The House met at 10 a.m.

The Chaplain, the Reverend Daniel P. Coughlin, offered the following prayer:

Lord, our refuge and our defense, show Yourself, our Deliverer. In the time of Moses, in response to the murmuring of Your people, You fed them in the desert. Amidst their struggles, Your servant Paul exhorted the early Christian community at Corinth not to grumble, but deepen their understanding. Yet in this Nation truly blessed and free, rich with options and opportunity, people find reasons to complain. Among the mournful crisis of this world, hear us and be patient with us, Lord.

Guide Your people, by Your spirit, that they may refine their perceptions and expand their vision so to distinguish mere inconvenience and frustration from true suffering and the pain of loss. The times and the issues which face this Congress and this Nation are so significant, Lord, You must silence the trivial in us.

You have called us to be Your moral witness and reform our lives. Free us from complaining so to learn determination, commitment, and perseverance; and prove ourselves faithful in living and unafraid to die for everlasting values now and forever. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day’s proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule 1, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Nebraska (Mr. TERRY) come forward and lead the House in the Pledge of Allegiance?

Mr. TERRY led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

CONGRATULATIONS TO JOB CORPS

(Ms. ROS-LEHTINEN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ROS-LEHTINEN. Mr. Speaker, I would like to congratulate Job Corps, a national program which serves more than 70,000 students each year, and especially I would like to congratulate Job Corps director Roy Larsen of Homestead and Luis Cerezo of Miami.

The Job Corps program teaches the job training skills necessary for young people to thrive in the workforce. Through cooperative work-based learning, students are able to gain hands-on experience which is vital to long-term career success.

Job Corps graduates enjoy a 91 percent placement rate through national partnerships with employers such as HCR, Manor Care, the U.S. Army, and Walgreens. These partners invest in Job Corps students and are rewarded with well-trained individuals to fill their employment needs.

Please join me in congratulating and recognizing the wonderful work that Job Corps provides and, most especially, Job Corps directors Roy Larsen of Homestead and Luis Cerezo of Miami for their dedication and hard work in the south Florida community and for our young people.

SOCIAL SECURITY IS AN IRREFUTABLE OBLIGATION OF U.S.

(Mr. DeFAZIO asked and was given permission to address the House for 1 minute.)

Mr. DeFAZIO. Well, Mr. Speaker, the Republican majority has a new plan. Instead of taking on the extension of the $5.95 trillion debt ceiling, they are a little embarrassed to be increasing the debt of the United States when last year they predicted surpluses as far as the eye could see and paying the debt off within a few years. They are especially embarrassed that they are going to break open the Social Security lockbox, something they had us vote on seven times. They do not talk much about the lockbox anymore.

But now the most disturbing proposal. They are not going to raise the debt ceiling; they are going to disappear the Social Security trust fund. Yes, that is right. They decided yesterday that they are going to say that these special depository instruments, the debt of the Federal Government of the United States, which is held by the Social Security trust fund, over $1 trillion, does not exist.

Suddenly, they are wiping a couple of trillion dollars off the books, all because they do not want to take an embarrassing vote, or all because they do not want to roll back their obscene tax cuts or rein in their massive increases in military spending.

They cannot do this to the Social Security trust fund. It is an irrefutable obligation of the Government of the United States of America. They cannot disappear it.

NORTH KOREA AND THE AXIS OF EVIL

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, President Bush said that there is an axis of evil governments at work in the world today, three countries ruled by evil governments that sponsor terrorism, practice genocide, and seek weapons of mass destruction. It should be pointed out that it is the governments, the rulers of these three countries the President has talked about, not the people who live there.
No one knows better than the people of Iran, Iraq, and North Korea that their rulers are evil. Take, for example, the boy in this picture. A German doctor who was visiting the North Korean countryside took this photo more than a year ago. He said, When I see the brainwashing, starvation, concentration camps, medical experiments, and mass executions, I must say that Kim Jong Il is an upgraded version of Hitler's Nazi Germany. Children like this suffer from starvation, oppression, poor medical care, while the ruling elite live like kings.

The people of North Korea and other axis countries live in constant fear and, while they are sorely oppressed, they dare not complain. The people are not the ones that the President is talking about; it is the governments of these countries that are brutally oppressing their people.

CONGRESS HAS FAILED AGAIN
(Mr. BLUMENAUER asked and was given permission to address the House for 1 minute.)

Mr. BLUMENAUER. Mr. Speaker, yesterday’s vote in the other Chamber marked another sad chapter in America’s inability to have an energy policy. Congress has failed again, as we unsuccessfully attempted to raise efficiency standards for the first time since 1975.

This means that this Congress has failed again to protect the environment, as we continue to consume 10 percent of the world’s petroleum supply, just to get to and from work and the mall. Even if they invade the Arctic, relying on the most volatile region of the world for most of our energy is not going to change.

We have also failed the auto workers. Now people who want energy-efficient vehicles will have three choices in the next model year, all from Japan. The next time there is an energy shortfall, it will be foreign manufacturers in a prime position to satisfy consumer demand.

Most importantly, we failed the American public, the young people whose energy future we are squandering and the citizens that are more than willing to step up and meet this challenge of protecting the environment and conserving valuable petroleum resources.

I hope the public loses no opportunity to tell Congress about its misjudgment and lack of courage.

TRIBUTE TO CHIEF WARRANT OFFICER STANLEY L. HARRIMAN
(Mr. HAYES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HAYES. Mr. Speaker, today I rise in tribute to Chief Warrant Officer Stanley L. Harriman of Wade, North Carolina, killed in action as a result of enemy fire during Operation Anaconda.

He had been assigned to the Third Special Forces Group in my district at Fort Bragg, North Carolina. He was the first Army soldier from North Carolina to die in action in the Afghan war.

Stanley, a loving husband and father, was willing to step up and meet this challenge. He had been deployed in Haiti, Kuwait, Nigeria, Germany, and for Operation Desert Storm. During his career he earned two Meritorious Service Medals, three Army Achievement Medals, and an Army Superior Unit Award, among many others.

The accolades of Chief Warrant Officer Harriman’s military career speak for themselves. I would like to highlight his strong moral character and dedication to our country. Stanley wanted freedom. He wanted freedom for us and for his children. He believed in the fight to free the world of terrorism.

Stan loved his country, and we must not forget the ultimate sacrifice that he made for his children.

Recently I had the chance to visit Afghanistan and see the outstanding work that the Special Forces have done. Sheila, Barbi, and Christopher, our thoughts, our prayers, and those of a grateful Nation, are with you today.

CONGRATULATIONS TO THE GIRL SCOUTS ON THEIR 90TH ANNIVERSARY
(Ms. WOOLSEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. WOOLSEY. Mr. Speaker, I rise today to congratulate the Girl Scouts on their 90th anniversary. As a former Girl Scout, it brings me great pleasure on their 90th anniversary. As a former Girl Scout, it brings me great pleasure.

Since 1912, the Girl Scout program has been helping girls develop physically, mentally, and spiritually. Currently, there are more than 235,000 troops throughout the United States and Puerto Rico. Girls who participate in the Girl Scout program acquire self-confidence and empowerment. They take on responsibility, think creatively, and act with integrity. Our children are our future, and Girl Scout programs help shape these young minds to become good citizens and good leaders. Some actually become Members of Congress.

Mr. Speaker, I am proud to have participated in the Girl Scouts, and I hope that many other girls continue to have the opportunity to take advantage of what Girl Scouts have to offer.

OPPOSE YUCCA MOUNTAIN
(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, the nuclear industry lobbyists are trying to simply pull the wool over our eyes. As well as most Members of Congress and the American people, we are gullible to some of their ludicrous remarks. They would have us believe that by supporting the Yucca Mountain project that the nuclear waste problem at over 100 commercial nuclear power plants will just disappear. Puff. Gone.

Now, I am not sure how many of us believe in fairy tales; but that is exactly what this is, a fairy tale of monumental proportions.

The truth is, there are over 100 nuclear waste sites around the country; and if Yucca Mountain was open, we would have not only those sites, but also Yucca Mountain, and high-level nuclear waste traveling across the country. After all, the waste will not just magically appear in Nevada, it will take at least 38 years and more than 96,000 truck shipments to transport the waste from 38 States.

Mr. Speaker, the viability of Yucca Mountain is not just a fairy tale, it is a nightmare. Protect America. Oppose Yucca Mountain.

THE MEDS ACT
(Mr. ROSS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROSS. Mr. Speaker, adverse medical effects caused by patients misusing or not taking their medicine costs our health care system an estimated $170 billion every year. Tragically, much of this cost results from seniors simply not being able to afford to buy the medicines they need or not knowing how best to take the drugs they have been prescribed.

The prescription drug benefit bill that the gentlewoman from Missouri (Mrs. EMERSON) and I have introduced, the bipartisan MEDS Act, addresses this heavy burden on our Nation’s health care system. Our bill includes provisions that cover critical medical management services to monitor and ensure seniors know what medicines they are taking and how to take them properly.

Some Members are concerned about the cost of providing a prescription drug benefit. Health insurance companies are in the business of making a profit and even they cover medicine as part of their health insurance plan, because they know it helps people to get well quicker, to live healthier lifestyles, and to live longer.

Mr. Speaker, we need to put this issue into perspective and think about the cost of not providing a prescription drug benefit and the fact that our unburdened health care system bears when seniors improperly take or simply cannot afford their medicines.
Court of New York, yet Italy refuses to see Jeff the most fit parent. A final judgment dissolving the marriage was entered by the Court of New York. The court entered temporary custody of Ludwig pending the abduction and other circumstances. Mr. Koons was awarded temporary custody of Ludwig by the Supreme Court of New York, yet Italy refuses to acknowledge this. Where is our State Department? Does anyone care? Bring Ludwig Koons and all American children home.

INS SNAFU PROVES AGAIN THAT BIG GOVERNMENT CANNOT WORK ECONOMICALLY OR EFFICIENTLY

Mr. DUNCAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. DUNCAN. Mr. Speaker, the Immigration and Naturalization Service has had a 250 percent increase in funding over the last 8 years, about 10 times the rate of inflation over that period. Now they are trying to blame the snafu over granting student visas to two dead hijackers over 6 months after the September 11 attacks to an anti-quantified paper system. What a flimsy excuse.

In other words, even with a 250 percent increase in funding, they are basically saying, "If we had even more money, we would have done better." The problem is not money, Mr. Speaker, it is a civil service system that does nothing for good, dedicated employees, but protects lazy or incompetent ones.

Also, in the private sector, the pressure is always on to do more and to do better and to do more with less. These pressures are just not there in the Federal bureaucracy, and it becomes more apparent with each passing year that big government cannot do anything in an economical or efficient way.

CALLING FOR THE STATE DEPARTMENT TO WORK TO BRING ABDUCTED AMERICAN CHILDREN HOME

Mr. LAMPSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. LAMPSON. Mr. Speaker, yesterday we left off with the abduction of Ludwig Koons. On June 9, 1994, against a New York court order, Ilona Staller abducted Ludwig to Italy. A bench warrant was issued in New York. Ms. Stall er kept Ludwig in hiding for over a month, and Jeff Koons had no contact with his son. He did not know where he was, if he was safe, nothing.

Due to the abduction and other circumstances, Mr. Koons was awarded temporary custody of Ludwig pending a final decision by the New York Supreme Court. In the fall of 1994, the Italian authorities charged Ms. Staller with parental kidnapping pending before the Pretura Penale di Roma. However, the Italian Government stalled and stalled. Proceedings on the charge were delayed for 2 years.

In December of 1994, custody was awarded to Jeff Koons by the Supreme Court of New York. The court entered a final judgment dissolving the marriage and blaming Ms. Staller for the breakdown of the marriage, and deeming Jeff the most fit parent.

Mr. Speaker, Jeff Koons was awarded custody of Ludwig by the Supreme Court of New York, yet Italy refuses to do their part.

URGING PRESERVATION OF COLLECTION OF MALCOLM X DOCUMENTS

Mr. MEEKS of New York asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. MEEKS of New York. Mr. Speaker, recently the most extensive collection of Malcolm X's writings ever collaborated was found in the hands of an anonymous private owner. The undisclosed person attempted to sell the collection to the highest E-Bay bidder. Fortunately, an investigation looking into the legitimacy of how the current anonymous owner came to have the documents is pending, and the notion of selling the collection has ceased for the time being.

Prior to this pending investigation, the Lotr. Guitar to be auctioned off into two dozen private hands, completely dispersing the writings to unknown whereabouts, making it difficult, if not impossible, for the public to access.
Many of these documents were written during the leader’s last year, the last year of his life. The reflections of Malcolm X’s innermost thoughts in these documents are of significance not only to his devout followers, but for all who wish for wisdom. Knowledge is priceless, and those who place a price on knowledge may never come to realize its true value.

Good luck to the family of the Honorable El Hajj Malik El Shabazz.

SCANDALOUS INS ERROR SHOULD LEAD TO REFORM

(Ms. JACKSON-LEE of Texas asked and was given permission to read the House for 1 minute and to revise and extend her remarks.)

Mr. JACKSON-LEE of Texas. Mr. Speaker, scandalous. Mr. Speaker, absolutely scandalous, when the INS issues a visa to two deceased terrorists who in fact were part of the September 11 tragedy.

What needs to be done is that the INS has to be demanded right now to implement their visa tracking system. The President has to order them to implement the program that already exists.

What else has to happen? The INS has to be restructured, not abolished. We must recognize that there are two distinct responsibilities, but they must be coordinated by a Deputy Attorney General for Immigration Affairs.

What must they do? Deal with the services aspect, for those who want to access legalization, those who are honest immigrants, and then coordinate with the enforcement so that we can stop at the borders the terrorists who want to come into our Nation.

Visas to deceased terrorists? Outrageous and scandalous. The President needs to order the INS now: Put that tracking system in place today and make it work.

BULGARIA

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, on Tuesday, I welcomed Capitol Hill Ambassador Elena Poptodorova and Foreign Minister Solomon Passy to their efforts for coordinated defense in Europe.

Mr. DIAZ-BALART. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 366 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. Res. 366

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the purpose of consideration of the bill (H.R. 2146) to amend title 18 of the United States Code to provide life imprisonment for repeat offenders who commit sex offenses against children. The first reading of the bill shall be dispensed with. All points of order against consideration of the bill are waived. General debate shall be limited to 2 hours and shall not exceed one hour equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary. After general debate the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider as an original bill for the purpose of amendment under the five-minute rule the amendment in the nature of a substitute recommended by the Committee on the Judiciary now printed in the bill. The committee amendment in the nature of a substitute shall be considered as read. During consideration of the bill for amendment, the Chairman of the Committee of the Whole may accord priority in recognition on the basis of whether the Member offering an amendment has caused it to be printed in the portion of the Congressional Record designated as the five-minute rule and pursuant to clause 8 of rule XVIII. Amendments so printed shall be considered as read. At the conclusion of consideration of the bill for amendment the Committee shall report the bill to the House with such amendments as may have been adopted. Any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instruction.

The SPEAKER pro tempore (Mr. TERRY). The gentleman from Florida (Mr. DIAZ-BALART) is recognized for 1 hour.

Mr. DIAZ-BALART. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Ohio (Mr. HALL), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

(Mr. DIAZ-BALART asked and was given permission to revise and extend his remarks.)

Mr. HALL of Ohio. Mr. Speaker, I reserve the balance of my time.

Mr. DIAZ-BALART. Mr. Speaker, House Resolution 366 is an open rule providing for the consideration of H.R. 2146, the Two Strikes and You’re Out Child Protection Act.

The rule provides for 1 hour of general debate, evenly divided and controlled by the chairman and the ranking minority member of the Committee on the Judiciary. The rule further provides that the amendment in the nature of a substitute recommended by the Committee on the Judiciary now printed in the bill shall be considered as an original bill for the purpose of amendment.

This is a fair rule that will allow Members ample opportunity to offer amendments and debate this important issue.

I can think of few crimes. Mr. Speaker, as serious as the sexual abuse of children. I personified the death penalty for the criminals that we are dealing with in this legislation. Though this legislation does not go that far, it does treat repeat child molesters in a severe fashion.

H.R. 2146 would Establish life imprisonment for repeat child sex offenders.

Mr. Speaker, victims experience severe mental and physical health problems as a result of these crimes. These problems include increased rates of depression and suicide as well as all sorts of other serious problems.

We must do everything in our power to ensure that repeat sex offenders are kept off of our streets. Mr. Speaker, we badly live in a world where children are all too often forced to grow up much too quickly. I ask that my colleagues help us in protecting our children from sexual offenders by passing this critical piece of legislation.

I would like to thank the gentleman from Wisconsin (Mr. GREEN); the gentleman from Wisconsin (Mr. SENSENBRINNER), the distinguished chairman of the Committee on the Judiciary; and all those who have worked so diligently to bring this legislation to the floor. Accordingly, Mr. Speaker, I urge my colleagues to support both the rule and the underlying legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. SENSENBRINNER. Mr. Speaker, I yield myself such time as I may consume.

I want to thank the gentleman from Florida (Mr. DIAZ-BALART) for yielding
me the time. This is an open rule. It will allow for the consideration of a bill that would establish a mandatory sentence of life in prison for anyone convicted a second time for sexual offenses against children.

The legislation applies only to cases on Federal properties such as military bases and national parks. As my colleague has described, this rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Judiciary.

The rule permits amendments under the 5-minute rule. This is the normal amending process in the House. All Members on both sides of the aisle will have the opportunity to offer germane amendments.

Mr. Speaker, sex offenses against children are among the disturbing crimes in our society and each attack can be a tragic event that will leave a permanent psychological scar on its victim. The punishment should be severe. It is important to lock up offenders so that they do not have the opportunity to strike again. This is the justification behind this bill.

However, I must use this opportunity to express some concern over eliminating the flexibility of the courts to make the sentence fit the unique events behind a particular case. Experts have pointed to a number of undesirable practices that could occur by requiring such an exact sentence regardless of the circumstances.

Mr. Speaker, this is an open rule. Members will have a chance to change this bill. They will have the opportunity to perfect it through the amendment process. I support the rule.

Mr. Speaker, I reserve the balance of my time.

Mr. DIAZ-BALART. Mr. Speaker, I reserve the balance of my time.

Mr. HALL of Ohio. Mr. Speaker, I yield the balance of my time to the gentlewoman from Texas (Ms. JACKSON-LEE).

To the Chair.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I am sorry my voice is a little raspy, but my heart is certainly not raspy but concerned about the nature of the acts against children when they are sexually molested or abducted; and so in general I think the idea of acknowledging seriousness of these crimes is very valuable. And the underpinnings of this legislation, I recognize the importance of and clearly believe that we should move in the direction, however, with one concern as the ranking member indicated, whether or not our Federal judges will have some discretion to deal with cases that warrant determinations of difference other than what this legislation provides.

As I speak to that issue, I believe and hope that my amendment concerning a study of the impact of this legislation would be received and accepted. And then I would like to move to another discussion. Mr. Speaker, and that is of a present circumstance that is going on in my district right now. I am going to ask this House to weigh the germaneness that might be raised against an amendment that I propose because we have a problem and I believe this is a Federal problem.

As I speak, a 13-year-old in Houston, Texas, has been abducted, someone who simply wanted to have her homework Sunday night. She lives in an apartment. She is not an immigrant, Spanish speaking. She just wanted to go 100 feet down the street to get a Sunday newspaper dutifully doing a school project. And her mother indicated, can you wait till Monday morning, and my colleagues know how good students are in the 7th grade. She said she needed the Sunday paper. Lo and behold, on Monday morning when she did not return or early that morning when the mother was frantic, the police found sneakers scattered, papers scattered and obviously something has gone awry.

What a tragedy. Mr. Speaker, that here in the face of this legislation we now have a circumstance that this child is missing, but let me tell my colleagues the absolute insult.

As the officers were poring over lists of known sexual offenders, concentrating on the girl's neighborhood, the Texas Department of Public Safety lists 25 registered sex offenders in one ZIP code. This has no sense to it. This is a tragedy in its own making, and I hope the leaders of this legislation can find some sense to allowing an amendment that investigates how we can put 25 sex offenders in one ZIP code, and this has to do with Federal funding and a nexus as to whether or not these States should have these dollars. We have to find some other way of dealing with this.

Mr. Speaker, thanks very much for the tolerance of my outrage, but we need an amendment that will stop putting this overabundance of sex offenders in one neighborhood; and we need to find little Laura Ayala now.

Mr. HALL of Ohio. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. DIAZ-BALART. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

The Chair recognizes the gentleman from Wisconsin (Mr. SENSENBRENNER).

Mr. SENSENBRENNER. Mr. Chairman, I yield myself such time as I may consume.

I rise in support of H.R. 2146, the Two Strikes and You're Out Child Protection Act. This bill establishes a mandatory sentence of life imprisonment for twice-convicted child sex offenders.

The bill states that any person convicted of a Federal sex offense against a person under the age of 17 who has been previously convicted of a similar offense at the State or Federal level would be subject to a mandatory minimum sentence of life imprisonment.

The term ‘Federal sex offense’ includes various crimes of sexual abuse committed against children and the interstate transportation of minors for sexual purposes.

According to the Justice Department’s Bureau of Justice Statistics, since 1980 the number of persons sentenced for violent sexual assault other than rape increased annually by an average of nearly 15 percent, which is faster than any other category of violent crime. Of the estimated 95,000 sex offenders in State prisons today, well over 60,000 most likely committed their crime against a child under age 17.

Compounding this growing problem is the high rate of recidivism among sex offenders. A review of frequently cited studies of sex offender recidivism indicates that offenders who molest young girls repeat their crimes at rates up to 25 percent and offenders who molest young boys at rates up to 40 percent. Moreover, the recidivism rates do not appreciably decline as offenders age.

Another factor that makes these numbers disturbing is that many serious sex crimes are never reported to authorities. National data and criminal justice experts indicate that sex offenders are apprehended for a fraction of the crimes they commit. By some estimates, only one in every three to five serious sex offenses are reported to authorities, and only 3 percent of such crimes ever result in the apprehension of an offender.

Studies confirm that a single child molester can abuse hundreds of children. It goes without saying that any abuse in the child abuse trauma for the victim and will leave a scar that will be carried throughout life. Victims experience severe mental and physical

In the Committee of the Whole
March 14, 2002

Mr. SCOTT. Mr. Chairman, I yield myself such time as I may consume.

I rise in opposition of H.R. 2146. It is a perfect example of what the Judicial Conference of the United States Courts describes as the type of legislation that “severely distorts and damages the Federal sentencing system and undermines the sentencing guideline regimen established by Congress to promote fairness and proportionality in our sentencing system.”

Under the bill, Mr. Chairman, the mandatory minimum penalty for second offense of consensual touching by an 18-year-old of his 14-year-old girlfriend is life imprisonment without parole, the same penalty for a sexual offense against a child which results in death. The problem with this bill, Mr. Chairman, is its title, the baseball phrase “two strikes and you’re out.” If “two strikes and you’re out” is not even good baseball policy, why would we arbitrarily conclude it is good crime policy?

Another major concern is that it would have the chilling effect on victims coming forward to report sex crimes if the victim knows the result will be that the perpetrator will have to serve life without parole. For example, a teen victim may be reluctant to turn in an older sibling or other family member if they know that the offender will have to face life without parole.

In addition, H.R. 2146 would lead to a victim being killed to lessen the risk of being caught. The law professor and criminologist who testified before the Subcommittee on Crime on an earlier version of this bill stated that facing life without parole, a sex offender would have little further to lose by eliminating the victim, who is often an important witness against the offender.

Now, considering the penalty for second-offense murder is less than second-offense petting, we can see why this is a concern. So, Mr. Chairman, I oppose the bill in its present form, but believe it is possible to fix the worst problems in it, and I offer amendments designed to do so.

Mr. Chairman, I reserve the balance of my time.

Mr. SENSENBRENNER. Mr. Chairman, I yield 4 minutes to the gentleman from Wisconsin (Mr. GREEN), who is the author of the bill.

Mr. GREEN of Wisconsin. Mr. Chairman, I thank the gentleman for yielding me this time, and I begin by thanking my friend and colleague from Wisconsin for his work in bringing this bill forward. I appreciate it very, very much.

First, let me say that this bill is not new to this House. This House has already passed the bill by voice vote. The State version of this legislation is already the law in Wisconsin, and other States are looking at it. The cosponsorship of this legislation is bipartisan. In fact, it includes the chairman of the Democratic Caucus.

The reason this bill has such strong support is that its objective is unsailable, preventing repeat child molesters from continuing to prey upon our young kids. This bill is a very simple measure. It does not pass any crimes. It does not change the terms of underlying criminal laws. This bill is not about sending a message, this bill is not about deterring crime, it is about getting bad guys off the streets so they cannot attack more innocent children.

This bill says very simply, If you are arrested and convicted of a serious sex crime against kids, and then after you have done your time and you are released, you do it yet again, that is the underlying principle. You are going to go to prison for the rest of your life. No more chances and, Lord willing, no more victims.

CONGRESSIONAL RECORD — HOUSE

Mr. Chairman, I urge my colleagues to support this legislation.

Mr. Chairman, I reserve the balance of my time.

Mr. SCOTT. Mr. Chairman, I yield myself such time as I may consume.

I rise in opposition of H.R. 2146. It is a perfect example of what the Judicial Conference of the United States Courts describes as the type of legislation that “severely distorts and damages the Federal sentencing system and undermines the sentencing guideline regimen established by Congress to promote fairness and proportionality in our sentencing system.”

Under the bill, Mr. Chairman, the mandatory minimum penalty for second offense of consensual touching by an 18-year-old of his 14-year-old girlfriend is life imprisonment without parole, the same penalty for a sexual offense against a child which results in death. The problem with this bill, Mr. Chairman, is its title, the baseball phrase “two strikes and you’re out.” If “two strikes and you’re out” is not even good baseball policy, why would we arbitrarily conclude it is good crime policy?

Another major concern is that it would have the chilling effect on victims coming forward to report sex crimes if the victim knows the result will be that the perpetrator will have to serve life without parole. For example, a teen victim may be reluctant to turn in an older sibling or other family member if they know that the offender will have to face life without parole.

In addition, H.R. 2146 would lead to a victim being killed to lessen the risk of being caught. Mr. Chairman, I reserve the balance of my time.

Mr. SENSENBRENNER. Mr. Chairman, I yield 4 minutes to the gentleman from Wisconsin (Mr. GREEN), who is the author of the bill.

Mr. GREEN of Wisconsin. Mr. Chairman, I thank the gentleman for yielding me this time, and I begin by thanking my friend and colleague from Wisconsin for his work in bringing this bill forward. I appreciate it very, very much.

First, let me say that this bill is not new to this House. This House has already passed the bill by voice vote. The State version of this legislation is already the law in Wisconsin, and other States are looking at it. The cosponsorship of this legislation is bipartisan. In fact, it includes the chairman of the Democratic Caucus.

The reason this bill has such strong support is that its objective is unsailable, preventing repeat child molesters from continuing to prey upon our young kids. This bill is a very simple measure. It does not pass any crimes. It does not change the terms of underlying criminal laws. This bill is not about sending a message, this bill is not about deterring crime, it is about getting bad guys off the streets so they cannot attack more innocent children.

This bill says very simply, If you are arrested and convicted of a serious sex crime against kids, and then after you have done your time and you are released, you do it yet again, that is the underlying principle. You are going to go to prison for the rest of your life. No more chances and, Lord willing, no more victims.

CONGRESSIONAL RECORD — HOUSE

1045

Proponents of the bill suggest that a second consensual offense between teens could not occur because by the time the first case is over, the offender, who has served his sentence, would no longer be a teen. This does not take into account the fact that the likely judgment for such a first offense would be probation. All it takes for these kinds of cases to end up in court is a determined parent and equally determined teens, and, bam, life without parole for what children refer to as “petting.”

The current penalty maximum for a second offense under 2243(a) is 15 years. We do not have to mandate life in prison to get all of the cases for which life would be deserved. To get the cases for which 15 years is not harsh enough, we can increase the maximum penalty. So, Mr. Chairman, at the appropriate time, I will offer an amendment to raise the maximum possible sentence for violations of 2243(a) to life imprisonment, and leave it to the Sentencing Commission and the courts to distinguish which cases deserve harsher punishment than 15 years, rather than taking the draconian approach in this bill and mandating life without parole for all cases.

One thing should be clear, Mr. Chairman, the bill only applies where there is Federal jurisdiction. Therefore, none of the cases, virtually none of the cases that will be referred to by the supporters of the bill will be affected by the bill because those are State cases. The Federal jurisdiction would be those on Native American reservations, national parks and U.S. maritime jurisdiction.

Only a few cases fall under that jurisdiction, the requirement of Federal jurisdiction; at least the information we have gotten from the Sentencing Commission is that it might affect 60 cases. But virtually all of those cases will be for Native American reservations, and it is unfair that Native Americans will be subjected to such a grossly disproportionate impact from the draconian legislation just because they live on a reservation. The bill will create a penalty disparity with those committing the same offense in the same State with one getting probation and the other getting life without parole because he lives on a reservation.

That is why, Mr. Chairman, I will offer another amendment that will allow tribal governments to opt out of the provision of the bill in the same manner as we did for the “Three Strikes and You’re Out” bill a few years ago. There is no evidence that there has been any problem with sex crimes against children on reservations or any other Federal jurisdiction, and there is nothing to suggest that to whatever extent there is a problem it is not being appropriately dealt with under Federal jurisdiction now.

Interestingly enough, Mr. Chairman, prior marriage is a bar to prosecution under 2243(a). All over this Nation, States recognize the rights of parents to give consent to a minor, often as young as 14 or 15 years of age. It should be as old as 40 or older. In all likelihood, before the marriage, they will have been committing offenses which could result in life without parole under the bill. If there is any debate within the family about the appropriateness of the marriage, life without parole creates an interesting new idea about the shotgun wedding.

The problem with this bill, Mr. Chairman, is the problem of mandatory sentences in general. They eliminate the reason and discretion in order to promote the politics of tough on crime. There is no study or data or other reason basis for this bill. The entire reason is its title, the baseball phrase “two strikes and you’re out.” If “two strikes and you’re out” is not even good baseball policy, why would we arbitrarily conclude it is good crime policy?
March 14, 2002

CONGRESSIONAL RECORD—HOUSE

H915

Now, my good friend and colleague, the gentleman from Virginia (Mr. SCOTT), said there are no good studies for this bill. I could not disagree more. Study after study supports this bill. A 1992 study from the National Center for Missing and Exploited Children reported that the average pedophile commits 281 offenses, with an average of 150 victims. One hundred fifty victims. There are other studies that do much more; the numbers are higher. For purposes of this debate today, we have tossed out those high numbers. We have come up with an average of 201.

So think about that number as we have the debate today, 201 victims per pedophile. There are other studies, as I said, that put the number up. Those studies recently caused former Attorney General, Democratic Attorney General, Janet Reno to estimate that the recidivism rate of child molesters is 75 percent.

The bill is necessary because, thankfully, the number of attackers is relatively small; but tragically, the number of victims, the number of lives destroyed, innocence stolen, is incredibly and unacceptably high. If someone is arrested for committing a serious sex crime against kids, and then after they are released, they do it yet again, they have shown that they are unwilling or unable to help themselves. We must get them off the streets so their reign of terror will end.

Congress must stop this tragedy. It is happening in too many places across this country to too many young people, to too many families. We must get those we are trying to get, but it is more than that.

Mr. SCOTT. Mr. Chairman, I yield myself such time as I may consume just to point out that the cases that have been mentioned probably do not even come under the bill.

First of all, if the average is 201 before apprehension, the bill will have no effect because it will not be a second offense. We have to charge at least one of them as being on Federal property after the prior conviction. And, third, it does include misbehaving teenagers.

The bill needs to be reworked. It can get those who are trying to get, but it is overinclusive and many people who do not deserve life without parole will be brought up under it.

Mr. Chairman, I reserve the balance of my time.

Mr. SENSENBRENNER. Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. SMITH), who is the chairman of the Subcommittee on Crime.

Mr. SMITH of Texas. Mr. Chairman, I thank the gentleman from Wisconsin, the chairman of the Committee on the Judiciary, for yielding me this time, and I strongly support H.R. 2146, the Two Strikes and You’re Out Child Protection Act, introduced by the gentleman from Wisconsin (Mr. GREEN).

This bill will amend the Federal Criminal Code to provide for mandatory life imprisonment of a person convicted of a Federal sex offense in which a minor is the victim, when the person has previously been convicted of a State or Federal child sex offense. This is important legislation that will protect our children from sexual predators.

Studies have shown that sex offenders and child molesters are four times more likely than other violent criminals to recommit their crimes. Even when only one of the victims the average pedophile abuses in a lifetime. While any criminal’s subsequent offense is of public concern, preventing child sexual predators from repeating crimes is particularly important, given the irrefutable harm that these offenses cause victims and the fear they generate in the community.

Sexual assault is a terrifying crime that can leave its victims with physical, emotional, and psychological scars.

Mr. Chairman, this legislation will provide law enforcement officials with the ability to permanently remove those individuals from our society, who have demonstrated that they will continue to prey upon our children if not incarcerated.

Based upon the testimony before the Subcommittee on Crime, this bill enjoys broad support from victims’ rights organizations, correction officials, as well as those who suffer from sex offenders’ actions. Mr. Chairman, I urge my colleagues to support this legislation.

Mr. SCOTT. Mr. Chairman, I reserve the balance of my time.

Mr. SENSENBRENNER. Mr. Chairman, I yield 2 minutes to the gentleman from Minnesota (Mr. KENNEDY).

Mr. KENNEDY of Minnesota. Mr. Chairman, I am here this morning to show my strong support for H.R. 2146, the Two Strikes and You’re Out Child Protection Act, sponsored by my good friend, the gentleman from Wisconsin (Mr. GREEN). This legislation would bring an end to the worst kind of sexual predators in our Nation, those who prey on our children.

Statistics have shown that giving these predators two strikes is more than enough for what they are doing to our children. Actual rates of repeat offenders are two-and-a-half times higher than are reported. A study of offenders, as the gentleman from Wisconsin (Mr. GREEN) was referring to earlier, shows that those who commit two offenses each, in actuality, in one study, were found to have 110 different victims and committed 318 different offenses each. And, sadly, it is obvious that victims of child sex offenders have a higher risk of depression and suicide, and more likely to abuse alcohol and drugs.

I know this will be a stringent and difficult guideline, but as a man with four children of my own, I think it is time that to crack down. Ronald Reagan said that the government’s first duty is to protect the people. By passing this important legislation, we stand up and say “no.”

Now, I know there are some who wish to make some changes in this legislation, like exempting certain groups or geographic areas from its application. We cannot allow that to happen. Exempting some would only create a safe harbor for these predators to prey. If predators who wish to end our existence and our democracy, but we cannot forget to focus on those who wish to take advantage of the fairness and mercy of our judicial system by harming our most vulnerable, our children. Please join me in supporting H.R. 2146.

Mr. SCOTT. Mr. Chairman, I yield 2 minutes to the gentleman from Kentucky (Mr. LUCAS).

Mr. LUCAS of Kentucky. Mr. Chairman, I thank the gentleman from Virginia (Mr. SCOTT) for yielding me this time, even though we are on opposite sides of this issue.

I support the Two Strikes and You’re Out Child Protection Act. I thank the gentleman from Wisconsin (Mr. GREEN) for his hard work on this legislation.

I think too often Americans have heard the cases of heinous crimes committed against children by criminals who turn out to be repeat offenders. Despite the best efforts of local and State law enforcement officers, convicted pedophiles still threaten the well-being of our children. I believe we must do everything we can to keep sex offenders off the street and away from our youth. This bill takes a step in the right direction. Many States have already passed laws known as Megan’s laws to notify communities when a sex offender moves into the neighborhood. Today, we have an opportunity to see that some of these offenders never have the opportunity to move into our neighborhoods in the first place.

Today, by passing the Two Strikes and You’re Out Child Protection Act, we can ensure that these lowest of all criminals are moved out of residential blocks in our communities and moved into the cells of Federal prisons.

I support this bill wholeheartedly. I urge my colleagues to do so. Mr. SCOTT. Mr. Chairman, I yield myself such time as I may consume, just to mention that if someone is caught molesting 300 children, it is hard to believe that with consecutive sentences that they would ever get out, first or second offense. This also, unfortunately, includes misbehaving teenagers who would be treated, under this bill, worse than murderers.

Mr. Chairman, I yield back the balance of my time.

Mr. SENSENBRENNER. Mr. Chairman, I yield the balance of my time to the gentleman from Wisconsin (Mr. GREEN).
Mr. GREEN of Wisconsin. Mr. Chairman, I thank the gentleman from Wisconsin (Mr. SENSENIBRENNER) for yielding me this time, and I want to also thank the gentleman from Kentucky (Mr. LUCAS) for his support for this legislation.

The issue just raised by my friend and colleague, the gentleman from Virginia (Mr. SCOTT), about the so-called mandatory minimum sentencing law, we will talk about a little later on. I think this is the wrong way to go, but I think it is important to see that he is raising an applicable scenario to this legislation. But, Mr. Chairman, what I would like to do here is focus everyone's attention to this chart. On this chart there are three numbers. These three numbers are important because I believe that this whole debate really comes down to these three numbers. These three numbers say it all: 16, 75, and 511. What do those numbers stand for?

Sixteen. Sixteen represents the number of years of a sexual offender committing crimes until he is caught. He is caught for the crimes he committed. When you see a sexual offender on television, of someone being caught, convicted and being tried for their offense, understand that, on average, he has been doing this for 16 years before he gets caught. Think about what that means. Think about how much damage and destruction, how many lives he has destroyed.

The second number, 75. Seventy-five is the recidivism rate for child molesters as estimated by Attorney General Janet Reno. She wrote this last year in an article that she believes the recidivism rate is about 75 percent. Again, that goes to what we have been saying all along, that these are unusual crimes. This is not run-of-the-mill crime in any sense of the word. And that if we have someone who is arrested and convicted of a serious sex crime against kids and they have done it yet again after they are released, studies tell us, the numbers tell us that he is arrested again and again unless we stop them.

Five hundred eleven. This is the most troubling number of all. This is a number that I do not make up. This is a number that comes from a study done in the year 2000 about “Sex Abuse,” the journal of research and treatment into this area of sexual offenders. Five hundred eleven represents the average number of crimes committed by admitted child molesters; 511 per molester. That is a large number, it is hard for us to even imagine, to even comprehend it. And we cannot comprehend it, because these individuals are sick. They are sick monsters in every sense of the word. But once again, these numbers tell us that if someone is arrested and convicted of a serious sex crime against kids and they serve their time and they are released, if they do it yet again, they are self-identified. They have told the world that they are either unwilling or unable to help themselves. Congress has to step in.

This bill is not about sending a message. This bill is not about piling on. This bill is not about deterrence. This bill is very simply, given these numbers, given the recidivism rate, this is simply about taking these sick monsters off the streets, away from schools, away from our children, to protect our children, to protect our families, to try to end the cycle of horrific violence that every parent’s nightmare. That is what this bill is about, these three numbers.

I urge my colleagues to support this bill. Let us get this on the Senate’s desk. Let us encourage the Senate to act. Let us encourage the Senate to end the nightmare. That is what this bill is about, these three numbers.

Despite my support, I am concerned that this legislation, since it only applies in Federal jurisdiction, will have a disproportionate racial impact on Native Americans. I am pleased to report that I have offered an amendment to add a new section including special provisions for lands occupied by Native Americans. However, the amendment failed by voice vote. It is my hope that as this bill is forwarded to the Senate, attempts to address this issue will be made.

Mr. STARK. Mr. Chairman, I rise today in redundant opposition to H.R. 2146, the Two Strikes and You’re Out Child Protection Act. Protecting our children from abuse is of paramount importance. Unfortunately, the potential for harmful consequences of this bill outweigh its benefits.

My primary concern with H.R. 2146 is its mandatory sentencing requirements. Mandatory sentencing laws tie the hands of judges. Such laws remove the flexibility judges need to carefully review every case and assess the individual circumstances of their cases. For example, this bill could force a judge to sentence someone to life in prison for a minor offense. Furthermore, in some abuse cases, particularly those involving family members, counseling may effectively address the offending behavior. This bill would eliminate the prospect for such treatment. When sentencing, judges need to have the discretion to determine when a plaintiff is a sexual predator that could threaten other children, versus someone whose problems could be addressed through treatment, counseling or other means.

In addition to my concerns about mandatory sentencing, this bill has an unintended racial bias. This bill is limited to cases falling under jurisdiction, will have a disproportionate racial impact on Native Americans. I am pleased to report that I have offered an amendment to add a new section including special provisions for lands occupied by Native Americans. However, the amendment failed by voice vote. It is my hope that as this bill is forwarded to the Senate, attempts to address this issue will be made.

I believe that our experience in this area has shown that crimes are best assessed on a case-by-case basis, by a judge and jury of one’s peers. I do not believe that there is any current law, or in the near future, that could better address. I believe that our experience in this area has shown that crimes are best assessed on a case-by-case basis, by a judge and jury of one’s peers. I do not believe that there is any current law, or in the near future, that could better address. I believe that our experience in this area has shown that crimes are best assessed on a case-by-case basis, by a judge and jury of one’s peers. I do not believe that there is any current law, or in the near future, that could better address.

Mr. SMITH of New Jersey. Mr. Chairman, today I rise in strong support of H.R. 2146, the Two Strikes and You’re Out Child Protection Act. The premise of the bill is simple: if you are convicted twice of any Federal sex crime, and the crimes take place on Federal property, then you go to prison for life.

Study after study shows that criminals who prey upon children are more likely to reoffend if they are released. According to a 1999 study by the Center for Sex Offender Management, 16 years go by before the average sex offender is caught and a recent 2000 study in the issue of sex abuse found that the average sex offender commits 511 crimes. As you know, they victimize, on average, hundreds of children and commit several hundred different offenses and unfortunately, they are prosecuted for only a tiny fraction of their horrific acts.

Mr. Chairman, these statistics are all too real—in my district in New Jersey, a 7-year-old girl, Megan Kanka, was raped and then murdered by her neighbor, Jesse Timmendquas in 1994. He was a two-time convicted sex offender who was released.
early from prison after serving 6 years of a 10 year sentence. Mr. Timmendquas lived across the street from the Kanka family in a house he shared with two other sex offenders—and neighbors were not aware of their criminal past.

In light of Megan Kanka’s horrific tragedy, I worked alongside my colleagues to pass “Megan’s Law.” At first, this legislation was established at the State level. Later, we were successful at winning support at the Federal level to require states to inform the public when dangerous sex offenders are released from prison and move to their neighborhoods. The combination of the Two Strikes You’re Out Child Protection Act, and Megan’s Law, will provide important tools to protect our communities from sex offenders. It is my hope that we will eventually expand the Two Strikes and You’re Out Child Protection Act nationwide, and into all states and territories.

The people who repeatedly sexually molest children do not deserve to roam free. When they are free, they molest children. Until modern medicine can cure the sick mind that compels sex offenders to commit their horrific crimes, they should not be allowed to leave prison. Period.

Megan Kanka’s death could have been prevented. All of us in Congress have a special burden to make sure that our laws adequately protect children from the likes of Mr. Timmendquas. H.R. 2146 is a good step in the right direction.

Protecting our children from sexual predators requires a comprehensive, multilayered approach. I am proud to have been the prime sponsor of legislation, the Victims of Trafficking and Violence Protection Act (P.L. 106–386), which contained two key provisions to help fight child molesters. The first provision of P.L. 106–386 would expand the “Megan’s Law” concept to college and university communities. Under the new law, law enforcement authorities are required to notify local communities when a registered sex offender is enrolled or employed at a local college or university.

The second provision was called “Aimee’s Law,” and is designed to punish states that release dangerous sexual felons back into our communities in the first place. Under “Aimee’s Law,” if a State lets a sexual predator loose, and that predator moves to another State and victimizes another person, the second State can petition the Attorney General to have law enforcement grant funds transferred from the first State to the second State as a form of interstate compensation. The central idea behind the law is to discourage States from releasing sex offenders early.

As the father of four children, I share the anger and frustration that parents across our country have regarding sexual predators and the grave danger they pose to our country’s children. As my colleagues are aware, I have worked with many of you in the effort to pass and enforce tough laws to crack down on child pornography. Largely because I believe it leads to diabolical crimes such as sexual molestation and rape of young children. The Two Strikes and You’re Out Child Protection Act will take those people who prey on our children off the streets and into jail—where they belong—for life. I urge my colleagues to unanimously support the Two Strikes and You’re Out Child Protection Act.
To that end, I have introduced an amendment mandating a thorough evaluation of alternatives to incarceration and treatment in order to rehabilitate those capable of such progress. I urge my colleagues to support it.

I believe whole-heartedly, that we must protect Americans from the horrors of sex offenders. To that end, I am asking for support for my second amendment which states simply that no Federal monies can be expended for this legislation if there are more than two convicted sex offenders within a given ZIP Code.

This amendment is motivated by a recent tragedy in Houston, Texas in which a 13-year-old girl, Laura Ayala, went across the street from her southeast Houston home Sunday night and never returned.

Since that day, our police officers have been poring over lists of known sexual offenders, concentrating on Laura’s neighborhood. What is most disturbing is that the Texas Department of Public Safety lists 25 registered sex offenders in the ZIP Code. This amendment recognized the need for legislation that protects our children from multiple sex offenders who collectively may have a cumulative effect that is adverse to our children and communities.

But in our efforts to protect society and rehabilitate those who perpetrate these heinous crimes, we must do so justly, and with precision so as not to create further injustice within an already overtaxed justice system.

Mrs. ROUKEMA. Mr. Chairman, I rise in strong support of this legislation and in defense of our children. This legislation is overdue and I would urge my colleagues to pass it without delay.

Mr. Chairman, there’s a raging debate in criminal justice circles regarding the wisdom of mandatory minimum sentences. One side of the argument holds that we should let the system work—that judges can make the best judgments on important issues of incarceration.

With all due respect to opponents of this legislation, that debate is totally inappropriate when it comes to child victims of sexual abuse.

When it comes to children—children and sexual abuse and sexual crimes—we cannot leave the issue to discretionary judgments. There are principles of law that civilized societies must adhere to and enforce. Protecting our children from sexual abuse is one of them.

It is estimated that child molesters are four times more likely than other violent criminals to recommit their crime. In a recent study, 453 sex offenders admitted to molesting more than 67,000 children in their lifetime. Another study found that 571 pedophiles had each molested an average of 300 victims.

Two is too many. But this bill will bring us closer to a world where molesters cannot continue their horrible crimes ad infinitum.

Over the past few years, this Congress has been strongly supportive of such commonsense legislation as Megan’s Law—named after a victim from our State of New Jersey who was brutalized and murdered by a repeat sexual offender. Megan’s Law requires citizens to be notified when a sexual offender moves into their neighborhood.

Mr. Chairman, this legislation will not mean there will be no repeat offender. But what it should mean is that the neighborhood a repeat offender moves into is a prison—for life.

Our charge here in this House is to protect the children. This legislation prevents them from being victimized by those who we know are likely to abuse, attack and murder again. Support this commonsense legislation. It reaffirms our commitment to our American principle that we are a civilized society raising standards for the treatment of our children.

The CHAIRMAN pro tempore (Mr. OSE). All time for general debate has expired.

Pursuant to the rule, the committee amendment in the nature of a substitute not printed in the bill is considered as an original bill for the purpose of amendment and is considered read.

The text of the committee amendment in the nature of a substitute is as follows:

H.R. 2146

Be it enacted by the Senate and House of Representa tives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE. This Act may be cited as the “Two Strikes and You’re Out Child Protection Act”.

SEC. 2. MANDATORY LIFE IMPRISONMENT FOR REPEAT SEX OFFENDERS AGAINST CHILDREN.

Section 3559 of title 18, United States Code, is amended by adding at the end the following new subsection:

(2) MANDATORY LIFE IMPRISONMENT FOR REPEATED SEX OFFENSES AGAINST CHILDREN.—

(1) In general.—A person who is convicted for a Federal sex offense in which a minor is the victim shall be sentenced to life imprisonment if the person has been convicted for a prior sex conviction in which a minor was the victim, unless the sentence of death is imposed.

(2) Definitions.—For the purposes of this subsection—

(A) the term ‘Federal sex offense’ means—

(i) an offense under section 2241 (relating to sexual abuse), 2242 (relating to sexual abuse of a minor), 2243(a)(1) or (2) (relating to abusive sexual contact), 2245 (relating to sexual abuse), 2246 (relating to sexual abuse resulting in death), or 2251A (relating to selling or buying of children); or

(ii) an offense under section 2423(a) (relating to transportation of minors) involving prostitution or sexual activity constituting a State sex offense;

(B) the term ‘State sex offense’ means an offense under State law that consists of conduct that would be a Federal sex offense if, to the extent or in the manner specified in the applicable provision of this title—

(i) the offense involved interstate or foreign commerce, or the use of the mails; or

(ii) the conduct occurred in any commonwealth, territory, or possession of the United States, within the special maritime and territorial jurisdiction of the United States, in a Federal prison, on any land or building owned by, leased to, or otherwise used by or under the control of the Government of the United States, or in the Indian country (as defined in section 1151);

(C) the term ‘prior sex conviction’ means a conviction for which the sentence was imposed before the conduct occurred constituting the subsequent Federal sex offense, and which was for a Federal sex offense or a State sex offense;

(D) the term ‘minor’ means an individual who has not attained the age of 17 years; and

(E) the term ‘State’ has the meaning given that term in subsection (c)(2).

SEC. 3. CONFORMING AMENDMENT.

Sections 2247 and 2426 of title 18, United States Code, are amended by inserting ‘‘—unless section 3559(e) applies’’ before the final period.

The CHAIRMAN pro tempore. During consideration of the bill for amendment, the Chair may accord priority in recognition to a Member offering an amendment that he has printed in the designated place in the CONGRESSIONAL RECORD. Those amendments will be considered as read.

Are there any amendments to the bill?

AMENDMENT OFFERED BY MR. SCOTT

Mr. SCOTT. Mr. Chairman, I offer an amendment.

The Clerk reads as follows:

Amendment offered by Mr. SCOTT:

Page 2, beginning in line 22, strike “2243(a) (relating to sexual abuse of a minor)”.

Page 4, after line 7 insert the following:

Section 3559(a) of title 18, United States Code, is amended by striking the final period and inserting ‘‘, but if the defendant has a prior sex conviction (as defined in section 3559(e)) in which a minor was a victim, the court may sentence that defendant to imprisonment for any term or years or for life’’. Redesignate succeeding sections accordingly.

Mr. SENSENBRENNER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the Record.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. SCOTT. Mr. Chairman, this amendment would remove the mandatory life sentence for a violation of section 2243(a) as a second sex offense against a minor. Instead, this amendment would increase the maximum possible term for a second offense to a term up to life imprisonment. Under the existing sentencing guidelines, touching of a 14-year-old by an 18-year-old boy friend or girlfriend with a prior offense would mandate life without parole, while murder, even second offense murder, does not.

While we can all imagine cases in which a life sentence would be appropriate for a second offense against a child, we do not have to mandate life sentences for cases which clearly do not warrant such treatment in order to get at those that do. We can simply extend the maximum legal sentence to life imprisonment and leave it to the sentencing commission and the courts to determine which ones warrant that treatment.

Not only would we have the unintended racial impact in that it would affect primarily Native Americans but it would also have a chilling effect on victims in some cases that would otherwise be prosecuted. This is especially true in families where the victim might want to see an older sibling or other relative dealt with for a repeat offense but not seen to cause the relative spending the life imprisonment which would be required under the bill.
If we believe the purpose of the bill is to send a message to repeat sex offenders, it would send the wrong message. At a hearing before the Subcommittee on Crime, a law professor and criminologist testified that a repeat offender who knows that if caught he would be sentenced to life imprisonment on a mandated basis, that person may be more disposed to kill his victim to eliminate the primary witness. This is particularly true because the punishment for second offense murder would be life without parole. Under this amendment, life without parole would be available for those who are appropriately sentenced to life but not mandated for misbehaving teenagers.

Again, I would point out that the whole bill is only in cases that have Federal jurisdiction; so even with the amendment, we may have the anomaly of persons committing a crime within the State and if they are in Federal jurisdiction, they get life without parole. If they are without Federal jurisdiction, they could get probation. I would hope that the House would adopt the amendment.

Mr. SENSENBRENNER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, under the amendment of the gentleman from Virginia, we are going to reduce the penalty for pedophiles if they do not murder one of their victims. What that amendment really is not a good idea and in effect reverses the entire thrust of the bill.

I do not think that the concern of the gentleman from Virginia is justified because what he is saying is that we ought to take out the bill’s penalties away from section 2243(a) of the criminal code which provides that whoever knowingly engages in a sexual act with another person who is 12 to 15 years old and that at least 4 years older than the victim shall be fined or imprisoned for not more than 15 years, or both.

If you have the hypothetical of an 18-year-old adult knowingly engaging in a sexual act with a 15-year-old, that person would be indicted, would be prosecuted, would be convicted and would be incarcerated for several years as a result of that crime. My guess is that he would not be out of prison until he was in his mid- to late twenties. Now, it is supposed to be another sexual act on someone who is 12 to 15 years old in his mid-twenties, then I think the book ought to be thrown at him, because this is not an immediate post-adolescent whose hormones have run amok and commits a sexual act. This is somebody who is now preying on somebody who is probably 10 to 15 years younger as a victim. I think that is the type of person who ought to be sentenced to life imprisonment.

I think that really what we ought to do is look at how the clock runs, where you have the first strike that does not involve life imprisonment and then you have the second strike which would involve life imprisonment where the victim is probably at least 10 years and maybe even more than that younger than the assailant.

For that reason, I would hope that this amendment would be rejected.

Mr. GREEN of Wisconsin. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in opposition to this amendment. My opposition really falls on three grounds. First off, let us remember that this bill, Two Strikes and You’re Out, as I understand it, changes the terms of underlying criminal law. It simply changes the penalties for those who do it over and over again. This section that the gentleman from Virginia (Mr. SCOTT) seeks to change, to modify, is current law and one that Congress has always treated seriously. It is already punishable by 15 years in prison and doubled for the second offense. If the gentleman from Virginia wants to change the terms of 2243(a), he should introduce legislation to do so, but that is not this bill.

Secondly, those who would be caught up by this 2243(a) and the Two Strikes law are not merely guilty of, quote-unquote, “teen statutory rape.” Listen closely to what the gentleman from Wisconsin (Mr. SENSENBRENNER) has pointed out. The victim must be 12 to 15 years old. The attacker must be at least 4 years older. For Two Strikes to apply, the attacker must have committed this crime or an even more serious sex crime against kids. What is our grounds, not just his teenage girlfriend under the gentleman from Virginia’s scenario, but the judge, gone through a trial, been convicted, served his time, and then do it again, all in the span of 2 years.

Well, logically, that is next to impossible.

Finally, and I think the most important point here, is to understand that there are other statutes that cover the behavior that the gentleman from Virginia (Mr. SCOTT) refers to. We spoke only this morning to a representative of the U.S. attorney’s office, and he said that no U.S. attorney in the Nation would charge under 2243(a) for the conduct that the gentleman from Virginia (Mr. SCOTT) describes.

There is, in fact, another statute which is not part of Two Strikes, 2244(a) and 2244(b), abusive sexual contact. That is the statute which U.S. attorneys can use to charge, if they see fit to charge, for that type of behavior. That is not covered by Two Strikes.

Two Strikes deals with a narrow category of seven serious sex crimes against kids, and it says in the event that after someone has done their time, they have done one of these serious offenses, they get out, they do it yet again, then by all the studies we have seen, we know that they are going to do it, and would to avoid yet another Congress steps in and breaks the cycle of violence. That is why this bill exists.

The scenario that the gentleman from Virginia (Mr. SCOTT) raises is implausible, at best, and also the points the gentleman makes are outside the course of this bill.

Let us keep our eye on the ball here. Let us focus on the problem of repeat child molesters. That is what this bill deals with. Let us defeat this amendment and go on to pass this bill.

Mr. CONYERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am very pleased to yield to the gentleman from Virginia (Mr. SCOTT), the member of the Committee on the Judiciary that I think was made more of a contribution and has thought about this more carefully than anyone else.

Mr. SCOTT. Mr. Chairman, I thank the gentleman for yielding.

If it is an appropriate case, you can get life. But it just seems to me that if words parole for this situation, which could include family members, is totally inappropriate; and I would hope we would adopt the amendment which would be to allow life, but not mandatory life, so the judge would have some discretion in sentencing people under this bill. If you have 500 people, the stories they have told, the judge will know what to do.

Mr. CONYERS. Mr. Chairman, reclaiming my time, I support the Scott amendment because I think we are trying not to expose a countless number of teenagers to mandatory life sentences for being involved in consensual relationships. I am quite inclined to ask the author of the bill if that is his intention, but I am afraid to.

Mr. Chairman, if we are not considering the cultural differences and not considering whether family members are aware of the youthful indiscretions of a couple of teenagers, then this is a one-way ticket to a life imprisonment bill; this is not Two Strikes and You’re Out. I have to keep thinking that this is an unintended consequence.

I am saying to you that the circumstancs of each case are not relevant and will not be given any consideration at all. So all the gentlemen...
from Virginia is doing is correcting this by permitting the judge to impose a maximum sentence of life.

The amendment would restore to the judiciary discretion to deal with the sentence that he is giving under the circumstances, and the judge would not be imposing a sentence of life; but in other cases, they may be able to tailor a decision that would take into account the appropriateness of something other than life. So I urge my colleagues on the floor to give this some thought from this point of view.

This is almost becoming an anti-judge bill as well. Who needs judges? The prosecutor is given far more authority and decision-making that determines in effect the whole outcome of the case that comes before the judge. The judge is sitting here saying, I am bound by this, I am caught by this. The prosecutor decides the other thing.

So I think it is something that we need to rethink with the gentleman from Virginia (Mr. Scott). I am pleased and happy the gentleman has offered the amendment.

Mr. Chairman, I include the following article entitled "Judges Speak Out" for the RECORD.

**JUDGES SPEAK OUT**

"Statutory mandatory minimum sentences create injustice because the sentence is determined without looking at the particular defendant. . . . It can make no difference whether he is a lifetime criminal or a first-time offender. Under this sledgehammer approach, it could make no difference if the day before making this one slip in an otherwise unblemished life the defendant had rescued 15 children from a burning building or had won the Congressional Medal of Honor while defending his country."—J. Spencer Letts, U.S. District Judge, Central District of California.

"We must remember we are not widgets or robots, but human beings. Defendants should be sentenced within the spectrum of all that most judges would consider fair and reasonable."—Leon Higginbotham, Judge, 3rd Circuit Court of Appeals.

"I think that a lot of people do not understand what is going on until, all of a sudden, they are caught up in the system; and they find out that people have been mouthing all kinds of slogans, and when the slogans all come down to rest, they sometimes come to rest very hard on the shoulders of the individual."—David Doty, U.S. District Judge, Minnesota.

". . . I continue to believe that sentence of 10 years' imprisonment under the circumstances of this case is unconscionable and proportionate, as it is likely that the defendant will be incarcerated on the altar of Congress' obsession with punishing crimes involving narcotics. This obsession is, in part, understandable, for narcotics pose a serious threat to the welfare of this country and its citizens. However, at the same time, mandatory minimum sentences—a method by which a defendant's punishment is determined in a manner properly tailored to a defendant's particular circumstances."—Paul A. Magnuson, U.S. District Judge, Minnesota.

"As a consequence of the mandatory sentences, we (judges) know that justice is not always done. . . . [Y]ou cannot dispense equal justice by playing a numbers game. Judgment and common sense are essential."—Joyce Hens Green, U.S. District Judge, District of Columbia.

"We need to deal with the drug problem in a much more discretionary, compassionate way. We need treatment, not just punishment and imprisonment."—Stanley Sporkin, U.S. District Judge, District of Columbia.

The CHAIRMAN pro tempore (Mr. OSE). The question is on the amendment offered by the gentleman from Virginia (Mr. SCOTT).

The amendment was rejected.

AMENDMENT OFFERED BY MR. SCOTT

Mr. SCOTT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SCOTT:

Page 4, after line 11, insert the following:

SEC. 4. SPECIAL PROVISION FOR INDIAN COUN-TRYS.

Section 3559(c)(6) of title 18, United States Code, is amended by inserting "or subsection (e)" after "this subsection" each place it oc-
curs.

Mr. SCOTT. Mr. Chairman, this amendment would allow tribal governments to opt out of the coverage of the bill and the administration of their systems of justice in the manner that we allowed them to opt out of the applica-
tion of the Three Strikes and You're Out law that we passed several years ago to the unintended ra-
cial and disproportionately negative impact.

Since the bill only applies in Federal jurisdictions, the vast majority of the cases affected would involve Native Americans. This means the bill will affec-
t Native Americans in a dispropor-
tionately negative manner when com-
pared to similar offenders in the same State as the Native American reserva-
cion.

Based merely on the location of the offense, whether you are on the reservation or right outside of the reserva-
tion, you could have vastly dif-
ferent sentences, as vastly different as probations in one case and life impris-
mement for some offenses for Native Ameri-

cans, and offenders. There is no evidence that this particular problem, sex crimes against children, is predomin-
antly a Native American problem, so why are we singling them out for the draconian treatment?

Because this bill only applies in Fed-

eral jurisdiction, it will have no effect on the vast majority of cases that have been mentioned today. The only good thing about it is, it will only affect a few cases, but unfortunately, an over-

generalization that these cases will be cases affecting Native Amer-
i
cans.

I would hope that the House would adopt the amendment.

Mr. SENSENBRENNER. Mr. Chair-

man, I rise in opposition to the amend-
ment.

Mr. Chairman, the second Scott amendment amends the bill so that no person subject to the criminal jurisdic-
tion of an Indian tribal government would be covered by the Two Strikes and You're Out provision contained in this bill.

What the amendment does is, it cre-
ates a safe haven for child sex offenders on Indian land. I do not think we want to do that. A convicted child molester in Wisconsin would know the only way to avoid life imprisonment if he is caught would be to prey upon children in Indian lands. I think the Congress has an obligation to protect children on Indian lands as well as we have an obligation to protect children on other Federal lands, as well.

I urge my colleagues to oppose this amendment.

Mr. CONYERS. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, as I understand what we are doing here, we are allowing tribal governments to opt out of coverage, as we have done in other matters like this before, so it is not encouraging this kind of offense to get softer treat-
ment than it would anywhere else in the country.

The racially discriminatory impact on Native Americans is pretty clear here, and that is what we are trying to do. If we say that that legislation that is proposed applies to conduct occurring on land owned by the United States or within the territorial jurisdic-
tion of the United States. So that is Indian reservations. Most of the cases have indicated that 75 percent of these kinds of cases arising under the bill's provision will involve Native Ameri-
cans, so to give the tribal government this option is no less rational than when we did it before.

Carving out an option provision in the Three Strikes legislation. It did not work in any kind of way to mitigate the way that law was handled. There-
fore, there should be no difference in the action we take here today with re-
spect to these groups.

Mr. Chairman, that is my take on the Scott amendment, and I hope that we can reach agreement on it.

Mr. GREEN of Wisconsin. Mr. Chair-

man, I move to strike the last word.

Mr. Chairman, I rise in opposition to this amendment. For the record, I am proud to have six Indian Tribes in my congressional district. I am proud to represent both Native Americans and non-Native Americans.

The amendment offered by the gen-
tleman from Virginia (Mr. SCOTT) is bad public policy because it would send a terrible message to States like Wis-
consin. Carving out a reservation from this law would somehow suggest that the Congress does not have an obligation to protect children on Indian lands just as much as we have an obligation to protect children in Wisconsin. I do not think that is what we want to do.

Carving out reservations from this law would, as the gentleman from Wis-
consin (Chairman SENSENBRENNER) has said, create the appearance of a safe harbor for child molesters. It says to them, lure your victims to the reserva-
tion, take your victims from the reser-
vation, and the penalty will be less. That is wrong-headed. We should not be doing that.

Now, the reasoning of the gentleman from Virginia (Mr. SCOTT) that a high percentage of Federal sex crimes under
this bill would occur on Federal Indian reservations. I think that argues for the inclusion of those reservations into this bill.

It also raises a self-evident point: Under his logic, Federal homicide laws would have a larger impact on reservations and Native Americans; Federal drug laws would have a greater impact on Native Americans by his logic. I do not believe that we should be exempting from Federal drug laws.

There are actually very few cases in which reservation land is exempt from Federal jurisdiction. No tribe has approached me, either this session or last session when we passed this bill twice by a voice vote, no tribe has come to me asking for a carve-out. That is because, I would guess, they do not want to create a safe harbor, either, for child molesters. The last thing they would want to do is say, Come on, we will protect you; you will be safe here on reservation land.

They do not want to look the other way when these terrible crimes occur, and we should not look the other way when these terrible crimes occur. We should protect all children, native American children, non-native American children. Wherever they are, we should take steps to protect them from the monsters who would prey on our children over and over again. My colleagues saw the numbers I had up here before: 209 victims per child molester, 511 offenses per child molester. Do we really want to say that that is okay if it occurs on Federal land, or are we also going to treat it as severely? I do not think so. I do not think anyone here seriously wants to do that.

The CHAIRMAN pro tempore (Mr. Ose). The question is on the amendment offered by the gentleman from Virginia (Mr. Scott).

The amendment was rejected.

AMENDMENT OFFERED BY MS. JACKSON-LEE OF TEXAS

Ms. JACKSON-LEE of Texas. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Ms. Jackson-Lee of Texas:

Add at the end the following new section:

SEC. . STUDY AND REPORT TO CONGRESS.

Not later than one year after the date of the enactment of this Act, the National Institute of Justice shall make a study and report to Congress on the availability and effectiveness of treatment for incarcerated and non-incarcerated perpetrators of sex offenses against children, while also analyzing the effectiveness of probation and parole supervision and reducing the rates of recidivism in these individuals, whether they are incarcerated. We have got to find out what propels individuals to do these heinous and horrific acts.

These crimes are a great threat to our children and to our society at large. Statistics indicate that on a given day there are well over 200,000 offenders convicted of rape or sexual assault under the care, custody, or control of correction agencies, whether they are life, whether they are mandatory minimums, or however they are incarcerated. In any 1 year there are over 1 million such offenders in prison. More startling, however, is the fact that nearly 80 percent of the victims of sexual offenses are children 17 or younger. But if women are truly at risk, even if they are incarcerated. We have got to find out what propels individuals to do these heinous and horrific acts.

Mr. Chairman, recognizing that this legislation is moving forward, I am offering an amendment that will at the very least, be a step toward reducing the number of sex offenses committed against our children.

My amendment will require that the National Institute of Justice study and report to Congress on the availability and effectiveness of treatment for incarcerated and non-incarcerated perpetrators of sex offenders against children, while also analyzing the effectiveness of probation and parole supervision and reducing the rates of recidivism in these individuals, whether they are incarcerated. In any 1 year there are over 1 million such offenders in prison. More startling, however, is the fact that nearly 80 percent of the victims of sexual offenses are children 17 or younger. If women are truly at risk, even if they are incarcerated, we have got to find out what propels individuals to do these heinous and horrific acts.

These crimes are a great threat to our children and to our society at large. Statistics indicate that on a given day, there are well over 200,000 offenders convicted of rape or sexual assault under the care, custody, or control of correction agencies, whether they are life, whether they are mandatory minimums, or however they are incarcerated. H922

CONGRESSIONAL RECORD — HOUSE
March 14, 2002

In 1994, Congress enacted the Jacob Wetterling Crimes Against Children and Sexually Violent Offender Registration Act, which requires that perpetrators of violent sex offenses and crimes against minors register with local law enforcement. In 1996, Megan’s Law and the Lychner Act were passed; these laws require community notification and interstate tracking.

In these ways, we attempted to protect children and others from violent criminals. However, we must also ensure that when these offenders are released into our communities, they are equipped with tools that they need to be less likely than ever to attempt to commit another heinous act.

To this end we must evaluate the availability and effectiveness of treatments and post-release programs. Some studies have been conducted, but they do not comprehensively address the issue, nor do they provide up-to-date information. For example, in March of this year, the Office of Juvenile Justice and Delinquency Prevention issued a review of the professional literature from the past 10 years on juveniles who have sexually offended, including references to treatment, its approaches and its efficacy. The National Institute of Justice issued in January 1997 a study on managing adult sex offenders in communities through probation, parole and other forms of community supervision. These studies are valuable tools, but they must be more comprehensive, and we must keep them updated.

My amendment is an effort to protect our children by compelling a thorough evaluation of alternatives to incarceration and treatment in order to rehabilitate those capable of such progress. I urge my colleagues to support this amendment.

POINT OF ORDER
Mr. SENSENBERN. Mr. Chairman, I make a point of order against the amendment. The amendment is not germane. It fails the fundamental purpose test.

The fundamental purpose of the legislation is to provide mandatory minimum sentences for those convicted of such offenses. A child sex offender that amendment offered by the gentleman from Texas (Ms. JACKSON-LEE) exceeds the scope of this legislation by directing a component of the Department of Justice to study a subject not directly relevant to the issue under consideration, proposes an unrelated method and is, therefore, not germane to the bill.

The point of order is sustained. The amendment is not in order.

PARLIAMENTARY INQUIRY
Ms. JACKSON-LEE of Texas. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN pro tempore. Is the point of order made and sustained against the amendment?

Ms. JACKSON-LEE of Texas. If the point of the legislation was willing to waive the germaneness, would that not have supported allowing this amendment to be heard on the floor?

The CHAIRMAN pro tempore. A point of order was made and sustained against the amendment.

Ms. JACKSON-LEE of Texas. I thank the Chair. I am so sorry that we are losing the opportunity to do a better job on this legislation.

Mr. CONYERS. Mr. Chairman, I offer an amendment. The Clerk read as follows:

Amendment offered by Mr. CONYERS:

SEC. 3. STUDY OF IMPACT OF LEGISLATION.

(a) In each case in which a life sentence is imposed under section 3559(e), the judge shall make and transmit to the Administrative Office of the United States Courts findings with regard to each of the following:

(1) The applicable range under the Federal Sentencing Guidelines if the statutory minimum life sentence had not applied.

(2) The sentence that the court would have imposed on the defendant if the statutory minimum life sentence had not applied, in light of the nature and circumstances of the offense, the history and characteristics of the defendant, and the other factors set forth in section 3553(a).

(3) The race, gender, age, and ethnicity of the victim and defendant.

(4) The reason for the Government’s decision to prosecute this defendant in Federal court instead of deferring to a State or tribal court; and the sentence that the court would have imposed on the defendant if the statutory minimum life sentence had not applied.

(5) The projected cost to the Federal Government of the application of section 3559(e), the judge shall make and transmit to the Administrative Office of the United States Courts findings with regard to each of the following:

(a) In each case in which a life sentence is imposed under section 3559(e), the judge shall make and transmit to the Administrative Office of the United States Courts findings with regard to each of the following:

(1) The applicable range under the Federal Sentencing Guidelines if the statutory minimum life sentence had not applied.

(2) The sentence that the court would have imposed on the defendant if the statutory minimum life sentence had not applied, in light of the nature and circumstances of the offense, the history and characteristics of the defendant, and the other factors set forth in section 3553(a).

(3) The race, gender, age, and ethnicity of the victim and defendant.

(4) The reason for the Government’s decision to prosecute this defendant in Federal court instead of deferring to prosecution in State or tribal court, and the criteria used by the Government to make that decision in this and other cases.

(5) The projected cost to the Federal Government of the life sentence, taking into account capital and operating costs associated with imprisonment.

(b) To assist the court to make the findings required in subsections (a)(4) and (a)(5), the Government attorney shall state on the record such information as the court deems necessary to make such findings, including cost data provided by the Bureau of Prisons. In making the required findings, the court shall not be bound by the information provided by the Government attorney.

(c) The Administrative Office of the United States Courts shall annually compile and report the findings made under subsection (a) to the Congress.

Redesignate succeeding sections accordingly.

Mr. CONYERS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CONYERS. Mr. Chairman, I rise to introduce a notion that we would require the Administrative Office of the United States Courts to compile and report to the Congress its findings pertaining to the impact of this legislation, specifically relating to race, gender, age, ethnicity of victim and defendant; the reasons behind the government’s decision to prosecute the defendant in Federal court instead of deferring to a State or tribal court; and the sentence that the court would have imposed on the defendant if the statutory minimum life sentence had not applied.

The idea is to provide our colleagues with invaluable insight into the effect of this legislation as it will relate to prison overcrowding, racial considerations, and the costs that are attached to the Federal court in the event of the enacting of this legislation.

This is dealing with the ballooning prison population because we have more people proportionately in prison than anywhere else on the planet, and we think that this would be a very important move in the right direction; and I hope that it will become a part of this legislation.

Mr. SENSENBERN. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I would like to thank the gentleman from Michigan (Mr. CONYERS) for introducing a germane amendment on how to study the impact of this legislation. I think the type of material that the study would put together would be very useful in looking at the types of crimes that have been committed against children.

However, let me say I am a little bit puzzled at the gentleman from Michigan putting this amendment in, because all day yesterday when we were dealing with the class action suit, the gentleman from Michigan and his supporters on the other side of the aisle were saying how overworked our Federal judges are and how the complicated class action legislation that we were discussing yesterday, really more of these cases should be tried in State or tribal court because our Federal judges were overworked.

Well, now we have an amendment that has a mandate on the Federal
judges. Let me read from the amendment to show that the Federal judges are going to have to do more work. It says that “in each case in which a life sentence is imposed, the judge shall make and transmit to the Administrative Office of the United States Courts findings, with regard to each of the following: the applicable range under the sentencing guidelines if the minimum mandatory life sentence had not applied.” So the judge has to speculate what he would do to sentence the defendant. It is not required to sentence the defendant for life.

“The race, gender, age and ethnicity of the victim and of the defendant.” Well, that is fairly obvious from the court records. But then we have to have the reason for the government’s decision to prosecute this defendant in Federal court instead of State or tribal court, and then the criteria used by the government to make that decision in this or other cases, and the projected cost to the government of the life sentence, taking into account capital and operating costs associated with the imprisonment.

Now, what this is going to require is it is going to require an additional hearing after the sentence for the court to make these findings, because the government would not be able to make a determination of what this cost would be until the sentence is pronounced, as well as what the alternative would have been and the mandatory life sentence if not applied in this case.

So I would say to the gentleman from Michigan, I think these are very, very useful statistics, and I am prepared to support this amendment; but I am wondering if the gentleman’s sympathy for our overworked Federal judges evaporated overnight, and I am happy to yield for an answer.

Mr. CONYERS. Mr. Chairman, I thank the gentleman for yielding. I am glad the gentleman pointed out the fact that I claimed that the judges were overworked. I think they are probably in the same condition today that they were yesterday, which is overworked; and I would like to use the gentleman’s solution, which is that we get more judges into the judicial system. I think it is 70-something, and I think that would help. So I think the gentleman thinks they are overworked and so do I, but I think this could be a useful purpose.

Mr. SENSENBERNER. Mr. Chairman, reclaiming my time, we will be dealing with the issue of additional judicial manpower in the context of the conference on the Department of Justice authorization bill.

But even before that passes, if we could get a few more confirmations, we would get more judges on the bench and we would do more work.

Mr. CONYERS. If the gentleman will continue to yield, Mr. Chairman, could I ask the gentleman if he would consider, with me, the proposal of the gentlewoman from Texas (Ms. JACKSON-LEE) in terms of a freestanding proposal separate from this?

Mr. SENSENBERNER. Reclaiming my time, Mr. Chairman, I would encourage the gentleman from Texas to reintroduce this or separate legislation. I am not sure that the Committee on the Judiciary has exclusive jurisdiction over that type of a study, and I certainly would not wish to preclude other committees of jurisdiction from looking at it.

Mr. CONYERS. I thank the gentleman.

The CHAIRMAN pro tempore (Mr. OSE). The question is on the amendment offered by the gentleman from Michigan (Mr. CONYERS).

The question was taken; and the amendment offered by Mr. SENSENBERNER was withdrawn.

AMENDMENT OFFERED BY MS. JACKSON-LEE OF TEXAS

Ms. JACKSON-LEE of Texas. Mr. Chairman, I offer an amendment.

The Clerk reads as follows:

Amendment offered by Ms. JACKSON-LEE of Texas:

SEC. 2. PROHIBITION OF FEDERAL EXPENDITURES.

This Act shall have no effect if there are more than five convicted child sex offenders within any given zip code.

Mr. SENSENBERNER. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN pro tempore. The amendment offered by Ms. JACKSON-LEE of Texas: Add at the end the following new section:

SEC. 2. PROHIBITION OF FEDERAL EXPENDITURES.

This Act shall have no effect if there are more than five convicted child sex offenders within any given zip code.

Mr. SENSENBERNER. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN pro tempore. The gentleman from Wisconsin reserves a point of order.

Ms. JACKSON-LEE of Texas. Mr. Chairman, the intent of the legislation, the underlying legislation, is to ensure the safety of our children. I agree with that. At the same time, I think that the legislation has the opportunity to ensure the further enhanced security of our children from convicted sexual molesters of children.

I rise to support the amendment that indicates that no dollars should be rendered in this act if there are more than five sex molesters of children in one zip code. The act would then have no effect.

I ask my colleagues to support this amendment, because there is great evidence that in urban areas and even in rural areas there seems to be a dumping in particular locations of child sex molesters.

Here is a prime example. On Sunday, March 11, 2002, a young girl by the name of Laura Ayala walked from her home in Dallas, Texas, to a store and buying the newspaper. What was later discovered is a scattered newspaper and her shoes scattered in an area along the way.

But the most shocking aspect, as members of my community continue to search for her, is that as the officers were looking for lists of known sexual offenders, concentrating on the girl’s neighborhood, the Texas Department of Public Safety listed 25 registered sex offenders in the zip code.

Laura is only 4 feet tall, weighs 90 pounds, has black, medium-length hair with brown highlights. She is a child that is loved, as there are in many homes children that are loved. Therefore, I would argue that this is a germane amendment to prevent, if you will, the dumping of sexual offenders in particular areas.

Today on the floor of the House we can fix it right now. Our colleagues will support this. Why, in this whole world would want their neighborhood, no matter where they live, what their economic status, what language they speak or what culture they come from, that they have their neighborhoods 25 sex molesters of children living in their community?

We always ask the question, Mr. Chairman, are we relevant? Are we really focusing on what Americans’ desires are as we proceed as Members of the House and the other body?

Today we can be relevant. In addition to this legislation, we can be relevant and right now confront a crisis that is not only in Houston. Think how I would imagine if we took a sampling around the Nation, we would find dumping of these offenders in communities everywhere we might look. We can be relevant today by providing some solace to the innocent children of sexual molesters of children, as this dumping of sex offenders in particular areas.

Those who are first offenders will ultimately be out. This does not conflict with the underlying intent. We know that if one sex offender will be out among our population. Why have 25? Who knows, there may be 35 and 45 and 50 in other zip codes.
Mr. Chairman, is it not reasonable for my colleagues to support this amendment to be able to be relevant today as we move this legislation forward? I would ask that my colleagues support this amendment that will prohibit the duplication of sex offenders on our community and dumping of sex offenders on our innocent children.

Mr. Chairman, I rise today in support of my amendment which states simply that no federal monies can be expended for this legislation if there are more than two convicted sex offenders within a given ZIP code. This amendment is motivated by a recent tragedy in Houston, Texas in which a 13-year-old girl, Laura Ayala, went across the street from her southeast Houston home Sunday night and never returned.

Since that day, our police officers have been poring over lists of known sexual offenders, concentrating on Laura’s neighborhood. What is most disturbing is that the Texas Department of Public Safety lists 25 registered sex offenders in one ZIP code. Why was this allowed to happen?

Mr. Chairman, my amendment recognizes the need for legislation that protects our children from multiple sex offenders who collectively may have a cumulative effect that is adverse to our children and communities.

I urge my colleagues to support it.

Mr. SENSENBRENNER. Mr. Chairman, I withdraw my point of order, since the amendment is germane, and I rise in opposition to the amendment.

Mr. Chairman, I cannot believe that the gentlewoman from Texas would draft an amendment of this nature and submit it to the committee for its consideration.

It says, "This act shall have no effect if there are more than five convicted child offenders within any given ZIP code." That means that if there are five child sex offenders who are convicted under this law and sent to the penitentiary for life, there are five people in the ZIP code where the penitentiary is located, and every future child sex offender would be able to run around the country in Federal areas and be able to continue preying on these children.

Stop and think about how this amendment is drafted. It is drafted so that anywhere where there is a penitentiary that has five or more child sex offenders, it would end up taking away the effect of this law throughout the United States of America.

This is a shameful amendment, and I hope it is overwhelmingly rejected.

Mr. SCOTT. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I yield to the gentlewoman from Texas (Ms. JACKSON-LEE) so she can respond to the comments that were just made.

Ms. JACKSON-LEE of Texas. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, I believe that in the wisdom of this body, we could find a way to work on this very striking discovery and still keep the enforcement of the act. I support the amendment that I have, but I will look further to, if you will, having the opportunity to write free-standing legislation. I still believe that we have the opportunity here to craft this amendment to not be detrimental to the underlying bill. That is not the intent of the amendment.

I do recognize there is free association on expedited attention in this country. That is why I went to the proponents of the bill to see how we could work together. This is an important enough issue for me that I believe that this body should address it and address it today.

However, if the amendment does not achieve its ultimate goal of victory, then what I will do is write a free-standing bill. I would hope to encourage those who would understand the sentiment, the purpose, the underlying legal standing of such legislation, which is not to undermine the present legislation, but to protect our communities. I would hope they would join in with me on that.

Mr. GREEN of Wisconsin. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to this amendment. Let me first say that I believe that the gentlewoman’s intentions are honorable and good intentions, and she is pointing out a problem that I think is worth our examining at some point. I think the Committee on the Judiciary, as it has oversight hearings and such, should ask some of these questions. They are important questions.

I, unfortunately, believe that this amendment is not drafted in a way that will achieve the result the good gentlewoman intends. I do not think the answer is to say that the more sex offenders we find in a particular area, the softer the law should be, or this tougher law should not apply to other parts of the country.

In fact, the answer should be if there are more sexual offenders in a given area, to go to the State legislature in that State and get tougher laws and more enforcement, beef up our resources. Those children in those areas deserve more protection, not less protection.

So while I understand the motives and would like to work with the gentlewoman in the future to look at some of these issues, I do not believe this amendment gets to that point.

Ms. JACKSON-LEE of Texas. Mr. Chairman, will the gentlewoman yield?

Mr. GREEN of Wisconsin. I yield to the gentlewoman from Texas.

Ms. JACKSON-LEE of Texas. Mr. Chairman, I thank the gentlewoman for yielding to me.

Mr. Chairman, I believe that in the wisdom of this body, we could find a way to work on this very striking discovery and still keep the enforcement of the act. So while I understand the motives and would like to work with the gentlewoman in the future to look at some of these issues, I do not believe this amendment gets to that point.
The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on the amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes had prevailed.

Mr. BILIRAKIS, Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered taken, and the vote was taken by electronic device, and there were—yeas 382, nays 34, not voting 18, as follows:

[Roll No. 64]

YEAS—382

—

Messrs. PENCE, PHELPS and SHUSTER changed their vote from "aye" to "no."

Messrs. MCDREER, JOHNSON of Illinois, SHAYS, DREIER, BOYD, PORTMAN, MURTHA, GUTENKNECHT, HOEKSTRA, BURTON of Indiana, GALLEGLY, HILLIARY, HULSHOF, Ms. HARMAN, Messrs. HOBSON, PETRI, MORAN of Kansas, SCHAFER, GRAHAM, Mrs. EMERSON, Messrs. GREENWOOD, WELDON of Pennsylvania, Mrs. KELLY, Messrs. CRANE, UPTON, GANSKE and SIMMONS changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. Ms. SOLIS, Mr. Chairman, during roll call no. 63 on an amendment to H.R. 2146 to provide for a study of the impact of the legislation I was unavoidably detained. Had I been present, I would have voted "aye."

Stated for, Ms. SOLIS. Mr. Chairman, during roll call no. 63 on an amendment to H.R. 2146 to provide for a study of the impact of the legislation I was unavoidably detained. Had I been present, I would have voted "aye."

So the amendment was agreed to.

The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN pro tempore (Mr. OSE).

The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN pro tempore.

Under the rule, the committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mrs. EMERSON) having assumed the chair, Mr. OSE, Chairman pro tempore of the Committee of the Whole on the House of the States of the Union, reported that that Committee, having had under consideration the bill (H.R. 2146) to amend title 18 of the United States Code to provide life imprisonment for repeat offenders who commit sex offenses against children, pursuant to House Resolution 306, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.
H926

CONGRESSIONAL RECORD — HOUSE  
March 14, 2002

Stated for:
Mr. ISTOOK. Mr. Speaker, on rollover No. 64, I was detained due to chairing a hearing regarding the White House and its budget. Had I been present, I would have voted “aye.”

Mr. UDALL of Colorado. Madam Speaker, on rollover No. 64, H.R. 2146, the “Two Strikes and You’re Out Child Protection Act”, I was delayed on official business on the other side of the Capitol. Had I been present, I would have voted “aye.”

Mr. FORD. Madam Speaker, on H.R. 2146, rollover No. 64, I was on the floor but apparently missed the vote, the Two Strikes and You’re Out Child Protection Act.

I would have voted in favor of the resolution, had I not been in the cloakroom and slightly confused about the second vote being called.

Stated against:
Ms. SOLIS. Mr. Speaker, during rollover No. 64 on final passage of H.R. 2146 I was unavoidably detained. Had I been present, I would have voted “no.”

PERSONAL EXPLANATION

Ms. KILPATRICK. Mr. Speaker, had I been present, I would have voted “aye” on the Concurrent amendment (rollover No. 63) to H.R. 2146, the “Two Strikes and You’re Out Child Protection Act” and “aye” on final passage of H.R. 2146, the “Two Strikes and You’re Out Child Protection Act” (rollover No. 64).

GENERAL LEAVE

Mr. GREEN of Wisconsin. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the bill just passed.

The SPEAKER pro tempore (Mrs. McCAIN of Arizona). Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

ANNOUNCEMENT BY COMMITTEE ON RULES REGARDING AMENDMENT PROCESS FOR BUDGET RESOLUTION

(Mr. DREIER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. PELOSI. Madam Speaker, I take this time for the purpose of inquiring about the schedule for next week.

I yield to the distinguished majority leader.

Mr. ARMY. Madam Speaker, I thank the gentlewoman from California for yielding.

Madam Speaker, I am pleased to announce that the House has completed its legislative business for the week.

The House will next meet for legislative business on Tuesday, March 19, at 12:30 p.m. for morning hour and at 2 p.m. for legislative business. The House will consider a number of measures under suspension of the rules, a list of which will be distributed to Members’ offices tomorrow.

Madam Speaker, I should note that in particular a bill under consideration under suspension next Tuesday is H.R. 2804, the James R. Browning Courthouse Designation Act, and, of course, others as well.

For Wednesday and Thursday, I have scheduled the Budget Resolution for Fiscal Year 2003, marked up in the Committee on the Budget yesterday. I have also scheduled the Digital Tech Corps Act of 2001, being marked up in the Committee on Government Reform today.

Ms. PELOSI. Madam Speaker, reclaiming my time, could the gentleman be more specific about what day the budget resolution will be considered?

Mr. ARMY. Madam Speaker, if the gentlewoman will continue to yield, we should expect to consider the budget on Wednesday, and as it turns out now, we should expect to complete the budget, Madam Speaker, by sometime fairly early Wednesday evening.

Ms. PELOSI. Madam Speaker, does the leader expect any legislation dealing with pensions to be brought up on the floor next week?

Mr. ARMY. Again, I thank the gentlewoman for the inquiry, and if she will continue to yield, we do not anticipate any legislation being available for scheduling next week.
Ms. PELOSI. Madam Speaker, just to clarify what the leader said about the budget resolution, if the work on the budget resolution is concluded early evening Wednesday, will there be any legislative votes on Thursday next week?

Mr. ARMEY. Again, let me thank the gentlewoman for the inquiry.

If the gentlewoman would continue to yield, it would be our anticipation, Madam Speaker, that should we complete our work on the budget Wednesday night, that we would probably complete our work for the week at that point.

Ms. PELOSI. I thank the gentleman for the information, for giving us a specific list of suspensions, in one case in any event.

ADJOURNMENT TO MONDAY,
MARCH 18, 2002

Mr. ARMEY. Madam Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 2 p.m. on Monday next.

The SPEAKER pro tempore (Mrs. EMERSON). Is there objection to the request of the gentleman from Texas?

There was no objection.

HOURL OF MEETING ON TUESDAY,
MARCH 19, 2002

Mr. ARMEY. Madam Speaker, I ask unanimous consent that when the House adjourns on Monday, March 18, 2002, it adjourn to meet at 12:30 p.m. on Tuesday, March 19, for morning hour debates.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENDING WITH CALENDAR
WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. ARMEY. Madam Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

HONORING IRISH AMERICANS AND
ESSAY CONTEST WINNER MI-
CHAEL ANTHONY PECORA
BEFORE ST. PATRICK’S DAY

(Mr. FERGUSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FERGUSON. Mr. Speaker, I rise today to honor all Irish Americans and to wish everyone an early happy St. Patrick’s Day, which we will celebrate this weekend.

I also would like to pay tribute to Mr. Michael Anthony Pecora, the first prize winner in the 2002 Morris County, New Jersey, St. Patrick’s Day Essay Contest.

Michael is currently a ninth grade student at Delbarton School in Morris-town, New Jersey, a school of which I am a proud alumnus. Entrants in this contest were asked to discuss the contributions that Irish Americans have made to the betterment of our country.

Michael wrote of the ways that Irish Americans have helped to shape our political system, our national literature and theater and sports. He spoke of the unique prominence of women in Irish communities, and the accomplishments that many women of Irish heritage have achieved in our country.

Michael eloquently described the persistence of Irish Americans in the face of ethnic and religious prejudice, and to overcome these obstacles and to make lasting and important contributions to American society.

I commend Michael Pecora for his award-winning essay about Irish Americans, and congratulate him on his accomplishment.

Mr. Speaker, I conclude for the Record the essay by Mr. Pecora.

The document referred to is as follows:

THE CONTRIBUTIONS OF IRISH-AMERICANS TO THE DEVELOPMENT OF THE UNITED STATES

(by Mike Pecora)

The many contributions of Irish-Americans to the development of the United States have enriched the true meaning of what an American citizen represents today. Although these accomplishments are numerous and varied, there are spheres of endeavor in which Americans of Irish birth or ancestry have distinguished themselves throughout our country’s history—public service, politics, and governance; and one domain of American life in which the Irish, by their overwhelming numbers, clearly left their impact on our national life. As exemplified by the Kennedys of Massachusetts, Irish-Americans have generally come from strong, stable, and large families. But even more remarkably, we have a pattern of increasing upward mobility from one generation to the next. The key variable in this upward march has been education, particularly the educations of women. Over the twentieth century, the Irish have been at the forefront of the nation’s public and parochial educational systems. Indeed, coming into a society dominated by white Anglo-Saxon Protestants, the Irish took the lead in the creation of a distinctly American Catholicism. The collective cultural achievements of Irish-Americans, from literature and theater to sports and popular entertainment are legend. Given that some forty million Americans claimed some Irish ancestry in the 1900 census, the collective record of Irish-Americans does not seem surprising (Meager 1999, p. 280). But to get to where they are today, Irish-American women have had to surmount major obstacles, including entrenched ethnic and religious prejudice. By doing so, not only did the Irish successfully assimilate into American society; they had a major part in the making of the American melting pot.

Long before the Great Potato Famine of the late 1840s, substantial numbers of Irish immigrants came to the shores of North America. During the time of the American Revolution, there were an estimated 250,000 individuals of Irish descent living in North America, many of them laboring in the construction of the country’s rapidly growing transportation infrastructure (Meager 1999, p. 280). In 1857, Irish national-ism was the driving force behind the founding of the Irish Republican Brotherhood, the forerunner of the “Fenian” movement abroad, recruiting former state militia members into their ranks. When the primus of the Fenian nucleus of Irish regiments already been organized. During the Civil War, “Ireland provided the largest proportion of foreign born troops in the South (Vinyard 1997, p. 468). In the First and Second, units such as the famous “fighting sixty-ninth” extended this legacy of Irish-Americans answering the call to military duty.

In the 1920s, D.W. Brogan noted that the Irish had come to constitute the “governing class” of America (cited in Meager 1999, p. 280). At this time, white Anglo-Saxon Protestants and German American ethnicity made up the “ruling class” of the United States—a term that had been used in the way in public service (notably, in the police and fire departments of the country’s developing cities) and in the nation’s political life. The 1950s and 1960s witnessed the exception of many women. By 1910, Irish governors, such as David Walsh of Massachusetts, Edward Dunne of Illinois, and Alfred E. Smith of New York were elected to the highest posts within their own states. Al Smith’s selection as the Democratic Party’s nominee for the presidency in 1928 was a milestone for both the Irish and for Catholic Americans—was defeated in this bid, but some three decades later, John F. Kennedy completed the breakthrough (Vinyard 1997, p. 468). In the 1968 presidential contest, his brother, Robert Kennedy challenged Eugene McCarthy to become the Democratic standard-bearer; only for Kennedy to be assassinated, and McCarthy to be defeated in the primaries. Nevertheless, in that same year, Irish Catholics held both positions of Speaker of the House of Representatives (John McCormack) and majority leader of the Senate (Michael Mansfield).

Given their Catholic faith, it is not surprising that Irish-Americans have generally come from large families. But the frequency of divorce among the Irish has been significantly lower than that of other ethnic groups (Blessing 1980, p. 541). But the success of Irish families is even more evident when we consider patterns of generational upward mobility. During the nineteenth century, Irish-born immigrants did not fare well in the industrial capitalist economy of the United States. Indeed, the “famine” Irish of the 1850 and 1860s had a “dismal record of movement up the occupational ranks” (Blessing 1980, p. 541). Nevertheless, second- and third-generation Irish-Americans far exceed the accomplishments of their parents and grandparents. By 1960, with each successive generation of Irish-Americans, we see upward leaps in years of completed schooling, occupational status, and household income (Blessing 1980, p. 542).

One especially important aspect of Irish-American support for education revolves around gender. “Irish families often gave their daughters more schooling than their sons; accordingly, second- and third-generation Irish women were able to take advantage of opportunities becoming available to females” (Blessing 1980, p. 542). In the 1960s, women were heavily over-represented within the ranks of public school teachers during the
Progressive Era and thereafter (Vinyard 1997, p. 466). Moreover, Irish nuns and priests have been important leaders in America’s parochial school system.

In the mid-nineteenth century, the Irish established themselves as the dominant ethnic group within the American Catholic Church, and have held that status ever since (Vinyard 1997, p. 466). In 1970, for example, over 50 percent of the bishops and 34 percent of the priests of the American Catholic Church were of Irish background (Blessing 1980, p. 542). Such outstanding individuals as Cardinal William O’Connell of Boston, Cardinal Francis Spellman of New York City, and successor, Cardinal John O’Connor, honorably led the Catholic Church through the transition of Vatican II. The Irish, therefore, left an unforgettable imprint upon American Catholicism, creating a model for both national and religious allegiance.

Immigrants, but more often second- and third-generation Irish, helped to create a new American urban culture that emerged in the late nineteenth and early twentieth centuries (Meager 1999, p. 238). Irish Americans were highly visible in the theater during this period. Playwrights like Eugene O’Neill, and novelists like James T. Farrell, Edwin O’Connor, and James Flaherty, F. Scott Fitzgerald, made world-class achievements in American literature. At the same time, the Irish excelled in sports: John L. Sullivan in boxing and such individuals as Connie Mack, Dizzy McGraw, and Charles Comiskey help to transform baseball into America’s pastime.

It is only been in the second half of the twentieth century that the scope, and depth of Irish contributions to America has been given its full recognition. In January 1897, when the founders of the Irish American Historical Society issued that organization’s founding statement, they lamented that their countrymen had received “scant recognition” from U.S. historians and attributed this neglect to “carelessness, ignorance, indifference or design” (American Irish Historical Society, in Griffin, 1973, p. 121). Despite their Irish-language advantage, the Irish were subjected to both ethnic and religious prejudice. This anti-Irish bias unfolded in waves, increasing during the immigration periods of the Progressive era at the turn of the century, and into the 1920s with the revival of the anti-Catholic Ku Klux Klan. As historian Patrick Blessing has put it: “It was the first major immigrant group to threaten the stability of American society. Out of their interaction with the host society, came a more diverse and turbulent society” (Blessing 1980, p. 462). Despite decades of bigotry and repression, the Irish assimilated into the American “melting pot.” Indeed, not only did they serve as a model for other immigrant groups, but the process of becoming full-fledged Americans, they altered, enlarged, and enriched the very definition of an “American.”

SPECIAL ORDERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mrs. Jo Ann Davis) is recognized for 5 minutes.

(Mrs. JO ANN DAVIS of Virginia addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. Hoyer) is recognized for 5 minutes.

(Mr. HOYER addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. Jones) is recognized for 5 minutes.

(Mr. JONES of California, Mr. Corkins addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. Hunter) is recognized for 5 minutes.

(Mr. HUNTER addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Ms. Kaptur) is recognized for 5 minutes.

(Ms. KAPTUR addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

RESTRUCTURING THE IMMIGRATION AND NATURALIZATION SERVICE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. Gekas) is recognized for 5 minutes.

Mr. GEKAS. Madam Speaker, I say to the Speaker and to the Members that the ghost of Mohamed Atta has attacked our Nation. Following the real Mohamed Atta and his crash into the World Trade Center, his ghost, like ashes left at Ground Zero, has arisen and entered the public consciousness again.

This time, as everyone knows by now, we learned from the aviation school in Florida that the visa for Mohamed Atta has been approved, 6 months to the day after the real Mohamed Atta crashed into our Twin Towers.

This, of course, is unacceptable, and the President of the United States has said, and the President immediately took action to start the investigation into the matters that led to this unseemly development in the school in Florida.

But it brings to mind that the President of the United States, as candidate George W. Bush in the Year 2000, noted that his observation of the Immigration and Naturalization Service was such that it could not go on in the structure that was extant at that time, that we must separate the law enforcement segment of INS from that of the process of visas and naturalization and citizenship.

This is a theme which members of the Committee on the Judiciary took to heart, and we have introduced legislation worked on legislation for bifurcation of the INS so that we can home in on student visas, like the kind that Mohamed Atta abused, so we can home in on those who overstayed their visas, like the Mohamed Attas of the world, so that we can stop the attendance of students in our country and note the end of their scholarship at a particular institution and then take steps, when necessary, to make sure they leave the country at the expiration of the visas.

All those are problems that are anticipated to be solved when we proceed with the bifurcation, the new structure, of the Immigration and Naturalization Service.

One giant step that we have already taken to get to the bottom of this is that I have instructed our Subcommittee on Immigration and Naturalization Service to formulate a hearing on this very same subject, and next week, on as soon as possible, to look into how this incident occurred. We are going to determine from the INS internal workings how this large hole in the process appeared, and we are going to take steps to cover that hole forever, probably with a new structure that we anticipate under the legislation that we have in front of us.

The important thing to recognize here is that we know, and we know where September 11, and so did Candidate Bush know in the Year 2000, that we must do something about the INS. It had grown, in agonizing detail, uncomfortable in so many respects, not only to the people who are subject to its process, who had to wait such long periods of time for validation of their particular applications, but also on the question of border control and the large question of illegal aliens and how many of them should be deported on the spot. All these are problems that we anticipate will be alleviated, if not removed entirely, by the new structure that we envision.

Now, to his credit, the President, together with the Attorney General, has
made some movements internally to do exactly that, but it is not enough to guarantee that this restructuring will take place. It will take a statute, and I encourage all Members, Democrat and Republican, to join in cosponsoring our legislation to bring about this great idea of restructuring the INS.

What we are pronouncing here today, Madam Speaker, is the death of the Immigration and Naturalization Service as we know it. For whom the bell tolls? It tolls for the INS.

The new structure will meet these problems head on and accord the American public a new sense of security at the borders and deal with the problem of the internal machinations of the student visas and other visas. We aim to tighten up the process so that we can guarantee the security of the American people.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. CUMMINGS) is recognized for 5 minutes.

Mr. CUMMINGS addressed the House. The bill will appear hereafter in the Extensions of Remarks.

THE FAIR FEDERAL COMPENSATION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from the District of Columbia (Ms. NORTON) is recognized for 5 minutes.

Ms. NORTON. Madam Speaker, on Monday I introduced the Fair Federal Compensation Act. The mayor of the city and the City Council chair stood with me as I put this act forward.

Madam Speaker, the act is aimed at dealing with an impending crisis that I think the Congress would want to take hold of before it happens, particularly since the District is just out of a financial crisis, the worst in 100 years, and this one is not of the District’s own making. This is a crisis the District cannot tax its way out of, cannot grow its way out of, because of restrictions placed on the city by the Federal Government.

I speak of a structural financial imbalance that comes from the requirement of the Federal Government that the taxpayers of the District of Columbia pay for services rendered to the Federal Government and to Federal employees without any reimbursement for those services. Because almost 1 million people come in every day, and only 600,000 people live here, it has become impossible to do that, and over time, a new crisis will break out unless we get hold of it now.

I think I have a win-win way to deal with that crisis through an infrastructure fund that would benefit the entire region, not only the residents of the District, if it is set up in such a way that would reduce this dangerous financial burden imposed on the city without imposing taxes on the American people or on commuters. It would simply involve a transfer of 2 percent of the taxes that commuters, almost all of them Federal employees, already pay to the Federal Government.

As a way to calculate the cost of the services, there has to be a limit on how much the Federal Government is going to transfer; we say this money is for the cost of the services provided Federal employees, so you take 2 percent of the taxes they already pay.

There is no cost to the commuters. I have not added a new tax. There is no cost to the American people, because there is no increase in taxes.

The amount is infinitesimal. It is $100 million a year, about that amount, going up only gradually as commuters’ salaries go up. That does not even register in the Federal budget because it is so small.

□ 1300

And it is about a third of the money that we think the taxpayers of the District of Columbia put out in order to deal with Federal employees, Federal services, and the Federal presence.

This is a city in the middle of a financial crisis. It has to carry this built-in, mandatory financial imbalance. If we were in another city, there is some State aid that helps the city to handle it; or sometimes there is a commuter tax or a wage tax. The District has none of that. The District does not have any of that and cannot have any of that. Sometimes people build high because if you keep building up, you can make up for the taxes that are lost. The District cannot do that. There is a height limit on how high we can build. The Federal Government takes 42 percent of the land for its own purposes. So we are trying to find a way to deal with this crisis before it gets out of control and without imposing any additional burdens.

This month, this simple transfer, based on the taxes commuters already pay, gives us a reasonably accurate calculation of the services used by Federal employees. It is a predictable amount, which allows the District to do the necessary budget forecasting. It costs the District nothing, it costs the American people nothing extra, and it is tied simply as a part of a simple transaction, tax transaction.

We think that when we have done what the District has done, which is to pull itself out of the worst financial crisis in its history, the city will be in the middle of a recession and yet the District still has a surplus because it has been so prudent; in other words, we have our operating budget under control, we think it is fair to come to the Federal Government and say we have appropriated, because it takes place simply as a part of a simple transaction, tax transaction.

and conviction about their own self-worth serve them all of their lives. Today, there are nearly 3.7 million Girl Scouts, 2.8 million members, girl members, and 942,000 adult members, almost all volunteers.

Therefore, it is important that we honor the Girl Scouts for their 90 years of work in developing qualities in young women today so that they may serve as future leaders tomorrow.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. Engel) is recognized for 5 minutes.

(Mr. Engel addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. Meeks) is recognized for 5 minutes.

(Mr. Meeks of New York addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Florida (Mrs. Thurmam) is recognized for 5 minutes.

(Mrs. Thurmam addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Change in Disease Status of Greece Because of BSE [Docket No. 01-065-2] received March 5, 2002, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Agriculture.

5900. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—National Poultry Improvement Plan and Auxiliary Provisions [Docket No. 00-088-1] received March 5, 2002, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Agriculture.

5901. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Black Stem Rust; Identification Requirements and Addition of Rust Resistant Varieties [Docket No. 97-053-3] received March 5, 2002, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Agriculture.

5902. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Compliance Alternatives for Provision of Uncompensated Services [RIN: 0960-0281] received March 5, 2002, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Agriculture.

5903. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule—2, 4-D; Time-Limited Pest Tolerance [OPP–301219; FRL–6627–1] (BAN: 2,4-D; Time-Limited Pest Tolerance) received March 4, 2002, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Agriculture.

5904. A letter from the Regulations Coordinator, Department of Health and Human Services, transmitting the Department's final rule—Compliance Alternatives for Provision of Uncompensated Services [RIN: 0960-0281] received March 5, 2002, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Energy and Commerce.

5905. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule—Approval and Promulgation of State Implementation Plans; Indiana [IN109–1; FRL–7152-3] received March 6, 2002, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Energy and Commerce.

5906. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule—Approval and Promulgation of Air Quality Implementation Plans; Maine; Control of Gasoline Volatility [ME005–7014a; A–1; FRL–7152-1] received March 7, 2002, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Energy and Commerce.
By Mr. SMITH of Michigan: H.R. 3965. A bill to authorize the establishment of a Center for Plant Disease Control in the Department of Agriculture; to the Committee on Appropriations.

By Ms. RIVERS (for herself and Mr. WELDON of Florida): H.R. 3966. A bill to direct the Director of the Office of Science and Technology Policy to conduct a study of the impact of Federal policies on the innovation process for genomic technologies, and for other purposes; to the Committee on Science, and in addition to the Committee on the Judiciary, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. RIVERS (for herself and Mr. WELDON of Florida): H.R. 3967. A bill to amend title 35, United States Code, to provide for noninfringing uses of patents on genetic sequence information for purposes of research and genetic diagnostic testing, and to require public disclosure of such information in certain patent applications; to the Committee on the Judiciary.

By Mr. GILMAN: H.R. 3968. A bill to provide Capitol-flown flags to the immediate family of fire fighters, law enforcement, emergency medical technicians, and other rescue workers who are killed in the line of duty; to the Committee on House Administration.

H.R. 3969. A bill to enhance United States public diplomacy, to reorganize United States international broadcasting, and for other purposes; to the Committee on International Relations.

By Mr. DINGELL (for himself, Mr. TOWNS, Mr. MARKULIS, Ms. DeGETTE, Mr. BURSCH, Mr. BALLENGER, Mr. GILL, Mr. ROBINSON, and Mr. ENGEL): H.R. 3970. A bill to improve the setting of accounting standards by the Financial Accounting Standards Board, to provide sound and uniform accounting and financial reporting for public utilities, to clarify the responsibility of issuers for the transparency and honesty of their financial statements and reports, and to enhance the governance of the accounting profession; to the Committee on Financial Services, and in addition to the Committee on Science and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. HASTINGS of Washington (for himself, Mr. SMITH of Washington, Mr. NETHERCUTT, Ms. DUNN, Mr. INSLEE, Mr. DUKAS, and Mr. LARSEN of Washington): H.R. 3971. A bill to provide for an independent investigation of Forest Service fire-fighter deaths caused by wildfire entrapment or burnover; to the Committee on Agriculture.

By Mr. JONES of North Carolina: H.R. 3972. A bill to amend title 10, United States Code, to index for inflation the amount of the death gratuity paid upon the death of a member of the Armed Forces on active duty; to the Committee on Armed Services.

By Mr. JONES of North Carolina (for himself and Mr. GUTCHINCY): H.R. 3973. A bill to amend the Internal Revenue Code of 1986 to restore the tax exempt status of death gratuity payments to members of the uniformed services, to the Committee on Ways and Means.

By Mrs. JONES of Ohio (for herself and Mr. WATTS of Oklahoma): H.R. 3974. A bill to authorize the use of the expertise and capacity of community-based organizations involved in economic development activities and key community development programs; to the Committee on Financial Services.

By Mr. LEACH (for himself and Ms. MCCLINTOCK of California): H.R. 3975. A bill to provide for an amendment to the Articles of Agreement of the International Monetary Fund to authorize the United States to increase its share of the quotas of the International Monetary Fund, and for other purposes; to the Committee on Foreign Affairs.

By Mr. MCDERMOTT (for himself and Mr. S assaults): H.R. 3976. A bill to amend title XVIII of the Social Security Act to provide for a direct Medicare supplemental insurance option; to the Committee on Energy and Commerce, and in addition to the Committee on Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. MENENDEZ: H.R. 3977. A bill to authorize the Secretary of the Interior to provide a grant to the State of New Jersey for the construction of a memorial to the New Jersey victims of the terrorist attacks of September 11, 2001; to the Committee on Resources.

By Mr. MENENDEZ: H.R. 3978. A bill to provide compensation and income tax relief for the individuals who were victims of the terrorist-related bomb- ing of the World Trade Center in 1993 on the same basis as compensation and income tax relief is provided to victims of the terrorist-related aircraft crashes on September 11, 2001, to the Committee on Ways and Means, and in addition to the Committee on Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. PITTS (for himself and Mr. KINK): H.R. 3979. A bill to provide for the extension of nondiscriminatory treatment (normal trade relations treatment) to the products of the Republic of Uzbekistan; to the Committee on Ways and Means.

By Mr. ROTHMAN (for himself, Mr. HASTINGS of Florida, Mr. TOWNS, Mr. SERRANO, Mr. BALDACCI, Mr. FROST, and Mr. RANGEL): H.R. 3980. A bill to provide for a circulating commemorative coin to commemorate the events of September 11, 2001; to the Committee on Financial Services.

By Mr. TOOMEY: H.R. 3981. A bill to amend the Congressional Budget Act of 1974 to protect Social Security beneficiaries against any reduction in benefits; to the Committee on Rules, and in addition to the Committee on the Budget, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. TRAFICANT: H.R. 3982. A bill to apply recently imposed tariffs on steel imports towards assistance for displaced steel workers and retirees; to the Committee on Education and the Workforce, and in addition to the Committees on Education and the Workforce, and Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.
By Mr. KERNJS:
H. Con. Res. 350. Concurrent resolution expressing the sense of Congress that amnesty should not be granted to individuals who are in the United States, or its territories, illegally; to the Committee on the Judiciary.

By Ms. MCCOLLUM:
H. Con. Res. 351. Concurrent resolution expressing the sense of Congress that the United States should condemn the practice of execution by stoning as a gross violation of human rights, and for other purposes; to the Committee on International Relations.

By Mr. POMOJO (for himself, Mr. STRYKER, Mrs. Davis of California, Mr. KILDKE, Mr. SCHAFFER, Mr. McINNISS, Mr. SIMPSON, and Mr. STUMP):
H. Res. 352. Concurrent resolution expressing the sense of Congress that Federal land management agencies should fully implement the Western Governors Association “Collaborative 10-year Strategy for Reducing Wildland Fire Risks to Communities and the Environment” to reduce the overabundance of forest fuels that place national resources at high risk of catastrophic wildfire, and prepare a National Prescribed Fire Strategy that minimizes risks of escape; to the Committee on Agriculture, and in addition to the Committee on Resources, for a period to be determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. BURTON of Indiana (for himself and Mr. RANGELE):
H. Res. 370. A resolution recognizing the Ellis Island Medal of Honor and commemorating the National Ethnic Coalition of Organizations; to the Committee on the Judiciary.

H.R. 3661: Mr. MOORE.
H.R. 3678: Mr. BARTLETT of Maryland.
H.R. 3693: Mr. MERRr, Mrs. Jones of Ohio, Mr. BERMAN, Mr. HONDA, Mr. UNDERWOOD, and Ms. LOPUREN.
H.R. 3708: Mr. DOOLITTLE, Mr. SCHAFFER, Mr. CALVERT, Mr. THORNBERRY, Mr. Herger, Mr. RADANOvICH, Mr. SIMPSON, Mr. LINDER, and Mr. STUMP.
H.R. 3706: Mr. DOOLITTLE, Mr. SCHAFFER, Mr. CALVERT, Mr. THORNBERRY, Mr. Herger, Mr. RADANOvICH, Mr. SIMPSON, and Mr. STUMP.
H.R. 3707: Mr. DOOLITTLE, Mr. SCHAFFER, Mr. CALVERT, Mr. THORNBERRY, Mr. Herger, Mr. RADANOvICH, and Mr. STUMP.
H.R. 3773: Ms. SLAUGHTER.
H.R. 3770: Mr. BRADY of Pennsylvania, Mr. BLUNT, Mr. FOLEY, and Mr. BEEzRRA.
H.R. 3771: Mr. UNDERWOOD, Ms. CUNNINGHAM, and Ms. MCKINNEY.
H.R. 3784: Mr. Wilson of South Carolina, Mr. LaFalce of California, Mr. Osborn, Mr. BURN of North Carolina, Mr. Watts of Oklahoma, Mr. Simmons, Mr. GibBONs, Mr. BERMAN, Mr. SOUDBIr, Mr. DUNCAN, Ms. McCARTHY of Missouri, Mr. FILMER, Mr. BrayDy of Pennsylvania, Mr. BALDACCI, Mr. STICKLAND, Mr. SCHIFF, and Mr. GORDON.
H.R. 3794: Mrs. KELLY, Ms. Norton, Mr. ENGEL, Mr. NADLER, Ms. MCKINNEY, and Mr. ROTHMAN.
H.R. 3805: Mr. CANTOR.
H.R. 3842: Mr. McIntyre and Mr. PALLONE.
H.R. 3857: Mr. HOCURITY and Mr. Watkins.
H.J. Res. 40: Mr. Hall of Ohio and Mr. KLECIa.
H. Con. Res. 315: Mr. JEFF MILLER of Florida.

DISCHARGE PETITIONS

Under clause 2 of rule XV, the following discharge petition was filed:

The following Members added their names to the following discharge petitions:

Petition 4. By Mr. RANDY “DUKE” CUNNINGHAM, on House Resolution 271: "Ed
AMENDMENTS

Under clause 8 of rule XVIII, proposed amendments were submitted as follows:

H.R. 2146
OFFERED BY: MR. CONYERS
AMENDMENT No. 1: Page 4, after line 7, insert the following:
SEC. 3. STUDY OF IMPACT OF LEGISLATION.
(a) In each case in which a life sentence is imposed under section 3559(e), the judge shall make and transmit to the Administrative Office of the United States Courts findings with regard to each of the following:
(1) The applicable range under the Federal Sentencing Guidelines if the statutory minimum life sentence had not applied.
(2) The sentence that the court would have imposed on the defendant if the statutory minimum life sentence had not applied.
(3) The race, gender, age, and ethnicity of the victim and defendant.
(4) The reason for the Government’s decision to prosecute this defendant in Federal court instead of deferring to prosecution in State or tribal court, and the criteria used by the Government to make that decision in this and other cases.
(b) The projected cost to the Federal Government of the life sentence, taking into account capital and operating costs associated with imprisonment.
(c) To assist the court to make the findings required in subsections (a)(4) and (a)(5), the Government attorney shall state on the record such information as the court deems necessary to make such findings, including cost data provided by the Bureau of Prisons. In making the required findings, the court shall not be bound by the information provided by the Government attorney.
(c) The Administrative Office of the United States Courts shall annually compile and report the findings made under subsection (a) to the Congress.
Redesignate succeeding sections accordingly.

H.R. 2146
OFFERED BY: MS. JACKSON-LEE OF TEXAS
AMENDMENT No. 2: Add at the end the following new section:
SEC. . PROHIBITION OF FEDERAL EXPENDITURES.
No federal funds shall be expended for this Act if there are more than five convicted sex offenders within any given ZIP code.

H.R. 2146
OFFERED BY: MR. SCOTT
AMENDMENT No. 3: Page 2, beginning in line 22, strike “2243(a)” (relating to sexual abuse of a minor”.
Page 4, after line 7 insert the following:
SEC. 3. LIFE IMPRISONMENT MAXIMUM FOR CERTAIN REPEAT SEX OFFENDERS AGAINST CHILDREN.
Section 2243(a) of title 18, United States Code, is amended by striking the final period and inserting “, but if the defendant has a prior sex conviction (as defined in section 3559(e)) in which a minor was a victim, the court may sentence that defendant to imprisonment for any term or years or for life.”.
Redesignate succeeding sections accordingly.

H.R. 2146
OFFERED BY: MR. SCOTT
AMENDMENT No. 4: Page 4, after line 11, insert the following:
SEC. 4. SPECIAL PROVISION FOR INDIAN COUNTRY.
Section 3559(c)(6) of title 18, United States Code, is amended by inserting “or subsection (e)” after “this subsection” each place it occurs.
The Senate met at 9:30 a.m. and was called to order by the Honorable Debbie Stabenow, a Senator from the State of Michigan.

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Bless the Lord, O my soul; and all that is within me, bless His holy name! Bless the Lord, O my soul, and forget not all His benefits.—Psalm 103:1.

Let us pray:

Gracious Father, source of all the blessings of life, You have made us rich spiritually. We realize that You have placed in our spiritual bank account abundant deposits for the work of this day. You assure us of Your everlasting, loving kindness. You give us the gift of faith to trust You for exactly what we will need each hour of this busy day ahead. You promise to go before us, preparing people and circumstances so we can accomplish our work without stress or strain. You guide us when we ask You to help us. You give us gifts of wisdom, discernment, knowledge of Your will, prophetic speech, and hopeful vision. Help us to draw on the constantly replenished spiritual reserves You provide. Bless the Senators this day with great trust in You, great blessings from You, and great effectiveness for You. You are our Lord and Saviour. Amen.

PLEDGE OF ALLEGIANCE
The Honorable Debbie Stabenow led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE
The Presiding Officer. The clerk will please read a communication to the Senate from the President pro tempore (Mr. Byrd).

The assistant legislative clerk read the following letter:

U.S. SENATE, 
PRESIDENT PRO TEMPORE, 

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable Debbie Stabenow, a Senator from the State of Michigan, to perform the duties of the Chair.

Robert C. Byrd, 
President pro tempore.

Ms. Stabenow thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER
The Acting President pro tempore. The acting majority leader is recognized.

SCHEDULE
Mr. Reid. Madam President, this morning the Senate will resume consideration of the energy reform bill. The first amendment will be offered by the Senator from Wyoming, Mr. Thomas. It is believed that will take several hours this morning. We hope and intend to have a vote before 12:30 today on that amendment one way or the other.

After we complete work on the Thomas amendment, it has been contemplated by the two managers that we will go to a series of amendments dealing with sustainability. We know Senator Jeffords is going to offer an amendment; we know Senator Byrd is going to be offering an amendment. We want to complete that this afternoon as soon as we can.

There are a number of other issues. Certainly one of the issues we need to dispose of—we have spoken to Senator Murkowski in this regard—is whatever he intends to do regarding drilling in the ANWR wilderness. He will make a decision as to whether he is going to do that late this afternoon or tomorrow—or Monday, whatever he decides.

MEASURE PLACED ON THE CALENDAR—H.R. 2175
Mr. Reid. Madam President, I understand H.R. 2175 is at the desk and due for its second reading.

The Acting President pro tempore. The Senator is correct.

Mr. Reid. I ask that H.R. 2175 be read a second time, but I also object to any further proceedings.

The Acting President pro tempore. The clerk will read the bill by title for the second time.

The legislative clerk read as follows:

A bill (H.R. 2175) to protect infants who are born alive.

The Acting President pro tempore. Objection having been heard, the bill will be placed on the calendar.

RESERVATION OF LEADER TIME
The Acting President pro tempore. Under the previous order, the leadership time is reserved.

NATIONAL LABORATORIES PARTNERSHIP IMPROVEMENT ACT OF 2001
The Acting President pro tempore. Under the previous order, the Senate will now resume consideration of S. 517, which the clerk will report.

The legislative clerk read as follows:

A bill (S. 517) to authorize funding for the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes.

Pending:

Daschle/Bingaman further modified amendment No. 2917, in the nature of a substitute.

Feinstein amendment No. 2899 (to amendment No. 2917) to provide for increased average fuel economy standards for passenger automobiles and light trucks.
Kerry/McCain amendment No. 2999 (To amendment No. 2917) to provide for increased average fuel economy standards for passenger automobiles and light trucks.

The ACTING PRESIDENT pro tempore, Mr. THOMAS, is recognized to offer an amendment.

AMENDMENT NO. 3012 TO AMENDMENT NO. 2917
Mr. THOMAS. Madam President, I send to the desk an amendment.

The ACTING PRESIDENT pro tempore, Mr. THOMAS, is recognized to offer an amendment.

Mr. THOMAS. I ask unanimous consent that the reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 21, strike line 16 and all that follows through page 23, line 24 and insert the following:

"(c) CERTIFICATION.—(1) An electric reliability organization shall file a proposed reliability standard or modification to a reliability standard with the Commission.

(2) The Commission may approve a proposed reliability standard or modification to a reliability standard if it determines that the standard is just, reasonable, not unduly discriminatory or preferential, and in the public interest. The Commission shall give due weight to the technical expertise of the electric reliability organization with respect to the content of a proposed standard or modification to a reliability standard, but shall not defer with respect to its effect on competition.

(3) The electric reliability organization and the Commission shall rebuttably presume that a proposal from a regional entity, an entity the Commission finds, after notice and opportunity for comment, that the change is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. The Commission shall consider comments of the electric reliability organization or the Commission, including comments of the public, the Commission shall consider comments of the electric reliability organization and the Commission, including comments of the public,

The legislative clerk read as follows:

The AMENDING PRESIDENT pro tempore, Mr. THOMAS, is recognized to offer an amendment.

Mr. THOMAS. I ask unanimous consent that the reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 21, strike line 18 and all that follows through page 23, line 24 and insert the following:

"(c) CERTIFICATION.—(1) An electric reliability organization shall file a proposed reliability standard or modification to a reliability standard with the Commission.

(2) The Commission may approve a proposed reliability standard or modification to a reliability standard if it determines that the standard is just, reasonable, not unduly discriminatory or preferential, and in the public interest. The Commission shall give due weight to the technical expertise of the electric reliability organization with respect to the content of a proposed standard or modification to a reliability standard, but shall not defer with respect to its effect on competition.

(3) The electric reliability organization and the Commission shall rebuttably presume that a proposal from a regional entity, an entity the Commission finds, after notice and opportunity for comment, that the change is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. The Commission shall consider comments of the electric reliability organization or the Commission, including comments of the public,

The legislative clerk read as follows:

The AMENDING PRESIDENT pro tempore, Mr. THOMAS, is recognized to offer an amendment.

Mr. THOMAS. I ask unanimous consent that the reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 21, strike line 16 and all that follows through page 23, line 24 and insert the following:

"(c) CERTIFICATION.—(1) An electric reliability organization shall file a proposed reliability standard or modification to a reliability standard with the Commission.

(2) The Commission may approve a proposed reliability standard or modification to a reliability standard if it determines that the standard is just, reasonable, not unduly discriminatory or preferential, and in the public interest. The Commission shall give due weight to the technical expertise of the electric reliability organization with respect to the content of a proposed standard or modification to a reliability standard, but shall not defer with respect to its effect on competition.

(3) The electric reliability organization and the Commission shall rebuttably presume that a proposal from a regional entity, an entity the Commission finds, after notice and opportunity for comment, that the change is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. The Commission shall consider comments of the electric reliability organization or the Commission, including comments of the public,

The legislative clerk read as follows:

The AMENDING PRESIDENT pro tempore, Mr. THOMAS, is recognized to offer an amendment.

Mr. THOMAS. I ask unanimous consent that the reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 21, strike line 16 and all that follows through page 23, line 24 and insert the following:

"(c) CERTIFICATION.—(1) An electric reliability organization shall file a proposed reliability standard or modification to a reliability standard with the Commission.

(2) The Commission may approve a proposed reliability standard or modification to a reliability standard if it determines that the standard is just, reasonable, not unduly discriminatory or preferential, and in the public interest. The Commission shall give due weight to the technical expertise of the electric reliability organization with respect to the content of a proposed standard or modification to a reliability standard, but shall not defer with respect to its effect on competition.

(3) The electric reliability organization and the Commission shall rebuttably presume that a proposal from a regional entity, an entity the Commission finds, after notice and opportunity for comment, that the change is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. The Commission shall consider comments of the electric reliability organization or the Commission, including comments of the public,

The legislative clerk read as follows:

The AMENDING PRESIDENT pro tempore, Mr. THOMAS, is recognized to offer an amendment.

Mr. THOMAS. I ask unanimous consent that the reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 21, strike line 16 and all that follows through page 23, line 24 and insert the following:

"(c) CERTIFICATION.—(1) An electric reliability organization shall file a proposed reliability standard or modification to a reliability standard with the Commission.

(2) The Commission may approve a proposed reliability standard or modification to a reliability standard if it determines that the standard is just, reasonable, not unduly discriminatory or preferential, and in the public interest. The Commission shall give due weight to the technical expertise of the electric reliability organization with respect to the content of a proposed standard or modification to a reliability standard, but shall not defer with respect to its effect on competition.

(3) The electric reliability organization and the Commission shall rebuttably presume that a proposal from a regional entity, an entity the Commission finds, after notice and opportunity for comment, that the change is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. The Commission shall consider comments of the electric reliability organization or the Commission, including comments of the public,
of course, we have merchant generators. And more and more of that will go, where they sell it outside of their distribution area or, indeed, have no distribution area at all.

New system structures are also being created by the divestiture of vertically integrated utilities and by the emergence of new market structures and participants. Cooperation is being replaced with competition.

The result of these changes has been an increase in the number and severity of violations of NERC’s voluntary reliability rules.

On occasion, we have even seen utilities take power from the grid in direct violation of NERC’s rules, and they suffer no penalty.

We all agree we need to protect reliability. The question is not whether we can protect it. The question is, How do we protect it? That is, of course, what this issue is all about.

First, the voluntary reliability provisions in the Daschle bill take the wrong approach. The Daschle bill gives FERC the exclusive responsibility for establishing and enforcing reliability standards. This is very technical work that will require a very large commitment of resources.

Unfortunately, FERC does not have either the technical capability or the manpower to take on such a significant new responsibility. FERC’s expertise is ratemaking, not in technical standard setting.

Another key problem with the Daschle bill is that it does not recognize regional differences in electrical systems due to the geography, the market design, the economics, and the operational factors. Many fear that FERC does not have the sensitivity to the regional differences that are so critically important, and I suppose you could say particularly in the West, in that the West has moved a little more quickly to do this, but the rest of the country will be moving necessarily soon.

Regional differences are best taken into account by those who are closest to the problem and those who understand what needs to be done, and that, unfortunately, is not FERC.

In addition, the Daschle bill simply does not address adequately the needs of the States for a meaningful role in the process of setting and enforcing regional standards. Of course, it is an issue in lots of things, but it has always been an issue in this electric re-regulation business; that is, that the States outside of a State ought to have a great deal of involvement. And particularly when we end up, as inevitably we will, with RTOs and different kinds of distribution systems coming off a main national distribution transmission channel, then the States and the regions need to have that ability to help it.

Under the Daschle bill, the States, as any other interested or affected party, can make their views known to FERC as part of any formal rulemaking, but
FERC can disregard those State views, substituting FERC’s judgment for that of the States.

So I ask, who is more interested in ensuring reliability than those who would be directly affected? Why would you believe FERC has a better idea of what those who are directly affected? I feel very strongly about that, as I think most of us do.

Far too often we have seen that FERC is more interested in abstract notions of competition instead of concrete issues of price and supply, which is what is really important in this reliability aspect to consumers.

The Daschle bill also fails to account for the international nature of our transmission grid. Canada is already part of a seamless North American grid, and Mexico is also an interconnect.

If reliability is given to FERC, as in the Daschle bill, FERC will be trying to set standards applicable to and affecting transmission in Canada and Mexico, over which FERC has no authority. I fear Canada and Mexico simply will not allow their systems to be regulated directly or indirectly by FERC. After all, of course, they are sovereign nations.

If these two nations withdraw from collaborative efforts, not only will it jeopardize the reliability of the entire North American grid, it will certainly also seriously impair cross-border trade in electricity.

Continued international trade is critical to our supply of power. As we have seen in California, even a minor shortfall of electricity can create significant problems in terms of price spikes and blackouts. In short, we need to have that Canadian component. And they are a voluntary part of this system.

This amendment addresses all of those concerns. In a nutshell, the amendment converts the existing NERC voluntary reliability system into a mandatory reliability system.

The new reliability organization will have enforcement powers, with real teeth to ensure reliability. The amendment provides that mandatory reliability rules will apply to all users of the transmission grid. There are no loopholes. No one will be exempt.

It will be participant-run but subject to oversight by FERC in the United States and with the appropriate regulatory authorities in Canada and Mexico.

It will utilize industry’s technical expertise to create reliability rules, and everyone will be able to participate. It assures a meaningful role for the States and regional organizations in the development and enforcement of the reliability standards.

There can be appropriate regional variations that recognize that the East is different from the West. It will allow the participation of Canada and Mexico without violating national sovereignty.

The amendment has the backing of the North American Electric Reliability Council; the National Association of Regulatory Utility Commissioners, which represent State public utility commissions, the Western Governors’ Association, and the administration.

The need for such a reliability system has been cited in the President’s national energy policy. It is one thing that Congress really should do as part of any energy bill. We have the opportunity now to do that.

Both the Daschle bill and the amendment speak to reliability of the transmission system. If you want more Federal command and control by FERC, and if you do not mind jeopardizing cross-border electric trade with all segments of the industry, consumers and federal and state regulators. Your amendment would put in place a reliability management system that builds upon this proven reliability methodology, but upgrades it to provide for mandatory and enforceable reliability standards. The Federal Energy Regulatory Commission, FERC, will provide oversight and coordinate with all State and Federal entities, but unlike the existing language in S. 517, your amendment would not have FERC directly promulgating and enforcing reliability rules.

That is from this national group that, by the way, is located in New Jersey.

This one is from APPA’s over 2,000 State and locally-owned not-for-profit electric utilities:

[This] amendment would ensure that a broad-based industry self-regulating reliability organization would be vested with the authority to set and enforce reliability standards. This type of organization—the North American Electric Reliability Council—already exists, but legislation is required to give NERC the ability to enforce the standards that industry agrees should be promulgated.

In contrast, (the Daschle bill) would allow the Federal Energy Regulatory Commission to confer enforcement authority to a wide range of organizations—with potential for varied and inconsistent results.

We also have a letter from the Canadian Embassy and from the Western Governors’ Association.

I think there is a real opportunity, obviously, to deal with reliability. Our choices are whether we want to use the approach that has been proven or whether we want to shift it to another agency of the Federal Government to make all the decisions at the top level rather than including everyone in it.

Madam President, I yield the floor.

Mr. BINGAMAN. Madam President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BINGAMAN. Madam President, I am an unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BINGAMAN. Madam President, I rise to discuss the issue before the Senate and explain my position on it and hope that Senators can give their attention, those in their offices, and their staffs. This is a complex issue we are debating, the issue of reliability and how we deal with it.

The underlying energy bill contains provisions that are intended to create a system to ensure that the grid for delivery of electricity is reliable. This is a hearing in front of the Energy Committee. He could say: You haven’t given us that job. You, the Congress, have not given us, the Federal Energy Regulatory Commission, the job of keeping this system reliable. That belongs to NERC, which is the North American Electric Reliability Council. They are the ones responsible.

Everybody, the industry included, realizes that is not adequate for today’s demands. We need to have some governmental accountability in addition to the expertise that NERC and other organizations can bring to the system.

The reliability system needs to apply to all users. The rules need to be enforceable. I think there is a need to penalties if we do not comply with the rules. Someone has to be able to slap your wrist and say: Get in line and do what everyone has agreed to.

Nobody disagrees with the conclusion that FERC should have oversight of the system that contains these requirements. There are differences, however, about how these principles should be implemented.

I believe the provisions in the bill before us, S. 517, take the simplest approach possible. That is what we have tried to do. We give FERC the responsibility. We provide tremendous flexibility for FERC to defer to experts, to
The reliability structure, in my view, needs to be simple and dependable. We should require that FERC implement a system, give them guidelines and flexibility to confer with experts, flexibility to defer to regional bodies. That is what we do in the underlying bill. We should not have to spend too much time trying to work with FERC and not unduly discriminatory.

Let me take this down and just go through more of a detailed explanation of what I understand this proposal to be. This amendment that the Senator from Wyoming is offering would add a new section, No. 215, to the Federal Power Act.

Just a second here. Let me jump ahead. The provision the Senator from Wyoming is proposing contains a provision that is as a result of an attempt by FERC to reach a consensus among industry participants about what needs to be done about reliability. This process has been going on many years now.

About 4 years ago, they came up with a 30-page document purporting to represent the agreement of a broad range of industry participants. The proposal was renegotiated several times over the course of the last few years with key constituencies dropping out of that consensus as they went forward.

The most recent iteration—the one we are considering here—was a result of discussions last fall. At the conclusion of those discussions, very few of the original consentees—if that is a good word—remained on board. The Electric Power Supply Association and the Association of Marketers and Independent Power Producers oppose this new version—the version now being offered as an amendment. The Electric Institute—which is, of course, central in such issues related to electricity—was unable to endorse the proposal because their members opposed it from a regional entity organized on an interconnected-wide basis. One place: California, in the West. The rest of the country doesn’t benefit from that so-called rebuttable presumption.

As far as the Thomas amendment would reorganize that to a regional entity organized on an interconnected-wide basis, both is a rebuttable presumption, a rebuttable presumption that any proposal for a standard or modification comes from a regional entity organized on an interconnected-wide basis is just and reasonable and not unduly discriminatory.

Let me go to the map again. As to the provision that any proposal for a standard or modification that comes from a regional entity organized on an interconnected-wide basis is just and reasonable and not unduly discriminatory. Remember that they have a rebuttable presumption that any proposal for a standard or modification that comes from a regional entity organized on an interconnected-wide basis is just and reasonable and not unduly discriminatory.

The Western Governors’ Association has proposed language and that is what we have before us.

Let me try to summarize their proposal. Their proposal gives the Commission jurisdiction within the U.S. over an electric reliability organization and any regional entities and all users, owners, and operators for the bulk power system for the purpose of improving reliability and enforcing reliability standards. The electric reliability organization would file the proposed standards or modification with FERC. This is under the amendment of the Senator from Wyoming. Instead of FERC issuing them, the electric reliability organization would file the proposed standards of modification with FERC. FERC may approve them if it determines that the standards are just, reasonable, and not unduly discriminatory or preferential and in the public interest.

The electric reliability organization and FERC must rebuttably presume—and that is in the statute—that any proposal for a standard or a modification that comes from a regional entity that is organized on an interconnected-wide basis is just and reasonable and not unduly discriminatory.

All of this is in the amendment the Senator from Wyoming is proposing. This goes on and on. It is easy to summarize this by putting up a chart or two and try to explain to the Senate how this would work, as I understand it. Let me start with “Standard Proposals.” It really should have been entitled “How Do You Propose a Reliability Standard?” What is the process for proposing a reliability standard? FERC has a responsibility and jurisdiction to establish an electric reliability organization. That is what they do here. So the ERO, electric reliability organization, under the Senator’s amendment, would be established.

Now, the ERO can delegate its authority to a regional entity for standard proposals and enforcement. That is this box over here. The Senate, delegation the electric reliability organization under the Senator’s amendment, would be established in the map. Remember that the regional entity is organized on an interconnected-wide basis. Then that is when the rebuttable presumption
comes in. So if you are in the western part of the country, then there is the rebuttable presumption that comes in that the regional entity should be approved. There is only one region in the country where this interconnection-wise deference is applicable, and that is the West. The rest of the country doesn’t benefit.

There are three interconnections: The 14 Western States that are in the Western Electric Coordinating Council; ERCOT, Electric Reliability Council of Texas; and then there is the rest of the country. Currently, there are eight regional reliability councils besides these two—the one in the West and the one in Texas. They are all in the eastern interconnection. It is a near certainty that these eight entities will not be able to organize into an interconnection-wide regional body so that the rest of the country does not receive, under this amendment, the same deference as the West would receive.

As there will be different structures for reliability compliance and enforcement in different parts of the country.

Perhaps the most disturbing detail of the proposal is that any entity that is organized on an interconnection-wide basis must be assumed to be functional just because it is organized on an interconnection-wide basis. We are saying if you are organized on an interconnection-wide basis, shown in pink on this map of the country, then you have the presumption that you are a functional organization. In the rest of the country, a regional entity must prove it is adequate, instead of requiring the entity to prove it is adequate. Reliability, in my view, is more important than that, and we need to require that all parts of the structure in all parts of the country demonstrate competence to shoulder this heavy responsibility.

The Commission and the national reliability organization on which we will be depending to keep the lights on, to keep the electricity operating, must prove their interconnection-wide basis is just and reasonable and not unduly discriminatory or preferential. We have these rebuttable presumptions to which everyone is obligated to defer.

The consequence of this rebuttable presumption/remand circle is that a regional entity that wanted to prevent a change in a standard could tie up the decision for virtually forever. The important rule that governs reliability of the transmission system could circle through this system pretty much indefinitely, with nobody ever able to come to a final decision.

Let me change charts and put up a different chart. This one is called FERC Proposed Modification.

Let me go through this chart as best I can. If the electric reliability organization, the ERCO, that has been set up by FERC, wants to propose a standard, it needs to file it with FERC.

The Commission has the choice: It can approve the standard or, if it does not find it is just and reasonable and not unduly discriminatory or preferential, it can remand the proposal back to the electric reliability organization for revisions: It can approve it or remand it.

If the electric reliability organization has delegated its authority to a regional entity, the proposal will then be remanded to the regional entity instead of FERC. If the regional entity does not accept the proposal, it may re-submit it to the electric reliability organization, and the electric reliability organization then resubmits it to FERC.

Remember, there is a rebuttable presumption for both the electric reliability organization and for FERC. If any proposal from a regional entity that is organized on an interconnected-wide basis is just and reasonable and not unduly discriminatory or preferential. We have these rebuttable presumptions to which everyone is obligated to defer.

The consequence of this rebuttable presumption/remand circle is that a regional entity that wanted to prevent a change in a standard could tie up the decision for virtually forever. The important rule that governs reliability of the transmission system could circle through this system pretty much indefinitely, with nobody ever able to come to a final decision.

These are not the kinds of decisions that should be allowed to bog down in this maze.

Let me change charts and put up a different chart. This one is called FERC Proposed Modification. Again, I am trying to describe the amendment as I understand it, and if I am wrong about how this amendment works, then I invite my colleagues who are proposing the amendment to explain why I am wrong.

This is called FERC Proposed Modification. If FERC believes it needs to propose a change, it can order the electric reliability organization to submit a proposal. We have an order going from FERC to the electric reliability organization. Then the electric reliability organization submits the modification to FERC and the circle starts again. There are rebuttal presumptions in here. There are remands going around in this chart as well. Neither the electric reliability organization nor FERC is empowered under this amendment, as I read it, to bring this to a conclusion.

Let me go through one other chart. This is a chart on how complaints are to be handled under the system that is being proposed in this amendment.

If the electric reliability organization receives a complaint that someone has failed to comply with a rule—and that is obviously what this whole system is intended to deal with—it may, after notice of hearing—that is shown on the chart as: Does the electric reliability organization want to act? The complaint is filed. If they want to act, they have a hearing, and propose a penalty.

If they do not have authority under this amendment—and I underline this—they do not have authority to issue a compliance order. They cannot say: Do this. All they can do is penalize for failing to comply, and they can impose a penalty. The penalty is then submitted to FERC, which reviews it and may modify, affirm, or set aside the electric reliability organization’s action.

That is, they have that authority unless the electric reliability organization has already delegated its authority to a regional entity. If there is a regional entity that is using reliability authority, then they first have dibs at dealing with this issue.

If the regional entity disagrees with the electric reliability organization, it may not have the authority to file an enforcement action with FERC. But that action needs to be filed by the regional entity, so that the electric reliability organization is essentially displaced from its authority and the authority then has to be exercised by the regional entity. That is, the rebuttable presumptions to which everyone is obligated to defer.

The Commission, and the national reliability organization, and the electric reliability organization get their action from FERC. If FERC believes it needs to propose a penalty, the electric reliability organization then files with FERC—exactly what happens in that circumstance is not very clear.

This may be confusing. To me it is confusing. I have heard other bills over the course of the time in the Senate referred to as the lawyer’s full employment act of 19 whatever. This is the Lawyer’s Full Employment Act of 2002, particularly the Utility Lawyer’s Full Employment Act of 2002.

I hope that if a participant in a market is acting in some manner that is not in compliance with reliability rules, some action can be taken to change that behavior quickly. That is in everyone’s interest. That is what we were trying to do when we proposed language to essentially say, OK, FERC, you are responsible for being sure the reliability is guaranteed in the system. With this structure that is proposed in that amendment, that has come to the ERO, to this electric reliability organization. They have to have time for notice. They have to have a hearing. They, then, can impose a penalty. They cannot issue a compliance order. Then their proposal needs to be filed with FERC for further review and further action.

So the real question is, Will the lights still be on? Will the electricity still be flowing? How long does this take? Is there a complaint that can be issued to stop the action that is threatening the reliability of the system? Is it going to take weeks? Is it going to take months? Is it going to take years? This amendment requires FERC to establish regional advisory councils on the petition of at least two-thirds of the States in the region. This is a good idea. This is a part of the amendment. I think it is a good idea. I am not sure as much process needs to be specified as the amendment does, but the general idea and concept of support. If this were the amendment being offered, we would gladly accept that amendment.
I think, though, the amendment that is offered and the way it is worded gives most States less deference than the language in our bill does. Our bill would allow FERC to defer to NERC, to defer to a regional council, to a similar organization, or a State regulatory authority. In other words, if States create a regional advisory council, FERC clearly can defer to that under the legislation that we proposed.

The language we have before us in this amendment would allow FERC to defer only to a regional advisory body if it is organized on an interconnection-wide basis.

So, again, we have this map. I will put the map up again to reiterate the point.

This amendment was put together by the Western Governors’ Association. I understand that. That is the part of the country in which I live. I know that is the part of the country in which my colleagues who are proposing the amendment live. But in each case, the preference under the amendment goes to this part of the country. The deference goes to another part of the country.

I do not really think that is the right way to make national policy. I think we ought to have a uniform national policy. The whole idea is to set up a system that will work everywhere.

I will summarize my objections. I know my colleague from Oregon is anxious to speak in favor of the amendment. I will summarize some of my other views, and then I will defer to him.

In general, the proposal of the Western Governors’ Association specifies matters that I believe are better left to experts to sort out. The proposal we have in the bill would allow FERC to approve a reliability organization that fits this description to defer to regional entities or to the electric reliability organization, but it does not require it. Our language does not contain all of these rebuttable presumptions.

When I first read through this, I thought to myself: Why in the world are we putting in all these rebuttable presumptions? A rebuttable presumption is essentially a burden of proof, a standard of proof, that is put in in order to be in a position that later on someone can review that, when it is appealed, to see whether the standard was met, whether or not the burden of proof is on us.

I shudder to think of the number of appeals that will be taken from decisions by one or another of these entities on the basis that the presumption, which we are being asked to write into law, or to a State regulatory authority, is not really known why we see it in our interest, why it would be in the national interest, for us to write into law all sorts of rebuttable presumptions which then complicate the situation and invite appeal from whatever decision is made.

I have some real interest in seeing some finality brought to these decisions if we are going to have a reliable system.

I think the requirement that FERC only be able to remand standards that it finds not to be just and reasonable eliminates flexibility that FERC may well need to have. This interconnection-wide presumption essentially says, if one happens to be in this pink area of the country, they get the interconnection-wide area, and therefore all these rebuttable presumptions apply. And what they say gets particular deference.

I do not, quite frankly, understand, and we are still trying to educate people on this amendment, but I cannot understand why Governors of these other States—there are a lot of States that are not in this pink area. I do not know why Governors in these other States and commissioners in these other States would support this proposal. It gives them far fewer rights than the Governors and the commissioners in the West have. So I have some concerns about it.

I will mention one other concern, and then I will defer to my colleague, who is anxious to speak. As chairman of the Energy Committee, we have had several hearings so far this last year where we bring in the FERC Commissioners and we basically try to cross-examine them and ask them why they have not done this and why they have not done that and why they are not living up to their responsibilities in this regard. We had a bunch of those hearings when the lights were going out in California.

If we pass this amendment, my firm belief is next time the lights go out somewhere, and we bring those Commissioners before the committee and say, now, why were you not carrying out your responsibility, they have a ready answer. Their answer will be: We were carrying out our responsibility. You told us our responsibility was to presume these folks knew what they were doing. We were doing it, and now it turns out they did not know what they were doing. So do not criticize us. You are putting the responsibility somewhere else. You told us there is a rebuttable presumption that they know exactly what they are doing and they can handle all of this.

So we were trying to get out of that. We were trying to say: Look, let us fix responsibility in the hands of a group that we trust, that we confirm and then encourage them to delegate that as they say fit, but not give them the out of saying they are not responsible; that it was someone else’s job and it was not theirs.

I very much fear this amendment, if adopted, will give them a very convenient out. We will then be having long, complicated hearings going through charts about whose rebuttable presumption was met and whose rebuttable presumption was rebutted, and that is not good for the country. It is not going to keep the electricity going. It is not going to keep the lights on.

For those reasons, I urge that my colleagues oppose the amendment and keep the bill as it is, which is much simpler, which is much more straightforward and which does not get into all kinds of complexities which will be contrary to our national interest.

The PRESIDING OFFICER (Mr. Edwards). The Senator from Oregon.

Mr. Smith of Oregon. Mr. President, I thank our chairman for his statement, which, though, in opposition to his view, and I support the view of the Senator of Wyoming and his amendment. I happen to be a cosponsor of it.

I think for people looking in, the C-SPAN junkies like ourselves, may wonder what all the charts and all the maps and all the rhetoric might boil down to. In my view, it really boils down to this: Should all power over power be vested within the beltway or should we trust regional organizations that know their areas, that know their systems, to manage these systems?

That, in my view, is what this debate is all about.

It is very important. There are great implications for how we really transmit energy and keep the lights on in the regions of this country.

This amendment would ensure that a self-regulating organization would be given the authority to establish and enforce reliability standards. This amendment is supported by the Western Governors Association, the American Public Power Association, and most of the transmitting utilities of the West.

For those in the West who lived through the blackout of August 19, 1996, the need for an enforcement mechanism for transmission reliability standards is clear. That blackout, which literally stretched from Texas to Portland to Los Angeles, was the result of a series of seemingly independent events that sent the western transmission system cascading into a blackout.

The ensuing blackout covered parts of seven Western States and caused severe economic disruption on the west coast. The event caused the Western Systems Coordinating Council to reevaluate its notification procedures. Such an event has not been repeated since.

The only thing that really transmission reliability organizations lack is the enforcement mechanism. That is what we provide in this amendment.

To date, we have relied upon voluntary compliance by transmitting utilities to keep the lights on. While such voluntary compliance has been largely successful, there are growing concerns that such voluntary means may not work in a deregulated wholesale electricity market. Frankly, if we are going to move away from a voluntary system, I would much rather give the enforcement authority envisioned under this amendment to regional organizations that are well respected and know the intricacies of the systems which they regulate.
Canada's position is that a self-regulating reliability organization, with members representing both countries, would be best placed to develop, implement and enforce consistent reliability standards for the interconnected North American electricity grid, while respecting the jurisdiction of sovereign regulatory bodies. I understand that a similar position is supported by the Western Governors Association and by major electricity associations.

The approach in S. 517 will not provide for the effective management of reliability standards for the interconnected North American electricity grid, while respecting the jurisdiction of sovereign regulatory bodies. I urge you to give strong consideration to our shared interest in an interconnected North American market and to our mutually beneficial electricity trade.

Yours sincerely,

Michael Kergin,
Ambassador

Mr. SMITH of Oregon. I note a few of the words in particular. He expressed to Senator Daschle a concern that this legislation would have a negative impact on Canadian-U.S. electricity trade.

I can say in the California debacle last year, but for Canadian power, it would have been far worse than it ended up being. Anything we are doing that could undermine what we have with Canada on energy would be a step back, not a step forward. That is why the Canadian Government has notified the Senate leadership that the amendment offered by the Senator from Wyoming is the right thing to do. The underlying proposal is the wrong thing to do in terms of our relationship with Canada.

I urge support for the Thomas amendment. It is the amendment we passed in the Senate in the 106th Congress. We ought to pass it again in the 107th Congress as part of this important energy regulation.

I yield the floor.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. Thomas. I thank the Senator from Oregon for his insight. I cannot think, frankly, of anyone in the whole country who has had more experience in this than people on the west coast connected to the California project. I appreciate very much the Senator's thoughts.

This bill has come to the Senate without the committee being involved. This very bill was passed by the committee last year with no objection from the Senator from New Mexico. This went through the committee, although what is before the Senate now was never talked about in the committee. That is a procedural question we have discussed quite a bit.

Now I will discuss some of the objections. There are two points of view, very clearly. The Senator from Oregon said it very well: To whom are you going to look?

I have been involved in this business in the past. The people in the business, the people who are responsible in your State, the people who have joined together in a region, have a much better view than bringing it back to the belt-way for these decisions. That is the bottom line.

It is a complicated business. However, in the current underlying bill, practically anyone can go to FERC. It is not uncomplicated there. The bill we are discussing gives FERC responsibility to defer to other organizations. FERC need not defer to anyone on anything if they choose not to. It is a given sweeping new authority to preempt the judgments of existing State and national organizations. Part of the availability for transmission systems to supply the demand. That is where we are with the amendment.

The amendment builds on an existing system. If you go to FERC, there is nothing to build on. Here, there is. Go to FERC: There are no people who have the expertise to do these things. In the existing system, there are.

It does not require a new bureaucracy. We have come about under the existing bill. Bulk power system reliability will continue to be managed outside of FERC's hearing rooms unless a problem arises. Then, of course, we can invoke FERC's intervention. That is the way it would be, to start at the grassroots, do the decision-making there, and still have the opportunity to go to FERC through the network. That is not strange and unusual. That is why we have States. That is why we have local government.

The amendment in the existing bill, under the Daschle bill, requires FERC to create a reliability structure. Ours does not. FERC need only approve reliability organizations if the requirements specified. S. 517 requires FERC to create a new reliability bureaucracy to take over the function that FERC now does not have the expertise to perform—where, indeed, we have local government.

Cumbersome? We talked about it being cumbersome. Nothing in the amendment makes it cumbersome. FERC can entertain a complaint at any time, move as quickly as it deems warranted. I do not think you can ask for much more than that.

We talked about only one part of this country when this was created. The interconnected-wide entity exists in Texas. Whether an eastern-wide entity is created is up to the East. It has been done in the West because there are unique problems there. These problems can be solved better by an interconnected and will be done throughout the rest of the country as well. This is what we are seeking to do.

The complaint here is the structure is so complicated as to render it unworkable. Actually, the structure reflects the way the reliability has been managed by the American bulk power system—rather successfully, as a matter of fact—and the legislation is needed to ensure that reliability experts who are not at FERC can take the actions necessary to protect the grid. That is what it is all about. We have people, and it has been successful. Certainly we need to build on that. It becomes more important as we go.
It would be ironic for the industry to come to consensus on how to deal with these issues. There is no industry consensus on how to structure the relationship. That is why the arrangement is there. The bulk of the industry agrees they should continue with separate organization that are separately approved on reliability. That organization should coordinate closely with whatever organization devises the business practices. Because FERC has the ultimate oversight for reliability and whatever business organization that is separate, FERC can assure the necessary coordination exists.

That is really what it is all about. Out there, there are people who have done this. We know how to do it. We have evidence of that. But what we have not had is the opportunity for someone to really have the authority to do that. So this is what this does, giving that to FERC.

You can argue if you want to, and I understand if I hope Members understand, if you like having the Federal Government do it from here, that is what you ought to do. If you like working with your own public service commission—and by the way, the national public service commissions have supported this amendment. Talk about being just a regional thing, the national public service commissions support this amendment. I think we will have some more Senators speak shortly. I think we ought to continue to delve into how we can best serve the American people with electric reliability, whether we transfer that to an agency that has the expertise or whether we try to use what is in place to make it more efficient.

I ask unanimous consent to add Senator CAMPBELL of Colorado as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. Mr. President, at this point I want to refer to and then have printed in the RECORD a few letters that support the underlying provision that we have in the bill on reliability and oppose the Thomas amendment. I have five. Let me go through each of them and indicate what they are and what they say.

This first one is a letter from the Mid-Atlantic Area Council, the regional reliability council for this area of the country. It is located in Norristown, PA. It is directed to me. It is dated March 13. It says:

The Mid-Atlantic Area Council—

MAAC is the acronym. We always like acronyms here in Washington—would like to express its support for the reliability provision in section 207 of your amendment in the nature of a substitute to S. 517.

They are supporting the underlying bill, not the amendment by the Senator from Wyoming.

MAAC recognizes your continued efforts to promote legislation that increases our energy supply and advances the effort to establish wholesale electricity markets in the United States.

It is our understanding that the North American Electric Reliability Council (NERC) and the participants’ association are seeking to strike your language in order to substitute an amendment they drafted. This amendment is based upon the litany of focus that has developed over three years ago. The subsequent convergence of reliability and market issues has rendered this language obsolete, and we urge you to oppose the amendment.

MAAC recognizes the need for mandatory reliability standards that are broadly applicable to the entire wholesale electric industry. However, the language in the amendment will limit the Federal Energy Regulatory Commission’s—FERC—and the industry’s ability to properly restructure the wholesale transmission system which is essential for reliable, efficient and well-functioning markets. As currently drafted, the amendment removes most aspects of standards development and enforcement from FERC and grants sweeping powers to a new electric reliability organization, likely to be NERC.

The amendment removes the important role that regional transmission organizations—RTOs—will play in reliability and market management and appears to assume that assuring reliability is purely an engineering function with no significant economic content or effect on markets, while your language would permit FERC to coordinate with other regions on reliability and markets and allow FTO-administered market mechanisms to preserve and foster reliability.

Furthermore, a December, 2001 FERC Order commenced a broad industry collaborative effort to arrive at a consensus on how to best align NERC’s activities into the standard setting process. It developed the new North American Electric Standards Board—NAESB, formerly Gas Industry Standards Board. The industry will make a filing to FERC by March 15. This amendment could derail the efforts supported by a large number of stakeholders to establish NAESB as the standards developer best able to accommodate NERC and commercial concerns.

Your reliability language is compatible with recent efforts by the industry to develop a new approach to standards setting. The amendment would stifle industry efforts to forge a standards setting process that is in the best interest of American utility [as amendment], your language does not set into law a complex and burdensome set of rules and processes which would institute a command and control system of enforcement ignoring was that market forces could enhance reliability. The language of the amendment, if substituted for your language, would result in a major setback of the efforts to reduce power costs through innovation and market forces.

MAAC urges you that strenuously oppose the changes to your language provision, and offers our assistance to you as the Senate considers this important legislation.

The States that are covered by MAAC are Pennsylvania, New Jersey, Delaware, Maryland, and Virginia. We believe that, in an effort to at least, that some States are not totally enthusiastic about this amendment Senator Thomas is proposing.

Next, I refer to a letter we have received, also dated March 13, from the Electric Consumers Resource Council—ELCON. This is the national association representing large industrial users of electricity. They indicate in their letter they were established in 1976, their member companies have long supported policies furthering competition in wholesale and retail electric markets, and their members operate in every State in the Union.

I will quote a couple of sentences out of that letter.

We are obviously following the Senate debate on S. 517 very closely. One provision that might be overlooked is the issue labeled “reliability.” By way of background, ELCON supports a role of the national standard setting in this issue with the North American Electric Reliability Council (NERC) to develop then-consensus language roughly four years ago. They have continued to work with NERC and with the Gas Industry Standards Board (GISB), now the North American Energy Standards Board (NAESB), to develop a structure for an organization to develop reliability standards for our interstate electricity grid and the impact of those standards on commercial activity.

Since our members operate throughout the Nation, we strongly believe that rules should be as consistent as possible in every area. To do otherwise would balkanize the grid and hinder competition. For that reason we find the proposal now being promoted by NERC (and supported by several groups including the Western Governors Association) to be counterproductive, because it would be as consistent as possible in every area. To do otherwise would balkanize the grid and hinder competition. For that reason we find the proposal now being promoted by NERC (and supported by several groups including the Western Governors Association) to be counterproductive, because it would be as consistent as possible in every area.

We urge you to reject any attempts by Senators from other regions to impose alternative legislation in any region, even if that region constitutes an entire interconnected network. We oppose any attempts by Senators to impose alternative legislation on any region, even if that region constitutes an entire interconnected network.

We hope these views are helpful to you in your deliberations.

I will go next to the PJM Interconnection. It is the Pennsylvania-New Jersey-Maryland Interconnection. This, again, is a letter dated the same date, March 13, to me, by Phillip Harris. He is the president and CEO of PJM. He says:

I am writing to express our support for electricity title, Title II, of Senator Bingaman’s energy legislation, S. 517. I believe that PJM will serve to meaningfully improve electricity markets in North America and urge your support of it.

Then, going down the letter, it says:

In the PJM region, we have been able to work successfully with States and local governments to ensure that electricity markets and the grid work in a way that meets the needs of wholesale and retail customers, while improving regional reliability. We are pleased that section 207 of Title II contains simplified reliability legislation that places reliability authority directly with FERC and enables it to objectively defer to regional solutions without preference. We urge you to reject any attempts by Senators from other regions to remove this same legislation that would significantly blur or weaken the government accountability over reliability found in Section 207 or impose impossibly stringent FERC’s authority over Regional Transmission Organizations. The substance of the reliability amendment runs counter to an ongoing industry effort to recognize this business and rely on.

As I said, that was signed by Phillip Harris, the president and chief executive officer for PJM.

Next, I will refer to a letter dated March 14, 2002, from Elizabeth Moler,
who is representing Exelon, Commonwealth Edison of Chicago, and PECO Energy in Pennsylvania.

She says:

DEAR MR. CHAIRMAN: I am writing to share Exelon Corporation’s views on the Sen. Thomas amendment proposed reliability amendment to S. 517, the pending energy bill.

Exelon Corporation is one of the nation’s largest electric utilities. Our major subsidiaries are Commonwealth Edison, the public utility that serves Chicago; PECO Energy, the public utility that serves the Philadelphia area, and Exelon Generation. We have roughly five million retail customers in Illinois and Pennsylvania, which have both restructured their electricity markets. Exelon owns 22.5 gigawatts of generation (including nuclear, coal-fired, gas-fired, gas/oil fired, pumped storage and run-of-river hydro units) and controls an additional 15 gigawatts of capacity. We have additional capacity under development.

Then the letter goes on and says:

Exelon opposes the Thomas amendment, principally because we believe it would interfere with the development of competitive wholesale markets. As the United States Supreme Court recently recognized last week in reviewing FERC Order No. 888, electricity markets are fundamentally interstate in nature. The amendment seeks to deny this fact, by encouraging individual states or regions to develop unique reliability standards. We believe that the Nation needs uniform, national reliability standards. The rules should not vary from region to region. National reliability guidelines and standards will facilitate the development of more seamless electricity markets and ensure the much-needed investment in both generation and transmission. We believe that the Thomas amendment would further balkanize electric markets, rather than facilitating the development of a national electricity marketplace.

That is a quotation out of that letter from Exelon.

The final letter I wish to refer to is the one from the Electric Power Supply Association. Quoting their letter:

The Electric Power Supply Association would like to affirm our support for the reliability provision in Section 207 of your amendment. Here is a subtext to S. 517. We appreciate your continued efforts to promote legislation that increases our energy supply and advances the effort to establish wholesale electricity markets in the United States.

It has come to our attention that efforts are being made to strike your language in order to substitute an amendment supported by the North American Electric Reliability Council and the Western Governors’ Association. This amendment is based upon the NERC (and supported by several groups including Edison) and with the Gas Industry Standards Board, that the Gas Industry Standards Board approved in December of 2001. The industry will make a filing to FERC by March 15. This amendment would nullify the efforts supported by a large number to stake- holders to establish NAESB as the standards developer best able to accommodate NERC and commercial concerns.

Your reliability language is compatible with recent efforts by the industry to develop a new and improved approach to standards setting. The amendment would stifle industry efforts to forge a standards setting process that is in the best interest of America. Unlike the Thomas amendment, if substituted for your language, would result in a major setback of the efforts to reduce power costs through innovation and market forces.

MAAC urges that you strenuously oppose the changes to your reliability provision, as our members and stakeholders in the Senate consider this important legislation. Please contact us with any questions or requests for additional information.

Very truly yours,

P.R. LANDRIEU, Chairman.
Hon. JEFF BINGAMAN,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, DC.

March 14, 2002.

DEAR CHAIRMAN BINGAMAN: The Electric Power Supply Association (EPSA) would like to affirm our support for the reliability provision in Section 207 of your amendment in S. 517, the pending energy bill. The Bipartisan energy amendment adopted unanimously yesterday by the United States Senate is a giant step toward enactment of much-needed legislation to reform the electric power industry. We look forward to continuing to work with you in the days and weeks ahead in support of enacting a comprehensive national energy policy that will enable us to continue to provide consumers reliable service at reasonable prices.

Thank you for your consideration of our views.

With best wishes,

Sincerely,

ELIZABETH A. MOLER
President and CEO

Washington, DC, March 6, 2002.
Mr. KENNEDY. Mr. President, I ask unanimous consent to be able to speak for 10 minutes as in morning business and that my remarks be printed at the appropriate place in the RECORD and not interfere with the debate on the energy bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. KENNEDY are printed in today’s RECORD under “Morning Business.”)

The PRESIDING OFFICER (Mr. Nelson of Florida), The Senator from Wyoming.

Mr. THOMAS. Mr. President, I rise to address the pending amendment. The Senator from New Mexico cited a number of the people supporting his part of the bill, several of whom were compañes, of course. Maybe the fact that the National Association of Regulatory Utility Commissioners supports the amendment would be an interesting change of scene. One of the things I am looking out for is the public’s interest. I would guess that is more likely to be the case—certainly the North American Electric Reliability Council. Again, there are letters on each one’s desk that the administration supports this proposal. We are looking toward getting together a balanced program.

A number of things have been mentioned that need to be talked about a little bit. The FERC industry standards board was mentioned as being an alternative. The fact is that is only a concept. Years of work will be needed to make it happen. There is no consensus among industry stakeholders. More has developed in the West, and that is why this has sort of started there because these people were forced to come together and others will be as well.

I don’t think it is time to jettison 30 years of experience in doing this thing so that you can hand it over to a new bureaucracy that has neither the expertise nor, indeed, the background to take care of this task.

It has been mentioned, but it is very true that we need to have an opportunity for whatever we put into place to deal also with uniformity in reliability with the United States, Mexico, and western Canada. That is very important, particularly to the Northwest, of course, as mentioned by the Senator from Oregon.

There is a need to move fairly quickly. I don’t think there is much doubt that the NERC process would be able to act much more quickly in consensus building than FERC. The thing that it seems we always try to push aside is that FERC still has the final responsibility. That is probably the way it ought to be.

The standard setting, we talked a little about that. I don’t think that system has to recognize the realities of the differences that do exist. The enforcement of standards is well defined and responsive to differences in inter-actions, and it has to be that way. There is no definition process that is going to emerge from the industry. Often there are things going on here that just aren’t actually the case on the ground.

There was some suggestion that NERC’s proposal was organized 3 years ago and is now obsolete. There is nothing going about the NERC proposal.

In fact, during this Western crisis of the last couple years, reliability standards was one of the few elements that worked well. So I think the evidence is that we have around a group that is deeply involved and has shown expertise, representing different parts of the country, the needs of different parts of the country—certainly with the oversight that exists.

So the Bingaman approach—the Daschle bill—does not provide a role for the States. There is no assurance of independence or any standard setting. Therefore, we need to look at the concept of how we are doing this. We are expecting a couple more Senators to come and speak momentarily. In the meantime, I yield the floor.

Mr. REID. Mr. President, we are in the process of preparing to propound a unanimous consent request. That should be done within the next few minutes. We can set a vote at 2 o’clock this afternoon. Prior to that time, Senator Bingaman is planning to start debate on renewable portfolio. Senator Jeffords is standing by to come at the appropriate time. It may be that Senator Kyl will follow with his amendment. We should be able to do that in the next few minutes.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceed to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that the Thomas amendment No. 3012 be set aside to recur at 2 p.m. today; that at 2 p.m., the Senate vote in relation to the amendment, with no second-degree amendments in order prior to the vote in relation to the Thomas amendment; that Senators may speak until 2 p.m. today on the 10 percent standard and its pendency; that Senator Dayton be recognized to offer an amendment relating to gasohol; that after a period of debate, the amendment be set aside for consideration later today; that following that period of debate, Senator Bingaman be recognized to offer an amendment relating to renewable portfolio standards.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, we will have a vote at 2 o’clock. Senator Dayton is going to offer an amendment on his behalf and that of Senator Grassley.

That debate will take just a few minutes. There are others who want to speak on the amendment of Senator Thomas. They can do that until 2 o’clock.

In the meantime, Senator Bingaman is going to start the debate today dealing with renewable portfolio standards. A very important part of the bill deals with renewables. He will offer his amendment and Senator Jeffords will offer a second-degree amendment, I am told. I spoke with his chief of staff. Following that, Senator Kyl will offer another amendment toward renewables. This should take care of renewables once and for all on this bill.

Once we get that done, there are some other amendments, but the big one still left is that dealing with ANWR. We are eliminating a lot of contentious matters on this bill.

Senators can be expected to come to the Chamber a number of times this afternoon and evening regarding votes on renewable portfolio standards.

The PRESIDING OFFICER. The Senator from Minnesota.

AMENDMENT NO. 3008 TO AMENDMENT NO. 297

Mr. DAYTON. I thank the Chair. I thank Senator Thomas for his acquiescence.

Mr. President, I offer this amendment on behalf of myself and Senator Grassley.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

Mr. Dayton from Minnesota [Mr. DAYTON], for himself and Mr. GRASSLEY, proposes an amendment numbered 3008 to amendment No. 297.

The amendment is as follows:

(Purpose: To require that Federal agencies use ethanol-blended gasoline and biodiesel-blended diesel fuel in areas in which ethanol-blended gasoline and biodiesel-blended diesel fuel are available)

At the end of subtitle B of title VIII, add the following:

SEC. 3008. FEDERAL AGENCY ETHANOL-BLENDED GASOLINE AND BIODIESEL PURCHASING REQUIREMENT.

Title III of the Energy Policy Act of 1992 is amended by striking section 306 (42 U.S.C. 13215) and inserting the following:

SEC. 3008. FEDERAL AGENCY ETHANOL-BLENDED GASOLINE AND BIODIESEL PURCHASING REQUIREMENT.

(a) ETHANOL-BLENDED GASOLINE.—The head of each Federal agency shall ensure that, in areas in which ethanol-blended gasoline is available, the Federal agency purchases ethanol-blended gasoline containing at least 10 percent ethanol (or the highest available percentage of ethanol), rather than nonethanol-blended gasoline, for use in vehicles used by the agency.

(b) BIODIESEL.—

(1) DEFINITION OF BIODIESEL.—In this subsection, the term ‘‘biodiesel’’ has the meaning given the term in section 312(d).

(2) REQUIREMENT.—The head of each Federal agency shall ensure that the Federal agency purchases, for use in fueling fleet vehicles used by the Federal agency at the location at which fleet vehicles of the Federal agency are centrally fueled—

(A) as of the date that is 5 years after the date of enactment of this paragraph, biodiesel-blended diesel fuel; and

S1882 CONGRESSIONAL RECORD — SENATE

March 14, 2002
Mr. DAYTON. Mr. President, I thank the Senators from Nevada and New Mexico for making the time available. I am pleased to offer today, along with my very distinguished colleague from the neighboring State of Iowa, Senator GRASSLEY, an amendment that will significantly increase the use of ethanol and soy diesel fuels across our country.

Our amendment requires all Federal Government vehicles to use 10-percent ethanol-blended gasoline where it is available or whatever lesser percent of ethanol blend is available in that particular locale.

Our amendment also requires Federal vehicles which run on diesel fuel to use at least a 2-percent biodiesel blend or higher by the year 2007, and a 20-percent biodiesel blend by the year 2012. If we want to improve our Nation's energy security, provide cleaner air, boost farm income, and strengthen many rural communities across this country, increasing the use of ethanol and soy diesel is a golden opportunity. Both of these fuels have come into their own as better alternatives to blend with regular gasoline and diesel fuel than the oil-based additives which currently predominate across the country.

Regular car and truck engines can use up to 10-percent ethanol with no modifications required, and centrally fueled trucks and other vehicles can similarly use up to 20-percent biodiesel blend even more efficiently and effectively than other diesel blends today. In fact, my Minnesota office leases a regular Chrysler minivan that travels all across Minnesota burning fuel which is 85-percent ethanol. That van has had no problems whatsoever in its performance, and, fortunately, we have had no trouble finding this 85-percent ethanol throughout my State.

One of the reasons ethanol is so readily available in Minnesota is that our State legislature had the foresight 7 years ago to pass a law requiring that a 10-percent ethanol blend be available to all gas stations across the State. Just 3 days ago, the Minnesota Legislature passed a similar mandate which, if signed by the Governor, will require stations to provide a 2-percent blend of biodiesel fuel.

When people have positive experiences using these blends and then become confident they can obtain them wherever they travel, the usage of these alternative fuels soars.

By the end of this year, it is estimated that our country's ethanol production capacity will reach 2.7 billion gallons. If this amount of ethanol were used in cars and trucks across our country, it would displace approximately all the foreign oil imported into our Nation this year.

Of all the measures being considered in this legislation and of all the measures that are being discussed or implemented in America today, nothing can reduce our dependency on foreign oil or increase our domestic energy production but ethanol and biodiesel fuels.

Increasing the use of these fuels is what I call the grand slam: No. 1, it boosts the chances that we can find soybeans and other suitable crops in the marketplace and, thus, both raises farmers' incomes and reduces taxpayers' subsidies; No. 2, it improves the local economies and communities through out-of-state spending in the billions; No. 3, it reduces U.S. dependence on foreign oil; and No. 4, it provides cleaner air.

The Federal Government ought to be leading the way in expanding these markets for these renewable fuels, but, unfortunately, the Federal fleet consumption of these fuels is currently only 2 percent, despite several Executive orders signed by President Clinton during his two terms. Thus, our amendment is essential to requiring that the 100,000 vehicles in the Federal fleet do their part in expanding the utilization of ethanol and soy diesel.

When I was commissioner of energy and economic development for the State of Minnesota back in the 1980s, Senator DASCHLE and Senator BINGAMAN have performed a great service to all of us when we could have and should have been taking these small baby steps.

I believe as a nation we are utilizing less than 5 percent of our potential for alternative sources of energy, energy conservation, and other economically and ecologically sound measures to improve our energy security. We have been taking these small baby steps when we could have and should have been progressing by leaps and bounds. This energy bill is an opportunity we cannot afford to miss. Senator DASCHLE and Senator BINGAMAN have performed a great service to all of us and to our entire country by bringing before us this bill which makes so many important contributions to a balanced national energy policy.

Senator GRASSLEY and I believe our amendment is another important contribution, and I respectfully urge our colleagues to support it.

Mr. GRASSLEY. Mr. President, as all of my colleagues know, I strongly support the production of renewable domestic fuels, particularly ethanol and biodiesel. As domestic, renewable sources of energy, ethanol and biodiesel can increase fuel supplies, reduce our dependence on foreign oil, and increase our national and economic security.

Historically, Congress and the administration have asked the Federal Government to lead by example when moving this country to new standards. Since we are talking about the future of energy in this country, we as a Federal Government must lead by example. The Dayton-Grassley amendment is largely symbolic and it will codify what many administrations have already directed the Federal Government to do: to use renewable fuels where practicable.

For instance, the last administration issued an Executive order directing the Federal Government in 1998 to exercise leadership in the use of alternative fuel vehicles, to develop and implement aggressive plans to fulfill the alternative fueled vehicle acquisition requirements of the Energy Policy Act of 1992, which required 25 percent in 1996, 33 percent in 1997, 44 percent in 1998, and 75 percent in 1999 and thereafter.

The Executive order was never adhered to because it was not generally practicable, but the Dayton-Grassley amendment is much easier to implement, because we are talking about setting a standard using normally blended renewable fuels.

The Federal Government should be using as much renewable fuels as is practicably available.

The amendment would require just that—where available, Federal fleet vehicles should be using ethanol and biodiesel, the two most practicably available renewable fuels.

I support this amendment, because it makes good sense for the Federal fleet to use as much ethanol and biodiesel as it possibly can.

The requirements for ethanol and biodiesel usage under this amendment are easily attainable and does not require the Federal fleet to use as much ethanol and biodiesel as it possibly can. I am pleased to offer this amendment with Senator DAYTON.

Mr. DAYTON. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NELSON of Florida. Mr. President, I ask unanimous consent that the other Members of the committee be excused.

The PRESIDING OFFICER (Mr. DAYTON). Without objection, it is so ordered.

Mr. NELSON of Florida. Mr. President, I rise in support of the amendment of the Senator from Minnesota. His amendment is the kind of creativity and inventiveness and American can-do ingenuity we have to have as we approach this energy crisis, energy shortage.

Clearly, the production of ethanol and its substitution for otherwise fossil fuels is of benefit to Minnesota. There is not particularly any benefit to my State, so I wish to rise as a nonconflicted party to endorse the Chair's amendment to say, as we approach the crisis of how we are going to continue to have the energy resources we need for a nation that consumes a lot of energy, we have to be inventive and creative.

I think the Senator from Minnesota has proposed one alternative. I think we will see other alternatives produced in an amendment by the Senator from New Mexico on renewables, wind, the
use of waste to produce energy which we do in Florida in 13 different locations. I have been assured by the Senator from New Mexico that we will be able to continue, as part of the credit, with those existing facilities which are turnkey ready to go.

Years ago, when I was in the Florida Legislature, we established the Florida Solar Energy Center, which is in the shadow of Cape Canaveral right outside the gates of our space center. It, today, is the focus of research and development in using the God-given rays and heat of the Sun and converting that into energy.

Clearly, we have seen that, for example, in processes employed in our space program, of taking the solar arrays, very high-tech kinds of mechanisms, folded out in huge arrays in the zero gravity and vacuum of space and having that sunlight come down and penetrate those arrays and that being converted into electricity for the spacecraft.

Another thing used on the spacecraft called the space shuttle is a device that takes oxygen and hydrogen and suddenly produces electricity and has water as a byproduct. That is why our astronaut crews on the space shuttle have to perform, at the end of each flight day, water dumps where water, which is the byproduct of making this electricity by the combining of hydrogen and oxygen, is dumped overboard in space. As one sees it come out the nozzle and it starts to freeze in that very cold atmosphere of space, it is a beautiful sight, particularly when the rays of the Sun happen to hit those water crystals. It is another example.

Ultimately, we will be able to use hydrogen in automobiles. Think what that will save us in the way of fossil fuels.

Why do we need to find alternatives to fossil fuels? Because of the obvious: They are limited. The amounts of oil for energy purposes are going to be used up over the course of the next 50 years. So we have to be planning for that.

There is another reason right now that is so important, and that is the United States is dependent on foreign-imported oil, and that dependence causes us to be in the unenviable position that we have to assure the flow of that oil out of the Persian Gulf region. As we are engaged in this war against terrorism, where is a lot of that activity and who is planning to try to sink one of those supertankers in the Strait of Hormuz, and if that were to occur, what huge economic dislocations and economic disruptions would occur throughout the globe. And it is because we are dependent on oil.

We ought to be reducing our dependence, and I think the amendment of the Senator from Minnesota is one good illustration of how we lessen our dependence on that foreign oil. Another problem we are faced with—unfortunately, we were not successful yesterday—increasing the miles per gallon, otherwise known as the CAFE standards. That does not mean anything to most Americans, but when we start talking about do Americans want to get more miles per gallon in their automobile, the answer is a resounding “yes.” Yet yesterday we were not able to increase the miles per gallon in our fleet of automobiles.

That is a political travesty. It will have profound economic consequences. Sooner or later, when we have another crisis, that oil is not going to be able to be as accessible from foreign shores; then we will have to get serious again about the development of energy in America, which is in the transportation sector, about increasing miles per gallon.

That is a decision the Senate rendered yesterday. I think it is unfortunate. However, the fact is there are creative and genius Senators, such as the Senator from Minnesota, who is offering his amendment. I add my voice of support to his amendment.

I suggest the absence of a quorum. The PRESIDING OFFICER. The clerk will call the roll.

The assistant bill clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Nelson of Florida). Without objection, it is so ordered.

The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I rise to support the amendment offered by the Senator from Wyoming, Mr. CRAIG THOMAS. I will discuss the amendment. It is an amendment that deserves understanding. I compliment the Senator from Wyoming for the manner in which he has focused on this amendment from the standpoint of keeping responsibility for the most part at the level where it belongs, which is at the State level.

The amendment replaces the Federal command and control in the Daschle substitute. That amendment has FERC setting and enforcing reliability standards. There are some things wrong with that, and I will go through that in detail. This is a provision similar to legislation the Senate unanimously passed last Congress which has the North American Electric Reliability Council continuing to set standards but not with the ability to enforce them. This is a group that knows what they are talking about when it comes to reliability.

Under this amendment, there is an enforcement mechanism. It is important to note that energy that is generated is freely sold to the public, and it is perhaps one of the most important responsibilities of the electric utility sector, about increasing miles per gallon. Yet it works. So the tendency is, do not disturb it. We have to recognize there are more and more demands for greater electric energy as a consequence of computers and various other appliances we take for granted in our homes.

This amendment ensures our electric transmission grid will continue to be safe and reliable. We know that grid, in some areas particularly, is overtaxed, inadequate transmission lines. Yet it works. So the tendency is, do not disturb it. We have to recognize there are more and more demands for greater electric energy as a consequence of computers and various other appliances we take for granted in our homes.

This amendment ensures that our electric transmission grid will continue to be safe and reliable. Consumers will be able to get the power they need when they need it—the lights will go on, and they will stay on.

The amendment establishes a nationwide reliability organization which has the authority to establish and enforce reliability standards. I emphasize two words: Establish and enforce. This is a nationwide reliability organization that has proven itself. The new reliability organization will be run by market participants and will be overseen by the FERC.

To give an example: When the Enron company collapsed, the system worked. There was not a price increase. There was not a shortage of electricity. The free market system worked. I have often said, if those companies, on the demise of Enron, had to go to FERC to get authority to take over the slack, one wonders how long it would take. The public would probably be inconvenienced. The price would probably be adjusted because of a crisis.

My point is, the free market system can work. That is why it is so important we address reliability. This amendment does it.

Our existing voluntary reliability system has been with us for some time. Under current law, reliability standards are set by the North American Electric Reliability Council and its 10 regional councils. These standards are entirely voluntary. There is no penalty
mechanism for violation. The pending amendment gives an enforcement mechanism that is good. In a nutshell, the pending amendment takes the existing voluntary program and gives it some enforcement powers. The new reliability organization sets the standards with FERC approving. FERC becomes the backstop, not the individual who necessarily carries the ball upfront. The reliability organization will be made up of representatives of those who are affected: Residents, commercial and industrial consumers, independent power producers, electric utilities, and others.

There is no question we need a system to safeguard the integrity of our electric grid. Both the amendment and the Daschle bill create mandatory and enforceable reliability rules. But they do so in very different ways. This is where Members are going to have to look at this amendment and recognize its contribution vis-a-vis what is in the Daschle bill.

The Daschle bill gives all authority and responsibility to FERC. This is a States rights issue. Clearly, when it comes to transmittal of power, FERC holds, and should have, a role. We believe the Daschle bill, in giving all the authority and responsibility to FERC, takes away from the States their right to address intrastate power reliability. It can best be addressed by the States. In the Daschle bill, in giving all the authority and responsibility to FERC, FERC sets the standards and FERC enforces the standards. It is that simple.

Unfortunately, in our opinion, FERC does not have all the expertise in the world to set highly technical and complex reliability standards that can only be done by industry experts. Where do the industry experts reside? They reside within the States.

The amendment instead establishes a participant-run, FERC-overseeing, electric reliability organization. It is a blend of Federal oversight along with industry expertise. It is similar to a bill that passed unanimously last Congress.

Over the years, the grid has been well protected through voluntary standards established by the North American Electric Reliability Council. FERC’s voluntary reliability standards, which are not necessarily enforceable, have subsequently been complied with by the electric power industry; in other words, a kind of self-policing mechanism.

But with the changing nature of the electric power market, it is time to change that to create a new organization with enforcement powers. That is what this amendment does. The answer to every problem is not necessarily another layer of Federal command and control or, in this case, more FERC. This is the central failure, in our opinion, of the Daschle bill. Federal standards and Federal enforcement are simply not necessary across the board.

The amendment offered by the Senator from Wyoming adopts the language developed by the North American Reliability Council. It recognizes and addresses the regional differences. It is supported by State Governors, including western Governors, and State public utility commission. As we did last year, the Senate amendment can unanimously support the language and reject the Federal preemption and command and control that is in the Daschle legislation.

I support the amendment and encourage its adoption.

I would like to point out that this is a pretty complex piece of legislation contained in this amendment. I encourage Members to talk to members of the Energy and Natural Resources Committee because we have had previously—not this time—hearings on this matter.

I previously discussed my displeasure with the process that brought the bill to the Senate floor. However, unlike most of this bill, the reliability language does not have to be done by industry experts. Where do the industry experts reside? They reside within the States. In the Daschle bill, in giving all the authority and responsibility to FERC, takes away from the States their right to address intrastate power reliability. It can best be addressed by the States. In the Daschle bill, in giving all the authority and responsibility to FERC, FERC sets the standards and FERC enforces the standards. It is that simple.

On June 21, 2000, the committee reported legislation that took the approach contained in the amendment of the chairman of the Energy and Natural Resources Committee, the Senate. In 2001, the Senate passed that approach. That approach was recommended by the Energy Committee and passed by the Senate. I have supported many of their efforts. I have nothing but the most wonderful things to say about the two of them and the patience they displayed trying to bring the bill together into one that can unite this body and one that can really help move this country forward.

I am going to vote for the bill, whether ANWR is in it or not. I am supporting Senator MURKOWSKI has worked so hard on the bill before us, and I have supported many of their efforts. I have nothing but the most wonderful things to say about the two of them and the patience they displayed trying to bring the bill together into one that can unite this body and one that can really help move this country forward.

The big picture is really this: I think the solution is for this country to get serious about becoming energy independent. I think the President is absolutely right when he talks about a free enterprise economy or a free market back or a freedom system. This is about freedom. This is about being able to be a leader in the world based on what our real values are, and not being held hostage because we need something that some people in the world claim we need to produce it, even though we have it. Our foreign policy is compromised and the lives of our men and women are put in danger.

It is not right. It is not smart. It is dangerous. If we did a better job of communicating to the American people this reality, I think they would rise and demand a fundamental change.
So the amendment I am going to lay down is a simple one. It says this: All States are to submit a plan to the Secretary of Energy within 1 year to show how they can become basically energy self-sufficient.

Whatever they are consuming, they must come up with a plan of producing—not 100 percent, because I think that would be very difficult for some States, recognizing that some States are small. So my amendment is going to say that whatever you consume, you must try to produce 50 percent of what you consume. The money in this budget, the money that the Federal Government—taxpayers—provide, is contingent upon the State submitting such a plan.

If you do not submit a plan, you are not permitted to receive any money. I will tell you why. On the floor I said one of the founding principles of this Nation was: He who doesn't work doesn't eat. It is why the Plymouth Colony worked. I think this is not only is surviving but thriving; it is because it is an American principle that we live by every day—not perfectly, but it is an underlying principle of this Nation.

There is a communistic principle, not other principles. The principle in America is you live by the fruit of your labor. You work and use the talents God has given you. When you produce, you can live and consume. But if you just work, and you don't produce, you should not pick up the paycheck. We have done it in welfare reform. We do it everywhere. But we do not do it in energy.

I will show you why we do not do it. This is a chart of the States that produce power. The purple States shown here produce enough power for themselves, and are net exporters of power. They produce it in all different ways. Some produce it by coal, some produce it by hydro, some produce it by using their great water resources with which their regions are blessed.

These States have figured out what resources they have. They are trying—I admit with a lot of mistakes in the past. When we didn't have the great science and technology of today—using basically just carriages and horseback—we were just trying to make it work and build this country. So they found all these resources and started putting them together, to give power to a nation that is truly the light of the world.

Now notice the red States here. They are consuming much more—in some cases dramatically more—than they are producing. That is the problem. I will submit for the Record the numbers that are quite dramatic for these consuming States which indicate their unwillingness and their reluctance to produce the energy they need to sustain their economy and their dependence on others to produce for them.

If that were as far as we have gone, maybe we could even live with that. Not only are these States not willing to produce, but they are telling other States they can't produce—not only not in my backyard, but not in your backyard. I think that kind of attitude is driven by populations that might not quite realize what is at stake. It is, I think, jeopardizing our Nation and producing a price structure that has margins to it by not producing and not really work on the core points.

We cannot conserve our way out of where we are. We have to produce more domestically.

Let me give you another reason why I am very passionate about this.

Every time we drive domestic production off our shores, it goes somewhere else. It doesn't go away. It just goes somewhere else. When it goes to Canada, it is not bad because Canada is a stable country with good laws and good environmental rules and regulations. We in some ways benefit when it goes to Canada—not only as a nation but as a world—because Canada is a developed, progressive, and friendly country. By the Bylaw, it might go to Mexico and to South and Central America. Mexico is a friend. Our relations are warming. They are an ally, but I would not say that Mexico or Central America or Latin America has the strongest environmental policies. I think they have fairly transparent business operations. I am not so sure they have the highest level of ethics in terms of their business, at least compared to the United States.

When we drive production off the shores of the greatest country in the world, which has the best regulations, the best laws, the most transparent system, and an assurance that drilling is done in the right way, we drive it to places in the world where environmental destruction is inevitable because they do not have the technology. They do not have the laws. They do not have the organized environmental groups. In our great righteousness of trying to clean up the United States of America, we are messing up the rest of the world.

It doesn't make sense from an environmental perspective. It doesn't make sense from a security perspective. Children, young people, spouses, and parents are dying today over this issue.

Why can't we help Israel anymore? Because we are so dependent on Arab countries to supply us with oil, and so we don't have to drill anywhere in the United States for oil. We see in the paper every day that another 60 people have died in Israel, and we say we are sorry.

This Senator is going to do everything in her power to help change this view in the United States.

When a person runs for President in this country, they have to go to California to get a lot of votes. They have to go to Florida to get a lot of votes. They have to go to Pennsylvania and New York and Ohio to get a lot of votes. There are some interest groups there that I think have captured and held hostage some of the general public in those States and convinced them that they can just continue to consume. They don't have to produce anything. They don't have to produce it by coal. They don't have to produce it by nuclear. They don't have to produce it by hydro. They don't have to produce it by wind. They don't have to produce it by oil. They can just consume. They can just consume.

Again, the States in red on this chart are importers of electricity. They consume sometimes 3, 5, 10, and 15 percent more than they produce. The States in purple produce more than they consume. They are not exporters.

The amendment that I am going to lay down later today is a message amendment. I think this is a message worth giving. I hope somebody will listen to it. States are to submit a plan to the Secretary of Energy within 1 year. In that plan, every State has to show how they are going to become energy independent within 10 years. If they do not submit a plan, they are not allowed to get one penny from this energy bill for any projects because then they go on their own.

The country was founded on the principle of those who work eat, and those who do not work do not eat.

Let me say something about State. This isn't just about Louisiana. I am proud of what my State does. We are trying to do a better job of protecting our environment. We are making huge strides. We are doing great, and our businesses are trying. We acknowledge that we have made some mistakes. I am very proud of my State. We produce a lot, and we consume a great amount.

I will show you on this chart, but you can understand that our consumption is not just for ourselves. We have a lot of industry that makes a lot of products that go everywhere in the country and in the world. Not only do we produce more than others, we send a billion of what we need every day for our lives, but we also produce enough to run this great industrial complex. Even then, we send another half of what we produce out to everybody else. We do it because we are very blessed to have oil and gas. We thank God for it. We didn't make it. It was there where our State was founded. But we are wise enough to try to recover it and use it for the great growth of the Nation.

In addition, we own the greatest river system that drains the entire Nation, that produces fish, and we have levee systems, at some sacrifice to our environment. Who in America would say we don't need the Mississippi River? I don't know what we would do without it. I do. Our universities, our farmers in the Midwest would do without the mighty Mississippi and its tributaries.

The people in Louisiana have done more than their fair share. It is not just about Louisiana. It is about the principles that we need to get straight.

This chart is an illustration of how much natural gas comes from offshore.
This is the big trunk—Louisiana and Mississippi. This represents where our gas comes from that is firing our economy and meeting new environmental clean air standards. Why? Because natural gas is a clean way to produce energy. It helps keep our air clean. That is the benefit when you have a pro-production attitude.

Just imagine if we had a pro-production attitude in other places in this nation. Instead of one tree trunk, we could have 10 tree trunks. So in the event that some terrorists tried to shut down one of these tree trunks, we might have several others. Or in the event of some natural catastrophe, such as a major hurricane, or some other event that might shut down some of the infrastructure here, we could be self-reliant. But we are not self-reliant because we have one big trunk, and it comes right off the Mississippi and Louisiana coast. Nowhere else.

It is not good to be coming anywhere here as shown on this portion of the chart because we have blocked everything else. We are just like sitting ducks. We have one tree trunk. If that tree trunk gets cut down, there is no business.

Let me show you another chart. This shows you the other fallacy. I am so tired of hearing people say: Senator, even if we opened up drilling everywhere, we could only get enough gas to last us for a year or 2 years or 3 years.

Let me just say something: Hogwash. Hogwash. It is not true. I say to anybody who says it, please come to this Chamber and debate the numbers because I am going to show you what I just learned this week, after being here several years. I was looking at these charts, and then something very significant dawned on me.

As seen on this chart of the United States, for those areas shown in the gold-orange color, we have said, either through law or through regulation, you cannot drill here. It was not always this way. We used to start the country this way—but in the last several years, a small group of people who think you can consume and not produce have convinced enough people of that mistruth, and successfully blocked production in these areas.

Here are the areas shown on the chart. You cannot drill anywhere up the east coast and the eastern part of the Gulf of Mexico. You cannot drill in California or any place such as Washington or Oregon.

But what these charts are not accurate about is this: Minerals Management Service, for instance, offers these estimates. MMS does a beautiful job. It isn’t that they are trying to mislead, but I don’t know how they calculate these numbers and they are not really accurate or show the right picture. They are calculating, if we open this area, we could maybe get 2.5 trillion cubic feet of gas. The United States needs 22 trillion cubic feet of gas a year.

So that would only be such a small percentage, you could ask yourself: Is it worth it? I would ask myself that. Is it worth it to open it up if you could only get a few months’ worth of gas? Maybe that answer would be wrong. I will show you the reason these charts are very misleading.

On this chart, look at the Gulf of Mexico where we have been drilling since about 1950. It is a very developed field. We know what is there because we have taken a lot out. Our industry is very knowledgeable about this area.

Look what this chart says: Gas, 105,52, which means this is 105 trillion cubic feet of gas in just one part of the Gulf. But right over this line, between Alabama and Florida, the estimate drops to 12.3 trillion cubic feet of gas.

So I tell you again, that could not possibly be true because any geologist—and I am not a geologist—but any geologist can tell you that the formations do not stop at State boundaries. They do not stop at political boundaries. If these formations are true for the western part of the Gulf, it has to be true for the eastern part.

So when we say no drilling anywhere in the eastern part of the Gulf because there might be only a little bit of gas—so why go there? It is not just a little bit of gas, it is a lot of gas. It is the difference between being hostage to enemy countries and freedom. It is a big difference. And it is a big decision.

And we mislead our people when we say: Why drill? There is just not a lot of gas there.

There is a lot of gas in the gulf. There is enough gas, just in my little place to keep the country going for 5 years—just in one part. Five years—just in my part. And we are willing to do it. But why should we try to keep it going for the next 20 years? Can’t some other place contribute? For 5 years we could keep it going. And that is on one little part. And we have already taken a Honda or Mitsubishi.

So I am just going to make a rough estimate that if Florida would open up—not close to the shore because I do not want to put oil rigs off the coast of Florida. I have spent my life growing up off the Florida coast. I am used to seeing oil rigs. I understand people do not like them. I think they are pretty nice. I have been on them. But I understand that.

I am not talking about right off the coast. I am talking about 25 miles out. You cannot even see them. And with the directional drilling now, you could drill with a minimal footprint and provide this Nation with 10 years of freedom. You could tell Saudi Arabia, no. You could say: No, we are not sending our soldiers. But, no, we have people who think: Fine. Send the soldiers.

I don’t want to send my son. He is only 9. I hope I can keep him home. That is what this debate is about. I do not want him to go when he is 18. If I have to come to this Chamber every day until he is 18 to fight on this point, it is worth it—for him, for my family, for everybody’s family.

But I am not going to listen to “because MMS says.” I asked MMS this morning. I asked: How do you all come up with these numbers?

They said: Senator, since we have done no exploration there, we really just estimate. We use those bare minimum numbers. These are just bare minimum numbers.

But I can use my brain and figure out what the truth is. Today I figured it out. There is a lot of gas. There is a lot of oil. There is enough in that little piece of Alabama, Mississippi, Louisiana, so that we are not going to exist anymore because the environmental movement itself is going to destroy them. Because there are no regulations in other countries—not up to our standards—there is no oversight, there are no agencies, so the industry will not have the truth, they will not have the press to tell you when you have gone too far.

We have a free press in this country. And, believe me, that is a great thing because if the industry goes too far, the press will be right there, writing: You didn’t abide by your permit. You went too far. You have polluted this stream, and you should not do it. Then we respond to it and we shut them down. That does not exist in places like Brazil or Honduras. We just have other places, to that great of an extent.

So I challenge the environmental community: Could you think about somebody else besides us for a change? Could we think about the world? We are not thinking about the world. We are leading the country in the wrong direction.

I challenge the leadership to tell the people the truth. Just tell them the truth. We are not telling them the truth. We are not telling the truth to the press, as a result, when they do not have the truth, they cannot then respond in a way that is right.

It is our job to say the truth, and I am going to say it every day in hopes that we will get energy independent in this Nation. We can do it. And we can do it by producing more in the right ways, and by—as Senator Bingaman has been so good at—focusing on new freedom technologies, such as fuel cells and hydrogen and new reactors that Senator Domenici has been leading us toward. We are not far away. Soon it will be wonderful to live in a country where we are energy independent. Then we can set our goals and our principles
Ms. LANDRIEU. Then I am going to submit other things for the RECORD and lay down the amendment when the Senator from Alaska suggests we lay it down.

I yield whatever time I have remaining.

The PRESIDING OFFICER (Mr. BAYH). The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I have listened to the Senator from Louisiana. I look forward to being a co-sponsor of her amendment.

For far too long, we have not identified the issue of equity which the Senator from Louisiana has certainly shown with her chart. I have a slightly bigger chart which basically shows the same thing.

I will take a few moments, if I may. I ask the Senator from Louisiana to look at this chart. As she displayed on her own chart, the areas that are off limits to oil and gas activity are clearly the entire east coast of the United States, from Maine to Florida. This is the entire area in gray. Then we have the area of lease sale 181 that was addressed by the Senators from the States of jurisdiction. I respect the attitude prevailing within those States relative to what happens off their shores.

The entire west coast of the United States is off limits, from Washington to California. The Senator from Louisiana did not show what happened in the offshore Gulf, where we have the producing States of Colorado, Wyoming, Montana, Utah, northern parts of New Mexico; they have been taken basically off limits by the roadless policy, as has a lot of public land.

As we begin to look at this country, we recognize who produces the energy: Texas; Louisiana; Mississippi; Alabama; to a degree; California is still a major producer; Montana; my State of Alaska. But the inconsistency, as the Senator from Louisiana pointed out, is that we have been told and it is ironic that Senators who do not want energy production from Federal lands of their States are very much opposed to supporting the States that want to have the development. Whether we talk about CAFE or some reasonable form of revenue back to the States that bear the impact associated with offshore activity, such as Louisiana or others, we get into a fight over equity there. Clearly, Louisiana has to provide the infrastructure to support an offshore activity, but they don’t receive necessarily any Federal consideration on revenue sharing that is any more significant than another State that doesn’t have that impact.

Ms. LANDRIEU. Mr. President, will the Senator yield?

Mr. MURKOWSKI. I am happy to yield.

Ms. LANDRIEU. The Senator is aware that there is a great injustice on which I hope we can make some headway before this bill leaves the Senate. The injustice is that Federal law allows those interior States—and I think rightfully so, and I most certainly support it because even though it should increase—but even in the interior States,
when they do any kind of mining or re-
source recovery on Federal land, the
State that hosts that Federal land and
the surrounding communities share 50
percent to compensate for impacts be-
cause there are roads that have to be
built.
There are other impacts where if the
Federal Government is going to benefit
drilling within your State, even on
State land, we think the State
should share the benefit.
But that is not the trend so that for coastal
States, such as Louisiana, Texas, Mis-
issippi, Alabama, and, to some degree,
Alaska, you must drill within 3 miles of
your coast to get any compensation.
So we are sending $1 and $5 billion in
royalties and revenues to the Federal
Treasury. In addition to sending the
oil, in addition to sending the gas, we
are also sending huge amounts of
money to the Federal Treasury, and
our States get nothing, nothing in di-
rect aid.
My next amendment is going to be
about changing that. I have an amend-
ment that is going to ask for a portion.
I hope everyone will support that. I
can’t imagine why anyone wouldn’t,
considering what I have just shown. I
thank the Senator for raising this
issue.
Mr. MURkowski. I thank the Sen-
ator from Louisiana. I will comment on
a couple of other points she made. One
is that States such as Louisiana and
others—she said, States contrib-
ute extraordinarily to the standard
of living we all enjoy. We enjoy it with-
out having the impact of resource de-
velopment in some States.
I would appreciate it if they would
leave that one chart up that showed
the electricity because that in itself—
even though I am not over there, I hope
the camera can pick it up—does rep-
resent a significant reality that the
purple States are contributing for the
productive energy so that the other States can share a standard
of living that is equal to the States
that are generating the electric pro-
duction. That means somebody is burn-
ing coal in a purple State, and a red
State enjoys theoretically the poten-
tial of not the impact of air emissions
but the generation of prosperity
through inexpensive electricity be-
cause of various efficiencies we have in the
system.
For a producing State not to get any
other consideration seems kind of in-
equitable when we look at technology
and issues of where are we going to
generate the power we consume.
That chart specifically is limited to
electricity, but it is a very interesting
one because it shows the disparity. I
encourage my colleagues to feel a little
guilty if they are a red State. If they are
a red State, they are depending on a
purple State to support the quality
and standard of living they enjoy.
I appreciate the Senator’s comment
relative to her young son and the re-
ality that we have fought a war over
energy oil specifically—before the
paper this morning showed a very dis-
mal picture relative to what is hap-
pening in the Mideast, the threat from
Iraq. I am always reminded of Senator
Mark Hatfield, who was a respected
Member of this body from the State of
Oregon, who said time and time again:
I would rather vote for opening up
ANWR than send another American
man or woman to fight a war on for-
eign soil over oil. That is what the Sen-
tator is talking about with regard to
her own son.
As we look at our vote yesterday,
really that vote was over safety. It was
families; it was children. We sacrificed
to some extent a CAFE for that assur-
ance and that reality. I think we have
to look similarly to the merits of our
dependence on greater sources of im-
ported oil from overseas and the price
we are going to have to pay for it, not
just in dollars but American lives.
There is a parallel.
Ms. LANDRIEU. Will the Senator
yield for purposes of comment? I would ask him
if he could imagine if we put some kind
of chart up like this where there were
some States that said: We want to
produce food. And then other States
said: No, we are not going to produce
any food. We want you to produce the
food, and we don’t want to produce the
food. Not only do we not want to
produce the food, but we want to have
a moratorium on food production. Not
only are we going to have a morato-
rium on food production in our State,
we are going to tell you, the purple
States, what kind of food you can grow
and how you can grow it, and that is
just the way it is going to be.
I realize this might be stretching this
analogy, but we have to break through
to the American people in some way
and explain that there are certain
things we all need. We all have to be
able to produce them. Food is one. En-
ergy is one.
Then some people will come down
here and argue: Senator, this is not
right, because some States produce
food, some States produce energy,
some States produce this, some States
produce that, and that is what a union
is all about. I have thought about that.
But there will not be a moratorium on
food. Nobody is saying don’t grow food
in my State. But, about energy, they
are saying we don’t want to produce
energy in our State. We don’t want the
same thing. We don’t want to produce it
through nuclear or
through coal. Some States are even
going so far as to say: We don’t want the
electricity lines. They are not nice
to look at. We don’t want merchant
powerplants.
How in the heck do they think, when
you walk into a building, these lights
go on? There is some electricity line,
or a powerplant, or there is some man
or woman in a coalfield working for
power production. We have done a
job disservice to our country by not
making this connection. It is very dan-
gerous. I thank the Senator from Alas-
ka.
Mr. MURkowski. I thank the Sen-
ator from Louisiana. I look forward to
seeing her amendment, which I intend to
cosponsor and support.
As we reflect on this debate, make no
mistake about it, yesterday’s vote was
a vote where we were willing to give up
CAFE for the safety of our children. I
think that is pretty basic. We are going
to have the same opportunity to ad-
dress the parallel when we get to the
issue specifically of trying to reduce our
dependence on imported oil. We will
want to trade off domestic production here at home, the opening
of ANWR, or, indeed, recognize the
threat we have to young men and
women fighting a war overseas on for-
eign soil over oil.
I will take a few moments to remind
our colleagues that our President had
some very strong words today for Sadd-
dam Hussein. Yesterday, during his
press conference, he shared them with
many of our colleagues. I want to
cite some of that press conference. I ask
that Members who haven’t looked at
the front page of the Washington Post
to recognize the potential threat we
have with regard to our relationship
with Iraq. Yesterday he said:
I am deeply concerned about Iraq. . . .
This is a nation run by a man who is willing
to kill his own people by using chemical
weapons, a man who won’t let the inspectors
into the country, a man who’s obviously got
something to hide.
Further, the President states:
And he is a problem, and we’re going
to deal with him: . . . we’ve got all options on
the table. . . . One thing I will not allow is
a nation such as Iraq to threaten our very fu-
ture by developing weapons of mass destruc-
tion.
We know that Saddam Hussein has
been up to no good. We have not had
inspectors there for over 21⁄2 years, and
we have reason to believe he has a mis-
sile development capability. He has al-
ready shown it in the Persian Gulf war
and with the missiles that were fired at
Israel. We have every reason to believe
he has a biological, and perhaps a nu-
clear, capability. We know he has been
developing weapons of mass destruct-
ion.
Now, the President said:
We’ve got all the options on the table.
I don’t need to remind my colleagues
what Saddam Hussein means to the
world in which we live. He is much
more than just an enemy with
whom we went to war. Unfortunately,
he is a partner at the same time. He is
a partner we rely on to power our econ-
omy, that is going to happen to the
roughly million barrels a day we im-
port each day when and if President
Bush’s words turn into deeds? Are we
still going to be able to count on Sadd-
dam Hussein for a million barrels a
day? How are we going to replace that
oil?
majority, 62 to 38, yesterday's vote on CAFE was a victory for common sense, for the American family, and the American worker. As I indicated earlier, it was a very basic vote where we gave up CAFE for the safety of our citizens and our children. By insisting that sound science not be simply ignored so we would be able to set our fuel standards, we protected America's ability to choose the automobiles that meet their needs and the American workers who build them.

But in so doing, those who objected to the more reasonable approach to CAFE standards for reducing our dependence on foreign oil—that was basically rejected as an alternative. Keep in mind that one of the treaties of that particular concept was that we don't need to develop more oil here at home. We don't need to develop ANWR. We can do it through CAFE savings.

Well, perhaps that might have been possible, but that was simply addressed in real terms by a rejection of that thought. The alternative of CAFE savings—picking up what we would otherwise have to perhaps depend on in ANWR, opening up domestic oil and gas reserves—was rejected.

Between the CAFE victory and the President's Iraq trip, I think it is clear we have to act to fill the energy voids. If we are not going to do it through CAFE, how are we going to do it? If we are going to terminate our relationship with Iraq under some set of circumstances, that is certainly going to affect our ability to import oil. Where will we get the difference?

The Senator from Louisiana said it right. Charity begins at home. We have to develop those areas where we have possible oil and gas potential to lessen our dependence on foreign oil.

I think her theory of holding each State accountable is a good one. We have technology and ingenuity within our States. Some States may be able to generate energy from solar, or wind, or nuclear. Let's get on with it here at home.

We have a lot of coal in this country, and we have gas offshore, and we have oil potential in certain areas. Let's commit ourselves to becoming more energy independent. We can do that if we concentrate on it.

Isn't that a good thing for the American economy? If we made this kind of a commitment, you would see the OPEC countries, as well as the rest of them, to an emergency meeting where they would say, just a minute, maybe we should lower the price of oil, maybe we should make a little more available—instead of what they are doing now.

So I think the Senator from Louisiana brought up some interesting ideas, and we should concentrate a little bit more on getting our act together. You have heard it time and again, but one of the major sources is the promise of ANWR. ANWR has more oil in it, in areas that are currently in reserves. It offers us an opportunity to potentially eliminate Iraqi dependence for more than a century or 30 years from Saudi Arabia. With American technology, we can reach oil safely and we can create thousands of jobs.

It is interesting to note that today we are going to have James Hofa, the Teamster president, for a press conference and one of the things we will be discussing is the dependence on foreign oil. One of the items is opening ANWR. That debate lies ahead of us. Keep in mind the realities of the choices we make when we choose from where our oil comes.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CARPER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CARPER. The Presiding Officer and I, before we were hired on as Senators, used to earn our keep by serving as Governors of Indiana and Delaware.

As Governors, we were mindful of the prerogatives of the States and our roles and responsibilities as chief executives of our States. We worked through our national and regional organizations to make sure the concerns of our region and the Governors and the States in general were respected.

Whenever a group of Governors today raises a concern about an issue that is before the Congress, I listen. In this case, we have heard from a number of Governors from the western part of the United States raising concerns with respect to the electric reliability provisions that are in the underlying bill before us.

We had a chance to try to better understand what the concerns of the Governors are, and we have had an opportunity to try to understand how their concerns, if adopted as proposed, would affect the rest of us who do not happen to be from those 14 or so Western States that have banded together to present their message to us.

That having been said, I nonetheless must feel compelled to rise in support of the electric reliability provisions that are in the underlying amendment. Senator BINGAMAN has sent out a Dear Colleague letter to all of us dated yesterday, March 13, on this issue. I urge our colleagues to take a few minutes to read it as we approach the vote at 2 p.m.

The underlying language that is in the bill Chairman BINGAMAN has developed represents what I believe is a simplified approach that places appropriate authority for liability within the Federal Energy Regulatory Commission, which we call FERC. FERC is the proper body to address electric reliability issues. FERC has the expertise to harmonize reliability and to commercialize issues that States and utilities face.

Under Senator BINGAMAN's proposal, FERC can objectively defer to regional and State solutions if FERC does not think they have the expertise and that the expertise lies elsewhere. They have the flexibility to look elsewhere for those solutions.

I believe what Senator BINGAMAN has provided for us is a thoughtful compromise. In the premise that a reliability structure should be both simple and dependable. The language in the underlying bill requires FERC to implement a system that applies to all regions in what I believe is a fair manner. It also includes the flexibility to defer, as I said earlier, where appropriate, to regional entities and to States. I believe this is a good solution to the important issue of ensuring the reliability of our electric grid. The electric grid is a national infrastructure, and the oversight of its reliability should be national in scope as well.

This morning Senator BINGAMAN introduced into the RECORD a letter from PJM. PJM is the entity which coordinates the electric grid in Delaware and in five other States in the mid-Atlantic region. PJM recognized, we believe, as the best in the country in ensuring the reliability of our grid. They said they support Senator BINGAMAN's efforts.

I would be surprised if our colleagues, especially those from the mid-Atlantic or from the Northeast, voted for the amendment that is being offered by the Senator from Wyoming later today, particularly if they will take the time to listen to the input, as I have, from their PJM in their part of the country, and especially if they will take the time to read this letter. It is a Dear Colleague letter from Senator BINGAMAN.

As Governors, we always tried to find solutions that were simple and dependable: The old "kiss" principle, keep it simple stupid. I often find that would underlie what we attempted to do. We would often seek, as Governors, to make sure what we tried to do for one region of the country did not somehow inconvenience or undermine the interests of another part of the country.

My concern about what our friends from the West have proposed is it is not simple and it would undermine and put the rest of us at a disadvantage.

I urge my colleagues to support Senator BINGAMAN's position in the underlying bill and oppose the amendment of Senator Thomas.

Mr. REID. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MILLER). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I say to my friend from Oregon, when the time arrives that he has his amendment in hand, I will be happy to yield the floor to him.
In the meantime, I note that after the 2 o’clock vote Senator BINGAMAN will lay down an amendment. The purpose of the amendment, as I understand it, is to change the renewable portfolio in the underlying bill. The underlying bill says in effect that 10 percent of the electricity in this country must be renewables by a certain time. Senator BINGAMAN’s amendment changes that to 8 1/2 percent, lowering it. Senator JEFFORDS will offer an amendment to raise that amount to 20 percent; or eliminating them altogether. We will complete those votes this afternoon sometime.

Although the amendment has not been laid down, I will speak in support of the Jeffords amendment. Why would I do that? The State of Nevada would benefit significantly from renewable energy because the Nevada Test Site, where we for 50 years have set off nuclear weapons and are still performing testing—could produce enough electricity for the whole United States, every need in the United States for electricity by putting solar panels that cover the Nevada Test Site. There is that much sun. We are not going to do that, but we could.

Also, the State of Nevada is the most mountainous State in the Union. We have more mountains than any State in the Union, except Alaska. We have 340 separate mountain ranges. We have 32 mountains over 11,000 feet high. As a result of that, we have wind all over the State of Nevada. Nevada, other than Alaska, is the most mountainous State in which to fly. Why? Because of the mountains. We have weather changing very quickly because of the mountains. People do not realize Nevada is the most mountainous State except for Alaska.

People think of Nevada as being desert, like Las Vegas. That is not the case. We have, in addition, the ability to produce large amounts of energy with sun. We have the ability to produce large amounts of energy with wind. However, it does not stop there. Nature gave Nevada also the greatest geothermal resource in the United States.

I remember when I first went to Reno. I traveled from Reno to Carson City, about 25 miles. Driving along that road on the side is steam coming from the ground. I had never seen anything like that before. The steam is from the heat of the Earth. What we have been able to do is tap that heat. Now we are producing electricity in Nevada, the geothermal energy. That is why I am so in favor of the Jeffords proposal.

Senator MURKOWSKI, my friend from Alaska, wants to produce more energy as a result of this bill. He wants to produce energy in the ANWR wilderness. That is not going to happen.

On the other side, people want to cut down the consumption of fuel on automobiles. That was debated all day yesterday with CAFE standards. That is not going to happen.

On one side, we have Members who want more production out of Alaska and are not willing to get it; and those who want to cut down the consumption of fuel on automobiles will not get it. Where does that leave us? It leaves us with the opportunity to demand that we do more with renewables. We can do that. There is no question we can do that. We are not as well advanced in technology as we should be, but we could be. The link between environment and energy must be forged and tempered in this century. I know everyone understands the importance of technology and the need to really develop our resources in homes and businesses without compromising our air or water quality. Senator JEFFORDS, in his position as chairman of the Environment and Public Works Committee, is in a very good position to proceed on this. That is what he is going to do. He will offer a second-degree amendment to increase the supply of renewables. He will offer that at a later time.

Congress needs to step up to the plate and diversify this Nation’s energy supply by stimulating the growth of renewable energy, America’s abundant and untapped renewable energy, and fuel our journey to a more prosperous tomorrow. We should harness the brilliance of the Sun, the strength of the wind, and the heat of the Earth to provide clean, renewable energy for our Nation.

Other nations are developing renewable energy sources at a faster rate than we are in the United States. Ten years ago, America produced 90 percent of the world’s wind power; today, 25 percent of the world’s wind power. Germany has the lead in wind energy, and Japan in solar energy. They are using technology that we developed, but we are not moving forward on it. They have surpassed us because their governments have provided support for renewable energy production and use.

In the United States today, we get less than 5 percent of our electricity from renewable energy sources such as wind, solar, and geothermal. But the potential from a State such as Nevada is unbelievable large. To meet the goals for 2013, for example, Nevada has, through their State legislature, indicated they must produce more electricity. I am proud of the State of Nevada for doing that. They have set goals. If they set goals, there is no reason we as a Federal Government cannot set goals.

In Saudi Arabia—we refer to them as the energy source of the world—they literally can punch a hole on top of the ground and oil comes out. We do not do that in the United States; it is hard to get our oil. However, Nevada is referred to as a Saudi Arabia of geothermal. My State can use geothermal to meet a third of its electricity needs. Today, this source of energy produces only a little over a percent of our energy. The renewable energy needs. We must reestablish America’s leadership in renewable energy.

How can Congress help? Clearly, the two most important legislative means are a renewable portfolio standard and a renewable tax credit. The renewable portfolio standard provides a strategic framework for renewable energy development while the production tax credit acts as a market force. They are both essential. We need a permanent production tax credit to encourage businesses to invest in wind farms, geothermal plants, and solar arrays.

Within the stimulus bill we passed, and the President signed last week, there is a tax credit for wind. We had that before. It is so important. All over America we have companies wanting to go forward with wind farms. They could not do it because they did not have the tax credit. Now, within a short period of time, they are off and running again.

When the wind energy tax credit first came into being, it took a little over 22 cents to produce a kilowatt of electricity by wind. At the same time, coal and natural gas were 2 cents to 3 cents. Wind was way behind these other two sources. But today, because of the tax credit, wind is the same price as coal and natural gas. That is why we need to make sure we have a production tax credit. It would cause people to invest in wind farms. We also need it, though, Mr. President—we do not have the same tax credit for Sun, solar. We do not have it for geothermal. We do not have it for biomass—and we need to get that. That is why I am opposed to the Bingaman amendment and Public Works Committee Chairman’s work. Senator BAUCUS, to offer something on this bill to allow us to do that.

A permanent tax credit would provide business certainty and ensure the growth of renewable energy development. It would signal America’s long-term commitment to renewable energy. As I have already said, I look forward to Senator BAUCUS’s bill.

I hope to have more to say about the production tax credit when we begin debate on the tax provisions of the energy bill. For the time being, let me focus my remarks on the need for a national renewable portfolio standard.

I see the chairman of the Environment and Public Works Committee is in the Chamber. I say to my friend, I have been indicating you are going to offer a second-degree amendment at a subsequent time to the Bingaman amendment, which has not yet been laid down.

I have been laying on the Senate all the reasons you are so visionary in offering this amendment.

We have to do this. I said earlier to those here in the Chamber that this energy bill has turned into an interesting
bill. On the one hand, people want to produce more by drilling in ANWR. That is not going to happen. We also want to increase the fuel efficiency of cars. That is not going to happen. I think all we have left to point to for progress with energy policy in this country is investment.

I really do believe we need to do more with wind, sun, geothermal, and biomass. So I commend and certainly applaud my friend from Vermont for his work in this area. As I indicated, there is no question that the amendment of Senator Jeffords, which I understand will call in 2020, for a 20-percent renewable portfolio standard—starting at 5 percent in 2005. A 20-percent goal is achievable. I am proud that Nevada has adopted the most aggressive renewable portfolio standard in the Nation, requiring that 5 percent of the State’s electricity needs be met by renewable energy resources in 2003—that is next year—and then climbing to 15 percent by the year 2013.

If Nevada can meet its renewable energy goal of 15 percent by 2013, then the Nation certainly should be able to meet its goal, 20 percent, in the Jeffords amendment.

To meet the goals of 2013, Nevada will develop 400 megawatts of wind, 400 megawatts of geothermal, and will do other things such as solar and biomass facilities. But it can be done. If it can be done in Nevada, it certainly can be done in the rest of our Nation. Fourteen States have already adopted a renewable portfolio standard. Why? Because they believe it works. We need a renewable portfolio standard, national standard, to ensure the energy security of this Nation and diversify our energy supply; to reduce the price volatility in energy markets; to set clear, reachable goals for the growth of renewable energy resources; to establish a system of tradable credits that allow a utility flexibility to meet these goals and reduce the cost of renewable energy technologies to create a national market.

I was listening to public radio one morning last week. I was stunned to hear a report of an article in the Journal of the American Medical Association that linked, clearly, lung cancer to soot particles from powerplants and motor vehicles. This study was exhaustive—500,000 people in 16 American cities whose lives and health have been tracked since 1982, for 20 years. Experts gave the study high marks.

The conclusions are obvious. We need to improve the quality of our air for the health and well-being of the American people.

Threats of adverse health effects cost us billions in medical care, and their cost in human suffering cannot be measured.

My good friend, Senator Jeffords, knows with great concern that America needs to build its energy future on an environmental foundation that doesn’t compromise air and water quality.

If we begin to factor in environment and health effects, the real cost of energy becomes more apparent. At the Nevada Test Site, I have indicated to the Senate what could happen there with solar power production. But a new wind farm there—it has already received the DOE’s permission to be built—will provide 250 megawatts to meet the needs of 260,000 Nevadans. The energy cost for this wind farm will be 3 cents to 4.5 cents per kilowatt hour with the benefit of production tax credits.

Renewable energy, such as wind, geothermal, and biomass, will provide power. But the advantage is more than environmental and health effects. Making the transition to renewable energy will make us less dependent on foreign oil. By 2010, it is estimated that 15 percent of our electricity will be generated by renewable sources.

I say to my friend from Vermont, I know better than anyone that American companies will be ready to lead the way in the 21st century by tapping their vast potential of clean renewable energy. Congress should pass energy legislation with a vision that looks to the future and assures the Nation of continued prosperity and a cleaner environment.

This Congress, this Senate, must commit ourselves to renewable energy for the security of the United States, for the protection of our environment, and for the health and welfare of our people.

The PRESIDING OFFICER. The Senator from Oregon.

AMENDMENT NO. 3014 TO AMENDMENT NO. 2917

Mr. Wyden. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the clerk will report.

The legislative clerk read as follows: The Senator from Oregon [Mr. Wyden], for himself and Mrs. Feinstein, proposes an amendment numbered 3014.

Mr. Wyden. I ask unanimous consent the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To establish within the Department of Justice the Office of Consumer Advocacy.)

On page 57, between lines 17 and 18, insert the following:

SEC. 253. OFFICE OF CONSUMER ADVOCACY.

(a) DEFINITIONS.—In this section:

(1) COMMISSION.—The term “Commission” means the Federal Energy Regulatory Commission.

(2) ENERGY CUSTOMER.—The term “energy customer” means a residential customer or a small commercial customer that receives products or services from a public utility or natural gas company under the jurisdiction of the Commission.

(3) NATURAL GAS COMPANY.—The term “natural gas company” has the meaning given in section 2 of the Natural Gas Act (15 U.S.C. 717a), as modified by section 601(a) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3311(a)).

(4) OFFICE.—The term “Office” means the Office of Consumer Advocacy established by subsection (b)(1).

(5) PUBLIC UTILITY.—The term “public utility” has the meaning given in section 231 of the Federal Power Act (16 U.S.C. 824(e)).

(6) SMALL COMMERCIAL CUSTOMER.—The term “small commercial customer” means a commercial customer that has a peak demand of not more than 1,000 kilowatts per hour.

(7) ESTABLISHMENT.—There is established within the Department of Justice the Office of Consumer Advocacy.

March 14, 2002

CONGRESSIONAL RECORD—SENATE
I ask unanimous consent that a set of letters endorsing this amendment be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

WASHINGTON DC,
February 28, 2002

DEAR SENOIR: As the Senate begins consideration of S. 517, the comprehensive energy bill, we urge you to consider several amendments that would protect consumers, especially as electricity markets continue to be deregulated.

First, Senator Wyden will likely be introducing an amendment to create an Office of Consumer Advocacy to handle energy issues within the Department of Justice (DOJ). This office will provide an independent advocate for ratepayers, particularly in cases where State utility commissions are not protecting consumers. In addition, the amendment would put in place an independent energy ombudsman within DOJ to provide greater oversight of energy trading markets.

With regard to the energy trading markets, Senator Feinstein is planning to address regulatory shortcomings that were evident by Enron's collapse through an amendment that would provide for regulatory oversight by the Commodity Futures Trading Commission (CFTC) of derivatives and energy commodities. This would ensure that energy traders cannot operate without appropriate federal oversight that makes market transactions transparent.

Moreover, the amendment, which would protect consumers, would put in place a more comprehensive framework to ensure that FERC can better detect problems, before they lead to a complete breakdown in the electricity market.

In cases where a utility engages in transactions with the parent company, the consumer advocate can independently investigate to make sure the utility ratemakers are not harmed by deals which enrich the parent company at the expense of the utility and its ratepayers.

A number of organizations support this legislation. I want to take a minute to particularly commend the American Association of Retired Persons (AARP), Florida, Maine, and Washington, D.C., for their leadership in this effort. Their work over the years has been invaluable to protecting the elderly. They have used their influence to advocate for public interest in the wholesale energy market. They have collaborated to develop an educational program for the elderly. They have worked together with a grassroots organization on behalf of this effort involving the public interest research organizations, State associations of advocates for ratepayers, and the ones that I think do a very good job given the limited tools they have today.

The Office may represent the interests of energy customers on matters concerning rates or service of public utilities and natural gas companies under the jurisdiction of the Commission.

At the State level, many States—in fact, the majority of the States—have put in place consumer advocates whose job is to stand up for the energy ratepayer. The fact is that across this country, the last year, America's energy business has undergone dramatic changes. New sources of power are produced by State-regulated utility companies. Unregulated market makers are providing an increasing share of new power generation in this country.

We have the States across the country trying to stand up for the ratepayer. Many of the legislatures have created these consumer advocates that monitor energy prices to make sure the State-regulated utilities are charging fair rates. But when power is being traded like pork bellies and so much of the energy business has moved interstate, the State advocates have no way to investigate or address the wholesale power prices that eventually raise retail consumer rates and that are spawned by interstate activity.

What I am proposing in this legislation—this is a part of what my colleagues Senators BINGAMAN, MURKOWSKI, HATCH, and LEAHY, have already made clear—is that we will continue to refine this bill as we go through the legislative process, and we will create a Federal advocate for the energy consumer. That advocate at the Department of Justice will have the authority to address the interstate trading of wholesale power and to spot pricing and to raise rate hikes before they get to the State-regulated utilities and their retail ratepayers.

My view is that consumer advocates provide an independent watchdog over a very important issue that come before the Federal Energy Regulatory Commission and a number of agencies that affect energy policy and the American consumer.

Power, of course, used to be produced and sold by State-regulated utilities. Those advocates were able to watchdog the entire process. But today, with State advocates being forced to rubberstamp a lot of these electric rate increases caused by spikes in interstate prices, the Federal consumer advocate could ask for protection of consumer interests. If the increases weren't just and reasonable, the advocates could represent the consumer in a complaint before the Federal Energy Regulatory Commission, challenging those prices.

Some may say as they consider this issue that there really isn't a need for a Federal advocate, that utilities and other buyers of energy can bring cases on their own with the Federal Energy Regulatory Commission if someone is manipulating the market. But that approach won't work when the buyer of energy is the utility owned by an energy marketer. The utility isn't going to bring a complaint that the Federal Energy Regulatory Commission against its parent company.

In cases where a utility engages in transactions with the parent company, the consumer advocate can independently investigate to make sure the utility ratemakers are not harmed by deals which enrich the parent company at the expense of the utility and its ratepayers.

I want it understood that I very much share Senator REED's views with respect to renewable energy. He and Senator JEFFELDS have really been our leaders.

This amendment has been cleared on both sides of the aisle.

As I begin my remarks, I would especially like to express my appreciation to Senators BINGAMAN, MURKOWSKI, LEAHY, and HATCH. All of them have been very gracious in terms of working with me on this issue.

This amendment would establish within the Department of Justice the Office of Consumer Advocacy. This is especially important right now because our Nation's electric power system is undergoing dramatic changes. New sources of power are produced by State-regulated utility companies. Unregulated market makers are providing an increasing share of new power generation in this country.

At the State level, many States—in fact, the majority of the States—have put in place consumer advocates whose job is to stand up for the energy ratepayer. The fact is that across this country, the last year, America's energy business has undergone dramatic changes. New sources of power are produced by State-regulated utility companies. Unregulated market makers are providing an increasing share of new power generation in this country.

We have the States across the country trying to stand up for the ratepayer. Many of the legislatures have created these consumer advocates that monitor energy prices to make sure the State-regulated utilities are charging fair rates. But when power is being traded like pork bellies and so much of the energy business has moved interstate, the State advocates have no way to investigate or address the wholesale power prices that eventually raise retail consumer rates and that are spawned by interstate activity.

What I am proposing in this legislation—this is a part of what my colleagues Senators BINGAMAN, MURKOWSKI, HATCH, and LEAHY, have already made clear—is that we will continue to refine this bill as we go through the legislative process, and we will create a Federal advocate for the energy consumer. That advocate at the Department of Justice will have the authority to address the interstate trading of wholesale power and to spot pricing and to raise rate hikes before they get to the State-regulated utilities and their retail ratepayers.

My view is that consumer advocates provide an independent watchdog over a very important issue that come before the Federal Energy Regulatory Commission and a number of agencies that affect energy policy and the American consumer.

Power, of course, used to be produced and sold by State-regulated utilities. Those advocates were able to watchdog the entire process. But today, with State advocates being forced to rubberstamp a lot of these electric rate increases caused by spikes in interstate prices, the Federal consumer advocate could ask for protection of consumer interests. If the increases weren't just and reasonable, the advocates could represent the consumer in a complaint before the Federal Energy Regulatory Commission, challenging those prices.

Some may say as they consider this issue that there really isn't a need for a Federal advocate, that utilities and other buyers of energy can bring cases on their own with the Federal Energy Regulatory Commission if someone is manipulating the market. But that approach won't work when the buyer of energy is the utility owned by an energy marketer. The utility isn't going to bring a complaint that the Federal Energy Regulatory Commission against its parent company.

In cases where a utility engages in transactions with the parent company, the consumer advocate can independently investigate to make sure the utility ratemakers are not harmed by deals which enrich the parent company at the expense of the utility and its ratepayers.

A number of organizations support this legislation. I want to take a minute to particularly commend the American Association of Retired Persons (AARP), Florida, Maine, and Washington, D.C., for their leadership in this effort. Their work over the years has been invaluable to protecting the elderly. They have used their influence to advocate for public interest in the wholesale energy market. They have collaborated to develop an educational program for the elderly. They have worked together with a grassroots organization on behalf of this effort involving the public interest research organizations, State associations of advocates for ratepayers, and the ones that I think do a very good job given the limited tools they have today.

The Office may represent the interests of energy customers on matters concerning rates or service of public utilities and natural gas companies under the jurisdiction of the Commission.
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Dirksen Senate Office Building, Washington, DC.

Dear Chairman Bingaman:

I am writing to express the National Association of State Utility Consumer Advocates strong support for an amendment we expect to be offered by Senator Wyden establishing an Office of Consumer Advocacy in the Department of Justice.

Restructuring experiences in the states have consistently shown that the road to competition is difficult. In many instances, consumers have faced higher prices and limited, if any, choices. State consumer advocate offices have worked diligently to protect consumers during this difficult transition. However, they have found their limited resources (half of our members’ budgets are $1 million or less with less than 10 employees) stretched to the limit, particularly as wholesale prices set by FERC in Washington increasingly determine what consumers ultimately pay back home. Most consumer advocate offices simply do not have the resources to fight in both venues.

An Office of Consumer Advocacy would give residential consumers much needed representation in Washington and a fighting chance to benefit from legislation passed by Congress. We urge you to support this critical amendment.

Thank you for your leadership to enact comprehensive energy legislation.

Sincerely,

[signature]

ADAM J. GOLDBERG, Executive Director.

Mr. Wyden. Mr. President, as I indicated earlier, my colleague—particularly Senator FRANK MURKOWSKI, LEAHY, and HATCH—have been very gracious in working with me on this position. We are going to continue to work with them as this legislation is considered in the Senate and when this bill gets to conference.

As we go forward with this today, I hope we will ensure that there is a strong Federal presence to advocate for the consumer. I think these advocates at the State level do a good job given their limited resources.

Given the fact that so much of the energy business has moved interstate, and those interstate transactions can result in higher bills to small businesses in some States and across this country for senior citizens and others of modest means, I think we need to now have a Federal advocate.

I am pleased we have been able to assemble a bill that is going to help pass this today and continue to work to refine it as it is considered through the evolution of this legislation in the Senate and in conference.

I ask the Senate to approve the amendment at this time.

I yield the floor.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. Bingaman. Mr. President, this is a good amendment. I congratulate the Senator from Oregon for his leadership in bringing this amendment to the Senate and for us to consider it as part of this bill. It has been cleared on both sides. I am authorized by the Republican leadership to indicate that.

There is a lot already in the bill that protects consumers. Obviously, a main theme of this bill is to empower and protect consumers. This will add to that and make sure that the bill and amendment.

We very much appreciate the cooperation of the other side in having this amendment added.

I urge all colleagues to support the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

The amendment (No. 3014) was agreed to.

Mr. Bingaman. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DURBIN. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. Bingaman. Mr. President, I am going to address, in a few moments, the pending issue involving the energy bill, particularly when it comes to the renewable portfolio standard for energy. Before I do that, though, I ask the indulgence of the Senate and the new moments to address an unrelated issue which I think is of critical importance to our Nation.

(The remarks of Mr. Durbin are printed in CONGRESSIONAL RECORD for March 15, 2002).

The PRESIDING OFFICER. The Senator from Illinois.

Mr. Durbin. Mr. President, I rise to speak to the pending matter being debated concerning the renewable portfolio standard.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. Bingaman. Mr. President, if I may prepay a unanimous consent request before my colleague from Illinois continues with his comments, I ask unanimous consent, since we have a vote at 2 o’clock on the Thomas amendment, that at 1:50 we reserve 10 minutes equally divided between Senator Thomas and myself where he can explain his amendment, and I can explain the arguments against it.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. Durbin. Mr. President, if I may try to make my presentation briefer so they have more time if needed. I thank the Senator from New Mexico for his leadership on this issue.

This is supposed to be an energy bill which is going to give America more energy security, make us more independent of foreign oil sources, clean up our environment, and grow the energy needs of the growing American economy in the 21st century. That is a tall order for any single piece of legislation.

What happened on the floor of the Senate yesterday calls into question whether or not we are facing this challenge responsibly. If we cannot pass a fuel economy standard, a fuel efficiency standard for cars and trucks in America, then we have given a great victory not only to the special interests who are fighting it but a great victory to OPEC. Yesterday was a wonderful day of victory for OPEC and all of...
the foreign oil producers who have America hooked on foreign sources of oil.

We came to the Senate floor and, by a vote of 67 to 32, better than a 2-to-1 margin, we rejected the notion that we would have to go to war against new fuel efficiency standards for cars and trucks in America. We haven’t had such a standard since 1985. So for 17 years, no progress has been made. And by its decision, 67 to 32 yesterday, this Senate said: And we are not interested in changing it in the future.

The Senate gave authority to NHTSA, the National Highway Transportation Safety Administration, to take a look at it, consider it, view it, wrestle with it, to get back to us when they want to. That is totally unacceptable. It is an abdication of our responsibility to future generations. It is a decision which will come back to haunt us as we continue to be dependent on foreign energy sources.

This is going to drag us into political tight fixes and situations around the world where American lives will be at stake because the Senate does not have the courage to stand up and say to the American people: we need to give real leadership to the Big Three in Detroit: you can do a better job, you can make better cars and trucks, and we challenge you to do it over a period of time; and to say to the American people: yes, you may not be able to buy the fattest, biggest SUV that can come out of your dream sequence, but we believe you can have a vehicle that is safe and fuel efficient for you and your family and your business.

We were unwilling to do that yesterday—too much to ask of the American people to consider that possibility. I looked at some of the comments that were written and said on the floor yesterday suggesting that the American people are just too self-centered to be prepared to make any sacrifice for the good of this country. How could anybody start with that premise after what we have seen since September 11?

This country is prepared to roll up its sleeves and fight the war on terrorism. This country is prepared to sacrifice if necessary to make us more secure. The families and businesses across this country are waiting for leadership from this Congress to make this a better, safer, and stronger Nation.

Yesterday, colleagues in opposition to fuel efficiency said: We wouldn’t dare ask Americans to consider making that kind of sacrifice. I am sorry. We missed a golden opportunity. I am afraid today we are about to do the same thing. It is bad enough that we can’t have fuel efficiency standards. Now we are talking about what is known as a renewable portfolio which means looking at alternative forms of energy that do not threaten the environment and give us energy independence.

I applaud Senator Jeffords of Vermont. I was happy to cosponsor his amendment. He says America should move to the point where in the year 2020, about 18 years from now, 20 percent of our electricity is generated from renewable sources. Today it is about 4 percent. The underlying bill sets a goal of about 10 percent by the year 2020. Why is this important? Because as we find other sources for electricity, we lessen our dependence on foreign sources, and we also have a cleaner environment. We create a new industry to promote this, this technology which is going to make us less and less dependent on our current sources for the generation of electricity. Those sources would obviously be, in most instances, coal; in some instances it would be gas, natural gas; oil; or it could be nuclear.

I come from a State that produces coal. I would like to see us return to the day when coal becomes an environmentally responsible alternative to other sources of energy. I have voted, and I will continue to do so, for research to find ways to use that coal in an environmentally sensible way so that we can promote energy sources in the United States not at the expense of America’s public health. We need to do that.

At the same time, we need to look to other sources that are benign, sources that can produce electricity without damaging the environment in any way. One of those is clearly obvious is this concept of wind power, which can wind up a lot of people. They have not seen the wind generating stations across the United States, but they are popping up all over the place. Senator Grassley from Iowa is in the Chamber. The State of Iowa is seeing more and more of the wind generating turbines that are, frankly, generating electricity for small and large uses. That makes a lot of sense, and it is part of the renewable portfolio.

It is important for us to keep an eye on these elements that can give us energy independence and a cleaner environment.

Wind power is used for electricity. It lights our homes, our office buildings, and powers our industries. It is very misleading for people to say we don’t need to worry about wind power; we are going to go and drill for oil and gas in the Arctic; we are going to go to the ANWR area, the National Wildlife Refuge. There is one answer from the other side of the aisle when you talk about America’s future energy needs. I think that is a false choice and a bad choice. There are many other concepts of conservation and fuel efficiency and making certain that we have alternative fuels that are going to be encouraged.

Can this be done? Can we really move to a 20-percent standard by the year 2020? We would have to work hard at it. We would have to have leadership in Washington. Take a look at some of the other countries around the world that have said they are going to do the same thing. Denmark, Spain, and Germany are already near 20 percent in their electricity production just from wind turbines alone. The European Union has a goal of reaching 22-percent renewable energy in electricity by the year 2010. The State of Nevada has a 15-percent RPS by 2015. Connecticut and Massachusetts and similar goals. The State of California is currently at 12 or 13 percent in their renewable portfolio. The city of Chicago, under the leadership of Mayor Daley, has said they will move toward more wind power as a source of electricity.

In individual settings around the country and around the world, leaders are stepping up and saying: We accept the challenge. We believe we can do this. Whether we are going to use wind power, solar energy, geothermal or biomass, there are ways to do it that can be attained and attained successfully.

There will be critics who will come to the floor and say this is an idea that is also flawed, much like fuel efficiency in vehicles. They will toss out this opportunity for us to look ahead with vision and determination to become a nation that is more energy secure, more energy independent, and using sources of energy that are more environmentally acceptable.

I say to my colleagues: I hope we don’t gut this provision when it comes to the renewable portfolio. Senator Jeffords has a valuable suggestion. I hope it is offered and that it passes. Please, let’s not go any further down the chain lower than the 10 percent that is being called for by the underlying bill. If this is truly going to be an energy bill to meet our Nation’s energy needs, we have to address the real issues of fuel efficiency, of conserving energy in this country, and of finding alternative sources that are environmentally acceptable.

At this point, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. Bingaman. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. Bingaman. Mr. President, under the unanimous consent agreement, I have reserved 10 minutes—5 for myself, 5 for Senator Thomas—and I think the protocol is that since Senator Thomas has the amendment, he would want his 5 minutes last. I will go ahead with my statement at this point and urge people not to support the Thomas amendment.

Let me, once again, make the large points that need to be made. I will put up the map of the country again. These are the electricity regions that are all over the country. This largest one, by far, is that part of the country and contains 14 States. The amendment before us, which Senator Thomas offered, is an amendment...
that the Western Governors’ Association has put together, which, as I see it, does several things.

First, it dramatically complicates the process by which we try to ensure that the system for transmitting power around the country is reliable. It put up another chart that tries to make that point. I will not go through every detail of it. I will try to make the point that if a complaint is filed and it is indicated that some utility is not abiding by the directions that are to be abided by in order to ensure the reliability of the system, and it is not doing what is required, then under Senator Thomas’s amendment you have a very complex procedure that could, in fact, take place, where the electric reliability organization that is called for in his amendment decides it wants to take action, and before it can, it is required to give notice, have a hearing. If it decides to take action, all it is permitted to do is impose a penalty. It cannot compel compliance or issue an order compelling compliance as FERC can.

This electric reliability organization is also required to approve regional entities and delegate enforcement authority, and there are rebuttable presumptions written into this that say, just in the western part of the country, just in this area here in the pink, there are rebuttable presumptions that anything they do is right—that FERC has one set of standards that apply to the rest of the country, but in this area there are rebuttable presumptions that what is done is accurate.

In my view, this complicates matters. It is an inconsistent set of rules. It is not an appropriate set of national rules. It is not fair, quite frankly, to the rest of the country. I come from a State that is in this area, so perhaps I should be on the other side of this issue. But this is not good national policy. In my view, it is not fair to a lot of the other States. We have letters I have put into the RECORD already to indicate that various of the regional transmission organizations are upset about this inconsistent treatment.

Quite frankly, the complexity of this amendment undercut any meaningful accountability in the system. We have been trying to ensure that someone can be held accountable when the lights go out, when the electricity quits flowing. You can’t get to them to call to say they have fallen down on the job; it was your responsibility to do this, and you have fallen down on the job.

Under this amendment, it is going to be really tough to tell whom you ought to call because the electric reliability organization might be the right one, or the regional entity might be, or FERC might have some authority. Quite frankly, we can see the time down the road when we can wind up with a hearing in the Energy Committee, the lights will have gone out somewhere in the country, power will have failed, and we will call in the FERC Commissioners and say: What is the problem?

Why were you not doing your job? They will say: We were doing our job. Under the statute you passed, you told us to presume these people knew what they were doing. It was a rebuttable presumption. We took you at your word. It turns out they didn’t know what they were doing.

I think the proposal we have in the underlying bill is far preferable, much simpler. It puts accountability right at FERC and gives FERC flexibility to continue to defer to the industry organization that is in the regional area, to defer to governmental organizations, as they determine appropriate. I urge people to oppose the Thomas amendment on those grounds.

The PRESIDING OFFICER. The Senator from Wyoming is recognized.

Mr. THOMAS. Mr. President, we have gone over this pretty thoroughly. We have pretty much explained the direction we are taking.

I might say to the Senator from New Mexico regarding his last comment that FERC would have the authority to make these decisions. Now we have local input and different kinds of things, but FERC has the authority. To make the suggestion that FERC would somehow say we could not do it simply is not accurate.

So we are trying to ensure transmission grids and delivery of electricity that will be safe and reliable. Consumers need that. The lights will go on, and they must stay on.

The amendment I am offering establishes a nationwide organization that has the authority to establish and enforce reliability standards. The new reliability organization would be run by participants and be overseen by FERC. The idea that somehow there is no authority here is simply not true. The reliability organization would be made up of representatives of everybody affected—residential, commercial, industrial, State, independent power producers, electric utilities, and others, as opposed to only FERC.

There is no question but that we need a new system. The question is—we can do it in different ways—how will we do it? It gives all the responsibility to FERC and sets the standards. We agree that we need protection. It is not whether we need it, but it is how we get it. I think the Daschle bill takes the wrong approach; hence our amendment. We know there are great differences in design, and economics over the different parts of the country. So we want to have those people in those areas having input into how to resolve it in that particular area. FERC is not necessarily sensitive to those particular changes and differences that are there. So we believe very strongly we need to do that.

There is a very important question to the Northwest, particularly, and that is transmission from Mexico and Canada. The Canadian import of power is particularly important, of course, and we don’t want to let that happen. So this amendment addresses these concerns. It converts the existing NERC voluntary reliability system into a mandatory reliability system.

The new reliability organization will have enforcement powers with real teeth to ensure reliability. The amendment provides mandatory reliability rules that will apply to all uses of the transmission grid. No loopholes, nobody is exempted. It is the kind of thing, certainly, that most of us believe in, that we ought to take in government; that is, to empower local people who are experts in what they are doing.

FERC has been working for a very long time. When we look at the California situation, we see that reliability was the issue that was least important. Reliability was there. So we ought to use that experience rather than trying to build a new bureaucracy in FERC which doesn’t have the authority or the capability of doing these kinds of things.

I urge that you vote for this amendment. If I might, I ask unanimous consent that Senator Shelby be added as a co-sponsor to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Idaho.

Mr. CRAIG. I strongly support what the Senator from Wyoming has brought to the floor. As we have moved to restructure the electrical systems of our country, the Senator from New Mexico sweeping it into a Federal single authority without the kind of flexibility we need.

The Senator from Wyoming is absolutely correct. What we have had has stood the test of time. Western Governors believe in that. If you want to take the authority away from the States and put it with the bureaucracy in Washington, DC, then you would oppose the Senator from Wyoming. I believe that is exactly the opposite direction in which we are heading. Therefore, I hope my colleagues will support this amendment dealing with the reliability issue of this important title.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I move a point of order that the pending amendment violates section 302(f) of the Congressional Budget Act of 1974.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. THOMAS. Mr. President, I move to waive the pertinent section of the Budget Act, and I ask for the yeas and nays.

I also have to add, we did not even know about this until 10 minutes ago. We did not even have time to look at what they are talking about. The Budget Committee is not able to tell us. I guess if my colleagues want to play this game, we can do it on the whole bill.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.
The question is on agreeing to the motion. The clerk will call the roll.

The legislative clerk called the roll.

The PRESIDING OFFICER (Mrs. CARNAHAN). Are there any other Senators in the Chamber desiring to vote?

The yeas and nays are as follows—yeas 60, nays 40, as follows:

[Roll call Vote No. 49 Leg.]

YEAS—60

Allen  East  McConnell
Allard  East  McConnell
Baucus  East  Murray
Bennett  East  Murray
Bond  East  Nelson (NE)
Boxer  East  Vickers
Brownback  East  Roberts
Bunning  East  Santorum
Burns  East  Sessions
Campbell  East  Shelby
Cantwell  East  Smith (OR)
Cochran  East  Smith (MS)
Collins  East  Snowe
Cornyn  East  Stevens
Craig  East  Thomas
Crapo  East  Thompson
DeWine  East  Thurmond
Domenici  East  Voinovich
Durbin  East  Warner
Ensign  East  Wyden

NAYS—40

Allard  East  Lugar
Bayh  East  Matsuoka
Biden  East  Nelson (FL)
Bingaman  East  Reed
Breaux  East  Reed
Byrd  East  Rockefeller
Carnahan  East  Sarbanes
Carper  East  Schumer
Chafee  East  Specter
Claiborne  East  Stabenow
Clinton  East  Torricelli
Curnin  East  Wellstone
Daschle  East  Wyden
Dayton  East  Lieberman

The PRESIDING OFFICER (Mrs. CARNAHAN). On this vote the yeas are 60 and the nays are 40. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to and the point of order fails.

If there is no further debate, the question is on agreeing to the amendment No. 3012 of the Senator from Wyoming.

The amendment (No. 3012) was agreed to.

Mr. REID. I move to reconsider the vote.

Mr. MURKOWSKI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Madam President, I will comment for a couple of minutes regarding what we went through in the last 20 minutes. I note the presence of the majority whip on the floor, for whom I have the greatest respect and total trust in terms of fair treatment.

Regarding the point of order raised on this amendment, which no one knew about until it was raised, from what I can tell, on the side of the aisle—it would have been a good and fair thing had it been called to the attention of the proponent of the amendment. I assure Members, had the opponents of the amendment prevailed on the point of order, on this particular amendment, all one has to do was change it. Instead of directed spending, it would be subject to an appropriation and it would no longer be subject to a point of order, from what I have been informed in my conversations with the Parliamentarian.

So that means we would just go through two votes because somebody thought making a point of order on the Budget Act would have gotten rid of that amendment. It would not have. Had that vote been 59 instead of 60, we would fix the amendment, re-offer it, and do what I just said by way of altering it.

That could have all been understood between enlightened staffers and Senators who would like to do that. I don’t think the Senators were aware of it. I just raise it because it shocked me that this very important amendment, which I worked on and participated in, was subject to a point of order. I didn’t know it or I would have advised them to fix it.

I yield the floor.

Mr. MURKOWSKI. Madam President, just to make clear for the information of my colleague, I did advise the sponsor of the amendment about a half hour before the vote and I had been informed that a Budget Act point of order could be raised, and I would intend to raise it. I understand from him now that was not adequate time for him to get the advice he needed in this connection. Perhaps we should have delayed the vote for a longer period. That was not even considered by me or him.

At this point, unless there are other Members seeking recognition, I will offer another amendment.

The PRESIDENT. The Senator from Alaska.

Mr. MURKOWSKI. Madam President, I thank my colleague from New Mexico. I encourage Members to have our amendment accepted. We think the recognition that clearly we had an alternative, as the senior Senator from New Mexico indicated, under this connection, suggests that in the future we could work a little more closely to ensure we move along because there may be other points of order on other amendments that will be coming up.

I encourage the Senator BINGAMAN to proceed with his proposed amendment, and we will move on with this process. We look forward to participating.

AMENDMENT NO. 3016 TO AMENDMENT NO. 2917

Mr. BINGAMAN. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. BINGAMAN] proposes an amendment numbered 3016 to amendment No. 2917.

Mr. BINGAMAN. I ask unanimous consent the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To clarify the provisions relating to the Renewable Portfolio Standard)

On page 67, strike line 6 and all that follows through page 76, line 11, and insert the following:

“SEC. 606. FEDERAL RENEWABLE PORTFOLIO STANDARD.

“(a) MINIMUM RENEWABLE GENERATION REQUIREMENT.—For each calendar year beginning in calendar year 2005, each retail electric supplier shall submit to the Secretary, not later than April 1 of the following calendar year, renewable energy credits in an amount equal to the required annual percentage specified in subsection (b).

“(b) REQUIRED ANNUAL PERCENTAGE.—

“(1) For calendar years 2005 through 2020, the required annual percentage of the retail electric supplier’s basic amount that shall be generated from renewable energy resources shall be the percentage specified in the following table:

<table>
<thead>
<tr>
<th>Calendar Years</th>
<th>Required annual percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>2005 through 2006</td>
<td>1.0</td>
</tr>
<tr>
<td>2007 through 2008</td>
<td>2.2</td>
</tr>
<tr>
<td>2009 through 2010</td>
<td>3.4</td>
</tr>
<tr>
<td>2011 through 2012</td>
<td>4.6</td>
</tr>
<tr>
<td>2013 through 2014</td>
<td>5.8</td>
</tr>
<tr>
<td>2015 through 2016</td>
<td>7.0</td>
</tr>
<tr>
<td>2017 through 2018</td>
<td>8.5</td>
</tr>
<tr>
<td>2019 through 2020</td>
<td>10.0</td>
</tr>
</tbody>
</table>

“(2) Not later than January 1, 2015, the Secretary may, by rule, establish required annual percentages in amounts not less than 10% for calendar years 2020 through 2029.

“(c) SUBMISSION OF CREDITS.—(1) A retail electric supplier may satisfy the requirements of subsection (a) through the submission of renewable energy credits. 

“(A) issued to the retail electric supplier under subsection (d);

“(B) obtained by purchase or exchange under subsection (e); or

“(C) borrowed under subsection (f).

“(2) A credit may be counted toward compliance with subsection (a) only once.

“(d) ISSUANCE OF CREDITS.—(1) The Secretary shall establish, not later than one year after the date of enactment of this section, a program to issue, monitor the sale or exchange of, and track renewable energy credits.

“(2) Under the program, an entity that generates electric energy through the use of a renewable energy resource may apply to the Secretary for the issuance of renewable energy credits. The application shall include—

“(A) the type of renewable energy resource used to produce the electricity;

“(B) the location where the electric energy was produced; and

“(C) any other information the Secretary determines appropriate.

“(3)(A) Except as provided in paragraphs (B), (C), and (D), the Secretary shall issue to an entity one renewable energy credit for each kilowatt-hour of electric energy the entity generates from the date of enactment of this section and in each subsequent calendar year through the use of a renewable energy resource at an eligible facility.

“(B) For incremental hydropower the credit shall be calculated based on the expected increase in average annual generation resulting from the efficiency improvements or
capacity additions. The number of credits shall be calculated using the same water flow information used to determine a historic average annual generation baseline for the hydroelectric facility and certified by the Secretary or the Federal Energy Regulatory Commission. The calculation of the credits for incremental hydropower shall not be based on a change in the efficiency of the hydroelectric facility not directly associated with the efficiency improvements or capacity additions.

"(C) The Secretary shall issue two renewable energy credits for each kilowatt-hour of electric energy generated and supplied to the grid in that calendar year through the use of a renewable energy resource and a non-renewable energy resource and a non-renewable energy resource are used to generate the electric energy, the Secretary shall issue credits based on the proportion of the renewable energy resource and the non-renewable energy resource used. The Secretary shall identify renewable energy credits by type and date of generation.

"(D) When a generator sells electric energy generated through the use of a renewable energy resource to a retail electric supplier under a contract subject to section 210 of this Act, the retail electric supplier is treated as the generator of the electric energy for the purposes of this section for the duration of the contract.

"(E) The Secretary may issue credits for existing facility offsets to be applied against a retail electric supplier's own required annual percentage. The credits are not tradeable and may only be used in the calendar year generation actually occurs.

"(F) The term 'biomass'—

"(1) Except with respect to material removed from National Forest System lands, the term 'biomass' means any organic material that is available on a renewable or recurring basis, including dedicated energy crops, trees grown for electric production, wood waste and wood residues, plants (including aquatic plants, grasses, and agricultural crops), residues, fibers, animal wastes and other organic waste materials, and fats and oil.

"(2) With respect to material removed from National Forest System lands, the term 'biomass'—

"(ii) the Secretary shall issue the credit, and

"(ii) a repowering or cofiring increment that is placed in service on or after the date of enactment of this section.

"(G) 'Renewable energy resource'—The term 'renewable energy resource' means solar, wind, ocean, or geothermal energy, biomass (including municipal solid waste), landfill gas, a generation offset, or incremental hydropower.

"(H) 'Renewable energy'—The term 'renewable energy' means electric energy generated by a renewable energy resource.

"(I) 'Renewable energy resource'—The term 'renewable energy resource' means solar, wind, ocean, or geothermal energy, biomass (including municipal solid waste), landfill gas, a generation offset, or incremental hydropower.

"(J) 'Renewing or cofiring enforcement'—The term 'renewing or cofiring enforcement' means the additional generation from a modification that is placed in service on or after the date of enactment of this section.

"(K) 'Renewable energy resource'—The term 'renewable energy resource' means solar, wind, ocean, or geothermal energy, biomass (including municipal solid waste), landfill gas, a generation offset, or incremental hydropower.

"(L) 'Renewable energy resource'—The term 'renewable energy resource' means solar, wind, ocean, or geothermal energy, biomass (including municipal solid waste), landfill gas, a generation offset, or incremental hydropower.
we establish a clear policy statement of our need as a nation to diversify our power generation sector.

This amendment establishes a renewable portfolio standard for the electricity sector. This is the corollary, as I see it, to the credible fuel standard that we have heard so many laudatory statements about yesterday. This amendment will ensure that all retail sellers of electricity have a portion of their generation—from renewable resources.

The amendment is modeled after the very successful Texas program that President Bush implemented when he was Governor of Texas. The basic outline is as follows.

All retail sellers with annual sales greater than a million megawatt hours will be required to contract for and secure a certain amount of generation annually from renewable resources. Most co-ops and municipals would be exempt.

Beginning January 2005, 2 years after the date of enactment, retail suppliers will be required to include a minimum of 1 percent of their generation in their retail sales. The percentage would increase annually by .6 percent until 2020.

There are several adjustments to the calculation based on existing renewable supplies. A retailer can subtract from its sales base all existing generation from renewable resources, including hydro. The renewable resources include solar, wind, ocean, biomass, landfill gas, geothermal, generation offsets from renewables that are “net metered” at a customer’s facility, and generation from incremental hydropower improvements and incremental generation from repowering or cofiring.

For new renewables placed in service after the date of enactment, the retailer will get one credit per kilowatt hour generated; 2 credits for net metered; 3 credits for renewable resources that are from landfill gas, geothermal, generation from repowering or cofiring. The first year of the program, the retailer may borrow against expected credits to offset a retail provider’s own annual obligation, but they could not be used for credit trading.

To facilitate the ramp-up of the program, retailers can start to accrue credits from the date of enactment, which they can bank to use within the next 5 years.

The first year of the program, the retailer may borrow against expected generation to be installed within the next 3 years. The price cap of the lesser of 3 cents per kilowatt hour or 20 percent of the average market value of credits for the previous year is contained in the bill.

This is not a guarantee for any renewable generation. This is not a new version of PURPA. Every renewable developer will have to compete in the marketplace. There will be no bureaucrats dictating prices.

I think this would be a major step forward in ensuring that we do develop a diverse set of sources from which we can generate power in this country. I commend to my colleagues the reports on the experience they have had in Texas, in particular, since we have modeled the proposal closely after what was approved in Texas.

I think it is an excellent proposal. I hope very much at the conclusion of our deliberations on this renewable portfolio issue, this amendment can be adopted.

I understand my colleague from Vermont is here and has a second-degree amendment.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Madam President, I ask for the yeas and nays on the Bingaman amendment.

The PRESIDING OFFICER. The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MURKOWSKI. Madam President, I believe Senator BINGAMAN and I can just indicate amendments that we have. I will certainly defer to you on Senator JEFFORDS. We have a couple of Collins amendments, I believe, on our side, and a Kyl amendment that we know about at this time.

Mr. BINGAMAN. Madam President, for the information of my colleague, I am not familiar with the Collins amendments. But I do know of Senator JEFFORDS’ intent to offer an amendment, and I did know of Senator Kyl’s intent to offer an amendment. I will be glad to consult with my colleague about any additional amendments that would be offered.

Mr. REID addressed the Chair.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. I direct a question to the Senator from Alaska through the Chair: The Collins amendment applies to the same subject matter?

Mr. MURKOWSKI. In response to the Senator from Nevada, it is my understanding that they do. One is, I believe, on existing renewables, that they would count. I am not sure that I have information on the other one at this time, but I will be happy to provide it.

Mr. REID. I say to my friend from Alaska, it would be good if today we can finish this renewable part of the amendment package. We do know, as has been talked about here, the amendment of the Senator from New Mexico increases what is in the bill 8.5 percent.

The Jeffords amendment increases it to 20 percent, and the Kyl amendment would wipe out all of them.

We were happy to work procedurally any way possible to have a fair vote and have this issue resolved. Maybe we could do all these votes later this evening.

Mr. MURKOWSKI. I would be happy to encourage Senators on our side to come over with their amendments.

The PRESIDING OFFICER. The Senator from Vermont.

AMENDMENT NO. 3017 TO AMENDMENT NO. 3016

Mr. JEFFORDS. Madam President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont (Mr. JEFFORDS) proposes an amendment numbered 3017 to amendment No. 3016.

Mr. JEFFORDS. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The amendment is printed in the RECORD under “Amendments Submitted.”)

Mr. JEFFORDS. Madam President, I rise to offer an amendment which would do more to encourage development of renewable energy in this country than any other provision in the legislation currently before us.

My amendment will gradually increase the amount of electricity generated by renewable energy in this country to 20 percent by 2020.

I am deeply convinced that it is not only possible to achieve this goal, it is the best policy for this country, and for energy future.

For over 20 years I have pushed clean, renewable energy in this Congress.

In fact, 25 years ago when I came into this body, we were in an energy crisis. That was brought about by the oil cartel that was holding up oil coming from the Middle East. We suffered greatly with long lines of cars. I have been involved with this kind of a problem ever since then. In fact, during that period of time where we had problems created by the OPEC cartel, I was able to offer very significant amendments, working with my partners at the time.

For instance, at that time, we introduced an amendment to make sure we had a photovoltaic effort going on which would help increase the utilization of renewable energy by looking to the Sun for the answer. That was a time when a number of us had come to Congress and were freshmen, but we knew the kind of chaos we had.

The amendment was to the appropriations bill. It was an $18 million amendment. I remember it very well.

When I went to offer it, the chairman of the subcommittee, Tom Bevill of Alabama, came up to me and wrapped his arm around me. He said: Son, you don’t offer amendments to appropriation bills until you have checked with me. I said: Gee, I am sorry, but I can’t wait for that. He said: Well, why not? I said: Because I have 80 cosponsors. He said: 80 cosponsors? I said: Yes, 80 cosponsors. He said: Well, I guess we will have to go ahead.

We went ahead. It passed. We created a photovoltaic industry in this Nation at that time which brought forward a considerable amount of energy relief.

In addition, at the same time, three of us—Congressman Mineta, Congresswoman Taubman, and myself—introduced one to create development for
wind energy. At that time, we did not know who was going to get the credit, so we all kind of flipped coins. The winner was Congressman Blanchard from Michigan who went on to be Governor. Of course, Norm Mineta is now Secretary of Transportation. And I am still here.

But those really were the only two significant renewable energy provisions that passed. They are still there. They were important contributions. But it is time for us to put further emphasis and create further opportunities with respect to the renewable energy field.

It is hard not to, when you see the lakes and forests in my State dying from acid rain.

We have to clean up our act.

It is hard to read the health statistics from air pollution, particularly for the very young and elderly, and not worry about the emissions that continue to pour from this country’s smokestacks.

It is difficult not to care about renewable energy when the northern maple trees are disappearing and our ocean temperatures are rising.

But those really were the only two significant renewable energy provisions that passed. They are still there. They were important contributions. But it is time for us to put further emphasis and create further opportunities with respect to the renewable energy field.

It is difficult not to care about renewable energy when the northern maple trees are disappearing and our ocean temperatures are rising.

We all should care. I am disappointed that this is not more of a concern in this Congress do not care quite enough.

It is unconsolable to continue to shackle ourselves to fuels that dirty our air and water, and that compromise our national security, when clean, abundant, and affordable domestic alternatives exist.

We owe something better to our children, to our environment and to our future.

The amendment that I am offering today would gradually increase the amount of electricity produced from renewable energy nationwide, reaching 20 percent by the year 2020.

States are already out in the forefront on this issue, with 12 States having enacted renewable energy standards and almost a dozen others actively considering one.

Governor Bush signed one into law in Texas in 1999. Nevada law currently requires that 15 percent of state electricity come from renewable energy by 2013, and California is on the verge of passing a state requirement of 20 percent renewables by 2010. This is twice as aggressive as the standard in my amendment.

The technology to produce renewables is clearly sufficient to meet these standards.

During the more than 20 years that I have been in this Congress, the costs of generating wind and solar energy have decreased by 80 percent. Throughout the world, wind is the fastest growing source of electricity generation, and in this country wind-generated electricity is generally competitive with traditional fossil and other fuels.

In 2001, the U.S. wind industry installed $1.7 billion worth of new generating equipment. As this chart illustrates, current installed wind capacity almost doubled between 2000 and 2001, bringing total wind capacity in the United States to 4.258 megawatts, representing billions of dollars in jobs and investments.

This year, wind projects, one from the 1800s and a modern Texas wind farm, illustrate how wind has moved from the past, and into our future.

This Hawaii power plant is operating on geothermal energy, which is also found abundantly throughout the American West.

This office complex in Louisville, KY, is heated and cooled by geothermal heat pumps.

Vast sources of biomass, such as the wood pulp that fires this California power plant, are found throughout the United States. Biomass currently generates more electricity than any other U.S. renewable resource.

As for solar, the Sacramento Municipal Utility District estimates that if every home in every subdivision each year had photovoltaic energy roofs similar to the one in this picture, they would produce the energy equivalent of a major 400 to 500 megawatt power plant every year.

So the technology to produce renewable energy also exists here. The resources also are here. Vast quantities of wind power are found along the East Coast, the West Coast, across large parts of the American West and across the Appalachian Mountain Chain. North and south, abundant wind energy is sufficient to supply 36 percent of the electricity needed in the lower 48 states.

The United States has the technical capacity to generate 4.5 times its current electricity needs from a combination of wind, bioenergy, and other renewable resources.

As to affordability, Federal studies have consistently shown that a Federal renewables standard of 20 percent will have little to no impact on overall consumer energy costs. The most recent study by the Department of Energy’s Energy Information Administration has found that consumer prices for electricity under a 20 percent standard would be largely the same as without one, resulting in an increase of only 3 percent by 2020.

Further, as indicated on the chart— with purple indicating business as usual, and green representing a 20 percent RPS—Federal RPS studies have shown that by 2020, a 20 percent Federal RPS would have no measurable impact on overall consumer energy bills, which would include electricity bills along with home heating and cooling bills, and commercial and industrial energy costs. So the technology is there, the resource is there, and the costs to consumers are minimal.

Despite this, the contribution of renewables to the U.S. electricity market is still well under 3 percent. We must help these industries grow, just as was done with the solar industries. In the same way this Federal Government of our has assisted traditional fuels such as coal, oil and gas, nuclear and hydro-energy throughout their histories. We must level the playing field for the renewables industry and facilitate market entry of these valuable resources.

The U.S. Department of Energy has found that, as the demand for energy without creating new carbon emissions, U.S. carbon emissions will increase 47 percent above the 1990 level by the year 2020. However, as this chart shows— with green representing carbon emissions with a 10 percent RPS by 2020, purple representing a 20 percent RPS by 2020 and pink showing the improvements that can be made by additional energy efficiency provisions—with a 20 percent renewables standard, U.S. carbon dioxide emissions will decrease by more than 10 percent by the year 2020.

Adding renewable energy to our energy mix will also reduce emissions of mercury, sulfur dioxide, and nitrogen dioxide, which contribute to the problems of smog, acid rain, respiratory illness, and water contamination.

A Federal 20 percent renewable energy standard will create thousands of new, high-quality jobs and bring a significant new investment to rural communities. It will create an estimated $80 million in new capital investment, and more than $5 billion in new property tax revenues.

It will bring greater diversity to our energy sector, creating greater market stability, and reducing our vulnerability to terrorist attacks to our energy infrastructure.

For all these reasons, I strongly support a requirement that would achieve the maximum amount of renewable energy production in this country.

I urge my colleagues to support inclusion of a strong renewables standard in this bill. Without such a standard, I think we all must question whether this bill is in fact going in the right direction to ensure a clean, secure American future.

My amendment creates a renewable energy standard under which utilities would be required to gradually increase the amount of electricity produced from renewable energy resources, starting at 5 percent in 2005 and leveling at 20 percent by 2020, a rate that is plenty of time to adjust, plenty of time to make sure we can get to that goal without really creating any problems.

This level allows a long ramp-up time before utilities must begin to comply. The environment, provides the flexibility of adjusting their renewable energy generation within 5 year increments rather than every year.
My amendment places a cap on the cost of renewable energy credits by allowing retailers to purchase credits directly from the Secretary of Energy at 3 cents per credit, thereby ensuring price predictability for retail suppliers. The amendment recognizes the special economics of small entities, and excludes small retailers which sell 500,000 megawatt hours or less of electric energy from the requirements of the bill.

However, my amendment recognizes that not only do we want to encourage renewable energy production and purchase by these small entities, they comprise a large part of the market for larger retailers. The amendment therefore directs the Secretary of Energy to apply money generated by the purchase of renewable energy credits to a program to maximize generation and purchase of renewable energy by these small retailers.

My amendment will also allow utilities credit for existing renewable energy production, thereby increasing the potential for additional renewable production from existing facilities and rewarding those who have taken the initiative to develop green energy. Senator Murkowski, I rise to enlighten my colleagues about renewables because we are going to be spending a good deal of time on the issue of renewables. Senator Jeffords has called for an increase to the underlying bill. I want to make sure everybody knows that we didn’t suddenly find renewables. Renewables have been around for a long time. Some Members aren’t too sure of where we have been on renewables. Some are of the opinion that we haven’t spent much money, time, or attention. Let me try and turn that around because we have spent $6.4 billion on renewables in the past 5 years. We are going to continue to spend money on renewables. We spent $1.5 billion in direct research and development for renewables; $500 million for solar; $330 million for biodiesel; $200 million for hydrogen; and nearly $5 billion in tax incentives; $2.6 billion in reduced excise taxes for alcohol fuels, ethanol. So it is not that we have been asleep in this process. The problem we have is that nonhydro renewables make up less than 4 percent of our total energy needs and less than 2 percent of our electric consumption. I am sorry Senator Jeffords is not present. But it isn’t that we don’t support renewables; the question is, At what price? As I indicated, we spent $6.5 billion in the last 5 years, and we have about 4 percent of our total energy needs in nonhydro renewables, and less than 2 percent of our electric consumption. We can throw enough money at this. The point is, there is a footprint to renewables. There is a misunderstanding on what kind of footprint is involved in the consideration of renewables and the application of that footprint. If you want to talk about solar, it certainly has an application in certain areas. In my State of Alaska in the wintertime, it doesn’t work very well. Go up to Barrow where there are probably 4 months of darkness; solar panels aren’t going to work very well. Go down to the Southern States; clearly they have an application. But they also have a footprint. The same is true with windmills. They have a significant footprint. I will show you some of those charts and how the staff brings this to the Chamber.

The point I want to make is, we haven’t walked into the discovery that renewables are important. They are so important we have spent $6.5 billion in the last 5 years. They are so important that while we have concentrated on them, they still only address 4 percent of our total energy needs and less than 2 percent of electric consumption.

Let me show you a little bit about renewables. They are worthy of consideration and further examination. Wind power is real as long as the wind blows, but sometimes the wind doesn’t blow. Around here, we can usually generate enough hot air to keep the draft going. Sometimes it doesn’t blow. This is the San Jacinto wind farm located outside of Banning, CA. If you have driven from Los Angeles to Palm Springs, you have driven through it. I guess we all have our views of the beautiful mountains and what lies between the vision. That is a lot of windmills. They are probably in this picture, 150 windmills in the background. Some of them work; some don’t. Sometimes the windmills are torn up because the wind doesn’t always blow at the same velocity. Sometimes there are problems. Engineering advancements have come along, and it is a significant contributor to energy. Some of the footprints of particular wind farms, which is one of the largest in the United States, takes about 1,500 acres, and the energy production is 800 million kilowatts of electricity. What does that equate to? That is about 1,300 barrels of oil. We have an equation, 1,500 acres of footprint producing 1,360 barrels of oil.

I hate to be rhetorical, but in comparison, what does 2,000 acres of ANWR produce? One million barrels of oil. Some people suggest that these windmills are Cuisinarts for the birds. The birds do have a bit of a time getting through there if they are flying low. The point is, there is a footprint to renewables.

There are a couple other renewables we think highly of and want to promote. This is one: Solar panels. Solar panels produce the energy equivalent of 4,400 barrels of oil a day. That is 2,000 acres; 2,000 acres of solar panels is a lot of acreage. Two thousand acres of ANWR produce 1 million barrels of oil a day. So, again, we are simply talking about comparisons. It would take two-thirds of the State of Rhode Island to equate to 448,000 acres which would produce as much energy as 2,000 acres of oil in ANWR. So, virtually cover two-thirds of Rhode Island with solid solar panels.

We have another significant contribution to energy, and that is ethanol. Ethanol is made from corn. There is a comparison here because if you took 2,000 acres of ethanol from the farm, 2,000 acres, and produced the energy equivalent of that, it would produce 25 barrels of oil a day. Mr. President, 2,000 acres of corn in ANWR would produce a million barrels a day. So you are talking about an awful lot of acreage to produce an equivalent. All I am talking about is a footprint. It
would take 80 million acres of farm- 
land, or all of the land of New Mexico 
and Connecticut, to produce as much 
ergy as we can get out of 2,000 acres 
of ANWR.

I think I have made my point, Mr. 
President. There is a footprint. Renew- 
able power—approximately 2 per- 
cent. The 10-percent additional renew- 
able mandate, by 2020, would require 6 
times the amount of renewables we are 
currently generating. Is a 10-percent dic- 
tate on renewables anything is achievable, but at what cost? 

We have a chart that shows what the 
Energy Information Administration of 
the Department of Energy has done. It 
is an analysis of the 10-percent re- 
newable portfolio mandate. The EIA estimates that the cost of renew- 
able portfolio mandate will grow to $12 billion per year by 2020. 

Let me refer to the chart. This chart 
I think I have made my point, Mr. 
President. The consumers are bet- 
ter able to decide what is in their own 
best interest than is Congress. If con- 
sumers want to pay extra for “green 
power,” then they should be able to 
do it. A number of States have created 
programs to allow them to do that. In 
Colorado, for example, there is a very 
robust program. It is called the renewable 
portfolio mandate. I oppose Federal command and control of the 

Now, all three propose that the Fed- 
eral Government—Congress, as a mat- 
ter of fact—decides what kind of en- 
ergy we have. And as a consequence, 
force the markets to comply with our views of political cor- 
rectness. Let me say that again. Con- 
grress decides what kind of energy we like and what kind we don’t like. Do we want to pick the energy “flavor of the month,” so to speak, 

pick the winners and the losers based 
regional or local politics? It is one 
thing to support technologies on re- 
source development by tax incentives 
or grants or other direct programs. We 
do that with conservation, renewables, 
and our basic fuels. We encourage ex- 
ploration and development in the ultra 
deepwaters of the Gulf of Mexico, as we 
should. That is one thing, but arbitrary 
dictates on what you must buy, well, 
that is another issue.

I oppose Federal command and control 
of the market. We have a free mar- 
ket in this country. If there is any- 
thing that we should have learned from 
the past 200 years in this Nation, it 
is that free markets work and 

Governments command and control, 
as a rule, doesn’t work. I think the 

proof is out there.

For example, in the 1960s and 1970s, 
we tried to micromanage the natural gas 
business. What did we get? We got 
shortages and price spikes. When we 
deregulated natural gas, we got an 
abundant gas supply and lower prices.

Even more fundamentally, the U.S. ex- 
stinct. It is fine for the world. Their economy collapsed. I have 
no doubt that this Nation, and 

and our industry, can meet any demand we 
put upon them. There is no question 
that it can. If we put a man on the 

Moon, we can certainly build all the 
windmills we want.

So the question isn’t, Can it be done? 
The question is, Should it be done? 

Should we dictate the market—have 
Congress tell consumers what is good 
energy and what bad energy; what 
they should buy or should not buy?

Mr. President, the consumers are bet- 
ter able to decide what is in their own
into office. They tried to put on a Btu—British thermal unit—tax on energy. They failed, coming in the back door.

EIA says consumers will not see most of this cost in terms of higher retail rates. Instead, it will be paid for by other segments of the power industry. I am not that optimistic about EIA’s assessment of cost or impact to consumers. EIA’s numbers are based on a set of assumptions about technology—send in this message capacity—economic which may or may not pan out.

If there is anything more certain than death and taxes, it is that the utilities will pass on consumer costs. In other words, as I have said, anything more certain than death and taxes is the utilities will pass on to the consumers the costs.

The only exception to that was in California when California chose not to pass on the cost of generating electricity. They capped retail rates and were not allowed to pass through the true cost of electricity. And what did we have? We had some of the largest generating companies in the United States in Chapter 11. We learned something from that, but hopefully we will not forget it so soon.

Those costs are going to show up in consumer electric bills one way or another. And we can be sure of that. Do not be lulled to sleep by assertions that the renewable dictate is a free ride. If you believe that, I have a bridge to sell you in Ketchikan, and it has not even been built yet.

Let me point out some of the requirements of the renewable dictate. Under these circumstances, if the utility is not able to meet its renewable portfolio through generation, it is going to have to purchase the credits from someone whose generating electricity pays a Federal penalty. They have to do it one way or another. In other words, consumers in regions and States that do not have renewable opportunities will have to pay for electricity or pays a Federal penalty. They have to do it one way or another. In other words, consumers in regions and States that do not have renewable opportunities will have to pay for electricity or pay a Federal penalty. They have to do it one way or another.

Let me repeat that. Consumers in regions or States that do not have renewable opportunities will have to pay for electricity they do not even receive. I do not know how many people you know, Mr. President, but I know a lot of people who would not want to do that.

How much is this going to cost the consumer in New York or Chicago? It is clear what is going on. It is a Btu tax—a British thermal unit tax—which will transfer massive amounts of money to one politically favored segment of the electric power industry. What is that? Renewable source. I find it unbelievable that you would actually be subsidizing large renewable generators, such as—well, let’s choose Enron as an example, to the tune of up to $12 billion per year.

I am wondering why this Federal mandate is necessary. These 14 States have already established a renewable portfolio mandate program. They, too, would be preempted.

I admire what these States have done. They have taken the initiative to establish a State renewable portfolio mandate. They did it themselves: Arizona, Connecticut, Hawaii, Illinois, Iowa, Maine, Massachusetts, Minnesota, Nevada, New Jersey, New Mexico, Pennsylvania, Wisconsin. This is the market working. People in those States are concerned. They want renewables and are ready to pay for them. They have set up a system, and it works.

This legislation would mandate it across the country. The renewable mandate would thus penalize those States that have already acted to establish a renewable program by requiring these States to replace their State program with a new Federal program. For Heaven’s sake, if it works in these States, why not leave it alone? They are doing their job. People are happy. They would be increasing or rejecting. Other States have considered and rejected a renewable mandate as being unworkable or too expensive.

Senator Jeffords wants to raise the renewable dictate. What does he want to raise it to? He wants to raise it to 20 percent. I oppose that. I think it is impractical, unrealistic, and beyond reasonable costs.

Senator Bingaman’s amendment differs from the underlying Daschle bill in a relatively minor aspect. It retains the 10-percent mandate from the underlying bill. In addition, it double credits to renewables on Indian land, gives credit for not using energy, and it lengthens the program by 50 percent out to the year 2030.

I have a little problem with extending these programs out to 2010, 2020, 2030. My problem is, how many of us are going to be around here in 30 or 28 years to be held accountable for what we are setting as a standard today? It lengthens the program by 50 percent beyond what we are setting.

We should hold ourselves accountable for realistic goals in the future and not put them out so far that other people are going to come along and look at it and say that was simply unattainable or the cost of it was beyond comprehension.

In a nutshell, the Bingaman amendment makes only minor changes to the Daschle bill. I oppose the Bingaman amendment as well, just as I oppose the Daschle bill and gives credit for.

I believe Federal command and control of the market leads to terrible distortions, economic waste, and inefficiency. It is bad for consumers and bad for our economy.

I will support Senator Kyl when he offers his amendment to allow the States to set up their own renewable portfolio program. As I mentioned before, 14 States already have them. They seem very happy with them. They are working. Why do we always have to jump on something the States seem to be doing reasonably well with a Band-Aid as if this is a Federal project and we should take the initiative away from the States. The best government is the government closest to you.

As I mentioned before, 14 States already have it. Senator Kyl’s amendment will allow States to set up their own renewable portfolio program. The Bingaman amendment gives the State utility commission and each nonregulated utility to consider offering consumers renewable energy if available, but it does not require them to do so—only consider doing it. If a State or nonregulated utility concludes that a renewable program is not in their consumers’ best interest, then they should be free to not adopt that. That is exactly what the Kyl amendment does.

If a State adopts the program, then consumers will still be free to decide whether or not green power is worth the cost. Consumer choice has worked well in States such as Colorado where 2 percent of the customers have chosen to pay more to buy power generated by wind turbines, and I believe there is some of that in California as well. Allowing consumers to decide what is in their best interest is the essence of good public policy.

Let me note that some associations in opposition to the renewable portfolio mandate in this bill.

I ask unanimous consent that this letter be printed in the RECORD. There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Hon. Thomas A. Daschle, Hon. Senate Office Building, U.S. Senate, Washington, DC.

Dear Senator Daschle: We are writing to express our deep concern over the economic impact of the renewable electricity portfolio mandates contained in the Substitute Amendment (the Energy Policy Act of 2002) to S. 517. This renewable portfolio standard would require that 10 percent of all electricity generated in 2020 must be generated by renewable facilities built after 2001. The renewable portfolio standard would become effective next year. Activity of renewable generation required would increase every year between 2005 and 2020. While we believe that renewable generation should have an important, and growing, role in supplying our electricity needs, the provisions contained in the Substitute Amendment are not reasonable and cannot be achieved without causing dramatic electricity price increases. This in turn would have the unintended consequence of reducing the competitiveness of American businesses in the global economy and, thereby, reducing economic growth and employment.

Today, according to the Energy Information Administration, renewable facilities placed in service over past decades make up only about 2.16 percent of the total amount of electricity generated in the United States. However, even this modest existing renewable capacity will not count under the Substitute Amendment toward satisfying the renewable electricity portfolio standard, which requires that 10 percent of all electricity generated in 2020 must be generated by renewable facilities built after 2001.

The Substitute Amendment’s 2.5 percent renewable mandate for 2005 would require doubling the amount of non-hydro renewables that are currently in place—something that would be unattainable even though it took us more than 20 years to get to where we are today.
In addition, because the Substitute Amendment requires that 10 percent of all electricity generation, not capacity, must come from renewables, vast numbers of renewable generating facilities will have to be built. Wind energy, perhaps the most promising non-hydro renewable technology, currently only supplies between 20 percent to 40 percent of the time. Solar is also intermittent. Therefore, the actual amount of newly installed capacity needed to generate electricity to meet the Daschle Amendment’s requirements could well exceed 20,000 megawatts by 2005. To put this into context, according to the American Wind Energy Association, we currently have less than 5,000 megawatts of installed wind capacity in the United States.

Simply imposing an unreasonable large, federally mandated requirement to generate electricity from renewables will not guarantee that enough windmills and other renewable facilities can be built on schedule, that the wind (or sun or rain) will cooperate, or that the generating costs will be as low as would be the case from a more diverse, market-directed portfolio attempting to combine as well as renewable and alternative fuels. If retailers do not comply with the mandate, they would face a 3 cent per kilowatt hour civil penalty. Some may suggest that this penalty would operate as a “cap” on the inevitable run up of electricity costs under the AMENDMENT, if this penalty were effective at limiting skyrocketing electricity costs—and experience with similar “penalties” indicates that it will—not the 100 to 200 percent increases that are currently being charged on the billing of current wholesale electricity prices for renewable power. Clearly, electricity rates may substantially increase if the Substitute Amendment becomes law.

The Federal government’s past record in choosing fuel “winners and losers” is dismal. The Industrial Fuel Use Act of 1978, which prohibited the use of natural gas in electric powerplants and discouraged its use in many industrial facilities, was essentially repealed less than a decade later when its underlying premises were conceded to be wrong. While holding back the use of natural gas, the Federal government spent billions of dollars attempting to commercialize “synthetic fuels,” including oil shale and tar sands, with little to show for its efforts.

While we believe that the Federal government has an important role to play in encouraging the development of renewable and other fuels, we are troubled when that role turns to mandates and market set-asides for one particular fuel or technology. Mandates and set-asides usually don’t work, and create unintended consequences far more severe than the underlying problem being addressed.

For all these reasons, we respectfully request that you support efforts to modify the language in section 265 of the Substitute Amendment to S. 517, in order to eliminate the mandate set-aside for one particular fuel or technology. Mandates and set-asides usually only benefit one particular fuel or technology, and tar sands, with little to show for its efforts.

Mr. MURKOWSKI. The signers represent a broad range of affected industries, including chemicals, paper, textiles, cement, carpeting, petroleum, natural gas, mining, nuclear power, as well as the U.S. Chamber of Commerce.

A Federal renewable dictate is, in my opinion, bad energy policy, bad social policy, and bad economic policy. I thank the Chair for persevering with me, and I yield to Senator BINGAMAN.

Mr. BINGAMAN. Mr. President, I will say a few words about the various amendments we are considering this afternoon. I proposed an amendment to the underlying bill which does modify the provisions we had related to this issue of a renewable portfolio standard, and that is the pending first-degree amendment, and essentially that calls for us trying to increase the generation of electric power from renewable energy sources over the next 18 years, between now and the year 2020, up to 10 percent. That is what we have proposed in the amendment I sent to the desk.

Senator JEFFORDS has sent a second-degree amendment to the desk, and he has asked that we change that goal and requirement, and that instead of going to 10 percent of power having to be generated from renewable sources, it should be 20 percent. He has made his statement in support of that, and he has indicated that he would come back and reiterate those points before we actually cast a vote on his amendment.

Then there is also, as I understand it, expected to be an amendment by Senator Kyl from Arizona which will essentially eliminate any kind of a Federal program or requirement to increase the amount of renewable energy that utilities generate. So those are the three main issues before us.

Obviously my position, which is I think is shared by my colleagues, is that the 10-percent goal we have in the bill and in the substitute I have sent to the desk is an appropriate goal. It is something we can achieve. It makes sense. It moves us, as a country, in the direction we ought to be going. It reduces our dependence on fossil fuels in very important ways.

There are some obvious reasons why I think it is important that we do this as part of a national energy bill. When one looks at a comprehensive energy bill, which we are now debating, there are various things that can be done. The supply can be increased, and we are trying to increase the supply of energy from our traditional sources from oil and gas, from coal, from nuclear, from hydroelectric power. All of those are existing sources of energy upon which we believe we are going to remain dependent. They should continue to flourish. We support that and we have provisions in the bill that support them.

I firmly believe it is also important we put a particular emphasis on renewable power, renewable energy sources. What I want to do is bring to this debate what would not normally be a part of a national energy bill. I think we are going to be faced with a very diverse set of sources. It is important we do that because the renewable energy sources do not produce emissions. They are extremely benign to the environment, and there are substantial benefits from using renewable energy, including job creation, quite frankly, from putting a heavier emphasis here.

I will put up a couple of charts I referred to earlier in the debate so people can be reminded this is where we produce electricity today. This is the “Electricity Generation Fuel.” There seems to be a lot of information on this chart, but it is pretty clear what the big points are.

The first big point is, this is from the period 1970 to the year 2020. So over this 50-year period, it shows that by far the biggest contributor to electric generation today is coal. It has been all along. It continues to be, it is going to be in the future—that is a given—and we have provisions in this bill to encourage additional research to try to find ways to continue using coal in the most environmentally benign way possible.

Down beneath that we have nuclear. This is as of the year 2000 in this period. The next line is nuclear. Nuclear accounts for something in the range of 20 percent of the power we produce today in this country. It will continue to account for a substantial portion of the power we produce for the indefinite future even if there are no additional nuclear powerplants built, and there may well be. I do not know the answer to that.

The other fuel, which is now third as far as the contributors to electrical generation, is natural gas. That is this green line. Although it is third now, we can see that it is growing dramatically as a contributor to electricity generation in this country. We are now in a situation where today 69 percent of the electricity we generate in this country comes from two fuels: coal and natural gas. That is going to change by the year 2020, unless we enact legislation in the nature of this renewable portfolio standard that I have proposed.
The way that is going to change is we are going to be much more dependent upon those two fuels, coal and natural gas, by the year 2020 than we are today. Instead of 69 percent, which is where it is today, it will be up to 80 percent. So we will be 80-percent dependent upon those two fuels.

Why is this a problem, some might ask. Who cares? It is a problem because price spikes, particularly in natural gas, can play havoc with people’s electric bills, can play havoc with our ability to maintain a stable market for electricity in the country.

Eighteen months ago, it was $10 per million Btu of natural gas. Today it is more like two-fifty. There is a tremendous volatility in those prices, and that is what we are setting ourselves up for if we do not diversify the sources of fuel upon which we rely. We do have real concerns about the adequacy of our supply of natural gas as we go forward to the year 2020. We may well be buying a larger percentage of our natural gas in the form of liquefied natural gas that is brought in by tanker from overseas. This is being brought in from the Middle East, from a lot of countries that we do not currently consider particularly stable suppliers.

Just as we are currently dependent upon foreign sources of oil, we can see the day, possibly in the future, when we will be substantially dependent upon foreign sources of natural gas. A lot of that dependence will be because we have not diversified the sources of power to generate electricity.

Also, of course, if one thinks climate change is a problem, which many people do, it is important we try to find some sources of energy that do not contribute to that problem, and that is exactly what we are trying to do with this renewable portfolio standard.

Another one of these charts I think makes the point. We have a lot of opportunity to do better in this area. This chart is entitled “The Commitment to Renewable Generation.” This is the period 1990 to 1995. The point it makes is, over on the left-hand side, this is the percentage increase in nonhydro renewable generation during that 5-year period, 1990 to 1995. Spain increased their nonhydro renewable generation over 300 percent during those 5 years; Germany increased theirs something around 170, 180 percent; Denmark, nearly 150; the Netherlands, about 70 percent; France, something in the range of 30 percent; and then there is the United States. We can see from this chart there was hardly any increase during that 5-year period, in nonhydro renewable generation in the United States.

Frankly, we have a lot of opportunity to catch up with some of the European nations in producing more power from renewable sources.

In my State of New Mexico, I asked why we did not have wind power. I have seen the charts that say New Mexico is a natural source of wind power. We have a lot of wind, particularly this time of year. I found there was very little renewable power generated in my State. I asked if we had any U.S. manufacturers of wind turbines come and put up wind power, and I found out the major manufacturers of wind turbines were mainly in Europe. The main market for wind turbines is in Europe, not here.

We may want to do in New Mexico what the neighboring State of Texas has done. We have a love-hate relationship between New Mexico and Texas; it grates on me to say that Texas did something right, but the reality is they have done something right in this area.

Frankly, President Bush did something right in this area when he was Governor of Texas. He signed a law to put in place a renewable portfolio standard that was very much the same in its provisions as we propose as a national program. They have moved ahead very dramatically in adding generation capacity from renewable energy. It is the kind of action I wish we had taken in New Mexico. I hope we do it in the near future.

I know our major utility in New Mexico is considering putting in a wind farm. Call it cost effective. It does make sense. They have seen the successes our neighboring State has had.

Let me show another chart entitled “U.S. Renewables Corporation.” This points out that today 3½ to 4 percent of the electricity that we consume is generated from renewable sources—nonhydro renewable sources. Under this bill, under the renewable portfolio standard we are proposing—not the one Senator Jeffords is proposing; that is more ambitious, but the one I am proposing—we would increase that between now and 2020 up to around 12 to 13 percent. There is the expectation under this bill.

The green area on the chart is what will be added as renewable generation if this bill is passed with the renewable portfolio standard in it. Absent the renewable portfolio, if the Kyl amendment succeeds and we eliminate any national renewable portfolio standard, the expectation is we would have this orange strip that we are now at, with 3½ percent of our generation coming from nonhydro renewables; that would be the same in 2020. We would still be producing about 3½ percent from nonhydro renewables.

I think there is a very strong case to be made that a forward-looking, comprehensive effort to diversify sources of energy, to deal with global climate change in a responsible way, to ensure we are diversifying our sources and producing all the power we need in the future, would lead us to conclude we ought to have this modest requirement. This is a modest requirement. This is not excessive. There are many American manufacturers of renewable generation and are critical of what I have proposed as a renewable portfolio standard because they think it is insufficient.

They think we should be doing more. I would love to see more. I think this is a realistic proposal given the reality we face today.

My proposal is there for anyone to study and review. I think it would be very good public policy for the country.

I have some letters I call to my colleagues’ attention. One is from the American Wind Energy Association, dated March 13.

While we believe that all of America’s renewable energy technologies—wind, solar, geothermal, biomass—are capable of contributing higher levels of electricity generation than would be required by the proposed RPS, the provision is a significant step forward in meeting America’s growing energy needs.

In 2001 alone the wind energy industry installed close to 1,700 megawatts of new generating capacity, enough to meet the needs of 75,000 homes. Over the last 5 years, half of this new wind power development (915 megawatts) was produced in Texas—a state with the most effective renewable energy requirements in the nation. We are making progress in producing electricity without emitting any pollutants, each megawatt of wind power creates at least $1 million in economic activity.

Obviously, I would like to see some of that economic activity in my State. I assume the Presiding Officer would like to see some in his. That would occur as part of the implementation of this.

I also refer to a letter from MidAmerican Energy Holdings Company, which is headquartered in Omaha, NE. The Presiding Officer is familiar with that company. This is a letter to me from David Sokol, chairman and chief executive officer.

Dear Chairman Bingaman, I am pleased to write in support of your efforts to include provisions to promote the development of renewable energy resources for electric generation in the Senate’s comprehensive energy bill and American Energy Holdings Company is one of the world’s largest developers of renewable energy, including geothermal, wind, biomass and solar.

MidAmerican has been a long-time proponent of both a production tax credit for electricity generated by renewables and a federal government purchase standard for renewable electricity. We strongly support these provisions in the comprehensive energy bill before the Senate, as well as recent modifications to the bill’s renewable portfolio standard (RPS) that will ensure that implementation of the RPS is achievable and affordable.

Renewable electricity can play a critical role in diversifying the nation’s fuel mix and providing emissions-free electricity for American consumers. By including both supply and demand side components in the comprehensive energy package, your legislation will benefit the environment and American energy security.

Thank you again for your leadership in promoting renewable energy.

I have one other letter from the American Bioenergy Association. This letter was sent to you from Washington, D.C. There are various members of the group who have signed the letter to me, dated March 13.
Dear Senator Bingaman: We, the undersigned members of the American Bioenergy Association (ABA)—the leading industry group representing biofuels, biomass power, and biopower—writethis letter to thank you for your support to date and to encourage you to offer an amendment for a renewable portfolio standard that is both aggressive and realistic. It is critical that we level the playing field for renewable energy generation. State RPS programs have made enormous success. A federal RPS would allow clean energy developers and their customers to use biomass power in all regions of the country where it is technically feasible. The ABA believes that the biomass industry provides a significant contribution to the standard you will offer as a substitute amendment to the Daschle bill. This RPS uses the already oversubscribed Texas legislation as a model. The national policy you propose would allow all renewable energy resources to be developed where they are most applicable.

In 2001 alone the wind energy industry installed close to 1,700 megawatts of new generating capacity, enough to meet the needs of about 455,000 households. More than half of this new wind power development (915 megawatts) was produced in Texas—a state with the most effective renewable energy requirement law in the nation. In addition to producing energy emitting no pollutants, each megawatt of wind power creates at least $1 million in economic activity.

The wind industry is proud to support the RPS contained in S. 517, aimed at diversifying America’s energy production while also enhancing our efforts to secure cleaner and a more sustainable energy future.

Sincerely,

Randall Swisher, Executive Director,

MidAmerican Energy Holdings Company, Omaha, NE, March 14, 2002.

Hon. Jeff Bingaman,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, DC.

Dear Senator Bingaman:

Please consider this letter an endorsement of the compromise Renewable Portfolio Standard contained in S. 517, the Energy Policy Bill. This RPS uses the already oversubscribed Texas legislation as a model. The national policy you propose would allow all renewable energy resources to be developed where they are most applicable.

I have one other brief issued by the National Hydropower Association.

It says:

The National Hydropower Association writes to strongly urge you to support the Energy & Natural Resources Committee Chairman Jeff Bingaman and Majority Leader Tom Daschle’s compromise amendment to S. 517 on the Renewable Portfolio Standard.

The ABA believes that is very much in the interests of the Nation.

Finally, there is a letter I have here from Michael Wilson, vice president of the Florida Power & Light. He says in a letter to me dated March 14:

Please consider this letter an endorsement of the compromise Renewable Portfolio Standard contained in S. 517, the Energy Policy Bill. As you may know, FPL Group, comprised of the two major subsidiaries—

He lists what those are—

is one of America’s cleanest, most progressive energy companies. Our commitment to the environment is manifested by—

He goes on and on and indicates they are intending to add 2000 megawatts of new wind generation over the next 2 years and that this renewable portfolio standard will allow wind generation to contribute to existing Hydro's energy independence and security.

Mr. President, I ask unanimous consent the letters I referred to be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

American Wind Energy Association,

Hon. Jeff Bingaman,
Chairman, Senate Energy and Natural Resources Committee, U.S. Senate, Washington, DC.

Dear Chairman Bingaman: I write on behalf of the Board of Directors and member companies of the American Wind Energy Association (AWEA) in support of the Renewable Portfolio Standard (RPS) contained in the proposed substitute to S. 517, the Energy Policy Act of 2002.

While we believe that all of America’s renewable energy technologies—wind, solar, geothermal, biomass, and hydropower—are capable of contributing higher levels of electric generation than would be required by the previous version of the bill, I propose an important step forward in meeting America’s growing energy needs.

In 2001 alone the wind energy industry installed close to 1,700 megawatts of new generating capacity, enough to meet the needs of about 455,000 households. More than half of this new wind power development (915 megawatts) was produced in Texas—a state with the most effective renewable energy requirement law in the nation. In addition to producing clean, renewable energy and receiving no air pollutants, each megawatt of wind power creates at least $1 million in economic activity.

The wind industry is proud to support the RPS contained in S. 517, aimed at diversifying America’s energy production while also enhancing our efforts to secure cleaner and a more sustainable energy future.

Sincerely,

David L. Sokol,
Chairman and Chief Executive Officer,

American Bioenergy Association,

Re: Renewable Portfolio Standard Amendment.

Hon. Jeff Bingaman,
Hart Senate Office Building, Washington, DC.

Dear Senator Bingaman: We, the undersigned members of the American Bioenergy Association (ABA)—the leading industry group representing biofuels, biomass power, and bioproducts—are writing to thank you for your support to date and to encourage you to offer an amendment for a renewable portfolio standard that is both aggressive and realistic.

It is critical that we level the playing field for renewable energy generation. State RPS programs have made enormous success. The ABA believes that the biomass industry provides a significant contribution to the standard you will offer as a substitute amendment to the Daschle bill. This RPS uses the already oversubscribed Texas legislation as a model. The national policy you propose would allow all renewable energy resources to be developed where they are most applicable.

In addition, we applaud your support of a renewable fuels standard, increased biomass research and development, and a production tax credit for biomass. ABA hopes that these policies, along with this strong renewable portfolio standard, will be accepted by the Senate.

Again, the ABA thanks you for your strong support for biomass. We truly believe that, with the right policies in place, clean, renewable biomass, we can begin to wean ourselves from foreign oil and clean up our air.

Sincerely,

Kathleen Hamilton and Megan Smith,
Co-Directors,

ISSUE BRIEF, MARCH 13, 2002.

The National Hydropower Association (NHA) writes to strongly urge support Energy & Natural Resources Committee Chairman Jeff Bingaman and Majority Leader Tom Daschle’s compromise amendment to S. 517 on the Renewable Portfolio Standard (RPS). Senators Bingaman and Daschle’s amendment to S. 517 resolves many of the issues associated with their original RPS proposal and clearly recognizes that hydropower, our nation’s leading renewable resource, must play an important role in meeting future energy needs.

The amendment that will be offered by the Senators will exempt all existing hydropower from a retail electric supplier’s base rate amount and include incremental hydropower from new hydropower facilities through efficiency improvements and additions of new capacity—as a qualifying renewable resource. This policy validates a recent poll which showed that 93% of registered voters believe that hydropower should play an important role in meeting future energy needs. What’s more, 74 percent of America’s registered voters support federal incentives for incremental hydropower.

With the inclusion of incremental hydropower in the Bingaman-Daschle RPS amendment, approximately 4,300 Megawatts (MWs) of new hydro generation could be developed without building a new dam or impoundment. This additional power could provide clean, renewable, domestic and reliable energy for America’s energy consumers in an environmentally-responsible way. Senator John Edwards’ amendment, however, has no such role for hydropower.

Once again, NHA strongly urges you to vote yes on the Bingaman-Daschle RPS amendment and to oppose the RPS amendment offered by Senator Jeffords.

If you have any questions, please contact Mark Henry, NHA’s Director of Government Affairs, at 202-682-1700 x-104, or at mark@hydro.org.
end of the pipeline. When we import barrels of oil—although we are not talking about so much oil, because we also rely on natural gas and coal—we have the following consequences: First of all, we import the energy and we export the dollars—probably to the tune of about $200 billion a year.

The more we can produce of our own energy, the more capital we keep in our communities, and the better it is for our States.

On environmental grounds, I don’t, frankly, know what we are doing with more reliance on coal.

In our State, we love our lakes. We are the “land of 10,000 lakes.” But if you look in different manuals, you will see the warnings: If you are a woman expecting a child, don’t eat fish. We love walleye. Don’t eat too many walleye a week; or, don’t eat any; or, for small children, don’t let them eat walleye. One way to get to the hearts of Minnesotans is to talk about walleye.

Why? Because there are toxins, PCBs, acid rain, and coal.

What in the world are we doing relying more on coal, relying more on fossil fuels, and relying more on utility industries that barrel us down a path which goes exactly in the wrong direction?

Minnesota is rich in wind. In rural Minnesota and farm country, we are talking about biomass electricity. We are talking about solar. We are talking about nuclear. We are talking about safe energy. We are talking about clean technology.

We are talking about job-intensive and job-creating industries that are respectful of the environment, that are respectful of our community, that lead tomorrow’s economic development, and that make all the sense in the world.

When we are able to rely more on renewable energy policy—we have the technology—we are far less dependent on large energy companies that end up being the ones making decisions that affect all of our lives, not always so much for the good.

...I am pleased to join Senator Jeffords.

Mr. WELLSTONE. Mr. President, I came to the Chamber in support of the amendment of Senator Jeffords. I am proud to join him on this amendment.

We are talking about a portfolio that has to do with renewable energy for production of electricity. The bill would require the amount of electricity produced from renewable to increase from 2.5 percent in 2005 to 10 percent in 2020. This is certainly an improvement in the right direction.

The amendment I am cosponsoring with Senator Jeffords argues that the Senate should go higher. We are talking about basically going up to 20 percent by the year 2020.

I wish to make three or four points. First of all, I want to let you know that I am speaking as a Senator from Minnesota. For Minnesota, this is a no-brainer. We are a cold-weather State. We are at the other clear that we are committed to making sure that renewable energy is much more a part of the production of electricity.

Look again at what we do that is good. We do a so much better job for our environment. Coal, I mentioned. Today, I am giving a speech today in this Chamber that says: Let’s dismantle all the nuclear powerplants. As a matter of fact, that is not my position. But we do not know what to do with the waste. We are going to buy more plants which are incredibly capital intensive.

I think the Presiding Officer is one of the people here who knows the most about finances. I am not even sure it is a go from the point of view of cost-effectiveness.

But beyond that, can anybody tell me whether or not we should be going forward with more nuclear powerplants when we do not even know what to do with the waste right now? In case anybody has not noticed, our good friends from Nevada do not want it there. If all of us were Senators from Nevada, we would take the same position. And there are some legitimate questions that are being raised about Yucca Mountain.

Then others say: Well, maybe not. Then it should be above ground, in dry-cast storage. Then others will say: What about the transportation of it?

So we do not know what to do with the waste. Yet we are now talking about maybe we are going to rely more on nuclear power. We do not know what to do with the expense. By the way, most people do not want the plants near where they live. There are all sorts of public health concerns. I have already mentioned coal. What do we need? More acid rain? Why do we want to rely on these big utility companies to basically be in charge of our energy future? Have the consumers of this country really noticed that we are not always so kind to us in terms of the bills that we pay?

We could make the decisionmaking much more back at the State level, much more back at the community level with renewable energy policy. Between the potential of wind and biomass electricity and solar, along with what we have been talking about with biodiesel and other clean alternative fuels, such as ethanol, we have a real technology. It is a real business opportunity. It is a perfect marriage. I will finish on this point and then take a question from my colleague. It is a marriage made in Heaven between being respectful of the environment and a huge growth industry, which is much more small business oriented, with the creation of more jobs and keeping capital in the community and having better economic development.

It could be done, and it should be done. If we took a poll, 80 percent of the American people would agree. The only problem is, the big utility companies and this big energy industry have too much clout. They have too much money, they have too much power, and
they have too much influence. We should be reaching beyond 10 percent. I think Senator Jeffords and I are attempting to lay down a landmark because we want to be part of the debate and, at a very minimum, not turn the clock backward and even go below the 10-percent requirement. Frankly, we should be doing much better.

Mr. Reid. Will the Senator yield for a question?

Mr. Wellstone. I am pleased to yield for a question.

Mr. Reid. Does my friend agree that on this energy bill yesterday he and I were terribly disappointed because we had the opportunity to do something about consumption in this country, to cut the amount of fossil fuels we use, by making our automobiles more energy efficient, and we lost on that? Does the Senator agree that we lost on that?

Mr. Wellstone. That is correct. I am also disappointed here where some think we can produce our way out of the energy crisis in which we find ourselves. Does the Senator acknowledge, out of the worldwide reserves of petroleum, the United States has 3 percent, including Alaska, and the rest of the world has 97 percent? Does the Senator acknowledge that as a fact?

Mr. Wellstone. That is correct. Mr. Reid. So I say to my friend, I do not personally know how we are going to produce our way out of this situation. We are not going to do it by drilling in ANWR. So when this legislation is ended, we are going to get nothing out of ANWR, and we are going to have no more fuel-efficient vehicles.

So I ask my friend, isn’t the only thing left for the American consumer to look to with pride that we will have done on the energy bill is to do something with renewables? Isn’t that right?

Mr. Wellstone. Mr. President, I thank my colleague from Nevada because that is why I said to Senator Jeffords earlier today that I would be out here joining him on this amendment.

Frankly, the rest of my time on this bill will be on this renewable portfolio because this is the only item left in the bill that is strongly proconsumer and also enables our country to reduce our energy consumption and presents some alternatives going down exactly the wrong path. Absolutely.

The sad thing—I know this sounds a little arrogant; and I don’t mean to sound arrogant; and I don’t think I am being arrogant—I used to be on the Energy Committee. If we took a poll, about 80 percent of the people in this country would agree, saying: Absolutely, more renewables. We really like that idea. We like it because of the environment. We like it because we can keep the capital in our community. We like it because we can develop. We like it because it is job intensive. We like it because it is good for our country’s independence.

Remember, with electricity we are talking less about oil; we are talking about coal, nuclear, whatever.

I am not arguing conspiracy. And I am not arguing every Senator who votes the other way votes that way because of money. What is a horrible argument that I hear. What is that about each of us on every vote.

I will say this. Institutionally, from a sort of systemic point of view, the unfortunate thing is there are these regulated energy utility companies. They do not want to budge from the monopoly they now have. They do not want to see this alternative future. But, boy, this is the direction in which we have to go. That is why I thank Senator Jeffords and I am honored to be a part of this debate and do this amendment with him.

Am I making sense?

Mr. Reid. Of course. That is why I came to the Chamber, because the Senator is making a lot of sense. I feel so desperated to see that thing that helps the American consumer when we finish this energy bill, which we have been talking about for so long.

Does the Senator realize that in 1990 the United States produced 90 percent of its oil and gas from the Gulf of Mexico? We produced 90 percent 10, 11 years ago. Today, we produce—not 90 percent—25 percent of the power. Germany—the relatively small area of Germany—produces more electricity by wind than we do.

Mr. Wellstone. Yes. I say to my colleague, first of all, again, wind is near and dear to my heart. You should see Buffalo Ridge in Minnesota. We produce much of the wind power in the country in Minnesota.

Brian Baenig, who does wonderful work here, points out that there have been two Department of Energy analyses, and they have found, under a 20 percent renewable portfolio standard, total energy bills would be lower in 2020 than “business as usual” because this would also reduce the natural gas prices. This would be far better for our consumers. But also other countries—that is what I was saying earlier—are putting us to shame. The thing of it is, this isn’t just an environmental issue. This is also, I say to both colleagues in the Chamber, a business issue.

Mark my words—let me shout it from the mountaintop of Senate today—clean technology will be a huge growth industry in this new century. We should be at the cutting edge of it, we should be nurturing it, and we should be promoting it. It is absolutely the right direction in which to go.

That is what is so important about this amendment.

Mr. Reid. I say to my friend from Minnesota, I join with him in complimenting the Senator from Vermont, the chairman of the Environment Committee for moving this issue forward. I think he has not done it in a tepid fashion. I say that because we should be able to do this. There are 14 States in the United States that have renewable portfolios. States do it. Why can’t we, as a country, do it? The answer is there is no reason in the world we should not be able to do this.

I believe this so much that, in addition to this—I say to my friend from Minnesota, he has taken the cost. One of the costs that he cannot attribute to alternative energy is what it saves in lost lives, what it saves in added health care costs for this country.

The three of us in this Senate Chamber are not kids. We have all lived a long time and are very fortunate in that regard. But we can all remember, even the State of Vermont, as pristine as the State of Vermont is, how the air quality has changed over our lifetimes.

Mr. Wellstone. I say to the Senator, on the whole issue of air quality, I am out here with a little bit of a sense of urgency. I want to hold on to this standard, and I want to increase it because it is the best thing for my State.

It is for all the reasons I just mentioned, but also having to do with what we love the most. We love our lakes and rivers and streams. In fact, I don’t know that we can come to be. It is as though people in the country have lost their sense of indignation. Their expectations are so lowered about the environment. I am surprised that people are not furious. I think they are, but they don’t know what to do.

As to a lot of our beautiful lakes, people are being told with regard to lake after lake after lake in Minnesota, if you are expecting a child, don’t eat the fish. If you have little children, don’t let them eat the fish because of the air toxins. This is acid rain. This is coal. This is mercury poisoning.

I want to put a stop to it. That is in part what the amendment is about, much less all the good economic and energy efficiency arguments I could make.

I yield the floor and thank both of my colleagues. I am proud to join them in this effort.

The Presiding Officer. Mr. Corzine, the Senator from Vermont.

Mr. Jeffords. Mr. President, I commend my good friend. He has articulated and put the issues in focus as to what we are discussing. Coming from Vermont, one of the States that has the most desire, perhaps, to take advantage of the situation, going to my own personal history back to 1939, I was just a kid, but we had the first commercial windmill in the United States. It was working fine until a hurricane blew it away. It was an example to us of what the potential is.

Now we have windmills going over the State, up and down the State. Hopefully, there will be more and more. We have them in nice places that do not spoil the view. What a great source of energy to take advantage of, especially in a State that is really being hard hit by all of the acid
rain and other stuff that floats to us from places known and unknown. But I want to share with everyone the experiences we have had.

Going back again, 29 years ago, the wind energy program started. It has come quite a ways, but now is the time to reexamine its utility and to keep this Nation going in the direction which will lead us away from the huge problems we have with being so dependent upon foreign oil and all those matters.

Perhaps my good friend, the leader, can tell us what we are going to do next, but at this point I will save the floor and then come back.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. In response to the Senator from Vermont, Senator KYL is tied up in the Judiciary Committee. They are on a very important judicial nomination now dealing with an appellate court judge to be or not to be. Therefore, we are going to talk about his amendment at this time. There have been a number of things we have talked about doing. One would be to vote soon on the Jeffords amendment, then debate the KYL amendment as soon as he gets his telephone vote on that tonight or tomorrow. That is where we are.

The Senator has arrived. I say to my friend — because I know he has been so tied up in the Judiciary Committee; I listened to his statement on television — that he has not asked for an amendment at this time. Therefore, there have been a number of things we have talked about doing. One would be to vote soon on the Jeffords amendment, then debate the KYL amendment as soon as he gets his telephone vote on that tonight or tomorrow. That is where we are.

The Senator has arrived. I say to my friend — because I know he has been so tied up in the Judiciary Committee; I listened to his statement on television — that he has not asked for an amendment at this time. Therefore, there have been a number of things we have talked about doing. One would be to vote soon on the Jeffords amendment, then debate the KYL amendment as soon as he gets his telephone vote on that tonight or tomorrow. That is where we are.

One would be to vote soon on the Jeffords amendment, then debate the KYL amendment as soon as he gets his telephone vote on that tonight or tomorrow. That is where we are.

The Senator has arrived. I say to my friend — because I know he has been so tied up in the Judiciary Committee; I listened to his statement on television — that he has not asked for an amendment at this time. Therefore, there have been a number of things we have talked about doing. One would be to vote soon on the Jeffords amendment, then debate the KYL amendment as soon as he gets his telephone vote on that tonight or tomorrow. That is where we are.
be, versus my proposal which says: We can suggest to the States that they consider different forms of incentives or even mandates if they want to do that, but we should leave it up to the States to decide what they want to implement.

There are three or four different reasons that I think this is a better approach. First, obviously, I do not think the source of all wisdom in the United States resides in 100 U.S. Senators or 435 Congressmen. People in the States with respect to the particular needs of their States.

I point out to the distinguished Presiding Officer, for example, that on the east coast, there are some opportunities for solar and wind power are not great. So the net result of the passage of the Bingaman amendment or the underlying bill or the Jeffords amendment is going to be a huge transfer of wealth from New Jersey, New York, Massachusetts, and other States such as Delaware, Arizona, which has lots of sunshine and can produce lots of solar energy, and California that has lots of solar energy opportunities and windmills to produce wind energy.

There will be a huge transfer of wealth. Why? Because the law will say: If you do not produce electricity through these renewable sources, then you have to pay a penalty, you basically have to buy credits from those States that do, and that is going to cost you money. Do you get electricity from it? No, you just pay money, and that keeps you out of trouble. You do not get any electricity for what you are paying. But the cost of the penalties or the cost of doing this either way is going to be passed on to your electric customers.

I say to any of my friends from the States that are not blessed, shall we say, with a lot of wind or sun: Get ready, you are going to be sending a lot of money to States in the Southwest, States such as Arizona that I represent.

Let me give an idea of the cost. Let’s look at how much it is going to cost to develop this renewable production capability. It is represented by the blue. It starts in the year 2005 on the far left-hand side where the arrow is pointing. That is about $2 billion a year cost to produce this much power with renewable sources. This is gross cost.

The far line on the chart is the year 2020. The blue line goes up to about $10 billion. This represents the preferred fuels, the so-called "base fuels," which I sit.

The red represents the penalties that will have to be paid because you cannot build the generating capability to meet the requirement called for under the law. That would total just about $12 billion a year in the year 2020.

Whether it is the actual construction of the facilities or the payment of the penalties, we are talking just under $12 billion a year. Much of that, as I said, is going to be paid by States that do not develop the generation but have to buy the credits and send them to the States that do provide the generation and excess amount of that generation.

This total is about $88 billion over the 15-year period. That is $88 billion gross cost.

To show what the pending Jeffords amendment will do, it is even worse. The money starting in the year 2005, $20 billion a year, which goes up to, in the year 2020, more than $22 billion a year; again, the production capacity lining out at about $13 billion a year and the remainder in penalty, but there is a total gross cost of about $23 billion, and the total cost over the 15 years is about $181 billion.

Have we done a cost-benefit analysis to understand what we are going to be getting with $181 billion? These charts are produced by the U.S. Department of Energy. They have the numbers, but nobody has done a cost-benefit analysis of what we are going to get out of this.

Some say: Maybe this will replace some of the fuels that are currently being used, such as coal or oil, and therefore there will be less demand for those particular fuels, so the cost of those fuels will go down, so energy produced by coal or gas will go down—you get the idea.

That may happen, but obviously we are still talking about a huge cost to implement this law. Let’s just take a wild presumption and say that all of this generation replaced the generation from natural gas and it drove the gas prices down to such an extent that we ended up with a wash, which is not the case even according to the Department of Energy, but even if we did that, what would that represent? It represents a Btu tax, as I said, on nuclear, coal, oil, and alternative production, and even hydro production, as a matter of fact, and a big wealth transfer from States that would have to buy the credits to States that generate the electricity from the preferred fuels, these so-called renewable sources.

I think that is bad public policy. It is arrogant on the part of the Federal Government to mandate something such as this, to presume we would know the right mix of fuels to use in producing electricity in this country. Part of this States would get hurt by it more than other States, to not have ever done any kind of cost-benefit analysis, notwithstanding the huge costs involved.

I am assuming, by the way, that this is possible, that we can do this, even though 2 percent of the generation today is through the so-called renewable sources. This is why President Bush supports our approach, which is a voluntary approach by the States where the States can determine themselves what mandate to impose.

By the way, 14 States already have a mandate. My State has a 2-percent mandate. The State of Maine has a 30-percent mandate. Texas has a mandate. What the President believes is each State should be able to decide for itself, based on its unique circumstances, what is possible in that context. It may be in one State it is possible to do a lot of wind and solar generation. It may not be so possible in New Jersey or New York. That is why each State ought to determine for itself what the mix should be, of course. This is based upon the Jeffords amendment, if we impose upon the retail and wholesale customers in the respective States.

I spoke with the Secretary of Energy today, who assured me I could represent to all of my colleagues that he supports the Kyl amendment, that he opposes the underlying Bingaman amendment and the underlying bill and, of course, the Jeffords amendment, which would all impose by Federal mandate a standard for renewable portfolio.

Let me address this cost in another way. As I said, this is a mandate. The Federal Government already provides an incentive, and the cost of that incentive right now is $1 billion over a 2-year period. This is the production tax credit which will be renewed, extended, and expanded in terms of its scope. That is what came out of the Finance Committee, on which I sit.

We are going to be providing for expanded and extended tax credits for the production of electricity through these renewable fuels. It is not necessary for the Federal Government to mandate it as long as we can achieve that result through the use of the tax incentives which we will be, as I say, dealing with here a little bit later on, but that is what came out of the committee.

I want now to address briefly this question of discrimination. It is apparent to me that the effort being made is to round up votes by picking and choosing between the politically correct fuels and those that are not politically correct and so on. Other changes in the amendments so some areas are impacted and other areas are not. Let me give an illustration.

We know this underlying amendment of Senator BINGAMAN and the amendment of Senator JEFFORDS that is pending would both impose significant unfunded mandates on the States and localities. Part of this is due to the fact that States would have to buy credits from other States. The fact there are a lot of municipal power producers in almost every State.

It is my understanding—and I would love to be corrected by the Senator from New Mexico if I am wrong on this point—that a point of order would lie against his amendment because of this unfunded mandate, the provision with respect to municipal generation or public subdivision generation, Federal or State or local, has been removed from the bill. I will assume, unless I am corrected, that is the case. I am seeing a nod, so that is good.
I do not think we should impose this mandate on our political subdivisions. So that would remove the point of order with respect to the generation.

I am not sure with respect to the purchase of credits, and I would have to analyze it, but at least we have done is to say that 10 percent of the power, more or less, that is produced in the country by the municipal generators would not be subject to this mandate.

In the House I have a fairly large public power producer and a bunch of little co-ops and a couple of very large investor-owned utilities. So I ask: Is it fair for the Senate to impose upon one group a mandate that 10 percent or 20 percent or even 8½ percent of power be generated by renewables, whereas it would not apply to the political subdivisions?

I am happy for the political subdivisions. I am glad they do not have the mandate applied to them, although they do in the case of Arizona because the State applies a mandate, but that is the determination of the State. I do not think it is fair. I think it is discriminatory.

I do understand hydro is treated a little differently; that hydro is only considered a renewable resource. Now if water is not renewable, I do not know what is. Water over the dam has always been considered a renewable, the best of the renewable resources, but it is not politically correct to recognize certain environmental groups and so it is not included, except to the extent there are incremental economic improvements or efficiency improvements in the electrical generation facility, the dam through which the water passes. You rewind the turbines and that gives a greater efficiency, and apparently you get some credit for doing that. But otherwise you get no credit for hydrogeneration.

I understand Senator COLLINS will have an amendment to say, wait a minute, in Maine we do a lot of hydrogeneration and we should get some credit for that. I understand that may be accepted. I do not know whether or not it will be, but clearly there is discrimination going on when one kind of clearly renewable resource counts but another kind does not count. Why would we have a double credit for solar energy or energy produced on Indian lands versus clean or green hydropower, what matters is energy? Why is that? Perhaps the authors of the bill could explain that to us.

In other words, my point about discrimination is we have done some picking and choosing, some winners and losers. It, again, is the arrogance of Federal power that we decide what is best. Based upon science? Based upon the merits? No, based upon what it is going to take to get the amendment passed. That is what is happening.

Let us get real specific about it. What we are doing is trying to construct something that can pass, and what I am saying is that the fairest and most nondiscriminatory way of all is to say, let each State decide for itself. That is really fair. So if New Mexico decides to do solar generation, it can do that. If my State of Arizona says, wait a minute, you mean we are going to have to put up acres and acres of shiny mirrors in our pristine desert that we love to look at because it is so beautiful—that is the way we could generate that power in Arizona is through solar—that is how we would have to do it? We are going to be required to do that by Senator Kyl's amendment—by putting—I do not know how many hundreds of acres of mirrors it would take to generate this solar power; that is how we would do it, I guess.

I think the State of Arizona would say that is environmentally unacceptable; we are not going to do that. We are not going to spoil the beauty of our State, not to mention what would happen to the flora and fauna that could be affected in an adverse way by such a mandate. The State of Arizona is unique in the State of Arizona. I think we would like to make that decision ourselves. If it is possible to produce, let us say, 3 percent of power through solar generation in Arizona, and our people in the State decide that could it can be done in an environmentally sensitive way, and that is a good thing, then let the State of Arizona decide that.

I do not think representatives from the State of Florida, which also has a lot of sun, the State of Vermont, which may not have quite as much sun, should be dictating that to the State of Arizona.

I have one more point, and then I will make the rest of my points later.

The procedure—and I will close very quickly—as I understand it, is we have the underlying bill, that pending to that is a Bingaman amendment that would reduce the Federal mandate to 8½ percent, but it still would be a Federal mandate—and correct me if I am wrong on that, but it would exclude the municipal providers and it has a phase-in period different from the underlying bill; those are some of the essential differences between that and the underlying bill—that the pending second-degree amendment is a Jeffords amendment that would mandate 20 percent and does not exclude the municipal generators, and if that is defeated, then we would be back to the point I could offer another amendement, which very simply provides that the States must consider the alternative of renewable fuels generation, as well as consumer choice, so the consumers could require that they be provided renewable fuels. If they are willing to pay for it but it would be up to each individual State as to what to order.

What I would hope is we would defeat the Jeffords amendment, that we could then approve the Kyl amendment, which would be a substitute for the underlying Bingaman amendment, and there may be later some clarifying amendment by Senator COLLINS that we would consider at that point. That would deal with the subject of renewable fuels, and I think it would do so in a fair way, in a nondiscriminatory way, in a way that would not necessarily cost as much, although each State could decide to impose those costs on themselves if they chose to do so in a way that would be consistent with the President's energy plan and a way that I suggest to my colleagues would be much more likely to be successful with my colleagues in a conference on this bill.

So I hope when we get to the point, after I have offered my amendment, we will be able to support that which will have the effect of defeating the underlying Bingaman amendment.

Excuse me. I stand corrected. I am advised the Bingaman amendment is still at 10 percent, but it pushes out to the year 2019. So it is still a 10-percent mandate.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. During the debate today, the Bingaman amendment was changed. It was modified, and a substitute maintenance for the 10 percent of the bill made it a different way of getting there. I made the same mistake the Senator of Arizona did today.

Prior to the Senator from Arizona leaving, I wanted to make a unanimous consent request. I ask unanimous consent that the time until 5:35 p.m. today be for debate with reference to the Jeffords second-degree amendment No. 3017, with the time equally divided and controlled in the usual form; that at 5:35, the Senator vote on or in relation to the Jeffords amendment; that upon disposition of amendment No. 3017, Senator KYL be recognized to offer a second-degree amendment to the Bingaman amendment No. 3016; that no invoking of any amendment be in order prior to disposition of either amendment, nor any language which may be stricken.

I further ask that Senator CRAIG be recognized for 25 minutes; and that Senator NELSON be recognized for 5 minutes—Senator CRAIG has no objection to Senator NELSON going first—and that Senator JEFFORDS have the final 5 minutes prior to the vote that would occur at 5:35.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Florida.

Mr. NELSON of Florida. Hearing this debate, it reminds me a little bit about the debate on miles per gallon, whether or not that would be etched into law that would have to be met.

If we do not set such a standard, we will never get to it. If we do not set a percentage of years that are required to be met, or not that would be etched into law that would have to be met.

I do not think representatives from the House are likely to be successful with this amendment. We are not going to have to do that.

I support the amendment of the Senator from New Mexico.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. CRAIG. Mr. President, I believe under the unanimous consent agreement I have 25 minutes.
The PRESIDING OFFICER. The Senator from Idaho.

Mr. CRAIG. Mr. President, we are discussing a very important amendment to a very complicated bill that will once again require a Federal mandate to meet a specific goal; or should I say, when we allow our States, through the incentive of the marketplace, to meet the goals relating to certain levels of energy production being of a given type.

This is not a new issue. For the past couple of weeks, we have witnessed an unprecedented attempt to write very complex legislation on the floor of the Senate—an electricity title of an energy bill.

Three years ago, Senator MURkowski, then serving as chairman of the Energy and Natural Resources Committee, on which I am privileged to serve, laid out three criteria for action as we move toward the development of a comprehensive energy policy.

Deregulate where possible; streamline when deregulation is not possible; and, the third, respect the prerogatives of the States.

What that was not a mandate of the committee, it was certainly something to which all Members largely agreed.

To that, I add a fourth elementary principle that I think is pertinent in crafting the legislation: Know what we are doing when we legislate and when we grant new authority or change our delegation of authority to a regulatory agency. In other words, look at the whole and not just each of the pieces now scurrying to the Chamber to be attached to this Title of the Bill.

Title II fails all four tests.

The approach we are taking to create this Title is simply too dangerous for me: Trying to write complex legislation without understanding it, without allowing our staffs in a bipartisan way to collectivelly make sure all the pieces fit together. Somehow politics leads us to this very precarious endeavor.

A few general observations before I go into the provisions of this title that the Senator from Vermont is amending. We have this month received a landmark Supreme Court decision on the authority of the Federal Energy Regulatory Commission to order transmission restructuring that has significant implications on the balance of Federal-State responsibility and authority for regulation of public utilities.

The majority opinion requires careful analysis in light of the statements, on the one hand, that the Federal Commission could not assume jurisdiction over retail transmission without possibly running afoul of the Federal Power Act that gave jurisdiction to States for all sales, and, on the other hand, that the Commission could take control if it makes certain factual findings.

Mr. President, what have I just said? Has anyone really, has understood the implication that I have just made? Are we, today, measuring our actions against what the Supreme Court laid down recently?

We must know how far the Commission can go now and how far we want it to go before we enact this law. Yet there is fundamentally no effort to make that happen. The Commission has pursued a restructuring program to establish regional transmission organizations, a virtual stand-alone transmission business, as the Commission called it in 1999.

Before we enact a law, we need to carefully study that new reality. How are we going to make that decision in this bill? New York v. FERC affect those regional transmission organizations or RTOs? I note also that in all these hundreds of pages of comprehensive energy bill, not one word addresses the issue of regional transmission organizations.

How can we enact a title on electricity without taking RTOs into account, now that the Supreme Court has ruled? Yet we are not doing that. If we discussed, or reviewed in jurisdiction, "comprehensive," then we have just taken a big chunk out of it, letting what the Court has said stand without explanation in the context of the current policies of the Federal Energy Regulatory Commission.

Even if we choose to remain silent on this important topic of the day, our choice should be a conscious one, clearly expressed and based on a complete record and, at a minimum, after hearings in the committee of jurisdiction, not the lapse of haphazardly working out numerous specifics on the floor of the Senate.

We are now in a scurry with amendments, one that has just been offered and one that is about to be offered. Staff are over speaking with the Budget committee right now, seeing if amendments violate the Budget Act. Why? Because they were never tested, discussed, or reviewed in jurisdictional committees. So we are literally at this moment doing something that to my knowledge rarely occurs on the floor of the Senate.

Many experts and the administration's "National Energy Policy Report" note that this country needs more investment in transmission. Better returns bring investment. The Commission, in its RTO rule in 1999, provided for certain kinds of price reforms to make investment more attractive. This title has not one word on the reform of transmission rates or prices.

Even if we conclude that it is not necessary to address the issue in a separate statutory manner, of course that the Commission is on, our conclusion should come from conscious choice after hearings in the appropriate committee—not, as I have already said, the lapse of haphazardly legislating on the floor.

If you read these provisions, and I have, you will notice that, except for repeal of the Public Utility Holding Company Act of 1935 and the Public Utility Regulatory Policy Act of 1978—two obsolete statutes, I think most recognize, whose repeal I support—not one word in the title takes authority away from the Federal Government.

So as was our intent in 1992 to move electrical production in this country away from a structured environment, we now have an amendment on the floor that takes us back to Federal mandates and Federal controls under the Federal Energy Regulatory Commission.

I would like to spend a few minutes now, before my time runs out, on some of the other provisions within this electric title. Mr. President, let me assure you on the end of the day, this is what I plan to do.

I have filed at the desk an amendment, an amendment that would strike the electric title as it is proposed and amended by the actions of the Senate. In striking it, my amendment would replace the reliability language that was just put in this afternoon, and would include the current language in the bill repealing PURPA and PUHCA.

It would also include consumer protection language that is currently in the bill covering information security, consumer privacy, and involuntary slamming and cramming.

These provisions address issues that have been debated in Committee and considered for quite some time. The provisions offered from the General consensus that has evolved over the several years. These provisions will do no harm, and will advance important solutions to problems that have hobbled efforts to assure that our electric system remains the most reliable in the world as well as ensure that consumers of electricity are protected. Leaving the Title as is does not advance deregulation, or a reform, but re-regulation and a move towards the centralizing of Federal authority at the Federal Energy Regulatory Commission.

Let me go to a provision in the bill, if I can: electricity mergers. The provision raises the floor on merger review from $2 million to $50,000. How many transactions does it affect? I doubt that anyone has any idea. There have been no hearings, no analysis of the market to determine the impact of this proposal. More importantly, section (a)(1)(D) gives the Federal Government jurisdiction over acquisitions of generating plants, unless they are used exclusively in retail. Utilities sell at wholesale and retail, largely from the same plants. They don't create separate generating facilities for those kinds of purposes. It blurs the distinction between regulation of retail suppliers of electricity, traditionally the province of the States, with the regulation of wholesale supply of electricity.

Why State States not been vigilant? Have they been too restrictive? Will the Federal Commission now preempt State procedures for assuring adequate supply? Will the Commission now use generation acquisitions as a club to force restructuring, as it did with mergers previously?

No one knows the answer to what I believe is a significant question that I
The Commission shall, by rule, adopt procedures for the expedient consideration of applications. I like that.

Rule such rules should identify classes of transactions or specify the criteria for transactions that normally meet the standards established in paragraph (4).

What does “normally” mean? If you have ever watched these kinds of transactions or determinations, then you better understand what the word means because there is a long history of making decisions as determined by Courts of law.

In the vacuum of the floor deliberations, we don’t know nor will FERC understand our intent because they will have to thumb through pages and pages of CONGRESSIONAL RECORD instead of a full committee report.

Going further, if the Commission does not act within 90 days on these transactions, such application shall be deemed granted. Maybe that is fine. Now comes the hook:

Unless the Commission finds that further consideration is required to decide the issues and the Commission issues one or more orders tolling the time for acting on the application for an additional 90 days.

What am I saying? How complicated is that? Is there a clear understanding of what is intended here?

The provision appears to permit the Commission to refile from the very speed the proposal is attempting to introduce.

As I said, I am generally for speed in decision-making, within reason, so that it isn’t dragged out month after month and hundreds of thousands, if not millions, of dollars are lost and ultimately recouped from the ratepayers.

Under this provision, as I read it, the Commission could take away with one hand what we have required with the other.

What standard do we set here to make sure FERC doesn’t toll away the 90 days into long delay? How does FERC intend to use this loophole? What has FERC done in the past? We cannot know because in the Chamber we cannot hold a hearing to get an interpretation from the Commission itself or legal and consumer groups as to what they believe the intent would be and how they would choose to carry it out.

That is the reality.

Let me touch on one other subject, market manipulation.

This section in the legislation on the floor would tell the Commission it can do what it wants because this section says it shall consider “such factors as the Commission may deem relevant.” That is a phenomenal grant of authority.

The Federal Commission can use this as a club for forcing restructuring, as it is in the past, forced, and it can again force utilities to buy and sell electricity against their will, subordinate capital retail consumers, reveal proprietary information, and join regional transmission organizations.

Each of these appears very much to be in the Commission’s sights as we speak.

The section lists possible factors: “the nature of the market and its response mechanism.” What does “the nature” of the market mean? Response mechanisms? What kind? And to what?

To me, the best response mechanism we have is the law of supply and demand. But that is not necessarily the response mechanism at which the Federal Energy Regulatory Commission would be looking.

My colleagues may argue that the Commission could construe it means. Maybe so. But we need to know what this means before we give the Commission such vast authority.

Repeal of market-based rates in section (f) says FERC shall set the just and reasonable rates by order. Under what terms? From the time it does so forward, or can FERC subject utilities to open-ended retroactive refunds, as it is trying to do now?

Of course, one of those situations we have seen the frustration that has been brought about by the attempt of FERC to do this recently. We don’t know because we are legislating on the fly again without committee deliberations.

How about a refund effective date?

This section changes the date from which the Commission can order refunds of retroactive rates. Current law makes it, at the earliest, 60 days from the complaint or FERC investigation. This gives utilities time to digest the complaint to know the extent of their jeopardy. Sixty days also gives companies time to specialist hedges, and, most importantly, in this era of post-Enron disclosure, to keep timely disclosure to the investors, the shareholders, and security regulators.

Perhaps the implications of consumer protection outweigh these harms. But can anyone tell me what they are? Has the current law harmed anyone? Will this fix any harm? This would not have appeased my colleagues from California two summers ago. I can tell you that. We cannot know when we legislate from the floor.

I could go on. My time is running out. I will speak more about this possibly tomorrow and on Monday because I want to walk my colleagues through the substance of this title and to justify why I think it is necessary to strike this title and replace consensus provisions. We must do no harm and we do not harm by establishing not only re- liability but by repealing obsolete law—PURPA and PUHCA and by putting in the kind of consumer protections that all of us, or most of us, have agreed arefitting and proper.

That is what we ought to do in the Senate. But there is a rush to judgment today in a time when the committee has no opportunity to hold this fine print up to the light of day and give our colleagues—our professional staff who have dealt with this law and the Federal Energy Regulatory Commission for years—to examine it and at least give us the reasonable interpretation of what all of this might mean.

If I have confused anyone today, I hope I have because this is phenomenally complicated law. My guess is that most of my colleagues have not read the bill. If they had, they could not understand it. That is in no way to impugn the chairman of the committee. It is his bill. My guess is he is ready, and certainly his staff is. But when it deals with the kind of complications that I bring out and the simple interpretation that I can turn a few other words that are now injected into what could become new utility law for this country.

I will conclude my remarks for the day. I yield the floor.

The PRESIDING OFFICER. Who yields the time?

Mr. JEFFORDS. Mr. President, if I may, I would like to respond to some of the statements that have been made by my colleagues.

First of all, my friend from Alaska quoted a figure of $6.4 billion having being spent in the last 5 years on renewable energy. I agree a lot.

The Congressional Joint Committee on Taxation estimates that between 1999 and 2003 the oil and gas industry received $11 billion in direct tax breaks—over three times what was given, in that sense, to renewables.

If you want to take a look at where your money ought to go, it ought to go where you can get the best buck. It is certainly not with coal.

These kinds of subsidies have been there for decades and decades—in some years greater than others. For example, in a typical year, $21 billion in Federal subsidies go to fossil fuels, $1 billion to nuclear, and $1 billion to renewables.

Again, when you look at energy costs with those kinds of subsidies, renewables are obviously the best way to go. But you have to have the sources to be able to provide the electricity.

As to the cost of the Federal 20 percent RPS, I note that the U.S. Department of Energy has consistently found that it will not harm the economic energy sector costs at all.

My friend says that whatever costs are incurred are passed on to the consumer. That is true. Consumers also
pay the massive cost from powerplant emissions, both environmental and health related.

For instance, recent studies have shown that emissions from coal-fired plants lead to a massive 12-percent increase in lung cancer. Obviously, if you are using wind, you do not have any ramifications.

The Senator from Alaska, who just came back to the Chamber, points to a large “footprint” from wind turbines. Let me show you this picture, which shows how wind turbines are indeed “multiple use” in the best sense, with farmers able to raise crops and graze livestock beneath them.

The wind energy alone from a 20-percent renewable standard will provide $1.2 billion in new income for farmers, ranchers, and rural landowners. That is $1.2 billion in income to our farmers.

My amendment of a 20-percent standard by 2020 is achievable, good for the economy, good for consumers, and good for the environment. I urge all Members to please support my amendment. We have to make progress. It has been some 30 years that we have been working on renewables. The successes are growing, and they are spreading throughout the world. But we are not maximizing it. In this Nation, we are not taking anywhere near the advantage we should in renewables.

So I urge my colleagues to vote for my amendment. Hopefully, this will lead to a much more prosperous future for not only the energy users but for those who produce the energy, such as those on our farms.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Alaska?

Mr. MURKOWSKI. How much time is remaining prior to the vote?

The PRESIDING OFFICER. There are 4 minutes and 12 seconds under the control of Senator CRAIG.

Mr. MURKOWSKI. I thank the Chair. My colleague was referring to millions rather than billions. I think he used the term...two billion dollars saved.” I think on the chart it shows “积极参与.” But nevertheless, I—

Mr. JEFFORDS. The total was $1.2 billion.

Mr. MURKOWSKI. So $1.2 billion. The chart said $125 million.

Mr. JEFFORDS. That was only for that farm.

Mr. MURKOWSKI. Just that farm?

Mr. JEFFORDS. Yes.

Mr. MURKOWSKI. I thank the Senator.

I want to make a point on renewables because renewables certainly have a value. But this isn’t the first time we have come to find the contribution of renewables.

We have expended $6.4 billion on renewables in the past 5 years. We are going to continue to do that at a relatively high rate.

We have had $1.5 billion for R&D, $500 million for solar, $330 million for biofuels, $150 million for wind; and $100 million for hydrogen; almost $5 billion in tax benefits, and $2.6 billion in reduced excise taxes for alcohol fuels.

I support renewables, as does virtually every Member of this body. But the question in my mind, of increasing to the point that the Senator has suggested—an aggressive 10 percent to 20 percent—will cost an extraordinary amount of money. If you consider that nonhydro renewables make up less than 4 percent of our total energy needs and less than 2 percent of our electricity consumption.

So we need a realistic national energy strategy that includes renewable energy as part of a balanced energy portfolio. But let’s not fool the public into thinking that renewable energy can replace coal, oil, natural gas, and nuclear anytime soon.

Even if we adopt an aggressive 10- to 20-percent RPS, where will the other 80 to 90 percent of our electric needs come from? Fossil and nuclear, clearly.

Even with 3 to 5 percent renewable fuels, the other 95 to 97 percent would still come from oil. Let’s move it. Let’s recognize the world moves on oil.

As a consequence, Mr. President, I encourage Members to reject the proposal to mandate this would because the cost-benefit ratio is so far out of line with what is technically achievable.

I think the National Research Council that reviewed the Department of Energy’s renewable energy programs could provide substantial improvements in performance and reductions in the costs of renewable energy technologies certainly have been made. But deployment goals for renewable technologies are based on unreasonable expectations and on unrealistic promises, and to mandate this would put an extraordinary cost on the consumer. And I assure you, that is where the costs would have to be passed.

So I encourage Members to reject the proposal.

The PRESIDING OFFICER. All time is yielded back.

The question is on agreeing to the Jeffords amendment No. 3017. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. REID. I announce that the Senator from New Jersey (Mr. TORRICELLI) is necessary. And the PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 29, nays 70, as follows:

[Rollcall Vote No. 50 Leg.]

YEAS—29

Baucus
Boxer
Biden
Brown
Buchanan
Bond
Braun

Dayton
DeWine
Domenici
Durbin

The amendment (No. 3017) was rejected.

Mr. REID. Mr. President, I move to reconsider the vote.

Mr. CRAIG. I move to lay that motion on the table.

The motion to lay on the tab was agreed to.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. WELLSTONE). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

The amendment (No. 3017) was rejected.

Mr. DASCHLE. Mr. President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DASCHLE. Mr. President, there will be no more votes tonight.

In consultation with the Republican leader and the managers of the bill, and Senator Reid, I do not believe we are in a position to come to any further conclusions on amendments tonight. So I do not expect there will be any additional rollcalls.

There will be a rollcall vote on one of the two judicial nominations pending on the calendar tomorrow morning at 9:15. Then there will be an additional rollcall vote on the second judicial nomination on Monday at 6 o’clock. So Senators should be made aware that tomorrow morning we will have a vote on a judicial nomination. It appears that may be the only vote we will have scheduled tomorrow, unfortunately. Then, on Monday, we will have a second vote which may not be the only vote. We are not sure at this time.
So I ask unanimous consent that, at 3 p.m., Monday, March 18, the Senate proceed to the consideration of Calendar No. 318, H.R. 2356, the campaign finance reform legislation, and that the cloture vote on the motion to proceed be voted.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DASCHLE. Mr. President, we will continue to take this matter one step at a time. We are encouraging Senators to express themselves on the order. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DASCHLE. Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. LOTT. Mr. President, let me inquire about the parliamentary situation. Is the energy bill still pending, and is there an amendment pending at this time?

The PRESIDING OFFICER. The energy bill is pending, and the Bingaman plan to the energy bill is pending.

NOMINATION OF CHARLES PICKERING

Mr. LOTT. Mr. President, notwithstanding that, and after a discussion with Senator DASCHLE, I will take leader time to make some remarks about the vote just taken in the Judiciary Committee. I yield myself leader time.

The PRESIDING OFFICER. The Senator has the floor.

Mr. LOTT. Mr. President, this is my 14th year in the Senate. There have been a lot of high moments and low moments in that tenure. I certainly worked very hard, and in my position as majority leader, I learned a lot of lessons. As you go along, sometimes you do things that Senators agree with, and sometimes they do not—on both sides of the aisle. I understand that.

But I must say that I feel about as bad about the Senate right now as I have in the years that I have been watching the Senate and that I have been in the Senate. I think the Senate Judiciary Committee just participated in a miscarriage of justice. I am very much concerned about the effect it is going to have on the Senate, and on our relationship on both sides of the aisle.

The Senate Judiciary Committee just voted against the nomination of Judge Charles Pickering from Mississippi to move from the Southern District Court of Mississippi to the Fifth Circuit Court of Appeals. They voted against, as I understand, reporting out his nomination unfavorably, and they voted against reporting out his nomination without recommendation. That was not exactly the sequence, or exactly the motion. The fact is they have voted against the nomination of this very fine man.

I think for the Judiciary Committee to take the action as they did is very unfortunate and very unfair to a man I have known directly and personally for about 40 years.

I know him as an individual. I know his family. I have been in his home. I have been to football games with him. I have been to campground rallies with him, and I know him very well. He certainly is qualified and certainly deserves better treatment than he has received in this process. I think this is a continuation of the politics of personal destruction. I think his character has been smeared. I think a lot of incorrect information and misleading information was put out about the judge. That was wrong.

Now a number of Senators are saying: Well, yes, we realize that information is not right but voted against him anyway. As a matter of fact, this judge has been very courageous and has been a moderating force and a leader in trying to bring about reconciliation and bringing people together—do not drive them apart, particularly in the area of race relations in our State.

I think one thing that strikes me so hard and has hurt me about this is because once again, I believe there are amendments on the campaign finance reform bill. I will say, if there are amendments to be offered, we will have debate and further consideration of those amendments on Monday and Tuesday.

It would be my expectation to file cloture on the bill for a cloture vote on Wednesday, as we currently expect it. That would then require the vote, as I have said on many occasions, no later than Friday, which would accommodate our schedule for the balance of next week.

I have said, and will repeat, if there is a way we can resolve whatever other outstanding procedural questions between now and Monday, or between now and Wednesday, I am certainly more than ready to do so. But I appreciate at least this progress. We will have more to say beginning Monday.

I yield the floor.

Mr. MURKOWSKI. Will the majority leader yield for a question?

Mr. DASCHLE. I will be happy to yield.

Mr. MURKOWSKI. Assuming. Mr. President, the schedule of campaign finance being resolved Wednesday, is it the majority leader’s intention, then, to go back to energy?

Mr. DASCHLE. Mr. President, the Senator is correct. My hope is we can finish this bill sometime soon. It would be my desire to continue to work on it until we do so, with the exception, of course, of the campaign finance reform bill.

Mr. MURKOWSKI. And, Mr. President, recognizing that may be extended, I gather the agreement is still under consideration, but if it is prolonged, do you intend to proceed and conclude campaign finance and then ultimately go back to energy?

Mr. DASCHLE. The Senator is correct.

Mr. MURKOWSKI. I thank the Chair. I thank the leader.
feel strongly about his faith. He is a believing Christian. He is an active participant in the church. He was president of the Mississippi Baptist Association. He was president of the Mississippi Gideon Association.

Is that a problem? Is that a disqualification?

This is the second nomination I have seen this year where it has looked as though if you feel strongly about your faith—your Christian faith—that there is something suspicious about that. Whatever your faith is—I think if you are committed to your faith—it should not be a disqualification from office. One of the things I admire most about Joe Lieberman is that he feels strongly about his faith, and he goes to extra lengths to abide by it, even during the campaign.

I remember during the campaign of 2000 when I came into National Airport. The campaign plane of the Vice Presidential candidate for the Democrats was sitting there at the airport on Saturday. Most of us were campaigning like crazy on Saturday. But not Joe Lieberman. He was fulfilling his commitment to his faith.

So, all of this bothers me. It is an attack. It is an attack on the nominee’s religion. It is an attack on his positions on race, which have been inaccurately portrayed. I think this is a real tragedy I am so sorry to see.

I saw a letter in a newspaper just last night from an African American. I think maybe it was a paper in New Jersey. The caption of the letter was “The Fruit Never Falls Very Far From the Tree”. This was an African American talking about his run for Congress. I guess he was an incumbent House Member, a Democrat, and he was running in the primary. When he got to a particular site, he didn’t really have enough equipment to put up his signs. When he was parking and someone around trying to get it done, Congressman Charles “Chip” Pickering showed up.

He said: We will help you. Take some of our stuff. He didn’t win, but Charles “Chip” Pickering went on to win. It is a small thing. But it tells you a lot about a man and about a man’s son.

Charles Pickering’s son worked for me. Chip Pickering is one of the finest young men I have known. He was a missionary with the Iron Curtain. He was my legislative director, and a great legislator. He not only knew the substance, but he knew the art of the possible. Senator Fritz Hollings can tell you that we got the telecommunications bill passed because of the brilliance of Congressman Chip Pickering, the son of this nominee. This young man has now worked day and night to try to help his dad get through this unfair crucible—now without success.

I feel like I failed him. I have tried to understand. Why is this happening? What is happening here? Is it just about this man? I don’t think so. No, I think it is a lot bigger than that. I think it is really directed at future Supreme Court nominees. This is a message to the President. You send us a pro-life conservative man of faith for the Supreme Court, and we will take care that he or she does not get confirmed.

That is what it is really about. But I also think it is a shot at this man. I think it is a personal shot at me. This is an attack on his positions on race, which have been inaccurately portrayed. I think this is a real tragedy I am so sorry to see.

integrity has never been questioned—until now, when the political ends apparently justify the means in some people’s minds.

When confronted with his support in Mississippi among the people—Democratic and Republican, black and white—who have known him longest and best, opponents have simply said that those opinions don’t matter, or that he has duped home folks. They know the real Pickering, they say, and he’s a right-wing extremist who’ll turn back the clock on civil rights by decades.

This is sheer demagoguery, made all the more deplorable because it exploits Mississippi’s image as some place where even a man who doesn’t deserve it. The only bright side of all this is the way so many politically and racially diverse Mississippians have rallied to Pickering’s defense.

Barring a political miracle, Pickering’s nomination appears doomed. This political mugging will say a lot more about the perpetrators than about their victim.

Mr. LOTT. Madam President, I am going to read it because it sort of sums up what a lot of the editorials are saying in these newspapers.

It is entitled: “5th Circuit Flaccus.”

Twelve years ago, the U.S. Senate approved another of the President’s nominations for a federal district court judgeship unanimously. This week, it’s likely that President Bush’s nomination of [Judge] Pickering to the U.S. Court of Appeals for the 5th Circuit, even if it is a miracle, will make it out of the Senate Judiciary Committee.

Democrats on the committee, under pressure from liberal interest groups, oppose Pickering. They’ve either brought into or allowed the grossly distorted picture of Pickering to be published in the Boston Globe, The New York Times, and other such publications. They know the real Pickering, they say, and he’s a right-wing extremist who’ll turn back the clock on civil rights by decades.

This is sheer political demagoguery, made all the more deplorable because it exploits Mississippi’s easy-mark image to smear a man who doesn’t deserve it. The only bright side of all this is the way so many politically and racially diverse Mississippians have rallied to Pickering’s defense.

Barring a political miracle, Pickering’s nomination appears doomed. This political mugging will say a lot more about the perpetrators than about their victim.

Madam President, this is an editorial from a newspaper that certainly isn’t known for endorsements, on a regular basis, of Republicans or conservatives. So I think it sums up very well what has happened here.

Now, the larger question is what does it mean for the committee and the Senate? I am not going to go or this. It is going to stick in my mind for a long time, but I am going to try to look at it from a broader perspective.

There are still eight nominees pending before the Judiciary Committee, and I have spent the last 10 months only thinking of those.

Mr. MCCONNELL, Ninth. Mr. LOTT. May 9th for the circuit court: men, women, and minorities who have not even had a hearing. Now, I realize that the majority going to stick in my mind for a long time, but I am going to try to look at it from a broader perspective.

There are still eight nominees pending before the Judiciary Committee, and I have spent the last 10 months only thinking of those.

This one man; it is about a quality system. That is what we have suffered through.

AMENDMENT NO. 3528

Mr. LOTT. I ask unanimous consent that the pending amendment be set aside, and I send an amendment to the desk.

Mr. REID. Reserving the right to object.

The PRESIDING OFFICER (Ms. CANTWELL). The Senator from Nevada.

Mr. REID. Madam President, I was present in a conversation that the majority leader and minority leader had just a short time ago. It is my understanding that the distinguished Senator from Mississippi will allow, if Senator Daschle chooses, to offer a second-degree amendment at some subsequent time. The majority leader has not yet decided.

Mr. LOTT. Madam President, I certainly would have no objection to that. That was ever-presenting, I think we ought to have a full debate. I assume the Democrats are going to vote for the resolution I have offered. If they have
something else they want to offer, fine. Let’s have a full debate on it. Maybe that will begin a process that will lead to some changes in the way we are doing things. I hope for the best.

Mr. REID. Continuing my reservation, the majority leader has indicted to me and to the minority leader that he has not decided whether he wants to offer a second-degree amendment. The courtesy of the Senator from Mississippi is appreciated.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Mississippi [Mr. Lott] proposes an amendment numbered 3032:

At the appropriate place, add the following:

SEC. 2. FAIR TREATMENT OF PRESIDENTIAL JUDICIAL NOMINEES.

(a) FINDINGS. —The Senate finds that—

(1) the Senate Judiciary Committee’s pace in acting on judicial nominees thus far in this Congress has caused the number of judges confirmed by the Senate to fall below the number of judges who have retired during the same period, such that the 67 judicial vacancies, which represents an increase from 7.9 percent to 11 percent in the total number of Federal judgeships that are currently vacant;

(2) thirty one of the 96 current judicial vacancies are on the United States Courts of Appeals, representing a 17.3 percent vacancy rate for such seats;

(3) seventeen of the 31 vacancies on the Courts of Appeals have been declared “judicial emergencies” by the Administrative Office of the U.S. Courts;

(4) during the first 2 years of President Reagan’s first term, 19 of the 20 circuit court nominations that he submitted to the Senate were confirmed; and during the first 2 years of President George H. W. Bush’s term, 22 of the 29 circuit court nominations that he submitted to the Senate were confirmed; and during the first 2 years of President Clinton’s first term, 19 of the 22 circuit court nominations that he submitted to the Senate were confirmed; and

(5) only 7 of President George W. Bush’s 29 circuit court nominees have been confirmed to date; 4.8 percent of such nominations submitted to the Senate.

(b) SENSE OF THE SENATE. —It is the sense of the Senate that, in the interests of the administration of justice, the Senate Judiciary Committee shall hold hearings on the nominees submitted by the President on May 9, 2001, by May 9, 2002.

Mr. Lott. Madam President, I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. Madam President, I would like to respond very briefly to the minority leader.

I am a member of the Senate Judiciary Committee. Let me say at the outset that one of the most painful assignments I have found serving in Congress, particularly in the Senate, is to stand in judgment of another person. We are doing something entirely different when we use the advice and consent process. It is never easy, particularly when there is controversy and particularly when you end up voting against that person for whatever reason.

I cannot appreciate the pain that the minority leader feels at this moment. A good and close friend of his has not been successful before the Senate Judiciary Committee. I am sure, were heartfelt about his love for Judge Pickering and his close friendship. Whatever I am about to say I hope will in no way reflect negatively on what is clearly a strong personal friendship between the minority leader and Judge Pickering. But there are two or three points which I would like to make so that they are clear on the record.

I have served on the Senate Judiciary Committee for 4 of the 6 years now that I have been in the Senate. I have witnessed the Senate Judiciary Committee under the control of Republicans, and I have seen it for the 8 months that the Democrats have been in control. I can tell you that the courthouse door was open for Judge Pickering in terms of a timely hearing were extraordinary.

They were extraordinary because his first hearing was in October of last year, when this Capitol complex was virtually closed down for security reasons. Exceptional efforts were made to keep our word to Judge Pickering that he would have a full hearing. It was impossible to use the ordinary buildings we use, so the hearing was held in the Capitol building. Many of us stayed over to give him his opportunity for testimony.

At that hearing, it was established that he had some 1,000 or 1,200 unpublished opinions as a Federal district court judge, and we made it clear we wanted to review those before making a final decision. So a second hearing was scheduled. And as soon as those had been reviewed, that hearing was held in February. The hearing went on for the better part of a day under the chairmanship at the time of Senator Feinstein of California.

Judge Pickering was given complete opportunity to explain his point of view and to answer all questions—another timely hearing. That led to the decision today on Judge Pickering’s nomination to the Fifth Circuit Court of Appeals.

I could go into detail, but I will not, about why I voted against Judge Pickering. There was one point that was raised by Senator Lott as minority leader which I must address. It is a point that, frankly, should not be left unresolved on the floor of the Senate. Until Senator Lott came to the floor and announced the religious affiliation of Judge Pickering, I had no idea what it was. No question was ever asked of Judge Pickering about his religious affiliation—none whatsoever. Nor in any private conversation with any member of the committee was I even given the courtesy of a hearing. Those judges were pending before the Judiciary Committee under the control of the Republican Party for an extraordinarily long period of time. Let me be specific.

Judge Rangel, nominated in July of 1997, was returned in October of 1998. It sat before the Senate Judiciary Committee under the direction of the Republican Party for 15 months with no action taken. An attempt to fill this vacancy in the Fifth Circuit and the nominee was never even given the courtesy of a hearing.

Enrique Marenco, nominated by President Clinton in September of 1999, re-nominated in January of 2001, was finally withdrawn in March of 2001; 17 months pending before the Senate Judiciary Committee; never given the courtesy of a hearing.

Alicia Johnson, nominated in April of 1999, finally, his nomination withdrawn 23 months later—never even given the courtesy of a hearing in the same Fifth Circuit. Now, the minority leader comes before us and says all of the nominees of President Bush as of last year have to receive immediate hearings before this committee.

Well, let the record reflect that the action taken today on Judge Pickering was the 43rd Federal judge who has been considered by the Senate Judiciary Committee since control of the Senate passed to the Democrats. More Federal judges have been reported out of the Senate Judiciary Committee under Chairman Patrick Leahy, a Democrat, with a Republican President in the White House, than in 4 of the years that the Republicans controlled the Senate Judiciary Committee and President Clinton, a Democrat, was in the White House.

To suggest we are blocking and stopping the efforts of the President to fill judicial vacancies is just wrong and not supported by the facts.
Let me add one last thing. To suggest this is some discriminatory action against people who live in the Fifth Circuit is wrong as well. The fact that Judge Pickering was from Mississippi, frankly, had no relevance as far as I was concerned just last year. Judge Edith Clement of Louisiana, who was nominated by President Bush to fill a spot on the Fifth Circuit, was approved in record time by a unanimous vote on the Senate Judiciary Committee and a unanimous vote on the floor of the Senate. For us to raise this now is no doubt about it. Judge Edith Clement was conservative, a Republican, and a member of the Federalist Society, and none of those things slowed down the consideration of her nomination by the Judiciary Committee. We gave Judge Clement her opportunity to serve, and we gave President Bush his nominee in record time. We extended courtesies to Judge Clement which were denied consistently by the same Committee under Republican leadership when President Clinton was in the White House.

So I think the record has to be clear in terms of where we stand and where we are going. I am troubled that we have reached this impasse, and I hope we can get through it. I hope the record will be clear as we go through this consideration. For those who have argued that someone called Judge Pickering a racist, I have not heard that word used in reference to Judge Pickering and repeatedly, on both sides of the table, Democrat and Republican, today in the Senate Judiciary Committee, that conclusion was rejected. I personally reject it. I don’t believe Judge Pickering is a racist. I believe if you look at his personal history, you will find he did things in the fifties and sixties in Mississippi which he personally regrets, and said as much to the committee.

Let me be honest. We have all done things in our lives that we regret. I should not be held against him, and it wasn’t.

He has also done exceptionally good things in the area of civil rights, and that was made a part of the record as well. Judge Pickering was judged on the basis of his service on the Federal district court bench. Good people can reach different conclusions about whether or not his service merited a promotion to the appellate court. A majority of the Judiciary Committee today adjudged that it did not.

I am not going to take any more time, other than to say it is an unfortunate outcome for a close friend of the minority leader, but I think the committee treated him with courtesy, treated his nomination with dispatch, and gave him every opportunity to present his point of view. He was given better treatment by this committee than many of the nominees submitted by the Clinton White House. I think that is part of the process. Some of these people have had to go through this day when it comes to the Judiciary Committee. We want to work with the White House so that people who have excellent legal and academic credentials, of the highest integrity and with moderate political views, have a chance to serve.

Mr. HATCH. Mr. President, if that is treating a person good, I would hate to see who is treated badly. Is all I can say. I have to take a little about Judge Pickering before I am through.

I have been hearing comments about how badly the Clinton nominees were treated. Lately, I have heard Democrats suggesting that their treatment for Bush nominees is payback for how I treated Clinton nominees when I was chairman.

I want to take a moment to defend my record on Clinton nominees. I first want to state that President Clinton got 377 Federal judges confirmed during the time I was either ranking member or chairman of the Judiciary Committee. That is a number which is only short of the record that Ronald Reagan had of 382. President Clinton would have had 3 more than Reagan—385—had it not been for Democratic holds and objections on this floor. Keep in mind President Reagan had 6 years of a favorable Republican Senate. President Clinton had 6 years of the opposition party Senate, where I was chairman, and he still got that many judges through.

By the way, to talk in terms of the 2 or 3 or 4 people I have been hearing about would not get confirmed, I think of the 54 who were left hanging when Bush I left office—54 Republicans. Terry Boyle, who has been renominated by President George W. Bush, has been sitting in committee since May 9. Both were first nominated by President Clinton, and he said John Roberts is one of the two greatest appellate lawyers appearing before the Supreme Court today—has been sitting there since May 9. So it is not surprising that President Bush, who was nominated by President George H.W. Bush, and were 2 of the 54 nominees that the Democrats left hanging at the end of his administration.

I admit 6 nominees were put up so late that, literally, nobody could have gotten them through. So say 48 were left hanging. Compare that to when President Clinton left office, the way, when Bush I left office, there were 97 vacancies, and 54 were left hanging—85 less. President Bush, who was 6 who were probably nominated too late. When President Clinton left office, there were 63 vacancies—30 less than when the Democrats held the committee, when George Bush the first was President. There were 41 nominees left hanging, 31 of whom were Clinton left office, Of the 41, there were 9 put up so late that it was a wash; in other words, it was just to make it look good. They could not have gotten through no matter who tried.

In reality, there were 32 nominees left hanging at the end of the Clinton Administration versus 48 who were left hanging at the end of the first Bush Administration. Of those 48 left hanging, I can match the Senator from Illinois and every other Democrat person for person, and much more, with decent, honorable, wonderful people who just didn’t make it through. But you haven’t heard us come to the floor every day, every day, talking about how badly they were treated, even though they were treated badly. People like John Roberts, one of the greatest appellate lawyers in the history of the country.

Think of that—382 for Reagan, the all-time champion, with the opposition party in the minority for 6 of those years, and 377 for Clinton, with the opposition party in the majority for 6 of those years. Comparing the number confirmed to the number nominated, President Clinton enjoyed an 85 percent confirmation rate on the individuals he nominated.

There were only 68 article III judges who were nominated by President Clinton, in all of his 8 years, who did not get confirmed. Of those, 3 were left at the end of the 103rd Congress, when the Democrats controlled the Senate, that leaves 55. Of those, 12 were withdrawn by the President, leaving 43. Nine were nominated too late for the Congress and committee to act on them or they were lacking paperwork. That leaves 44. Now, 17 of those lacked home State support, which was often the result of a lack of consultation with home State Senators. There was no way to confirm them without ignoring the senatorial courtesy that we afford to home State Senators in the nomination process. That left 27. One nominee was defeated on the floor, which leaves only 26 remaining nominees.

Of these, some had other reasons for not moving that I simply cannot comment on because of the security of the nomination. For example, nomination of the 54 who were left hanging when Bush I left office—54 Republicans. Terry Boyle, who has been renominated by President George W. Bush, has been sitting in committee since May 9. May 9. John Roberts, about whom I had a conversation with one of the Justices—and he said John Roberts is one of the two greatest appellate lawyers appearing before the Supreme Court today—has been sitting there since May 9. So it is not surprising that President Bush, who was nominated by President George H.W. Bush, and were 2 of the 54 nominees that the Democrats left hanging at the end of his administration.

I admit 6 nominees were put up so late that, literally, nobody could have gotten them through. So say 48 were left hanging. Compare that to when President Clinton left office, the way, when Bush I left office, there were 97 vacancies, and 54 were left hanging—85 less. President Bush, who was 6 who were probably nominated too late. When President Clinton left office, there were 63 vacancies—30 less than when the Democrats held the committee, when George Bush the first was President. There were 41 nominees left hanging, 31 of whom were Clinton left office, Of the 41, there were 9 put up so late that it was a wash; in other words, it was just to make it look good. They could not have gotten through no matter who tried.

In reality, there were 32 nominees left hanging at the end of the Clinton Administration versus 48 who were left hanging at the end of the first Bush
through—for a number of them, for instance, there is not support of home State Senators.

Of those 41 nominees left at the end of the 106th Congress, 1 was eventually confirmed in the 107th Congress. Twelve lacked home State support or had incomplete paperwork. That leaves only 20 nominees who did not go forward at the end of the Clinton administration.

There were 41 Clinton nominees left in committee at the end of the 106th Congress when Clinton left office. When Bush left office, there were 54 nominees left in committee, as I said. So the argument that this all began because the Republicans were unfair to Clinton nominees is simply untrue. We were not. I was more fair to Clinton in confirming nominees than the Democrats were to President George H.W. Bush.

I also heard the allegation that Republican inaction during the Clinton Presidency is to blame for the current vacancy crisis. This is untrue. There were only 67 vacancies at the end of the 106th Congress. Today there are nearly 30 more vacancies; 96 after almost a year. Madam President, 11.2 percent of the Federal judiciary is vacant. At the end of my tenure as chairman during the Clinton Presidency, that rate was only 7.9 percent.

We are in the middle of a circuit court vacancy crisis, and the Senate is doing virtually nothing whatsoever to address it.

There were 31 vacancies in the Federal courts of appeals when President Bush sent us his first 11 circuit nominees on May 9 last year, and there are 31—the exact same number—today. We are making no real progress.

Eight of President Bush’s first 11 nominees have not even been scheduled for hearings, including John Roberts and Terry Boyle (both of whom were on the schedule of the last President Bush but who did not get a hearing back then). This time around, they have been pending for 309 days as of today. All of these nominees received qualified or well-qualified ratings from the American Bar Association.

A total of 22 circuit court nominations are now pending for those 31 vacancies, but we have confirmed only 1 circuit judge this year and only 7 since President Bush took office.

The Sixth Circuit is half-staffed, with 8 of its 16 seats vacant. That is a crisis. They cannot function appropriately. This crisis exists despite the fact we have seven Sixth Circuit nominees pending motionless before the Judiciary Committee right now.

Although the Michigan Senators are blocking 3 of those nominees by not returning blue slips, the other 4 are completely ready to go. All have complete paperwork, good ratings by the ABA, and most importantly, the support of both home State Senators.

The DC Circuit is two-thirds staffed with 4 of its 12 seats sitting vacant. This is despite the fact that President Bush nominated Miguel Estrada and John Roberts, who have not yet been given a hearing and whose nominations have not seen the light of day since they were nominated better than 300 days ago. There is simply no explanation for this situation other than stall tactics.

The Senate Democrats are trying to create an illusion of movement by creating great media attention concerning a small handful of nominees in order to make it look as if things are moving. Some try to blame the Republicans for the circuit court vacancy crisis. That is complete bunk. Look at the record.

Some have suggested that 45 percent of President Clinton’s circuit court nominees were not confirmed during his Presidency. That number is a bit of Enron-ization. It is inflated by double counting individuals who were nominated more than once. For example, by their numbers, Martha Berzon, who was nominated in the 105th Congress and confirmed in the 106th Congress, would count as 2 nominations and only 1 confirmation. If you remove the double counting and count only the viable candidates, by their numbers, President Clinton nominated 86 individuals for the circuit courts and only 21 were not confirmed. That is 24 percent as opposed to 45 percent.

Of those 21 nominees who were not confirmed, 9 lacked home State support, one had incomplete paperwork, and another was nominated after the August recess in 2000. That leaves 10 circuit court nominees who did not receive action, some of which had issues I cannot discuss publicly.

As I said, there are currently 31 circuit court vacancies. During President Clinton’s first term, when Republicans controlled the Judiciary Committee, circuit court vacancies never exceeded 21 at the end of any year.

There were only 2 circuit court nominees left pending in committee at the end of President Clinton’s first year in office. In contrast, 23 of President Bush’s circuit court nominees were pending in committee at the end of last year.

At the end of President Clinton’s second year in office, the Senate had confirmed 19 circuit judges, and there were only 15 circuit court vacancies.

In contrast, today, in President Bush’s second year, the Senate has confirmed only one circuit court nominee, and there are 22 pending, and 17 of those are considered emergency positions.

At the end of 1995, my first year as chairman, there were only 13 circuit court vacancies left at the end of the year. At the end of 1996, the end of President Clinton’s first term and in a Presidential election year, there were 26 circuit court vacancies, only 1 higher than the number the Democrats left at the end of 1993 when they controlled the Senate and Clinton was President.

Taking numbers by the end of each Congress, a Republican-controlled Senate has never—never—left as many circuit court vacancies as currently exist today. At the end of the 104th Congress, the number was 18. At the end of the 105th Congress, that number was 14. At the end of the 106th Congress, a Presidential election year, that number was only 23. Today there are 31 vacancies in the circuit courts.

Despite all the talk, and lack of action, the unmistakable fact is that circuit courting is a crisis. There are 31 vacancies, which is far higher than the Republicans ever let reach, and the current Senate leadership is doing nothing about it. Actually, I should correct myself. They are doing something about it. They are making it grow even larger. They have acted with a deliberate lack of speed, and that is something the American people do not deserve.

Having said this to set the record straight, there are always a few nominations that have a difficult time whether the Republicans or Democrats are in control. I have to admit, I wish I could have gotten a few more through when I was the committee chairman, and if I had to do it over, I would probably have voted for a number of them.

Having said all that, let me talk about Charles Pickering because I am disappointed in what happened today. The real problem that many of the interest groups have with Charles Pickering is he does not think as they do.

These groups want to impose an ideological litmus test on judicial nominees. They will mount a campaign against any nominee who does not agree with their position on abortion, civil rights, and a host of other issues, and they will try to label anyone who disagrees with them as an extremist who is out of the mainstream. But the key here is that a nominee’s personal or political opinion on such issues is irrelevant when it comes to the confirmation process.

The real question is whether the nominee can follow the law, and Judge Pickering has certainly proved that he can. Judge Pickering has demonstrated an ability to follow the law. This is reflected in his low reversal rate of a half percent during his decade-plus tenure as a district court judge.

Although I have heard some of my colleagues complain about his 26 reversals, let’s put this in context. Judge Pickering in his nearly 12 years on the Federal bench handled 4,000 to 4,500 cases.

In all of those cases, he has been reversed only 26 times. This is a record to be proud of, not a reason to vote against him.

I suspect many of my colleagues’ misperceptions about Judge
Pickering’s record as a district judge stems from the gross distortion of that record by the liberal special interest groups. For example, one often-cited area of concern is Judge Pickering’s record on Voting Rights Act cases, but the fact is that Judge Pickering, for the Fifth Circuit, has decided a total of three of those cases on the merits: Fairley, Brazilian-American youth in Laurel, Mississippi, and the case for him; chaired a race relations committee for Jones County, Mississippi, in 1988; served on the board of the Institute of Racial Reconciliation at the University of Mississippi, in 1988; and worked with at-risk African-American youth in Laurel, Mississippi, in 2000.

I have to say I was pleased that my colleagues on the other side said they do not believe he is a racist and they do not believe that such a case can be made, and they were disappointed that some tried to make it.

I say, in addition, Judge Pickering has compiled an impressive record as a Federal district court judge. During his more than 11 years on the bench, he has disposed of an estimated 4,000 to 4,500 cases, but he has been reversed only 26 times. This means his reversal rate is roughly one-half of 1 percentage point and is lower than the average reversal rate for Federal district court judges in this country.

Despite this impressive career, Judge Pickering has become the target of a smear campaign instigated and perpetrated by liberal Washington interest groups and lobbyists with their own political agenda, some of whom called him, in essence, a racist. These groups have painted a man that bears little resemblance to reality, all in the name of attempting to change the ground rules on judicial confirmation process and impose their political litmus test for all of President Bush. So what did we hear an argument on? The Swan case. Now what was the Swan case? The Swan case the case of a cross burning on the lawn of an African-American family.

I might mention that is a vicious, rotten, lousy thing for anybody to do. Of the three boys who did it, one of them was a vicious racist who had shot into the house with a gun. Because two of them cooperated, the Justice Department put them basically a giveaway, easy sentence. The third was absolutely drunk at the time. He had not shot into the home, he had not issued any racist comments, but he was with them. He did not think he did anything wrong. He contested the case, lost, and under the mandatory minimum he had to be sentenced to 7 years.

The judge did not think that was right, but the other two really were any or more culpable, and when he looked and found out that this young man had never made a racist comment and he was drunk at the time, he thought it was a tremendous injustice. So what he did was he complained to one of his friends, Frank Hunger, who was with the Justice Department at the time, but not at the Civil Rights Division at the Civil Division. Swan still got a sentence of 27 months, a fairly long time when his two co-defendants got only home confinement and probation.

Because he talked to Frank Hunger, who was with the Civil Division, not the Civil Rights Division, we had efforts to paint that as a tremendous violation of ethics. Hardy. Hunger does not even remember the conversation and is one of the strongest supporters of Judge Pickering, a Democrat from Mississippi, Attorney General of the State, and from the Democrat attorney general of the State, and from prominent members of the African-American community.

Those who know Judge Pickering well know he has worked to improve race relations in Mississippi. For example, he worked on the revision of the Mississippi Civil Rights Act in 1966; represented a black man falsely accused of robbing a 16-year-old white girl in 1981 and won the case for him; chaired a race relations committee for Jones County, Mississippi, in 1988; served on the board of the Institute of Racial Reconciliation at the University of Mississippi since 1999; and worked with at-risk African-American youth in Laurel, Mississippi, in 2000.

I have to say I was pleased that my colleagues on the other side said they do not believe he is a racist and they do not believe that such a case can be made, and they were disappointed that some tried to make it.

I say, in addition, Judge Pickering has compiled an impressive record as a Federal district court judge. During his more than 11 years on the bench, he has disposed of an estimated 4,000 to 4,500 cases, but he has been reversed only 26 times. This means his reversal rate is roughly one-half of 1 percentage point and is lower than the average reversal rate for Federal district court judges in this country.

I might mention that is a vicious, rotten, lousy thing for anybody to do. Of the three boys who did it, one of them was a vicious racist who had shot into the house with a gun. Because two of them cooperated, the Justice Department put them basically a giveaway, easy sentence. The third was absolutely drunk at the time. He had not shot into the home, he had not issued any racist comments, but he was with them. He did not think he did anything wrong. He contested the case, lost, and under the mandatory minimum he had to be sentenced to 7 years.

The judge did not think that was right, but the other two really were any or more culpable, and when he looked and found out that this young man had never made a racist comment and he was drunk at the time, he thought it was a tremendous injustice. So what he did was he complained to one of his friends, Frank Hunger, who was with the Justice Department at the time, but not at the Civil Rights Division at the Civil Division. Swan still got a sentence of 27 months, a fairly long time when his two co-defendants got only home confinement and probation.

Because he talked to Frank Hunger, who was with the Civil Division, not
pay us to do. It is sometimes difficult. But what is really important for us to be sure of is that the judgment we make is our own, independent judgment, made with integrity, and not influenced by unfair charges or pressure from the Senate.

I think a nominee is entitled to that. If charges are made against a nominee, we ought to hear about them. We ought to find out if they are correct. Maybe delay the vote and have another hearing. If it is what is required, so be it. But when the nominee can show that the charges against him in case after case after case are not justified, and there are perfectly good and sound reasons for the actions he has taken, that his words are being taken out of context, outside the normal bounds of any kind of fair criticism, when he can explain that in matter after matter after matter that the charges are untrue, I believe the members of the Senate Judiciary Committee should listen to that. Senators should not allow friends from the outside, who have an agenda and a commitment to defeating a nominee who they have picked as the person they want to go after, to control the situation and, in effect, cast a vote in these matters. That is what I am concerned about.

Judge Pickering came before our committee. He was a superb witness. He testified with integrity, with skill, with understanding. He is a man I believe the committee related to well. I was very impressed with his testimony, his whole history as a lawyer and as a judge and as a human being. I thought, what a wonderful presentation he made. But it seemed not to have changed a single vote.

When point A was knocked down, we would go to point B, and when that was knocked down, to point C. Finally, we ended up with the most weak excuses, weak reasons that I do not believe rise to the level, in any way, that would justify rejecting this fine man.

He finished No. 1 in his law class at the University of Mississippi School of Law, an excellent school of law. He decided to go back home where his family were farmers, in the dairy business, in Laurel, MS, knew that he ought to be convicted of the crimes he committed. But when the nominee can show that the charges against him in case after case after case are not justified, and there are perfectly good and sound reasons for the actions he has taken, that his words are being taken out of context, outside the normal bounds of any kind of fair criticism, when he can explain that in matter after matter after matter that the charges are untrue, I believe the committee related to well. I was very impressed with his testimony, his whole history as a lawyer and as a judge and as a human being. I thought, what a wonderful presentation he made. But it seemed not to have changed a single vote.

He testified with integrity, with skill, with understanding. He is a man I believe the committee related to well. I was very impressed with his testimony, his whole history as a lawyer and as a judge and as a human being. I thought, what a wonderful presentation he made. But it seemed not to have changed a single vote.

Another case involved a head of the Ku Klux Klan in that area. It was a tense case in a tough time. Something needed to be done to send a signal to that jury that good men and women, in Laurel, MS, knew that he ought to be convicted of the crimes he committed.

Judge Pickering volunteered and testified as a character witness against that defendant, saying that he had a bad reputation for violence in the community. Nobody, I am sure, relished having to do that task at that time. Sure enough, the next election, he lost that election. And the Klan bragged that was the reason, that they got the man who went against them.

That is how he has a superb legal mind. He finished at the top of his class at the University of Mississippi. A man, faced with difficult times, was on the right side of the issue.

We had Charles Evers, the brother of Medgar Evers, the slain civil rights worker in Mississippi visit members of the Judiciary Committee. He came up here on Judge Pickering’s behalf and spoke strongly and passionately for him. As did an African-American judge. As did others who came. By the way, I think 26 out of 26 living Presidents of the Mississippi Bar Association endorsed Judge Pickering. But this group came here. I asked them, each one of them: During the 1960s and into the 1970s, when civil rights was really a matter of some courage in the South, was Judge Pickering on the good guys’ side or the bad guys’ side? They all said he was on the right side. He was on the good guys’ side. He took actions to reach out to the community and he believed that is important.

He, in fact, serves now as co-chairman—or did until recently—with former Governor Winter, a Democrat of Mississippi, on the Ole Miss Commission to Promote Racial Harmony. He was chosen to be co-chairman of that commission.

Oh, but they say we didn’t accuse him of being a racist. He is hostile to employment cases. So Senators HATCH and I did both the employment cases that he dealt with, delineated the two, I believe, that were reversed on matters unrelated to the merits, really, of employment cases. I also point out in the state of Mississippi, there are a group of lawyers who specialize in employment cases representing plaintiffs who sue to get their jobs back for or for damages for mistreatment. The top plaintiffs’ lawyer in Mississippi, who practiced before Judge Pickering many times, wrote an op-ed piece in the New York Times. Not just a letter, he wrote an op-ed in the paper with his name on it, saying Judge Pickering should be confirmed; the plaintiffs’ lawyer said that Judge Pickering is a fair man and that Judge Pickering treated employment cases fairly in court.

Why would we want to even continue to talk about that issue after that matter is closed? But still people do.

There were other complaints. They said he had asked lawyers to write letters on his behalf and that this somehow violated ethics. We had a professor who said this was a magnificent at best, and cited histories going back to Learned Hand, where judges got letters written on behalf of nominees. So I don’t think that was the matter.

They said he had them given to him. The Department of Justice asked him to collect the letters and have them sent up. The U.S. Department of Justice asked him to collect those letters and send them forward. It was during the time of the anthrax scare, when the then the FBI did Fifth Circuit and him to be sure to collect them all so they could be sent straight to the Department of Justice so they could be disseminated to those of us in the Senate who needed to know about it.

I am, frankly, concerned about the suggestion that there is an unfairness, or an excessive conservative bent on the Fifth Circuit Court of Appeals. The Fifth Circuit is one of the great circuits in America. It has consistently had some of the great judges in America. I just had the honor to participate in the swearing in of Ginny Granade, the granddaughter of Judge Richard Reeves on the old Fifth Circuit to a Federal judgeship in my hometown of Mobile. She worked for me for 12 years when I was U.S. attorney there. She is one of the finest people I know. She has never been political in any way. She was confirmed and is now serving there. The old Fifth Circuit and the Fifth Circuit today is a great circuit. It has a good record of being affirmed by the U.S. Supreme Court.

We have had some concerns about the Ninth Circuit Court of Appeals. I will admit I have raised these on occasion. One year the Ninth Circuit had 27 out of 28 cases that went to the Supreme Court of the United States reversed. Year after year—one year it was 17 out of 15. The Ninth Circuit has the highest record of reversals of any circuit in America by far. The Fifth Circuit is nowhere close.

I opposed, I will admit, two nominees to the Ninth Circuit. But they were confirmed.

I would have to add, however, that my concerns have been a bit validated in that Judges Paez and Berzon, the two I did vote against, those two judges on separate occasions have evidenced an ideological and doctrinal predilection for the “three strikes and you are out” law in the State of California which the State supreme court, which is not a conservative court had previously upheld.

I will just note that was discretion. Perhaps there was a legal basis for those reversals of the important California habitual offender law. Maybe the
There was a suggestion that he had collected some letters to support him and that it was unethical. There is no ethics provision that says that one way or the other. As a matter of fact, none of us can stand up and say, yes, or, no. I think he was accused of doing something, and I don’t think that that criticism has been made out that that criticism alone would have been extraordinarily unfair.

The American Bar Association, which rated Judge Pickering well qualified, considered all of these matters. Obviously, the American Bar Association’s imprimatur of qualification has been one of the standards most of the members on the majority side have held up as justifying a vote for or against a nominee. When the ABA says this candidate is qualified, it is a little hard for me to justify an assertion that somehow he was unethical because he collected letters of support on his behalf and presented them to the full Senate. It seems to me as constitutional officials we have an obligation to follow our constitutional obligation and our decision based on whether a person is qualified or not, not based upon whether that person is controversial.

There is also a very significant undercurrent of retribution. Hardly any conversation about Judge Pickering could occur without members of the majority party saying: And let us remind you of all of the judges who were
treated unfairly when Republicans were in power in the Senate and President Clinton was the President.

Only one judge was defeated on the floor of the Senate, and I do not think any were defeated in the committee, as Judge Pickering today. But there were some judges who did not get a hearing. Maybe there were too many. But I think that it is quite unfair to try to dream up reasons to vote against somebody if the real reason is that you do not like what happened to some of President Clinton’s nominees. That is not right.

We talk about the cycle of violence in the Middle East and say we have to stop it. Yet some people apparently are willing to maintain a different kind of cycle of retribution in the Senate.

I think what it boils down to is a matter of philosophy. I think, if people are honest with themselves, a lot of this boils down to the fact that some members of the majority are uncomfortable supporting a conservative nominated by President Bush. And some on the committee have been courageous enough to, in fact, say that.

One of the Senators from the majority this morning said: Look, I think that really is the reason this nominee. And the question is, Who got elected as President of the United States? Are they right? And, B, is that right?

Well, are they right? I do not doubt that Judge Pickering may be characterized as a conservative, but he has been on the Federal bench for a long time, and I have not seen anybody say that he reflected some kind of conservative bias. Moreover, one man’s conservative is another man’s mainstreamer, or however you want to characterize it.

I think we get on a slippery slope when a Senator from New York says, for example: Why, those candidates are outside the mainstream. They are conservative ideologues. I say: Gosh, they look pretty good to me. Of course, I am a conservative from Arizona. So it is all in the behavior. The question is, Who got elected as President of the United States?

I remember when Al Gore said in one of the debates with George Bush: You don’t want to elect George Bush because, if he gets elected, he will nominate conservatives to the bench. Everybody in the country knows who ever is elected President is going to nominate people they like to the bench.

President Clinton nominated a lot of people I thought were pretty liberal. I did not vote for all of them, but I voted for a lot of them because they were qualified, I had to admit. But I thought they were liberal. They were liberal. And I did not like that. And they have added to liberal courts. But, again, he was elected President, not me. I am a conservative from Arizona.

You can characterize President Clinton by how I would characterize him. He had the right to nominate candidates of his choice because he got elected by the whole country. And so did George Bush.

I daresay that George Bush probably is a better representative of the mainstream of America than a lot of individuals in this body who are answerable to specific constituencies in Arizona or New York or New Jersey or Minnesota or whatever State it might be. Therefore, I think it is wrong for any of us to have a litmus test of politics determining our vote for judges on the courts. I think if they are qualified, if the ABA says they are qualified, if we acknowledge they are qualified in the process of voting against them just because of their judicial philosophy.

That brings me to the conclusion.

When I saw the distinguished minority leader express himself tonight, after his fellow Mississippian had been defeated in the Senate committee, and he offered his sense of the Senate, I admired Senator Lott because what he was saying, in effect, was: I am not going to forget this personally. But it is time to move on and stop this business of retribution. This business of saying Clinton judges were treated unfairly, so, therefore, we are justified in doing the same to President Bush’s nominations.

What Trent Lott was saying was let’s move on. Let’s stop this nonsense. And the way we can do it is to begin to deal with the backlog of circuit court nominees that we face today. And he pointed out the statistics. Only one of the nine nominees of just about a year ago—on May 9—have even had a hearing. There is no excuse for that. There is absolutely no reason that all nine of these candidates could not have had a hearing.

Judge Pickering is only one. The other eight have not had hearings. Miguel Estrada, for example: No hearing. He is right here. There is no problem. He can have a hearing. But it is going to be a year before he can even conceivably have a hearing now. There is clearly something wrong when that is the situation.

So what Senator Lott said was let’s have a sense of the Senate and agree as a Senate that at least those eight nominees of May 9, 2001, should have a hearing by May 9, 2002, that is not too much to ask. And let’s make sure it is on the qualifications and not some excuse. Then bring those nominees who are supported to the floor so the full Senate can act on them as a body.

I support Senator Lott’s resolution. I hope my colleagues will do so when we have a chance to vote on it, perhaps Tuesday, so we can move beyond the kind of actions that I believe characterize Judge Pickering’s rejection today. I hope this is the last time we will have to have a conversation such as this.

I appreciate the Presiding Officer’s patience.

APPEAL IN THE LOCKERBIE CASE

Mr. KENNEDY. Mr. President, today justice was shining as the Scottish court in the Netherlands upheld the convictions of Libyan intelligence officers Abdel Basset al-Megrahi for the terrorist bombing of Pan Am flight 103 over Lockerbie, Scotland on December 21, 1988.

In this heinous crime, Libyan terrorists blew up Pan Am flight 103, ruthlessly murdering 270 innocent people, including 189 Americans. Until the September 11 terrorist attack, the Pan
case was the most fatal terrorist atrocity in American history.

Since 1989, our Nation has joined the victims’ families to bring the terrorists to justice and to compel the Libyan Government to acknowledge its responsibility for this terrible act. Today, after more than 13 years, a measure of justice has finally been achieved.

This verdict by the Scottish court is a victory for the families of the victims, for the British and American governments, and for the United States. One of the things that has been resolute, determined, and persistent over the period of 13 years, both in the area of sanctions as well as pursuing this in the international courts, that we have the judgment as we have seen today. That judgment is extremely clear in pointing out responsibility to the world. The Scottish court is pointing the world to the cause of the terrorism which took 13 families from my State, 67 members of the U.S. Armed Forces, and scores of other Americans. This is a victory for those families.

It is a very important step that has been taken. It is a reaffirmation in our system of justice, and it is a clear indication to countries around the world that the United States is not to be consistent and persistent to bring those who have created terror to justice, no matter how long it takes.

APPLAUDING THE JUSTICE DEPARTMENT FOR THEIR LEADERSHIP IN THE LAWSUIT AGAINST THE TOBACCO INDUSTRY

Mr. DURBIN. Mr. President, about 13 years ago, I went to get on an airplane in Phoenix, AZ. I was a Member of Congress. I was late for my plane, as usual. I came running into the airport, went to the United ticket counter, and said: Can I still make the plane? And the ticket counter said: Yes, I think you can. Hurry up. I said: Can you get me a seat in the nonsmoking section of the plane? It was too late. She said: The only seat I have left is a middle seat in the smoking section of the plane. So I said to the counter: Isn’t there something you can do? She looked down at my airline ticket and at my title and said: No, Congressman. But there is something you can do.

So I got on that airplane and sat in a middle seat in the smoking section between two chain-smoking sumo wrestlers and thought to myself: There has to be a better way.

When I got off that plane, I decided to introduce an amendment to ban smoking on airplanes across America, and was successful, to the surprise of myself and everybody else. No one had ever beaten the tobacco lobby on the floor of the House of Representatives. We did it by five votes. It was very bipartisan. It came over to the Senate. Senator Lautenberg of New Jersey picked up the cause. He was successful on this side. We put into law a ban on smoking on airplanes, which I think was the first time that titanic struggle banning all across America, in restaurants, in office buildings, in hospitals, and not only on planes, but on trains and buses. There has been a real revolution in just 13 years.

I applaud the tobacco companies when the tobacco companies go on. I give credit to a lot of those who followed after that historic legislation, particularly the State attorneys general who filed lawsuits against tobacco companies and successfully brought in billions of dollars to States because of the fraud perpetrated on the public by the tobacco industry.
I was happy to support those State suits. But at the same time, President Clinton was President, and many of us said: Why isn’t the administration in Washington doing the same thing? Why don’t we bring a lawsuit on behalf of taxpayers across America who have had billions of dollars spent on medical care for tobacco-related disease and death? Why shouldn’t they be compensated, as the States successfully prosecuted the tobacco companies for compensation at the State level?

To be fair credit, in the closing days of the Clinton administration, they prepared a lawsuit and started it against the tobacco companies by the Federal Government. And then, with the change in the administration, there was a question as to whether or not this new administration would still dedicate its resources and determination to successfully prosecute the same lawsuit.

We were concerned because initially there was criticism that the Department of Justice was putting too much money into this lawsuit. Attorney General John Ashcroft, as a Senator in this Chamber, was critical of this lawsuit against the tobacco companies. So many of us, an understandable concern about whether or not the Federal Government would really vigorously pursue the lawsuit against the tobacco industry.

I am happy to report to you today that what has been disclosed within the last several weeks gives us great encouragement because we now have had disclosed documents that have been prepared by our Government, by our Department of Justice, demanding, in this lawsuit, changes in policy by the tobacco companies which could lead to more encouraging.

Many of the things I am about to read to you have been proposed by people such as myself concerning the tobacco industry for years, and it has fallen on deaf ears in Congress. Congress is one of the worst places in the world to go and discuss the tobacco issue. The tobacco lobbyists are all over the Capitol. The tobacco interests fund campaigns right and left, and they make it very difficult for anything to be done on Capitol Hill. That is why the courts have been more successful.

But let me give you an idea of a number of the things this administration is asking for as part of their lawsuit which would really change the way tobacco products are going to be sold in America.

It would restrict all cigarette advertising to black and white print-only formats, with 50 percent of the space dedicated to graphic health warnings. In other words, all the glamour and glitz of the billboards, and all the other advertising on cigarette packaging and in magazines, would be replaced by very stark and clear black and white advertising with very graphic health warnings.

This is not a new idea. The Canadians have been in this business for a long time. Other countries around the world, such as Poland, for example, have started doing things relating to tobacco advertising the United States should have done years ago.

It would require cigarette packaging, under this demand from the Department of Justice, to carry health leaflet inserts.

It would end trade promotions and giveaways.

It would ban all vending-machine sales, which is the avenue by which many underage smokers start their habit.

It would forbid “light,” “low-tar,” or “mild” labels, which are deceptive on their face.

It would require the industry to publicly disclose all ingredients, additives, and toxic chemicals.

It would require the industry to publicly disclose manufacturing methods and marketing research.

And it would force the use of slotted fees paid to retailers for favorable placement of tobacco products.

This is an amazing array of remedies being asked for by the Department of Justice. I stand in this Chamber as someone who has never wavered in their commitment. I applaud them for the real leadership they are showing in this lawsuit. If this is a change of heart in the administration, let this Democrat stand here and be the first to praise the administration for its leadership.

We need this. We need a commitment not just of resources, but a commitment of talent at the Department of Justice to make this legal action successful. Congress now needs to ensure, in our appropriation, that we adequately fund the Department of Justice to pursue this lawsuit. Give the Department of Justice the resources it needs to fight the tobacco industry. They are going to put together hundreds of lawyers to defend their miserable product and their practices. We need to have a team just as good and well funded on our side.

I can tell you as well, don’t be deceived by the advertising from the tobacco industry. They have not changed. The Department of Justice uncovered documents that show, as recently as 1997, when the State settlements were being negotiated, the tobacco industry was conducting studies so that the brand preferences of young smokers between the ages of 12 and 20. Despite all of that beautiful advertising put on by Philip Morris and other companies on the television, which says: No we can’t sell you these cigarettes, kiddo; you know what the law is. The fact is, this industry would die if they could not recruit teenage smokers. They are still trying to find ways to reach them.

As long as they are doing that, this insidious effort to make addicts of our children so that they ultimately become hooked and die from tobacco-related disease has to be fought every step of the way. It is time for us in Congress to wake up to the need for the Food and Drug Administration to have new authority to regulate tobacco products. They have slipped through the cracks entirely too long when it comes to Government oversight. It is time to change it.

IN MEMORY OF TOM WINSHIP

Mr. KERRY. Madam President, I share a loss which affects England, and Massachusetts particularly, feel today. Thomas Winship, editor of the Boston Globe from 1965 to 1984, and a champion of the role that the American newspaper plays in our lives and the lives of our children. He used this morning after a long and brave battle with cancer, leaving behind his wife Beth, a sister, Joanna Crawford; two sons, Lawrence and Ben; two daughters, Margaret and Joanna, and eight grandchildren.

Our condolences from all in the State of Massachusetts and all who knew him. Our prayers go out to them today as they grieve the passing of this very special man.

Their loss is also our country’s loss. I can say without embellishment that Tom Winship was one of America’s great newsmen. He was an extraordinary editor, a giant among a generation of editors that includes people such as Ben Bradlee and Joe Lelyveld, and a host of others, all of whom were a band of brothers at that time, who sought to change the face of America, our politics, our culture, and our lives in a positive way. Enlarging their power of the print to be able to reach the American people with what they thought were best interpretations and aspirations of our country.

Tom was a man who lived the word “citizen” to its fullest. He loved his family, his country, his community, and the newspaper business, all with a burning passion. In his years at the Boston Globe, he left an indelible mark on our Nation. It is not an exaggeration to say that through his efforts and the efforts of others, they made a real and a significant contribution, certainly to the history of Massachusetts, of New England, and, in the conglomerate of all of them, of the country.

I first met Tom Winship when I was a young veteran, recently returned from Vietnam. I went to see him to talk about the war, a visit which led to a friendship that lasted some 31 years. When we veterans came to Washington in the early 1970s to speak our minds about the war in which we had fought, as veterans who believed we had no other choice but to tell another side of the story, something we thought was not sufficiently reported, Tom Winship showed a special and personal interest. He understood the meaning of that effort. He insisted that his paper cover that story, our story, and I think, even for a generation. As something we thought was not sufficiently reported, Tom Winship showed a special and personal interest. He understood the meaning of that effort. He insisted that his paper cover that story, our story, and I think, even for a generation.
Tom’s courage was measured not just in printing “The Pentagon Papers,” for which he was bitterly attacked by some, but in covering all the words of the time—harsh words sometimes, honest words always, and words that might much more easily, were it not for him, have been ignored.

Tom’s brand of special leadership did not begin or end with Vietnam. Perhaps it began even with the civil rights movement when he faced not just the segregation of the South but a segregation of the North. It was also his early activism, his willingness to protect the environment in the days when Rachel Carson and her book "Silent Spring" touched a new consciousness about clean air, clean water, and the birth of the environmental movement that never could have reached full momentum without Tom’s stewardship of a newspaper determined to make it an issue.

It was the unflinching effort to press for reforms— in Massachusetts, in the State legislature, in the State constitution—and his creation of the Globe’s Spotlight Team that awoke citizens to what was happening in too many instances in government that made it possible for a new generation of reformers, Governors, to have a voice and find the platform that ultimately helped usher in the modern era of politics in our State.

On all these issues and so many more, it was Tom Winship who never shied away from steering the Boston Globe by his own moral compass. He believed that a newspaper served an important national purpose. To report the news, yes, but also, he believed equally importantly, to help his fellow citizens understand how events in their neighborhoods and beyond their borders impacted their lives. He believed in the role of the newspaper to help frame the world for us, to help us find a direction as a people, to open our eyes to the outcomes and possibilities which, as it always is in a democracy, are left up to the people to decide.

Tom thought it was entirely appropriate to make public a sense of moral outrage about the actions of people in public life whose choices or whose unwillingness to make choices, their inaction, came into conflict with the public interest. Tom Winship did not easily accept the chances he perceived in America’s print media which seemed more and more interested in personality and conflict and less and less interested in ideas and ideals. Tom’s sense of what was news and what was merely new never shifted. It was seared into him by his passion for a debate on big choices and his deep and unshakable belief that the newspapers were there to help us wrestle with those decisions.

For him, being fair in the responsibility of journalists to our country, and for his remarkable energy spent to preserve that special role of the American newspaper in our democracy, for his courage in fighting to put real news, however contentious, on the front pages of America’s consciousness, Tom earned the enormous and unflinching respect of his peers. He also earned the admiration of a generation of activists and outsiders who might well have otherwise been written out of our Nation’s dialogue.

For all that he did in his life and throughout his career, Tom leaves a record that he also recognized existed at home and in the world. It was the unflinching effort to press for meaningful change and to find the platform and voice and find the platform that ultimately helped usher in the modern era of politics in our country. But I wish all of you had the opportunity I now have to work with Secretary Powell and President Bush. I have been in meetings with them and with heads of state or foreign ministers of other nations. And in private, in staff meetings, I can tell you that you would sleep better at night knowing how calm, competent, strong and dedicated they are. I wish I could say that I would sleep better at night knowing how calm, competent, strong and dedicated I am, except for Deputy Secretary Armitage calling me to ask where is the memo that was supposed to be upstaged by close of business.

March 14, 2002
CONGRESSIONAL RECORD — SENATE
S1927

Remarks by Otto J. Reich Upon His Swearing-In as Assistant Secretary for Western Hemisphere Affairs, in the Benjamin Franklin Room, U.S. Department of State, March 11, 2002

Mr. REICH. As President Bush would say, “Basta.”

Thank you very much, Mr. Secretary, for those very kind words and for your presence know how busy you are and I very much appreciate your officiating at this ceremony.

Excellencies, Senators Helms—Chairman Helms, Secretary Martínez, colleagues from many years of service in the U.S. Government, Army buddies, un-indicted co-conspirators, friends, family, and special guests: many of you know how many long hours to be here, and I want to thank you all for sharing this important occasion with me and with my family. I believe, however, the delegation from Panama holds the record for the longest distance traveled. If anybody else has traveled longer, we have a prize for you afterwards.

As much as I appreciate your presence, my first words of gratitude, on behalf of myself and my brother, my family and my fellow Cuban-Americans, must go to this most generous of countries, the United States of America.

As most of you know, my country of birth, Cuba, lost its liberty to a totalitarian dictatorship forty-three years ago. My family, like so many other nonpolitical families, was in danger simply because of our love of liberty, which ran counter to the communist ideology being imposed by force on that island.

The United States of America opened its doors to us, as it has done for millions yearning to breathe free. It did not ask anything in return, except allegiance and respect for the law. It protected our lives, gave us liberty and the opportunity to pursue our happiness.

The Greek philosopher Thucydides said that Justice is the right of any person to do those things which God gave him the ability to do. By that or any other definition, this is a just country. Our nation is not perfect, but it allows its citizens to do that for which God gave them the ability. To say that I am proud to be an American is the height of understatement.

I wish all of you had the opportunity I now have to work with Secretary Powell and President Bush. I have been in meetings with them and with heads of state or foreign ministers of other nations. And in private, in staff meetings, I can tell you that you would sleep better at night knowing how calm, competent, strong and dedicated they are. I wish I could say that I would sleep better at night knowing how calm, competent, strong and dedicated I am, except for Deputy Secretary Armitage calling me to ask where is the memo that was supposed to be upstaged by close of business.

I wish all of you had the opportunity I now have to work with Secretary Powell and President Bush. I have been in meetings with them and with heads of state or foreign ministers of other nations. And in private, in staff meetings, I can tell you that you would sleep better at night knowing how calm, competent, strong and dedicated they are. I wish I could say that I would sleep better at night knowing how calm, competent, strong and dedicated I am, except for Deputy Secretary Armitage calling me to ask where is the memo that was supposed to be upstaged by close of business.

I yield the floor.

OTTO REICH IS ON THE JOB

Mr. HELMS. Madam President, this past Monday, March 11, I was among the hundreds of Otto Reich’s friends and supporters when he was sworn in as Secretary of State Colin Powell to serve as Assistant Secretary for Western Hemisphere Affairs.

His nomination had been delayed, to a frivolous extent, by a few Senators who held a grudge against Mr. Reich because he so ably served President Reagan in the 1980s as head of the U.S. Office of Public Diplomacy for Latin America.

Now, on this past Monday, March 11, surrounded by his family, his two daughters held the Holy Bible on which Otto placed his hand while taking the oath of office by Secretary Powell. There followed a thunderous and prolonged applause when the oath was concluded and Secretary Powell turned over the podium to Secretary Reich.

Madam President, it occurs to me that many will find Otto Reich’s courage was measured not just in fighting to put real news, however contentious, on the front pages of America’s consciousness, but also in a memorandum that teaches us lessons about telling the truth and focusing on what is really important. When you lose a man such as Tom Winship, your first instinct is to say you will not see another one like him. But knowing what we do about Tom Winship, knowing all he stood for and all he accomplished, we also know he would not want that. He simply would not believe it. He would want us to think that the world we live in, in the future will be a world with more people pursuing the same goals, with more people believe they can change things and follow his example.

He would have believed nothing less than that. Although the standard he set is exceedingly high, it will mean so much more to our country to see another generation that walks the path Tom Winship so courageously blazed for all of us.

I yield the floor.
country to be the first one in my family to graduate from college, and then to obtain a graduate degree; to be an officer in the U.S. Army; and to be sworn-in three previous times for Presidential appointments. I am proud of every single job I have performed in service to our country.

Much has been written in the so-called "pervasively favorable" press as a result of my previous work. Some of it even true! There were charges of "covert propaganda" by the office I headed in the 1980’s; the Office of Public Diplomacy for Latin America and the Caribbean. Well, Mr. Secretary, today I have a confession to make about the work of that office. Now that the Statute of Limitations has expired, I think it is safe for me to confirm what so many on the other side suspected: Yes, the Office of Public Diplomacy for Latin America and the Caribbean was single-handedly responsible for the downfall of the Soviet Union.

There are so many things for which I am grateful today. Like two beautiful and intelligent young ladies who hold the Bible. The person responsible for their being smart and pretty is here, their mother—Connie—my friends. Each of you made sacrifices to help me to where I am today. I don’t think anyone has a more supportive ex-spouse than I do. Thank you.

And also here is another very special lady, Lourdes Ramos, who this past weekend accepted my proposal of marriage. Thank you, Lourdes. I look forward to our life together. It’s a busy weekend.

Standing up here, I stand figuratively on the shoulders of all of you. Each of you is here because you have something to say about my being here, some more than others. As George Orwell said in Animal Farm, “All animals are equal but some are more equal than others.”

I am not going to start naming the names of those who are more equal than others, but you know who you are. Since I can’t possibly name each one, please consider yourselves properly singled out.

I do want to thank President Bush and Secretary Powell not only for selecting me for this incredibly exciting post, but for allowing me to serve in Cuba. I am proud, Mr. Secretary, that my grandfather served in the U.S. Army under a general named Antonio Maceo.

Maceo was the equivalent of the Chairman of the Joint Chiefs of Cuba’s insurrection. He was a black descendent of slaves. Today we would call him Afro-Cuban. Over one hundred years ago, Cubans of all races willingly fought and died for their independence. They called it “El Taino de Bronce,” the Taino of Bronze, in honor of the color of his skin.

Antonio Maceo, the highest-ranking military officer of African heritage in this hemisphere until Colin Powell came along. And today I am proud to serve under another “Taino de Bronce.”

Much has been made of my Cuban-American heritage. One group said that I couldn’t possibly handle our relations with this hemisphere because I don’t have the right temperament, by virtue of my ethnic background. They actually put that in writing. They said that I can’t make rational decisions because I am a foreigner! Well, they are not saying that anymore, because I had them all arrested this morning!

Believe me, I hung in there and I have the rope burns around my neck to prove it. But persevere? I am an American. When the Founding Fathers pledged their lives, their fortunes and their sacred honor to create this experiment in democracy in 1776, they did not qualify their words. They didn’t say they were going to re-consider if they ran into some resistance from the British. Well, I was not going to re-consider either.

How could I? My late parents were not quitters, and they are proud of my service to their adopted country. My mother was a poet and a humanitarian, and was also a practical hard-working, a telephone operator and a union member.

I like to remind my Democrat friends that I come from a labor union family and am proud to have served the only U.S. President to have been president of a labor union: Ronald Reagan, the man who with his famous policy vision and courage laid the groundwork for the end of the Evil Empire. And by the way, with the help of a lot of people who are in this room today, I said their names and a little bit about what they did. So I do have my obligations to them. I am proud to have served in Cuba.

Hang In There.

—Lourdes Ramos

CONGRESSIONAL RECORD — SENATE
March 14, 2002
Kevin, I hear you. I hope my colleagues do, too.

Kevin is addressing a problem many families and communities all across our Nation now find themselves confronting. They are all asking the question: Is my local part safe from arsenic-treated wood which, when the rains come, leach the arsenic from the playground wood into the soil? Should I tell my children they cannot play in the park because of the wood that is treated with arsenic?

What I found is that local officials, county commissioners, city commissioners all across Florida and many other States have raised similar questions about the use of arsenic-treated wood in playgrounds and backyard decks. The fact is, none of these communities has been given any clear guidance of what to do about arsenic-treated wood which, when the rains come, leach the arsenic from the playground wood into the soil? Should I tell my children they cannot play in the park because of the wood that is treated with arsenic?

I tell my children they cannot play in the park because of the wood that is arsenic-treated. The EPA has studied and negotiated an agreement, reminiscent of a voluntary phaseout of arsenic-treated wood which, when the rains come, leach the arsenic from the wood on those playgrounds about which little Kevin is writing.

Even before his election to the Nevada State Assembly in 1983, Marvin was an integral part of the Nevada political scene. In 1958 Marvin was a member of the Democratic Party Reform Commission, and in 1968 he became the State chairman of the “ Humphrey for President” campaign. Marvin was also selected by several Nevadan Governors, good friend Governor Mike O’Callaghan, to serve on various State boards. He was a member of the Governor’s Task Force on Rural Health Emergency Services and an advisory board member for the Clark Community College. In addition, he served as secretary of the State Board of Optometric Examiners and president of the Clark County Mental Health Society.

As a member of the Nevada State Assembly, Marvin gained prominence across the State for his service as chairman of the Assembly Ways and Means Committee, which allowed him to determine which bills would survive and which bills would not move forward. Marvin maintained his position to advocate for those who often are voiceless including welfare mothers and low-income workers and families. In addition, while many others shied away from unpopular tax increases, Marvin’s courage led him to support increases that would fund the State’s expanding services and social programs.

Marvin’s greatest cause was improving the education of Nevada’s school children. He was a great believer in the importance of educational funding and continuously pushed for increasing funds for State schools. Throughout his 8 years in the Nevada State Assembly and even before then, he worked to ensure that Nevada’s children had the resources to improve their lives, receive a solid education, and fulfill the American dream. The Local Law Enforcement Act of 2001 is now a symbol of what to do about arsenic-treated wood which, when the rains come, leach the arsenic from the wood on those playgrounds about which little Kevin is writing.

I urge my colleagues to join me in enacting legislation I filed to permanently ban this potentially harmful product. It is S. 1963.

TRIBUTE TO MARVIN SEDWAY

Mr. REID. Mr. President, I rise today to celebrate the official opening of the Marvin Sedway Middle School in Las Vegas, NV. This state-of-the-art facility provides an enduring tribute to one of Nevada’s most esteemed and courageous political figures.

Marvin Sedway was a man with a ferocious spirit. His language was rough and his determination was fearless, but in everything that he did, Marvin was dedicated to the betterment of Nevada. As a State assemblyman he demonstrated an unwavering dedication to the children of his State and made their education his top priority.

Mr. Sedway moved to Las Vegas from New York City when he was 13 years old. In 1946 he graduated from Las Vegas High School and then he attended the University of Nevada at Reno. After completing his professional education at Pacific University in 1964, Marvin worked as an optometrist for almost 40 years. Throughout his career, Marvin Sedway’s compassion and generosity were evident. It was widely known that Marvin volunteered thousands of hours to serve handicapped and underprivileged children who could not afford proper care.

Even before his election to the Nevada State Assembly in 1983, Marvin was an integral part of the Nevada political scene. In 1958 Marvin was a member of the Democratic Party Reform Commission, and in 1968 he became the State chairman of the “Humphrey for President” campaign. Marvin was also selected by several Nevadan Governors, good friend Governor Mike O’Callaghan, to serve on various State boards. He was a member of the Governor’s Task Force on Rural Health Emergency Services and an advisory board member for the Clark Community College. In addition, he served as secretary of the State Board of Optometric Examiners and president of the Clark County Mental Health Society.

As a member of the Nevada State Assembly, Marvin gained prominence across the State for his service as chairman of the Assembly Ways and Means Committee, which allowed him to determine which bills would survive and which bills would not move forward. Marvin maintained his position to advocate for those who often are voiceless including welfare mothers and low-income workers and families. In addition, while many others shied away from unpopular tax increases, Marvin’s courage led him to support increases that would fund the State’s expanding services and social programs.

Marvin’s greatest cause was improving the education of Nevada’s school children. He was a great believer in the importance of educational funding and continuously pushed for increasing funds for State schools. Throughout his 8 years in the Nevada State Assembly and even before then, he worked to ensure that Nevada’s children had the resources to improve their lives, receive a solid education, and fulfill the American dream.

When Marvin Sedway died of lung cancer on July 7, 1990 at the age of 61, Nevada lost a great leader. But as the doors of the Marvin Sedway Middle School officially open, we can celebrate his legacy as a public servant committed to education. Thousands of young Nevadans will be educated in this remarkable facility, fulfilling Marvin’s hopes and ambitions for Nevada’s children.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of last year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred in August 1994 in Sioux City, IA. Two gay men were attacked when two intruders broke into their residence. The assailants, Anthony L. Smith, 17, and Henry White, 18, were charged with first-degree burglary and second-degree criminal mischief under the State hate crime statute.

I believe that government’s first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

RETRAITEMENT SECURITY ADVICE ACT OF 2002

Mr. BOND. Mr. President, today I am adding my name as a co-sponsor of the Retirement Security Advice Act of 2002, S. 1963, introduced by my good friend from Arkansas, Senator TIM HUTCHINSON. I do so, and submit this statement for the RECORD, because the bill holds important implications for small businesses in this country and the millions of Americans they employ.

In 1996, we created the Savings Incentive Match Plans for Employees SIMPLE, as a pension-plan option for small firms in this country. The goal was a simple one: provide a pension plan with low administrative costs for employers so they can offer pension benefits to encourage employees to save for their retirement. I am pleased that these plans have become quite popular, and together with the other pension simplifications and improvements enacted in the last five years, they have contributed to better access to pension benefits by small businesses and their employees.

Greater retirement savings, however, have raised new and complex issues for many employees who have seen their pension accounts grow substantially. As the Ranking Member of the Committee on Small Business and Entrepreneurship, I have heard many constituents raise difficult questions in this area as they ponder investments for my personal circumstances and risk tolerance? Should I buy stocks, bonds, annuities, or something...
else? How should I diversify my investments? When should I modify my investment mix? And so on.

The importance of these questions has increased substantially in light of recent high-profile business failures and economic downturns. Gone are the days of the momentum market where any dollar invested seemed to grow with little effort or risk.

The return to more cautious investing has left many who participate in employer-sponsored pension plans in a real dilemma. Hire an outside investment advisor or go it alone in most cases? Why? Current pension rules effectively preclude most employers from offering investment advice directly to their employees. In fact, recent estimates are that only about 16 percent of participants have access to investment advice through their pension plan. In today’s complex investment environment that is simply too little help for employers wanting to try and manage their retirement security.

Senator HUTCHINSON’s bill addresses this situation in a responsible way. For most businesses, and particularly small firms, the logistical place to look for an investment advisor would be the company that manages the plan’s investment options or an affiliated firm. Under Senator HUTCHINSON’s bill that option would now be available, opening the door for countless businesses to offer this investment benefit. I disagree to their employees who participate in the company’s pension plan. In addition, by allowing more businesses to offer investment-advice benefits, the bill creates an opportunity for increased competition among investment advisors, which can lead to better advice products and lower costs overall.

Senator HUTCHINSON’s bill, however, does not simply change the rules to help the business community. It also includes safeguards to protect the interests of the plan participants. Investment advisors must satisfy strict requirements concerning their qualifications, and they must disclose on a regular basis all their business relationships, fees, and potential conflicts of interest directly to the participants. In addition, and arguably most importantly, the investment advisor must assume fiduciary liability for the investment advice it renders to the employee participants in the plan. In short, if the investment advisor does not act solely in the interest of the participant, it will be liable for damages resulting from the breach of its fiduciary duty. Together, the bill’s provisions provide substantive safeguards to protect the interests of the plan participants who take advantage of the new investment-advice benefit.

Some have contended that a better alternative is to force small businesses to engage an independent third party to provide investment advice. I disagree. The result would simply be the same as under current law. Cost is a real issue for small businesses seeking to offer benefits like pension plans and related investment advice. Hence, the genesis of the SIMPLE pension plan. As under the current rules, if the only option is a costly outside advisor, the small firm will not offer the investment-advice benefit. As a result, we would not move the ball even a yard further, employees would still be left to their own devices to figure out the complex world of investing or they would have to seek out and hire their own advisor, which few have the wherewithal to do.

More to the point, nothing under the Hutchinson bill prevents a business from engaging an independent advisor if the employer deems that the best alternative. The standard under the Hutchinson bill for selecting the investment advisor is prudence: the same criteria that the employer must exercise under current law when selecting the company that manages the pension plan and its investment options. If a prudent person would not hire or retain the investment advisor, then under the Hutchinson bill, the employer should not do so either or face liability for breach of fiduciary duty. Again, additional protection for the plan participants.

In my assessment, investment advice is an increasingly important benefit that employees want and need. Moreover, small businesses in particular need the flexibility to offer benefits that keep their key people with big companies as they seek to hire and retain the very best employees possible. And when we talk about small business, we are not dealing with an insignificant employer in this country. In fact, according to Small Business Administration data, small businesses represent 99 percent of all employers and provide about 75 percent of the net new jobs in this country.

The Retirement Security Advice Act provides a carefully balanced and responsible way to address this situation. Most importantly, it provides a solution that employers will actually use to offer the investment advice sought by their employees who struggle to put money aside in the hopes of having a nest egg that someday will provide them with a comfortable retirement. I am pleased to co-sponsor this bill and look forward to working with my colleague from Arkansas to see it enacted into law.

REMEMBERING THE VICTIMS OF SEPTEMBER 11

Mrs. BOXER. Mr. President, today, I speak with great pain in my heart as our country remembers the victims of September 11. Monday was the 6-month anniversary of the attack on the World Trade Center and the Pentagon. Once again, I want to offer my condolences for the people who lost family members, friends, neighbors, and co-workers.

The amazing generosity and outpouring of love expressed by so many people in our country over these past six months has been heartwarming, and I have never seen such unity.

Our country has been through a very difficult time. Each of us will remember where we were when we heard the news that commercial planes were turned into weapons against the World Trade Center and the Pentagon. Each of us will remember how we felt when we realized the incredible devastation of terrorism in our midst.

On that day I was in the Capitol in a meeting with Senate Majority Leader TOM DASCHLE and several other Senators when the planes struck the World Trade Center. As we evacuated the Capitol building, our brave Californians on Flight 93 were bringing down the plane, hijacked by the terrorists and most likely headed for us. I truly believe that those Californians on Flight 93 that day have made it possible for me to be here today.

Even as time has gone on, all I can think of is the people on those planes, the families who lost loved ones. It is the families today that are coping with the results of September 11, and it is the families that will continue to keep the memory of the victims alive in all of our hearts. We have decided to fight and stand up for them and their memories.

Every generation has its time of testing. For my parents it was World War II, and for their parents it was World War I. Now, this our time, and this our challenge.

THE UNINSURED

Mr. SMITH of Oregon. Mr. President, I rise today to give tribute to some of
the health care heroes in my home State of Oregon. During a recent visit to the Volunteers in Medicine Clinic in Eugene, OR, I was tremendously impressed by the strong public service ethic of the professionals who deliver high quality health care to their uninsured clients.

In 1999, a concerned group of citizens in Eugene, OR, convened to study the extent of the health insurance problem in Lane County. It found that 28,000 of their friends and neighbors in the county were uninsured. Of these, almost half were working families or low-income people.

As a result of that study, the Volunteers in Medicine Clinic came about. Under the executive director and board chair, Sister Monica Heeran, the mission of the clinic is to meet the health and wellness needs of the working poor by providing free medical care.

The Volunteers in Medicine model relies on practicing and retired medical professionals and volunteers who have limited access to health care, typically the working poor. Over 300 health care professionals have generously given their time for this worthy cause that has helped hundreds of families secure a medical home.

One of the volunteers at the Volunteers in Medicine Clinic is Dr. John Haughom, vice chair of the Board and volunteer physician. He told me about a woman he had seen recently at the clinic, Mrs. Gonzalez, who had presented with a large mass under her right jaw. It had been growing for some time, but she had not sought medical care because she knew she could not afford it. Dr. Haughom diagnosed Mrs. Gonzalez with non-Hodgkins lymphoma and was able to arrange for the best possible treatment for her advanced condition. As she was treated, Dr. Haughom continued to visit her at her workplace and shared her good news when she told him that a surgeon had been able to remove the entire tumor, and that her recovery is expected to be complete.

I also heard from a patient who had gone to the Volunteers in Medicine Clinic with what he thought was a case of acid reflux—heartburn. In addition to being given medication to control the symptoms, the patient was referred to a cardiologist, who advised the patient to get an angiogram. It turned out that the underlying condition was no less than five clogged arteries, and that her recovery is expected to be complete.

Mr. NELSON of Nebraska. Mr. President, I rise today during the celebration of the 90th anniversary of the Girl Scouts of the U.S.A., to express my support for this respected organization.

The mission of the Girl Scouts is to help all girls grow strong. Girl Scouting empowers girls to develop to their full potential and to develop values that provide the foundation for sound decision-making. Scouting teaches girls to relate positively to others and to contribute in constructive ways to society.

Through Girl Scouting, girls acquire self-confidence, learn to take on responsibility, and are encouraged to think creatively and act with integrity. Girl Scouts take part in activities that teach them about science and technology, finance, sports, health and fitness, the arts, global awareness, and community service. These experiences allow Girl Scouts to develop the qualities that are essential in developing strong leaders.

Perhaps the best proof that Girl Scouting has had an important impact on women leaders in our country is the fact that over two-thirds of our doctors, lawyers, educators, and community leaders are former Girl Scouts.

I also would like to thank the many volunteers who make the Girl Scouts such a successful organization. These mentors and role models are essential in providing support to girls and empowering them to realize their potential and to achieve.

I think it is important to take this time today to celebrate and recognize the important role models and friends that Girl Scouting has to our society by encouraging them to become good citizens and effective future leaders.

Mr. SANTORUM. Mr. President, I would like to take this opportunity to recognize the Girl Scouts of the USA, as they are celebrating their 90th anniversary this week. Today, as the result of founder Juliette Gordon Low's vision, 2.7 million girls in more than 233,000 troops are learning the skills and building the character necessary to make a positive impact on the world. It is the Girl Scouts mission to help all girls grow strong by empowering them to develop their full potential, relate positively to others, and contribute to society. The Girl Scouts recognize the importance of training girls to become effective leaders by instilling in them strong values, increasing their social awareness, giving them responsibilities, and encouraging them to think creatively and act with integrity. The Girl Scouts also provide experience and training in the area of activities related to science and technology, money management and finance, sports, health and fitness, the arts, global awareness, and community service.

This significant undertaking would not be possible without the commitment and sacrifice of Girl Scout adult members. I would like to note that 99 percent of the 4 million adults involved with the Girl Scouts are volunteers. Their willingness to invest in the girls of America is highly commendable and is the kind of service that President Bush has been raising and encouraging. It provides a perfect example of the good that can be accomplished when dedicated people get involved in their communities. More than 50 million Girl Scout alumnae are a testament to their success. Over two-thirds of our doctors, lawyers, educators, community leaders, and women Members of Congress were once girl scouts, as were 64 percent of the women listed in Who’s Who of American Women.

Another facet of the Girl Scouts that makes them so admirable is the diverse membership they embrace. Troops can be found in every kind of community; girls are not limited by racial, ethnic, socioeconomic, or geographical boundaries. The Girl Scouts continue to expand, with troops now meeting in homeless shelters, migrant farm camps, and juvenile detention facilities. And because of a Girl Scouts initiative called Girl Scouts Beyond Bars, girls can meet in prisons where their mothers are incarcerated. In addition to creating more troops, the organization has also established a research institute and has received funding to address violence prevention.

The Girl Scouts is an organization that we in this country are very proud of. The combination of educational and service-oriented programs and exemplary leadership produces the caliber of responsible citizens America needs, especially in this time of uncertainty. So today I would like to thank the Girl Scouts for their outstanding contribution to our society, and I want to express my firm support and congratulations as they strive to carry out the mission that was begun 90 years ago.

Mr. INHOFE. Mr. President, often when we think of Girl Scouts, we think of those delicious cookies that come to our door every year, delivered by smiling-faced girls. But we may not realize the positive impact Girl Scouts have had on so many women in our society.

Established by Juliette Gordon Low in 1912, Girl Scouts is made up entirely of women leaders in our society. The Girl Scouts continue to exist in every kind of community; girls are not limited by racial, ethnic, socioeconomic, or geographical boundaries. The Girl Scouts continue to expand, with troops now meeting in homeless shelters, migrant farm camps, and juvenile detention facilities. And because of a Girl Scouts initiative called Girl Scouts Beyond Bars, girls can meet in prisons where their mothers are incarcerated. In addition to creating more troops, the organization has also established a research institute and has received funding to address violence prevention.

The Girl Scouts is an organization that we in this country are very proud of. The combination of educational and service-oriented programs and exemplary leadership produces the caliber of responsible citizens America needs, especially in this time of uncertainty. So today I would like to thank the Girl Scouts for their outstanding contribution to our society, and I want to express my firm support and congratulations as they strive to carry out the mission that was begun 90 years ago.
In a time when more positive role models are needed, Girls Scouts often become good citizens and strong leaders through learning self-confidence, responsibility, and the ability to think creatively and act with integrity. They also participate in activities that teach them teamwork, management, money, technology, money, management, sports, health, and fitness, the arts, global awareness, community service, and much more.

In my State of Oklahoma, the Girl Scouts of Red Lands Council has launched an initiative to serve girls who have special financial and educational needs. This project has allowed many girls to become Girl Scouts who might not have otherwise had the opportunity.

Please join me in recognizing this outstanding organization for its role in giving today’s girls a chance to become tomorrow’s leaders.

Mr. DOMENICI. Mr. President, I rise today to congratulate the Girl Scouts of America on celebrating 90 years of making a difference in the lives of millions of girls and young women. Founded by Juliette Gordon Low on March 12, 1912, the Girl Scouts of America has a long and storied tradition of providing girls with the tools they will need to be successful members of our communities. America is a better country because this organization has led the way in preparing girls for leadership roles.

I have long supported efforts and organizations that help our young people deal with the very unique challenges they face. The Girl Scouts is an organization that is doing just that. In fact, that is exactly the mission of the Girl Scouts. I am proud of the efforts that the Girl Scouts has made in understanding and addressing the needs of girls.

As you know, I believe that we need to do better in teaching math and science to our young people. This is particularly true when it comes to our girls and young women. I am told that women constitute only 22 percent of our scientists and engineers in spite of making up 46 percent of our work force. The Girl Scouts is working successfully to change this through the Girls at the Center program, the National Science Partnership, the Elliott Wildlife Values Project, and one of the newest initiatives, Girls Go Tech. These initiatives have been very successful in helping girls realize their full potential in the areas of Math and Science and I look forward to the continued success of these programs.

Another feature of the Girl Scouts that I am excited about is its volunteer component. I believe that the Girl Scouts is exactly the type of organization that the President has referred to in his call for more volunteers. I don’t think anyone could disagree when I say that this organization is only successful because of the efforts of our volunteers. Over 99 percent of the adults involved in the Girl Scouts volunteer their time.

In closing, I want to thank the women who came by my office yesterday to share with me the exciting things that the Girl Scouts of America is doing in my state of New Mexico. Based on the quality of women who made the organization’s capitol, I am confident in predicting much continued success for this organization in our state and in this great country.

Mr. MILLER. Mr. President, I rise today to recognize the contributions an extraordinary organization has had on the lives of young women in America. In 1912, the Girl Scouts of America was founded in my home State of Georgia by a visionary young lady named Juliette Gordon Low. Juliette’s hope was to bring girls together in the spirit of service and community. Within a few years of the establishment of the first troop, the Girl Scouts had expanded to many different cities across the country, and had opened their doors to girls of all ages and backgrounds. Since then, the organization has been a symbol of leadership in this country, from their involvement in relief efforts during the Great Depression to their activism for civil rights and environmental responsibility in the turbulent 1960s and 1970s. The Girl Scouts have cultivated traditional values like volunteerism and have taught young women the importance of leadership, financial literacy, good health, and global awareness.

Today, Girl Scouts organizations across America play a role in the lives of over 3.7 million young women. On this, the 90th anniversary of the creation of the Girl Scouts in Savannah, GA, I wish to recognize the vision of Juliette Gordon Low and the contributions of the Girl Scouts of America to the development of the intelligent, self-confident young women who play such an important role in America today.

Mr. BUNNING. Mr. President, today I would like to take the opportunity to honor the Girl Scouts of the United States of America for all that they have accomplished for America’s young women. This week, the Girl Scouts is amicably celebrating its 90th anniversary, and I believe it appropriate that we congratulate all involved with this storied institution for having the courage and capability to withstand and conquer the hands of time.

March 12, 1912, Juliette “Daisy” Gordon and 18 girls from Savannah, Georgia gathered for what was to become the first official meeting of the Girl Scouts. Like most great innovators, Juliette Gordon began her journey with a very simple and progressive idea. She thoroughly believed that every young woman deserves the opportunity to fully develop physically, mentally, and spiritually. Today, the Girl Scouts of the United States of America have membership of 3.8 million girls, 909,000 adult members and over 900,000 adult members. That small southern group of 18 Savannah women has grown over the last 90 years into the largest organization for girls in the world. Through its membership in the World Association of Girl Guides and Girl Scouts, Girl Scouts is part of the worldwide family of 10 million girls and adults in 140 countries. They even received a charter from the United States Congress in 1950 officially establishing the Girl Scouts of the United States of America.

By enrolling in the Girl Scouts, a young women is afforded the unique opportunity to enhance her communication and social skills, to develop a strong sense of self, to participate in innovative programs, and to foster her creative side. At the different levels of Girl Scouting, girls learn relevant and applicable skills relating to science and technology, money management and finance, health and fitness, community service, sports, and global awareness. These young women are learning how to be productive and proactive citizens, who will some day have the chance to change the world. In fact, over two-thirds of women doctors, lawyers, educators, community leaders, and members of Congress in the United States were once proud participants in the Girl Scouts. In 1999 “Troop Capitol Hill” was founded to honor those women members of Congress who were in the Girl Scouts. Furthermore, 64 percent of the women listed in the Who’s Who of American Women were at one point Girl Scouts. The Girl Scouts has found a successful way to bring out the best in its young women, and I personally thank the leaders and supporters of this great organization for continually producing strong and bright young women committed to making this country a better place to live.

I would now like to pay a special tribute to the Girl Scouts of Kentucky. In the Commonwealth of Kentucky, over 33,000 girls and 13,000 adult volunteers participate in the Girl Scouts. In fact, six of my granddaughters were Girl Scouts and six of my beautiful granddaughters are currently learning what it means to live by The Girl Scout Law. Girl Scouts of Kentucky has made a substantial effort to reach out to young girls who typically might not be able to be involved in the program due to monetary issues. They have even gone as far as to establish troops in homeless shelters and low-income housing projects. The women of Girl Scouts of Kentucky have gone above and beyond their call of duty to ensure that every young woman in the Commonwealth has the opportunity to realize the vision Juliette Gordon set out in 1912. I ask that my fellow colleagues join me in applauding their selfless efforts.

Finally, I would like to share with my colleagues the timeless words of The Girl Scout Law.

I will do my best to be honest and fair, friendly and helpful, considerate and caring, courageous and strong, and
responsible for what I say and do and to respect myself and others, respect authority, use resources wisely, maintain the work ethic, and be a sister to every Girl Scout.

Mrs. CLINTON. Mr. President, on the occasion of the 90th anniversary of the Girl Scouts, I want to take this opportunity to discuss the exciting work of the Girl Scouts in New York State. I am proud to report that over 190,000 girls participate in New York Girl Scout troops, with the help of over 50,000 adult volunteers.

For 90 years, Girl Scouts have been hard at work building the self-esteem of girls, raising awareness about the importance of public service, building character, and developing leadership skills. Today, as scouting enters the 21st century, Girl Scouts in New York are involved in a series of new projects and outreach efforts.

Immediately after September 11th, New York troop leaders quickly revised a curriculum on tolerance and diversity to include the attack on New York and our country. The revised curriculum helped to provide local leaders across the State with the tools they needed to help girls deal with our national tragedy.

New York Girl Scouts are reaching out to new members in underserved communities. Troop leaders are working through the schools and through housing programs to recruit girls who may not be familiar with scouting, and to create opportunities for new experiences and challenges.

The Genesee Valley Girl Scouts offer an innovative conflict resolution program that provides anger and conflict management training for middle school girls referred by school guidance counselors. Role-playing is used to teach girls a range of peaceful solutions to different situations. This program has been a huge success: 88 percent of participants reported an increase in school attendance, 72 percent maintained or improved their GPA and 82 percent reduced disciplinary problems.

From Buffalo to Chappaqua, from El mira to Long Island, Girl Scout troops across New York are committed to public service projects that help instill in our youth the importance of helping others. And girls across the State are learning the value of hard work and commitment through their efforts to meet the requirements of merit badges.

Every year in New York, a small number of girls are honored with the Gold Award, the highest achievement award given by the Girl Scouts. In order to be eligible for a Gold Award, a Girl Scout must meet the requirements of a series of awards that require leadership and work on behalf of their community. Gold Award recipients must also design and follow through with an extensive community service project. I want to take this opportunity to congratulate the New York Gold Award honorees for their great public service accomplishments and commitment to scouting.

As a member of the Honorary Congressional Girl Scout Troop and a former Girl Scout, I encourage my colleagues to support Girl Scouts in the 21st century. I look forward to working with New York Girl Scouts to help create opportunities for girls and to encourage youth involvement in public service.

ADDITIONAL STATEMENTS

IN RECOGNITION OF DR. CHARLES H. WRIGHT: DOCTOR, HISTORIAN, AND CIVIC LEADER

Mr. LEVIN. Mr. President, I ask the Senate to join me today in extending my condolences to the family and friends of Dr. Charles H. Wright, who passed away on March 7, 2002. During his 83 years, Dr. Wright left an indelible mark on this country through his work as a doctor, a civil rights leader, a community activist and a leader in the national movement to create museums celebrating the history, culture and accomplishments of African Americans.

Legend has it that it was Charles Wright's mother who inspired him to attend medical school, by declaring at age eight that he would become a doctor. Growing up in segregated Alabama, to parents who's own education was stopped at the 8th grade, Wright had to overcome many obstacles to make his mother's dream a reality. But, as those who knew Dr. Wright can attest, he was not one to shy away from a challenge. He did attend medical school, and in 1946 he moved to Detroit, where he served his community as an obstetrician/gynecologist. He delivered more than 7,000 babies, including those of some of my staff. Today, you can still meet adults in Detroit who will refer to themselves as 'Dr. Wright's babies.'

Dr. Wright was always concerned about the plight of black people, both here and in Africa. He answered the call of Dr. Martin Luther King, traveling to the South to protest and to help those protesters who required medical assistance. He worked to end discrimination in hospitals, where empty beds were being denied to blacks because the hospital refused to put black patients and white patients in the same ward. He traveled to newly post-colonial Africa to work in villages lacking adequate health care resources. He helped raise money so that African children could come to American universities. He was constantly driven to serve others, and to serve those whom he felt could best help.

Dr. Wright is perhaps best known as the man responsible for Detroit's Museum of African American History, the largest such museum in the world. In his dream a reality.

Mr. BROWNBACK. Mr. President, I would like to take this moment to recognize Kylie White, a fifth grade student at Lowther South Intermediate School in Emporia KS. Kylie was recently selected as the Kansas recipient of the Nicholas Green Distinguished Student Award from the National Association of Gifted Children.

The NAGC—Nicholas Green Distinguished Student Awards program recognizes excellence in young children between third and sixth grade who have distinguished themselves in academics, leadership, or the arts. This program is funded by the Nicholas Green Foundation, established by Maggie and Reg Green, and the Nicholas Green Scholarship Fund, both created to honor the memory of the Green's seven-year-old son Nicholas, who was killed in a drive-by-shooting while vacationing in Italy in 1994. The program highlights high-ability students across the country, demonstrating that gifted and talented children come from all cultures, racial and ethnic backgrounds, and socioeconomic groups.

The NAGC—Nicholas Green Distinguished Student Award honors America's outstanding students, who serve as role models for all of our Nation's children as they strive for excellence. I am proud that Kylie has been selected to receive this honor on behalf of the State of Kansas. I wish her continued success in all of her future endeavors.
I ask consent that Kylie’s NAGC—Nicholas Green Distinguished Student Award composition be printed in the RECORD following my remarks.

The composition follows:

“Mama, a problem is only a problem until you solve it. There were the words I spoke when I was only three. Ever since then I have been solving all different kinds of problems, whether they only took a couple minutes or months to figure out. What I like about problem solving is that every one of them is different and you have to pull together all of your knowledge and creativity to figure them out.

I got interested in problem solving when I was little. My Dad taught me how to solve all kinds of problems. Whether it was figuring out the money in Monopoly or deciding how to make a stable structure out of Legos all kinds of “problems” were tackled. I was very lucky to have great first and second grade teachers who deeply influenced and encouraged me to set high goals. Mrs. Davidson and Ms. Newton taught me how to really push myself.

In third, fourth, and fifth grades, my principal offered the “Principal’s Problem of the Week.” These were optional challenging word or math problems that always got me thinking. I was awarded top “Principal’s Problem of the Week Solver” three consecutive years. In grade school I went to the library once a week and solved challenging word problems in the library. I also learned how to solve problems. The long-term solution you work on for months before you go to the competition. The spontaneous problem’s name kind of explained the problem and usually you get 1 minute to think and 2 minutes to answer. The team I was on in fourth grade made all the way to World Finals in Knoxville, Tennessee. Raising the money to get there was a problem in itself. We had a lot of fun there and we took 25th place out of 44 teams in our division even though we were a very young team.

This year in 5th grade my biggest challenge has been learning how to speak French. I have also served as a peer mentor in a classroom for students having problems making and maintaining friendships. I like helping others solve their problems.

Problem solving opens up a lot of opportunities for students having problems, making and maintaining friendships. I could be a teacher and help kids learn how to solve problems. Or maybe I could be a top residential adviser and solve international problems.

Problem solving is a way to exercise your brain. It is a fun way to expand your knowledge horizon. I hope to stay at it for a long, long time.

RECOGNITION OF THE LYON COLLEGE CONCERT CHOIR

Mrs. LINCOLN, Mr. President, I rise today in recognition of the Lyon College Concert Choir on the occasion of their performance at the National Cathedral, March 17, 2002. Lyon College, located in Batesville, AR, offers a liberal arts education of superior quality in a personalized setting. A selective, independent, undergraduate, residential teaching and learning community affiliated with the Presbyterian Church, USA, Lyon encourages the free intellectual inquiry essential to social, ethical and spiritual growth. With a rich and scholarly and religious heritage, Lyon develops, in a culture of moral leaders, committed to continued personal growth and service. We in Arkansas are extremely proud of the young people from Lyon College who will fill the cathedral with song on March 17.

CITY OF ABSECON CELEBRATES CENTENNIAL

Mr. CORZINE, Mr. President, it is with great pride that I bring to your attention the lovely waterfront community of Absecon, which is celebrating its centennial year on March 24, 2002. Absecon, originally Absecum, comes from the Algonquin Indian word Absegami, meaning “A Cross Little Water.” Located in Atlantic County, Absecon was incorporated as a city on March 24, 1902. It is governed by an elected body consisting of a mayor and council members. The community, which lies adjacent to Atlantic City, and the citizens of Absecon earned their living clamming and oystering. Soon wharves lined the creek, and boats large and small were built along the banks of this bustling seaport. In 1795, Thomas Budd purchased 10,000 acres of land in what later became Atlantic County. He paid 4 cents an acre for the land on which Atlantic City now stands. It was called Further Island, further from Absecon, and later called Absecon Beach and finally became Atlantic City. The land was originally purchased for control of the waterways and not for farming.

In 1819, Dr. Jonathan Pitney, saddlebags brimming with medical supplies, a blanket, and clothing, rode into Absecon on horseback to set up his medical practice. Only 21 years old, Dr. Pitney came to Absecon after completing 2 years as an assistant in a hospital on Staten Island, following his graduation from a New York medical school. Few in the village could have known that this young doctor one day would become famous and be forever known as the “Father of Atlantic City.” For by 1834, the village known as Absecon in Galloway Township still only consisted of a tavern, store, and 8 to 10 dwellings. When not visiting patients, Dr. Pitney could always be found strolling the shoreline taking in the sea air. It did not take long for Dr. Pitney to realize the benefits of the sea air and to determine that this area was magical and had the ideal climate for a health resort. Consequently, Pitney and local authorities that a railroad to the beach would be beneficial, he was to be responsible for the construction of the railroad east across New Jersey through the salt marshes to Absecon Island, now Atlantic City. Shortly thereafter, Dr. Pitney again became a leading force in the Village, petitioning Congress to construct a lighthouse on the north end of Absecon Island and later the Absecon Lighthouse was constructed putting an end once and for all to the countless scores of shipwrecks along the shoals and beaches near “Graveyard Inlet.”

By 1899, Absecon’s population was over 5,500 people by 1902 the legislature of the State of New Jersey approved an act to incorporate Absecon City in the County of Atlantic, as a city. From these humble beginnings, Absecon has grown to become a charming city by the water, housing a Central Business District and Light Industrial areas.

I invite my colleagues to join me in congratulating Mayor Peter C. Elco and the citizens of Absecon on their centennial. May they have another 100 years of prosperity and community.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Ms. Evans, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE

At 12:06 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 2341. An act to amend the procedures that apply to consideration of interstate class actions to assure fairer outcomes for class members and defendants, to outlaw certain practices that provide inadequate settlements for class members, to assure that attorneys do not receive a disproportionate amount of settlements at the expense of class members, to provide for clearer and simpler information in class action settlement notices, to assure prompt consideration of interstate class actions, to amend title 28, United States Code, to allow the application of the principles of Federal diversity jurisdiction to interstate class actions, and for other purposes.

MEASURE REFERRED

The following bill was read the first and the second times by unanimous consent, and referred to the Committee on:

H.R. 2341. An act to amend the procedures that apply to consideration of interstate class actions to assure fairer outcomes for
class members and defendants, to outlaw certain practices that provide inadequate settlements for class members, to assure that attorneys do not receive a disproportional amount of settlements at the expense of class members, to provide for clearer and simpler information in class action settlement notices, to assure prompt consideration of interstate class actions, to amend title 28, United States Code, to allow the application of the principles of Federal diversity jurisdiction to interstate class actions, and for other purposes.

MEASURE PLACED ON THE CALENDAR

The following bill was read the second time, and placed on the calendar

H.R. 2175. An act to protect infants who are born alive.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–5730. A communication from the Secretary of the Interior, transmitting a draft of proposed legislation entitled “Bureau of Land Management Appropriations Reauthorization Act of 2002”; to the Committee on Energy and Natural Resources.

EC–5731. A communication from the General Counsel of the Department of Commerce, transmitting a draft of proposed legislation entitled “Analog Spectrum Lease Fee Act”; to the Committee on Commerce, Science, and Transportation.

EC–5732. A communication from the General Counsel of the Department of Commerce, transmitting a draft of proposed legislation entitled “Promoting Certainty in Upcoming Spectrum Auctions Act”; to the Committee on Commerce, Science, and Transportation.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LEAHY, from the Committee on the Judiciary, without amendment and with a preamble:

S. Res. 206: A resolution designating the week of March 17 through March 23, 2002 as “National Inhalants and Poison Prevention Week”.

By Mr. LEAHY, from the Committee on the Judiciary, with an amendment in the nature of a substitute and an amendment to the title and with an amended preamble:

By Mr. LEAHY, from the Committee on the Judiciary, without amendment and with a preamble:

S. Res. 221: A resolution to commemorate and acknowledge the dedication and sacrifice made by the men and women who have lost their lives while serving as law enforcement officers.

By Mr. LEAHY, from the Committee on the Judiciary, with an amendment in the nature of a substitute and an amendment to the title:

S. 1356: A bill to establish a commission to review the facts and circumstances surrounding injustices suffered by European Americans, Europeans Latin Americans, and European refugees during World War II.

ECXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. KENNEDY for the Committee on Health, Education, Labor, and Pensions.

By Mr. KENNEDY for the Committee on Health, Education, Labor, and Pensions.

Sally Stryo, of Virginia, to be Assistant Secretary for Postsecondary Education, Department of Education.

By Mr. LEAHY for the Committee on the Judiciary.

Don Slazinik, of Illinois, to be United States Marshal for the Southern District of Illinois for the term of four years.

Kim Richard, of Illinois, to be United States Marshal for the Northern District of Illinois for the term of four years.

(Nominations without an asterisk were reported with the recommendation that they be confirmed.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced; read the first and second times by unanimous consent, and referred as indicated:

By Mr. HARKIN (for himself, Mr. DURBIN, Mrs. CLINTON, and Mr. SCHUMER):

S. 2013: A bill to authorize the Secretary of Agriculture to prescribe performance standards for the reduction of pathogens in meat, meat products, poultry, and poultry products processed by establishments receiving inspection services; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. FEINGOLD (for himself and Ms. COLLINS):

S. 2014. A bill to provide better Federal interagency coordination and support for emergency medical services; to the Committee on Energy and Natural Resources.

By Mr. MURKOWSKI:

S. 2015. A bill to amend the United States Code, to permit retired members of the Armed Forces who have a service-connected disability to receive both military retired pay by reason of their years of military service and disability compensation from the Department of Veterans Affairs for their disability.

S. 177.

At the request of Mr. SMITH of New Hampshire, his name was added as a cosponsor of S. 177, a bill to amend the provisions of title 29, United States Code, relating to the manner in which pay policies and schedules and fringe benefit programs for postmasters are established.

S. 780.

At the request of Mr. INHOFE, the name of the Senator from Virginia (Mr. ALLEN) was added as a cosponsor of S. 780, a bill to amend the Internal Revenue Code of 1986 to allow individuals who do not itemize their deductions a deduction for a portion of their charitable contributions, and for other purposes.

S. 952.

At the request of Mr. GREGG, the name of the Senator from Massachusetts (Mr. KERRY) was added as a cosponsor of S. 952, a bill to provide collective bargaining rights for public safety officers employed by States or their political subdivisions.

S. 1296.

At the request of Mr. DORGAN, the name of the Senator from New Mexico (Mr. BINGAMAN) was added as a cosponsor of S. 1296, a bill to improve academic and social outcomes for teenage youth.

S. 1278.

At the request of Mrs. LINCOLN, the names of the Senator from New York (Mr. SCHUMER) and the Senator from Alabama (Mr. SHEFFY) were added as cosponsors of S. 1278, a bill to amend the Internal Revenue Code of 1986 to allow a United States independent film and television production wage credit.

S. 1394.

At the request of Mr. ENsign, the name of the Senator from Arkansas (Mr. HUTCHINSON) was added as a cosponsor of S. 1394, a bill to amend title XVIII of the Social Security Act to repeal the medicare outpatient rehabilitation therapy cap.

S. 1671.

At the request of Mr. DODD, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of S. 1677, a bill to amend the Workforce Investment Act of 1998 to increase the hiring of firefighters, and for other purposes.

S. 1762.

At the request of Mr. CORzINE, the name of the Senator from Illinois (Mr. DURBIN) was added as a cosponsor of S. 1762, a bill to amend the Public Health Service Act with respect to facilitating the development of microcides for preventing transmission of HIV and other sexually transmitted diseases.
Mr. SESSIONS was added as a cosponsor of the Senator from Alabama (Ms. LANDREAU), and the Senator from Arizona (Mr. DURBIN) was added as a cosponsor of S. 1999, a bill to amend title 18, United States Code, to prohibit human cloning.

Mr. BROWNBACK, the name of the Senator from Idaho (Mr. CRAPPO) was added as a cosponsor of S. 1899, a bill to amend title 18, United States Code, to prohibit human cloning.

Mr. DURBIN, the Senator from Tennessee (Mr. FRIST), and the Senator from Nebraska (Mr. NELSON) was added as a cosponsor of S. RES. 219, a resolution expressing the Senate’s appreciation of the efforts of the elected Government of Colombia and the United States to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes.

At the request of Mr. SCHUMER, the names of the Senator from Delaware (Mr. BIDEN), the Senator from Iowa (Mr. GRASSLEY), the Senator from North Dakota (Mr. CONRAD), the Senator from Tennessee (Mr. Frist), and the Senator from Nebraska (Mr. HAGEL) were added as cosponsors of S. RES. 206, a resolution designating the week of March 17 through March 23, 2002 as “National Inhalants and Poison Prevention Week.”

At the request of Mr. DURBIN, the Senator from Alabama (Ms. SESSIONS) was added as a cosponsor of S. RES. 219, a resolution expressing support for the democratically elected Government of Colombia and its efforts to counter threats from United States-designated foreign terrorist organizations.

At the request of Mr. DURBIN, his name was added as a cosponsor of S. RES. 221, a resolution designating the week of March 17 through March 23, 2002 as “National Inhalants and Poison Prevention Week.”

At the request of Mr. GRAHAM, the name of the Senator from Alabama (Mr. CONRAD) was added as a cosponsor of S. RES. 221, a resolution designating the week of March 17 through March 23, 2002 as “National Inhalants and Poison Prevention Week.”

At the request of Mr. SCHUMER, the names of the Senator from Illinois (Mr. DURBIN), the Senator from Louisiana (Ms. LANDRIEU), and the Senator from Wisconsin (Mr. KOHL) were added as cosponsors of S. CON. RES. 81, a concurrent resolution providing for a joint session of Congress to be held in New York City, New York.

At the request of Mr. DAYTON, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of amendment No. 3008 proposed to S. 517, a bill to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes.

By Mr. HARKIN (for himself, Mr. DURBIN, Mrs. CLINTON, and Mr. SCHUMER):

S. 2013. A bill to clarify the authority of the Secretary of Agriculture to prescribe performance standards for the reduction of pathogens in meat, poultry, and poultry products. A bill to amend title 21, United States Code, to provide the authority to enforce those rules.

Mr. HARKIN. Mr. President, today I am introducing the Meat and Poultry Pathogen Reduction Act of 2002. On December 6, 2001, the Fifth Circuit Court of Appeals upheld and expanded an earlier District Court decision that removed the U.S. Department of Agriculture’s, USDA, authority to enforce its Pathogen Performance Standard for Salmonella. Passage of this bill is vital because the Fifth Circuit’s decision in Supreme Beef v. USDA, Supreme Beef, seriously weakens the substantial food safety improvements adopted by USDA in its 1996 Hazard Analysis Critical Control Point and Pathogen Reduction, HACCP, rule. According to the Fifth Circuit’s opinion in Supreme Beef, today, USDA does not have the authority to enforce Performance Standards for reducing viral and bacterial pathogens. This decision seriously undermines the new meat and poultry inspection system.

The Pathogen Performance Standard rule recognized that bacterial and viral pathogens were the foremost food safety threat in America, responsible for 5,000 deaths, 325,000 hospitalizations and 76 million illnesses each year. To address the threat of foodborne illness, USDA developed a modern inspection system based on two fundamental principles.

The first was that industry has the primary responsibility to determine how to produce the safest products possible. Industry must examine its plants and determine how to control contamination throughout the food production process, from the moment a product arrives at their door until the moment it leaves their plant.

The second, even more crucial principle was that plants nationwide must reduce levels of dangerous pathogens in meat and poultry products. To ensure the new system accomplished this, USDA developed Pathogen Performance Standards. These standards provide targets for reducing levels of pathogens and require all USDA-inspected facilities to meet them. Facilities failing to meet a standard may be shut down until they create a corrective action plan to meet the standard.

So far, USDA has only issued one Pathogen Performance Standard for Salmonella. The vast majority of plants in the U.S. have been unable to meet the new standard, and it is clearly workable. In addition, USDA reports that Salmonella levels for meat and poultry products have fallen substantially. The Salmonella standard, therefore, has been successful. The Fifth Circuit’s decision threatens to destroy this success and set our food safety system back by years.

The other major problem is that we have an industry developing on striking down USDA’s authority to enforce meat and poultry pathogen standards. Ever since the original Supreme Beef decision, I have spent many hours trying to find a compromise that will allow us to ensure viable, science-based standards for pathogens in meat and poultry products. I have already introduced legislation to address this issue and have worked with industry leaders attempting to reach a reasonable compromise.

However, despite repeated attempts to address industry concerns, industry has continually back-tracked and moved the finish line. Many times, I have made changes in my legislation to address their concerns of the moment only to have them come back and say we have not gone far enough. We cannot let the intransigence of the meat and poultry industry place our children, families and our country at risk of getting ill or dying, because some in the industry want to backtrack on food safety.

I plan to seek every opportunity to get the Meat and Poultry Pathogen Reduction Act enacted. I think it is essential, both to ensuring the modernization of our food safety system, and ensuring consumers that we are making progress in reducing dangerous pathogens. I hope that both parties, and both houses of Congress will be able to act to pass this legislation without delay. The public’s confidence in our meat and poultry inspection system depends on us.

Mr. DURBIN. Mr. President, today I am joining Senator HARKIN in introducing legislation that will clarify the United States Department of Agriculture’s, USDA, authority to enforce new meat and poultry pathogen standards. I am pleased to join in this very important effort.

Make no mistake, our country has been blessed with one of the safest and most abundant food supplies in the world. However, we can do better. While food may never be completely free of risk, we must strive to make our food as safe as possible. Foodborne illnesses and hazards are still a significant problem that cannot be passively dismissed.

The Centers for Disease Control and Prevention, CDC, estimate that as many as 76 million people suffer from foodborne illnesses each year. Of those individuals, approximately 325,000 will be hospitalized, and more than 5,000 will die. Children and the elderly are especially vulnerable. In terms of medical costs and productivity losses, foodborne illnesses cost the nation billions of dollars annually, and the situation is not likely to improve without decisive action. In fact, the Department of Health and Human Services...
predicts that foodborne illnesses and deaths will increase 10-15 percent over the next decade.

In an age where our Nation’s food supply is facing tremendous pressures, from emerging pathogens to an ever-growing food import, focus on food safety is critical. The Secretary of Agriculture must be able to ensure the safety of the meat and poultry products sold in this country.

The court’s decision in the Supreme Beef case is a step back for food safety. We must work together to ensure that USDA has the necessary authority to enforce pathogen performance standards that will protect public health. Let’s not turn our back on food safety protection at such a critical time for food safety and security. I encourage my colleagues to join us in this effort to protect our food supply and public health.

By Mr. FEINGOLD (for himself, and Ms. COLLINS):

S. 2015. A bill to exempt certain users of demonstration areas from fees imposed under the recreation fee demonstration program; to the Committee on Energy and Natural Resources.

Mr. SMITH of New Hampshire. Mr. President, I rise today to introduce legislation that would provide equity and fairness to the application of the Recreational Fee Demonstration Program, or the Fee Demo Program, as it is more commonly called. This bill, the Host Community Fairness Act, would exempt local residents from fees imposed as part of the Fee Demo Program.

As I am sure my colleagues are all aware, the Fee Demo Program, which started in fiscal year 1996, was established to fund recreational and resource needs, and repair facilities throughout our national forests, parks and other public lands. Currently, each land management agency can establish any number of fee projects and retain and spend all the revenue collected. However, at least 80 percent of the fees collected are retained at the site where collected. The program was originally supposed to end at the end of FY98; however, due to the Gramm-Rudman-Hollings Act, the program was continued through FY04. It is now set to expire at the end of FY04.
While I agree that the intentions of this program are good, there are flaws that must be addressed. What concerns me most is double-taxation for the local residents who live in and around these Fee Demo areas. These individuals should not also be required to pay to use Federal lands. Especially when they already suffer from a decreased tax-base due to the presence of Federal lands in their community and who help to provide emergency services. It is wrong to ask them to pay to use land that they already support and is essentially in their own backyard.

Just to be clear, this legislation would exempt residents of any county or counties that host any Federal land that has a Fee Demo project from paying the fee, regardless of where in the forest or park the fee is being imposed. When I say Federal land, I mean any National Forest, National Park, National Wildlife Refuge or Bureau of Land Management land.

I would like to take a moment to talk about how this impacts the State of New Hampshire. Nearly 50 percent of Berlin, New Hampshire, which has a population of about 10,000, falls within the boundaries of the White Mountain National Forest. Unfortunately, the city of Berlin has dealt with several economic setbacks, including the recent closure of a local paper mill, its largest employer. When this situation is combined with the fact that half their land is tied up in the National Forest, the result is a severe hit to this city’s tax base. Asking these citizens to pay a fee to hike in their own backyard is not only unfair, it is also wrong. I think it is also reasonable to assume that this kind of economic situation is not unique to host communities in New Hampshire.

Finally, it should be noted that a clear and convincing majority of the New Hampshire House of Representatives voted to the Senate regarding their serious concerns with this program. On February 14, 2002, the New Hampshire House overwhelmingly voted in favor of a resolution that clearly outlines what they see as the negative effect this program has had on their local communities.

The New Hampshire House is the largest parliamentary bodies in the world. Its 400 members receive only a $100 per year stipend and they are truly citizen legislators. The resolution adopted by the New Hampshire House was essentially the same as the one that was passed in 1993. The resolution included over 400 representatives, including both Republicans and Democrats as well as the Speaker of the House and the former Speaker of the House, who is now a State Senator.

What concerns me most with what these citizen legislators are saying is that, “. . . the Recreational Fee Demonstration Program has undermined the longstanding goodwill between the White Mountain National Forest and New Hampshire citizens and communities”. I am extremely concerned that with the new level of support from the New Hampshire citizens for activities such as trail maintenance and fire safety have been compromised . . . .”.

As the senior Senator from New Hampshire, I find these statements very disheartening. In New Hampshire, there is a longstanding tradition of open access to both public and private lands. The Fee Demo program runs counter to that tradition. Members of Congress have a duty to their constituents to maintain a cooperative relationship between the Federal land management agencies and the communities that are required to host them.

Section 315 of the Community Fairness Act is one small step we can take in addressing these legitimate concerns and restoring the goodwill previously enjoyed between the Federal lands across this country and their host communities.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2015

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Host Community Fairness Act of 2002.”

SEC. 2. LOCAL EXEMPTIONS FROM USER FEES.

Section 315 of the Department of Interior and Related Agencies Appropriations Act for Fiscal Year 1996 (16 U.S.C. 460–6a note; Public Law 104–134) is amended as follows:

(1) by redesignating subsections (c), (d), (e), and (f) as subsections (d), (e), (f), and (g), respectively; and

(2) by inserting after subsection (b) the following:

“(c) LOCAL EXEMPTIONS FROM USER FEES.—

“(1) IN GENERAL.—A person that resides in a county in which a fee demonstration area is located, in whole or in part, shall be exempt from any recreational user fees imposed under this section for access to any portion of the fee demonstration area.

“(2) ADMINISTRATION.—The Secretary of the Interior and the Secretary of Agriculture in consultation with affected State and local governments, shall establish a method for identifying and exempting persons covered by this subsection from the user fees.”.

By Mr. MURKOWSKI.

S. 2016. A bill to authorize the exchange of lands between an Alaska Native Village Corporation and the Department of the Interior, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. MURKOWSKI. Mr. President, I rise today to introduce legislation to address a critical concern for one of Alaska’s rural villages.

The village of Newtok, in far western Alaska, is facing the loss of its homes and facilities to ever-encroaching erosion by the Ninglick River. The village is presently located on the north bank of the river in an estuary on a sweeping bend, which is reclaiming the bank at a rate of several feet per year.

By at least 2008, some homes will no longer be habitable and the village airport will begin to suffer irreparable damage. It is critical for the future of Newtok’s residents that Congress act this year to make provision for the relocation of the village.

Newtok is located within the boundaries of the Yukon Delta National Wildlife Refuge. Under the Alaska Native Claims Settlement Act of 1971, Newtok had land selection rights within the Refuge. Most of the lands selected were conveyed to the village by the United States in the north side of the Ninglick River, although a portion of the village land holdings are on Nelson Island, to the south.

The village has identified 5,580 acres on Nelson Island that will be more suitable for a permanent relocation location. The land on Nelson Island is higher in elevation and is underlain with rock and gravel. Furthermore, it is situated such that hydraulic forces of the river are unlikely to pose any future threat to the well-being of the village.

The proposed legislation authorizes an equal value exchange of lands between the Fish and Wildlife Service and the Newtok Native Corporation, the ANCSA corporation organized by the village which owns Newtok Village lands. The proposed exchange is the first important step in allowing the Newtok villagers to relocate their village to safe ground.

The exchange is proposed primarily for health and safety reasons, to protect the lives and property of Alaska Native villagers. However, there is a direct benefit to the broader interest of the United States. The land Newtok proposes to relinquish contains habitat for the very valuable and Spectacled Eider than the land on Nelson Island that has been selected for the new village location. Thus the Yukon Delta National Wildlife Refuge, while receiving lands of equal economic value in the exchange, will actually be receiving lands of greater value for waterfowl habitat.

We should not underestimate the importance of congressional action this year on this matter. It will take several years to actually relocate the village facilities and homes must be built. Before any of that can begin, the land must be exchanged. I therefore urge my colleagues to support this important legislation.

By Mr. CAMPBELL (for himself and Mr. INOUYE):

S. 2017. A bill to amend the Indian Financing Act of 1974 to improve the effectiveness of the Indian Loan Guarantee and insurance program; to the Committee on Indian Affairs.

Mr. CAMPBELL. Mr. President, it is my pleasure to introduce the Indian Financing Act Amendments of 2002 to improve the effectiveness of an economic development program essential to our Native American community. As one of the legislative flowerings of President Nixon’s “Special Message to Congress on Indian Affairs,” the Indian Financing Act joins the Indian Self Determination and Education Assistance Act as pillars of Federal Indian policy. Since Congress enacted the Indian Financing Act of 1974 and established the
Indian Revolving Loan Fund program, the Secretary of the Interior has had the authority to insure and guaranty the repayment by qualified Native American borrowers of small business loans issued by private banks and lenders. The benefits of the loan program are available to Native American-owned businesses who cannot otherwise obtain financing in conventional credit markets.

The Indian Revolving Fund Program has consistently over the past 26 years to reach $60 million in annual lending to Indian communities, though the need for capital in Indian economies far outstrips this amount. The “Mortgage Finance News” reports that for housing finance alone, there is $2.7 billion in outstanding demand in the Indian community. In addition, the “Native American Lending Study” released by the Community Development Financial Institutions shows, there are great needs in Native communities for more capital and financial services. These unmet needs are holding back the growth of Indian economies.

The purpose of a Federal loan guaranty is to stimulate the private lending community into being more active with Indian-owned customers they serve. Under the current Indian guaranteed loan program, the lender shares in the cost of any loan default, and is not 100 percent guaranteed by the government. Lenders across the country have told the Committee on Indian Affairs that a major problem restraining their participation in this program is the lack of liquidity once the loan is made. These small business loans tend to stay on the books for a long time. They are paid down but not as rapidly refinanced as conventional loans. Therefore, a bank has its capital tied up in these loans, and cannot easily turn around and use that capital again.

A primary community long ago came up with a system to respond to this general need, and that is to allow investors to buy loans on the secondary market. This is the cornerstone for our private mortgage market and the essential job of Fannie Mae and Freddie Mac. But it is also an important part of commercial lending. The Small Business Administration, which makes loan guarantees available through over 1,000 lenders nationwide, 17 years ago recognized the importance of secondary market for its SBA loan guarantees. At its request, Congress enacted legislation which allows for the orderly transfer and sales of the guaranteed portion of the SBA loan through a secondary market fiscal transfer agent. This system operates largely at no cost to the government, as the fees for the transfer are paid by the buyers and sellers of the loans, and not passed back to the borrowers.

The SBA loan program is highly successful. It assists Native Americans who may not regularly participate in these government programs by giving them a standardized and simple process for transfer of the loan. The use of the fiscal transfer agent ensures that loan payments made to the original lender are properly flowed through any investors. Most importantly, the ability of the SBA to regulate or otherwise discipline originating lenders is unimpeded by the secondary market.

The “Indian Financing Act Amendments of 2002” directs the Secretary of the Interior to take similar steps to the SBA program by allowing the efficient functioning of a secondary market for Native American loans or loan guaranties made by the Interior Department.

It is my hope that the Indian Financing Act Amendments of 2002 will profoundly affect Native American small business owners throughout the United States, and that the support of the Department, and the Native American and financial communities, we can effect positive change not just for Native American small business owners, and for Indian Country generally.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

SEC. 1. SHORT TITLE.

This Act may be cited as the “Indian Financing Act Amendments of 2002.”

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds that—

(1) the Indian Financing Act of 1974 (25 U.S.C. 1451 et seq.) was intended to provide Native American borrowers with access to commercial capital sources that, but for that Act, would not be available through loans guaranteed by the Secretary of the Interior;

(2) although the Secretary of the Interior has made loan guarantees available, acceptance of loan guarantees by lenders to benefit Native American business borrowers has been limited;

(3) 27 years after enactment of the Act, the promotion and development of Native American-owned business remains an essential foundation for growth of economic and social stability of Native Americans.

(4) acceptance by lenders of the loan guaranties may be limited by liquidity and other capital market-driven concerns; and

(5) it is in the interest of the guaranteed loan program to—

(A) encourage the orderly development and expansion of a secondary market for loans guaranteed by the Secretary of the Interior;

(B) become the secured party of record; and

(c) FULL FAITH AND CREDIT.

(2) REGULATIONS.—A transfer under subparagraph (A) shall be consistent with such regulations as the Secretary shall promulgate under subsection (B).

(3) NOTICE.—A lender that completes a transfer under subparagraph (A) shall give notice of the transfer to the Secretary (or a designee of the Secretary).

(4) EFFECT OF TRANSFER.—On any transfer under this subsection, the transferee shall—

(A) become the secured party of record; and

(B) be responsible for—

(i) performing the duties of the lender; and

(ii) servicing the loan or portion of the loan, as appropriate, in accordance with the terms of guarantee of the Secretary of the loan or portion of the loan.

(c) TRANSFER OF GUARANTEED PORTIONS OF LOANS.—

(I) TRANSFER.—

(A) IN GENERAL.—The lender of a loan guaranteed under this title may transfer to any person—

(i) all or part of the guaranteed portion of the loan; and

(ii) the security given for the guaranteed portion transferred.

(B) REGULATIONS.—A transfer under subparagraph (A) shall be consistent with such regulations as the Secretary shall promulgate under subsection (g).

(C) NOTICE.—A lender that completes a transfer under subparagraph (A) shall give notice of the transfer to the Secretary (or a designee of the Secretary).

(D) ACKNOWLEDGMENT.—On receipt of notice of a transfer under subparagraph (C), the Secretary (or a designee of the Secretary) shall issue to the transferee the acknowledgment of the Secretary of—

(i) the transfer; and

(ii) the interest of the transferee in the guaranteed portion of a loan that was transferred.

(E) EFFECT.—Notwithstanding any other provision of law, with respect to any transfer under this subsection, the lender shall—

(A) remain obligated under the guarantee agreement with the transferee or the Secretary; and

(B) continue to be responsible for servicing the loan in a manner consistent with the guarantee agreement; and

(C) remain the secured creditor of record.

(D) FULL FAITH AND CREDIT.—

“(1) IN GENERAL.—The full faith and credit of the United States is pledged to the payment of all loan guarantees made under this title.

“(2) VALIDITY.—

“(A) IN GENERAL.—Except as provided in subparagraph (B), the validity of a guarantee of a loan under this title shall be incontestable in the courts of the United States. The transfer of a guarantee of a guaranteed obligation whose interest in a guaranteed loan has been acknowledged by the Secretary (or a designee of the Secretary) under subsection (c)(1)(D).

“(B) FRAUD OR MISREPRESENTATION.—Subparagraph (A) shall not apply in a case in which the Secretary determines that a transferee of the transfer of a loan transferred under this section has actual knowledge of fraud or misrepresentation, or participates in or condones fraud or misrepresentation, in connection with the loan.

“(3) USE OF FUNDS.—The Secretary shall require a borrower to use funds received from the transfer of a loan or guaranteed portion of a loan transferred in accordance with subsection (b) or (c) for the purpose of the loan or guaranteed portion of a loan transferred.

“(4) REGULATIONS.—Not later than 180 days after the date of enactment of this act, the Secretary shall promulgate such regulations as are necessary to facilitate, administer, and enforce the transfer of one or more guarantees of a loan under this section.

“(B) CENTRAL REGISTRATION.—On promulgation of such regulations by the Secretary, the registrant shall—

“(i) provide for the central registration of all loans and portions of loans transferred under this section; and

“(ii) contract with a fiscal transfer agent—(A) to act as a designee of the Secretary; and

“(B) on behalf of the Secretary—

“(i) to carry out the central registration and paying agent functions; and

“(ii) to issue acknowledgments of the Secretary (or a designee of the Secretary) under subsection (c)(1)(D).

“(F) POOLING.—

“(1) IN GENERAL.—Nothing in this title prohibits the pooling of whole loans, or portions of loans, transferred under this section.

“(2) REGULATIONS.—The Secretary may promulgate regulations to effect orderly and efficient pooling procedures under this title.

“By Mr. SARBANES.

S. 2019. A bill to extend the authority of the Export-Import Bank until April 30, 2002; considered and passed.

Mr. BINGAMAN. Mr. President, today I am pleased to introduce a bill that would create a unique area within the Cibola National Forest in New Mexico, entitled the T’u Shur Bien Preservation Trust Area. The importance of this bill cannot be overstated.

It would resolve, through a negotiated agreement, the Pueblo of Sandia’s land claim to Sandia Mountain, an area of significant value and use to all New Mexicans. The bill would also maintain full public ownership and access to the National Sandia and Sandia Mountain Wilderness lands within the Pueblo’s claim area; clear title for affected homeowners; and grant the necessary rights-of-way and easements to protect private interests and the public’s ongoing use of the Area.

The need for this bill and the basis for Sandia Pueblo’s claim arise from a 1748 grant to the Pueblo from a representative of the King of Spain. That grant was recognized and confirmed by Congress in 1858, 11 Stat. 374). There remains, however, a dispute over the location of the eastern boundary of the Pueblo that stems from an 1875 survey of the Pueblo’s boundaries. The survey fixed the eastern boundary roughly along the top of a foothill on the western slope of the mountain, rather than along the true crest of the mountain. The Pueblo has contended that the interpretation of the grant, and thus the survey and subsequent patent, are erroneous, and that the true eastern boundary is the crest of the mountain.

In the early 1980’s, the Pueblo approached the Department of the Interior seeking a resurvey of the grant to locate the eastern boundary of the Pueblo along the main ridge of Sandia Mountain. In December 1988, the Solicitor of the Department of the Interior issued an opinion rejecting the Pueblo’s claim. The Pueblo challenged the opinion in federal district court and in 1998, the court issued an Order setting aside the 1988 opinion and remanding the matter to Interior for further proceedings. See, United States v. Babbitt, Civ. No. 94–2624, D.D.C., July 18, 1998. The Order was appealed but appellate proceedings were stayed for more than a year while a settlement was being negotiated. Ultimately, on April 4, 2000, a settlement agreement was executed between the Secretary of the Interior, and the Sandia Peak Tram Company. That agreement was conditioned on congressional ratification, but remains effective until November 15, 2002.

In November, 2000, the Court of Appeals of the District of Columbia Circuit dismissed the appeal for lack of jurisdiction because the District Court’s action was not a final appealable decision. Upon dismissal, the Department of the Interior proceeded with its reopening of the Solicitor’s opinion in accord with the 1998 Order of the District Court. On January 19, 2001, the Solicitor issued a new opinion that concluded that the 1859 survey of the Sandia Pueblo grant was erroneous and that a resurvey should be conducted.

Implementation of the opinion would therefore remove the area from its National Forest status and convey it to the Pueblo. The Department stayed the resurvey, however, until after November 15, 2002, so that there would be time for Congress to legislate the settlement and make it permanent.

To state the obvious, this is a very complicated situation. The area that is the subject of the Pueblo’s claim has been the subject of the Pueblo and its members for centuries and is of great significance to the Pueblo for traditional and cultural reasons. The Pueblo strongly desires that the wilderness character of the area continue to be preserved and use by the Pueblo protected. Notwithstanding that interest and use, the Federal Government has administered the claim area as a unit of the National Forest system for most of the last century and over the years has issued patents for several hundred acres of land within the area to persons who had no notice of the Pueblo’s claim. As a result, there are now several subdivisions within the external boundaries of the area, and almost one hundred years of land ownership and use by the Pueblo.

The Pueblo lawsuit specifically disclaimed any title or interest in privately-owned lands, the residents of the subdivisions have concerns that the claim and its associated litigation have resulted in hardships by clouding titles to the land. Finally, the emerging National Forest system, the areas has significant value and use to all New Mexicans, including the residents of the Counties of Bernalillo and Sandoval as well as the City of Albuquerque, who use the claim area for recreational and other purposes and who desire that the public use and natural character of the area be preserved.

Because of the complexity of the situation, including the significant and overlapping interests just mentioned, Congress has not yet acted in this matter. In particular, concerns about the area that were expressed by parties who did not participate in the final stages of the negotiations. I have worked with those parties to address their concerns while still trying to maintain the benefits secured by the parties in the Settlement Agreement. I believe that legislation that I have introduced today is a fair compromise. It provides the Pueblo specific rights and interests in the area that help to resolve its claim with finality but also, as noted earlier, maintains full public ownership and access to the National Forest system lands. In that sense, using the term ‘Trust’ in the title recognizes those specific interests but does not confer the same status that exists when the Secretary of the Interior accepts title to land in trust on behalf of an Indian tribe.

Most importantly, the bill I am introducing today relies on a settlement as the basis for resolving this claim. Although other approaches have been circulated, this bill is the only one with the potential to secure a consensus of the interested parties. Not only is a negotiated settlement the appropriate manner by which to resolve the Pueblo’s claim, it also allows for a solution that fits the unique circumstances of this situation. To my knowledge, Sandia Pueblo’s claim is the only Indian land claim that exists where the tribe may effectively recover ownership of federal land without an Act of Congress. Nonetheless, the parties have negotiated a creative arrangement to address the Pueblo’s interests, protect private property, and still maintain public ownership of the land. That is to be commended and I am proud to introduce this legislation to preserve the substance of that arrangement.
SENATE RESOLUTION 226—DESIGNATING APRIL 6, 2002, AS “NATIONAL MISSING PERSONS DAY”

Mr. SCHUMER submitted the following resolution; which was referred to the Committee on the Judiciary:

S. Res. 226

Whereas Saturday, April 6, 2002, marks the 24th birthday of the University of Albany student, Suzanne Lyall, who has been missing since June 2001, in New York State:

Whereas through her disappearance, Suzanne Lyall has come to represent thousands of other missing persons:

Whereas in New York State, there were 198,575 persons over the age of 18 reported missing to law enforcement agencies nationwide:

Whereas many of those reported missing may be victims of Alzheimer’s disease or other health related issues, or victims of foul play:

Whereas regardless of age or circumstances, all missing persons have families who need support and guidance to endure the days, months, or years they may spend searching for their missing loved ones; and

Whereas it is important to applaud the committed efforts of families, law enforcement agencies, and concerned citizens who work to locate missing persons and to prevent all forms of victimization: Now, therefore, be it

Resolved, That the Senate—

(1) designates April 6, 2002, as “National Missing Persons Day”;

(2) requests that the President issue a proclamation that—

(A) calls upon the people of the United States to observe this day with appropriate programs and activities; and

(B) urges all Americans to support worthy initiatives and increased efforts to locate missing persons.

AMENDMENTS SUBMITTED AND PROPOSED

SA 3002. Mr. THOMAS (for himself, Mr. CAMPBELL, Mr. SHELBY, Mr. CRAPO, and Mr. SMITH, of Oregon) proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra;

SA 3003. Mrs. FEINSTEIN submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3004. Mrs. ROSEN submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3005. Mrs. CARNAHAN submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3006. Mr. BINGAMAN submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3007. Mr. SMITH submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3008. Mr. BINGAMAN proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3009. Mr. BINGAMAN submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 3012. Mr. THOMAS (for himself, Mr. CAMPBELL, Mr. SHELBY, Mr. CRAPO, and Mr. SMITH, of Oregon) proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3013. Mrs. FEINSTEIN submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3014. Mr. WYDEN (for himself and Mrs. FEINSTEIN) submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3015. Mrs. CARNAHAN submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3016. Mr. BINGAMAN proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3017. Mr. JEFFORDS (for himself, Mr. WELLSTONE, and Mr. KERRY) proposed an amendment to amendment SA 3016 proposed by Mr. BINGAMAN to the amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3018. Mrs. FEINSTEIN submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3019. Mrs. FEINSTEIN submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3020. Mrs. FEINSTEIN submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3021. Mrs. BOXER (for herself and Mrs. FEINSTEIN) submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3022. Mrs. BOXER (for herself and Mrs. FEINSTEIN) submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3023. Mrs. LINCOLN (for herself, Mr. BOND, Mr. JOHNSON, Mrs. CARNahan, Mr. LANDBERGER, Mr. CARNEY, Mr. HUNTING, Mr. BAYH, and Mr. CRAIK) submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3024. Mr. GOINOVICH (for himself, Mr. LANDBERGER, Mr. SMITH, of New Hampshire, and Mr. INHOFE) submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3025. Mr. INHOFE (for himself and Mr. Conrad) submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3026. Ms. LANDRIEU submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3027. Mr. CRAIG submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3028. Mr. REID (for Mr. ALLARD) proposed an amendment to the bill S. 1372, to reauthorize the Export-Import Bank of the United States.

SA 3030. Mr. SCHUMER submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 3031. Mr. JEFFORDS (for himself, Mr. WELLSTONE, and Mr. KERRY) proposed an amendment to amendment SA 3016 proposed by Mr. BINGAMAN to the amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.
as is necessary or appropriate against the electric reliability organization should be approved. Such regulation may promotion of bulk power system reliability and promotes effective and efficient administration of the bulk power system. If the Commission, upon its own motion or complaint, may propose a change to the rules of the electric reliability organization. A proposed rule or proposed rule change shall take effect upon a finding by the Commission, after notice and opportunity for a hearing, that the change is just, reasonable, not unduly discriminatory or preferential, and in the public interest, and satisfies the requirements of subsection (c)(2).

(g) Coordination with Canada and Mexico—

(1) The electric reliability organization shall take all appropriate steps to gain recognition in Canada and Mexico.

(2) The President shall use his best efforts to ensure international agreements with the governments of Canada and Mexico to provide for effective compliance with reliability standards and the effectiveness of the electric reliability organization in the United States and Canada or Mexico.

(h) Reliability Reports—

(1) The electric reliability organization shall have authority to develop and enforce compliance with standards for the reliable operation of the bulk power system.

(2) This section does not provide the electric reliability organization or the Commission with the authority to order the construction of additional generation or transmission capacity or to set and enforce compliance with standards for adequacy or safety of electric facilities or services.

(3) Nothing in this section shall be construed to preempt any authority of any State to take action to ensure the safety, adequacy, and reliability of electric service within that State, that action is not inconsistent with any reliability standard.

(4) Within 90 days of the application of any reliable standard proposed to apply within the region, the Commission shall have authority to order the construction of additional generation or transmission capacity or to set and enforce compliance with standards for adequacy or safety of electric facilities or services.

(i) Savings Provisions—

(1) The electric reliability organization shall have authority to develop and enforce compliance with standards for the reliable operation of the bulk power system.

(j) Enforcement—

(1) The electric reliability organization may impose a penalty on a user or operator of the bulk power system if the electric reliability organization, after notice and an opportunity for a hearing (A) finds that the user or owner or operator of the bulk power system has violated a reliability standard approved by the Commission under subsection (d); and

(2) On its own motion or upon complaint, the Commission may order compliance with a reliability standard and may impose a penalty against a user or owner or operator of the bulk power system. If the Commission finds, after notice and opportunity for a hearing, that the user or owner or operator of the bulk power system has violated or threatened to violate a reliability standard.

(3) The Commission shall establish regulations authorizing the electric reliability organization to enter into an agreement to delegate authority to a regional entity for the purpose of proposing and enforcing reliability standards (including related activities) that the Commission determines would be appropriate to address a reliability problem, and that the Commission finds, after notice and opportunity for a hearing, that the user or owner or operator of the bulk power system has violated or threatened to violate a reliability standard.

The electric reliability organization and the Commission shall reauthorize any proposal for delegation to a regional entity organized on an interconnected-wide basis for a reliability standard or modification to a reliability standard to be applicable on an interconnected-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest.

(4) The Commission shall promulgate a proposed reliability standard or a modification to a reliability standard that the Commission disapproves in whole or in part.

(5) The Commission, upon its own motion or upon complaint, may order a reliability organization to submit to the Commission or to the public for further consideration a proposed reliability standard or a modification to a reliability standard that is determined by the Commission to adequately address a specific matter in which the Commission considers such a new or modified reliability standard appropriate to carry out this section.

(e) Enforcement—

(1) The electric reliability organization may impose a penalty on a user or operator of the bulk power system if the electric reliability organization, after notice and an opportunity for a hearing (A) finds that the user or owner or operator of the bulk power system has violated a reliability standard approved by the Commission under subsection (d); and

(2) On its own motion or upon complaint, the Commission may order compliance with a reliability standard and may impose a penalty against a user or owner or operator of the bulk power system. If the Commission finds, after notice and opportunity for a hearing, that the user or owner or operator of the bulk power system has violated or threatened to violate a reliability standard.

(3) The Commission shall establish regulations authorizing the electric reliability organization to enter into an agreement to delegate authority to a regional entity for the purpose of proposing and enforcing reliability standards (including related activities) that the Commission determines would be appropriate to address a reliability problem, and that the Commission finds, after notice and opportunity for a hearing, that the user or owner or operator of the bulk power system has violated or threatened to violate a reliability standard.

(4) The Commission may take such action as is necessary or appropriate against the electric reliability organization or a regional entity to ensure compliance with a reliability standard or any Commission order affecting the electric reliability organization or a region.

(f) Changes in Electricity Reliability Organization Rules—

(1) No reliability standard approved by the Commission shall take effect before after notice and opportunity for a hearing, that the change is just, reasonable, not unduly discriminatory or preferential, and in the public interest, and satisfies the requirements of subsection (c)(2).

(2) Within 90 days of the application of any reliable standard proposed to apply within the region, the Commission shall have authority to order the construction of additional generation or transmission capacity or to set and enforce compliance with standards for adequacy or safety of electric facilities or services.

(3) Nothing in this section shall be construed to preempt any authority of any State to take action to ensure the safety, adequacy, and reliability of electric service within that State, that action is not inconsistent with any reliability standard.

(4) Within 90 days of the application of any reliable standard proposed to apply within the region, the Commission shall have authority to order the construction of additional generation or transmission capacity or to set and enforce compliance with standards for adequacy or safety of electric facilities or services.

SEC. 253. OFFICE OF CONSUMER ADVOCACY.

(a) Definitions.—In this section—

(1) "Commission" means the Federal Energy Regulatory Commission.

(2) "Energy customer."—The term "energy customer" means a residential customer or a small commercial customer that receives products or services from a public utility or natural gas company under the jurisdiction of the Commission.

(3) "Natural gas company."—The term "natural gas company" has the meaning given in section 201(d) of the Natural Gas Act (15 U.S.C. 711(d)). At the end of such section, the following shall be added:

"(d) Liability standards.—An electric reliability organization shall have authority to develop and enforce compliance with standards for the reliable operation of the bulk power system.

(2) This section does not provide the electric reliability organization or the Commission with the authority to order the construction of additional generation or transmission capacity or to set and enforce compliance with standards for adequacy or safety of electric facilities or services.

(3) Nothing in this section shall be construed to preempt any authority of any State to take action to ensure the safety, adequacy, and reliability of electric service within that State, that action is not inconsistent with any reliability standard.

(4) Within 90 days of the application of any reliable standard proposed to apply within the region, the Commission shall have authority to order the construction of additional generation or transmission capacity or to set and enforce compliance with standards for adequacy or safety of electric facilities or services.

(5) The term "energy customer" means a residential customer or a small commercial customer that receives products or services from a public utility or natural gas company under the jurisdiction of the Commission.
the term in section 2 of the Natural Gas Act (15 U.S.C. 717a), as modified by section 601(a) of the Natural Gas Policy Act of 1978 (15 U.S.C. 331(a)),

(4) The term ‘Office’ means the Office of Consumer Advocacy established by subsection (b)(1).

(5) PUBLIC UTILITY.—The term ‘public utility’ has the meaning given the term in section 201(e) of the Federal Power Act (16 U.S.C. 721(e)).

(6) SMALL COMMERCIAL CUSTOMER.—The term ‘small commercial customer’ means a commercial customer that has a peak demand of not more than 1,000 kilowatts per hour.

OFFICE.—

(1) ESTABLISHMENT.—There is established within the Department of Justice the Office of Consumer Advocacy.

(2) DIRECTOR.—The Office shall be headed by a Director to be appointed by the President, by and with the advice and consent of the Senate.

(3) DUTIES.—The Office may represent the interests of energy customers on matters concerning rates or service of public utilities and make recommendations accepted by the consumer under the jurisdiction of the Commission—

(A) at hearings of the Commission;

(B) in judicial proceedings in the courts of the United States;

(C) at hearings or proceedings of other Federal regulatory agencies and commissions;

SA 3015. Mrs. CARNAHAN submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered printed.

SEC. 1704. NATIONAL ACADEMY OF SCIENCES STUDY OF PROCEDURES FOR SELECTION AND ASSESSMENT OF ROUTES FOR SHIPMENT OF SPENT NUCLEAR FUEL.

(a) In General.—The Secretary of Transportation shall enter into an agreement with the National Academy of Sciences under which agreement the National Academy of Sciences shall conduct a study of the procedures by which the Department of Energy, together with the Department of Transportation and the Nuclear Regulatory Commission, selects routes for the shipment of spent nuclear fuel.

(b) Elements of Study.—In conducting the study under subsection (a), the National Academy of Sciences shall consider the following:

(1) potential routes for the shipment of spent nuclear fuel;

(2) sources and a description of a specific shipment of spent nuclear fuel; and

(3) conduct assessments of the risks associated with shipments of spent nuclear fuel.

(c) Considerations Regarding Route Selection.—The analysis under subsection (b) shall include a consideration whether, and to what extent, the procedures analyzed for purposes of that portion of that subsection take into account the following:

(1) The proximity of the routes under consideration to major population centers and the risks which such with shipments of spent nuclear fuel through densely populated areas;

(2) Current traffic and accident data with respect to the routes under consideration;

(3) The quality of the roads comprising the routes under consideration.

(4) Emergency response capabilities along the routes under consideration.

(5) The proximity of the routes under consideration to places or venues (including sports stadiums, convention centers, concert halls, and theaters, and other venues) where large numbers of people gather.

(d) Recommendations.—In conducting the study under subsection (a), the National Academy of Sciences shall make such recommendations concerning the matters studied as the National Academy of Sciences considers appropriate.

(e) Deadline for Dispersal of Funds for Study.—The Secretary shall disperse to the National Academy of Sciences the funds for the cost of the study required by subsection (a) not later than 30 days after the date of enactment of this Act.

(f) Report on Results of Study.—Not later than six months after the date of the dispersal of funds under subsection (e), the National Academy of Sciences shall submit to the appropriate committees of Congress a report on the study conducted under subsection (a), including the recommendations required by subsection (d).

(g) Appropriations for Study.—

(1) For fiscal years 2002 through 2006, and for other purposes; as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>Amount (in billions)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2002</td>
<td>0.5</td>
</tr>
<tr>
<td>2003</td>
<td>0.6</td>

</tr>
<tr>
<td>2005</td>
<td>0.8</td>
</tr>
<tr>
<td>2006</td>
<td>0.9</td>
</tr>
</tbody>
</table>

(2) Not later than January 1, 2015, the Secretary may, by rule, establish required annual percentages of the retail electric supplier.

(h) Requirements for Other Purposes.—

(1) A credit may be counted toward compliance with subsection (a) only once.

(2) A credit may be counted toward compliance with subsection (a) only once.

SEC. 606. FEDERAL RENEWABLE PORTFOLIO STANDARD.

(a) Minimum Renewable Generation Requirement.—For each calendar year beginning in calendar year 2005, each retail electric supplier shall submit to the Secretary, not later than January 1 of the following calendar year, renewable energy credits in an amount equal to the required annual percentage specified in subsection (b).

(b) Required Annual Percentage.

(1) For calendar years 2005 through 2020, the required annual percentage of the retail electric supplier's base amount that shall be generated from renewable energy resources shall be the percentage specified in the following table:

<table>
<thead>
<tr>
<th>Calendar Year</th>
<th>Required Annual Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>2005 through 2006</td>
<td>0.5</td>

</tr>
<tr>
<td>2017 through 2018</td>
<td>3.5</td>
</tr>
<tr>
<td>2019 through 2020</td>
<td>4.0</td>
</tr>
</tbody>
</table>

(2) Not later than January 1, 2015, the Secretary shall issue to the retail electric supplier, for each kilowatt-hour of electric energy that is generated from a renewable energy resource at an eligible facility, a credit.

(3) The Secretary may issue credits for incremental hydroelectric power that is generated from the incremental increase in average annual generation resulting from the efficiency improvements or capacity additions.

(d) Renewable Energy Resource.—A renewable energy resource shall be calculated using the same water flow information used to determine a historical average annual generation baseline for the hydroelectric facility and certified by the Secretary or the relevant regulatory commission. The calculation of the credits for incremental hydroelectric power shall not be based on any operational changes at the hydroelectric facility not directly associated with the efficiency improvements or capacity additions.

(e) Calculation of renewable energy credits for each kilowatt-hour generated.

(f) To be eligible for a renewable energy credit, the unit of electric energy generated through the use of a renewable energy resource may be sold or may be used by the generator.

(g) The Secretary shall issue credits based on the proportion of the renewable energy resource used.

(h) A retail electric supplier may use renewable energy credits for the purposes of this section for the duration of the contract.

(i) The Secretary may issue credits for each kilowatt-hour of electric energy generated from a renewable energy resource at an eligible facility against a retail electric supplier's own required annual percentage.

(j) The credits are not...
tradeable and may only be used in the calendar year generation actually occurs.

‘‘(e) CREDIT TRADING.—A renewable energy credit may be sold or exchanged by the entity to which it was issued by any other entity who acquires the credit. A renewable energy credit for any year that is not used to satisfy the minimum renewable generation requirement under subsection (a) for that year may be carried forward for use within the next four years.

‘‘(f) CREDIT BORROWING.—At any time before the end of calendar year 2005, a retail electric supplier that has reason to believe it will not have sufficient renewable energy credits to comply with subsection (a) may—

(1) notify the Secretary to the extent that the entity demonstrating that the retail electric supplier will earn sufficient credits within the next 3 calendar years which, when taken into account, will enable the retail electric supplier to meet the requirements of subsection (a) for calendar year 2005 and the subsequent calendar years involved; and

(2) upon the approval of the plan by the Secretary, apply credits that the plan demonstrates will be earned within the next 3 calendar years that are the requirements of subsection (a) for each calendar year involved.

‘‘(g) CREDIT COST CAP.—The Secretary shall not redeem the credits for sale at the lesser of 3 cents per kilowatt-hour or 200 percent of the average market value of credits for the applicable compliance period. On January 1 of each year following calendar year 2005, the Secretary shall adjust for inflation the price charged per credit for such calendar year, based on the Gross Domestic Product Implicit Price Deflator.

‘‘(h) ENFORCEMENT.—The Secretary may bring an action in the appropriate United States district court to impose a civil penalty of not more than the greater of 3 cents or 200 percent of the average market value of credits for the applicable compliance period.

‘‘(i) INFORMATION COLLECTION.—The Secretary may collect the information necessary to verify and audit any plan submitted by a retail electric supplier to the Secretary, and

(1) the annual electric energy generation and renewable energy generation of any entity applying for renewable energy credits under this section.

(2) the validity of renewable energy credits submitted by a retail electric supplier to the Secretary, and

(3) the quantity of electricity sales of all retail electric suppliers.

‘‘(j) ENVIRONMENTAL SAVINGS CLAUSE.—Incremental hydropower shall be subject to all applicable environmental laws and licensing and permitting requirements.

‘‘(k) STATE SAVINGS CLAUSE.—This section does not preclude a State from requiring additional renewable energy generation in that State, except for modifying technology mix.

‘‘(l) DEFINITIONS.—For purposes of this section—

‘‘(1) BIOMASS.—

(A) Except with respect to material removed from National Forest System lands, the term ‘biomass’ means any organic material of non-timber origin that occurs in a natural or artificial environment in a recurring basis, including dedicated energy crops, trees grown for energy production, wood waste and wood residues, plants (including aquatic plants, grasses, and agricultural crops), residues, fibers, animal wastes and other organic waste materials, and fats and oils.

(B) With respect to material removed from National Forest System lands, the term ‘biomass’ means fuel and biomass accumulations from precommercial thinnings, slash, and brush.

‘‘(2) ELIGIBLE FACILITY.—The term ‘eligible facility’ means—

(A) a facility for the generation of electric energy from a renewable energy resource that is placed in service on or after the date of enactment of this section; or

(B) a repowering or cofiring increment that is placed in service on or after the date of enactment of this section at a facility for the generation of electric energy from a renewable energy resource that was placed in service before that date.

‘‘(3) ELIGIBLE RENEWABLE ENERGY RESOURCE.—The term ‘renewable energy resource’ means solar, wind, ocean, or geothermal energy, biomass (excluding solid waste and paper that is commonly recycled), landfill gas, a generation offset, or incremental hydropower.

‘‘(4) GENERATION OFFSET.—The term ‘generation offset’ means reduced electricity usage measured at a site where a customer consumes energy from a renewable energy technology.

‘‘(5) EXISTING FACILITY OFFSET.—The term ‘existing facility offset’ means renewable energy generated from an existing facility, not classified as an eligible facility, that is owned or under contract to a retail electric supplier on the date of enactment of this section.

‘‘(6) INCREMENTAL HYDROPOWER.—The term ‘incremental hydropower’ means additional electric energy from increased efficiency or additions of capacity after the date of enactment of this section at a hydroelectric dam that was placed in service before that date.

‘‘(7) INDIAN LAND.—The term ‘Indian land’ means—

(A) any land within the limits of any Indian reservation, pueblo or rancheria;

(B) any land not within the limits of any Indian reservation, pueblo or rancheria title to which has been conveyed to the United States for the benefit of any Indian tribe or individual subject to restriction by the United States against alienation;

(1) any dependent Indian community, and

(2) any land conveyed to any Alaska Native corporation under the Alaska Native Claims Settlement Act.

(8) INDIAN TRIBE.—The term ‘Indian tribe’ means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.), which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

(9) RETAIL ELECTRIC SUPPLIER.—The term ‘retail electric supplier’ means any electric supplier to electric consumers during the preceding calendar year; except that such term does not include the United States, a State or any political subdivision of a State, or any agency, authority, or instrumentality of any one or more of the foregoing, or a rural electric cooperative.

‘‘(12) RETAIL ELECTRIC SUPPLIER.—The term ‘retail electric supplier’ means a person, that sells electric energy to electric consumers and sold not less than 1,000,000 megawatt-hours of electric energy to electric consumers for purposes other than resale during the preceding calendar year; except that such term does not include the United States, a State or any political subdivision of a State, or any agency, authority, or instrumentality of the foregoing, or a rural electric cooperative.

(13) RETAIL ELECTRIC SUPPLIER’S BASE AMOUNT.—The term ‘retail electric supplier’s base amount’ means the total amount of electric energy sold by the retail electric supplier to electric customers during the most recent calendar year for which information is available, excluding electric energy generated by—

(A) an eligible renewable energy resource;

(B) municipal solid waste; or

(C) a hydroelectric facility.

(m) SUNSET.—This section expires December 31, 2030."

SA 3017. Mr. JEFFORDS (for himself, Mr. WELLSSTONE, and Mr. KERRY) proposed an amendment to amendment SA 3016 proposed by Mr. BINGAMAN to the amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; pending.

Beginning on page 1, strike line 5 and all that follows through page 9, line 8, and insert the following:

SEC. 606. FEDERAL RENEWABLE ENERGY STANDARD.

SEC. 1. DEFINITIONS.

In this section—

(1) BIOMASS.—The term ‘biomass’ means—

(A) organic material from a plant that is placed exclusively for the purpose of being used to produce electricity; and

(B) nonhazardous organic or agricultural animal waste material that is segregated from other waste materials and is derived from—

(i) a forest-related resource, including—

(1) mill and harvesting residue;

(2) precommercial thinnings;

(3) slash; and,

(4) brush;

(ii) an agricultural resource, including—

(I) orchard tree crops;

(II) vineyards;

(III) grain;

(IV) legumes; (V) sugar; and

(IV) other crop by-products or residues;

(iii) miscellaneous waste such as—

(1) waste pallet;

(2) crate;

(3) dunnage; and

(4) landscape or right-of-way tree trimmings, but not including—

(aa) municipal solid waste;

(bb) recyclable postconsumer wastepaper;

(cc) painted, treated, or pressurized wood; and

(dd) wood contaminated with plastic or metals; or

(ee) tires; and

(iv) animal waste that is converted to fuel rather than directly combusted, the residue of which is converted to biological fertilizer, oil, or activated carbon.
(2) INCREMENTAL HYDROPOWER.—The term “incremental hydropower” means additional generation capacity achieved from increased efficiency after January 1, 2002, at a hydroelectric dam that was placed in service before January 1, 2002.

(3) LANDFILL GAS.—The term “landfill gas” means gas generated from the decomposition of household solid waste, commercial solid waste, and industrial solid waste disposed of in a municipal solid waste landfill unit (as those terms are defined in regulations promulgated by the Environmental Protection Agency).

(4) RENEWABLE ENERGY.—The term “renewable energy” means electricity generated from—

(A) a renewable energy source; or

(B) hydrogen that is produced from a renewable energy source or by a fuel cell that uses a renewable energy source as input.

(5) RENEWABLE ENERGY SOURCE.—The term “renewable energy source” means—

(A) wind;

(B) biomass;

(C) incremental hydropower;

(D) landfill gas; or

(E) a geothermal, solar thermal, or photovoltaic source.

(6) RETAIL ELECTRIC SUPPLIER.—

(A) In general.—The term “retail electric supplier” includes—

(i) a regulated utility company (including affiliates or associates of such a company);

(ii) a company that is not affiliated or associated with a regulated utility company;

(iii) a cooperative utility;

(iv) a local government; and

(v) a special district.

(B) Identification of retail electric supplier.—The term “retailer” means the Secretary of Energy.

SEC. 2. RENEWABLE ENERGY GENERATION STANDARDS.

(a) RENEWABLE ENERGY CREDITS.—

(1) IN GENERAL.—Not later than April 1 of each year, each retail electric supplier shall submit to the Secretary renewable energy credits proportional to the required annual percentage of the retail electric supplier’s total amount of kilowatt-hours of non-hydropower electricity sold to consumers during the preceding calendar year.

(2) RATE.—The rates charged to each class of consumers by a retail electric supplier shall reflect an equal percentage of the cost equal to three cents per renewable energy credit in 2003 dollars, adjusted for inflation.

(b) ELIGIBLE RESOURCES.—A retail electric supplier shall—

(A) determine the type of renewable energy credit—

(i) by which renewable energy credits are being sold not 500,000 megawatt-hours or less of renewable energy generation during the calendar year for which renewable energy credits are being sold not 500,000 megawatt-hours or less of renewable energy generation during the calendar year for which renewable energy credits are being sold, or

(ii) for which renewable energy credits are being sold, or

(iii) issued under subsection (d) for renewable energy generated during the calendar year for which renewable energy credits are being issued under subsection (d) for renewable energy generated during the calendar year for which renewable energy credits are being issued, or

(D) the volume of household solid waste, commercial solid waste, and industrial solid waste disposed of in a municipal solid waste landfill unit, as determined by the States.

(c) SUBMISSION OF RENEWABLE ENERGY CREDITS.—To meet the requirements under subsection (a)(1), a retail electric supplier may submit to the Secretary—

(1) renewable energy credits issued under subsection (d) for renewable energy generated by the retail electric supplier during the calendar year for which renewable energy credits are being submitted or the previous calendar year; or

(2) renewable energy credits—

(A) issued under subsection (d) to any new renewable energy generator for renewable energy generated during the calendar year for which renewable energy credits are being submitted or the previous calendar year; and

(B) acquired by the retail electric supplier under subsection (e); or

(3) renewable energy credits acquired from the Secretary for the issuance of renewable energy credits in 2003 dollars, adjusted for inflation.

(d) SMALL UTILITY PROGRAM.—The Secretary shall apply proceeds from the sale of renewable energy credits acquired under subsection (c)(3) to a program, utilizing a competitive bidding process, to encourage maximum renewable energy generation and purchase by retail electric suppliers which sold not 500,000 megawatt-hours or less of renewable energy to consumers for purposes other than resale during the preceding calendar year.

(e) ISSUANCE OF RENEWABLE ENERGY CREDITS.—

(1) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, the Secretary shall establish a program to issue, monitor the sale or exchange of, and track renewable energy credits.

(2) APPLICATION.—

(A) IN GENERAL.—Under the program established under paragraph (1), an entity that generates electric energy through the use of a renewable energy resource may apply to the Secretary for the issuance of renewable energy credits.

(B) REQUIREMENTS.—An application under subparagraph (A) shall identify—

(i) the type of renewable energy resource used to produce the electric energy;

(ii) the entity which the electric energy was produced; and

(iii) any other information that the Secretary determines appropriate.

(3) NUMBERS OF RENEWABLE ENERGY RESOURCE CREDITS.—

(A) IN GENERAL.—The Secretary shall issue to an entity 1 renewable energy credit for each kilowatt-hour of electric energy that the entity generates through the use of a renewable energy resource in any State in calendar year 2002 and each year thereafter.

(B) PETITIONS FOR WAIVERS.—If both a renewable energy resource and a nonrenewable energy resource are used to generate the electric energy, the Secretary shall issue renewable energy credits based on the proportion of the renewable energy resource used.

(4) ELIGIBILITY.—To be eligible for a renewable energy credit under this subsection, the entity shall generate or acquire the renewable energy credits.

(5) IDENTIFICATION OF RENEWABLE ENERGY CREDITS.—The Secretary shall identify renewable energy credits by—

(A) the type of generation; and

(B) the State in which the generating facility is located.

(f) USE.—

(A) IN GENERAL.—To receive a renewable energy credit, the entity shall pay a fee, calculated by the Secretary, in an amount that is equal to the lesser of—

(i) the administrative costs of issuing, recording, monitoring the sale of exchange of, and tracking the renewable energy credit; or

(ii) 5 percent of the national average market value (as determined by the Secretary) of that quantity of renewable energy credits.

(B) USE.—The Secretary shall use the fees to pay the administrative costs described in subparagraph (A)(i).

(g) SALE OR EXCHANGE.—A renewable energy credit may be sold or exchanged by the entity that issued the renewable energy credit or by any other entity that acquires the renewable energy credit.

(h) VERIFICATION.—The Secretary may collect the information necessary to verify and audit—

(1) the annual electric energy generation and renewable energy generation of any entity applying for renewable energy credits under this section;

(2) the validity of renewable energy credits submitted by a retail electric supplier to the Secretary; and

(3) the amount of electricity sales of all retail electric suppliers.

(i) ENFORCEMENT.—

(1) IN GENERAL.—The Secretary may bring an action in United States district court to impose a civil penalty on a retail electric supplier that fails to comply with subsection (a).

(2) AMOUNT OF PENALTY.—A retail electric supplier that fails to submit the required evidence of renewable energy credits under subsection (a) shall be subject to a civil penalty of not more than 3 times the estimated national average market value (as determined by the Secretary) of renewable energy credits for the calendar year concerned.

SA 3018. Mrs. FEINSTEIN submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to lie on the table; as follows:

On page 189, in the table between lines 10 and 11, in the item relating to calendar year 2004, strike “2.3” and insert “1.3”.

SA 3019. Mrs. FEINSTEIN submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to lie on the table; as follows:

Beginning on page 195, strike line 19 and all that follows through page 196, line 4, and insert the following:

“(B) PETITIONS FOR WAIVERS.—

(i) IN GENERAL.—The Administrator, in consultation with the Secretary of Agriculture, shall approve or disapprove a State petition for a waiver of the requirement of paragraph (2)
within 30 days after the date on which the petition is received by the Administrator.

‘‘(ii) FAILURE TO ACT.—If the Administrator fails to approve or disapprove a petition within the period specified in clause (i), the petition shall be deemed to be approved.

SA 3020. Mrs. FEINSTEIN submitted an amendment intended to be proposed to amendment SA 297 proposed by Mr. DASCHLE (for himself and Mr. BINGA-
MAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to lie on the table; as follows:

On page 189, line 3, strike ‘‘2004’’ and insert ‘‘2005’’.

On page 189, line 5, strike ‘‘2004’’ and insert ‘‘2005’’.

On page 189, line 8, strike ‘‘2004’’ and insert ‘‘2005’’.

On page 189, in the table between lines 10 and 11, strike the item relating to calendar year 2004.

On page 193, line 10, strike ‘‘2004’’ and insert ‘‘2005’’.

On page 194, line 21, strike ‘‘2004’’ and insert ‘‘2005’’.

On page 196, line 17, strike ‘‘2004’’ and insert ‘‘2005’’.

On page 197, line 4, strike ‘‘2004’’ and insert ‘‘2005’’.

On page 199, line 4, strike ‘‘2004’’ and insert ‘‘2005’’.

On page 199, line 17, strike ‘‘2004’’ and insert ‘‘2005’’.

SA 3021. Mrs. BOXER (for herself and Mrs. FEINSTEIN) submitted an amendment intended to be proposed to amendment SA 297 proposed by Mr. DASCHLE (for himself and Mr. BINGA-
MAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to lie on the table; as follows:

Beginning on page 204, strike line 15 and all that follows through page 205, line 8, and insert the following:

‘‘Notwithstanding any other provision of federal or state law, a renewable fuel, as defined by this Act, used or intended to be used as a motor vehicle fuel, or any motor vehicle fuel containing such renewable fuel, shall be subject to liability standards no less protective than any other motor vehicle fuel or fuel additive.’’.}

SA 3022. Mrs. BOXER (for herself and Mrs. FEINSTEIN) submitted an amendment intended to be proposed to amendment SA 297 proposed by Mr. DASCHLE (for himself and Mr. BINGA-
MAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to lie on the table; as follows:

On page 191, strike lines 8 through 11 and insert the following:

‘‘(4) CELLULOSIC BIOMASS ETHANOL.—

(A) In general.—For the purpose of paragraph (2), ‘‘state law’’ means:

(i) except as provided in clause (ii), 1 gal-
lon of cellulosic biomass ethanol shall be
considered to be the equivalent of 1.5 gallons of renewable fuel; and

(ii) 1 gallon of cellulosic biomass ethanol shall be considered the equivalent of 2 gal-
lons of renewable fuel if the cellulosic bio-
mass ethanol is derived from agricultural
commodities and residues.

(B) CELLULOSIC BIOMASS ETHANOL CONVER-
SION ASSISTANCE.—

(1) IN GENERAL.—The Secretary of Energy may make grants to merchant producers of cellulosic biomass ethanol to assist such pro-
ducers in building eligible facilities for the production of cellulosic biomass ethanol.

(ii) ELIGIBLE FACILITIES.—A facility shall be eligible to receive a grant under this para-
graph if the facility—

(I) is located in the United States; and

(ii) uses cellulosic biomass ethanol feed
stocks derived from agricultural commod-
ities and residues.

(III) AUTHORIZATION OF APPROPRIATIONS.—

There is authorized to be appropriated to carry out this paragraph such sums as may be necessary for fiscal years 2003, 2004, and 2005.

SA 3023. Mrs. LINCOLN (for herself, Mr. BOND, Mr. JOHNSON, Mrs. CARNAHAN, Mr. HUTCHINSON, Mr. HAR-
KIN, Mr. GRASSLEY, Mr. Bunning, Mr. BAYH, and Mr. CRAIG) submitted an amendment intended to be proposed to amendment SA 297 proposed by Mr. DASCHLE (for himself and Mr. BINGA-
MAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to lie on the table; as follows:

On page 142, strike lines 8 through 11 and insert the following:

SEC. 817. TEMPORARY BIODIESEL CREDIT EXP-
ansion.

(a) BIODIESEL CREDIT EXPANSION.—Section 312(b) of the Energy Policy Act of 1992 (42 U.S.C. 13220(b)) is amended by striking paragraph (2) and inserting the following:

‘‘(2) USE.—

(A) In general.—A fleet or covered person

(i) may use credits allocated under sub-
paragraph (a) to satisfy more than 50 percent of the alternative fueled vehicle requirements of a fleet or covered person under this title, title IV, and title V; but

(ii) may use credits allocated under sub-
paragraph (a) to satisfy 100 percent of the alter-
native fueled vehicle requirements of a fleet or covered person under title V for 1 or more of model years 2002 through 2005.

(B) APPLICABILITY.—Subparagraph (A)

does not apply to a fleet or covered person

that is a biodiesel alternative fuel provider described in section 501(a)(2)(A).

(b) TREATMENT OF SECTION 512 CREDITS.—

Section 312(c) of the Energy Policy Act of 1992 (42 U.S.C. 13220(c)) is amended—

(1) in the subsection heading, by striking ‘‘CREDIT’’ and inserting ‘‘TREATMENT’’; and

(2) by striking ‘‘shall not be considered’’ and inserting ‘‘shall be treated as’’.

(c) ALTERNATIVE FUELED VEHICLE STUDY AND REPORT.—

(1) DEFINITIONS.—In this subsection:

(A) ALTERNATIVE FUELED VEHICLE.—The term ‘‘alternative fueled vehicle’’ has the meaning given in section 310 of the Energy Policy Act of 1992 (42 U.S.C. 13211).

(B) LIGHT DUTY MOTOR VEHICLE.—The term ‘‘light duty motor vehicle’’ has the meaning given in section 301 of the Energy Policy Act of 1992 (42 U.S.C. 13211).

(2) BIODIESEL CREDIT EXPANSION.—As soon as practicable after the date of enactment of this Act, the Secretary shall conduct a study—

(A) to determine the availability and cost of light duty motor vehicles that qualify as alternative fueled vehicles under title V of the Energy Policy Act of 1992 (42 U.S.C. 13251 et seq.); and

(B) to compare—

(i) the availability and cost of biodiesel; with

(ii) the availability and cost of fuels that qualify as alternative fuels under title V of the Energy Policy Act of 1992 (42 U.S.C. 13251 et seq.).

(3) REPORT.—Not later than 1 year after the date of enactment of this Act, the Secretary shall submit to Congress a report that—

(A) describes the results of the study con-
ducted under paragraph (2); and

(B) includes any recommendations of the Secretary for legislation to extend the tem-
porary credit provided under subsection (a) beyond model year 2005.

SA 3024. Mr. VOINOVICH (for himself, Ms. LANDRIEU, Mr. SMITH of New Hampshire, and Mr. INHOFE) submitted an amendment intended to be proposed to amendment SA 297 proposed by Mr. DASCHLE (for himself and Mr. BINGA-
MAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to lie on the table; as follows:

On page 119, between lines 10 and 11, insert the following:

Subtitle B—Growth of Nuclear Energy

SEC. 511. COMBINED LICENSE PERIODS.

Section 103c. of the Atomic Energy Act of 1954 (42 U.S.C. 2133(c)) is amended—

(1) by striking ‘‘c. Each such’’ and inserting the following:

‘‘c. LICENSE PERIOD.—

‘‘(1) ‘‘In general.’’—Each such’’; and

(2) by adding at the end the following:

‘‘(2) COMBINED LICENSES.—In the case of a combined construction and operating license issued under section 156(b), the duration of the operating phase of the license period shall not be less than the duration of the oper-
ing license if application had been made for separate construction and operating li-
ces.

SEC. 512. SCOPE OF ENVIRONMENTAL REVIEW.

(a) IN GENERAL.—Chapter 10 of title I of the Atomic Energy Act of 1954 (42 U.S.C. 2131 et seq.) is amended—

(1) by redesignating sections 110 and 111 as sections 111 and 112, respectively; and

(2) by inserting after section 109 the fol-

lowing:

SEC. 110. SCOPE OF ENVIRONMENTAL REVIEW.

‘‘In conducting any environmental review (including any activity conducted under section 162 of the National Environmental Pol-
cy Act of 1969 (42 U.S.C. 4332)) in connection with an application for a license or a re-
newed license under this chapter, the Com-
mission shall not give any consideration to the need for, or any alternative to, the fac-
ility to be licensed.’’.

(c) CONFIRMING AMENDMENTS.—

(1) The Atomic Energy Act of 1954 is amended—
(A) in the table of contents (42 U.S.C. prec. 2011), by striking the items relating to section 110 and inserting the following:

“Sec. 110. Scope of environmental review.

“Sec. 111. Exclusions.

“Sec. 112. Licensing by Nuclear Regulatory Commission of distribution of certain materials by Department of Energy.”;

(B) in the last sentence of section 57b. (42 U.S.C. 2071(b)), by striking “section 111 b. and inserting “section 112b.”;

(C) in section 131a.(2)(C), by striking “section 111 b.” and inserting “section 112b.”;

(2) Section 202 of the Energy Reorganization Act of 1974 (42 U.S.C. 5842) is amended—

(A) by striking “section 110 a.” and inserting “section 111a.”; and

(B) by striking “section 110 b.” and inserting “section 112b.”.

Subtitle C—NRC Regulatory Reform

SEC. 521. ELIMINATION OF DUPLICATIVE ANTitrust REVIEW.

Section 105 of the Atomic Energy Act of 1954 (42 U.S.C. 2135) is amended by striking subsection c. and inserting the following:

“c. (1) IN GENERAL.—A condition is critical to the performance of the duties of the Commission—

“(i) to develop a sufficient record; or

“(ii) to achieve fairness.”

(2) MODIFICATION.—If a person that is licensed to construct or operate a utilization or production facility applies for reconsideration under this section of a condition imposed in the person’s license, the Commission shall conduct a proceeding, on an expedited basis, to determine whether the license condition—

“(A) is necessary to ensure compliance with subsection a.; or

“(B) should be modified or removed.”.

SEC. 522. HEARING PROCEDURES.

Section 189a.1(1) of the Atomic Energy Act of 1954 (42 U.S.C. 2239a(1)) is amended by adding at the end the following:

“(C) Hearing.—A hearing under this section shall be conducted using informal adjudicatory procedures unless the Commission determines that formal adjudicatory procedures are necessary to achieve fair and effective decision making.

“(i) to develop a sufficient record; or

“(ii) to achieve fairness.”

SEC. 523. AUTHORITY OVER FORMER LICENSEES FOR DECOMMISSIONING FUNDING.

Section 11 of the Atomic Energy Act of 1946 (42 U.S.C. 2201(1)) is amended—

(1) by striking “and (3)” and inserting “(3);”

(2) by inserting before the semicolon at the end the following: “; and (4) to ensure that sufficient funds will be available for the decommissioning of any production or utilization facility licensed under section 109 or 104b., including standards and restrictions governing the control, maintenance, use, and disposition of any former licensee under this Act that has control over any fund for the decommissioning of the facility.”.

Subtitle D—NRC Personnel Crisis

SEC. 531. ELIMINATION OF PENSION OFFSET.

Section 161 of the Atomic Energy Act of 1954 (42 U.S.C. 2201) is amended by adding at the end the following:

“y. exempt from the application of sections 9344 and 9468 of title 5, United States Code, an annuitant who was formerly an employee of the Commission who is hired by the Commission as a consultant, if the Commission finds that the consultant has a skill that is critical to the performance of the duties of the Commission.”.

SEC. 532. CONTRACTS WITH THE NATIONAL LABORATORIES.

Section 170a of the Atomic Energy Act of 1946 (42 U.S.C. 2201a) is amended by striking subsection c. and inserting the following:

“c. CONTRACTS, AGREEMENTS, AND OTHER ARRANGEMENTS WITH THE NATIONAL LABORATORIES.—Notwithstanding section 111b., and notwithstanding the potential for a conflict of interest that cannot be avoided, the Commission may enter into a contract, agreement, or other arrangement with a national laboratory if the Commission takes reasonable steps to mitigate the effect of the conflict of interest.”

SEC. 533. NRC TRAINING PROGRAM.

(a) IN GENERAL.—In order to maintain the human resource investment and infrastructure of the United States in the nuclear sciences, health physics, and engineering fields, in accordance with the statutory authorities of the Commission relating to the civilian nuclear energy program, the Nuclear Regulatory Commission shall carry out a training and fellowship program to address shortages of individuals with critical safety skills.

(b) AUTHORIZATION OF APPROPRIATIONS.—

(1) IN GENERAL.—There are authorized to be appropriated to carry out this section $1,000,000 for each of fiscal years 2002 through 2006.

(2) AVAILABILITY.—Funds made available under paragraph (1) shall remain available until expended.

SA 3025. Mr. INhofe (for himself and Mr. Conrad) submitted an amendment intended to be proposed to amendment SA 2017 proposed by Mr. DASCHLE (for himself and Mr. Bingaman) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to lie on the table; as follows:

“TITLe II—ELECTRICITY

“Subtitle A—Consumer Protections

“SEC. 201. INFORMATION DISCLOSURE.

“(a) OFFERS AND SOLICITATIONS.—The Federal Trade Commission shall issue rules requiring each electric utility that makes an offer to sell electric energy, or solicits electric consumers to purchase electric energy from the electric utility, to provide the electric consumer with information containing the following information:

“(1) the nature of the service being offered, including information about interstitiality of service;

“(2) the price of the electric energy, including a description of any variable charges;

“(3) a description of all other charges associated with the service being offered, including access charges, exit charges, back-up service charges, stranded asset recovery charges, and customer service charges; and

“(4) information the Federal Trade Commission determines is technologically and economically feasible to provide in a format of assistance to electric consumers in making purchasing decisions, and concerns—

“(A) the product or its price;

“(B) the share of electric energy that is generated by each fuel type; and

“(C) the environmental emissions produced in generating the electric energy.

“(b) PERIODIC BILLINGS.—The Federal Trade Commission shall issue rules requiring any electric utility that sells electric energy to each of its electric consumers, in addition to the information transmitted pursuant to section 115(f) of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 7921), to provide a clear disclosure containing the information described in subsection (a) for each billing period (unless such information is not reasonably ascertained by the electric utility).

“SEC. 202. CONSUMER PRIVACY.

“(a) PROHIBITION.—The Federal Trade Commission shall issue rules prohibiting any electric utility that sells electric energy to an electric consumer from using, disclosing, or permitting access to consumer information in connection with the sale or delivery of electric energy to an electric consumer from using, disclosing, or permitting access to consumer information in connection with the sale or delivery of electric energy to an electric consumer, or for related services; and

“(b) PERMITTED USE.—The rules issued under this section shall not prohibit any electric utility from using, disclosing, or permitting access to consumer information referred to in subsection (a) for any of the following purposes:

“(1) to facilitate an electric consumer’s change in selection of an electric utility under procedures approved by the State or State regulatory authority;

“(2) to initiate, render, bill, or collect for the sale or delivery of electric energy to electric consumers; and

“(3) to protect the rights or property of the person obtaining such information;
“(4) to protect retail electric consumers from fraud, abuse, and unlawful subscription in the sale or delivery of electric energy to such consumers;”

“(5) for law enforcement purposes; or

“(6) for purposes of compliance with any Federal, State, or local law or regulation authorizing disclosure of information to a Federal, State, or local agency.

“(c) AGGREGATE CONSUMER INFORMATION.—The rules issued under this subsection may permit a person to use, disclose, and permit access to aggregate consumer information and may require an electric utility to make such information available to other electric utilities upon request and payment of a reasonable fee.

“(d) DEFINITIONS.—As used in this section:

“(1) The term ‘aggregate consumer information’ means collective data that relates to a group or category of retail electric consumers, from which individual consumer identities and characteristics have been removed.

“(2) The term ‘consumer information’ means information that relates to the quantity, technical configuration, type, destination, or amount of use of electric energy delivered to any retail electric consumer.

“SEC. 203. UNFAIR TRADE PRACTICES.

“(a) SLAMMING.—The Federal Trade Commission shall issue rules prohibiting the changing of the provider of electric service of an electric utility except with the informed consent of the electric consumer.

“(b) CRAMMING.—The Federal Trade Commission shall promulgate rules prohibiting the imposition of goods and services to an electric consumer unless expressly authorized by law or the electric consumer.

“SEC. 204. APPLICABLE PROCEDURES.

“The Federal Trade Commission shall proceed in accordance with section 553 of title 5, United States Code, when prescribing a rule required under this section.

“SEC. 205. FEDERAL TRADE COMMISSION ENFORCEMENT.

“Violation of a rule issued under this subtitle shall be treated as a violation of a rule under section 18 of the Federal Trade Commission Act (15 U.S.C. 57a) respecting unfair or deceptive acts or practices. All functions and powers of the Federal Trade Commission under such Act are available to the Federal Trade Commission to enforce compliance with this subtitle notwithstanding any jurisdictional limits in such Act.

“SEC. 206. STATE AUTHORITY.

“Nothing in this subtitle shall be construed to preclude a State or State regulatory authority from prescribing and enforcing laws, rules or procedures regarding the practices which are the subject of this subtitle.

“SEC. 207. DEFINITIONS.

“As used in this subtitle:

“(1) The term ‘aggregate consumer information’ means collective data that relates to a group or category of electric consumers, from which individual consumer identities and identifying characteristics have been removed.

“(2) The term ‘consumer information’ means information that relates to the quantity, technical configuration, type, destination, or amount of use of electric energy delivered to an electric consumer.

“(3) The term ‘electric consumer’, ‘electric utility’, and ‘State regulatory authority’ have the meanings given such terms in section 3 of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2602).

“(Subtitle B—Electric Reliability

“SEC. 208 ELECTRIC RELIABILITY.

“Part II of the Federal Power Act (16 U.S.C. 824 et seq.) is amended by inserting the following after section 215 as added by this Act:

“SEC. 216. ELECTRIC RELIABILITY.

“(a) DEFINITIONS.—For purposes of this section:

“(1) ‘bulk-power system’ means the network of interconnected transmission facilities and generating facilities;

“(2) ‘electric reliability organization’ means a self-regulating organization certified by the Commission under subsection (c) whose purpose is to promote the reliability of the bulk power system and that—

“(A) has established rules that—

“(i) assure its independence of the users and owners of the bulk power system; while ensuring fair stakeholder representation in the selection of its directors and balanced decision-making in any committee or subordinate organizational structure;

“(ii) allocate equitably dues, fees, and other charges among end users for all activities under this section;

“(iii) provide for reasonable notice and opportunity for public comment, due process, openness, and balance of interests in developing reliability standards and otherwise exercising its duties;

“(B) has established rules that, at a minimum, adequately address the requirements of this subsection, the Commission shall approve only the application it concludes will best implement the provisions of this section;

“(d) RELIABILITY STANDARDS.—

“(1) An electric reliability organization shall file a proposed reliability standard or modification to a reliability standard with the Commission.

“(2) The Commission may approve a proposed reliability standard or modification to a reliability standard if it determines that the proposed reliability standard or modification is not unduly discriminatory or preferential, and is subject to the content of a proposed standard or modification to a reliability standard, but

shall not defer with respect to its effect on competition.

“(3) The electric reliability organization and the Commission shall rebuttably presume that a proposal for a reliability standard organized on an interconnected-wide basis for a reliability standard or modification to a reliability standard to be applicable on an interconnected-wide basis is reasonable, and not unduly discriminatory or preferential, and in the public interest.

“(4) The Commission shall require the electric reliability organization for further consideration a proposed reliability standard or a modification to a reliability standard that the Commission disapproves in whole or in part.

“(5) The Commission, upon its own motion or upon complaint, may order an electric reliability organization of the Commission a proposed reliability standard or a modification to a reliability standard that addresses a specific matter if the Commission considers such a new or modified reliability standard appropriate to carry out this section.

“(e) ENFORCEMENT.—

“(1) An electric reliability organization may impose a penalty on a user or owner or operator of the bulk power system if the electric reliability organization, after notice and an opportunity for hearing, that the user or owner or operator of the bulk power system has violated a reliability standard approved by the Commission under subsection (b).

“(2) On its own motion or upon complaint, the Commission may order compliance with a reliability standard and may impose a penalty against a user or owner or operator of the bulk power system.

“(3) The Commission shall establish regulations authorizing the electric reliability organization to enter into an agreement to delegate authority to a regional entity for the purpose of proposing and enforcing reliability standards (including related activities) for a regional entity and to modify, amend, and enforce reliability standards.

“(4) The Commission may take such action as is necessary or appropriate against the electric reliability organization or a regional entity to require compliance with a reliability standard or any Commission order affecting the electric reliability organization or a regional entity.

“(5) CHANGES IN ELECTRIC RELIABILITY ORGANIZATION RULES.—An electric reliability organization shall file with the Commission for its approval any proposed rule change, accompanied by an explanation of its basis and purpose. The Commission, upon its own motion or complaint, may propose a change to the rules of the electric reliability organization. A proposed rule or proposed rule change shall take effect upon a
finding by the Commission, after notice and opportunity for comment, that the change is just, reasonable, not unduly discriminatory or preferential, is in the public interest, and satisfies the requirements of subsection (c)(2).

(g) Coordination With Canada and Mexico—

(1) The electric reliability organization shall take all appropriate steps to gain recognition in Canada and Mexico.

(2) The President shall use his best efforts to enter into international agreements with the governments of Canada and Mexico to provide for effective compliance with reliability standards and the effectiveness of the electric reliability organization in the United States and Canada or Mexico.

(h) Reliability Reports.—The electric reliability organization shall, on a periodic basis, make available to the public reports on the extent that section 5 applies to unfair trade practices.

(1) The term ‘liability standard’ means an electric utility company in the United States, as long as such action is not inconsistent with any reliability standard.

(2) Within 90 days of the application of the electric reliability organization or other affected party, and after notice and opportunity for comment, the Commission shall issue a final order determining whether a state action is just, reasonable, not unduly discriminatory or preferential, and in the public interest and any other responsibilities requested by the Commission. The Commission may give deference to the advice of the Commission regarding the governance of an existing or proposed regional reliability entity within the same region, or whether fees proposed to be assessed within the region are just, reasonable, not unduly discriminatory or preferential, and in the public interest and any other responsibilities requested by the Commission. The Commission shall have authority to develop and enforce a reliability standard, taking into consideration any recommendation by the Commission.

(3) The term ‘affiliate’ of a company means any company, 5 percent or more of the outstanding voting securities of which are owned, controlled, or held with power to vote, directly or indirectly, by such company.

(4) The term ‘associate company’ of a company means a corporation, partnership, association, joint stock company, business trust, or any organized group of persons, whether incorporated or not, or a receiver, trustee, or other liquidating agent of any of the foregoing.

(5) The term ‘electric utility company’ means any company that owns or operates facilities for the transmission, distribution, or sale of electric energy for sale.

(6) The term ‘holding company’ means a company or holding company system with such company.

(7) The term ‘gas utility company’ means any company that owns or operates facilities for the transmission or distribution of natural gas for resale within the State, as long as such action is not inconsistent with any reliability standard.

(8) The term ‘gas utility company’ means any company that owns or operates facilities for the transmission or distribution of natural gas for sale.

(9) The term ‘holding company system’ means a holding company, together with its subsidiary companies.

(10) The term ‘jurisdictional rates’ means rates established by the Commission for the transmission of electric energy in interstate commerce, the sale of electric energy at wholesale in interstate commerce, the sale of natural gas in interstate commerce, and the sale in interstate commerce of natural gas for resale for ultimate public utility customers, and includes both commercial and industrial, or any other use.

(11) The term ‘natural gas company’ means any person engaged in the transmission or resale of natural gas in interstate commerce or the sale of such gas in interstate commerce for resale.

(12) The term ‘person’ means an individual or company.

(13) The term ‘public utility’ means any person who owns or operates facilities used for the transmission of electric energy in interstate commerce or sales of electric energy at wholesale in interstate commerce.

(14) The term ‘utility company’ means any electric utility company or a gas utility company.

(15) The term ‘State commission’ means any commission, board, agency, or officer, by whatever name designated, in a municipality, or other political subdivision of a State that, under the laws of such State, has jurisdiction to regulate utility companies.

(16) The term ‘subsidiary company’ of a holding company means—

(A) any company, 10 percent or more of the outstanding voting securities of which are directly or indirectly owned, controlled, or held with power to vote, by such holding company and

(B) any person, the management or policies of which the Commission, after notice and opportunity for hearing, determines to be subject to a controlling influence, directly or indirectly, by such holding company (other alone or pursuant to an arrangement or understanding with one or more other persons) so as to make it necessary or appropriate for the rate protection of utility customers with respect to rates such person be subject to the obligations, duties, and liabilities imposed by this subtitle upon subsidiary companies of holding companies.

(17) The term ‘voting security’ means any security presently entitling the owner thereof to vote or to participate in the management of the affairs of a company.

SEC. 211. REPEAL OF THE PUBLIC UTILITY HOLDING COMPANY ACT OF 1935.

SEC. 212. FEDERAL ACCESS TO BOOKS AND RECORDS.

(a) In General.—Each holding company and each associate company thereof shall maintain, and shall make available to the Commission, such books, accounts, memoranda, and other records as the Commission deems to be relevant to costs incurred by a public utility or natural gas company that is an associate company of such holding company and necessary or appropriate for the protection of utility customers with respect to rates such person be subject to the obligations, duties, and liabilities imposed by this subtitle upon holding companies.

(b) Affiliates Companies.—Each affiliate of a holding company or any subsidiary company of a holding company shall maintain, and shall make available to the Commission, such books, accounts, memoranda, and other records as the Commission deems to be relevant to costs incurred by such holding company or any subsidiary company of a holding company shall maintain, and shall make available to the Commission, such books, accounts, memoranda, and other records as the Commission deems to be relevant to costs incurred
by a public utility or natural gas company that is an associate company of such holding company and necessary or appropriate for the protection of utility customers with respect to jurisdictional rates.

(c) HOLDING COMPANY SYSTEMS.—The Commission may examine the books, accounts, memoranda, and other records of any company, holding company system, or any affiliate thereof, as the Commission deems to be relevant to costs incurred by a public utility or natural gas company within such holding company system and necessary or appropriate for the protection of utility customers with respect to jurisdictional rates.

(d) CONFIDENTIALITY.—No member, officer, or employee of the Commission shall divulge any fact or information that may come to his or her knowledge during the course of examination of books, accounts, memoranda, or other records as provided in this section, except as may be directed by the Commission or by a court of competent jurisdiction.

SEC. 213. STATE ACCESS TO BOOKS AND RECORDS.

(a) IN GENERAL.—Upon the written request of a State commission having jurisdiction to regulate a public utility company in a holding company system, the holding company or any associate company or affiliate thereof, other than such public utility company, shall produce for inspection books, accounts, memoranda, and other records that—

(1) have been identified in reasonable detail by the State commission;

(2) the State commission deems relevant to costs incurred by such public utility company; and

(3) are necessary for the effective discharge of the responsibilities of the State commission with respect to such proceeding.

(b) LIMITATION.—Subsection (a) does not apply to a person that is a holding company solely by reason of ownership of one or more qualifying facilities under the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2601 et seq.).

(c) CONFIDENTIALITY OF INFORMATION.—The production of books, accounts, memoranda, and other records under subsection (a) shall be subject to such terms and conditions as may be necessary and appropriate to safeguard against unwarranted disclosure to the public of any trade secrets or sensitive commercial information.

(d) EFFECT ON STATE LAW.—Nothing in this section shall preempt applicable State law concerning the provision of books, accounts, memoranda, and other records under any other Federal law, contract, or otherwise.

(e) COURT JURISDICTION.—Any United States district court located in the State in which the State commission referred to in subsection (a) is located shall have jurisdiction to enforce compliance with this section.

SEC. 214. EXEMPTION AUTHORITY.

(a) RULEMAKING.—Not later than 90 days after the effective date of this subtitle, the Commission shall promulgate a final rule to exempt from the requirements of section 224 any person that is a holding company, solely with respect to—

(1) qualifying facilities under the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2601 et seq.);

(2) exempt wholesale generators; or

(3) foreign utility companies.

(b) OTHER AUTHORITY.—The Commission shall exempt a person or transaction from the requirements of section 224, if such application or upon the motion of the Commission—

(1) the Commission finds that the books, accounts, memoranda, and other records of any person are not relevant to the jurisdictional rates of a public utility or natural gas company; or

(2) the Commission finds that any class of transactions is not relevant to the jurisdictional rates of a public utility or natural gas company.

SEC. 215. AFFILIATE TRANSACTIONS.

(a) COMMISSION AUTHORITY UNAFFECTED.—Nothing in this subtitle shall limit the authority of the Commission under the Federal Power Act (16 U.S.C. 791a et seq.) to require that jurisdictional rates are just and reasonable, including the ability to deny or approve the pass through of costs of cross-subsidization, and the promulgation of such rules and regulations as are necessary or appropriate for the protection of utility consumers.

(b) RECOVERY OF COSTS.—Nothing in this subtitle shall preclude the Commission or a State commission from exercising its jurisdiction under otherwise applicable law to determine whether a public utility company, public utility, or natural gas company may recover in rates any costs of an activity performed by an affiliate company, or any costs of goods or services acquired by such public utility company from an associate company.

SEC. 216. APPLICABILITY.

Except as otherwise specifically provided in this subtitle, no provision of this subtitle shall apply to, or be deemed to include—

(1) the United States;

(2) a State or any political subdivision of a State;

(3) any foreign governmental authority not operating in the United States;

(4) any agency, authority, or instrumentality of any entity referred to in paragraph (1), (2), or (3);

(5) any officer, agent, or employee of any entity referred to in paragraph (1), (2), or (3) acting as such in the course of his or her official duty;

SEC. 217. EFFECT ON OTHER REGULATIONS.

Nothing in this subtitle precludes the Commission or a State commission from exercising its jurisdiction under otherwise applicable law to protect utility customers.

SEC. 218. ENFORCEMENT.

The Commission shall have the same powers as are set forth in sections 306 through 317 of the Federal Power Act (16 U.S.C. 825e-625p) to enforce the provisions of this subtitle.

SEC. 219. SAVINGS PROVISIONS.

(a) IN GENERAL.—Nothing in this subtitle prohibits a person from engaging in or continuing to engage in activities or transactions in which it is legally engaged or authorized to engage on the effective date of this subtitle.

(b) EFFECT ON OTHER COMMISSION AUTHORITY.—Nothing in this subtitle limits the authority of the Commission under the Federal Power Act (16 U.S.C. 791a et seq.) (including section 301 of that Act) or the Natural Gas Act (15 U.S.C. 717 et seq.) (including section 8 of that Act).

SEC. 220. IMPLEMENTATION.

Not later than 18 months after the date of enactment of this subtitle, the Commission shall—

(1) promulgate such regulations as may be necessary or appropriate to implement this subtitle (other than section 225); and

(2) submit to the Congress detailed recommendations on technical and conforming amendments to Federal law necessary to carry out this subtitle and the amendments made by this subtitle.

SEC. 221. TRANSFER OF RESOURCES.

All books and records that relate primarily to the functions transferred to the Commission under this subtitle shall be transferred from the Securities and Exchange Commission to the Commission.

SEC. 222. INTER-AGENCY REVIEW OF COMPETITION IN THE WHOLESALE AND RETAIL MARKETS FOR ELECTRIC ENERGY.

(a) TASK FORCE.—There is established an inter-agency task force, to be known as the "Electric Energy Market Competition Task Force" (referred to in this section as the "task force"), which shall consist of—

(1) 1 member each from—

(A) the Department of Justice, to be appointed by the Attorney General of the United States;

(B) the Federal Energy Regulatory Commission, to be appointed by the chairperson of that Commission; and

(C) the Federal Trade Commission, to be appointed by the chairperson of that Commission;

(2) 2 advisory members (who shall not vote) of whom—

(A) 1 shall be appointed by the Secretary of Agriculture to represent the Rural Utility Service; and

(B) 1 shall be appointed by the Chairman of the Securities and Exchange Commission to represent that Commission.

(b) STUDY AND REPORT.—(1) STUDY.—The task force shall perform a study and analysis of the protection and promotion of competition within the wholesale and retail market for electric energy in the United States.

(2) REPORT.—

(A) FINAL REPORT.—Not later than 1 year after the effective date of this subtitle, the task force shall submit a final report of its findings under paragraph (1) to the Congress.

(B) PUBLIC COMMENT.—At least 60 days before submission of a final report to the Congress under subparagraph (A), the task force shall publish a draft report in the Federal Register to provide for public comment.

(c) Terms.—The study required by this section shall examine—

(1) the best means of protecting competition within the wholesale and retail electric market;

(2) activities within the wholesale and retail electric market that may allow unfair and unjustified discriminatory and deceptive practices;

(3) activities within the wholesale and retail electric market, including mergers and acquisitions, that deny market access or suppress competition;

(4) cross-subsidization that may occur between regulated and nonregulated activities; and

(5) the role of State public utility commissions in regulating competition in the wholesale and retail electric market.

(d) CONSULTATION.—In performing the study required by this section, the task force shall consult with and solicit comments from its advisory members, the States, representatives of the electric power industry, and the public.

SEC. 223. GAO STUDY ON IMPLEMENTATION.

(a) STUDY.—The Comptroller General shall conduct a study of the success of the Federal Government and the States during the 18-month period following the effective date of this subtitle in—

(1) preventing all anticompetitive practices and other abuses by public utility holding companies, including cross-subsidization and other market power abuses; and

(2) the promotion of competition and efficient energy markets to the benefit of consumers.

(b) REPORT TO CONGRESS.—Not earlier than 18 months after the effective date of this subtitle or later than 24 months after
that effective date, the Comptroller General shall submit a report to the Congress on the results of the study conducted under subsection (a), including probable causes of its findings and recommendations to the Congress and the States for any necessary legislative changes.

SEC. 223. EFFECTIVE DATE.

"(a) A subtitle on which the United States shall take effect 18 months after the date of enactment of this subtitle.

SEC. 227. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated such funds as may be necessary to carry out this subtitle.

SEC. 225. CONFORMING AMENDMENTS TO THE FEDERAL POWER ACT.

"(a) Section 318 of the Federal Power Act (16 U.S.C. 796s) is amended by striking ‘‘1935’’ and inserting ‘‘2002’’.

"(c) Section 213 of the Federal Power Act (16 U.S.C. 796m) is amended by striking ‘‘1935’’ and inserting ‘‘2002’’.

Subtitle C—Amendments to the Public Utility Regulatory Policies Act of 1978

SEC. 244. CONSTRUCTION AND SMALL POWER PRODUCTION PURCHASE AND SALE REQUIREMENTS.

"(a) TERMINATION OF MANDATORY PURCHASE AND SALE REQUIREMENTS.—Section 230 of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 722b) is amended by adding at the end the following:

"(m) TERMINATION OF MANDATORY PURCHASE AND SALE REQUIREMENTS.—

"(1) In general.—After the date of enactment of this section, no utility shall be required to enter into a new contract or obligation to purchase or sell electric energy under this section.

"(2) Existing rights and remedies.—Nothing in this subsection affects the rights or remedies of any party with respect to the purchase or sale of electric energy or capacity from or to a facility under this section under any contract or obligation to purchase or sell electric energy or capacity on the date of enactment of this subsection, including—

"(A) the right to recover costs of purchasing such electric energy or capacity; and

"(B) in States without competition for retail electric service, the obligation of a utility to provide, at just and reasonable rates for consumption by a qualifying small power production facility or a qualifying cogeneration facility, backup, standby, and maintenance power.

"(3) Recovery of costs.—

"(A) REGULATORY REMEDIES.—A regulation entered under subparagraph (A) shall be enforceable in accordance with the provisions of law applicable to enforcement of regulations under the Federal Power Act (16 U.S.C. 791 et seq.).

"(B) ELIMINATION OF OWNERSHIP LIMITATION.—

"(1) Section 317(C) of the Federal Power Act (16 U.S.C. 796c(17)(C)) is amended to read as follows:

"(2) Qualifying small power production facility' means a small power production facility that cannot determine, by rule, meets such requirements (including requirements respecting minimum size, fuel use, and fuel efficiency) as the Commission may, by rule, prescribe.’

"(2) Section 3(18)(B) of the Federal Power Act (16 U.S.C. 796s(18)(B)) is amended to read as follows:

"(B) ‘‘qualifying cogeneration facility’ means a cogeneration facility that the commission determines, by rule, meets such requirements (including requirements respecting minimum size, fuel use, and fuel efficiency) as the Commission may, by rule, prescribe.’

SA 3028. Mr. LOTT proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize the use of energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; as follows:

At the appropriate place, add the following:

"SEC. 2. FAIR TREATMENT OF PRESIDENTIAL JUDICIAL NOMINEES.

(a) FINDINGS.—The Senate finds that—

(1) The Senate Judiciary Committee’s pace in acting on judicial nominees thus far in this Congress has caused the number of judges confirmed by the Senate to fall below the number of nominees received during the same period, such that the 67 judicial vacancies that existed when Congress adjourned under President Clinton’s last term in office in 2000 have now grown to 96 judicial vacancies, which represents an increase from 7.9 percent to 11 percent in the total number of Federal judgeships that are currently vacant;

(2) thirty one of the 96 current judicial vacancies are on the United States Courts of Appeals, representing a 17.3 percent vacancy rate for such seats;

(3) seventeen of the 31 vacancies on the Courts of Appeals have been declared ‘‘judicial emergencies’’ by the Administrative Office of the U.S. Courts;

(4) during the first 2 years of President Reagan’s first term, 19 of the 20 circuit court circuit law nominations that he submitted to the Senate were confirmed; and during the first 2 years of President George H. W. Bush’s term, 22 of the 23 circuit court circuit law nominations that he submitted to the Senate were confirmed; and during the first 2 years of President Clinton’s first term, 19 of the 22 circuit court circuit law nominations that he submitted to the Senate were confirmed;

(5) only 7 of President George W. Bush’s 29 circuit court court circuit law nominees have been confirmed to date, representing just 24 percent of such nominations submitted to the Senate.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that, in the interests of the administration of justice, the Senate Judiciary Committee shall hold hearings on the nominations submitted by the President on May 9, 2001, and May 9, 2002.

SA 3029. Mr. REID (for Mr. ALLARD) proposed an amendment to the bill S. 1372, to reauthorize the Export-Import Bank of the United States, as follows:

At the end of the bill, add the following:

SEC. 7. INVESTIGATIONS OF THE EXPORT-IMPORT BANK.

(a) ESTABLISHMENT OF POSITION.—Section 11 of the Inspector General Act of 1978 (5 U.S.C. App. 11) is amended—

(1) in paragraph (1), by striking ‘‘or the Board of Directors of the Tennessee Valley Authority,’’ and inserting ‘‘or the Board of Directors of the Tennessee Valley Authority; or the President of the Export-Import Bank;’’; and

(2) in paragraph (2), by striking ‘‘or the Tennessee Valley Authority;’’ and inserting ‘‘the Tennessee Valley Authority, or the Export-Import Bank.’’

(b) SPECIAL PROVISIONS.—The Inspector General Act of 1978 is amended—

(1) by redesignating section 8 as section 8J and inserting after section 8H the following:

"SA 8J. Special Provisions Relating to the Export-Import Bank of the United States

“(a) IN GENERAL.—The Inspector General of the Export-Import Bank shall not prevent or inhibit the Audit Committee from initiating, carrying out, or completing any audit or investigation or undertaking any other activities in the performance of the duties and responsibilities of the Audit Committee, including auditing the financial statements of the Export-Import Bank, determining when it is appropriate to use independent external auditors, and selecting independent external auditors. In carrying out the duties and responsibilities of Inspector General, the Inspector General of the Export-Import Bank shall not be prevented or prohibited from initiating, carrying out, or completing any audit or investigation, or from issuing any subpoena during the course of any audit or investigation. The Audit Committee shall make available to the Inspector General of the Export-Import Bank the reports of all audits the Committee undertakes in the discharge of its duties and responsibilities.

“(b) AUDIT COMMITTEE.—For purposes of this section, the term ‘Audit Committee’ means the Audit Committee of the Board of Directors of the Export-Import Bank or any successor thereof;’’

(2) by adding the following to section 8J of S. 2917:

"SEC. 22. EFFECTIVE DATE.

"(a) Section 3 of this Act (and any amendments thereto) shall be effective on and after October 1, 2002.

Mr. SCHUMER submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize the use of energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; as follows:

Beginning on page 186, strike line 9 and all that follows through page 205, line 8. On page 236, strike lines 7 through 9 and insert the following:

"(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on October 1, 2002.

SA 3030. Mr. SCHUMER submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize the use of energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to be on the table; as follows:

At the end of this Act, add the following:

"(2) In paragraph (2), by striking ‘‘or the Tennessee Valley Authority;’’ and inserting ‘‘the Tennessee Valley Authority, or the Export-Import Bank.’’

At the end of this section, add the following:

"SEC. 7. INVESTIGATIONS OF THE EXPORT-IMPORT BANK.

(a) ESTABLISHMENT OF POSITION.—Section 11 of the Inspector General Act of 1978 (5 U.S.C. App. 11) is amended—

(1) in paragraph (1), by striking ‘‘or the Board of Directors of the Tennessee Valley Authority,’’ and inserting ‘‘or the Board of Directors of the Tennessee Valley Authority; or the President of the Export-Import Bank;’’; and

(2) in paragraph (2), by striking ‘‘or the Tennessee Valley Authority;’’ and inserting ‘‘the Tennessee Valley Authority, or the Export-Import Bank.’’
(2) by inserting after subsection (n) the following: ‘‘(o) ANALYSES OF MOTOR VEHICLE FUEL CHANGES.—

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Thursday, March 14, 2002, at 9:30 a.m., in open session, to receive testimony on the atomic energy defense activities of the Department of Energy, in review of the Defense authorization request for fiscal year 2003.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on Thursday, March 14, 2002, at 10 a.m., to conduct an overheard hearing on ‘‘Accounting and Investor Protection Issues Raised by Enron and Other Public Companies: Oversight of the Accounting Profession, Audit Quality and Independence, and Formulation of Accounting Principles.’’

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on Thursday, March 14, 2002, at 3 p.m., to conduct a hearing on the nominations of the Honorable Joann Johnson, of Iowa, to be a member of the National Credit Union Administration Board; and Ms. Deborah Matz, of New York, to be a member of the National Credit Union Administration Board.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet on S. 1991, National Defense Interstate Rail Act on Thursday, March 14, 2002, at 9:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FINANCE

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on Thursday, March 14, 2002, at 10 a.m., to hear testimony on ‘‘Reimbursement and Access to Prescription Drugs Under Medicare Part B.’’

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, March 14, 2002, at 2 p.m., to hold a nomination hearing.

Agenda

Nominees: The Honorable Richard M. Miles, of South Carolina, to be Ambassador to Georgia; the Honorable James W. Pardee, of Arkansas, to be Ambassador to the Republic of Bulgaria; Mr. Peter Terpeluk, Jr., of Pennsylvania, to be Ambassador at Large; and Mr. Lawrence E. Butler, of Maine, to be Ambassador to The Former Yugoslav Republic Macedonia.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON HEALTH, EDUCATION, LABOR, AND PENSIONS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Health, Education, Labor, and Pensions be authorized to meet for a hearing on ‘‘The Future of American Steel: Ensuring the Viability of the Industry and the Health Care and Retirement Security for Its Workers,’’ during the session of the Senate on Thursday, March 14, 2002, at 2:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON INDIAN AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Indian Affairs be authorized to meet on Thursday, March 14, 2002, at 10 a.m., in room 405 of the Russell Senate Office Building, to conduct an oversight hearing on the President’s budget request for Indian programs for fiscal year 2003.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. REID. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet to conduct a hearing on ‘‘Competition, Innovation, and Public Policy in the Digital Age: Is the Marketplace Working To Protect Digital Creative Works?’’ on Thursday, March 14, 2002, in Dirksen Room 106, at 10 a.m.

Witness List: Mr. Richard D. Parsons, CEO Designate, AOL Time Warner, Inc.; Dr. Craig R. Barrett, President and CEO, Intel Corporation; Mr. Jonathan Taplin, CEO, Intertainer; Mr. Joe Kraus, Founder, Excite.com and DigitalConsumer.org; and Mr. Justin Hughes, Professor, UCLA Law School.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. REID. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet to conduct a markup on Thursday, March 14, 2002, at 2 p.m., in Dirksen Room 106.

Tentative Agenda

I. Nominations

Charles W. Pickering, Sr. to be U.S. Circuit Court Judge for the 5th Circuit.
To be United States Attorney: Jane J. Boyle for the Northern District of Texas; Matthew D. Orwig for the Eastern District of Texas; and Michael Taylor Shelby for the Southern District of Texas.

II. Bills

S. 1356. The Wartime Treatment of European Americans and Refugees Act. [Feingold/Grassley/Kennedy]

III. Resolutions

S. Res. 207. A Resolution to Designate March 31, 2002 as “National Civilian Conservation Corps Day’’. [Bingaman]
S. Res. 206. A resolution designating the week of March 17 through March 23, 2002 as “National Inventors and Poison Prevention Week”. [Murkowski]
S. Res. 221. A resolution to commemorate and acknowledge the dedication and sacrifice made by the men and women who have lost their lives while serving as law enforcement officers. [Campbell]

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON VETERAN’S AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Veterans’ Affairs be authorized to meet during the session of the Senate on Thursday, March 14, 2002, at 10 a.m., for a joint hearing with the House of Representatives’ Committee on Veterans Affairs, to hear the legislative presentations of the Gold Star Wives of America, the Fleet Reserve Association, the Air Force Sergeants Association, and the Retired Enlisted Association. The hearing will take place in room 345 of the Cannon House Office Building.

I also ask unanimous consent that the Committee on Veterans’ Affairs be authorized to meet during the session of the Senate on Thursday, March 14, 2002, at 2 p.m., for a hearing on the nominations of Robert H. Roswell to be Under Secretary for Health of the Department of Veterans Affairs and Daniel L. Cooper to be Under Secretary for Benefits of the Department of Veterans Affairs. The hearing will take place in room 418 of the Russell Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL COMMITTEE ON AGING

Mr. REID. Mr. President, I ask unanimous consent that the Special Committee on Aging be authorized to meet on Thursday, March 14, 2002, from 9:30 a.m. to 2 p.m., in Dirksen 268 for the purpose of conducting a hearing.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON AIRLAND

Mr. REID. Mr. President, I ask unanimous consent that the Subcommittee...
on Airland of the Committee on Armed Services be authorized to meet during the session of the Senate on Thursday, March 14, 2002, at 2:30 p.m. in open session to receive testimony on Army Modernization and Transformation, in review of the Defense authorization requests for fiscal year 2003.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGES OF THE FLOOR

Mr. THOMAS. Madam President, I ask unanimous consent that Cindy Haverish, be granted the privilege of the floor for today.

Mr. DAYTON. Mr. President, I ask unanimous consent that my staff, Jennifer Havrish, be granted the privilege of the floor during consideration of amendment No. 3008.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WYDEN. Mr. President, I also ask unanimous consent that Bethell Che, a fellow in my office, to be granted access to the Senate floor for the consideration of the energy bill.

Mr. DURBIN. Mr. President, I ask unanimous consent that floor privileges be granted to Christopher Reed, a detail to the Senate in my Judiciary Committee staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

JOINT REFERRAL OF S. 2018

Mr. REID. Mr. President, I ask unanimous consent that S. 2018, the "Tuf Sur Bein Preservation Trust Act", be joinedly referred to the Committee on Energy and Natural Resources and Indian Affairs; that if one committee reports the bill, the other committee shall have 20 calendar days for review, excluding any period where the Senate is not in session for more than 3 days; provided further that if the second committee fails to report the measure within a 20-day period, then that committee is automatically discharged and the measure is placed on the Senate Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

DISTRICT OF COLUMBIA COLLEGE ACCESS IMPROVEMENT ACT OF 2002

Mr. REID. Mr. President, I ask the Chair lay before the Senate a message from the House of Representatives on the bill (H.R. 1999) to amend the District of Columbia College Access Act of 1999 to permit individuals who enroll in an institution of higher education more than 3 years after graduating from a secondary school and individuals who attend private historically black colleges and universities nationwide to participate in the tuition assistance programs under such Act, and for other purposes.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Reference: Senate concurrent resolution S.J. Res. 1, of 2002.

The PRESIDING OFFICER. Without objection, it is so ordered.

SEC. 3. PRIVATE SCHOOL PROGRAM.

Section 3(c)(1)(B) of the District of Columbia College Access Act of 1999 (sec. 38-2704(c)(1)(B), D.C. Official Code) is amended by striking the "'The campus of which is located in the State of Maryland or the Commonwealth of Virginia'",

SEC. 4. GENERAL REQUIREMENTS.

(1) by striking subsection (b) and inserting the following:

"(B) ADMINISTRATIVE EXPENSES.—

"(1) IN GENERAL.—The Mayor of the District of Columbia may not use more than 7 percent of the total amount of Federal funds appropriated to carry out the program, retroactive to the date of enactment of this Act (the District of Columbia College Access Act of 1999), for the administrative expenses of the programs.

"(2) DEFINITION.—In this subsection, the term 'administrative expenses' means any expenses that are not directly used to pay the cost of tuition and fees for eligible students to attend eligible institutions; and

(2) by redesignating subsections (c) and (f) as subsections (j) and (k); and

(3) by inserting after subsection (d) the following:

"(e) LOCAL FUNDS.—It is the sense of Congress that the District of Columbia may appropriate such local funds as necessary for the programs under sections 3 and 5.

"(f) USE OF FUNDS.—Amounts in the dedicated account shall be used solely to carry out the programs under sections 3 and 5.

"(g) END OF FISCAL YEAR.—The District of Columbia government shall establish a dedicated account for the programs under sections 3 and 5 consisting of the following amounts:

(1) The Federal funds appropriated to carry out such programs under this Act or any other Act;

(2) Any District of Columbia funds appropriated by the District of Columbia to carry out such programs.

"(h) Any unobligated balances in amounts made available for such programs in previous fiscal years;

"(i) Interest earned on balances of the dedicated account.

"(j) USE OF FUNDS.—Amounts in the dedicated account shall be used solely to carry out the programs under sections 3 and 5.

SEC. 5. CONTINUATION OF CURRENT AGGREGATE LEVEL OF AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—The District of Columbia College Access Act of 1999 (sec. 38-2701 et seq., D.C. Official Code) is amended by striking ''and such sums'' and in-
The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENDING AUTHORITY OF EXPORT-IMPORT BANK

Mr. REID. Mr. President, I ask unanimous consent that the Senate now proceed to S. 1920 introduced earlier today by Senator SARBANES.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1920) to extend the authority of the Export-Import Bank until April 30, 2002.

There being no objection, the Senate proceeded to consider the bill.

Mr. REID. Mr. President, I ask unanimous consent that the bill be read three times, passed, and the motion to reconsider be laid on the table, without intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 1920) was read the third time and passed, as follows:

S. 1920

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. EXTENSION OF EXPORT-IMPORT BANK.

Notwithstanding the dates specified in section 7 of the Export-Import Bank Act of 1945 (12 U.S.C. 635f) and section 1(c) of Public Law 101-428, the Export-Import Bank of the United States shall continue to exercise its functions in connection with and in furtherance of its objects and purposes through April 30, 2002.

The legislative clerk read as follows:

A bill (S. 1920) to reauthorize the Export-Import Bank of the United States.

There being no objection, the Senate proceeded to consider the bill.

Mr. SARBANES. Mr. President, I rise in support of S. 1920, the Export-Import Bank Reauthorization Act. This legislation, which was reported out of the Committee on Banking, Housing, and Urban Affairs by a 21-0 vote in the Banking Committee in support of this legislation. I would like to thank Senator BAYH, Chairman of the International Trade and Finance Subcommittee, and Senators HARKIN and a member of the Senate, for their strong support and leadership on this legislation. I would also like to thank Senator GRAMM, the Ranking Member of the Banking Committee, for his cooperation in moving this important legislation forward.

There are four key issues addressed in this legislation: the term of the reauthorization of the Ex-Im Bank; the competitive challenge posed to the Ex-Im Bank and foreign market windows; Ex-Im Bank financing for small business; and the collection of information on the activities of foreign export credit agencies as part of the Ex-Im Bank’s annual report. Following is a brief discussion of these issues, as well as a discussion of a amendment that will be offered on the floor by Senator ALLARD to establish an Inspector General for the Eximbank.

The legislation intentionally provided an authorization until September 30, 2006 in order to take the reauthorization of the Ex-Im Bank out of the Presidential election cycle. When the reauthorization of the Ex-Im Bank falls in the first year of a President’s term, it runs the risk that a new President will be taking office, as occurred last year. In that case, a new administration must struggle not only to put in place a new Chairman of the Ex-Im Bank but also cope with providing leverage for the reauthorization of the Ex-Im Bank as well. The Banking Committee believed that it makes more sense to put the reauthorization of the Ex-Im Bank in the second year of a President’s term to assure that a new official export credit agency has been put in place and has been on the job with sufficient time to provide leadership for the reauthorization of the Bank.

The second issue addressed in the legislation is the competitive challenge to the Ex-Im Bank posed by foreign market windows. In hearings held in the International Trade and Finance Subcommittee last year, witnesses from industry, academia, and the Administration commented on the growing challenges to U.S. exporters posed by foreign market windows. Market windows are government-sponsored enterprises (for example, government-owned or directed financial institutions) which provide export financing at below market rates. However, the foreign governments—notably Germany and Canada—which support them claim that these enterprises are not an unfair export advantage, and thus not subject to the disciplines of the OECD Arrangement. Currently, two government entities operate very active market windows. They are the German market window KfW and the Canadian market window, the Export Development Corporation (EDC). The result is that these foreign market windows can provide subsidized export financing outside the OECD Arrangement and give their exporters a competitive advantage over U.S. exporters. Also, because the foreign market windows are not subject to the OECD disciplines, there is often a transpareny problem—it is difficult to find out the terms of the financing they provide.

The Ex-Im Bank Act currently authorizes the Ex-Im Bank to “provide guarantees, insurance, and extensions of credit at rates and on terms and other conditions which are fully competitive with the Government-supported enterprises, the Ex-Im Bank and foreign market windows; the Ex-Im Bank financing for small business; and the collection of information on the activities of foreign export credit agencies as part of the Ex-Im Bank’s annual report. Following is a brief discussion of these issues, as well as a discussion of a amendment that will be offered on the floor by Senator ALLARD to establish an Inspector General for the Eximbusk.

The legislation intentionally provided an authorization until September 30, 2006 in order to take the reauthorization of the Ex-Im Bank out of the Presidential election cycle. When the reauthorization of the Ex-Im Bank
the foreign market windows of U.S. concern about their operations.

As a result, the legislation contains two provisions which address market windows. The first provision directs the executive branch to seek increased transparency in the activity of market windows in the OECD Export Credit Arrangement. If it is determined that market windows are disadvantage U.S. exporters, the U.S. would be directed to seek negotiations in the OECD for multilateral disciplines and transparency for market windows.

The second provision authorizes the Ex-Im Bank to provide financing on terms and conditions that are inconsistent with those permitted under the OECD Export Credit Arrangement to match financing terms and conditions that are being offered by market windows if such matching advances negotiations for multilateral disciplines and transparency within the OECD, or when market windows are being offered on terms that are more favorable than available from private financial markets. Ex-Im Bank could also match market window financing when the market window refuses to provide increased transparency to permit Ex-Im Bank to determine the terms and conditions of the market window financing. The Banking Committee believed that it was very important to make clear that EximBank has the authority to match market windows financing in order to allow U.S. exporters to compete on a level playing field, and to direct the executive branch to seek negotiations in the OECD for multilateral disciplines and transparency for market windows.

The third provision supports small business financing by the EximBank. The Banking Committee strongly supported the Ex-Im Bank’s efforts to provide financing for small business. The Ex-Im Bank Act currently requires that “to the maximum extent practicable, the Ex-Im Bank shall make available, from the aggregate loan, guarantee, and insurance authority available to it, an amount to finance exports directly by small business concerns which shall not be less than 10 percent of such authority for each fiscal year.”

The legislation increases the requirements to 18 percent. According to the Ex-Im Bank, in FY 2000 small business comprised 18 percent of the total value of all Ex-Im Bank financing authorizations and 86 percent of all transactions supported by Ex-Im Bank. In FY 1999 these numbers were 16 percent and 86 percent respectively. In FY 1998 they were 21 percent and 85 percent respectively.

The Banking Committee believed that the requirement for Ex-Im Bank small business financing could reasonably be raised to a level of 18 percent without causing disruption to Ex-Im Bank’s lending programs. Ex-Im Bank must maintain a “market level,” as it has in the past, but the Committee was concerned the requiring a higher level could have the unwanted effect of tying up available Ex-Im Bank resources if the Ex-Im Bank could not achieve higher levels of small business financing in a given year.

The legislation makes a number of changes to Ex-Im Bank reporting requirements to ensure more timely and complete reporting of the activities of foreign export credit agencies.

The legislation requires the Ex-Im Bank to submit its annual competitiveness report to Congress not later than June 30 of each year. Currently, the annual competitiveness report comes to the Banking Committee in late summer/early autumn, too late to be used for any oversight or legislation in any given year. Also, with the current submission date, the Advisory Committee’s annual recommendations, completed in December each year, are 8 to 9 months old. Finally, by moving the reporting date to June 30, the Ex-Im Bank will have ample time to include data on other export credit agencies, in light of the fact that the Bank’s reports on global export credit agency activity come in 45 days after the close of each quarter.

As previously mentioned, the legislation also specifies that the Bank’s annual competitiveness report to Congress must include information on export financing available to foreign competitors through market windows. The legislation also requires the Ex-Im Bank to estimate the annual amount of export financing available from the government and government-related agencies and to include that information in Ex-Im’s annual competitiveness report.

Finally, during the Banking Committee markup on the legislation, Senator Allard offered an amendment that would have established an Inspector General for the Ex-Im Bank. Members of the Banking Committee agreed in principle that Ex-Im Bank could benefit from an Inspector General, but concerns were raised about how an Inspector General provision should be structured. Senator Allard withdrew his amendment with the understanding that an effort would be made to reach an agreement that is acceptable to the members of the Banking Committee.

I believe that S. 1372, the Export-Import Bank Reauthorization Act, is a very balanced piece of legislation which will assure that the Export-Import Bank will be able to provide critically needed export financing to U.S. exporters to compete in foreign markets. I urge my colleagues to support this legislation.

Mr. BAYH. Mr. President, I rise today to offer my support for the charter reauthorization of the Export-Import Bank of the United States. The Export-Import Bank was last reauthorized in 1997, and its charter expired in September of last year.

As Chairman of the Subcommittee on International Trade and Finance, I held two hearings last year in order to craft a bipartisan reauthorization bill that is both helpful to the Bank and to the export community. The present bill, which authorizes the Ex-Im Bank for 5 years, includes a number of important provisions that will help make the Bank more competitive with other export credit agencies.

Among other provisions, this bill requires Ex-Im to submit its Competitiveness Report to the Banking Committee by June 30 and will be more helpful to the Committee to receive that report earlier in order to be able to use its information during the reauthorization. The bill also requires Ex-Im to compile and analyze data regarding market windows and their effects on the Bank’s competitiveness for the annual Competitiveness Report. This will give the Committee a clearer understanding of the amount of market window activity taking place around the world. Finally, the bill requires the Bank to estimate the annual amount of export financing available from the government and government-related agencies and to include that information in Ex-Im’s Competitiveness Report. This provision would essentially require Ex-Im to rank itself against other export credit agencies.

Although the Ex-Im Bank has played an important role in our country’s exports, there have been a few instances in which the Bank has lent its support to exports that have helped foreign companies who are engaged in dumping products into our domestic market. For this reason, I offered an amendment to Bank’s reauthorization that would prohibit the extension of a loan or guarantee to any entity subject to a countervailing or anti-dumping order. I will continue to work with Senator DODD, GRAMM, and HAGEL to develop a compromise version of my amendment that will improve the Ex-Im Bank’s adverse economic impact standards.

I understand that some people who follow the trade model of economic theory, we do not live in a theoretical world. We live in a real world. America is currently suffering from a significant balance of...
trade deficit that will undoubtedly have an impact on our currency and overall economic health in years to come. It is essential that we work to provide a level playing field for American companies, particularly at a time when many of our foreign competitors receive financial support from their export markets. I also urge our competitors to reconsider their support of their exporters from their own governments. If our competitors offer their exporters assistance, so should we.

Since its creation in 1934, the Export-Import Bank of America has contributed to the welfare and well-being of America’s economy. I hope that we will allow the Bank to continue its function, and I encourage my colleagues to support reauthorization of this important organization.

Mr. REID. Mr. President, I understand Senator ALLARD has an amendment at the desk. I ask unanimous consent that the amendment be considered and agreed to, to the motion to reconsider be laid upon the table; that the bill, as amended, be read a third time, passed, and enrolled for action, subject to the President’s objections.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 3029) was agreed to, as follows:

(Purpose: To establish an Inspector General at the Export-Import Bank of the United States)

At the end of the bill, add the following:

SEC. 7. INSPECTOR GENERAL OF THE EXPORT-IMPORT BANK.

(a) ESTABLISHMENT OF POSITION.—Section 11 of the Inspector General Act of 1978 (5 U.S.C. App.) is amended—

(1) in paragraph (1), by striking “or the Board of Directors of the Tennessee Valley Authority;” and inserting “the Board of Directors of the Tennessee Valley Authority, or the President of the Export-Import Bank;”;

and

(2) in paragraph (2), by striking “or the Tennessee Valley Authority;” and inserting “the Tennessee Valley Authority, or the Export-Import Bank.”;

(b) SPECIAL PROVISIONS.—The Inspector General Act of 1978 is amended—

(1) in section 8I as section 8J and inserting after section 8H the following new section:

“§ 81. Special Provisions Relating to the Export-Import Bank of the United States

“(1) IN GENERAL.—The Inspector General of the Export-Import Bank shall not prevent or prohibit the Audit Committee from initiating, carrying out, or completing any audit or investigation of or undertaking any other activities in the performance of the duties and responsibilities of the Audit Committee, including auditing the financial statements of the Export-Import Bank, determining when it is appropriate to use independent external auditors, and selecting independent external auditors. In carrying out the duties and responsibilities of Inspector General, the Inspector General of the Export-Import Bank shall not be prevented or prohibited from initiating, carrying out, or completing any audit or investigation of the Export-Import Bank, determining when it is appropriate to use independent external auditors, and selecting independent external auditors. In carrying out the duties and responsibilities of the Export-Import Bank, the inspector general shall be required to deliver to the Audit Committee a report of all audits of the Bank that are undertaken during the course of any audit or investigation. The Audit Committee shall make available to the Inspector General of the Export-Import Bank the reports of all audits the Committee undertakes in the discharge of its duties and responsibilities.

“(2) REPORTS OF AUDIT COMMITTEE.—For purposes of this section, the term ‘Audit Committee’ means the Audit Committee of the Board of Directors of the Export-Import Bank or any successor thereof. In conducting any audit or investigation, the United States should seek enhanced transparency over the activities of market windows in the OECD Export Credit Arrangement. If such transparency indicates that market windows are disadvantageous to United States exporters, the United States should seek negotiations for multilateral disciplines and transparency within the OECD Export Credit Arrangement.

“The Inspector General is authorized to provide financing on terms and conditions that are consistent with those permitted under the OECD Export Credit Arrangement.

“(1) to match financing terms and conditions that are more favorable than the terms and conditions that are available from private financial markets; and

“(2) when the foreign government-supported institution refuses to provide sufficient transparency to permit the Bank to make a determination under paragraph (1).

IN DEFINITION.—In this term ‘OECD’ means the Organization for Economic Cooperation and Development.”.

SEC. 8. EXPORT-IMPORT BANK.

(a) ESTABLISHMENT OF POSITION.—Section 11 of the Inspector General Act of 1978 (5 U.S.C. App.) is amended—

(1) in paragraph (1), by striking “or the Board of Directors of the Tennessee Valley Authority;” and inserting “the Board of Directors of the Tennessee Valley Authority, or the President of the Export-Import Bank;”;

and

(2) in paragraph (2), by striking “or the Tennessee Valley Authority;” and inserting “the Tennessee Valley Authority, or the Export-Import Bank.”;

(b) SPECIAL PROVISIONS.—The Inspector General Act of 1978 is amended—

(1) by redesignating section 8I as section 8J and inserting after section 8H the following new section:

“§ 8I. Special Provisions Relating to the Export-Import Bank of the United States

“(1) IN GENERAL.—The Inspector General of the Export-Import Bank shall not prevent or prohibit the Audit Committee from initiating, carrying out, or completing any audit or investigation of or undertaking any other activities in the performance of the duties and responsibilities of the Audit Committee, including auditing the financial statements of the Export-Import Bank, determining when it is appropriate to use independent external auditors, and selecting independent external auditors. In carrying out the duties and responsibilities of the Export-Import Bank, the Inspector General of the Export-Import Bank shall not be prevented or prohibited from initiating, carrying out, or completing any audit or investigation, or from issuing any subpoena during the course of any audit or investigation. The Audit Committee shall make available to the Inspector General of the Export-Import Bank the reports of all audits the Committee undertakes in the discharge of its duties and responsibilities.

“(2) AUDIT COMMITTEE.—For purposes of this section, the term ‘Audit Committee’ means the Audit Committee of the Board of Directors of the Export-Import Bank or any successor thereof.”.

Section 8J (as redesignated), by striking “or 8H of this Act” and inserting “8H, or 8I of this Act.”
(c) EXECUTIVE LEVEL IV.—Section 5315 of title 5, United States Code, is amended by inserting after the item relating to the Inspector General of the Environmental Protection Agency the following:

"Inspector General, Export-Import Bank.".

(d) INITIAL IMPLEMENTATION.—Section 9(a)(2) of the Inspector General Act of 1978 is amended by inserting "to the Office of the Inspector General," after "(2)".

(e) TECHNICAL CORRECTIONS.—Section 11 of the Inspector General Act of 1978 is amended—

(1) in paragraph (1)—

(A) by striking the second semicolon after "Community Service";

(B) by striking "and" after "Financial Institutions Fund"; and

(C) by striking "and" after "Trust Corporation";

(2) in paragraph (2), by striking the second comma after "Community Service".

(f) EFFECTIVE DATE.—The amendments made by this section shall take effect on October 1, 2002.

ORDERS FOR FRIDAY, MARCH 15, 2002

Mr. REID. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 9:15 a.m. tomorrow, Friday, March 15; that following the prayer and the pledge, the Journal of the proceedings be approved to date, the morning hour be deemed to have expired, the time for the two leaders be reserved for their use later in the day; that the Senate proceed to executive session to consider Calendar No. 704, and the Senate vote on the nomination, without intervening action or debate; further, that it be in order to request the yeas and nays on the nomination at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. I therefore ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. REID. Mr. President, I ask unanimous consent that following the disposition of the nomination, the motion to reconsider be laid upon the table, any statements thereon appear at the appropriate place in the Record, the President be immediately notified of the Senate’s action, and the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, we certainly appreciate you today for being so courteous and patient and waiting for everybody to complete their work.

My only comment is, after all this debate for several hours today, it is interesting that tomorrow the Senate will be on a judicial nomination.

ADJOURNMENT UNTIL 9:15 A.M. TOMORROW

Mr. REID. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 8:23 p.m., adjourned until Friday, March 15, 2002, at 9:15 a.m.

NOMINATIONS

Executive nominations received by the Senate March 14, 2002:

DEPARTMENT OF AGRICULTURE
Phyllis K. Fong, of Maryland, to be Inspector General, Department of Agriculture, Vice Roger C. Viadero, resigned.

FEDERAL MARITIME COMMISSION
Steven Robert Blust, of Florida, to be a Federal Maritime Commissioner for a term expiring June 30, 2006, Vice Antony M. Merck, term expired.

DEPARTMENT OF LABOR
W. Roy Grizzard, of Virginia, to be an Assistant Secretary of Labor, Vice John Martin Manley, resigned.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES
Evelyn Dee Potter Rose, of Texas, to be a Member of the National Council on the Arts for a term expiring September 3, 2006, Vice Richard J. Stern, term expired.

Celeste Colgan, of Texas, to be a Member of the National Council on the Humanities for a term expiring January 26, 2006, Vice John N. Moline, term expired.

Wilfred M. McClay, of Tennessee, to be a Member of the National Council on the Humanities for a term expiring January 26, 2006, Vice Bill Duke.
EXTENSIONS OF REMARKS

GIRL SCOUTS

HON. LOIS CAPPS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 14, 2002

Mrs. CAPPS. Mr. Speaker, I rise today to commemorate 90 years of Girl Scouting. I am pleased that many of my colleagues have also chosen to celebrate and espouse the accomplishments of this time-honored organization.

Once a Girl Scout myself, I proudly support the cultural, political, social, and economic advancements of the millions of girls across the nation.

Girl Scouts of the USA instills young women and girls with a balanced set of values and varied skills, beneficial to the development of every girl who is often vulnerable during these early stages of growth.

Girl Scouts give girls the opportunity to rise to their full potential and relate positively to others.

In addition, the organization creates a foundation for sound decision-making so that these girls may confront society head on and contribute to it. Not only is Girl Scouting a positive experience for its members, but the organization’s advocacy on the national level in building solid communities enabled the Girl Scouts to create a research institute.

With the help of government funding the Girl Scouts have addressed such issues as violence prevention and the digital divide with activities that encourage girls to pursue careers in science, math, and technology.

In my district, the Girl Scouts of Tres Condados number 15,000 members strong.

I am proud to report that two of these young girls were recently awarded Lifesaving Medals of Honor.

The last time these Girl Scouts medals were awarded was 16 years ago.

Nine-year old Lindsey Papa received the award after saving her brother in a boating accident. While others were trying to free the boy from the boat propeller, Lindsey hit the switch that shut off the engine, saving her brother’s life.

And amazingly, seven-year old Courtney Harmon received the award when she performed the heimlich maneuver on her classmate saving the classmate’s life.

We can undeniably give some credit to the Girl Scouts for training Courtney in First Aid and CPR. Courtney exemplifies how invaluable a First Aid and CPR education can be for children and in schools.

And we can also attribute Lindsey’s ability to make sensible decisions under pressure to her Girl Scout experiences.

The remarkable acts of these two young girls are a testament to the objectives of the Girl Scouts.

There are more than 233,000 troops and groups throughout the United States and Puerto Rico. And over 300 local Girl Scout councils offer the opportunity for Girl Scout membership.

I have always encouraged students—males, and young females especially—to get involved in issues that are of importance to them in their communities.

No other organization provides all girls everywhere with the tools and resources entirely favorable to their upbringing.

Girl Scouts is an outlet accessible to all girls, with links to an endless array of possibilities, expression and creativity.

I know the Girl Scouts of the USA will well outlive this 90-year anniversary and continue to be a positive and significant societal influence for centuries to come.

TRIBUTE TO NORM HOFFMAN

HON. WILLIAM M. THOMAS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 14, 2002

Mr. THOMAS. Mr. Speaker, I rise today to memorialize my friend and former colleague, Norm Hoffman, who was killed in a road accident one year ago today.

Bakersfield suffered a significant loss with the death of Norm Hoffman. Norm was an extraordinary main in many ways, and he left his mark deep on the Bakersfield community. The Bakersfield City Council has officially designated March 16 as Norm Hoffman Day, and this Saturday, Norm will also be honored by the dedication of a memorial on the Bakersfield College campus where he was a beloved teacher to hundreds of students both inside and outside of the classroom.

Norm was a dedicated athlete and fitness enthusiast. He was distinguished early by his athletic ability, but didn’t find his real love, cycling, until later in life. As a college student, Norm was the NCAA champion in the half-mile at Oregon State and only a hamstring injury kept him from competing for a spot on the 1964 Olympic Team. In the 1970’s, Norm took up and excelled at bodybuilding, winning the Mr. Kern County abdominal muscle group award and bulking up to 260 pounds. However, he found his greatest athletic success and enjoyment when he began cycling after age 40.

The list of Norm’s successes in cycling go on and on: four-time national champion in the 40 kilometer time trials; three national and world records; and consideration for a place on the 1988 Olympic time trials team at age 46. The most important of his achievements; however, is also his legacy: a whole generation of local cyclists who were inspired to take up the sport from his example. Norm’s influence on the community is clearly visible. Chances are that most of the many cyclists you’ll see on the bike path on Saturday mornings owe their involvement in the sport to Norm Hoffman.

Norm was a familiar sight to many of us in Bakersfield, as he cycled to and from Bakersfield College greeting his many friends with a wide grin. His determination, vitality, boundless energy and dedication to others are devoutly missed, but despite his absence, Norm continues to serve as an inspiration and as a role model to the many people who knew his indomitable spirit.

GIRL SCOUTS’ 90TH ANNIVERSARY

HON. MAC COLLINS
OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 14, 2002

Mr. COLLINS. Mr. Speaker, ninety years ago, in Savannah, Georgia, Juliette Gordon Low formed an organization for girls. The original Girl Scout troop consisted of 18 girls from the Savannah community. Today, the Girl Scout organization has grown to include more than 3.7 million current members, and more than 50 million girls and women have at one time or another been members of the Girl Scouts of America.

The Girl Scouts of America was recognized by this body in 1950 by a Congressional Charter. Today, they are part of a global family that serves more than 140 nations and has more than 10 million members.

While we all are familiar with Girl Scout Cookies, what many people are not aware of is the diverse make-up of Girl Scout Troops in this nation and around the world. Currently in the United States there are more than 233,000 troops meeting in homes, churches, schools and community centers. Nearly one million adults volunteer serve as leaders to teach girls self-confidence and skills, and to encourage them to think creatively and to act with integrity.

In addition to conventional troops, Girl Scouts meet in detention centers, and group homes. They meet, in homeless shelters, and in migrant farm camps, and some meet via the Internet. The goal is to allow as many girls as possible to develop their full potential; relate positively with others; develop values that provide the foundation for sound decision-making; and to contribute to society.

In a day and age of less-than-positive role models, it is vital that our young people have the opportunity to grow and be influenced by positive mentors, and to learn skills that will help them to be productive and conscientious members of society.

The Girl Scouts have established a research institute, work to address violence prevention, and are encouraging girls to pursue careers in science, math, and technology.

I am proud the Girl Scouts began in my home state. I am proud one of my granddaughters is a Girl Scout. I am proud of the contributions this fine group has made to the nation and to the world. Congratulations to the Girl Scouts of America on their 90th birthday. I wish them many more years of service in the fulfillment of their mission to nurture girls and help them build character and skills for success.
IN RECOGNITION OF NATIONAL PEANUT BUTTER DAY

HON. SAXBY CHAMBLISS
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. CHAMBLISS. Mr. Speaker, today is National Peanut Butter Day—a time to celebrate one of America’s favorite foods. National Peanut Butter Day is part of the month long celebration of National Peanut Month. It offers a time to recognize the nutritional and economic values of peanuts to the state of Georgia. As Georgia ranks number one in the nation in peanut production growing peanuts in 79 countries and 45 percent of all peanuts grown in the United States. The industry has been a mainstay in south Georgia’s economy for over 60 years and continues to benefit our local economy. The eighth congressional district of Georgia is second largest producer of peanuts in the nation.

Not only are peanuts an important part of our economy, but they offer nutritional benefits by providing essential vitamins and minerals. They are an excellent source of the B vitamin folate, which can prevent birth defects and lower the risk of heart disease. One serving of peanuts provides protein, vitamin E, niacin, folate, phosphorus, and magnesium, which can help lower blood pressure and decrease the risk of diabetes in women.

National Peanut Month and Peanut Butter Day provides us the opportunity to recognize the benefits of peanuts as well as the hard work of all the people in the peanut industry. Mr. Chairman, I hope you will join me today in recognizing National Peanut Butter Day and National Peanut Month.

A TRIBUTE TO THE 90TH ANNIVERSARY OF GIRL SCOUTS USA

HON. SAM FARR
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. FARR of California. Mr. Speaker, I rise today to celebrate the 90th anniversary of Girl Scouts USA. For ninety years, Girl Scouts has had a proven track record of empowering girls to become leaders, helping adults be positive role models and mentors for children and helping build solid communities.

When founder Juliette Gordon Low assembled 18 girls ninety years ago she started what would become the largest organization of girls in the world. It was because of her vision, that girls now have access to a forum to develop mentally, spiritually, and physically. Girl Scouts promotes the ideas of fun, friendship and power of girls together. Through experiences such as cultural exchanges, outdoor experiences and community service projects girls learn life skills. They acquire self-confidence and expertise, take on responsibility, are encouraged to think creatively and act with integrity—qualities essential in good citizens and great leaders.

The Girl Scout Mission is “to help all girls grow strong.” I hope we can follow the examples set by the Girl Scouts and remember the great importance of coming together to give back to our communities.

CLEAN DIAMOND TRADE

HON. TONY P. HALL
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. HALL of Ohio. Mr. Speaker, I rise today to update my colleagues on recent progress made in the battle against the scourge of conflict diamonds. The U.S. House of Representatives has been at the forefront of this work, and I am proud of our country’s Clean Diamond Trade Act effort—landmark legislation that would advance this fight. However, this problem requires a broader solution than the United States can implement alone. I am pleased to report that yesterday, the United Nations General Assembly endorsed the Kimberley Process’ efforts to craft a system of customs controls capable of ending this blood trade.

International Efforts—That work is far from complete, and a critical next step will be taken next week as representatives of civil society, the diamond industry, and more than 35 countries gather to finish the job. If they rise to the challenges against diamonds, we will have a mechanism for preventing rough diamonds that fund war from being traded as legitimately.

Yesterday, the non-governmental organizations whose exposure this blood trade instigated this work warned all involved in this work that a flawed agreement may be worse than none at all. More needs to be done on monitoring and enforcing the system, making it transparent through the publication of key statistics on the secretive trade, and on WTO issues will be critical. NGOs argue that neither embattled civilians in Africa, nor terrorist targets in America, nor the countries and companies that depend on the legitimate trade in diamonds can afford half-measures or complexion confidence that the situation magically will resolve itself. They are absolutely right.

There is another grave flaw in this work: it depends upon a definition of conflict diamonds that senselessly excludes those mined in the Democratic Republic of Congo. Under the terms of both the Kimberley Process and the Clean Diamond Trade Act, conflict diamonds are only those embargoed by the Unions. That means that unless the United Nations imposes sanctions on diamonds originating in a war zone, as it has in the case of the wars in Angola, Sierra Leone and Liberia, trade in the diamonds that fuel conflict there cannot be checked by this new international system.

A War for Plunder—Diamonds are not the cause of what has come to be known as Africa’s First World War, but they play a crucial role in sustaining it and spreading misery elsewhere—perhaps even to the United States, because Al Qaeda, Hezbollah, and other radical organizations reportedly have funded their terrorist activities with Congolese diamonds. There is ample evidence that diamonds and other resources have become the reason for the Congo’s war, so ending their illegal trade essential. Some of the most compelling reports of the link between plunder and misery and I am proud of the United States’ Panel of Experts on the Illegal Exploitation of Natural Resources and Other Forms of Wealth of the Democratic Republic of the Congo. Here are a few excerpts from them:

Parties to the war in the DRC are ‘motivated by desire to control and profit from the natural resources of the [DRC] and . . . they finance their armies and military operations by exploiting those resources.’—From the report of the Panel of Experts of April 2001.

The conflict in the [DRC], because of its lucrative nature, has created a “win-win” situation for all belligerents. Adversaries and enemies are at times partners in business. . . . Business has superseded security concerns. The only loser in this huge business venture is the Congolese people.

Illegal exploitation of the mineral and forest resources of the [DRC] is taking place at an alarming rate. The [DRC] has become mainly about access, control and trade of five key mineral resources . . . Plundering, looting and racketeering and the constitution of criminal cartels are becoming commonplace in occupied territories. These criminal cartels have ramifications and connections worldwide, and they represent the next serious security problem in the region.

The link between the continuation of the conflict and the exploitation of natural resources would have not been possible if some entities, not parties in the conflict, had not played a key role, willingly or not. Bilateral and multilateral donors and certain neighboring states that are complicit, as they have, facilitated the exploitation of the resources of the [DRC] and the continuation of the conflict; the role of private companies and individuals has also been vital.—From the report of the Panel of Experts of April 2001.

The systematic exploitation of natural resources and other forms of wealth of the [DRC] continues unabated . . . the cease-fire is generally respected on the front line, leaving the exploitation of the resources as the main activity of the foreign troops. There is a clear link between the continuation of the conflict and the exploitation of natural resources. It would not be wrong to say that one drives the other. The military operations and presence in the [DRC] of all sides have been transformed into self-financing activities. . . .

The initial motivation of foreign countries or groups to intervene in the war is primarily political and security-related in nature; over a period of time, and owing to the evolving nature of the conflict it has become the primary motive of extracting the maximum commercial and material benefits. This holds true for both government allies and rebel supporters.—From the report of the Panel of Experts of November 2001.

United Nations is Dithering.—Despite the eloquent words of the United Nations’ experts and diplomats, the impassioned calls for action made by virtually everyone who has examined the situation in the [DRC], and the full knowledge that each day of delay has serious consequences for innocent Congolese, the United Nations has continued to dither.

Three months ago, the Security Council “strongly condemned the continued plundering of the [DRC’s] natural resources . . . which it said was perpetuating the conflict in the country, impeding economic development and exacerbating the suffering of the Congolese people.” But then, instead of acting on the incontrovertible evidence that had been painstakingly gathered, it gave U.N. experts six more months to come up with yet more information and to propose solutions.
Given the complexities of the resource trade, the shifting alliances involved in the war, the thorny issues of sovereignty, and—perhaps deterministic—the clear preference of Security Council members to buck tough decisions to a later time, it is not surprising that the Panel concluded in November that the exploitation of natural resources in the DRC cannot be viewed and dealt with in isolation. This is one part of the problem which is inextricably linked to other serious issues the report addresses.

However, in his presentation to the Security Council, the Panel’s Chairman, Mahmoud Kaseem, also warned that “failure to follow up on the recommendations would send a message to traffickers and profiteers that they could continue their activities with impunity.”

Few could quarrel with what the Panel advocates: “a resolution of the broader conflict in the DRC and the region” and a “rebuidling of the State institutions [which] will require a systematic and sustained approach stretching over many years, and with the full assistance and cooperation of the international community.” And of course it is good news that yet another round of peace talks is underway today, and better news that, save for low-intensity conflicts, a ceasefire has largely held for nearly a year, however the report’s sad trajectory is what’s at issue: that, at the present rate, it will take longer to stop the plundering phase of the war than its shooting phase.

Given the richness of the Congo’s resources and its fascinating history since the late 19th century, there is little reason to hope the current era of misery will be either short or less deadly than prior ones. Belgium’s exploitation of the Congo left 7—10 million dead and a record of viciousness that almost matches that of the drug-adlled rebels who’ve turned Sierra Leone into a nation of amputees and war victims. Then, after the Congo’s independence, Mobutu Sese Seko, the strongman who ruled it with full U.S. support for decades, became one of the world’s richest men from the trade in rough diamonds and its exploitation a horror. This vast country is now called the Democratic Republic of the Congo, and what is happening there echoes Conrad. . . . The Congo, as big as the United States east of the Mississippi, with 50 million people, has become a carcass being swallowed by the elite and its neighbors. They have looted and sold its natural resources on a scale without precedent. This, with the direct or tacit complicity of pious government officials and corporations around the world. . . . For Zimbabwe, Rwanda, Uganda and Burundi, the Congo is too rich a cash cow to abandon. From the Christian Science Monitor, May 16, 2001.

Given the Congo’s current situation and decades of experience, the question before members of the international community today is straightforward: How long do we intend to wait to act? A small and anemic contingent of UN troops are there now, in a situation that echoes a year in Sierra Leone in the weeks before 500 UN peacekeepers were kidnapped there two years ago. In the international community did little until it suffered that humiliation, then hastened to sanction the diamonds rebels used to fund their brazen attacks. Is yet another crisis what the United Nations is waiting for? Can it instead act on the ample evidence of suffering and plunder before the situation takes another turn for the worse?

I share the concern of many concerned people at the United Nations and elsewhere that a comprehensive approach to ending the plunder of the Congo and securing a lasting peace will be found. But I strongly disagree with the United Nations’ apparent conclusion that there’s nothing we shouldn’t do anything. The Congo’s people, and others threatened by the problems that fester in its chaos, can’t want for an over-arching system of controls on every valuable resource this rich country produces. They can’t afford another six months of expert investigation of problems that obviously exist, and grand solutions that will take even longer to devise than the Kimberley Process has spent on its system of controlling rough diamonds.

In truth, neither can we Americans. A December 2001 account by Washington Post investigative reporter Tara Larson detailed the way Al Qaeda, Hezbollah and other radical Islamic groups are funding their terrorist attacks by trading conflict diamonds and other Congolese resources. Africans and Americans have learned together in recent months the hard lesson that averting our eyes is not the way to deal with a problem however intractable.

Congo: The Next Focus.—The United Nations has tied itself in knots before, trying to determine which nations are participating defensively and offensively, which nations are aggressors, but enough is enough, particularly when it comes to diamonds. I suspect what matters most to consumers is that diamonds’ image differs from reality. To Americans in particular—who buy half of the world’s diamond gems and jewelry, and 10 percent of its rough diamonds—the fact that a diamond might be funding war is what matters. Whose blood stains their token of love, whether it belongs to a Rwandan soldier or a Zimbabwean, probably isn’t that important.

When Kimberley Process nations, the diamond industry, and members of civil society completed the first phase of their efforts against conflict diamonds next week, I hope they will turn their energies to the DRC’s forgotten war. Finding a way to close the Congo-sized loophole that threatens to undercut their good work on a global system, and that is leaving the Congolese people untouched by an approach that has proven constructive in other countries torn by wars over diamonds, is essential.

Together with other leaders of the work against conflict diamonds in the House of Representatives, I am drafting legislation that aims to support responsible action on this pressing problem. Unfortunately, this is not something the United States can do unilaterally. Not is it an issue that trading partners should detain to be subsumed to the interests of some U.S. allies who are involved in the Congo’s war. The precedent we set in the deadliest war of this decade should not merely serve the narrow interests of any one nation; it should support future work to put diamonds beyond the reach of thugs and terrorists.

I look forward to working with Congressional leaders, the Bush administration, the diamond and jewelry industries, human rights and humanitarian organizations, and others to address this flaw in international efforts to combat conflict diamonds, and to ensure we reach our goal by ending this scourge.

Clean Diamond Trade Act.—In closing, I want to give our colleagues an update on H.R. 2722, the legislation we endorsed 408–6 last November. My hope and that of other sponsors was that the Senate would act quickly on this landmark legislation, both to push other countries to meet their Kimberley Process obligations and to serve as a pilot for this project so any flaws in this approach could be corrected through the legislation the Administration plans to introduce this year.

To my great dismay, that has not happened, and the extraordinary coalition of industry and activists that supported the Clean Diamond Trade Act has collapsed over differences in how Congress should proceed. I remain hopeful that the Senate sponsors of H.R. 2722’s companion—which represents a compromise that I brokered between the human rights community and the diamond industry—will find a way through their differences with the Bush Administration and the House so that this bill can be enacted at the earliest opportunity.

I don’t quarrel with our Senate partners’ preference for stronger legislation; in fact, I share it, and want the record to be clear that their differences are honorable ones grounded in the bill’s substance. This is not a partisan issue, as Congressmen WOLF, Houghton and RANGEL and Senators DURBIN, DeWINE, FEINGOLD and GREGG’s combined efforts demonstrate.

However, having worked steadily on this issue since I first met the victims of one war over conflict diamonds, and sponsored six different bills aimed at resolving it, I am convinced that there simply is no silver bullet capable of stopping this criminal trade. Giving our Customs agents weapons to battle it, giving activists tools to expose shortcomings in enforcement, finding ways to complement the law through development and diplomacy, and remaining vigilant until this scourge ends are the truly real solution.

I hope this work can begin soon, with the United States at the forefront and supported by the international community and this Congress.

CELEBRATING THE 90TH ANNIVERSARY OF THE SUFFOLK COUNTY GIRL SCOUTS

HON. STEVE ISRAEL
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. ISRAEL. Mr. Speaker, I rise to offer my sincere congratulations to the Suffolk County Girl Scouts in celebration of their 90th Anniversary.

Over 35,000 girls participate in Girl Scouts in Suffolk County and it is the largest Girls Scout Council in New York State. In addition, the Girl Scouts of Suffolk County are the “largest youth serving agency” on Long Island.

The Girl Scouts are dedicated to helping girls reach their fullest potential. And one of the reasons they do that is by having girls help other girls. Through peer leadership, mentoring and support, the Girl Scouts help our girls make the transition from child to adult.

Mr. Speaker, the Girl Scouts are dedicated to helping girls reach their fullest potential. And one of the reasons they do that is by having girls help other girls. Through peer leadership, mentoring and support, the Girl Scouts help our girls make the transition from child to adult.
The Girl Scouts of Suffolk County have designed a special patch that was unveiled yesterday, the six-month anniversary of September 11th, in memory of the horrific tragedy and Attack on America. The patch will be distributed across the nation; to earn it, each girl must participate in four activities that commemorate September 11th.

The Suffolk County Girl Scouts have pledged to perform 90,000 hours of community service benefiting Long Island this year. Their dedication to the community is to be commended.

I wish great success to the Girls Scouts as they embark on this great endeavor to make Suffolk County a better place.

COMMENORATION OF ST. PATRICK’S DAY

HON. DAVID E. BONIOR OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. BONIOR. Mr. Speaker, I am pleased to join the Irish community in celebration of St. Patrick’s Day.

On March 17, 2002, people from around the world will come together to celebrate the life of St. Patrick, the patron saint of Ireland. During the fifth century, St. Patrick devoted his life to sharing the Christian faith with the native Irish people. As it has been for centuries, the entire Irish community will celebrate the day with music, parades, and family gatherings. When Irish soldiers serving in the English military held the first St. Patrick’s Day parade on March 17, 1762, through the streets of New York City, they started a tradition that continues until the present day.

During the mid-1800s, millions of Irish immigrants came to America to seek new lives. Today, the United States is enriched not only by the contributions of these immigrants, but also by that of their sons, daughters, and grandchildren. The Americans have made major contributions to all aspects of American society, including sports, medicine, religion, politics, and the arts.

Their innumerable contributions are why it is appropriate to honor the Irish community with a commemorative postage stamp honoring Irish American Heritage Month. This commemorative stamp would salutate the accomplishments of all Irish-Americans and their invaluable contributions to the American way of life. From President John F. Kennedy to F. Scott Fitzgerald to the brave firefighters who gave their lives on September 11, 2001, Irish-Americans have strengthened and enhanced our Nation and it is only appropriate that those contributions be honored and celebrated by all Americans.

America can boast a population of 44 million Irish-Americans, and I am proud that my home State of Michigan has a thriving Irish-American community. In our State, many Irish-American organizations work each day to enrich our neighborhoods. These institutions provide invaluable public service, as well as a strong foundation for the community as a whole.

Mr. Speaker, counter to peopled people of Ireland, all those of Irish ancestry around the world and our own Irish-American community in celebrating St. Patrick’s Day.

IN RECOGNITION OF AKTINA PRODUCTIONS, INC.

HON. CAROLYN B. MALONEY OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mrs. MALONEY of New York. Mr. Speaker, I rise to pay tribute to AKTINA Productions Inc. This year, AKTINA Productions Inc., which produces Greek-American radio and television programs, will be commemorating the 47th anniversary of the beginning of the battle for independence from British colonial rule waged by Cyprus. In memory of those Cypriots who lost their lives in the struggle for freedom, on March 17, 2002, AKTINA Productions will be hosting an anniversary event entitled “To the Immortals.”

Founded in 1993, AKTINA Productions Inc. is a non-profit organization dedicated to promoting Cypriot and Greek culture. Known as the “voice of Cyprus” in America, it emphasizes cultural and educational development through radio and television as well as live performances, including concerts and dance shows.

In May of 1993, AKTINA Productions Inc. had the distinction of introducing the first ever bilingual Greek-American radio show, known as AKTINA FM. AKTINA FM is a live on-air Greek-American Radio Magazine which highlights Greek culture, heritage and tradition and focuses on national and international issues affecting Cyprus and Greece. AKTINA FM is presently heard by more than 500,000 listeners on the radio, and more than 7,000 on the Internet. Call-in segments often feature a wide range of diverse participants and subjects, including education, immigration, health, crime prevention and the arts.

AKTINA FM also facilitates a number of educational programs dedicated to children ranging in ages from 7–17 years. They also offer platforms for children from a variety of ethnic and social backgrounds to display their various talents in poetry, speech, composition and other areas. AKTINA FM also offers a monthly Student Essay Contest in which more than 100 public and private school children participate and almost all of the Greek-American day and afternoon schools of the Greek Archdiocese in the tri-state area participate. Nearly 60 children ages 7–15 years will take part in the “To the Immortals” anniversary event.

For its many contributions to the community, I ask that my colleagues join me in saluting AKTINA Productions Inc.

GIRL SCOUTS’ 90TH ANNIVERSARY

HON. DAVID E. PRICE OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. PRICE of North Carolina. Mr. Speaker, I am pleased to join the Girl Scouts of the USA in celebrating their 90th anniversary. Since the organization’s inception in 1912, the Girl Scouts have taken on the mission of giving all girls the opportunity to develop physically, mentally and socially. For the last 90 years, Girl Scouts has empowered girls to become leaders, helping adults be positive role models and mentors for children, and helping to build solid communities. We have experienced this in our own family and still remember fondly the visit with our daughter to founder Juliette Gordon Low’s home in Savannah. Through Girl Scouting, girls acquire self-confidence and expertise, take on responsibility, and are encouraged to think creatively and act with integrity—the qualities that are essential in good citizens and great leaders.

Today, Girl Scouting has a membership of 3.8 million—2.7 girl members and over 900,000 adult members—making it the largest organization for girls in the world. Girl Scouting is available to all girls ages 5–17 through participation in more than 233,000 troops throughout the United States and Puerto Rico. The Pines of Carolina Girl Scout Council, which serves girls in North Carolina’s Fourth District, boasts a membership of more than 21,000 girls. As an organization, the Girl Scouts have recently rededicated themselves to ensuring that Girl Scouting is available to every girl in every community, reaching beyond racial, ethnic, socioeconomic or geographic boundaries.

The positive impact that Girl Scouting has on our communities cannot be overstated, and I am proud of the work of the Girl Scouts of the USA, particularly the work which benefits thousands of families in North Carolina. It is my pleasure to congratulate and commend this organization on its 90th anniversary.

HONORING MAYOR LUTHER JONES OF CORPUS CHRISTI, TX

HON. SOLOMON P. ORTIZ OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. ORTIZ. Mr. Speaker, I rise to pay tribute to my friend, a great man and Mayor Emeritis of Corpus Christi, TX, Mayor Luther Jones, who passed away last week after a very short hospitalization. He was a great man, a loved friend, and a figure known far beyond Corpus Christi as a moral, lovable man who loved life, his home, and all the people in it.

To see the future, you must stand on the shoulders of a giant. Mayor Luther Jones’ political legacy, his legacy of good government, is easily the leadership he exhibited in 1983 when he forced all parties in disagreement about the election of city officials to sit together in the same room until the issue was resolved. His leadership at that moment in our history was pivotal to restructuring the city’s election process.

In the highly charged emotions of the time, Mayor Jones saw around the curve of history, and through the sheer force of will, personality, and the righteousness of the cause, he persuaded all parties to find a compromise—modified single member-districts—which changed the face of Corpus Christi politics and offered minorities entry into city government.

As much as he will be remembered for delivering Corpus Christi into the late 20th century in terms of political participation, it is his personal legacy that made him a widely loved friend and leader.

While many in south Texas have extolled the mayor for his contributions to the Nation’s military through his leadership at the Corpus Christi Army Depot and his support for education, particularly his successful effort to get
a four-year institution of higher learning in Corpus Christi, that was not what was most important to him. The thing that he loved the most was the school that bore his name, the Luther Jones Elementary School, because he knew the silver bullet, the single most important thing in the life of a child was education, pure and simple. He knew you had to get kids early to make an impression on them.

The children there loved him, and he loved them. He never missed a graduation; he came to every event and spoke to everyone there. He wanted these young people to know there was an adult who believed in them. And they believe in him.

In the weeks just before the mayor passed, the children at Luther Jones Elementary were building a monument to him. The pentagon-shaped monument had words on each side of it most often associated with the mayor: Integrity, Honesty, Perseverance, Success, and Victory. Those were the traits of the only man ever afforded the title of Mayor Emeritus in the history of Corpus Christi.

If the measure of a man is in the number of lives touched, of positive changes made, Corpus Christi Mayor Emeritus Luther Jones will be the yardstick by which the rest of us are measured. I ask my colleagues to join me in remembering this great American patriot today.

RECOGNIZING THE GIRL SCOUTS OF AMERICA

HON. SHERWOOD L. BOEHLERT
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. BOEHLERT. Mr. Speaker, today I rise in recognition of the legacy of Juliette Gordon Low. Ninety years ago this week, she founded an institution—the Girl Scouts of the United States of America—which has since inspired over 50 million American women.

In our nation, over two and a half million young women graduate in this institution that has a simple goal—to endow our girls with self-confidence, responsibility, integrity and leadership skills; and to help them develop physically, mentally and spiritually into successful adults.

Further, as Chairman of the House Committee on Science, I would like to commend the efforts of the Girl Scouts to close the gap in math and science education that exists between our boys and our girls. While only around one-fifth of our scientists and engineers are women, the Girl Scouts are working to expose girls to a wide variety of experiences and career choices and open new opportunities for girls in science.

Also today, I would like to recognize the fortieth anniversary of the Foothills Girl Scout Council in my Congressional district. This year, along with other outstanding young women across the country, Jennifer Fleischer, Krystina Novak and Jessica Walker from the Foothills Girl Scout Council have earned the Girl Scout Gold Award. They have done so through considerable efforts and contributions to their communities, and I congratulate them on their wonderful achievements.

Girl Scouts of the United States of America, I salute you at your ninetieth anniversary, and thank you for strengthening the minds, bodies and spirits of America’s girls and young women.

GIRL SCOUTS OF AMERICA

HON. ERNEST J. ISTOOK, JR.
OF OKLAHOMA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. ISTOOK. Mr. Speaker, this week is the 90th anniversary of Girl Scouting in America. After its founding in 1912, and its Congressional Charter in 1950, it has grown to a membership of over 2.7 million girls. Today, in Oklahoma, there are 25,000 Girl Scouts, with 8,500 volunteers helping girls develop to their full potential. Evidence has demonstrated that the more time a girl spends in Girl Scouts, the more likely she is to be drug free, avoid sexual activity that can lead to unwanted pregnancy, and attend college. I commend all of the leaders across America who are working to make our children’s lives better, and to prepare the next generation for a healthy and productive future.

ACKNOWLEDGING AHEPA’S SALUTE TO AMERICA

HON. MICHAEL BILIRAKIS
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. BILIRAKIS. Mr. Speaker, I rise to acknowledge the American Hellenic Educational Progressive Association (AHEPA), the largest and oldest association of Americans of Greek heritage and Philhellenes. This entity plans to honor and memorialize members of the community who perished in the tragic events of September 11, 2001. It will also salute those who have carried out courageous acts or performed tremendous philanthropic and humanitarian deeds during one of the most trying moments of our country’s history.

The attack on America was an assault upon the values of democracy which have enabled our nation to persevere with strength and resolve for well over two hundred years. These values, given to Western Civilization by the ancients, comprise our freedoms, our liberty, and our commitment to uphold justice. Together these ideals, combined with the American tradition of tolerance for people of different faiths and ethnic backgrounds, will help us to overcome our current challenges and be victorious in our common fight against terrorism.

On March 25, 2002, in the spirit of that tradition, the descendants of ancient Greece, who as immigrants came to America because of the very democratic ideals fostered by their ancestors, will come together to “Honor America.” This event will be hosted by the American Hellenic Educational Progressive Association, an organization founded by visionary Greek immigrants eighty years ago. They will pay their respects to family, friends, neighbors, and fellow citizens, who lost their lives in harm’s way to save the lives of others.

President George W. Bush, in an address on November 8, 2001, said our nation was born in a spirit of courage and optimism “as immigrants yearning for freedom courageously risked their lives in search of greater opportunity.” The descents of Greek immigrants offer thanks and pay homage to America, warmly embracing this spirit of optimism and courage that President Bush said “must guide the rest of us fortunate enough to live here.”

I ask my colleagues to join me in recognizing the efforts of the American Hellenic Educational Progressive Association to honor, memorialize, and salute members of the community affected by the sad events of September 11, 2001, during the organization’s 35th Biennial Congressional Banquet, held March 25, 2002, in Washington, DC.

HAPPY 90TH ANNIVERSARY, GIRL SCOUTS OF AMERICA

HON. TIMOTHY V. JOHNSON
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. JOHNSON of Illinois. Mr. Speaker, I would like to take this time to congratulate and thank the Girl Scouts of the USA for their 90 years of service and dedication to the young women of our nation.

I am extremely blessed to have two extraordinary Girl Scout Councils in my district that truly deserve to be honored during this 90th Anniversary Celebration. Serving over 4,000 girls, the Green Meadows and Centrillo Girl Scout Councils have clearly demonstrated their strong commitment to the development of strong and confident young women. We must not forget that these women are those who will become the future leaders of our communities, our nation, and our world. In addition, the Girl Scouts have throughout their history allowed many adult volunteers the opportunity to reach out to young women in the community and act as positive role models and mentors.

I ask all of my colleagues in the House to join me in taking the time this week and throughout the year of their 90th Anniversary Celebration to honor the Girl Scouts of the USA for their hard work and dedication in providing an atmosphere “Where Girls Grow Strong.”

THE SEPTEMBER 11TH, 2001 COMMEMORATIVE COIN ACT

HON. STEVEN R. ROTHMAN
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. ROTHMAN. Mr. Speaker, today I introduced the “September 11th, 2001 Commemorative Coin Act” which calls for the introduction of a circulating commemorative coin that would honor the victims of the events of September 11th.

A generation ago, the events of December 7th, 1941 became not only a day of infamy, but also a reference point that no one has forgotten. My father knows precisely where he was on that Sunday, just as I suspect nearly all Americans know what they were doing when the World Trade Center and the Pentagon were attacked.
Events of cataclysmic proportion, as well as epic struggles, have long been commemo-
rated on the coinage of various countries. Canada’s tombac nickel, for example, issued in 1943, contains a new reverse design from the famous Churchill “V” for victory over the Nazi Axis in 1945.

America’s circulating coinage is not so dif-
ferent. The heraldic eagles utilized on the re-
verse of our coinage has had the beak of the
eagle pointed, variously, to olive branches of
peace, or towards the talons holding arrows of
war. The heraldic eagle on the reverse of the sil-
ver dollar (bearing Independence Hall) is one of
these (pointed toward arrows of war), while the
Seated Liberty dollar of 1940-1973 had the eag-
le’s head pointed toward olive branches, as
does the Mint of 1979-1981.

In the 20th century, the first circulating commorative was struck for the cen-
tennial of the birth of Abraham Lincoln, in 1909. The Annual Report of the Director of the Mint simply noted that, “With the approval of the Secretary of the Treasury the new de-
sign for the coin was adopted, and the coin was struck in April 1909. On the obverse the head of Lincoln appears instead of the Indian head which this piece had borne since 1861. The engraver of the Philadelphia Mint was in-
structed to prepare dies and coinage of this piece was commenced in May. . . .”

In March 1913, Congress enacted legislation overturning a portion of the Act of Sept. 26, 1890 (limiting design changes to no more fre-
quently than once in 25 years on circulating coinage) and specifically authorized and di-
rected the Secretary of the Treasury “for the purpose of commemorating the 200th anni-
versary of the birth of George Washington, to change the design of the 25-cent piece so that the obverse design shall appear on the obverse, with appropriate de-
vices on the reverse. . . .”

Following President Roosevelt’s death in 1945, the Mint produced a Roosevelt memori-
al medal, and also introduced a new circu-
minating commorative coin design for the dime (dated 1946). Vermeule terms the coin “the logical memorial for Franklin Roo-
sevelt in the regular coinage.”

After the assassination of John F. Ken-
nedy, Dec. 30, 1963, directing that the Franklin half be re-
placed with a design “which shall bear on one side the likeness of the late president of
the United States John Fitzgerald Ken-
nedy,” a motif which Vermeule terms a
“hasty; emotional advent” even though the design is “a tolerable, staidly handsome coin.”

The One Bank Holding Company Act of 1970 required a coin to
be produced 750 million of such coins in a year’s time, the seigniorage would be a re-
markable down payment on the rebuilding of the World Trade Center, which cost an esti-
ated $350 million per tower to construct

To accomplish this, a bill would have to be introduced in the Senate, passed by both chambers, and approved by the President. Modestly, here’s my proposal to
do just that:

2002 CONSTRUCTION INDUSTRY
EXPOSITION
HON. DON YOUNG
OF ALASKA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. YOUNG of Alaska. Mr. Speaker, next week the entire construction and construction materials industries are holding a convention, the CONEXPO-CON/AGG, in Las Vegas, NV. More than 125,000 people are expected to at-
tend and over 2,300 exhibitors covering will show their construction material and equip-
ment in 1.9 billion net square feet of indoor
and outdoor exhibit space. This convention is
one of the best as it draws contractors and construction materials producers from around the world.

Several organizations associated with these events, are conducting their annual conven-
ations in Las Vegas: The Association of Equipment
Manufacturers; the National Stone, Sand and Gravel Association, the National Ready Mixed Concrete Association, the America Road and Transportation Builders Association; the Associated General Contractors of Amer-
ica; the Construction Materials Recycling Asso-
ciation; the Concrete Sawing and Drilling Association; the International Road Federa-
tion; the National Fluid Power Association; the National Utility Contractors Association and the Society of Automotive Engineers. I con-
gratulate them for the work they do to keep America moving.

[From the Numismatic News, Oct. 2, 2001]
PUT TRADE CENTER ON NEW HALF
DOLLAR
(BY DAVID L. GANZ)

America’s tragedy that is personified by the destruction of the twin towers of the World Trade Center in New York City, through the deplorable and criminal assault on its
sovereignty on Sept. 11 in a suicide bombing, is deserving of a lasting tribute.

Coinage, since the time of Caesar, has
served the simultaneous purpose of doing the
business of commerce and remembering his-
sory events that are worthy of commemora-
tion. In ancient times, coins of that era were utilized to pay homage to the emperors, to util-
ized to pay homage to the emperors, to
utilized to pay homage to the emperors, to
utilized to pay homage to the emperors, to

The House in Committee of the Whole

Mr. MEEKS of New York. Mr. Chairman, in the House of Representatives.

The House in Committee of the Whole on the State of the Union had under consideration the bill (H.R. 2341) to amend the procedures that apply to consideration of interstate class actions to assure fairer outcomes for class members and defendants, to outlaw certain practices that provide inadmissible settlements for class members, to assure that attorneys do not receive a disproportionate amount of settlements at the expense of class members, to provide for clearer and simpler information in class action settlement notices, to assure prompt consideration of interstate class actions, to amend title 28, United States Code, to allow consideration of interstate class actions, to provide for clearer and simpler information in class action settlement notices, to assure prompt consideration of interstate class actions, and for other purposes.

Mr. MEEKS of New York. Mr. Chairman, in an age when corporate wrongdoing is a daily front page headline, now is not the time for Congress to bend the rules that allow injured consumers and workers access to the civil justice system.

Proponents of H.R. 2341 insist that a class action crisis threatens the well being of U.S. courts this is simply not true. There is no statistical evidence of a class action crisis. In fact, the Federal Court System has consistently opposed efforts to "federalize" class actions believing that state courts are perfectly capable of handling their own matters without interference from the Federal judiciary. There is simply no need for massive civil justice reform, especially reform like H.R. 2341 that limits the rights of consumers to seek redress against wrongdoers.

Currently, class action suits provide access to justice for thousands of American consumers and small businesses that would otherwise have no realistic means of taking their case to court. Unfortunately this legislation is an attempt to deny American consumers and small businesses by making plaintiffs jump through multiple hurdles to bring class actions, allowing proponents of this bill to accomplish their policy goal at the expense of consumers who have been harmed by corporate wrongdoers.

Today we are given the opportunity to make a clear choice between the legal rights of powerful corporations that break the rules, and the legal rights of the families, retirees and consumers they harm. Today we cannot turn our backs on those who depend on us. Today we must stand up for those who stand the greatest harm by opposing H.R. 2341.

CONGRATULATIONS, GIRL SCOUTS, ON 90 YEARS OF WONDERFUL SERVICE

HON. DAVID VITTER
OF LOUISIANA

In the House of Representatives.

Mr. VITTER. Mr. Speaker, I rise today to celebrate the 90th anniversary of the Girl Scouts of America. In March 1912, Juliette Gordon Low, a visionary from Savannah, GA, formed an organization that has become the world's preeminent organization dedicated solely to girls.

Girl Scouting encourages girls to develop their full potential, to believe in themselves, to respect others, and to make a contribution to the world around them. In an accepting and nurturing environment, girls build character and skills for success in the real world. In partnership with committed adults, girls develop qualities that will serve them all of their lives—like strong values, a social conscience and conviction about their own potential and self worth.

The Girl Scout Council of Southeast Louisiana provides a positive impact on our entire region by the services and activities they provide. I salute the adult troop leaders who volunteer their time to serve as role models for the thousands of Girl Scouts in our community. As the father of a Brownie, I see first hand the enjoyment and enrichment that Girl Scouting provides.

Could Juliette Gordon Low have known in 1912 when she sold her pearls to give Girl Scouting financial backing that millions of girls would benefit from her generosity? She would be proud to know that Girl Scouting is still going strong and shaping lives. Congratulations Girl Scouts on 90 years of wonderful service.

HON. LYNN N. RIVERS
OF MICHIGAN

In the House of Representatives.

Ms. RIVERS. Mr. Speaker, evidence is mounting that the patenting of human genes is both inhibiting important biomedical research and interfering with patient care. Today I am introducing two bills that address these increasingly troublesome effects of human gene patenting.

Despite resistance from many of our European allies and the popular view in this country that owning the rights to a part of the human body is inappropriate and even immoral, patenting of human genetic sequences is increasing rapidly. Patents on genes or genetic material have already been issued by the Patent and Trademark Office (PTO), including at least 1,500 on human genetic material. Tens of thousands of additional human gene patents await examination by the PTO. And while the criteria for awarding gene patents have been marginally tightened in recent years, progress toward patenting of the entire human genetic sequence continues unabated. There is little doubt that most of the significant claims on our genetic code will be tied up as private property within a very few years.

What does it mean to own a human gene patent? It means that the gene patent holder controls any use of "its" gene, a gene that is found in virtually every human being on the planet. The patent holder can prevent my doctor from looking in my body to see if I have that gene. The patent holder can prevent anyone else from doing research to improve a genetic test or to develop a gene therapy based on that gene.

PTO's grant of total ownership in genes has already led to some very unusual moral and medical dilemmas. In one well-publicized case, Miami Children's Hospital—the owner of the gene responsible for the fatal neurological disorder Canavan disease—is being sued by the families of dead and dying children who provided the tissue samples which enabled the hospital's researchers to discover the gene's function. The Canavan parents had sought the help of hospital researchers in order to develop testing that was accessible and affordable to the public. Instead, when Miami Children's Hospital discovered the Canavan gene, it secretly filed a patent and now prevents doctors from testing or examining patients for the gene without paying the hospital a fixed royalty fee, even though those doctors could do so without using any product or device invented by MCH. The Canavan families claim that the terms under which the hospital is licensing use of the gene are slowing progress into finding a cure or therapy for the disease.

In the House of Representatives.

Mr. MEEKS. Mr. Chairman, the construction industry represents 8 percent of our Nation's gross domestic product and accounts for 5 percent of total U.S. employment. The construction industry puts more than $850 billion of products in place annually and employs more than 6.8 million people. Despite a recession, the construction and construction materials industries added 63,000 jobs. These numbers are staggering and impressive and result from the very successful TEA 21 Act that funds the federal highway road program.

These are America's builders. Through their hard work, the wilderness that was America was transformed into a stronghold of productivity and commerce.

These groups build our roads and highways, airports, and rail beds—the networks that connect our cities, our communities, and our families. They build our homes, our workplaces, our churches, our schools, and our hospitals.

They build and maintain our utilities, including water and sewer facilities, natural gas pipelines and telecommunications systems. They build these underground lifelines that keep America and the people alive.

Not only do they build—they rebuild. In the true spirit of America they responded after September 11 by sending manpower, materials, equipment, and money to the New York City World Trade Center and the Pentagon to help heal the wounds inflicted on America by the terrorist attacks. Members of these associations continue their efforts to erase these scars that mar our landscape.

The construction and construction materials industries have built Americans' quality of life and are ensuring a prosperous future for our country and its people.

We all take pride in the work these "Builders of America" do every day. On the eve of CONEXPO-CON/AGG 2002, we extend our sincerest thanks and best wishes to the construction and construction materials industries for a successful trade show that is "An Exper-
In another example, several European laboratories have refused to recognize—and are attempting to overturn—a patent held by a U.S. company on a gene that is strongly linked to breast and ovarian cancer. The patent holder requires that all tests be shipped to its lab in the United States under the theory that it has the most accurate genetic test available. However, at least one European laboratory found additional mutations for which the patent holder was not testing. European geneticists claim that the testing fee charged by the patent holder ($2,680) is exorbitant, since they can obtain a sophisticated test for half that price, and that the terms of the gene license are choking off discovery of other medically important mutations of the gene.

In yet another example, a U.S. firm obtained a patent on a gene by specifying its sequence and its possible importance in a number of diseases. The firm did not mention AIDS in its patent application. Several research groups subsequently discovered the gene’s importance in the AIDS infection mechanism. These groups now have to deal with the gene’s patent holder to develop their discoveries, even though that owner had no idea of the gene’s relevance to AIDS. In a final example, Jonathan Shestack, the producer of the movie Air Force One, began raising money to fund a film he learned that progress was slow because certain researchers were hoarding patients’ tissue samples. They wanted to be the first ones to find the gene and gain commercially.

These and other similar results from the patenting of human genes have led many in the medical and religious communities to conclude that patents should simply not be granted on human genetic sequences. Prohibiting gene patents would of course require a major change to the patent law, an unlikely outcome given the biotechnology industry’s strenuous assertion that gene patents are essential to genetic and medical innovation. This is an interesting but debatable proposition. The two bills that I am introducing today, however, do not directly challenge the viability or legality of gene patents. What I seek to do, rather, is to carve out exemptions to the applicability of gene patents. These exemptions are designed to minimize some of the negative impacts of patents on the practice of medicine and the advancement of science. They aim to broaden the availability and usefulness of gene-based diagnostics in the overall health care system, while allowing essential medical progress to continue unabated.

The “Genomic Research and Diagnostic Accessibility Act of 2002” has three major provisions.

**RESEARCH EXEMPTION**

Section 2 exempts from patent infringement those individuals who use patented genetic sequence information for non-commercial research purposes. This provision would apply to all genetic sequence patents, not just human gene patents. Contrary to the understanding of many scientists, patent law does not protect from patent infringement scientists doing basic, fundamental, non-commercial research when they use patented tools, techniques, and materials. Surveys performed by researchers at Stanford University have shown that most researchers only test for promising genetic research areas because of patent infringement concerns. Another study published earlier this year in the Journal of the American Medical Association found that a majority of geneticists are being denied access to colleagues’ data. The JAMA study concluded that withholding data may hinder scientists’ ability to replicate the results of published studies and to pursue their own research, and may hurt the education of new scientists. An exemption that would make genetic patent law comparable to copyright law, which has a “fair use” defense that permits socially valuable uses without a license.

It is important to note that this section would not overturn the commercial rights of patent holders. If a research utilizing the exemption makes a commercially viable finding, he or she would still have to negotiate any rights to market the new discovery with the patent holder.

**DIAGNOSTIC USE EXEMPTION**

Section 3 would exempt medical practitioners utilizing genetic diagnostic tests from patent infringement remedies. This section builds on a provision in patent law, enacted in 1996 after its passage in the House by an overwhelming majority, which exempts health care providers from patent infringement suits when they use a patented medical or surgical procedure. The 1996 law was authored by two legislators/doctors—Representative GANSE and Senator FRIST—and eliminated the disadvantageous position that doctors would use a less safe surgical procedure rather than risk infringing a patent.

Some biotechnology companies and researchers argue that monopolistic control of genetic diagnostic tests is essential. They claim that research investment—investment made possible only by the prospect of total control of the diagnostic revenues—the tests never would have been developed in the first place. This argument begs the question of whether current patenting policies are in fact serving the broader interests of patients. In my view, they are not. Costs for patented tests can become prohibitive, especially when licensing fees are stacked through a series of tests. Negotiating licenses and fees can be time-consuming and can stifle medical progress. And most importantly, control of testing protocols and results in a single laboratory can retard medical knowledge, which has historically progressed through the free exchange of information among the entire medical community. The prospect of owning a profitable genetic test may indeed drive some early innovation, but monopolistic control of a genetic test will ultimately stifle innovation.

I have referred to some of the problems that patents have caused in the field of genetic diagnostics. In a recent article in the journal Nature, four U.S. bioethicists concluded that “gene patents affect the cost and availability of clinical-diagnostic testing.” One of the authors, Mildred Cho from Stanford University, has conducted broader surveys suggesting that nearly half of all diagnostic labs have been forced to abeyate certain tests because of gene patents. This is not an outcome that promotes broad, fairly priced diagnostic medicine.

I believe that the interests of patients and the overall health care system in this country will far better serve their laboratories, universities, and the private sector are free to use patented information for the development of diagnostics tests. To those who argue that medical innovation will be stifled by this approach, I would point out that surgeons have been refining their techniques for centuries without patent protection. Furthermore, many genetic advances have and will continue to be made without the allure of profits. Dr. Francis Collins discovered and patented a cystic fibrosis gene ten years ago. Dr. Collins, the current director of the Federal gene-mapping effort, was not motivated by profits and neither was the university. That test is broadly licensed today at a nominal fee and remains an easily affordable service available to thousands of expectant parents.

**INFORMATION DISCLOSURE**

Section 4 of the bill would require public disclosure of genomic sequence information contained within a patent application when federal funds were used in the development of the invention. The data would be released within 30 days of patent filing, rather than the current 18 months.

This provision is one that should be applied broadly to federally funded research programs, as I have limited data in this bill. Legislation enacted in the 1980’s enabled universities and small businesses to patent discoveries made with federal funding—a change in patent law that has driven much high-technology innovation in the U.S. economy. Section 4 would patent rights of these universities and small businesses. It would, however, require that genetic data in a patent application be disclosed promptly through normal scientific channels, both to preclude wasteful duplication of effort by others as well as to stimulate broad dissemination. Since the public funded the research, it seems only reasonable that the patent applicant be asked to share the publicly funded research results as broadly and as quickly as possible.

THE “GENOMIC SCIENCE AND TECHNOLOGY INNOVATION ACT OF 2002”

This bill provides for an in-depth study by the White House Office of Science and Technology Policy on the impact of Federal policies, especially patent policies, on the rate of scientific progress, the cost, and the availability of genomic technologies.

A 5-4 Supreme Court ruling in 1980 opened the door for gene patents, which have been central to the development of the U.S. biotechnology industry. Ever since, except for a few minor changes like the Ganske-Frist amendment, genes and other genetic sequences have been treated pretty much like chemicals by the Patent Office. This is not surprising because the Patent Office responds to the will of the Congress and the courts. What is surprising is that there has been almost no thoughtful or scholarly study of the effect of human gene patenting on either scientific progress or the overall health care system. Do patents serve patients well? Do they help or hinder scientific progress? Do they promote innovation? These are fundamental questions that would perhaps have engaged the attention of the Office of Technology Assessment had the Congress not foolishly abolished it in 1995. The Human Genome Program, who has spent nearly $100 million over the past 10 years on “Ethical, Legal, and Social Implications of the Human Genome Project,” has funded almost nothing in this area. Meanwhile, the Patent Office continues to review and grant patents, almost by blind momentum
Mr. OWENS. Mr. Speaker, as a Tribute to the firefighters who died at the World Trade Center and those who were injured, I ask that a copy of the following proclamation be placed in the Congressional Record of the United States House of Representatives:

TRIBUTE TO GAIL TORREANO

HON. SANDER M. LEVIN
OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. LEVIN. Mr. Speaker, I rise today to reflect on the contributions of SBC Ameritech Michigan and its President Gail Torreano, as they are both honored on March 22nd by the Oak Park Business and Education Alliance for their outstanding work in the community of Oak Park, Michigan. The Oak Park Business and Education Alliance was established in 1993, and is a nonprofit organization of educators, businesses and government entities that provide assistance to the Oak Park School District to improve the individual education experiences of students and prepare them for the modern workforce.

Ms. Torreano’s career and other accomplishments demonstrate her strong commitment to community activism. A graduate of Central Michigan University, she has served as Associate Director of the Michigan Special Olympics in Mount Pleasant. Among the many boards she has served on are the Detroit Chamber of Commerce, Detroit Chapter for the NAACP Freedom Fund dinner for 2002, Michigan Virtual University, and the Economic Club of Detroit.

SBC Ameritech Michigan has been the recipient of numerous honors and awards including the Michigan Deaf Association’s Chairman’s Award for her leadership in the deaf community. In addition, the American Society on Aging and the National Minority Supplier Development Council named SBC “Corporation of the Year” in 2000.

Ms. Torreano’s and SBC’s commitment and support of the communities where they serve is, indeed, commendable.

Mr. Speaker, I ask my colleagues to join me in honoring the commitment of SBC Ameritech Michigan and its President, Gail Torreano, to the community of Oak Park and the Business and Education Alliance.

CHINA’S MILITARY EXPANSION

HON. BOB SCHAFFER
OF COLORADO

IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. SCHAFFER. Mr. Speaker, I rise today to discuss an issue of utmost importance to our national security. On Tuesday, March 5th, the Washington Post reported the People’s Republic of China has increased its military spending by over 17% for the second consecutive year.

As I have pointed out many times on the House Floor, China’s desire is for complete dominance and hegemony in the Asia-Pacific region.

Communist China’s attempts to build a nuclear arsenal capable of striking the United States are undeniable. In that regard, the addition of multiple independently targeted re-entry vehicles is the PRC’s most significant threat to the United States. This targeted spending increase is clearly designed to close the nuclear gap that exists between the United States and China.

China’s military buildup is especially disconcerting considering its much publicized goal of controlling Taiwan. Mr. Speaker, as you know, China has said it will take back Taiwan by whatever means necessary. Along these lines, Chinese military leaders have openly questioned whether the United States would be willing to sacrifice Los Angeles in our attempts to protect Taipei. We must be prepared to defend ourselves against this type of overt aggression.

Mr. Speaker, this is why I have been so vehement in articulating the need to act decisively to build a ballistic missile defense. The fact that our country remains completely vulnerable to a ballistic missile attack is a reflection of our lack of political will to build an adequate defense. The technology for a ballistic missile defense is available, and has been for years and even decades. It is obvious China will neither lay aside its obsessive quest to build and maintain an offensive nuclear missile program, nor cut its massive military spending. There is only one acceptable response to this PRC’s desire to fund a robust ballistic missile defense program, encompassing a variety of technologies and defenses, and we must accomplish this without delay.

Mr. Speaker, at this point in the Record I submit the text of the March 5th article to which I have been referring. I commend this article to our colleagues and all observers of these proceedings.

[From the Washington Post Foreign Service, Mar. 5, 2002]

CHINA RAISES DEFENSE BUDGET AGAIN

(BY JOHN POMFRET)

BEIJING—China will announce another 17 percent rise in defense spending this week, completing a one-third increase in acknowledged military expenditures over the last...
two years, Chinese and other Asian sources said today.

The increase reflects Beijing’s ambition to build a powerful military to complement its robust economy and underpin its strategic position in Asia. But despite more than a decade of big jumps in the defense budget, Asian and Western military officers and Chinese sources said the 2.5-million-member People’s Liberation Army, the largest standing fighting force in the world, is struggling with its modernization program, handicapped by low pay, poor morale and difficulty absorbing new weapons.

Finance Minister Xiang Huaicheng will announce an increase of around 17.6 percent in defense spending when he details China’s budget on Wednesday during a meeting of the legislature, Chinese sources, Asian diplomats and Chinese-language media reports said. China increased defense spending by 17.7 percent last year; the jump this year will bring its publicly acknowledged defense budget to $54 billion.

China’s real defense spending, including funds expended but not reported, is considered the highest in Asia, considerably more than the $46 billion spent annually by Japan. By contrast, administration has proposed a $77 billion defense budget for the next fiscal year.

Beijing explained its increase last year as a response to “drastic changes” in the military situation around the world, a reference to the U.S.-led war in Kosovo in 1999. This year, sources said, Beijing needs more money to bolster its nuclear forces following the Bush administration’s decision to withdraw from the Anti-Ballistic Missile Treaty and continue work on a missile defense system.

China has often voiced concern that, if the United States builds a missile shield, the Chinese military would lose its strategic deterrent without more robust forces and delivery vehicles.

China’s main modernization efforts, however, focus on turning the People’s Liberation Army into an army of farmers into a modern, streamlined fighting force and to abandon the People’s War doctrine, which involves basic guerrilla tactics in favor of more traditional doctrines used by world powers.

The goal, according to Pentagon reports, is to become a “regional hegemon,” project Chinese power into any corner of Asia, protect China’s interests in the world, and turn China into Asia’s preeminent power in the region and use Chinese power to guarantee reunification with Taiwan.

To do so, China has embarked on a shopping spree for weapons from Russia, Israel, and South Africa and a worldwide hunt for technology to improve its nuclear weapons and rocketry programs. China was the world’s biggest arms importer in 2000, according to the Stockholm International Peace Research Institute. It will probably be so again in 2001 and 2002, analysts say.

Starting in 1997, China shed 500,000 troops from its armed forces, transferring those in the People’s Armed Police, which deals with internal security. It has also launched an ambitious program to enhance training, education and living standards for the men and women who serve.

Chinese analysts consider morale a major problem for the army. One Western military attaché who has had links with the Chinese military since the 1980s described the army as facing a “psychological crisis.”

“ar has lost its revolutionary elan,” he said. “It is no longer a tough, ragtag force of creative and motivated guerrilla fighters. It has become rigid, bureaucraticized and slow.”

Morale problems are reflected regularly in the People’s Liberation Army Daily, the army’s newspaper, where complaints about training, lack of vacation time and poor food and training are routine. Last week, the military, responding to years of complaints, promised to increase its rations budget by 20 percent, stimuli.

Once a route out of the countryside for smart young men, the army no longer can attract the talent it needs, Chinese sources said, because other opportunities have arisen. A growing army with upper-middle levels of society, an army career is almost a joke. Practically no students from Beijing or Qinghua universities, China’s most prestigious universities, consider a career in the military, which pays a colonel less than $350 a month.

Reform-minded senior Chinese military officers regularly compare the army to a state-owned enterprise burdened by aging, unproductive workers. “What can you do with someone who is 45 and has grown up in the old PLA?” said one Chinese major general.

“There are thousands of people like this. Many are officers, and because we can’t do anything with them, our younger officers are angry and leaving the service.”

A good percentage of training, up to 30 percent in some cases, is taken up with political indoctrination, Chinese sources said. “Political indoctrination, Chinese sources said. “Political indoctrination, Chinese sources said.”

More broadly, the PLA’s reputation still has not recovered from the killings around Tiananmen Square during the pro-democracy demonstrations of 1989. The PLA’s efforts to save people during floods in the summer of 1999 helped for a while. But, simultaneously, many stories arose of local military leaders leading smuggling rings.

Tanen’s reputation still has not recovered from the killings around Tiananmen Square during the pro-democracy demonstrations of 1989. The PLA’s efforts to save people during floods in the summer of 1999 helped for a while. But, simultaneously, many stories arose of local military leaders leading smuggling rings.

Jokes about corruption in the military and its obsession with politics are now routine. When Japanese Self-Defense Forces sank an intruding vessel, believed by Tokyo to be a North Korean spy boat, inside China’s 200-mile exclusive economic zone in December, China did not dispatch a ship to monitor the incident. “They must have been busy,” the punch line went, “studying the Three Represents’ [the latest political philosophy of President Jiang Zemin] or smuggling diamonds.”

China’s military acquisitions have been substantial. Recent Russian weapons and equipment sales have included 72 Su–27 fighter–ground attack aircraft; 100 S–300 surface-to-air missile systems consisting of 10 transports; four Kilo-class submarines and two Sovremenny-class destroyers. China has also signed a contract to assemble at least 200 more Su–27s at the Shenyang Aircraft Corp. in northeastern China.

But an Asian military officer estimated that 60 percent of the Su–27s cannot fly, either because they are broken or because the pilots lack the skill to fly them. “Their men are 20 years behind ours in terms of their skill at handling and repairing these sophisticated machines,” he said. “This gap in personnel is not easily closed.”

China’s purchases of the Sovremenny-class destroyers were touted as another sign of Beijing’s new ability to project force and challenge U.S. influence in Asia. But attempts to purchase an early warning radar system failed in July 2000 when the United States blocked Israel from selling China an I–76 aircraft equipped with AWACS-style radar, a system Israel calls the Phalcon.

“Without the Phalcon,” said a Western analyst, “the Sovremenny is a sitting duck.”

Mr. Speaker, while China’s military expansion poses a real threat to the United States, we have the technology to build a real missile defense shield, and should be directing the necessary funds to build and deploy such a system without delay.

PAYING TRIBUTE TO ANN SHEETS

HON. SCOTT McINNIS
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
March 14, 2002

Mr. McInnis. Mr. Speaker, it is with profound sadness that I pay tribute today to Ann Sheets, an incredible woman who tragically passed on much too soon. She was loved by each and every person whose life she touched, and will be sorely missed by all who knew and loved her. She was a person of unquestioned integrity and of unparalleled moral fiber, and it is my hope that her life will serve as a model to the many children she so lovingly taught, as she is truly an inspiration to us all. As her family mourns her loss, I believe it is appropriate to remember Ann and pay tribute to her for her warm heart, and her many contributions to her community and her state.

Ann lived her life in a manner befitting the friendship and love bestowed upon her by her colleagues, students, friends and family. She was raised in Steamboat Springs, where she graduated from high school. She went to work at Junction Square, where she continued to work while attending college at Mesa State. Eventually, Ann became a librarian at Chatfield Elementary School, where her love for children and education enabled her to excel, and make her a favorite with everyone with whom she came in contact. The lucky触摸 the lives of students each and every day by sharing her love of reading. It is no small feat to turn children on to reading, but Ann was able to do it with the same ease and grace that was the hallmark of her life.

Mr. Speaker, we are all terribly saddened by the loss of Ann Sheets, but take comfort in the knowledge that our grief is overshadowed only by the legacy of courage, selflessness and love that she left with all of us. Ann Sheets’ life is the very embodiment of all that makes this country great, and I am deeply honored to be able to bring her life to the attention of this body of Congress.
HON. SCOTT SPEICHER
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002
Ms. SANCHEZ. Mr. Speaker, I rise to honor the
Girl Scouts of the USA who are celeb-
har
"Scott" Speicher, USN, and
America's Missing in Action
HON. R. J. FORBES
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002
Mr. FORBES. Mr. Speaker, I am very dis-
thought today over our failure to resolve the disappearance of LCDR Michael Scott
Speicher. Commander Speicher was the first American lost in the 1991 gulf war. His F/A-
18 Hornet was shot down west of Baghdad in the early morning hours of January 17. After
Kuwait was liberated and the tenuous cease-
the early morning hours of January 17. After
Kuwait was liberated and the tenuous cease-
Mr. POMBO. Mr. Speaker, After seeing the
destruction that happened last year during the
fires seasons, I concluded that Congress must
be prepared to respond to these catastrophic
events before the 2002 wildfire season begins.
Some fires create a catastrophic event. These
types of fires are extremely intense. The fires literally destroy every sign of life and can rage for
thousands of acres. The costs of fighting these fires are astronomical. During the 2001 wildfire
season, for example, 8,881 fires burned about 1,600,000 acres, killing 15 firefighters and threatened rural communities nationwide. The year before in 2000, more than 7.4 million acres burned—equiva-
lent to a 6-mile-wide swath from Washington, DC to Los Angeles, CA. These fires destroyed 861 structures and cost the Federal government $1.3 billion in direct programs.
Quite simply, our Federal strategy to handle
catastrophic wildfire is not adequately ad-
dressing a looming crisis. The Federal Gov-
ernment must take action to prevent the loss
of wildlife habitat and protect rural communi-
ties.
This is why I am asking you to please join
me in cosponsoring this Wildfire Resolution
expressing the Sense of the U.S. Congress to:
(1) fully implement the Western Governors As-
sociation "Collaborative 10-year Strategy for
Reducing Wildland Fire Risks to Communities
and the Environment" and (2) to prepare a
National Prescribed Fire Strategy that mini-
izes risks of escape. America needs to know
Congress understands the forest-health crisis is causing these fires and that Congress is
taking action.
In managing our forests, it is very important
to remember that they are in constant trans-
formation. A particular forest now will look
much different in 10 years, and in about 50
years will not even look like the same forest.
Sometimes a forest can get overpopulated
with trees.
While some trees become diseased creating
enormous amount of fuel that leads to cata-
strophic fires.
Reducing forest density and improving the
ability of healthy forests to survive expansive
wildfires must become the No. 1 priority for
Federal forest managers. This is not a timber
industry issue—it is a forest-health issue.
Thinning practices necessary to ensure our
forests are able to survive future catastrophic
wildfires must begin without further delay.
It is time for Congress to set aside political rhetoric and make the tough de-
cisions necessary to end catastrophic losses of
wildlife habitat, forest resources and most
importantly, human lives on all Federal forest lands. I ask unanimous consent that the reso-
bution be printed in the RECORD following my
remarks.

HON. RICHARD W. POMBO
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

HON. ELTON GALLEGGY
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002
Mr. GALLEGGY. Mr. Speaker, I rise to honor the
heroic memory of Air Force Senior Airman
Jason Dean Cunningham, who died March 4,
2002, during a firefight with America’s en-
emies in the mountains of eastern Afghan-
istan. Airman Cunningham is to be laid to rest
today in Arlington National Cemetery.
Jason lived briefly in my district with his
wife, Theresa, and her parents, Lucy and Lito
DeCastro, in Camarillo, CA. Jason’s parents,
Lawrence Dean and Jackie Cunningham, hail
from Gallup, NM. Theresa joined the Navy
after graduating from Rio Mesa High School
and met Jason while both were stationed in
Italy.
At that time, Jason also served in the Navy. He switched to the Air Force 2½ years ago to
become a pararescueman—a paramedic who
has trained at a special forces levels. Jason underwent 2 years of intense training in air-
borne, scuba and survival schools, search and
rescue, and, of course, medical training to join
this elite group of lifesavers. He was assigned
to the 38th Rescue Squadron at Moody Air
Force Base, near Valdosta, GA.
By all accounts, Jason was a dedicated and
skilled airman, and a dedicated and loving
family man. He and Theresa have two daugh-
ters, Kyla, 4, and Hannah, 2.
On March 4, he and six others died trying
to rescue a Navy SEAL. It is important to re-
member them as well, for they fought by Ja-
son’s side and will be with him for all eternity:
Sgt. Bradley Crose, 22, of Orange Park, Flor-
da; Spec. Marc A. Anderson, 30, of Brandon,
Florida; Pfc. Matthew A. Commons, 21, of
Boulder City, Nevada; Petty Officer 1st Class
Neil Roberts, 32, of Woodland, California;
Tech. Sgt. John A. Chapman, 36, of Windsor
Locks, Connecticut; and Army Sgt. Philip J.
Svitak, 31, of Joplin, Missouri.
Jason is the second serviceman from my
district to die in Afghanistan since the hos-
tilities began. Special Forces Staff Sgt. Brian
Cody Prosser of Frazier Park, CA, died in Af-
ghanistan in December. Considering the rel-
lively low casualty rate so far, that’s a high
percentage for a congressional district. But the
people in my district were patriotic long before
September 11. They believe strongly in free-
dom and know deep in their hearts that free-
dom often comes with a price. Jason and Brian joined the military to protect their fami-
lies, friends and neighbors from America’s en-
emies. We forever will be grateful.
Mr. Speaker, we are deeply saddened by
the loss of Jason Dean Cunningham but our
resolve is strong. Our enemies must know that
when they attack us they will be destroyed.
I urge all colleagues extending our heartfelt sympathy to Jason’s family and to
all those who have lost loved ones in the pur-
suit of freedom.
HONORING OUR NATION’S FARMERS AND CELEBRATING NATIONAL AGRICULTURE WEEK

HON. DOUG OSE
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. OSE. Mr. Speaker, next week, March 17, 2002, we celebrate National Agriculture Week. From the apple orchards of upstate New York and cattle ranches of Texas, to the farm belt of the Midwest and rice fields of California, we are a nation built by farmers and ranchers. We take this week to honor those who produce our food and fiber, and to call attention to what needs to be done to protect our agricultural heritage, our way of life and our safe and plentiful food supply. It is the strength of this agricultural community that has made the United States the “bread basket of the world.”

My home of California is our nation’s most productive agricultural producers, producing more than $27 billion worth of product each year. The people of our state and nation benefit from this agricultural bounty every day in affordable, high-quality food, fiber, flowers and forest products.

Farmers are good stewards of the land and take pride in their work to protect the environment. Farmers and ranchers care for the land in many ways—by using integrated pest and soil management; by conserving water and grazing programs.

Farmers are also good conservationists, and have written the book on doing more with less. In the past 30 years, agriculture’s share of water has remained constant, but farmers and ranchers have boosted production on a tonnage basis an impressive 67 percent during the same period. Farmers provide habitat for many species of wildlife, including the water fowl of the Pacific Flyway. Many farmers are working towards better and more environmentally friendly methods of pest control—such as box homes for bats and barn owls, or pest resistant plants and bacteria that combat pests while reducing the reliance on pesticides.

In addition to their environmental benefits, farmers, ranchers, vinters and other members of the agricultural community are an important part of California’s economy. A University of California study recently found that farmers generate about $59 billion in personal income for Californians or 6.6 percent of the state’s annual personal income. California agriculture also contributes 1.1 million jobs to the state, about 7 percent of the total workforce. It is my great honor and pleasure to represent many of the men and women of California Agriculture in this House. Please join me next week in recognizing their contributions and thanking them for all they do to make this great nation what it is today.

HONORING THE GIRL SCOUTS OF AMERICA

Girl Scouting began on March 12, 1912. The founder Juliette Gordon Low assembled 18 girls from Savannah, Georgia, for a local Girl Scout meeting. The group was brought together because of her belief that all girls should be given the opportunity to develop physically, mentally and spiritually.

The Girl Scouts have continued to help all girls grow strong. To that end, Girl Scouting empowers girls to develop their full potential; relate positively to others; develop values that provide the foundation for sound decision-making; and contribute to society. Through the years, the Girl Scouts have continued to address contemporary issues affecting girls, while maintaining its core values. The organization’s foundation is still based on the Girl Scouts’ Promise and Law, just as it was in 1912.

Today, the Girl Scouts of America has a membership of 2.7 million girl members and over 900,000 adult members. In the state of Arkansas the Girl Scouts is 18,000 girl members and 7,000 adult members strong. They promote many beneficial programs, such as in-school scouting, and also promote qualities including diversity and responsibility. This program is one of the few private programs to still teach patriotism and the democratic process. The Girl Scouts is one of the few private programs to still teach patriotism and the democratic process. The qualities that girls learn from this organization helps to guarantee a brighter future for Arkansas and the United States of America.

Mr. Speaker, thank you for giving me the opportunity to honor the Girl Scouts of America.

STATEMENT IN HONOR OF ST. PATRICK’S DAY AND OUR SEPTEMBER 11TH FIREFIGHTERS

HON. KAREN McCARTHY
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Ms. McCARTHY of Missouri. Mr. Speaker, on March 17, 2002 the people of Kansas City will once again participate in the wearing of the Green and celebrate our Irish heritage. The tradition dates back to the 1800’s and has grown to the third largest St. Patrick’s celebration in the United States. This will be a St. Patrick’s Day Parade like no other as participants and spectators will be wearing green, but seeing red, white, and blue. Our honored guests will be members of the New York’s Port Authority, Police Department, and Fire Department.

On September 11, 2001, these brave first responders put their lives on the line for individuals in the World Trade Towers and surrounding structures. We at the Capitol watched in horror with the plane attack on Tower II, and felt the impact of the attack on the Pentagon. The world observed the courage and a selflessness of these men and women who rush to danger so that others will survive. Americans watched with pride and tears cognizant of the loss of life and families that would forever be altered.

As a community, we have witnessed the bravery of our own first responders. Kansas Citians along with the rest of our Nation volunteered the Girl Scouts 9/11 rescue efforts. Locally, the firefighter’s boot became the means for every citizen to contribute to the relief of the 9/11 survivors. I attended the New York Giants v. Kansas City Chiefs game at Arrowhead Stadium, and witnessed an emotional tribute and the generosity as I, along with my firefighters, collected donations from fans. I consider this a privilege especially after having witnessed the devastation of ground zero. The representatives from New York who are participating in the Kansas City St. Patrick’s Day Parade and the people of New York have the respect and admiration of us all.

Mr. Speaker, as we celebrate St. Patrick’s Day, I will participate as one of over 200 entries in the third largest parade in the Nation. As a proud American, I ask that you join the citizens of Kansas City as we salute our heroes of 9/11 and especially our honored guests from New York participating in the parade.

From the Port Authority: Officers Frank Dowd, Bob Moore, Brian Dunwoody, John O’Donnell, and Patrick Hart.

From the New York Police Department: Detective Steve Eizikowitz, Detective Mike Davis, Kevin Douliot, and Patrick Kelly.

From the Fire Department of New York: Lieutenant Joe Huber, Carl Punzone, Bob Fraumeni, and Josh Lomask.

Mr. Speaker, I ask my colleagues to join me today in honoring our first responders throughout the United States, as we observe the courage of St. Patrick.

CONGRATULATING THE GIRL SCOUTS OF THE USA ON THEIR 90TH ANNIVERSARY

HON. DANA ROHRABACHER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. ROHRABACHER. Mr. Speaker, as Co-Chairman of the Congressional Scouting Caucus I wish to congratulate the Girl Scouts of the USA on the occasion of their 90th anniversary.

When I was a boy, I thought girls were icky. And as a boy I thought all Girl Scouts did was camp, sell cookies and do crafts. Well, I have dramatically changed my opinion about girls, and the Girl Scouts have changed as well.

Today, the Girl Scouts is three million girls strong, with 900,000 adults volunteers. Girl Scouts now can earn merit badges that develop skills in chemistry, math, marketing, sports, computer science, aerospace and the environment.

The Girl Scouts have developed programs that deal with the real problems young women face today. The Girl Scouts are actively working to discourage teen pregnancy, cultivate girls whose parents are incarcerated, mentor disadvantaged young women and encourage the academic achievement that will be so critical in their future.

These programs expose girls from all walks of life to all the wonderful possibilities open to them in work, play, and service to others. The Girl Scouts develop healthy interests, skills and habits that serve young women for a lifetime.

It is a long, long way from when Juliette Lowe founded the Girl Scouts on March 12 of 1912. But 90 years later the Girl Scouts are still teaching the basic values contained in the Girl Scout law: “to be honest and fair, friendly and helpful, considerate and caring, courageous and strong, and responsible for what I
March 14, 2002

CONGRESSIONAL RECORD — Extensions of Remarks

E359

say and do." These basic, timeless values prepare our girls to take on the mantle of leadership as they enter adulthood. And for that, I congratulate the Girl Scouts of America for their invaluable contribution to the success of our girls and the good of America.

THE FALLEN HEROES FLAG ACT OF 2002, H.R. 3968

HON. BENJAMIN A. GILMAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. GILMAN. Mr. Speaker, it is with great pride that I introduce H.R. 3968, the Fallen Heroes Flag Act of 2002. This Act provides for a flag flown over our Capitol to the immediate family of our nation's brave firefighters, law enforcement officers, emergency medical technicians (EMT's), and to other relief workers whose lives are lost in the line of duty. This Act ensures that our future generations of public servants who may pay the ultimate price for their service to our communities and our nation are accorded the honor, the dignity and respect that they deserve.

As we pass the six-month anniversary of the barbaric terrorist acts perpetrated against the people of our great nation, we are reminded, once again, of the heroic acts of bravery, devotion to duty and self-sacrifice that our firefighters, law enforcement officers, emergency medical technicians and other relief workers rendered to us. Their great heroism was not just exhibited by those who following their rescue efforts, re-entered the crumbling buildings with the certain knowledge that they would pay the ultimate price; but for those who labored at Ground Zero, day after day, searching not only for survivors, but for their brave colleagues and our fellow citizens who perished on that day.

All too often we take our firefighters, law enforcement officers, EMT's, and relief and rescue workers for granted. The events of September 11th provided us with a glimpse into their lives, hard work and achievements, devotion to public service and to our communities that our brave public servants give each and every day. We must never forget the great service that they provide to our nation!

Mr. Speaker, as is customary with our fallen military heroes, this act will provide the immediate family member of our fallen public servants with the symbol of our great nation—our flag, as a tribute for the respect, admiration and appreciation that must be accorded to our brave firefighters, law enforcement officers, emergency medical technicians and our relief and rescue workers who have made the ultimate sacrifice.

Accordingly, I urge all of our colleagues to join as co-sponsors of the Fallen Heroes Flag Act of 2002, as our way of honoring the work and lives of our brave, devoted and dedicated fallen heroes.

H.R. 3968

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled:

SECTION 1. SHORT TITLE.
This Act may be cited as the "Fallen Heroes Flag Act of 2002".

SEC. 2. PROVIDING CAPITAL-FLOWN FLAGS FOR FAMILIES OF LAW ENFORCEMENT AND RESCUE WORKERS KILLED IN THE LINE OF DUTY.

(a) IN GENERAL.—At the request of the immediate family of a fire fighter, law enforcement officer, emergency technician, or other rescue worker who died in the line of duty, the Representative of the family may provide the family with a Capitol-flown flag, together with the certificate described in subsection (c).

(b) NO COST TO FAMILY.—A flag provided under this section shall be provided at no cost to the family.

(c) CERTIFICATE.—The certificate described in this subsection is a certificate which is signed by the Speaker of the House of Representatives and the Representative providing the flag, and which contains an expression of sympathy from the House of Representatives for the family involved, as prepared and developed by the Clerk of the House of Representatives.

(d) DEFINITIONS.—In this section—
(1) the term "flag" means a United States flag flown over the United States Capitol in honor of the deceased individual for whom such flag is requested; and
(2) the term "Representative" includes a Delegate or Resident Commissioner to the Congress.

SEC. 3. REGULATIONS AND PROCEDURES.

(a) IN GENERAL.—Not later than 30 days after the date of the date of the enactment of this Act, the Clerk shall issue regulations for carrying out this Act, including regulations to establish procedures (including any appropriate forms, guidelines, and accompanying certificates) for requesting a Capitol-flown flag.

(b) APPROVAL BY COMMITTEE ON HOUSE ADMINISTRATION.—The regulations issued by the Clerk under subsection (a) shall take effect upon approval by the Committee on House Administration of the House of Representatives.

SEC. 4. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated from the applicable accounts of the House of Representatives for fiscal year 2003 and each succeeding fiscal year such sums as may be necessary to carry out this Act.

SEC. 5. EFFECTIVE DATE.

This Act shall take effect October 1, 2002, except that no flags may be provided under section 2 until the Committee on House Administration of the House of Representatives approves the regulations issued by the Clerk of the House of Representatives under section 3.

A TRIBUTE TO THE LATE EDITH BRISKER VILLASTRIGO

HON. BARBARA LEE
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Ms. LEE. Mr. Speaker, I rise today with great sadness and deep respect in paying tribute to a woman with the courage to envision a peaceful world. Mrs. Edith Brisker Villastriago passed away on Sunday, August 26, 2001, in Silver Spring, MD.

Mrs. Villastriago's commitment and dedication to peace in the world, as well as to other issues affecting women spanned for more than four decades.

Mrs. Villastriago immigrated to the United States from Gomel, Russia, in the 1920s. Her long record of activism began with union organizing in Chicago, Illinois, and Pittsburgh, PA.

A visionary and advocate for peace, Mrs. Villastriago helped lead the Women Strike for Peace organization, opposed the Vietnam War and challenged the Nixon administration and its policies by protesting at the Washington Monument.

In the 1980s, she fought for peace on an even broader scale, helping to lead protests against Star Wars and nuclear proliferation. Her passion inspired us all.

Mrs. Villastriago's death represents a tremendous loss to the peace community as well to her family, friends, admirers, and supporters. But as we mourn her death, we also remember the legacy of hope and inspiration Edith left behind as a true leader and voice for peace.

Her passion and mission for peace show us how one person's vision, dreams and actions can inspire and make a difference for all who seek peace in the world.

Mr. Speaker, I would like to extend my deepest condolences to the late Mrs. Villastriago's children, her sister, her grandchildren, her friends and supporters throughout the world.

To Mrs. Villastriago—may the world receive the love, peace, and compassion you gave it. God Bless.

IN HONOR OF UCI UNDERGRADUATE SCIENCE STUDENTS

HON. LORETTA SANCHEZ
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Ms. SANCHEZ. Mr. Speaker, today I rise to honor eight undergraduate science students from the University of California, Irvine for their award-winning work at the student poster competition at the American Association for the Advancement of Science's (AAAS) Annual Meeting.

Biological sciences majors Rafael Gonzalez, Matilde Gonzalez, Sylvia Jaramillo, and psychology major Bonnie Sue Poytress won first place recognition for their posters. Biological science majors Cheryse Furman, Kathi Lynn Hamor, David Hernandez, and Sarah Lopez earned honorable mentions for their entries.

The AAAS is the world's largest organization of scientists. The AAAS Annual Meeting offered an interdisciplinary blend of more than 130 symposia, plenary and topical lectures, poster presentations and exhibits. The poster session included about 300 posters presented by national and international undergraduate and graduate students.

Scientific posters provide a visual snapshot of a research project, using a brief amount of text and extensive visuals to explain the work. These posters are usually presented with other talks of a similar topic and are judged for the quality and originality of the data.

I am extremely proud to represent such talented minds! Please join me in honoring these eight UCI undergraduate students for their hard work and achievements.
Mr. SCHAEFFER. Mr. Speaker, our government's consideration of China as a force for peace among its neighbors is impossible to substantiate and is overwhelmingly refuted by the facts. Our own good intentions are not sufficient to overcome the fact that China is a force for war, building up its military strength in warlike preparations aimed at its Asian neighbors such as Taiwan, and extending to the United States.

Policies of engagement with China do not excuse a lack of diligence by the United States over China's ballistic missile threat and arms buildup, as well as its failure to abide by non-proliferation agreements such as the one it signed in November 2000 to halt the sale of ballistic missiles and technology for the delivery of weapons of mass destruction.

In February 2002 Secretary of State Colin Powell noted how China's proliferation of ballistic missiles remained "an irritation in the relationship" between it and the United States. This irritation understates China's reliance on ballistic missiles as a key component of its military power, including their use as precision weapons capable of deep penetration without the delivery of weapons of mass destruction—conventional warfare.

In February 2002 CIA Director George Tenet, in testimony before the U.S. Senate, warned about China's increasing military power, saying, "The past year, Beijing's military training exercises have taken on an increasingly real-world focus, emphasizing rigorous practice in operational capabilities and improving the military's actual ability to use force.

Mr. Tenet added, "This is aimed not only at Taiwan but also at increasing the risk to the United States itself in any future Taiwan contingency. China also continues to upgrade and expand the conventional short-range ballistic missile force it has arrayed against Taiwan."

Mr. Tenet noted the link between China's threat to Taiwan and its threat to the United States.

I believe this House and our nation's president recognize the link between China's threat to Taiwan and the United States. In his question-and-answer session with Chinese students at Qinghua University in Beijing, when asked why he did not use the term "unification" with China and Taiwan, President George W. Bush responded by referring to the Taiwan Relations Act, "which says we will help Taiwan defend herself if provoked.

The United States must be wary of China's subtle rhetoric. The PLA understands only one language—the language of military strength to force one's will upon another, just as communism was forced on China through the barrel of a gun as stated by Mao Zedung. While China maycloak its intent in soft words of diplomacy, in 1995 and 1996 it launched ballistic missiles off the coast of Taiwan in a show that intimidated it and the Far East.

China's diplomatic overtures to Taiwan lack sincerity. Vice Premier Qian Qichen's remarks on Taiwan in January 2002, supposedly extending goodwill to Taiwan and interest in holding talks, were apparently intended as propaganda to divide Taiwan's president from his party, and create an impression of goodwill in advance of our president's visit.

Shortly after Qian's remarks, China's Vice Foreign Minister Li Zhaoxing firmly repeated China's demand that Taiwan accept China's view of "one China" before it would negotiate with Taiwan's duly elected democratic government. He suggested how Qian's remarks did not represent a major softening of China's position and demand for eventual reunification. He further noted that it would be the most important topic of our Bush's visit.

China's overtures to Taiwan need to be understood in the context of its United Front strategy seeking to isolate Taiwan, and divide Taiwan's ruling DPP party by playing on the economic interests of DPP members who may have business relations with China. In addition, China is continuing to entice Taiwan to invest in it, seeking economic and technological growth.

In his February Senate testimony, Mr. Tenet warned how China's arms buildup directed at Taiwan represented an increasing risk to the United States. What may not be as apparent is how China's buildup of intermediate and long-range ballistic missiles, including the road-mobile, solid-fuel DF–31 ICBM, threaten the United States and U.S. forces in the Pacific.

These intermediate and long-range ballistic missiles form part of China's Long Wall Project as explained by the Taipei Times in May 2001:

The Long Wall Project is basically a deterrent against the US' fighting forces in the Pacific . . .

While the use of ballistic missiles against U.S. naval vessels may seem implausible, it forms part of China's military strategy, seeking to counter U.S. strengths by exploiting its vulnerabilities. Moreover, it is feasible as should be realized by the accuracies the United States obtained from its Pershing II intermediate-range ballistic missile equipped with a radar-guided terminal seeker.

The United States had no defense against DF–31 ICBM. The U.S. Navy has no defense against the DF–31, nor does it have any defense against China's short and intermediate-range ballistic missiles, which can threaten American forces and bases in the Far East and Pacific.

China's probable attainment of an operational capability with its DF–31 ICBM by the end of December 2001, and its probable deployment of the DF–31 at two or more bases in 2001 should be of grave concern to the United States.

China recognizes how the United States and its armed forces are underarmed from ballistic missiles, with the exception of the short-range Patriot, which is inadequate against intermediate and long-range ballistic missiles. China plans to exploit this weakness with a maximum of surprise.

To support its use of ballistic missiles in conventional warfare, even against ships, China has not only developed accurate ballistic missiles, it is building reconnaissance satellites. These satellites include the Ziyuan–1 and Ziyuan–2 earth resource satellites believed to be for observing foreign military forces. The ZY–2, launched on September 1, 2000, carries a camera with photographic resolution of about nine feet. Other Chinese reconnaissance satellites include the Haiyang-1 (HY–1) ocean color surveillance satellite expected to be launched by June 2002, and its follow on Haiyang-2 (HY–2).

Accurate ballistic missiles and the ability to observe U.S. forces from space will give China the potential ability to attack U.S. ships at sea in and port. This capability is being enhanced by China's development of an integrated command and control system called Qu Dian, expected to improve communications satellite launched on January 26, 2000. Qu Dian, considered a major force multiplier, is similar to the U.S. Joint Tactical Information Distribution System, or JTIDS, and boasts a secure, jam-resistant, high capacity data link communication system for use in tactical combat. In addition to its potential use GPS and Glosnas satellite navigation, has developed its own Beidou navigation satellites.

Along with a integrated command and control system, China's improvements in inertial and satellite-aided navigation systems for missiles with potential breakthroughs in ballistic missile terminal guidance will give it a new form of precision attack, faster than relying on cruise missiles or aircraft.

The effect of China's ballistic missiles delivering a surprise blow must not be underestimated. This type of attack, capable of being carried out with non-nuclear warheads, represents a new form of conventional warfare for the 21st century. Such an attack could occur in an hour. It could not only result in a major loss of U.S. military strength, it could create a sudden tide of momentum for China's regular forces to successfully challenge the United States.

The comparison would be the German blitzkrieg unleashed against France in 1940. U.S. forces would be unlikely to respond in an effective manner, especially as the United States has not taken vigorous steps to counter its vulnerability to ballistic missiles.

The January 2002 CIA Report on Foreign Ballistic Missile Threats and Developments noted the transforming effect of China's ballistic missile forces as applied to its buildup of short-range ballistic missiles near Taiwan:

China's leaders calculate that conventionally armed ballistic missiles add a potent new dimension to Chinese military capabilities, and they are committed to continue fielding them at a rapid pace. Beijing's growing intermediate-range ballistic missile forces provide China with a military capability that avoids the political and practical constraints associated with the use of nuclear-armed missiles. The latest Chinese SRBMs provide a survivable and effective conventional strike force and expand conventional ballistic missile coverage.

This transformation applies to China's intermediate and long-range ballistic missiles as well, providing China with a capability for threatening the United States and its armed forces.

This development of China's military strategy was noted in the June 2000 Department of Defense Report on China's military power: Chinese strategists believe that if a war against a technologically superior foe breaks
out, the enemy likely will deploy forces rapidly and then launch a massive air campaign. While the enemy is assembling its forces, there exists a window of opportunity for preemptive strike. This approach—‘‘striking the enemy by striking first’’—is viewed as an effective method to offset or negate the advantages possessed by a more advanced military foe.

The only possible defense against China’s ballistic missile threat is a strong and effective U.S. ballistic missile defense. This defense, to be effective against China’s development of decays, multiple warheads, and other counter-measures, needs to focus on the deployment of a space-based defense building on the research and development conducted under the Strategic Defense Initiative during the Reagan administration and his successor’s administration.

The advantages of a space-based ballistic missile defense include global coverage, boost phase interception, and multiple opportunities for intercepting a ballistic missile. These advantages are not inherent with a ground-based interceptor defense, which is currently under development, which will have limited coverage for intercepting a ballistic missile, a transformation that can be seen in its DF–31 ICBM apparently aimed at U.S. forces.

Mr. Speaker, such an attack from China directed at U.S. forces could come before the end of this year. And strongly urge you and your colleagues to take immediate action to overcome our vulnerability and include steps toward the support of a space-based ballistic missile defense.

Mr. Speaker, I hereby submit for the Record various sources supporting my remarks.

Mr. Speaker, I have also submitted these identical observations and conclusions to the President by letter which I have posted today.

WORKS CITED

TRIBUTE TO DR. ALEXANDER E. BAILEY

HON. SANDER M. LEVIN
OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 14, 2002

Mr. LEVIN. Mr. Speaker, I rise today to reflect on the work of Alexander E. Bailey, Ed.D., as he is honored for his exemplary community work by the Oak Park Business and Education Alliance on March 22, 2002. The Oak Park Business and Education Alliance was established in 1993 and is a non-profit organization of educators, businesses and government entities that provide assistance to the Oak Park School District to improve the educational experience of students.

Dr. Bailey’s life of service began in the military, where he was a specialist in the U.S. Army Security Agency. After his military service, Dr. Bailey chose education as his field of study. Dr. Bailey began his career as a teacher at Paul Washington High School in Philadelphia, Pennsylvania. In 1971, he received a Bachelor of Arts degree in Elementary Education; in 1972, he received a Masters of Arts degrees in Counseling; in 1980, he became an Education Specialist, and in 1983, he earned a Doctorate of Education.

After serving in various educational positions on the east coast he came to Michigan’s Oak Park School District. Since 1991, Dr. Bailey has been a dynamic leader of the Oak Park School District serving as the Superintendent. Dr. Bailey is the author of several published works and presentations, some of which include “Strategies for Effective Alternative Education Programs,” “Do You Know Your Child?” and “Appeal Motivation That Works.”

Dr. Bailey’s professional and civic affiliations are numerous, among them the African Task Force for the city of Oak Park, The Children’s Center, African-American Superintendent’s Group, the American Personnel and Guidance Association and the Oak Park Business and Education Alliance.

Mr. Speaker, I ask my colleagues to join me in honoring Dr. Bailey for his many accomplishments and service to the community of Oak Park and the Business and Education Alliance.

HONORING DAVID C.G. KERR

HON. JIM DAVIS
OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 14, 2002

Mr. DAVIS of Florida. Mr. Speaker, I rise in honor of David C.G. Kerr, a deeply respected lawyer in the Tampa Bay community who recently lost his battle with Lou Gehrig’s disease.

David, a veteran of the Korean War, worked at Tampa’s Macfarlane, Ferguson and McMullen for nearly 40 years, specializing in
transportation, admiralty and corporate law. He served as lead corporate counsel for a number of key Tampa real estate projects, including Harbour Island, Tampa Palms and the Ice Palace.

David quickly became known for his great intelligence and dedication to his job. He successfully argued two cases before the U.S. Supreme Court, one of which established a principle in international admiralty law, and he served as his firm’s chairman from 1990 to 1993. David also spent 39 years as general counsel and executive director of the National Juice Products Association, the industry’s largest trade association.

David will be remembered across the state for his work outside of the office. He served Florida’s business and legal communities in countless ways, as President of Hillsborough County Bar Association in 1987, on the Florida Bar Association’s board of directors in 1971, as president of the Greater Tampa Chamber of Commerce in 1979, and chairman of its Committee of 100 in 1977. Later, at the request of Governors Bob Martinez and Lawton Chiles, David headed the Florida Transportation Commission and served as a member of the commission from 1987 to 1999. In this role, David succeeded remarkably in minimizing politics and moving Florida’s transportation projects forward.

Close to home, David was a member of the University of Tampa’s Board of Trustees, and was an active member of St. Andrew’s Episcopal Church and Ye Mystic Krewe of Gasparilla.

I remember David as a wonder role model for young people who desired to succeed in their business or profession and serve the community. David did everything with a dignity and grace that brought out the best in everyone with whom he worked. I am eternally grateful for the constant guidance and encouragement he gave me starting in my years as a teenager. David similarly touched the lives of hundreds of young people.

On behalf of the people of Tampa Bay, I would like to extend my heartfelt sympathies to David’s family.

PROCLAMATION RECOGNIZING CAPTAIN VERNON RICHARD—LADDER NO. 7

HON. MAJOR R. OWENS
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. OWENS. Mr. Speaker, as a tribute to Captain Vernon Richard of Ladder Number 7, a member of the Vatican’s Society and one of the fallen heroes of September 11th, I would like to insert the following proclamation into the Record:

Whereas, September 11, 2001 was a day of horror and tragedy that will forever live in the memory of American, and;

Whereas, More than 300 New York City Firefighters lost their lives in the effort to save others, and;

Whereas, Congressman Major R. Owens and the people of the 11th Congressional District salute the bravery and dedication of all who gave their full measure of devotion, and;

Whereas, I have determined it appropriate to highlight the courage and valor of individuals and groups in a variety of forms and ceremonies. Now therefore be it

Resolved: That on this 11th Day of March, Two Thousand and Two, Congressman Major R. Owens, and representatives of the people of the 11th Congressional District, pause to salute our great American Firefighters who died at the World Trade Center on September 11, 2001.

That the text of this resolution shall be placed in the Congressional Record of the United States House of Representatives. Given by my hand and seal this 11th day of March, Two Thousand and Two in the Year of our Lord.

Personal Explanation

HON. RUBEN HINOJOSA
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. HINOJOSA. Mr. Speaker, I regret that I was unavoidably detained in my Congressional District. Had I been present, I would have voted “yes” on Rollcalls 53, 54, 56, 57, 58, 59, 60, 61, 63, and 64. I would have voted “no” on Rollcalls 55 and 62.

TOBACCO LIVELIHOOD AND ECONOMIC ASSISTANCE FOR OUR FARMERS ACT OF 2002

HON. TOM DAVIS
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. DAVIS of Virginia. Mr. Speaker, I am pleased to be an original cosponsor of the Tobacco Livelihood and Economic Assistance for our Farmers Act of 2002. This bill couples my legislation, the National Youth Smoking Reduction Act—which would allow the Food and Drug Administration to regulate tobacco—with legislation to end the current tobacco marketing quota program. I would also like to thank my colleague Mr. McIntyre, the sponsor of this bill, for his hard work and leadership.

For someone who never touched a cigarette, I now know a great deal about tobacco. It is an extremely complex issue in which the public health, the needs of farmers, and the rights of Americans must all be taken into consideration. Often, it appears an impossible task to bring the stakeholders together; nevertheless, I am convinced there is a solution. When I introduced the National Youth Smoking Reduction Act last June, it was my intent to put forward the idea that we could devise a regulatory scheme to keep tobacco products away from those too young to legally purchase them while simultaneously maintaining the rights of adult tobacco growers.

This bill expands upon that concept by demonstrating that a solution for our farmers is complementary to the other elements of this debate.

For centuries, tobacco has been a cornerstone of the agricultural economy of the Commonwealth of Virginia and other tobacco growing states. American tobacco has always been regarded as the highest quality tobacco available. Despite this fact, American growers are increasingly vulnerable to lower quality—but less expensive—tobacco. While quota marketing system has been a valuable tool to support and stabilize the income of the tobacco farmer, it has also created an artificial cost that has made it all the more difficult for the American grower to compete. Growers and communities dependent on tobacco for their economic survival; however, now find themselves trapped—forced to continue growing an increasingly unprofitable crop without the necessary resources to transition away from the current dysfunctional system.

Ending the quota is something we must do in order to save the economic viability of our tobacco farmers. We must also recognize that the quota system has created an asset—the quota itself—the value of which must be compensated to those who own or use it. Farmers have been increasingly supportive of the idea of a buy-out, as was the President’s Commission on Improving Economic Opportunity in Communities Dependent on Tobacco Production While Protecting Public Health in its report published last year. Until now, the question of how to fund a buy-out was always a major obstacle. This bill, however, takes an innovative approach by proposing to fund the buy-out through the imposition of user-fees. These user-fees will initially provide the resources to fund both FDA regulatory actions and the buy-out. Once the buy-out has been completed, the user-fees will be used to fund FDA actions and other tobacco-related programs.

I realize it is a mistake to consider tobacco growers as a homogeneous lot. The needs and concerns of flue-cured growers differ from the needs and concerns of burley growers. The needs and concerns of Virginia growers are not the same as those of North Carolina growers. However, a vital concern to all growers is the question—what will the post-buy-out world hold for me? We have taken steps in this bill to ensure fair compensation so that those who choose to stop growing tobacco can do so. For those that choose to continue to grow tobacco, not only will they be compensated for their quota’s loss of value, but they are guaranteed that tobacco production will remain in those areas where it has been traditionally grown.

I have no tobacco farmers in my district, but I am a Virginian. Tobacco is a part of our culture and was the crop that made the Colony of Virginia economically viable almost four hundred years ago. As we transitioned from colony to commonwealth, tobacco remained a keystone to our way of life. To this very day, the golden leaf adorns our statehouse. With this in mind, I say to the small farmers and rural communities whose fortunes have been tied to tobacco for generations, I will continue to work with you to ensure tobacco can remain a viable option for you. I recognize more may be necessary to keep all production from transferring to large farms. I am confident that this bill, with the help of the Virginia delegation, the Virginia Farm Bureau, and all organizations dedicated to the well being and prosperity of tobacco growers in the

Extensions of Remarks

Mr. HINOJOSA. Mr. Speaker, I regret that I have voted 'nay' on Rollcalls 53, 54, 56, 57, 58, 59, 60, 61, 63, and 64. I would have voted “no” on Rollcalls 55 and 62.
Commonwealth of Virginia that our small tobacco farms can survive and prosper in a post-buy-our-world.

In closing, let me state that I am eager to start the debate on tobacco. I hope my colleagues will join in so that a constructive, beneficial solution can be crafted.

CONGRATULATING SAINT PATRICK ROMAN CATHOLIC CHURCH IN EAST CHICAGO, INDIANA

HON. PETER J. VISCLOSKY OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 14, 2002

Mr. VISCLOSKY. Mr. Speaker, it is my distinct pleasure to congratulate St. Patrick Roman Catholic Church in East Chicago, Indiana, on its 100th anniversary as a congregation, on March 17, 2002, the Feast Day of St. Patrick. The anniversary celebration will begin with an afternoon Mass celebrated by Bishop Dale J. Melczek. Following the Mass, the parishioners will enjoy an evening filled with entertainment and dancing as they observe this milestone in the church’s history.

Nestled among the smokestacks of the steel mills in the Indiana Harbor, St. Patrick Church has risen from its humble beginnings to serve as a cornerstone of the East Chicago community. Founded in 1902, the parish of St. Patrick was the first Roman Catholic Church established in the Indiana Harbor. Under the guidance of Father Thomas Mungoven, eight families met for Sunday Mass in Klein Hall on Michigan Avenue. With the strength of their faith to bolster their spirits, this small congregation constructed a church of their own. On January 25, 1903, the parish of St. Patrick celebrated its first Mass in its new home. By 1909, the parish grew to include 87 families from Ireland and St. 100th anniversary as a congregation.

Over the years, as other ethnic groups were drawn to the area by the opportunities offered in the steel mills, the composition of East Chicago grew more diverse. Irish and Slavic families now welcomed Hispanic and African-American Catholics into the congregation. In 1986, in an effort to involve new parishioners in Sunday services, Father John Ambre instituted Masses in Spanish.

As the parish mission statement attests, the members “strive to be a welcoming community celebrating our cultural diversity; foster harmony and reconciliation among parishioners and the community . . . .” Embracing the Christian ideals of loving thy brothers and sisters and honoring them neighbors, the parishioners have opened the doors of St. Patrick to hundreds of a spiritual home. When other ethnic parishes in East Chicago closed, St. Patrick welcomed these Catholics with open arms. In 1987, when St. Francis of Assisi Parish closed, St. Patrick installed the cornerstone of this church in its vestibule walls, a symbolic gesture affirming the acceptance of these new members into the church community. Again, when Assumption of the Blessed Virgin Mary Parish closed in 1998, rather than allowing the church to fade from the memories of its former parishioners, St. Patrick added the altar to its own sanctuary. St. Patrick represents more than a building where worshippers meet once a week for a service; it truly embodies the tenets of the faith it espouses.

Since 1997, the current pastor, Father Fernando de Cristobal, has used his position as a spiritual leader to promote various cultural activities in order to better educate the entire congregation. For the Feast of Our Lady of Guadalupe, a holy day revered in Mexico, the celebration included Las Mananitas, offerings of songs, offered to the Virgin Mary and mariachi music, followed by a midnight Mass. On June 24th, the parish honors Saint John the Baptist, the patron saint of Puerto Rico, with a bilingual mass and a banquet. Keeping with this spirit of diversity, the centennial celebration will feature Irish dancers and bagpipes in an effort to pay tribute to the parish’s Irish heritage.

Mr. Speaker, I ask you and my other distinguished colleagues to join me today in commending the parish family of St. Patrick Church, under the guidance of Father Fernando de Cristobal, as they prepare to celebrate the 100th Anniversary of their founding. All past and present parishioners and pastors should be proud of the numerous contributions they have made out of love and the devotion they have displayed for their church.

TRIBUTE TO THE DEPARTMENT OF VETERANS AFFAIRS ON THE THIRTEENTH ANNIVERSARY OF THEIR BECOMING A CABINET DEPARTMENT

HON. CHRISTOPHER H. SMITH OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 14, 2002

Mr. SMITH of New Jersey. Mr. Speaker, I rise today to mark the thirteenth anniversary of the Department of Veterans Affairs becoming a Cabinet Department. As Chairman of the House Committee on Veterans’ Affairs, I am privileged to work with thousands of dedicated employees of the Department to improve the delivery of benefits and services to our nation’s 25 million veterans and their families.

On October 25, 1988, President Ronald Reagan signed the Department of Veterans Affairs Act (H.R. 3471 in the 100th Congress), legislation I cosponsored and strongly supported. This Act led to the Veterans Administration (VA) becoming the 14th federal Department of the Executive Branch.

Subsequently, on March 15th, 1989, thirteen years ago this week, the Honorable Edwin Bergen was sworn in as the first Secretary of Veterans Affairs. Finally, the nation’s veterans had a full and permanent seat at the President’s Cabinet table.

My heart is with the parishioners, the clergy and staff of Our Lady of Peace who witnessed this brutal violence. We must all say a prayer and light a candle for the community near Our Lady of Peace that was affected by this tragedy. The neighbors, police, emergency personnel and the nearby schools were all senselessly victimized as well.

I was in the vicinity of the church when the shooting occurred. Many of the local roads were blocked; those living nearby were basically under house arrest. Police covered the streets as they looked for the shooter, who had taken cover in a nearby home. Four hundred schoolchildren were being held indoors at the church school.

This isn’t a new occurrence. Random acts of gun violence against innocent people happen all the time. A lot of Americans don’t think it can happen to them, but my neighbors and I know all too well the pain that gun violence brings. It has happened everywhere: on trains, in schools, homes, the workplace. And now, in a place of worship.

It’s unbelievable, yet it’s true.

I have processed the details of what happened yesterday. I’m not standing here on a soapbox. I’m not talking about a certain piece of legislation.

I’m talking about safety. I’m talking about our children’s safety, our neighbors’ safety, the safety of different religious worshipers.

I think it’s obvious. Gun violence wreaks havoc in our lives in various ways, not the least of which is the loss of safe places in our community. If we can’t be safe at church, at school, on commuter trains, in our workplaces or at home, where does that leave us?

I urge you to seriously consider the havoc gun violence creates in our society. Better, consider its effect on your community. Please take a minute to think about it before it’s too late.

May God be with us all.

Extensions of Remarks

March 14, 2002

CONGRESSIONAL RECORD — Extensions of Remarks
The Department of Veterans Affairs is the second largest federal agency in terms of employees, with over 220,000 dedicated men and women providing a range of vital benefits and services for veterans around the country. The VA operates the largest integrated health network in the world, comprised of 163 medical centers, over 850 Community Based Outpatient Clinics, 135 nursing homes, 43 domiciliaries and 73 comprehensive home-care programs. The VA continues to provide quality care to millions of veterans, their families and their survivors.

In addition, the VA operates one of the most important medical research programs in the world, with more than 15,000 research projects at 115 VA medical centers. The Veterans Health Administration (VHA) is on the cutting edge of research on matters ranging from brain trauma to hepatitis C to Alzheimer’s disease. The VHA also pays particular attention to the wounds and illnesses of soldiers, sailors, marines and airmen, and recently opened two new Centers for the Study of War-Related Illnesses, one in Washington, DC, and the other in my home state of New Jersey.

The Department of Veterans Affairs maintains a national network of veterans’ cemeteries for our nation’s veterans, consisting of 119 national cemeteries in 39 states and Puerto Rico and also administers six life insurance programs with 3.2 million policies in force having a face value of $22 billion.

The Veterans Benefits Administration (VBA), created as part of the new Department of Veterans Affairs, oversees a myriad of benefits programs for veterans, including disability compensation, education and training, job placement, home loans, and life insurance. Over 2.7 million veterans receive disability compensation payments for wounds or illnesses resulting from their service to our nation, and an additional 570,000 widows, children and surviving parents of deceased veterans also receive monthly benefit payments.

Mr. Speaker, the VA also operates the GI Bill program, which has provided college education and training to more than 20 million veterans since its creation in 1944. This historic program not only changed the way America looked at veterans benefits, it also changed the nature of higher education and helped to create the modern middle class. In addition, the VA operates the veterans home loan program, which has helped over 16 million former servicemen and women buy their own homes.

Since the creation of the original Veterans Administration in 1930, our nation has recognized the unique contributions and sacrifices of the men and women who have defended our freedom at home and abroad. Today, the Department of Veterans Affairs, ably led by Secretary of Veterans AffairsAnthony J. Principi, continues to provide the benefits and services that our nations veterans have earned.

On the wall outside the VA’s main office in Washington, DC, the words of President Abraham Lincoln are inscribed on the building: “To care for him who has borne the battle, and his widow and his orphan.” This is the mission that draws so many committed men and women to the VA.

Mr. Speaker, it is an honor for me to work on behalf of our nation’s veterans and I want to pay tribute to the Department of Veterans Affairs, and especially all of their gifted and dedicated employees, on the 13th anniversary of their becoming a full Cabinet Department of the federal government.

---

**GIRL SCOUTS**

**HON. HEATHER WILSON**

**OF NEW MEXICO**

**IN THE HOUSE OF REPRESENTATIVES**

**Thursday, March 14, 2002**

Mrs. WILSON of New Mexico. Mr. Speaker, I rise today to speak in support of a world-class organization that has achieved world-class results.

Founded in 1912 on the simple belief that all girls should be given the opportunity to develop physically, mentally, and spiritually, Juliette Gordon Low assembled a meeting of 18 girls in Savannah, GA. Today, the Girl Scouts of the USA has grown into an organization with membership numbering 3.8 million, far and away the largest organization for girls in the world.

I would especially like to praise the Girl Scouts of Chaparral Council, the local Girl Scout troop from my home district. Chartered in 1958 and serving over 6,000 girls and 2,000 adult volunteers, the Girl Scouts of Chaparral Council have been teaching girls in my district the ideals of character, conduct, and patriotism for almost 50 years. Organizations like the Girl Scouts of Chaparral Council that make me proud to represent the citizens of the first district of New Mexico.

The Girl Scouts of the USA is the world’s preeminent organization dedicated solely to girls, where in a positive, nurturing environment, girls build character and skills for success in the real world. In partnership with committed adult volunteers, girls develop qualities such as strong moral values, leadership, a social conscience, and conviction about their own potential and self worth—values that will serve them well the rest of their lives.

Being involved with Girl Scouts enables girls to develop self-confidence and expertise, take on responsibility, think creatively, and act with integrity. Girl Scouts learn the characteristics essential being good citizens and great leaders.

The U.S. Congress chartered the Girl Scouts of the USA on March 16th, 1950, and at present, there is a “Troop Capitol Hill” made up entirely of Congresswomen who are honorary members.

For 90 years, Girl Scouts of the USA has had a proven track record of empowering girls to become leaders, helping adults become positive role models and mentors for children, and helping to build strong communities. Girl Scouts of the USA truly is a place “where girls grow strong!”

**EVIDENCE IN CHITHISINGHPORA FAKE, GOVERNMENT ADMITS**

**HON. DAN BURTON**

**OF INDIANA**

**IN THE HOUSE OF REPRESENTATIVES**

**Thursday, March 14, 2002**

Mr. BURTON of Indiana. Mr. Speaker, back in March 2000, just before former President Clinton visited India, 35 Sikhs were massacred in the village of Chithisinghpura in Kashmir.

At the time, many people accused the Indian government of this atrocity while the Indian government laid the blame on Pakistani-sponsored militants. A study by the Movement Against State Repression (MASR) and the Punjab Human Rights Organization (PHRO) showed that the Indian government’s own forces had killed these innocent Sikhs, a conclusion confirmed by a study from the international Human Rights Organization (HRO) and by an article in the New York Times Magazine by Barry Bearak. Yet the Indian government maintained the fiction that Pakistanis carried out the massacre. They killed five young Kashmiris, claiming they were responsible, then were forced to admit that they were not. Then five other Kashmiris were arrested and charged with the crime.

On March 8, Reuters news service reported that the chief minister of Kashmir, Farooq Abdullah, admitted that the evidence against these Kashmiris was faked. That’s right. Mr. Speaker, the “world’s largest democracy” faked evidence to falsely convict some Kashmiris of the massacre of these Sikhs in order to set these two minorities against each other. Fortunately, it has not worked. Last year, some Indian troops were caught red-handed trying to set fire to a Gurdwara and some Sikh homes in Kashmir and they were overwhelmed by Sikh and Muslim villagers.

Remember also, Mr. Speaker, that the ruling BJP is part of a militant Hindu nationalistic organization the Rashtra Swayamsewak Sangh (RSS), which published a booklet last year on how to implicate minorities in false criminal cases.

Given the government’s admission of fraud in this case, how many other cases have they faked? They admit to holding 52,288 Sikhs as political prisoners, according to a MASR report. Amnesty International says that tens of thousands of other minorities are also being held as political prisoners in “the world’s largest democracy.” How many cases have been faked against these prisoners?

Mr. Speaker, it is shameful that the evidence in the Chithisinghpura massacre was faked, and it is shameful that it needed to be. However, the people who carry out atrocities like this massacre are not being punished. Instead, the state either finds scapegoats like the five Kashmiris it is currently holding or it does nothing. It has found a scapegoat in the killing of Graham Staines, even though every report at the time reported that a mob of people chanting Hindu slogans burned Mr. Staines and his two sons. No one has been punished in the murder of former Akal Takht Jathedar Gurdev Singh Kauneke, or the kidnapping and murder of Jaswant Singh Khalar, who was killed in police custody.

I call on the Indian government to punish those who tampered with the evidence in this case immediately. I also call on the United States to cut off aid with India until they allow people to enjoy basic human rights and a fair, impartial system of justice. We should also press for a free and fair plebiscite on independence for the people of Kashmir, Kashmir, Nagaland, and the other countries seeking their freedom. That is only way to protect their rights and end this kind of abuse.
IN HONOR OF DR. STEPHEN LIPMAN, SENIOR PASTORAL COUNSELOR FOR HOSPICE OF PALM BEACH COUNTY

HON. MARK FOLEY
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. FOLEY. Mr. Speaker, I rise today to honor a man who has been a true asset to his community. His caring and guidance have touched many families and friends in need of support.

I speak of Dr. Stephen Lipman, Senior Pastoral Counselor for Hospice of Palm Beach County for the past 19 years. Fortunately, Steve is not retiring, but is offering his services as the Pastor of the Jupiter Medical Center.

We all know of the fine work Hospice offers and what kind of a person it takes to counsel the individuals and their families whose loved ones are in the transition for their final stages of life.

Dr. Lipman’s services have gone beyond that: whether it is counseling young children, lending kindness to the terminally ill or simply offering a smiling face, you can always count on Steve. He exemplifies all that is good in an individual.

I would like to join the communities of South Florida and thank Dr. Lipman for his sincere dedication and years of service.

Mr. Speaker, please let the record reflect the 107th Congress’ appreciation for all he has done.

HONORING MOLLIE TAYLOR STEVENSON, SR. AND MOLLIE TAYLOR STEVENSON, JR.

HON. KEN BENSEN OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 2002

Mr. BENSON. Mr. Speaker, I rise to honor Mollie Taylor Stevenson, Sr., and her daughter, Mollie Taylor Stevenson, Jr., who are the first living African-American women and native Americans to be inducted into the National Cowgirl Museum and Hall of Fame. The organization honors and documents the lives of women who have distinguished themselves by exemplifying the pioneering spirit of the American West. The Stevensons were inducted during a ceremony at the Renaissance Worthington Hotel in Ft. Worth, Texas, on November 9, 2001.

Friends and family know them as “Mollie” and “Lil Mollie.” The 89-year-old Mollie, Sr. and the fifty something, Mollie, Jr., have a close bond that started before they were born. Their parents, the late Mollie Stevenson, Sr. and Mollie Stevenson, Jr., met at Fisk University in Nashville, Tennessee.

Human rights groups have frequently accused Indian security forces of abuses such as summary killings and torture. India has always denied systematic human rights abuses. Many allegations are investigated and the guilty punished.

The killing of 36 Sikhs in remote Chitisingpora village in the violence-racked state of Jammu and Kashmir in March 2000 occurred hours before a visit by U.S. President Bill Clinton to India and drew strong condemnation. Indian newspapers have alleged that soon after the massacre security forces picked up five innocent youths, killed them in a stage-managed gun battle, burned their bodies and then claimed they were “foreign militants” responsible for the Sikhs’ deaths. The bodies of the five youths were exhumed and forensic samples taken only after massive demonstrations in Kashmir by protesters. Kashmir state chief minister Farooq Abdullah told the legislature on Friday “it appears fake samples were sent to laboratories and apologized for the injustice done to the people for which I feel ashamed”.

The sample was sent to establish the falsified, accused the state in an editorial on Friday of a cover-up. More than 33,000 people have been investigated and the guilty punished.

India has sought either independence or union with Pakistan, blamed India for the massacre of the Sikh killings as belonging to the militant separatist groups Hizbul Mujahideen.

Both groups denied responsibility and, with Pakistan, blamed India for the massacre. The sample was sent to establish the Kashmir independence cause during Clinton’s visit. The laboratories to which the samples were sent to establish the youths’ identity said they were mislabeled and showed serious discrepancies. Abdullah said a judge would lead the probe, which would take two months. He also said fresh tests samples would be taken under the supervision of police and doctors. The Times of India, one of the newspapers which investigated reports that the samples had something to hide, foisting the charge of terrorism on Indians.

In 1940s and early 50s, the ranch was home to the Dallas Police Academy and was much like the ranch wars seen in the old westerns. Cattle were stolen and attempts to acquire the valuable herds became a frequent occurrence. Mollie, Jr. took on chalengers in and out of court and preserved for her descendants their right to the Taylor-Stevensoon lands.

During segregation, Mollie, Sr., and her husband Big Ben, created a haven for African-American children barred from all but one of the city’s parks. At the Stevenson ranch children could ride horses, play with the ranch animals, eat farm-fresh meals, and spend weekends and summers on the ranch. The Stevensons became well known for their philanthropy and generous spirits. Believing that education was very important, they not only educated their own children, but countless others with food, books, tuition payments and entire college educations. There are regularly scheduled field trips to the ranch and museum, which provides an opportunity to those who would not otherwise have a chance to experience the true nature of a working ranch.

Mollie, Jr., worked as a professional model in Houston, Kansas City and New York, but she was drawn back to the place where she and her mother worked side by side with her mother to preserve their legacy. She established the American Cowboy Museum, a 501(c)(3) organization in 1987. It honors the contributions to Western culture of African Americans, Hispanics, Native Americans, and European immigrants. The museum has been featured on radio and television and in articles in Ebony, Essence, Texas Highways, Horse Talk and many local newspapers. She has been honored by numerous schools as a motivational speaker and event coordinator. Mollie, Jr. is also a journalist and an active volunteer with the Sugar Shack Trailride and various other rodeo trail ride associations. She is also a member of the Speakers and Black Go Texan Committee of the Houston Livestock Show & Rodeo, the Professional Black Cowboy & Cowgirl Association, the Landowners of Taylor Ranch, and her favorite, the Round L Riding & Roping Club. To acquaint a new generation with this rich history, Mollie offers school tours, leather crafts for visiting children, lectures, a traveling exhibit with quilt display, horseback riding, a mobile petting zoo, and living history presentations. She also encourages young people to consider careers in agribusiness and land ownership and sponsors FFA and 4-H students.

The Taylor-Stevenson Ranch is a treasure that seven generations of the family have fought to preserve and to enable future generations to live or maintain various areas. The 150-year-old working ranch is one of the oldest Black-owned ranches in the United States, complete with an assortment of livestock. In the shadow of the 4th largest city in the county, the Stevensons have carved out a legacy that can provide a momentary escape from the hurried pace of the city. About 100 tours and field trips are conducted each year. Heritage tours and family reunions are also a part of the activities arranged by the ranch. During the 1930s and early 50s, the ranch was home to Sky Ranch, an oil field worked by Tuskegee graduates who were mechanics for the famed World War II Tuskegee Airmen.

The property is also officially listed as a Texas historical landmark.
Century Ranch, an honor reserved for ranches operated by the same family for more than 100 years and certified by the Commissioner of the Texas Department of Agriculture. The Ranch continues to be run with family love and values. Mollie Stevenson, Sr. is still the matriarch of the ranch, cared for by six of her children and their families who live on the property. The Black Professional Cowboy & Cowgirl Association and also the Black Go Texan Committee recognized Mollie, Sr. as a “Living Legend.”

Mr. Speaker, I congratulate Mollie Stevenson, Sr. and Mollie Stevenson, Jr. who have lived their lives as true stewards of their land and community. They are the driving force behind the ongoing success of the ranch and museum. They stand tall over their corner of history. They have the Girl Scouts of Kentucky, and especially the members of Kentucky’s 4th Congressional District, which I represent. Founded on March 3, 1912, by Juliette Gordon Low in Savannah, GA, the Girl Scouts have earned the admiration of this great Nation. Juliette Gordon Low had a vision. She wanted all young women to be given the opportunity to develop physically, mentally, and spiritually. After 90 years, Juliette Gordon Low’s vision remains the basic mission of the Girl Scouts.

Working as a grassroots organization, the Girl Scouts have changed the lives of millions of girls. Worldwide, the Girl Scouts have over 10 million members, both women and girls, in 140 countries. In Kentucky alone, there are over 44,000 Girl Scouts and 13,000 adult volunteers. And right in the Licking Valley of Kentucky, there are 5,000 Girl Scouts and 1,300 adult volunteers. Mr. Speaker, this is an outstanding organization.

As the Girl Scouts celebrate their 90th anniversary, I would like to conclude with the Girl Scouts promise: “On my honor, I will try: To serve God and my country. To help people at all time, and to live by the Girl Scout Law.” I ask all my colleagues to join me in honoring this incredible organization that has changed the lives of millions of Americans and people throughout the world.

IN HONOR OF THE GIRL SCOUTS’ 90TH ANNIVERSARY

HON. KEN LUCAS
of Kentucky
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 14, 2002

Mr. LUCAS of Kentucky. Mr. Speaker, I rise today in recognition of an outstanding organization that is dedicated to helping girls throughout the world. This organization is the Girl Scouts.

Specifically, I would like to honor the Girl Scouts of Kentucky, and especially the members of Kentucky’s 4th Congressional District, which I represent. Founded on March 3, 1912, by Juliette Gordon Low in Savannah, GA, the Girl Scouts have earned the admiration of this great Nation. Juliette Gordon Low had a vision. She wanted all young women to be given the opportunity to develop physically, mentally, and spiritually. After 90 years, Juliette Gordon Low’s vision remains the basic mission of the Girl Scouts.

Working as a grassroots organization, the Girl Scouts have changed the lives of millions of girls. Worldwide, the Girl Scouts have over 10 million members, both women and girls, in 140 countries. In Kentucky alone, there are over 44,000 Girl Scouts and 13,000 adult volunteers. And right in the Licking Valley of Kentucky, there are 5,000 Girl Scouts and 1,300 adult volunteers. Mr. Speaker, this is an outstanding organization.

As the Girl Scouts celebrate their 90th anniversary, I would like to conclude with the Girl Scouts promise: “On my honor, I will try: To serve God and my country. To help people at all time, and to live by the Girl Scout Law.” I ask all my colleagues to join me in honoring this incredible organization that has changed the lives of millions of Americans and people throughout the world.

HONORING THE GIRL SCOUTS ON THE OCCASION OF THEIR 90TH ANNIVERSARY

HON. JOHN D. DINGELL
of Michigan
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 14, 2002

Mr. DINGELL. Mr. Speaker, I am pleased to rise today to pay tribute to the Girl Scouts on their 90th Anniversary.

The Girl Scouts are the world’s preeminent organization dedicated solely to girls—all girls. In a nurturing environment, girls are able to build character and skills for success in the real world. Girl Scouting began on March 12, 1912, when founder Juliette Gordon Low assembled 18 girls from Savannah, Georgia, for a local Girl Scout meeting. She believed that all girls should be given the opportunity to develop physically, mentally, and spiritually.

Today, with a membership of more than 44,000, that small group of 18 girls from Savannah has blossomed into 3.8 million Girl Scouts nationwide. The Detroit Metro Girl Scouts currently have 32,000 girls involved and it just keeps growing. Not only have the Girl Scouts continued their dedication to building good citizens and leaders, but their organization has established a research institute, received government funding to address violence prevention and is addressing the digital divide with activities that encourage girls to pursue careers in science, math and technology. The Detroit Metro Girl Scouts have set up a program with Lawrence Technological Institute in Detroit, Michigan to further the involvement of young women in the field of technology.

In the Girl Scouts, girls discover the fun, friendship, and power of girls together, through a myriad of opportunities, such as extraordinary field trips, sports skill-building clinics, community service projects, environmental stewardships and numerous other character building activities. They provide young women with the opportunity to build a strong mind, body, and spirit through various programs dealing with creative writing, exercise and several other health campaigns including the Campaign for Tobacco-Free Kids and Child Health Day.

Mr. Speaker, the Girl Scouts are an asset to communities all over the United States. I want to thank them for their tireless effort to provide young women with the personal, emotional and intellectual foundation that is essential for building good citizens and leaders. On the occasion of their 90th Anniversary, I would like to ask all my colleagues to salute the Detroit Metro Girl Scouts and their fellow Girl Scouts across the country.

IN HONOR OF THE GIRL SCOUTS’ 90TH ANNIVERSARY

HON. FORNEY PETE STARK
of California
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 14, 2002

Mr. STARK. Mr. Speaker, I rise today to recognize California State Superintendent of Public Instruction, Delaine Eastin, on the dedication of the Delaine Eastin Elementary School in Union City, California.

Delaine Eastin once stated, “I’ll never stop fighting for children and education, it’s my life’s work.” I want to applaud her dedication to building good citizens and leaders. On the occasion of their 90th Anniversary, I would like to ask all my colleagues to salute the Detroit Metro Girl Scouts and their fellow Girl Scouts across the country.

As State Superintendent, Delaine Eastin has fought for safer and healthier schools, modern facilities, cutting-edge technology, family-school partnerships, teacher training and professional development, tighter graduation requirements, and increased resources for schools.

She is a dedicated advocate for reduced class sizes, improved reading and mathematics instruction, and the implementation of statewide standards, assessment, and increased accountability for what students should accomplish. She has tirelessly advocated for improved library facilities, strong arts programs, and librarians, counselors, and nurses in all California schools.

Delaine Eastin is currently serving her second term as State Superintendent. Prior to this position, she served as an educator, a Union City city councilwoman, and a four-term State Assemblywoman for Southern Alameda County. She was chair of the Assembly Committee on Education, where she voiced early support for the charter school concept and for strengthened technical training.

Delaine Eastin is the recipient of many distinguished awards and recognitions, notably the President’s Crystal Apple Award from the American Library Association, the Distinguished Alumni Award from the University of California, Santa Barbara, the Distinguished Service Award from the Women’s Fund, and the Leader Award from California Leadership.

In addition to the Delaine Eastin Elementary School, a day care center also carries her name. I am honored to congratulate Delaine Eastin on all of her remarkable accomplishments. Her tireless dedication to improving education in California has assured every child in the state the opportunity for a bright and successful future.

TRIBUTE TO CALVIN RAPSON

HON. DALE E. KILDEE
of Michigan
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 14, 2002

Mr. KILDEE. Mr. Speaker, I ask the House to recognize an ordinary man from Flint, Michigan, whose dedication and hard work have benefited many. Calvin Rapsong began his career with the UAW in 1965 working for the Chevrolet Engine plant. Through his employment with Chevrolet Cal earned a Machine Repair Machinist skilled trades Journeyman classification. After graduating from the UAW–GM apprenticeship program, Cal became active in UAW Local 659.

UAW Local Unions are the front lines in providing assistance and better job opportunities for workers. Through the various elected positions Cal held with Local 659, he was able to learn every aspect of the Local’s day-to-day operations. From grassroots political action, solving health and safety problems and negotiating local contracts, Cal was at the forefront of every fight for justice and equity for the members. In 1982 he was the chair of the UAW Negotiating Team that successfully bargained the UAW–GM Master Agreement.

This success led to his appointment to the UAW International staff that same year. Working with a wide variety of organizations and
plants, Cal participated in the global efforts of the UAW to bring fair wages, human rights, and a new approach to international trade to workers in the United States and worldwide. In 1988 Cal was promoted to Coordinator of Active Training Programs at the UAW-GM Human Resources Center. He went on to serve in the UAW GM Department as Administrative Assistant to then UAW Vice-President Stephen Yokich from 1989 to 1995.

Following up his appointment as Assistant Director of Region 1–C in 1995, Cal was named the region’s director in 1998. With these two positions Cal came back to his early roots. His service to the Flint community reflects Cal’s vision of a better life for workers and their families. He serves on the board of many community organizations including the United Way of Flint, Health Coalition.

A huge Spartan fan, Cal attended Michigan State University. Realizing the importance of education and history, Cal now works with Michigan State University. Mott Community College and Lansing Community College to preserve the history of the labor movement and to foster better relations between labor and educational institutions.

Cal Rapson has a deep and abiding respect for the workers in Region 1–C. Having come up through the ranks with most of the workers in this area Cal stated in his director’s report, “I have never been prouder to be from this region than after the events of September 11.” Under his leadership the local unions raised over $500,000 to benefit the victims of that tragedy. UAW Region 1–C workers donated their time and labor to build vehicles for the New York City recovery operation, replacing those destroyed in the collapse of the World Trade Towers.

Mr. Speaker, I consider Cal Rapson a dear friend and superior advisor. I appreciate his expertise, his common sense, his judgment, his guidance, and discernment. The UAW will miss his contributions to the labor movement. I ask the House of Representatives join me in wishing him the best as he begins his well-deserved retirement.

HON. JAMES A. BARCIA
OF MICHIGAN

THE UNIVERSITY OF WISCONSIN—MADISON MALE BASKETBALL TEAM

HON. TAMMY BALDWIN
OF WISCONSIN

PAYING TRIBUTE TO GERTRUDE L. BENZEL
OF COLORADO

Mr. BARCIA. Mr. Speaker, I rise today to pay tribute to Commemorative Bucks of Michigan on the occasion of its 20th anniversary. I am proud to have written during my years as a state lawmaker the resolution that established Commemorative Bucks as the official record-keeping organization for big game hunters in my home state or Michigan. I am prouder still to be a member of such an outstanding organization and to have one of my hunting achievements included in its record book.

As a non-profit organization, Commemorative Bucks of Michigan collects and maintains records on trophy class Whitetail deer, black bear, elk and turkey taken by legal hunting means in the state of Michigan. Under the strong leadership of President Richard Wilt and previous top officials, Commemorative Bucks has become a premier organization in the state for the promotion and advancement of big game hunting. In addition to its record books, the organization's official publication, "Buck Fax," has become an excellent resource for hunters throughout the state.

The magazine provides a top-notch forum for successful hunters on their personal hunting strategies and display their trophies with their own pictures. It also provides a guide for young novice hunters through information and articles included in "Buck Tail Basics." Moreover, in the interest of community service, "Buck Fax" is mailed free of charge to every high school library in the state and to veterans hospitals.

In addition, both through the magazine and through informational events held across the country, Commemorative Bucks takes an active role as an advocate for deer management and the cultivation of wildlife as a renewable resource. As all outdoors enthusiasts understand, hunting greatly benefits our efforts to sustain wildlife populations and foster an environment that will protect our resources for future generations.

Commemorative Bucks also takes an active role in promoting hunters’ rights to ensure that the ability to hunt is not infringed upon by those who fail to understand the importance of hunting.

Mr. Speaker, I ask my colleagues to join me in honoring Commemorative Bucks of Michigan, President Richard Wilt and the entire membership for the significant contributions to hunting made by the organization during the past 20 years. I am thrilled Commemorative Bucks will continue to honor the achievements of Michigan Hunters and act as an advocate for responsible hunting and wildlife management for many years to come.

HON. SCOTT McINNIS
OF COLORADO

Mr. McINNIS. Mr. Speaker, it is with profound sadness that I rise today to recognize and to commend the life and contributions of Gertrude L. Benzel of Glenwood Springs, Colorado. Gert peacefully left us on a Saturday morning, March 9, 2002. Gert was a popular member and patriarch of the community and was often sought by many for her listening ear, advice, and warm smile.

Gert was a native of her state, born in 1911 in Delta, Colorado and resided in Grand Junction. In 1942, Gert, along with her late husband Alex, moved to Glenwood Springs and purchased a sheep ranch. Gert soon thereafter found herself desiring to improve the lives of her fellow community members. She was often found spending her time as President of the State Woolgrowers Association, as a charter member of the Glenwood Springs Golf Club, or at various charitable and volunteer organizations throughout the area. What I find truly amazing is how Gert was able to stay completely involved in her pursuits and still be able to raise a family that appreciated and valued the importance of hard work, honor, and perseverance. She dedicated her children John and Joanne to be respectful and hardworking individuals determined to succeed in their own pursuits. Gert’s influence touched many lives outside of her immediate family and she was a well-revered and loving mother, grandmother, wife, sister, and friend to many.

Gert’s passing is especially hard for me as she was like a second mother to our family. I have such warm memories of those days of my youth that I spent visiting our neighbors, the Benzels. Whether it was hunting with John, handling sheep up Storm King with Shet (Alex), talking with JoAnne, or watching Jeannie with baby Julie, they were all wonderful times. But truly, I will miss that special time with Gert. The ranch, the golf course, the kitchen (baking cakes for any parent’s birthday), the kittens, all of it was good living and we will miss her very much.

Mr. Speaker, it is my privilege to pay tribute to Gertrude L. Benzel for the great strides she took in establishing herself as a valuable leader and patriarch of the Glenwood Springs community. Her dedication to family, friends, work, and the community certainly deserves the recognition of this body of Congress, and this nation. Although Gert has left us, her good-natured spirit lives on through the lives of those she has touched. I would like to extend my regrets and deepest sympathy to Gert’s family and friends during this sad and difficult time. We’re going to miss you Gert.
Thursday, March 14, 2002

Daily Digest

HIGHLIGHTS

House committees ordered reported six sundry measures.

Senate

Chamber Action

Routine Proceedings, pages S1871–S1957

Measures Introduced: Seven bills and one resolution were introduced, as follows: S. 2013–2019, and S. Res. 226. Page S1935

Measures Reported:

S. Res. 206, designating the week of March 17 through March 23, 2002 as “National Inhalants and Poison Prevention Week”.

S. Res. 221, to commemorate and acknowledge the dedication and sacrifice made by the men and women who have lost their lives while serving as law enforcement officers.

S. 1356, to establish a commission to review the facts and circumstances surrounding injustices suffered by European Americans, European Latin Americans, and European refugees during World War II, with an amendment in the nature of a substitute.

Measures Passed:

Export-Import Bank Authorization: Senate passed S. 1372, to reauthorize the Export-Import Bank of the United States, after agreeing to the following amendment proposed thereto: Reid (for Allard) Amendment No. 3029, to establish an Inspector General at the Export-Import Bank of the United States. Page S1956

Energy Policy Act: Senate continued consideration of S. 517, to authorize funding for the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, taking action on the following amendments proposed thereto:

Adopted:

Wyden/Feinstein Amendment No. 3014 (to Amendment No. 2917), to establish within the Department of Justice the Office of Consumer Advocacy. Pages S1892–94

Thomas/Murkowski Amendment No. 3012 (to Amendment No. 2917), to establish an organization to enforce reliability standards with respect to electricity. Pages S1872–82, S1884–92

Rejected:

By 29 yeas to 70 nays (Vote No. 50), Jeffords Amendment No. 3017 (to Amendment No. 3016), to establish renewable electric energy generation standards. Pages S1899–S1914

Pending:

Daschle/Bingaman Further Modified Amendment No. 2917, in the nature of a substitute. Page S1871

Feinstein Amendment No. 2989 (to Amendment No. 2917), to provide regulatory oversight over energy trading markets. Page S1871

Kerry/McCain Amendment No. 2999 (to Amendment No. 2917), to provide for increased average fuel economy standards for passenger automobiles and light trucks. Page S1872

Dayton/Grassley Amendment No. 3008 (to Amendment No. 2917), to require that Federal agencies use ethanol-blended gasoline and biodiesel-blended diesel fuel in areas in which ethanol-blended gasoline and biodiesel-blended diesel fuel are available. Pages S1882–84

Bingaman Amendment No. 3016 (to Amendment No. 2917), to clarify the provisions relating to the Renewable Portfolio Standard. Pages S1887–99
Lott Amendment No. 3028 (to Amendment No. 2917), to provide for the fair treatment of Presidential judicial nominees.

During consideration of this measure today, Senate also took the following action:

By 60 yeas to 40 nays (Vote No. 49), three-fifths of those Senators duly chosen and sworn, having voted in the affirmative, Senate agreed to the motion to waive the Congressional Budget Act of 1974 with respect to Thomas/Murkowski Amendment No. 3012 (to Amendment No. 2917), to establish an organization to enforce reliability standards with respect to electricity. Subsequently, the point of order, that the amendment was in violation of section 302(f) of the Congressional Budget Act of 1974, failed.  

Senate will continue consideration of the bill on Friday, March 15, 2002.

Campaign Finance Reform—Agreement: A unanimous-consent agreement was reached providing for consideration of H.R. 2356, to amend the Federal Election Campaign Act of 1971 to provide bipartisan campaign reform, at 3 p.m., on Monday, March 18, 2002, and that the pending cloture motion on the motion to proceed to consideration of the bill be vitiated.

District of Columbia College Access Improvement Act: Senate concurred in the amendment of the House to Senate amendments to H.R. 1499, to amend the District of Columbia College Access Act of 1999 to permit individuals who enroll in an institution of higher education more than 3 years after graduating from a secondary school and individuals who attend private historically black colleges and universities nationwide to participate in the tuition assistance programs under such Act.

T’ur Shur Bein Preservation Trust Area Act—Joint Referral Agreement: A unanimous-consent agreement was reached providing that S. 2018, the T’ur Shur Bein Preservation Trust Area Act be jointly referred to the Committees on Energy and Natural Resources and Indian Affairs.

Nomination—Agreement: A unanimous-consent agreement was reached providing for consideration of David C. Bury, to be United States District Judge for the District of Arizona, at 9:15 a.m., on Friday, March 15, 2002, with a vote to occur thereon.

Nominations Received: Senate received the following nominations:

Phyllis K. Fong, of Maryland, to be Inspector General, Department of Agriculture.

W. Roy Grizzard, of Virginia, to be an Assistant Secretary of Labor.

Evelyn Dee Potter Rose, of Texas, to be a Member of the National Council on the Arts for a term expiring September 3, 2006.

Celeste Colgan, of Texas, to be a Member of the National Council on the Humanities for a term expiring January 26, 2008.

Wilfred M. McClay, of Tennessee, to be a Member of the National Council on the Humanities for a term expiring January 26, 2006.

Adjournment: Senate met at 9:30 a.m., and adjourned at 8:23 p.m., until 9:15 a.m., on Friday, March 15, 2002. (For Senate’s program, see the remarks of the Acting Majority Leader in today’s Record on page S1957).

Committee Meetings

(Committees not listed did not meet)

APPROPRIATIONS—AGRICULTURE

Committee on Appropriations: Subcommittee on Agriculture, Rural Development, and Related Agencies concluded hearings on proposed budget estimates for fiscal year 2003 for the Department of Agriculture, focusing on the Farm and Foreign Agricultural Services, Natural Resources Conservation Services, Rural Development Mission Area, Research, Education, and Economics, Department Administration, National Appeals Division, Office of the Chief Financial Officer, Working Capital Fund, and Office of the Inspector General, after receiving testimony from Keith Collins, Chief Economist, J.B. Penn, Under Secretary for Farm and Foreign Services, Mark E.
Rey, Under Secretary for Natural Resources and Environment, Michael E. Neruda, Deputy Under Secretary for Rural Development, Joseph J. Jen, Under Secretary for Research, Education and Economics, and Dennis Kaplan, Director, Office of Budget and Program Analysis, all of the Department of Agriculture.

REGIONAL EMERGENCY PLANNING
Committee on Appropriations: Subcommittee on District of Columbia concluded hearings to examine the accountability of funds appropriated last year for regional emergency planning for the Nation's Capital, in order to implement a seamless emergency response plan, a rigorous training program, and a public education plan, after receiving testimony from Deputy Mayor for Public Safety and Justice Margaret Nedelkoff Kellems, and Peter G. LaPorte, Emergency Management Agency, both of the Government of the District of Columbia, Richard A. White, Washington Metropolitan Area Transit Authority, and Michael C. Rogers, Metropolitan Washington Council of Governments, all of Washington, D.C.

APPROPRIATIONS—EDUCATION
Committee on Appropriations: Subcommittee on Labor, Health and Human Services, and Education concluded hearings on proposed budget estimates for fiscal year 2003 for the Department of Education, after receiving testimony from Roderick Paige, Secretary of Education.

APPROPRIATIONS—TREASURY
Committee on Appropriations: Subcommittee on Treasury and General Government concluded hearings on proposed budget estimates for fiscal year 2003 for the Department of the Treasury, after receiving testimony from Paul H. O'Neill, Secretary of the Treasury.

DEFENSE AUTHORIZATION
Committee on Armed Services: Committee concluded hearings on proposed legislation authorizing funds for fiscal year 2003 for the Department of Defense, focusing on the atomic energy defense activities of the Department of Energy, after receiving testimony from Spencer Abraham, Secretary, Everett Beckner, Deputy Administrator for Defense Programs, and Linton F. Brooks, Deputy Administrator for Defense Nuclear Nonproliferation, both of the National Nuclear Security Administration, all of the Department of Energy.

DEFENSE AUTHORIZATION
Committee on Armed Services: Subcommittee on Airland concluded hearings to examine proposed legislation authorizing funds for fiscal year 2003 for the Department of Defense, focusing on Army modernization and transformation, after receiving testimony from Les Brownlee, Under Secretary of the Army; and Gen. John M. Keane, USA, Vice Chief of Staff, United States Army.

ACCOUNTING AND INVESTOR PROTECTION
Committee on Banking, Housing, and Urban Affairs: Committee resumed oversight hearings to examine accounting and investor protection issues raised by Enron and other public companies, including oversight of the accounting profession, audit quality and independence, and formulation of accounting principles, receiving testimony from James G. Castellano, Rubin, Brown, Gornstein and Company, James E. Copeland, Deloitte and Touche, William E. Balhoff, Poslithwaite and Netterville, Olivia A. Kirtley, ResCare, Inc., and James S. Gerson, PricewaterhouseCoopers, all of New York, New York, on behalf of the American Institute of Certified Public Accountants; and Peter J. Wallison, American Enterprise Institute Project on Financial Market Deregulation, and Robert E. Litan, Brookings Institution Economic Studies Program, both of Washington, D.C.

Hearings continue on Tuesday, March 19.

NOMINATIONS
Committee on Banking, Housing, and Urban Affairs: Committee concluded hearings on the nominations of JoAnn Johnson, of Iowa, and Deborah Matz, of New York, each to be a Member of the National Credit Union Administration Board, after the nominees testified and answered questions in their own behalf. Ms. Johnson was introduced by Senator Grassley.

NATIONAL DEFENSE RAIL ACT
Committee on Commerce, Science, and Transportation: Committee concluded hearings on S. 1991, to establish a national rail passenger transportation system, reauthorize Amtrak, and improve security and service on Amtrak, after receiving testimony from Senators Biden and Carper; Michael P. Jackson, Deputy Secretary, and Kenneth M. Mead, Inspector General, both of the Department of Transportation; George D. Warrington, President/CEO, Amtrak (National Railroad Passenger Corporation); New Orleans Mayor Marc Morial, New Orleans, Louisiana, on behalf of the U.S. Conference of Mayors; David D. King, North Carolina Deputy Department of Transportation, Raleigh, on behalf of the States for Passenger Rail Coalition; Edward Hamberger, Association of American Railroads, Gilbert E. Carmichael, Amtrak Reform Council, and Charles F. Moneypenny, Transport Workers Union of America,

PRESCRIPTION DRUGS
Committee on Finance: Committee held hearings to examine reimbursement and access to prescription drugs under Medicare Part B, focusing on payment systems, physician practice costs, and recent settlements, receiving testimony from Thomas A. Scully, Administrator, Centers for Medicare and Medicaid Services, and Janet Rehnquist, Inspector General, both of the Department of Health and Human Services; Laura A. Dummit, Director, Health Care-Medicaid Payment Issues, General Accounting Office; Larry Norton, Memorial Sloan-Kettering Cancer Center, New York, New York, on behalf of the American Society of Clinical Oncology; Ellen Stovall, National Coalition for Cancer Survivorship, Silver Spring, Maryland; and Lisa M. Getson, Apria Healthcare, Lake Forest, California.

Hearings recessed subject to call.

NOMINATIONS
Committee on Foreign Relations: Committee concluded hearings on the nomination of Richard Monroe Miles, of South Carolina, to be Ambassador to Georgia, James W. Pardew, of Arkansas, to be Ambassador to the Republic of Bulgaria, Peter Terpeluk, Jr., of Pennsylvania, to be Ambassador to Luxembourg, and Lawrence E. Butler, of Maine, to be Ambassador to The Former Yugoslav Republic of Macedonia, after the nominees testified and answered questions in their own behalf. Mr. Miles was introduced by Senator Hollings, Mr. Terpeluk was introduced by Senators Specter and Santorum, and Mr. Butler was introduced by Senator Collins.

AMERICAN STEEL
Committee on Health, Education, Labor, and Pensions: Committee concluded hearings to examine the future of American steel, focusing on ensuring the viability of the industry and the health care and retirement security for workers, after receiving testimony from Robert S. Miller, Jr., Bethlehem Steel Corporation, Bethlehem, Pennsylvania; Leo W. Gerard, United Steelworkers of America, Pittsburgh, Pennsylvania; Jerry Fallos, United Steelworker of America Local 4108, Aurora, Minnesota; Jeffrey Mikula, Bethlehem Steel’s Sparrows Point mill, and Gertrude Misterka, both of Baltimore, Maryland; and McCall White, Ellicott City, Maryland.

INDIAN PROGRAMS BUDGET
Committee on Indian Affairs: Committee concluded oversight hearings on the President’s proposed budget request for fiscal year 2003 for Indian programs, including those provided by the Department of Interior’s Bureau of Indian Affairs, National Indian Gaming Commission, and the Environmental Protection Agency, after receiving testimony from Neal A. McCaleb, Assistant Secretary of the Interior, Bureau of Indian Affairs; Diane C. Regas, Acting Assistant Administrator for Water, Environmental Protection Agency; and Montie R. Deer, National Indian Gaming Commission, Washington, D.C.

NOMINATIONS
Committee on Veterans’ Affairs: Committee concluded hearings on the nominations of Robert H. Roswell, of Florida, to be Under Secretary for Health, and Daniel L. Cooper, of Pennsylvania, to be Under Secretary for Benefits, both of the Department of Veterans Affairs, after the nominees testified and answered questions in their own behalf. Mr. Roswell was introduced by Senators Graham and Nelson (FL).

SENIOR HEALTH CARE AND THE ECONOMY
Special Committee on Aging: Committee concluded hearings to examine the current economy and its impact on seniors, focusing on funds for, and services provided by, Medicaid, health, and senior services, after receiving testimony from Gail R. Wilensky, Project HOPE, Bethesda, Maryland, former Administrator, Health Care Financing Administration; Idaho Lt. Governor Jack Riggs, on behalf of the Council of State Governments Health Capacity Task Force, and Karl B. Kurtz, Idaho Department of Health and Welfare, both of Boise; Joan W. Lawrence, Ohio Department of Aging, Columbus; Barbara Lyons, Kaiser Commission on Medicaid and the Uninsured, Washington, D.C.; Vernon K. Smith, Health Management Associates, Lansing, Michigan; Barry Donenfeld, Mid-Willamette Valley Senior Services Agency, Salem, Oregon, on behalf of the National Association of Area Agencies on Aging.
House of Representatives

**Chamber Action**

**Measures Introduced:** 18 public bills, H.R. 3965–3982; and 4 resolutions, H. Con. Res. 350–352, and H. Res. 370 were introduced.

Page H931–32

**Reports Filed:** No Reports were filed today.

**Two Strikes and You’re Out Child Protection Act:** The House passed H.R. 2146, to amend title 18 of the United States Code to provide life imprisonment for repeat offenders who commit sex offenses against children by a yea-and-nay vote of 382 yeas to 34 nays, Roll No. 64.

Page H912–26

Pursuant to the rule, the amendment in the nature of a substitute recommended by the Committee on the Judiciary now printed in the bill, H. Rept. 107–373, was considered as an original bill for the purpose of amendment.

Page H912

Agreed To:

Conyers amendment that mandates judges to report to the Administrative Office of the United States Courts various findings including the race, gender, age, and ethnicity of the victim and defendant for each case in which a life sentence is imposed (agreed to by a recorded vote of 259 ayes to 161 noes, Roll No. 63).

Page H924–25

Rejected:

Scott amendment that sought to give judges the discretion to impose life imprisonment for certain repeat sexual offenders; and

Scott amendment that sought to exempt sex offenders subject to tribal governments from provisions of the bill.

Page H920

Withdrawn:

Jackson-Lee amendment was offered but subsequently withdrawn that sought to nullify the act where there are five or more convicted child sex offenders within any given zip code.

Page H921

Point of Order Sustained Against:

Jackson-Lee amendment that sought to require a study by the National Institute of Justice on the availability and effectiveness of treatment for incarcerated and non-incarcerated perpetrators of sex offenses against children.

Page H922

H. Res. 366, the rule that provided for consideration of the bill was agreed to by voice vote.

Pages H912–13

**Legislative Program:** The Majority Leader announced the Legislative Program for the week of March 18.

Pages H926–27

Meeting Hour—Monday, March 18: Agreed that when the House adjourns today, it adjourn to meet at 2 p.m. on Monday, March 18. Page H927

Meeting Hour—Tuesday, March 19: Agreed that when the House adjourns on Monday, March 18, it adjourn to meet at 12:30 p.m. on Tuesday, March 19 for morning hour debate. Page H927

Calendar Wednesday: Agreed to dispense with the Calendar Wednesday business of Wednesday, March 20. Page H927

Quorum Calls—Votes: One yea-and-nay vote and one recorded vote developed during the proceedings of the House today and appear on pages H924–25 and H925–26. There were no quorum calls.

Adjournment: The House met at 10 a.m. and adjourned at 1:05 p.m.

**Committee Meetings**

**AGRICULTURE, RURAL DEVELOPMENT, FDA APPROPRIATIONS**

Committee on Appropriations: Subcommittee on Agriculture, Rural Development, Food and Drug Administration and Related Agencies held a hearing on Food Safety and Inspection Service. Testimony was heard from the following official of the USDA: Stephen B. Dewhurst, Budget Officer; Elsa Murano, Under Secretary; and Merle D. Pierson, Deputy Under Secretary, both with Food Safety; and Margaret O’K. Glavin, Acting Administrator, Food Safety and Inspection Service.

**COMMERCE, JUSTICE, STATE AND JUDICIARY APPROPRIATIONS**

Committee on Appropriations: Subcommittee on Commerce, Justice, State and Judiciary held a hearing on State Department-International Organizations, and on NOAA. The Congressional Record provides Title 44, United States Code, and published for each day that one or both Houses are in session, excepting very infrequent instances when two or more unusually small consecutive issues are printed at one time. Public access to the Congressional Record is available online through GPO Access, a service of the Government Printing Office, free of charge to the user. The online database is updated each day the Congressional Record is published. The database includes both text and graphics from the beginning of the 103d Congress, 2d session (January 1994) forward. It is available through GPO Access at www.gpo.gov/gpoaccess. Customers can also access this information with WAIS client software, via telnet at swais.access.gpo.gov, or dial-in using communications software and a modem at (202) 512-1800 (toll-free), (202) 512-1530 (D.C. area), or fax to (202) 512-1262. The Team’s hours of availability are Monday through Friday, 7:00 a.m. to 5:30 p.m., Eastern Standard Time, except Federal holidays. The Congressional Record paper and 24x microfiche will be furnished by mail to subscribers, free of postage, at the following prices: paper edition, $211.00 for six months, $422.00 per year, or purchased for $5.00 per issue payable in advance; microfiche edition, $341.00 per year, or purchased for $1.50 per issue payable in advance. The semimonthly Congressional Record Index may be purchased for the same per issue prices. To place an order for any of these products, visit the U.S. Government Online Bookstore at: bookstore.gpo.gov. Mail orders to: Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or phone orders to (866) 512-1800 (toll free), (202) 512-1800 (D.C. area), or fax to (202) 512-2250. Remit check or money order, made payable to the Superintendent of Documents, or use VISA, MasterCard, Discover, American Express, or GPO Deposit Account. Following each session of Congress, the daily Congressional Record is revised, printed, permanently bound and sold by the Superintendent of Documents in individual parts or by sets. With the exception of copyrighted articles, there are no restrictions on the republication of material from the Congressional Record.
