H. CON. RES. 36

Whereas over one million Americans suffer from juvenile (Type 1) diabetes, a chronic,

genetically determined, debilitating disease affecting every organ system;

Whereas 13,000 children a year 35 each day are diagnosed with juvenile diabetes;

Whereas 17,000 adults a year 46 each day are diagnosed with juvenile diabetes;

Whereas juvenile diabetes is one of the most costly chronic diseases of childhood;

Whereas insulin treats but does not cure this potentially deadly disease and does not prevent the complications of diabetes, which include blindness, heart attack, kidney failure, stroke, nerve damage, and amputations;

Whereas a strong public private partnership to fund juvenile diabetes exists between the Federal Government and the Juvenile Diabetes Foundation, a foundation which has awarded more than \$326 million for diabetes research since 1970 and will give \$100 million in fiscal year 2001: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That Federal funding for diabetes research should be increased in accordance with the recommendations of the Diabetes Research Working Group so that a cure for juvenile diabetes can be found.
