesses” in the case of commercial products” after “households” each place it appears.

(8) In section 322(b)(2)(C)—

(A) by striking “term” and inserting “terms”; and

(B) by inserting “and business” after “household”.

(9) In section 323(b)(1)(B) by inserting “or commercial” after “consumer”.

SEC. 923. ADDITIONAL DEFINITIONS.

Section 321 of the Energy Policy and Conservation Act (42 U.S.C. 6291) is amended by adding at the end the following:

“(32) The term ‘battery charger’ means a device that charges batteries for consumer products.

“(33) The term ‘commercial refrigerator, freezer and refrigerator-freezer’ means a refrigerator, freezer or refrigerator-freezer that—

“(A) is not a consumer product regulated under this Act; and

“(B) incorporates most components involved in the vapor-compression cycle and the refrigerated compartment in a single package.

“(34) The term ‘external power supply’ means an external power supply circuit that is used to convert household electric current into either DC current or lower-voltage AC current to operate a consumer product.

“(35) The term ‘illuminated exit sign’ means a sign that—

“(A) is designed to be permanently fixed in place to identify an exit; and

“(B) consists of—

“(i) an electrically powered integral light source that illuminates the legend ‘EXIT’ and any directional indicators; and

“(ii) provides contrast between the legend, any directional indicators, and the background.

“(36)(A) Except as provided in subsection (B), the term ‘low-voltage dry-type transformer’ means a transformer that—

“(i) has an input voltage of 600 volts or less;

“(ii) is air-cooled;

“(iii) does not use oil as a coolant; and

“(iv) is rated for operation at a frequency of 60 Hertz.

“(B) The term ‘low-voltage dry-type transformer’ does not include—

“(i) transformers with multiple voltage taps, with the highest voltage tap equal to at least 20 percent more than the lowest voltage tap;

“(ii) transformers that are designed to be used a special application, such as electronic transformers commonly known as drive transformers, rectifier transformers, autotransformers, Uninterruptible Power System (UPS) transformers, impedance transformers, harmonic transformers, regulating transformers, sealed and nonventilating transformers, machine tool transformers, welding transformers, grounding transformers, or testing transformers; or

“(iii) any transformer not listed in clause (i) that is excluded by the Secretary by rule because the transformer is designed for a special application and the application of standards to the transformer would not result in significant energy savings.

“(37) The term ‘low-voltage transformer’ means the lowest amount of electric power used by a household appliance when not performing its active functions, as defined on an individual product basis by the Secretary.

“(38) The term ‘torchiere’ means a portable electric lamp with a reflector bowl that directs light upward so as to give indirect illumination.

“(39) The term ‘transformer’ means a device consisting of 2 or more coils of insulated wire that transfers alternating current by electromagnetic induction, and the case of such transformer to another to change the original voltage or current value.”

“(40) The term ‘unit heater’ means a self-contained fan-type heater designed to be installed within the heated space, except that such term does not include a warm air furnace.”

SEC. 924. ADDITIONAL TEST PROCEDURES.

(a) EXIT SIGNS.—Section 323(b)(1) of the Energy Policy and Conservation Act (42 U.S.C. 6293) is amended by adding at the end the following:

“(9) Test procedures for illuminated exit signs shall be based on the test method used under the Energy Star program for the Environmental Protection Agency for illuminated exit signs, as in effect on the date of enactment of this paragraph.

“(10) Test procedures for low voltage dry-type distribution transformers based on the ‘Standard Test Method for Measuring the Energy Consumption of Distribution Transformers’ prescribed by the National Electrical Manufacturers Association (NEMA TP 2-1998). The Secretary may review and revise this test procedure based on future revisions to such standard test method.

(b) ADDITIONAL CONSUMER AND COMMERCIAL PRODUCTS.—Section 323 of the Energy Policy and Conservation Act (42 U.S.C. 6293) is further amended by adding at the end the following:

“(1) ADDITIONAL CONSUMER AND COMMERCIAL PRODUCTS.—The Secretary shall within 24 months after the date of enactment of this subsection prescribe testing requirements for suspended ceiling fans, refrigerated bottled or canned beverage vending machines, commercial unit heaters, commercial refrigerators, freezers and refrigerator-freezers. Such testing requirements shall be based on existing test procedures used in industry tests that are currently in practice. In the case of suspended ceiling fans, such test procedures shall include efficiency at both maximum output and at an output no more than 50 percent of the maximum output.”

SEC. 925. ENERGY LABELING.

(a) RULEMAKING ON EFFECTIVENESS OF CONSUMER PRODUCT LABELING.—Paragraph (2) of section 324(a) of the Energy Policy and Conservation Act (42 U.S.C. 6294(a)(2)) is amended by adding at the end the following:

“(F) Not later than three months after the date of enactment of this subparagraph, the Commission shall take effect on the same date as energy conservation standards are prescribed by the Secretary for covered products referred to in subsections (u) and (v) of section 323, and within 18 months of enactment of this paragraph for products referred to in subsections (w) through (y) of section 325, prescribe, by rule, labeling requirements for such products. Labeling requirements adopted under this paragraph shall take effect on the same date as the standards set pursuant to sections 325(v) through (y).”

(b) RULEMAKING ON LABELING FOR ADDITIONAL PRODUCTS.—Section 324(a) of the Energy Policy and Conservation Act (42 U.S.C. 6294(a)) is further amended by adding at the end the following:

“(5) The Secretary shall within 6 months after the date on which energy conservation standards are prescribed by the Secretary for covered products referred to in subsections (u) and (v) of section 323, and within 18 months of enactment of this paragraph for products referred to in subsections (w) through (y) of section 325, prescribe, by rule, labeling requirements for such products. Labeling requirements adopted under this paragraph shall take effect on the same date as the standards set pursuant to sections 325(v) through (y).”

SEC. 926. ENERGY STAR PROGRAM.

The Energy Policy and Conservation Act (42 U.S.C. 6201 and following) is amended by inserting after section 324 the following:
SEC. 927. ENERGY CONSERVATION STANDARDS FOR CENTRAL AIR CONDITIONING AND HEAT PUMPS.

Section 325(d) of the Energy Policy and Conservation Act (42 U.S.C. 6295(d)) is amended to read as follows:

"(1) Except as provided in paragraph (3), the seasonal energy efficiency ratio of central air conditioners and central air conditioning heat pumps manufactured on or after January 23, 2006 shall not be less than 7.7.

"(2) Except as provided in paragraph (4), the heating seasonal performance factor of central air conditioning heat pumps manufactured on or after January 23, 2006 shall be no less than 7.7.

"(3) The seasonal energy efficiency ratio of central air conditioners or central air conditioning heat pumps manufactured on or after January 23, 2006 shall be no less than 12.0 for products that—

"(A) have a rated cooling capacity equal to or less than 30,000 BTU/hr;

"(B) have an outdoor or indoor unit having at least two overall exterior dimensions or an overall displacement that—

"(i) is substantially smaller than those of other units that are currently installed in site-built single family homes, and of a similar cooling or heating capacity, and

"(ii) if increased would result in a significant increase in the cost of installation or would result in a significant loss in the utility of the product to the consumer; and

"(C) are for purchase in the United States as of December 1, 2000.

"(4) The heating seasonal performance factor of central air conditioning heat pumps manufactured on or after January 23, 2006 shall not be less than 7.4 for products that meet the criteria in paragraph (3).

"(5) The Secretary may postpone the requirements of paragraphs (3) and (4) for specific product types until a date no later than January 23, 2010.

"(6) The Secretary shall publish a final rule not later than January 1, 2006 to determine whether the standards in effect for central air conditioners and central air conditioning heat pumps should be amended. Such rule shall provide that any action taken pursuant to subparagraphs (A) and (B) for the determination of any new covered products for which he intends to institute rulemakings on standby mode pursuant to this section and he shall state the dates by which such rulemakings shall apply to products manufactured on or after January 1, 2011."

SEC. 928. ENERGY CONSERVATION STANDARDS FOR ADDITIONAL CONSUMER AND COMMERCIAL PRODUCTS.

Section 325 of the Energy Policy and Conservation Act (42 U.S.C. 6295) is amended by adding at the end the following:

"(u) STANDBY MODE ELECTRIC ENERGY CONSUMPTION—

"(1) INITIAL RULEMAKING—

"(A) The Secretary shall, within 18 months after the date of enactment of this subsection, prescribe by notice and comment, definitions of standby mode and test procedures for the standby mode power use of battery chargers and external power supplies. In establishing these test procedures, the Secretary shall determine, among other factors, the energy consumption of existing products and assess the current and projected future market for battery chargers and external power supplies. This assessment shall include estimates of the significance of potential energy savings from technical improvements to these products and suggested product classes for standards. Prior to the end of this time period, the Secretary shall hold a scoping workshop to discuss and receive comments on plans for developing energy conservation standards for standby mode energy use for these products.

"(B) The Secretary shall, within 3 years after the date of enactment of this subsection, issue a final rule that determines whether energy conservation standards shall be promulgated for battery chargers and external power supplies or classes thereof. For each product class, any such standards shall be set at the lowest level of standby energy use that—

"(i) meets the criteria of subsections (o), (p), (q), (r), (s), and (t); and

"(ii) will result in significant overall annual energy savings, considering both standby mode and other operating modes.

"(2) DESIGNATION OF ADDITIONAL COVERED PRODUCTS—

"(A) Not later than 180 days after the date of enactment of this subsection, the Secretary shall publish for public comment and public hearing a notice to determine whether any noncovered products should be designated as covered products for the purpose of subsection (j). In determining this section to determine whether an energy conservation standard restricting standby mode energy consumption, should be promulgated, providing that any restriction on standby mode energy consumption shall be limited to major sources of such consumption.

"(B) In making the determinations pursuant to subparagraph (A), the Secretary shall, among other relevant factors and in addition to the criteria in section 323—

"(i) standby mode power consumption compared to overall product energy consumption; and

"(ii) the priority and energy savings potential of standards which may be promulgated under this subsection compared to other required rulemakings under this section and the availability for the Secretary to conduct such rulemakings.

"(C) Not later than one year after the date of enactment of this subsection, the Secretary shall publish a notice to determine whether any new covered products for which he intends to institute rulemakings on standby mode pursuant to this section and he shall state the dates by which such rulemakings shall apply.

"(D) REVIEW OF STANDBY ENERGY USE IN COVERED PRODUCTS—In determining pursuant to section 325, whether any specified product meets the criteria for energy conservation standards pursuant to section 325 should be revised, the Secretary shall consider for covered products which are major sources of standby mode energy consumption whether to incorporate standby mode into such test procedures and energy conservation standards to account, among other relevant factors, the criteria for non-covered products in subparagraph (B) of this subsection.

"(E) RULEMAKING FOR STANDBY MODE—

"(A) Any rulemaking instituted under this subsection or for covered products under this section which restricts standby mode power consumption shall be subject to the criteria and procedures for issuing energy conservation standards set forth in section 325 and the criteria set forth in paragraph 2(B) of this subsection.

"(B) No standard can be proposed for new covered products or covered products in a standby mode unless the Secretary has promulgated applicable test procedures for each product pursuant to section 323.

"(C) The provisions of section 327 shall apply to new covered products which are subject to the rulemakings for standby mode after a final rule has been issued.

"(3) EFFECTIVE DATE.—Any standard promulgated under this subsection shall be effective for products manufactured on or after January 1, 2005.
(c) HVAC MAINTENANCE.—(1) For the purpose of ensuring that installed air conditioning and heating systems operate at their maximum rated efficiency levels, the Secretary shall, within 180 days of the date of enactment of this subsection, carry out a program to educate homeowners and small business owners concerning the energy savings that may be realized as a result of properly conducted maintenance of air conditioning, heating, and ventilating systems. 

(2) The Secretary may carry out the program described in paragraph (1) in conjunction with any 11th industry trade associations, industry members, and energy efficiency organizations.

SEC. 934. PUBLIC HOUSING CAPITAL FUND.
Section 9(d)(1) of the United States Housing Act of 1937 (42 U.S.C. 1437f(d)(1)) is amended—

(1) in subparagraph (I), by striking “and” and inserting “and”; and

(2) by striking “20 percent” and inserting “30 percent”.

SEC. 935. GRANTS FOR ENERGY-CONSERVING IMPROVEMENTS FOR ASSISTED HOUSING.
Section 251(b)(1) of the National Energy Conservation Policy Act (42 U.S.C. 8231) is amended—

(1) by striking “financed with loans” and inserting “assisted”;

(2) by inserting after “1959,” the following: “which are eligible multifamily housing projects that are designed to meet section 512 of the Multifamily Assisted Housing Reform and Affordability Act of 1997 (42 U.S.C. 1437f note) and are subject to a mortgage restructuring and rental assistance sufficiency plans under such Act.”; and

(3) by inserting after the period at the end of the first sentence the following new sentence: “Such improvements may also include the installation of energy and water conserving fixtures and fittings that conform to the American Society of Mechanical Engineers/American National Standards Institute standards A112.19.2–1996 and A12.18.1–2000, or any revision thereto, applicable at the time of installation, and by increasing energy efficiency and water conservation by such other means as the Secretary determines are appropriate.”

SEC. 936. FHA MORTGAGE INSURANCE INCENTIVES FOR ENERGY EFFICIENT HOUSING.

(a) SINGLE FAMILY HOUSING MORTGAGE INSURANCE.—Section 203(b)(2) of the National Housing Act (42 U.S.C. 1709(b)(2)) is amended—

(1) by striking “credit” and inserting “incentives”;

(2) in subsection (c), by striking “and” and inserting “or”; and

(3) by striking “percent” and inserting “30 percent”.

(b) MULTIFAMILY HOUSING MORTGAGE INSURANCE.—Section 221(d)(3)(B)(i) of the National Housing Act (42 U.S.C. 1701q(d)(3)(B)(i)) is amended—

(1) by striking “or paragraph (10)” and inserting “and”;

(2) by striking “and” and inserting “or”;

(3) by striking “and” and inserting “or”; and

(4) by striking “30 percent” and inserting “40 percent”.

(c) COOPERATIVE HOUSING MORTGAGE INSURANCE.—Section 221(d)(3)(B)(ii) of the National Housing Act (42 U.S.C. 1701q(d)(3)(B)(ii)) is amended by striking “percent” and inserting “percent”.

(2) by striking “percent” and inserting “percent”.

(d) REHABILITATION AND NEIGHBORHOOD CONSERVATION HOUSING MORTGAGE INSURANCE.—Section 221(d)(3)(B)(ii) of the National Housing Act (42 U.S.C. 1701q(d)(3)(B)(ii)) is amended by striking “percent” and inserting “percent”.

(2) by striking “percent” and inserting “percent”.

SEC. 937. ELDERLY HOUSING MORTGAGE INSURANCE.

(a) Limitation on use of funds.—In any fiscal year, the Secretary may carry out the program to educate homeowners and small businesses concerning the energy savings that may be realized as a result of properly conducted maintenance of air conditioning, heating, and ventilating systems.

(b) Descendants of former slaves.—In any fiscal year, the Secretary may carry out the program to educate homeowners and small businesses concerning the energy savings that may be realized as a result of properly conducted maintenance of air conditioning, heating, and ventilating systems.
(2) creating flexible international and domestic mechanisms, including joint implementation, technology deployment, emissions trading and carbon sequestration projects that will reduce, avoid, and sequester greenhouse gas emissions; and

(3) participating in international negotiations, including putting forth a proposal at the next meeting of the Conference of the Parties, with the objective of securing United States’ participation in a revised Kyoto Protocol or other future binding climate change agreements in a manner that is consistent with the environmental objectives of the Framework Convention on Climate Change, that protects the economic interests of the United States, and recognizes the shared international responsibility for addressing climate change, including developing country participation.

Subtitle B—Climate Change Strategy

SEC. 101. SHORT TITLE.

This title may be cited as the “Climate Change Strategy and Technology Innovation Act of 2002”.

SEC. 102. FINDINGS.

Congress finds that—

(1) evidence continues to build that increases in atmospheric concentrations of greenhouse gases are contributing to global climate change;

(2) in 1992, the Senate ratified the United Nations Framework Convention on Climate Change, done at New York on May 9, 1992, the ultimate objective of which is the “stabilization of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system”;

(3) although science currently cannot determine precisely what atmospheric concentrations are “dangerous”, the current trajectory of greenhouse gas emissions will lead to a continued rise in greenhouse gas concentrations in the atmosphere, not stabilization;

(4) the remaining scientific uncertainties cast doubt on human actions, but not inaction;

(5) greenhouse gases are associated with a wide range of human activities, including energy production, transportation, agriculture, forestry, manufacturing, buildings, and other activities;

(6) the economic consequences of poorly designed policies to address climate change, or of inaction, may cost the global economy trillions of dollars;

(7) a large share of this economic burden would fall on the United States;

(8) stabilization of greenhouse gas concentrations in the atmosphere will require transformational change in the global energy system and other emitting sectors at an almost unimaginable level—a veritable industrial revolution is required;

(9) such a revolution can occur only if the revolution is preceded by research and development that leads to bold technological breakthroughs;

(10) over the decade preceding the date of enactment of this Act—

(A) energy research and development budgets in the public and private sectors have declined precipitously and have not been focused on the climate change response challenge; and

(B) the investments that have been made have not been guided by a comprehensive strategy that includes a research and development agenda, but also bolder, breakthrough research;

(12) much more progress could be made on the issue of climate change if the United States were to adopt a new approach for addressing climate change that included, as an ultimate goal, the following:

(A) stabilization of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system; and

(B) a response strategy with 4 key elements consisting of—

(i) definition of interim emission mitigation and adaptation strategies coupled with specific mitigation approaches and after taking into account actions by other nations (if any), would result in stabilization of greenhouse gas concentrations;

(ii) technology development, including—

(I) a national commitment to double energy research and development by the United States public and private sectors; and

(II) in carrying out such research and development, a national commitment to provide a high degree of emphasis on bold, breakthrough technologies that will make possible a profound transformation of the energy, transportation, industrial, agricultural, and building sectors of the United States; and

(iii) climate adaptation research that—

(A) incorporates the 4 key elements of that response strategy is consideration of the international nature of the challenge, which will require—

(I) establishment of joint climate response strategies and joint research programs;

(B) assistance to developing countries and countries in transition for building technical and institutional capacities and incentives for addressing the challenge; and

(C) promotion of public awareness of this issue.

(12) much more progress could be made on the issue of climate change if the United States were to adopt a new approach for addressing climate change that included, as an ultimate goal, the following:

(A) stabilization of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system; and

(B) a response strategy with 4 key elements consisting of—

(i) definition of interim emission mitigation and adaptation strategies coupled with specific mitigation approaches and after taking into account actions by other nations (if any), would result in stabilization of greenhouse gas concentrations;

(ii) technology development, including—

(I) a national commitment to double energy research and development by the United States public and private sectors; and

(II) in carrying out such research and development, a national commitment to provide a high degree of emphasis on bold, breakthrough technologies that will make possible a profound transformation of the energy, transportation, industrial, agricultural, and building sectors of the United States; and

(iii) climate adaptation research that—

(A) incorporates the 4 key elements of that response strategy is consideration of the international nature of the challenge, which will require—

(I) establishment of joint climate response strategies and joint research programs;

(B) assistance to developing countries and countries in transition for building technical and institutional capacities and incentives for addressing the challenge; and

(C) promotion of public awareness of this issue.

SEC. 103. PURPOSE.

The purpose of this title is to implement the new approach described in section 1012(12) by developing a national focal point for climate change response through—

(i) the establishment of the National Office of Climate Change Response within the Executive Office of the President to develop the United States Climate Change Response Strategy that—

(A) incorporates the 4 key elements of this new approach;

(B) is additive and integrated in the overall energy, transportation, industrial, agricultural, forestry, and environmental policies of the United States;

(C) takes into account—

(I) the diversity of energy sources and technologies;

(ii) supply-side and demand-side solutions; and

(iii) national infrastructure, energy distribution, and transportation systems;

(D) provides for the inclusion and equitable participation of federal, state, tribal, and local government agencies, nongovernmental organizations, academia, scientific bodies, industry, the public, and other interested parties;

(E) incorporates new models of Federal-State cooperation; and

(F) defines a comprehensive energy technology research and development program that—

(i) recognizes the important contributions that research and development programs in existence on the date of enactment of this title make toward addressing the climate change response challenge; and

(ii) provides an additional research and development agenda that focuses on the bold, breakthrough technologies that are critical to the long-term stabilization of greenhouse gas concentrations in the atmosphere;

(G) includes consideration of other efforts to address critical environmental and health concerns, including air, clean water, and responsible land use policies; and

(H) incorporates initiatives to promote the deployment of clean energy technologies developed in the United States and abroad.

(2) the establishment of the Interagency Task Force, chaired by the Director of the White House Office, to serve as the primary mechanism through which the heads of Federal agencies work together to develop and implement the Strategy; and

(3) the establishment of the Office of Climate Change Technology within the Department of Energy—

(A) to manage, as its primary responsibility, an innovative research and development program that focuses on bold, breakthrough technologies that are critical to the long-term stabilization of greenhouse gas concentrations in the atmosphere; and

(B) to provide an analytic base of data to the White House Office, other agencies, and the public;

(4) the establishment of an independent review board—

(A) to review the Strategy and annually assess United States and international progress toward the goal of stabilization of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system; and

(B) to assess—

(i) the performance of each Federal agency that has responsibilities under the Strategy; and

(ii) the adequacy of the budget of each such Federal agency to fulfill the responsibilities of the Federal agency under the Strategy; and

(5) the establishment of offices in, or the carrying out of activities by, the Department of Agriculture, the Department of Transportation, the Department of Commerce, the Environmental Protection Agency, and other Federal agencies as necessary to provide support to the Strategy.

SEC. 104. DEFINITIONS.

In this title:

(1) CLIMATE-FRIENDLY TECHNOLOGY.—The term “climate-friendly technology” means any energy supply or end-use technology that, over the life of the technology and compared to similar technology in commercial use as of the date of enactment of this Act—

(A) results in reduced emissions of greenhouse gases; and

(B) may substantially lower emissions of other pollutants; and

(C) may generate substantially smaller or less hazardous quantities of solid or liquid waste.

(2) DEPARTMENT.—The term “Department” means the Department of Energy.

(3) DEPARTMENT OFFICE.—The term “Department Office” means the Office of Climate Change Technology of the Department established by section 1017(a).

(4) FEDERAL AGENCY.—The term “Federal agency” has the meaning given the term “agency” in section 551 of title 5, United States Code.
(5) **GREENHOUSE GAS.**—The term “greenhouse gas” means—
(A) an anthropogenic gaseous constituent of the atmosphere (including carbon dioxide, methane, nitrous oxide, sulfur hexafluoride, hydrofluorocarbons, perfluorocarbons, sulfur hexafluoride, and tropospheric ozone) that absorbs and re-emits infrared radiation and influences climate; and
(B) an anthropogenic aerosol (such as black soot) that absorbs solar radiation and influences climate.

(6) **INTERAGENCY TASK FORCE.**—The term “Interagency Task Force” means the United States Climate Change Response Interagency Task Force established under section 1016(d).

(7) **KEY ELEMENT.**—The term “key element”, with respect to the Strategy, means—
(A) definition of interim emission mitigation levels, that, coupled with specific mitigation approaches and after taking into account actions by other nations (if any), would result in stabilization of greenhouse gas concentrations; and
(B) technology development, including—
(i) a national commitment to double energy research and development by the United States public and private sectors; and
(ii) in carrying out such research and development commitments, to provide a high degree of emphasis on bold, breakthrough technologies that will make possible a profound transformation of the energy, industrial, agricultural, and building sectors of the United States; and
(C) climate adaptation research that—
(i) focuses on response actions necessary to adapt to climate change that may have already occurred;
(ii) focuses on response actions necessary to adapt to climate change that may occur under any future climate change scenario; and
(D) climate science research that—
(i) builds on the substantial scientific understanding of climate change that exists as of the date of enactment of this Act; and
(ii) focuses on resolving the remaining scientific, technical, and economic uncertainties to aid in the development of sound response strategies.

(8) **QUALIFIED INDIVIDUAL.**—(A) In general.—The term “qualified individual” means an individual who has demonstrated national and leadership skills to draw on other experts in diverse fields of knowledge that are relevant to addressing the climate change response challenge.

(B) **FIELDS OF KNOWLEDGE.**—The fields of knowledge referred to in subparagraph (A) are—
(i) the science of primary and secondary climate change impacts;
(ii) energy and environmental economics;
(iii) technology transfer and diffusion;
(iv) the social dimensions of climate change;
(v) climate change adaptation strategies;
(vi) fossil, nuclear, and renewable energy technology;
(vii) energy efficiency and energy conservation;
(viii) energy systems integration;
(ix) engineered and terrestrial carbon sequestration; and
(x) transportation, industrial, and building sector concerns;
(xi) regulatory and market-based mechanisms in addressing climate change;
(xii) risk and decision analysis; and
(xiii) strategic planning; and
(xiv) the international implications of climate change response strategies.

(9) **REVIEW BOARD.**—The term “Review Board” means the United States Climate Change Response Strategy Review Board established by section 1019.

(10) **SECRETARY.**—The term “Secretary” means the Secretary of Energy.

(11) **STABILIZATION OF GREENHOUSE GAS CONCENTRATIONS.**—The term “stabilization of greenhouse gas concentrations” means the stabilization of greenhouse gas concentrations, either in the short term or long term, at a level that would prevent dangerous anthropogenic interference with the climate system, recognizing that such a level should be achieved within a time frame sufficient to allow ecosystems to adapt naturally to climate change, to ensure that food production is not threatened and to enable economic development to proceed in a sustainable manner as determined by the United Nations Framework Convention on Climate Change, done at New York on May 9, 1992.

(12) **STRATEGY.**—The term “Strategy” means the United States Climate Change Response Strategy developed under section 1015.

(13) **WHITE HOUSE OFFICE.**—The term “White House Office” means the National Office of Climate Change Response of the Executive Office of the President established by section 1016(a).

## SEC. 1015. UNITED STATES CLIMATE CHANGE RESPONSE STRATEGY.

(a) **IN GENERAL.**—(1) The Director of the White House Office shall develop the United States Climate Change Response Strategy, which shall—
(A) be consistent with the goals of energy, transportation, industrial, agricultural, forestry, environmental, economic, and other relevant policies of the United States;
(B) be developed on the basis of an evaluation of a wide range of approaches for achieving the long-term goal, including evaluation of—
(i) a variety of cost-effective Federal and State policies, programs, standards, and incentives;
(ii) policies that integrate and promote innovative, market-based solutions in the United States and in foreign countries; and
(iii) participation in other international institutions, or in the support of international activities, that are established or conducted to facilitate stabilization of greenhouse gas concentrations; and
(C) be based on a national commitment to double energy research and development by the United States public and private sectors; and
(D) incorporate mitigation approaches that are technologically feasible measures that will—
(i) produce measurable net reductions in United States emissions that lead toward achievement of the long-term goal; and
(ii) minimize any adverse short-term and long-term economic, environmental, national security, and social impacts on the United States.

(2) The development of technologies that have the potential for long-term implementation;

(3) giving preference to technologies that have the potential to reduce significantly the overall cost of stabilization of greenhouse gas concentrations; and
(C) such changes in institutional and technological systems as are necessary to adapt to climate change in the short-term and the long-term.

(3) The development of technologies that have the potential for long-term implementation;

(b) **IN GENERAL.**—(1) The Director of the White House Office shall develop the United States Climate Change Response Strategy, which shall—
(A) have the long-term goal of stabilization of greenhouse gas concentrations through actions taken by the United States and other nations;
(B) recognize that accomplishing the long-term goal of stabilization will take from many decades to more than a century, but acknowledging that significant actions must begin in the near term;
(C) build on the 4 key elements; and
(D) be developed on the basis of an examination of a broad range of emissions levels and dates for achievement of those levels (including those evaluated by the Intergovernmental Panel on Climate Change and those consistent with U.S. treaty commitments) that, after taking into account by actions other than the United States, the overall cost of stabilization of greenhouse gas concentrations;

(4) (i) giving preference to technologies that have the potential to reduce significantly the overall cost of stabilization of greenhouse gas concentrations; and
(ii) a national commitment to double energy research and development by the United States public, private, and public-private sector actions that bear on the long-term goal;

(b) **IN GENERAL.**—(1) The Director of the White House Office shall develop the United States Climate Change Response Strategy, which shall—
(A) be consistent with the goals of energy, transportation, industrial, agricultural, forestry, environmental, economic, and other relevant policies of the United States;
(B) be developed on the basis of an evaluation of a wide range of approaches for achieving the long-term goal, including evaluation of—
(i) a variety of cost-effective Federal and State policies, programs, standards, and incentives;
(ii) policies that integrate and promote innovative, market-based solutions in the United States and in foreign countries; and
(iii) participation in other international institutions, or in the support of international activities, that are established or conducted to facilitate stabilization of greenhouse gas concentrations; and
(C) be based on a national commitment to double energy research and development by the United States public and private sectors; and
(D) incorporate mitigation approaches that are technologically feasible measures that will—
(i) produce measurable net reductions in United States emissions that lead toward achievement of the long-term goal; and
(ii) minimize any adverse short-term and long-term economic, environmental, national security, and social impacts on the United States.

(b) **IN GENERAL.**—(1) The Director of the White House Office shall develop the United States Climate Change Response Strategy, which shall—
(A) have the long-term goal of stabilization of greenhouse gas concentrations through actions taken by the United States and other nations;
(B) recognize that accomplishing the long-term goal of stabilization will take from many decades to more than a century, but acknowledging that significant actions must begin in the near term;
(C) build on the 4 key elements; and
(D) be developed on the basis of an examination of a broad range of emissions levels and dates for achievement of those levels (including those evaluated by the Intergovernmental Panel on Climate Change and those consistent with U.S. treaty commitments) that, after taking into account by actions other than the United States, the overall cost of stabilization of greenhouse gas concentrations; and

(4) (i) giving preference to technologies that have the potential to reduce significantly the overall cost of stabilization of greenhouse gas concentrations; and
(ii) a national commitment to double energy research and development by the United States public, private, and public-private sector actions that bear on the long-term goal;

(b) **IN GENERAL.**—(1) The Director of the White House Office shall develop the United States Climate Change Response Strategy, which shall—
(A) be consistent with the goals of energy, transportation, industrial, agricultural, forestry, environmental, economic, and other relevant policies of the United States;
(B) be developed on the basis of an evaluation of a wide range of approaches for achieving the long-term goal, including evaluation of—
(i) a variety of cost-effective Federal and State policies, programs, standards, and incentives;
(ii) policies that integrate and promote innovative, market-based solutions in the United States and in foreign countries; and
(iii) participation in other international institutions, or in the support of international activities, that are established or conducted to facilitate stabilization of greenhouse gas concentrations; and
(C) be based on a national commitment to double energy research and development by the United States public and private sectors; and
(D) incorporate mitigation approaches that are technologically feasible measures that will—
(i) produce measurable net reductions in United States emissions that lead toward achievement of the long-term goal; and
(ii) minimize any adverse short-term and long-term economic, environmental, national security, and social impacts on the United States.

(b) **IN GENERAL.**—(1) The Director of the White House Office shall develop the United States Climate Change Response Strategy, which shall—
(A) have the long-term goal of stabilization of greenhouse gas concentrations through actions taken by the United States and other nations;
(B) recognize that accomplishing the long-term goal of stabilization will take from many decades to more than a century, but acknowledging that significant actions must begin in the near term;
(C) build on the 4 key elements; and
(D) be developed on the basis of an examination of a broad range of emissions levels and dates for achievement of those levels (including those evaluated by the Intergovernmental Panel on Climate Change and those consistent with U.S. treaty commitments) that, after taking into account by actions other than the United States, the overall cost of stabilization of greenhouse gas concentrations; and

(4) (i) giving preference to technologies that have the potential to reduce significantly the overall cost of stabilization of greenhouse gas concentrations; and
(ii) a national commitment to double energy research and development by the United States public, private, and public-private sector actions that bear on the long-term goal;
(17) provide a detailed explanation of how the measures recommended by the Strategy will ensure that they do not result in serious harm to the economy of the United States; (18) provide a detailed explanation of how the measures recommended by the Strategy will achieve the long-term goal of stabilization of greenhouse gas concentrations; (19) recommend modifications for legislative and administrative actions necessary to implement the Strategy; (20) serve as a framework for climate change response actions by all Federal agencies; (21) recommend which Federal agencies are, or should be, responsible for the various aspects of implementation of the Strategy and any budgetary implications; (22) address how the United States should engage foreign governments in developing an international response to climate change; and (23) be subject to review by an independent review board in accordance with section 1019.

(b) Submission to Congress.—Not later than 1 year after the date of enactment of this title, the President shall submit to Congress an updated Strategy to Congress under subsection (b), and at the end of each of the next 4 years, the President shall submit to Congress an updated version of the Strategy.

(c) Updating.—Not later than 2 years after the date of submission of the Strategy to Congress under subsection (b), and at the end of each of the next 3 years, the President shall submit to Congress an updated version of the Strategy.

(d) White House Role.—Not later than 1 year after the date of submission of the Strategy to Congress under subsection (b), and at the end of each 1-year period thereafter, the President shall submit to Congress a report that—

(1) describes the progress on implementation of the Strategy; and
(2) provides recommendations for improvement of the Strategy and the implementation of the Strategy.

(e) Alignment With Energy, Transportation, Industrial, Agricultural, Forestry, and Other Policies.—The President, the Director of the White House Office, the Secretary, and the other members of the Interagency Task Force, in consultation with the White House Office shall establish a process for obtaining the meaning-sharing to further the understanding of the full range of climate-related international obligations.

(f) Staff.—Consistent with paragraph (2), the White House Office shall—

(1) establish policies, objectives, and priorities for the Strategy;
(2) in accordance with subsection (d), establish the Interagency Task Force to serve as the primary mechanism through which the heads of Federal agencies shall assist the Director of the White House Office in developing and implementing the Strategy;
(3) request that the heads of Federal agencies involved in climate change response actions assist the President and the heads of Federal agencies on

SEC. 1016. NATIONAL OFFICE OF CLIMATE CHANGE RESPONSIVENESS OF THE EXECUTIVE OFFICE OF THE PRESIDENT.

(a) Establishment.—

(1) IN GENERAL.—There is established, within the Executive Office of the President, the National Office of Climate Change Response.

(2) FOCUS.—The White House Office shall have the objective of achieving the long-term goal of stabilization of greenhouse gas concentrations while minimizing adverse short-term and long-term economic and social impacts.

(b) Duties.—Consistent with paragraph (2), the White House Office shall—

(1) establish policies, objectives, and priorities for the Strategy;
(2) in accordance with subsection (d), establish the Interagency Task Force to serve as the primary mechanism through which the heads of Federal agencies shall assist the Director of the White House Office in developing and implementing the Strategy;
(3) request that the heads of Federal agencies involved in climate change response actions assist the President and the heads of Federal agencies on

(1) specify, to the maximum extent practicable, the economic and environmental costs and benefits of any proposed international treaties or components of treaties that have an influence on greenhouse gas management; and
(2) assess the extent to which the treaties advance the long-term goal of stabilization of greenhouse gas concentrations, while minimizing adverse short-term and long-term economic and social impacts and considering other impacts.

(4) CONSULTATION.—

(I) WITH MEMBERS OF INTERAGENCY TASK FORCE.—To the extent practicable and appropriate, the Director of the White House Office shall consult with all members of the Interagency Task Force and other interested parties before providing advice to the President.

(II) WITH OTHER INTERESTED PARTIES.—The Director of the White House Office shall establish a process for obtaining the meaningful participation of Federal, State, tribal, and local government agencies, nongovernmental organizations, academia, scientific bodies, industry, the public, and other interested parties in the formulation of advice to be provided to the President.

(5) ANNUAL REPORTS.—The Director of the White House Office, in consultation with the Interagency Task Force and other interested parties, shall prepare an annual report for submission by the President to Congress that—

(A) assesses progress in implementation of the Strategy; (B) assesses progress, in the United States and in foreign countries, toward the long-term goal of stabilization of greenhouse gas concentrations; and

(C) addresses the totality of actions in the United States that relate to the 4 key elements.

(6) ANALYSIS.—During development of the Strategy, preparation of the annual reports submitted under paragraph (5), and provision of advice to the President and the heads of Federal agencies, the Director of the White House Office shall place significant emphasis on the use of objective, quantitative analysis and the consideration of uncertainties associated with the analysis.

(7) STAFF.—

(1) IN GENERAL.—The Director of the White House Office shall employ a professional staff of not more than 25 individuals to carry out the duties of the White House Office.

(2) INTERGOVERNMENTAL PERSONNEL AND FELLOWSHIPS.—The Director of the White House Office may use the authority provided by the Intergovernmental Personnel Act of 1970 (42 U.S.C. 4711 et seq.) and subchapter VI of chapter 33 of title 5, United States Code, and fellowships, to obtain staff from academic, scientific bodies, nonprofit organizations, and national laboratories, for appointments of a limited term.

(d) INTERAGENCY TASK FORCE.—

(1) IN GENERAL.—The Director of the White House Office shall establish the United States Climate Change Response Interagency Task Force.

(2) COMPOSITION.—The Interagency Task Force shall be composed of—

(A) the Director of the White House Office, who shall serve as Chairperson; (B) the Secretary of State; (C) the Secretary of Defense; (D) the Secretary of Commerce; (E) the Secretary of the Treasury; (F) the Secretary of Transportation; (G) the Administrator of the Environmental Protection Agency;
S1478

CONGRESSIONAL RECORD — SENATE
March 5, 2002

(I) the Administrator of the Agency for International Development;

(J) the United States Trade Representative;

(K) the National Security Advisor;

(L) the Chairman of the Council of Economic Advisers;

(M) the Chairman of the Council on Environmental Quality;

(N) the Director of the Office of Science and Technology Policy;

(O) the Chairperson of the Subcommittee on Global Change Research which performs the functions of the Committee on Earth and Environmental Sciences established by section 102 of the Global Change Research Act of 1990 (15 U.S.C. 2932); and

(P) the heads of such other Federal agencies as the Chairperson determines should be members of the Interagency Task Force.

3. STRATEGY.—

(A) IN GENERAL.—The Interagency Task Force shall serve as the primary forum through which the Federal agencies represented on the Interagency Task Force jointly—

(i) assist the Director of the White House Office in developing and updating the Strategy; and

(ii) assist the Director of the White House Office in preparing annual reports under subsection (b)(6).

(B) ASSESSED ELEMENTS.—In carrying out subparagraph (A), the Interagency Task Force shall—

(i) take into account the long-term goal and other requirements of the Strategy specified in section 1015(a);

(ii) consult with State, tribal, and local government agencies, nongovernmental organizations, academia, scientific bodies, industry, the public, and other interested parties; and

(iii) build consensus around a Strategy that is based on strong scientific, technical, and economic analyses.

4. WORKING GROUPS.—The Chairperson of the Interagency Task Force may establish such topical working groups as are necessary to carry out the duties of the Interagency Task Force.

5. PROVISION OF SUPPORT STAFF.—In accordance with procedures established by the Chairperson of the Interagency Task Force, the Federal agencies represented on the Interagency Task Force shall provide staff from the agencies to support information, data collection, and analyses required by the Interagency Task Force.

6. CHANGING OR TERMINATING THE TASK FORCE.—In the event the Chairperson or the Interagency Task Force may hold such hearings, meet and act at such times and places, take such testimony, and receive such evidence as the Interagency Task Force considers to be appropriate.

SEC. 1017. TECHNOLOGY INNOVATION PROGRAM IMPLEMENTED THROUGH THE OFFICE OF CLIMATE CHANGE TECHNOLOGY OF THE DEPARTMENT OF ENERGY.

(a) Establishment of Office of Climate Change Technology of the Department of Energy.—

1. IN GENERAL.—There is established, within the Department, the Office of Climate Change Technology.

2. DUTIES.—The Department Office shall—

(A) develop and implement research and development programs that will directly support the Strategy by—

(i) focusing on high-risk, bold, breakthrough technologies that will have significant promise of contributing to the national climate change policy of long-term stabilization of greenhouse gas concentrations; and

(aa) mitigating the emissions of greenhouse gases; (bb) removing and sequestering greenhouse gases from emission streams; or (cc) removing and sequestering greenhouse gases from the atmosphere; and

(ii) not be designed significantly by other Federal programs; and

(iii) represent a substantial advance beyond technology available on the date of enactment of the Act.

(B) STRATEGY.—The Director of the Department Office shall develop a strategy for the implementation of alternative climate change response strategies with other members of the Interagency Task Force to assist all members in understanding—

(I) the scale of the climate change response challenge; and

(II) how the actions of the Federal agencies of the members positively or negatively contribute to climate change solutions; and

(I) determine how the energy technology research and development program described in subsection (a)(2)(A) can be designed for maximum impact on the long-term goal of stabilization of greenhouse gas concentrations;

(D) TOOLS, DATA, AND CAPABILITIES.—The Director of the Department Office shall foster the development of tools, data, and capabilities to ensure that—

(i) the United States has a robust capability for evaluating alternative climate change response scenarios; and

(ii) the Department Office provides long-term analytical continuity during the terms of service of successive Presidents.

(E) ADVISORY DUTIES.—The Director of the Department Office shall advise the Secretary on all aspects of climate change response.

(F) ANNUAL REPORTS.—The Director of the Department Office shall prepare an annual report for submission by the Secretary to Congress and the White House Office that—

(A) assesses progress toward meeting the goals of the energy technology research and development program described in subsection (a)(2)(A);

(B) assesses the activities of the Department Office;

(C) assesses the contributions of all energy technology research and development programs of the Department (including science programs) to the long-term goal and other requirements of the Strategy specified in section 1015(a); and

(D) makes recommendations for actions by the Department and other Federal agencies to assess the progress of the energy development that are necessary to support the Strategy.

(G) ANALYSIS.—During development of the Strategy, annual reports submitted under paragraph (6), and advice to the Secretary, the Director of the Department Office shall place significant emphasis on the use of objective, quantitative analysis, taking into consideration any associated uncertainties.

(H) STAFF.—The Director of the Department Office shall employ a professional staff of more than 100 for the purpose of carrying out the duties of the Department Office.

(I) INTERGOVERNMENTAL PERSONNEL AND FELLOWSHIPS.—The Department Office may use the authority provided by the Intergovernmental Personnel Act of 1970 (42 U.S.C. 4701 et seq.), subchapter VI of chapter 33 of title 5, United States Code, and other Federal personnel authorities to obtain staff from academia, scientific bodies, non-profit organizations, industry, and national laboratories, for appointments of a limited term.

(J) RELATIONSHIP TO OTHER DEPARTMENT PROGRAMS.—Each project carried out by the Department Office shall—

(A) be developed only after consultation with 1 or more other appropriate program offices of the Department that support research and development in areas relating to the project; (2) be managed by the Department Office; and (3) in the case of a project that reaches a sufficient level of maturity, with the concurrence of the Department Office and an appropriate office described in paragraph (1), transferred to the appropriate office, along with the funds necessary to continue the project to the point at which non-Federal funds can provide substantial support for the project.

(K) ANALYSIS OF STRATEGIC CLIMATE CHANGE RESPONSE.—

(1) IN GENERAL.—

(A) GOAL.—The Department Office shall foster the development and application of
advanced computational tools, data, and capabilities that, together with the capabilities of other federal agencies, support integrated assessment of alternative climate change scenarios and implementation of the Strategy.

(B) PARTICIPATION AND SUPPORT.—Projects supported by the Department Office may include (and be supported by), other Federal agencies that have a role in the development, commercialization, or transfer of energy, transportation, industrial, tribal, and international carbon change-related technology.

(2) PROGRAMS.—
(A) IN GENERAL.—The Department Office shall—
(i) develop and maintain core analytical competencies and complex, integrated computational modeling capabilities that, together with the capabilities of other Federal agencies, are necessary to support the design and implementation of the Strategy; and
(ii) track United States and international progress toward the long-term goal of stabilization of greenhouse gas concentrations.

(B) INTERNATIONAL CARBON DIOXIDE SEQUESTRATION AND DATA PROGRAM.—In consultation with Federal, State, academic, scientific, private sector, nongovernmental, tribal, and international carbon capture and sequestration technology programs, the Department Office shall design and carry out an international carbon dioxide sequestration monitoring and data program to collect, analyze, and make available the technical and economic data to ascertain—
(i) whether engineered sequestration and terrestrial sequestration will be acceptable technologies from regulatory, economic, and international perspectives; and
(ii) whether carbon dioxide sequestered in geological formations is permanent and has inconsequential leakage rates on a geologic time-scale; and
(iii) the extent to which forest, agricultural, and other terrestrial systems are suitable carbon sinks.

(3) AREAS OF EXPERTISE.—
(A) IN GENERAL.—The Department Office shall develop and maintain expertise in integrated assessment, modeling, and related capabilities necessary—
(i) to understand the relationship between natural, agricultural, industrial, energy, and economic systems;
(ii) to design effective research and development programs; and
(iii) to develop and implement the Strategy.

(B) TECHNOLOGY TRANSFER AND DIFFUSION.—() In general, the Department Office shall include knowledge of technology transfer and technology diffusion in United States markets and foreign markets.

(1) TERRITORIAL INFORMATION.—The Department Office shall ensure, to the maximum extent practicable, that technical and scientific knowledge relating to greenhouse gas capture, avoidance, and sequestration is broadly disseminated through publications, fellowships, and training programs.

(5) ASSESSMENTS.—In a manner consistent with the Strategy, the Department shall conduct assessments of deployment of climate-friendly technology.

(6) USE OF PRIVATE SECTOR FUNDING.—
(A) IN GENERAL.—The Department Office shall create an operating model that allows for collaboration, division of effort, and cost sharing across industry on individual climate change response projects.

(B) REQUIREMENTS.—Although cost sharing in some cases may be appropriate, the Department Office should not make industrial partnerships or cost sharing a requirement, if such a requirement would bias the activities of the Department Office toward incremental innovations.

(C) EVALUATION OF TECHNOLOGY TRANSFER AND DEVELOPMENT PROGRAMS.—At such time as the Department Office determines that a research and development program reaches a sufficient level of technological maturity such that the program is transitioned to a program office within the Department other than the Department Office, the cost-sharing requirements and criteria applicable to the program should be reevaluated.

(D) PUBLICATION IN FEDERAL REGISTER.—Each cost-sharing agreement entered into under this subparagraph shall be published in the Federal Register.

SEC. 1018. ADDITIONAL OFFICES AND ACTIVITIES.

The Secretary of Agriculture, the Secretary of Transportation, the Secretary of Commerce, the Administrator of the Environmental Protection Agency, and the heads of other Federal agencies may establish such offices and carry out such activities, as in addition to those established or authorized by this Act, as are necessary to carry out this Act.

SEC. 1019. UNITED STATES CLIMATE CHANGE RESPONSE STRATEGY REVIEW BOARD.

(a) ESTABLISHMENT.—There is established as an independent establishment within the executive branch the United States Climate Change Response Strategy Review Board. 

(b) MEMBERSHIP.—
(1) COMPOSITION.—The Review Board shall consist of 11 members who shall be appointed, not later than 90 days after the date of enactment of this Act, after and with the advice and consent of the Senate, from among qualified individuals nominated by the National Academy of Sciences in accordance with paragraph (ii).

(2) NOMINATIONS.—Not later than 60 days after the date of enactment of this Act, after taking into consideration the guidance and recommendations of a broad range of scientific and technical societies that have the capability of recommending qualified individuals, the National Academy of Sciences shall make appointment to the Review Board not fewer than 22 individuals who—
(A) are—
(i) qualified individuals; or
(ii) experts in a field of knowledge specified in section 1014(9); and
(B) as a group represent broad, balanced expertise.

(3) PROHIBITION ON FEDERAL GOVERNMENT EMPLOYMENT.—A member of the Review Board shall not be an employee of the Federal Government.

(4) TERMS; VACANCIES.—
(A) TERMS.—
(i) IN GENERAL.—Subject to clause (ii), each member of the Review Board shall be appointed for a term of 4 years.

(ii) INITIAL TERMS.—
(I) COMMENCEMENT DATE.—The term of each member initially appointed to the Review Board shall commence 120 days after the date of enactment of this title.

(II) TERMINATION DATE.—Of the 11 members initially appointed to the Review Board, 5 members shall be appointed to serve for 2 years and 6 members shall be appointed for a term of 4 years, to be designated by the President at the time of appointment.

(B) VACANCIES.—
(i) IN GENERAL.—A vacancy on the Review Board shall be filled in the manner described in this subparagraph.

(ii) NOMINATIONS BY THE NATIONAL ACADEMY OF SCIENCES.—Not later than 60 days after the date on which a vacancy commences, the National Academy of Sciences shall—
(I) after taking into strong consideration the guidance and recommendations of a broad range of scientific and technical societies that have the capability of recommending qualified individuals, nominate, from among qualified individuals, not fewer than the number required to fill the vacancy, and
(II) submit the names of the nominees to the President.

(iii) SELECTION.—Not later than 30 days after the date on which the nominations under clause (ii) are submitted to the President, the President shall select from among the nominees an individual to fill the vacancy.

(iv) SENATE CONFIRMATION.—An individual appointed to fill a vacancy on the Review Board shall be confirmed by and with the advice and consent of the Senate.

(5) APPLICABILITY OF ETHICS IN GOVERNMENT ACT OF 1978.—A member of the Review Board shall be deemed to be an individual subject to the Ethics in Government Act of 1978 (5 U.S.C. App.).

(6) CHAIRPERSON; VICE CHAIRPERSON.—The members of the Review Board shall select a Chairperson and a Vice Chairperson from among the members of the Review Board.

(C) REEVALUATION ON TRANSITION.—
(A) IN GENERAL.—Not later than 180 days after the date of submission of the initial report under section 1015(c), the President, or Congress, at the President’s request, may provide for reevaluation of the United States Climate Change Response Strategy Review Board.

(B) MEMBERSHIP.—
(1) COMPOSITION.—The Review Board shall consist of 11 members who shall be appointed, not later than 90 days after the date of enactment of this Act, after and with the advice and consent of the Senate, from among qualified individuals nominated by the National Academy of Sciences in accordance with paragraph (ii).

(2) NOMINATIONS.—Not later than 60 days after the date of enactment of this Act, after taking into consideration the guidance and recommendations of a broad range of scientific and technical societies that have the capability of recommending qualified individuals, the National Academy of Sciences shall make appointment to the Review Board not fewer than 22 individuals who—
(A) are—
(i) qualified individuals; or
(ii) experts in a field of knowledge specified in section 1014(9); and
(B) as a group represent broad, balanced expertise.

(3) PROHIBITION ON FEDERAL GOVERNMENT EMPLOYMENT.—A member of the Review Board shall not be an employee of the Federal Government.

(4) TERMS; VACANCIES.—
(A) TERMS.—
(i) IN GENERAL.—Subject to subparagraph (B), each member of the Review Board shall be appointed for a term of 4 years.

(ii) INITIAL TERMS.—
(I) COMMENCEMENT DATE.—The term of each member initially appointed to the Review Board shall commence 120 days after the date of enactment of this title.

(II) TERMINATION DATE.—Of the 11 members initially appointed to the Review Board, 5 members shall be appointed to serve for 2 years and 6 members shall be appointed for a term of 4 years, to be designated by the President at the time of appointment.

(B) VACANCIES.—
(i) IN GENERAL.—A vacancy on the Review Board shall be filled in the manner described in subparagraph (A).

(ii) NOMINATIONS.—
(I) IN GENERAL.—Subject to paragraph (A), the Review Board, at the request of the President or Congress, may provide recommendations on additional climate change-related topics.

(1) COMMISSIONING DATE.—The term of each member initially appointed to the Review Board shall commence 120 days after the date of enactment of this title.

(2) COMMENTS.—In reviewing the Strategy or a report under paragraph (1), the Review Board shall consider and comment on—
(A) the adequacy of effort and the appropriateness of focus of the totality of all public spending, and the effectiveness of Federal agencies with respect to the 4 key elements; and
(B) the extent to which actions of the United States, with respect to climate change, complement or leverage international research and other efforts designed to manage global stocks of greenhouse gases, to further the long-term goal of stabilization of greenhouse gas concentrations;

(C) the funding implications of any recommendations made by the Review Board; and

(D) the effectiveness with which each Federal agency is carrying out the responsibilities of the Federal agency with respect to the short-term and long-term greenhouse gas management goals; and

the adequacy of the budget of each such Federal agency to carry out those responsibilities.

(3) ADDITIONAL RECOMMENDATIONS.—
(A) IN GENERAL.—Subject to paragraph (B), the Review Board, at the request of the President or Congress, may provide recommendations on additional climate change-related topics.

(B) PRIORITY.

(1) Hearings.—On request of the Chairperson or a majority of the Members of the Review Board, the Review Board may hold such hearings, meet and act at such times and places, take such testimony, and receive such evidence as the Review Board considers to be appropriate.

(C) ADMINISTRATION OF OATHS.—Any member of the Review Board may administer an oath or affirmation to any witness that appears before the Review Board.
White House Office to carry out the duties of the White House Office under this Title $5,000,000 for each of fiscal years 2003 through 2011, to remain available through September 30, 2011.

(b) DEPARTMENT OFFICE.

(1) USE OF AVAILABLE APPROPRIATIONS.—From funds made available to Federal agencies for the fiscal year in which this title is enacted, the President shall provide such sums as are necessary to carry out the duties of this Title to remain available through September 30, 2011.

(c) REVIEW BOARD.

(1) USE OF AVAILABLE APPROPRIATIONS.—From funds made available to Federal agencies for the fiscal year in which this title is enacted, the President shall provide such sums as are necessary to carry out the duties of the Department Office under this Title to remain available through September 30, 2011.

The Review Board shall be subject to confirmation by the Senate. The employment of an executive director and other personnel with the Review Board shall be subject to confirmation by the Senate. The Review Board shall be subject to confirmation by subchapter III of chapter 53 of title 5, United States Code, for each of fiscal years 2003 through 2011, to remain available through September 30, 2011.

The Review Board may use the United States mails in the same manner and under the same conditions as are necessary to enable the Review Board to carry out the duties of the Review Board.

(g) STAFF.—(1) The Review Board may, without regard to the provisions of title 5, United States Code, regarding appointments in the competitive service, appoint and terminate an executive director and other personnel with the Review Board as are necessary to enable the Review Board to perform the duties of the Review Board. The employment of an executive director shall be subject to confirmation by the Senate.

(2) CONFIRMATION OF EXECUTIVE DIRECTOR.—The employment of an executive director shall be subject to confirmation by the Senate.

(3) COMPENSATION.—(a) (1) The Review Board may, without regard to the provisions of title 5, United States Code, regarding compensation of employees of an agency, pay for the executive director and other personnel with the Review Board as are necessary to enable the Review Board to perform the duties of the Review Board.

(b) USE OF AVAILABLE APPROPRIATIONS.—From funds made available to Federal agencies for the fiscal year in which this title is enacted, the President shall provide such sums as are necessary to carry out the duties of the Review Board under this title to remain available through September 30, 2011.

(f) TRAVEL EXPENSES.—There is authorized to be appropriated to the Review Board under this title $3,000,000 for each of fiscal years 2003 through 2011, to remain available through September 30, 2011.

The Review Board, and subject to applicable law, may use the United States mails in the same manner and under the same conditions as are necessary to enable the Review Board to carry out the duties of the Review Board.
SEC. 1104. NATIONAL GREENHOUSE GAS DATABASE.

(a) Establishment.—The Designated Agency or Agencies shall provide a comprehensive system for greenhouse gas emissions reporting, inventorying and reductions registration. The Designated Agency or Agencies shall ensure that the system is designed to maximize completeness, transparency, and accuracy and to minimize measurement and reporting costs for covered entities.

(b) Required Elements of Database Reporting System.

(1) MANDATORY REPORTING.

(A) Beginning one year after promulgation of the final rule under paragraph (c), each entity that exceeds the greenhouse gas emissions threshold in paragraph (2) shall report annually to the Designated Agency or Agencies, for inclusion in the National Greenhouse Gas Database, the entity-wide emissions of greenhouse gases in the previous calendar year. Such reports are due annually to the Designated Agency or Agencies, but must be submitted no later than April 30 of each calendar year in support of the previous year’s emission reporting requirements. The Designated Agency or Agencies shall provide information sufficient for the Designated Agency or Agencies to verify, and analyze information on—

(i) direct emissions from stationary sources;

(ii) direct emissions from vehicles owned or controlled by a covered entity;

(iii) direct emissions from any land use activities that release significant quantities of greenhouse gases;

(iv) indirect emissions from all outsourced activities, contract manufacturing, wastes transferred from the control of an entity, and other relevant categories as determined to be practicable under the rule;

(v) indirect emissions from electricity, heat, and steam imported from another entity, as determined to be practicable under the rule;

(vi) the production, distribution or import of greenhouse gases listed under section 1102(b) by an entity; and

(vii) such other categories, which the Designated Agency or Agencies determine by rule, after public notice and comment, should be included to accomplish the purposes of this title.

(B) Each report submitted shall include—

(i) actual reductions in direct greenhouse gas emissions activities carried out since 1990 and verified according to rules implementing subparagraphs (6) and (8) of this subparagraph and submitted to the Designated Agency or Agencies before the date that is three years after the date of enactment of this title, those reductions that have been incorporated or submitted by an entity under section 1605(b) of the Energy Policy Act of 1992 (42 U.S.C. 13385(b)) or under other Federal or State voluntary greenhouse gas reduction programs.

(C) Each report shall include total mass quantities for each greenhouse gas emitted, and in terms of carbon dioxide equivalent.

(D) Each report shall include the greenhouse gas emissions per unit of output by an entity, such as tons of carbon dioxide per kilowatt-hour of electricity.

(E) The first report shall be required to be submitted not later than April 30 of the fourth year after the date of enactment of this title.

(2) THRESHOLD FOR REPORTING.

(A) An entity shall not be required to make a report under paragraph (1) unless—

(i) the total greenhouse emissions of at least one facility owned by an entity in the calendar year for reporting exceeds 10,000 metric tons of carbon dioxide equivalent, or a greater level as determined by rule; or

(ii) the total quantity of greenhouse gases produced, distributed or imported by the entity exceeds 10,000 metric tons of carbon dioxide equivalent, or a greater level as determined by rule.

(B) The final rule promulgated under section 1102(b) shall provide that the rule with respect to the threshold for reporting in subparagraph (A) shall capture information on no less than 75 percent of anthropogenic greenhouse gas emissions from entities.

(3) METHOD OF REPORTING.—Entity-wide emissions shall be reported at the facility level.

(4) ADDITIONAL VOLUNTARY REPORTING.—An entity may voluntarily report to the Designated Agency or Agencies, for inclusion in the registry of the national database—

(A) with respect to the preceding calendar year and any greenhouse gas emitted by the entity—

(i) project reductions from facilities owned or controlled by the reporting entity in the United States;

(ii) transfers of project reductions to and from any other entity;

(iii) project reductions and transfers of project reductions outside the United States;

(iv) other indirect emissions that are not required to be reported under paragraph (d); and

(v) product use phase emissions; and

(B) with respect to greenhouse gas emissions reductions activities carried out since 1990 and verified according to rules implementing subparagraphs (6) and (8) of this subparagraph and submitted to the Designated Agency or Agencies before the date that is three years after the date of enactment of this title, those reductions that have been incorporated or submitted by an entity under section 1605(b) of the Energy Policy Act of 1992 (42 U.S.C. 13385(b)) or under other Federal or State voluntary greenhouse gas reduction programs.

(5) TYPES OF ACTIVITIES.—Under paragraph (4), an entity may report projects that reduce greenhouse gas emissions or sequester a greenhouse gas including—

(A) fuel switching;

(B) energy efficiency improvements;

(C) use of renewable energy; and

(D) use of combined heat and power systems;

(E) management of cropland, grassland, and grazing land; and

(F) forestry activities that increase forest carbon stocks or reduce forest carbon losses;

(G) carbon capture and storage;

(H) methane recovery; and

(I) greenhouse gas offset investments.

(6) PROVISION OF VERIFICATION INFORMATION BY REPORTING ENTITIES.—Each reporting entity shall provide information sufficient for the Designated Agency or Agencies to verify, in accordance with measurement and verification criteria developed under Section 1102(b), the greenhouse gas report of the reporting entity—

(A) that has been accurately reported; and

(B) in the case of each additional voluntary report, represented by—

(i) actual reductions in direct greenhouse gas emissions relative to historic emission levels and net of any increases in direct emissions; and

(ii) actual increases in net sequestration.

(7) INDEPENDENT THIRD-PARTY VERIFICATION.—The total greenhouse gas reporting entity—

(A) obtain independent third-party verification; and

(B) shall not be subject to judicial review.
(B) present the results of the third-party verification to the Designated Agency or Agencies for consideration by the Designated Agency or Agencies in carrying out paragraphs (A) and (B) of subsections (1) and (2) that the Designated Agencies or Agencies—

(8) DATA QUALITY.—The rule under subsection (c) shall establish procedures and protocols needed to—

(A) prevent the reporting of some or all of the same greenhouse gas emissions or emission reductions by more than one reporting entity;

(B) provide for adjustments to reflect new technologies or methods for measuring or calculating greenhouse gas emissions; and

(C) account for changes in registration of ownership of emissions reductions resulting from a voluntary private transaction between reporting entities.

(9) AVAILABILITY OF DATA.—The Designated Agency or Agencies shall ensure that the information in the database is published, accessible to the public, and made available in electronic format on the Internet, except in cases where the Designated Agency or Agencies determine that publishing or making available the information would disclose information vital to national security.

(10) DATA INFRASTRUCTURE.—The Designated Agency or Agencies shall ensure that the database established by this Act shall utilize and is integrated with existing Federal, state, local, and private greenhouse gas data collection and reporting systems to the maximum extent possible and avoid duplication of such systems.

(11) ADDITIONAL ISSUES TO BE CONSIDERED.—

In promulgating the rules for and implementing the Database, the Designated Agency or Agencies shall consider a broad range of issues involved in establishing an effective database, including the following:

(A) UNITS FOR REPORTING.—The appropriate units for reporting each greenhouse gas, and whether to require reporting of emission efficiency rates (including emissions per kilo watt-hour for electricity generators) in addition to greenhouse gas emissions.

(B) INTERNATIONAL CONSISTENCY.—The greenhouse gas reduction and sequestration methods and standards applied in other countries, as applicable or relevant; and

(C) DATA SUFICIIENCY.—The extent to which available fossil fuels, greenhouse gas emissions, and greenhouse gas production and importation data are adequate to implement a comprehensive National Greenhouse Gas Database.

(e) ENFORCEMENT.—The Attorney General may, at the request of the Designated Agency or Agencies, bring a civil action in the United States District Court against an entity that

fails to comply with reporting requirements under this section, to impose a civil penalty of not more than $25,000 for each day that the failure to comply continues.

(f) ANNUAL REPORT.—The Designated Agency or Agencies shall publish an annual report that—

(1) describes the total greenhouse gas emissions and emission reductions reported to the database;

(2) provides entity-by-entity and sector-by-sector analyses of the emissions and emission reductions reported; and

(3) reflects recent atmospheric concentrations of greenhouse gases and tracks such information over time.

SEC. 1105. REPORT ON STATUTORY CHANGES AND HARMONIZATION.

Not later than 3 years after the date of enactment of this title, the President shall submit a report identifying any changes needed to this title or to other provisions of law to improve the accuracy or operation of the Database and related programs under this title.

SEC. 1106. MEASUREMENT AND VERIFICATION.

The Designated Agency or Agencies shall, not later than 1 year after the date of enactment of this title, establish procedures and standards needed to ensure a consistent and technically accurate record of greenhouse gas emissions, reductions, and atmospheric concentrations for use in the national greenhouse gas database. The Agency or Agencies shall periodically review and revise these methods and standards as necessary.

SEC. 1107. INDEPENDENT REVIEW.

(a) The General Accounting Office shall submit a report to Congress five years after the date of enactment of this title, and every three years thereafter, providing a review of the accuracy and consistency of the greenhouse gas database and the methods and standards used by the Agency or Agencies implementing this title, and to report to Congress not later than four years after the date of enactment of this title with recommendations for improving those methods and standards or related elements of the programs or structure of the reporting and registry system established by this title.

(b) The Designated Agency or Agencies shall enter into an agreement with the National Academy of Sciences to review the scientific methods, assumptions and standards used by the Agency or Agencies implementing this title, and to report to Congress not later than four years after the date of enactment of this title with recommendations for improving those methods and standards or related elements of the programs or structure of the reporting and registry system established by this title.

(c) There is authorized to be appropriated amounts necessary to carry out the activities and programs included in this title.

DIVISION E—ENHANCING RESEARCH, DEVELOPMENT, AND TRAINING

TITLE XII—ENERGY RESEARCH AND DEVELOPMENT PROGRAMS

SEC. 1201. SHORT TITLE.

This division may be cited as the "Energy Science and Technology Enhancement Act of 2002".

SEC. 1202. FUNDING.

The Congress finds the following:

(1) A coherent national energy strategy requires an energy research and development program that supports basic energy research and provides mechanisms to develop, demonstrate, and deploy new energy technologies in partnership with industry.

(2) An aggressive national energy research, development, demonstration, and technology deployment program is an integral part of a national climate change strategy, because it can reduce—

(A) United States energy intensity by 1.9 percent per year from 1999 to 2030;

(B) United States energy consumption in 2020 by 8 quadrillion Btu from otherwise expected levels;

(C) United States carbon dioxide emissions from expected levels by 166 million metric tons in carbon equivalent in 2020.

(3) An aggressive national energy research, development, demonstration, and technology deployment program can help maintain domestic United States production of energy, increase United States hydrocarbon reserves by 14 percent, and lower natural gas prices by 20 percent, compared to estimates for 2020.

(4) An aggressive national energy research, development, demonstration, and technology deployment program is needed if United States suppliers are to be able to compete in future markets for advanced energy technologies.

SEC. 1203. DEFINITIONS.

In this title—

(1) DEPARTMENT.—The term "Department" means the Department of Energy.

(2) DEVELOPMENT.—The term "development" means to develop in partnership with industry, government, and the academic community, missions and programs that are designed to enable the United States to compete in future markets for advanced energy technologies.

(3) INSTITUTION OF HIGHER EDUCATION.—The term "institute of higher education" has the meaning given that term in section 1001(a) of the Higher Education Act of 1965 (20 U.S.C. 1001).

(4) NATIONAL LABORATORY.—The term "National Laboratory" means any of the following:

(A) Argonne National Laboratory;

(B) Brookhaven National Laboratory;

(C) Idaho National Engineering and Environmental Systems Laboratory;

(D) Lawrence Berkeley National Laboratory;

(E) Lawrence Livermore National Laboratory;

(F) Los Alamos National Laboratory;

(G) National Energy Technology Laboratory;

(H) National Renewable Energy Laboratory;

(I) Oak Ridge National Laboratory;

(J) Pacific Northwest National Laboratory; or

(K) Sandia National Laboratory.

(5) SECRETARY.—The term "Secretary" means the Secretary of Energy.

(7) SUSTAINABILITY.—The term "sustainability" means activities that provide for improving those methods and standards or related elements of the programs or structure of the reporting and registry system established by this title.

(8) DATA QUALITY.—The term "data quality" means activities to monitor and report identify and correct errors in data submitted to the database.

(9) DATA INFRASTRUCTURE.—The term "data infrastructure" means activities to establish and maintain the capability to collect, store, and analyze comprehensive measurement and verification data, including the development of appropriate technical standards and methods.

(11) ANNUAL REPORT.—The Designated Agency or Agencies shall publish an annual report that—

(1) describes the total greenhouse gas emissions and emission reductions reported to the database;

(2) provides entity-by-entity and sector-by-sector analyses of the emissions and emission reductions reported; and

(3) includes recent atmospheric concentrations of greenhouse gases and tracks such information over time.

(12) INDEPENDENT REVIEW.—The term "independent review" means activities to monitor and report identify and correct errors in data submitted to the database.

(13) DEPARTMENT.—The term "Department" means the Department of Energy.

(14) DEVELOPMENT.—The term "development" means to develop in partnership with industry, government, and the academic community, missions and programs that are designed to enable the United States to compete in future markets for advanced energy technologies.

(15) INSTITUTION OF HIGHER EDUCATION.—The term "institute of higher education" has the meaning given that term in section 1001(a) of the Higher Education Act of 1965 (20 U.S.C. 1001).

(16) NATIONAL LABORATORY.—The term "National Laboratory" means any of the following:

(A) Argonne National Laboratory;

(B) Brookhaven National Laboratory;

(C) Idaho National Engineering and Environmental Systems Laboratory;

(D) Lawrence Berkeley National Laboratory;

(E) Lawrence Livermore National Laboratory;

(F) Los Alamos National Laboratory;

(G) National Energy Technology Laboratory;

(H) National Renewable Energy Laboratory;

(I) Oak Ridge National Laboratory;

(J) Pacific Northwest National Laboratory; or

(K) Sandia National Laboratory.

(17) SECRETARY.—The term "Secretary" means the Secretary of Energy.

(19) SUSTAINABILITY.—The term "sustainability" means activities that provide for improving those methods and standards or related elements of the programs or structure of the reporting and registry system established by this title.

(20) DATA QUALITY.—The term "data quality" means activities to monitor and report identify and correct errors in data submitted to the database.

(21) DATA INFRASTRUCTURE.—The term "data infrastructure" means activities to establish and maintain the capability to collect, store, and analyze comprehensive measurement and verification data, including the development of appropriate technical standards and methods.

(23) ANNUAL REPORT.—The Designated Agency or Agencies shall publish an annual report that—

(1) describes the total greenhouse gas emissions and emission reductions reported to the database;

(2) provides entity-by-entity and sector-by-sector analyses of the emissions and emission reductions reported; and

(3) includes recent atmospheric concentrations of greenhouse gases and tracks such information over time.

(24) INDEPENDENT REVIEW.—The term "independent review" means activities to monitor and report identify and correct errors in data submitted to the database.
(A) cut the energy use of new housing by 50 percent, and
(B) reduce energy use in existing homes by 30 percent.

3. **INDUSTRIAL ENERGY EFFICIENCY.—The goal of the industrial energy efficiency pro-
gram shall be to develop, in partnership with industry, enabling technologies, designs, pro-
ducts and services to support activities that will, by 2010, enable energy-intensive indus-
tries such as the following industries to reduce their energy intensity by at least 25 percent:

(A) the wood product manufacturing industry;
(B) the pulp and paper industry;
(C) the petroleum and coal products manu-
ufacturing industry;
(D) the mining industry;
(E) the chemical manufacturing industry;
(F) the glass and glass product manufac-
turing industry;
(G) the iron and steel mills and ferroalloy manufactur-
ing industry;
(H) the primary aluminum production in-
dustry;
(I) the foundries industry; and
(J) U.S. agriculture.

4. **TRANSPORTATION ENERGY EFFICIENCY.—The goal of the transportation energy effi-
ciency program shall be to develop, in partnership with industries that will enable the achievement—

(A) by 2010, passenger automobiles with a fuel economy of 80 miles per gallon;
(B) by 2010, light trucks (classes 1 and 2a) with a fuel economy of 60 miles per gallon;
(C) by 2010, medium trucks and buses (classes 2b through 6 and class 8 transit buses) with a fuel economy, in ton-miles per gallon, that is three times that of year 2000 equivalent vehicles;
(D) by 2010, heavy trucks (classes 7 and 8) with a fuel economy, in ton-miles per gallon, that is two times that of year 2000 equivalent vehicles; and
(E) by 2015, the production of fuel-cell pow-
ered passenger vehicles with a fuel economy of 110 miles per gallon.

5. **ENERGY EFFICIENT DISTRIBUTED GENERA-
TION.—The goals of the energy efficient on-
site generation program shall be to help re-
move environmental and regulatory barriers to on-site, or distributed, generation and combi-
nerguyen ti power by developing technologies by 2015 that achieve—

(A) electricity generation efficiencies greater than 40 percent for on-site genera-
tion technologies based on natural gas, in-
cluding fuel cells, microturbines, reciproc-
cating engines and industrial gas turbines;
(B) combined heat and power total (elec-
tric and thermal) efficiencies of more than 85 percent;
(C) fuel flexibility to include hydrogen, biofuels and natural gas;
(D) near zero emissions of pollutants that form smog and acid rain;
(E) reduction of carbon dioxide emissions by at least 40 percent;
(F) paced system integration at end user facilities providing complete services in heating, cooling, electricity and air quality; and
(G) increased reliability for the consumer and greater stability for the national electric-
grid.

6. **AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary for carrying out research, de-
velopment, demonstration, and technology deployments under this subtitle:

(1) $700,000,000 for fiscal year 2003;
(2) $781,000,000 for fiscal year 2004;
(3) $878,000,000 for fiscal year 2005; and
(4) $983,000,000 for fiscal year 2006.

7. **LIMITATION ON USE OF FUNDS.—None of the funds authorized to be appropriated in

(subsection (c) may be used for the following programs of the Department—

1. **Weatherization Assistance Program:** This amount is used for the following programs of the Department—

2. **State Energy Program:** This amount shall be used to provide matching funds for the following programs of the Department—

3. **Federal Energy Program:** This amount shall be used to provide matching funds for the following programs of the Department—

**SEC. 1212. ENERGY EFFICIENCY SCIENCE INITIA-
TIVE.**

(a) **ESTABLISHMENT AND AUTHORIZATION OF APPROPRIATIONS.—From amounts authorized under section 1211(c), there are authorized to be appropriated not more than $50,000,000 in any fiscal year, for an Energy Efficiency Science Initiative to be managed by the Assistant Secretary in the Department with re-
ponsibility for energy conservation under section 203(a)(9) of the Department of Energy Organization Act (42 U.S.C. 7139). In consultation with the Director of the Office of Science, for grants to be competitively awarded and subject to peer review for re-
search relating to energy efficiency.
(b) **REPORT.—The Secretary of Energy shall submit to the Committee on Science and the Committee on Appropriations of the United States House of Representatives, and to the Committee on Energy and Natural Resources and the Committee on Appropriations of the United States Senate, an annual report on the activities of the Energy Efficiency Science Initiative, including a description of the process used to award the funds and an explanation of how the research relates to energy efficiency.

**SEC. 1213. NEXT GENERATION LIGHTING INITIA-
TIVE.**

(a) **ESTABLISHMENT.—There is established in the Department a Next Generation Light-
ing Initiative to research, develop, and con-
duct demonstration activities on advanced solid-state lighting technologies based on white light emitting diodes.
(b) **OBJECTIVES.—
(1) **IN GENERAL.—The objectives of the ini-
tiative shall be to develop, by 2011, advanced solid-state lighting technologies based on white light emitting diodes that, compared to incandescent and fluorescent lighting technologies, are—
(A) longer lasting;
(B) more energy-efficient; and
(C) cost-competitive.
(2) **INORGANIC WHITE LIGHT EMIT-
TING DIODES.—The objective of the initiative with respect to inorganic white light emitting di-
odes shall be to develop an inorganic white light emitting diode that has an efficiency of 180 lumens per watt and a 10-year lifetime.
(3) **ORGANIC WHITE LIGHT EMIT-
TING DIODE.—The objective of the initiative with respect to organic white light emitting diodes shall be to develop a light emitting diode with an efficiency of 100 lumens per watt with a 5-year lifetime that—
(A) illuminates over a full color spectrum;
(B) covers large areas over flexible sur-
faces; and
(C) does not contain harmful pollutants typical of fluorescent lamps such as mer-
cury.
(c) **CONSORTIUM.—
(1) **IN GENERAL.—The Secretary shall ini-
tiate and manage basic and manufacturing-
related research on advanced solid-state lighting technologies based on white light emitting diodes for the initiative, in co-
operation with the Next Generation Lighting Initiative Consortium.
(2) **COMPOSITION.—The consortium shall be composed of firms, national laboratories, and other entities so that the consortium is representative of the United States solid state lighting research, development, and manufacturing expertise as a whole.

**FUNDING.—The consortium shall be funded by—

(A) participation fees; and
(B) grants provided under subsection (e)(1).

**ELIGIBILITY.—To be eligible to receive a grant under subsection (e)(1), the consortium shall—

(i) be a nonprofit organization;
(ii) have a governance structure that includes representatives of relevant stakeholders; and
(iii) have a plan for dissemination and use of the research.

**PLANNING BOARD.—The planning board shall be composed of—

(A) 4 members from universities, national laboratories, and other entities with expertise in advanced solid-state lighting; and
(B) 3 members from a list of no less than 6 industry members from industry submitted by the consortium.

**STUDY.—The study shall develop a comprehensive strategy to imple-
ment, through the initiative, the use of white light emitting diodes to increase energy efficiency and enhance United States competitiveness.

**IMPLEMENTATION.—As soon as practicable after the study is submitted to the Secretary, the Secretary shall implement the initiative in accordance with the recom-
endations of the planning board, in consultation with participants in the consortium.

**TERMINATION.—The planning board shall terminate upon completion of the study under paragraph (3).

**GRANTS.—

1. **FUNDAMENTAL RESEARCH.—The Secre-
tary, through the consortium, shall make grants to conduct basic and manufacturing-
related research related to advanced solid-
state lighting technologies based on white light emitting diode technologies.

2. **TECHNOLOGY DEVELOPMENT AND DEM-
ONSTRATION.—The Secretary shall enter into grants, contracts, and cooperative agree-
ments to conduct or promote technology re-
search, development, or demonstration ac-

**CONTINUING ASSESSMENT.—The con-
sortium, in collaboration with the Secretary, shall conduct periodic reviews of the performances of the initiative, and the Secretary shall conduct such reviews as the Secretary deems necessary to determine the merits of the initiative, and the Secretary shall make such reviews as the Secretary deems necessary to determine the performance of the initiative, and the Secretary shall make such reviews as the Secretary deems necessary to determine the performance of the initiative, and the Secretary shall make such reviews as the Secretary deems necessary to determine the performance of the initiative.

**AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary for carrying out the research, develop-
ment, demonstration, and technology deployment activities under this subtitle:

(1) $700,000,000 for fiscal year 2003;
(2) $781,000,000 for fiscal year 2004;
(3) $878,000,000 for fiscal year 2005; and
(4) $983,000,000 for fiscal year 2006.

**LIMITATION ON USE OF FUNDS.—None of the funds authorized to be appropriated in
(4) **Technical Assistance.**—The National Laboratories shall cooperate with and provide technical assistance to persons carrying out projects under the initiative.

(a) **Authorization.**—In general. The Secretary shall retain an independent, commercial auditor to determine the extent to which funds made available under section 1221(b) have been expended in a manner that is consistent with the objectives under subsection (b) and, in the case of funds made available under the consortium, the annual program plan of the consortium under subsection (c)(4)(B).

(b) **Reports.**—The auditor shall submit to Congress, the Secretary, and the Comptroller General of the United States an annual report containing the results of the audit.

(c) **Applicable Law.**—Grants, contracts, and cooperative agreements under this section shall not be subject to the Federal Acquisition Regulation.

(d) **Protection of Information.**—Information obtained by the Federal Government on a confidential basis under this section shall be considered to constitute trade secrets and commercial or financial information obtained from a person and privileged or confidential, as defined in section 552(b)(4) of title 5, United States Code.

(e) **Authorization of Appropriations.**—In addition to the amounts authorized under section 1221(c), there are authorized to be appropriated for activities under this section $50,000,000 for each of fiscal years 2003 through 2007 in order to assist in:

(h) **Definitions.**—In this section:

(1) **Advanced solid-state lighting.**—The term "advanced solid-state lighting" means a semiconductor device package and delivery system that produces white light using externally applied voltage.

(2) **Consortium.**—The term "consortium" means the Consortium for Next Generation Lighting Initiative established under subsection (c).

(3) **Initiative.**—The term "initiative" means the Next Generation Lighting Initiative established under subsection (a).

(a) **Inorganic white light emitting diode.**—The term "inorganic white light emitting diode" means an inorganic semiconductor device package and delivery system that produces white light using externally applied voltage.

(b) **Organic white light emitting diode.**—The term "organic white light emitting diode" means an organic semiconductor device package and delivery system that produces white light using externally applied voltage.

(c) **White light emitting diode.**—The term "white light emitting diode" means:

(A) an inorganic white light emitting diode; or

(B) an organic white light emitting diode.

SEC. 1214. **Railroad Efficiency.**

(a) **Establishment.**—The Secretary shall, in cooperation with the Secretaries of Transportation and Defense, and the Administrator of the Environmental Protection Agency, establish a public-private research partnership involving the federal government, railroad carriers, locomotive manufacturers, and the Association of American Railroads. The goal of the initiative shall include developing and demonstrating locomotive technologies that increase fuel economy, reduce emissions, improve safety, and lower costs.

(b) **Authorization of Appropriations.**—There are authorized to be appropriated to carry out the purposes of this section $60,000,000 for fiscal year 2003 and $70,000,000 for fiscal year 2004.

Subtitle B—Renewable Energy

SEC. 1221. **Enhanced Renewable Energy Research and Development.**

(a) **Program Direction.**—The Secretary shall conduct balanced energy research, development, and demonstration, and technology deployment programs to enhance the use of renewable energy.

(b) **Program Goals.**—The goals of the wind power program shall be to develop, in partnership with industry, a variety of improved wind turbine manufacturing technologies that are cost-competitive with fossil-fuel generated electricity, with a focus on developing advanced low wind speed technologies that will, with the expanding utilization of widespread class 3 and 4 winds.

(2) **Photovoltaics.**—The goal of the photovoltaic program shall be to develop, in partnership with industry, total photovoltaic systems with installed costs of $4000 per peak kilowatt by 2005 and $2000 per peak kilowatt by 2015.

(3) **Solar Thermal Electric Systems.**—The goal of the solar thermal electric systems program shall be to develop, in partnership with industry, solar thermal power technologies (including solar-thermal power systems that are competitive with fossil-fuel generated electricity by 2015, by combining high-efficiency and high-temperature receivers with advanced thermal storage and power cycles.

(4) **Biomass-Based Power Systems.**—The goal of the biomass-based power systems program shall be to develop, in partnership with industry, integrated power-generating systems, advanced conversion, and feedstock technologies capable of producing power that is cost-competitive with fossil-fuel generated electricity by 2010, together with the production of fuels, chemicals, and other products under paragraph (6).

(5) **Geothermal Energy.**—The goal of the geothermal program shall be to develop, in partnership with industry, integrated systems for geothermal systems and advanced heat and power systems, including geothermal heat pump technology, with a specific focus on:

(A) improving exploration and characterization technology to increase the probability of drilling successful wells from 20 percent to 40 percent by 2006;

(B) reducing the cost of drilling by 2008 to an average cost of $150 per foot; and

(C) developing enhanced geothermal systems technical tools to double the usable geothermal resource base.

(6) **Biofuels.**—The goal of the biofuels program shall be to develop, in partnership with industry, advanced bioconversion and thermochemical conversion technologies capable of making liquid and gaseous fuels from cellulose feedstocks, that are price-competitive with gasoline or diesel, in either internal combustion engines or fuel cell vehicles, by 2010.

(7) **Hydrogen-Based Energy Systems.**—The goal of the hydrogen energy systems program shall be to support research and development on technologies for production, storage, and use of hydrogen, including fuel cells and, specifically, fuel-cell power plant development activities under section 1211.

(8) **Hydropower.**—The goal of the hydropower program shall be to develop, in partnership with industry, a new generation of turbine technologies that are less damaging to fish and aquatic ecosystems.

(9) **Electric Energy Systems and Storage.**—The goal of the electric energy systems and storage program shall be to develop, in partnership with industry—

(A) generators and transmission, distribution, and energy storage systems that combine high capacity with high efficiency;

(B) technologies to interconnect distributed energy resources with electric power transmission and distribution systems, including the creation of advanced interconnection standards, have a minimum 10-year useful life;

(C) advanced technologies to increase the average efficiency of electric transmission facilities in rural and remote areas, giving priority for demonstrations to advanced transmission technologies that are being or have been field-tested;

(D) the use of new transmission technologies, including composite conductor material, advanced circuit breakers and control systems, and other cost-effective methods and technologies;

(E) the use of superconducting materials in power delivery equipment as a transmission and distribution cables, transformers, and generators;

(F) energy management technologies for end-use devices with advanced distributed generation, such as power parks; and

(G) economic and system models to measure the costs and benefits of improved system efficiency.

(H) hybrid distributed energy systems to optimize two or more distributed or on-site generation technologies; and

(I) storage programs to optimize power transmission and distribution system control technologies that provide for continual exchange of information between generation, transmission, distribution, and consumer facilities.

(c) **Special Projects.**—In carrying out this section, the Secretary shall demonstrate—

(1) the use of advanced wind power technology, biomass, geothermal energy systems, and other renewable energy technologies to assist in delivering electricity to rural and remote locations; and

(2) the combined use of wind power and coal gasification technologies.

SEC. 1222. **Bioenergy Programs.**

(a) **Program Direction.**—The Secretary shall carry out research, development, demonstration, and technology development activities related to bioenergy, including programs under paragraphs (4) and (6) of section 1221(b).

(b) **Authorization of Appropriations.**—There are authorized to be appropriated to the Secretary for carrying out research, development, demonstration, and technology deployment activities under this subtitle—

(1) $300,000,000 for fiscal year 2003; and

(2) $483,000,000 for fiscal year 2004; and

(3) $433,000,000 for fiscal year 2006.

SEC. 1223. **Hydrogen Research and Development.**

(a) **Short Title.**—This section may be cited as the "Hydrogen Future Act of 2002."
(b) PURPOSES.—Section 102(b) of the Spark M. Matsunaga Hydrogen Research, Development, and Demonstration Act of 1990 (42 U.S.C. 12401(b)) is amended by striking paragraphs (1) and (2) and inserting the following:

"(1) to direct the Secretary to develop a program of technology assessment, information transfer, and education in which Federal and non-Federal sources of the transportation, energy, and other industries, and other entities may participate;

"(2) to develop methods of hydrogen production, distribution, storage, and use, and production, distribution, and storage of greenhouse gases, including developing—

"(A) efficient production from non-renewable resources; and

"(B) cost-effective production from renewable resources such as biomass, geothermal, wind, and solar energy; and

"(3) to foster the use of hydrogen as a major energy source, including developing the use of hydrogen in—

"(A) isolated villages, islands, and communities in which other energy sources are not available or are very expensive; and

"(B) foreign economic development, to avoid environmental damage from increased fossil fuel use.

(c) REPORT TO CONGRESS.—Section 103 of the Spark M. Matsunaga Hydrogen Research, Development, and Demonstration Act of 1990 (42 U.S.C. 12402) is amended—

(1) in subsection (a), by striking “January 1, 1999,” and inserting “1 year after the date of enactment of the Hydrogen Future Act of 2002,” and

(2) in subsection (b), by striking paragraphs (1) and (2) and inserting the following:

"(1) an analysis of hydrogen-related activities throughout the United States Government to identify productive areas for increased intragovernmental collaboration;

"(2) recommendations of the Hydrogen Technical Panel established by section 108 for any improvements in the program that are needed, including recommendations for additional legislation; and

"(3) to the extent practicable, an analysis of State and local hydrogen-related activities.; and

(3) by adding at the end the following:

"(c) COORDINATION PLAN.—The report under subsection (a) shall be based on a comprehensive coordination plan for hydrogen energy prepared by the Secretary in consultation with other Federal agencies.”.

(d) HYDROGEN RESEARCH AND DEVELOPMENT.—Section 104 of the Spark M. Matsunaga Hydrogen Research, Development, and Demonstration Act of 1990 (42 U.S.C. 12403) is amended—

(1) in subsection (b)(1), by striking “marketplace;” and inserting “marketplace, including foreign markets, particularly where an energy infrastructure is not well developed;” and

(2) in subsection (e), by striking “this chapter” and inserting “this Act”; and

(3) by striking subsection (g) and inserting the following:

"(g) COST SHARING.—

"(1) IN GENERAL.—The Secretary shall not consider a proposal submitted by an industry unless the proposal contains a certification that—

"(A) reasonable efforts to obtain non-Federal funding in the amount necessary to pay 100 percent of the cost of the project have been made; and

"(B) non-Federal funding in that amount could not reasonably be obtained.

"(ii) by striking “Not later than 180 days after the date of enactment of this Act,” and inserting “Not later than 180 days after the date of enactment of this section, subject and” and inserting “(a) IN GENERAL.—Subject;” and

(3) by striking “and” and inserting “and all that follows and inserting “into Federal, State, and local government facilities for stationary and transportation applications,”); and

(2) in subsection (b), by striking “gas is” and inserting “basis;” and

(3) by striking subsection (d) and inserting “projects described in subsections (a)(1) and (a)(2) and inserting “projects proposed;” and

(4) by striking subsection (d) and inserting the following:

"(c) TECHNICAL PANEL.—

"(1) IN GENERAL.—The Secretary shall require a commitment from non-Federal sources of at least 50 percent of the cost of the projects described in subsection (a) and then the term of the members serving at any time to expire at spaced intervals so as to ensure continuity in the functioning of the technical panel.

"(2) NEW APPOINTMENTS.—A member of the technical panel whose term expires may be reappointed.”; and

(iii) by striking “the technical panel shall have a chairman,” and inserting the following:

"(3) CHAIRPERSON.—The technical panel shall have a chairperson,” and

(4) in subsection (b), by striking “and” and the period “;”.

(2) in paragraph (1), by striking “and inserting “the following items”;

(2) in paragraph (1), by striking “and” at the end.; and

(iv) by adding at the end the following:

"(3) in paragraph (2), by striking the period at the end and inserting “;”;

(2) in paragraph (9), by striking the period at the end and inserting “; and

(3) by striking “(a) in subparagraph (A), by redesigning subparagraphs (A) through (D) as clauses (i) through (iv), respectively, and inserting appropriately;”;

(2) in paragraph (C), by redesigning paragraphs (1) and (2) as subparagraphs (A) and (B), respectively, and inserting appropriately;”;

(2) in subparagraph (B), by redesigning subparagraphs (A), (B), and (C) as subparagraphs (1) through (4) respectively, and inserting the following:

"(1) I N GENERAL.—The Secretary shall conduct a program designed to—

"(A) accelerate wider application of hydrogen technology in the marketplace, in-...
(2) REDUCTION.—The Secretary may reduce the non-Federal requirement under paragraph (1) if the Secretary determines that the reduction is appropriate considering the potential environmental risks involved in the project and is necessary to meet the objectives of this Act.

(2) COOPERATIVE AND COST-SHARING AGREEMENTS.—

SEC. 202. INTERAGENCY TASK FORCE.

(a) ESTABLISHMENT.—Not later than 120 days after the date of enactment of this section, the Secretary shall establish an interagency task force led by a Deputy Assistant Secretary of the Department of Energy and comprised of representatives of—

(1) the Office of Science and Technology Policy;

(2) the Department of Transportation;

(3) the Department of Defense;

(4) the Department of Commerce (including the National Institute for Standards and Technology);

(5) the Environmental Protection Agency;

(6) the National Aeronautics and Space Administration; and

(7) other agencies as appropriate.

(b) DUTIES.—

(1) IN GENERAL.—The task force shall develop a plan for carrying out this title.

(2) FOCUS OF PLAN.—The plan shall focus on development and demonstration of integrated systems and components for—

(A) hydrogen production, storage, and use in Federal, State, and local government buildings and vehicles;

(B) hydrogen-based infrastructure for buses and other light transportation systems that include zero-emission vehicles; and

(C) hydrogen-based distributed power generation and generation of combined heat, power, and hydrogen.

SEC. 203. COOPERATIVE AND COST-SHARING AGREEMENTS.

The Secretary shall enter into cooperative and cost-sharing agreements with Federal, State, and local agencies for participation by the agencies in demonstrations at facilities administered by the agencies, with the aim of integrating high efficiency hydrogen systems using fuel cells into the facilities to provide immediate benefits and promote a smooth transition to hydrogen as an energy source.

SEC. 204. INTEGRATION AND DISSEMINATION OF TECHNICAL INFORMATION.

The Secretary shall—

(1) integrate all the technical information that becomes available as a result of development and demonstration projects under this title;

(2) make the information available to all Federal and State agencies for dissemination to all interested persons; and

(3) foster the exchange of generic, nonproprietary information and technology developed under this title among industry, academia, and Federal, State, and local governments, to help the United States economy attain the economic benefits of the information and technology.

SEC. 205. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated, for activities under this title—

(1) $25,000,000 for fiscal year 2003;

(2) $30,000,000 for fiscal year 2004;

(3) $35,000,000 for fiscal year 2005; and

(4) $40,000,000 for fiscal year 2006.

Subtitle C—Fossil Energy

SEC. 1231. ENHANCED FOSSIL ENERGY RESEARCH, DEVELOPMENT, AND DEMONSTRATION.

(a) PROGRAM DIRECTION.—The Secretary shall conduct a balanced energy research, development, demonstration, and technology deployment program to enhance fossil energy, including gasification combined cycle, gasification fuel cells, gasification co-production, hybrid gasification/combustion, or other technology with the potential to address the goals in subparagraphs (D) or (E) of subsection (b)(1).

SEC. 1232. POWER PLANT IMPROVEMENT INITIATIVE.

(a) PROGRAM DIRECTION.—The Secretary shall conduct a balanced energy research, development, demonstration, and technology deployment program to demonstrate commercial applications of advanced lignite and coal-based technologies applicable to new or existing power plants (including co-production plants) that advance the efficiency, environmental performance, and competitiveness substantially beyond technologies that are in operation or have been demonstrated by the date of enactment of this subtitle.

(b) TECHNICAL MILESTONES.—

(1) IN GENERAL.—The Secretary shall set technical milestones specifying efficiency and emissions levels that projects shall be designed to achieve. The milestones shall become more restrictive over the life of the program.

(2) 2020 EFFICIENCY MILESTONES.—The milestones shall be designed to achieve by 2020 interim thermal efficiency of—

(A) 45 percent for coal of more than 9,000 Btu;

(B) 44 percent for coal of 7,000 to 9,000 Btu; and

(C) 42 percent for coal of less than 7,000 Btu.

(3) 2020 EFFICIENCY MILESTONES.—The milestones shall be designed to achieve by 2020 thermal efficiency of—

(A) 60 percent for coal of more than 9,000 Btu;

(B) 59 percent for coal of 7,000 to 9,000 Btu; and

(C) 57 percent for coal of less than 7,000 Btu.

(4) EMISSIONS MILESTONES.—The milestones shall include near zero emissions of mercury and greenhouse gases and of emissions that form fine particles, smog, and acid rain.

(5) REGIONAL AND QUALITY DIFFERENCES.—The Secretary may consider regional and quality differences in developing the efficiency milestones.

(c) PROJECT CRITERIA.—The demonstration activities proposed to be conducted at a new coal-fired power plant or any existing coal-fired power plant having a nameplate rating of not less than 100 megawatts, excluding a co-production plant, shall include at least one of the following—

(1) a means of recycling or reusing a significant portion of coal combustion wastes produced by coal-based generating units, excluding practices that are commercially available by the date of enactment of this subtitle;

(2) a means of capture and sequestering emissions, including greenhouse gases, in a manner that is more effective and substantially below the cost of technologies that are in operation or that have been demonstrated by the date of enactment of this subtitle;

(3) a means of controlling sulfur dioxide and nitrogen oxide or mercury in a manner that improves environmental performance beyond technologies that are in operation or that have been demonstrated by the date of enactment of this subtitle;

(a) in the case of an existing unit, achieve an overall thermal efficiency improvement compared to the efficiency of the unit as operated, of not less than—

(i) 7 percent for coal of more than 9,000 Btu;

(ii) 6 percent for coal of 7,000 to 9,000 Btu; or

(iii) 5 percent for coal of less than 7,000 Btu.
(ii) 4 percent for coal of less than 7,000 Btu; or
(B) in the case of a new unit, achieve the efficiency milestones set for in subsection (b) (compliance with a typology limit as established on the date of enactment of this subtitle, before any retrofit, repowering, replacement, or installation).

(d) The Secretary, in consultation with the Administrator of the Environmental Protection Agency, the Secretary of the Interior, and interested entities (including coal producers, industries using coal, organizations to promote coal or advanced coal technologies, environmental organizations, and universities and other research institutions) shall conduct an assessment that identifies performance criteria that would be necessary for coal-based technologies to meet, to enable them to make a contribution in an environmentally sustainable manner for electricity generation, use as a chemical feedstock, and as a transportation fuel.

(e) AUTHORIZATION OF APPROPRIATIONS.—
(1) IN GENERAL.—There are authorized to be appropriated to the Secretary for carrying out activities under this section $300,000,000 for each of fiscal years 2003 through 2008.

(2) LIMITATION ON FUNDING OF PROJECTS.—Eighty percent of the funding under this section shall be limited to—
(A) Demonstration capture and sequestration technologies;
(B) Gasification technologies, including gasification combined cycle, gasification fuel cells, co-combustion, or hybrid gasification-combustion; or
(C) other technology either by itself or in conjunction with other technologies that has the potential to achieve near zero emissions.

SEC. 1233. RESEARCH AND DEVELOPMENT FOR ADVANCED SAFE AND EFFICIENT COAL MINING TECHNOLOGIES.

(a) ESTABLISHMENT.—The Secretary of Energy shall establish a cooperative research partnership involving appropriate Federal agencies, coal producers, including associations, equipment manufacturers, universities with mining engineering departments, and other relevant entities to—
(1) develop mining research priorities identified by the Mining Industry of the Future Program and in the recommendations from relevant reports of the National Academy of Sciences on mining technologies;
(2) establish a process for conducting joint industry-government research and development; and
(3) expand mining research capabilities at institutions of higher education.

(b) AUTHORIZATION OF APPROPRIATIONS.—
(1) IN GENERAL.—There are authorized to be appropriated to carry out activities under this section $12,000,000 in fiscal year 2003 and $13,000,000 in fiscal year 2004.

(2) LIMIT ON USE OF FUNDS.—Not less than 20 percent of any funds appropriated in a given fiscal year under this subsection shall be dedicated to research carried out at institutions of higher education.

SEC. 1234. ULTRA-DEEPWATER AND UNCONVENTIONAL RESOURCE EXPLORATION AND PRODUCTION TECHNOLOGIES.

(a) DEFINITIONS.—In this section:
(1) ADVISORY COMMITTEE.—The term “Advisory Committee” means the Ultra-Deepwater and Unconventional Resource Technology Advisory Committee established under subsection (c).
(2) AWARD.—The term “award” means a cooperative agreement, contract, award or other type of agreement as appropriate.
(3) DEEPWATER.—The term “deepwater” means a water depth that is greater than 200 but less than 1,500 meters.
(4) ELIGIBLE RECIPIENT.—The term “eligible award recipient” includes—
(A) a research institution;
(B) an institution of higher education;
(C) a corporation; and
(D) a managing consortium formed among entities described in subparagraphs (A) through (C).

(5) INSTITUTION OF HIGHER EDUCATION.—The term “institute of higher education” has the meaning given in section 101 of the Higher Education Act of 1965 (20 U.S.C. 1001).

(6) MANAGING CONSORTIUM.—The term “managing consortium” means an entity that—
(A) exists as of the date of enactment of this section; and
(B) is an organization described in section 501(c)(3) of the Internal Revenue Code of 1986; and
(ii) is exempt from taxation under section 501(a) of that Code;
(C) is experienced in planning and managing programs in natural gas or other petroleum exploration and production research, development, and demonstration; and
(D) has demonstrated capabilities and experience in representing the views and priorities of industry, institutions of higher education and other research institutions in formulating comprehensive research and development plans and programs.

(7) PROGRAM.—The term “program” means the program of research, development, and demonstration established under subsection (b)(1)(A).

(8) ULTRA-DEEPWATER.—The term “ultra-deepwater” means a water depth that is equal to or greater than 1,500 meters.

(9) ULTRA-DEEPWATER ARCHITECTURE.—The term “ultra-deepwater architecture” means the integration of technologies to explore and produce petroleum and coal resources located at ultra-deepwater depths.

(10) ULTRA-DEEPWATER RESOURCE.—The term “ultra-deepwater resource” means natural gas or any other petroleum resource (including methane hydrate) located in an ultra-deepwater area.

(11) UNCONVENTIONAL RESOURCE.—The term “unconventional resource” includes natural gas or any other petroleum resource located in a formation on physically or economically inaccessible land currently available for lease for extraction of other petroleum exploration and production.

(b) ULTRA-DEEPWATER AND UNCONVENTIONAL EXPLORATION AND PRODUCTION PROGRAM.

(1) ESTABLISHMENT.—
(A) IN GENERAL.—The Secretary shall establish a program of research into, and development and demonstration of, ultra-deepwater resource exploration and production technologies to—
(i) to maximize the value of the ultra-deepwater resources of the United States;
(ii) to increase the supply of ultra-deepwater resources by lowering the cost and improving the efficiency of exploration and production of such resources; and
(iii) to improve safety and minimize negative environmental impacts of that exploration and production.

(B) UNCONVENTIONAL RESOURCES.—The Secretary shall make awards to carry out research into, and development and demonstration of, unconventional resource exploration and production technologies to—
(i) increase the supply of unconventional resources by lowering the cost and improving the efficiency of exploration and production of such resources; and
(ii) to develop technologies to simultaneously—
(I) increase the supply of unconventional resources by lowering the cost and improving the efficiency of exploration and production of unconventional resources; and
(II) improve safety and minimize negative environmental impacts of that exploration and production.

(c) CONDITIONS.—An award made under this subsection shall be subject to the following conditions:

(1) TYPES OF AWARDS.—
(A) ULTRA-DEEPWATER RESOURCES.—
(i) IN GENERAL.—The Secretary shall make awards for research into, and development and demonstration of, ultra-deepwater resource exploration and production technologies to—
(I) to maximize the value of the ultra-deepwater resources of the United States;
(II) to increase the supply of ultra-deepwater resources by lowering the cost and improving the efficiency of exploration and production of such resources; and
(III) to improve safety and minimize negative environmental impacts of that exploration and production.

(B) UNCONVENTIONAL RESOURCES.—The Secretary shall make awards to carry out research into, and development and demonstration of, unconventional resource exploration and production technologies to—
(I) increase the supply of unconventional resources by lowering the cost and improving the efficiency of exploration and production of unconventional resources; and
(II) improve safety and minimize negative environmental impacts of that exploration and production.

(2) TECHNOLOGY IN EXISTENCE.—If an award recipient is composed of more than one eligible organization, the recipient shall provide a signed contract, agreed to by all eligible organizations comprising the award recipient, that defines, in a manner that is consistent with applicable law in effect as of the date of the contract, all rights to intellectual property for—
(i) technology in existence as of that date; and
(ii) future inventions conceived and developed with funds provided under the award.

(B) COMPONENTS OF APPLICATION.—An application for an award for a demonstration
S1488

CONGRESSIONAL RECORD — SENATE
March 5, 2002

project shall describe with specificity any intended commercial applications of the technology to be demonstrated.

(C) COST SHARING.—Non-Federal cost sharing shall be in accordance with section 1493.

(e) PLAN AND FUNDING.—

(1) IN GENERAL.—The Secretary, and where appropriate, a managing consortium under subsection (a), shall formulate annual operating and performance objectives, develop multi-year technology roadmaps, and establish research and development priorities for the funding of activities under this section which will serve as guidelines for making awards including cost-matching objectives.

(2) INDUSTRY INPUT.—In carrying out this program, the Secretary shall promote maximum industry input through the use of managing consortia or other organizations in framing and executing the research areas and conducting workshops or reviews to ensure that this program focuses on industry problems and needs.

(f) AUDITING.—

(1) IN GENERAL.—The Secretary shall retain an independent, commercial auditor to determine the extent to which funds authorized by this section, provided through a managing consortium, are expended in a manner consistent with the purposes of this section.

(2) AUDIT REQUIREMENTS.—The auditor retained under paragraph (1) shall submit to the Secretary, and the Secretary shall transmit to the appropriate congressional committees, an annual report that describes—

(A) the findings of the auditor under paragraph (1); and

(B) a plan under which the Secretary may remediate any deficiencies identified by the auditor.

(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Department of Energy for each of fiscal years 2003 and 2004—

(1) $43,600,000 to support a Nuclear Energy Technology Development Program to develop a technology roadmap to design and develop new nuclear energy powerplants in the United States.

(2) $130,000,000 for each of fiscal years 2003 and 2004; and

(3) $43,600,000 for each of fiscal years 2005 and 2006.

SEC. 1243. NUCLEAR ENERGY RESEARCH INITIATIVE.

(a) ESTABLISHMENT.—The Secretary shall establish a Nuclear Energy Research Initiative for grants for research relating to nuclear energy.

(b) AUTHORIZATION OF APPROPRIATIONS.—From amounts authorized under section 1243(c)(1), the following amounts are authorized for activities under this section—

(1) $33,000,000 for fiscal year 2003; and

(2) $37,900,000 for fiscal year 2004;

(3) $45,600,000 for fiscal year 2005; and

(4) $50,100,000 for fiscal year 2006.

SEC. 1244. NUCLEAR ENERGY PLANT OPTIMIZATION PROGRAM.

(a) ESTABLISHMENT.—The Secretary shall support a Nuclear Energy Plant Optimization Program for grants to improve nuclear energy plant reliability, efficiency, and productivity. Notwithstanding section 1403, the program shall require industry cost-sharing of at least 50 percent and be subject to annual review by the Nuclear Energy Research Advisory Committee of the Department.

(b) AUTHORIZATION OF APPROPRIATIONS.—From amounts authorized under section 1244(c), there are authorized to be appropriated to the Secretary for activities under this section in each fiscal year—

(1) $22,000,000 for each of fiscal years 2003 and 2004;

(2) $20,000,000 for each of fiscal years 2005 and 2006.

SEC. 1245. NUCLEAR ENERGY TECHNOLOGY DEVELOPMENT PROGRAM.

(a) ESTABLISHMENT.—The Secretary shall establish a Nuclear Energy Technology Development Program to develop a technology roadmap to design and develop new nuclear energy powerplants in the United States.

(b) GENERATION IV REACTOR STUDY.—The Secretary shall, as part of the program under subsection (a), conduct a study of Generation IV nuclear energy systems, including development of a technology roadmap and performance of research and development necessary to make a timely decision regarding the most promising candidates for commercial deployment. The
study shall examine advanced proliferation-resistant and passively safe reactor designs, new reactor designs with higher efficiency, lower cost and improved safety, proliferation-resistant and high burn-up fuels, minimization of generation of radioactive materials, improved nuclear waste management technologies, and improved instrumentation science. Not later than December 31, 2003, the Secretary shall submit to Congress a report describing the results of the study.

(c) AUTHORIZATION OF APPROPRIATIONS.—From amounts authorized to be appropriated under section 1241(c), there are authorized to be appropriated to the Secretary for activities under this section such sums as are necessary for:

Subtitle E—Fundamental Energy Science
SEC. 1251. ENHANCED PROGRAMS IN FUNDAMENTAL ENERGY SCIENCE.
(a) Program Direction.—The Secretary, acting through the Office of Science, shall:

(1) conduct a comprehensive program of fundamental research, including research on chemical sciences, physics, materials sciences, biological and environmental sciences, geosciences, engineering sciences, plasma sciences, mathematics, and advanced scientific computing;

(2) maintain, trade and expand the scientific user facilities maintained by the Office of Science and ensure that they are an integral part of the departmental mission for exploring the frontiers of fundamental science;

(3) maintain a leading-edge research capability in the energy-related aspects of nanoscience and nanoengineering, advanced scientific computing and genome research; and

(4) ensure that its fundamental science programs, where appropriate, help inform the applied research and development programs of the Department.

(b) Authorization of Appropriations.—There are authorized to be appropriated to the Secretary for carrying out research, development, demonstration, and technology deployment activities under this subtitle—

(1) $3,755,000,000 for fiscal year 2003;

(2) $1,153,000,000 for fiscal year 2004;

(3) $1,586,000,000 for fiscal year 2005; and

(4) $4,500,000,000 for fiscal year 2006.

SEC. 1252. NANOSCALE SCIENCE AND ENGINEERING RESEARCH.
(a) Establishment.—The Secretary, acting through the Office of Science, shall establish a program of research, development, demonstration, and technology deployment activities in nanoscience and nanoengineering consistent with the Department’s statutory authorities related to research and development. The program shall include efforts to further the understanding of the chemistry, physics, materials science and engineering of phenomena at the scale of 1 to 100 nanometers.

(b) Duties of the Office of Science.—In carrying out the program under this section, the Office of Science shall—

(1) develop a research strategy; and

(2) pursue advanced research and development activities in collaboration with industry and other federal agencies.

(c) Nanoscience and Nanoengineering Research Centers and Major Instrumentation.—

(1) Authorization.—From amounts authorized to be appropriated under section 1251(b), the amounts specified under subsection (d)(2) shall, subject to appropriation, be available for projects to develop, plan, construct, acquire, or operate special facilities, equipment, instrumentation, or facilities for investigators conducting research and development in nanoscience and nanoengineering.

(2) Projects.—Projects under paragraph (1) may be pursued if the Secretary determines that they—

(A) are essential for the development of properties at the scale of 1 to 100 nanometers, manipulation at such scales, and the integration of technologies based on nanoscience or nanoengineering into bulk materials or other technologies.

(B) demonstrate the ability of technologies based on nanoscience or nanoengineering to benefit industry and other users of science and technology.

(C) demonstrate improved nuclear waste management technologies, improved materials, improved nuclear energy systems, new reactor designs with higher efficiency, lower cost and improved safety, improved commercial fusion science technologies, and improved instrumentation science.

(D) address key burning plasma physics issues; and

(E) include specific information on the scientific capabilities of the experiments, the relevance of these capabilities to the goal of practical fusion energy, and the

SEC. 1253. ADVANCED SCIENTIFIC COMPUTING FOR ENERGY MISSIONS.
(a) Establishment.—The Secretary, acting through the Office of Science, shall establish a program to advance the Nation’s computing capacity across a diverse set of grand challenge computationally based science problems related to departmental missions.

(b) Duties of the Office of Science.—In carrying out the program under this section, the Office of Science shall—

(1) advance basic science through computation by developing software to solve grand challenge science problems on new generations of computing architectures;

(2) enhance the foundations for scientific computing by developing the basic mathematical and computing systems software needed to take full advantage of the computing capabilities of computers with peak speeds of 100 teraflops or more, some of which may be unique to the scientific problem of interest;

(3) enhance national collaborative and networking capabilities by developing software to integrate geographically separated research teams to facilitate access to and movement and analysis of large (petabyte) data sets, and

(4) maintain a robust scientific computing hardware infrastructure to ensure that the computing resources needed to address DOE missions are available; explore new computing approaches and technologies that promise to advance computing science and technology.

(c) High-Performance Computing Act Program.—Section 203(a) of the High-Performance Computing Act of 1991 (15 U.S.C. 5523(a)) is amended—

(1) in paragraph (3), by striking “and”; and

(2) in paragraph (4), by striking the period and inserting “.

(3) by adding after paragraph (4) the following: “(5) conduct an integrated program of research, development, and provision of facilities to develop and deploy to scientific and technical users the high-performance computing and collaboration tools needed to fulfill the statutory mandate of the Department of Energy in conducting basic and applied energy research.”.

(d) Coordination With the DOE National Nuclear Security Agency Accelerated Strategic Computing Initiative and Other National Computing Programs.—The Secretary shall ensure that this program, to the extent feasible, is integrated and consistent with—

(1) the Accelerated Strategic Computing Initiative of the National Nuclear Security Agency; and

(2) other national efforts related to advanced scientific computing for science and engineering.

(e) Authorization of Appropriations.—From amounts authorized under section 1251(b), the following amounts are authorized for activities under this section—

(1) $255,000,000 for fiscal year 2003;

(2) $300,000,000 for fiscal year 2004;

(3) $310,000,000 for fiscal year 2005; and

(4) $320,000,000 for fiscal year 2006.

SEC. 1254. FUSION ENERGY SCIENCES PROGRAM AND PLANNING.
(a) Overall Plan for Fusion Energy Sciences Program.—

(1) In General.—Not later than 6 months after the date of enactment of this subtitle, the Secretary, acting through the Fusion Energy Sciences Advisory Committee, shall develop and transmit to the Congress a plan to ensure a strong scientific base for the Fusion Energy Sciences Program within the Office of Science and to enable the experiments described in subsection (b) and (c).

(2) Objectives of Plan.—The plan under this subsection shall include as its objectives—

(A) to ensure that existing fusion research facilities and equipment are more fully utilized with appropriate measurements and control tools;

(B) to ensure a strengthened fusion science theory and computational base;

(C) to encourage and ensure that the selection, development, and funding of new magnetic and inertial fusion research facilities is based on scientific innovation and cost effectiveness;

(D) to improve the communication of scientific results and methods between the fusion science community and the wider scientific community;

(E) to ensure that adequate support is provided to optimize the design of the magnetic fusion burning plasma experiments referred to in subsections (b) and (c); and

(F) to ensure that inertial confinement fusion facilities are utilized to the extent practicable for the purpose of inertial fusion energy research and development.

(b) Plan for United States Fusion Experiment.—

(1) In General.—The Secretary, after consultation with the Fusion Energy Sciences Advisory Committee, shall develop a plan for construction in the United States of a magnetic fusion burning plasma experiment for the purpose of accelerating scientific understanding of fusion plasmas. The Secretary shall request a review of the plan by the National Academy of Sciences, and then transmit the plan and the review to the Congress by July 1, 2004.

(2) Requirements of Plan.—The plan described in paragraph (1) shall—

(A) address key burning plasma physics issues; and

(B) include specific information on the scientific capabilities of the experiments, the relevance of these capabilities to the goal of practical fusion energy, and the
overall design of the experiment including its estimated cost and potential construction sites.

(c) PLAN FOR PARTICIPATION IN AN INTERNATIONAL EXPERIMENT.—In addition to the plan described in subsection (b), the Secretary, after consultation with the Fusion Energy Sciences Advisory Committee, may also develop a United States participation in an international experiment, including real time control to permit the reconfiguration of energy delivery systems.

(3) incident tracking and trend analysis
(2) probabilistic risk assessment of the energy infrastructure to account for unconventional and terrorist threats;
(3) incident tracking and trend analysis tools to assess the severity of threats and reported incidents to the energy infrastructure;
(4) integrated multi-sensor, warning and mitigation technologies to detect, integrate, and localize events affecting the energy infrastructure, including time control to permit the reconfiguration of energy delivery systems.

(c) PROGRAM SCOPE.—(a) shall include research, development, deployment, technology demonstration for—
(1) analysis of energy infrastructure interdependencies to quantify the impacts of system vulnerabilities in relation to each other;
(2) probabilistic risk assessment of the energy infrastructure to account for unconventional and terrorist threats;
(3) incident tracking and trend analysis tools to assess the severity of threats and reported incidents to the energy infrastructure;
(4) integrated multi-sensor, warning and mitigation technologies to detect, integrate, and localize events affecting the energy infrastructure, including time control to permit the reconfiguration of energy delivery systems.

(c) PROGRAM SCOPE.—The program under subsection (a) shall include research, development, deployment, technology demonstration for—
(1) analysis of energy infrastructure interdependencies to quantify the impacts of system vulnerabilities in relation to each other;
(2) probabilistic risk assessment of the energy infrastructure to account for unconventional and terrorist threats;
(3) incident tracking and trend analysis tools to assess the severity of threats and reported incidents to the energy infrastructure;
(4) integrated multi-sensor, warning and mitigation technologies to detect, integrate, and localize events affecting the energy infrastructure, including time control to permit the reconfiguration of energy delivery systems.

(c) PROGRAM SCOPE.—The program under subsection (a) shall include research, development, deployment, technology demonstration for—
(1) analysis of energy infrastructure interdependencies to quantify the impacts of system vulnerabilities in relation to each other;
(2) probabilistic risk assessment of the energy infrastructure to account for unconventional and terrorist threats;
(3) incident tracking and trend analysis tools to assess the severity of threats and reported incidents to the energy infrastructure;
(4) integrated multi-sensor, warning and mitigation technologies to detect, integrate, and localize events affecting the energy infrastructure, including time control to permit the reconfiguration of energy delivery systems.

(c) PROGRAM SCOPE.—The program under subsection (a) shall include research, development, deployment, technology demonstration for—
(1) analysis of energy infrastructure interdependencies to quantify the impacts of system vulnerabilities in relation to each other;
(2) probabilistic risk assessment of the energy infrastructure to account for unconventional and terrorist threats;
(3) incident tracking and trend analysis tools to assess the severity of threats and reported incidents to the energy infrastructure;
(4) integrated multi-sensor, warning and mitigation technologies to detect, integrate, and localize events affecting the energy infrastructure, including time control to permit the reconfiguration of energy delivery systems.
Sciences to establish and manage the Pipeline Integrity Technical Advisory Committee for the purpose of advising the Secretary of Transportation and the Secretary of Energy on the development and implementation of the research and development program plan under subsection (d). The Advisory Committee shall have an ongoing role in evaluating and reviewing the research, development, and demonstration carried out under this section.

(2) MEMBERSHIP.—The National Academy of Sciences shall appoint the members of the Pipeline Integrity Technical Advisory Committee after consultation with the Secretary of Transportation and the Secretary of Energy. A representative elected by the Advisory Committee should have the necessary qualifications to provide technical contributions to the purposes of the Advisory Committee.

(b) AUTHORIZATION OF APPROPRIATIONS.—(1) There are authorized to be appropriated to the Secretary of Transportation for carrying out this section such sums as may be necessary to defray all costs of the research, development, and demonstration activities carried out under this section.

(2) LIMITATION ON FUNDS.—There is authorized to be appropriated under section 6301 of title 49, United States Code, for each of the fiscal years 2003 through 2006, $3,000,000, to be derived from user fees under section 60301 of title 49, United States Code, for each of the fiscal years 2003 through 2006.

(3) In subsection (b), the amount available in the Oil Spill Liability Trust Fund established by section 9509 of the Internal Revenue Code of 1986 (36 U.S.C. 9509), $3,000,000 shall be transferred to the Oil Spill Liability Trust Fund. Appropriations as provided in appropriation Acts, to carry out this section $3,000,000, to be derived from user fees under section 60301 of title 49, United States Code, for each of the fiscal years 2003 through 2006.

(3) There are authorized to be appropriated to the Secretary of Energy for carrying out this section such sums as may be necessary for each of the fiscal years 2003 through 2006.

SEC. 1263. RESEARCH AND DEMONSTRATION FOR REMEDIATION OF GROUNDWATER CONTAMINATION.

(a) IN GENERAL.—The Secretary shall carry out a research, development, demonstration, and technology deployment program to improve methods for environmental restoration of groundwater contaminated by energy activities, including oil and gas production, surface mining and mining of coal, and in-situ extraction of energy resources.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary $200,000,000 for each of the fiscal years 2003 through 2006.

TITLE XIII—CLIMATE CHANGE-RELATED RESEARCH AND DEVELOPMENT

Subtitle A—Department of Energy Programs

SEC. 1301. PROGRAM GOALS.

The goals of the research, development, demonstration, and technology deployment programs under this title shall be to—

(A) conduct observational and analytical research to acquire and interpret the data needed to describe the radiation balance from the surface of the Earth to the top of the atmosphere;

(B) determine the factors responsible for the Earth’s radiation balance and incorporate improved understanding of such factors in climate models;

(C) improve the treatment of aerosols and clouds in climate models;

(D) reduce the uncertainty in decade-to-century model-based projections of climate change; and

(E) increase the availability and utility of climate change simulations to researchers conducting studies designed to assessing the relationship between energy and climate change.

(2) CARBON CYCLE.—The Secretary shall—

(A) carry out field research and modeling activities—

(i) to understand and document the net exchange of carbon dioxide between major terrestrial ecosystems and the atmosphere; or

(ii) to evaluate the potential of proposed methods of carbon sequestration;

(B) develop and test carbon cycle models; and

(C) acquire data and develop and test models to simulate and predict the transport, transformation, and fate of energy-related emissions in the atmosphere.

(3) ECOCLOGICAL PROCESSES.—The Secretary shall carry out long-term experiments of the response of intact terrestrial ecosystems to—

(A) alterations in climate and atmospheric composition; or

(B) land-use changes that affect ecosystem extent and function.

(4) INTEGRATED ASSESSMENT.—The Secretary shall develop and improve methods and tools for tracking the consequences of climate change to economic and social systems, with emphasis on critical gaps in integrated assessment modeling, including modeling of technology innovation and diffusion and the development of metrics of economic costs of climate change and policies for mitigating or adapting to climate change.

(c) AUTHORIZATION OF APPROPRIATIONS.—From amounts authorized under section 1430(c), there are authorized to be appropriated to the Secretary for carrying out activities under this section—

(1) $150,000,000 for fiscal year 2003;

(2) $175,000,000 for fiscal year 2004;

(3) $200,000,000 for fiscal year 2005; and

(4) $250,000,000 for fiscal year 2006.

(d) LIMITATION ON FUNDS.—Funds authorized to be appropriated under this subsection shall be available only for basic research, demonstration, or deployment of technology to reduce, avoid, or sequester greenhouse gas emissions.

SEC. 1302. DEPARTMENT OF ENERGY GLOBAL CHANGE SCIENCE RESEARCH.

(a) PROGRAM DIRECTION.—The Secretary, acting through the Office of Science, shall conduct a comprehensive research program to understand and address the effects of energy production and use on the global climate system.

(b) PROGRAM ELEMENTS.—(1) CLIMATE MODELING.—The Secretary shall—

(A) remove and sequester greenhouse gases from emissions streams; and

(C) remove and sequester greenhouse gases from the atmosphere.

(2) C LIMATE MODELING.—(A) There are authorized to be appropriated for research activities under this subsection—

(i) renewable energy systems;

(ii) advanced fossil energy technology;

(iii) advanced nuclear power plant design;

(iv) fuel cell technology for residential, industrial, and transportation applications;

(v) carbon sequestration practices and technologies, including agricultural and forestry practices that store and sequester carbon;

(vi) efficient electrical generation, transmission, and distribution technologies; and

(vii) efficient end use energy technologies.

Subtitle B—Department of Agriculture Programs

SEC. 1311. CARBON SEQUESTRATION BASIC AND APPLIED RESEARCH (a) BASIC RESEARCH.—(1) IN GENERAL.—The Secretary of Agriculture shall carry out research in the areas of soil science that promote understanding of—

(A) the net sequestration of organic carbon in soil; and

(B) net emissions of other greenhouse gases from agriculture.

(2) AGRICULTURAL RESEARCH SERVICE.—The Secretary of Agriculture, acting through the Agricultural Research Service, shall collaborate with other Federal agencies in developing and carrying out research addressing soil carbon fluxes (losses and gains) and net emissions of methane and nitrous oxide from cultivation and animal management activities.

(3) COOPERATIVE STATE RESEARCH, EXTENSION, AND EDUCATION SERVICE.—(A) IN GENERAL.—The Secretary of Agriculture, acting through the Cooperative State Research, Extension, and Education Service, shall establish a competitive grant program to carry out research on the matters described in paragraph (1) in land grant universities and other research institutions.

(B) CONSULTATION ON RESEARCH TOPICS.—Before issuing a request for proposals for basic research under paragraph (1), the Cooperative State Research, Extension, and Education Service shall consult with the Agricultural Research Service to ensure that proposed research areas are complementary with and do not duplicate research projects underway at the Agricultural Research Service or other Federal agencies.

(c) APPLIED RESEARCH.—(1) IN GENERAL.—The Secretary of Agriculture shall carry out applied research in the areas of soil science, agronomy, agricultural economics, and other agricultural sciences to—

(A) promote understanding of—

(i) how agricultural and forestry practices affected the sequestration of organic and inorganic carbon in soil and net emissions of other greenhouse gases;
(ii) how changes in soil carbon pools are cost-effectively measured, monitored, and verified; and
(iii) how public programs and private market approaches can be devised to incorporate carbon sequestration in a broader societal greenhouse gas emission reduction effort;

(B) develop methods for establishing baseline quantities of carbon and other greenhouse gases sequestered; and

(C) evaluate leakage and performance issues.

(2) REQUIREMENTS.—To the maximum extent practicable, applied research under paragraph (1) shall—

(A) draw on existing technologies and methodologies; and

(B) strive to provide methodologies that are accessible to a nontechnical audience.

(3) MINIMIZATION OF ADVERSE ENVIRONMENTAL IMPACTS.—All applied research under paragraph (1) shall be conducted with an emphasis on minimizing adverse environmental impacts.

(A) NATURAL RESOURCES CONSERVATION SERVICE.—The Secretary of Agriculture, acting through the Natural Resources Conservation Service, shall collaborate with other Federal agencies and the National Institute of Standards and Technology, in developing new measuring techniques and equipment or adapting existing techniques and equipment to enable cost-effective and accurate monitoring and verification, for a wide range of agricultural and forestry practices, of—

(A) changes in soil carbon content in agricultural soils, plants, and trees; and

(B) net emissions of other greenhouse gases;

(B) COOPERATIVE STATE RESEARCH, EXTENSION, AND EDUCATION SERVICE.—(A) IN GENERAL.—The Secretary of Agriculture, acting through the Cooperative State Research, Extension, and Education Service, shall establish a competitive grant program to encourage research on the matters described in paragraph (1) by land grant universities and other research institutions.

(B) CONSULTATION ON RESEARCH TOPICS.—Before issuing a request for proposals for applied research under paragraph (1), the Cooperative State Research, Extension, and Education Service shall consult with land grant universities and other Federal agencies.

(c) ELIGIBLE CONSORTIA.—(1) IN GENERAL.—The Secretary of Agriculture may designate not more than 2 research consortia to carry out research projects under this section, with the requirement that the consortia be operated in a manner by the Cooperative State Research, Extension, and Education Service.

(2) ELIGIBLE CONSORTIUM PARTICIPANTS.—Entities eligible to participate in a consortium include—

(A) land grant colleges and universities;

(B) private research institutions;

(C) State geological surveys;

(D) agencies of the Department of Agriculture;

(E) research centers of the National Aeronautics and Space Administration and the Department of Energy;

(F) other Federal agencies;

(G) agricultural businesses and organizations with demonstrated expertise in these areas; and

(H) representatives of the private sector with demonstrated expertise in these areas.

(4) RESERVATION OF FUNDING.—If the Secretary of Agriculture designates 1 or 2 consortia, the Secretary of Agriculture shall reserve for research projects carried out by the consortium or consortia not more than 25 percent of the amounts made available to carry out projects under this section.

(d) STANDARDS OF PRECISION.—

(1) CONFERENCE.—Not later than 3 years after the date on which this subtitle takes effect, the Secretary of Agriculture, acting through the Agricultural Research Service and in consultation with the National Resources Conservation Service, shall convene a conference of key scientific experts on carbon sequestration and measurement techniques from various sectors (including the government, academia, and private sectors) to—

(A) discuss benchmark standards of precision for measuring soil carbon content and net emissions of other greenhouse gases;

(B) design packages of measurement techniques and modeling approaches to achieve a level of precision agreed on by the participants in the conference; and

(C) evaluate leakage on baseline, permanence, and leakage issues.

(2) DEVELOPMENT OF BENCHMARK STANDARDS.—

(A) IN GENERAL.—The Secretary shall develop benchmark standards for measuring the carbon content of soils and plants, including trees, based on—

(i) information from the conference under paragraph (1);

(ii) research conducted under this section; and

(iii) other information available to the Secretary.

(B) OPPORTUNITY FOR PUBLIC COMMENT.—The Secretary shall provide an opportunity for the public to comment on benchmark standards developed under subparagraph (A).

(3) REPORT.—Not later than 180 days after the conclusion of the conference under paragraph (1), the Secretary of Agriculture shall submit to the Committee on Agriculture of the House of Representatives, to the Committee on Agriculture, Nutrition, and Forestry of the Senate, and to the Secretary of Agriculture an annual report on the results of the conference.

(e) AUTHORIZATION OF APPROPRIATIONS.—

(1) IN GENERAL.—There are authorized to be appropriated to carry out this section $25,000,000 for each of fiscal years 2003 through 2006.

(2) ALLOCATION.—If the amounts made available to carry out this section in a fiscal year are less than $25,000,000, the Secretary of Agriculture shall reallocate the amount to another fiscal year to the extent provided by law.

(f) REPORT.—The Secretary shall submit a report on the results of the conferences under this section to the Committees on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate not later than 180 days after the conclusion of the conferences, and shall make the report available to the public.

(g) STANDARDS OF PRECISION.—The Secretary shall require applied research under subsection (a) in the State to—

(A) demonstrate the feasibility of methods of measuring, verifying, and monitoring—

(i) changes in organic carbon content and other carbon pools in agricultural soils, plants, and trees; and

(ii) net changes in emissions of other greenhouse gases.

(h) EVALUATION OF IMPLICATIONS.—The projects under subparagraph (A) shall include evaluation of the implications for reassessed baselines, carbon or other greenhouse gases, and other issues.

(i) DURATION.—Not more than 10 projects under subparagraph (A) may be in progress at any one time.

(j) OPPORTUNITY FOR PUBLIC COMMENT.—(1) IN GENERAL.—The Cooperative State Research, Extension, and Education Service shall widely disseminate information about the economic and environmental benefits that can be generated by adoption of conservation techniques (including benefits from increased sequestration of carbon and reduced emissions of other greenhouse gases), and the project results.

(2) PROJECT RESULTS.—The Cooperative State Research, Extension, and Education Service shall inform farmers, ranchers, and State agricultural and energy offices in each State that—

(A) the results of demonstration projects under subsection (a)(2) in the State; and

(B) the ways in which the methods demonstrated in the projects might be applicable to the operations of those farmers and ranchers.

(k) POLICY OUTREACH.—On a periodic basis, the Cooperative State Research, Extension, and Education Service shall widely disseminate information on the policy nexus between global climate change mitigation strategies and agriculture, so that farmers and ranchers may better understand the global implications of the activities of farmers and ranchers.

(l) AUTHORIZATION OF APPROPRIATIONS.—(1) IN GENERAL.—There are authorized to be appropriated to carry out this section $10,000,000 for each of fiscal years 2003 through 2006.

(2) ALLOCATION.—If the amounts made available to carry out this section in a fiscal year are less than $10,000,000, the amounts shall be allocated to demonstration projects under subsection (a)(2).

Subtitle C—Clean Energy Technology Exports Program

SEC. 1312. CARBON SEQUESTRATION DEMONSTRATION PROJECTS AND OUT-REACH.

(a) DEMONSTRATION PROJECTS.—

(1) DEVELOPMENT OF MONITORING PROGRAMS.—(A) IN GENERAL.—The Secretary of Agriculture, acting through the Natural Resources Conservation Service and in cooperation with local extension agents, experts from land grant universities, and other local agricultural or conservation organizations, shall develop user-friendly, programs that combine measurement tools and modeling techniques into integrated packages to monitor the carbon sequestering benefits of conservation practices and net changes in greenhouse gas emissions.

(B) BENCHMARK LEVELS OF PRECISION.—The Secretary shall require the programs developed under subparagraph (A) to—

(i) achieve benchmark levels of precision in measurement in a cost-effective manner.

(ii) achieve a level of precision agreed on by the participants in the conference; and

(iii) be accessible to a nontechnical audience.

(iii) other information available to the Secretary.

(2) OPPORTUNITY FOR PUBLIC COMMENT.—The Secretary shall provide an opportunity for the public to comment on the results of the conference.

(3) REPORT.—The Secretary shall submit to the Committee on Agriculture of the House of Representatives, to the Committee on Agriculture, Nutrition, and Forestry of the Senate and to the Secretary of Agriculture an annual report on the results of the conference.

(4) AUTHORIZATION OF APPROPRIATIONS.—(1) IN GENERAL.—There are authorized to be appropriated to carry out this section $25,000,000 for each of fiscal years 2003 through 2006.

(2) ALLOCATION.—The amounts made available to carry out this section shall be allocated to demonstration projects under subsection (a)(2).

Subtitle C—Clean Energy Technology Exports Program

SEC. 1321. CLEAN ENERGY TECHNOLOGY EXPORTS PROGRAM.

(a) DEFINITIONS.—In this section—

(1) CLEAN ENERGY TECHNOLOGY.—The term ‘‘clean energy technology’’ means an energy supply or end-use technology that, over its lifecycle and compared to a similar technology already in commercial use in developing countries, countries in transition, and other partner countries—

(A) emits substantially lower levels of pollutants or greenhouse gases; and

(B) may generate substantially smaller or less adverse impacts of subsistence.

(2) INTERAGENCY WORKING GROUP.—The term ‘‘interagency working group’’ means [Section begins here]
(b) INTERAGENCY WORKING GROUP.—

(1) ESTABLISHMENT.—Not later than 90 days after the date of enactment of this section, the Secretary of Energy, the Secretary of Commerce, and the Administrator of the U.S. Agency for International Development shall establish a Interagency Working Group on Clean Energy Technology Exports. The interagency working group will focus on opening and expanding energy markets for U.S. energy technology to the developing countries, countries in transition, and other partner countries that are expected to experience, over the next 20 years, significant growth in energy production and associated greenhouse gas emissions, including through technology transfer programs under the Framework Convention on Climate Change, other international agreements, and relevant Federal efforts.

(2) MEMBERSHIP.—The interagency working group shall be jointly chaired by representatives appointed by the agency heads under paragraph (1) and shall also include representatives from the Department of State, the Department of Energy, the Environmental Protection Agency, the Export-Import Bank, the Overseas Private Investment Corporation, the Trade and Development Agency, and other federal agencies as deemed appropriate by all three agency heads under paragraph (1).

(d) ANNUAL REPORT.—Not later than April 1, 2002, and each year thereafter, the Interagency Working Group shall submit a report to Congress on its activities during the preceding calendar year. The report shall include a description of the technology, policy, and market opportunities for international development, demonstration, and deployment of clean energy technology exported or deployed in the United States that is expected to experience, over the next 20 years, significant growth in energy production and associated greenhouse gas emissions, including through technology transfer programs under the Framework Convention on Climate Change, other international agreements, and relevant Federal efforts.

(3) REPORT ON USE OF FUNDS.—Not later than October 31 of each year thereafter, the Secretary of State, in consultation with other federal agencies, shall submit a report to Congress indicating how United States funds for clean energy technology exporters and other relevant federal programs are being directed in a manner consistent with the goals of this section. The report shall cover the activities of the Interagency Working Group to support the deployment of clean energy technology to the developing countries, countries in transition, and other partner countries, including efforts pursuant to multilateral and bilateral agreements.

(3) REPORT ON USE OF FUNDS.—Not later than October 31 of each year thereafter, the Secretary of State, in consultation with other federal agencies, shall submit a report to Congress indicating how United States funds for clean energy technology exporters and other relevant federal programs are being directed in a manner consistent with the goals of this section. The report shall cover the activities of the Interagency Working Group to support the deployment of clean energy technology to the developing countries, countries in transition, and other partner countries, including efforts pursuant to multilateral and bilateral agreements.

(f) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the departments, agencies, and entities of the United States described in subsection (b) such sums as may be necessary to support the transfer of clean energy technology, consistent with the direction of the Interagency Working Group to improve U.S. clean energy technology exports.

(g) CONGRESSIONAL REPORT.—Not later than 180 days after the date of enactment of this section, the Secretary shall, by regulation, provide for a pilot program for financial assistance for qualifying international energy deployment projects.

(h) Selection Criteria.—After consultation with the Secretary of State, the Secretary of Commerce, and the United States Trade Representative, the Secretary shall select and approve for participation in the program based solely on the criteria under this title and without regard to the country in which the project is located.

(i) Financial Assistance.—

(1) IN GENERAL.—A United States firm that undertakes a qualifying international energy deployment project that is selected to participate in the pilot program shall be eligible to receive a loan or a loan guarantee from the Secretary.

(2) RATE OF INTEREST.—The rate of interest of any loan made under clause (1) shall be equal to the rate for Treasury obligations equal to the rate for Treasury obligations that would be applicable to such loans if made from the Secretary.

(3) AMOUNT.—The amount of a loan or loan guarantee under clause (1) shall not exceed 50 percent of the total cost of the qualified international energy deployment project.

(4) DEVELOPED COUNTRIES.—Loans or loan guarantees made for projects to be located in a developed country, as listed in Annex I of the UN Framework Convention on Climate Change, shall require at least a 50 percent contribution towards the total cost of the loan or loan guarantee by the host country.

(5) DEVELOPING COUNTRIES.—Loans or loan guarantees made for projects to be located in a developing country, as listed in Annex I of the UN Framework Convention on Climate Change, shall require at least a 10 percent contribution towards the total cost of the loan or loan guarantee by the host country.

(6) Capacity Building Research.—Proposals made for projects to be located in a developing country may include a research component to test the economic and technical feasibility of deploying the technology with the help of the developing country. Such proposals must be related to the technologies
being deployed and must involve both an institution in the host country and an industry, university or national laboratory participant from the United States. The host institution shall contribute at least 50 percent of funds provided for the capacity building research.

(1) COORDINATION WITH OTHER PROGRAMS.—Each international energy deployment project funded under this section shall not be eligible as a qualifying clean coal technology under section 415 of the Clean Air Act (42 U.S.C. 7651n).

(2) REPORT.—Not later than 5 years after the date of enactment of this subsection, the Secretary shall submit to the President a report on the pilot projects.

(3) RECOMMENDATION.—Not later than 60 days after receiving the report under subparagraph (E), the President shall submit to Congress a recommendation, based on the results of the pilot projects as reported by the Secretary of Energy, concerning whether the financial assistance program under this section should be continued, expanded, reduced, or eliminated.

(3) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary to carry out this section $100,000,000 for each of fiscal years 2003 and 2004, and $75,500,000 for each of fiscal years 2003 through 2011, to remain available until expended.

Subtitle D—Climate Change Science and Information

PART I—AMENDMENTS TO THE GLOBAL CHANGE RESEARCH ACT OF 1990

SEC. 1331. AMENDMENT OF GLOBAL CHANGE RESEARCH ACT OF 1990. 

Exempt as otherwise expressly provided, whenever in this subtitle an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision of this Act, the reference shall be considered to refer to, or repeal of, a section or other provision of the Global Change Research Act of 1990 (15 U.S.C. 2901 et seq.).

SEC. 1332. CHANGES IN DEFINITIONS.

Paraphrased, in section 2 (15 U.S.C. 2902) is amended by striking “Earth and” and inserting “Climate and”.

SEC. 1333. CHANGE IN COMMITTEE NAME.

Section 102 (15 U.S.C. 2902) is amended—

(1) by striking “Earth and” in the section heading and inserting “CLIMATE AND”;

(2) by striking “Earth” and in subsection (a) and inserting “Climate and”; and

(3) by striking “section” in subsection (b) and inserting “sections”.

SEC. 1334. CHANGE IN NATIONAL GLOBAL CHANGE RESEARCH PLAN.

Section 105 (15 U.S.C. 2903) is amended—

(1) by adding at the end of subsection (c) the following:

“(6) Methods for integrating information to provide predictive tools for planning and decision making by governments, communities and the private sector.”;

(2) by inserting “local, State, and Federal” before “or for, as determined by the Committee” in subsection (d); and

(3) by striking “and” in subsection (d)(2); and

(4) by striking “,” in subsection (d)(3) and inserting “,” and;”

(5) by adding at the end of subsection (d) the following:

“(4) establish a common assessment and modeling framework that may be used in both research and operations to predict and assess the vulnerability of natural and managed ecosystems and of human society in the context of other environmental and social changes;”;

(6) by adding at the end the following:

“(q) STRATEGIC PLAN; REVISED IMPLEMENTATION PLAN.—The Chairman of the Council, through the Program Office, shall develop a strategic plan for the United States Global Climate Change Research Program for the 10-year period beginning in 2002 and submit the plan to the Congress within 180 days after the date of enactment of the Global Climate Change Act of 2002. The Chairman, through the Program Office, shall also submit a revised implementation plan under subsection (a).”

SEC. 1335. INTEGRATED PROGRAM OFFICE.

Section 105 (15 U.S.C. 2903) is amended—

(1) by redesignating subsections (a), (b), (c), and (d) as subsections (b), (c), (d), and (e) respectively; and

(2) by inserting after subsection (b), as redesignated, the following:

“(a) INTEGRATED PROGRAM OFFICE.—

(1) ESTABLISHMENT.—There is established in the Office of Science and Technology Policy an integrated program office for the global change research program.

(2) ORGANIZATION.—The integrated program office established under paragraph (1) shall be headed by the associate director with responsibility for climate change science and technology and shall include a representative from each Federal agency participating in the global change research program.

(3) FUNCTION.—The integrated program office shall—

(A) manage, working in conjunction with the Committee, interagency coordination and implementation of global change research activities and budget requests;

(B) ensure that the activities and programs of each Federal agency or department participating in the program address the goals and objectives identified in the strategic research plan and interagency implementation plans;

(C) ensure that program and budget recommendations of the Committee are communicated to the President and are integrated into the climate change action strategy; 

(D) review, identify, and allocate funds for, partnership projects that address critical research objectives or operational goals of the program, including projects that would fill research gaps identified by the program, and for which project resources are shared among at least 2 agencies participating in the program; and

(E) review and provide recommendations on, in conjunction with the Committee, all annual appropriations requests from Federal agencies or departments participating in the program.

(4) GRANT AUTHORITY.—The Integrated Program Office may authorize 1 or more of the departments or agencies participating in the program to enter into contracts and make grants, using funds appropriated for use by the Office of Science and Technology Policy for the purpose of carrying out the responsibilities of that Office.

(5) FUNDING.—For fiscal year 2003, and each fiscal year thereafter, not less than $130,000,000 shall be made available to the Integrated Program Office from amounts appropriated to or for the use of the Office of Science and Technology Policy;

(6) by inserting after section 5 the following:

“(1) by striking “preliminary” in paragraph (10), as redesignated;

(2) by striking “this Act,” the first place it appears in paragraph (10), as redesignated, “the Global Change Climate Act of 2002;” and

(3) by striking “this Act,” the second place it appears in paragraph (10), as redesignated, and inserting “that Act.”

SEC. 1344. AUTHORIZATION OF APPROPRIATIONS.

Section 9 (15 U.S.C. 2909) is amended—

(1) by striking “1999,” and inserting “2002;”

(2) by striking “1998,” and inserting “2003;”

(3) by striking “1998,” and inserting “2004;” and

(4) by striking “$25,500,000” and inserting “$75,500,000.”

SEC. 1345. NATIONAL CLIMATE SERVICE PLAN.

The Act (15 U.S.C. 2901 et seq.) is amended by inserting after section 5 the following:

“SEC. 6. NATIONAL CLIMATE SERVICE PLAN.

Within one year after the date of enactment of the Global Climate Change Act of 2002, the Secretary of Commerce shall submit to the Senate Committee on Commerce, Science, and Transportation and the House Science Committee a plan of action for a National Climate Service under the National Climate Program. The plan shall set forth recommendations and funding estimates for—

(1) a national center for operational climate monitoring and predicting with the functional capacity to monitor and adjust observing systems as necessary to reduce bias;

(2) the design, deployment, and operation of an adequate national climate observing system that builds upon existing environmental monitoring systems and closes gaps in coverage by existing systems;

(3) the establishment of the national coordinated modeling strategy, including a national climate modeling center to provide a dedicated capability for climate modeling; and

(4) the development of a long and short term time schedule and at a range of spatial scales;
“4) improvements in modeling and assessment capabilities needed to integrate information to predict regional and local climate changes and impacts; “5) focused research and development efforts, including those related to human-induced and natural processes of global change; “6) improving weather forecasts and public warning systems; “7) strengthening national security and military preparedness; “8) enhancing the safety and efficiency of marine operations; “9) monitoring and evaluating the effectiveness of ocean and coastal environmental policies; “10) reducing and mitigating ocean and coastal pollution; and “11) providing information that contributes to public awareness of the state and importance of the oceans.

SEC. 1347. REPORTING ON TRENDS.

(a) ATMOSPHERIC MONITORING AND VERIFICATION PROGRAM.—The Secretary of Commerce, in coordination with relevant Federal agencies, shall, as part of the National Climate Service, establish an atmospheric monitoring and verification program utilizing aircraft, satellite, ground sensors, and modeling capabilities to monitor, measure, and verify atmospheric greenhouse gas levels, dates, and emissions. Where feasible, the program shall measure emissions from identified sources participating in the reporting system for verification purposes. The program shall establish standards and protocols that are consistent with those utilized in the greenhouse gas measurement and reporting system established under subsection (a) and the registry established under section 1102.

(b) ANNUAL REPORTING.—The Secretary of Commerce shall submit an annual report to the Congress that identifies greenhouse emissions and trends on a local, regional, and national level. The report shall also identify emissions or reductions attributable to individual or multiple sources covered by the greenhouse gas measurement and reporting system established under section 1102.

PART III—OCEAN AND COASTAL OBSERVING SYSTEM

SEC. 1351. OCEAN AND COASTAL OBSERVING SYSTEM.

(a) ESTABLISHMENT.—The President, through the National Ocean Research Leadersh- ership Council, established by section 7902(a) of title 10, United States Code, shall establish and maintain an integrated ocean and coastal observing system that provides for long-term, continuous, and real-time observations of the oceans and coasts for the purposes of— "1) understanding, assessing and responding to human-induced and natural processes of global change; "2) improving weather forecasts and public warning systems; "3) strengthening national security and military preparedness; “4) identifying sources of data from open ocean locations at low cost and in real time. “5) Ocean data management and assimilation systems that ensure full use of new sources of data from space-borne and in situ sensors; “6) focused research programs; “7) Technology development program to develop observing capabilities and technologies, including data management and dissemination; “8) Public outreach and education.

SEC. 1352. AUTHORIZATION OF APPROPRIATIONS. For development and implementation of an integrated ocean and coastal observing system under this title, including financial assistance to regional coastal ocean observing systems, there are authorized to be appropriated $235,000,000 in fiscal year 2003, $315,000,000 in fiscal year 2004, $390,000,000 in local year 2005, and $445,000,000 in fiscal year 2006.

subtitle E—climate change technology

SEC. 1361. NIST GREENHOUSE GAS FUNCTIONS. Section 2(c) of the National Institute of Standards and Technology Act (15 U.S.C. 272(c)) is amended— "1) striking “and” after the semicolon in paragraph (21); “2) by redesignating paragraph (22) as paragraph (23); and “3) by inserting after paragraph (21) the following: "5) Broad bandwidth communications that are capable of transmitting high volumes of data from open ocean locations at low cost and in real time. “6) Ocean data management and assimilation systems that ensure full use of new sources of data from space-borne and in situ sensors; “7) focused research programs; “8) Technology development program to develop observing capabilities and technologies, including data management and dissemination; “9) Public outreach and education.

SEC. 1362. DEVELOPMENT OF NEW MEASUREMENT TECHNOLOGIES.

(a) IN GENERAL.—The Secretary of Commerce shall initiate a program to develop— "1) greenhouse gas emissions and reductions from agriculture, forestry, and other land use practices; “2) non-carbon dioxide greenhouse gas emissions from transportation; “3) greenhouse gas emissions from facilities or sources using remote sensing technology; and “4) any other greenhouse gas emission or reductions for which no accurate or reliable measurement technology exists.

SEC. 1363. ENHANCED ENVIRONMENTAL MEASUREMENTS AND STANDARDS.

The National Institute of Standards and Technology Act (15 U.S.C. 271 et seq.) is amended— “1) by redesignating sections 17 through 32 as sections 18 through 33, respectively; and “2) by inserting after section 16 the following: "SEC. 17. CLIMATE CHANGE STANDARDS AND PROCESSES.

(a) IN GENERAL.—The Director shall establish within the Institute a program to perform and support research on global climate change standards and processes, with the aim of providing scientific and technical knowledge applicable to the reduction of greenhouse gases (as defined in section 4 of the Global Climate Change Act of 2002).

(b) RESEARCH PROGRAM.— "1) Climate Change Standards and Processes. “a) IN GENERAL.—The Director is authorized to conduct, directly or through contracts or grants, a climate change standards and processes program. “b) SPECIFIC CONTENTS.—The specific contents and priorities of the research program...
shall be determined in consultation with appropriate Federal agencies, including the Environmental Protection Agency, the National Oceanic and Atmospheric Administration, and the National Aeronautics and Space Administration. The program generally shall include basic and applied research—

(A) to develop and provide the enhanced measurements, calibrations, data, models, and reference material standards which will enable the monitoring of greenhouse gases;

(B) in establishing of a baseline reference point for future trading in greenhouse gases and the measurement of progress in emissions reduction;

(C) to address greenhouse gases acknowledged internationally as scientific or technical information which has the stated purpose of developing mutually recognized measurements, standards, and procedures for reducing greenhouse gases; and

(D) to assist in developing improved industrial processes designed to reduce or eliminate greenhouse gases.

"(c) National Measurement Laboratories.—

(1) IN GENERAL.—In carrying out this section, the Director shall utilize the collective skills of the National Measurement Laboratories of the National Institute of Standards and Technology to develop those baseline measurements that will permit better understanding and control of these industrial chemical processes and result in the reduction of greenhouse gas emissions.

(2) Material, Process, and Building Research.—The National Measurement Laboratories shall conduct research under this subsection that includes—

(A) developing material and manufacturing processes which are designed for energy efficiency and reduced greenhouse gas emissions into the environment;

(B) developing environmentally-friendly, ‘green’ chemical processes to be used by industry; and

(C) enhancing building performance with a focus in developing standards or tools which will help incorporate low or no-emission technologies into building designs.

"(d) National Voluntary Laboratory Accreditation Program.—The Director shall utilize the National Voluntary Laboratory Accreditation Program under this section to establish a program to include specific calibration or test standards and related methods and protocols assembled to satisfy the unique needs of the Nation’s industries engaged in the production of greenhouse gases. In carrying out this subsection the Director may cooperate with other departments and agencies of the Federal Government, State and local governments, and private organizations.

SEC. 1364. TECHNOLOGY DEVELOPMENT AND DIFFUSION.

(a) Advanced Technology Program Competitions.—The Director of the National Institute of Standards and Technology, through the Advanced Technology Program, may hold a portion of the Institute’s competitions in thematic areas, selected after consultation with industry, academia, and other Federal Agencies, designed to develop new and commercialize enabling technologies to address global climate change by significantly reducing greenhouse gas emissions and concentrations in the atmosphere.

(b) Manufacturing Extension Partnership Authorization and Appropriations.—The Director of the National Institute of Standards and Technology, through the Manufacturing Extension Partnership, shall support the implementation of new “green” manufacturing technologies and techniques by the more than 380,000 small manufacturers.

SEC. 1365. APPLICABILITY OF PROVISIONS.

There are authorized to be appropriated to the Director to carry out functions pursuant to sections 1345, 1351, and 1361 through 1363, $10,000,000 for each fiscal year from 2006 through 2009.

Subtitle F—Climate Adaptation and Hazards Prevention

PART I—ASSESSMENT AND ADAPTATION

SEC. 1371. REGIONAL CLIMATE ASSESSMENT AND ADAPTATION.

(a) IN GENERAL.—The President shall establish within the Department of Commerce a National Climate Change Vulnerability and Adaptation Program for regional impacts to including concentrations of greenhouse gases in the atmosphere and climate variability.

(b) COORDINATION.—In designing such program the Secretary shall consult with the Federal Emergency Management Agency, the Environmental Protection Agency, the Army Corps of Engineers, the Department of Transportation, and other appropriate Federal, State, and local government entities.

(c) VULNERABILITY ASSESSMENTS.—The program shall—

(1) evaluate, based on predictions developed under this Act and the National Climate Change Program Act (15 U.S.C. 2901 et seq.), relocations and mandatory actions that will be associated with climate change and climate variability, including—

(A) increases in severe weather events;

(B) sea level rise and shifts in the hydrological cycle;

(C) natural hazards, including tsunami, drought, flood and fire; and

(D) alteration of ecological communities, including at the ecosystem or watershed level;

(2) build upon predictions and other information developed or obtained under this Act, the National Assessment and Adaptation Program Act (15 U.S.C. 2901 et seq.), relocations and mandatory actions that will be associated with climate change and climate variability, including—

(A) increases in severe weather events;

(B) sea level rise and shifts in the hydrological cycle;

(C) natural hazards, including tsunami, drought, flood and fire; and

(D) alteration of ecological communities, including at the ecosystem or watershed level;

(E) build upon predictions and other information developed or obtained under this Act, the National Assessment and Adaptation Program Act (15 U.S.C. 2901 et seq.), relocations and mandatory actions that will be associated with climate change and climate variability, including—

(A) increases in severe weather events;

(B) sea level rise and shifts in the hydrological cycle;

(C) natural hazards, including tsunami, drought, flood and fire; and

(D) alteration of ecological communities, including at the ecosystem or watershed level.

OUTLINE OF THE BILL

March 5, 2002

SENIOR CONGRESSIONAL RECORD — SENATE

S1496

LOCAL GOVERNMENTAL ENTITIES, CONDUCT REGIONAL ASSESSMENTS OF THE VULNERABILITY OF COASTAL AREAS TO HAZARDS ASSOCIATED WITH CLIMATE CHANGE, CLIMATE VARIABILITY, SE A LEVEL RISE, AND LOSS OF LIFE AND PROPERTY, AND COORDINATE DISSEMINATION OF INFORMATION AND THE IMPLEMENTATION OF NEW ‘GREEN’ MANUFACTURING TECHNOLOGIES AND TECHNIQUES BY THE MORE THAN 380,000 SMALL MANUFACTURERS.

SEC. 1365. APPLICABILITY OF PROVISIONS.

There are authorized to be appropriated to the Director to carry out functions pursuant to sections 1345, 1351, and 1361 through 1363, $10,000,000 for each fiscal year from 2006 through 2009.

Subtitle F—Climate Adaptation and Hazards Prevention

PART I—ASSESSMENT AND ADAPTATION

SEC. 1371. REGIONAL CLIMATE ASSESSMENT AND ADAPTATION.

(a) IN GENERAL.—The President shall establish within the Department of Commerce a National Climate Change Vulnerability and Adaptation Program for regional impacts to including concentrations of greenhouse gases in the atmosphere and climate variability.

(b) COORDINATION.—In designing such program the Secretary shall consult with the Federal Emergency Management Agency, the Environmental Protection Agency, the Army Corps of Engineers, the Department of Transportation, and other appropriate Federal, State, and local government entities.

(c) VULNERABILITY ASSESSMENTS.—The program shall—

(1) evaluate, based on predictions developed under this Act and the National Climate Change Program Act (15 U.S.C. 2901 et seq.), relocations and mandatory actions that will be associated with climate change and climate variability, including—

(A) increases in severe weather events;

(B) sea level rise and shifts in the hydrological cycle;

(C) natural hazards, including tsunami, drought, flood and fire; and

(D) alteration of ecological communities, including at the ecosystem or watershed level;

(2) build upon predictions and other information developed or obtained under this Act, the National Assessment and Adaptation Program Act (15 U.S.C. 2901 et seq.), relocations and mandatory actions that will be associated with climate change and climate variability, including—

(A) increases in severe weather events;

(B) sea level rise and shifts in the hydrological cycle;

(C) natural hazards, including tsunami, drought, flood and fire; and

(D) alteration of ecological communities, including at the ecosystem or watershed level;
1 to 1 thereafter. Distribution of these funds to coastal states shall be based upon the formula established under section 306(c) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1453 et seq.) and is consistent with the coastal zone management plan of the State in which it is located.

(C) Future cost—A project is eligible for financial assistance under the pilot program if it—

(1) will restore or strengthen coastal resources, sources, facilities, or infrastructure that have been damaged by such an impact, as determined by the Secretary;

(2) meets the requirements of the Coastal Zone Management Act (16 U.S.C. 1451 et seq.) and is consistent with the coastal zone management plan of the State in which it is located;

(3) does not cost more than $100,000.

(3) Funding share.—The Federal funding share of any project under this subsection may not exceed 50 percent of the total cost of the project. In the administration of this paragraph—

(A) the Secretary may take into account in-kind contributions and other non-cash support to determine the Federal funding share for that project; and

(B) the Secretary may waive the requirements of this paragraph for a project in a community if—

(i) the Secretary determines that the project is important; and

(ii) the economy and available resources of the community in which the project is to be conducted are insufficient to meet the non-Federal share of the project’s costs.

F. Definitions.—Any term used in this Act that is defined by the Coastal Zone Management Act of 1972 (16 U.S.C. 1453) has the meaning given it by that Act.

(g) Authorization of Appropriations.—There are authorized to be appropriated $5,000,000 annually for regional assessments under this section, $2,000,000 annually for coastal adaptation grants under this subsection (d).

PART II—FORECASTING AND PLANNING PILOT PROGRAMS

SEC. 1381. REMOTE SENSING PILOT PROJECTS.

(a) In General.—The Administrator of the National Aeronautics and Space Administration shall establish, through the National Oceanic and Atmospheric Administration’s Coastal Services Center, a program of grants for competitively awarded pilot projects to explore the integrated use of sources of remote sensing and other geospatial information to address State, local, regional, and tribal areas. The grants shall be available for the following purposes:

(1) Identify areas that are sensitive to the consequences of global climate change or climate variability;

(2) make use of existing public or commercial data sets;

(3) use data from multiple sources of geospatial information, such as geographic information system data, satellite-provided positioning data, and remotely sensed data, in innovative ways;

(4) offer diverse, innovative approaches that may serve as models for establishing a future coordinated framework for planning strategies for adaptation to coastal zone and land use changes related to global climate change or climate variability;

(b) In-kind contributions from non-Federal sources;

(6) involve the participation of commercial entities that process raw or lightly processed data, other organizations to develop, use, and disseminate geospatial information, to create data products that have significant value added to the original data;

(7) take steps to demonstrate as diverse as possible a set of public sector applications as possible.

(c) Opportunities.—In carrying out this section, the Center shall seek opportunities to assist—

(1) in the development of commercial applications potentially available from the remote sensing industry; and

(2) State, local, regional, and tribal agencies in applying remote sensing and other geospatial information technologies for management and adaptation to coastal and land use consequences of global climate change or climate variability.

(d) Duration.—For a pilot project under this section, the Center shall be provided for a period of not more than 3 years.

(e) Responsibilities of Grantees.—Within 180 days after completion of a grant project, the grantee shall submit a report to the Secretary on the results of the pilot project and conduct at least one workshop for potential users to disseminate the results from the pilot project as widely as feasible.

(f) Regulations.—The Center shall issue regulations establishing application, selection, and implementation procedures for pilot projects, and guidelines for reports and workshops required by this section.

SEC. 1382. DATABASE ESTABLISHMENT.

(a) In General.—The Center shall maintain an electronic, Internet-accessible database of the results of each pilot project completed under section 1381.

SEC. 1383. DEFINITIONS.

In this subtitle:

(1) Center.—The term “Center” means the Coastal Services Center of the National Oceanic and Atmospheric Administration.

(2) Geospatial Information.—The term “geospatial information” means knowledge of the nature and distribution of physical and cultural features on the landscape based on analysis of data from airborne or spaceborne platforms or other types and sources of data.

(3) Institution of Higher Education.—The term “institution of higher education” has the meaning given that term in section 101(a) of the Higher Education Act of 1965 (20 U.S.C. 1001(a)).

SEC. 1384. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated $30,000,000 annually for the program authorized by this subtitle.

SEC. 1385. AUTHORIZATION OF APPROPRIATIONS.

(a) In General.—There are authorized to be appropriated $20,000,000 for fiscal year 2004; $20,000,000 for fiscal year 2005; $22,500,000 for fiscal year 2006; and $22,500,000 for fiscal year 2007.

(b) Title XIV—MANAGEMENT OF DOE SCIENCE AND TECHNOLOGY PROGRAMS

SEC. 1401. DEFINITIONS.

In this title:

(1)APPLICABILITY OF DEFINITIONS.—The definitions in section 1201 shall apply.

SEC. 1402. AVAILABLE OF FUNDS.

Awards authorized under section 1202 shall be made only after an independent review of the scientific and technical merit of the proposals for such awards has been made by the Department of Energy.

SEC. 1403. COST SHARING.

(a) RESEARCH AND DEVELOPMENT.—For research and development projects funded from appropriations authorized under subtitl
CONGRESSIONAL RECORD — SENATE

(b) Utilization of Existing Committees.— The Secretary of Energy shall continue to use the scientific program advisory committees chartered under the Federal Advisory Committee Act by the Office of Science to oversee research and development programs under that Office.

(c) Office.— Each advisory board under this section shall consist of experts drawn from industry, academia, federal laboratories, research institutions, or state, local, or tribal governments, as appropriate.

(d) Meetings and Purposes.— Each advisory board under this section shall meet at least annually to review and advise on the progress made by the respective research, development, demonstration, and technology deployment program. The advisory board shall review the adequacy and relevance of the goals established for each program by Congress and the President, and may otherwise advise on promising future directions in research and development that should be considered by each program.

SEC. 1406. Improved Coordination and Management of Civilian Science and Technology Programs.

(a) Effective Top-Level Coordination of Research and Development Programs.—

Section 5311 of the Department of Energy Organization Act (42 U.S.C. 7131(b)) is amended to read as follows:

"(b) The Secretary shall be in the Department an Under Secretary for Energy and Science, who shall be appointed by the President, and with the advice and consent of the Senate. The Under Secretary shall be compensated at the rate provided for at level III of the Executive Schedule under section 5314 of title 5, United States Code.

(2) The Under Secretary for Energy and Science shall be appointed from among persons who—

(A) have extensive background in scientific and engineering fields; and

(B) are well qualified to manage the civilian research and development programs of the Department of Energy.

(c) The Under Secretary for Energy and Science shall—

(1) serve as the Science and Technology Advisor to the Secretary;

(2) monitor the Department’s research and development programs in order to advise the Secretary with respect to any undesirable duplication of efforts in such programs;

(3) advise the Secretary with respect to the well-being and management of the multi-purpose laboratories under the jurisdiction of the Department;

(4) advise the Secretary with respect to education and training activities required for effective short- and long-term basic and applied research activities of the Department;

(E) advise the Secretary with respect to grants and other forms of financial assistance required for effective short- and long-term basic and applied research activities of the Department; and

(F) exercise authority and responsibility over Assistant Secretaries carrying out the energy research and development and energy technology functions under sections 203 and 209, as well as other elements of the Department assigned by the Secretary;

(b) Reconfiguration of Position of Director of the Office of Science.— Section 209 of the Department of Energy Organization Act (41 U.S.C. 7101) is further amended by striking "Secretary of Energy" and inserting "Under Secretary of Energy and Science".

(c) Additional Assistant Secretary Position to Enable Improved Management of Nuclear Energy (4) The Secretary shall—

(1) establish a Technology Infrastructure Program, and shall oversee the expenditure of funds allocated to the Technology Infrastructure Program by the Office of Federal Procurement Policy Act (41 U.S.C. 421(c)(1)) may be credited toward costs paid by non-Federal sources to a project, if the expenses meet the other requirements of this section.

(3) No funds or other resources expended either before the start of a project under this
Congressional Record — Senate

S1499

March 5, 2002

section or outside the project’s scope of work shall be credited toward the costs paid by the non-Federal sources to the project.

3) Competitive Selection.—All projects in which the Department plans to operate a National Laboratory, or a single-purpose research facility receives funding under this section shall, to the extent practicable, be competitively bid by the National Laboratory or facility using procedures determined to be appropriate by the Secretary.

4) Accounting Standards.—Any participant under this section, other than a National Laboratory or single-purpose research facility, may use generally accepted accounting principles for maintaining accounts, books, and records relating to the project.

5) Limitations.—No Federal funds shall be made available to any party under this section for—
(A) construction; or
(B) any project for more than five years.

6) Selection Criteria.—The Secretary shall allocate funds under this section only if the Director of the National Laboratory or single-purpose research facility managing the project determines that the project is likely to improve the ability of the National Laboratory or single-purpose research facility to achieve its technical milestones in meeting departmental missions.

7) Additional Criteria.—The Secretary shall require the Director of the National Laboratory or single-purpose research facility to—
(A) increase the participation of small business concerns, including socially and economically disadvantaged small business concerns, in procurement, collaborative research, technology licensing, and technology transfer activities conducted by the National Laboratory or single-purpose research facility;
(B) report to the Director of the National Laboratory or single-purpose research facility on the actual participation of small business concerns in procurement and collaborative research along with recommendations, if appropriate, on how to improve participation;
(C) make available to small business concerns training, mentoring, and clear, up-to-date information on how to participate in procurement and collaborative research, including how to submit effective proposals;
(D) increase the awareness inside the National Laboratory or single-purpose research facility of the capabilities and opportunities presented by small business concerns; and
(E) establish guidelines for the program under subsection (b) on the effectiveness of such program to the Director of the National Laboratory or single-purpose research facility.

Establishment of Small Business Assistance Program.—The Secretary shall require the Director of each National Laboratory, and may require the Director of a single-purpose research facility, to establish a program to provide small business concerns assistance directed at making them direct grants to the small business concerns.

Use of Funds.—The Secretary shall require the Director of each National Laboratory, and may require the Director of a single-purpose research facility, to establish a program to provide small business concerns assistance directed at making them direct grants to the small business concerns.

Authority of Appropriations.—There are authorized to be appropriated to the Secretary for activities under this section $10,000,000 for each of fiscal years 2003 and 2004.

SEC. 1409. SMALL BUSINESS ADVOCACY AND ASSISTANCE.
(a) Small Business Advocate.—The Secretary shall require the Director of each National Laboratory, and may require the Director of a single-purpose research facility, to establish an office to perform the following functions:
(1) increase the participation of small business concerns, including socially and economically disadvantaged small business concerns, in procurement, collaborative research, technology licensing, and technology transfer activities conducted by the National Laboratory or single-purpose research facility;
(2) report to the Director of the National Laboratory or single-purpose research facility on the actual participation of small business concerns in procurement and collaborative research along with recommendations, if appropriate, on how to improve participation;
(3) make available to small business concerns training, mentoring, and clear, up-to-date information on how to participate in procurement and collaborative research, including how to submit effective proposals;
(4) increase the awareness inside the National Laboratory or single-purpose research facility of the capabilities and opportunities presented by small business concerns; and
(5) establish guidelines for the program under subsection (b) on the effectiveness of such program to the Director of the National Laboratory or single-purpose research facility.
(b) Establishment of Small Business Assistance Program.—The Secretary shall require the Director of each National Laboratory, and may require the Director of a single-purpose research facility, to establish a program to provide small business concerns assistance directed at making them direct grants to the small business concerns.
(c) Use of Funds.—The Secretary shall require the Director of each National Laboratory, and may require the Director of a single-purpose research facility, to establish a program to provide small business concerns assistance directed at making them direct grants to the small business concerns.
(d) Authority of Appropriations.—There are authorized to be appropriated to the Secretary for activities under this section $10,000,000 for each of fiscal years 2003 and 2004.

SEC. 1410. SMALL BUSINESS ADVOCACY AND ASSISTANCE.
(a) Small Business Advocate.—The Secretary shall require the Director of each National Laboratory, and may require the Director of a single-purpose research facility, to establish an office to perform the following functions:
(1) increase the participation of small business concerns, including socially and economically disadvantaged small business concerns, in procurement, collaborative research, technology licensing, and technology transfer activities conducted by the National Laboratory or single-purpose research facility;
(2) report to the Director of the National Laboratory or single-purpose research facility on the actual participation of small business concerns in procurement and collaborative research along with recommendations, if appropriate, on how to improve participation;
(3) make available to small business concerns training, mentoring, and clear, up-to-date information on how to participate in procurement and collaborative research, including how to submit effective proposals;
(4) increase the awareness inside the National Laboratory or single-purpose research facility of the capabilities and opportunities presented by small business concerns; and
(5) establish guidelines for the program under subsection (b) on the effectiveness of such program to the Director of the National Laboratory or single-purpose research facility.
(b) Establishment of Small Business Assistance Program.—The Secretary shall require the Director of each National Laboratory, and may require the Director of a single-purpose research facility, to establish a program to provide small business concerns assistance directed at making them direct grants to the small business concerns.
(c) Use of Funds.—The Secretary shall require the Director of each National Laboratory, and may require the Director of a single-purpose research facility, to establish a program to provide small business concerns assistance directed at making them direct grants to the small business concerns.
(d) Authority of Appropriations.—There are authorized to be appropriated to the Secretary for activities under this section $10,000,000 for each of fiscal years 2003 and 2004.

SEC. 1411. MOBILITY OF SCIENTIFIC AND TECHNICAL PERSONNEL.
Not later than two years after the enactment of this section, the Secretary, acting through the Director, shall report to Congress on the opportunities under this section for the mobility of scientific and technical personnel among the Department’s laboratories, including joint laboratories, contractor-operated laboratories, National Laboratory managed facilities, and facilities operated by the Secretary.
SEC. 1413. REPORT ON TECHNOLOGY READINESS AND BARRIERS TO TECHNOLOGY TRANSFER.

(a) IN GENERAL.—The Secretary, acting through the Partnership Working Group and in consultation with representatives of affected industries, universities, and small business concerns, shall—

(1) assemble the baseline data for technology transfer of energy technologies developed through projects funded from appropriations authorized under subtitles A through D of title II and

(2) identify barriers to technology transfer and cooperative research and development agreements between the Department or a semiprivate entity and cooperative research and development corporations established by the Secretary under this section, and shall update such report on a biennial basis, taking into account progress made in eliminating barriers to technology transfer identified in previous reports under this section.

TITLE XV—PERSONNEL AND TRAINING

SEC. 1501. WORKFORCE TRENDS AND TRAINEESHIP GRANTS.

(a) WORKFORCE TRENDS.—

(1) MONITORING.—The Secretary of Energy (in this section referred to as the “Secretary”), acting through the Administrator of the Energy Information Administration, in consultation with the Secretary of Labor, shall monitor trends in the workforce of skilled technical personnel supporting energy technology industries, including renewable energy industries, companies developing and commercializing devices to increase energy efficiency, the oil and gas industry, nuclear power industry, the coal industry, and other industrial sectors as the Secretary may deem appropriate.

(2) ANNUAL REPORTS.—The Administrator of the Energy Information Administration shall include statistics on energy industry workforce trends in an annual report of the Energy Information Administration.

(3) SPECIAL REPORTS.—The Secretary shall report to the appropriate committees of Congress—

(A) on workforce development, and deployment.

(b) CONTENT OF GUIDELINES.—From amounts authorized under section 1241(c), there are authorized to be appropriated to the Secretary for activities under this section such sums as may be necessary for each fiscal year to carry out the recommendations included in the report submitted under subsection (a).

SEC. 1502. POSTDOCTORAL AND SENIOR RESEARCH FELLOWSHIPS IN ENERGY RESEARCH.

(a) POSTDOCTORAL FELLOWSHIPS.—The Secretary shall establish a program of fellowships to encourage outstanding young scientists and engineers to pursue postdoctoral research appointments in energy research and development at institutions of higher education of their choice. In establishing a program under this subsection, the Secretary may enter into appropriate arrangements with the National Academy of Sciences to help administer the program.

(b) DISTINGUISHED SENIOR RESEARCH FELLOWSHIPS.—The Secretary shall establish a program of fellowships to allow outstanding senior researchers in energy research and development and their research groups to explore research and development topics of their choosing for a fixed period of time. Awards under this program shall be made on the basis of past scientific or technical accomplishment and promise for continued accomplishment during the period of support, which shall not be less than 3 years.

(c) AUTHORIZATION OF APPROPRIATIONS.—From amounts authorized under section 1241(c), there are authorized to be appropriated to the Secretary for activities under this section such sums as may be necessary for each fiscal year to carry out the recommendations included in the report submitted under subsection (a).

SEC. 1503. TRAINING GUIDELINES FOR ELECTRIC ENERGY INDUSTRY PERSONNEL.

(a) MODEL GUIDELINES.—The Secretary shall, in cooperation with electric generation, transmission, and distribution companies and recognized representatives of employees of those entities, develop model employee training guidelines to support electric supply system reliability and safety.

(b) CONTENT OF GUIDELINES.—The guidelines under this section shall include—

(1) requirements, training, competency, and certification, developed using criteria set forth by the Utility Industry Group recognized by the National Skill Standards Board, and as established by the National Electric Safety Code and other industry consensus standards.

(2) consolidation of existing guidelines on the construction, operation, maintenance, and inspection of electric supply generation, transmission and distribution facilities such as those established by the National Electric Safety Code and other industry consensus standards.

SEC. 1504. NATIONAL CENTER ON ENERGY MANAGEMENT AND BUILDING TECHNOLOGIES.

The Secretary shall establish a National Center on Energy Management and Building Technologies, to carry out research, education, and training activities to facilitate the improvement of energy efficiency and indoor air quality in industrial, commercial, and residential buildings. The National Center shall be established in cooperation with—

(1) recognized representatives of employers in the heating, ventilation, and air conditioning industry;

(2) contractors that install and maintain heating, ventilation and air conditioning systems and equipment;

(3) manufacturers of heating, ventilation and air-conditioning systems and equipment;

(4) representatives of the advanced building envelope industry, including design, windows, lighting, and insulation industries; and

(5) other entities as appropriate.

SEC. 1505. IMPROVED ACCESS TO ENERGY-RELATED SCIENTIFIC AND TECHNICAL CAREERS.

(a) DEPARTMENT OF ENERGY SCIENCE EDUCATION PROGRAMS.—Section 3164 of the Department of Energy Science Education Enhancement Act (42 U.S.C. 7381a) is amended by adding at the end the following:

“(c) PROGRAMS FOR WOMEN AND MINORITY SUPPORT.—In carrying out a program under subsection (a), the Secretary shall give priority to activities that are designed to encourage women and minority students to pursue scientific and technical careers.

(b) PARTNERSHIPS WITH HISTORICALLY BLACK COLLEGES AND UNIVERSITIES, HISPANIC-SERVING INSTITUTIONS, AND TRIBAL COLLEGES.—The Department of Energy Science Education Enhancement Act (42 U.S.C. 7381 et seq.) is amended—

(1) by redesignating sections 3167 and 3168 as sections 3168 and 3169, respectively, and

(2) by inserting after section 3168 the following:

“SEC. 3167. PARTNERSHIPS WITH HISTORICALLY BLACK COLLEGES AND UNIVERSITIES, HISPANIC-SERVING INSTITUTIONS, AND TRIBAL COLLEGES.

“(a) DEFINITIONS.—In this section:

“(1) HISPANIC-SERVING INSTITUTION.—The term ‘Hispanic-serving institution’ has the meaning given the term ‘part B institution’ in section 322 of the Higher Education Act of 1965 (20 U.S.C. 1061).

“(2) HISTORICALLY BLACK COLLEGE OR UNIVERSITY.—The term ‘historically Black college or university’ has the meaning given the term ‘tribally controlled college or university’ in section 2(a) of the Tribally Controlled College or University Assistance Act of 1978 (25 U.S.C. 1801(a)).

“(3) TRIBAL COLLEGE.—The term ‘tribal college’ has the meaning given the term ‘tribally controlled college or university’ in section 2(a) of the Tribally Controlled College or University Assistance Act of 1978 (25 U.S.C. 1801(a)).

“(b) EDUCATION PARTNERSHIP.—

“(1) IN GENERAL.—The Secretary shall direct the Director of each National Laboratory, and may direct the head of any science agency, to increase the participation of historically Black colleges or universities, Hispanic-serving institutions, or tribal colleges in activities that increase the capacity of historically Black colleges or universities, Hispanic-serving institutions, or tribal colleges to train personnel in science or engineering.

“(2) ACTIVITIES.—An activity under paragraph (1) may include—

“(A) collaborative research;

“(B) a transfer of equipment;

“(C) training of personnel at a National Laboratory or science facility; and

“(D) a mentoring activity by personnel at a National Laboratory or science facility.

“(e) REPORT.—Not later than 2 years after the date of enactment of this section, the Secretary shall submit to the Committee on Science of the House of Representatives and the Committee on Natural Resources of the Senate a report on the activities carried out under this section.”.

SEC. 3168. PARTNERSHIPS WITH HISTORICALLY BLACK COLLEGES AND UNIVERSITIES, HISPANIC-SERVING INSTITUTIONS, AND TRIBAL COLLEGES.
(4) prescribe such rules and regulations as it deems necessary governing the operation and organization of the Service.

SEC. 707. BOARD.

The Board shall consist of 13 members as follows—

(1) 6 Members of the Senate, appointed by the President pro tempore of the Senate, 3 from the majority party and 3 from the minority party;

(2) 6 Members of the House of Representatives appointed by the Speaker of the House and Representatives 3 from the majority party and 3 from the minority party;

(3) the Director, who shall not be a voting member.

SEC. 708. REPORT TO CONGRESS.

The Service shall submit to the Congress an annual report which shall include, but not be limited to, an evaluation of technology assessment, insofar as may be feasible, of technological areas and programs requiring future analysis. The annual report shall be submitted not later than March 15 of each year.

SEC. 709. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Service such sums as are necessary to fulfill the requirements of this title.

TITLE XVII—STUDIES

SEC. 1701. REGULATORY REVIEWS.

(a) REGULATORY REVIEWS.—Not later than one year after the date of enactment of this section, and every five years thereafter, each Federal agency shall review relevant regulations and standards to identify—

(1) existing regulations and standards that act as barriers to—

(A) market entry for emerging energy technologies (including fuel cells, combined heat and power, distributed power generation, and small-scale renewable energy); and

(B) market development and expansion for existing energy technologies (including combined heat and power, small-scale renewable energy, and energy recovery in industrial processes), and

(2) actions the agency is taking or could take to—

(A) remove barriers to market entry for emerging energy technologies and to market expansion for existing technologies,

(B) increase energy efficiency and conservation, or

(C) encourage the use of new and existing processes to meet energy and environmental goals.

(b) REPORT TO CONGRESS.—Not later than 18 months after the date of enactment of this section, and every five years thereafter, the Director of the Office of Science and Technology Policy shall report to the Congress on the results of the agency reviews conducted under subsection (a).

(c) CONTENTS OF THE REPORT.—The report shall—

(1) identify all regulatory barriers to—

(A) the development and commercialization of emerging energy technologies and processes, and

(B) the further development and expansion of existing energy conservation technologies and processes;

(2) actions taken, or proposed to be taken, to remove such barriers, and

(3) recommendations for changes in laws or regulations that may be needed to—

(A) expedite the siting and development of energy production and distribution facilities,

(B) encourage the adoption of energy efficiency and process improvements;

(C) facilitate the expanded use of existing energy conservation technologies, and

(D) reduce the environmental impacts of energy facilities and processes, through transparent and flexible compliance methods.

SEC. 1702. ASSESSMENT OF DEPENDENCE OF HAWAII ON OIL.

(a) STUDY.—Not later than 60 days after the enactment of this section—

(1) the Secretaries of Energy shall initiate a study that assesses the economic risk posed by the dependence of Hawaii on oil as the principal source of energy, and

(b) SCOPE OF THE STUDY.—The Secretary shall assess—

(1) the short- and long-term threats to the economy of Hawaii posed by insecure supply and volatile prices;

(2) the impact on availability and cost of refined petroleum products if oil-fired electric generation is displaced by other sources;

(3) the feasibility of increasing the contribution of renewable sources to the overall energy requirements of Hawaii; and

(4) the feasibility of using liquid natural gas as a source of energy to supplement oil.

(c) REPORT.—Not later than 300 days after the date of enactment of this section, the Secretary shall prepare, in consultation with appropriate agencies of the State of Hawaii, industry representatives, and citizen groups, and shall submit to Congress a report detailing the Secretary’s findings, conclusions, and recommendations. The report shall include—

(1) a detailed analysis of the availability, economics, infrastructure needs, and recommendations to increase the contribution of renewable energy to the overall energy requirements of Hawaii; and

(2) a detailed analysis of the use of liquid natural gas, including—

(A) the availability of supply,

(B) economics,

(C) environmental and safety considerations,

(D) technical limitations,

(E) infrastructure and transportation requirements, and

(F) siting and facility configurations, including—

(i) onshore and offshore alternatives, and

(ii) environmental and safety considerations of both onshore and offshore alternatives.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary of Energy such sums as may be necessary to carry out the purposes of this section.

SEC. 1703. STUDY OF SITING AN ELECTRIC TRANSMISSION SYSTEM ON AMTRAK RIGHT-OF-WAY.

(a) STUDY.—The Secretary of Energy shall contract with Amtrak to conduct a study to identify the feasibility of building and operating a new electric transmission system on the Amtrak right-of-way in the Northeast Corridor.

(c) CONTENTS OF THE STUDY.—The study shall consider—

(1) alternative geographic configuration of a new electronic transmission system on the Amtrak right-of-way;

(2) alternative technologies for the system;

(3) the estimated costs of building and operating each alternative;

(4) alternative means of financing the system;

(5) the environmental risks and benefits of building and operating each alternative as well as environmental impacts and benefits of building and operating the system on the Northeast Corridor rather than at other locations;

(6) engineering and technological obstacles to building and operating each alternative; and
(7) the extent to which each alternative would enhance the reliability of the electric transmission grid and enhance competition in the sale of electric energy at wholesale within the United States.

(d) RECOMMENDATIONS.—The study shall recommend the optimal geographic configuration, the optimal technology, the optimal engineering design, and the optimal means of financing for the new system from among the alternatives considered.

(e) REPORT.—The Secretary of Energy shall submit a completed study to the Committee on Energy and Natural Resources of the United States Senate and the Committee on Energy and Commerce of the House of Representatives, or, in the event the study is not completed by the date of enactment of this section, the final study to Congress.

(f) DEFINITIONS.—For purposes of this section—

(1) the term ‘Amtrak’ means the National Railroad Passenger Corporation established under chapter 243 of title 49, United States Code; and

(2) the term ‘Northeast Corridor’ shall have the meaning given such term under section 24102(7) of title 49, United States Code.

DIVISION G—ENERGY INFRASTRUCTURE SECURITY

TITLE XVIII—CRITICAL ENERGY INFRASTRUCTURE

Subtitle A—Department of Energy Programs

SEC. 1801. DEFINITIONS.

In this title:

(1) CRITICAL ENERGY INFRASTRUCTURE.—(A) The term ‘critical energy infrastructure’ means a physical or cyber-based system or service for—

(i) the generation, transmission, or distribution of electric energy; or

(ii) the production, refining, or storage of petroleum, natural gas, or petroleum products;

(B) the incapacity or destruction of which would have a debilitating impact on the defense or economic security of the United States.

(2) EXCLUSION.—The term shall not include a facility that is licensed by the Nuclear Regulatory Commission under section 103 or 104 b. of the Atomic Energy Act of 1954 (42 U.S.C. 2133 and 2134(b)).

(3) DEPARTMENT.—The term ‘Department’, ‘National Laboratory’, and ‘Secretary’ have the meaning given such terms in section 12301.

SEC. 1802. ROLE OF THE DEPARTMENT OF ENERGY

Section 102 of the Department of Energy Organization Act (42 U.S.C. 7121) is amended by adding at the end the following:

‘‘(29) To ensure the safety, reliability, and security of the nation’s energy infrastructure, and to respond to any threat to or disruption of such infrastructure, through activities including—

(A) research and development;

(B) research, planning, technical assistance, and cooperative activities with States, industry, and other interested parties; and

(C) education and outreach activities.’’

SEC. 1803. CRITICAL ENERGY INFRASTRUCTURE PROGRAMS.

(a) PROGRAMS.—In addition to the authorities otherwise provided by law (including section 1231), the Secretary is authorized to establish programs of financial, technical, or administrative assistance to—

(1) enhance the security of critical energy infrastructure in the United States;

(2) develop and disseminate, in cooperation with industry, best practices for critical energy infrastructure; and

(3) protect against, mitigate the effect of, and improve the ability to recover from disruptive incidents affecting critical energy infrastructure.

(b) REQUIREMENTS.—A program established under this section shall—

(1) be undertaken in consultation with the advisory committee established under section 1804;

(2) have available to it the scientific and technical resources of the Department, including resources at a National Laboratory; and

(3) be consistent with any overall Federal plan for national energy infrastructure security developed by the President or his designee.

SEC. 1804. ADVISORY COMMITTEE ON ENERGY INFRASTRUCTURE SECURITY.

(a) E STABLISHMENT.—The Secretary shall establish a committee, or utilize an existing advisory committee within the Department, to advise the Secretary on policies and programs related to the security of U.S. energy infrastructure.

(b) BALANCED MEMBERSHIP.—The Secretary shall ensure that the advisory committee established or utilized under subsection (a) has a membership with an appropriate balance among the various interests related to energy infrastructure security, including—

(1) scientific and technical experts;

(2) industrial representatives;

(3) worker representatives;

(4) insurance companies or organizations;

(5) environmental organizations;

(6) representatives of State, local, and tribal governments; and

(7) such other interests as the Secretary may deem appropriate.

(c) EXPENSES.—Members of the advisory committee established or utilized under subsection (a) shall serve without compensation, and shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized for an employee of an agency under subchapter I of chapter 57 of title 5, United States Code, while away from the home or regular place of business of the member in the performance of the duties of the committee.

SEC. 1805. BEST PRACTICES AND STANDARDS FOR ENERGY INFRASTRUCTURE SECURITY.

The Secretary, in consultation with the advisory committee under section 1804, shall develop and disseminate best practices and standards for ensuring the security of critical energy infrastructure.

SUBTITLE B—DEPARTMENT OF THE INTERIOR PROGRAMS

SEC. 1811. OUTER CONTINENTAL SHELF ENERGY INFRASTRUCTURE SECURITY.

(a) DEFINITIONS.—In this section—

(1) APPROVED STATE PLAN.—The term ‘approved State plan’ means a State plan approved by the Secretary under subsection (c)(3).

(2) COASTLINE.—The term ‘coastline’ has the same meaning as the term ‘coast line’ as defined in subsection (c)(2) of the Submerged Lands Act (43 U.S.C. 1301(c)).

(3) CRITICAL OCS ENERGY INFRASTRUCTURE FACILITY.—The term ‘critical OCS energy infrastructure facility’ means—

(A) a facility located in an OCS Production State or in the waters of such State related to the production of oil or gas on the Outer Continental Shelf; or

(B) a relative facility located in an OCS Production State or in the waters of such State that carries out a public service, transportation, or infrastructure activity critical to the operation of the Outer Continental Shelf energy infrastructure facility, as determined by the Secretary.

(4) DISTANCE.—The term ‘distance’ means the minimum great circle distance, measured in statute miles.

(b) LEASED TRACT.—(1) IN GENERAL.—The term ‘leased tract’ means a tract that—

(i) is subject to a lease under section 6 or 8 of the Outer Continental Shelf Lands Act (43 U.S.C. 1335, 1337) for drilling, developing, and producing oil or natural gas resources; and

(ii) consists of a block, a portion of a block, any combination of blocks or portions of blocks, or a combination of portions of blocks, as—

(I) specified in the lease; and

(II) depicted on an Outer Continental Shelf official protraction diagram.

(2) EXCLUSION.—The term ‘leased tract’ does not include a tract described in subparagraph (A) that is located in a geographic area subject to a leasing moratorium on January 1, 2001, unless the lease was in production on that date.

(c) OCS POLITICAL SUBDIVISION.—The term ‘OCS political subdivision’ means a county, parish, borough or any equivalent subdivision of an OCS Production State all or part of which subdivision lies within the coastal zone (as defined in section 304(1) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1453(1)).

(d) OCS PRODUCTION STATE.—The term ‘OCS Production State’ means the State of—

(A) Alaska;

(B) Alabama;

(C) California;

(D) Florida;

(E) Louisiana;

(F) Mississippi; or

(G) Texas.

(2) PRODUCTION.—The term ‘production’ has the meaning given the term in section 2 of the Outer Continental Shelf Lands Act (43 U.S.C. 1331).

(3) PROGRAM.—The term ‘program’ means the Outer Continental Shelf Energy Infrastructure Security Program established under subsection (b).

(4) QUALIFIED OUTER CONTINENTAL SHELF REVENUES.—The term ‘qualified Outer Continental Shelf revenues’ means all amounts received by the United States from each leased tract or portion of a leased tract lying seaward of the zone defined and governed by section 8(g) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.), or lying within such zone but to which section 8(g) does not apply, the geographic center of which lies within a distance of 300 miles from any part of the coastline of any State, including bonus bids, rents, royalties (including payments for royalties taken in kind and net profit share payments, and related late payment interest. Such term does not include any revenues from a leased tract or portion of a leased tract that is included in an area of the Outer Continental Shelf where a moratorium on new leasing was in effect as of January 1, 2001, unless the lease was issued prior to the establishment of the moratorium and was in production on January 1, 2001.

(6) SECRETARY.—The term ‘Secretary’ means the Secretary of the Interior.

(7) STATE PLAN.—The term ‘State plan’ means a State plan described in subsection (b).

(8) ESTABLISHMENT.—The Secretary shall establish a program, to be known as the ‘Outer Continental Shelf Energy Infrastructure Security Program’ under which the Secretary shall provide funds to OCS Production States to implement approved State plans to provide security against hostile and
natural threats to critical OCS energy infrastructure facilities and support of any necessary public service or transportation activities that are needed to maintain the safety and operation of critical energy infrastructure facilities. Such plan shall include:

(A) the name of the State agency that will have the authority to represent and act for the State in dealing with the Secretary for purposes of this section;

(B) a program for the implementation of the plan which describes how the amounts provided under subsection (a) will be used;

(C) a contact for each OCS political subdivision and description of how such political subdivisions will use amounts provided under this section; and

(D) measures for taking into account other relevant Federal resources and programs.

(2) annual reviews.—Not later than 1 year after the date of submission of the plan and annually thereafter, the Governor of each OCS Production State shall:

(A) review the approved State plan; and

(B) submit to the Secretary any revised State plan resulting from the review.

(3) approval of plans.—

(A) in general.—In consultation with appropriate Federal security officials and the Secretaries of Commerce and Energy, the Secretary shall—

(i) approve each State plan; or

(ii) recommend changes to the State plan.

(B) OCS political subdivisions.—In making any such recommendations the Secretary recommends changes to a State plan under paragraph (A)(ii), the Governor of any OCS Production State may solicit public comments on the plan to the extent that the State or OCS political subdivision agrees with the changes to be approved.

(4) availability of plans.—The Secretary shall provide to Congress a copy of each approved State plan.

(5) consultation and public comment.—

(A) consultation.—The Governor of an OCS Production State shall develop the State plan in consultation with Federal, State, and local law enforcement and public safety officials, industry, Indian tribes, the scientific community, and other persons as appropriate.

(B) public comment.—The Governor of an OCS Production State may solicit public comments on the State plan to the extent that the State or OCS political subdivision agrees with the changes to be approved.

(d) allocation of amounts by the Secretary.—The Secretary shall allocate the amounts made available for the purposes of carrying out the program provided for by this section among OCS Production States as follows:

(1) 25 percent of the amounts shall be divided equally among OCS Production States;

(2) the remainder of the amounts shall be divided among OCS Production States on the basis of the proximity of each OCS Production State to offshore locations at which oil and gas are being produced.

(e) calculation.—The amount for each OCS Production State under paragraph (d)(2) shall be calculated based on the ratio of the prior five-year period. Where there is more than one OCS Production State within 50 miles of the coastline of any OCS Production State, 25 percent of the OCS Production State's payment under paragraph (d)(2) for such leased tract shall be inversely proportional to the distance between the geographic centers of each such State and the geographic center of each leased tract or portion of the leased tract (to the nearest whole mile) that is within 200 miles of the coastline, as determined by the Secretary. A leased tract or portion of a leased tract shall be excluded if the tract or portion is located in a geographic area where a moratorium on new leasing was in effect on January 1, 2001, unless the lease was issued prior to the establishment of the moratorium and was in production on January 1, 2001.

(f) payments to OCS political subdivisions.—Thirty-five percent of each OCS Production State's allocation under subsection (d)(2) shall be paid directly to the OCS political subdivisions by the Secretary based on the following formula:

(1) 25 percent shall be allocated based on the ratio of such OCS political subdivision's population to the population of all OCS political subdivisions in the OCS Production State.

(2) 25 percent shall be allocated based on the ratio of such OCS political subdivision's coastline miles to the coastline miles of all OCS political subdivisions in the OCS Production State. For purposes of this subsection, those OCS political subdivisions without coastlines shall be considered to have a coastline that is the average length of the coastlines of all political subdivisions in the state.

(3) 50 percent shall be allocated based on the relative distance of such OCS political subdivision from any leased tract used to calculate that OCS Production State's allocation under paragraph (d)(2) that each is proportional to the distance between the point in the coastal political subdivision closest to the geographic center of each leased tract or portion, as determined by the Secretary. For purposes of the calculations under this subparagraph, a leased tract or portion of a leased tract shall be excluded if the leased tract or portion is located in a geographic area area where a moratorium on new leasing was in effect on January 1, 2001, unless the lease was issued prior to the establishment of the moratorium and was in production on January 1, 2001.

(g) failure to have plan approved.—Any amount allocated by the Secretary to OCS Production States or OCS political subdivisions but not disbursed because of a failure to have an approved plan under this section shall be immediately recycled to the Federal Treasury.

(h) use of amounts allocated by the Secretary.—

(1) in general.—Amounts allocated by the Secretary under subsection (d) may be used only in accordance with a plan approved pursuant to subsection (c) for—

(A) activities to secure critical OCS energy infrastructure facilities from human or natural threats; and

(B) support of any necessary public service or transportation activities that are needed to maintain the safety and operation of critical OCS energy infrastructure facilities.

(2) restoration of coastal wetland.—For the purposes of subsection (c)(4)(A), restorations of any coastal wetland shall be considered to be an activity that secures critical OCS energy infrastructure facilities from a natural threat.

(i) failure to have use.—Any amount allocated to an OCS political subdivision but not disbursed because of a failure to have a qualifying use as described in subsection (b) shall be allocated by the Secretary to the OCS Production State in which the OCS political subdivision is located except that the Secretary shall hold in escrow such amount until the final resolution of any appeal regarding the use of the funds.

(j) compliance with authorized uses.—If the Secretary determines that any expenditure made by an OCS Production State or an OCS political subdivision is not consistent with the uses authorized in subsection (b), the Secretary shall not disburse any further amounts under this section to that OCS Production State or OCS political subdivision until the amounts used for the inconsistent expenditure have been repaid or obligated for authorized uses.

(k) rulemaking.—The Secretary may promulgate such rules and regulations as may be necessary to carry out the purposes of this section, including rules and regulations setting forth an appropriate process for appeals.

(l) authorization of appropriations.—There are hereby authorized to be appropriated $500,000,000 for each of the fiscal years 2003 through 2008 to carry out the purposes of this section.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Madam President, I believe the next order of business is to take up the request of the Senator from Alaska. Unless my colleague from Nevada has business to transact, I suggest the absence of a quorum until the Senator from Alaska arrives.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from North Dakota.

Mr. DORGAN. Madam President, I inquire about the order this afternoon. My understanding is the ranking member on the Energy Committee intends to make a presentation this afternoon. I inquire about the opportunity to make an opening statement on the bill. I inquire of the majority whip what the circumstances are.

Mr. REID. If the Senator will yield, the Senator from Alaska is going to speak for approximately 15 minutes—it may last a little longer than that—and thereafter the bill will be open for amendment. Or if the Senator would
like to come back in an hour or so to make his opening statement, that would be entirely appropriate. If the Senator wishes, we could certainly make that in the form of a unanimous consent request that the Senator be allowed to speak on the bill.

Mr. DORGAN. I guess I do not understand whether we are going to go back and forth. If we are, I ask unanimous consent that I might be recognized following whatever time is taken by Senator Dorgan to make his opening statement.

Mr. REID. Does the Senator from North Dakota have some idea as to how long he wishes to speak?

Mr. DORGAN. Perhaps 20 minutes or so. I do not know what order has been established, if any.

Mr. REID. There has been no order established.

Mr. DORGAN. I ask unanimous consent that I might be recognized following the opening presentation by Senator MURkowski.

The PRESIDING OFFICER. Is there objection?

Mr. DOMENICI. Reserving the right to object.

Mr. MURKOWSKI. Reserving the right to object.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. I do not intend to object. I propose we go back and forth on opening statements and, following that, pretty much on amendments on the basis of Members coming to the floor and being recognized.

Mr. DOMENICI. The Senator from North Dakota still has the floor, but I think it would be very good if we could get the opening statements out of the way as soon as we could—not limiting anybody as to how long they speak. It takes into the evening, fine. We are just getting started. I am not trying in any way to limit the length of the opening statements on this bill. But I think it would be good if we could get those out of the way now and move to the amendment process as soon as possible.

Mr. MURKOWSKI. Reserving the right to object, and I shall not, I think that is an appropriate procedure, if Members want to work out among themselves a time agreement or discuss it, but I don’t think any Members should be limited to a time agreement on an opening statement at this time.

Mr. REID. I note the Senator from New Mexico is here. It is my understanding he wished to speak following the Senator from North Dakota?

Mr. DOMENICI. If that is the order we are in, I ask I be added to that consent in that manner.

Mr. REID. I withdraw the previous request for unanimous consent that the Senator from North Dakota, Mr. Dorgan, be recognized following the statement of the Senator from Alaska, and following the Senator from North Dakota, Senator DOMENICI will be recognized following the same statement.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from New Mexico.

Mr. MURKOWSKI. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI. Madam President, first of all, let me compliment my colleague, Senator Bingaman, for the submission of what has been a difficult and long process, represented by a lot of staff work on behalf of the majority. I very much appreciate his lengthy opening statement because I think it provides us with a detailed explanation of what is in the bill.

As you know, the minority has not had an opportunity to craft this particular bill. I do want to highlight that, indeed, we do want a bill. We think, in response to the President’s request, that we should proceed with an energy bill, a comprehensive bill, and we believe, since the House has met its obligation, it is paramount the Senate meet its obligation and produce a comprehensive bill.

There are a number of amendments before us today; I am estimating somewhere in the area of 100 or more. As a consequence, it is fair to say that many of these amendments, ANWR has already been mentioned this morning by Senator Jeff Bingaman; CAPE is going to require an extended debate; the renewable mandates are, in the opinion of some, not a mandate and, in others, a clear mandate.

The electrical portion of this bill is going to take a great deal of time and explanation for the specific reason that we have not had an opportunity in the committee of jurisdiction to address the process with extended debate, the submission of amendments, and the formulation of a consensus. So there is going to be a lot of education in this Chamber. There will be a lot of input from lobbyists as a consequence of the unfamiliarity associated with a lot of the terminology. It may be possible for Price-Anderson alone, which represents a necessity for the continued contribution of our nuclear industry, to have a good deal of attention based on those who do not want to see the nuclear industry in the country continue.

There is probably going to be considerable discussion over the issue of Yucca Mountain and the question of what to do with our high level waste that is associated with a number of years of accumulated waste. It is interesting to note on that particular item that the Federal Government entered into the sanctity of a contractual relationship with many of the States, and certainly the industry, to take this waste in 1998. So basically the Federal Government is in breach of its contractual relationship. Yet the ratepayers have been paying into a fund of the Federal Government, somewhere in the area of $11 billion over an extended period of time, and the Federal Government has not been able to take the waste. As a consequence, the damages associated with suits are estimated to be somewhere in the area of $0 billion to $70 billion. This seems to be overlooked in the manner in which we address a resolution of Yucca Mountain and what to do with it.

It is fair to say that we have different opinions on particular legislation. The chairman of the Energy Committee has indicated a terminology that I believe will come up from time to time that suggests renewable performance standards.

I think it is fair to say we say that as a clear mandate to achieve a certain percentage. The question that comes to mind is why, for example, hydroelectric is not considered to be renewable. If it is not a renewable, I look at the chart; it is roughly 18,600 per dollar of gross domestic product in 1973. In the year 2000, it is 10,600 per dollar of gross domestic product. That is a 42 percent decrease. So we are using 42 percent less energy to produce the same value today than 3 percent of the world’s population.

If you look at this chart, it shows in detail that there has been substantial growth in efficiency since 1973. If you look at the chart, it is roughly 18,600 Btu’s per dollar of gross domestic product in 1973. In the year 2000, it is 10,600 per dollar of gross domestic product. That is a 42 percent decrease. So we are using 42 percent less energy to produce the same value than it was 30 years ago.

I recognize we are all committed to conservation, we are committed to greater utilization of renewables. But I think it is important to point out the direction in which we are going and what we have achieved. We haven’t been standing still. We haven’t been going the other way. We have been making what amounts to substantive and significant progress. Again, we are using 42 percent less energy to produce the same value today in this country.

To those who suggest that the world is coming down, and to the doom-sayers who suggest that somehow we have to abandon our traditional dependence on coal, whether it be wind or energy sources that might be available from other alternatives, I suggest to you there are other charts that show an alarming inconsistency relative to the footprint.
Let us look at wind energy, for example. We have developed several charts. The one I want to show first is a wind farm that is familiar to many people, and certainly to those who reside in California and have had occasion to drive to Palm Springs and go through the Banning area, where the San Gorgonio wind farm is located. For those who have been there, it is not necessarily a very pretty sight. You go up through the pass, and you see this huge area of wind farms. Some of those wind farms are moving; some of them aren’t moving. How you compare this wind farm in proportion to the generation of oil deserves a few minutes of examination.

This chart actually shows the 1,500-acre wind farm that is in evidence in California today. The energy production is about 800 million kilowatts of electricity, which is equivalent to 1,360 barrels of oil and a footprint of 1,500 acres. I offer that in comparison because the energy we use in the United States is significant enough that the discussion is going to be ANWR. Let us not kid ourselves. We are talking about a footprint. It is not very pretty. Some people say these are nothing more than Cuisinarts for birds because low-flying birds don’t do very well going through this particular type of exposure. I am not going to spend a lot of time on this at this time because we will have to get into some of the specifics in this legislation.

I see the majority leader is on the floor. I want to talk a little bit about the process because I take issue with the process. I have great respect for both the majority leader as well as the chairman of the Energy and Natural Resources Committee.

When he has said what he has said, he then said he had to do is recognize that we have an obligation to be responsive to our President. Our President has charged us to help him seek ways to make our Nation more secure. Our Nation’s energy policy is a critical first step in this enormous challenge.

When we fight for freedom, when we seize the day for democracy, we need energy. These things cannot be done without energy. When we pioneer new technology, that saves lives. When we turn our experiences that mark the difference between modern life and life of the past, we turn to energy. It is probably something we take for granted more than anything around us. That is why our work today is so critical. That is partially why the process which has gotten us to this point has been, in my opinion, frustrating, it has been embarrassing, and it has not been in the traditions of the Senate.

I think the process is severely flawed as a consequence of the committee of jurisdiction having been ordered by the majority leader to no longer take up the process that ordinarily is appropriate around here; that is, the bills are referred to the committees of jurisdiction and the committees of jurisdiction proceed in an orderly manner—in a manner where amendments are offered, discussions take place, and we proceed through the process.

Does the majority leader seek recognition?

Mr. DASCHLE. Madam President, I was just going to ask if the Senator would yield at the appropriate time.

Mr. MURKOWSKI. I would be happy to yield without losing my right to the floor.

Mr. DASCHLE. I ask if the distinguished Senator from Alaska is aware that the majority leader, when the Republicans were in charge, utilized exactly the same process the last time the energy bill the Senator is now criticizing came to the floor. I am wondering if the Senator could clarify the difference between that set of circumstances and this set of circumstances.

Mr. MURKOWSKI. I think there is a significant difference. I think what the majority leader is referring to is his right to have a contentious bill be introduced by him. I have been around here 21 years. I do not recall one instance where the committee of jurisdiction has been deprived of the process—not only the committee of jurisdiction, the Energy and Natural Resources Committee, but to some extent I think the Commerce Committee—and, as a consequence, bring a bill up and bypass the jurisdiction of the committee. I think it is an affront to the business of the Senate. It is certainly not in the tradition of the committee process.

Why the majority leader chose to do this on the excuse that somehow it was contentious, to me, fails the true test of this body, of being a deliberative body that considers debate as part of the process, and certainly the value of education from the standpoint of Members of the committee to proceed.

The resolutions as well as I do that the reason it was pulled from the committee was that we had the votes to vote out a certain contentious amendment, and that was to open ANWR. The majority leader simply pulled it. I think if he would refer to comments made by the chairman of the committee, which I would be happy to quote later on in the debate, he would see that the chairman of the committee didn’t have anything to do with it. It was simply pulled by the leader. The leadership said they were going to take it over, and that is the way it was.

Mr. DASCHLE. Madam President, will the Senator yield for one last time?

Mr. MURKOWSKI. I am happy to yield.

Mr. DASCHLE. I do not mean to interrupt his presentation. I know he has an opening statement. It is not my intention to debate him. I ask unanimous consent that there be printed in the RECORD the document showing the sequence of events beginning on May 16, of the year 2000.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2557—Bill, Summary and Status for the 106th Congress

Sponsor: Senator Lott, Trent (introduced 5/18/2000).

Latest Major Action: 10/31/2000 Senate floor actions: Motion to proceed to consideration of measure made in Senate (consideration: CR S11417).

Title: A bill to protect the energy security of the United States and decrease America’s dependency on foreign oil by enhancing the use of renewable energy resources, conserving energy resources, improving energy efficiencies, and increasing domestic energy supplies, mitigating the effect of increases in energy prices on the American consumer, including the poor and the elderly, and for other purposes.

Title(s): (italics indicate a title for a portion of a bill).

S.17/2000: Title(s): Oil Dependency on Foreign Resources bill (identified by CRS); Energy Security Act (identified by CRS).

Official Title as Introduced: A bill to protect the energy security of the United States and decrease America’s dependency on foreign oil sources to 50 percent by the Year 2010 by enhancing the use of renewable energy resources, conserving energy resources, improving energy efficiencies, and increasing domestic energy supplies, mitigating the effect of increases in energy prices on the American consumer, including the poor and the elderly, and for other purposes.

Status: (dates in italics indicate Senate actions). See also: CQ Custom BillTrack Report 5/26/2000: Introduced in the Senate. Read the first time. Placed on Senate Legislative Calendar under Read the First Time.

5/17/2000: Read the second time. Placed on Senate Legislative Calendar under General Orders. Calendar No. 552.

9/22/2000: Motion to proceed to consideration of measure made in Senate (consideration: CR S9029).

10/2/2000: Motion to proceed in considered in Senate (consideration: CR S8975).

10/6/2000: Motion to proceed considered in Senate (consideration: CR S10039-10040).

10/19/2000: Motion to proceed consideration of measure withdrawn in Senate (consideration: CR S10769).

10/19/2000: Motion to proceed to consideration of measure made in Senate (consideration: CR S11014).

10/26/2000: Motion to proceed to consideration of measure withdrawn in Senate (consideration: CR S11070).

10/26/2000: Motion to proceed to consideration of measure made in Senate (consideration: CR S11104).

S1506

CONGRESSIONAL RECORD — SENATE

March 5, 2002

10/30/2000: Motion to proceed to consider-
ation of measure made in Senate (consider-
ation: CR S11378).
10/31/2000: Motion to proceed to consider-
ation of measure withdrawn in Senate (con-
sideration: CR S11416).
10/31/2000: Motion to proceed to consider-
ation of measure made in Senate (consider-
ation: CR S11417).

Mr. DASCHLE. Madam President, I say for the RECORD that the majority leader at that time, Senator LOTT, in-
troduced an energy bill outside of the committee. It was read the first time and was placed on the Senate Legislative Calendar under “Read the First Time” on May 16. On May 17, the bill was read the second time. And then on September 22 of the year 2000, the ma-
jority leader made a motion to pro-
ceed. None of the activity had taken
place in committee, except for one
hearing. I think the Senator from New Mexico has had multiple hearings on energy and on the bill over the course of the last many months. But this is exactly what our Republican col-
leagues did in May and September of
the year 2000.

So I find it a little inconsistent for the Senator to criticize our efforts to bring a bill to the floor this year when his party and his leadership did exactly the same thing in May and September of the year 2000.

Again, I thank the Senator for yield-
ing.

Mr. MURKOWSKI. Madam President, let me respond to the majority leader because I think we should pursue this a little bit, because the traditions of Senate procedure are very much in play.

While I agree that bills have been brought to the floor in accordance with Senate rules, I completely disagree the Republicans brought bills to the floor while violating the Senate rules. As long as I was committee chairman under Senator Dole and Senator LOTT, I can say beyond any instance where the majority leader ordered me—or
dered me—to stop the process of mark-
ing up a bill and shut down the stand-
ing committee of the U.S. Senate.

And Senator DASCHLE, that is exactly what you did on October 9th of last year. You ordered the Senate energy committee to suspend markup of the energy bill. As a result, the committee has not held a legislative markup since August of last year out of fear that we would want to bring up amendments regar-ding the energy bill, because you knew we had the votes to pass them out.

Mr. DASCHLE. Will the Senator yield?

Mr. MURKOWSKI. I would like to finish my statement. I will be happy to yield at the conclusion of my state-

I am sure those on the other side of the aisle recognize that the Standing Rules of the Senate require commit-
tees to meet regularly to conduct busi-
ness. And I am not aware of any unani-
mous consent request asking the Sen-
ate Energy and Natural Resources Committee to be exempt from the rules

of the Senate. So I think the compari-
son of what Republicans and what
Democrats did is completely different.

Let me refer the Senator to—before I yield, and I will yield—to a release that came out of Senator BINGAMAN’s office. This came out on October 9, I quote—

At the request of Senate Majority Leader Tom Daschle, Senate Energy & Natural Re-

sources Committee Chairman Jeff Bingaman today suspended any further mark-up of en-
ergy legislation for this session of Congress. Instead, the Chairman will propose com-
prehensive and balanced energy legislation that can be added by the Majority Leader to the Senate Calendar for potential action prior to adjournment.

I am happy to yield to the majority leader, without losing my right to the
floor.

Mr. DASCHLE. Madam President, I hope the distinguished Senator from Alaska has more documentation than a press release that will allow him to make the assertion he has just made. I do not order my chairmen to do any-
thing. I consult with them. I talk with them. But I think the Senator from New Mexico, who is on the floor, can attest to that fact.

There was no ordering here. There was plenty of consultation, just as I am sure there was some consultation with

the Senator from Alaska when Senator LOTT chose to bring the energy bill to the floor in May of the year 2000. I doubt very much that he ordered Sen-
ator MURKOWSKI or anybody else to comply with his wishes. I am sure he consulted. That is exactly what we did.

So I hope the Senator has some docu-
mentation to support his assertion be-
cause that is quite a charge. I will say that there was ample consultation, not
only with the Senator from New Mex-
ico but many other Senators who also
had jurisdiction.

Nine different committees have had
some jurisdictional role to play with regard to the completion and the progress on this legislation—nine com-
mittees. It is not my job, in sequence with each of the nine commit-
tees, or even simultaneously, for that
matter, would be quite a legislative un-
taking.

So what have worked diligently to

come up with a working draft that we

have shared with our Republican col-leagues. But to assert that I ordered anybody to do something is, I think, not only an error but is a disservice to the process that we have been engaged in.

I thank the Senator again for yield-
ing.

Mr. BINGAMAN. Madam President, could I also respond to the Senator?

Mr. MURKOWSKI. If I may, before the majority leader leaves, tell him that I very much appreciate that we have had this dialog because I think it truly represents a departure from the committee norm that I certainly have learned to expect around here. And the fact that the majority leader has seen fit to identify that the Republicans have done it, therefore, it is all right—or the implication of that—I think is not necessarily applicable to good leg-
islation or a process.

I again would demur, because having been on the Energy Committee for a little over 21 years, somewhere between 21 and 22—I have never, never had a sit-
uation where the majority leader has taken, if you will, not only either di-
rect or through the chairman, which would absolve the committee from its

function.

The fact is, we have not had—and I think the majority leader and any mem-
ber of the committee, at least in the

minority, as to whether or not we have had any significant input in this

legislation. We have not. We have not had any markups or any opportu-
nity for any amendments. And I think the majority leader would have to ac-
knowledge that because that is factual.

It was rather curious at the time this was done. It was shortly after we lost control of the U.S. Senate. It was shortly after it became apparent that the votes to pass an amend-
ment that would include opening up ANWR. It was clear that we had the votes to do it.

Then the majority leader has left us in this quandary where he stated that if you do have the votes—and it

would be a 60-vote point of order on a cloture—why, we cannot win because he will pull the bill down. I think that kind of an approach to the Democratic process around here is a bit incon-
sistent with tradition.

Mr. DASCHLE. If the Senator will yield one last time, I know Senator BINGAMAN has been patiently waiting to be able to register his own com-
ments here.

Let me just say, it is just not accu-
rate for the Senator from Alaska to as-
sert that this is unprecedented. That is the word he used; this was “unprece-
dented.” As I said for the RECORD—it is now part of the RECORD—this very ac-
count taken by the majority leader in May and September of the year 2000—exactly the same.

So I would just make sure that our colleagues are aware, this is not un-
precedented. It has happened on many, many occasions, involving many, many issues and many committees.

I think we ought to get on to the sub-
stantive issues, and put this procedural issue to rest once and for all. We have a lot of important substantive debates in here. I look forward to having those. But I do hope we can clarify the RECORD in this regard and move on to more substantive questions.

Again, I thank the Senator for yield-
ing.

Mr. MURKOWSKI. It is isn’t a mat-
ter of who is going to have the last

word. The majority leader should have the last word. But, on the other hand, this committee was requested to stop markup, and that is a fact. And I do not think it can be colored any other way by the majority leader.

Mr. BINGAMAN. Mr. President, may I clarify, since I have been quoted, at least?
The PRESIDING OFFICER (Mr. JOHNSON). The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, since I have been quoted, or a press release has from my office, the decision to terminate the markup of any legislation on energy by my consultation with the majority leader because it was a joint decision by us that the best way to get a bill to the Senate floor, which reflected the policies that we agreed made sense for the country, was for the person who had the authority there to do it.

As the majority leader has pointed out, that is exactly the approach that Senator LOTT used when he was majority leader.

As far as the action we have taken in the Senate Energy Committee, I think the Senator from Alaska will acknowledge that we have had a series of hearings. We have had various confirmation hearings. I have approached the Senator from Alaska several times in the last several months to see whether or not we could proceed to consider legislation without having controversial energy bill amendments added to that legislation. I was informed we could not.

We have held off on considering those other nonrelated pieces of legislation. We have worked hard to accommodate the majority and to accommodate the administration in getting all of their nominees approved. We have worked hard to have hearings that were of interest to members of the committee. And we intend to continue doing so.

Frankly, I am very proud of the product we are bringing to the Senate for consideration today. It is a good bill. It does reflect many proposals that came from the Republican side. We worked hard with Members from the Republican side to perfect provisions in this bill. It has not been in an official markup. But just as we have worked with Senators to perfect provisions in the bill, we worked with Republican Members to perfect provisions in the bill, and the same with the administration. This is a combined effort. I feel very good about it.

I hope we can get on with a discussion of the bill, with consideration of amendments, to the extent that Senators have amendments. I know there are many. That is exactly what this period on the Senate floor is devoted to. I know the Senator from Alaska has been anxious to get a debate on the Senate floor and anxious to get an opportunity to offer his amendments. He has that time. He has that opportunity. I hope we will use it.

I yield the floor.

Mr. MURKOWSKI. I thank my friend for his comments. I, too, wish to get on with my opening statement.

We have to call a spade a spade at a time when Americans all over the world are pulling together with a sense of oneness and purpose, Congress has an obligation at the moment to avoid those contentious issues that divide, rather than unite us.

Mr. BINGAMAN. I hope when Members recognize the severity of our dependence on imported oil, they will recognize that in 1973 or the American public understands this process because it is important that we have consensus on the bill. We have worked with Democratic Members to perfect provisions in the bill, we worked with Republican Members to perfect provisions. The process is flawed. I am glad the majority leader was here so we could have a discussion.

Mr. BINGAMAN. This is not a representative bill.

Somehow the prevailing majority has forced the Senate to consider this measure, again, without the benefit of committee deliberation and action. As a consequence, he has made the task much harder of moving this bill. It is much more complicated than it had to be because it has not gone through the committee process. To say, well, Senator LOTT did it that way, I can tell my colleagues, again, I know of no instance where the jurisdiction was removed from its obligation to address the issue before it.

Difficult and divisive issues that could and should have been worked out in committee are going to be right here in the Senate Chamber.

I am going to work towards a bill, that was the first thing I indicated in my opening statement. I mean that. We want a bill. We want a comprehensive bill. We want a good bill. But we want some input into the bill. So whatever we will have to do is have our input by amendment. We don't think that should have been necessary but, clearly, that is the only choice we have. As a consequence, we are going to begin a long process.

I suppose I will be subject to some examination, but I think the majority leader said, as far as he was concerned, a portion of the bill was dead—ANWR, dead. That hardly represents anything more than a guess. He may be right. But if it is dead, Tom Daschle killed it. Make no mistake about that.

I hope when Members recognize the severity of our dependence on imported oil, they will recognize that in 1973 or...
thereabouts, when we had the Arab oil embargo, when we had gas lines around the block—and some people are old enough to remember that—the public was outraged and indignant, that was during the Yom Kippur War. We were 37 percent on oil at that time. We were blaming everybody. The Government was lashing out: How could this happen?

Now we are over 56 percent dependent. When we talk about doing something different, we have to talk about the committee. We could have had, in the committee process, hundreds of amendments that could and should have been dealt with in the committee. Now they are going to take time on the floor away from our deliberations because the excuse I have heard so far is they are contentious. I don’t know what isn’t contentious around here. We all respect each other’s opinions. But we are entitled to express those opinions in a process associated with the committee function.

As far as I am concerned, the majority leader took control over the committee process. He said: We are going to have 60 votes because there is going to be a filibuster. I have never heard or seen that kind of an action taken before. Maybe someone will enlighten me as to when the authorities have been taken from the committee. Every committee chairman, whether Republican or Democrat, should remember this because it is a milestone in inconsistency—a milestone, in my opinion, not in the best tradition of the Senate.

Now we have heard our majority leader lay the responsibility around here, but I think the fault rests solely with his judgment. I don’t think there is any question about it, and I doubt very much if anyone would disagree with me, Republican or Democrat alike.

But even with the additional hurdles now being put before us, I think we can move a bill off the floor. This Nation needs an energy bill, one that is rooted in the recognition of just how dependent we are on oil at this time. We were blaming everybody. The Government was lashing out: How could this happen?

Government was lashing out: How can we continue to fly in and out of Washington on hot air, as the phrase goes? So whether it be on the ships, trains, trucks, cars, or airplanes, it is oil.

The world is in the same position. Transportation is dependent on oil. So we have to reflect on reality and recognize that, as we become dependent on oil, it is from overseas. We import that oil, and we become more vulnerable. As I indicated, in 1973 we were 37 percent dependent on imported oil; today, that is magnified to 58 percent. We have over 100 nuclear plants, and 100 of those nuclear plants spread across the country. They provide nearly 20 percent of the energy produced in this Nation. We see that new electric plants are being built today that run on natural gas.

The United States is the “Saudi Arabia of coal.” We have West Virginia coal. We have Pennsylvania coal. We have coal in Alaska. We have a supply of coal that would last for centuries. We can use these coal resources in a cleaner, more efficient way, and we can do that. We can do that. It is just a matter of applying our technology.

Now, all this, to a degree, relates to the economy of this country. We are talking about jobs. It is pretty simple. Development of our domestic resources. I am talking about resources in the United States. That is going to mean thousands and thousands of jobs across our Nation. I am talking about putting new software on the ships, on the double-bottom, double-hull supertankers, which we are currently building in California and in Mississippi. These are U.S. ships—the largest concentration of tonnage under the U.S. flag in our merchant marine service. These are mandated by law because the carriage of goods between two American ports has to be in a U.S. flag vessel, with a U.S. crew, built in a U.S. yard.

So these are big job issues, Mr. President. That oil that moves from my State of Alaska doesn’t go to Japan. There hasn’t been a drop of oil that has moved outside the United States since a year ago last April. What did go was growth in efficiency since 1973, and it shows a 42-percent decrease, if you will. That is a decrease in our utilization of energy. Again, if 3 percent of the population of the United States utilizes 25 percent of the world’s energy and produces 30 percent of the world’s energy, that is not a bad start. So we are using 42 percent less energy to produce the same value today. That is what that chart shows.

Senator Breaux and I have a lot of charts here, so we will probably be trading charts before this process is over. What have we done, to a degree—and we can do better—is we have proven we can balance our conservation and environmental protection with increased domestic energy production. For that reason, I refuse to take part in the fable being put forth by those who are running the so-called spin machines around here that say the Nation needs to make a choice. Some say we need to make a choice between using the energy technologies of today—coal, oil, gas, hydro, nuclear—or using energy technologies of tomorrow.

Now, some see this as energy as-a-vis the environment. I don’t think that is the issue. Some say this is about today and tomorrow. I don’t think that is the issue. Some insist whatever solutions we propose, they can’t be done safely today. I don’t think that is the issue. The logic tells the American worker and American ingenuity far too short. We need to strive for new technologies and diversify our energy supply. We need to conserve more and become more energy efficient.

If this bill passes today, we will not be driving hydrogen cars tomorrow. In spite of the fact that many have suggested, “Why can’t we?” It is simply a matter that we don’t have the technology. We will not be powered by solar or wind energy by morning. We cannot simply shut down the economy of this Nation and put our national security on hold. We must make choices in our energy supply. We need to conserve more and become more energy efficient.

Our energy comes from many sources today—coal, oil, natural gas, hydro, nuclear, and so forth. We must, through the technology, explore new and highly, perhaps, unachievable technologies today, but they might be achievable tomorrow, because they can reduce our consumption in the coming years.

Recognize, Mr. President, we have 200 million cars on the road. Oil is going to continue to be the primary ingredient in our transportation for the foreseeable future—even if they get 30 miles to the gallon. A lot of people reflect on all sources of energy that we have in this country and say: Aren’t we fortunate? We have hydro and nuclear, and we have plenty of oil and gas, and a good deal of it we import. Nevertheless, we have it, and we have technology for wind and solar. But make no mistake about it, for transportation, the world is beholden to oil. We don’t fly in and out of Washington on hot air, although there is plenty here. So whether it be on the ships, trains, trucks, cars, or airplanes, it is oil.

The world is in the same position. Transportation is dependent on oil. So we have to reflect on reality and recognize that, as we become dependent on oil, it is from overseas. We import that oil, and we become more vulnerable. As I indicated, in 1973 we were 37 percent dependent on imported oil; today, that is magnified to 58 percent. We have over 100 nuclear plants, and 100 of those nuclear plants spread across the country. They provide nearly 20 percent of the energy produced in this Nation. We see that new electric plants are being built today that run on natural gas.

The United States is the “Saudi Arabia of coal.” We have West Virginia coal. We have Pennsylvania coal. We have coal in Alaska. We have a supply of coal that would last for centuries. We can use these coal resources in a cleaner, more efficient way, and we can do that. We can do that. It is just a matter of applying our technology.

Now, all this, to a degree, relates to the economy of this country. We are talking about jobs. It is pretty simple. Development of our domestic resources. I am talking about resources in the United States. That is going to mean thousands and thousands of jobs across our Nation. I am talking about putting new software on the ships, on the double-bottom, double-hull supertankers, which we are currently building in California and in Mississippi. These are U.S. ships—the largest concentration of tonnage under the U.S. flag in our merchant marine service. These are mandated by law because the carriage of goods between two American ports has to be in a U.S. flag vessel, with a U.S. crew, built in a U.S. yard.

So these are big job issues, Mr. President. That oil that moves from my State of Alaska doesn’t go to Japan. There hasn’t been a drop of oil that has moved outside the United States since a year ago last April. What did go was
These are good paying jobs. These are thousands of jobs across the country. Sources would mean thousands and exporting our dollars and our jobs. From Alaska. My point is very clear: as other areas, and bringing oil down a very small amount that was excess to March 5, 2002. It will help turn around our economy and be built by high-skilled workers. This in this Nation and the men and women in this country, a recession, I remind you, we have lost some 700,000 jobs since September 11. Whatever the case, it is time to put American workers back to work. We can do it, because we have before. Opportunities we have not service jobs flipping hamburgers in a McDonald’s. As I indicated, ships will be built by high-skilled workers. This will help turn around our economy and get us out of this rather soft recession.

Somebody put together a figure—and I do not know how correct it is—that we have lost some 700,000 jobs since September 11. Whatever the case, it is time to put American workers back to work. We can do it, because we have before.

Let’s talk about some of the groups that are supporting proposals to develop more domestic energy in the United States. First, new legislation, the Sea 

A very small amount that was excess to March 5, 2002. It will help turn around our economy and be built by high-skilled workers. This in this Nation and the men and women who drive it. We need an energy bill that provides today’s resources to move us to tomorrow’s promises, not the shallow measures before us with empty promises that simply export the wealth, jeopardizes the national security, and shifts U.S. jobs overseas. As a matter of energy policy, these provisions and differences in opinion with America’s environmental community. They are opposed to various parts of this bill, particularly those parts that suggest we can develop our domestic resources at home; otherwise, we have no scientific evidence to suggest that we cannot. None whatsoever. We will have an opportunity to get into that a little further in the debate.

Let’s talk a little bit about the bill before us, the bill that was introduced by the majority leader—call it the Daschle bill. As far as I am concerned, it is pretty hard to identify new job production associated with that legislation. We have already discussed that. We have not had input, and the excuse has been: Senator Lott did it; therefore, it is all right. I think I have already made that point, and that point is very explicit. We have never had responsibility pulled from the committee simply because the votes in the committee were supportive of an amendment that would increase domestic production.

Since we have not had the benefit of committee debate and approval, I want to delve into this bill a closer look. What does this bill do? Even though we have only seen it for a very short period of time, the legislation appears to authorize some 60 new Federal programs, many of which already exist at the Department of Energy or elsewhere. We can go into those.

We are told there are some 32 new studies on various impacts of energy policy, but studies are what one calls perfunctory. The scrutiny on it is obviously lacking. The scrutiny on it is obviously lacking. Title I through IX are largely the regional in Senator Bingaman’s original bill. I might add.

Title XVIII, critical energy infrastructure, was the very same title that prompted the Democratic leader and the Energy Committee chairman to suspend committee action the first place. I ask, what is new, what is different about this proposal to merit delaying discussion on these important issues for the past several months? A positive note as a matter of political expediency. I do not suggest there are no provisions of the pending legislation that have redeeming social value. There are several, that is, provisions that we have generally agreed on that could have been refined and supported almost unanimously in committee had we been allowed to meet.

Among those provisions are title I, regional coordination of energy policies and planning for energy infrastructure; title II, PUCHA and PURPA repeal for electricity and possibly changes in other provisions in this title with minor changes; title III, hydro licensing. The proposal in this bill reflects part but not all of an emerging consensus on how to balance power needs with environmental concerns. And title IV, Indian energy programs. I only wish the Committee on Indian Affairs had been allowed to hold hearings to consider these programs in some detail. I happen to be a member of that committee. I am a member of the Finance Committee. We still have not reported out the tax aspects associated with this bill.

So we have title V, the Price-Anderson, both the chairman of the Energy Committee and I proposed full review of Price-Anderson for both the DOE contractors and the NRC licensees. Why NRC licensees are not included. I am not sure, but hopefully we will find that out in our debate. Title VI, permanent authority for the SPR and a reevaluation of SPR capacity are areas of broad agreement.

Title VII, higher standards for Federal fleet fuel economy proposed comes...
from our bipartisan energy proposal and other alternative fuel provisions that are basically taken from H.R. 4, the House bill, and the renewable motor fuel provisions for ethanol are the same as those that I proposed last year in a draft revision of our bipartisan energy bill.

We agree on much of title IX, energy efficiency, with one large exception for the 13 SEER air conditioning standards rejected by the administration last year.

There is agreement in principle but not on specific spending levels or program structures in title X, onward, with respect to climate change and energy R&D. Many of the subtle differences of opinion throughout this bill could have been easily addressed in a committee markup and not on the Senate floor, but we are left with that reality for reasons we have already articulated, although we have differences of opinion on those, and I respect that. So I regret we were deprived of the chance to proceed in committee, for now we will have to deal with these changes on the floor, which will make our task harder and longer.

Since I commented on the areas of agreement, let me comment on the issues of disagreement because this is where we are going to be spending a lot of time.

We are talking about issues of agreement, and despite the broad agreement on the majority of issues contained in this bill, there are some other provisions which we have great disagreement on. I want to address some of those today, I think we should have been able to provide the Senate with a recommendation and some sense of legislative history, and we should have been able to better define the debate, but because of the reality that the committee has not had an opportunity to meet, why we have no other choice but to proceed.

I think it is important that particularly the majority that we are in now reflect on what our intention was so we could communicate that to the majority. So we developed some principles on one of the more contentious parts of the bill, and that was the electricity portion.

Basically, what Republicans, as a minority, stand for in our caucus is an obligation to, first, protect consumers. That means the Federal Trade Commission precautions and protections without preempting the traditional authority of the States. We feel very strongly about that. We are talking about trying to streamline the regulatory process, eliminate some of the obsolete statutes like PUHCA and PURPA, and limit Federal micro-management.

One has to wonder, if we reflect on the Enron situation, if we had what is in this bill, could there have been an orderly transition of the market working? Because what happened with Enron clearly was: The market worked. There were no interruptions of power.

There were no price increases. One wonders if we had to get permission if one company whose trading suddenly falls to its knees can have an orderly, innovative market work. Well, maybe we can get to that, but I personally am a little uncomfortable with too much Federal micromanagement.

We also stand for enhancing interstate transmission while preserving State authority through the interconnectedness concept. We want to assure reliability and encourage competition, the North American Electric Reliable Council enforceable standards. We want to promote renewable energy, market-driven approaches and consumer choices and not Federal mandates.

That is kind of where we are coming from.

Again, those issues we disagree on because we could not get together and resolve our differences in committee. Among those issues we disagree on are the concept of the electric grid and the transmission of the grid. Many of these provisions have little to do with the extensive role the Federal government has in the States and how we define it.

I think it is important that particularly the minority that we are in now understand this to things we can all understand.

Where do we explore for energy resources to meet our growing needs? We know about ANWR, but what about the lower 48 and our automobile energy needs? How best to protect nuclear plant operators from any exposure on a catastrophic scale and how to keep them afloat, that is the Price-Anderson. Some people see this as a way of prolonging the life of the nuclear industry, but I take issue with those people because they are not realists and do not recognize that there is a trade-off.

There are no emissions with nuclear. There is a problem with waste, but it is emission-free. We look at global warming concepts. We look at emission standards. There is certainly room for the nuclear energy industry, and they need Price-Anderson.

Do we explore for energy resources to meet our growing needs? We know about ANWR, but what about the lower 48? How can automobiles become more efficient without jeopardizing the American worker? Our energy efficiency, with one large exception for the 13 SEER air conditioning standards rejected by the administration last year. How big is Prudhoe Bay? It was supposed to have recoverable reserves of 10 billion barrels. We are in the process of producing the 13 billion barrel now.

How big, according to the experts in the final USGS study? There was one made in 3 days to accommodate the former Secretary of the Interior, but the current one, the most credible one, suggests the reserves at 5.6 billion to 16 billion barrels. If it is an average between the two, it is about 10 billion barrels, which would provide the Nation with as much as Prudhoe Bay is currently providing. So you double that.

The question is, Can you do it safely? We will get into it later. The footprint is pretty small. In H.R. 4, the House bill, it was 12,000 acres. We are not talking about peanuts here. If the oil isn't there, it will not be developed; that is all there is to it. We have to find all the oil in Alaska because the costs are so high.

The chairman of the committee talked a little bit about natural gas that has been found. It is important to note on this chart that this gas has been found associated with looking for oil, not gas. It is an incidental find. I used to say to the geologists: If you find another gas discovery, forget it. We are not even going to buy you a Coke. We are looking for oil. But in the process, they accumulated about 36 trillion cubic feet of natural gas, the largest deposit of gas known to exist in North America. So it is very important that we look to ways to get that out.
appreciate working with my colleague, the chairman of the committee, in that regard.

We need the development of gas from the Arctic. Our country needs it for the simple reason that we are pulling down our gas reserves faster than we are finding new ones. I think we have a chart that shows our reserves in decline. The Senate plan that the Democrats propose—the Senate Democratic plan that has been presented—initially was to provide, I believe, a $10 billion guarantee. It did not address a route selection.

One of the amendments I am going to have will be to mandate a southern highway route that would bring the gas down paralleling the pipeline to Fairbanks and follow the highway into Canada. That would keep options open for Alaskans. It would keep options to bring gas down to the port of Valdez if the market for the liquefied natural gas in Asia should develop. It would provide the alternative to bring gas into Fairbanks and take that gas further on down to Point Mackenzie or take the gas into Anchorage or down the Kenai Peninsula where gas is liquefied and exported and urea and ammonia are made. We can fill all our ships and keep all open. So it is very important a southern high route be designated in this legislation.

Make no mistake about it. I support the development of the resources, both the oil and gas. However, the proposal put forth on the other side allows for some untested technology to be used in sensitive areas of the Arctic over the opposition of some of the Native people and virtually every elected official in Alaska.

What I am concerned with here is the realization that currently this legislation does not exclude another route, which would be a route over the top, across Canada. Most of those jobs and most of that activity would benefit Canada and not the State of Alaska, nor American labor.

I remind my colleagues, the gas in question is owned exclusively by the State of Alaska. This is not Federal gas. This gas is on State lands associated with the fields at Prudhoe Bay which are on State lands. Unlike discussions about leasing of the so-called 1002 area—that chart is behind this one—the Coastal Plain where the subject of Federal lands is the issue, the issue involving gas is strictly on State lands and is an issue of the State’s ability to develop and transport a resource owned exclusively by the State and not the Federal Government.

As a delegation, Senator Stevens, Representative Young, and I have worked with the Governor and Lieutenant Governor and our Native population and others to ensure that any proposal fully protects the interests of our residents, the environment, and the economy. So it is important to have a proposal that meets, if you will, our wishes relative to what is in the best interests of the State as well as our Nation. Our Nation, again, is pulling its gas reserves down faster than we are finding new reserves.

Furthermore, the project that has been proposed has some problems with it because the producers of the gas—namely, Exxon, British Petroleum, and Phillips—have indicated at the current prices the project is uneconomical at this time. We have a situation where, to make it economic, we are going to need some assistance. I am asking about is how we can work to come up with a methodology to take some of the risk out of the movement and development of this project because this will be the largest and most expensive construction project ever undertaken in North America. We have to be careful that it stimulates the United States economy and not the Canadian economy, and that we recognize the contribution of American workers by mandating the selection of American workers by making available the option of having oil going down the pipeline in the United States or Alaska.

What we have here, of course, among our critics are, for the most part, people who have never visited the Arctic. They have never taken an opportunity to go up there.

I will say Senator Bingaman has accompanied me up on occasion, where we had the Secretary of the Interior. We got a lot of fresh air. It was cold. But, nevertheless, I think we were given an opportunity of having extended hospitality by the Eskimo people, as well as seeing some of the highest technology in the oil and gas business underway.

It is my intention to offer significant amendments to this gas provision to make sure that the development of Alaska gas is done in the most environmentally sensitive way as possible. We got a lot of fresh air. It was cold. But, nevertheless, I think we were given an opportunity of having extended hospitality by the Eskimo people, as well as seeing some of the highest technology in the oil and gas business underway.

It is my intention to offer significant amendments to this gas provision to make sure that the development of Alaska gas is done in the most environmentally sensitive way as possible. We have a chart that shows what happened to our imports of oil when the Trans-Alaska pipeline from Prudhoe Bay to Valdez was built. We have heard critics and environmentalists suggest that the effect of ANWR would not have any significant effect on oil imports into the United States. It shows the barrels of oil per day that the United States imports. In the time frame between 1977, 1978, and 1979, imports early in the 2 million barrels a day came down from Alaska. You see TAPS opens at the top, and imports begin to drop dramatically. The reason our imports dropped is the market for oil didn’t decline. It was because of the contribution by Alaska’s domestic production.

The point of this chart is a very simple one. It simply shows that when you produce more oil of the magnitude of a million barrels a day, it has a decided impact on reducing imports.

You see this period from 1982 through about 1987, and then imports start to climb up again.

The question is, would we have been if we didn’t have the Prudhoe Bay contribution? That is my point. It would still be going off the chart. The chart in red clearly shows the import vis-a-vis Alaskan production. The blue line shows Alaska production coming on line and it is beginning to keep prices from not declining if ANWR were opened.

We also have statements by various individuals that are made from time to time relative to the effects on drilling in Alaska, and the impact that it would have on various areas of concern.

I am going to refer to a couple of those because I think we need to shed some light on it.

I can only defer to those who have indicated some position on the issue of opening up the Arctic to oil and gas exploration. I would like to, first of all, refer to comments that were made by my good friend from Massachusetts, the junior Senator, who on MSNBC’s “Hardball with Chris Matthew” on February 26 of this year and indicated that:

The alternative to drilling in Alaska is several things. No. 1, there should be drilling almost anywhere but Alaska. No. 2, you can’t drill your way out of the problem of the Persian Gulf.

I think the last chart we saw indicated that by drilling our way domestically we reduce our imports. I think that question has been resolved. I think for the first one—drilling almost anywhere but Alaska,—let us look at anywhere but Alaska.

Here is the chart of the United States. If you look at the gray areas, you see the areas off limits for drilling: the entire east coast from Maine to Florida, the area off Florida in the Gulf, and then in the overthrust belt—those areas which have been closed primarily because of wilderness mandates. Colorado, Wyoming, and various other States are limited. And clearly the west coast is off limits.

I wonder where in the world the oil is going to come from if we have taken all of these areas off limits. Some suggest going to the Gulf of Mexico off Louisiana. That is a good portion of our exploration is occurring. It is occurring there because of the technology. They are drilling in 3,000 feet of water. The industry is doing an extraordinary job. We have to go somewhere.

Then we have heard from time to time: Who wants to drill where? Clearly, Alaskans propose drilling and support drilling in our State.

The point is, you have to get it somewhere. If you do not get it domestically, you are going to import it.

As I have indicated, gas isn’t the only resource our State can contribute to America’s energy security. The gas
will not fill the transportation needs of California, or some of the other States as some have suggested. Only the development of a small portion of ANWR can do this.

We have heard discussions on the issue from the Speaker of the House and the leadership of the Senate and the House at the last. We have heard also on this Chamber regard energy as just a political issue, pure and simple, with pressure from the environmental community. It is just another piece of the puzzle that has been laid out for us. I think our last piece is to reach the bipartisan goal of coming together and recognizing that this country simply cannot proceed with its increased dependency on foreign oil.

As a consequence of that, I think we have to be very careful to not sell America’s can-do spirit short, the American family, and America’s future. We must address the national security interests of our President’s direction to do by coming up with a responsible energy bill at this time. As a consequence, we have differences. But, hopefully, we can work that out through a process of debate. We have differences that we can undoubtedly address with regard to alternative and renewables.

But make no mistake about it, we are not going to be able to get there from here on any one alone. It is going to take all our resources to meet our energy demands until we have significant breakthroughs in technology that will allow us to lessen our dependence on our conventional sources of energy. Energy isn’t about politics. It is about families, families across this country whose jobs are are not shot. You can’t run in there with a snow machine and run them down.

Some would be surprised. I don’t believe there is anyone here from Texas. So I ask the attention of our colleagues the fear of reprisal. But geologists indicate that ANWR holds more oil than all of the proven oil reserves of Texas—all of Texas. I might add that Alaska is about 2½ times the size of Texas. That would put 25 years worth of Saudi Arabian imports. Engineers believe that it can be explored for less than a 2,000-acre footprint. The union men and women of this Nation believe it can create thousands of jobs. It can be flowing in a few years—not 10 years. It is a matter of recognizing that if we want to go ahead with it, we can issue the permits. We can do it safely. Winter exploration will occur on ice roads.

Some suggest that it is a decade away. That is not factual. It is unfortunate that some people who have never been there think they can make decisions about the people who live there.

Unlike the plan that has been proposed on the other side of the aisle about Alaska’s gas, the plan to develop Alaskan oil will use proven and tested technology. It will take advantage of existing infrastructure on the North Slope. It will minimize the impact of Arctic environment. It will have the benefit of a 7-year environmental impact process. It will limit the surface footprint to 2,000 acres, and it will require the use of project labor agreements—labor that will prohibit the export of any energy resource. None will be exported outside the United States. It is overwhelmingly supported by the deleagtes—Senator STEVENS, Representative YOUNG, myself, our Governor, our Lieutenant Governor, the State legislature, and the people of the area, the Innuapit Eskimo people.

In conclusion, I pledge my support to improving our energy policy. I use the word “domestic” that safeguards our environment and our national security than to rely on the supplies to Saddam Hussein to supply this energy.

On September 11, we were importing a million barrels, just a little over a million barrels a day, from Saddam Hussein. Today that is about 870,000 barrels a day. We bombed him this year, once just a few days ago. We have women, men, and boys to shoot us down. We take out his targets. But we take his oil. It is almost as if we put it in our jet fighters and go over and take out his targets. He pays his Republican Guard. As a consequence, he remains a threat to wind power.

At whom is he aiming these missiles, this biologic capability, this new capability? At our ally, Israel. When we come to grips with the likes of a Saddam Hussein as we continue to rely more and more on that source, when we have a domestic source at home that we can develop safely? The answer, in my mind, is clearly that we should reduce our dependence on foreign oil.

We have a statement from an outstanding American—well, we will get it for the later debate. But we have a number of statements of outstanding Americans who have indicated they believe it is the worst mistake we could possibly make to continue our dependence on imported oil.

Furthermore, I have to recognize the responsibility that we have in this body to the President. President Bush has asked, time and time again, for an energy bill. He has asked as recently as in his State of the Union Address to produce a national energy plan. He knows energy is about jobs. He knows energy is about security. He wants to protect this Nation from the Axis of Evil. He knows that so long as we are dependent on foreign oil, our very security is threatened and our future is at stake.

So, Mr. President, our challenge is clear: To deliver to this President an energy plan for our Nation and our Nation’s future. That is the job of this body. I have indicated, the House has done its job by passing H.R. 4.

So I pledge my support to improve the legislation before us and get a bill to the President as soon as possible. I urge my colleagues to recognize the weight of the task before us, to push aside their agendas, and to do what is right for the Nation.

Finally, in conclusion, I encourage Members to recognize that we have contentious issues here in ANWR, in CAFE standards, in renewable portfolio standards in electricity and perhaps several others. But I encourage Members to use accurate information—particularly when they are talking about my State, particularly when they are talking about Alaska and having never visited there, and particularly when they are expressing the litany of opponents such as some of the national environmental groups who fall to address the issue of whether we can do it safely. The answer is clearly yes, we can do it safely based on 30 years of experience in the Alaska’s Arctic.

Is it a significant supply? Some suggest it is 6 months. Obviously, it is potentially as much or more than Prudhoe Bay, which has been 25 percent of the Nation’s total production; particularly when they say it is 10 years away, when it is only a matter of
a few years if, indeed, the oil is there; and, finally, to recognize that when we passed legislation that would have opened ANWR in 1995, if President Clinton had not vetoed it, we would have all this behind us. We would know whether the oil was there. And if it was, it would be flowing and reducing our dependence on imported oil.

So it is in our national security interests. It is in the interests of American labor and American jobs to move forward with ANWR. I encourage Members who have been lobbied heavily by America’s environmental community to recognize that they are going to be called on to vote, to vote on the question of whether to appease and be responsive to the environmental lobbyists, or do what is right for America.

I will conclude with a reference to a statement made by a former and respected Member of this body, Senator Hatfield of Oregon, who said, "I might add, a pacifist—at least in the minds of many of us, although we had the deepest respect for him—who said: I will vote for opening ANWR any day rather than send a man or woman in our Armed Services overseas to fight another war overseas."

I think that says a lot.

Mr. President, I yield the floor and look forward to the statements of my colleagues who will be forthcoming throughout the day.

Mr. DASCHLE. Mr. President, the events of the last year have highlighted what Americans have known since the 1970s, our economic security and our national security depend on our energy security. Americans need— and deserve—an energy plan that truly moves us towards energy independence.

America’s appetite for energy continues to grow each year. Today we import nearly sixty percent of our oil. And the problem is getting worse, not better.

Over the next 10 years, the United States is expected to consume roughly 1.5 trillion gallons of gasoline, most of it imported oil. We need to reduce our growing dependence on foreign oil. We need to ensure the reliability and security of our energy supply. And we need to do so in a way that is good for our families, our economy, and our environment.

There is no doubt in my mind that we can do all of these things, if we’re willing to invest in new ideas, new technologies, and new approaches to old problems.

As we begin this energy debate, I think we should keep in mind four key goals. Any energy plan we pass should increase our energy independence, it should be good for consumers, it should create jobs, and it should be responsible, both environmentally and fiscally.

Nine committees have worked on this bill, and Senator BINGAMAN has done an amazing job of coordinating input from so many committees and so many Senators on both sides of the aisle.

In the end, he’s put together a bill that meets each of these goals.

Opponents of this bill have essentially said that we face a choice between production and conservation. This bill demonstrates that we can, indeed, increase both.

First, production.

For a while, we’ve looked for the "Made in America" label on our clothes. We need to put that same "Made in America" label on our energy, too.

That means increasing our domestic production. But it also means recognizing the reality we face. We hold only 3 percent of the known world oil reserves, and we consume 25 percent of the world’s supply. Even if we drilled in everybody’s back yard, we could never meet our own demand with our own supply.

One might call the assertion that we can drill our way to energy independence, fuzzy math.

That’s not to say that we shouldn’t drill for oil and gas in the United States; to the contrary, we can and we must.

But we cannot simply drill our way out of this problem, and we should not be drilling in environmentally sensitive areas such as the Arctic National Wildlife Refuge.

Here is what we should do: We should look to develop natural gas deposits in deepwater areas of the Gulf of Mexico, and allow for increased production where it is environmentally acceptable.

We should explore for oil and gas in the National Petroleum Reserve in Alaska, the area where the three largest onshore oil reserves in the last ten years have been found.

And we should construct a pipeline to bring natural gas from Alaska to the lower forty-eight states. There are 35 trillion cubic feet of known natural gas reserves on the North Slope of Alaska.

Right now, we are literally pumping that gas back into the ground because we have no way of getting it to people.

This 2,000 mile long gas pipeline would create 400,000 jobs, use an estimated 5 million tons of US steel, and ensure that we do not become dependent on imported liquefied natural gas from the middle east. If we want to create jobs, increase our energy security, and help the U.S. steel industry, then building this pipeline is the way to do it.

Energy for America, jobs and opportunity for steelworkers, and no damage to sensitive environmental areas, this is the type of pro-development, pro-jobs, energy project we should be encouraging.

Others assert that we can dig our way to energy independence. Some see coal as a panacea. Others see it as a dirty and unsafe source of energy. But the choice between simply using more coal or less is a false choice.

This bill says that we can use coal better.

It invests in new clean coal technologies, which are good for our environment. In so doing, it will create jobs in an industry and area that has been losing them, and will help guarantee the future of coal in America.

Still, we need to recognize that drilling and digging simply won’t add up to independence if we don’t find other fuel sources here at home.

That is why this bill invests heavily in new and renewable fuels, including biofuels.

For example, it will triple our use of ethanol, which is a clean-burning, corn-based, renewable fuel.

It will help us harness the power of the wind, the sun, and the heat of the earth itself with tax incentives to develop these sources of energy, and to keep the energy produced affordable.

Recent analysis indicates that investing in these clean and renewable energy technologies will create 1.3 million new jobs for American workers.

More importantly, energy from these sources would provide American farmers and producers, pass through American refineries, and fuel American energy needs. No soldier would have to fight overseas to protect them. And no international cartel could turn off the spigot on us.

For all of those reasons—economic, security, and environmental—this bill sets a goal of generating 10 percent of our energy from renewable sources by 2015.

Some states are exceeding this goal already. There’s no reason that our nation can’t meet it.

Our bill also invests in common-sense efficiency, and the new technologies necessary to increase our energy without making sacrifices in performance.

Take air conditioners, for example. Two years ago, the Clinton Administration issued a standard that would have increased the efficiency of air conditioners by 2 percent.

Here is what that means: a 30 percent more efficient air conditioner would save our nation from having to build the equivalent of 50 new power plants and save Americans $3 billion in electricity bills.

Meeting that standard isn’t a pie-in-the sky proposal or a crushing new mandate for business.

In fact, Goodman Manufacturing Company, the second largest air conditioning manufacturer in the United States supports this standard and says that they can meet it with no additional cost to consumers.

As John Goodman, Chairman and Chief Executive Officer of the company, said, “[the higher standard] is just the right thing, and it’s something our industry can do to help.”

The Bush Administration revoked this standard, and the House-passed bill doesn’t include it. We think it makes sense, and that’s why we require it.

This bill will help us make similar efficiency gains with items such as vending machines, commercial refrigerators, lights—even our power lines.

As Senator KERRY has said so well, you just can’t tell Americans you’re serious about energy security unless
you’re willing to tackle transportation, where 70 percent of the oil we purchase is consumed.

During the 1970s, America created a program to increase auto efficiency. Those standards now save 3 million barrels of oil every day. But because those standards were frozen seven years ago, our vehicle fuel efficiency is worse now than it has been in twenty years.

So this bill says that automobiles and light trucks should average 35 miles per gallon by the year 2013.

This doesn’t mean that we are going to take away anyone’s SUV or make every American drive a compact car.

It means that the car companies will do what they say they can do, and increase the efficiency of the vehicles they make.

In fact, the National Academy of Sciences found that technology that already exists can be used to improve the fuel economy of automobiles and light trucks without affecting safety or performance.

When the fuel-efficiency provisions of the Senate energy bill are fully implemented, they will not only save American drivers billions of dollars—they will also reduce the same amount of oil we are currently importing from the Persian Gulf.

Finally, when it comes to energy efficiency, this bill says that the Federal Government must lead by example.

Last year, the Federal Government’s utility bill totaled $3.4 billion. This bill mandates that the government use cost effective technologies that consume less energy.

This small step alone—one that is not a part of the House-passed bill—will save taxpayers $250 million a year.

Doing all of this will be good for consumers and families, good for our energy independence, and good for our economy.

Finally, this bill demonstrates international leadership on global climate change—leadership that the Administration, sadly, has been unwilling to show.

This bill links energy policy and climate change by creating a national strategy to track and reduce carbon pollution and other greenhouse gas emissions. It funds research and development on innovative technologies to reduce carbon pollution, opens markets for clean energy technologies, and demands high-level coordination and leadership from the White House.

The science on this issue is clear. Carbon pollution and other greenhouse gas emissions are causing changes in our climate, including coastal flooding, agricultural disruptions and significant damage to our ecosystems.

As the largest emitter of carbon pollution in the world, I believe the United States has a special responsibility to help address this problem. This bill does that.

Now, we know what our opponents are going to say about this bill and about our approach.

They are going to say that we are going to take away people’s SUVs and washing machines—we are going to ask you to sweat in the summer and freeze in the winter.

They will try to tell you that this is a choice between abundance and austerity. They couldn’t be more wrong.

Actually, they are right about one thing—we do face a choice. It is a choice between the past and the future, between a bill that is good for consumers, or one that serves only the energy companies.

The energy bill that passed the House is based entirely on the old philosophy of dig, drill and burn. The centerpiece of that plan is to open the Arctic Refuge.

Supporters of drilling in the Arctic Refuge have used almost every opportunity to justify their position.

When we were experiencing rising oil prices, supporters said it would make oil available quickly and drive prices down in the process.

But even if Congress were to authorize drilling in the Arctic National Wildlife Refuge today, we would not see significant quantities of oil produced from the refuge for 10 years at the earliest.

When our economy began to slow, supporters began billing it as an economic stimulus measure, saying it would create 750,000 jobs.

Yet that number comes from an outdated and biased study by the American Petroleum Institute. Recent, more credible estimates by the Congressional Research Service and others suggest that only 60,000 jobs would actually be created.

And now, as we face threats to our nation’s security, those same supporters are wrapping their argument in the cloak of patriotism, saying that drilling in ANWR is vital to increasing our energy security.

But the oil there would only meet America’s needs for less than 6 months.

Let me give you an example of how little oil that is: If we all put replacement tires on our cars that were as good as the ones that came with the cars when they were new, the resulting increase in energy efficiency would save 5.4 billion gallons of oil—70 percent more than the total amount of oil in the Arctic Refuge.

Compare that our proposed Alaska natural gas pipeline we have proposed—which would provide natural gas to American consumers for at least 30 years.

The rest of the House bill is a smorgasbord of tax cuts for oil and gas companies. The Republican bill includes $33 billion in tax cuts. Twenty-seven billion of that goes to the biggest energy companies.

Perhaps even more astonishing is this fact: Because the House bill fails to make meaningful reductions in the transportation sector, we would be getting oil from a source that would produce so little and so far in the future, if we enacted it into law today, it would actually increase our dependence on foreign oil.

The House plan may indeed be an energy plan for a new century. Unfortunately, that century is the 1900s.

Our bill takes the better path—for our energy security, for our economy, for our environment, and for our future.

Now, there is one other thing we’re hearing from the other party, and it is this complaint that the Republican leadership did the exact same thing with a Republican energy bill—the National Energy Security Act of 2000.

Second, now that we’re debating an energy bill, some of my colleagues seem more intent on debating how we came to debate this bill.

I made a promise to bring this bill up for debate. That is exactly what I have done.

No one’s right to be heard will be compromised.

Anyone is welcome to offer any amendment they choose.

I expect to have a full and open debate on this bill. The less time we spend worrying about procedure, the more time we can spend debating the direction and substance of our Nation’s energy policy.

So, with that, I want to thank Chairman BINGAMAN and the other committee chairs who have worked so hard to assemble this bill.

And I look forward to working with my colleagues on both sides of the aisle in order to make progress on this vitally important piece of legislation.

Mr. REID. Mr. President, we have had a number of calls in the cloakroom from Senators who want to come over and give opening statements. Others want to offer amendments. I am wondering if I could ask the Republican manager, because I have cleared this with the manager on this side, if we were alternating back and forth on the statements—as I said, there are a couple of more statements at least that people want to give this afternoon. It is going to take us into early evening. It is my understanding there is something some Members are interested in doing tonight. I wonder if when we get into the amendment stage we could have an initial agreement that we alternate back and forth on amendments on this very important legislation. That is normally the way we do it. Is there any problem with that?

Mr. MURKOWSKI. Mr. President, it is my understanding we had reached agreement on that earlier in our discussion, that we would go back and forth as Members appear.

Mr. REID. On statements.

Mr. MURKOWSKI. Mr. President, we were going back and forth on amendments. I ask the Chair if that agreement has not been previously made?
Mr. REID. I apologize. I thought it was on statements.

The PRESIDING OFFICER. There is an agreement on the recognition of the following two Senators: Senators Dorgan and Domenici, in that order.

Mr. MURKOWSKI. I would not object to what has been proposed by the majority whip.

Mr. REID. I would also say to my friend, so there is some order, Senators Daschle and Bingaman have decided they will offer the first amendment and then we will go to the Republican side. We will probably not get to that until first thing in the morning the way the statements are going.

I ask unanimous consent that in addition to the alternating of opening statements on this bill that the amendments also alternate; that Senator Daschle or his designee will offer the first one and then go to Senator Lott or his designee, and so on down the line.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from North Dakota.

Mr. DORGAN. Mr. President, I listened to the comments of my colleague from Alaska. He obviously feels passionately about this issue. I have served with him on the Energy Committee for a long while. He studies these issues carefully. He uses a prodigious number of charts when he makes his presentations.

In my case, I just want to say in his presentation that there is much in this bill on which we can find agreement. He indicated there were a number of areas of agreement. I know he stressed areas of disagreement, but I think he also said there are a number of areas in this legislation where there can be some broad agreement. I think that is helpful.

At the start, however, I want to comment on the exchange between my colleague from Alaska and the majority leader.

The majority leader brought this bill to the floor of the Senate for a very important reason. It is not unprecedented. It was brought to the floor of the Senate rather than being moved through the committee first.

We all know the issue of energy security is more than just finding additional supplies of energy. As a result of September 11, and other concerns about the broader area of energy security, the leader decided to bring to the floor the product of a number of different committees of the Senate working on this issue of energy security.

This is about protecting America’s nuclear power plants against attacks by terrorists. That is part of this bill. That is part of energy security. So there are a series of things that were brought together, including the work and the efforts by the Finance Committee dealing with tax credits. That, too, is part of this bill.

The majority leader decided to bring this bill to the floor as a product of a number of different committees, to work on all of these issues on the floor of the Senate, so all Senators would have the opportunity to address these issues.

It does not shortchange the Senate to adopt that approach. It has been done before. It is not unprecedented. And the majority leader did not make a mistake in doing so. I think he advanced the interests of the energy bill and advanced the interests of the debate about energy in this country by adopting this approach. The fact that some of my colleagues think it was the wrong thing to do. I respect their opinion, but they are just flat out wrong.

We are here in the Chamber dealing with energy. That is where we ought to be. This is an important public policy issue for this country. The bill that has now come to the floor has the combined input of many committees, which is as it should be. We ought not deal with these issues separately.

I say that, because I know the majority leader has been criticized by some for this approach. The majority leader has done exactly the right thing and has done it the right way. He kept his word in bringing this bill to the floor, so we can have an open and full debate on all of the issues that affect this country’s energy future.

This is probably not the most opportune time to debate energy. Timing is everything, of course. This morning I stopped for gas on my way to the Capitol Building, and it cost $1.08 per gallon. In high school, when I was pumping gas at my father’s service station, I was pumping gas for about the same price—actually slightly more in real dollars than we are paying today for a gallon of gasoline.

The current price probably does not promote great urgency among the American people that we must have a new energy policy now. Most Americans understand, despite the fact that the price of gasoline is very moderate right now, that the future is not all that bright. We have not found a complete solution to this problem yet. We have to keep working at it.

The answer is yes. We need to produce more energy. Do we need to produce more energy to meet future energy needs? The answer is yes. We need to produce more. Let’s do it in an environmentally sensitive way. So produce more in an environmentally sensitive way.

No. 2, do we need to conserve more? Yes. We waste too much energy. Let’s do that in a thoughtful way.

No. 3, can we achieve greater efficiency with all of the appliances we use every day in every way in this country? Yes, of course. That also is an element of conservation.

No. 4, and finally, turning to limitless, renewable sources of energy. That makes sense for this country and the world. These policies combined will help wean us from the overdependence on foreign sources of energy, help us develop additional sources of energy at home, and also help us become more efficient and more conservation-minded as a nation.

Now, more than ever, we understand this is not just about energy security, but that energy security is about national security. That has to be part of this debate. Reducing our dependence on foreign sources of energy is part of our national energy security policy.

Financial assistance in this bill would help improve critical energy infrastructure security. That is a part of this legislation that is very important.

This legislation will increase domestic oil, gas, and coal production. It will do that in a thoughtful and environmentally sensitive way. It will help remove barriers to production on public lands in an environmentally sustainable manner, and it will authorize the construction of a natural gas pipeline from Alaska to the lower 48 States, helping to create hundreds of thousands of jobs and, more importantly, helping us move an estimated 32 trillion cubic feet of reserves of natural gas that exist in Canada, reserves that are leased and that can come into our inventory, when we are able to build the pipeline. That pipeline authorization is part of this legislation.

This bill will promote research, development, and deployment of advanced clean coal technologies, something very important, including, especially, opportunities for lignite coal, because coal is going to be a part of our energy future. Lignite coal is a significant part of that opportunity as well.

One of the questions for us when we finish this debate will be: are we going to see the future through a rearview mirror? Is our energy policy a policy of yesterday forever? We have some who will come to the floor who will say: I have a new idea. Let’s just drill and dig for more oil and coal.
What I say is: we support that. We need increased production. But if our strategy for tomorrow’s energy supply is simply drilling and digging, that is a strategy of yesterday forever.

We had someone from the Energy Department testify before the Energy Committee. I asked them a simple question that we similarly ask about a lot of programs. On Social Security, we ask the question: What will be the stability and the financial circumstance of Social Security in 25 or 50 years? Can you tell us what is going to happen 50 years from now?

So we do charts and graphs and create the financial mechanisms to evaluate whether we will be on safe ground in 50 years with respect to Social Security.

I asked the Energy Department officials: What is your plan for 35 and 50 years from now with respect to energy? What kind of energy will we be using? What will be the energy mix? How much will we be using?

The answer was: We don’t have a plan.

The reason I asked the question was, I was trying to determine, are we going to wean ourselves from this overly dependent mix of sources of oil? Are we going to move toward technologies that will change our use of energy, our need for certain kinds of energy? Have we decided as a country, for example, if we want to change to a goal of decreased oil that in 50 years we want fuel cell cars driving on the streets of the Nation’s Capital and all across the country using oxygen and hydrogen and throwing water vapor out the back end? That sounds like a pretty good deal to me.

The Energy Department’s answer was: We don’t have a plan. We will get back to you.

My response was: We need a plan. America needs to decide its energy future, what it intends to do with respect to energy supplies in the long term.

If we do what some of my colleagues counsel at this point, we will be back here 25 years from now, and we will have exactly the same debate. People will wear the same color shoes and shirts and suits, and they will stand up and use the same tired, worn arguments.

The solution 25 years from now? Dig more and drill more. This debate doesn’t change. Only the calendar changes. The people change. You could have read this debate 25 years ago. You will be able to read it 25 years from now, unless we decide we are going to do some things differently.

My first car was a model T Ford that I restored as a young boy. It was a 1924 Model T Ford that I bought for $25. It was in an old granary and had not been driven for decades. The rats had eaten off the seat covers and all the wiring. It was a tin shell with an engine that didn’t work and tires eaten off and rotting off. My father owned a service station, so I pulled it in and put it up on a hoist. I worked on it for nearly 2 years. I restored that 1924 model T Ford. It was a great thing to do as a high school boy.

Then I got interested in girls and decided a 1924 car was not the thing, and so I sold it—much to my regret. I have regretted that sale ever since. I got myself a new two-door car for a couple of hundred dollars.

My point about the Model T Ford is that you put what you did in that 1924 car exactly the same way you put gasoline in a 2002 car. Everything else in our lives has changed. Everything has changed around us, except you drove a 1924 Ford up to the gas pump the same way you drive a 2002 Ford up to the gas pump. You take the cap off, you stick the hose in, and you start pumping. Seventy-seven years later, nothing has changed. Should it? Will it? The answer is no. Congress allows that to expire means we support the hose in, and you start pumping. Seventy-seven years later, nothing has changed. Should it? Will it? The answer is no. Congress allows that to expire means we support the hose in, and you start pumping.

What I say is: we support that. We need increased production. But if our strategy for tomorrow’s energy supply is simply drilling and digging, that is a strategy of yesterday forever.

What we have now is all of these projects that are stalled, because Congress has not done its job. This bill contains a five-year extension of the wind energy production tax credit. And while I support it in this bill, I would like to get it done apart from this bill and, as we know, when we complete the bill in the Senate, we will be in conference with the House. This will take months.

My colleague from Wyoming, the other day, said—after I gave this presentation on extending the wind energy production tax credit—he said, yes, but we are taking that up as part of the energy bill. That is of little solace to me. It will be months and months before this energy bill is completed. Meanwhile, projects in my State will languish on the shelf when, instead, those projects should be helping to create jobs and energy.

With respect to electricity, I have just described the reliability of the transmission grid and the opportunity in this legislation to help facilitate access to and reduce constraints of the grid. This bill will help create a more seamless and national grid, and it will help States like North Dakota use its vast resources, such as wind, to be able to move electricity around the country.

We are also going to repeal PUHCA and PURPA in the context of this comprehensive energy bill, while we will still retain sufficient consumer protections and safeguards, which are included in this legislation as well.

And, this bill is going to facilitate energy production and transmission on tribal lands. It includes measures to research and deploy transmission technologies—which I am very high on—including composite conductor wire that can dramatically increase the efficiency of existing wires to improve the efficiencies of existing lines and alleviate transmission bottlenecks.

We are going to hear a lot about the energy efficiency of appliances, such as residential air conditioners. We put into this bill what is called a SEER 13 air conditioner, which is a much higher level of efficiency with respect to air conditioners. This bill contains a number of provisions designed to save energy in buildings and save energy with more efficient appliances. The SEER 13 air conditioner standard would save an amount of energy equivalent to that produced by nearly 70 power plants. This standard also would save $3.6 billion in electric bills for consumers over a 12 SEER standard.

The Energy Department received many comments on this standard than on any other rulemaking in the agency’s history. The vast majority were in support of this 13 SEER standard, and that is why we have put this standard
in the bill. This bill contains Federal building performance standards, too. It requires the Government to purchase energy-efficient products, among other provisions, because the Federal Government is the single largest user of energy in the State.

I want to talk for a moment about transportation, which is the sector in which we consume the most amount of energy in this country. If you look at the demand for energy, you see that the transportation sector is where the largest demand occurs and where that demand is increasing.

My colleague, Senator BINGAMAN, has used this chart on a good many occasions. There will be a debate in the Senate on the issue of CAPE standards. I come from a State that uses pickup trucks, SUVs, and four-wheel-drive vehicles extensively. It is not a convenience for someone in a northern State, which experiences rough weather, to need a four-wheel drive. These vehicles also do not have the convenience for people that are out there operating a ranch, a farm, or living in a small town and are 50 miles from a hospital. It is not unusual for these people to want to drive a vehicle with some weight, a vehicle with a four-wheel drive. I do believe any of them want someone to tell them they can't do that.

We can't address energy without addressing efficiency and without addressing the opportunity to make this transportation sector more efficient. So, some say, let's go to the old CAFE standard. I happen to prefer a pull rather than a push. Some say, let's push to 37 miles per gallon or whatever number that is being used today. I think we ought to say to consumers that we are going to empower them when they buy their vehicles. We are going to give them a very substantial tax credit to purchase more efficient vehicles—a per car credit of $4,000 or $5,000 depending on the value of the car.

So, a consumer would be able to go to a car dealership, knowing that such a credit would only exist if he or she were to buy a car that meets certain efficiency standards. If one manufacturer is not making that type of car, then the person would be able to go to another manufacturer.

I want to "pull" manufacturers to be making the kind of products that consumers want to buy, to move efficient tax credits. But I don't want people, because of where they live, or because of their needs, to be penalized, if they drive a four-wheel-drive pickup truck or SUV. We are going to debate that. So, I will have more to say about that in the future.

We have a difference of opinion on whether we should provide a legislative push or pull. I believe that our future with respect to vehicles is to be able to expect that we will see the manufacture of more hybrid vehicles and hydrogen-powered fuel cell cars. I drove a demonstration car on the Capitol grounds, which was running on oxygen and hydrogen, and it was emitting water vapor out the back end of the car. That is the future. But we won't get to that future unless as a matter of public policy we pull very hard in that direction. Otherwise, we will be consigned to yesterday forever. We will replay the past forever. That is not what I want for an energy policy.

If that is going to be the end of this debate, we should not have it. If this is going to be the same debate we had 25 years ago, I happened to be on the floor of the Senate—but if this is our debate, then it is a thoughtless debate. This country needs to understand it has a world class economy, the strongest economy in the world. It uses a substantial amount of energy. That use continues to increase.

We are overly dependent on foreign sources for that energy, especially from areas of the world that are inherently unstable, and we would do well to remember that—especially now more than ever.

There are some who say, well, that is all really interesting. You folks who talk about renewable and limitless sources of energy, that is really great because it is on this chart. Look at the renewables used in the United States, compared to other countries. We are not doing much.

It is a very small part of our energy supply. They will say, you are focusing on the corner rather than the lion at the door.

The fact is, this country has the opportunity right now to describe an energy policy that really does turn the corner and move us in a very new direction. If we are moving in the right direction at the end of this debate, then we will have probably passed the kind of bill that was brought to the floor of the Senate and perhaps even have improved upon that. Then we will especially be able to say: We are doing something different.

Think about this. I just described that, in over 75 years, nothing has changed with respect to the way we put gas in a 1924 Model T Ford versus a 2002 Ford Explorer—nothing. Think of this country. We have, as people, written, split the atom, spliced legs, and his cave and, in the last 10,000 years, he invented language, tools, the wheel, fire, primitive warfare, and agriculture. Five thousand years later, he invented recorded history and chariots. In the past 500 years printing occurred, the steam engine was invented, and the industrial revolution occurred. But nearly everything else has been invented in a very short period of time the last 100 years or so. Yet, we tend to think that our existence on Earth is the only existence; that this Earth was placed here for our convenience.

If we take the long view of energy policy, we will understand that this is not the case. The long view of energy policy says: Let's change what we are doing. Yes, let's produce more; but, let's also disconnect in the long term and pay more attention to opportunities for limitless and renewable sources of energy. Let's have real conservation, real efficiency, and let's, as a nation, understand that energy security is part of our national security.

I thank Senator BINGAMAN. Serving on the Energy Committee has been a source of pleasure for me. These are very interesting and important national issues. Senator BINGAMAN, Senator MURkowski, and many on the Committee have exhibited great passion about these issues. I chided Senator MURkowski for the number of charts he used today. It simply shows the depth of his passion, and I respect that.

Senator BINGAMAN has, with quiet, effective leadership for a long period of time, attempted to bring the Senate a bill of which we can be proud. I say to him how much I appreciate his work.
The Energy Committee has been, from time to time, a divided committee. At other times, we have worked closely together. The men and women who serve on the Energy Committee are good thinkers. They come from different parts of the country and combine the experience to the center a good, interesting, and aggressive debate about these issues.

As I indicated, I have great respect for those with whom I may disagree. But there is no more important policy we will debate this year that will have ramifications for decades and decades into the future than this energy bill. I am pleased we can finish our opening statements and go to amendments. I believe we will start on amendments tomorrow.

I thank the Senator from New Mexico and the Senator from Alaska for their earlier statements. I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico. I believe under a previous order the Senator from New Mexico is scheduled to address the Senate.

Mr. DOMENICI. Madam President, are there other Senators waiting to be heard? I will not be long; maybe 7 to 10 minutes. I thank the Chair for recognizing me.

Madam President, I am pleased we are finally beginning to debate a very serious subject and that we have put together a bill that is before us that perhaps after a couple of weeks of work will be known as the Senate’s comprehensive energy policy for our Nation.

As President Bush has repeatedly said, this issue is a vital component of our homeland defense and our national security. Our economic and our environmental future is directly tied to our ability to produce ample supplies of clean, reliable energy. There can be no doubt that this great Nation, which has achieved the most significant heights in terms of material wealth and material well-being, has done that because we have been able, principally with our American private sector and competition, to supply the kinds of energy that are needed for this enormous growth that affects each and every family as they go about their daily lives, as they live in their homes which have heat, which have cool air in the summer, which have kitchens with all kinds of appliances to get done what they want for their families and enjoy life.

In a very real sense, America’s future is tied to whether or not we are smart enough to do the right things or, in some instances, to do nothing so that we can continue to have this supply of energy our country has enjoyed.

Everyone knows that without an adequate supply of energy, our modern standard of living would plummet. Long-term recession and major job losses would be the norm. In fact, America would not be the America it is today in a decade or two if, for some reason, we did not have adequate energy supplies.

We saw the impact sometime back from oil shocks and their devastation to our economy, but remember that the shock in the 1970s occurred when we were little more than one-third dependent upon foreign nations for our oil. Yet we had an enormous shock. Now what? Nearly 60 percent dependent on oil.

This underscores the importance, in this Senator’s opinion, of moving forward with an energy plan that the President will be a partner in and that the President will proceed with his intervention from time to time that we can altogether say we have produced an energy plan, bipartisan in nature, under the leadership of our President.

The policy that we have must set forth the principles, should be the guideline, for our debate on a comprehensive energy policy. That is the policy the President put before us.

Specifically, that policy noted that through conservation, more production, and the diversity in energy production and distribution, the country can overcome short-term energy shortages. In addition, we can build a new approach to energy that will continue to increase the quality of life in the United States and place in the leadership role in improving the quality of life around the world.

Conservation and efficiency clearly must be part of this comprehensive energy bill. I appreciate the emphasis the President has put in his policy proposals on these aspects of energy policy in the United States, and I compliment Senator BINGAMAN. While I do not agree with everything in the bill with reference to conservation, with reference to saving of energy, the bill has some very good ideas in it and I hope some of them will still be in the bill when we finish our 10 days to 2-week debate.

Conservation has been absolutely vital to the United States over the past decades in controlling our thirst for energy. A lot of people do not know we have done some very significant things in the area of conservation—at least the numbers show that—so let me talk about those.

Since 1973, our economy has expanded 126 percent while our energy increase has been only 30 percent. That shows, in my opinion, we have taken conservation seriously and we have already done something about it. That does not mean we have solved all the problems in conservation, that we have opened all the windows that can be opened to conservation, but clearly we know how to do it.

I also appreciate the emphasis in the President’s policy on environmental protection, and that obviously finds itself in this bill also.

I think we should remind ourselves and fellow Americans that we have accomplished a lot. For example, again, since 1970 our emission of air pollutants has decreased by 31 percent while our gross domestic product grew by 147 percent and the amount of vehicle miles driven has increased by 140 percent. When one looks at those kinds of numbers, they know the United States has done a reasonably good job to date. Even though there are many who are critical, it is obvious to this Senator that if we can do again in the next decade what we have done in the past decade or two with reference to these two areas, we will indeed have a very good energy policy and a policy that will carry us through in good standing.

Of course, there is more to environmental protections than just the quality of air, which I have mentioned in terms of where we were and what happened to our clean air. The policy the President proposes carefully notes that modern energy exploration and extraction technology can be done with minimal environmental impact. I hope those who will listen to the debate and ultimately participate by virtue of what they think the Senator should do and the way they vote know that I hope everybody knows that modern energy exploration and extraction technology can be done with minimal environmental impact.

I am proud of some of these advanced techniques that have been pioneered in the State of New Mexico and are now ready to help in the exploration of ANWR, if that be the will of the Congress and of the President.

Returning to our immediate task at hand, I hope we will not repeat what has been repeatedly said by my colleague from Alaska. I think the issue that divides us, ANWR, should have been voted on in committee. I think the bill should have come with ANWR in or out, with the Senate having debated it in committee and having voted. I believe if that would have been the case, ANWR would be in the bill.

Now, which ANWR? Not the ANWR we talked about a couple of years ago. The ANWR that is spoken of in the House bill, where a very small area, 2,000 acres, will be used to determine whether or not there is sufficient oil to proceed. With the new technologies from that small location, we will be able to determine tremendous information with reference to what surrounds it and where, and we can determine as a nation and as a people if we should proceed.

I believe we should have produced a bill that had all of the major issues that are now in this bill discussed and debated in the committee. On the other hand, I believe Senator BINGAMAN, who comes with the first major bill I think he has managed—I would ask the Senator, is that correct?

Mr. BINGAMAN. Yes.

Mr. DOMENICI. He will probably be here for 2 or 3 weeks managing this bill. I believe those who know what happened will understand the Senator did put in a lot of ideas and a lot of proposals that came from our side of the aisle. To mention one, there are a
lot of proposals in this that are now reduced to statute form that have to do with nuclear energy for the future. They were in a bill that I introduced, along with the Senator from Louisiana who is sitting in the chair, and some of those proposals are not in this bill, and some of them—and are in this bill that Senator Bingaman has brought. I hope we will take all of the difficult issues that confront us and not dilly-dally, but get them debated and voted on. And there are many. So let us get on with it. Let us proceed. Then the entire provision on electricity—there is a very elaborate provision that was put in by the distinguished Senator from New Mexico, Mr. Bingaman, and we will have to decide whether that is what we want, but at least the issue will be joined on another very important part of this bill. So I hope we will proceed on some area.

It is pretty hard to make the Senate proceed with dispatch when Senators know they have an infinite amount of time on a bill. It will be hard to get them to bring amendments, but there will be plenty of them soon, and I look for participation, particularly on the nuclear part of this bill, during which time I will share a lot more with the Senate and those interested about why we should proceed with nuclear energy, at least its availability, as part of the mix in the United States for our future. I yield the floor.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. BREAUX. Madam President, I thank the Chair for presiding in such an effective fashion.

I will take a minute in the general debate time to talk about the energy bill that is before the Senate.

No. 1, let me say I think we desperately need an energy bill. It sort of goes without saying, if there is anything both sides could probably agree on, it is on energy. I am otherwise likely to be a relatively contentious debate, certainly we can all agree on the fact we need an energy bill in this country.

The reasons are quite obvious. The United States prides itself in being a very strong and powerful nation, probably the most powerful nation on the face of the Earth, and perhaps the most powerful and strongest nation in the history of the world. When it comes to being self-sufficient in most aspects important to us, we are anaemic. When it comes to the food we eat, Americans produce more than we can eat. In fact, we supply the food for a large number of countries around the world. We do very well. When it comes to medicine, the rest of the world is the envy of the world. Pharmaceutical companies are the best. Medical technology and science is the best in this country. People come to America when they need very sophisticated, quality health care if they cannot find a way to get to our country.

So in most all of what we do, including education, we are indeed No. 1 in the world, except when it comes to energy. The facts are the opposite when it comes to energy. We are dependent on other countries to help run America, whether it is running automobiles on the highways, or the tractors in the fields, or launching a space vehicle, or running a naval vessel, or running a tank, or supplying the men and women fighting in Afghanistan.

So much of the energy we use as a nation comes from foreign countries. It comes from foreign nations. I have seen the number as high as 58 percent of the energy we use in this country comes from foreign sources. Not only does it come from foreign sources, unfortunately it comes from countries on which we really cannot depend.

Our energy does not come from Canada. It does not come from people who have been allied with the United States in most difficult battles. Much of the energy supply comes from countries that are the most dangerous in the world, particularly not to the most stable countries in the world, which means the oil we get from them is not as dependable as it should be.

Not only is it coming from countries in a part of the world that is one of the most dangerous potential for those supplies being interrupted at a moment’s notice because of some additional conflict in the Middle East, it comes from those countries through a process that, if it were engaged in in this country, people would go to the penitentiary.

What I mean by that is quite simple. The Organization of Petroleum Exporting Countries, OPEC, which supplies much of the energy and the oil we use to run America on a regular basis, has meetings at very nice places around the world. They bring in all of their oil ministers, they sit around the table, and guess what they do. They fix prices. They determine how much energy is going to cost America by sitting around the table and deciding how much they will produce. If they think the price is too low, they cut back their production, they raise the price and sell it to the United States and other countries around the world.

Between 55 and 60 percent of our oil comes from parts of the world that fix prices. If business men and women did in this country, they could go to the penitentiary because it is illegal to fix prices. For years we have been comfortable with getting our energy from countries that, if they operated in America, would go to jail.

It is, therefore, abundantly clear we need an energy policy that allows us to approach self-sufficiency. I daresay if we imported half the food we ate in this country, people would be marching on the streets in our Nation’s Capital saying that is unacceptable because food is critically important to this country’s survival. That is, of course, true, but equally true is that critical to our Nation’s survival and stability is the energy that we use. The energy that we use to engage in commerce is also critical to the security and the long-range future of the strongest Nation on Earth.

We can do no less than come up with an energy bill that addresses this most serious issue. For the most part, I think that the energy bill we see the committee is a movement in that direction. It can be improved. I hope, through the amendment process, it will be approved. We have to have a balanced energy package. We cannot be putting all of our eggs in one basket.

I remember in the not too distant past when we were talking to control the supply of drugs in this country. The popular phrase at that time was “just say no.” It sounded good, but it only addressed half of the equation. It addressed the half of the equation of the demand side. If we do not have a demand for drugs, we will solve the drug problem. It never really worked because we did not pay enough attention to the supply side. We did not control the flow of drugs illegally into this country. The answer, obviously, was we had to do both. We had to control the demand in this country and we had to control the illegal supply to this country.

The same thing is true with regard to energy. We cannot just save our way out. We cannot just rely on alternative fuels. I have voted for over $6 billion of assistance for alternative forms of energy. I believe in it. I think we have to have more. We have to have alternative kinds of energy. I hope we can develop wind as a source of energy, as well as solar power. We need to also look at the alternative of hydrogen cell fuel utilization. We have to look at waste material, whether it is chicken waste, swine waste, or whatever have you.

I guarantee you that in the foreseeable future we are not going to run the planes of this country and the tractors on the farms with chicken waste; it is not enough.

We also have to develop our traditional oil and gas resources. I have heard some of our colleagues and I have heard some of the environmental groups say we cannot drill our way out of this problem, as if we were drilling everywhere. Just the opposite is true. The chart I have shows the light orange areas where we can not drill. The entire east coast of the United States of America, other than congressional actions or moratoriums by Presidents, both Democrat and Republican Presidents, has said we are not going to look for oil and gas from the State of Maine down to the State of Florida. It is not quite “drilling our way out of it.” On the other side of the country, from the Canadian border and the State of Washington down to the country of Mexico, and all of the areas between, through moratoriums or acts of Congress, they have said: Don’t do it. We have done this.

All of this area is a potential source of oil and gas but because of the opposition of the locals along the west
coast of the United States, we are not looking, we are not searching, and we are not producing energy, much of which is consumed in their respective States.

The west coast of the United States is off-limits east coast of the United States is off limits, and the eastern part of the Gulf of Mexico, where everybody seems to want to send the offshore production, off Louisiana or Texas, we will not worry; it is also off limits, as well.

This Congress just engaged in a very bitter battle over a proposal by President Clinton to lease sale 181 in the eastern Gulf of Mexico. President Clinton made a compromise in the sale by reducing the area. This administration reduced it by two thirds further, and we had a knock-down, drag-out battle on the floor of the Senate to eliminate it completely.

All of these areas are restricted: Don’t do it here; not on the ball; do it somewhere else. And we continue to import over 58 percent of our country.

We need an energy policy. It should be balanced. And balanced does not mean just wind, solar, and hydrogen; solar it means a combination. There will be efforts by the Senator from Alaska to address some areas of interest in his State. I remember quite well back in 1980 when we were engaged in debate on the Alaskan lands bill—1980, I was a member of the House of Representatives, chairman of the subcommittee that handled the Alaskan lands bill over in the House. We produced a bill which said we were going to set aside a very large area in the Arctic National Wildlife Refuge and we were not going to allow any exploration in that Arctic National Wildlife Refuge except for one particular area which was designated as section 1002 of that particular part of the Arctic wildlife refuge. We said the Arctic wildlife refuge would have about 19 million acres in it. We were not going to do production in those 19 million acres, but we were going to reserve 1.5 million acres in section 1002 of the bill.

I was there when we wrote it. It was our intent to say at that time, that one section of the 19 million acres we will look at and ask USGS to do seismic work and come back to the Congress and recommend whether we should proceed or not. It is interesting. The New York Times and Washington Post are totally opposed to what the Senator from Alaska is attempting to do now. But do you know what they were saying when we did this back in the 1980s? The New York Times said:

Alaska’s Arctic National Wildlife Refuge . . . the most promising untapped source of oil in North America.

The total acreage affected by development would represent only a fraction of 1 percent of the North Slope wilderness . . . But it is hard to see why absolutely nothing is done of this remote wilderness should take precedence over the nation’s energy needs.

The Washington Post had an equally strong comment about what we were doing back in 1987 when we set up this process. They said:

But that part of the Arctic coast—

Meaning the coastal plains—

is one of the bleakest, most remote places on this continent. Nearly any other place where drilling would have less impact on the surrounding life . . .

That oil could help ease the country’s transition to renewable energy supplies and . . . reduce its dependence on uncertain imports.

Congress would be right to go ahead and, with all the conditions and environmental precautions that apply to Prudhoe Bay, see what is under the refuge’s tundra.

That was in 1987. We are more dependent on foreign oil today than when they wrote those comments and remarks back in 1987. They were right then. They would be even more right if they said the same thing today. But all of a sudden, this area has become something that no one can even touch. I understand when people say, “Not in my backyard.” I don’t agree with it because it is a national program, not just for one State. But if you live in the neighborhood, you ought to be listened to more than if you don’t live in the neighborhood where the activity is going to occur.

We are talking about activity in the Arctic National Wildlife Refuge, the small sliver up there of 2,000 acres. The Governor of the State, who is a Democrat, supports this activity, the two Senators who represent the State support the activity, and the Member of Congress in the House of Representatives who represents that area supports that activity. I would add the Native Alaskans who live in the area also support the activity.

So if you want to look to the people who are there and who are duly elected to represent the people, they enthusiastically support the amendment to be offered by the Senator from Alaska. Maybe there is an environmental group sitting in a fancy office in San Francisco that thinks: If we take this position, by golly, do you know how many more members we can get? This will be our cause célèbre for the next 5 years. They love the issue, but I think their position is not correct.

We just can’t do it all in Louisiana. We are going to do more than our part. We will continue to do so. This has to be something that all of us participate in as a nation. We have to have more savings. We have to have more alternative sources of fuel. We have to have more exotic ways of finding energy through wind and solar power.

But we also have to do what is necessary for a number of years to come in balancing that with traditional oil and gas supplies. You cannot say “not here, not there, and not there,” and solve the problem.

For those who say there is not that much up there, No. 1, no one knows how much is up there until we take a look, but the estimates we have from the USGS and the industry say there is a sufficient amount of supply up there to reduce our dependence and eliminate all our imports from Saudi Arabia for the next 30 years. They are the largest exporter of oil to the United States. We can eliminate their imports to this country for the next 30 years as a result of that activity. That, I suggest, is a very important part of our Nation’s energy solution.

I hope we will have more time to debate this issue. I look forward enthusiastically to doing it. I think the Senator from the State where this would be involved has done an outstanding job of presenting this issue to this body, and I hope we listen to his recommendations.

I yield the floor.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURkowski. Madam President, I wonder if the Senator from Louisiana would comment briefly on the advancement of offshore drilling off the State of Louisiana and the Gulf of Mexico. I understand they are drilling in several thousand feet of water, and actually Federal leases are being sold in excess of that? That technology in deep water has risks, obviously, but the industry has an extraordinary record of success.

Mr. BREAUX. I thank the Senator for the question. I will be brief. I know my colleague is waiting to speak.

We have been doing offshore production in Louisiana in some of the most fragile areas for over 60 years. I would argue with anyone that this environment and this ecosystem down here is far more fragile than the ecosystem in the Arctic National Wildlife Refuge on the Coastal Plain. They have tundra grass that grows during the winter a couple of inches high.

We have, down here, an abundant supply of fish, of shrimp, of fur-bearing animals; it is a very fragile coastal wetland environment that is incredibly productive. Every single wildlife refuge in Louisiana has oil and gas production on it.

We have learned. We have learned by mistakes. We have benefited from science. Now the activity and the way it is conducted is the state-of-the-art technology. To say we have not learned a sufficient amount of information to be able to go out and do it is not nearly as complicated, not nearly as fragile, with much smaller numbers of wildlife in existence, as in this area, I think is to ignore the last 60 years of balanced development that we have experienced.

I think we ought to learn from those mistakes as well as learn from our positive accomplishment, and apply it in the area of the State of the Senator from Alaska.

Mr. MURKOWSKI. I wonder if the Senator will yield for another question. I notice there are some charts behind the Senator from Louisiana relative to what is going on in refuges. I think
March 5, 2002

CONGRESSIONAL RECORD—SENATE

S1521

there is a presumption among some that refuges are off limits to oil and gas, other exploration. My understanding is that chart shows the number of activities in various wetlands.

Mr. BREAUX. The wildlife refuge law was specifically set up by Congress to protect the wilderness that had special significance. But other activities that were compatible were to be allowed. You have to look at each wildlife refuge and determine whether that activity is compatible.

Is farming, grazing, or oil and gas development compatible with the purposes of the refuge? In my State of Louisiana, 12 wildlife refuges—Federal wildlife refuges and State wildlife refuges—have oil and gas production, in a much more fragile environment than is on the Coastal Plain of the Arctic National Wildlife Refuge. In addition, all these other States have had the same activity in their wildlife refuges and it has been determined that it has been compatible.

Do you take special precautions? Absolutely. The point is, it is not a blanket prohibition. What is being asked today is a blanket prohibition, which I think is not justifiable, particularly when we have as strong a wilderness as we do as need as we do.

Mr. MURKOWSKI. I believe the other chart shows all the specific areas and refuges that are identified by State. It looks like Texas, Oklahoma—a number of States that are inside the expertise of that Energy Committee.

Mr. BREAUX. I think also these are national wildlife refuges. There are a number of State wildlife refuges that States have set aside that also have produced on them as well.

Congress set this up, as the Senator well knows—I helped write section 1002 over in the other body—as an area that was going to be looked to for potential exploration. The remaining 19 million acres in the rest of the wildlife refuges in ANWR was going to be set aside for no activity. But Congress specifically made a decision: Look, we are going to reserve section 1002 for potential exploration and production. That is exactly what the Washington Post and the New York Times were commending Congress for at that time.

When President Jimmy Carter signed this bill, they knew that section had been set aside for the purposes of looking at potential oil and gas exploration. Now, all of a sudden, we come back and say: No, we just can’t touch it. I think that is not being fair or balanced.

Mr. MURKOWSKI. I thank my friend from Louisiana.

Mr. PRESIDING OFFICER. The Senator from Idaho is recognized.

Mr. CRAIG. Madam President, let me first and foremost associate myself with the words of the Senator from Louisiana. I think he has made such a very clear and profound case that with the time constraints of today, with what we now know and what we have learned in the wetlands of Louisiana or Texas and on the northern edge of Alaska, without a doubt we can now explore and develop oil reserves with little to no environmental damage to the surrounding areas; that when those oil reserves have been finalized or produced out, we can close out and leave, and Mother Nature begins the healing process in a way that is reasonable, if not short, period of time our presence there has hardly known.

I guess I would be remiss today if I didn’t say I have looked forward to this time in my life for a long while. I had hoped that years ago we could have debated and developed a national energy policy. I am quite confident that the chairman of the committee, who is here on the floor, feels the same way as the ranking member. The Energy Committee, on which I have served for 12 years, has literally held hundreds of hearings and maybe thousands of hours in the taking of testimony as to the character of the national energy supply of our country—where it comes from, how it is used—everything from current supplies of hydrocarbons to electrical production, coal-fired, hydro, nuclear, on the thermal side of the electrical production, and certainly oil production.

We have added, I believe, a phenomenally thorough job of looking at the overall perspective of energy for this country, both under Republican leadership and Democrat leadership. I think it would be fair to say that the majority of the House and Members such as ourselves have developed a level of knowledge and expertise that is really substantial.

I say that in this context: That we are capable and should have been allowed to let that committee work, under the chairmanship of Senator BINGAMAN, to craft an energy bill to bring to the floor. But because of the unique politics of today and the unique politics of the energy debate that was had by the committee chairman of the Senate communicated to the chairman of the Energy Committee, who is now here in the Chamber, that that committee was not to send forth an energy bill.

We can all speculate as to that conversation, but I think it has been relatively open as to what was said. Certainly the Senator from New Mexico was quoted roundly in the newspapers. I will not in any way attempt to interpret what he meant. But I know the Senator well enough to know that prior to October 9, prior to the August recess of last year, after we came back in September, and after September 11, in the conversations I had with the Senator I believed he was sincere and that it was his intent to produce an energy bill.

It has certainly been the intent of the ranking member, the Senator from Alaska, to do so, and to build a comprehensive bill that this Senate could look at, debate, and amend, but most importantly that would be assembled inside the expertise of that Energy Committee with both staff, Democrat and Republicans, and Members working on it, fine-tuning through the amendment process, and ultimately coming to do the floor for another bite of the energy apple, if you will, by other colleagues who are not on that committee.

We now know that didn’t happen. I must tell you I believe it is historic in the fact that it didn’t happen.

I have here in my hand the bill that was not written in committee and that was written through the amendment process—some 539 pages. As I came to the floor this morning to get a copy, I was told that portions of it were still being written or rewritten because somehow they had not quite gotten it right yet, or someone had made a change, or maybe it was believed if they made a little change they might pick up another vote or two in a given title of the bill. I don’t know the reason.

But I do know that on the day when we began a historic debate on national energy policy for this Nation, I had not had a chance to read the bill in detail and it was still being written.

The 539-page bill we have before us S. 517. I am told it will have another 40 or 50 amendments. The Democrat whip is on the floor. If he allows us to debate this for a couple or 3 weeks, we might get it read, understood, and possibly crafted now in the process which is legitimately a committee process. Most of the whole instead of a committee of the authorizing to deal with national energy policy.

Am I angered by that? Well, I would like to be. I guess I am more frustrated that in a representative republic and a democratic form of government in which we craft expertise and talent in the committees of authorization, it is simply and politically wiped away. The stroke of the hand of the majority leader of the Senate says you shall not because you cannot do it the way I want it done politically.

Before the August recess, if we had crafted a bill and worked on it and passed it out of the Energy Committee, it would have had ANWR in it. The votes were there. It would have been a bipartisan energy bill. The House acted before the August recess. They narrowed what we now call the footprint in the Arctic National Wildlife Refuge on which exploration can take place to maybe political and maybe the appropriate exploration for that area. They got their work done. We knew we could. I don’t think anybody would dispute the fact that Democrats and Republicans were working to do so. The majority leader was phenomenally fearful that this political will could not be addressed.

Others on the other side of the aisle I think were quite confident that they would have the political opportunity of a lifetime to filibuster a bill with ANWR in it and to strut their environmental stuff.

But something happened after September 11. A debate that in the minds
of many Americans on national energy policy was somewhat esoteric, a future and generational economic exercise, had all of a sudden been refocused. Our Nation was at war, we had been attacked, and the American people asked: Are we so dedicated upon a very unstable region of the world that the night those sheiks could turn down their valves and up would go energy prices? Oh, my goodness, what would this country do? It was no longer this esoteric and generational economic debate, but a debate over nation energy policy in relation to national security as a policy. Somehow they came together. As the World Trade Center fell, energy policy and national security policy got melded together in the minds of most Americans.

For those who wanted to filibuster over here on the floor, I am quite sure they scurried over to the majority leader’s office and said: Don’t throw us in that political briar patch, because we have a competitor in front of the camera and we will somehow look anti-American if we stand up and deny the right to speak. I understand a new copy is under work to read it as soon as it is available. I believe one way of doing that is to transport electrons from point A to point B. We have that bill on the floor at this moment. I haven’t read it because I haven’t had it. It is still being written. I can’t read it. We will work to read it as soon as it is available. I understand a new copy is under print. This is the first book I have ever known. I can see pages in its second print in popularity and nobody has read it. That is strange. The New York Times Best Sellers List ought to try to that one: You go to second print before the first one is read. That is the reality of what we are faced with. We are here now on the floor of the Senate, I would trust, in good will, to bring forth a national energy policy for this country, if we can, in a way that we can take to a conference between the House and the Senate, and then place that bill on the President’s desk for him to sign and for this country and its economy to mobilize around.

One of first opportunities I had to engage with President George Bush was when he was President-elect George Bush, right after the issue in Florida had been solved. He was here on Capitol Hill to visit with all of us. We met in then-Majority Leader Trent Lott’s office. He talked about his campaign promises: A promise to bring forth a comprehensive energy bill for our country; a promise to reform and cut taxes to stimulate our economy and to affect all segments of it in a positive and beneficial way. He talked about national security and a variety of other issues. But he stopped midway through that conversation. He said: Do you know what is really important for our country right now? It is a national energy policy. The lights have gone out in California right from an unstable region of the world, and gas prices are high. I believe a national energy policy is critical for this country.

That was President George Bush speaking, and I paraphrase.
He said: I am going to assign the Vice President that responsibility. We will assemble a governmental task force, and we will craft a policy and get it to the Hill as quickly as we can, and see if we can’t work with you here in the Senate and in the House to develop an overall comprehensive policy.

It was one of this President’s priorities, and he acted accordingly. It should have been a priority in the Senate and House. But here, months later than it should be, after the authorizing committee had been turned away and its lights turned out, we are now debating a bill that was a priority for the President, an issue of national priority, and a bill that many of us have not yet read or understand all of the nuances or policy proclamations within it. That is the reality of what we are dealing with.

I hope that as we debate this issue, and as we amend it over the course of the next several weeks, we will deal with nuclear energy exploration and development on public lands across this country, and that we open up Federal lands to do that and put more of our own gas into the pipeline as we talk about bringing gas down from Alaska where it is currently being turned under, so that as we move toward other forms of electrical generation with gas turbines and that standards of our country, we will have an abundance of natural gas to do that at reasonable prices.

I hope this legislation will have that. If it does not, there will be amendments to assure that the pipeline infrastructure that is necessary to deliver that resource to the Nation will be there, be available, or the incentives to do so will be allowed.

I hope that when we deal with infrastructure issues, we are able to talk about transmission and distribution processes, RTOs and regional ways of transportating electrons from point A to point B, from New Mexico to Idaho, if that is the wish of the generator and the user. As the chairman knows, and as the ranking member knows, some months ago we had a transmission expert before us. I think his words were something like this: The electrical transmission lines of this country today are like a bunch of country roads that every county rents.

That was part of the problem in California when we, from Idaho, were helping supply California to keep its lights on. You just simply could not get energy there, or if you got it to California, then it plugged up along the way as it headed from north to south or south to north. So pipelines, transmission lines, infrastructure become an important part of all of that.

For a good number of years I have worked on the issue of hydro relicensing. In the Pacific Northwest, we are very fortunate to have a dominant amount of our electrical generation by hydroelectric, or hydroelectric. We know much of that has to be relicensed over the next several decades, and that licensing process is broken or cumbersome or unpredictable and very costly.

While we are trying to incorporate all of the concerns and issues of many different groups in retrofitting and modernizing 40- and 50-year-old structures, because the world around them and the wishes of that world have changed, it may take not 5 to 10 years and millions and millions of dollars and a reduction of capacity or productivity of that unit to get it relicensed.

We want to answer and adjust to the environmental concerns. At the same time, it ought to be our desire to make that unit more efficient, not less so, with new turbines and retrofits. Yet we struggle under that relicensing.

I have worked very closely with the chairman. We are awfully close to getting something, but I am not going to add more problems to the current problem. If we cannot get there, and the answer is to make it more difficult or more complicated, I am simply going to step back and say what we have got is what we are going to have to have.

If the country wants to keep on down this track of relicensing under phe-nomenally expensive and cumbersome processes, tragically enough, so be it. I hope, though, we can find a way out of this, to streamline it, improve it, make it more predictable, balanced, and hopefully, less costly.

Nuclear energy is 20 percent of our current electrical production in this country. If we believe in climate change, if we believe there is an environmental problem out there and somehow the gases that are produced by the energy sources today are helping complicate or exacerbate that problem of climate change, then we ought to be for the cleanest source of energy possible to fill up that energy hole that is now in deficit and growing more empty.

I believe one way of doing that is through nuclear energy and creating new prototype reactors that by public perception and reality are safer, more productive, less costly to build, and less costly to operate. We ought to be about doing that. I think we are going to reauthorize the Price-Anderson Act that deals with the liability of the development and the operation of those nuclear facilities. That is something we ought to do.

We ought to be encouraging all forms because my guess is a pretty safe one:
That if we want an increasingly cleaner environment, probably over the next decade or two nuclear energy, as a percent age of the total supply, should not be 20 percent, it ought to be 25 or 30 percent. It must assuredly ought not drop below where it is. It ought to advance well beyond where it is.

I think most realistic thinkers would recognize the importance of energy as it relates to nuclear and the cleanliness of that form of generation. We ought to apply the greatest technology we have to the task.

I mentioned, in the context of nuclear energy, climate change. Senator HAGEL and I have worked for the last 4 or 5 years on that. So has the Senator from New Mexico. So has the Senator from Alaska. Many have become involved in that debate. The two Senators from Oklahoma have been involved in it. Why? Because we do not want a hysterical policy that shuts the world down in panic. We want a policy that allows us to get on with the business of producing and prosper while making our world cleaner.

The legislation the Senator from Nebraska and I have crafted, that now in part has been accepted by the President and is focused on national climate change policy, ought to be incorporated in this bill, ought to be a full part of it. We are working to get there. Frankly, it is possible to get there.

In conclusion, I began to debate energy issues well over a decade ago. I have been involved on energy issues in the Senate for 12 years. I am embarrassed to say that during that period of time we have not built a comprehensive energy policy. I used to select different forms of energy and suggest that this one ought not go forward, but maybe this one should. I must say, I am no longer there, not at all. I believe we ought to be investing in all forms of energy and all forms of conservation.

We ought to give the public a choice between green power or other power. Let them decide in the marketplace if they want a hysterical policy that shuts the world down, not the political, environmental nit-picking that is going on at this moment.

I hope the real job that is done here is to offer the amendments to craft a bill that will produce something that is phenomenally clean, abundant and allows our technology to lead the rest of the world into a clean energy environment that is abundant for all and inexpensive for everyone along with it.

I yield the floor.

The PRESIDING OFFICER (Mr. CORZINE). The Senator from Nevada.

Mr. REID. Mr. President, I did not mean in any way to speed the Senator from Nevada in his statement. I wanted to announce on behalf of the majority leader there will be no votes tonight.

I also ask unanimous consent that Senator DURBAN now be recognized and, following that, Senator BURNS be recognized.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Illinois.

Mr. DURBAN. Mr. President, I thank the majority leader for his unanimous consent request. I appreciate the opportunity to be here to speak on this issue which is so critical to the future of America.

Let me begin by commending the Senator from New Mexico, Mr. BINGMAN, as well as our majority leader, Senator DASCHLE, for bringing this bill to the floor and keeping a promise that they would. We have been challenged for more than a year by the Bush administration and by Republicans in the Congress to bring an energy bill forward. Senator DASCHLE made it clear he would do that. But for a delay in the previous bill on election reform, it might have taken place as early as last week. He certainly kept his word.

I thought it was interesting that some of those from the other side of the aisle came to the Chamber and actually criticized the process. If I understand their argument, they think we brought it to the floor too fast. They think it should have gone through committee, should have been subject to a lot of amendments and changes. Quite honestly, if you look at the precedent of what has happened in the Senate, Senators DASCHLE and BINGMAN have brought this bill to the Senate in the same manner the Republican leadership did 2 years ago.

They have given ample opportunity for amendments and debate. That is the way it should be. I have always felt that in a legislative body, you give it your best argument and present it to your colleagues and have a vote and move on, ultimately to final passage, I hope that is what happens with this important bill.

This is the fourth time we have debated energy policy in America since 1973. The last time was 10 years ago. When you look at what has happened to us in recent times, you can understand how timely this debate is. We faced spikes in oil prices in the spring of 1999 due to an OPEC decision to reduce production; the winter of 1999-2000 home heating problems caused by a combination of unexpected weather, depleted supply, and rising costs; gasoline price spikes in the Midwest in the summer of 2000; rolling blackouts in California in early 2001 marked the first deliberate energy cutoff since World War II.

These events were set against the backdrop of strong economic growth in the mid to late 1990s; increases in energy consumption to keep this economy moving forward; deregulation; advances in efficiency; and evolving demand for foreign petroleum.

As we debate this issue, our attention is focused to that part of the world again that is the source of a great portion of our energy. We have to understand that this debate is taking place in the context of an American dependence on foreign oil. I believe it is naive to think that in the near term we will be completely independent when it comes to energy sources. I wish I could say otherwise. Even with our best efforts, we are going to have to rely on some imported fuel.

I hope we can make progress in this bill in moving us forward toward less dependence on foreign energy sources. The way we approach that is the crux of this debate.

On the other side, the Bush administration and many Republicans—not all but many—in Congress believe that production is the way to answer this. They think if we can just find sources of production that are adequate, we can solve the care of America's future energy needs. I won't quarrel with the math, but I will quarrel with the policy.
I do have to question whether or not we want to embark on a policy that really focuses on the production of energy as the foundation and cornerstone of our energy policy. That, in my point of view, is thinking that dates back to the last century and before. We should be thinking about new and different ways to not only create energy but to conserve energy in a fashion that is not only going to give us energy, move us toward energy independence, but is also kind to our environment.

This bill half of this equation. It is not just about our economy and energy as the fuel for the economy, but the impact of our use of energy on the environment we live in, the air we breathe, the streams and rivers that may be polluted, as well as the whole question of whether or not we are going to for once invade some wilderness areas to try to drill for oil and gas.

Let me summarize what the bill says, as has been mentioned in the course of the debate. It tries to address ensuring adequate and affordable supplies of energy from renewable sources as well as oil, gas, coal, and nuclear. This element of the bill is important to speak about.

This bill creates goals and incentives to increase the amount of U.S. electricity produced from renewable energy sources. This is an area of great potential in the United States. We are seeing, for example, alternative and renewable fuels being used to a greater extent in some parts of our country than others. California is an example. I am told that 12 to 13 percent of the electricity generated in California comes from renewable sources. Those include a lot of things—geothermal, wind power, and others. We should really embark, as part of this bill, on a national policy of encouraging these renewable sources. They are often dependent on foreign energy source, but they are also kind to the environment. Solar, wind, geothermal, and biomass are all mentioned in the bill as avenues for us to explore in the use of renewable energy sources. We also need a renewable portfolio standard to increase the amount of renewable energy provided by electricity retailers.

Let me show you a chart that talks about renewable sources for electricity consumption. Do nothing will set us back. The lower line here represents the current renewable sources in America as a per average total. You see it is slightly more than 2.5 percent. This bill moves us forward. By 2020, we are at least over 10 percent. We will debate, in the course of this bill, an amendment by Senator Jeffords which would even have us at a higher level as a commitment to renewable energy sources. This makes sense, it is an important debate, and it will change our way of approaching energy. It can change it in an environmentally sensible way.

We also need to expand the amount of ethanol and biodiesel used in motor vehicles. This bill does it. It triples the amount that is going to be used in America during the life of the bill. That is a big issue where I live because, living in the farm belt and being in an area that is considered, I guess, the ‘OPEC of ethanol’, we really have room for expansion. But the challenge production. But the good news is there are other areas in the country that are currently opening up ethanol production facilities. Ethanol, of course is an alcohol fuel derived from grains primarily from corn. It is a fuel that is kind to the environment. It reduces pollution and helps our farmers. I do have some bias, representing a farm State such as Illinois, but more demand for ethanol is going to create higher farm prices for corn and reduce the need for Federal expenditures in the farm program. It is a winning proposition.

I am really proud that this bill focuses on ethanol and biodiesel and makes a serious national commitment to ethanol energy supplies. We will quadruple the amount of ethanol produced by 2012. We expedite the construction of the pipeline to bring natural gas from Alaska to the lower 48. This doesn’t involve the Arctic National Wildlife Refuge (ANWR), it is a pipeline already in existence. It is environmentally acceptable, environmentally acceptable, and it doesn’t go into the wilderness areas. We increase funds to speed up the permitting of new domestic oil and gas production. I have heard executives from oil companies tell me: You don’t need to go to ANWR; there are plenty of places that are environmentally sound in the United States to turn to. ANWR is in this debate because a lot of companies have invested a lot of money in ANWR. They are being protected by some in this Chamber who want to make sure they capitalize on that investment. We ought to think twice about that, and I will address that in a moment.

The bill extends permanent authority to fill and operate the Strategic Petroleum Reserve. This is a reserve of petroleum that is available in emergency circumstances to the United States. I think it is important to fill it and have it on hand when needed. You never know when you are going to face an interruption in supply. The bill also invests in Research and Development in all fuels. That is when we exhaust the discussion of ensuring the diversity of energy supplies.

We move on to the question of improving efficiency and productivity of energy transmission and use. I learned, by my experience in my home area, in central Illinois, how important the national grid is to electricity. There is a lot that needs to be done to upgrade this grid and make certain it is really national in scope, so consumers can know they have reliable sources for energy supplies.

This bill is legislation on the Democratic side—protects reliability of the interstate electric grid and removes barriers to adding to the electric infrastructure. It will provide consumers with more transparent information and better information on energy choices. It requires higher fuel efficiency in future Federal purchases of automobiles and other vehicles and greater energy efficiency in Federal buildings. It helps State and local governments grow the economy and public housing. It sets new efficiency standards for commercial and consumer products, including an increase in central air-conditioning efficiency by 30 percent, and enhances the Energy Star Program. I think, to improve product label information. It increases funding for the Low-Income Home Energy Assistance Program (LIHEAP) to help low-income families make their homes more energy efficient.

I have seen the importance of this program firsthand. I just left Chicago, which I am proud to represent in the Senate, where the weather was cold—zero degrees on Sunday night, with the windchill bringing it down below zero by about 22 degrees. I thought of all the people who are living in homes that are not adequately heated. I have visited some of those homes and have seen people struggling to keep their babies warm in a frigid atmosphere. LIHEAP provides the basic necessities of home heating and cooling. It also helps low-income families make homes more energy efficient, and it is particularly important for senior citizens.

Other things are part of this bill, but I want to move to one particular element that I think is very important for us to discuss, and that is the Corporate Average Fuel Economy (CAFE) standard. I was visited earlier today by one of my close friends in the labor movement, who came to me and urged that I oppose any increase in the fuel efficiency standards, fuel economy standards for automobiles and other vehicles in America. I really struggled in trying to understand his point of view, but to produce the continued argument I think is an important element in this debate, the way I see it is this. In 1975, we made a decision in America to basically double the fuel efficiency of cars to 27.5 miles per gallon, and to do that by 1985—a 10-year project.

At the time it was proposed—and I have seen quotes from the debate—automobile manufacturers said it was physically impossible, it could not be achieved without laying off auto workers across America, and that technologically we were going to sacrifice the safety of cars in an effort to try to put this new fuel economy standard in place.

Well, we did it. We did it by 1985, and we are better off for it. Think of the level of our dependence on energy today had we not initiated that discussion in 1975.

But since 1985, we have been absolutely stuck in the mud when it comes to improving these standards. If we don’t take the issue of fuel efficiency seriously as part of this energy debate, Congress should not be
March 5, 2002

CONGRESSIONAL RECORD — SENATE

I will be happy to yield to my colleague from Alaska.

Mr. MURKOWSKI. Mr. President, I noted the reference by the Senator from Illinois several times to the issue of wilderness. I wonder if he under- stands the difference between the area under consideration in the amendment that will be offered by various Members relative to opening up ANWR.

Mr. DURBIN. I certainly have heard many descriptions. I will let my colleague from Alaska explain it.

Mr. MURKOWSKI. Let me refer to the statements that have been made by the Senator from Illinois relative to this being a wilderness, to this being a refuge. Clearly, there are distinctions. I would stand with the Senator from Illinois if there were any effort to open oil and gas exploration in wilderness areas of my State.

The Senator from Illinois indicated there were proposals to even go into the wilderness in Alaska. I know of no such proposals to open or go into areas in wilderness.

I encourage my friend from Illinois to not mix metaphors because wilderness is wilderness. We do not drill in wilderness areas. We are not proposing we drill in wilderness areas. The 1002 area is not a wilderness. It was set aside by Congress for specific action.

I am sure my friend from Illinois knows that ANWR is about the size of the State of South Carolina. I am sure he knows there are 8.5 million acres of the 19 million acres that are designated as wilderness, but that is not in the area that is proposed to be opened for competitive leasing. That is 1.5 million acres, not the 1002 area.

I am sure my friend is also aware that out of the 19 million acres, 9 million acres have been set aside in a separate refuge that is managed as a wilderness which is not included.

It is important that we recognize realities and not mix metaphors because the Arctic Coastal Plain is certainly not the last remaining wilderness in Alaska.

We have 56 million acres designated wilderness that we defend. So please be careful when you mix these metaphors because if you had been up there to look at it, you would have a different appreciation.

Mr. DURBIN. I would like to reclaim my time.

The PRESIDING OFFICER. The Senator from Illinois has the floor.

Mr. DURBIN. I think I have been generous in allowing the Senator to interrupt this presentation.

Mr. MURKOWSKI. This is not interrupting; I am responding and asking a question about metaphors. I think we should be very careful not to mislead the public.

In this time when we are waging war and Americans are being killed overseas because of terrorism, when we are focusing on the Middle East and its instability, is it too much to ask the people of this country to join us in a collective discussion and debate about what we can do as individuals, businesses, and families to come up with more efficient vehicles? I do not think it is.

Americans are prepared to sacrifice with the right leadership if they believe the goals are right and honest. I believe these goals are. More fuel efficiency for our vehicles means less dependence on foreign energy sources and less pollution.

Let me give a comparison about what conservation means as opposed to some of the alternatives that have been suggested. This is a chart which I think tells an interesting story. Take a look at what this bill does in terms of saving millions of barrels per day of petroleum. In the industrial and home efficiency savings of this bill, look at the savings from the current debate time, 2002. The year 2002 there is a substantial increase in the industrial and home efficiency savings area that brings us ultimately to a savings of millions of barrels per day. The largest part is in vehicle savings.

In other words, taking the basic elements of this bill, these are the millions of barrels we will save per day with the fuel efficiency of the Bingaman-Daschle bill. There are those who say we do not need to do that; what we really need to do is drill in the Arctic National Wildlife Refuge, a wilderness area.

Mr. MURKOWSKI. Mr. President, I wonder if my friend will yield for a question.

Mr. DURBIN. I will be happy to yield for a question in a moment.

This chart indicates what we can hope to bring out of the Arctic National Wildlife Refuge. The chart may be being too low to see because it is down on the chart. I want to make sure that those who are following this debate with rapt attention notice that on the amount we hope to glean from the Arctic National Wildlife Refuge, even if we voted today to start it, we will not see the first barrel of oil coming out of there until 2009. Look at how little comes out. This larger amount is what we can achieve with efficiency. What we simply are debating in a wilderness and refuge area. We should make this commitment part of our energy policy. Why do we have to turn to an area which we declared, part of our national policy, would remain wilderness as God created it, bring in the trucks and all of the pipelines and everything that is necessary, and risk the loss of wildlife and changing the face of that area forever, when, in fact, if we take a responsible course on vehicle fuel efficiency, as well as industrial and home efficiency, the savings far outweigh what we could possibly glean from this Arctic National Wildlife Refuge?

I have to tell you that it is some source of embarrassment to me that, time and again, we are two steps behind automobile manufacturers overseas—particularly those in Japan—when it comes to new technology for automobiles, and other vehicles, to make them cleaner and safer. There is absolutely no excuse. We have the greatest engineers in the world. We have great minds in Detroit and other places. Why are we always two steps behind? Why would Honda and Toyota be the first companies to the market with these hybrid automobiles that offer 60 to 70 miles per gallon, while Detroit is still in a concept car and they hope for, next year and the year after, might be able to offer the first vehicle?

During the Clinton administration, President Clinton and Vice President Gore said: We are prepared to basically look the other way on antitrust enforcement by the automobile manufacturers a chance to sit down, work together, and come out with a fuel-efficient car. This was the common complaint: Oh, we could do it, but as soon as we talked to one another, the Department of Justice would be on our backs. The Clinton-Gore administration said: Have no fear. Move forward.

Nothing happened. We sit here today still looking for that breakthrough in automobile technology. Quite honestly, this bill is going to move us forward in terms of fuel economy. I am going to support it. I hope to explain to my friends in labor as well as those working for the Big Three that if we don’t include industrial and home efficiency in this bill, this bill is not worth the effort. If we don’t do this, we are going to find ourselves continuing to be dependent on finding new sources of fossil fuels around the world and in the United States.

We are conceding the fact we are going to be so hungry for oil to fuel these gas guzzler cars on the highways that we are prepared to drill almost anywhere. Already some are saying: Let’s go into wilderness areas in Alaska; we have no place else to turn. What is next? The Mall? Central Park? Yosemite?

Frankly, we have to look at our responsibilities in this country as part of our national policy, would remain wilderness as God created it, bring in the trucks and all of the pipelines and everything that is necessary, and risk the loss of wildlife and changing the face of that area forever, when, in fact, if we take a responsible course on vehicle fuel efficiency, as well as industrial and home efficiency, the savings far outweigh what we could possibly glean from this Arctic National Wildlife Refuge?

We are conceding the fact we are two steps behind automobile manufacturers overseas—particularly those in Japan—when it comes to new technology for automobiles, and other vehicles, to make them cleaner and safer. There is absolutely no excuse. We have the greatest engineers in the world. We have great minds in Detroit and other places. Why would Honda and Toyota be the first companies to the market with these hybrid automobiles that offer 60 to 70 miles per gallon, while Detroit is still in a concept car and they hope for, next year and the year after, might be able to offer the first vehicle?
Mr. DURBIN. It is very gracious of the Senator from Alaska to help me with my metaphors. I thank the Senator from Alaska. I stand corrected. The use of the word “wilderness” is inappropriate. It is the Arctic National Wildlife Refuge.

I do believe it is somewhat specious to argue it is only the size of South Carolina. Three Mile Island was only the size of this Capitol Building, and when you look at some of the oil spills I have seen, when I went up to see Prince Edward Sound, the size of that tanker may not have been much longer than half the size of this building, but what it did when it ruptured caused damage far beyond the size of the tanker.

When the Senator says it is just the size of South Carolina, I think, frankly, that understates the potential damage which could be done to the environment and to the wildlife if we are not careful.

Plus, I have to tell my colleagues, I believe it is shortsighted and it is not the wisest and most prudent approach to say that if we are going to have any kind of energy independence, then we have to drill in a national wildlife refuge like this.

There are so many other activities we can do by way of conservation, efficiency, and drilling for oil and gas in environmentally sound areas that would absolve us from getting into the controversy of going into this wildlife refuge. I think, frankly, that is a wrongheaded approach. I disagree with the Senator from Alaska. I was happy to yield him the time, and he made his point.

In concluding this presentation, let me say the following: I hope when we get into this debate about fuel economy and fuel efficiency standards that we can find a way to deal with some of the more vexing aspects of the problem. Part of this has to do with credits we created years ago rewarding some automobile manufacturers for the types of vehicles they made and not rewarding others.

The building up of these credits has created a secondary, but very important, argument which should be addressed as part of this energy policy debate.

What I think we should require of all manufacturers that want to sell in the United States and foreign cars that is that they demonstrate a real commitment to improved fuel efficiency of their vehicles.

Recently, one of the engineers in the city of Chicago at the Illinois Institute of Technology wrote an article for the Chicago Tribune in which he had a few thoughts about the whole discussion of hydrogen-fuel-cell-powered vehicles. It is an interesting concept, he said, but at least 10 years away, maybe longer; we should continue to explore, but, frankly, we should be focused on the Holy Grail; and that just because of the possibility of hydrogen-fueled cars, we really should not avoid addressing fuel efficiency and economy in today’s automobiles.

He said at the end of the article: I hope the Senators from Illinois read this article and give me a call.

So I did. I said to the Professor: What is it you would like me to do?

He said: There are things that can and should be done now to improve the fuel efficiency of vehicles. Why Detroit and other manufacturers are holding back on it, I do not understand.

He gave us one illustration. A larger battery in a vehicle allows one to turn to more electronic equipment in that vehicle as opposed to mechanical and hydraulic, which takes weight off the vehicle but still performs the valuable function. That seems sensible to me.

He says a heavier battery where there is electronic-powered brakes, for example, could save 2 miles per gallon, and you think, well, that is a pretty sensible thing to do.

He also said going to newer materials that are safe materials that can be used in vehicles that do not add to weight but still provide protection, all of these things have to be on the table. They will not be taken seriously by Detroit unless and until we are serious about fuel standards. We will have to continue to play the role of second best in this automobile technology race unless and until Congress has the willingness and the political courage to step up and say to Detroit and all automobile and truck manufacturers across America: We have to do better.

When I asked one of the critics of this bill today what do they think we can achieve, what is realistic when it comes to fuel economy, he said: I think we can achieve a 10-percent improvement in fuel economy by the year 2019.

I said: So we could go from 27.5 miles per gallon to perhaps 31 miles per gallon by the year 2019? Yes, he said.

So I ask: From 1985 to 1995 the best we could achieve was 3 miles per gallon. I do not buy that. I do not believe that. I really believe we proved between 1975 and 1985 that given the right incentives, we can do a lot better than that, and I sincerely hope those who are involved in this debate will not view it as a political and legal struggle but as a technological challenge, because once challenged, I think our scientists and engineers can rise to that occasion.

So I commend my colleague from New Mexico, Senator BINGAMAN, for his leadership on this bill, as well as the majority leader, Senator DASCHLE, for joining him in this effort. I look forward to this debate because I believe it is timely. And I am hoping that as a result of it we will have a reliable, stable supply of energy; we will have conservation policies that make sense for our future; we will move toward renewable energy; we will have such great potential; we will find ourselves using alternative fuels that, frankly, have been valuable to us and can be used even more. That is part of a balanced debate that does not have us drilling in wildlife refuges—not wilderness, as Senator MUKROWSKI has corrected me—and areas that, frankly, should be the last place, not the first place, we turn to when we are desperate for energy, especially when we have so many other options we can consider in terms of energy efficiency.

I yield the floor.

Mr. BINGAMAN. Mr. President, I know the next order of business is to hear from the Senator from Montana, Mr. BURNS. I do not know if he is available to give his statement at this point. I think possibly we should go into a quorum call and try to locate him.

I suggest the absence of a quorum.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUKROWSKI. Mr. President, I am not going to speak long, but I want to say a point to my colleagues, and particularly their staffs, that there are certain aspects of this legislation that are very technical and certain aspects reflect on the knowledge that obviously we have in our own States, and I do not want to delay this legislation.

I want my colleagues on notice we are going to follow the statements very closely and we will respond in rebuttal to obvious inaccuracies relative to statements that are being made, and that is in the spirit of simply accuracy and factual information that I think is necessary to portray and project indeed the importance of having factual information before the Members of this body as we deliberate the bill.

I see the Senator from Montana. If there is no objection from my friend from New Mexico, I yield to the Senator from Montana.

Mr. BINGAMAN. Mr. President, I thank my good friend from Alaska, and I thank the chairman of the Energy and Natural Resources Committee for the time.

Mr. BURNS. Mr. President, I thank you for your good friend from Alaska, and I thank the chairman of the Energy and Natural Resources Committee for the previous order.

Mr. BINGAMAN. Thank you. I yield the floor.
decisions about what is really important in our lives. As I have traveled across this country and in my home State of Montana, I keep hearing the same thing over again. Everybody in America wants to protect their family, they want to provide a safe and secure living, and they want to protect their loved ones from harm.

There is one thing that is undisputable. I represent an energy State. We have been in the production of energy for a long time in Montana, so we know a little something about it. There is also something else that is undisputable and that is that a comprehensive energy policy is absolutely paramount to American freedom. Let me put it this way: Energy security is economic security is national security.

If that magic word that goes across our television screen and across our mind is “security,” we cannot separate those three. Energy security is economic security is national security, so that when we make here what impact will the Senate will affect and direct the lives of every single American, without exception. The policy we set here on the Senate floor should ensure that energy is affordable, and that it is abundant. Affordable energy means businesses stay open and businesses prosper and people keep working. It means senior citizens who are on fixed incomes are able to pay their electricity bill at the end of the month without having to give over their last dime. It means someone can fill up their car with gas and drive their kids to school; fill up a truck and deliver goods across the country without breaking the bank; and, yes, to my State, crank up the combines, harvest a crop and put another one in, without fearing the repercussions of high fuel prices.

Every one of us will be affected no matter how basic the level. So we have to answer a lot of questions. How do we get affordable, dependable and affordable energy? That will be the focus of this debate, and the policy that carries us not through my generation but also the next generation and the next. And that is about the time we will have another policy change because technology and circumstances will change.

We have heard some of my colleagues claim Americans use too much energy, that we are greedy, that we use more than our fair share of the world’s supply of energy. Would those same people stand up and argue that the United States produces more than its fair share of goods and services? Would they say we have an oversupply of American ingenuity?

Are we producing more computers, more cars, more agricultural goods than we should? I don’t think so. I don’t think the hard-working people who produce those goods think so either. We can do that because we are good at it and because we have used our own best conservation technology known until this date.

Let’s go one step beyond the economic security that affordable energy provides. Think about the security it provides this country when we improve our ability to produce different kinds of energy domestically. For example, this country buys 56 percent of its oil from other countries. Think back to the 1970s when we had the lines at the gas stations and 35 or 36 percent from foreign countries. I don’t like that kind of vulnerability. Much of that oil is produced from countries or producers that have very honest intentions, but, I will remind Americans we do not own all of it.

Every drop of oil we produce domestically is one that we do not buy from Saddam Hussein. Every barrel bought from a rogue nation could mean a bomb built to hurt this country. I think it is about time we turn off the spigot of terrorist oil.

In this debate we will start talking about the Alaska National Wildlife Refuge. While at times the point may be confused, like in the colloquy that just preceded me — the Alaska National Wildlife Refuge created by law and that law gave express permission or grant to drill within parts of it. I can think of no other public land that was created with that express intention and law.

I agree with open debate and I am glad to participate in this process, but I wonder why we only get to do it when we want to open Federal land, and not when we shut it off. Why is it that a midlevel manager in the Forest Service can make the decision to close 350,000 acres from gas and oil development in Montana in two different decisions. There was no congressional discussion either time.

I say to my good friend from Oklahoma, whose State is an energy producer like my state of Montana, that since 1997, in my State alone, the Federal Government and the executive branch have managed to shut off 727,000 acres from gas and oil development in Montana in two different decisions. There was no congressional discussion either time.

I agree with open debate and I am glad to participate in this process, but I wonder why we only get to do it when we want to open Federal land, and not when we shut it off. Why is it that a midlevel manager in the Forest Service can make the decision to close 350,000 acres, and we don’t hear a whimper or whisper on the Senate Floor.

Because of a decision made in a federal bureaucracy or through executive order, it has been decided we are going to take that land out of production. That denies my State the ability to produce the energy the country that really needs it, and the jobs it provides and the revenue it provides to my State to build schools, build roads, provide government services.

Of course, the debate will extend beyond domestic oil and gas production, and it should. We are developing excellent technology. We are tapping resources to create energy from new sources. I heard mention today about renewables. They want to use thermal activity.

We live next to an area that has more thermal activity than any place in our country: Yellowstone Park. There is thermal potential all the way around it. You just try to develop it. It cannot be done because you have to cross federal land to get there, which makes absolutely no sense.

We will talk about fuel cells. We will talk about biomass. We will talk about ethanol. We will talk about wind. Those are only a few of the opportunities we have to use our resources in new ways.

I am proud to support alternative and renewable energy, and will continue to do so. But we can’t shortchange our energy needs today by focusing our efforts on alternative energy alone. Many of the technologies are promising but are still in the developmental and very expensive stages in comparison to our traditional energy sources. By continuing to develop and encourage alternative fuels and create markets for those technologies, we can approach this country’s energy future with optimism.

It is time we go to work. It is time we debate those issues one by one. But keep in mind what I said at the beginning of this speech. I do not know of a military airplane that hasn’t burn oil-based fuel. And if something really bad happens in this country, I tell you something: The fire truck that shows up and the emergency vehicle will burn gasoline. In order to fight this great battle against terrorism and against people who would erode our freedoms, who work in the shadows, and who are a faceless enemy, the weapons we need still burn gasoline.

I have to think about the American people and their safety and their security. What we are asking in this is a policy that will develop those new technologies. But we cannot turn our backs on the demand for the energy sources we have used for so long in this country. Let us work to give the American people what they need—a safe, steady energy supply that will ensure economic stability and national security.

I thank the Chair. I yield the floor.

UNANIMOUS CONSENT REQUEST

Mr. DASCHLE. Mr. President, I wonder if the Senator would yield very briefly so we might propound a quick unanimous consent request.

Mr. MC_CONNELL. Reserving the balance of my time, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DASCHLE. Mr. President, I ask unanimous consent the majority leader, following consultation with the Republican leader, may at any time turn to the consideration of H.R. 2356, the campaign finance reform legislation; that there be 4 hours of debate equally divided and controlled between the two leaders or their designees; that no amendments or motions be in order to the bill; that upon the use or yielding back of time the bill be read the third time, the Senate vote on passage of the bill, this action occurring with no further intervening action or debate.

Mr. MC_CONNELL. Reserving the right to object, and I will object, let me
say to the distinguished majority leader and to all Members of the Senate, since he last propounded this consent agreement, the senior Senator from Arizona and I have had an opportunity to sit down three times in private discussion on some technical changes on the bill that I thought would improve violence to the underlying concept. We have reached agreement in principle on 6 of the 13 suggestions I made.

Today, he and I both had an opportunity to brief our colleagues in the Republican conference on the 13 suggestions, and I think they have been distributed. I would like for the majority leader and the Democrats to look at them as well. I am hoping we can continue to discuss the changes in the next few days.

I remind our colleagues that this bill, which certainly will become law somehow, doesn’t take effect until November 6. So I think to take a little more time to look at it very carefully and do what these suggestions that will benefit both sides is a good idea. I encourage all Senators to take a look at the suggestions I have made. I believe virtually all of them are reasonable. I know Senator McCARTY believes that most of them are reasonable. Therefore, I object.

The PRESIDING OFFICER. The objection is heard.

Mr. MCCAIN. Will the Senator yield?

Mr. DASCHLE. Mr. President, I am happy to yield.

Mr. MCCONNELL. I thank the majority leader for propounding this unanimous consent agreement, and I thank my colleague from Kentucky for entering into good-faith discussions on this issue. We have had important discussions, and I think they have been something that Senator McCONNELL deserves to have had, given the long involvement we have had in this issue.

I must tell my colleagues, we are at an impasse. We are at a situation where we need to move the process forward because the seven areas of “disagreement” that we have are substantive in nature, could never be viewed by me and Senator FEINGOLD, with whom I have consulted constantly during this issue, my partner—could not be construed as anything but substantive amendments.

That is why I requested that the Senator from Kentucky bring up these 7 amendments, we vote them up or down, 51 votes needed, and I agree to move to final passage on the bill.

I cannot continue to discuss the amendments on the bill when we cannot agree to process on the bill. My position—and it remains my position, as propounded by the majority leader—is that we could not get to the bill with the amendments the Senator from Kentucky or others may have been voted up or down, with an agreement on those amendments, with final passage.

As to the technical amendments, many of which I am still up for discussion and would have to also be agreed to by my colleagues on the other side of the Capitol, those we would agree to by unanimous consent agreement, as far as the Senate is concerned, and if we, the majority leader, the Republican Congresswoman, Senator McCONNELL, Senator DODD, Senator McCARTY, and Senator FEINGOLD are in agreement, we would take any amendments technical amendments to the bill. I think that is a fair disposition of this legislation.

As Senator McCONNELL is going to distribute his proposals, I will also distribute our responses. To any objective observer, a majority of those are not technical amendments. They are controversial. They need to be debated and voted on within a reasonable length of time.

Finally, I appreciate the patience of the majority leader. He is committed to the energy bill. I understand that commitment. But I also appreciate the fact that the major leader wants this issue dispensed with. It was March a year ago that we passed this legislation. It went over to the other body with assurance of a fair rule. It was an unfair rule. They had to get 218 votes. They passed this legislation with 10 amendments. We had 3 weeks of debate—3 weeks with amendment after amendment.

This issue has been ventilated. It is time to move forward. I say with great respect and appreciation for this honorable opponent, it is time we move forward. If we have to, the majority leader needs to go through the cloture motion process. I regret that, but we cannot discuss further technical amendments that are not technical amendments unless there is an agreement on the process, and that process has to be considered of amendments and agreement of final passage, or anticipation of a filibuster, to which one of our colleagues has already committed, no matter what.

One of our colleagues is already committed to filibuster, I say to my colleagues. One of the discussions that Senator McCONNELL and I may have. It is time we plan for that and move forward with cloture motions. If the Senate decides not to get 60 votes, then we will wait until the next scandal. We will wait until the next scandal. I say to the Senator from Kentucky. I don’t know if it is Buddhist Temple fundraising, I don’t know if it is Enron, I don’t know who it is, but this system awash in money creates scandals because it makes good people do bad things. It is time we fixed it.

Mr. DASCHLE. Mr. President. I am happy to briefly yield to the Senator from Wisconsin.

The PRESIDING OFFICER (Mr. DATORI). The Senator from Wisconsin.

Mr. FEINGOLD. Mr. President, I have been quiet the last few days about this because I have a lot of respect for the Senator from Kentucky, and I admire the patience of my partner, Senator McConnell. I go through these proposals with the Senator from Kentucky. But I have to say, in my mind, the time has run out.

The proposals the Senator from Kentucky is talking about, as he indicated, in some cases are technical. In those instances, we can simply deal with these matters in a separate piece of legislation. But the Senator from Arizona is right. The other matters are substantive, they are controversial. But I add, they do not go to the core issues of the McCain-Feingold bill.

A broad consensus in both Houses, a bipartisan consensus, has voted strongly to have those items happen now. And again, the fact that one of the Members on the other side of the aisle has indicated—not the Senator from Kentucky, but another Member—that there will be a filibuster, in any way, this time has come not to be quiet anymore but to support the majority leader, who has come out here diligently and tried to move us forward. Consistent with the other commitments he has made, consistent with the process that has been here and tried again today to get us to the final process.

It is regrettable, but I think we have to go now to the final stage: to represent the will of this body, the will of the Senate, and to finally clean up this system. I don’t think any more delay is merited.

Mr. DASCHLE. Mr. President, I have said publicly, and I will say for purposes of the Record, it is my intention to back up from the final day of this particular work period for whatever length of time may be required to go through the procedural hurdles to accomplish our goal of completing our work on this bill before we go into the Easter recess. So we will do that. I just put my colleagues on notice.

I also simply note that had we been able to get unanimous consent, I would also have asked unanimous consent on behalf of Senator Hollings that the constitutional amendment regarding campaign finance reform also be considered. But since that agreement could not be reached, I did not propound the other request.

I am happy to yield to the Senator from Kentucky.

Mr. McCONNELL. If the Senator will yield for a question, I hope the majority leader might be willing to share the information now with the balance of his colleagues so that others might take a look at whether or not these suggestions are reasonable and don’t go to the heart of the bill. Even Senator McCARTY and Senator FEINGOLD have indicated that six of them we can probably reach agreement on in principle.

You are the majority leader, not I, but let me suggest on the ones that we can go to a separate technical corrections bill, that if it needs to be in a separate bill, in order to go back to the House. Pass the technical corrections bill simultaneously; it goes back to the House, the other bill goes on down to the President.

I am a little worried about there not being much interest in the technical
corrections bill after the main bill leaves the Senate. If we can reach agreement on at least some of these, as appears possible, I hope the majority leader might consider taking up the technical corrections package simultaneously, sending it out here and back over to the House side. It is just a suggestion.

Mr. DASCHLE. I say to the Senator from Kentucky, I know he has put a lot of time and thought into this. I am not adverse to considering that approach. I think it is worth our effort to consider what proposals the Senator and others have suggested. We will take a look at that and entertain that possibility at such time as we take up the bill.

I yield the floor.

Mr. MCCONNELL. Mr. President, briefly, I ask unanimous consent the package I just referred to in my remarks be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows: SENATOR MCCONNELL’S 6 TECHNICAL CHANGES PROPOSED—AGREEMENT IN PRINCIPAL.

1. Transfer of Excess Campaign Funds—Shays-Meehan inadvertently eliminated unlimi-ted transfers of excess campaign funds to party committees.

Solution: Include “without limitation” for transfers of excess funds so transfer will not be a “personal use” of campaign funds.

2. Not Impact 2002 Run-Offs—Effective date is before run-off elections are held.

Solution: Allow parties to operate under the current system for any 2002 run-off elections.

3. Defined Solicitation—Federal candidates and officeholders are heavily restricted in fundraising for state candidates and party committees. For example, federal candidates and officeholders could be banned from attending fundraising events for state candidates.

Solution: Clearly define what we can and cannot do.

4. Time Limit for Special Judicial Review Process—Plaintiffs around the country should not be forced to sue only in D.C. District Court forever, with no circuit court review (only option is discretionary appeal to the Supreme Court—practically foreclosing appellate review).

Solution: Provide a time limit for exclusive jurisdiction in D.C. District Court and lack of circuit court review.

5. Authorize Member Challenges—Shays-Meehan specifically authorizes member intervention in a suit but does not specifically authorize a member to challenge the new law.

Solution: Specifically authorize member challenges—parity for challenging and intervening.

6. State Party Building Funds—State parties will have to use hard dollars to pay for their buildings.

Solution: Clarify that state party building funds are governed exclusively by state law.

SENATOR MCCONNELL’S 7 TECHNICAL CHANGES PROPOSED—NOT AGREED TO.

1. Outside groups/State Party Parity—Shays-Meehan inadvertently gave outside groups and Weakens State Parties

Federal candidates and officeholders can raise soft money for outside groups: unlimited for ..

Sen. McConnell...

—S 7 TECHNICAL CHANGES

There being no objection, the material was ordered to be printed in the RECORD.

SENATOR MCCONNELL’S 2 TECHNICAL CHANGES PROPOSED—NOT AGREED TO.

2. Contribution Limit to State Party. The limit is increased but not indexed.

Solution: Index the hard dollar limit—critical to compete with outside groups.

3. Index Contribution Limit To State Party. The limit is increased but not indexed.

Solution: Index the hard dollar limit—critical to compete with outside groups.

4. Defined Solicitation—Independent Expenditures. Shays-Meehan treats all party committees (from national to local parties) as a single committee. Prohibits all committees from both coordinated expenditures and independent expenditures after nomination by party (contrary to 8 Ct. ruling in Colorado I).

Solution: Treat all party committees as a single committee and do not prohibit them from doing both independent and coordinated party expenditures.

5. Do Not “Federalize” State Candidates—State candidates may not mention federal candidates in an advertisement unless they use hard dollars; state candidates doing GOTV activity must use hard dollars, and federal candidates and officeholders are subject to the hard dollar limits and restrictions in fundraising for state candidates.

Solution: Do not “federalize” state candidates.

6. Index PAC limit—the limit is not increased or indexed.

Solution: Index, but do not increase, hard dollar contribution limits to and from PACs.

Solution: Allow parties to spend, not raise, building funds until funds are depleted.

Mr. MCCAIN. Mr. President, I ask unanimous consent an analysis of changes proposed by Senator McConnell be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ANALYSIS OF CHANGES PROPOSED BY SENATOR MCCONNELL TO PENDING CAMPAIGN FINANCE REFORM LEGISLATION.

Twelve specific changes to the McCain-Feingold/Shays-Meehan bill have been proposed to Senator McConnell. Incorporation of any of these changes in the bill itself would kill the bill by sending it to conference or back to the House.

Many of these changes are unacceptable substantive revisions of the bill. Some of these changes would upset bipartisan compromises made during floor consideration in the Senate or decisions made on the House floor regarding the central components of the reform effort, particularly the soft money ban.

Some of the suggested changes are technical or mechanical, but that could be addressed in a separate technical corrections bill as long as it does not interfere with the prompt enactment of the pending campaign finance reform legislation.

Each of the amendments is discussed below. The headings for the amendments are taken from the proposal given to Senator McCain.

1. State Party/Outside Group Parity—This is a proposed substantive change to the pending campaign finance reform legislation. This would incorporate the changes made in the House that clarified Senator Levin’s amendment in order to prevent the amendment from becoming a major obstacle in the soft money ban.

Under the Levin amendment, state and local parties could use up to $10,000 per year from soft money funds for voter registration, union, or individual, for generic get out the vote activities (GOTV); GOTV for state and local candidates; and voter registration within 120 days of an election involving a federal candidate, so long as these activities do not refer to a clearly identified candidate for federal office. As passed by the Senate, the Levin amendment could have been interpreted to allow federal officeholders to raise these soft money funds, and to allow state parties to use these soft money funds to finance broadcast ads.

Senator Levin was very clear on the Senate floor, however, that he did not intend this soft money to be raised by federal candidates or officeholders. The bill clarifies this. Senator Levin also indicated that the money be used for grassroots activities, and the House bill clarifies this as well.

Sen. McConnell...

The proposed revision would eliminate these clarifying provisions.

The House bill also added restrictions on joint fund-raising to prevent solicitations of large sums from a single donor, and restricted transfers of funds to state and local party committees to help prevent the federal soft money system from being shifted to the state level. The proposed revision would eliminate these protections.

The proposed revision would also double the amount of soft money that state parties can use from contributions provided by corporations, unions, or individuals for the authorized GOTV and voter registration activities that would include the $10,000 limit contained in both the House and Senate-passed bills to $20,000 per year. The $10,000 limit is the same as the limit that applies to hard money donations by individuals to state parties under the bill. Thus, under the bill, an individual donor can already give a total of $20,000 per year to a state party that can be used for voter activities, the same amount that federal candidates can solicit for outside groups for use on these activities.

3. Contribution Limit to State Parties—The proposal suggests indexing the amount that individuals can contribute to state parties. The decision not to index this amount during Senate consideration of the bill led to a package of increases in contribution
limits approved by the Senate. The only change in this provision made by the House was to increase the aggregate limits.

3. Hard Dollar Candidate Support by Parties—This is a proposed substantive change to the pending CFR legislation. The proposal would allow parties to make both independent and coordinated expenditures in individual races.

The requirement that the parties choose between these expenditures was contained in both the Senate and House-passed bills and is not consistent with the Colorado I decision. For purposes of this provision only, national and state party committees are treated as separate political parties. Otherwise, this provision would not be effective because, for example, a national party could choose to make coordinated expenditures, and then transfer additional funds to a local party to use for independent expenditures.

Parties should not be able to claim that they are independent of one of their candidates if, during the general election period, they are making coordinated expenditures with that same candidate under section 411(a) of the FECA. Permitting both coordinated and independent expenditures by a party makes meaningless the coordinated spending limits recently upheld by the Supreme Court in Colorado II. Furthermore, since the decision in Colorado I that the choice between making independent or coordinated expenditures is made by the party only after a candidate is nominated, the national party will be able to make the decision with kind of spending to undertake. In addition, contrary to the claim made in the proposal, there is no general restriction on transferring hard money between national and state parties.

4. Excess Campaign Funds—This is a proposed substantive change. The proposal would index the limits on how much can be contributed to and from PACs.

Increasing PAC contribution limits was considered and rejected in bipartisan negotiations on coordination limits during Senate consideration of the bill. The decision represents a position that the role of PACs in financing elections should not be increased. The Senate agreement was not changed in the House.

5. Federal Election Limit—This is a proposed substantive change. The proposal would index the limits on how much can be contributed to and from PACs.

Increasing PAC contribution limits was considered and rejected in bipartisan negotiations on coordination limits during Senate consideration of the bill. The decision represents a position that the role of PACs in financing elections should not be increased. The Senate agreement was not changed in the House.

6.的时间限制 for expedited judicial review—This is a proposed substantive change to the pending CFR legislation. The proposed revision suggests changing the effective date of the pending law as the House and Senate bills previously passed by the Senate and House-passed bills were not limited in this way. The expedited review provisions assure that decisions that could affect ongoing campaigns will be made promptly. These provisions will be useful even years after enactment.

By requiring all suits challenging the constitutionality of the Act to be brought within a specific time period after enactment in order to qualify for expedited treatment. The Supreme Court can summarily affirm the lower court’s decision if it chooses, so this provision need not be a burden on the Court’s docket.

If agreement can be reached on revised judicial review procedures, it can be included in a technical corrections bill if there is one and if there is agreement on the definition of the term can be reached.

The increase in the statute of limitations from three to five years resulted from Senator Lieberman’s amendment. Like many other terms in the bill, solicitation definitions were subject to review by the FEC in regulations. A statutory definition could also be included in a separate technical corrections bill if there is one and if there is agreement on the definition of the term.

The non-substantive portion of the bill deals with transfers of excess campaign funds by candidates to political parties.

There was no intention to change long-standing federal election law that permits candidates to transfer excess campaign funds without limitation to their parties. This can be clarified in a colloquy or in a technical corrections bill if there is one.

12. Court Challenges—The proposal would allow Members of Congress a statutory right to challenge the campaign finance reform law in court.

The existing intervention provisions of the bill give Members of Congress on both sides of the issue the ability to participate equally in litigation concerning constitutionality of the Act. Members of Congress may already have standing to challenge the Act in court, and Congress cannot grant constitutional standing that already exist. Issues relating to standing by members could be addressed in a separate technical corrections bill if there is one, as long as members on both sides of the issue are treated similarly.
Weighed several hundred pounds—if you did not open up your hands in time, it went right down in there. I have a lot of friends who can’t play the guitar anymore.

Frankly, I almost ended up in this business in the automobile business. When we talk about economic development and economic stimulus, I think often about the oil fields in Oklahoma. I was a very young child at that time. We are talking about 50 years ago. I remember going to get lunch. You had to stand in line and wait to pay your ticket. That was back in the day when we really had economic stimulus. It came from this energy. That is something we don’t talk about very much, but it is a very real thing, and it is particularly real when you personally experience it.

But I have to say that my major concern right now with our energy crisis with which we are faced—and it is a crisis—is how it affects our ability to defend our country or for our ability to fight a war. Several Members mentioned—including the Senator from Montana—that our dependency is directly related to our ability to be independent and to be strong. We are dependent on Iraq for our ability to fight a war against Iraq, that is a crisis. That is a situation we are in right now. We are dependent upon foreign countries for our ability to fight a war.

But here are the facts. I think it is important that we talk about this from a military perspective.

First of all, the military is as dependent on foreign oil as the general public is. It takes eight times as much oil to meet the energy needs for each U.S. soldier as it did during World War II. In addition to that, the Department of Defense accounts for 80 percent of all Government energy use.

For all practical purposes, we are talking about the defense ramifications of this use. It is not like it was in World War II. Now it takes eight times as much oil. It is a very serious problem.

Iraq is the fastest growing contributor to our dependency. People do not understand that. They say: Wait a minute. Aren’t we at war with Iraq? I guess by some definition you would have to say we are. They are shooting down our UAVs that are flying over some of the zones trying to protect us, as is required by U.N. resolution. Yet Iraq is the fastest growing source for United States oil imports. Shockingly, in the year 2000, $5 billion of American money went to Iraq to buy oil.

There is a lot of talk about sanctions, and a belief in sanctions, if sanctions are going to really accomplish something. But how can we have sanctions against a country when we are paying them $5 billion in America money to buy the oil, particularly when that is used to defend America?

America’s energy consumption is on the rise, but we are producing less domestic oil than at any time since World War II. Dependence on foreign oil has dramatically increased since 1973, and it is projected to continue to increase—currently, about 60 percent. You hear 57 percent. You can justify some 60 percent, depending on how you calculate it. Sixty percent of our U.S. energy needs are met by foreign sources.

In the mid-1980s, I traveled around the country with Don Hodel. Don Hodel was Secretary of the Interior. He was also Secretary of Energy. This was back during the Reagan administration. At that time, we were about 38 percent dependent on foreign countries for our oil. Don Hodel and I went to States that are consumption States and not production States, and explained to them that our dependency on foreign countries for our ability to fight a war was a national security issue—not an energy issue. In fact, we had a little dog-and-pony show. We would go back to, and including, the President of the United States, trying to tell that story. It didn’t sell well then.

After the Persian Gulf war, people started listening and realizing that there is a relationship between our ability to be energy sufficient and the danger that we are facing.

In both 1995 and 1999, the Secretary of Commerce acknowledged, pursuant to a law requiring his assessment, that our oil dependency poses a threat to our national security. I elicted virtual consensus from all members of the Joint Chiefs of Staff that energy security was a too-often overlooked aspect of our national security needs.

After September 11, Deputy Secretary of Defense Paul Wolfowitz said that U.S. dependency on foreign oil—now, this happened in a public hearing where we were; and I asked him the question about Iraq and its relationship to our national security—he said that U.S. dependency on foreign oil “is a serious strategic issue... My sense is that [our] dependency is projected to grow, not to decline... it’s not only that we would, in a sense, be dependent on Iraqi oil, but the oil as a weapon. The possibility of taking that oil off the market and doing enormous economic damage with it is a serious problem.”

That is the Deputy Secretary of Defense, Paul Wolfowitz.

The President made energy a top national priority. He said it over and over again. Sometimes I wonder if people are listening. In an overwhelmingly bipartisan manner, the House of Representatives adopted a comprehensive energy policy which includes provisions to modernize conservation and infrastructure, increase domestic energy supplies, and accelerate the protection of the environment.

But that is not all. H.R. 4 has a comprehensive approach to meet our energy needs. We have nuclear in there; we have oil and gas production. Let’s just take the marginal production I have been concerned about it. For my money, to be a major producer, they are used to be, of marginal wells.

A marginal well is a well that produces 15 barrels of oil or less a day. If we had all the oil that would have come from margin wells that have been plugged in the last 10 years flowing again today, it would produce more oil than we are currently importing from Saudi Arabia. That is a huge source. That is part of H.R. 4.

We are talking about renewables in it. People are talking about renewables. It has nuclear. Right now, to meet our energy needs to light our lights in America, we are only 20 percent dependent on nuclear energy. France is 80 percent dependent on nuclear energy. People who were marching and protesting back in the 1970s against nuclear plants now realize, after all the ambient air problems that have been coming up, that nuclear energy is among the cheapest, and the most abundant energy available, yet we are not using it.

That is why I offered the energy bill as an amendment to last year’s Defense authorization bill. Here I am on the Armed Services Committee. I had chaired the Subcommittee on Readiness. I offered the energy bill to the Defense authorization bill so people would somehow reprogram their thinking and realize we were talking about a national security issue. We are talking about a national security issue when we talk about our energy dependence. So I offered it, and I was glad I did.

We, of course, are addressing energy legislation today. I am really highly troubled by the bizarre legislative path that this legislation has traveled. I know we have talked about this quite a bit. I hope the majority leader will allow fair up-and-down votes on issues such as ANWR. We need to vote on it. I ran the numbers required for everyone who is going to be voting on ANWR to take a trip up to the north slopes of Alaska to see what we are really talking about. It is not a pristine wilderness. We are only talking about a very small, a minuscule part of that area up there, and we are talking about an environment where the Eskimos, the local people, are begging us to come in and open it up.

So we do not need just any bill; the Senate owes our country a strong energy bill, which should include hydraulic fracturing. Hydraulic fracturing is a system where water is forced in, in order to be able to produce the oil.
March 5, 2002

Mr. BAYH. Mr. President, as we begin debate on comprehensive energy legislation, it is important to remember that a diversity of energy concerns has brought us to this point. Because costs of energy supplies are relatively high and gasoline prices are relatively low, there are those that may want to postpone the difficult decisions required by comprehensive action. I rise today to remind my colleagues of our energy history and that, to avoid repeating the energy crises of the past, we need to act now.

A quick review of just the last four years reveals the breadth of the energy issues that we must address. At the end of 1998, oil prices were so low they threatened the viability of the domestic oil industry; in the spring of 1999, they soared to record levels. Severe weather and transportation problems
combined to create a home heating oil crisis in the Northeast the following winter. At the start of the summer of 2000, people in the Midwest were paying record prices for petroleum products. Later that summer, a decaying gas pipeline in New Mexico exploded, killing an entire family.

The winter of 2000 brought new challenges. Consumers were paying an average 30 percent more to heat their homes than they had the previous year. The summer of 2000 saw the collapse of the California electricity market, with blackouts and previously unthinkable electricity prices. Last fall, we began a war against terror that may impact our supplies of oil from the Middle East.

Energy policy is about more than the price of gasoline at the pump today. A comprehensive energy policy will require thoughtful, and often difficult, choices today to ensure secure, affordable and sustainable energy in the future. This bill addresses many of these choices. It aims to secure new, as well as traditional, energy supplies; promote investment in critical infrastructure; expand technology options; reduce energy use and promote energy market mechanisms that protect consumers and the environment.

I would like to highlight just a few of the provisions in this bill that I believe advance these objectives. Many of these are items that I worked with Chairman Bingaman to have included in this bill and I thank him for his assistance and support.

First, among the bill’s efforts to increase our short-term energy security, is a provision that Senator Landrieu and I developed directing that the Strategic Petroleum Reserve be filled to capacity. It also requires a review to determine whether the size of the Reserve and our capacity for refining and transporting the Reserve oil are adequate to respond to severe supply disruption. The bill also moves the Nation toward greater long-term security by providing incentives for development of Alaska’s natural gas resources. Other provisions to expand the use of renewable fuels for transportation will ease both short- and long-term supply uncertainties, while reducing the environmental costs of petroleum.

The energy bill also acknowledges the critical role that innovation and technology advancement will play in our long-term energy strategy. The bill expands energy research and development in traditional as well as alternative energy. This bill also calls for the Department of Energy to identify ways to accelerate innovation and reduce barriers to technology development.

The tax provisions of the bill, which I understand will be added at a later date, also aim to balance incentives for increasing conventional and alternative energy supplies, including credits for marginal oil well production, clean coal technology and renewable energy production. In addition to supply incentives, the package contains provisions to address energy demand, including credits for efficient cars, homes and appliances which will help to reduce energy use while promoting technology development.

Another way that I believe that the Federal Government can play a significant role in promoting efficient technologies is by using its own purchasing power. Last year, I introduced a bill, S. 1358, to provide resources and enhance accountability for the Federal Government’s efforts to improve its own efficiency and reduce its energy use. The bill would establish energy reduction goals and performance standards for Federal buildings and fleets; ensure that Federal procurement policies promote purchases of the most efficient equipment and supplies and create a Federal revolving fund, or “energy bank” to help agencies finance efficiency improvements. Many of these initiatives have been incorporated into the bill before us; I believe they will reduce the Federal energy bill and build the market for new technologies.

Another area in which the bill provides assistance for advanced energy technologies is a voluntary demonstration program, which I also supported, to help schools and communities secure newer school buses that use clean diesel and natural gas technology. A growing market will help to bring down the cost of these new technologies and let communities reap the air quality benefits in the process.

The bill also recognizes the requirements of new energy markets. For instance, S. 517 replaces the archaic Public Utility Holding Company Act of 1935 with regulatory and oversight mechanisms that protect the consumer in the modern marketplace and promote investment in the energy sector. It also acknowledges that effective energy regulation must recognize regional lines and provides for regional energy coordination without undermining States’ authority.

These are just a few of the important ideas in the bill that deserve support; there are many more. There are also many difficult issues that will need to be resolved. We will not all be able to agree on every provision in this bill, but it is critical that we work across party and regional lines to find compromise where we can and move forward with a comprehensive policy. The alternative is to persist in our national amnesia about our energy problems, ensuring that the spiking prices, infrastructure failures and energy insecurity of the past become part of our future.

MORNING BUSINESS

Mr. REID. Mr. President, I ask unanimous consent the Senate now proceed to a period of morning business.

THE PRESIDING OFFICER. Without objection, it is so ordered.

WTO DISPUTE

Mr. DODD. Mr. President, on February 1, 2002, the World Trade Organization adopted a report by its Appellate Body that concluded that a U.S. law known as Section 211 violates U.S. obligations to protect and enforce intellectual property rights under the Agreement on Trade-Related Aspects of Intellectual Property Rights, TRIPS. The WTO urged the United States to take the necessary steps to bring the United States into compliance with its international obligations. This decision provides Congress with an opportunity—a chance to reaffirm our commitment to the protection of intellectual property rights by repealing Section 211 in its entirety.

Section 211 is a special interest provision that was added into the FY 1999 Omnibus Appropriations Act at the behest of Bacardi, Ltd., a Bermuda-based corporation, just prior to enactment. It was not considered in conference, in committee, or on the floor of either House of Congress. This ill-conceived provision triggered the WTO complaint against the United States and has undermined U.S. leadership in promoting strong protection for intellectual property rights in the global marketplace.

The Appellate Body concluded that key provisions of Section 211 violate two fundamental principles of WTO rules—national treatment and most-favored-nation status. Section 211 prohibits WTO members from discriminating against intellectual property right holders based on nationality. For over 100 years, these principles have obligated our trading partners to protect U.S. trademark and trade name holders from discrimination abroad. The Appellate Body found, however, that Section 211 violated these long-standing U.S. obligations by imposing obstacles on foreign intellectual property holders that do not exist for U.S. and other nationals.

The United States cannot appeal the Appellate Body’s conclusion that Section 211 clearly violates WTO rules. Following last week’s formal adoption of the Appellate Body report by the WTO’s Dispute Settlement Body, the United States has only a short time to correct its violations and come into compliance with WTO rules. If the United States fails to do so, it will have to offer compensatory measures which provide possible retaliatory measures against U.S. intellectual property right holders and other trade interests.

Even more troubling than the threat of retaliation, however, is the fact that Section 211 and the Appellate Body decision may serve as a model for other countries that wish to make it more difficult for U.S. intellectual property holders to protect and enforce their rights abroad. While the Appellate Body concluded that Section 211 violates national treatment and MFN, it let stand other U.S. arguments that suggest that WTO members are free to deny protection to trademark right
that by passing this legislation, we can enhance Act of 2001 is now a symbol against the harms that come out of is to defend its citizens, to defend them to the entire community. I look with process is difficult and long, and I offer family and friends at Santana High mark the one-year anniversary of the COMMEMORATING THE ONE YEAR thatched outside a nightclub. The Portsmouth, NH. A gay man was at- acceptable in our society. hate crimes legislation sending a sig- Local Law Enforcement Act of 2001 legislation I introduced with Senator intellectual property rights. World win to its rightful place as the leadership in the fight to secure strong protection and enforcement for intellectual property rights worldwide.

LOCAL LAW ENFORCEMENT ACT

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of last year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred August 10, 1996 in Portsmouth, NH. A gay man was attacked outside a nightclub. The attackers, three men, yelled anti-gay epithets while they assaulted the victim.

I believe that government’s first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement En- hancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

COMMEMORATING THE ONE YEAR ANNIVERSARY OF THE SHOOT-ING AT SANTANA HIGH SCHOOL

Mrs. BOXER. Mr. President, today marks the one-year anniversary of the tragic shooting at Santana High School in Santee, CA. This shooting claimed the lives of two innocent teenagers: Brian Zucker and Randy Gordon, and sent an entire community into mourning.

The community of students, faculty, family and friends at Santana High School is still mourning. The healing process is difficult and long, and I offer my thoughts, condolences, and support to the entire community. I look with great respect at the way they have re-acted to this senseless act of violence; both immediately, in the aftermath of the shootings, and in the year that has followed. Youth and adults alike have shown great compassion, strength and bravery in coping with this tragic event.

To commemorate this one-year anni-versary, the school held a “Santana Safe School Tribe 5k Run/Walk” on Saturday morning. Proceeds from the walk will benefit the creation of Santana’s Community/Family Re- source Center, a center aimed at pro-viding youths the physical, emotional and intellectual support they need. In addition, Santana High School will have a day of private remembrance today, with a flag ceremony in the main quad, a moment of silence, and a luncheon for the entire school community.

On this day, the anniversary of Santana High School’s shooting, I once again extend my support for the families and friends affected by the tragedy. I offer special condolences and thoughts to the Zucker and Gordon families. I assure them that I continue to hold this incident close to my heart as I fight to pass common sense gun legislation, put police officers in schools, and keep our children and communities safe.

GOD BLESS THE USA

Mrs. LINCOLN. Mr. President, I ask unanimous consent that the following poem, “God Bless the USA,” written by Ms. Debbie Rogers of Danville, AR, be printed in the RECORD. There being no objection, the poem was ordered to be printed in the RECORD, as follows:

GOD BLESS THE USA

Twin Towers once stood regally, but Majestic in the sky. Pure evil took them down today, Americans stand and cry.

Two planes marked for death. As the world observes them, Once Titanic against the skyline, now scattered in debris and ash.

Four planes all together, carrying innocent lives on each one. Leaving disbelief and carnage, when the Hollihut Burcher were done.

There was no kind of warning, no message did they send.

And total devastation, is so hard to comprehend.

Emergency Crews work frantically, keeping hope always alive.

They dig with bleeding hands, Praying someone does survive.

Thousands hurt and missing, death lingers in the air.

Families in such torment, the world mourns in deep despair.

Our whole world has been disrupted. As we watch the Breaking News.

Praying they find survivors, and all the missing clues.

We need closure for the Families, and Jus- tice for us all.

We’ll deal with this catastrophe, As Americans we stand tall.

We’re proud to be Americans, We won’t take this without a fight.

We won’t cease in determination, till this wrong is made right.

We’ll rise above the smoke and ash, re- membrance in our heart.

Of all the innocent Families, these Mon- sters tore apart.

Now vengeance seems to call, like a beacon in the night.

God forgive Our thoughts, two wrongs don’t make a right.

We stand on Honor and Justice, there’ll be a reckoning day.

This deed won’t go unpunished, God Bless The U.S.A.

ADDITIONAL STATEMENTS

CHILDREN’S SPINE FOUNDATION

“THE ART OF GIVING”

- Mrs. BOXER. Mr. President, on March 6, 2002, the Children’s Spine Foundation will hold its Fourth Annual Gala, “The Art of Giving.” I would like to take a moment to inform the Senate of the organization’s great work.

Spinal deformities present a serious health problem for many children each year, and many cases are life threatening. The Children’s Spine Foundation helps detect those deformities early and treats them effectively. The foundation has helped save many lives. Founded in 1994 by Dr. Thomas and Salma Haider, the Children’s Spine Foundation provides much needed services to children in the Riverside and San Bernardino communities who might not otherwise have access to quality spinal health care.

The foundation connects children in need with renowned orthopedic surgeons at local hospitals. It also provides screening for spinal abnormalities and raises awareness through educational programs, health fairs, workshops and conferences. I would like to express a special word of commendation to Dr. and Mrs. Haider, whose care and compassion have made the Children’s Spine Foundation a reality. CSF would not be the wonderful foundation it is today without their guidance and vision. They are truly the pioneers behind CSF’s important mission.

I send my best wishes to the Child- ren’s Spine Foundation on the special day of its annual gala event, and wish the staff and volunteers much continued success.

CONGRATULATIONS TO MIKE “DOC” HOWARD

- Mr. BUNNING. Mr. President, today I ask my fellow colleagues to join me in praising the entrepreneurial spirit of Mike “Doc” Howard of Lebanon, KY. Mr. Howard was recently named the Outstanding Businessperson of 2001 by the Lebanon/ Marion County Chamber of Commerce for his progressive eco- nomic vision and innovative genius.

Doc Howard received his first lesson in economics from his Uncle Doc, Howard when he was just 12 years of age. Doc was put to work by his uncle at the Arista Theater, Lebanon Drive-In, and
local gas station, where he ran the projector, operated the grill, and pumped the gas. At a young age, Doc Howard seemed to firmly grasp the simple but often elusive concept of saving money in order to make money. This economic axiom has stuck with him ever since his days of flipping burgers and pumping gas.

In the early 1970s, Howard, with the help of several business partners, opened a printing business and so began his career as an entrepreneur for Marion County. Since then, Doc has been financially involved in all of the following industries: entertainment, carpentry, real-estate, lumber, agriculture, produce, retail and restaurant. He has owned drive-ins, built houses, sold houses, owned grocery stores and delis, and even found time to become a farmer. Currently, Doc is attempting to build on his previous successes and bring even greater economic opportunities to the residents of Marion County. He does this through the Lincoln Heritage Shopping Center, which now includes Sears, Dollar General, Central Kentucky Staffing, an Italian restaurant, a physical therapist, and a tobacco store. The people of Marion County will definitely benefit from these new businesses. Since the early 1970s, Doc Howard has diligently committed his efforts to making Lebanon/Marion County a more attractive place to do business. He deserves our praise for being a pillar of capitalism.

I congratulate Mr. Johnson on his award and thank him for investing his time and money into the future of Marion County.

TRIBUTE TO NEW NATIONAL FARMERS UNION PRESIDENT

DAVE FREDERICKSON

Mr. Johnson, Mr. President, I rise today to congratulate Dave Frederickson as the recently elected National Farmers Union, NFU, president. During the National Farmers Union 100th anniversary convention, delegates chose a true leader for their future in Mr. Frederickson. Family farmers and ranchers across America can rest assured that Dave will continue his commitment to them in his new role.

Dave brings 11 years of experience as the Minnesota Farmers Union, MFU, president to his new post. Not only is Dave committed to sustain family farmers and ranchers, he also holds the education of youth to a high standard. After graduating from St. Cloud State University with a degree in education, Dave spent 8 years teaching special education children. The Farmers Union philosophy regards education as one of their three most important principles. Having a leader with Dave's background and experience, the national organization is sure to continue its legacy of education.

From 1986 to 1992, Dave served as a State senator in the Minnesota legislature. During this period, he served on a number of committees, including the rural development committee, the education committee, and the governmental operations committee. Because of Dave's commitment to rural development and legislation that he supported, the ethanol industry has become an important tool in Minnesota. Dave continued his commitment to rebuilding and strengthening rural communities while president of MFU. The experience that he brings to the table can only ensure that the National Farmers Union organizations in America is in good hands.

Dave has made his first priority as president of NFU to see a good farm bill passed out of conference committee. He said, "Farmers Union has worked hard throughout the House and Senate farm bill process, and we have much more work ahead of us, let's go back to Washington and work for a farm bill so that when you go back into your fields you'll know what kind of support you have behind you."

I look forward to working with Dave on issues that not only affect South Dakota, but the entire fabric of rural America. The members of Farmers Union are dedicated to serving as a leader with integrity, vision, and commitment. Again, congratulations to Dave Frederickson on his accomplishments of the past, and his commitment to the future of rural America in his new role as National Farmers Union president.

THE DEATH OF LT. COL. HENRY "HANK" BARROWS, USAF, RET.

Mr. McCain. Mr. President, I rise today to honor a great American patriot, Hank Barrows. Hank passed away unexpectedly on Monday, February 11 at his home in Washington, DC. My deepest sympathies go out to his wife, Suzanne, and his sons, Geoffrey and Brian. Born in Bremerhaven, Germany on September 9, 1946, Hank emigrated with his family to the United States in 1960, settling in Westfield, NJ. Following his graduation from Westfields High School, Hank was accepted by Rutgers University, where he graduated in 1964 with a bachelor's degree in German.

Trained as a navigator following his graduation from Air Force Officer Candidate School, OCS, in 1969, Hank served two tours in Vietnam. In his first tour, Hank served as a EWO on a C-130 gunship and the second as a B-52 EWO during the Linebacker II Operations over North Vietnam. It was on December 19, 1972, during one of the Linebacker missions, that Hank was shot down and taken prisoner by the North Vietnamese. Hank was held prisoner in the infamous "Hanoi Hilton" until his release on March 29, 1973. After being released by the Vietnamese, he was assigned to the 343rd Strategic Reconnaissance Squadron at Offutt Air Force Base as an Electronic Intelligence intercept officer on the RC-135s.

His next assignment was to the 7575 Operations Group Operating Location A Support Squadron stationed at Rhein Main Air Force Base, Frankfurt, Germany. Following in an assignment as part of the freedom of the corridors mission. In recognition of his superior performance and expertise, Hank was reassigned in 1979 to United States Air Force-Europe, USAFE, headquarters in the office that managed airborne operations.

Hank returned to the U.S. in 1982 working in the Air Staff Intelligence Directorate in the Pentagon. He spent the last seven years of his distinguished Air Force career in the Defense Support Project Office. He finished that assignment as the Deputy Director for Airborne Reconnaissance.

Upon his retirement in 1992, Hank joins his wife, Suzanne, and their two children, Geoffrey and Brian, living in their home in Round Hill, Virginia. Hank was a dedicated member of the Veterans of Foreign Wars, the US Air Force Association, and the Marine Corps League. He was an avid golfer, hunter, and outdoorsman. He loved his family and country.

I look forward to working with Dave at the Washington Office and at the state level. He will bring to the table a wealth of experience and a willingness to listen. I am proud to count Dave as a friend and colleague.

Upon his retirement in 1992, Hank joins his wife, Suzanne, and their two children, Geoffrey and Brian, living in their home in Round Hill, Virginia. Hank was a dedicated member of the Veterans of Foreign Wars, the US Air Force Association, and the Marine Corps League. He was an avid golfer, hunter, and outdoorsman. He loved his family and country. We will remember Hank as an exemplary role model with vision, passion, and loyalty.

NOMINATIONS DISCHARGED

The following nominations were discharged from the Committee on Health, Education, Labor, and Pension pursuant to the order of March 5, 2002:

- NATIONAL FOUNDATION FOR THE ARTS AND THE HUMANITIES

Don V. Cogman, of Connecticut, to be a member of the National Council on the Arts for a term expiring September 3, 2006.

- TERESA LOZANO LUNA, of Texas, to be a member of the National Council on the Arts for a term expiring September 3, 2006.
INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Ms. COLLINS:
S. 323. A bill to amend the Internal Revenue Code of 1986 to provide for coverage of pregnancy-related assistance for targeted low-income pregnant women.

S. 369. A bill to amend the Internal Revenue Code of 1986 to allow a deduction for patient protection by limiting the number of mandatory overtime hours a nurse may be required to work in certain providers of services to which payments are made under the medicare program.

At the request of Mr. BINGAMAN, the name of the Senator from Idaho (Mr. LUGAR) was added as a cosponsor of S. 1926, a bill to improve infrastructure investment at the guaranteed funding level contained in the Transportation Equity Act for the 21st Century.

At the request of Mr. JEFFORDS, the name of the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 1917, a bill to provide for highway infrastructure investment at the guaranteed funding level contained in the Transportation Equity Act for the 21st Century.

At the request of Mr. NELSON, the name of the Senator from Florida (Mr. STABENOW), and the Senator from Michigan (Mr. LEVIN), the name of the Senator from Illinois (Mr. DURBIN), the Senator from Hawaii (Mr. MURKOWSKI), and the Senator from Vermont (Mr. JEFFORDS) were added as cosponsors of S. 1926, a bill to improve passenger automobile fuel economy and safety, reduce greenhouse gas emissions, reduce dependence on foreign oil, and for other purposes.

At the request of Mr. JOHNSON, the names of the Senator from Colorado (Mr. ALLARD), the Senator from Michigan (Ms. STABENOW), and the Senator from Indiana (Mr. BAYH) were added as cosponsors of S. 1926, a bill to provide for the merger of the bank and savings association deposit insurance funds, to modernize and improve the safety and fairness of the Federal deposit insurance system, and for other purposes.

At the request of Mr. MURkowski, the name of the Senator from New Mexico (Mr. BINGAMAN) was added as a cosponsor of S. 1917, a bill to amend the Internal Revenue Code of 1986 to allow tax-free distributions from individual retirement accounts for charitable purposes.

At the request of Mrs. FEINSTEIN, the name of the Senator from Maine (Ms. SNOWE) was added as a cosponsor of S. 1917, a bill to amend title XVII of the Social Security Act to repeal the Government pension offset and windfall elimination provisions.

At the request of Mr. KENNEDY, the name of the Senator from Hawaii (Mr. COCHRAN) was added as a cosponsor of S. 1866, a bill to amend title XVIII of the Social Security Act to provide for patient protection by limiting the number of mandatory overtime hours a nurse may be required to work in certain providers of services to which payments are made under the medicare program.

The following concurrent resolutions and Senate resolutions were read, and referred as indicated, as follows:

S. Con. Res. 34. A concurrent resolution on the budget for fiscal year 2003.

The following resolutions were read, and referred as indicated:

S. Res. 219. A resolution to honor Walter D. Stewart for his years of service in the Office of Advocacy of the Small Business Administration; considered and agreed to.

ADDITIONAL COSPONSORS

At the request of Mr. SMITH of New Hampshire (for himself, Mr. FEINGOLD, and Mr. MCCAIN):
S. 1866. A bill to amend the Interstate Surface Transportation Efficiency Act of 1991 to identify a route that passes through the States of Texas, New Mexico, Oklahoma, and Kansas as a high priority corridor on the National Highway System; to the Committee on Environment and Public Works.

By Mr. SMITH of New Hampshire (for himself and Mr. EDWARDS):
S. 1869. A bill to authorize the establishment of a National Cyber Security Defense Team for purposes of protecting the infrastructure of the Internet from terrorist attack; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred as indicated:

By Mr. KERRY (for himself, Mr. BOND, Mr. LIEBERMAN, Mr. BURNS, Mr. CLELAND, Mr. BENNETT, Ms. LANDRIEU, Ms. SNOWE, Mr. EDWARDS, Ms. CANTWELL, Ms. ALLEN, Mr. ENSIGN, Mr. WELLSFORD, Mr. HARKIN, and Mr. LEVIN):
S. Res. 219. A resolution to honor Walter D. Stewart for his years of service in the Office of Advocacy of the Small Business Administration; considered and agreed to.

At the request of Mr. BINGAMAN, the name of the Senator from Nevada (Mr. ENSIGN) was added as a cosponsor of S. 514, a bill to amend the Internal Revenue Code of 1986 to allow the Secretary of Transportation to establish a grant program for the rehabilitation, preservation, or improvement of railroad track.

At the request of Mr. BREAUx, the name of the Senator from Hawaii (Ms. COCHRAN) was added as a cosponsor of S. 1713, a bill to authorize the Secretary of Transportation to provide increased mandate enforcement to assure fairer procedures that apply to consideration of interstate class actions to assure fairer outcomes for class members and defendants, and for other purposes.

At the request of Ms. SNOWE, the name of the Senator from Missouri (Mrs. CARNAHAN) was added as a cosponsor of S. 946, a bill to establish an Office on Women’s Health within the Department of Health and Human Services.

At the request of Mr. WARNER, the name of the Senator from Maine (Ms. SNOWE) was added as a cosponsor of S. 1022, a bill to amend the Internal Revenue Code of 1986 to allow Federal civil and criminal penalties to pay health insurance premiums on a pretax basis and to allow a deduction for TRICARE supplemental premiums.

At the request of Mr. REED, the name of the Senator from Rhode Island (Ms. CANTWELL) was added as a cosponsor of S. 999, a bill to amend title 10, United States Code, to provide for a Korea Defense Service Medal to be issued to members of the Armed Forces who participated in operations in Korea after the end of the Korean War.

At the request of Mr. WARNER, the name of the Senator from Maine (Ms. SNOWE) was added as a cosponsor of S. 1209, a bill to amend the Internal Revenue Code of 1986 to allow Federal civil and criminal penalties to pay health insurance premiums on a pretax basis and to allow a deduction for TRICARE supplemental premiums.

At the request of Mr. DORGAN, the name of the Senator from Massachusetts (Mr. KERRY) was added as a cosponsor of S. 1375, a bill to amend the Internal Revenue Code of 1986 to allow enhanced capacity to, mammography services under the medicare program, and for other purposes.

At the request of Mr. SANTORUM, the name of the Senator from Minnesota (Mr. DAYTON) was added as a cosponsor of S. 592, a bill to amend the Internal Revenue Code of 1986 to create Individual Development Accounts, and for other purposes.

At the request of Mr. BREAM, the name of the Senator from South Dakota (Mr. DASCHLE) was added as a cosponsor of S. 1713, a bill to authorize the Secretary of Transportation to provide increased mandate enforcement to assure fairer procedures that apply to consideration of interstate class actions to assure fairer outcomes for class members and defendants, and for other purposes.

At the request of Mr. INOUYE, the name of the Senator from Hawaii (Mr. MURkowski) was added as a cosponsor of S. 1686, a bill to amend title XVIII of the Social Security Act to provide for patient protection by limiting the number of mandatory overtime hours a nurse may be required to work in certain providers of services to which payments are made under the medicare program.

At the request of Mrs. FEINSTEIN, the name of the Senator from Maine (Ms. SNOWE) was added as a cosponsor of S. 1866, a bill to amend title XVIII of the Social Security Act to provide for patient protection by limiting the number of mandatory overtime hours a nurse may be required to work in certain providers of services to which payments are made under the medicare program.
March 5, 2002

CONGRESSIONAL RECORD — SENATE

S1537

(Mr. BREAUX), the Senator from Idaho (Mr. CRAPO), the Senator from North Carolina (Mr. HELMS), the Senator from Colorado (Mr. CAMPBELL), the Senator from Idaho (Mr. CRAIO), the Senator from North Dakota (Mr. DOGAN), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Massachusetts (Mr. KERRY), the Senator from Maryland (Ms. MIKULSKI), the Senator from Alaska (Mr. MUKOWSKI), the Senator from West Virginia (Mr. ROCKEFELLER), the Senator from Maryland (Ms. STABENOW) were added as cosponsors of S. Res. 207, a resolution designating March 31, 2002, as ‘National Greek and American Democracy’ Day.

At the request of Mr. SPECTER, the name of the Senator from Florida (Mr. NELSON) was added as a cosponsor of S. Res. 214, a resolution designating March 25, 2002, as “Greek Independence Day: A National Day of Celebration of Greek and American Democracy.”

AMENDMENT NO. 2915

At the request of Ms. COLLINS, the name of the Senator from Colorado (Mr. ALLARD) was added as a cosponsor of amendment No. 2915 proposed to S. 565, a bill to establish the Commission on Voting Rights and Procedures to study and make recommendations regarding election technology, voting, and election administration, to establish a grant program under which the Office of Justice Programs and the Civil Rights Division of the Department of Justice shall provide assistance to States and localities in improving election technology and the administration of Federal elections, to require States to meet uniform and nondiscriminatory election technology and administration requirements for the 2004 Federal elections, and for other purposes.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Ms. COLLINS:

S. 565. A bill to allow Federal securities enforcement actions to be predicated on State securities enforcement actions, to prevent migration of rogue securities brokers between and among financial services industries, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

Ms. COLLINS. Mr. President, today I am introducing the Microcap Fraud Prevention Act of 2001. This bill will close loopholes in the enforcement of our securities laws and furnish Federal authorities with the tools they need to combat growing fraud in the microcap securities market. While the Enron debacle has focused attention on the need for tougher and fuller financial disclosure standards to protect small investors, the costs investors an estimated $6 billion every year.

I first introduced this bill in the 106th Congress after extensive examination by the Senate’s Permanent Subcommittee on Investigations, which I chaired. I am pleased that the North American Securities Administrators Association, which is made up of our Nation’s State securities regulators, has once again sent me a letter of strong support of legislation such as this one of its top legislative priorities.

Today’s securities markets are much different than they were even a decade ago. Many more people own securities than ever before. The rise of the Internet has allowed investors greater access to market information and investment advice. Unfortunately, not all of this information and advice has been sound, or even honest.

These problems are exacerbated in the microcap market. Microcap stocks are those of smaller, thinly capitalized companies. Because the individual share prices may be higher than a certain threshold, however, they may avoid the SEC’s radar screen. Because investors typically know little of these companies, their share prices are easier to manipulate due to the small amount of total capital. They are often less regulated than the securities of larger companies. And therefore, they can pose difficult challenges for law enforcement and unique opportunities for dishonest brokers.

It is this combination of a microcap company’s low capitalization, making its shares manipulable, and obscurity, with high pressure sales tactics, that make microcap stocks so appealing to the more dishonest elements in our securities markets.

Frequently, salesmen will call customers, pitching these investments with high pressure sales tactics. More sophisticated scams involve a practice known as the “pump and dump” where a securities firm that has purchased a large block of a microcap company’s stock will market it aggressively and quickly to investors. As a result of the surge in demand, the share’s price will rise sharply but temporarily, despite the unchanged fundamentals underlying the stock’s price.

After a short time, investors will realize that the company’s performance does not merit its new share price. The stock’s share price will then plummet, but the firm will by then have unloaded their holdings, leaving investors holding the bag. In other cases, however, dishonest brokers and firms simply fail to execute sales orders or otherwise commit garden variety theft masquerading as securities transactions, such as churning or making unsuitable investments for clients.

States prosecute these criminal activities with some success and often obtain orders prohibiting further securities activities by bad actors within their jurisdiction. Because such an order ends at a State’s borders, however, the defendants can simply pick up, move to a new State, and begin their schemes anew. In contrast, a Federal order would have effect nationwide. Because Federal law enforcement resources are limited, however, there is only so much it can do, and many smaller time criminals can continue to operate below the Federal government’s radar screen. My bill would institute needed reforms to address these problems.

First, it would allow the SEC to take enforcement actions against brokers and firms on the basis of those already convicted by State. Although States may base their actions on Federal actions, the reverse is not true. As a result, the SEC must duplicate the State’s efforts to provide nationwide protection to investors. By allowing the SEC to base disciplinary actions on those concluded by states, the State’s disciplinary actions can be given effect nationwide, when appropriate, without the SEC’s having to commit significant amounts of additional resources.

Second, the bill would allow the SEC to bar those who commit any type of financial fraud from participating in the microcap market. Currently, the SEC can ban those who commit securities violations. But the SEC should have the power to discipline those who commit other types of financial services offenses as well.

Third, this bill would broaden provisions designed to prevent fraud in the penny stock market. Under current law, the SEC can suspend or bar those who are involved in microcap securities schemes. However, brokers so barred can turn around and commit the same types of offenses in the microcap market because their individual share prices might exceed $5 per share, even though the total capitalization amount is small enough to lend itself to easy manipulation. The penny stock market ban needs to be expanded to the microcap market as well.

Fourth, the statutory officer and jurisdiction bar would apply to all publicly traded companies. Currently, this bar only applies to companies that report to the SEC, leaving open the possibility that those who have been barred from serving in these companies could serve in others that are exempt from reporting. Companies involved in microcap schemes are frequently traded over the counter and are not covered by the bar. Under my bill, this bar would extend to all publicly traded companies.

Finally, the bill would allow the SEC to enforce its own orders and court injunctions against repeat offenders directly rather than waiting for the Justice Department to initiate contempt proceedings. Instead the SEC would be able to send fraudsters in this realm to Federal court for repeat violations without the delay that can occur from the initiation of contempt proceedings.

These are common sense, measured steps that can make a real difference in the level of protection that we provide to investors, many of whom are new to our capital markets. I would urge the Senate to consider and pass the
Microcap Fraud Prevention Act quickly. Mr. President, I ask unanimous consent that the letter of support from the NASAA be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Hon. SUSAN M. COLLINS,
U.S. Senate, Washington, DC.

DEAR SENATOR COLLINS: On behalf of the membership of North American Securities Administrators Association, Inc. (NASAA), I commend you for recognizing and confronting the problem of fraud in the microcap securities market. We appreciate your efforts to protect the investing public from frauds in low-priced securities, and for your plans to introduce legislation to enhance enforcement efforts in this area.

As you know, several years ago, state securities administrators recognized the problem of fraud in the microcap market. Since then the states have led enforcement efforts and filed numerous actions against microcap firms. There are systemic problems in this area, but they can be addressed effectively if state and federal regulators and policymakers work together on meaningful solutions.

NASAA wholeheartedly supports the intent of The Microcap Fraud Prevention Act of 2001. It would be an important step in combating abuses in the microcap market and maintaining continued public confidence in our markets.

We applaud your leadership in the fight against microcap fraud, and I pledge the support of NASAA’s membership to continue to work with you to secure passage of this important legislation.

Sincerely,

JOSEPH P. BORG
Alabama Securities Director
NASAA President.

By Mr. BINGAMAN (for himself and Mr. ROBERTS):

S. 1986. A bill to amend the Intermodal Surface Transportation Efficiency Act of 1991 to identify a route that passes through the States of Texas, New Mexico, Oklahoma, and Kansas as a priority corridor on the National Highway System; to the Committee on Environment and Public Works.

Mr. BINGAMAN. Mr. President, I rise today to introduce legislation that will enhance the future economic vitality of communities in Otero, Lincoln, Torrance, Guadalupe, and Quay Counties. By improving the transportation infrastructure, I believe this legislation will help attract good jobs to South, Central, and East New Mexico.

The bill we are introducing today designates U.S. Highway 54 from the border with Mexico at El Paso, TX, through New Mexico, and Oklahoma to Wichita, KS, as the Southwest Passage Initiative for the Regional and Interstate Transportation, or the Southwest Passage, corridor. Congress has already included Highway 54 as part of the National Highway System. The bill designates the Southwest Passage as a High Priority Corridor on the National Highway System.

I am honored to have my good friend and colleague, Senator ROBERTS, as a cosponsor of the bill. Our goal with this designation is to promote the development of this 700-mile route into a full four-lane divided highway. About half of the SPIRIT corridor is in New Mexico and another 200 miles of it are in Kansas.

I continue to believe strongly in the importance of highway infrastructure for economic development in my state. Even in this age of the new economy and high-speed digital communications, roads are essential to link our communities together and to carry the commercial goods and products our citizens need. Safe and efficient highways are especially important to citizens in the rural parts of New Mexico. It is well known that regions with four-lane highways are readily attract out-of-state visitors and new jobs. Truck drivers and the traveling public prefer the safety of a four-lane divided highway.

In New Mexico, US 54 is a fairly level route, bypassing New Mexico’s mountain ranges. The route also traverses some of New Mexico’s most dramatic scenery, including one of the State’s popular designated Scenic Byways. The Mesalands Scenic Byway is located in Quay and Guadalupe Counties, incorporating the beautiful tablelands known as El Llano Estacado. The SPIRIT corridor also passes through Alamogordo, home of the New Mexico Museum of Space History, and Tularosa, home of the renowned White Sands National Monument.

The route of the Southwest Passage starts at Juarez, Chihuahua, Mexico, home of one of the largest concentrations of manufacturing in the border region. As a result of increased trade under NAFTA, commercial border traffic is already increasing at the border crossings in El Paso, TX, and Santa Teresa, NM. In New Mexico, truck traffic from the border has risen to over 1,000 per day and is expected to triple in the next twenty years. The SPIRIT corridor is perfectly situated to serve international trade and promote economic development along its entire route. The route provides direct connections to four major Interstate Highways: I-10, I-35, I-40, and I-70. SPIRIT is also the shortest route between Chicago and El Paso, shaving 137 miles off the major alternative.

Though much of US 54 is currently only two-lane divided, it has been proposed to dramatically along the entire route since NAFTA was implemented. In New Mexico, total daily traffic levels are nearing 10,000 and are projected to rise to 30,000, with trucks making up 35 percent of the total. In Oklahoma, traffic levels are about 6,500 per day, 40 percent of which are commercial trucks. These traffic statistics clearly reflect the SPIRIT corridor’s attraction to commercial and passenger drivers.

New Mexicans recognize the importance of efficient roads to economic development and safety. I have long supported my State’s efforts to complete the four-lane upgrade of US 54. The State Highway and Transportation Department now rates the project a high priority for New Mexico. The four-lane upgrade of the first 56-mile segment from the Texas border to Alamogordo is underway and will be completed in the next year. Two more sections in New Mexico remain to be upgraded: 163 miles from Tularosa, north through Carrizozo, Corona, and Vaughn to Santa Rosa and 50 miles from Tucumcari to the Texas border near Nara Vista in Quay County. The cost to four-lane these two segments is estimated at $329 million and $85 million, respectively. I am committed to working to help secure the funding required to complete New Mexico’s four-lane upgrade as soon as possible. I am pleased the other States are also moving quickly to four-lane their portion of the route. I hope designating SPIRIT as a High Priority Corridor on the National Highway System will help spur the completion of this project.

Once the SPIRIT corridor is designated, New Mexico will have four high-priority corridors on the National Highway System. The other three are the Ports-to-Plains corridor, the Camino Real Corridor, and the East West Transamericca Corridor. These four high-priority corridors, as well as our close proximity to the border, strongly underscore the vital role New Mexico plays in our Nation’s international transportation network.

The SPIRIT Project has broad grassroots support. Most of the cities, counties, and chambers of commerce all the way from Wichita to El Paso have passed resolutions of support for the four-lane upgrade of US 54 along the entire corridor.

I do believe the four-lane upgrade of Highway 54 is vital to the continued economic development for all of the communities along the SPIRIT corridor in New Mexico.

I want to thank Senator ROBERTS for cosponsoring the bill, and I hope all Senators will join us in support of this important legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1986

Be it enacted by the Senate and House of Representatives of the United States of America in Congress Assembled,

SECTION 1. SOUTHWEST PASSAGE INITIATIVE FOR REGIONAL AND INTERSTATE TRANSPORTATION.

Section 1105(c) of the Intermodal Surface Transportation Efficiency Act of 1991 (105 Stat. 2032) is amended by adding at the end the following:

"(45) The corridor extending from the point on the border between the United States and Mexico in the State of Texas at which United States Route 54 begins, along United States Route 54 through the States of Texas, New Mexico, Oklahoma, and Kansas, and ending in Wichita, Kansas, to be known as the "Southwest Passage Initiative for Regional and Interstate Transportation Corridor" or "SPIRIT Corridor"."
By Mr. SMITH of New Hampshire
(for himself, Mr. FREINGOLD, and Mr. MCCAIN):
S. 87. A bill to provide for reform of the Corps of Engineers, and for other purposes; to the Committee on Environmental Protection.

Mr. SMITH of New Hampshire. Mr. President, together with my friend from Arizona, Mr. MCCAIN, and my friend from Wisconsin, Mr. FREINGOLD, I am introducing the Corps of Engineers Modernization and Improvement Act of 2002. “Corps Reform”, as it is frequently billed, has been the subject of much heated debate over the last two years. In fact, the Water Resources Development Act of 2000 included a proviso on independent peer review, requested by Senator FEINGOLD.

Since that time, it has become clear to me that we need to aggressively address a broad range of issue endemic in the Corps. That is why I am before you today, introducing this bill. The Corps has become a symbol of “the Fleecing of America” too many times. My primary goal is to ensure that Federal taxpayer dollars are spent wisely, on sound investments that are in the national interest. Our bill achieves this goal by addressing the non-Federal or “backlog” of projects that plagues the Corps; changing the cost-benefit ratio that a project must meet in order to be economically justified; updating of the Principles and Guidelines; instituting independent review of certain projects; amending some of the cost-share requirements; and limiting the waivers of non-Federal cost-shares often granted to communities.

It has been projected that there is currently a construction backlog of well over $10 billion in authorized projects, with annual appropriations for the construction account of the civil works mission averaging around $1.8 billion. As such, the majority of the backlog will not see a Federal dime. While a great number of these projects are meritorious and deserve funding, others are not in the Corps mission, are no longer economically justified, or violate non-Federal cost-share requirements.

Our bill would require the Corps to provide a list of projects in the backlog, categorizing each project as “active,” “deferred,” “inactive.” There would be a deauthorization mechanism, more stringent than current law, for projects that have never received construction funds, for projects that have been suspended, and for those that don’t pass economic muster.

In addition, there are projects “on the books” that are more than 25 years old, which have never received construction funds. These projects should be deauthorized immediately. The Environment and Public Works Committee can authorize a restudy if any of these projects are thought to have modern benefits and meet the requisite standards.

Currently, projects are only required to meet a 1:1 cost-benefit ratio. I find this appalling. No one would invest in the stock market at such a return. According to the Taxpayers for Common Sense, 36 percent of the 310 major projects authorized since 1986 have been authorized with a benefit-to-cost ratio of less than 1.5. Construction of these projects would cost more than $7 billion. Especially in these times of war and deficit spending, taxpayers cannot afford, nor should be asked to fund such projects. My bill would require that pretax return on benefits that are one and a half times the project costs, a vast improvement over current practice.

My friends, do not fear deauthorization. It is a cleansing process, getting the inactive projects off the books will only serve to better the chances of completed funding for those projects that remain.

I would also like to highlight the independent review provision in my bill. S. 1987. A bill to provide for reform of the National Academy of Sciences to issue a report making recommendations on the effectiveness of independent peer review. Many will ask, why not wait until the Academy’s report is issued before addressing this issue in legislation. I would say to my colleagues, if the Academy makes recommendations that differ from what I have included in this bill, I am open to making refinements as this bill moves through the legislative process. But I wanted to include this provision in the current review to highlight the importance of the issue, as well as my belief that such review will help restore integrity to the Corps and its study processes.

Let me say a word about cost-shares. I think it is important that a non-Federal sponsor partner with the Federal Government in the advancement of Corps of Engineers projects. The landmark WRDA 1986 established most of the modern cost-share formulas. But some of the percentages remain out of date, and could be stronger. For example, the benefits realized by beach replenishment projects are highly localized. The non-Federal interests should thus be responsible for a larger portion of the replenishment costs. I also believe that there should be a financial incentive, in the form of a better cost share, for non-structural flood damage reduction projects. This only seems logical from a financial sense, as well as an environmental standpoint for the costs associated with the Inland Waterways system, IWS, there should be a distinction between those segments of the System that carry most of the traffic and those that are underutilized. Approximately 30 percent of the Operations and Maintenance funds are devoted to segments of the IWS that realize a mere 3 percent of the traffic. My bill attempts to address this issue by reformulating how O&M costs are paid.

As for where we go from here, the Senate Environment and Public Works Committee will hold a hearing on the bill of Corps Reform in the upcoming months. I expect this bill to be part of the debate of the hearing.

Average Americans live their daily lives, all the while trying to make meager ends meet. How can I look at these Americans in the eye and say, your tax dollars pay to maintain a waterway that sees two barges a year or to replenish the sand on a beach where perhaps only 10 percent of the traffic sees it? Taxpayer dollars should be spent more wisely than hand over fist to hard-crowned coffers, to be spent on the beaches of the wealthy. Taxpayer dollars should be spent more wisely than to maintain deadbeat waterways. Particularly during this time of belt-tcinching, we should show more fiscal restraint!

I would like to quote another Mr. Smith, that is, Mr. Smith of Maine, who served on the House Committee of Ways and Means. Well, folks, you remember the old saying: “To every age, to every country, to every need, to every age, to every country, to every need, to every time, God hath appointed a medicine. It is a start. I challenge, as we move forward, please understand that I am open to suggestions as to how to improve upon the ideas embodied in this bill. I want to work together with my colleagues to make
this bill as meaningful, responsive, and responsible as possible.

Please join me in advancing this fiscally responsible legislation.

Our bill is supported by taxpayer advocacy groups such as the Taxpayers for Common Sense, National Taxpayers Union, Citizens Against Government Waste, as well as environmental groups, for example, National Wildlife Federation and Environmental Defense. I urge some of our friends and colleagues to support this bill without objection.

There being no objection, the letters were ordered to be printed in the RECORD.

Sincerely,

JOE THREISSEN,
Executive Director.

Mr. FEINGOLD. Mr. President, I rise today to join the Senator from New Hampshire, Mr. SMITH, in introducing the Corps of Engineers Modernization and Improvement Act of 2002. I am very pleased to be working with him on this issue, and admire his dedication to fiscal responsibility as embodied in this measure.

As the Senator from New Hampshire, Mr. SMITH, and I introduce this bill, we realize that Corps Reform is a work in progress. Reforming the Corps of Engineers will be a difficult task for Congress. It involves restoring credibility and accountability to a Federal agency rocked by scandals and constrained by ever-expanding authorizations and a gloomy Federal fiscal picture, and yet an agency that Wisconsin, and many other States across the country, have come to rely upon. From the Great Lakes to the mighty Mississippi, the Corps is involved in providing aids to navigation, environmental remediation, water control and a variety of other services to my state. My office has strong working relationships with the Detroit, Rock Island, and St. Paul Districts, Offices to Minneapolis, and I want the fiscal and management cloud over the Corps to dissipate so that the Corps can continue to contribute to our environment and our economy.

This legislation evolved from my experience in seeking to offer an amendment to the Water Resources Development Act of 2000 to create independent review of Army Corps of Engineers projects. In response to my initiative, the Fiscal and Management Act of 2001, S. 646. The measures the Senator from New Hampshire, Mr. SMITH, and the then Chairman, the Senator from Montana, Mr. BAUCUS, adopted an amendment as part of their Manager's Package which should help get the Authorization Committee, the Environment, and Public Works Committee, the additional information it needs to develop and refine legislation on this issue through a study by the National Academy of Sciences, NAS, on peer review.

Earlier this Congress, I introduced the Corps of Engineers Reform Act of 2001, S. 646. The measure the Senator from New Hampshire and I introduce
today includes many provisions that were included in my original bill, and codifies the idea of independent review of the Corps about which we agreed in the 2000 Water Resources bill. It also provides a mechanism to speed up completion of some Corps projects with large public benefits by deauthorizing low priority and economically wasteful projects. The bill put forward bold concepts. It streamlines the existing automatic deauthorization process. Under the bill a project authorized for construction but never started is deauthorized if it is denied appropriations funds towards completion of construction for five straight years. In addition, a project that has begun construction but denied appropriations funds towards completion for three straight years. The bill also preserves Congressional prerogative over setting the Corps’ construction priorities by allowing Congress a chance to reauthorize any of these projects before they are automatically deauthorized. This process will be transparently to all interests, because the bill requires the Corps to make an annual list of projects in the construction backlog available to Congress and the public at large. The bill also allows a point of order to be raised in the Senate against projects included in legislation for which the Corps has not completed necessary studies determining that a project is economically justified and in the federal interest. The process will be transparently to all interests, because the bill requires the Corps to make an annual list of projects in the construction backlog available to Congress and the public at large. The bill also allows a point of order to be raised in the Senate against projects included in legislation for which the Corps has not completed necessary studies determining that a project is economically justified and in the federal interest.

The Senator from New Hampshire and I came to a meeting of the minds on the issue of independent review of Corps projects. But the bill we introduced today is much more than that. It is a comprehensive revision of the project review and authorization procedures at the U.S. Army Corps of Engineers. Our joint goal is to have the Corps increase transparency and accountability, to ensure fiscal responsibility, and to allow greater stakeholder involvement in their projects. We are committed to that goal, and to seeing Corps Reform enacted as part of this year’s Water Resources bill.

I also look forward, to the upcoming hearing process, and stand ready to work with the Senator from New Hampshire in merging the bill we introduce today with S. 646, my bill from earlier this Congress. My bill, S. 646, which is sponsored in the other body by my colleague from Wisconsin, Representative KIND, includes a number of important concepts that are central to environmental protection and that should be part of Corps Reform.

The Corps is required to mitigate the environmental impacts of its projects in a variety of ways, including by avoiding damaging wetlands in the first place and either holding other lands or constructing wetlands elsewhere when it cannot avoid destroying them. The Corps requires private developers to commit projects as a condition of receiving a federal permit, and I think the federal government should live up to the same standards. Too often, the Corps does not complete required mitigation and enhances environmental risks. I feel very strongly that mitigation must be completed, that the true costs of mitigation should be accounted for in Corps projects, and that the public should have the ability to track the progress of mitigation projects. In addition, the concurrent mitigation requirements of S. 646 would actually reduce the total mitigation costs by ensuring the purchase of mitigation lands as soon as possible. It is forward thinking to be exploring these ideas with the Senator from New Hampshire as we work to produce a final product.

I feel that this bill is an important step down the road to a reformed Corps of Engineers. This bill establishes a framework to catch mistakes by Corps planners, deter any potential bad behavior by Corps officials to justify questionable projects, end old unjustified projects, and provide planners descriptive information. It is a never ending pressure of project boosters. Those boosters, include Congressional interests, which is why I believe that this body needs to champion reform—to end the perception that Corps projects are all pork and no substance.

I wish it were the case, that I could argue that the changes we are proposing today were not needed, but unfortunately, I see that there is need for this bill. I want to make sure that future Corps projects no longer fall to produce predictable results, stop costing the taxpayers more than the Corps estimated, do not have unanticipated environmental impacts, and are built in an environmentally compatible way. This bill will help the Corps do a better job which is what the taxpayers and the environment deserve.

By Ms. LANDRIEU:

S. 1988. A bill to authorize the American Buffalo Soldiers Commission to establish in the State of Louisiana a memorial to honor the Buffalo Soldiers; to the Committee on Energy and Natural Resources.

Ms. LANDRIEU. Mr. President, one hundred and thirty-five years ago, before the term Homeland Security was even coined, a group of men devoted themselves to securing the frontiers of this Nation. They protected Americans in their homes; they deterred hostile invaders, and they secured the blessings of liberty to the people of this land. Even more remarkable, they secured these blessings for others, while they could not fully enjoy them themselves.

I am referring to the Buffalo Soldiers. These brave men instituted a tradition of professional military service for African Americans that stretches one hundred and thirty-five years to our triumphs occurring this very day. African Americans military service, I love this Nation. There were black soldiers during the revolution, a unit of free black men played a pivotal role in the Battle of New Orleans, and the exploits of African Americans during the Civil War have been captured in novels and on film. However, it was not until the Army Reorganization Act of 1866 that soldiering and service to country became a reality for African Americans seeking to improve their quality of life. In so doing, they raised the bar of freedom, and revealed the injustice of preventing the defenders of democracy from fully participating in it.

Today, every one of us remembers the courage of our African American soldiers. But some of the legacy of the Buffalo Soldiers is unacknowledged in their home. For in Louisiana’s great military tradition, surely one of its greatest military contributions were the 9th Cavalry Regiment and the 25th Infantry Regiment. Those two forces, which are organized in New Orleans, represent half of all the units of buffalo soldiers. The 9th Cavalry alone constituted 10 percent of all the American cavalry. Their list of adversaries reads like a who’s who of the Old West, Geronimo, Sitting Bull, Blackfoot, and Apaches. In so doing, they raised the bar of freedom, and revealed the injustice of preventing the defenders of democracy from fully participating in it. By Ms. LANDRIEU:

owe them this public expression of gratitude.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 216—TO HONOR MILTON D. STEWART FOR HIS YEARS OF SERVICE IN THE OFFICE OF ADVOCACY OF THE SMALL BUSINESS ADMINISTRATION

Mr. KERRY (for himself, Mr. BOND, Mr. LIEBERMAN, Mr. BURNS, Mr. CLELAND, Mr. BENNETT, Ms. LANDRIEU, Ms. SNOWE, Mr. EDWARDS, Mr. CRAPO, Ms. CANTWELL, Mr. ALLEN, Mr. ENSIGN, Mr. WELSTONE, Mr. HARKIN, Mr. LEVIN) submitted the following resolution; which was considered and agreed to:

S. Res. 216

Whereas a vibrant and growing small business sector is vital to creating jobs in a dynamic economy;

Whereas reducing unnecessary regulatory burdens on small business promotes economic growth;

Whereas the Office of Advocacy of the Small Business Administration has been a key factor in working to minimize burdens on small business;

Whereas Milton D. Stewart, the first Chief Counsel for Advocacy, provided dynamic leadership in making the Office of Advocacy the effective voice for small business that it is today; and

Whereas Milton D. Stewart will be celebrating his 80th birthday on March 5, 2002:

Now, therefore, be it

Resolved, That the Senate—

(1) honors Milton D. Stewart for his many years of service to the small business community of the United States;

(2) thanks Mr. Stewart for his leadership in creating a strong and dynamic Office of Advocacy to help carry on that service in the future; and

(3) instructs the Secretary of the Senate to transmit an enrolled copy of this resolution to Milton D. Stewart.

AMENDMENTS SUBMITTED AND PROPOSED

SA 2979. Mr. MCCAIN (for himself, Mr. HOLLINGS, Mrs. MURRAY, Mr. BINGAMAN, Mr. BREAUX, Mr. SMITH of Oregon, Mr. DOMENICI, Mrs. HUTCHISON, and Mr. WYDEN) submitted an amendment intended to be proposed to amendment SA 2917 submitted by Mr. DASCHLE and intended to be proposed to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to lie on the table; as follows:

At the end of title VII, add the following:

Subtitle C—Pipeline Safety

PART I—SHORT TITLE: AMENDMENT OF TITLE 49, UNITED STATES CODE

PART II—PIPELINE SAFETY IMPROVEMENT ACT OF 2002

SHORT TITLE: AMENDMENT OF TITLE 49, UNITED STATES CODE

This subtitle may be cited as the "Pipeline Safety Improvement Act of 2002."
on operator qualification and training for purposes of this subsection.
(3) DUE DATE.—The Secretary shall submit the report required by paragraph (1) to the Committees not later than 12 months after the date of enactment of this Act.

SEC. 764. PIPELINE INTEGRITY INSPECTION PROGRAM.

Section 60109 is amended by adding at the end the following:

(c) INTEGRITY MANAGEMENT.—

(1) GENERAL.—The Secretary shall promulgate regulations requiring operators of hazardous liquid pipelines and natural gas transmission pipelines to evaluate the risk to their pipeline facilities in areas identified pursuant to subsection (a)(1), and to adopt and implement a program for integrity management that reduces the risk of such areas. The regulations shall be issued no later than one year after the Secretary has issued standards pursuant to subsections (a) and (b) of this section or by December 31, 2003, whichever is sooner.

(2) STANDARDS FOR PROGRAM.—In promulgating regulations under this section, the Secretary shall require an operator's integrity management plan to be based on risk analysis and each plan shall include, at a minimum:

(A) a periodic assessment of the integrity of the pipeline through methods including internal inspection, pressure testing, direct assessment, or other effective methods. The assessment must be done no less than once every 5 years unless the Department of Transportation Inspector General, after consultation with the Secretary determines there is not a sufficient capability or it is deemed unnecessary because of more technically appropriate monitoring or creates undue interruption of necessary supply to fulfill the requirements under this section;

(B) clearly defined criteria for evaluating the results of the periodic assessment methods carried out under subparagraph (A) and procedures to ensure identified problems are corrected in a timely manner; and

(C) measures, as appropriate, that prevent and mitigate unintended releases, such as leak detection, integrity evaluation, restrictive flow devices, or other measures.

(3) CRITERIA FOR PROGRAM STANDARDS.—In deciding whether the integrity assessment methods carried out under paragraph (2)(A) must be conducted, an operator shall take into account the potential for new defects, previously existing structural defects caused by construction or installation, the operational characteristics of the pipeline, and leak history. In addition, the Secretary may establish a minimum testing requirement for operators of pipelines to conduct internal inspections.

(4) 'OFFICE ROLE.—A State authority that has an agreement in effect with the Secretary under section 60106 is authorized to review and assess an operator's risk analyses and integrity management plans required under this section for interstate pipelines located in that State. The reviewing State authority shall provide the Secretary with a written assessment of the plans, make recommendations, as appropriate, to address safety concerns not adequately addressed in the operator's plans, and submit documentation evidencing the State-proposed plan revisions. The Secretary shall carefully consider the State's proposals and work in consultation with the States and operators to address safety concerns.

(5) MONITORING IMPLEMENTATION.—The Secretary of Transportation shall review the risk analysis and program for integrity management under this subsection and section 60109 for effectiveness and modify the program as necessary. The completed program shall include activities to advise affected municipalities, school districts, businesses, and residents of pipeline facility locations. The completed program shall be submitted to the Secretary or, in the case of an intrastate pipeline facility operator, the appropriate State agency.

(6) OPPORTUNITY FOR LOCAL INPUT ON INTEGRITY MANAGEMENT.—Not later than 12 months after the date of enactment of the Pipeline Safety Improvement Act of 2002, the Secretary shall, by regulation, establish a procedure for local officials to provide comments to the Secretary concerning the procedures to ensure identified problems are corrected and the manner in which the Secretary will notify the local officials about their concerns.

(b) EMERGENCY PREPAREDNESS.—

(1) OPERATOR LIABILITY.—

(A) a requirement that an operator of a hazardous liquid or natural gas transmission pipeline facility provide information about the risk analysis and integrity management plan required under this section to local officials in a State in which the facility is located;

(B) a description of the local officials required to be informed, the information that is to be provided to them and the manner, which may include traditional or electronic means, in which the information is to be provided; and

(C) the means for receiving input from the local officials that may include a public forum sponsored by the Secretary or by the State or the submission of written comments through traditional or electronic means;

(D) the extent to which an operator of a pipeline facility must participate in a public forum sponsored by the Secretary or in another means for receiving input from the local officials or in the evaluation of that input;

(E) the manner in which the Secretary will notify the local officials about how their concerns are being addressed.

(c) ENFORCEMENT.

(a) IN GENERAL.—Section 60112 is amended—

(1) by striking subsection (a) and inserting the following:

(1) OPERATOR AUTHORITY.—After notice and an opportunity for a hearing, the Secretary of Transportation may decide a pipeline facility is hazardous if the Secretary decides that—

(A) the operation of the facility is or would be hazardous to life, property, or the environment;

(B) the facility is, or would be, constructed or operated, or a component of the facility is, or would be, constructed, operated, and maintained in a manner that the Secretary determines is hazardous; or

(C) a requirement that an operator of a hazardous liquid or natural gas transmission pipeline facility provide information about the risk analysis and integrity management plan required under this section to local officials in a State in which the facility is located;

(2) the facility is, or would be, constructed or operated, or a component of the facility is, or would be, constructed, operated, and maintained in a manner that the Secretary determines is hazardous, and

(2) by striking "is hazardous," in subsection (d) and inserting "is or would be, hazardous.

(3) SMALLER COMMUNITIES.—In a community that has a population of not more than 1,000, the operator may establish an emergency planning committee, and shall make available to the Office of Pipeline Safety in a standardized form for the purpose of providing the information described in section 60102(d), the operator's program for integrity management, and information about implementation of that program. The information about the facility shall also include, at a minimum—

(A) the business name, address, telephone number of the operator, including a 24-hour emergency contact number;

(B) a description of the facility, including pipeline diameter, the type and number of pipeline parts, as well as the products carried, and the operating pressure;

(C) with respect to transmission pipeline facilities, maps showing the location of the transmission pipeline system, and a map showing the location of the areas which are to be included in the notification system, and a map identifying the location of such facility.

(4) RIGHT TO KNOW.—(A) a requirement that an operator of a hazardous liquid or natural gas transmission pipeline facility provide information about the risk analysis and integrity management plan required under this section to local officials in a State in which the facility is located;

(B) a description of the local officials required to be informed, the information that is to be provided to them and the manner, which may include traditional or electronic means, in which the information is to be provided; and

(C) the means for receiving input from the local officials that may include a public forum sponsored by the Secretary or by the State or the submission of written comments through traditional or electronic means;

(D) the extent to which an operator of a pipeline facility must participate in a public forum sponsored by the Secretary or in another means for receiving input from the local officials or in the evaluation of that input; and

(E) the manner in which the Secretary will notify the local officials about how their concerns are being addressed.

SEC. 765. ENFORCEMENT.

(a) IN GENERAL.—Section 60112 is amended—

(1) by striking subsection (a) and inserting the following:

(1) OPERATOR AUTHORITY.—After notice and an opportunity for a hearing, the Secretary of Transportation may decide a pipeline facility is hazardous if the Secretary decides that—

(A) the operation of the facility is or would be hazardous to life, property, or the environment; and

(B) the facility is, or would be, constructed or operated, or a component of the facility is, or would be, constructed, operated, and maintained in a manner that the Secretary determines is hazardous, and

(2) by striking "is hazardous," in subsection (d) and inserting "is or would be, hazardous.

(b) EMERGENCY PREPAREDNESS.—

(1) OPERATOR LIABILITY.—On request, make available to the State emergency response committees and local emergency planning committees in the areas of pipeline right-of-way, established under section 301 of the Emergency Planning and Community Right-To-Know Act of 1986 (42 U.S.C. 11001) in each State in which it operates.

(2) INFORMATION.—An operator shall, upon request, make available to the State emergency response committees and local emergency planning committees and shall make available to the Office of Pipeline Safety in a standardized form for the purpose of providing the information described in section 60102(d), the operator's program for integrity management, and information about implementation of that program. The information about the facility shall also include, at a minimum—

(A) the business name, address, telephone number of the operator, including a 24-hour emergency contact number;

(B) a description of the facility, including pipeline diameter, the type and number of pipeline parts, as well as the products carried, and the operating pressure;

(C) with respect to transmission pipeline facilities, maps showing the location of the transmission pipeline system, and a map showing the location of the areas which are to be included in the notification system, and a map identifying the location of such facility.

(D) a summary description of the integrity measures the operator uses to assure safety and protection for the environment; and

(E) a point of contact to respond to questions from emergency response representatives.

(3) SMALLER COMMUNITIES.—In a community that has a population of not more than 1,000, the operator may establish an emergency planning committee, and shall make available to the local fire, police, and other emergency response agencies.

(c) EMERGENCY PREPAREDNESS.—(1) A requirement that an operator of a hazardous liquid or natural gas transmission pipeline facility provide information about the risk analysis and integrity management plan required under this section to local officials in a State in which the facility is located;
The map may be provided in electronic form. The Secretary may provide technical assistance to the pipeline industry on developing public safety and public education program content. The Secretary may issue regulations for program delivery, and on evaluating the effectiveness of the programs. The Secretary may also provide technical assistance to State and local officials in applying practices developed in these programs to their activities to promote pipeline safety.

(d) Public Availability of Reports.—The Secretary shall:

1. make available to the public—
   (A) a safety-related condition report filed by an operator under section 60102(h); and
   (B) a report of a pipeline incident filed by an operator;
2. give the results of any inspection by the Office of Pipeline Safety or a State regulatory official; and
3. describe any corrective action taken in response to a safety-related condition reported under subparagraph (A), (B), or (C); and
4. prescribe requirements for public access, as appropriate, to integrity management programs put into place before this chapter, including requirements that will ensure data accessibility to the greatest extent feasible.

(F) Final Condition Reports.—Section 60102(h)(2) is amended by striking “authorities,” and inserting “officials, including the local emergency responders.”

(C) CONFORMING AMENDMENT.—The chapter analysis for chapter 601 is amended by striking the following:

“601.06. Public education, emergency preparedness, community right to know.”

SEC. 768. STATE OVERSIGHT ROLE.

(a) State Agreements with Certification.—Section 60102(h) is amended by striking subparagraphs (A) and (B) and inserting the following:

“(A) the Secretary accepts a certification under section 60105 of this title and makes the determination required under this subsection; or
(B) the interstate participation agreement is amended to read as follows:

‘‘(a) CIVIL PENALTIES.—(1) the Secretary shall consider
(A) the economic benefit gained from the violation
(B) other matters that justice requires.
(2) PENALTY CONSIDERATIONS.—In determining the amount of a civil penalty under this section—
(1) the Secretary shall consider—
(A) the circumstances, and gravity of the violation, including adverse impact on the environment;
(B) with respect to the violator, the degree of culpability, any history of prior violations, the ability to pay, any effect on ability to continue doing business; and
(C) good faith in attempting to comply; and
(2) the Secretary may consider—
(A) the economic benefit gained from the violation, without a discount because of subsequent damages; and
(B) other matters that justice requires.”

(b) Excavator Damage.—Section 60123(a) is amended by inserting—

“(b) ENSUING AGREEMENT.—Subsection (e) of section 60106, as redesignated by subsection (a), is amended to read as follows:

‘‘(1) PERMISSIVE TERMINATION.—The Secretary may end an agreement under this section when the Secretary finds that the State authority has not complied with any provision of the agreement.

(2) MANDATORY TERMINATION OF AGREEMENT.—The Secretary shall end an agreement if the following:
(A) implementation of such agreement has resulted in a gap in the oversight responsibilities of the State authority for the interstate pipeline transportation if the Secretary finds that—
(1) the agreement allowing participation by the State actions under the agreement have failed to meet the requirements under subsection (b); or
(2) continued participation by the State authority in the oversight of interstate pipeline transportation would not promote pipeline safety.
(B) interstate agreement in effect after January, 1999, to oversee interstate pipeline transportation have failed to meet the requirements of paragraph (1) or (2); or
(C) the interstate participation agreement would not adversely affect the oversight responsibilities of the State authority to participate in special investigations involving incidents or new construction and allow the Secretary to participate in other activities overseeing interstate pipeline transportation or to assume additional inspection or investigatory duties.
Nothing in this section modifies section 60122 where the Secretary shall develop and implement a comprehensive plan for the collection and use of data necessary to ensure that the oversight responsibilities under this chapter, including section 60112 of this chapter, are consistent with the safety policies and provisions provided under this chapter; or
(D) the interstate participation agreement would not adversely affect the oversight responsibilities of the State authority to participate in special investigations involving incidents or new construction and allow the Secretary to participate in other activities overseeing interstate pipeline transportation or to assume additional inspection or investigatory duties.
Nothing in this section modifies section 60122 where the Secretary shall develop and implement a comprehensive plan for the collection and use of data necessary to ensure that the oversight responsibilities under this chapter, including section 60112 of this chapter, are consistent with the safety policies and provisions provided under this chapter; or
(2) DETERMINATION REQUIRED.—The Secretary may not enter into an agreement under this subsection, unless the Secretary determines—
(A) the agreement allowing participation of the State authority is consistent with the Secretary’s program for inspection and consistent with the safety policies and provisions provided under this chapter;
(B) the interstate participation agreement would not adversely affect the oversight responsibilities of the State authority to participate in special investigations involving incidents or new construction and allow the Secretary to participate in other activities overseeing interstate pipeline transportation or to assume additional inspection or investigatory duties;
(C) the State is carrying out a program demonstrated to promote preparedness and risk prevention that enable communities to live safely with pipelines;
(D) the State meets the minimum standards for State one-call notification set forth in chapter 61; and
(E) the actions planned under the agreement would not impede interstate commerce or jeopardize public safety.

(3) EXISTING AGREEMENTS.—If requested by the Secretary, the Secretary shall authorize a State authority which had an interstate agreement in effect after January, 1999, to oversee interstate pipeline transportation pursuant to the terms of that agreement until the Secretary determines that the State meets the requirements of paragraphs (1) and (2) and executes a new agreement, or until December 31, 2003, whichever is sooner.
Nothing in this paragraph shall prevent the Secretary, after affording the State notice, from terminating the agreement to correct any alleged deficiencies, from terminating an agreement that was in effect before enactment of the Pipeline Safety Improvement Act of 2002; or
(4) continued participation by the State authority in the oversight of interstate pipeline transportation has had an adverse impact on pipeline safety.”

SEC. 769. IMPROVED DATA AND DATA AVAILABILITY.

(a) In General.—Within 12 months after the date of enactment of this Act, the Secretary shall develop and implement a comprehensive plan for the collection and use of gas and hazardous liquid pipeline data to revise the causal categories on the incident report forms to eliminate overlapping and confusing categories and include subcategories. The plan shall include components to provide the capability to perform sound incident trend analysis and evaluations of pipeline operator performance using normalized accident data.

(b) Report of Releases Exceeding 5 Gallons.—Section 60117(b) is amended—

(1) by inserting—

“(2) by redesignating paragraphs (1) and (2) as subparagraphs (A) and (B); and
(3) inserting before the last sentence the following:

‘‘(2) A person owning or operating a hazardous liquid pipeline facility shall report to the Secretary each release to the environment greater than five gallons of the hazardous liquid or carbon dioxide transported. This section applies to releases from pipeline facilities regulated under the act. A report must include the location of the release, fatalities and personal injuries, type of product, amount of product released, cause or causes of the release, extent of damage to property and the environment, and the response undertaken to clean up the release.
(3) During the course of an incident investigation, a person owning or operating a pipeline facility shall make records, reports, and information required under subsection (a) of this section or other reasonably relevant records, reports, or information relevant to the incident investigation, available to the Secretary within the time limits prescribed in a written request;’’ after “The Secretary.”

(c) Implementation.—The Secretary shall designate the final date of the last sentence and inserting—

“(d) The Secretary shall designate the final date of the last sentence and inserting—

‘‘The Secretary.”’’ after “The Secretary.”

S1544  CONGRESSIONAL RECORD — SATE  March 5, 2002
(c) PENALTY AUTHORITIES.—(1) Section 60122(a) is amended by striking “60114(c)” and inserting “60117(b)”; and
(2) Section 60123(a) is amended by striking “60117(b)” and inserting “60117(b)(3)”.

(d) ESTABLISHMENT OF NATIONAL DEPOSITORY.—Section 60117 is amended by adding at the end the following:

“(1) of utilization.—The Secretary shall establish a national depository of data on events and conditions, including spills histories and corrective actions for specific incidents, that can be used to evaluate the risk of, and to prevent pipeline failures and releases. The Secretary shall administer the program through the Bureau of Transportation and the Research and Special Programs Administration, and shall make such information available for use by State and local planning and emergency response authorities and the public.”

SEC. 770. RESEARCH AND DEVELOPMENT.

(a) INNOVATIVE TECHNOLOGY DEVELOPMENT.

(1) IN GENERAL.—As part of the Department of Transportation’s research and development program, the Secretary of Transportation shall direct research attention to the development of innovative technologies that can accommodate internal inspection devices to identify and accurately measure defects and anomalies;

(2) PURPOSE. The Secretary may participate in additional technological development through cooperative agreements with trade associations, academic institutions, or other qualified organizations.

(b) PIPELINE SAFETY AND RELIABILITY RESEARCH AND DEVELOPMENT.

(1) IN GENERAL.—The Secretary of Transportation, in coordination with the Secretary of Energy, shall develop and implement an accelerated cooperative program of research and development to ensure the integrity of natural gas and hazardous liquid pipelines.

(2) COOPERATIVE. The Secretary may participate in additional technological development through cooperative agreements with trade associations, academic institutions, or other qualified organizations.

(3) POINTS OF CONTACT. The Secretary shall consult with appropriate representatives of the natural gas, crude oil, and petroleum product pipeline industries to select and prioritize appropriate project proposals. The Secretary may also seek the advice of utilities, manufacturers of higher learning, Federal agencies, the pipeline research institutions, national laboratories, State pipeline safety officials, energy researchers, pipeline safety advocates, and professional and technical societies.

(4) IMPLEMENTATION. The Secretary of Transportation shall have primary responsibility for ensuring the 5-year plan provided for in paragraph (5) is implemented as intended. In carrying out the research, development, and demonstration activities under this subsection, the Secretary of Transportation and the Secretary of Energy may use, to the extent authorized under applicable provisions of law, contracts, cooperative agreements, research and development agreements under the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 737 et seq.), grants, joint ventures, other transactions, and any other form of agreement available to the Secretary consistent with the recommendations of the Advisory Committee.

(5) REPORTS TO CONGRESS. The Secretary of Transportation shall report to the Congress annually as to the status and results to date of the implementation of the research and development program plan. The report shall include the activities of the Department of Transportation and Energy, the laboratories, and any other research organizations, including industry research organizations.

SEC. 771. PIPELINE INTEGRITY TECHNICAL ADVISORY COMMITTEE.

(a) ESTABLISHMENT.—The Secretary of Transportation shall enter into appropriate arrangements with the National Academy of Sciences to establish and manage the Pipeline Integrity Technical Advisory Committee for the purpose of advising the Secretary of Transportation and the Secretary of Energy on the research and development and demonstration program plan under section 770(b)(5).

(b) MEMBERSHIP. The National Academy of Sciences shall appoint the members of the Pipeline Integrity Technical Advisory Committee after consultation with the Secretary of Transportation and the Secretary of Energy. Members appointed to the Advisory Committee should have the necessary qualifications to provide technical contributions to the purposes of the Advisory Committee.

SEC. 772. AUTHORIZATION OF APPROPRIATIONS.

(a) GAS AND HAZARDOUS LIQUIDS. Section 60125(a) is amended to read as follows:

“(a) GAS AND HAZARDOUS LIQUID.—To carry out this chapter and other pipeline-related damage prevention activities of this title (except for section 60107), there are authorized to be appropriated to the Department of Transportation—$30,000,000 for each of the fiscal years 2003, 2004, and 2005 of which $25,000,000 is to be derived from user fees for fiscal years 2003, 2004, and 2005 collected under section 60901 of this title.

(b) GRANTS TO STATES. Section 60125(c) is amended to read as follows:

“(c) STATE GRANTS.—Not more than the following amounts shall be paid to the Secretary to carry out section 60107—

$20,000,000 for the fiscal years 2003, 2004, and
S1546

CONGRESSIONAL RECORD — SENATE
March 5, 2002

2005 of which $18,000,000 is to be derived from user fees for fiscal years 2003, 2004, and 2005 collected under section 60301 of this title:—.

(c) Oil Spills.—Section 6012(b) is amended by renumbering paragraphs (d), (e), and (f) as subsections (e), (f), and (g) and inserting after subsection (c) the following:

"(d) OIL SPILL LIABILITY TRUST FUND.—Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(d) DEPARTMENT OF LABOR PROGRAM.—(1) There are authorized to be appropriated to the Secretary of Transportation for carrying out sections 770(b) and 771 of this subtitle $3,000,000 to be derived from user fees under section 60301 of title 49, United States Code, for each of the fiscal years 2003 through 2007.

(2) There are authorized to be appropriated to the Secretary of Transportation for carrying out sections 770(b) and 771 of this subtitle such sums as may be necessary for each of the fiscal years 2003 through 2007.

(iii) CRITERIA FOR DETERMINATION BY SECRETARY.—The Secretary may determine that a violation of subsection (a) has occurred only if the complainant demonstrates that any behavior described in paragraphs (1) through (4) of subsection (a) was a contributing factor in the involuntary personnel action in the absence of that behavior.

(iv) PROHIBITION.—Relief may not be ordered under subparagraph (A) if the employer demonstrates by convincing evidence that the employer would have taken the same involuntary personnel action in the absence of that behavior.

(b) DEPARTMENT OF LABOR COMPLAINT PROCEDURE.—

(1) FILING AND NOTIFICATION.—A person who believes that has been discharged or otherwise discriminated against by any person in violation of subsection (a) may, not later than 90 days after the date on which such discharge or discrimination occurred (i) file (or have filed on his or her behalf) a complaint with the Secretary of Labor alleging such discharge or discrimination. Upon receipt of a complaint under paragraph (1), the Secretary of Labor shall notify, in writing, the person named in the complaint and the Administrator of the Federal Energy Administration of the filing of the complaint, of the allegations contained in the complaint, of the substance of evidence supporting the complaint, and of the opportunities that will be afforded to such person under paragraph (2).

(2) INVESTIGATION: PRELIMINARY ORDER.—

(A) DEADLINE FOR ISSUANCE; SETTLEMENT AGREEMENTS.—Not later than 120 days after the date of conclusion of a hearing under paragraph (2), the Secretary of Labor shall issue a final order providing the relief prescribed by this paragraph or denying the complaint. At any time before issuance of a final order under this subsection or the complaint may be settled, the Secretary of Labor may issue a preliminary order. Such hearings shall be conducted ex parte, and an opportunity for a hearing, that the Secretary to present statements from witnesses, the Secretary of Labor shall conduct an investigation and determine whether there is reasonable cause to believe that the violation alleged in the complaint has merit and notify in writing the President, the Congress, and the claimant that any behavior described in paragraphs (1) through (4) of subsection (a) was a contributing factor in the involuntary personnel action in the absence of that behavior.

(b) DEPARTMENT OF LABOR COMPLAINT PROCEDURE.—

(i) FILING AND NOTIFICATION.—A person who believes that has been discharged or otherwise discriminated against by any person in violation of subsection (a) may, not later than 90 days after the date on which such discharge or discrimination occurred (i) file (or have filed on his or her behalf) a complaint with the Secretary of Labor alleging such discharge or discrimination. Upon receipt of a complaint under paragraph (2), the Secretary of Labor shall order the person who committed the violation to cease and desist from such discharge or discrimination. The Secretary shall include in the complaint a notice that any behavior described in paragraphs (1) through (4) of subsection (a) was a contributing factor in the involuntary personnel action in the absence of that behavior.

(ii) CRITERIA FOR DETERMINATION BY SECRETARY.—The Secretary may determine that a violation of subsection (a) has occurred only if the complainant demonstrates that any behavior described in paragraphs (1) through (4) of subsection (a) was a contributing factor in the involuntary personnel action in the absence of that behavior.

(iii) PROHIBITION.—Relief may not be ordered under subparagraph (A) if the employer demonstrates by convincing evidence that the employer would have taken the same involuntary personnel action in the absence of that behavior.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.

(c) OIL SPILL LIABILITY TRUST FUND.

Of the amounts available in the Oil Spill Liability Trust Fund, $8,000,000 shall be transferred to the Secretary of Transportation, as provided in appropriation Acts, to carry out programs authorized in this title for each of fiscal years 2003, 2004, and 2005.
of such violation. The petition for review must be filed not later than 60 days after the date of issuance of the final order of the Secretary of Labor. Review shall conform to chapter 12 of title 28, United States Code, and the commencement of proceedings under this subparagraph shall not, unless ordered by the court, operate as a stay of the order.

(5) ENFORCEMENT OF ORDER BY SECRETARY OF LABOR.—Whenever any person has failed to comply with an order issued under paragraph (3), the Secretary of Labor may file a civil action in the United States district court for the district in which the violation was found to occur to enforce such order. In actions brought under this paragraph, the district courts shall have jurisdiction to grant all appropriate relief, including, but not to be limited to, injunctive relief and compensatory damages.

(6) ENFORCEMENT OF ORDER BY PARTIES.—(A) COMMENCEMENT OF ACTION.—A person on whom an order is issued under subparagraph (3) may commence a civil action against the person to whom such order was issued to require compliance with such order. The action may be brought in the United States district court in which the violation occurred, without regard to the amount in controversy or the citizenship of the parties, to enforce such order.

(B) ATTORNEY FEES.—The court, in issuing any final order under this paragraph, may award costs of litigation (including reasonable attorney and expert witness fees) to any party whenever the court determines such award costs is appropriate.

(c) MANADAMUS.—any nondiscretionary duty imposed by this section shall be enforceable in a mandamus proceeding brought under section 1361 of title 28, United States Code.

(d) NONAPPLICABILITY TO DELIBERATE VIOLATION.—Subsection (a) shall not apply with respect to an employee of a pipeline, contractor or subcontractor who, acting without direction from the pipeline contractor or subcontractor (or such person’s agent), deliberately causes a violation of any requirement relating to pipeline safety under this chapter or any other law of the United States.

(e) CONTRACTOR DEFINED.—In this section, the term ‘contractor’ means a company that performs regulatory functions by contract for a pipeline.”.

(b) CIVIL PENALTY.—Section 60122(a) is amended by adding at the end following:

“(2) CIVIL PENALTY; — A person violating section 60129, or an order issued thereunder, is liable to the Government for a civil penalty not more than $1,000 for each violation. The penalties provided for in this section shall not apply to an order issued thereunder.”.

(c) CONFIRMING AMENDMENT.—The chapter analysis for chapter 601 is amended by adding at the end following:

“60129. Protection of employees providing pipeline safety information.”.

SEC. 755. STATE PIPELINE SAFETY ADVISORY COMMITTEE.

Within 90 days after receiving recommendations for improvements to pipeline safety from an advisory committee appointed by the Governor of any State, the Secretary of Transportation shall respond in writing to the committee setting forth what action, if any, the Secretary will take on those recommendations and the Secretary’s reasons for acting or not acting upon any of the recommendations.

SEC. 776. FINES AND PENALTIES.

The Inspector General of the Department of Transportation shall conduct an analysis of the Department’s assessment of fines and penalties for violations of hazardous liquid pipelines, including the cost of corrective actions required by the Department in lieu of fines, and, no later than 6 months after the completion of this report, shall provide a report to the Senate Committee on Commerce, Science, and Transportation and the House Committee on Transportation and Infrastructure. The report shall include recommendations for actions by the Secretary or Congress to ensure the fines assessed are an effective deterrent for reducing safety risks.

SEC. 777. STUDY OF RIGHTS-OF-WAY.

The Secretary of Transportation is authorized to conduct a study on how best to preserve environmental resources in conjunction with maintaining pipeline rights-of-way. The study shall analyze for chapter 601 is amended by adding at the end the following:

“... the recommendations.

Whenever any person has failed to comply with an order thereunder, is liable to the Government for a civil penalty of not more than $1,000 for each violation. The penalties provided for in this section shall not, unless ordered by the court, operate as a stay of the order.

(2) In California, natural gas prices have increased twenty-fold, from $3 per million British thermal units to nearly $60 per million British thermal units.

(3) One of the major causes of these price increases is a lack of supply, including a lack of natural gas reserves. The development of new natural gas reserves was commenced by the rupture of an El Paso Natural Gas Company pipeline in Carlsbad, New Mexico on August 1, 2001.

(5) Improving pipeline safety will help prevent similar accidents that interrupt the supply of natural gas and will help save lives.

(6) It is also necessary to find solutions for the lack of natural gas reserves that could be used during emergencies.

(b) STUDY BY THE NATIONAL ACADEMY OF SCIENCES.—The Secretary of Energy shall request the National Academy of Sciences to conduct a study to—

(1) conduct a study to—

(1) determine the causes of recent increases in the price of natural gas, including whether the increases have been caused by problems with the supply of natural gas or by problems with the natural gas transmission system;

(b) IDENTIFY ANY FEDERAL OR STATE POLICIES THAT MAY HAVE CONTRIBUTED TO THE PRICE INCREASES; AND

(b) determine what Federal action would be necessary to improve the reserve supply of natural gas for use in situations of natural gas shortages and price increases, including determining the feasibility and advisability of a Federal strategic natural gas reserve system; and

(2) not later than 60 days after the date of enactment of this Act, submit to Congress a report on the results of the study.

SEC. 778. STUDY AND REPORT ON NATURAL GAS PIPELINE AND STORAGE FACILITIES IN NEW ENGLAND.

(a) STUDY.—The Federal Energy Regulatory Commission, in consultation with the Department of Energy, shall conduct a study on the natural gas pipeline transmission network in New England and natural gas storage facilities associated with that network.

(b) REPORT.—Not later than 60 days after the date of enactment of this Act, the Federal Energy Regulatory Commission shall prepare and submit to the Senate Committee on Energy and Natural Resources and the appropriate committees of the House of Representatives a report containing the results of the study conducted under subsection (a), including recommendations for assessing potential natural gas transmission and storage capacity problems in New England.

PART 3—PIPELINE SECURITY SENSITIVE INFORMATION.

SEC. 781. MEETING COMMUNITY RIGHT TO KNOW WITHOUT SECURITY RISKS.

Section 60117 is amended by adding at the end the following:

“(1) WITHHOLDING CERTAIN INFORMATION.—

“(1) IN GENERAL.—Notwithstanding any other provision of this chapter requiring the Secretary to provide information obtained by the Secretary or an officer, employee, or agent in carrying out this chapter to the public or any other person, the Secretary shall withhold such information if it is information that is described in section 552(b)(1)(A) of title 5, United States Code.

“(2) CONDITIONAL RELEASE.—Notwithstanding paragraph (1), upon the receipt of assurances satisfactory to the Secretary that the information will be handled appropriately, the Secretary may provide information permitted to be withheld under that paragraph—

“(a) to the owner or operator of the affected pipeline system;

“(b) to an officer, employee or agent of a Federal, State, Tribal, or local government, including a voluntary fire department, concerned with carrying out this chapter, with protecting the facilities, with protecting public safety, or with national security issues.

“(C) in an administrative or judicial proceeding brought under this chapter or an administrative or judicial proceeding that addresses terrorist actions or threats of such actions; or

“(D) to such other persons as the Secretary determines necessary to protect public safety and security.

“(2) REPORT TO CONGRESS.—The Secretary shall provide an annual report to the Congress, in appropriate form as determined by the Secretary, containing a summary of determinations made by the Secretary during the preceding year to withhold information from release under paragraph (1).”.

SEC. 782. TECHNICAL ASSISTANCE FOR SECURITY OF PIPELINE FACILITIES.

The Secretary of Transportation may provide technical assistance to an operator of a pipeline facility or to State, Tribal, or local officials to prevent or respond to terrorist that may impact the pipeline facility, including—

(1) actions by the Secretary that support that of the National Guard or State or Federal personnel to provide additional security for a pipeline facility at risk of terrorist attack or in response to such an attack; and

(b) to the Secretary to develop and implement security measures for a pipeline facility;

(3) potential constraint points in regional, interstate, and international pipeline capacity serving New England; and

(4) the quality and efficiency of the Federal environmental review and permitting process for natural gas pipelines.

(b) REPORT.—Not later than 120 days after the Federal Energy Regulatory Commission submits any final environmental impact statement for a pipeline facility, the Federal Energy Regulatory Commission shall prepare and submit to the Senate Committee on Energy and Natural Resources and the appropriate committees of the House of Representatives a report containing the results of the study conducted under subsection (a), including recommendations for assessing potential natural gas transmission and storage capacity problems in New England.
NOTICES OF HEARINGS/MEETINGS
COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HARKIN. Mr. President, I would like to announce that the Committee on Agriculture, Nutrition, and Forestry will conduct a nomination hearing on March 6, 2002, in SD-106 at 9:30 a.m. The purpose of this hearing will be to consider the following nominations: Thomas Dorr the nominee for Under Secretary of Rural Development; Nancy Bryson, the administration nominee to serve as general counsel for USDA; and Grace Daniel and Fred Daley who are nominated to serve on the board of the Federal Agricultural Mortgage Corporation.

AUTHORITY FOR COMMITTEES TO MEET
COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on Tuesday, March 5, 2002, at 10 a.m., to conduct an oversight hearing on “Accounting and Investor Protection Issues Raised by Enron and Other Public Companies.”

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet on Tuesday, March 5, 2002, at 2:30 p.m. to hold a hearing to consider the nomination of Jeanette J. Clark to be an Associate Judge of the Superior Court of the District of Columbia.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON HEALTH, EDUCATION, LABOR, AND PENSIONS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Health, Education, Labor, and Pensions be authorized to meet for a hearing on Tuesday, March 5, 2002, at 2:30 p.m. to receive testimony on “The Dangers of Cloning and the Promise of Regenerative Medicine,” during the session of the Senate on Tuesday, March 5, 2002, at 2:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON INDIAN AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Indian Affairs be authorized to meet on Tuesday, March 5, 2002, at 10 a.m. in room 485 of the Russell Senate Office Building to conduct an oversight hearing on the President’s budget request for Indian programs for fiscal year 2003.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. REID. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet to conduct a nominations hearing on Tuesday, March 5, 2002, in Dirksen room 226.

Witness List

Panel I: The Honorable Orrin G. Hatch; the Honorable John Warner; the Honorable Carl Levin; the Honorable Robert Bennett; the Honorable Debbie Stabenow; the Honorable George Allen; and the Honorable Sander Levin.

Panel II: Mary Ann Solberg to be Deputy Director of the Office of National Drug Control Policy; Barry Crane to be Deputy Director for Supply Reduction, Office of National Drug Control Policy; Scott Burns to be Deputy Director for State and Local Affairs, Office of National Drug Control Policy; and John Robert Flores to be the Administrator of the Office of Juvenile Justice and Delinquency Prevention, Department of Justice.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SEAPOWER

Mr. REID. Mr. President, I ask unanimous consent that the Subcommittee on Seapower of the Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, March 5, 2002, at 2:30 p.m. in open session to receive testimony on Marine Corps modernization programs in review of the Defense Authorization request for fiscal year 2003.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGES OF THE FLOOR

Mr. REID. Mr. President, I ask unanimous consent that Peter Winokur, a congressional fellow on my staff, be granted floor privileges during the consideration of S. 517, the Energy Policy Act of 2002.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BINGAMAN. Mr. President, I ask unanimous consent that Dr. Jonathan Epstein and Mr. John Kotek, who are legislative fellows in my office, be given floor privileges during the pending consideration of S. 517, and that the following Finance Committee legislative fellows be afforded floor privileges during the pendency of this bill: Charles McFadden, Jill Shore Auburn, Elmer Ransom, Julius Shapiro, Dana Curterlin, Jonathan Seibald, and Charles Donnelly.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that privileges of the floor be granted to the following members of my staff: Bryan Hannegan, Colleen Deegan, Christine Drager, Dan Kish, Mike Menge, Howard Useem, Dave Woodruff, Macy Bell, Shane Perkins, Jared Stubbs, Julia Gray, Kristin Phillips, Joe Brenchle, and Joshua Bowlen. I think that will suffice. I guess that about covers everybody.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CARPER. Mr. President, I ask unanimous consent floor privileges be granted to Commerce Committee fellows Charliase Carney-Nunes and Peter Fippinger for the duration of the debate on the energy bill, S. 517.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I ask unanimous consent the privilege of the floor be granted to Peter Lyons, a fellow in our office, during debate on the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

NOMINATIONS DISCHARGED

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to executive session and the HELP Committee be discharged from further consideration of the following nominations: Don Cogman to be a member of National Council on the Arts; Katherine DeWitt to be a member of the National Council on the Arts; Teresa Long to be a member of the National Council on the Arts; that the nominations be confirmed, the motions to reconsider be laid on the table, any statements thereon be printed in the RECORD, the President be immediately notified of the Senate’s action, and the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations were considered and confirmed, as follows:

NATIONAL COUNCIL ON THE ARTS

Don V. Cogman, of Connecticut, to be a Member of the National Council on the Arts for a term expiring September 3, 2006.

Katharine DeWitt, of Ohio, to be a Member of the National Council on the Arts for a term expiring September 3, 2006.

Teresa Lozano Long, of Texas, to be a Member of the National Council on the Arts for a term expiring September 3, 2006.

LEGISLATIVE SESSION

The PRESIDING OFFICER (Mrs. CARNAHAN). Under the previous order, the Senate will return to legislative session.

HONORING MILTON D. STEWART

Mr. REID. Madam President, I ask unanimous consent that the Senate
proceed to the consideration of S. Res. 216 submitted earlier today by Senators KERRY and BOND.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 216) to honor Milton D. Stewart for his years of service in the Office of Advocacy of the Small Business Administration.

There being no objection, the Senate proceeded to consider the resolution.

Mr. KERRY. Madam President, I speak in support of a sense of the Senate regarding the work and dedication of Milton D. Stewart, the first Chief Counsel for the Office of Advocacy at the U.S. Small Business Administration. Today, March 5, 2002 Milt turns 80 years-old and it is only fitting that we pass this Resolution in honor of his commitment to America's small businesses. I am pleased to say that this bi-partisan Resolution has been sponsored by myself and Ranking Member Bond, along with a great majority of the members of the Senate Committee on Small Business and Entrepreneurship. I am also pleased that this Resolution has been cleared for passage and I thank the floor staff for their quick work in facilitating passage of this Resolution.

One of the most highly successful innovations of the House and Senate Small Business Committees came twenty-six years ago with the creation of the Office of Advocacy within the Small Business Administration. This Office was established to represent and advance small business interests before other Federal agencies and even with Congress. Congress recognized the importance of small business to the competitiveness of the American economy and understood that government sometimes can get in the way of small businesses doing what they do best—creating jobs.

Advocacy has done a commendable job looking out for the interests of small business. It is, ironically, a government agency that has the task of making sure that other government agencies take into account the special problems and needs of small businesses as those agencies go about their rulemaking activities. Over the years, Advocacy has had a great deal of success and its hand has been strengthened by further Congressional action, such as the Regulatory Flexibility Act in 1980 and the Small Business Regulatory Enforcement Fairness Act in 1996.

This success is due in no small part to the solid beginnings of the Office of Advocacy under the leadership of the very first Chief Counsel for Advocacy, Milton D. Stewart. Milt, in his tenure as Chief Counsel, laid the groundwork for the Regulatory Flexibility Act, the first White House Conference on Small Business, the Small Business Innovation Research Act, and many other programs that are now considered part of the core small business policy within this country.

He came by his small business roots honestly. He spent his youth in a family-owned small business begun and managed by his father and mother. Early on, he acquired great respect for the skill and courage of small business entrepreneurs. Later in his life, Milt also had significant government service beginning with the Office of War Information during World War II. He was even a staff member of the original Senate Committee on Small Business. He served as special counsel to Governor Harriman of New York and to the New York State Thruway Authority. All of this preceded his tenure as the first Chief Counsel for Advocacy.

While he was Chief Counsel, his charisma and vision inspired many of those who worked with him to catch the “small business bug” and to direct their energies toward helping develop sound small business policy for our Nation. They, and we, owe Milt a deep debt of gratitude.

The Office of Advocacy is fortunate to have had such a sound beginning. Those of us who care deeply for small business policy recognized how crucial Advocacy has become to sound regulatory debate within our country. The Office is a sterling example of an experiment that worked and continues to work to this day.

Milt, who deserves all the best on his birthday, can certainly take pride in the legacy that he has left by setting all the precedents that made the Office of Advocacy what it is today—an effective voice promoting the best interests of small business within our government.

Mr. REID. Madam President, I ask unanimous consent the resolution and preamble be agreed to en bloc, the motion to reconsider be laid on the table, and any statements relating to the resolution be printed in the Record.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 216) was agreed to.

The preamble was agreed to.

(The resolution, with its preamble, is printed in today's RECORD under "Submitted Resolutions.")

ORDERS FOR WEDNESDAY, MARCH 6, 2002

Mr. REID. Madam President, I note the presence of the Senator from Ohio. I will make sure the Senator from Ohio, in this unanimous consent agreement, is allowed to speak in relation to S. 517. It is my understanding the Senator from Ohio wishes to make an opening statement on this most important bill.

I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 10 a.m., Wednesday, March 6; that following the prayer and the pledge, the Journal of proceedings be approved to date, the morning hour be declared expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of S. 517, the energy bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT

Mr. REID. Madam President, if there is no further business to come before the Senate, I ask unanimous consent the Senate stand in adjournment under the previous order following the remarks of the Senator from Ohio in relation to S. 517.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Ohio, Mr. VOINOVICH. Madam President, I ask unanimous consent to speak for as much time as I may need to read my opening statement on the underlying bill that will provide a national energy policy for our country.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENERGY

Mr. VOINOVICH. Madam President, we are facing a problem that every other nation that we share the planet with hopes it will have some day. That is, our country's economic growth will soon outpace our supply of available energy.

The growth of both the high tech and advanced manufacturing sectors in America has created jobs and has created enormous opportunity for our people, and they have created a new demand for energy. One reason these industries have flourished in America is because we have the fuel they need to succeed. We have the "people" fuel, the skilled workers with committed hearts and hands; we have the "idea" fuel, the smart minds that dream big and can take ideas from the drawing board on to the street; and we have "good old-fashioned" fuel, inexpensive, reliable sources of energy that literally make everything move and connect and work.

Other nations have some of these pieces, but they rarely have all of them. That won't always be the case. The world is shrinking, and our competitors, strategic and otherwise, are in hot pursuit. What will we do to stay ahead? What will we do to fuel America's continued success?

Our future success will require us to produce more energy to keep up with the growing demand for it. How big will that demand be? Big. You can see from this chart that there is a large gap currently in terms of the domestic production of energy and consumption. In other words, this open space on this chart is a gap between what we produce domestically and what we consume.
According to the Department of Energy, we are going to have to increase by 30 percent the amount of energy produced by 2015 in order to meet the demand of this great Nation.

In 2000, America used more than 3.8 billion megawatt hours of electricity. The Department of Energy estimates that by 2020, the demand will rise to 5.43 billion megawatts a year, an increase of 1.63 billion. To meet that new demand, the DOE says it will take 1,300 new power plants or, quite simply, the light bulb that powered the American dream for a lot of people.

Let’s remember, needing more energy is a great problem to have. It means we are creating jobs and we are creating opportunity. The American dream is our country’s economic success. It is a gift bequeathed to this generation by generations of men and women who tolled before us.

We are the stewards of this gift. History will judge us based on what this generation of Americans does right now with this gift. Will we keep America’s light of opportunity shining, or will we sleep through our watch and let the light flicker out?

I am thankful to the Majority Leader for keeping this issue and bringing this issue to the floor of the Senate. However, I disagree with the way it came to the Senate, since the bill should have been considered and voted out of the Energy Committee, instead of being written on the floor of the Senate.

Still, the bill presented before us at least starts the process by laying the foundation and beginning the debate. It has many things worthy about it and many things that we can build upon.

This bill is a good start because, among other things, it encourages greater use of renewable sources of energy, sources which have little or no impact on the environment.

The bill encourages the use of ethanol, a renewable gasoline additive that helps reduce auto emissions and makes the air cleaner for us and our children to breathe.

It starts the needed debate on reauthorizing the Price-Anderson Act, which is so vital to the future expansion of our nuclear energy industry. But there is much more that we need to do. I have introduced legislation to expand the Price-Anderson reauthorization to include commercial nuclear reactors, as it must, and I hope that we will be able to include it in this bill.

What concerns me about this bill, however, is it raises false hopes. It creates the expectation that it will solve our future energy crisis, protect our energy security, and sustain American opportunities. In reality, it doesn’t do this. The bill does start in several good directions, but then falls short and is silent on several other key issues, such as energy infrastructure and the need to reduce our dependency on foreign oil.

The majority’s bill doesn’t fully deliver what America needs, and I would have to oppose it in its current form. I hope that, as we amend it, it is something that I can support and a majority of the Senate can support.

Our energy challenge demands from us the enactment of a comprehensive energy policy, a program of which we have never seen before in this country. I think the Senator from Oklahoma, Mr. INHOFE, did a very good job in talking about the need for an energy policy. I have wanted one ever since I was mayor of the city of Cleveland in 1979, and when I was in administration after administration, we never got one. Today, we have this golden opportunity to have an energy policy for the United States of America. It has to be a policy that harmonizes energy and environmental policies, acknowledging that the economy and the environment are vitally intertwined, a policy that broadens our base of energy resources to create stability, guarantee reasonable prices, and protect our national security—a policy that can cause prices to spike, hurting particularly the elderly, disabled, and low-income families, and which won’t cripple the engines of commerce that fund the research that will yield future environmental protection technologies that can be shared with developing nations who currently face severe environmental crises.

In terms of energy security, we need to reduce our reliance on foreign sources of energy. As I pointed out, the gap between what we consume and what we produce is being met by imports—imported oil, imported gas, and other energy sources that we bring into the United States.

As we have all learned in ways too horrific for words, the enemies of freedom will go to extreme lengths to attack our country. As we seek to protect our Nation’s freedom of opportunity, we should not do it in ways that make us vulnerable to these enemies of freedom. We must do everything we can to provide for our energy need from within our Nation’s borders.

We are already far too dependent on foreign energy sources. Oil imports have risen from 1973, when we imported 35 percent of our oil, to 58 percent last year. Today, we even import oil from Iraq—750,000 barrels a day. Seven percent of our oil comes from Iraq—the oil used in regular combat missions. Think about that: 7 percent of our oil comes from a country that the President has described as one of the three countries in the Axis of Evil.

The political climate in the Middle East region today is more volatile than at any other time in my memory. For the United States to be so dependent on this part of the world to meet such a large portion of our energy needs makes us extremely vulnerable to being held hostage for oil. If the enemies of our country were willing to take out the World Trade Center and the Pentagon, does anyone doubt that if they had a chance to cut off, or even just disrupt, our energy supply, they would do it? There is no doubt. They would do it and we know it.

As we rely on our own strengths for the answers to the coming energy crisis, we see that no single source of domestic energy is sufficient to meet all of our Nation’s needs. Though we are blessed with large reserves of coal, oil, natural gas, renewables, and nuclear fuel, no single energy source can single-handedly solve our problem. That is why we need to broaden the base of energy sources. We simply cannot put all of our eggs in one basket. If we were some other nation, diversifying our energy supply might be a great challenge. But we have been blessed. God has blessed us with the resources to solve this problem.

One of our great untapped resources is nuclear energy. Over the past 40 years, we have seen how safe and reliable nuclear energy can be. We currently get 20 percent of our electricity from nuclear energy plants. But this is far below what we could do. France derives 70 percent of its electricity from nuclear power; Sweden gets 39 percent; South Korea gets 41 percent; and Japan gets 34 percent.

What nuclear energy brings to the table, which is so positive is that it produces zero harmful air emissions. In fact, 40 years of solid waste from all of our Nation’s 103 nuclear facilities would fit on a football field to a height of only 10 feet.

Since 1973, the use of nuclear energy has prevented 62 million tons of sulfur dioxide, a key component of acid rain, and 32 million tons of nitrogen oxide, a precursor to ozone, from being released in the atmosphere.

Reauthorizing the Price-Anderson program, which provides needed liability protection for nuclear waste, updating an outdated, duplicative licensing process and creating a permanent repository for nuclear waste, will make it possible for us to take full advantage of the incredible potential this clean energy source provides us. I am going to offer an amendment to help improve the licensing process to facilitate the construction of new nuclear facilities and also address the human capital crisis that is impacting the Nuclear Regulatory Commission. I will be joined by the Senator from Louisiana, Senator LANDRIFEE, in this effort.

The other energy source we should turn to more is coal. It is by far our most abundant and cheapest energy resource. Right now, we have enough coal to meet our country’s energy needs for the next 250 years. Because coal is so inexpensive, we can provide our vital manufacturing sector with the electricity it needs at prices low enough so that after businesses pay their energy bills, there will still have money left. But some countries have important needs like innovation and research. Just as nuclear energy’s challenge is waste storage—and I am glad
we are going to debate the issue of nuclear waste storage at Yucca Mountain—coal’s challenge is air emissions. Coal today is cleaner than ever before, but we need to make it even cleaner. We have the technologies available to do so, if we make research and installation of clean coal technology a viable investment. In addition, these technologies can be shared with emerging nations that are largely dependent on coal for electricity. We can help them learn from our experience and future environmental challenges. With clean coal technology, and the incentives to guarantee it will be used, we can ensure that the more than two centuries worth of coal that we have available today can be used as an energy source.

Let’s talk about natural gas. It is a key component in meeting our current and future energy needs as some 60 million American homes now use natural gas for heat. Natural gas also provides 15 percent of this Nation’s electricity, and nearly one-quarter of our total energy supply. These percentages are increasing because natural gas burns cleanly and because it is easier to achieve permits from the EPA for natural gas-powered electric generation facilities. In fact, it is estimated that nearly 95 percent of all new power plants are going to be using natural gas.

Even with this increased usage, production of natural gas has remained fairly stable, and to accommodate the growing demand, imports of natural gas have risen from 4.3 percent of consumption in 1981, to around 16 percent today.

To reduce our reliance on imports, we need to tap the estimated 40 percent of undiscovered natural gas that is located on lands owned by the Federal and State governments. Without this, we face steep price increases in natural gas as we are becoming increasingly dependent upon it.

We saw what can happen with natural gas during last winter’s especially cold temperatures. A sudden high demand caught us unprepared when supplies were low and prices shot through the roof, devastating the poor and the elderly. I will never forget holding a meeting in Cleveland with Catholic Charities, Lutheran Housing, and the Salvation Army where they presented the dramatic impact that high natural gas prices were having on the poor, the elderly, and the disabled.

We also need to be mindful that changes we make on energy policy that affect demand for natural gas directly impact on our competitive position in the world marketplace for plastics and fertilizer. In fact, the Ohio Corn Growers Association told me that the high cost of natural gas was impacting the cost of their fertilizer. They said that many of their farmers did not plant as much corn last year because of the high cost of fertilizer.

Right now in America, oil remains the primary source of energy. From heating people’s homes to firing energy plants to running our automobiles, it makes up the largest portion of our energy portfolio which keeps our economy humming.

Demand for oil is expected to grow at a constant rate of 1.5 percent per year through the year 2020. To meet that demand, we need to maximize the use of the more than 22 billion barrels of proven oil reserves the United States possesses. We also need to make oil exploration efforts in more economical. The Senator from Oklahoma spoke very eloquently a few minutes ago about the oil that is available if we could only find an economical way to get at it.

Of course, during the consideration of this bill, we will debate an amendment to allow oil exploration in ANWR. We have the technology today to both use our Alaskan oil and protect the region’s environment. The potential for new jobs created up to 735,000 jobs in a variety of fields, and the added production will help strengthen our energy self-reliance.

Let’s turn to conservation. Conservation has proven successful in reducing energy demand. By incorporating technological breakthroughs into the production of energy-efficient automobiles, high-efficiency homes, and more efficient appliances and machinery, conservation has succeeded in saving us tremendous amounts of money.

I get a little concerned when I hear people say we have not done enough in the area of conservation. This chart shows that through energy conservation, we have had enormous savings of some $2.5 trillion from 1972 to 1991. This is according to a 1995 Department of Energy report, which is the most up-to-date data we have available. One can see that we have committed this country to conservation, and it is making a big difference.

Legislation that I am working on with Senator Lieberman encourages continued fuel conservation efforts in automobiles without the devastating blow to our automobile manufacturing jobs that a competing bill would cause. Our proposal would let the technical work of establishing new fuel conservation standards be completed by researchers at the National Highway Transportation and Safety Administration. These new standards would be established only after scientific analysis is conducted, not some government’s environmental, economic, and efficiency factors involved, which is a more responsible approach than picking an arbitrary number out of thin air.

In the end, we can expect to see greater efficiency without sacrificing safety or a devastating loss of auto worker jobs upon which the economies of many States depend. I can tell my colleagues that the economy in my State depends on it, given the amount of auto manufacturing that goes on in Ohio.

I have heard from the United Auto Workers and from the major auto-mobile manufacturers that the language in the majority’s bill could actually cause disruption in the economy of that industry. There is another way to put in place standards that will still get the job done in terms of conservation.

Another avenue to focus on is renewable energy sources. We currently rely very little on renewable sources of energy. In fact, wind and solar together make up less than one-tenth of 1 percent of our current energy production, but they are expensive and they are heavily subsidized.

Nevertheless, we need to continue to invest in these forms of energy because they are so environmentally friendly and they contribute to meeting the requirement of national self-reliance.

On the other hand, we must also be realistic about our challenge. While a savings through conservation has reared, State, and wood—1.5 trillion over 30 years, the inherent problems of renewable sources make it impossible for them to realize similar savings or fill the growing gap between demand and supply.

In addition, because renewables make up such a small piece of our overall energy picture today, we do not have the capacity to meet our needs in the timeframe we are facing. Right now, as this chart shows, they will not get the job done. However, their growth will come, and should continue to be supported with research funding.

The point I am making is renewables currently make up only about 8 percent of our consumption, and if we protect them for 20 years, they by themselves will not get the job done in meeting our energy needs. When I am talking about renewables, I am talking about solar, wind, hydropower, biofuels, waste, and wood. 1.5 trillion over 30 years.

In a recent meeting I had with General Motors in Detroit, I was told the company sees fuel cell technology becoming a viable source in the next 10 to 15 years. It is not science fiction to think that our children and grandchildren—it will probably be our grandchildren—will see a time when the roads are traveled by cars run on hydrogen and give off only water.

The majority’s bill mandates minimum consumption requirements for renewables and civil penalties if those minimums are not met. We should not be clubbing people for noncompliance. We should be doing everything we can to encourage the adoption of new energy technologies.

Renewables and conservation need to be a bigger part of our new energy policy, but we must also be realistic about our challenge. These two strategies do not replace the capacity to meet our growing energy needs in the timeframe we are facing. Anyone who says otherwise either does not know what they are talking about or they are being intellectually dishonest.

Too often I hear people say: All we need to do is use more solar and wind power and it will take care of the problem. Here are the facts. Here is solar
and wind—less than one-tenth of one percent currently. If we project it, solar and wind alone will not get the job done. We are going to need coal, oil, natural gas, nuclear and other sources of energy to meet the demands of the United States of America.

Another important issue we must address is infrastructure. As we develop these new energy sources, we must make sure we can get them to where the people need them. We saw this firsthand 2 years ago when prices for gasoline in the Midwest spiked. The freak combination of a shattered refinery and a temporarily downed pipeline created a bottleneck that midwesterners paid for all summer long. Low-income Americans were hit especially hard at the pump, and trucking companies and airlines took a big beating.

That is why I introduced legislation last year to help streamline the permitting process for new energy facilities. I hope my legislation, S. 1590, can be added to this bill because I think it would enhance it and make it better.

The problem of distribution is especially critical to the northeastern States as they try to get additional natural gas supplies into their homes and businesses to meet a growing demand.

I encourage my colleagues from that part of the country to take a close look at my provision because I think it is something they should get behind.

The same technology which is helping to drive the demand for more energy has also equipped us with tools to provide that energy. Advanced slant drilling, super-efficient power plants, hyper-accurate seismic research, we have all of these because of our innovative high-tech research.

Technology has also given us new tools to protect our environment and public health, and we must take full advantage of these opportunities because we must be good stewards of what we have been given. I reject the hypocrisy of those on either side of the debate who say we have to choose between the environment and the economy. We now know the success of each is linked. As I have said before, we have to harmonize our energy needs and our environmental needs if we are going to have an energy policy. Only with a thriving economy can we fund the research that will find new ways to protect the environment—the cradle for every living thing on this planet—and the world’s ecosystems cannot sustain us if we do not have clean air and clean water.

A growing American economic capability is the only way we can do such things as fight our war on terrorism, provide a prescription drug benefit for seniors, save Social Security from bankruptcy, eliminate our national debt, and meet other financial challenges facing our country. We need to have a growing economy. We know the challenge. We must provide more energy to keep America going. We know we cannot keep relying on unstable foreign sources to do this. We know we have the resources domestically to meet our needs. We also know that doing this in an environmentally responsible way is critical. We know we have the technological know-how to meet these challenges.

The question that remains is whether or not Congress is going to stand in the way of this country’s future success or whether we are going to be part of the solution. As we seek to provide our country the power to succeed, does this body have the power to resist the temptation of partisanship and prove wrong those who say this debate will not end in the successful passage of a good bill? Do we have the courage to work together and do something good for our country and leave the partisan jabs and the hollow victories on the table?

I do not think it is going to be easy, but I think we can do that. I ask my colleagues to join in the constructive work of this body. Let us make it happen. I pray that the Holy Spirit inspires us to do it, for ourselves, for our children, our grandchildren and, yes, the world.

I yield the floor.

ADJOURNMENT UNTIL 10 A.M. TOMORROW

The PRESIDING OFFICER. Under the previous order, the Senate stands adjourned until the hour of 10 a.m. tomorrow.

There being no objection, the Senate, at 7:13 p.m., adjourned until Wednesday, March 6, 2002, at 10 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 5, 2002:

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Don V. Cogman, of Connecticut, to be a Member of the National Council on the Arts for a term expiring September 3, 2006.

Katharine DeWitt, of Ohio, to be a Member of the National Council on the Arts for a term expiring September 3, 2006.

Teresa Lozano Long, of Texas, to be a Member of the National Council on the Arts for a term expiring September 3, 2006.
CONGRATULATING OLYMPIC MEDALIST DANNY KASS

HON. MARGE ROUKEMA
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 5, 2002

Mrs. ROUKEMA. Mr. Speaker, I rise today to pay tribute to Danny Kass, a great American Olympian from Hamburg, New Jersey. Danny thrilled America by winning a silver medal in the men’s snowboarding halfpipe at the 2002 Winter Games in Salt Lake City, Utah.

Danny, the youngest member of the 2002 U.S. Olympic Men’s Snowboarding Team, began his career on the slopes of Mountain Creek Ski Resort in Vernon, New Jersey, and continues to hold on to his New Jersey roots. He has made all of us so proud.

Danny’s outstanding skill at the age of 19 is truly amazing. His talent was showcased for the entire world in Salt Lake this month. And although we may not all understand the intricacies of scoring the halfpipe competition, I think we can all agree that after watching Danny ride on Monday, February 11th, we knew we had seen a medal-winning performance. Sure enough, Danny was awarded the silver medal as he joined his two American teammates on the podium for a rare American sweep.

The exuberance of our American medalists was contagious. The country felt their excitement that day, and had a glimpse of how it feels to be rewarded for excelling at a sport you love. Danny Kass just couldn’t stop smiling and the crowd just couldn’t stop cheering.

Although this was not Danny’s first win in a snowboarding competition, I’m sure it will be a memorable one for him. Since he began snowboarding in Vernon, New Jersey, and competing on the slopes of Vermont, Danny has claimed titles in several impressive events, such as the Overall Men’s U.S. Grand Prix Halfpipe, the X-Games Halfpipe and the U.S. Olympic Halfpipe.

This weekend, we congratulate Danny on the New Jersey slopes where he first learned to snowboard. The Mountain Creek Ski Resort in Vernon will host a “Specialty Sport Pro/Am Halfpipe Jam” to honor Danny.

Through his dedication and pure love of the sport of snowboarding, Danny has earned the Olympic silver medal and the respect of his peers and fellow countrymen.

I urge my Colleagues to extend to Danny Kass warm wishes and congratulations. On behalf of our State of New Jersey, I extend to Danny our thanks for representing us so well in Salt Lake.

INTRODUCTION OF THE KEEPING CHILDREN AND FAMILIES SAFE ACT OF 2002

HON. PETER HOEKSTRA
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 5, 2002

Mr. HOEKSTRA. Mr. Speaker, today I am pleased to introduce the “Keeping Children and Families Safe Act of 2002” to reauthorize the Child Abuse Prevention and Treatment Act (CAPTA), the Adoption Opportunities program, the Abandoned Infants Act, and the Family Violence Prevention and Treatment Act (FVPSA).

According to recent statistics, almost 3 million reports of possible child maltreatment were made to child welfare agencies in 1999. Approximately 60 percent of these reports were investigated and 826,000 children were estimated to have been victims of abuse or neglect in 1999.

While the overall number represents a continuation of a downward trend since 1993, the long-term trend in child abuse reporting has been one of substantial growth, with the number of maltreatment reports more than quadrupling since 1976. However, it should be noted that increased reporting of abuse and neglect does not necessarily mean an equivalent increase in substantiated cases of abuse and neglect. While the proportion of child maltreatment reports that are substantiated has grown smaller over time, the number of reported child abuse cases is likely higher due to improved surveillance mechanisms. Despite progress made in promoting child abuse awareness and the endless efforts made to prevent child abuse and neglect, much more work is needed.

In addition, family violence continues to be the most common, yet least reported crime in our nation. Approximately 95 percent of family violence victims are women, and it is estimated that every 11 seconds a woman is battered in the United States. It is also estimated that 70 percent of men who abuse their wives also abuse their children, and children from abusive homes are at greater risk of alcohol or drug abuse and juvenile delinquency.

Mr. Speaker, the Keeping Children and Families Safe Act of 2002 continues to provide important federal resources for identifying and addressing the issues of child abuse and neglect and family violence, and to support effective methods of prevention and treatment. It also continues local projects with demonstrated value in eliminating barriers to permanent adoption and addressing the circumstances that often lead to infant abandonment.

This legislation emphasizes the prevention of child abuse and neglect and family violence before it occurs. It promotes partnerships between child protective services and private and community-based organizations to ensure that services are more effectively provided, and supports public education on child abuse and neglect by strengthening the public’s understanding of the role of child protective services and appropriate methods for public reporting of suspected incidents of child maltreatment.

This legislation also fosters cooperation between parents and child protective services workers by requiring case workers to inform parents of their rights and the allegations made against them. Further, this legislation is designed to improve the training, recruitment and retention of individuals providing services to children and ensures the appropriate supervision of these individuals.

Mr. Speaker, I urge my colleagues to back this important legislation that supports improved services for children and families.

ON THE INTRODUCTION OF THE “INSIDER STOCK SALES EMPLOYEE NOTIFICATION ACT”

HON. GEORGE MILLER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 5, 2002

Mr. GEORGE MILLER of California. Mr. Speaker, I rise for the purpose of introducing the “Insider Stock Sales Employee Notification Act,” a measure that will require company executives who sell stock to immediately notify the company pension plan officials. The bill would allow all employees to be given early warning in cases where executives begin dumping company stock.

Unfortunately, the Enron and Global Crossing scandals have shown us that employee retirement savings are vulnerable to misconduct and abuse by company officials. In the past few months we have learned that Enron and Global Crossing executives sold millions of dollars worth of company stock while encouraging employees to keep company stock in their retirement accounts, and prohibiting some employees from selling their company matched 401(k) shares.

Employer-sponsored investment rules are rigged against employees. Companies often have one set of rules for executives—which permit windfall profits from sales of stock without restriction—and another for rank-and-file employees, whose freedom to rescue their savings by selling company matched stock is often restricted by employers.

Last week, the Wall Street Journal published two shocking stories that further document the inequities that employees endure when companies confront huge losses: loyal employees see their 401(k)s evaporate while executives continue to pocket vast fortunes. As the Journal reported: “. . . Top executives at many companies, including Enron, Lucent, Global Crossing, Kmart and WorldCom have seemed intent on preserving their luscious compensation even as their companies flounder and their employees lose jobs, severance, medical benefits and retirement savings.”

* * * * *
Also, last week the Los Angeles Times reported that “Global Crossing workers lost about $250 million between 1999 and 2001 when the value of the company stock in their 401(k) accounts tumbled,” and that while the company “cut off severance pay to thousands of laid-off workers when it filed for bankruptcy in the preceding month [it] forgave loans and made $15 million in lump-sum pension payments to certain executives.”

I am inserting complete copies of these articles in the RECORD today.

Pension reform must provide equity to employees. Employees had a right to know when their executives are dumping company stock. They should then be able to make an informed decision as to whether they want to sell any of their own company stock in their retirement accounts. They should be able to receive accurate financial information about their company. They should have a right to have equal representation on the pension administrative committee. They should have the right to sell company-matched stock after only one year. And they should certainly be assured that when company officials breach their trust, the will be held fully accountable for their actions.

I urge the members to join me in sponsoring this new measure, and the Employee Pension Freedom Act (H.R. 3857) that I introduced earlier this year.

[From the LA Times, Feb. 27, 2002]

EX-EMPLOYEES QUESTIONED ON 401(K) PLAN

(The By Liz Pulliam Weston)

The Labor Department is questioning former Global Crossing Ltd., workers about the bankruptcy company’s 401(k) retirement plan, apparently to determine if any pension laws were broken.

Former Global Crossing employees said this week they have been contacted by Labor Department investigators, who asked for copies of documents distributed to workers describing the company’s 401(k) plan and its features.

The investigators “said that they were opening an investigation into Global Crossing’s 401(k) program and [were] very interested in any additional information that they could glean from any present or former employees,” said a former employee, who asked not to be identified.

Global Crossing workers lost about $250 million between 1999 and 2001 when the value of the company stock in their 401(k) accounts tumbled from a peak of $641 to 30 cents before the company filed the fifth-largest bankruptcy in U.S. history Jan. 28.

A Global Crossing spokeswoman said the company had been contacted by Labor Department investigators and was cooperating.

Global Crossing investigators also questioned them about the company’s severance packages. Global Crossing cutting off severance pay to thousands of laid-off workers when it filed for bankruptcy, but in the preceding months forgave loans and made $15 million in lump-sum pension payments to certain executives.

Regulators simply may be making sure employee contributions were deposited into the 401(k) plans. Former Global Crossing pension lawyer Alex Brucker. Troubled companies sometimes illegally use 401(k) contributions to pay bills, although such behavior is far more common at companies than at large, publicly traded firms, pension lawyers said.

Global Crossing spokeswoman Tisha Kreiser said all employee contributions have been properly deposited in the plan.

Labor investigators also may be probing whether employees were advised of the risks of investing in company stock, which at one point made up more than half the 401(k) plan’s assets, pension experts said.

Rep. George Miller (D-Martinez) asked the Labor Department last week to determine whether any of the trustees of Global Crossing’s savings plan were aware of the company’s financial condition — what steps the trustees took, if any, to protect employees.

Miller also plans to introduce a bill today that would require executives who sell company stock to alert company employees and pension officials within 24 hours.

Rep. Louise McIntosh Slaughter (D-N.Y.) has requested a congressional inquiry into Global Crossing’s decision to freeze workers’ 401(k) accounts for a month before the bankruptcy.

This legal but controversial practice, known as a lockdown, was used by both Global Crossing and bankrupt energy trader Enron Corp. when the companies switched plan administrators.

Several lawmakers have introduced bills that would limit how long lockdowns can last.

Global Crossing’s stock already had lost 99% of its value by the time its lockdown began Dec. 14. Global Crossing’s 401(k) plan was typical for a large firm, offering a range of investments, including stock and bond mutual funds as well as company stock.

Both firms matched employees’ contributions only with shares of company stock, however, and placed restrictions on workers’ ability to sell those shares. Consumer and pension rights advocates say such restrictions — also not uncommon among employers — prevented many employees from diversifying their accounts.

In December, Global Crossing lifted restrictions on employees’ ability to sell company shares in their 401(k) plans — after most of the shares’ value had disappeared. Even then, many employees did not sell their shares, saying they were told by executives that the stock price would recover.

WAYNE R. POLAND HONORED

HON. THOMAS H. ALLEN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. ALLEN. Mr. Speaker, in April, 2002, Wayne R. Poland was confirmed as the local president of the Portland Maine Area Local #451 of the American Postal Workers Union. He has served with distinction in the Postal Service since 1967, when he began as a part time flexible clerk. After Joining the American Postal Union, he held numerous trusted positions in the union. In 1980 he became the president of the Portland Maine Local, and has remained in that position for the last 22 years.

Wayne was born in Portland on March 29, 1943. He was the eldest son of four boys and one girl of John Poland, Jr. and Phyllis Pauline Woods Poland. Wayne grew up Portland, and attended my alma mater, Deering High School.

Wayne had the pleasure of working closely with Wayne during a difficult time for the Portland postal workers, when plans were being discussed for the relocation of the principal mail facility in the region. Thanks in large part to his able leadership, we were able to resolve this issue, ensuring that hundreds of postal workers working at the facility would not have to relocate or leave their Jobs.

Throughout his tenure, Wayne worked hard and effectively to serve the needs of both workers and the Postal Service. He earned the respect of all who worked with him, and he will be sorely missed.

IN TRIBUTE TO JOSEPH NAVAS,
PORT AUTHORITY OFFICER

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mrs. ROUKEMA. Mr. Speaker, I rise today with a heavy heart to pay tribute to one of New Jersey’s finest—Joseph Navas of the Port Authority of New York and New Jersey. A resident of Paramus, New Jersey, Joseph Navas died valiantly trying to save lives during the September 11 terrorist attack on the World Trade Center. Joseph was not only a dedicated veteran police officer for the Port Authority, but also a devoted and loving father and husband. And although he may have been taken early from this life, his children will grow up knowing that his father was a hero to his family, and now a hero to his country. I am proud to pay tribute to this courageous American hero.

As forces of terror tried to extinguish the light of our nation on September 11, the heroes in our midst shined brighter than ever. For some, we know what heroic endeavors were undertaken as we hear stories from cell phones, emails, and survivors. And then there are those whose story was not told, yet we know—because of the people they were—It was a selfless courageous story. We know this because these men and women were heroes before they even entered the World Trade Center Towers to begin their rescue missions. Officer Navas was one of those people.

That Tuesday, his work and courage brought him into the lobbies of the World Trade Center as people flooded onto the streets. He was one of the men and women who ran up the stairs while instructing people to immediately get down those same stairs. He was one who orchestrated safe escapes for those in the towers, while remaining in those very buildings to get people out. His efforts will never be forgotten, especially by those who were saved.
Someday we may hear the story of the lives Officer Navas saved or the comfort he provided. But for now, we can be proud: proud of the job he was doing, proud of the heroism he showed on that day, and proud of the courage he has always shown.

To his family, the legacy of Joseph’s heroism is nothing new. A 1985 graduate of the Port Authority Police Academy, Joseph joined the Port Authority’s Emergency Services Unit at Journal Square several years ago. Since then, he has rappelled off of buildings, waded through floods in search of victims, and trained for rescue diving. Officer Navas was at the World Trade Center for the first bombing in 1993 where he participated in the rescue. Recently, he saved a person prepared to jump from the George Washington Bridge. Joseph never mentioned the dramatic rescue to his family. They read about it later in the local paper.

His focus wasn’t on bragging about his success. For him, it was simply part of the job. Joseph’s focus was on his family—his wife of 15 years, Karen, and his children, Jessica, Joey, and Justin. I cannot say I knew him personally—so I will not presume to elaborate on his life and times. That is for his family and friends, and we will not only hear stories of Joseph in years to come, but I believe we will also see him in the actions of his loved ones, as his spirit lives on. Joseph has the admiration and thanks of an entire nation. His family can be assured that this nation will never forget the atrocities of September 11th or the values for which Joseph died.

Our country has come together. And we now come together to tell Joseph’s family they are not alone. America stands with them—now in their hour of grief, and in the days and years to come.

Mr. Speaker, I ask my colleagues to join me in honoring Port Authority Officer Joseph Navas for his achievements in life and the legacy he leaves. Let us never forget him—a true American hero.

IN MEMORY OF ED MARTIN OF NASHVILLE, TENNESSEE, FRIEND AND BELOVED BASKET-BALL COACH

HON. BOB CLEMENT
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 5, 2002

Mr. CLEMENT. Mr. Speaker, I rise today in memory of a fine gentleman. Tennessee State University (TSU) head basketball coach Ed Martin, who passed away on Monday, February 25, 2002.

Known for his compassion by all who knew him, Coach Martin shaped and molded many men into championship teams over 17 seasons coaching men’s basketball at TSU. His impressive 290–169 overall record began in 1968. After a successful run at TSU, Vanderbilt’s C.M. Newton hired Martin as assistant coach at Vanderbilt University. He coached there for four seasons and guided the early careers of such notable players as Will Perdue and Jeff Turner of Vanderbilt, along with Leonard Turner and Lloyd Neal from TSU. Ultimately, 16 players under his supervision went on to careers in the National Basketball Association (NBA). A native of Allentown, Pennsylvania, Martin participated in baseball while a student at North Carolina AT&T. He then went on to play in the Negro baseball leagues and the Cincinnati Reds franchise before an injury drove him to consider coaching basketball. He also served in the U.S. Navy as a young adult. Quickly making a name for himself, Martin won two South Carolina state high school championships at Avery High School in Charleston, and then began coaching at South Carolina State University. In 13 seasons at South Carolina State, he garnered a 214–87 record before moving to TSU and becoming one of the best loved coaches in Nashville.

In 1972, he led the Tigers to the United Press International (UPI) College Division National Title, and was subsequently named Coach of the Year. His colleagues continued to recognize him throughout his career and into his retirement. Additionally, his name is recorded in the Halls of Fame at North Carolina A&T, South Carolina State, TSU, and the Tennessee Sports Hall of Fame.

Mr. Speaker, I rise today to honor and pay tribute to Edwin H. May, Jr. who died February 20, 2002, at the age of 77. Mr. May represented Connecticut’s First Congressional District in the 85th Congress and was a valued public servant for the State of Connecticut.

Mr. May will long be remembered for his commitment to Connecticut. As President of the Greater Hartford Jaycees, the Connecticut State Jaycees, and co-founder of the Greater Hartford Open (GHO) in 1952, his leadership and devotion to the community has distinguished him among his peers.

Throughout his life, Mr. May was intensely devoted to his family, to Connecticut, and to his country. He was a student at Wesleyan University, where he was an Olin Scholar and a member of the Chi Psi fraternity. Mr. May left Wesleyan in his freshman year, however, to enlist in the U.S. Army Air Corps and become a P-38 fighter pilot in California. After the war ended, he returned to Wesleyan to graduate with a B.A. in Government.

In 1956, Mr. May was elected to a single term in the U.S. House of Representatives. After leaving office, he was selected as the Connecticut State Republican Party Chairman. He was also a member of the American Legion Boume-Keeny Post 23 in Wethersfield, Connecticut and a member of the Hartford Rotary Club.

Former Congressman May was an exemplary public servant and a model citizen. He will be greatly missed by the nation, the State of Connecticut, his family, and all who knew him.

TRIBUTE TO WILLY P. NAULTY
HON. JIM SAXTON
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 5, 2002

Mr. SAXTON. Mr. Speaker, I rise today to pay tribute to a good friend, William P. Naulty, who is retiring March 14, 2002 after 20 years service to the good citizens of Burlington County.

In the early 1980’s, when I served in the New Jersey Assembly and Senate, Bill acted as my press secretary, utilizing his knowledge not only of the working press, but of the legislative process. He was a true asset to my staff, good natured, well-liked and local color for our district.

More recently, as Chief Legislative Aide to Eighth District Senator C. William Haines, Assemblymen Harold Colbum and Francis Bodine he monitored all policy put forth by the legislators, continuing to serve in that capacity for Senator Martha Bark, and Assemblymen Bodine and Larry Chatzidakis. Bill has also been responsible for press inquiries and constituent service. In our state’s capital, he is considered “dean” of legislative aides, displaying a working knowledge of major issues facing the people of the Eighth District and New Jersey as a whole.

Prior to his legislative duties, Bill worked for more than 27 years as a reporter, rewrite man and make-up editor with the Philadelphia Bulletin, a daily paper which ceased operation in 1982. He covered the New Jersey beat, reporting on local, county, state and national politics and government. He made the transition, from newspaper reporter to legislative aide extraordinary seamlessly, earning the respect of not only legislators, but constituents as well.

Honorably discharged from the United States Army, Bill has devoted many years to the community, both through his work with the press, and also with the legislative district he has served so faithfully for so many years. He is highly respected by people on both sides of the aisle, by the press, by those in business and industry, and most important, by the people.

It has been a pleasure working with Bill Naulty through the years as we have served our mutual constituents. May his retirement with his wife, Marie, and their children be as fulfilling as his years of service have been rewarding.
HONORING ROMAN, DON AND GLORIA REED FOR THEIR EFFORTS TO FUND SPINAL CORD INJURY RESEARCH

HON. FORTNEY PETE STARK
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 5, 2002

Mr. STARK. Mr. Speaker, I am pleased to take this opportunity to share with my colleagues the achievements of a remarkable family in my district.

Roman Reed was a star college football player until he was paralyzed by a game injury that broke his neck. Such an injury would devastate most families, but not the Reeds. Roman's father, Don, began tirelessly searching for cures for his son's injuries. Don learned that, while research is moving closer and closer to a cure, insufficient funding is slowing our chances for success.

Roman's parents, Don and Gloria Reed, have become tireless advocates for spinal cord research. They gathered other concerned citizens and founded "Californians for a Cure," a campaign to raise funds for spinal cord injury research. Car accidents are the leading cause of spinal cord injury. Recognizing that, they sought state legislation to dedicate a portion of the state revenues collected from speeding tickets to spinal cord research.

The Reed's State Assemblyman, John Dutra, took up their cause for spinal cord research in the State Legislature. In September 2000, after three years of tremendous work, Governor Gray Davis signed the Roman Reed bill into law. For five years, this law will provide $1 million annually for spinal cord research in California.

Last Friday, March 1, the Roman Reed Laboratory for Spinal Cord Injury Research was dedicated at the University of California, Irvine. This laboratory was created through some of the funds made possible by the Roman Reed Bill. The Roman Reed Laboratory has a simple, important vision: to create a setting where scientists can rapidly translate ideas into research. Furthermore, the laboratory hopes to make spinal cord injury research more appealing to today's scientist with a compelling idea to immediately undertake research and experiments. The new core laboratory will help fast-track spinal cord injury research and speed up our chances of finding successful treatments to these devastating injuries.

Today, Roman has regained the use of his arms and legs. His father himself, and parents still tirelessly push for greater strides in spinal cord injury research. Most recently, I've heard from Don Reed regarding his fight to oppose new federal limitations on stem cell research. Stem cells may well be one of the answers to fighting paralysis. Don is taking his fight from California to Washington to make sure that roadblocks are not put in the way of vitally needed research.

I commend the entire Reed family for their dedication to finding a cure for spinal cord injuries—not only for their son—but for everyone who suffers from these devastating injuries. I am honored to know the Reeds, and proud to represent them in the U.S. Congress, and I am pleased to help them in this important cause.

TRIBUTE TO BISHOP WILLIAM L. JORDAN

HON. ROD R. BLAGOJEVICH
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 5, 2002

Mr. BLAGOJEVICH. Mr. Speaker, it is an honor for me to rise today to pay tribute to the Honorable Bishop William L. Jordan, Pastor of St. Mark Baptist Church in Harvey, Illinois. Since 1976, God, through him, has made and continues to make a difference in many lives.

Under his leadership and vision, St. Mark's membership has grown to over seven thousand. He preaches two Sunday services each week. St. Mark operates several community based programs, a medical center and a community center. Over twenty-six years of untried service, faithful dedication to the community and strong leadership have earned him the deserved respect and admiration of all whose lives he has touched.

Bishop Jordan has been instrumental in shaping the fabric of our community, state and country. I applaud his leadership and commend him for toiling so long to provide the type of guidance which has empowered so many to make meaningful contributions to the community. His accomplishments are far too numerous to list but I applaud him for each and every one of them and for having the dream and desire to use his faith as a vehicle to effect social, political and economic change.

He is a true testament to his faith and an asset to our country. I commend Bishop William Jordan and wish him many more years of exemplary service to the Lord.

TRIBUTE TO JOHN BULAGA, JR., JEREMY Glick, DEEPA PAKKALA, BRUCE REYNOLDS, JOSEPH VILARDO

HON. MARGE ROUKEMA
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 5, 2002

Mrs. ROUKEMA. Mr. Speaker, I rise today to pay tribute to five outstanding individuals who were killed in the attacks on our nation on September 11th. For the past four months, we have heard and read the stories of countless family members, neighbors and friends who went to work on September 11th and never came home. I ask that the names of five of these men and women be kept in our nation's CONGRESSIONAL RECORD—commemorating them as true American heroes.

Our northern New Jersey communities have been particularly hard-hit. We all know someone who was lost. Their stories are heart-wrenching, nearly unbearable in their sadness.

Today, in northern New Jersey, families will gather to celebrate the strong and proud American spirits of five individuals taken from our community. ClearChannel Communications will also be present with the United Way to present the families of the victims with a donation. I thank everyone who will be taking part in this for their support and compassion for those who have made a difference.

I have spoken to many families in my own attempt to bring them some consolation. Even though there are no words to relieve their anguish, I told each family that they should take comfort in the knowledge they are in the hearts and prayers of an entire nation. They are truly American heroes.

Just as I have come to know the nearly 100 residents of my Congressional District who never came home on September 11th, I have come to know John Bulaga, Jr., Jeremy Glick, Bruce Reynolds, Deepa Pakkala, and Joseph Vilardo.

John Bulaga, Jr., was a man who loved planning for the future. Shortly before he was killed while working for eSpeed, with Cantor Fitzgerald. John focused a career on preparing for the future of technology and the Internet. His wife finished some of the family’s plans for the future, as she recently finished the closing of the house and will move there shortly with their two children, Rhiannon and Alannah.

Jeremy Glick was one of the heroes aboard the American Airlines Flight 11 that crashed in Pennsylvania. Before Jeremy and other passengers decided to attack the hijackers, Jeremy was able to call his wife, Lizbeth, providing important details about the terrorists’ actions over his cell phone and telling Lizbeth how much he loved her. Jeremy’s newborn daughter Emerson will grow up hearing of her father’s brave actions.

Deepa Pakkala never wanted to call it a day. Determined to not only succeed but excel, Deepa worked long hours in order to provide for her family. A young mother who had just begun working for Oracle Corporation, Deepa went to work on September 11th and never returned.

Michael, can be very proud of their father. The two month old of John Bulaga, Jr., Jeremy Glick, Bruce Reynolds, Joseph Vilardo loved his family more than anything. John Bulaga, Jr. was a man who loved planning for the future. Shortly before he was killed while working for eSpeed, with Cantor Fitzgerald. John focused a career on preparing for the future of technology and the Internet. His wife finished some of the family’s plans for the future, as she recently finished the closing of the house and will move there shortly with their two children, Rhiannon and Alannah.

Bruce Reynolds was last seen helping a woman with burns in the south World Trade Center tower. Bruce’s father recalls that ever since Bruce was young, he knew he wanted to be a police officer to help people. He became a Port Authority Police Officer in June of 1986. Through his service and bravery, not only did his dream come true, but he has also saved people’s lives and made other people’s dreams possible. From the way people talk about Officer Bruce Reynolds, you can tell he was a truly special husband, father, son and fellow officer. Bruce’s children, Brianna and Michael, can be very proud of their father.

Joseph Vilardo loved his family more than anything. Joseph, a Senior Vice President with Cantor Fitzgerald, lived with his wife and children in Stanhope, nearby his parents and three sisters. According to his many friends, Joseph was a well-liked and well-respected individual. Regardless of how much work was required of him, Joseph always made time for his wife Patricia and their two children, Nicole and Matthew. Nicole and Matthew will have many memories of their father’s love for them.

These individuals have the admiration and respect of an entire nation. Their families can be assured that this nation will never forget the atrocities of September 11th or the values for which they died. Out of this tragedy, our nation has emerged stronger and prouder than ever. And we now come together to tell these families they are not alone. America stands with them—now in their hour of grief, and in the days and years to come.
Mr. Speaker, I urge my colleagues to join me in commemorating the lives of these noble Americans. May God bless these men and women, and those that are gathered today in their memory. And God bless America.

A BILL TO EXEMPT THE LST–325 FROM U.S. COAST GUARD INSPECTIONS

HON. TOM DAVIS
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 5, 2002

Mr. TOM DAVIS of Virginia. Mr. Speaker, I rise today to introduce legislation which will assist in the preservation and promotion of the LST–325, a symbol of American heroism and patriotism.

The LST–325 is a unique ship that needs and warrants special attention. LSTs (Landing Ship Tanks) were produced by the hundreds in the Second World War, but only a few are left today. Thousands of men served on them in the critical North Africa, Italian, and Normandy invasions. The brave young men who served on the LST–325 and its sister ships are now in the golden years of their lives, and they are spearheading this campaign to restore the LST–325 to its original glory.

Many may remember that the LST–325 was brought back to the United States last year by a group of retired veterans. Against the odds, these veterans sailed the LST–325 from Greece to Mobile, Alabama, facing fierce opposition from the seas and the weather—not to mention the bureaucracies of various nations. They overcame these hardships and succeeded magnificently. I am pleased to share with you that the average age of the crew was seventy-two years old.

Now the task is to restore the ship to create a living memorial and serve as a testament to our history and the bravery of the men who served on LSTs. My bill would specifically exempt the LST–325—like similar special category vessels such as the steamship John W. Brown in Baltimore, Maryland, the steamship Lane Victory in New York, California, and the steamship Jeremiah O’Brien—from certain Coast Guard technical and legal requirements (USC Title 46, Subsection 3302, subpart (f)(1)(A), (B), and (C)). These regulations apply today’s laws to yesterday’s ships. They only impede restoration efforts of the ship, and raise costs unnecessarily without any benefit to the ship.

This is problematic because the LST–325 is to be used strictly as a not-for-profit, historical vessel. It will educate Americans about the role these vessels played in our history.

Bordentown Township has been forced to grapple with the challenges of growth, due its desirable location along the Delaware River and its well-deserved reputation as a good place to live and raise a family. Consequently, there has been a sense of commitment among Township residents to maintain and preserve this historic ship.

In order to uphold the character of the township, Bordentown Township has purchased the LST–325 and its sister ships. The LST–325 was then restored, and the vessel was returned to the sky. To celebrate the restoration, Bordentown Township created a special commission to oversee the restoration and maintain the vessel as a historical artifact.

The first meetings of the Bordentown Township Commission were held in an unheated shed. Later, the meetings were held in a private home when it became too cold to hold them in the shed. In 1903 Township Hall was built on Cemetery Lane.

While things are much different in Bordentown Township today, the same spirit of service and willingness to make personal sacrifices for the benefit of local residents still exists in Bordentown’s elected leaders. I know, because I am friends with, and work with, many of them. For instance, the current mayor of Bordentown Township, Mark Roselli, once served as my Legislative Director, Campaign Manager, and Policy Advisor.

In addition, the Director of the Burlington/Washington County, Joyce Golden, has been a proud resident of Bordentown Township for 22 years. She currently serves on the Township’s County Committee, and has often told me that she and her husband, Marty, would not want to raise their family in any other community. Joyce and Marty are especially proud that their children have chosen to continue to live and work in Bordentown Township. Their daughter and her family have built a home in Bordentown Township, and it is now the community as a career Firefighter/EMT.

Mr. Speaker, I once again congratulate the people of Bordentown Township for preserving a community with a high quality-of-life for 150 years.

A TRIBUTE TO RUBEN S. AYALA FOR A LIFETIME OF PUBLIC SERVICE

HON. JERRY LEWIS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 5, 2002

Mr. LEWIS of California. Mr. Speaker, I would like today to pay tribute to Ruben S. Ayala, whose 45 years in elective office in California made him one of the most respected and influential political voices from San Bernardino County. Mr. Ayala, who is celebrating his 80th birthday this month, is still serving the people of California as a member of the state Unemployment Insurance Appeals Board.

Mr. Ayala began his career in politics in the same way that I and many of my colleagues became involved—as a member of the local board of education. He was elected to the Chino School Board in 1955, and he has been an active and influential political voice in Calexico. In 1962, he was elected as a Chino City Councilman, and became the city’s first elected mayor in 1964. He joined the San Bernardino County Board of Supervisors in 1966 and was chairman from 1968 to 1972. In 1974, he won a special election for State Senate, and served in that body until he retired in 1998.

I was privileged to serve in the Legislature for four years with Ruben Ayala, and found him to be a forceful advocate for the state’s schoolchildren and a proud proponent of San Bernardino County. After I came to Congress, I always knew State Sen. Ayala could be counted on to work hard for the benefit and improvement of our county. We have watched it grow and mature in many ways over the years, and Ruben Ayala deserves great credit for helping foster the county’s economic expansion.

The first Mexican-American to be elected to the State Senate in the 20th Century, Ruben Ayala was almost better known for his U.S. Marine Corps service and the Marine-like attitude he brought to the Legislature. When he became involved with an issue, he took action and was tenacious in pushing through legislation or demanding a response from state agencies. As chairmain of the Agriculture and Water Resources Committee, he was one of the most vocal voices with water policy in California—a topic that often defines the state’s political and economic agenda. He was also a primary sponsor of the legislation creating the California Conservation Corps, a very successful program that helped many citizens complete parks and public works projects.

Mr. Speaker, the quality of Mr. Ayala’s work, and the esteem that he has garnered, is evident from the fact that two parks, a street and
a high school has been named in his honor. He was named Legislative of the Year in 1986 by the League of California Cities, and received many other awards for his work on behalf of schools, cancer victims and the local economy. I ask you and my colleagues to honor him as well with our congratulations on his 80th birthday, and our best wishes for his continuing work on behalf of Californians.

LADY HAWKS OF CARROLLTON HIGH SCHOOL

HON. JOHN SHIMKUS
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 5, 2002

Mr. SHIMKUS. Mr. Speaker, I rise today to congratulate the Lady Hawks of Carrollton High School on their recent state basketball championship. The Lady Hawks defeated Augusta Southeastern, 24–20, to win their second consecutive Illinois High School Association Class A State Basketball Championship.

In addition to being crowned state champs, the Carrollton Lady Hawks finished with a record of 34 victories and only 3 losses. This team was able to reel off 24 consecutive wins en route to back-to-back titles. The Lady Hawks gave Carrollton basketball fans a thrill throughout their historic season.

I would like to personally commend the team members and coaches for a job well done. They are: Krisse Peters, Lauren Brannan, Justine Tucker, Alicia DeShasier, Tracy Stumpf, Katie Nolan, Dana Carter, Terra Stumpf, Amber Shelton, Molly Reed, Lisa Grummel, Jena Staples, Nicole Meyer, and Hannah Cunningham. Their coaches are Head Coach Lori Blade and Assistant Coach Donna Farley. I am very proud of you all.

HONORING THE LATE GERALD SOLOMON

HON. DAN BURTON
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 5, 2002

Mr. BURTON of Indiana. Mr. Speaker, on Friday, October 26, my good friend Gerry Solomon passed away after suffering congestive heart failure. What a great loss for this institution and for the constituents he once served.

Gerry was a Member of this Chamber for 10 terms serving from 1979–1999. Ask anyone who served with him, and they will remember him as an outspoken and tenacious advocate for his views and constituents.

I knew Gerry well and he was second to none in this Chamber. In losing Gerry, we lost a tremendous patriot and committed public servant. He was often referred to by his fellow colleagues as “the Pit Bull of the House.” And, although he enjoyed his work in Washington and in the International arena, he always said his greatest enjoyment came from successfully helping people back home in his district cope with problems they had with the Federal bureaucracy.

He was very proud of the often repeated comments on the streets back in his district that “you may not always agree with Jerry Solomon, but you sure as hell know where he stands on the issues.” His commuting back home every weekend, catapulted him to re-election usually by overwhelming 3–1 margins during his ten terms in Congress.

During his Congressional career, which spanned 20 years serving in the House of Representatives, Jerry devoted most of his time to the issues of veterans, senior citizens, foreign policy, national defense, the war on drugs, and the budget.

May he always be remembered for the good father and husband that he was, and his relentless efforts to promote pride, patriotism and volunteerism. He proudly and unabashedly showcased his love for his family and his country everyday of his life.

Mr. Speaker, H. Con. Res. 338, a resolution authorizing the printing of a collection of memorial tributes made in honor of the late Gerald Solomon, is a fitting tribute to our late colleague and friend. I rise in strong support of it.

REMEMBERING TOM WHALEN,
FORMER MAYOR OF THE CITY OF ALBANY

HON. MICHAEL R. MCMULTRY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 5, 2002

Mr. MCMULTRY. Mr. Speaker, I am terribly stunned and saddened to learn of the loss of my friend, Tom Whalen. My thoughts and prayers are with his wife, their children, and the entire Whalen family.

Tom served the people of the City of Albany as Mayor for eight years with the utmost devotion and expertise. He led the effort to bring the esteemed designation of “All-America City” to Albany in 1991. In 1986, he spearheaded the restoration of the carillon at City Hall as part of Albany’s Tercentennial. That same year, he formed the Community Police Relations Board to help foster relations between the Albany Police Department and the community. He also played an instrumental role in the development of the Albany-Tula Alliance.

Tom was a highly respected member of the Capital Region community who had a sincere commitment to public service—a sense of hard work and a desire to help others, especially the disadvantaged.

Tom Whalen had a love for God, his family, his community and his beloved Ireland. His loss will be felt and endured by many, and the void in our community—and our hearts—will be difficult to fill.

INTERNET FREEDOM AND BROADBAND DEPLOYMENT ACT OF 2001

SPEECH OF
HON. BETTY McCOLLUM
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 27, 2002

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 1542) to deregulate the Internet and high speed data services, and for other purposes:

Ms. McCOLLUM. Mr. Chairman, I rise today in opposition to the Tauzin-Dingell Broadband Deployment Act.

My State of Minnesota has been a pioneer in fostering competition in local telephone markets. In 1999, Minnesota implemented a ruling that required our local telephone companies to share not only its copper wires, but also upgraded lines with competitors. Following Minnesota’s lead, the Federal Communications Commission (FCC) adopted this line-sharing rule, in effect making it law nation-wide for all the surviving Bell companies.

Tauzin-Dingell would eliminate this sensible approach that Minnesota initiated. By excluding competitors from the use of upgraded fiber lines, Tauzin-Dingell will create a new monopoly for the Bells. This would mean fewer choices and poorer service for consumers.

We must not gut the market-opening provisions of the 1996 Telecommunications Act before they have had a chance to take root! It is imperative that we maintain incentives for competition to ensure the best possible services for our constituents.

Free and equal access to information is vital to the strength of our democracy. However, H.R. 1542 is simply not the answer. I urge my colleagues to join me in opposing H.R. 1542.

**Daily Digest**

**Senate**

**Chamber Action**

*Routine Proceedings, pages S1431–S1552*

**Measures Introduced:** Five bills and one resolution were introduced, as follows: S. 1985–1989, and S. Res. 216.

**Measures Passed:**

*Honoring Milton D. Stewart:* Senate agreed to S. Res. 216, to honor Milton D. Stewart for his years of service in the Office of Advocacy of the Small Business Administration.

**Energy Policy Act:** Senate resumed consideration of S. 517, to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, taking action on the following amendment proposed thereto:

- Pages S1431–38, S1441–S1527, S1530–33

**Pending:**

Daschle/Bingaman Further Modified Amendment No. 2917, in the nature of a substitute.

- Pages S1431–38, S1441–S1527, S1530–33

A unanimous-consent agreement was reached providing for further consideration of the bill, at 10 a.m., on Wednesday, March 6, 2002.

**Nominations Confirmed:** Senate confirmed the following nominations:

- Don V. Cogman, of Connecticut, to be a Member of the National Council on the Arts for a term expiring September 3, 2006. (Prior to this action, Committee on Health, Education, Labor, and Pensions was discharged from further consideration.)
- Katharine DeWitt, of Ohio, to be a Member of the National Council on the Arts for a term expiring September 3, 2006. (Prior to this action, Committee on Health, Education, Labor, and Pensions was discharged from further consideration.)
- Teresa Lozano Long, of Texas, to be a Member of the National Council on the Arts for a term expiring September 3, 2006. (Prior to this action, Committee on Health, Education, Labor, and Pensions was discharged from further consideration.)

- Pages S1535, S1548, S1552

**Additional Cosponsors:**

- Pages S1536–37

**Committee Meetings**

(Committees not listed did not meet)

**APPROPRIATIONS—SUPREME COURT/JUDICIARY**

*Committee on Appropriations:* Subcommittee on Commerce, Justice, State, and the Judiciary concluded hearings on proposed budget estimates for fiscal year 2003, after receiving testimony on behalf of funds for their respective activities from Anthony M. Kennedy and Clarence Thomas, both Associate Justices, United States Supreme Court; and John G. Heyburn II, Chairman, M. Blane Michael, and Leonidas Ralph Mecham, all of the Committee on the Budget, Judicial Conference of the United States.

**APPROPRIATIONS—MILITARY CONSTRUCTION**

*Committee on Appropriations:* Subcommittee on Military Construction concluded hearings on proposed budget estimates for fiscal year 2003 for the Department of Defense, including defense-wide, defense agencies, and Army military construction, after receiving testimony from Dov S. Zakheim, Under Secretary (Comptroller), Raymond F. DuBois, Jr., Deputy Under Secretary for Installations and Environment, Lt. Gen. William Tangney, USA, Deputy Commander in Chief, Special Operations Command, Maj. Gen. Leonard Randolph, USAF, Deputy Executive Director of the TRICARE Management Activity, Office of the Assistant Secretary for Health Affairs, John M. Molino, Deputy Assistant Secretary for

DEFENSE AUTHORIZATION

DEFENSE AUTHORIZATION

Committee on Armed Services: Subcommittee on SeaPower concluded hearings on proposed legislation authorizing funds for fiscal year 2003 for the Department of Defense, focusing on Marine Corps modernization programs, after receiving testimony from Gen. James L. Jones, Jr., USMC, Commandant, and Lt. Gen. Robert Magnus, USMC, Deputy Commandant, Programs and Resources, both of the United States Marine Corps.

ACCOUNTING/INVESTOR PROTECTION

Committee on Banking, Housing, and Urban Affairs: Committee concluded oversight hearings to examine accounting and investor protection issues raised by Enron and other public companies, focusing on full disclosure guidance, after receiving testimony from David M. Walker, Comptroller General of the United States, General Accounting Office; Robert R. Glauber, National Association of Securities Dealers, Inc., Washington, D.C.; Joel Seligman, Washington University School of Law, St. Louis, Missouri; and John C. Coffee, Jr., Columbia University School of Law, New York, New York.

TERRORIST NUCLEAR THREAT

Committee on Foreign Relations: Committee met in closed session to receive a briefing on the potential of a terrorist nuclear threat, focusing on dirty bombs and basement nuclear weapons, from Harry C. Vantine, Division Leader, Counterterrorism and Incident Response, Lawrence Livermore National Laboratory; Donald D. Cobb, Associate Laboratory Director for Threat Reduction, Los Alamos National Laboratory; Richard A. Meserve, Chairman, Nuclear Regulatory Commission; Steven E. Koonin, California Institute of Technology, Pasadena, California; and a member of the Intelligence Community.

NOMINATION

Committee on Governmental Affairs: Committee concluded hearings on the nomination of Jeanette J. Clark, to be an Associate Judge of the Superior Court of the District of Columbia, after the nominee, who was introduced by D.C. Delegate Eleanor Holmes Norton, testified and answered questions in her own behalf.

CLONING AND REGENERATIVE MEDICINE

Committee on Health, Education, Labor, and Pensions: Committee concluded hearings to examine cloning research, focusing on the clarification of how stem cell research, or therapeutic cloning, differs from human reproductive cloning, and the ethical and public-policy issues related to both, and related issues of S. 1893, to ban human cloning while protecting stem cell research, after receiving testimony from Senators Specter and Landrieu; Christopher Reeve, Christopher Reeve Paralysis Foundation, Springfield, New Jersey; Paul Berg, Stanford University Medical Center Beckman Center for Molecular and Genetic Medicine, Stanford, California, on behalf for the American Society for Cell Biology/Coalition for the Advancement of Medical Research; Thomas H. Murray, Hastings Center, Garrison, New York; Judy Norsigian, Boston Women’s Health Book Collective, Boston, Massachusetts; and Stuart A. Newman, New York Medical College, Valhalla, New York.

INDIAN PROGRAMS BUDGET

Committee on Indian Affairs: Committee held hearings on the President’s proposed budget request for fiscal year 2003 for Indian programs, focusing on employment and training, education, housing, government, and law enforcement, receiving testimony from David G. Dye, Deputy Assistant Secretary of Labor for Employment and Training Administration; Thomas M. Corwin, Acting Deputy Assistant Secretary of Education for Elementary and Secondary Education; Tracy A. Henke, Principal Deputy Assistant Attorney General, Office of Justice Programs, Department of Justice; and Clarence Carter, Director, Office of Community Services, Administration for
Children and Families, Department of Health and Human Services.

Hearings continue on Thursday, March 7.

NOMINATIONS

Committee on the Judiciary: Committee concluded hearings on the nomination of Mary Ann Solberg, of Michigan, to be Deputy Director, Barry D. Crane, of Virginia, to be Deputy Director for Supply Reduction, and Scott M. Burns, of Utah, to be Deputy Director for State and Local Affairs, all of the Office of National Drug Control Policy; and the nomination of J. Robert Flores, of Virginia, to be Administrator of the Office of Juvenile Justice and Delinquency Prevention, Department of Justice, after the nominees testified and answered questions in their own behalf. Ms. Solberg was introduced by Senators Levin, Stabenow, and Representative Levin, Mr. Crane and Mr. Flores were introduced by Senators Warner and Allen, and Mr. Burns was introduced by Senators Hatch and Bennett.

---

House of Representatives

Chamber Action

Measures Introduced: 17 public bills, H.R. 3839–3855; 1 private bill, H.R. 3856; and 4 resolutions, H. Con. Res. 338 and H. Res. 355–357, were introduced.

Reports Filed: Reports were filed today as follows:
- H. Res. 353, providing for consideration of H. Con. Res. 275, expressing the sense of the Congress that hunting seasons for migratory mourning doves should be modified so that individuals have a fair and equitable opportunity to hunt such birds (H. Rept. 107–364); and

Speaker Pro Tempore: Read a letter from the Speaker wherein he appointed Representative Culberson to act as Speaker pro tempore for today.

Recess: The House recessed at 12:56 p.m. and reconvened at 2 p.m.

Private Calendar: On the call of the Private Calendar, the House passed over without prejudice H.R. 392, for the relief of Nancy B. Wilson.

Suspensions: The House agreed to suspend the rules and pass the following measures:
- Ceremony to Present the Congressional Gold Medal to Former President Ronald Reagan and Nancy Reagan on May 15, 2002: H. Con. Res. 305, amended, permitting the use of the Rotunda of the Capitol for a ceremony to present a gold medal on behalf of Congress to former President Ronald Reagan and his wife Nancy Reagan in recognition of their service to the Nation. The bill was signed by the President on July 27, 2000 and became Public Law 106–251; Pages H661–63, H666
- Memorial Tributes in Honor of the Late Honorable Gerald Solomon of New York: H. Con. Res. 338, authorizing the printing as a House document of a collection of memorial tributes made in honor of the late Gerald Solomon; and Pages H663–64
- Recess: The House recessed at 2:48 p.m. and reconvened at 6 p.m.

Recess: The House recessed at 2:48 p.m. and reconvened at 6 p.m.

John F. Kennedy Center for the Performing Arts: The Chair announced the Speaker’s appointment of Representatives Pryce of Ohio and Kennedy of Rhode Island to the Board of Trustees of the John F. Kennedy Center for the Performing Arts.

Quorum Calls—Votes: One yea-and-nay vote developed during the proceedings of the House today and appears on page H666. There were no quorum calls.

Adjournment: The House met at 12:30 p.m. and adjourned at 8:57 p.m.

Committee Meetings

LABOR, HHS, AND EDUCATION APPROPRIATIONS

Committee on Appropriations: Subcommittee on Labor, Health and Human Services and Education held a hearing on Inspector General Panel. Testimony was
heard from Gordon S. Heddell, Inspector General, Department of Labor; Janet Rehnquist, Inspector General, Department of Health and Human Services; and Lorraine Lewis, Inspector General, Department of Education.

VA, HUD AND INDEPENDENT AGENCIES APPROPRIATIONS

Committee on Appropriations: Subcommittee on VA, HUD and Independent Agencies held a hearing on Department of Veterans Affairs. Testimony was heard from Anthony J. Principi, Secretary of Veterans Affairs.

DOMESTIC TERRORISM RESPONSE

Committee on Armed Services: Subcommittee on Military Procurement held a hearing on recommendations on crisis response capabilities to incidents of domestic terrorism. Testimony was heard from Bruce Baughman, Director, Domestic Preparedness, FEMA; the following officials of the Department of Defense: Peter F. Verga, Special Assistant, Homeland Security; and Maj. Gen. Raymond F. Rees, USA, National Guard, Vice Chief, National Guard Bureau; Maj. Gen. John M. McBroom, USAF (Ret.), Director, Emergency Operations, Department of Energy; Charles Ramsey, Chief, Metropolitan Police Department, District of Columbia; James Gilmore, former Governor, State of Virginia and Chairman, Advisory Panel to Assess Domestic Response Capabilities for Terrorism Involving Weapons of Mass Destruction; and public witnesses.

ARGENTINA’S ECONOMIC MELTDOWN

Committee on Financial Services, Subcommittee on International Monetary Policy and Trade continued hearings entitled “Argentina’s Economic Melt-down—Causes and Remedies.” Testimony was heard from public witnesses.

OFFICE OF JUSTICE PROGRAMS

Committee on the Judiciary: Subcommittee on Crime held an oversight hearing on “The Office of Justice Programs Part One-Coordination and Duplication.” Testimony was heard from Deborah Daniels, Assistant Attorney General, Office of Justice Programs, Department of Justice; Ralph E. Kelly, Commissioner, Department of Juvenile Justice, State of Kentucky; Laurie O. Robinson, former Assistant Attorney General, Office of Justice Programs, Department of Justice; and a public witness.

HUNTING SEASONS—MIGRATORY MOURNING DOVES

Committee on Rules: Granted, by voice vote, an open rule providing 1 hour of debate on H. Con. Res. 275, expressing the sense of the Congress that hunting seasons for migratory mourning doves should be modified so that individuals have a fair and equitable opportunity to hunt such birds. The rule waives all points of order against consideration of the concurrent resolution. The rule authorizes the Chairman of the Committee of the Whole to accord priority in recognition to Members who have pre-printed their amendments in the Congressional Record. Finally, the rule provides one motion to recommit with or without instructions. Testimony was heard from Chairman Hansen and Representative Underwood.

MOTIONS TO SUSPEND THE RULES

Committee on Rules: Granted, by voice vote, a resolution providing that certain suspensions will be in order at any time on the legislative day of March 6, 2002.

ADMINISTRATION’S UNEMPLOYMENT ADMINISTRATIVE FINANCING REFORM INITIATIVE

Committee on Ways and Means: Subcommittee on Human Resources held a hearing on the Administration’s Unemployment Administrative Financing Reform Initiative. Testimony was heard from Emily S. DeRocco, Assistant Secretary, Employment and Training Administration, Department of Labor; and public witnesses.

RETIREMENT SECURITY—EMPLOYEE AND EMPLOYER VIEWS

Committee on Ways and Means: Subcommittee on Oversight held a hearing on Employee and Employer Views on Retirement Security. Testimony was heard from public witnesses.

Congressional Record

The public proceedings of each House of Congress, as reported by the Official Reporters thereof, are printed pursuant to directions of the Joint Committee on Printing as authorized by appropriate provisions of Title 44, United States Code, and published for each day that one or both Houses are in session, excepting very infrequent instances when two or more unusually small consecutive issues are printed at one time. Public access to the Congressional Record is available online through GPO Access, a service of the Government Printing Office, free of charge to the user. The online database is updated each day the Congressional Record is published. The database includes both text and graphics from the beginning of the 103rd Congress, 2d session (January 1994) forward. It is available through GPO Access at www.gpo.gov/gpoaccess. Customers can also access this information with WAIS client software, via telnet at swais.access.gpo.gov, or dial-in using communications software and a modem at (202) 512-1800. Questions or comments regarding this database or GPO Access can be directed to the GPO Access User Support Team at: E-Mail: gpoaccess@gpo.gov; Phone 1-888-293-6498 (toll-free), 202-512-1800 (D.C. area); Fax: 202-512-1262. The Team’s hours of availability are Monday through Friday, 7:00 a.m. to 5:30 p.m., Eastern Standard Time, except Federal holidays. The Congressional Record paper and 24x microfiche will be furnished by mail to subscribers, free of postage, at the following prices: paper edition, $211.00 for six months, $422.00 per year, or purchased for $5.00 per issue, payable in advance; microfiche edition, $341.00 per year, or purchased for $1.50 per issue payable in advance. The semimonthly Congressional Record Index may be purchased for the same per issue prices. To place an order for any of these products, visit the U.S. Government Online Bookstore at: bookstore.gpo.gov. Mail orders to: Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or phone orders to (866) 512-1800 (toll-free), (202) 512-1800 (D.C. Area), or fax to (202) 512-2250. Remit check or money order, made payable to the Superintendent of Documents, or use VISA, MasterCard, Discover, American Express, or GPO Deposit Account. Following each session of Congress, the daily Congressional Record is revised, printed, permanently bound and sold by the Superintendent of Documents in individual parts or by sets. With the exception of copyrighted articles, there are no restrictions on the republication of material from the Congressional Record.
