

and entrepreneurs is left in the hands of those who earned it; the taxpayer. A lower cost of government expands economic freedom for all Americans. A lower cost of government increases personal choice and control. A lower cost of government allows those participating in the economy to choose what to consume, how much to save or invest. Ultimately, a lower cost of government allows every American to improve their quality of life and to spend more of their hard earned money on the things most important to themselves and their family.

THE INTELLECTUAL PROPERTY
PROTECTION ACT

HON. LAMAR S. SMITH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 27, 2002

Mr. SMITH of Texas. Mr. Speaker, today is world Anti-Counterfeiting day.

Countries around the globe will highlight the growing problem of counterfeiting and the efforts by law enforcement and private industry to combat intellectual property theft.

Today I introduced a bill to address counterfeiting and copyright piracy. The Intellectual Property Protection Act will help protect American innovation and creativity.

The Intellectual property industry employs 4.3 million Americans, making it one of the largest sectors of the American economy—and a sector threatened everyday by copyright piracy.

Copyright piracy is illegal and puts Americans at risk of losing not just their jobs and economic well-being, but their safety, as well. The profits seized by these criminals are often used to fund other illegal activities, including terrorism.

News stories have revealed that terrorist organizations receive hundreds of millions of dollars through pirate operations. For example, police in Argentina and Paraguay uncovered a pirate CD business that has used its profits to underwrite terrorist activities for Hezbollah. The more we crack down on piracy, the more we dry up financial resources for terrorist operations.

Under current law, we can prosecute someone for trafficking in fake labels for a computer program, but we cannot prosecute someone for faking the hologram used by the software maker to verify that the software is genuine.

For instance, if a person manufactures fake covers for counterfeit CDs, he or she can be prosecuted. However, if that same person creates fake holograms to make buyers believe that the CDs are authentic, there is no recourse.

We have criminalized trafficking in counterfeit documentation and packing of software programs, but not music and other products.

The Intellectual Property Protection Act will criminalize the counterfeiting of authentication features, like holograms. In addition, the bill will expand criminal law, which currently only criminalizes trafficking in counterfeit documentation and packaging for software programs, to include documentation and packaging for music, motion pictures, and other audiovisual works.

This bill also will provide relief for victims of intellectual property crimes. Many of these

crimes go unprosecuted today, leaving victims of these thefts without a way to recover their losses.

Last year, the retail software industry lost \$1.8 billion and the business software industry lost \$11 billion in revenue because of piracy. The motion picture industry lost \$3 billion in potential worldwide revenue and the recording industry lost \$4.3 billion worldwide due to piracy. These are staggering figures—especially considering there is no way to recover this lost revenue.

The legislation provides a private cause of action with a 3-year statute of limitations for victims to recover damages in federal court. In addition, if a person violates the anti-counterfeiting laws a second time within three years, treble damages will be available.

We must protect and encourage American originality and innovation. This bill goes a long way towards doing that.

RECOGNIZING THE HISPANIC ASSOCIATION OF COLLEGES AND UNIVERSITIES (HACU) NATIONAL INTERNSHIP PROGRAM

HON. SILVESTRE REYES

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 27, 2002

Mr. REYES. Mr. Speaker, as Chair of the Congressional Hispanic Caucus, I rise today to recognize the achievements of the Hispanic Association of Colleges and Universities (HACU) National Internship Program and its federal and private-sector partners in providing Hispanic college students with invaluable real world working experiences that have allowed these students to make more educated career choices.

Over the past ten years, the HACU National Internship Program (HNIP) has introduced more than 3,800 Hispanic college students to meaningful paid internships with federal and corporate partners during the spring, summer and fall. This has become the largest Hispanic college internship program in the United States.

The HACU National Internship Program exposes these students to public and private sector career opportunities and specifically helps address the historic under-representation of Hispanics in the federal work force. Many former interns are now full-time federal employees and managers, proving that the program truly is making a difference.

On July 10, 2002, the HACU National Internship Program will celebrate its 10th Anniversary at a "Red, White y Azul—Investing in the American Dream," Gala in Washington, D.C. This gala will showcase the achievements of former and current interns as part of a summer-long series of special events marking this remarkable program's first 10 years.

The HACU National Internship program began in 1992 with 24 interns. In 2001 alone, the program provided paid 10- and 15-week internships to 632 interns working at 19 federal agencies and five private corporations in Washington, D.C., and at locations throughout the United States. By the end of 2002, the program likely will set another record in the numbers of participating interns from throughout the country.

This competitive program selects top students from among HACU's 318 member and

partner colleges and universities, which collectively serve more than two-thirds of all Hispanic students in higher education. This program provides meaningful work experiences to these students by matching their skills and career goals with the objectives of federal and corporate partners, enabling these students to make more informed career choices.

Based on formal program evaluations from students and supervisors, the HACU National Internship Program boasts a proven track record in positively addressing the underrepresentation of Hispanics in the federal work force. Ninety-five percent of students surveyed in 2001 rated their internship experience in the federal government as "excellent." More importantly, 73 percent of the 2001 summer students stated that they are interested in pursuing a career in federal service. Of those students, 82 percent said it was a direct result of their internship experience.

Mr. Speaker, it is no secret that Hispanics remain the only under-represented ethnic group in the federal government. As you know, Hispanics currently comprise 11.9 percent of the civilian labor force but only 6.7 percent of the permanent federal workforce. Recent reports also estimate that within the next five years, more than 50 percent of the current federal work force will become eligible to retire.

As the youngest and now largest ethnic population, Hispanics already make up one of every three new workers in the overall workforce, and by 2050 are projected to make up one of every two new workers. Thus, the HACU National Internship Program directly addresses both the historic under-representation of Hispanics in the federal labor force and the need to address the coming shortage of public service sector employees overall.

In addition, this program fully supports White House Executive Order 13171, which requests that federal agencies increase their outreach to the Latino community and support programs that help address the continuing under-representation of Hispanics in federal workforce ranks. The HACU National Internship Program is Point Four in the Office of Personnel Management Nine-Point Hispanic Employment Initiative as an effective, proven tool to recruit well-qualified Hispanics into the federal government.

I salute those who have made the HACU National Internship Program a success. Their efforts will continue to open the doors to opportunity for new generations of exceptional students while enhancing the diversity of our workforce.

A SPECIAL TRIBUTE TO THE CITIZENS OF OTTAWA COUNTY ON THE DEDICATION OF THE NEW PERRY'S MEMORIAL VISITORS' CENTER

HON. PAUL E. GILLMOR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 27, 2002

Mr. GILLMOR. Mr. Speaker, it is with great pride that I rise today to pay special tribute to those dedicated individuals from Ohio's Fifth Congressional District who made this new visitors' center at Perry's Memorial a reality.

Mr. Speaker, The new visitors center at Perry's Victory and International Peace Memorial
