PROCEEDINGS AND DEBATES OF THE 107th CONGRESS, SECOND SESSION

Vol. 148

WASHINGTON, WEDNESDAY, OCTOBER 9, 2002

No. 132—Part II

House of Representatives

□ 1945

FURTHER CONSIDERATION OF H. RES. 114, AUTHORIZATION FOR USE OF MILITARY FORCE AGAINST IRAQ RESOLUTION OF 2002—Continued

Therefore, firm in my beliefs, buoyed by the input from my constituents, and strong in my faith in the principles and ideals of America, I will vote for the Spratt-Moran substitute resolution.

Mr. ISSA. Mr. Speaker, I yield 6 minutes to the gentlewoman from Connecticut (Mrs. JOHNSON).

Mrs. JOHNSON of Connecticut. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker this is the most important vote I will have cast in my 20 years in Congress. I was here to cast my vote to go to war against Iraq in 1991. That was a definable conflict involving an aggressor who had to be stopped by the international community. America provided the leadership both to develop the coalition effort and provided the military power needed to win the war decisively.

Now we face a far greater threat: the threat of a government dedicated to methodical, committed development, production, and stockpiling of chemical and biological weapons, and ultimately to the development of a small transportable nuclear weapon. This threat is spearheaded by Iraq, but not posed by Iraq alone. I firmly believe that if we fail to develop an international response to turn back this new threat of far more mobile and potent weapons, the cost will be extraordinary in the sacrifice of innocent lives and the crippling effect on the world's economy and on the stability of governments throughout the world.

We cannot allow nations, as a matter of their public policy, to develop chemical, biological, and nuclear weapons that can be delivered in lethal amounts all around the world. Whether it be de-

livery through terrorist organizations such as al Qaeda or hard-to-detect drones with sprayer nozzles, there are now the means to deliver these weapons of mass destruction into the very hearts of our cities and towns. The attack of September 11 was only the most vivid and terrible demonstration of the power of hate to deliver death and destruction of incredible dimensions by stealth means.

Make no mistake, for 4 years, ever since the arms inspectors left Iraq when they were prevented from doing their job, Iraq has been increasing its research, development, and production of chemical and biological weapons despite their international agreements not to do so. I believe the evidence on this matter is clear and convincing and that there is sufficient evidence of an accelerated effort to develop nuclear weapons to make action the only realistic course.

We and the international community must act, not only to stop Iraq, but to demonstrate to other nations that are starting down the same path as Iraq that are developing chemical and biological arsenals that the international community will not tolerate such a development because it poses such an extraordinary threat to all nations' economies, governments, and the very fabric of human communities.

I will vote "yes" on this resolution, and commend the President, Secretary Powell, and Secretary Rumsfeld for working to unify the international community in the face of this new and unprecedented threat. I firmly believe, as the President has said, that war is neither imminent nor unavoidable. But I believe that the passage of this resolution will make an effective peaceful multilateral response more likely because it represents the depth of our commitment to the goal of Iraqi disarmament and the elimination of the threat of chemical and biological weapons in tandem with the power of ter-

rorist organizations and the stealthy delivery systems so clearly under development in Iraq.

Failure to act as we have for 4 years is no longer an option. We must prevent the accumulation of chemical and biological weapons and the development of increasingly stealthy means of delivery before these weapons are used against us and others.

I thank the Speaker for this opportunity to be heard on this historic occasion.

Mr. DELAHUNT. Mr. Speaker, I yield 6 minutes to the gentleman from Massachusetts (Mr. NEAL), my friend and colleague who serves on the Committee on Ways and Means and is a leader in the Massachusetts delegation.

Mr. NEAL of Massachusetts. Mr. Speaker, I thank the gentleman from Massachusetts for yielding me this time.

Mr. Speaker, I come to the floor of the House to carry out one of the most important responsibilities that an elected Member of this institution has, to vote on a resolution authorizing the use of military force. It is a profound responsibility and one that I take most seriously.

Even Mr. Lincoln, as a Member of this House, wrestled with the issue of war-making powers when in 1848, in a letter to his law partner, William Herndon, voiced concern that Congress should not give unlimited powers to the executive. I share Mr. Lincoln's views on this important subject.

Everyone in this Chamber agrees that Saddam Hussein is a threat to his own people, his neighbors, and the entire civilized world. He is a tyrant intent on developing weapons of mass destruction and the means to deliver them. His many atrocities have been catalogued in this House and the Senate during this important debate, and his dictatorial regime is held in contempt around the globe. That is why

H7413

any attempt to disarm or to replace him, and I support both, should be done with the support of our friends and allies in the international community.

Unilateralism and the doctrine of preemption are dangerous precedents that the United States may be setting. Such action is contrary to our country's core values and principles. Efforts to neutralize Iraq's chemical, biological, and nuclear threat should be done with the support of an international coalition and in accordance with international law. In my opinion and the opinion of many allies around the world, there are many compelling alternatives to acting alone and the immediate use of force as the first option. Here is one.

It is my belief that we need a new unambiguous resolution from the United Nations Security Council calling for the immediate and unfettered weapons inspectors to be allowed into Iraq. This new resolution should be unconditional, have clear time tables, and must exclude the unreasonable 1998 language that restricts inspectors from visiting Saddam Hussein's presidential palaces. Nothing should be off limits. It will hold Iraq permanently accountable to the international community. Saddam Hussein will have only two stark choices. He can accept robust inspections and begin to disarm or pay serious consequences, and I urge the United Nations to act immediately.

In preparation for this debate, Mr. Speaker, I have had an opportunity to talk and listen to many people about the merits of this resolution. I went to my constituents in Massachusetts, colleagues in Washington, and officials of administrations past and present. And each time I came away with more questions than answers. Important and timely questions about the wider implications of a unilateral war with Iraq should be answered.

The administration must tell the American people in clear and concise terms what impact a unilateral strike against Iraq would have on the already tenuous situation in the Middle East. In 1990 Saddam Hussein launched 39 SCUD missiles into the heart of Israel. Does anyone doubt that he would do it again? Twelve years ago the State of Israel showed restraint in the face of such attacks; but as we debate this resolution this evening, the Israeli Government has indicated it will defend itself against any Iraqi initiative.

What does this mean for the security of the region? Any attempt to restore the peace process between the Israelis and the Palestinians would be lost in the short term. What about Iran, Syria, and Libya, who are all engaged in active programs to develop weapons of mass destruction and the means to deliver them? How do we respond to a unilateral, preemptive American strike against Iraq?

We should not minimize the far-reaching implications of a first strike and a new doctrine of preemption. Indeed, it may have unintended con-

sequences in other parts of the world, in conflicts between India and Pakistan, China and Taiwan, Russia and Georgia. On the verge of this historic vote, these questions need to be answered before we reach a decision to send our young Americans into harm's way.

Mr. Speaker, if we suddenly turn our attention to a unilateral war with Iraq, what are the implications for the ongoing war on terrorism? Since the attacks of September 11, we have waged a war on terrorism with the support of friends and allies around the globe. I have supported President Bush and commended his leadership time and again for his war on terrorism. But will the United States continue to receive the same level of support and cooperation from countries that do not support a unilateral preemptive strike on Iraq?

Ironically, there is one aspect of this debate where there are definitive answers, and I ask this tonight: How much is this war going to cost the American people? The Congressional Budget Office has estimated that the incremental cost of deploying a force to the Persian Gulf would be between \$9 billion and \$13 billion. Prosecuting a war would cost between \$6 billion and \$9 billion a month. After hostilities end, and we do not know how long they are going to last, the cost to return our troops home would range between \$5 billion and \$7 billion. If, as President Bush insisted, we intend to rebuild Iraq, the costs to the American taxpayer will rise exponentially.

In the Gulf War with the support of an international coalition, the costs of the war was shared by our friends and allies. This will not be the case with unilateral action. The burden conceivably will rise to \$200 billion, and it will not be ours alone if we do this with the support of the Security Council.

Mr. Speaker, I have not been persuaded that unilateralism and the doctrine of preemption is the best course of action against Iraq. From my perspective, a preferable course of action is to enlist the support of the international community and demand a strict review by U.N. inspectors. We should take the diplomatic and political route before bringing this Nation to war, and I plan to vote against this resolution.

I thank the gentleman for yielding me this time.

Mr. FALEOMAVAEGA. Mr. Speaker, I yield 5 minutes to the gentlewoman from Florida (Mrs. THURMAN), a distinguished member of the Committee on Ways and Means.

Mrs. THURMAN. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, this is the most important vote that I ever will cast in this House. Deciding when to send our troops into harm's way is never easy and must not be made without serious consideration.

My father was a career Air Force sergeant and B-52 tail gunner, and I re-

member worrying every time he left for a flight that he would not return. So I have some idea of what is going through the hearts and the minds of the families of our troops. And growing up on military bases, I personally knew the people willing to put their lives on the line to protect our great Nation. I see my late father in all of them, and I remain committed to making sure if we have to send our troops into battle that they will have all the support and resources they need.

Threat from international terrorism is real. The threat from weapons of mass destruction is real. That is why it was so important to stress that we have moved away from unilateral action. My colleagues and I stood strong on our principles and got the administration to agree to the changes in the Iraq resolution. We felt that these changes were necessary to protect our Nation and the world from Saddam Hussein and ensure that military force would be used as a last resort.

On Monday President Bush told the Nation and the world that approving this resolution does not mean that military action is imminent or unavoidable. He has asked Congress to authorize the use of America's military, if it proves necessary. The American people are taking him at his word. We in Congress are taking him at his word. I hope that military action will not be necessary, but I am prepared to support our troops if all other efforts fail.

This resolution does not indicate abandonment but rather, I believe, an extension of the fight against terrorists. We will continue to improve homeland security and to find terrorist organizations wherever they may hide. This resolution retains the constitutional power of Congress in defense and foreign affairs. It does not justify unilateral military action by any country anywhere.

□ 2000

It is limited to Iraq, a nation that has made promises and then deliberately refused to live up to them.

This resolution retains the constitutional power in defense and foreign affairs. This is not the Gulf of Tonkin Resolution. We will be kept informed and can, if necessary, restrain any abuse of power.

It also seeks to compel the entire international community to back efforts to compel Iraq to comply with the world's will as expressed in various U.N. resolutions. International support is vital. It will show the world that this is not a dispute between the United States and Iraq. It is not a dispute between American and Arab. It is not a dispute between cultures. If conflict occurs, the blame rests solely with Saddam Hussein, who first invaded Kuwait and then refused to accept the consequences of his actions.

We have the best-trained and best-equipped Armed Forces in the world. I have no doubt that they will do whatever is asked of them and that they will succeed.

But war is not cheap, in blood or treasure. Sacrifices will be made by our troops and their families. But the rest of us will have to shoulder our fair share of the burden. We will have to pay for this action, just as my parents paid for World War II and my grandparents paid for World War I, because we must not pass the cost of this war on to our children and our grandchildren. Our country needs to be prepared for the cost of the war, in both human life and limited government resources.

I have promised our troops that they will not go wanting. I now promise the rest of America that I will not forget your needs. Each of us knows what needs those are, because we hear about them from people every day.

We must provide for our common defense abroad or else we will never be secure at home. But we will not lose sight of our priorities at home. We will prevail. We will execute our constitutional duty to provide for the common defense, and we will provide for the general welfare at home.

I, therefore, will support the resolution on final passage.

Mr. PAYNE. Mr. Speaker, it is a pleasure to yield 6 minutes to the gentlewoman from Ohio (Ms. KAPTUR), a voice for justice that we have heard for many, many years, a member of the Committee on Appropriations.

Ms. KAPTUR. Mr. Speaker, I thank the distinguished gentleman from New Jersey for yielding me time.

Mr. Speaker, 3 weeks before election seems to be an odd time to be authorizing war. It is especially odd when President Bush himself said at the United Nations that Iraq represents a "grave and gathering threat," not an imminent threat. For a month, this debate has frozen off the front pages Social Security, prescription drugs, rising unemployment, growing deficits, robbery of pension accounts, corporate abuses and the inaction of this Congress itself.

The generals have not weighed in either. Retired General Norman Schwarzkopf, who headed the Persian Gulf War campaign, called on President Bush "not to go it alone." Retired General Wesley Clark, who headed up the Balkans campaign, called on President Bush "not to go it alone." Former National Security Adviser Brent Scowcroft said an attack on Iraq without addressing the problems of the Israeli-Palestinian conflict "could turn the whole region into a cauldron, and thus destroy the war on terrorism."

Last weekend, Israel's Chief of Military Intelligence, speaking on television, disputed contentions that Iraq is 18 months away from nuclear capability. He concluded Iraq's time frame was more like 4 years, and he said Iran's nuclear threat was as great as Iraq's.

Yes, Congress, on behalf of the American people must decide whether the United States incursion now into Iraq will make our country more secure and

whether it will make that region more stable. On both counts, my conclusion is no.

It will not make America safer, because unilateral military action without broad international support will isolate America further. It will thrust us into the position of becoming a common enemy in a volatile region where anti-western terrorism grows with each passing year.

It will not make the region more stable either. The Bush approach will yield more terrorism and instability, not less.

We should insist on rigorous inspections in concert with our allies and enforce all U.N. resolutions relating to the Middle East.

Indeed, if the politics of the oil regimes and lethal force had been successful over the past 25 years, America's citizens would not be the victims of escalating terrorist violence at home and abroad.

Since 1975, more American diplomats and military personnel have been killed or taken hostage as a result of Middle Eastern tumult than in the first 187 years of our Nation's history, and it worsens with each decade. After 9/11, 13,025 additional names of civilians here at home were added to that growing list.

Look more deeply at the roots of the rising levels of hatred and terrorism toward our people. Even if Iraq were able to serve as an instrument of global terrorism, the causes of that terrorism will not disappear with the demise of Saddam Hussein. The enemy has many fresh faces. They spring daily from the growing resentment of western influence over an Islamic world that is awakening to its own political destiny. America must not wed itself to the past but to the rising aspirations of subjugated people; and we must do it in concert with our friends, both inside the Arab world and outside it.

What propels the violence? A deep and powerful undercurrent moving people to violence in that region. It is the unresolved Israeli-Palestinian conflict.

The other major destabilizing force is America's utter and dangerous dependence on imported oil, whose purchases undergird repressive regimes. We must address both.

Think about it. Modern terrorism dawned in our homeland in June, 1968, with the assassination of Robert F. Kennedy. The unresolved Israeli-Palestinian conflict lay at the basis of that tragic loss. His disgruntled assassin, a Jordanian Arab, revealed in his diary that loss of his homeland in East Jerusalem lay at the root of his discontent. Sirhan Sirhan is one such face.

The intifada now proceeding in the West Bank and Gaza proves the lingering tragedy of the Holy Land resists peaceful resolution until today, and its irresolution instructs the street and produces sacred rage.

Now, let us look at oil, the one word the President left out of his address in Cincinnati. As the 1970s proceeded,

America's economic security became to be shaped more and more by events abroad. Thrust into two deep recessions due to the Arab oil embargoes as petroleum prices shot through the roof, our economy faltered. And the current recession, too, has been triggered by rising oil prices.

Meanwhile, America, rather than becoming energy independent at home, sinks deeper into foreign oil dependence, from the undemocratic regimes of Saudi Arabia, Kuwait and Iraq, to also include the state-owned monopolies of Nigeria and Venezuela and Mexico. While our military enforces the no-fly zones over Iraq, we import 8 percent of our oil from her. America has become more and more hostage to the oil regimes, with our future intertwined with the politics that Islamic fundamentalism breeds in the Muslim world.

Al Qaeda, led by Osama bin Laden, a Saudi national, is but the latest face of international terrorism. Al Qaeda's goal is expulsion of western influence in the Gulf and the creation of a religious, unified Islamic caliphate.

Mohammed Atta grew up in the undemocratic oil regimes of Saudi Arabia where 17 of the 19 hijackers originated.

By contrast, the goal of Saddam Hussein and his Baath Party has been control of the vast oil deposits in Iraq and access to waterborne shipping in the Persian Gulf. Hussein has been a fairly predictable foe. In the 1990s, he conventionally invaded Kuwait; and the raw truth is he never got what he expected, which was access through Kuwait to the Gulf.

When Iraq invaded Kuwait in 1990, the dispute not only involved Iraq's belief that Kuwait was part of its historic territory, but essentially the struggle involved who within OPEC would control that oil. Is defending oil reserves worthy of one more American life?

Before launching another war, Congress must vote to place our priorities where they belong, security here at home and a valued partner in the global community of nations.

Please vote for the Spratt-Skelton resolution and no on the Hastert-Gephardt resolution.

Three weeks before election seems an odd time to be authorizing war.

It is especially odd when President Bush himself said at the United Nations that Iraq represents a "grave and gathering threat," not an "imminent threat." For a month, this debate has frozen off the front pages Social Security, prescription drugs, rising unemployment, growing deficits, robbery of pension accounts, corporate abuses and the inaction of this Congress.

The generals have not weighed in either. Retired General Norman Schwarzkopf, who headed the Persian Gulf War campaign, called on President Bush "not to go it alone." Retired General Wesley Clark, who headed up the Balkans campaign, called on President Bush "not to go it alone." Former National Security Adviser Brent Scowcroft said an attack on Iraq without addressing the problems of the Israeli-

Palestinian conflict "could turn the whole region into a cauldron and thus destroy the war on terrorism."

In Cincinnati, President Bush said Iraq is seeking nuclear capability. He did not say Iraq had such a capability. And never has Saddam Hussein risked his regime's annihilation, which would be a certainty if he exhibits any adventurism.

The Philadelphia Inquirer reported yesterday (Tuesday) that a Central Intelligence Agency report, which was released last Friday, concluded that it could take Iraq until the last half of this decade to produce a nuclear weapon, unless it could acquire bomb grade uranium or plutonium on the black market.

Intelligence sources confirm chemical capabilities have been substantially reduced as a result of inspectors and Iraq's armed forces are 40% of their strength prior to the Gulf War.

The President claimed Iraq had acquired smooth aluminum tubes for its secret nuclear weapons program. But analysts at the Energy and State Departments concluded that the Iraqis probably wanted the tubes to make conventional artillery pieces. On chemical and biological weapons, all the evidence indicates the inspection regime of the 1980s worked and that civilized nations are effective in dismantling rogue states' arsenals when they join in common cause.

Last weekend, Israel's chief of military intelligence, speaking on television, disputed contentions that Iraq is 18 months away from nuclear capability. He concluded Iraq's time frame was more like four years, and he said Iran's nuclear threat was as great as Iraq's. I daresay Israel's chief of military intelligence is not the type of person who would engage in self-delusion.

Yet, Congress, on behalf of the American people, must decide: whether U.S. military incursion now into Iraq will make our country more secure, whether it will make that region more stable.

On both counts, my conclusion is "No."

It won't make America safer because unilateral military action, without broad international support, will isolate America further. It will thrust us into the position of becoming a "common enemy" in a volatile region where anti-Western terrorism grows with each passing year.

It won't make the region more stable, either. The Bush approach will yield more terrorism and instability, not less. We should insist on rigorous inspections in concert with our allies and enforce all U.N. resolutions relating to the Middle East. Indeed, if the politics of the oil regimes and lethal force had been successful over the past 25 years, America's citizens would not be the victims of escalating terrorist violence at home and abroad. Since 1975, more American diplomats and military personnel have been killed or taken hostage abroad as a result of Middle Eastern tumult than in the first 187 years of our nation's history. And it worsens with each decade. After 9/11, 3025 additional names of civilians here at home were added to that growing list.

Look more deeply at the roots of the rising levels of hatred and terrorism toward our people. Even if Iraq were able to serve as an instrument of global terrorism, the causes of that terrorism would not disappear with the demise of Saddam Hussein. Terrorists are being molded every day.

Look at the enemy. It is not conventional. It is not faceless. The enemy has many fresh

faces. They spring daily from the growing resentment of Western influence over an Islamic world that is awakening to its own political destiny. America must not wed itself to the past but to the rising aspirations of subjugated people, and we must do so in concert with our friends both inside the Arab world and outside it.

What propels the violence?

A deep and powerful undercurrent moving people to violence in that region is the unresolved Palestinian-Israeli conflict. The other major destabilizing force is America's utter and dangerous dependence on imported oil whose purchases undergird repressive regimes. We must address both.

Think about it. Modern terrorism dawned in our homeland in June 1968, with the assassination of Robert F. Kennedy. The unresolved Israel-Palestinian conflict lay at the basis of that tragic loss. His disgruntled assassin, a Jordanian Arab, revealed in this diary that loss of his homeland in East Jerusalem lay at the root of his discontent. Sirhan Sirhan is one such face.

The intifada now proceeding in the West Bank and Gaza proves the lingering tragedy of the Holy Land resists peaceful resolution event until today and its irresolution instructs the street and produces sacred rage.

Now, let's look at oil . . . the one word the President left out of his address in Cincinnati. As the 1970's proceeded, America's economic security came to be shaped by events abroad. Thrust into two deep recessions due to Arab oil embargoes as petroleum prices shot through the roof, our economy faltered. The current recession too has been triggered by rising oil prices.

In 1980, Jimmy Carter lost his bid for reelection because economic conditions at home so deteriorated. Carter had dubbed Arab oil price manipulation as the "moral equivalent of war." He had launched a major effort to restore America's energy independence.

Ronald Reagan and George Bush were elected in a campaign that highlighted the "misery index," the combination of unemployment and interest rates exploding over 20 percent.

By the 1980's, OPEC's cartel had realized that it lost revenue when America caught economic pneumonia. So OPEC learned something it practices to this very day: how to dance a clever pirouette of price manipulation rather than outright price gouging.

Meanwhile, America, rather than becoming energy independent at home, sinks deeper into foreign oil dependence—from the undemocratic regimes of Saudi Arabia, Kuwait, and Iraq to also include the state-owned monopolies of Nigeria and Venezuela and Mexico. While our military enforces the no-fly zone over Iraq, we import 8% of our oil from her.

America has become more and more an economic hostage to the oil regimes, with our future intertwined with the politics that Islamic fundamentalism breeds in the Muslim world.

America's ill-fraught alliances with unpopular Middle East regimes was vividly revealed in 1979 when Iran, though not an oil state, fell despite the fact the U.S. and our CIA had supported its Shah and his secret police, purportedly to assure regional stability. It produced exactly the opposite—a revolution.

Recall 1983, in the thick of Lebanon's civil war, when suicide bombers attacked the U.S. Marine compound in Beirut, killing 241 Ameri-

cans. They were caught in the crossfire of that civil war. From that point forward, U.S. casualties escalated every year, as more and more U.S. citizens were killed abroad and at home. If you travel to Lebanon today, our U.S. embassy is built like a bunker, underground. This is happening to U.S. facilities around the world.

Here is our nation's capital—barricades, concrete barriers, truck-bomb checks have become commonplace. A citizen can no longer drive down Pennsylvania Avenue in front of the White House. It is blocked off. We now have red, orange, yellow warning lights across the land. It is harder for our people to access their institutions of government. Block by block, our freedom is being circumscribed. In 1993, at the World Trade Center, six people died and one thousand were injured here at home in a bombing masterminded by a Pakistani trained in Afghanistan. In 1996, a truck bomb killed 19 Americans in Saudi Arabia at Khobar Towers, a residence for American military personnel. Last week a Green Beret was killed in Manila by a terrorist bomb, and yesterday in Kuwait two U.S. military personnel were fired upon—one died. Dozens of such tragedies now happen each year, and the body count mounts.

Al Qaeda, led by Osama bin Laden, a Saudi national, is but the latest face of international terrorism. Al Qaeda's goal is expulsion of Western influence in the Gulf and the creation of a religious, unified Islamic caliphate. But Al Qaeda and Osama are not Iraqi.

Mohammed Atta grew up in the undemocratic oil regimes of Saudi Arabia where 17 of 19 hijackers originated. They believed in the religious fundamentalism of the Wahhabi sect, but not its economic imperative that holds power through billions earned from vast oil reserves. Despite oil wealth, the king has become less and less able to control the disgruntled in that society, who resent the secular nature of the religious kingdom.

By contrast, the goal of Saddam Hussein and his Baath Party has been control of the vast oil deposits in Iraq and access to waterborne shipping in the Persian Gulf. Hussein has been a fairly predictable foe. In 1990, he conventionally invaded Kuwait. The raw truth is he received his early encouragement and support from the first Reagan-Bush Administration, in the early 1980s. That administration engaged Saddam Hussein and provided him with resources, and credits to depose Iran's Ayatollah Khomeini, who had just deposed the CIA-supported Shah in 1979. Through his U.S. contacts, Hussein assumed Iraq's quid pro quo would be access to the Persian Gulf on Bubiyan Island. Kuwait, however, never agreed.

When Iraq invaded Kuwait in 1990, the dispute not only involved Iraq's belief that Kuwait was part of its historic territory. Iraq also surmised that Kuwait was asking too low a price for oil sold to the West. Yes, America went to war to defend Kuwait's border. But essentially the struggle involved who within OPEC would control that oil. Subsequent to the Persian Gulf War, America began stationing more and more troops in Saudi Arabia, ostensibly to guard the oil flow out of the Persian Gulf. Is defending oil reserves worthy of one more life?

Of course, these forces also conveniently offered some threat to unwelcome enemies of the Saudi regime, at home and abroad. Anti-

western resentment in the region continues to rise. In 2000, our destroyer USS *Cole* was suicide bombed in Yemen harbor guarding the oil flows. Thirteen U.S. service members were killed and 39 wounded.

Over the last quarter century, it is interesting to reflect upon the intimate connection between the George Bush family, oil, and the shaping of foreign policy towards the Middle East. During the 1950s and 1960s, George Herbert Walker Bush, an oilman from Midland, Texas sought international exploration and investments as Texas oil wells were depleted prior to seeking office. In the 1960s and early 1970s, George Herbert Walker Bush served in the U.S. House, Senate, U.S. Ambassador to China, and was appointed head of the CIA in 1976 and served until March 1977.

Simultaneous with George Herbert Walker Bush's service in the CIA, Syria sent troops to Lebanon to stem the civil war, the Iranian Revolution gained steam, and Egyptian President Anwar Sadat traveled to Jerusalem and became the first Arab leader to recognize Israel.

George Herbert Walker Bush served as Vice President from 1981 to 1989 and as President from 1989 until 1993. During this period, the U.S. was drawn more directly into a central role in Middle East security.

In 1990, with the invasion of Kuwait by Iraq, President George Herbert Walker Bush fashioned a U.S.-led coalition of nations to push Saddam Hussein out of Kuwait. More than 400,000 U.S. troops were involved in that war. One hundred forty Americans died in that war, thousands have sustained war injuries and tens of thousands of Iraqis died.

With each succeeding decade, wars involving terrorism and America escalated. Now George Bush's son is serving as President and a second war resolution is being contemplated. It is fair to say that the Bush view of the Middle East literally has dominated U.S. policy for 75 percent of the past two decades.

9/11 was but the latest chapter in the expanding violence.

It is also important to inquire as to what private oil interests in the Middle East are held, or were held, by key officials in the current Bush Administration and how that might influence their views of U.S. "vital interests."

In the past, according to the Arabian Peninsula and Gulf Studies Project (supported by the Kuwait Foundation for the Advancement of Sciences). George W. Bush sat on the board of Harken Oil of Grand Prairie, Texas, as a private citizen, and held major oil company involvement in Bahrain both professionally and personally.

Halliburton, the firm that hired Vice-President DICK CHENEY as its CEO subsequent to the Persian Gulf War, had previously operated in Iraq. During the early 1980's, Vice-President CHANEY served as U.S. Secretary of Defense and Donald Rumsfeld as one of his Assistant Secretaries of Defense.

Newspaper reports now indicate that during that same period, biological and chemical germ samples were transferred to Iraq from the government of the United States through the Center for Disease Control and Prevention (CDC) to several Iraqi sites that U.N. weapons inspectors determined were part of Saddam Hussein's biological weapons program. Indeed, the U.S. government provided agricul-

tural credits to Iraq to finance these transactions and the purchase of large amounts of fertilizer and chemicals to be used in Iraq's protracted war with Iran.

Congressional records and CDC documents for that period show Iraq ordered the samples, and claimed them for legitimate medical research. The CDC and a biological sample company called the American Type Culture Collection sent strains of several germs. The transfers were made in the 1980's.

Included among these strains: anthrax, the bacteria that make botulinum toxin, and the germs that cause gas gangrene. Iraq also got samples of other deadly pathogens, including the West Nile virus. Senator ROBERT BYRD has questioned Secretary Rumsfeld, as President Reagan's envoy to the Middle East at that time, inquiring about how contacts were made with Iraq to transfer chemical and biological agents from the U.S. to Iraq as its launched its attacks on Iran.

Before launching another war, this one unilaterally, Congress must vote to place U.S. priorities where they belong—security here at home and a valued partner in the global community of nations.

Three policy prescriptions deserve greater weight.

First, inspection now, rigorous and full, in league with the world community.

Second, America must restore energy independence here at home. If we could land a man on the moon in 10 years, surely we can gather ourselves to master this scientific imperative. No longer should oil become a proxy for America's foreign policy. Our economic relations should not reward dictatorships.

Third, the U.S. must regain momentum to find a solution to the Israeli-Palestinian conflict. President Bush should dispatch former U.S. Senators George Mitchell and Warren Rudman to the Middle East as ambassadors without portfolio to exercise their considerable talents.

In closing, let me re-emphasize:

What is the "imminent threat" to the United States that justifies going to war now?

Where is the hard evidence of the new threat?

With unilateral action, how will the United States avoid being viewed in the Islamic world as a "common enemy?"

What specific threat justifies abandoning 50 years of strategic policy in favor of a unilateral policy of pre-emption?

Who would succeed Saddam Hussein in power in Iraq? How would a partitioned Iraq be a stabilizing force?

Does the United States want to engage in nation building in Afghanistan and Iraq simultaneously?

Who will pay for this nation building?

When will the United States wean itself from its dangerous dependence on foreign oil, which takes money from our people and distorts our foreign policy?

Why should the U.S. military be asked to serve as an occupying force in Afghanistan and Iraq?

What makes Iraq's threat to the United States so much more serious today that it was four months ago or even two years ago?

In closing, let not America be perceived as the "bully on the block" in the most oil-rich re-

gion of the world, where not one democratic state exists. Vote for security. Vote for stability. Vote for energy independence. Vote for resolving the Israeli-Palestinian conflict. Vote for Spratt-Skelton. Vote "no" on the Hastert-Gephardt resolution.

Mr. SMITH of New Jersey. Mr. Speaker, I yield 6 minutes to the distinguished gentleman from Texas (Mr. BRADY).

Mr. BRADY of Texas. Mr. Speaker, I thank the kind gentleman for his leadership on human rights and on safety throughout the world.

You have to ask yourself at a serious time like this, was not 9/11 enough? Was not 9/11 enough to spur America's resolve to defend our own country?

I support this resolution because the first responsibility of our government is to defend American citizens. The government of Iraq, like our terrorist nations, presents a grave threat to the safety, to the security, to the well-being of every American that hears this debate tonight.

We are in the early stages of what is likely to be a very long war against terrorism. In his September 20th, 2001, address to a Joint Session of Congress here in this Chamber, President Bush vowed that America would not rest until we had rooted out terrorism around the world. He said the countries harboring terrorists would be treated as terrorist nations themselves; that the coming war would be a long one, to be measured in years, rather than months.

The Afghanistan campaign is the first step in putting that pledge into action, and much remains to be done. Does anyone seriously believe that terrorism began and ended in Afghanistan?

Disarming Iraq and its support for state-sponsored terrorism is the next logical step to secure peace for our families and for this world. As we were reminded again this afternoon with the released audiotape of bin Laden's second in command predicting yet more terrorist attacks on America, the question is not if America will be attacked again here at home, but when and by whom.

Instead of crashing airplanes into our downtown office buildings or into our Pentagon, the terrorists of the future will turn to dangerous chemical and biological weapons, attempts to poison our air and water, disrupt our energy supply, our economy, our electronic commerce, destroy the jobs we rely upon each day.

Yes, they will direct these weapons of terrible destruction toward America, because standing as the world's lone superpower means standing as the world's biggest target. Our homeland,

our communities, our schools, our neighborhoods and millions of American lives are at risk as we speak tonight.

It is clear to me we are going to fight this war on terrorism in one of two ways: either overseas at its source, or here at home when it lands in our neighborhoods. I choose overseas at its source.

America's security at home depends upon largely our strength in the world. Terrorism expands according to our willingness to tolerate it. For too long the world has turned a blind eye to terrorism, afraid to confront it; and terrorism has flourished because the actions of our world leaders never matched their harsh words.

Well, that is all over now. That all changed September 11. That all changed with President Bush.

For the sake of our homeland, we must mean what we say. For the sake of our children, we must follow through on our vow to end terrorism. If the United Nations efforts should fail, if Saddam Hussein chooses to continue to arm himself and harbor terrorists, then America must act. Words alone are not enough. And when we send U.S. troops overseas, it must be to win and to return home as planned.

Our first President said there is nothing so likely to produce peace as to be well-prepared to meet an enemy. We know the enemy, we know the difficulty, we know the duty, and we know the strength of America's military men and women.

The resolution before the House tonight is not a question of the President's persuasiveness. It is a question of Congress' resolve to whip this terrible war on terrorism.

We know where the President stands. The question is, where does Congress stand, and do we stand with him? I do, and I am proud to do so. Make it clear, our resolve is not for war today; it is for peace tomorrow.

□ 2015

Our resolve is not for security for America alone, but for security for the world, a world free of fear from horror, from the incredible weapons of mass destruction, from all of that terrorism spawns.

All I seek and all Americans seek is a simple request: when our families leave our homes each morning, that they return home safely each night. Was not 9-11 enough for America to act to protect our citizens? It is.

Mr. FALEOMAVAEGA. Mr. Speaker, I gladly yield 5½ minutes to the gentleman from New Jersey (Mr. ROTHMAN), a distinguished member of the House Committee on Appropriations.

(Mr. ROTHMAN asked and was given permission to revise and extend his remarks.)

Mr. ROTHMAN. Mr. Speaker, on September 11, 2001, America's view of the world changed. On that day, many Americans learned, for the first time, that there were people in the world

who hated America so much that they would cross the oceans to come here to kill thousands of American men, women, and children, even if it meant they would die themselves.

In considering the resolution before us, I have weighed all of the pros and cons, all the risks of action and the risks of inaction, with September 11 very much in my mind. I believe that any close question on matters of national security must now be resolved in favor of erring on the side of being proactive and not reactive in protecting our people and our homeland.

I have spent a tremendous amount of time and study over the past several months on what to do about Saddam Hussein. I have engaged in dialogue with many of my constituents, spoken with experts on every side of this issue, and read literally thousands of pages of analysis. I can delineate as well as any opponent of this resolution all of the possible and considerable risks associated with military action against Saddam Hussein. However, in the end, I conclude, beyond any reasonable doubt, that America must join forces with our allies, hopefully under the express authorization of the United Nations, but that we must take action to prevent Saddam Hussein from using his weapons of mass destruction against us.

Now, especially in the light and shadow of September 11, there is a new immediacy and power to Saddam Hussein's long-standing and often-stated threats against America.

For years, Saddam Hussein has been a well-known patron and financier of some of the world's most lethal anti-American terrorists and terrorist organizations. Now, al Qaeda has joined them. After being driven from Afghanistan, al Qaeda has now sought and received safe haven from Saddam Hussein. Saddam is now training al Qaeda in bomb-making and the manufacture and delivery of poisonous and deadly gases.

We know that for years al Qaeda has been trying to get their hands on chemical, biological, or nuclear weapons to use against America and Americans. The thought of Saddam Hussein now infecting willing al Qaeda "martyrs" with his smallpox virus and sending them into America's major cities, causing hundreds of thousands of Americans to die of smallpox, is truly terrifying. The thought of Saddam Hussein sending these same al Qaeda martyrs to America to spray chemical or biological poisons over America's reservoirs or in our most populated cities is a thought so horrifying, yet so real a possibility, that I cannot, in good conscience, especially after the surprise attack of September 11, permit this to happen.

I, therefore, endorse this resolution. I do so, however, with a heavy heart. I do so yet with no reasonable doubt that preventing Saddam Hussein from using his weapons of mass destruction against us is necessary now if we are to avoid another 9-11 or worse.

Mr. Speaker, I pray that military action is not necessary and that alone, passage of this resolution will result in Saddam Hussein's compliance with all existing U.N. resolutions to disarm and to permit unconditional inspections. But in the end, that is Saddam Hussein's choice.

Mr. Speaker, as we pass this resolution, let us pray for the safety of all Americans, including the brave men and women in our military, law enforcement, and all other branches of our government who are today protecting us here at home and in countries around the world and who will be called upon to do so tomorrow or in the days ahead. God bless them and God bless America.

Mr. SMITH of New Jersey. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Kentucky (Mr. WHITFIELD).

Mr. WHITFIELD. Mr. Speaker, tonight we discuss giving the President the authority to use military force against Iraq. As the Congressman from the first district of Kentucky, I have the privilege of representing the fine men and women of Fort Campbell, Kentucky, home of the 101st Airborne, Air Assault Division, the 5th Special Forces Group, and the 160th Special Operations Aviation Regiment, better known as the Night Stalkers.

These soldiers were among the first to engage the Taliban in Afghanistan and, unfortunately, the first to suffer casualties.

If we go to war with Iraq, they will again be the tip of the spear thrusting at our enemies, and they will again, sadly, be among the first to suffer casualties. Hopefully, that will not occur.

When I vote later this week, I may be putting my friends and neighbors on the frontline of combat. It is not a decision that any of us takes lightly. Therefore, after much deliberation, I have reluctantly concluded that Saddam Hussein has proven himself to be a threat that we cannot ignore.

For 11 years Saddam Hussein has defied U.N. resolution after resolution, while continuing his drive to acquire weapons of mass destruction. For years, he hindered and toyed with U.N. weapons inspectors in defiance of the cease-fire that ended the Gulf War. He has consorted with terrorists who are willing and eager to target innocent civilians in their war of hatred against the civilized world. He controls biological and chemical weapons, and we know he is trying to develop nuclear capability as well.

We are the world's only remaining superpower; yet a small band of terrorists were able to cause unprecedented death and destruction here in America. We cannot wait for another attack to take more American lives before finally deciding to act.

Another dead American man, woman, or child, struck down in their home or workplace by terrorist violence, would be an indictment of this Congress's failure to act while we had the chance.

I firmly believe that granting the President the authority he needs to continue to combat the menace of Saddam's regime is the best way to preserve peace, and I firmly believe that granting the President the authority he needs to combat the menace of Saddam's regime is the best way to help the Iraqi people.

Our allies in the U.N., many of whom have explored reestablishing beneficial economic ties with Saddam Hussein's regime, are unlikely to take the necessary steps or approve our taking those steps to end Saddam's threat unless the U.S. leads the way.

Since the President's speech to the United Nations, we have witnessed the rest of the civilized world awakening from its slumber and stealing itself for this necessary confrontation with Saddam Hussein. By uniting behind our President, we can send the world an indication of our resolve. If we show our allies that we consider the threat worth risking the lives of our soldiers, I believe our allies will support us in our endeavor.

Mr. Speaker, my hometown newspaper recently noted that 60 million people died in World War II to teach the world that allowing tyranny to go unchecked was wrong. Let us not make that same mistake with Saddam Hussein.

Mr. PAYNE. Mr. Speaker, it is a pleasure to yield 5 minutes to the gentleman from Illinois (Mr. EVANS), a person who is a senior member of the Committee on Armed Services and has worked for persons in uniform for many years.

Mr. EVANS. Mr. Speaker, I rise in opposition to this resolution.

I believe that taking action against Iraq at this time will take vital resources away from an even more pressing and dangerous threat: the war on al Qaeda. And this action, including the occupation and stabilization of the nation after the invasion, could drain our military resources for over a decade.

I do believe that Saddam Hussein and his possession and development of weapons of mass destruction does pose a threat to our Nation. But we already have a policy that is containing the threat and positions us well if we have to move forcefully.

I think our greater responsibility is to assess threats to our national security and then decide how to deal with them. I believe we have an even greater challenge that we must not divert precious resources from the global war on terrorism.

The greatest danger facing our Nation comes from al Qaeda, the terrorist network that perpetrated the acts of September 11. And while a year has passed and we have prosecuted a successful war against al Qaeda in Afghanistan, the infrastructure of terror, however, remains in place. Our forces are still searching for bin Laden and his followers, and while these people remain at large, our Nation still focuses on the possibility of attacks from this

group on an even larger scale than September 11.

I am deeply concerned that prosecuting a war on Iraq will divert precious resources from this war. A campaign against Saddam Hussein could tie up 200,000 military personnel. Diverting these forces and the assets that will be needed to support them will stretch our military perilously thin. To do this while we are conducting an intense worldwide anti-terror operations is unwise. I believe it puts the lives of American citizens at risk. It will keep us from exerting the full range of military options we need to neutralize terrorist cells and to interrupt planned terrorist operations. And it could continue to weigh down our military for a number of years.

It has been estimated that we will need up to 50,000 to remain behind for a period of years to help guarantee as much as can be possibly done for the civility of Iraq.

□ 2030

No one knows how long this will take or what type of resources we will need. Add to this the potential for conflict between ethnic and political rivals in Iraq, and we could be entering a quagmire that we may not be able to get out of. The administration has not clearly outlined our exit strategy, and this is another thing that bothers my constituents.

The war that the administration is entering into is a war on terror. Yet the case has not been made that links Iraq to support to al-Qaeda. The evidence to this point is sketchy, at best. In fact, the evidence really suggests that Iraq is a greatly weakened nation and that the threat posed by it has been deterred or reduced by the U.S. presence in the Gulf and the enforcement of the no-fly zones.

The strategy of containment has kept Iraq at bay. It has worked and continues to work. We can continue this policy as well as allow the U.N. weapons inspectors to go in to do their jobs. If all of this ends in the conclusion that Iraq is in violation of U.N. resolutions and is near a real nuclear weapons capability, we can reevaluate our options. Until then, we should continue with the present policy.

I think we have a great responsibility to our men and women who are going to fight this war and to the people who have, time and time again, come before this body and talked about how their sons or daughters and relatives have served in the Persian Gulf War and suffered from, let us say, Agent Orange disability. Because those that saw combat went over to the Persian Gulf healthy and came back ill. Many of them still suffer from the illnesses, the causes of which we still do not know.

Before we send these young men and women off to war and expose them not only to the hazards of conflict but to a lifetime of dealing with the physical and emotional costs of combat, we must do everything to achieve our goals without resorting to force.

In the case of Iraq, we can do this. If not, we face losing the war we must win, the fight against al Qaeda.

Mr. FALEOMAVAEGA. Mr. Speaker, I yield 5 minutes to the gentleman from Florida (Mr. DEUTSCH), a distinguished member of the Committee on Energy and Commerce.

Mr. DEUTSCH. Mr. Speaker, there is no more important thing that this Congress does, and, in fact, this country does, than protect our national security.

For many years, the most significant threat to us as a Nation was ballistic missiles from the former Soviet Union. That threat does not exist today; and, in fact, we are living in a new world.

I think what the President has acknowledged, and is trying to lead the American people and this Congress to an understanding of, is that the greatest threat to this country today is the threat of weapons of mass destruction by both terrorist states and terrorists.

That is the unthinkable, weapons of mass destruction against our homeland. What could that mean? It is the unthinkable. We do not want to think about it, but it is a potential reality. Had a nuclear weapon been on one of the planes that hit the World Trade Center, it would not have been 4,000 people who died. I think it is impossible for any of us to really feel or really understand what it means for 4,000 people to die in an instant. It literally would have meant at least 4 million people dying in an instant, and many more dying subsequent to that.

This is not an unthinkable possibility. The reality is we live in a world where to build a nuclear weapon takes about 7 pounds of enriched uranium, not much larger than a softball. In fact, it can be carried without detriment to a carrier of it. The technology to build the weapon, unfortunately, is not that sophisticated today.

One of the issues in terms of Iraq that is worth pointing out, in 1981, when the Israelis blew up the Iraqi military nuclear reactor, in 1981, they were 6 months away from having a nuclear weapon. That was over 20 years ago. If we think about a sense of how much the world and technology has changed in 20 years, personal computers did not exist 20 years ago when that nuclear reactor was blown up. Obviously, technology has gone a long way from that point; as well, the effort of the Iraqis to acquire those weapons since that period of time and in the approximately 4 years that there have been no weapons inspectors at all in Iraq.

When the weapons inspectors left 4 years ago, about 4 years ago, 4 years and a short period of time, in the public domain we have the information that the Iraqis had smallpox and anthrax at that time, and we know they have used it against their own citizens and other countries.

What does it mean? What is the issue? Iraq is not the only country in the world that has weapons of mass destruction. Why are we addressing this

issue? Why am I supporting the resolution of use of force against Iraq? I think there is a policy that the President has articulated that it is just not enough that they have the weapons, but, really, the intent to use them.

Clearly, Iraq does not have the ability to send ballistic missiles to the United States. We understand that. But they do have the ability today to attack us with biological and chemical weapons, today. We do not know how far off they are from nuclear weapons, but 20 years ago they were 6 months away. We know they are aggressively trying to seek those weapons today.

I think we need to acknowledge this is really a change in policy, but a change in policy for this country that is needed in terms of weapons of mass destruction in the 21st century. The downside of not stopping these weapons is, in fact, the unthinkable.

One of the things we do not talk about often is, once the sort of code of both equipment and delivery of these weapons is broken, why would a country, why would Iraq, have one nuclear weapon? Would they not have five, 10, or for that matter, 15, to be able to use in terrorist ways?

We talk about the fact they have the ability today to build a weapon. The only restriction potentially is their lack of material, of enriched uranium, 7 pounds of enriched uranium. Effectively, we have no way of stopping that from entering the United States today. We acknowledge that, effectively, we cannot.

We have thousands of pounds of cocaine, and our war on drugs, as effective as it is, it literally lets in thousands of pounds of cocaine a year into the United States.

I urge my colleagues, I urge the country to support this effort. We have a country that literally wants to kill us. They do not want to kill the French. They do not want to kill the Swedish. The action is directed at us.

This is an issue, as I started this evening, of national security, national defense, national survival for the United States of America. I urge the adoption of the resolution.

Mr. PAYNE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me say to all the Members on this side who will be coming up, because of the large number of Members who would like to speak, we are asking if their remarks can be contained in the 5 minutes, because from this point on we will be unable to yield extra time.

Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. BACA), who is a new Member, but his mark has been made in agriculture and science.

(Mr. BACA asked and was given permission to revise and extend his remarks.)

Mr. BACA. Mr. Speaker, I come before this Chamber with a heavy heart, because I know that I am making one of the most difficult decisions in my life.

Like my colleagues in Congress and every American, I have debated whether unilateral military action in Iraq is the best thing to do. I have carefully weighed and considered all options. I pray to God that I am making the right decision.

I have not been able to sleep. I think about the mothers and fathers I have met who have asked me, how long will this war last? How many lives will be lost? Could our children be drafted? How many of those children will come back with deformities, with cancer or mental illness?

I think about our many sons and daughters that will be affected by our decision. I wonder how many will not make it home to their parents.

I think about the many veterans that already have served our Nation but still have not received access to the benefits of our country that has promised them that.

I think about the innocent Iraqi children who will be caught in the cross-fire.

I think about how this war could make us more suspicious of others based on the color of their skin.

I have talked to bishops, clergy, community leaders. All of my constituents have written and voiced their concern about the war. Is the price we will pay in lives worth the security we might gain by eliminating only one of countless threats? In our Nation's history, we have never fired the first shot, so why now?

One thing is clear: We must exhaust every alternative before we send our sons and daughters into harm's way. We all want to keep our families and our Nation safe from terrorists and weapons of mass destruction, but I also want to make sure that I can look into my children's eyes and tell them that we have done everything we can to avoid a war.

War should also be the last resort, not the first option. I do not believe the President has made the case clear to the American people that now is the best time, or that unilateral action is the best option.

That is why I will vote in favor of the Spratt substitute. The Spratt substitute supports the President's proposal for intrusive weapons inspections and still gives the President the power to use our military if Iraq refuses to comply.

Let me be clear: I support the President in his efforts to protect and defend this Nation, but we must do so with the support of the United Nations and the international community.

The Spratt amendment says that the President has to get congressional approval before he unilaterally invades Iraq. Does that not make sense? Should the President come to Congress before he leads this Nation into war? That is what our Constitution demands.

Like the rest of the Nation, I am concerned that Saddam Hussein could transfer weapons of mass destruction to terrorist organizations, but we must

not act in haste and not without the support of the United Nations and the world community. That is why I reluctantly will vote against H.R. 114.

Mr. Speaker, I want to make one thing clear: Do not confuse my vote against the resolution as a vote against our troops. As a veteran, as a Congressman, as a patriotic American, I stand 100 percent for our troops. I remember how our brave men and women were treated when they returned home from Vietnam. They were treated with scorn and hate. We must not repeat our mistakes of the past. Regardless of what we think of the war, we must all support our soldiers, and we should protect their lives by winning support of our allies.

Acting alone will increase our economic burden and leave us with few resources to rebuild Iraq. It would raise the question about the legitimacy of our action in the eyes of the world. It would create more instability in the region and turn a mere threat into our worst nightmare.

Mr. Speaker, has the Bush administration answered all of our questions? What will happen if we go to war and Saddam Hussein uses chemical or biological weapons against our troops?

Our troops must have the equipment and resources they need to fight the war. Do we know what Saddam will throw at us? That is why we must provide them with all possible protection and treatment and benefits they need.

When our children come back to us sick with cancer, horribly disfigured, we must not turn our backs on them or their families.

What will happen with this regime? We must make sure that a new Iraq is democratic and respects human rights. A post-Saddam Iraq must be a beacon of hope to the Arab world and not a tool of American foreign policy.

What effect will this have on our war on terrorism? Would going to war with Iraq add fuel to the fire of the war on terrorism?

What effects would this have on our economy? The Bush administration tries to paint a rosy picture of the state of our economy, but we have gone from a record surplus to crippling deficits. My constituents are concerned about their savings, their jobs, prescription drugs, Social Security, the schools. How will this war affect them?

The President must not forget the economic problems of the American people. I am placing my trust, and our country is placing its trust, in this President to heed these concerns.

I know the President's resolution will likely pass this body with little effort. I oppose it because more of our men and women will die if we go to war. I pray to God that I have made the right decision.

□ 2045

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Missouri (Mr. CLAY), a member of the Committee on Financial Services.

Mr. CLAY. Mr. Speaker, I thank the gentleman from New Jersey (Mr. PAYNE) for yielding me time.

Mr. Speaker, over the last few weeks my constituents in St. Louis have made their opinions clear to me regarding the President's positions regarding Iraq, and I hear great opposition to war against Iraq. I hear mothers, fathers, seniors, college students and veterans opposing any action in the region. Their voices are black, white, Asian and Hispanic. And while the reasons for their opposition vary, the one common question they all seem to have is this: How does this conflict serve America's best interest?

I, along with many Americans, believe that the state of our sagging domestic economy has to be considered our Nation's greatest concern at this time. In the past year and a half this country has experienced increasing unemployment, growing national debt, tumbling economic growth, and a floundering stock market which has lost all consumer confidence.

Despite all this, our domestic issues have been pushed aside as we debate a possible preemptive attack against Iraq. Important issues like education, Social Security, unemployment, and affordable health care have been almost completely ignored by this diversion. Another question my constituents frequently ask is this: How will this war affect our young men and women serving in the Armed Forces?

When one looks at the make-up of our Armed Forces, African Americans make up more than 25 percent of the U.S. Army and over 38 percent of our Marine Corps. And since African Americans comprise more than 50 percent of my district, my constituents are justifiably concerned that instead of making their lives more secure, this war will likely expose them to even greater dangers.

Mr. Speaker, if my constituents are any gauge of the American public's concern regarding possible military action against Iraq, then I hope all Americans will contact their elected officials here in Congress at 202-225-3121 and voice their opposition to this resolution.

Neither my constituents nor I have forgotten September 11. We are still asking questions about the magnitude of this country's loss, but debating unprovoked unilateral action against a country whose ties to terrorism are suspect at best is not providing any answers. I for one believe that our military's top priority should be fighting al Qaeda and finishing the war against terrorism that we started in Afghanistan. Those who support this resolution have not yet come close to proving to me that Iraq represents a big enough military threat to take our focus off of bin Laden.

In addition, the stability of the Middle East is in danger. Jordan, Saudi Arabia, and Egypt would be subject to extreme internal pressure and unrest that would disrupt and threaten American interests in the region.

The concerns of my constituents' echoes voices heard more than 200 years ago. The men and women who founded our country imagined a Nation based on liberty and republican principals. One of these principals was that no country had the unilateral right to attack another without just cause. And President George Washington went so far as to suggest that America should keep its hands out of most foreign affairs. Washington stated, "The great rule of conduct for us in regards to foreign nations is in extending our commercial relation to have as little political connection as possible."

It appears that now, 200 years later, we have strayed quite far from our Founding Fathers' vision. And I cannot in good faith subject my constituents to this military conflict. I urge my fellow Members of Congress to also vote against this resolution.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. DAVIS), a member of the Committee on Government Reform.

(Mr. DAVIS of Illinois asked and was given permission to revise and extend his remarks.)

Mr. DAVIS of Illinois. Mr. Speaker, I rise in opposition to this resolution, and I am opposed not because I do not believe that we need to protect our national security. I am not in opposition because Saddam Hussein does not need to be checkmated and stopped. And I am not opposed because I do not recognize the need for a strong military, and I am not in opposition because this resolution has been put forth by President Bush.

However, I am opposed because after all of the information I have seen and after all I have heard, neither am I or a majority of residents of my district, the Seventh Congressional District of Illinois, convinced that the war is our only and most immediate option. We are not convinced that every diplomatic action has been exhausted. Therefore, I am not convinced that this resolution would prevent us, the United States of America, from acting without agreement and involvement of the international community.

I oppose a unilateral first-strike action by the United States without a clearly demonstrated and imminent threat of attack against the United States. We are now asked to vote on a resolution which will likely culminate in a war with Iraq, a war which may involve the entire Mid East region.

As the American people are attempting to make sense of this complex situation, no one doubts the evil of the current Iraqi regime. No one doubts the eventuality that the United States would prevail in armed conflict with Iraq.

What then are the central issues which confront us? One, is there an immediate threat to the United States? In my judgment the answer is no. We have not received evidence of immediate danger. We have not received evidence that Iraq has the means to at-

tack the United States, and we have not received evidence that the danger is greater today than it was last year or the year before.

Two, will the use of military force against Iraq reduce or prevent the spread or use of weapons of mass destruction? In my judgment, the answer is no. All evidence is that Iraq does not possess nuclear weapons today. The use of chemical or biological weapons or the passage of such weapons to terrorist groups would be nothing less than suicide for the current Iraqi leadership. However, as the CIA reports have indicated, faced with invasion and certain destruction, there would be nothing for the Iraqi regime to lose by using or transferring any such weapons they may still possess. Other states in the region which fear they could be attacked next could be moved to rash action.

Finally, three, have we exhausted all nonmilitary options to secure the elimination of all weapons of mass destruction in Iraq in accordance with United Nations resolutions? In my judgment, the answer is no. We have not exhausted the potential for a collective action with our allies. We have not yet exhausted the potential for inspections and for a strict embargo on technologies which could be used for weapons of mass destruction. The use of armed force should be a last resort to be used only when all other options have failed.

In my judgment that commitment to the peaceful solution of problems and conflict is an important part of what our democracy should stand for, and that does not necessitate or demand invasion or an attack on Iraq at this time.

I was at church on Sunday and the pastor reminded us of Paul as he talked about our problems with Saddam Hussein. He reminded us that as Paul instructed the Philippians on how to deal with conflict, at one point he wrote to the Philippians, "Brethren, I count myself not to have apprehended, but this one thing I do, forgetting those things which are behind, and reaching forth unto those things which are before. I press forth towards the mark for the prize of the high calling of Jesus Christ."

I trust, Mr. Speaker, that as we press forward, I trust that we will press forward towards the mark of a high calling, that we will take the high road, that we will take the road that leads to peace and not to war, the road that lets us walk by faith and not alone by sight or might. Let us, Mr. Speaker, walk by the Golden Rule. Let us do unto others as we would have them do unto us. Let us walk the road that leads to life and not to death and destruction. Let us walk the road to peace.

Mr. Speaker, I rise in opposition to this resolution, which authorizes the President of the United States to use armed forces of the United States against Iraq, and I am opposed to H.J. Res. 114, not because I don't believe we need to protect our national security, I am

not in opposition because Saddam Hussein does not need to be checkmated and stopped, I am not opposed because I don't recognize the need for a strong military, and I am not in opposition because this resolution has been put forth by President Bush.

However, I am opposed because after all the information that I have seen and after all that I have heard, neither am I, or a majority of the residents of my district, the 7th Congressional District of Illinois, convinced that war is our only and most immediate option. We are not convinced that every diplomatic action has been exhausted. Therefore, I am not convinced that this resolution will prevent us, the United States of America from acting without agreement and involvement of the international community. I oppose a unilateral first strike action by the United States without a clearly demonstrated and imminent threat of attack against the United States.

We are now being asked to vote on a resolution which will likely culminate in war with Iraq—a war which may involve the entire Mid-east region.

The American people are attempting to make sense of this complex situation. No one doubts the evil of the current Iraqi regime. No one doubts that eventually the United States would prevail in armed conflict with Iraq. What then are the central issues which confront.

(1) Is there an immediate threat to the United States?

In my judgment the answer is NO. We have not received evidence of immediate danger. We have not received evidence that Iraq has the means to attack the United States. We have not received evidence that the danger is greater today than it was last year or the year before.

(2) Will the use of military force against Iraq reduce or prevent the spread or use of Weapons of Mass Destruction?

In my judgment the answer is NO. All evidence is that Iraq does not possess nuclear weapons today. The use of chemical or biological weapons, or the passing of such weapons to terrorist groups would be nothing less than suicide for the current Iraqi leadership. As the CIA report has indicated we know that when backed up against the wall people sometimes lash out blindly and without careful thought.

(3) Have we exhausted all non-military options to secure the elimination of Weapons of Mass Destruction in Iraq in accordance with United Nations resolutions?

In my judgment, the answer is no. We have not exhausted the potential for collective action with our allies. We have not yet exhausted the potential for inspections and for a strict embargo on technologies which could be used for Weapons of Mass Destruction. The use of armed force should be a last resort, to be used only when all other options have failed. In my judgment, that commitment to the peaceful solution of problems and conflicts is an important part of what our Democracy should stand for, and that does not necessitate or demand invasion or an attack on Iraq at this time.

I was at church on Sunday and the pastor reminded us of Paul as he talked about our problems with Saddam Hussein. He reminded us that as Paul instructed the Philippians on how to deal with conflict—

Philippians 3-13-14

Paul wrote to the Philippians—

"Brethren, I count myself not to have apprehended, but this one thing I do, forgetting those things which are behind, and reaching forth unto those things which are before.

I press toward the mark for the prize of the high calling of God in Jesus Christ."

I trust, Mr. Speaker, that as we press forward, I trust that we will press forward toward the mark of the high calling toward the high road, the road which leads to peace and not to war, the road that lets us walk by faith and not alone by sight or might. Let us, walk by the Golden Rule—let us do unto others as we would have them do unto us. Let us walk the road that leads to life and not to death and destruction. Let us walk the road that leads to peace. I urge a no vote on this resolution.

Mr. Speaker, I urge a "no" vote on this resolution.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio (Mr. STRICKLAND), a member of the Committee on Energy and Commerce, the Subcommittee on Energy and Health.

Mr. STRICKLAND. Mr. Speaker, all of us agree that Saddam Hussein is a bloodthirsty dictator and must be contained. But before we send young Americans into the deserts of Iraq, all diplomatic possibilities to avert war must be exhausted, and they have not been.

In times like these amid all of the swirling difference of opinion, what we need more than anything else is a good dose of common sense. Just today the Columbus Dispatch offered an editorial opinion which presents a commonsense approach to the challenge we face. I would like to share that editorial as a commonsense message from Ohio, the Heartland of America.

The editorial begins, "In his speech on Monday, President Bush made an excellent case for renewed United Nations weapons inspections in Iraq. He did not, however, make a case for war. Though the President continues to paint Iraq as an imminent threat to peace, he offered no new evidence to back that assessment. Iraq appears to be neither more nor less a threat than it was in 1998 when the last U.N. weapons inspectors left the country; nor does it appear to be a bigger threat than Iran, Libya or North Korea, all of whom are developing long-range missiles and weapons of mass destruction and are hostile to the United States.

The speech was a hodgepodge of half-plausible justifications for war with the President hoping that if he strings together enough weak arguments, they will somehow add up to a strong one. For example, the President failed to demonstrate any significant link between Iraqi dictator Saddam Hussein and the al Qaeda terrorism network. The truth is it would be far easier to demonstrate links between Iran and al Qaeda or Saudi Arabia and al Qaeda. But President Bush is not proposing military action against those states whose support for terrorism and terrorist organizations is practically overt. In fact, less than a day after the President's speech, CIA Director

George Tenet told Congress that Saddam apparently has a policy of not supporting terrorism against the United States.

The backhanded admission came as Tenet warned that Saddam might change his mind if he believes the United States is serious about attacking Iraq.

Next, the President cited the 11-year history of Iraqi attempts to deceive U.N. weapons inspectors as proof that inspectors have failed. But have they? For 11 years Saddam has not fielded a nuclear weapon, nor has he deployed any chemical or biological weapons. This suggests that in spite of Iraqi attempts to thwart inspectors, inspections have thwarted Saddam's ability to build the weapons he seeks.

The President also points out that removing Saddam from power would be a blessing to the people from Iraq who have endured his totalitarian boot on their necks for decades. This is true. Saddam idolizes Soviet dictator Josef Stalin and certainly will be skewered on an adjacent spit in hell. But if removing oppressive regimes justifies war, the United States is in for a long, long battle against half of the world that is ruled by bloodthirsty dictators.

The weaknesses of the President's arguments only heighten suspicions that the proposed attack on Iraq is intended to divert attention from the so-so progress of the genuine war on terrorism and the sputtering economy. Still, President Bush is correct to demand that the inspectors resume and that inspectors have unimpeded access to all Iraqi sites including the so-called presidential palaces. All diplomatic means now should be deployed to achieve that end.

□ 2100

As it stands, Iraq has agreed to re-admitting the inspectors, and the United Nations is preparing to send them in.

Sure, the United States and the United Nations have been down this road with Saddam before. But, last time, neither Washington nor the world community chose to do anything significant about it. There is time to give peaceful processes one more try. If, as many expect, Saddam intends to block the new inspections, the United States and the United Nations will have all the justifications they need for stronger measures; and at that point the President would have little problem in enlisting the support of the American people and the aid of the international community.

This concludes the editorial. And, Mr. Speaker, I stand today in support of the Spratt amendment because I cannot support H.J. Res. 114. We may have to eventually use military force to disarm Saddam Hussein, but this resolution is too open, too far-reaching. It is wrong. It should be rejected.

Mr. FALEOMAVAEGA. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey (Mr. PAYNE)

be granted an additional 60 minutes, and that he be permitted to control the time and yield to other Members of our body.

The SPEAKER pro tempore (Mr. HAYES). Is there objection to the request of the gentleman from American Samoa?

There was no objection.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. PAYNE) is recognized for 60 minutes.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Michigan (Mr. CONYERS), the second longest serving Democrat in the House and ranking member of the Committee on the Judiciary.

(Mr. CONYERS asked and was given permission to revise and extend his remarks, and include extraneous material.)

Mr. CONYERS. Mr. Speaker, I would like to thank the gentleman from New Jersey (Mr. PAYNE) for yielding me this time, and I am proud to be a part of this discussion tonight.

Passage of a resolution authorizing the President to commence war at a time and place of his choosing would set a dangerous precedent and risk unnecessary death. The proposal of this resolution has already been called a grand diversion of America's political focus as elections approach. Worse, it would create a grand diversion of our already depleted resources, those that are so desperately needed for the pressing problems at home.

The American people are not bloodthirsty. We never want to go to war unless we have been convinced that it is absolutely necessary. That is as true of Americans whether in Maine or West Virginia or Texas or Michigan, whether they are black, brown or white, young or old, rich or poor. The mail and phone calls I have received have been overwhelmingly opposed to a preemptive attack against Iraq.

Is war necessary now? We keep coming back to one stubborn irrefutable fact: There is no imminent threat to our national security. The President has not made the case. Senators and Congressmen have emerged from countless briefings with the same question: Where is the beef? There is no compelling evidence that Iraq's capability and intentions regarding weapons of mass destruction threaten the U.S. now, nor has any member of the Bush administration, the Congress, the intelligence community shown evidence linking the al Qaeda attacks last year on New York and the Pentagon with either Saddam Hussein or Iraqi terrorists. Indeed, if President Bush had such proof of Iraq's complicity, he would need no further authorization to retaliate. That is the law. He could do so under the resolution we passed only 3 days after al Qaeda's infamous attacks.

What is it we do now about Iraq? We know Saddam is a ruthless ruler who will try to maintain power at all costs and who seeks to expand his weapons of

destruction. We have known that for some time. We do know that Iraq has some biological and chemical weapons, but none with a range to reach the United States.

Therefore, the President paints two scenarios:

The first is that Iraq would launch biological or chemical weapons against Israel, Arab allies, or our deployed forces. But during the Gulf War, Saddam did not do so. Why not? Because he knew he would be destroyed in retaliation, and we were not then threatening his destruction as President Bush is now doing. Thus, attacking Iraq will increase rather than decrease the likelihood of Saddam Hussein's launching whatever weapons he may have.

Now, under the administration's second scenario, Iraq would give weapons of destruction to al Qaeda, who might bring them to our shores. But that scenario, too, is not credible.

Perhaps the most significant intelligence assessment we have was revealed publicly only last night and has been raised repeatedly on the floor during this debate. The Central Intelligence Agency states that Iraq is unlikely to initiate chemical or biological attacks against the United States, and goes on to warn that "Should Saddam conclude that a U.S.-led attack could no longer be deterred, he might decide the extreme step of assisting Islamist terrorists in conducting a weapons of mass destruction attack against the United States would be his last chance to exact vengeance by taking a number of victims with him."

Passage of a resolution authorizing the President to commence war at a time and place of his choosing would set dangerous precedents and risk unnecessary death. The proposal of this resolution has already created a "grand diversion" of America's political focus as elections approach, and worse, it would create a "grand diversion" of our already depleted resources, so desperately needed for pressing problems at home.

The American people are not bloodthirsty. We never want to go to war, unless we have been convinced that it is absolutely necessary. That is as true of Americans whether in Maine, West Virginia, Texas or Michigan—whether they are black, brown or white; young or old, rich or poor. The mail and phone calls I receive have been overwhelmingly opposed to a pre-emptive attack against Iraq.

Is war necessary now? We keep coming back to one stubborn irrefutable fact: There is no imminent threat to our national security. The President has not made the case. Senators and Congressmen have emerged from countless briefing with the same question: "Where's the beef?" There is no compelling evidence that Iraq's capability and intentions regarding weapons of mass destruction threaten the U.S. now. Nor has any member of the Bush Administration, the Congress or the intelligence community shown evidence linking the Al Qaeda attacks last year on New York City, and the Pentagon with either Saddam Hussein or Iraqi terrorists. Indeed, if President Bush had such proof of Iraq's complicity, he would need no further authorization to retaliate. He

could do so under the resolution we passed only three days after Al Qaeda's infamous attacks.

What is it that we do now about Iraq? We know Saddam is a ruthless ruler who will try to maintain power at all costs and who seeks to expand his weapons of destruction. We have known that for some time. We do know that Iraq has some biological and chemical weapons, but none with range to reach the U.S. Therefore, President Bush paints two scenarios:

The first is that Iraq would launch biological or chemical weapons against Israel, Arab allies or our deployed forces. But during the Gulf War, Saddam did not do so. Why not? Because he knew he would be destroyed in retaliation, and we were not then threatening his destruction, as President Bush is now doing. Thus, attacking Iraq will increase rather than decrease the likelihood of Saddam Hussein's launching whatever weapons he does have.

Under the Administration's second scenario, Iraq would give weapons of destruction to Al Qaeda, who might bring them to our shores. But that scenario, too, is not credible. Perhaps the most significant intelligence assessment we have is one revealed publicly only last night. The CIA states that Iraq is unlikely to initiate chemical or biological attack against the U.S., and goes on to warn that, and I quote:

Should Saddam conclude that a U.S.-led attack could no longer be deterred, [Hussein might] decide that the extreme step of assisting Islamist terrorist in conducting a [weapons of mass destruction] attack against the United States would be his last chance to exact vengeance by taking a number of victims with him.

In other words, the CIA warns that an attack on Iraq could well provoke the very tragedy the President claims he is trying to forestall—Saddam's use of chemical or biological weapons.

President Bush and his supporters now cite some "evidence of contacts between Al Qaeda representatives and Baghdad." So what? We have had high level contracts with North Korea, Afghanistan when the Taliban ruled it, and other ruthless despots. That did not mean we were allies. The intelligence community has confirmed that Al Qaeda and Saddam's secular Baathist regime are enemies. As a religious fanatic, Bin Laden has been waging underground war against the secular governments of Iraq, Egypt, Syria and the military rulers of other Arabic countries. Saddam would be very unlikely to give such dangerous weapons to a group of radical terrorists who might see fit to turn them against Iraq.

We are fairly certain that Iraq currently has no nuclear weapons. Even with the best luck in obtaining enriched uranium or plutonium, the official intelligence estimate is that Iraq will not have them for some time. If Iraq must produce its own fissile material, it would take three to five years, according to those estimates. In a futile effort to mirror the prudent approach of President Kennedy during the Cuban Missile Crisis, President Bush recently released satellite photographs of buildings, as evidence that Saddam has resumed a nuclear weapons development. This is hardly headline news. We knew that he had resumed them.

Another thing we know is that:

Iraq's vast oil reserves have been a major tool in the Administration's pressuring other countries to support our rush to war against their better judgment; and

Those oil reserves will be controlled and allocated by the U.S. if we install or bless a new regime in Baghdad.

These implications are explored in an excellent Washington Post article, which I ask unanimous consent to insert in the RECORD immediately following remarks. Let me read just two paragraphs here:

A U.S.-led ouster of Iraqi President Saddam Hussein could open up a bonanza for American oil companies long banished from Iraq, scuttling oil deals between Baghdad and Russia, France and other countries, and reshuffling world petroleum markets, according to industry officials and leaders of the Iraqi opposition.

Although senior Bush administration officials say that they have not begun to focus on the issues involving oil and Iraq, American and foreign oil companies have already begun maneuvering for a stake in the country's huge proven reserves of 112 billion barrels of crude oil, the largest in the world outside Saudi Arabia.

Mr. Speaker, there has been a discernible and disconcerting rhythm to the Administration's arguments. Every time one of their claims has been rebutted, they have reverted to the mantra that, after September 11, 2001, the whole world has changed. Indeed it has. But they cannot wave that new international landscape like a magic wand in order to transform Iraq into an imminent threat to the United States when it is not.

Moreover, discussing whether Iraq presents such a threat only deals with half of the equation before us. What are all the costs of war? While Iraq poses no imminent threat to us, unleashing war against Iraq would pose many terrible threats to America.

It would dilute our fight against Al Qaeda terrorists. That is why families of the victims of "9/11" have angrily told me and some of you that they oppose a pre-emptive war precisely because it would undermine our war on terrorism. Administration assurances that war against Iraq would not dilute our war on terrorism are pleasing, but cannot change the facts. Space satellites, aircraft, ships and special forces simply cannot be in two places at the same time.

America's attacking Iraq alone would ignite a firestorm of anti-American fervor in the Middle East and Muslim world and breed thousands of new potential terrorists.

As we see in Afghanistan, there would be chaos and inter-ethnic conflict following Saddam's departure. A post-war agreement among them to cooperate peacefully in a new political structure would not be self-executing. Iraq would hardly become overnight a shining "model democracy" for the Middle East. We would need a U.S. peacekeeping force and nation-building efforts there for years. Our soldiers and aid workers could be targets for retribution and terrorism.

America has never been an aggressor nation. If we violate the U.N. Charter and unilaterally assault another country when it is not yet a matter of necessary self-defense, then we will set a dangerous precedent, paving the way for any other nation that chooses to do so, too, including those with nuclear weapons such as India and Pakistan and China.

We will trigger an arms-race of nations accelerating and expanding their efforts to de-

velop weapons of destruction, so that they can deter "pre-emptive" hostile action by the U.S. Do we really want to open this Pandora's box?

Mr. Speaker, of all the consequences I fear, perhaps the most tragic is that war, plus the need to rebuild Iraq, would cost billions of dollars badly needed at home. For millions of Americans, the biggest threat to their security is the lack of decent wage jobs, health insurance or affordable housing for their families. Senior citizens having to choose between buying enough food and buying prescription drugs is an imminent threat. Unemployment reaching 6 million people is an imminent threat to America's well-being. Forty-one million American without health insurance is an imminent threat.

The huge cost of war and nation building, which will increase our deficit, along with the impact of the likely sharp rise in oil prices, will deal a double-barreled blow to our currently fragile economy.

What then should we do at this time? We should face the many clear and present dangers that threaten us here at home; we should seek peaceful resolution of our differences with Iraq.

Mr. Speaker, I include for the RECORD an article from the Washington Post from Sunday, September 15, 2002.

[From The Washington Post, Sept. 15, 2002]

IN IRAQI WAR SCENARIO, OIL IS KEY ISSUE

(By Dan Morgan and David B. Ottaway)

A U.S.-led ouster of Iraqi President Saddam Hussein could open a bonanza for American oil companies long banished from Iraq, scuttling oil deals between Baghdad and Russia, France and other countries, and reshuffling world petroleum markets, according to industry officials and leaders of the Iraqi opposition.

Although senior Bush administration officials say they have not begun to focus on the issues involving oil and Iraq, American and foreign oil companies have already begun maneuvering for a stake in the country's huge proven reserves of 112 billion barrels of crude oil, the largest in the world outside Saudi Arabia.

The importance of Iraq's oil has made it potentially one of the administration's biggest bargaining chips in negotiations to win backing from the U.N. Security Council and Western allies for President Bush's call for tough international action against Hussein. All five permanent members of the Security Council—the United States, Britain, France, Russia and China—have international oil companies with major stakes in a change of leadership in Baghdad.

"It's pretty straightforward," said former CIA director R. James Woolsey, who has been one of the leading advocates of forcing Hussein from power. "France and Russia have oil companies and interests in Iraq. They should be told that if they are of assistance in moving Iraq toward decent government, we'll do the best we can to ensure that the new government and American companies work closely with them."

But he added: "If they throw in their lot with Saddam, it will be difficult to the point of impossible to persuade the new Iraqi government to work with them."

Indeed, the mere prospect of a new Iraqi government has fanned concerns by non-American oil companies that they will be excluded by the United States, which almost certainly would be the dominant foreign power in Iraq in the aftermath of Hussein's fall. Representatives of many foreign oil concerns have been meeting with leaders of the Iraqi opposition to make their case for a fu-

ture stake and to sound them out about their intentions.

Since the Persian Gulf War in 1991, companies from more than dozen nations, including France, Russia, China, India, Italy, Vietnam and Algeria, have either reached or sought to reach agreements in principle to develop Iraqi oil fields, refurbish existing facilities or explore undeveloped tracts. Most of the deals are on hold until the lifting of U.N. sanctions.

But Iraqi opposition officials made clear in interviews last week that they will not be bound by any of the deals.

"We will review all these agreements, definitely," said Faisal Qaragholi, a petroleum engineer who directs the London office of the Iraqi National Congress (INC), an umbrella organization of opposition groups that is backed by the United States. "Our oil policies should be decided by a government in Iraq elected by the people."

Ahmed Chalabi, the INC leader, went even further, saying he favored the creation of a U.S.-led consortium to develop Iraq's oil fields, which have deteriorated under more than a decade of sanctions. "American companies will have a big shot at Iraqi," Chalabi said.

The INC, however, said it has not taken a formal position on the structure of Iraq's oil industry in event of a change of leadership.

While the Bush administration's campaign against Hussein is presenting vast possibilities for multi-national oil giants, it poses major risks and uncertainties for the global oil market, according to industry analysts.

Access to Iraqi oil and profits will depend on the nature and intentions of a new government. Whether Iraq remains a member of the Organization of Petroleum Exporting Countries, for example, or seeks an independent role, free of the OPEC cartel's quotas, will have an impact on oil prices and the flow of investments to competitors such as Russia, Venezuela and Angola.

While Russian oil companies such as Lukoil have a major financial interest in developing Iraqi fields, the low prices that could result from a flood of Iraqi oil into world markets could set back Russian government efforts to attract foreign investment in its untapped domestic fields. That is because low world oil prices could make costly ventures to unlock Siberia's oil treasures far less appealing.

Bush and Vice President Cheney have worked in the oil business and have longstanding ties to the industry. But despite the buzz about the future of Iraqi oil among oil companies, the administration, preoccupied with military planning and making the case about Hussein's potential threat, has yet to take up the issue in a substantive way, according to U.S. officials.

The Future of Iraq Group, a task force set up at the State Department, does not have oil on its list of issues, a department spokesman said last week. An official with the National Security Council declined to say whether oil had been discussed during consultations on Iraq that Bush has had over the past several weeks with Russian President Vladimir Putin and Western leaders.

On Friday, a State Department delegation concluded a three-day visit to Moscow in connection with Iraq. In early October, U.S. and Russian officials are to hold an energy summit in Houston, at which more than 100 Russian and American energy companies are expected.

Rep. Curt Weldon (R-Pa.) said Bush is keenly aware of Russia's economic interests in Iraq, stemming from a \$7 billion to \$8 billion debt that Iraq ran up with Moscow before the Gulf War. Weldon, who has cultivated close ties to Putin and Russian parliamentarians, said he believed the Russian

leader will support U.S. action in Iraq if he can get private assurances from Bush that Russia "will be made whole" financially.

Officials of the Iraqi National Congress said last week that the INC's Washington director, Entifadh K. Qanbar, met with Russian Embassy officials here last month and urged Moscow to begin a dialogue with opponents of Hussein's government.

But even with such groundwork, the chances of a tidy transition in the oil sector appear highly problematic. Rival ethnic groups in Iraq's north are already squabbling over the giant Kirkuk oil field, which Arabs, Kurds and minority Turkmen tribesmen are eyeing in the event of Hussein's fall.

Although the volumes have dwindled in recent months, the United States was importing nearly 1 million barrels of Iraqi oil a day at the start of the year. Even so, American oil companies have been banished from direct involvement in Iraq since the late 1980s, when relations soured between Washington and Baghdad.

Hussein in the 1990s turned to non-American companies to repair fields damaged in the Gulf War and Iraq's earlier war against Iran, and to tap undeveloped reserves, but U.S. government studies say the results have been disappointing.

While Russia's Lukoil negotiated a \$4 billion deal in 1997 to develop the 15-billion-barrel West Qurna field in southern Iraq, Lukoil had not commenced work because of U.N. sanctions. Iraq has threatened to void the agreement unless work began immediately.

Last October, the Russian oil services company Slavneft reportedly signed a \$52 million service contract to drill at the Tuba field, also in southern Iraq. A proposed \$40 billion Iraqi-Russian economic agreement also reportedly includes opportunities for Russian companies to explore for oil in Iraq's western desert.

The French company Total Fina Elf has negotiated for rights to develop the huge Majnoon field, near the Iranian border, which may contain up to 30 billion barrels of oil. But in July 2001, Iraq announced it would no longer give French firms priority in the award of such contracts because of its decision to abide by the sanctions.

Officials of several major firms said they were taking care to avoiding playing any role in the debate in Washington over how to proceed on Iraq. "There's no real upside for American oil companies to take a very aggressive stance at this stage. There'll be plenty of time in the future," said James Lucier, an oil analyst with Prudential Securities.

But with the end of sanctions that likely would come with Hussein's ouster, companies such as ExxonMobil and ChevronTexaco would almost assuredly play a role, industry officials said. "There's not an oil company out there that wouldn't be interested in Iraq," one analyst said.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. FILNER), a member of the Committee on Transportation and Infrastructure and a strong fighter for the environment.

Mr. FILNER. Mr. Speaker, I rise in opposition to this resolution to grant unilateral authority to the President of the United States for a preemptive strike on Iraq. I cannot believe that the Members of this body are ceding our constitutional authority to this President. And they can give me all the fancy whereases and phrases, and put on the fig leaves, and write all the report language they want, but this is a blank

check. This is a Gulf of Tonkin resolution. This is a violation not only of our Constitution but will lead to a violation of the United Nations Charter.

Wake up, my colleagues. Why would anyone vote to do that? That is not our constitutional responsibility. And when we vote on this resolution, will America be more safe? No, I think America will be less safe. We will dilute the war against terrorism. The destabilization of the area will lead to the increased probability of terrorists getting nuclear weapons, say, in Pakistan. The al Qaeda are probably cheering the passage of this resolution. Now is their chance to get more weapons.

We should not risk American lives. We should be working with the United Nations. We should get the inspectors in there. We should disarm Saddam Hussein. And if they cannot do their work, if the U.N. authorizes force, we will be a much stronger and efficient force working with the United Nations.

Imminent threat. There is an imminent threat. I will tell my colleagues what the imminent threat is, it is our failing economy and the rising unemployment. It is kids not getting a quality education. It is 401(k)s that are down to zero. It is corporate theft. It is the obscene cost of prescription drugs. That is the imminent threat to America, Mr. Speaker. That is what we ought to be working on here.

I have heard all my colleagues on the other side of this issue calling us appeasers, those who are going to vote against this resolution. We are wishful thinkers. We have our eyes closed. We sit on our hands. And, of course, that phrase, the risk of inaction is greater than the risk of action.

No one on this side, Mr. Speaker, is suggesting inaction. Making peace is hard work. Just ask Martin Luther King, Jr. Ask Ghandi. Ask Norman Mandela. They were not appeasers. They were not inactive. They were peacemakers. And they changed the history of this world.

So let us not hear talk of appeasement. Let us not hear talk that we favor inaction. We want action for peace in this world, and we want the United States to be part of that action.

Finally, Mr. Speaker, there is a whiff of Vietnam in the air. I had a constituent call me and say, "You know, if you enjoyed Vietnam, you are really going to love Iraq." The mail is running 10 to 1 against this war. Protests have already begun around the Nation and around the world.

I say to the President, of course through the Speaker, that you came to office as a uniter, not a divider. Yet we are going round the road of division in this Nation. You can see it, you can smell it, you can hear it, and we are going to hear more.

Let us not go down this road, Mr. President. Rethink this policy. A country divided over war is not a country that is going to make any progress. Let us have a rethinking of this resolution. Let us not vote for a preemptive uni-

lateral strike. Let us work through the United Nations. Let us become a peace-making Nation. Let us vote "no" on this resolution.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentlewoman from California (Ms. ROYBAL-ALLARD), a member of the Committee on Appropriations.

Ms. ROYBAL-ALLARD. Mr. Speaker, like my colleagues of both parties and in both Chambers and as the wife of a Vietnam veteran, the national debate on whether or not to go to war with Iraq and under what circumstances has weighed heavily on my mind and my heart. For, clearly, sending the young men and women of our Armed Forces into harm's way is one of the most serious and far-reaching decisions a Member of Congress will ever have to make.

Like all Americans, I take pride in the fact that we are a peaceful Nation but one that will defend itself if needed against real and imminent dangers. Like all Americans, I take very seriously our responsibilities as the world's global superpower and realize how our words and actions can have huge repercussions throughout the world.

For that reason, I attended meetings and studied the materials provided us. I have listened to the administration, my constituents, my colleagues on both sides of the issue, both sides of the aisle, and both sides of the Congress; and I remain deeply concerned about our march to war without a supportive coalition or a clear and moral justification.

Before making a final decision on my vote, I also asked myself, as a wife and mother, what would I want our Nation's leaders to do before sending my son, my daughter, any loved one to war? While I support our President's efforts to keep our Nation and our world safe, I firmly believe the President has not made the case for granting him far-reaching power to declare preemptive and unilateral war against Iraq.

There is no question that Saddam Hussein is a dangerous and unconscionable dictator with little regard for human life, and there is no question that he must be disarmed and removed from power. The facts presented thus far, however, do not support the premise that Saddam Hussein is an immediate danger to our country.

It is for that reason that I believe it is in the best interest of our Nation and our American troops to make every possible effort now to prevent war by exhausting diplomatic efforts, by giving the U.N. weapons inspectors the resources and opportunity to perform their work, and by establishing a U.N. Security Council multilateral coalition to use force, if necessary.

□ 2115

If that fails, the President can then bring his case to Congress on the need for a unilateral preemptive strike against Iraq. At this time, however, a blank check authorization for military force is not acceptable.

I cannot, therefore, in good conscience support the administration's request for a near *carte blanche* authority to wage war when the case to do so has not been justified.

I will, however, support the resolutions of my colleagues, the gentlewoman from California (Ms. LEE) and the gentleman from South Carolina (Mr. SPRATT).

The Lee resolution urges Congress to work with the United Nations using all peaceful means possible to resolve the issue of Iraqi weapons of mass destruction.

The Spratt resolution includes similar requirements with regards to the United Nations but also authorizes the use of force if the U.N. efforts fail. The Spratt resolution brings responsibility and accountability to our effort to protect our country from Saddam Hussein, and it makes the administration and the Congress partners in any military action against Iraq.

The Spratt proposal honors our Nation's fundamental system of checks and balances. It makes it possible for me to say to my constituents and our Nation's sons and daughters, including my stepson who proudly serves in the U.S. Army, I did everything in my power to keep you from harm's way.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from North Carolina (Mr. WATT), a member of the Committee on the Judiciary and a constitutional expert.

(Mr. WATT of North Carolina asked and was given permission to revise and extend his remarks.)

Mr. WATT of North Carolina. Mr. Speaker, Article I of the United States Constitution states that the Congress shall have power to declare war. Article II of the Constitution provides that the President shall be the Commander-in-Chief. Over the years, these provisions of the Constitution have been the subject of a virtually endless tug of war between the legislative branch and the executive branch, as well as the subject of virtually endless debate among constitutional scholars.

In general I believe, and many constitutional scholars agree, that these two provisions reserve to Congress the sole authority to declare war when there is time for Congress to make a deliberative determination to invade another country and allow the President, as Commander-in-Chief to engage the United States in war only in response to an attack upon the United States or its citizens or in the event of direct and imminent threat of such an attack.

I believe the resolution before us today crosses the line, delegating to the President the authority our Constitution gives solely to Congress. While we most certainly may delegate our authority, to do so would, in my opinion, be an abdication of our responsibility as Members of Congress.

If, as the President asserted in his speech to the American people, an imminent threat exists, it seems to me

that this resolution is unnecessary. There is ample precedent for the President to act under those circumstances without a declaration of war or of authorization from Congress. No such imminent threat has been shown to exist.

Of course, Saddam Hussein is a thug and probably all the other things he has been called in the course of this debate. That, however, does not mean that Iraq poses any imminent threat that would justify the President proceeding to war without authorization from Congress.

Further, nothing the President said in his speech and nothing I have seen apart from his speech has led me to conclude that we should be delegating to the President the authority the Constitution gives to Congress, certainly not in the one-step manner in which the resolution we are considering would do. Nor do I believe that refusing to give that authority over to the President places the United States in any imminent danger.

If the President and the United States fail in their efforts to have Iraq comply with U.N. resolutions and if the President fails in his efforts to mobilize a coalition of nations in support of the United States, I believe that would be the appropriate time for the Congress to consider the advisability of declaring war.

This resolution, instead, requires us to make that decision today by delegating the decision to the President without the authority to bring it back to us. To do so now, in fact, would put us ahead of the President since he insisted in his speech that he had not yet decided whether war is necessary.

Unfortunately, despite the President's assurance, the contents of the President's speech left me with the sinking feeling that giving him a blank check to invade Iraq without seeking further authorization from Congress will virtually assure war. In my opinion, war should always be the last resort and in this case will almost certainly increase, not decrease, the risk of biological, chemical, or other terrorist retaliations. In fact, that is exactly what the CIA told Senator LEVIN in testimony in the Senate.

We are called upon, as Members of Congress and as citizens of the world, to ask ourselves today, where and when would it end? The risks are too great to proceed to war without a satisfactory answer to that question and without pursuing every conceivable peaceful option short of war.

For these reasons, I will vote against the resolution; and I encourage my colleagues to vote against it, too.

Mr. ISSA. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio (Mr. LATOURETTE).

Mr. LATOURETTE. Mr. Speaker, I thank the gentleman who attended the same alma mater I attended in Cleveland Heights, Ohio, for yielding me this time.

Mr. Speaker, I have to admit to a great deal of confusion tonight. A num-

ber of my colleagues are convinced that war is the only action; some believe it should never be an option; and most, I think, join with me and think that it should be an issue of last resort.

Like most of my colleagues, I have received volumes of mail from my constituents, and their opinions mirror the confusion which exists in this body tonight.

What troubles me is I have heard members of my party indicate in the press that the issue of war with Iraq has sucked the air out of Democratic message; and, sadly, I have heard Members on the other side of the aisle complain of the same thing.

The thought that this issue where we are talking about certain casualties, Iraqi, American, and those of our coalition partners, that those would be used for an advantage by either side in midterm elections is repugnant to me and the people I represent in Ohio.

When I have an 84-year-old Republican grandmother in Ashtabula, Ohio, grab my arm and say, Congressman, we have never attacked another sovereign country in our history without first being attacked, I am moved.

When I hear former Prime Minister Netanyahu tell our Committee on Government Reform that Israel has dealt with terrorists like Saddam Hussein since 1948, and if you do not get him, he will get you, I am moved as well.

At the end of it all, I will say that I have concluded if we were on the floor of this House on September 10, 2001, and we knew what we know today, every Member in this body, Republican and Democrat, would do whatever it took to protect the people of this Republic, and we should do that tonight.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. FARR), a member of the Committee on Appropriations and an environmentalist.

Mr. FARR of California. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I rise tonight on the issue of war with Iraq. I rise not only as a House Member from California, but as a father and about-to-be grandfather, and as a person who in his youth responded to a call for action by serving in the United States Peace Corps.

I have to ask myself in casting the votes before us, what is the best way to achieve peace in Iraq, not only for its own diverse ethnic people living in Iraq, but also for the people in the rest of the world?

The House leadership has adopted a closed rule on the debate so only three resolutions can be voted on. I think the gentlewoman from California (Ms. LEE) has the preferred alternative because it speaks to the issue of putting all our efforts into working with the world community through the United Nations Security Council to get inspectors into Iraq. We should let that process run its course before determining that it will fail.

The Lee resolution calls upon the United States to "work through the United Nations to seek to resolve the matter of insuring that Iraq is not developing weapons of mass destruction through mechanisms such as resumption of weapons inspectors, negotiation, inquiry, mediation, regional arrangements and other peaceful means."

The President has done a good job in making the point that the U.N. Security Council must resolve the Iraq violation of U.N. resolutions. He should have stopped there, using all of the power of the President of the United States, the State Department, the Commerce Department, and the Department of Defense to help the U.N. inspectors into Iraq but not to threaten war. Why? Because, first, according to the U.N. Charter, only the U.N. Security Council has the power to enforce U.N. resolutions.

I find it ironic that the President who seems to be committed to holding Iraq accountable to the U.N. is requesting an authorization that circumvents the Security Council and runs counter to the authority of the U.N. Charter.

Second, the people's House should not give a blank check to declare war to the President of the United States. According to Article I Section 8 of the Constitution, Congress is given the power to declare war. The President is asking Congress to abrogate its constitutional responsibility. The President's resolution authorizes him to use force as he determines to be necessary. This is not the responsibility of the President. The President is the Commander-in-Chief. He shall execute as determined by Congress.

The Constitution clearly makes a separation of powers to stop the President from going on foreign adventures without the express consent of the American people.

Third, I think leaping into war before we get all of the facts could threaten world security, especially our own. Think about it. Striking preemptively without gathering sufficient intelligence will put U.S. troops in harm's way. We need U.N. inspectors in Iraq to gather information.

How will the U.S. military carry out surgical strikes of Iraq weapons depots and laboratories if it does not know where these facilities are? We need to know how many weapons Iraq has and what types of weapons. Striking before knowing creates an unintended consequence which could further threaten the world.

□ 2130

A preemptive strike will set an extremely damaging precedent to the future of international affairs. The U.S. will entirely lose its moral authority on preventing conflict. What will we say if Russia moves to attack Georgia, if China invades Taiwan, if India or Pakistan makes a decisive move into Kashmir? Lastly, a unilateral attack could alienate the U.S. from the rest of the world community including our

traditional allies, our allies in the region, and our new allies in the war against terrorism. Far from strengthening the U.N., a unilateral strike before the U.N. acts will undermine the international body and lead the world to believe that the U.S. views the U.N. as a rubber stamp at best.

A unilateral attack makes it less likely that the rest of the international community will support the U.S. in postconflict reconstruction of Iraq. The U.S. will bear most of the costs if not all the costs of the war and postwar, and remember the Persian Gulf War cost approximately \$70 billion. Our allies paid all but \$7 billion, which the U.S. took responsibility for. This new war against Iraq is estimated to cost between 100 and \$200 billion. If we go it alone, the U.S. will have to pay it all. What will happen to other priorities? What will happen to Social Security, to Medicare, to education? Will we have enough resources to spend on our domestic priorities?

Last, let us not forget that the power we have as Members of Congress is to cast these important votes from the consent of the people. My constituents have responded 5,000 to 24, approximately two to one.

If one has to vote, let us vote on the side of peace before we vote on the side of war.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentlewoman from Michigan (Ms. RIVERS), a member of the Committee on Education and the Workforce and a spokesperson for women.

Ms. RIVERS. Mr. Speaker, I rise in opposition to the resolution before us. There is a saying in the practice of law that tough cases make bad law. I believe that that is also true in the creation of laws and history tells us that when we are frightened and angry we are also more likely to make bad law.

I believe we are poised today to approve some very bad law and tread on some very important principles as we do it. While I share the concerns raised by many of my colleagues regarding the lack of substance in the administration's arguments, I am most concerned about the damage this proposal would do to our Constitution. James Madison wrote: "In no part of the Constitution is more wisdom to be found than in the clause which confides the question of war or peace to the legislature and not to the executive department . . . The trust and the temptation would be too great for any one man."

The Founding Fathers were explicit that the awesome power to commit the United States people and resources to waging of war should lie not with a single individual but rather in the collective judgment of the Congress. It was the hope of the Founders that reserving this decision to Congress would in fact make it harder to move the country to war. I applaud that sentiment. Historians note that Congress exclusively possesses the constitutional power to initiate war, whether declared

or undeclared, public or private, perfect or imperfect, de jure or defacto, with the only exception being the President's power to respond self-defensively to sudden direct attack upon the United States. There is no constitutionally recognized authorized use of force.

In the book "War, Foreign Affairs and Constitutional Power," Abraham Sofaer points out that the Constitution says Congress shall declare war, and it seems unreasonable to contend that the President was given the power to make undeclared war. He concludes that nothing in the framing or ratification debates gives the President as Commander in Chief an undefined reservoir of power to use the military in situations unauthorized by Congress.

The U.S. Constitution requires the expressed declaration of war by Congress to execute any military operations in Iraq. Authorizing military action is our job, not the President's. We, not he, must determine when and if the fearsome power of our country should be turned to war. I understand the political and military risks associated with sending Americans into harm's way, but fear of public reaction does not justify the dereliction of Congress's constitutional duty. Similarly, the fact that many Presidents and Congresses over the years have engaged in the unconstitutional transfer of war powers does not make our obligation any less binding. Congress is not free to amend the Constitution through avoidance of its duties, and a President is not free to take constitutional power through adverse possession.

The Congressional Research Service points out that the power to commence even limited acts of war against another nation belongs exclusively to Congress. We may not shirk this responsibility. We may not abdicate it, and we may not pretend it does not exist. We must meet our constitutional obligation to decide if or when America will go to war, whether our sons and daughters should be put in harm's way, and whether the country's purse should be opened to pay a bill as high as \$200 billion. This decision cannot be handed over to the President. If the Founding Fathers had wanted that, they would have explicitly provided so in the Constitution. They did not.

Should the United States go to war with Iraq? I do not believe the case has been made to do so. Can the Congress leave it to the President to decide whether or not we should attack Iraq? Any such transfer of congressional authority to the President is forbidden by the Constitution and would move us toward an upset of the delicate balance of powers between the Congress and the United States.

I urge my colleagues to exercise great care as we consider these questions. Tough cases can make for very bad law. Let us not let them make us trample very good laws that have existed since the dawn of the Republic. Vote "no."

Mr. FALEOMAVAEGA. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Texas (Mr. SANDLIN), a senior member of the House Committee on Financial Services.

Mr. SANDLIN. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, we are poised today on the brink of armed conflict, not knowing what the future may hold but confident in our position and in our resolve. We sincerely pray that war is not necessary. We realize that it may be. These closing hours and minutes of the 107th Congress may be our last chance for true and meaningful debate and deliberation. Can we as a reasonable people, supported by the international community, avoid the horrors of war, the stench of death, or rather does the protection of our country and the belief of the unalienable rights of all people, does common human decency require us to press forward in the face of certain American casualties?

Two questions face the American people: Is Iraq's threat imminent? Is an unprecedented first strike the proper course to take? On a positive note, the President has indicated that approval of the resolution does not mean war is imminent or unavoidable. Additionally the U.S. has indicated support for a three-pronged resolution: number one, Iraq must reveal and destroy all weapons of mass destruction under U.N. supervision; two, witnesses must be allowed to be interviewed outside of Iraq; and, thirdly, any site the U.N. wants to inspect must be open without delay, without preclearance, without restriction, without exception. These are reasonable and rational rules that are required to maintain international peace. Absent Iraqi compliance, it appears necessary to vest in the President the flexibility and authority to protect the American public and international community by military action if necessary.

But there is also a responsibility to exhaust all other options prior to risking the lives of young American sons and daughters. That is why we must use the most powerful military weapon that we have, diplomacy. That is why we must use all resources at our disposal to encourage the international community to pressure Hussein into compliance. But if all reasonable efforts fail, we must answer our duty to ensure the security of our country and those that we represent.

Certainly questions remain. It is particularly important to have a clear goal, a clear plan, and a clear exit strategy when American lives are at risk. Additionally, the President must address the issue of sacrifice. There is no short-term solution to the long-term problem, and there will be a cost to be paid in dollars and in American lives lost.

Presently, another cost is being assessed, the cost of waiting, the cost of allowing Saddam Hussein to build an international killing force, the cost of

world instability. As the President has indicated, the riskiest of all options is to wait.

So let us exhaust all diplomatic efforts. Let us make every reasonable effort to avoid conflict. But at the end of the day we may be called on to make a tremendous sacrifice by using our might to preserve what is right. Our cause is clearly just. Our responsibility is clear. We will have to walk by faith and not by sight, trusting that in the end we will choose the right course.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentlewoman from California (Ms. SOLIS), a member of the Committee on Education and the Workforce.

(Ms. SOLIS asked and was given permission to revise and extend her remarks.)

Ms. SOLIS. Mr. Speaker, there is no matter that comes before this Congress that is more serious than whether or not our Nation should enter into war. The implications of such a decision are so profound and will have worldwide impact. It could jeopardize U.S. relations with countries around the world. It would escalate the vulnerability of our Nation to a biological and chemical attack. And, of course, its most painful and lasting impact would be on the many American families who watch their sons and daughters go to war only to never see them again and maybe even return with lifetime illnesses.

This is not a decision that I take lightly. I recognize the gravity of it. And this is why I remain concerned about the timing of this resolution of the President's effort to send troops into Iraq. I do not doubt that Saddam Hussein is a menace to the United States and to the world and even to his own people. I echo concerns that we must ensure greater security for our people here at home and abroad. But I cannot support authorizing our President to send troops in harm's way without the support of our allies and concrete compelling evidence of imminent or nuclear threats that demand military action. We must eliminate weapons of mass destruction and the threat they pose to our Nation and others around the world. But unilateral military action against Iraq or any other foreign nation is not the most effective short-term strategy to accomplish this goal.

Over 90 percent of the calls that I received in my own district tell me that they are opposed to this war. They ask, What is the rush, Congresswoman? Why is it that we have to take action so immediate? They want to know why we cannot wait for the support of the U.N. and our allies. Some of these calls have come from my very own veterans in my district, many who have already made the ultimate sacrifices through their families, many of them who look like me and speak Spanish and are of Hispanic decent. They understand the extreme price of war and caution against using force without first gathering ally

support and using diplomatic means to find peace. They also recognize the implications that a war would have on our community, and I represent a largely Hispanic community.

Our military is a volunteer force. Most often it is the people of low-income families that answer that call to duty to serve our Nation. The young men and women on the frontlines would disproportionately be Latino, African American, and people of color. These communities will lose so much if the U.S. attacks Iraq.

I am concerned about the price of the war. It has been estimated that the cost of this war against Iraq would be between 100 and \$200 billion. How is the U.S. going to pay for this war? We are always told that we cannot afford a prescription drug benefit plan, that we cannot extend unemployment insurance to workers laid off after the wake of September 11. We need to think about these costs before we rush into a war, and we should exhaust tough, rigorous U.N. inspections before going into war. We should seek support from the U.N. Security Council. As the first President Bush's advisers of Operation Desert Storm have warned, by attacking Iraq we give Saddam Hussein both the excuse and the incentive to use the biological and chemical weapons that he already has.

I oppose this resolution and urge my colleagues to give serious consideration on this crucial matter.

Mr. FALEOMAVAEGA. Mr. Speaker, I yield 8 minutes to the gentleman from New Jersey (Mr. PASCRELL), my good friend.

(Mr. PASCRELL asked and was given permission to revise and extend his remarks.)

□ 2145

Mr. PASCRELL. Mr. Speaker, for 2 days Members have marched to the floor to offer their support for or opposition to this resolution, good Americans every one. Soon the hours of debate will come to an end. The House Chamber has echoed with the sentiments of almost every Member. Yet, many questions remain unanswered.

To be sure, there is one thing we all agree upon: Saddam Hussein is a tyrant, is a threat. He is the epitome of malevolence. Plato must have had visions of Hussein, a Hussein character, when he described evil in *The Allegory of the Cave*.

Mr. Speaker, I include for the RECORD *The Allegory of the Cave* from Plato's Republic.

The material referred to is as follows:

[From Plato's Republic]

THE ALLEGORY OF THE CAVE

And now, I said, let me show in a figure how far our nature is enlightened or unenlightened: Behold! human beings living in an underground den, which has a mouth open towards the light and reaching all along the den; here they have been from their childhood, and have their legs and necks chained so that they cannot move, and can only see before them, being prevented by the chains from turning round their heads.

Above and behind them a fire is blazing at a distance, and between the fire and the prisoners there is a raised way; and you will see, if you look, a low wall built along the way, like the screen which marionette players have in front of them, over which they show the puppets.

I see, he said.

And do you see, I said, men passing along the wall carrying all sorts of vessels, and statutes and figures of animals made of wood and stone and various materials, which appear over the wall? Some of them are talking, other silent.

You have shown me a strange image, and they are strange prisoners.

Like ourselves, I replied; and they see only their own shadows, or the shadows of one another, which the fire throws on the opposite wall of the cave?

True, he said; how could they see anything but the shadows if they were never allowed to move their heads?

And of the objects which are being carried in like manner they would only see the shadows?

Yes, he said.

And if they were able to converse with one another, would they not suppose that they were naming what was actually before them? And suppose further that the prison had an echo which came from the other side, would they not be sure to fancy, when one of the passers-by spoke that the voice which they heard came from the passing shadow?

No question, he replied.

To them, I said, the truth would be literally nothing but the shadows of the images.

That is certain.

And now look again, and see what will naturally follow if the prisoners are released and disabused of their error. At first, when any of them is liberated and compelled suddenly to stand up and turn his neck round and walk and look towards the light, he will suffer sharp pains; the glare will distress him, and he will be unable to see the realities of which in his former state he had seen the shadows; and then conceive some one saying to him, that what he saw before was an illusion, but that now, when he is approaching nearer to being and his eye is turned towards more real existence, he has a clearer vision, what will be his reply?

And you may further imagine that his instructor is pointing and when to the objects as they pass and requiring him to name them, will he not be perplexed? Will he not fancy that the shadows which he formerly saw are truer than the objects which are now shown to him? Far truer. And if he is compelled to look straight at the light, will he not have a pain in his eyes which will make him turn away to take refuge in the objects of vision which he can see, and which he will conceive to be in reality clearer than the things which are now being shown to him?

True, he said.

And suppose once more, that he is reluctantly dragged up a steep and rugged ascent, and held fast until he is forced into the presence of the sun himself, is he not likely to be pained and irritated? When he approaches the light his eyes will be dazzled, and he will not be able to see anything at all of what are now called realities?

Not all in a moment, he said.

He will require to grow accustomed to the sight of the upper world. And first he will see the shadows best, next the reflections of men and other objects in the water, and then the objects themselves; then he will gaze upon the light of the moon and the stars and the spangled heaven; and he will see the sky and the stars by night better than the sun or the light of the sun by day?

Certainly.

Last of all he will be able to see the sun, and not mere reflections of him in the water, but he will see him in his own proper place, and not in another; and he will contemplate him as he is.

Certainly.

He will then proceed to argue that this is he who gives the season and the years, and is the guardian of all that is in the visible world, and in a certain way the cause of all things which he and his fellows have been accustomed to behold?

Clearly, he said, he would first see the sun and then reason about it.

And when he remembered his old habitation, and the wisdom of the den and his fellow-prisoners, do you not suppose that he would felicitate himself on the change, and pity them?

Certainly, he would.

And if they were in the habit of conferring honors among themselves on those who were quickest to observe the passing shadows and to remark which of them went before, and which followed after, and which were together; and who were therefore best able to draw conclusions as to the future, do you think that he would care for such honors and glories, or envy the possessors of them? Would he not say with Homer, Better to be the poor servant of a poor master, and to endure anything, rather than think as they do and live after their manner?

Yes, he said, I think that he would rather suffer anything than entertain these false notions and live in this miserable manner.

Imagine once more, I said, such a one coming suddenly out of the sun to be replaced in his old situation; would he not be certain to have his eyes full of darkness?

To be sure, he said.

And if there were a contest, and he had to compete in measuring the shadows with the prisoners who had never moved out of the den, while his sight was still weak, and before his eyes had become steady (and the time which would be needed to acquire this new habit of sight might be very considerable), would he not be ridiculous? Men would say of him that up he went and down he came without his eyes; and that it was better not even to think of ascending; and if any one tried to loose another and lead him up to the light, let them only catch the offender, and they would put him to death.

No question, he said.

This entire allegory, I said, you may now append, dear Glaucon, to the previous argument; the prison-house is the world of sight, the light of the fire is the sun, and you will not misapprehend me if you interpret the journey upwards to be the ascent of the soul into the intellectual world according to my poor belief, which, at your desire, I have expressed, whether rightly or wrongly God knows. But, whether true or false, my opinion is that in the world of knowledge the idea of good appears last of all, and is seen only with an effort; and, when seen, is also inferred to be the universal author of all things beautiful and right, parent of light and of the lord of light in this visible world, and the immediate source of reason and truth in the intellectual; and that this is the power upon which he who would act rationally either in public or private life must have his eye fixed.

I agree, he said, as far as I am able to understand you.

Moreover, I said, you must not wonder that those who attain to this beatific vision are unwilling to descend to human affairs; for their souls are ever hastening into the upper world where they desire to dwell; which desire of theirs is very natural, if our allegory may be trusted.

Yes, very natural.

And is there anything surprising in one who passes from divine contemplations to

the evil state of man, when they returned to the den they would see much worse than those who had never left it himself in a ridiculous manner; if, while his eyes are blinking and before he has become accustomed to the surrounding darkness, he is compelled to fight in courts of law, or in other places, about the images or the shadows of images of justice, and is endeavoring to meet the conceptions of those who have never yet seen absolute justice?

Anything but surprising, he replied.

Any one who has common sense will remember that the bewilderments of the eyes are of two kinds, and arise from two causes, either from coming out of the light or from going into the light, which is true of the mind's eye, quite as much as of the bodily eye; and he who remembers this when he sees any one whose vision is perplexed and weak, will not be too ready to laugh; he will first ask whether that soul of man has come out of the brighter life, and is unable to see because unaccustomed to the dark, or having turned from darkness to the day is dazzled by excess of light. And he will count the one happy in his condition and state of being, and he will pity the other; or, if he has a mind to laugh at the soul which comes from below into the light, there will be more reason in this than in the laugh which greets him who returns from above out of the light into the den.

That, he said, is a very just distinction.

But then, if I am right, certain professors of education must be wrong when they say that they can put a knowledge into the soul which was not there before, like sight into blind eyes?

They undoubtedly say this, he replied.

Whereas, our argument shows that the power and capacity of learning exists in the soul already; and that just as the eye was unable to turn from darkness to light without the whole body, so too the instrument of knowledge can only by the movement of the whole soul be turned from the world of becoming into that of being, and learn by degrees to endure the sight of being, and of the brightest and best of being, or in other words, of the good.

Very true.

And must there not be some art which will effect conversion in the easiest and quickest manner; not implanting the faculty of sight, for that exists already, but has been turned in the wrong direction, and is looking away from the truth?

Yes, he said, such an art may be presumed.

And whereas the other so-called virtues of the soul seem to be akin to bodily qualities, for even when they are not originally innate they can be implanted later by habit and exercise, the virtue of wisdom more than anything else contains a divine element which always remains, and by this conversation is rendered useful and profitable; or, on the other hand, hurtful and useless. Did you never observe the narrow intelligence flashing from the keen eye of a clever rogue, how eager he is, how clearly his paltry soul sees the way to this end; he is the reverse of blind, but his keen eye-sight is forced into the service of evil, and he is mischievous in proportion to his cleverness?

Very true, he said.

But what if there had been a circumcision of such natures in the days of their youth; and they had been severed from those sensual pleasures, such as eating and drinking, which, like leaden weights, were attached to them at their birth, and which drag them down and turn the vision of their souls upon the things that are below, if, I say, they had been released from these impediments and turned in the opposite direction, the very same faculty in them would have seen the truth as keenly as they see what their eyes are turned to now.

Very likely.

Yes I said; and there is another thing which is likely, or Neither rather a necessary inference from what has preceded, that neither the uneducated and uninformed of the truth, nor yet those who never make an end of their education, will be able educated ministers of State; nor the former, because they have no single aim of duty which is the rule of all their actions, private as well as public; nor the latter, because they will not act at all except upon compulsion, fancying that they are already dwelling apart in the islands of the blest.

Very true, he replied.

Them, I said, the business of us who are the founders of the State will be to compel the best minds to attain that knowledge which we have already shown to be the greatest of all, they must continue to ascend until they arrive at the good; but when they have ascended and seen enough we must not allow them to do as they do now.

What do you mean?

I mean that they remain in the upper world; but this must not be allowed; they must be made to descend again among the prisoners in the den, and partake of their labors and honors, whether they are worth having or not.

But is not this unjust? he said; ought we to give them a worse life, when they might have a better?

You have again forgotten, my friend, I said, the intention of the legislator, who did not aim at making any one class in the State happy above the rest; the happiness was to be in the whole State, and he held the citizens together by persuasion and necessity, making them benefactors of the State, and therefore benefactors of one another; to this end he created them, not to please themselves, but to be his instruments in binding up the State.

True, he said, I had forgotten.

Observe, Glaucon, that there will be no injustice in compelling our philosophers to have a care and providence of others; we shall explain to them that in other States, men of their class are not obliged to share in the toils of politics; and this is reasonable, for they grow up at their own sweet will, and the government would rather not have them. Being self-taught, they cannot be expected to show any gratitude for a culture which they have never received. But we have brought you into the world to be rulers of the hive, kings of yourselves and of the other citizens, and have educated you far better and more perfectly than they have been educated, and you are better able to share in the double duty. That is why each of you, when his turn comes, must go down to the general underground abode, and get the habit of seeing in the dark. When you have acquired the habit, you will see ten thousand times better than the inhabitants of the den, and you will know what the several images are, and what they represent, because you have seen the beautiful and just and good in their truth. And thus our State, which is also yours will be a reality, and not a dream only, and will be administered in a spirit unlike that of other States, in which men fight with one another about shadows only and are distracted in the struggle for power, which in their eyes is a great good. Whereas the truth is that the State in which the rulers are most reluctant to govern is always the best and most quietly governed, and the State in which they are most eager, the worst.

Quite true, he replied.

And will our pupils, when they hear this, refuse to take their turn at the toils of State, when they are allowed to spend the greater part of their time with one another in the heavenly light?

Impossible, he answered; for they are just men, and the commands which we impose

upon them are just; there can be no doubt that every one of them will take office as a stern necessity, and not after the fashion of our present rulers of State.

Yes, my friend, I said; and there lies the point. You must contrive for your future rulers another and a better life than that of a ruler, and then you may have a well-ordered State; for only in the State which offers this, will they rule who are truly rich, not in silver and gold, but in virtue and wisdom, which are the true blessings of life. Whereas if they go to the administration of public affairs, poor and hungering after their own private advantage, thinking that hence they are to snatch the chief good, order there can never be; for they will be fighting about office, and the civil and domestic broils which thus arise will be the ruin of the rulers themselves and of the whole State.

Most true, he replied.

And the only life which looks down upon the life of political ambition is that of true philosophy. Do you know of any other?

Indeed, I do not, he said.

And those who govern ought not to be lovers of the task? For, if they are, there will be rival lovers, and they will fight.

No question.

Who then are those whom we shall compel to be guardians? Surely they will be the men who are wisest about affairs of the state.

ENDNOTES

If you understand this first distinction, the much more difficult division of the intelligible world will make more sense. Think over this carefully: the visible world, that is, the world you see, has two kinds of visible objects in it. The first kind are shadows and reflections, that is, objects you see but aren't really there but derive from the second type of visible objects, that is, those that you see and are really there. The relation of the visible world to the intelligible world is identical to the relation of the world of reflections to the world of visible things that are real.

The lower region of the intelligible world corresponds to the upper region in the same way the lower region of the visible world corresponds to the upper region. Think of it this way: the lower region deals only with objects of thought (that are, in part, derived from visible objects), which is why it is part of the intelligible world. There have to be certain first principles (such as the existence of numbers or other mathematical postulates) that are just simply taken without question: these are hypotheses. These first principles, however, derive from other first principles; the higher region of the intelligible world encompasses these first principles.

So you can see that the lower region derives from the higher region in that the thinking in the lower region derives from the first principles that make up the higher region, just as the mirror reflects a solid object. When one begins to think about first principles (such as, how can you prove that numbers exist at all?) and derives more first principles from them until you reach the one master, first principle upon which all thought is based, you are operating in this higher sphere in intellection. Plato's line is also a hierarchy: the things at the top (first principles) have more truth and more existence; the things at the bottom (the reflections) have almost no truth and barely exist at all.

He wrote: "Did you never observe the narrow intelligence flashing from the keen eye of a clever rogue? How eager he is. How clearly his paltry soul sees the way to his end. He is the reverse of blind, but his keen eyesight is forced into the service of evil, and he is mis-

chievous in proportion to his cleverness."

What a perfect description of Saddam Hussein in that allegory for all of us, distinguishing from falsehoods and reality of the cave, the shadows against the wall, the light behind us, like a puppeteer.

The record of this murderous regime has been outlined forcefully in this body and by our Commander-in-Chief. Saddam has used weapons of mass destruction against his own people, he waged war with Iran, he invaded Kuwait, and he even murdered his own people in the northern part of Iraq.

Two cities stand out in the northern part of Iraq in 1988, Halabja and Goktapa. We all, each and every one of us, need to read the stories from both of those towns of innocent people who were massacred, massacred.

The helicopters came over the day before in May, Mr. Speaker, taking pictures of the villages. People did not know what they were doing. Then, 2 days later, the same helicopters showed up and they dropped out of the sky mustard gases, lethal, lethal gases which left animals and plants and human beings dead. They did not need sophisticated state-of-the-art technology to deliver these gases.

Nothing like it was seen since the Holocaust, nothing came close. We need to think about this and who perpetuated these deaths.

For the last 11 years, he has defied the will of the entire planet, as expressed in the resolutions which we have heard over and over the last 2 days. Indeed, I know of no thinking person who argues against the profound necessity of eliminating Saddam's weapons technology.

But while we can all agree on the menace he poses and unite in the desire to live in a world where he is not a factor, there are still critically important lingering questions, questions about the process, about the timing and, ultimately, the unilateral nature of preemptive war that we seem to be accepting for the first time in the history of this great country.

Is the relative sudden frenzy to eliminate Saddam clouding the strategic vision of those who are most vociferous in the support of his ouster? My inquiry stems not from any kind of partisan agenda but out of a genuine confusion as to why key issues have not fully been discussed and debated.

We spend millions of dollars every day for 10 years protecting the no-fly zones in the north and south. The American people have a right to know what these actions will cost us. They have every right to know.

If we endorse this historic shift in our strategy that abandons our reliance on deterrence and arms control as the pillars of national security, will we open a Pandora's box of preemptive action throughout the world? What is our response when it comes?

If this is our Nation's new policy, then what is to prevent India from attacking Pakistan, or Russia from attacking the state of Georgia? If they do, what will we say? After war, then what? What happens on day three, as Thomas Friedman wrote?

After the intervention, how will the situation likely evolve? We have yet to hear any discussion on this. Surely in this great deliberative body we should give pause to this critical issue. Surely the administration must address this most comprehensively.

Let us remember, this is not a game of chess. These are our sons, these are our daughters who will execute this mission, many of whom may not return. Full debate is essential. Anything less is an abdication of the oath we all took together.

We also need to make absolutely certain that whatever is done in Iraq does not negatively impact the broader war that we authorized 12 months ago, the war on terrorism.

That said, a great many people predict that the Congress will pass the resolution, the joint resolution, House Joint Resolution 114, with an overwhelming majority. I do not dispute this, nor do I declare my opposition, but Congress must ensure that, through this process, no matter the duration, we are involved as explicitly as possible under article 1, Section 8. We must ensure that we constantly ask the appropriate questions and demand the pertinent answers.

I do believe that it is imperative that the United States speaks with one voice to Saddam Hussein. There can be no ambiguity in our resolve to protect and defend this greatest of all democracies and the families that make it great.

We all love America, not some more than others. When we leave this week, we must remember this: None of us love America more than anyone else in this room.

Mr. ISSA. Mr. Speaker, it is my pleasure to yield 5 minutes to the gentleman from Connecticut (Mr. SIMMONS).

Mr. SIMMONS. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, I am a Vietnam veteran. I served 18 months in uniform in that country. As someone who has seen the ugly face of war, I do not embrace it as a policy choice, nor is it my first choice, but as a choice we sometimes have to make.

I believe that preparation for war and a demonstration of national will to engage in war can be a way to avoid war, and I also believe that diplomacy without the threat of military action can be a hollow exercise in extreme cases. Right now, we are faced with an extreme case.

There is no doubt that Saddam Hussein is a menace. Our intelligence tells the story of brutality, savagery, patterns of aggression, deception, and defiance. It shows the danger that Saddam Hussein poses to our country, to his re-

gion, and to the world. His ouster could bring peace and stability, and it could also inflame further violence and instability. How we do what we do in this case is as important as what we do.

In dealing with the issue, I have asked myself a question: Does Iraq's intent and capability to use weapons of mass destruction pose a clear and present danger to the United States, to our allies, or to Israel? And based on a reading and hearing of information available to me, I believe that the danger to the United States is clear. Whether or not it is present is less certain.

For the continental United States, the danger may be 6 months away or it may be 6 years away, depending on a number of variables. For Israel, for some of our troops abroad, for our NATO ally Turkey, the danger is certainly clear and present.

Given this assessment, diplomacy and multilateral action are still reasonable options to use against Hussein, and they should be encouraged. That is why I intend to vote for the Spratt amendment, which maintains substantial focus on diplomacy and multilateral action.

My decision to support this amendment is not an easy one, but the stakes in this situation are very high. Over the past year, the intelligence community and committees of this Congress have tried to connect the dots on the vicious attack that took place on September 11, and the challenge for us today is to connect the dots once again but before another and potentially more lethal attack.

There are risks and consequences if we act; there are risks and consequences if we do not act. I lost friends in the Vietnam War, and I am reminded of that every time I go down to the Wall. But I lost neighbors on September 11, and I am reminded of that every time I see the World Trade Center.

On balance, I feel the greatest risk is through inaction, which is why, if the Spratt amendment fails on the floor tomorrow, I intend to vote for the bipartisan resolution.

A vote for the bipartisan resolution is not a vote for war, it is a vote for will. It is a statement of national unity that says to Saddam Hussein, you are a menace and a bully to your own people and to your neighbors. You must disarm. You have exhausted our patience. We will join the United Nations and the world community and work with them against you in this cause, but, at the 11th hour, we will be prepared to act.

We cannot wait for the smoking gun. A gun smokes only after it has been fired, and that may be too late for another American city, our troops abroad, a NATO ally, or Israel. When it comes to weapons of mass destruction, we must connect the dots before the next attack, not after it has occurred.

□ 2200

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentlewoman from Cali-

fornia (Mrs. CAPPS), a member of the Committee on Energy and Commerce.

(Mrs. CAPPS asked and was given permission to revise and extend her remarks.)

Mrs. CAPPS. Mr. Speaker, I rise in opposition to the resolution. There is no question that Saddam Hussein is a villain and a menace to his own people and to the rest of the world. He is a terrible dictator who has used chemical weapons in his own country and on other nations. He has likely biological weapons and is certainly seeking nuclear weapons. He has invaded his neighbors and defied the international community. He has worked to destabilize the Middle East in support of terrorism. We can all agree he is a threat to international peace and security. His own people and the rest of the world would be better off if he were not in power.

Mr. Speaker, it appears that the United States is going to use military force to reduce or eliminate this threat. It seems likely that the brave men and women of our Armed Forces will be sent to the region to disarm his regime and possibly remove Hussein from power. If that happens, I will support our country men as they do their duty and obey the orders of the Commander in Chief. But tomorrow, I will vote against the resolution authorizing the use of force now.

This is a hard decision. It is one of the most important votes that I cast. It is a vote of conscience for me, as I trust it is for all Members. And my conscience leads me to vote "no." After careful consideration, I have determined that the resolution before us does not advance our national security. The bottom line is that it authorizes the President to launch a unilateral preemptive attack if he so chooses. Our national security is not served by such an attack.

Mr. Speaker, I do not oppose the use of force in all circumstances. I voted to support military operations in Kosovo, and I stood on this floor and supported the President in the operations in Afghanistan. But I think an authorization to use force against Iraq before we have explored all of our options is premature and potentially dangerous.

First of all, international support, especially from the U.N., is critical. It allows us to share the risks and costs of our operations. It lends our efforts legitimacy. Recently, the United Nations has regained its focus on Iraq. It is on the verge of restarting inspections and international support for a stricter inspection regime is growing. The return of the inspectors should be our top priority. They can determine the extent of the threat Iraq represents, and their findings can help us build international support to check the Iraqi regime.

I will be supporting an alternative that continues those efforts. This alternative will only authorize force as a part of U.N. efforts to disarm Iraq. A unilateral preemptive attack on Iraq without U.N. support may undermine

the multilateral war against global terror. It could drive a wedge between us and those allies whose support we need.

In addition, with or without international support, we will have to be committed to rebuilding Iraq or we may be left with a state that is just as dangerous as the current one or worse we could be dealing with a chaotic civil war where we are not sure who has what kind of weapons. Unfortunately, the administration has shown little interest in addressing this important issue. This is consistent with its lack of attention to post-Taliban Afghanistan. Both are troubling.

And a preemptive, unilateral strike on Iraq may lead to uprisings in the Middle East. Friendly regimes could be threatened by extremists who will openly support terrorism. And key moderate Islamic nations, like Egypt, Jordan, and the nuclear-armed Pakistan, could be destabilized.

A U.S. attack would certainly further inflame the cycle of violence between Israel and the Palestinians. And I cannot imagine the consequences if Iraq were to attack Israel and Israel were to respond as Prime Minister Sharon has declared it would.

An attack on Iraq could lead to the use of the very weapons we want to destroy. In an attempt to survive, Saddam Hussein may use all the weapons at his disposal against our servicemen and women.

Finally, a preemptive attack on Iraq turns 50 years of national security policy on its head. We have struggled for 5 decades to help build a world in which nations do not attack one another without specific provocation. In the face of an imminent threat to the U.S., with an obvious provocation, a preemptive attack might be justified. But I have not seen convincing evidence that Saddam Hussein is an immediate threat.

There is still time to try to resolve the situation using other tools of statecraft, such as diplomacy. The United States would win a war against Iraq. But that does not necessarily mean it is a war that should be waged at this time. At some point it may be necessary to use force. We may have to place our men and women in our Armed Forces in harm's way, but that should be the last resort, only after we have explored all other means and after other measures have failed.

For now I do not think the case has been made that force is the only option left to us. It is premature to launch a unilateral preemptive attack, and it would be premature for us to authorize one. I oppose this resolution, and I urge my colleagues to do the same.

Mr. ISSA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I have chosen to remain silent and our side has held their debate because we want to allow full time for those opposed to have their word; but sometimes as you listen to a series of words you begin to see a pattern. And I think the American people, Mr.

Speaker, need to also hear maybe some of the realities that are not being mentioned.

This is not the beginning of a new war. In fact, President Herbert Bush, President Clinton, and now President George W. Bush have all, in fact, had to make strikes in Iraq to contain this evil dictator. In fact, President Clinton has made probably the largest strikes since the Gulf War during his administration. And at that time I do not believe that we heard in this body something about new preemptive acts of war. In fact, what we understood was we had a dictator who continued to use his remaining force and the ill-gotten revenues that he is getting from his clandestine selling of oil from outside the food program to, in fact, intimidate his neighbors and rebuild his weapons of mass destruction.

So as much as I certainly want to yield as much time to my colleagues who oppose this, I think the American people, Mr. Speaker, must understand that this is by no means a new war. The President is not asking for a new war. In fact, what he is asking for is a recognition that after 11-plus years of a war which has not ended because this dictator has not met his responsibilities, responsibilities he agreed with the United Nations to keep, that in fact the President has said, our President now has said, I must in fact have the tools to be able to go further to get the compliance. And I would hope that all of us in this body would very much understand the historic context in which I say the war has never ended.

We are only asking to continue a direction that President Herbert Bush started, President Clinton continued, and now President George W. Bush has on his desk; and we hold him responsible for our safety.

Mr. Speaker, I reserve the balance of my time.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Texas (Mr. RODRIGUEZ), a member of the Committee on Armed Services and the Committee on Veterans' Affairs.

Mr. RODRIGUEZ. Mr. Speaker, today we are debating whether and under what considerations we will consider sending our young men and women into battle. That is an awesome responsibility, and I have given it much thought. I rise to offer my support of the Spratt substitute. It is a balanced, very careful approach to a serious problem.

I stand before you as a father, as a husband, as an American, and as an elected representative of the people who live in the 20th Congressional District of Texas. Since the terrible attacks of September 11, we, as a Nation, have felt a new vulnerability; and we set out on a war against terrorism to safeguard our future.

During this past year, I have listened to my constituents' concerns, sharing their fears and consoling those shaken by disruptions and the issue of security in our Nation. I offered my full support

to the fight against terrorism, and I will continue to do so. We must not lose sense of the purpose, but we also must not lose our perspective. In recent months as the administration has begun to call for a war against Iraq, I have spoken with parents, brothers and sisters; and I have read heartfelt letters of young and old, and I have met with American men and women in uniform who proudly serve this Nation.

As I visited churches and restaurants, shops and homes throughout the San Antonio, South Texas region, I have heard patriotic voices, yet voices filled with concern about the war we are today asked to authorize. As the administration has tried to make its case for the unilateral war against Iraq, I have had many questions. I am troubled because many of these questions remain unanswered, even as we debate whether or how to put American troops in harm's way.

We have also heard mixed messages when we heard the Secretary call for a cut of 23,000 in the Army while at the same time we have heard our generals indicate that we need 40,000 in the Army, 20,000 in the Air Force and 8,000 Marines. Those mixed messages have not been helpful. But we also do not get the answers to our questions, questions such as, Who will pay for this war? We should have a tax bill on this House floor to pay for this war. What are our mission goals and our exit strategy?

The other reality is that there has been no dialogue and no real thrust in that with terrorism, also, it is a fight of ideology and ideas. One thing we are clear about is we know that Saddam Hussein and the government he controls brutally, Iraq, are without question a danger not only to the United States but also to the world community. We know that Saddam Hussein has gone to great lengths to seek, develop, and then conceal weapons of mass destruction. I believe I join my colleagues here today in stating that we must end Saddam Hussein's quest for these terrible weapons.

The issue before us is how we do so. It is crucial that we as representatives of the people translate the concerns about the execution of war against Iraq into a concrete plan to ensure the congressional representatives have a role in the decision to send our troops into harm's way.

The administration seeks a blank check from the Congress to authorize the use of force broadly. But the administration's proposal does not encourage multilateral cooperation and also does not anticipate further congressional input. The approach offered by the Spratt substitute offers a better option. We are today the world's greatest superpower; our military might and economic power reach around the globe. Our democracy is an example to which other nations aspire. We are a diverse Nation united by our love of liberty, our thirst for freedom, and our belief in justice and the rule of law.

That status as a world superpower brings with it great responsibilities. Yes, we have the power to go it alone, but I feel very strongly that the power to do exactly that would be the wrong thing to do. In the case of Iraq, I believe going it alone under the circumstances we now face is not the best approach. First, by working with the United Nations, we will act not only on our own behalf, but on behalf of the world community.

Let me ask that you support the substitute, the Spratt substitute, because it is also the best military option, because that would allow us an opportunity to seek out those biological and chemical weapons before our soldiers go in. And if they have to go in, at least we will identify those areas where they might be able to be hiding, and there is no doubt that that would be the best way to go at it.

Mr. UNDERWOOD. Mr. Speaker, I yield 5 minutes to the gentlewoman from New York (Mrs. LOWEY), the distinguished ranking member of the Committee on Appropriations, Subcommittee on Foreign Operations, Export Financing and Related Programs.

Mrs. LOWEY. Mr. Speaker, our decision to authorize the President to commit American men and women to overseas military action is the most difficult decision a Member of Congress will ever face.

Since September 11, 2001, when more than 100 of my constituents were killed in the terror attacks on our country, I have felt a new urgency to address the dangers to our national security that exist both here in the United States and abroad. Our government must act to secure our borders and airways, protect nuclear power plants, safeguard our food and water supplies and more.

□ 2215

We must face up to the very real possibility of a biological, chemical or even nuclear attack upon our country and take whatever action is necessary to prevent it.

I have spent a great deal of time, as have my colleagues, in recent weeks in classified briefings, with military and intelligence experts; and I have also paid close attention to the very real concerns of my constituents and even my family. We are living in a world far more dangerous today than we have ever known, and I have concluded that we must not wait for another terrorist attack before giving the President the authority to take the necessary action to protect our children and our grandchildren.

Throughout world history, inaction against tyrants has proven to be an ineffective strategy for averting catastrophe. We have every reason to believe that Saddam Hussein is continuing to build up his arsenal of weapons of mass destruction. He continues to defy the civilized world and United Nations Security Council resolutions ordering him to disarm. He has shown through brutality toward his own people his

willingness to use these terrible weapons against innocent people.

Therefore, I have concluded that Saddam Hussein poses a serious danger to United States national security. We must stand up to this threat first by pursuing to the fullest all possible diplomatic means and then, only if we must, by the use of force.

As a strong believer in the United Nations, I have a long record of support for a robust United States role in the United Nations, and I believe that strong United States leadership in the United Nations is critical to achieve peace in the world.

But the United Nations must act. The crisis before us provides an important opportunity for the U.N. Security Council to show that there are consequences to ignoring the will of the international community. Failure to enforce the relevant resolutions will hurt the U.N.'s effectiveness as an organization, diminishing a potent force for stability around the world. And if all else fails, if we must pursue military action, I hope and I pray that the mission is successful and short and that it will pave the way to a better day for Iraq and the region and result in greater security for Americans here at home.

Mr. PAYNE. Mr. Speaker, I yield 5½ minutes to the gentleman from Rhode Island (Mr. LANGEVIN), a member of the Committee on Armed Services.

(Mr. LANGEVIN asked and was given permission to revise and extend his remarks.)

Mr. LANGEVIN. Mr. Speaker, as I take the floor this evening I am humbled by the task at hand and the paths that have led us to this point.

When I arrived in Congress last year, I never imagined that we would witness cruel attacks on our own soil, that we would lead a war against terrorism across the globe or that we would contemplate returning to Iraq to address the ongoing threat of Saddam Hussein, all in less than 2 years. Yet, we did not choose these circumstances. Instead, they found us; and it is our responsibility to act in a careful and appropriate manner to protect the United States, its people, its allies and our ideals.

Authorizing the use of military force is one of the most important decisions Congress can make; and as a member of the House Committee on Armed Services, I do not take it lightly.

Last month, I held a listening tour in Rhode Island to understand my constituents' concerns about military action in Iraq. I spent many hours being briefed in the Committee on Armed Services and in the White House by senior administration officials and other experts. From these conversations, I have grown increasingly alarmed by the widening body of evidence that Saddam Hussein poses a grave and expanding threat to the security of the United States.

His development of biological and chemical weapons, as well as his pur-

suit of nuclear capabilities, flaunts United Nations resolutions and threatens the stability of the region. His oppression of the Iraqi people, including his use of chemical weapons against civilians, strikes at the very core of our belief in protecting human rights. He has also made it clear that he will take action to harm us and our allies, even firing on aircraft and enforcing the Iraqi's no-fly zone 2,500 times since 1991.

While it may be difficult to imagine what horrors this tyrant is planning over 6,000 miles away, I am convinced that the threat is very real.

The question, therefore, becomes how best to deal with this danger. I have heard overwhelming concerns from constituents that the United States could endanger the international coalition against terror if we act against Iraq, if we act particularly unilaterally. Equally important, I share the concern that we will damage our moral authority as the world's sole remaining superpower if we do not proceed responsibly.

For this reason, we must engage the global community in our efforts to neutralize the threat of Saddam Hussein. Cooperation with the United Nations and our allies is critical, and I hope that we are collectively able to develop a strong mandate for the disarmament of Iraq.

In his speech Monday night, President Bush pledged to engage the U.N. Security Council in drafting a new resolution; and I fully expect him to pursue this strategy, not only to establish broader support and deeper confidence for our mission but also to protect the integrity of the United States. If new weapons inspections do not achieve total disarmament, we must not rule out using military action to force compliance with U.N. resolutions, eradicate Iraq's destructive capabilities and protect the American people.

Again, such action must be taken in conjunction with other Nations. President Bush stated that we would act with our allies at our side, and we must hold him to his promise. We cannot ignore that unilateral action against Iraq could have dangerous ramifications on the region and America's own efforts in the war on terrorism. Furthermore, the international coalition would also be essential in promoting a new government in Iraq, an effort that should be undertaken as seriously as the Marshall Plan.

Tomorrow, I will vote for the Spratt amendment, which would require cooperation with the United Nations to the greatest extent possible. In contemplating a preemptive attack against another nation, it is our responsibility to work with our friends and allies and rally them to our cause. If the Spratt amendment is unsuccessful, I cannot support the underlying resolution until we first go to the U.N. Security Council and attempt to get a vote authorizing the use of force. Though that vote may ultimately fail,

the United States has been instrumental in shaping the guidelines and agreements that have fostered peace and cooperation throughout the world, and we must demonstrate our continued commitment to these goals.

The threat posed by Saddam Hussein is too great for us to remain inactive. We cannot sit idly by while the pieces of another September 11 fall into place. We cannot risk a single American life waiting for the promises from a madman.

We now have the opportunity to improve the safety of our citizens and the stability of the Middle East. However, there is a right way and a wrong way of approaching this complicated issue. Just as a prosecutor must lay out the facts to establish guilt, we must make our case before the world community.

I urge support for the Spratt amendment.

As I take the floor this afternoon, I am humbled by the task at hand and the path that has led us to this point. When I arrived in Congress last year, I never imagined that we would witness cruel attacks on our soil, that we would lead a war against terrorism across the globe, or that we would contemplate returning to Iraq to address the ongoing threat of Saddam Hussein—all in less than two years. Yet we did not choose these circumstances; instead, they found us, and it is our responsibility to act in a careful and appropriate manner to protect the United States, its people, its allies, and its ideals.

Authorizing the use of military force is one of the most important decisions Congress can make, and, as a member of the House Armed Services Committee, I do not take it lightly. Last month, I held a listening tour in Rhode Island to understand my constituents' concerns about military action in Iraq. I have spent many hours being briefed in the Armed Services Committee and at the White House by Administration officials and other experts. From these conversations, I have grown increasingly alarmed by the widening body of evidence that Saddam Hussein poses a grave and expanding threat to the security of the United States. His development of biological and chemical weapons, as well as his pursuit of nuclear capabilities, flaunts United Nations resolutions and threatens the stability of the region. His oppression of the Iraqi people, including his use of chemical weapons against civilians, strikes at the very core of our belief in protecting human rights. He has also made it clear that he will take action to harm us and our allies, firing on aircraft enforcing the Iraqi no-fly zones 2,500 times since 1991. And while it may be difficult for some to imagine what horrors this tyrant is planning over 6,000 miles away, I am convinced that the threat is real.

The question therefore becomes how best to deal with this danger. I have heard overwhelming concern from my constituents that the United States could endanger the international coalition against terror if we act unilaterally against Iraq. Equally important, I share their concern that we will damage our moral authority as the world's sole remaining superpower if we do not proceed responsibly. For this reason, we must engage the global community in our efforts to neutralize the threat of Saddam Hussein. Cooperation with the United

Nations and our allies is critical, and I hope that we are collectively able to develop a strong mandate for the disarmament of Iraq. In his speech on Monday night, President Bush pledged to engage the U.N. Security Council in drafting a new resolution, and I fully expect him to pursue this strategy, not only to establish broader support and deeper confidence for our mission, but also to protect the integrity of the United States.

If new weapons inspections do not achieve total disarmament, we must not rule out using military action to force compliance with U.N. resolutions, eradicate Iraq's destructive capabilities, and protect the American people. Again, such action must be taken in conjunction with other nations. President Bush stated we would act "with allies at our side," and we must hold him to his promise. We cannot ignore that unilateral action against Iraq could have dangerous ramifications on the region and America's own efforts in the war on terrorism. Furthermore, an international coalition would also be essential in promoting a new government in Iraq—an effort that should be undertaken as seriously as the Marshall Plan. Tomorrow, I will vote for the Spratt amendment, which would require cooperation with the United Nations to the greatest extent possible. When contemplating a preemptive attack against another nation, it is our responsibility to work with our friends and allies and rally them to our cause.

If the Spratt amendment is unsuccessful, I cannot support the underlying resolution until we first go to the U.N. Security Council and attempt to get a vote authorizing the use of force. Though that vote may ultimately fail, the United States has been instrumental in shaping the guidelines and agreements that have fostered peace and cooperation throughout the world, and we must demonstrate our continued commitment to these goals.

The threat posed by Saddam Hussein is too great for us to remain inactive. We cannot sit idly by while the pieces of another September 11 fall into place. We cannot risk a single American life waiting for promises from a madman. We now have the opportunity to improve the safety of our citizens and the stability of the Middle East. However, there is a right way and a wrong way of approaching this complicated issue. Just as a prosecutor must lay out facts to establish guilt, we must make our case before the world community. This is the only approach to guarantee that our efforts to disarm Iraq will have the full force of international support and not undermine our greater war against terrorism.

I appreciate the opportunity to share in this debate and urge my colleagues to vote for the Spratt amendment.

Mr. PAYNE. Mr. Speaker, I must once again reiterate, although it seems rude and people do want to extend and it is difficult to end before my colleagues complete their statements, I must insist that we take no more than 5 minutes.

Mr. Speaker, I yield 5 minutes to the gentleman from New York (Mr. TOWNS), a leading member of the Committee on Energy and Commerce.

Mr. TOWNS. Mr. Speaker, I am concerned that this resolution ignores the political realities that are present in a tinderbox like the Middle East. It is naive to think that unilateral Amer-

ican action in the Middle East will achieve lasting security, but it is downright foolish to ignore the United Nations' potential as a partner in eliminating Saddam's chokehold on world security.

This resolution merely pays lip service to any meaningful coalition building or endorsement of U.N. findings without establishing an international coalition. We leave the fate of the Iraqi people to uncertainty and without the hope of meaningful nation building or distribution of aid. America cannot achieve this alone or on its own.

The world is watching us to see how a superpower acts which has defeated its dragons and is now confronted by malignant dictators of developing powers. Make no mistake about it, Saddam Hussein is a dictator who resorts to the most heinous of atrocities to silence his opponents.

As the world's sole superpower, we must be careful that our allies do not grow resentful of us. We need to make certain that they are included in any sort of action that we as a Nation might decide to take. That has not happened, and I must vote no on the resolution.

Let me close by saying I am concerned as anyone in this Chamber about national and international security. I served in the United States Army, but I am not convinced that we should put our young people in harm's way. We should not do that; and, therefore, I will vote no on this resolution and hope that many of my colleagues would join us. This is the wrong way to go.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Colorado (Mr. UDALL), a member of the Committee on Resources.

(Mr. UDALL of Colorado asked and was given permission to revise and extend his remarks.)

Mr. UDALL of Colorado. Mr. Speaker, I thank the gentleman for yielding me the time.

Mr. Speaker, I rise in opposition to this resolution.

Like many of my colleagues, I have struggled with the question of whether to give the President the broad authority to take our Nation into a full-scale war with Iraq. I have also struggled with the question of how to support the President's objectives and also keep faith with my oath to uphold the Constitution.

I continue to have grave reservations about acting unilaterally, acting without evidence of an imminent threat and acting without considering the consequences for the war on terrorism or without a commitment to rebuilding a post-war Iraq. In my opinion, the resolution we are considering today would give the President authority to act without adequately addressing these crucial questions.

Congress has a solemn responsibility to join with the President in determining whether any path to war will be short or long, who will be on that path

with us and ultimately what kind of war we intend to wage. This resolution does not allow Congress to answer these important questions. Instead, the resolution gives that power to one man, the President, and represents a dangerous erosion of congressional power and responsibility. That is why it should be defeated unless it is amended.

Absent new evidence that Saddam Hussein poses an imminent threat to our national security, I believe we should only go to war against Iraq as a part of a broad international coalition authorized by the United Nations. This is important not only to secure the peace and manage the costly and difficult nation building that must follow but also to avoid compromising our efforts to combat global terrorism, particularly in the Islamic world.

□ 2230

As a last resort, it may be necessary for American military forces to act without the support of the United Nations Security Council. But before we do so, I believe the President should come to Congress for a separate authorization. That is what the amendment I offered to the Committee on Rules called for.

My amendment was based on a resolution I introduced, House Joint Resolution 118, which would ensure that Congress, not the President, makes this awesome decision. Regrettably, my amendment was not made in order; so I am glad that tomorrow I will have the opportunity to vote for the Spratt amendment, which I believe is more consistent with the Constitution than the underlying resolution we are being asked to support.

Congress needs to know whether the United Nations is with us or on the sidelines before we launch a military invasion of Iraq on our own. Not having this information beforehand, with all of the implications it poses for our global war on terrorism, and the consequences for our security in this region, is simply irresponsible, in my view.

Do not misunderstand. I have no illusions about the duplicity of Saddam Hussein or the depths of his cruelty. Saddam Hussein is a dangerous tyrant and a threat to peace, and I fully support the goal of disarming him. I do not believe in a policy of appeasement towards Saddam Hussein. But I believe that ridding the world of Saddam Hussein is only part of the job we face. We have to remove Saddam Hussein's threat in the context of broader security goals, including crippling al Qaeda and sustaining and building the important global relationships we need for the war against terrorism and for solving other critical global problems.

My father, Morris Udall, who was serving in Congress in 1964, came to regret his support for the Gulf of Tonkin resolution when it became clear that it was being used as a substitute for the constitutional responsibility of Con-

gress to declare war. I fear that this Congress, a generation later, is poised to make a similar mistake. To avoid that, we need to reject this resolution.

Mr. Speaker, I rise in opposition to this resolution.

Like many of our colleagues, I have struggled with the question of whether to give the president the broad authority to take our nation into a full-scale war against Iraq. I have also struggled with the question of how to support the president's objectives and also keep faith with my oath to uphold the Constitution. I continue to have grave reservations about acting unilaterally, acting without evidence of an imminent threat, and acting without considering the consequences for the war on terrorism or without a commitment to rebuilding a post-war Iraq. In my opinion, the resolution we are considering today would give the president authority to act without adequately addressing these crucial questions.

Congress has a solemn responsibility to join with the president in determining whether any path to war will be short or long, who will be on that path with us, and ultimately what kind of war we intend to wage. This resolution doesn't allow Congress to answer these important questions. Instead, the resolution gives that power to one man, the president, and represents a dangerous erosion of congressional power and responsibility. That is why it should be defeated unless it is amended.

Mr. Speaker, a few days ago the president told us that voting for this resolution would not mean that war was imminent or unavoidable. Many of my colleagues draw comfort from the view that this resolution is not necessarily a call to arms. With respect, I find no such comfort. This resolution very clearly gives the president authority to take us to war.

I introduced a resolution, H.J. Res. 118, which would ensure that Congress makes this awesome decision. I also submitted to the Rules Committee an amendment based on my resolution. Regrettably, my amendment was not made in order. So I am glad that I will have the opportunity to vote for the Spratt amendment, which I believe is more consistent with the Constitution than the underlying resolution we are being asked to support.

Absent new evidence that Saddam Hussein poses an imminent threat to our national security, I believe we should only go to war against Iraq as part of a broad international coalition authorized by the United Nations. This is important not only to secure the peace and manage the costly and difficult nation-building that must follow, but also to avoid compromising our efforts to combat global terrorism, particularly in the Islamic world. As a last resort, it may be necessary for American military forces to act without the support of the United Nations Security Council, but before we do so, I believe the president should come to Congress to ask for a separate authorization.

Congress needs to know whether the United Nations is with us or on the sidelines before we launch a military invasion of Iraq on our own. Not having this information beforehand, with all of the implications it poses for our global war on terror and the consequences for our security in the region, is simply irresponsible in my view.

Don't misunderstand, I have no illusions about the duplicity of Saddam Hussein or about the depths of his cruelty. Saddam Hussein is a dangerous tyrant and a threat to

peace, and I fully support the goal of disarming him. I do not believe in a policy of international amnesia toward Saddam Hussein. That's why I can't support the Lee amendment, which I believe does not adequately respond to the urgency of ending Saddam Hussein's decade of defiance and eliminating Iraq's weapons of mass destruction. The Lee amendment seems to rule out military action as a last resort, and I don't believe we can or should do that.

But I believe that ridding the world of Saddam Hussein is only part of the job we face. We have to remove Saddam Hussein's threat to the context of broader security goals, including crippling Al Qaeda and sustaining and building important global relationships we need for the war against terrorism and for solving other critical global problems.

My father was serving in Congress in 1964 when it passed the Gulf of Tonkin Resolution, which led to the eventual deployment of 500,000 American soldiers in Vietnam and the deaths of 55,000 American servicemen and women. My father came to regret his support for that resolution when it became clear that it was being used as a substitute for the Constitutional responsibility of Congress to declare war. I fear that this Congress, a generation later, is poised to make a similar mistake.

To avoid that, we need to reject this resolution.

Mr. FALEOMAVAEGA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we are demonstrating to our Nation and to the world what American democracy is all about, where the duly elected representatives of this body have been given an opportunity to share with each colleague their best judgment on whether the Congress supports the President's request to place the men and women of our armed services in harm's way.

I have no doubt that our President has spent countless hours, perhaps even sleepless hours, and probably even thought a thousand times over as to whether or not this was the best course of action that our country should take at this time and for him to make such an important decision that will determine whether our soldiers, sailors and airmen are going to be sent into harm's way.

Mr. Speaker, I am glad our President does not have the constitutional authority to declare war against enemy nations. I am also glad that our President does not have the authority under the provisions of our Constitution to establish our Nation's armies and navies. That is the exclusive authority that has been given specifically to the Congress of the United States. Mr. Speaker, I respect our President; but I do not worship him, nor is he a king or an emperor. He is our President and is subject to the will of the American people.

My reason for supporting this resolution is that our President is properly authorized under the terms of this proposed resolution to seek out all diplomatic options, to make sure that there is substantive participation from our allies and from other nations in the

world to confront the serious danger that is now before us and the world with the regime currently governed by the dictator Saddam Hussein.

Another critical factor in this whole debate, Mr. Speaker, is that we have not questioned the loyalty and patriotism of each of us or the integrity of each of us, of any Member of this body, especially under the climate we are now under to make a firm decision whether our Nation should commit her military forces against her enemies. I am convinced, Mr. Speaker, that sometime tomorrow, if as a result of a final vote by this body that vote is not overwhelming in support of the President's proposed resolution, that common sense would dictate that our President would seriously have to reconsider his position on this matter, go back to the drawing board and try again. I would rather deal with some bruised egos in the White House and in the Congress than to end up fighting another war like Vietnam.

Again, in good faith and as a consequence of the deliberative efforts of the leadership of both sides of the aisle in this body, a proposed resolution has been offered for our consideration. But, Mr. Speaker, I make reference to my friend, the Chinese General Sun Tzu, who some 2,500 years ago made some very astute observations concerning the art of warfare, and I hope our Vice President and our leaders in the Department of Defense will take heed to General Tzu's advice.

General Tzu said, "If you know the enemy and know yourself, you need not fear the result of 100 battles. If you know yourself but not the enemy, for every victory gained, you will also suffer a defeat. But if you do not know your enemy nor yourself, you will absolutely lose in every battle."

Mr. Speaker, I ask unanimous consent to yield the remainder of my time to the gentleman from New Jersey (Mr. PAYNE) and ask that he be permitted to control the rest of that time.

The SPEAKER pro tempore (Mr. TERRY). Is there objection to the request of the gentleman from American Samoa?

There was no objection.

Mr. ISSA. Mr. Speaker, I would ask for the time remaining now on the two sides.

The SPEAKER pro tempore. The gentleman from California (Mr. ISSA) has 2 hours and 21 minutes remaining, and the gentleman from New Jersey (Mr. PAYNE) now has 24½ minutes remaining.

Mr. ISSA. Mr. Speaker, I reserve the balance of my time.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio (Mr. SAWYER).

(Mr. SAWYER asked and was given permission to revise and extend his remarks.)

Mr. SAWYER. Mr. Speaker, I have with me a carefully prepared floor statement. It lays out my opposition to the Hastert-Gephardt-Bush resolution,

although it is a meaningful improvement over the original proposal, and my support for the Spratt alternative. I commend it to my colleagues, and will place that statement in the RECORD for reference.

In truth, it covers ground already well covered, more eloquently and with deepest conviction, by both supporters and opponents many times in this important and serious debate. Instead, because these votes may well be my last of real import as a Member of Congress, I would like to share with colleagues a very specific thought. It is simple. We all remember the warning common from childhood: "Don't start something you cannot finish."

I do not mean to suggest that what we are doing here today is something we cannot finish. But my father said it a little bit differently, more as a matter of advice than childish threat. "Don't start anything you don't know how to finish." It is good advice about many things. And even though I will not be here to help at the finish of what we begin here today, it is good advice here nonetheless.

Now, I am not talking about war plans. I am confident that they will be well and professionally crafted; and, clearly, we should not share them with our adversaries. But I am talking about peace plans. We seem to have more trouble with them. And we need to make them very clear to adversaries and allies alike. It is a powerful tool.

For the second time in a year, we are talking about making war in order to rebuild a nation and its culture. The echo which that recalls from 40 years ago is a concern.

"Don't start anything you don't know how to finish," my father said.

It reminds me of 1991. And the events of the last year in Afghanistan are even more troubling, as rebuilding there hardly proceeds at all. And the message that sends to the oppressed people of Iraq and others whom we would make our friends throughout the Middle East, that message is a real problem.

"Don't start anything you don't know how to finish," my father said.

Because this will not be over when the bombs stop falling and the ground combat is over and the wounded are cared for and the dead are put to rest. It will not begin to be over until we have carried out a coherent and clearly stated plan for postwar Iraq. It is the single most important message we can send to the people of the region as they debate and choose a better future for themselves.

Middle East analyst Stephen Cohen has remarked, "We in the West cannot have that debate for them, but we can help create the conditions for it to happen. America's role is to show the way to incremental change, something that is not, presto, instant democracy, or fantasies that enlightened despotism will serve our interests. We cannot just go on looking at the Arab world as a giant gas station, indifferent to what

happens inside. Because gas is now leaking and all around people are throwing matches."

"Don't start anything you don't know how to finish," my father said.

It is an important lesson. It is one that we might have thought the President's own father might have said to him. Or maybe not. And that is why I say it today.

Mr. Speaker, I believe Congress would achieve near unanimity if we were voting only on the overall purpose of this resolution, which is to eliminate Saddam Hussein's control over weapons of mass destruction. On that issue we are as unified as we are in the war against terrorism that we launched with the President a year ago. I, and many others, believe that the current Iraqi regime poses a long-term threat to the community of nations through its ongoing defiance of United Nations resolutions prohibiting Iraq from developing weapons of mass destruction. But I will not support the resolution before us because it provides the President with an open-ended authority that is far too broad for the task before us.

The President is asking for authorization of force even before he determines that force is necessary and before we have exhausted our other options short of force. Instead, Congress should pass a resolution that calls on the President to obtain the support of the United Nations and our allies and authorizes him to use force if it is so sanctioned by the United Nations. This approach is embodied in the Spratt substitute amendment to be offered tomorrow, which I will support. If the United Nations fails to take sufficient action, then we can pass another resolution of force at that time. But action by the United Nations Security Council offers the best chance to reintroduce meaningful inspections into Iraq. This would be the best way to resolve the threat from Iraq peacefully and without reducing our focus on eliminating al Qaeda, which remains the foremost immediate threat to America.

Given Saddam Hussein's record of obstruction over the past eleven years, the United Nations should authorize force against Iraq if Iraq interferes with the unconditional inspection and dismantling of its weapons of mass destruction. However, I cannot support a resolution that authorizes unilateral military force in the present circumstances.

I am concerned that if the U.S. were to act alone it would damage our wide international support in the war against terrorism and al Qaeda. This war depends on the cooperation of other governments to arrest terrorist suspects, monitor terrorist financial transactions, and share intelligence. We should not risk the goodwill of the international community by acting unilaterally while multilateral options still exist.

I am also concerned that if the U.S. were to act against Iraq without the support of the United Nations Security Council, it would set a dangerous precedent for other countries who might be tempted to use military intervention against the wishes of the international community in order to end long-simmering disputes. It is important that our policy toward Iraq be guided by our long-standing commitment to the principle of collective security, which the United States helped place in the Charter of the United Nations.

Let me close by saying that I believe that Congress and the Administration should make

it crystal clear before any military action is taken that the U.S. will be committed to helping Iraq rebuild after a war. The U.S. cannot expect to make a quick exit from Iraq after a war. We would have to be committed to a substantial expenditure of time and money to revitalize Iraq, and we will need the support of our allies to succeed. Doing otherwise would risk leaving behind a dangerously unstable country in the Middle East that could be an even greater source of danger in the region than the current regime.

Mr. ISSA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to thank the gentleman from Ohio for his thoughtful comments. I may not agree with all of them, but the contribution that he has made in this body will be sorely missed with his departure. And I know that I share with my colleagues on the other side of the aisle in knowing that this body will be poorer for not having the kind of insight and the kind of caring that we have just heard.

I know this debate has gone on long, but some things are worth going on a little longer, and I once again would like to express my appreciation for his thoughtful comments.

Mr. PAYNE. Mr. Speaker, I yield myself such time as I may consume to also compliment the gentleman from Ohio, who has served this House so outstandingly; and we will certainly truly miss him.

Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts (Mr. FRANK), one of the brightest persons in the House, who serves on the Committee on Financial Services and who has patiently waited.

Mr. FRANK. Mr. Speaker, I thank the gentleman from New Jersey for yielding me this time, and thank him as well for having undertaken this thankless, but very important, job and has done it well.

When I listened to the President's speech the other night, I found myself in agreement with much of it, but then I find myself in disagreement with his conclusion. I think the President made a pretty good case for a multilateral approach to making sure that Saddam Hussein is disarmed, but that is not what he is asking us to do.

The President is asking us to authorize a unilateral invasion of Iraq to overthrow Saddam Hussein because he is an immoral and evil ruler. I wish he were the only immoral and evil ruler in the world. Our job would be simpler.

But I do not see a rationale for a unilateral American invasion to overthrow Saddam Hussein that does not apply to a number of other governments, some of whom we are allied with. In fact, there will be a choice tomorrow for a very well-thought-out proposal that would empower the President with the full support of Congress to undertake a serious effort to get a multilateral approach, using force if necessary, to impose disarmament on Saddam Hussein. It is the resolution that will be offered by the gentleman from South Carolina.

And the President said, let us have unity, let us have a large majority here. He could get, I believe, more than 90 percent, if he were willing to throw his support behind a resolution that said let us use force in a multilateral context not to overthrow this government, because we cannot be in the position of, I think, invading every government that fails to meet our moral standards, as much as I believe those moral standards to be correct ones. He, instead, will choose a more divisive path.

Why? One reason is that we are told the policy of deterrence will not work with Saddam Hussein. We are told that deterrence, which has worked with the Soviet Union and with the People's Republic of China and with North Korea and with Iran and with other nations, uniquely will not work with Iraq because of the nature of Saddam Hussein. The problem with the argument that deterrence will not work, that is the policy that says the way to keep him from using chemical and biological and, ultimately, nuclear weapons, if he gets them, and we should try to stop him from getting them, but the way to keep him from doing it is to threaten him with overwhelming retaliation.

□ 2245

The President says it does not work. But American intelligence says it does.

Mr. Speaker, I include for the RECORD the Washington Post article from last Monday from which I want to read.

"Although Iraq's chemical artillery shells and warheads were deployed during the war of 1991, they were not used. U.S. officials now believe this was because the United States had repeatedly cautioned Iraq before the fighting started that use of such weapons would draw an immediate and possibly overwhelming response that would topple Hussein from power.

"One reason the Pentagon has adopted a plan to dissuade Iraqi officers from ordering the use of chemical and biological weapons is that, unlike in 1991, this deterrent has been rendered moot by the administration's decision to make removing Hussein the goal of any military action."

This is the conclusion of American military intelligence, not rebutted by the administration. It was recently reinforced by a letter released by the CIA, and the CIA said he is not likely to use the weapons because he is being deterred effectively by the threat of our force.

In a colloquy with a Senator from Michigan he was asked the question, What about his use of weapons of mass destruction? If we initiate an attack and he was an extremist or otherwise, what is the likelihood in response to our attack he would use chemical or biological weapons?

Senior intelligence witness: "Pretty high, in my view."

In other words, deterrence according to American intelligence analysis in

1991 and American intelligence analysis today works. So there is no need for this unilateral invasion.

Yes, I think it is useful for the international community to put maximum pressure on Saddam Hussein to disarm. I believe that the resolution offered by the gentleman from South Carolina is an authorization to do that.

I disagree with the President about this policy of a unilateral American invasion with us paying all of the costs and having all of the responsibility for the subsequent administration with Iraq. I disagree with it; but if one agrees with it, it is the height of irresponsibility to pretend that we can pay for it in the current situation without serious social harm.

This administration put through a major tax cut 2 years ago with the consent of Congress, over my objection and many others. Since that time, we have committed to spend on a war on Afghanistan, which I supported; reconstruction of Afghanistan, our moral obligation; significant increases to compensate the victims, both municipal and individual, of the mass murders of September 11; significant ongoing increases in expenditure of homeland security. Now add to that a war in Iraq and the subsequent responsibility to run Iraq and leave that tax cut in place. Members should understand the consequences: a deterioration in our environmental cleanup; a lack of transportation spending; indeed, a reduction of real spending for virtually every other domestic program.

Mr. Speaker, the fact that deterrence still works means that is unnecessary.

The previously referred to material is as follows:

[From The Washington Post, Sept. 30, 2002]

U.S. EFFORT AIMED AT IRAQI OFFICERS

(By Walter Pincus)

The Pentagon is preparing a campaign aimed at deterring Iraqi officers from firing chemical or biological weapons during a U.S. invasion because intelligence officials believe President Saddam Hussein has given field commanders conditional authority to use the weapons in the event of an attack, according to defense and intelligence officials.

The effort would include massive leafleting of Iraqi military positions—a tactic used by U.S. forces during the Gulf War in 1991—but also might employ covert techniques that would enable the U.S. message to reach Iraqi commanders, the officials said.

Final authority to use weapons of mass destruction has resided with Hussein. But the Iraqi president's knowledge that the United States would seek to take down Iraqi command centers and communications systems at the outset of any military strike means he has likely already given authority for firing chemical and biological weapons to his most loyal commanders in the field, the officials said. They said Hussein issued similar orders before the Gulf War.

As a result, the sources said, the Pentagon plans to appeal directly to these officers not to use the weapons. One of the biggest challenges before military planners is determining which Iraqi military units can be encouraged to defect in the event of a U.S. invasion and how to communicate with them, defense officials have said.

A British intelligence report released Tuesday by Prime Minister Tony Blair said Iraqi could deploy nerve gas and anthrax weapons on 45 minutes' notice. It also said Hussein may have already delegated authority to order use of such weapons to his youngest son, Qusai, who leads the Republican Guard—elite units that control deployed weapons for mass destruction.

The Pentagon's campaign was signaled recently by Defense Secretary Donald H. Rumsfeld. Testifying before the House Armed Services Committee, Rumsfeld said, "Wise Iraqis will not obey orders to use WMD [weapons of mass destruction].... The United States will make clear at the outset that those who are not guilty of atrocities can play a role in the new Iraq. But if WMD is used, all bets are off."

Rumsfeld added that if the order to use chemical or biological weapons were made by Hussein, "that does not necessarily mean his orders would be carried out. He might not have anything to lose, but those beneath him in the chain of command most certainly would have a great deal to lose."

A Pentagon official said Rumsfeld's comments "are at least the start of telling them where we are serious."

After the Gulf War, coalition force interrogators learned that Hussein had decided ahead of time to give commanders the go-ahead to use chemical weapons if Baghdad's communications were interrupted.

One administration source said the Iraqi president issued specific orders to use the weapons if "the allies were winning the ground war and they had crossed a line due west of the city of Al-Amarah," which is 200 miles south of Baghdad. Iraqi unit commanders were also told they should employ the weapons against Iranian forces if they crossed the border during the war and moved into Iraq's Maysan Province, where Al-Amarah is located.

Although Iraq's chemical artillery shells and warheads were deployed during the war, they were not used. U.S. officials now believe this was because the United States had repeatedly cautioned Iraq before the fighting started that use of such weapons would draw an immediate and possibly overwhelming response that would topple Hussein from power.

One reason the Pentagon has adopted a plan to dissuade Iraqi officers from ordering the use of chemical or biological weapons is that, unlike in 1991, this deterrent has been rendered moot by the administration's decision to make removing Hussein the goal of any military action.

Whether a plan to deter Iraqi commanders from employing the weapons will work is a matter of disagreement among military experts. The Republican Guard units that control the weapons are run by Hussein's most loyal officers.

"They will face a short-term or a long-term problem," one former senior intelligence official said. "We may come after them when the fighting is over. But there may be a Saddam loyalist with a gun who is threatening to kill him right away if he doesn't follow orders."

Judith Yaphe, an Iraq specialist at the National Defense University, said that in 1991, according to documents found after the war, Hussein had tried to persuade his commanders to use the weapons because they would be killed anyway. Also, Hussein had placed loyalists with the commanders to enforce his wishes. "The question is, are they still there?" she said.

Richard Russell, a CIA area analyst who specialized in Iraq and is now at the National Defense University, said the effort to deter individual commanders "makes sense as an attempt." But he noted that Iraqi oper-

ational security was very good in the Gulf War and "you have to assume it is much better now."

After Iraq's invasion of Kuwait in 1990, U.S. officials talked openly of American forces making preparations for waging combat in a chemical environment. Then-Secretary of State James A. Baker III told Iraqi Foreign Minister Tariq Aziz that Hussein's government would be endangered if such weapons were used. Then-Defense Secretary Richard B. Cheney hinted that if such an attack took place against Israel, that country might respond with nuclear weapons.

In the war's aftermath, U.S. intelligence officials learned that Iraq had been deterred from using chemical weapons by the threat of massive retaliation. Iraqi artillery units armed with chemical shells were segregated from the rest of the forces and chemical munitions were never moved to Kuwait and never moved toward the front as coalition forces approached, and in some cases breached, the Iraq-Kuwait border.

C.I.A. LETTER TO SENATE ON BAGHDAD'S INTENTIONS

Following is the text of a letter dated Oct. 7 to Senator Bob Graham, Democrat of Florida and chairman of the Intelligence Committee, by George J. Tenet, director of central intelligence, about decisions to declassify material related to the debate about Iraq:

In response to your letter of 4 October 2002, we have made unclassified material available to further the Senate's forthcoming open debate on a Joint Resolution concerning Iraq.

As always, our declassification efforts seek a balance between your need for unfettered debate and our need to protect sources and methods. We have also been mindful of a shared interest in not providing to Saddam a blueprint of our intelligence capabilities and shortcomings, or with sight into our expectation of how he will and will not act. The salience of such concerns is only heightened by the possibility of hostilities between the U.S. and Iraq.

These are some of the reasons why we did not include our classified judgments on Saddam's decision-making regarding the use of weapons of mass destruction (W.M.D.) in our recent unclassified paper on Iraq's Weapons of Mass Destruction. Viewing your request with those concerns in mind, however, we can declassify the following from the paragraphs you requested:

Baghdad for now appears to be drawing a line short of conducting terrorist attacks with conventional or C.B.W. [chemical and biological weapons] against the United States.

Should Saddam conclude that a U.S.-led attack could no longer be deterred, he probably would become much less constrained in adopting terrorist actions. Such terrorism might involve conventional means, as with Iraq's unsuccessful attempt at a terrorist offensive in 1991, or C.B.W.

Saddam might decide that the extreme step of assisting Islamist terrorists in conducting a W.M.D. attack against the United States would be his last chance to exact vengeance by taking a large number of victims with him.

Regarding the 2 October closed hearing, we can declassify the following dialogue:

Senator Levin [Carl Levin, Democrat of Michigan]: ... If (Saddam) didn't feel threatened, did not feel threatened, is it likely that he would initiate an attack using a weapon of mass destruction?

Senior Intelligence Witness: ... My judgment would be that the probability of him initiating an attack—let me put a time frame on it—in the foreseeable future, given

the conditions we understand now, the likelihood I think would be low.

Senator Levin: Now if he did initiate an attack you've ... indicated he would probably attempt clandestine attacks against us ... But what about his use of weapons of mass destruction? If we initiate an attack and he thought he was in extremis or otherwise, what's the likelihood in response to our attack that he would use chemical or biological weapons?

Senior Intelligence Witness: Pretty high, in my view.

In the above dialogue, the witness's qualifications—"in the foreseeable future, given the conditions we understand now"—were intended to underscore that the likelihood of Saddam using W.M.D. for blackmail, deterrence, or otherwise grows as his arsenal builds. Moreover, if Saddam used W.M.D., it would disprove his repeated denials that he has such weapons.

Regarding Senator Bayh's [Evan Bayh, Democrat of Indian] question of Iraqi links to al-Qa'ida. Senators could draw from the following points for unclassified discussions:

Our understanding of the relationship between Iraq and al-Qa'ida is evolving and is based on sources of varying reliability. Some of the information we have received comes from detainees, including some of high rank.

We have solid reporting of senior level contacts between Iraq and al-Qa'ida going back a decade.

Credible information indicates that Iraq and al-Qa'ida have discussed safe haven and reciprocal nonaggression.

Since Operation Enduring Freedom, we have solid evidence of the presence in Iraq of al-Qa'ida members, including some that have been in Baghdad.

We have credible reporting that al-Qa'ida leaders sought contacts in Iraq who could help them acquire W.M.D. capabilities. The reporting also stated that Iraq has provided training to al-Qa'ida members in the areas of poisons and gases and making conventional bombs.

Iraq's increasing support to extremist Palestinians coupled with growing indications of a relationship with al-Qa'ida, suggest that Baghdad's links to terrorists will increase, even absent U.S. military action.

Mr. ISSA. Mr. Speaker, in an effort to keep fairness in this body, I believe there are more speakers on the other side of the aisle, and I would like to inquire how much longer they would need in order to find a way to equalize time?

Mr. PAYNE. Mr. Speaker, we would need a minimum of at least one full hour. That would be the least amount of time. It is very difficult to predict. We will not let anyone speak over 5 minutes. However, we feel an obligation to every Member who was promised the opportunity to speak. We want to live up to our obligations, but we will try to move it along as quickly as possible.

Mr. ISSA. Mr. Speaker, certainly the gentleman from Illinois (Mr. HYDE) and the gentleman from California (Mr. LANTOS) had every intention in making sure that every Member got an opportunity to speak.

The SPEAKER pro tempore (Mr. TERRY). The gentleman from New Jersey (Mr. PAYNE) has 16 minutes remaining.

Mr. ISSA. Mr. Speaker, I ask unanimous consent to yield 44 minutes to the gentleman from New Jersey (Mr.

PAYNE) and that he may control that time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ISSA. Mr. Speaker, I yield myself such time as I may consume.

Mr. FRANK. Mr. Speaker, will the gentleman yield?

Mr. ISSA. I yield to the gentleman from Massachusetts.

Mr. FRANK. Mr. Speaker, I want to express my deep appreciation to the gentleman from California, and to the majority, for this very generous action. It is not always the norm, and I just want to express my appreciation.

Mr. ISSA. Mr. Speaker, I thank the gentleman and hope it will always be the norm on the Committee on International Relations.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. RUSH).

(Mr. RUSH asked and was given permission to revise and extend his remarks.)

Mr. RUSH. Mr. Speaker, as a representative of the thousands in my district who are opposed to an ill-conceived war, I rise in opposition to this resolution on the use of force against Iraq.

Thousands of my constituents have spoken. Families of military personnel who reside in my district have spoken. They have all emphatically and resoundingly delivered an answer to the question of going to war with Iraq; and the answer is, no, no, and no. No against the war in Iraq. No against sending their sons and daughters to war for yet-unknown reasons. And no to the ignoring of the economic problems that still are plaguing our Nation.

The war that my constituents want us to wage is a war on poverty, a war on layoffs, a war on inadequate health care, a war on a lack of affordable housing and a war for economic opportunity and fairness.

Over the last several months, the President has been earnest in his efforts to inform the American public of what the risks are of not going to war and what they may be. But, to date, he has not convinced the people in my district why their sons and their daughters should be placed in harm's way.

If we are going to engage in an honest debate, we owe it to the American public to ask the right questions. Questions like: What will the number of military and civilian casualties be? Questions like: How long will the conflict in Iraq be expected to last? And simple questions like: Does Saddam Hussein pose a clear and present threat to the United States?

Simply citing all the atrocities committed by Saddam Hussein, and there are many atrocities that have been ignored for a decade, and calling Saddam Hussein a bad name is simply not enough.

Mr. Speaker, during this incredible moment in American history, we

should all be reminded of a quote by President James Madison, "The advancement and infusion of knowledge is the only guardian of liberty."

If we are sincere about bringing democracy to the people of Iraq, we should lead by example in every step of the way. We should lead by presenting the American public and the American people with clear, balanced and realistic information on the consequences of a war on Iraq.

Let us not insult our own citizens by ignoring the fact that all nations in the Middle East region and many of our long-standing allies around the world oppose this war. They see military action in Iraq as a glorified oil and land grab. Let us not ignore the fact that a strike against Iraq will not only have the effect of inflaming existing resentment of U.S. foreign policy and possibly provoking renewed terrorist attacks on Americans both here and abroad.

And despite the President's proclamation that America is a friend of the Iraqi people, we cannot insult the American people by ignoring the fact that U.S.-led sanctions have created a hotbed of disease and extreme poverty in Iraq, and war will only plunge the Iraqi people deeper into death and despair.

For those who are saber rattling, war mongering and unconcerned with America's place in the global community, let us not ignore the consequences that the American people will have to pay.

To this issue, some argue that a war with Iraq is worth the blood of young Americans. But as a Representative who may have to face mothers and fathers and brothers and sisters of fallen constituents, I will not disrespect and dishonor them with tough talk, tough talk that refuses to answer obvious questions, tough talk that only provides the American people with answers that do not answer, with explanations that do not explain, and conclusions that do not conclude.

While I am confident that we will win an armed conflict with Iraq, there must be a forthright discussion with the public about the impact of a war on the American people and the world in which we live.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentlewoman from California (Mrs. DAVIS), a member of the Committee on Armed Services.

Mrs. DAVIS of California. Mr. Speaker, with a deep appreciation for the gravity of our collective decision, I rise to oppose this resolution, not because I disagree with the goal of disarming Saddam Hussein, with force if necessary, but because I believe that this resolution is dangerously broad and counterproductive to America's greater goal of winning the war on terrorism.

Mr. Speaker, over the course of the history of our country and the Congress, relatively few issues have risen to the significance of a declaration of war. Like many of my colleagues, I

have personally anguished over this decision because I am convinced that Saddam Hussein is a threat. It is clear that he has designs to amass weapons of mass destruction with the intent to exert control over the Middle East, if not a larger region. The core of our decision lies in the best way to address this threat.

I have tried to understand all perspectives. I have attended classified and public hearings, examined evidence, studied pages of material, and sought the counsel of many. I have listened intently to those who have fought wars and those who have prevented them. I have also listened attentively to the citizens of San Diego.

Mr. Speaker, looking back on the lessons of history, it is clear no one can predict the future. Those faced with difficult decisions must make the best judgment based on the information at hand. To be sure, in the words of Secretary Rumsfeld, "We do not know what we do not know." However, that is precisely the reason that I continue to have reservations about unilateral force.

Unilateral preemptive force may indeed win the battle for Iraq but cause us to lose the war by isolating America from its many allies, turning nations against us and reinforcing the cause of those who wish us harm.

In addition to these considerations, we must consider our young men and women in uniform. Before sending them into harm's way, we must fully explore every other avenue to achieve our goals without risking their lives. I do not believe we have done that.

I applaud the efforts of many to bring Congress to a place where there is more agreement than disagreement. While we may disagree on the manner, we agree that something must be done, and we agree that Saddam Hussein is a menace, and we agree that the United States must exercise its leadership.

To be a true leader, we must convince others to follow. Hubert Humphrey once said, "Leadership in today's world requires far more than a large stock of gunboats and a hard fist at the conference table." That is precisely why we must continue to seek options to unilateral force, to work with the United Nations and the world community, and to use force only when all other options are exhausted. If we do not, how can we expect others to do likewise?

In addition, we must be clear in our goal. Again, citing the Secretary of Defense, our goal is disarmament. To achieve this, we must insist on tough new rigorous U.N. inspections. If those inspections are thwarted, we may use force, first, if sanctioned by the U.N. Security Council, and then alone if necessary.

Based on these principles, I will support the Spratt substitute because it embodies the best way to address the threat posed by Saddam. It holds the U.N. accountable, and it retains Congress' prerogative to truly be the voice of the American people.

□ 2300

Mr. Speaker, I question the notion that we must speak with one voice because it is the collection of voices that grants us our strength. Mr. Speaker, tomorrow I will vote "no" because House Joint Resolution 114 is a premature de facto declaration of war that fails to recognize the fundamental tenet that leadership involves leading, not merely acting alone. But make no mistake. A "no" vote on the resolution does not restrict the President's power to act should an imminent threat arise. He already has that authority.

To conclude, let me say to the servicemen and women, especially those living in San Diego who will be called upon to enforce this policy, my admiration and respect for you is as strong as ever and it will never waiver. Just as you always do your duty to America regardless of how you personally feel about a particular mission, so will I do my duty to give you the support you need to complete your mission and get home safely. Along with my fellow Members of the House Committee on Armed Services, I will fight vigorously to get you every tool you need to do the job right.

To my colleagues on the committee and in Congress, I hope you will take my opposition to this resolution in the spirit in which it is offered, that of doing what I feel must be done to fight and win the war on terrorism and empower diplomacy. We may disagree over the strategy of addressing the threats posed by Iraq at this time, but we are united in the greater goal to free America and the world from the threat of terrorism.

To our enemies in Iraq and elsewhere, a warning: do not confuse democracy and debate with disunity or disarray. Our voices constitute our strength, and the United States of America is united in its resolve.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Vermont (Mr. SANDERS), a member of the Committee on Government Reform and the Committee on Financial Services, a true leader in this government.

Mr. SANDERS. Mr. Speaker, I thank my friend from New Jersey for yielding me this time.

Mr. Speaker, I do not think any Member of this body disagrees that Saddam Hussein is a tyrant, a murderer, and a man who has started two wars. He is clearly someone who cannot be trusted or believed. The question, Mr. Speaker, is not whether we like Saddam Hussein or not. The question is whether he represents an imminent threat to the American people and whether a unilateral invasion of Iraq will do more harm than good.

Mr. Speaker, the front page of The Washington Post today reported that all relevant U.S. intelligence agencies now say despite what we have heard from the White House that "Saddam Hussein is unlikely to initiate a chemical or biological attack against the United States." Even more impor-

tantly, our intelligence agencies say that should Saddam conclude that a U.S.-led attack could no longer be deterred, he might at that point launch a chemical or biological counterattack. In other words, there is more danger of an attack on the United States if we launch a precipitous invasion.

Mr. Speaker, I do not know why the President feels, despite what our intelligence agencies are saying, that it is so important to pass a resolution of this magnitude this week and why it is necessary to go forward without the support of the United Nations and our major allies including those who are fighting side by side with us in the war on terrorism.

But I do feel that as a part of this process, the President is ignoring some of the most pressing economic issues affecting the well-being of ordinary Americans. There has been virtually no public discussion about the stock market's loss of trillions of dollars over the last few years and that millions of Americans have seen the retirement benefits for which they have worked their entire lives disappear. When are we going to address that issue? This country today has a \$340 billion trade deficit, and we have lost 10 percent of our manufacturing jobs in the last 4 years, 2 million decent-paying jobs. The average American worker today is working longer hours for lower wages than 25 years ago. When are we going to address that issue?

Mr. Speaker, poverty in this country is increasing and median family income is declining. Throughout this country family farmers are being driven off of the land; and veterans, the people who put their lives on the line to defend us, are unable to get the health care and other benefits they were promised because of government underfunding. When are we going to tackle these issues and many other important issues that are of such deep concern to Americans?

Mr. Speaker, in the brief time I have, let me give five reasons why I am opposed to giving the President a blank check to launch a unilateral invasion and occupation of Iraq and why I will vote against this resolution. One, I have not heard any estimates of how many young American men and women might die in such a war or how many tens of thousands of women and children in Iraq might also be killed. As a caring Nation, we should do everything we can to prevent the horrible suffering that a war will cause. War must be the last recourse in international relations, not the first. Second, I am deeply concerned about the precedent that a unilateral invasion of Iraq could establish in terms of international law and the role of the United Nations. If President Bush believes that the U.S. can go to war at any time against any nation, what moral or legal objection could our government raise if another country chose to do the same thing?

Third, the United States is now involved in a very difficult war against

international terrorism as we learned tragically on September 11. We are opposed by Osama bin Laden and religious fanatics who are prepared to engage in a kind of warfare that we have never experienced before. I agree with Brent Scowcroft, Republican former National Security Advisor for President George Bush, Sr., who stated, "An attack on Iraq at this time would seriously jeopardize, if not destroy, the global counterterrorist campaign we have undertaken."

Fourth, at a time when this country has a \$6 trillion national debt and a growing deficit, we should be clear that a war and a long-term American occupation of Iraq could be extremely expensive.

Fifth, I am concerned about the problems of so-called unintended consequences. Who will govern Iraq when Saddam Hussein is removed and what role will the U.S. play in ensuing a civil war that could develop in that country? Will moderate governments in the region who have large Islamic fundamentalist populations be overthrown and replaced by extremists? Will the bloody conflict between Israel and the Palestinian Authority be exacerbated? And these are just a few of the questions that remain unanswered.

If a unilateral American invasion of Iraq is not the best approach, what should we do? In my view, the U.S. must work with the United Nations to make certain within clearly defined timelines that the U.N. inspectors are allowed to do their jobs. These inspectors should undertake an unfettered search for Iraqi weapons of mass destruction and destroy them when found, pursuant to past U.N. resolutions. If Iraq resists inspection and elimination of stockpiled weapons, we should stand ready to assist the U.N. in forcing compliance.

Mr. ISSA. Mr. Speaker, I yield such time as he may consume to the gentleman from Louisiana (Mr. MCCRERY).

(Mr. MCCRERY asked and was given permission to revise and extend his remarks.)

Mr. MCCRERY. Mr. Speaker, I rise in support of House Joint Resolution 114.

Mr. Speaker, I rise in support of House Joint Resolution 114, which would authorize the use of military force against Iraq.

The diplomatic and military situation in Iraq without question remains one of the most difficult security issues facing the United States and the international community. It has only been further complicated by the terrorist attacks on our country last year. Recently, the President's national security adviser said Saddam Hussein has sheltered al-Qaeda terrorists in Baghdad and helped train some in the development of chemical weapons. Also of concern is the revelation that there may have been a meeting between a senior Iraqi intelligence official and Mohammed Atta, the leader of the September 11th attacks.

The administration has stated on numerous occasions that the war on terrorism will continue to be fought against all countries that support or harbor terrorists. It appears that list must include Iraq.

Our national security depends on preventing other countries from developing weapons of mass destruction. Iraq has pursued an agenda to develop weapons of mass destruction including chemical, biological, and nuclear weapons for many years. Saddam Hussein has already demonstrated an unconscionable willingness to use chemical weapons on his own people, attacking ethnic Kurds in Northern Iraq. He also used them against Iranian troops during the Iran-Iraq War. Iraq's arsenal includes several delivery systems, including long-range missiles capable of carrying dangerous payloads to our allies in the Middle East and Europe, including U.S. military bases in Bahrain and Turkey.

The United Nations Security Council required Iraq to scrap all weapons of mass destruction and long-range missiles and to allow for weapons verification inspections. For the past four years, Iraq has prevented representatives of the United Nations from inspecting Iraq's weapon facilities. It is clear that the Iraqi government has undermined the authority of the United Nations by rebuilding many of its chemical, biological, and nuclear weapon manufacturing plants.

Iraq has a history of invading its neighbors and using any and all weapons at its disposal against its enemies. A nuclear weapon in the hands of Hussein's brutal regime would give him an unacceptable upper hand to expand control over the world's petroleum reserves and quite possibly give him the leverage he needs to expand the borders of tyranny.

Mr. Speaker, it is not an unlikely possibility that Iraq, as a state-sponsor of terrorism, would transfer weapons of mass destruction to terrorists intent on using them against the United States. September 11th showed us that America is not immune to terror attacks, and Iraq's ties to international terrorist groups are unquestioned.

I support the President's campaign against any state, including Iraq, which is found to support terrorism or seeks to develop weapons of mass destruction with the intent of attacking America or its allies. We cannot wait for a transparent threat to materialize. The longer we wait, the more we risk another unthinkable attack upon our soil. Simply put, the United States cannot ignore the threat that Iraq poses to our way of life and that of our allies.

Saddam Hussein must be held accountable for years of noncompliance with United Nations resolutions. Failure to enforce the resolutions weakens the authority of the United Nations itself and sends a message to the foes of peace that future disobedience will be objected to solely through empty threats and resolutions without teeth.

I am hopeful that diplomatic efforts may yet succeed, and believe the United States must try to work with our allies and the international community towards a peaceful solution to our present situation. Every Member of Congress weighs this decision carefully, knowing the votes we cast may place the men and women of our armed forces in harm's way. Yet if it becomes necessary, we must be certain we do not embark upon a Sicilian Expedition. Any use of force should include clear goals. If we are to enter into conflict in Iraq, we must plainly establish our objectives and follow through on a commitment to purge terror and rebuild Iraq into a strong and stable nation.

Our first priority of any use of force should be to eliminate the ability of the Hussein re-

gime to manufacture, distribute, or employ weapons of mass destruction. Hussein's goal has always been to obtain a weapon of such destructive force, that no other nation would be willing to resist his will. It would be fundamentally irresponsible to allow Iraq to obtain a weapon that could be used to deter allied forces from enforcing the internationally recognized authority of the United Nations. Saddam's arsenal of aggression and terror must be completely destroyed in order to encourage stability and prevent the proliferation of those weapons to other parts of the region. This action must be our first goal.

The second goal, is the removal of Saddam Hussein from power. Iraq has traditionally been a nation of commerce and prosperity, but Hussein hoards the resources of his country, starving her citizens into submission. His power is sustained by a 25,000-strong Republican Guard who, in return for maintaining Saddam's rule, are rewarded with Iraq's riches at the expense of her people. Hussein is not only guilty of some of the most heinous crimes against humanity, but he rules Iraq like a gangster by modeling his authority on the oppressive tyranny of Joseph Stalin and frequently and personally executes any who oppose his rule or stand in his way. We cannot continue to allow Hussein to cow the Iraqi people into living under an umbrella of terror. Hussein's sinister methodology of terror, assassination, and execution against all who oppose him must end. We must support a regime change.

Our third objective should include a plan to root out all elements of terror within Iraq and bring accountability to the war on terror within the borders of Iraq. Hussein's government has proven uncooperative and refuses to help in the identification and apprehension of those in terror networks. The Hussein regime is unable to control areas within Northern Iraq giving terrorist organizations like al-Qaeda free rein to operate within Iraq's borders. This stands in stark contrast to the other nations in the region who are working with the United States to eradicate terrorist networks.

Finally, the United States and the International Community must create a plan to rebuild Iraq and to restore a government that represents the interests of Iraqis and is dedicated to reconstructing an economy decimated by tyranny. New leadership will give the people of Iraq an opportunity to become a responsible member of the international community.

Mr. Speaker, President Bush has requested the Congress pass a resolution authorizing the use of military force to enforce the United Nations' Security Council Resolutions which Iraq continues to defy. We must defend the national security interests of the United States. We must eliminate the threat posed by Iraqi terror and we must work to restore international peace and security to Iraq.

Mr. Speaker, I urge my colleagues to join me in support of House Joint Resolution 114.

Mr. ISSA. Mr. Speaker, I reserve the balance of my time.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. JACKSON), a real spokesperson for justice in this country and a member of the Committee on Appropriations.

Mr. JACKSON of Illinois. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in opposition to this resolution. On September 11, 2001,

our Nation changed. We were traumatized when al Qaeda terrorists attacked our Nation, killed nearly 3,000 Americans, wounded many others physically, emotionally, and spiritually; destroyed families and buildings and disrupted our economy. The President, the Congress, and the American people responded quickly, appropriately and with courage. All Americans support the war on terrorism, and they want homeland security.

However, terrorism not only changed our psyche; it changed our politics. Our politics shifted from hope to fear, and fear now clouds our thinking. September 11 and Iraq are two distinct issues. Nevertheless, President Bush is trying to take our legitimate fear following 9-11 and illegitimately link it to Iraq. The White House and some in this body have sought to link al Qaeda and September 11 to Iraq. That alleged link underscores the President's position that the Iraqi threat is imminent. However, congressional Permanent Select Committee on Intelligence members have said President Bush has presented no factual evidence proving that link. Even the President separates 9-11 from an imminent Iraqi threat, and here is the proof. President Bush sees 9-11 and Iraq as separate because just 2 weeks ago on September 24, he lowered the domestic risk of terrorist attacks from orange to yellow. He lowered it. If the Iraqi threat were imminent, would not the risk of terrorist attacks have at least remained the same, at orange, or even elevated and raised to red, a severe risk of terrorist attacks? But the President lowered it from orange to yellow.

Yes, Iraq's threat is real; and in light of 9-11, it is normal for Americans to be afraid, but the Iraqi threat is not imminent. We should not let it affect our politics over the next 3 weeks. We should not vote on the basis of fear of an imminent threat from Saddam Hussein. We must vote our hopes and not our fears. So far this debate has been about military sticks, whether, when or under what circumstances to use them. But why not try carrots too? Most Americans do not know that the United States would not lift economic sanctions on Iraq even if Saddam agreed to and fully implemented all U.N. resolutions.

In 1997 Secretary Albright said the U.S. would only lift sanctions when Saddam Hussein was gone, not when Iraq lived up to U.N. resolutions. President Clinton stated sanctions will be there until the end of time or as long as Hussein lasts. But economic sanctions are only hurting the people, making life miserable for the average Iraqi, causing an estimated 500,000 deaths, mainly women and children. The economic sanctions are not hurting Saddam Hussein. If they were, he would not be the threat that the President says he is. Insisting on a regime change before lifting economic sanctions goes beyond the legal mandate of U.N. policy and is not authorized by any U.N.

resolution. We need to lure Iraqi compliance with a meaningful economic inducement, not merely threaten them with military force. Why does the United States not offer to lift economic sanctions in an orderly and progressive way in exchange for unfettered and comprehensive inspections? Without the carrot of lifting economic sanctions in exchange for removing weapons of mass destruction, the Iraqi government has no incentive to cooperate. Offering to lift economic sanctions in exchange for unfettered inspections will gain the support within Iraq and among our allies.

Before there is any authorization for the use of armed force against Iraq, we must make sure that all peaceful means containing and eliminating Iraq's weapons of mass destruction have been exhausted, including offering positive incentives, and the U.S. should lead this initiative. This positive incentive to get Saddam Hussein to comply has not and is not currently in play. But until we make this overture and change the policy of only lifting economic sanctions after a regime change, we will not have exhausted all peaceful alternatives to force.

We are a Nation united by our Constitution and committed to the rule of law. That commitment is now challenged by an outlaw. We must bring this outlaw to justice but not become outlaws ourselves. And while our attention is focused on a military threat overseas, we are drowning at home economically. I believe we can creatively insist on a peaceful resolution to eliminate Saddam's weapons of mass destruction without an invasion and the actual use of force. Our military might is unquestioned. Our wisdom, our compassion, our commitment to a non-violent means of resolving conflict is not. By that and that alone will move us toward a genuine peace, justice and security for all.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from New York (Mr. NADLER), member of the Committee on the Judiciary.

Mr. NADLER. Mr. Speaker, I thank the gentleman for the time. Mr. Speaker, I rise in opposition to this resolution. I take the threat of nuclear weapons in the hands of a hostile and aggressive Iraq very seriously. On September 11 when my district was attacked, I thanked God the terrorists did not have nuclear weapons. We all want to protect this Nation. The question before us today is not whether to protect America, but how best to do so.

Saddam Hussein unquestionably poses a real danger. He has consistently shown a virulent hostility to the United States and to Israel, a willingness to invade other countries without provocation, a willingness to use chemical and biological weapons against civilian populations, a relentless drive to obtain weapons of mass destruction including nuclear weapons and the means to deliver them, and a reckless aggressiveness.

□ 2315

The conclusion is inescapable that the acquisition of nuclear weapons by Iraq would pose an intolerable threat to the United States and to world peace. That threat must be met, if at all possible, through the United Nations and in accordance with international law, but war must be the last resort, not the first option.

The resolution before us is not a compromise. It is in all important respects still very much the original draft: a blank check, like the Gulf of Tonkin resolution. We must not grant the President a blank check.

Make no mistake, this resolution grants the President the power to go to war entirely at his discretion. While the resolution pays lip service to the need for international cooperation, it does not require the President to seek it. While the resolution mentions a desire to work through the United Nations, it does not require the President to exhaust our options at the U.N. before starting a war.

The resolution requires the President to inform Congress that efforts in the U.N. and the international community have failed, but he need not do so until after he starts a war. We must grant the President the power to take prudent action to meet the threat from Iraq but only action that does not itself threaten international peace and security.

The United States should seek a U.N. resolution providing for the immediate return to Iraq of beefed-up arms inspection teams and demanding that they be afforded unfettered and unconditional access to all sites they deem necessary to accomplish their task of locating and destroying all chemical, biological, and nuclear weapons and their production facilities.

The U.N. resolution should authorize the use of military force to the extent necessary to overcome any Iraqi attempts to interfere with the inspection teams, and Congress should authorize the President to use such military force only to enable the inspection teams to do their jobs.

We might this way be able to eliminate the threat of Iraq's chemical, biological, and nuclear weapons without military conflict. But if military conflict occurred, we would be better off as part of a multilateral effort enforcing a Security Council inspection and disarmament order, with the onus on Saddam Hussein for starting the conflict, than we would as the Lone Ranger invading Iraq on our own, with most of the world looking on in disapproval.

Let me remind my colleagues: Before they were ejected from Iraq, U.N. inspectors destroyed more weapons and more weapons facilities than did the coalition forces during the Gulf War. This proven, successful course of action should be fully utilized before we risk regional conflagration.

I believe the Security Council would adopt a resolution embodying such a specific limited approach, and that,

working through the U.N. and with other nations, the U.S. could participate in successfully implementing it.

Finally, Mr. Speaker, the President insists that, in addition to disarming Saddam, we must overthrow his regime. Demanding regime change is extremely dangerous. It is one thing to tell Saddam he must disarm. It is quite another to demand the end of his regime.

Faced with such a threat, which in practical terms means his death, there would be nothing to deter Saddam Hussein from deciding, like Samson in the Philistine temple, that he might as well pull the world down with him. Why should he not go down in history as an Arab hero by attacking Israel with chemical or biological weapons of perhaps devastating lethality? Israel might then feel compelled to retaliate, and no one could calculate the course of escalation from there.

But Members do not need to take my evaluation of this threat. Just yesterday, the director of the CIA, George Tenet, told the other body that "Baghdad, for now, appears to be drawing a line short of conducting terrorist attacks with conventional or chemical or biological weapons." But, he continued, if Saddam concluded the survival of his regime was threatened, "he probably would become much less constrained in adopting terrorist action."

Mr. Speaker, we must constrain the administration from pursuing this perilous course. The substitute resolution offered by the gentleman from South Carolina (Mr. SPRATT) grants the President the authority to use military force as part of a multilateral effort to divest Saddam of his weapons of mass destruction.

That is as far as we should go. We must draw this line, Mr. Speaker, not because we are unconcerned with our country's security, but precisely because we care so very, very much for it.

CONFERENCE REPORT ON H.R. 5010, DEPARTMENT OF DEFENSE AP- PROPRIATIONS ACT, 2003

Mr. LEWIS of California, submitted the following conference report and statement on the bill (H.R. 5010) making appropriations for the Department of Defense for the fiscal year ending September 30, 2003, and for other purposes:

CONFERENCE REPORT (H.R. 107-732)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5010) "making appropriations for the Department of Defense for the fiscal year ending September 30, 2003, and for other purposes", having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert:

That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending September 30, 2003, for military functions administered by the Department of Defense, and for other purposes, namely:

TITLE I

MILITARY PERSONNEL

MILITARY PERSONNEL, ARMY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Army on active duty (except members of reserve components provided for elsewhere), cadets, and aviation cadets; and for payments pursuant to section 156 of Public Law 97-377, as amended (42 U.S.C. 402 note), and to the Department of Defense Military Retirement Fund, \$26,855,017,000.

MILITARY PERSONNEL, NAVY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Navy on active duty (except members of the Reserve provided for elsewhere), midshipmen, and aviation cadets; and for payments pursuant to section 156 of Public Law 97-377, as amended (42 U.S.C. 402 note), and to the Department of Defense Military Retirement Fund, \$21,927,628,000.

MILITARY PERSONNEL, MARINE CORPS

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Marine Corps on active duty (except members of the Reserve provided for elsewhere); and for payments pursuant to section 156 of Public Law 97-377, as amended (42 U.S.C. 402 note), and to the Department of Defense Military Retirement Fund, \$8,501,087,000.

MILITARY PERSONNEL, AIR FORCE

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Air Force on active duty (except members of reserve components provided for elsewhere), cadets, and aviation cadets; and for payments pursuant to section 156 of Public Law 97-377, as amended (42 U.S.C. 402 note), and to the Department of Defense Military Retirement Fund, \$21,981,277,000.

RESERVE PERSONNEL, ARMY

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Army Reserve on active duty under sections 10211, 10302, and 3038 of title 10, United States Code, or while serving on active duty under section 12301(d) of title 10, United States Code, in connection with performing duty specified in section 12310(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty or other duty, and for members of the Reserve Officers' Training Corps, and expenses authorized by section 16131 of title 10, United States Code; and for payments to the Department of Defense Military Retirement Fund, \$3,374,355,000.

RESERVE PERSONNEL, NAVY

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Navy Reserve on active duty under section 10211 of title 10, United States Code, or while serving on active duty under section 12301(d) of title 10, United States Code, in con-

nection with performing duty specified in section 12310(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty, and for members of the Reserve Officers' Training Corps, and expenses authorized by section 16131 of title 10, United States Code; and for payments to the Department of Defense Military Retirement Fund, \$1,907,552,000.

RESERVE PERSONNEL, MARINE CORPS

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Marine Corps Reserve on active duty under section 10211 of title 10, United States Code, or while serving on active duty under section 12301(d) of title 10, United States Code, in connection with performing duty specified in section 12310(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty, and for members of the Marine Corps platoon leaders class, and expenses authorized by section 16131 of title 10, United States Code; and for payments to the Department of Defense Military Retirement Fund, \$553,983,000.

RESERVE PERSONNEL, AIR FORCE

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Air Force Reserve on active duty under sections 10211, 10305, and 8038 of title 10, United States Code, or while serving on active duty under section 12301(d) of title 10, United States Code, in connection with performing duty specified in section 12310(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty or other duty, and for members of the Air Reserve Officers' Training Corps, and expenses authorized by section 16131 of title 10, United States Code; and for payments to the Department of Defense Military Retirement Fund, \$1,236,904,000.

NATIONAL GUARD PERSONNEL, ARMY

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Army National Guard while on duty under section 10211, 10302, or 12402 of title 10 or section 708 of title 32, United States Code, or while serving on duty under section 12301(d) of title 10 or section 502(f) of title 32, United States Code, in connection with performing duty specified in section 12310(a) of title 10, United States Code, or while undergoing training, or while performing drills or equivalent duty or other duty, and expenses authorized by section 16131 of title 10, United States Code; and for payments to the Department of Defense Military Retirement Fund, \$5,114,588,000.

NATIONAL GUARD PERSONNEL, AIR FORCE

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Air National Guard on duty under section 10211, 10305, or 12402 of title 10 or section 708 of title 32, United States Code, or while serving on duty under section 12301(d) of title 10 or section 502(f) of title 32, United States Code, in connection with performing duty specified in section 12310(a) of title 10, United States Code, or while undergoing training, or while performing drills or equivalent duty or other duty, and expenses authorized by section 16131 of title 10, United States Code; and for payments to the Department of Defense Military Retirement Fund, \$2,125,161,000.

TITLE II

OPERATION AND MAINTENANCE

OPERATION AND MAINTENANCE, ARMY

(INCLUDING TRANSFER OF FUNDS)

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Army, as authorized by law; and not to exceed \$10,818,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Army, and payments may be made on his certi-

ficate of necessity for confidential military purposes, \$23,992,082,000: Provided, That of the funds appropriated in this paragraph, not less than \$355,000,000 shall be made available only for conventional ammunition care and maintenance: Provided further, That of the funds made available under this heading, \$2,500,000 shall be available for Fort Baker, in accordance with the terms and conditions as provided under the heading "Operation and Maintenance, Army", in Public Law 107-117.

OPERATION AND MAINTENANCE, NAVY

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Navy and the Marine Corps, as authorized by law; and not to exceed \$4,415,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Navy, and payments may be made on his certificate of necessity for confidential military purposes, \$29,331,526,000.

OPERATION AND MAINTENANCE, MARINE CORPS

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Marine Corps, as authorized by law, \$3,585,759,000.

OPERATION AND MAINTENANCE, AIR FORCE

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Air Force, as authorized by law; and not to exceed \$7,902,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Air Force, and payments may be made on his certificate of necessity for confidential military purposes, \$27,339,533,000: Provided, That notwithstanding any other provision of law, that of the funds available under this heading, \$750,000 shall only be available to the Secretary of the Air Force for a grant to Florida Memorial College for the purpose of funding minority aviation training: Provided further, That of the amount provided under this heading, \$2,000,000 may be obligated for the deployment of Air Force active and Reserve aircrews that perform combat search and rescue operations to operate and evaluate the United Kingdom's Royal Air Force EH-101 helicopter, to receive training using that helicopter, and to exchange operational techniques and procedures regarding that helicopter.

OPERATION AND MAINTENANCE, DEFENSE-WIDE

(INCLUDING TRANSFER OF FUNDS)

For expenses, not otherwise provided for, necessary for the operation and maintenance of activities and agencies of the Department of Defense (other than the military departments), as authorized by law, \$14,773,506,000, of which not to exceed \$25,000,000 may be available for the CINC initiative fund account; and of which not to exceed \$34,500,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of Defense, and payments may be made on his certificate of necessity for confidential military purposes: Provided, That notwithstanding any other provision of law, of the funds provided in this Act for Civil Military programs under this heading, \$750,000 shall be available for a grant for Outdoor Odyssey, Roaring Run, Pennsylvania, to support the Youth Development and Leadership program and Department of Defense STARBAS program: Provided further, That none of the funds appropriated or otherwise made available by this Act may be used to plan or implement the consolidation of a budget or appropriations liaison office of the Office of the Secretary of Defense, the office of the Secretary of a military department, or the service headquarters of one of the Armed Forces into a legislative affairs or legislative liaison office: Provided further, That \$4,675,000, to remain available until expended, is available only for expenses relating to certain classified activities,

and may be transferred as necessary by the Secretary to operation and maintenance appropriations or research, development, test and evaluation appropriations, to be merged with and to be available for the same time period as the appropriations to which transferred: Provided further, That any ceiling on the investment item unit cost of items that may be purchased with operation and maintenance funds shall not apply to the funds described in the preceding proviso: Provided further, That the transfer authority provided under this heading is in addition to any other transfer authority provided elsewhere in this Act.

OPERATION AND MAINTENANCE, ARMY RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Army Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications, \$1,970,180,000.

OPERATION AND MAINTENANCE, NAVY RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Navy Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications, \$1,236,809,000.

OPERATION AND MAINTENANCE, MARINE CORPS RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Marine Corps Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications, \$187,532,000.

OPERATION AND MAINTENANCE, AIR FORCE RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Air Force Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications, \$2,163,104,000.

OPERATION AND MAINTENANCE, ARMY NATIONAL GUARD

For expenses of training, organizing, and administering the Army National Guard, including medical and hospital treatment and related expenses in non-Federal hospitals; maintenance, operation, and repairs to structures and facilities; hire of passenger motor vehicles; personnel services in the National Guard Bureau; travel expenses (other than mileage), as authorized by law for Army personnel on active duty, for Army National Guard division, regimental, and battalion commanders while inspecting units in compliance with National Guard Bureau regulations when specifically authorized by the Chief, National Guard Bureau; supplying and equipping the Army National Guard as authorized by law; and expenses of repair, modification, maintenance, and issue of supplies and equipment (including aircraft), \$4,261,707,000.

OPERATION AND MAINTENANCE, AIR NATIONAL GUARD

For operation and maintenance of the Air National Guard, including medical and hospital treatment and related expenses in non-Federal hospitals; maintenance, operation, repair, and other necessary expenses of facilities for the training and administration of the Air National Guard, including repair of facilities, maintenance, operation, and modification of aircraft; transportation of things, hire of passenger motor vehicles; supplies, materials, and equip-

ment, as authorized by law for the Air National Guard; and expenses incident to the maintenance and use of supplies, materials, and equipment, including such as may be furnished from stocks under the control of agencies of the Department of Defense; travel expenses (other than mileage) on the same basis as authorized by law for Air National Guard personnel on active Federal duty, for Air National Guard commanders while inspecting units in compliance with National Guard Bureau regulations when specifically authorized by the Chief, National Guard Bureau, \$4,117,585,000.

OVERSEAS CONTINGENCY OPERATIONS TRANSFER ACCOUNT

(INCLUDING TRANSFER OF FUNDS)

For expenses directly relating to Overseas Contingency Operations by United States military forces, \$5,000,000, to remain available until expended: Provided, That the Secretary of Defense may transfer these funds only to military personnel accounts; operation and maintenance accounts within this title; the Defense Health Program appropriation; procurement accounts; research, development, test and evaluation accounts; and to working capital funds: Provided further, That the funds transferred shall be merged with and shall be available for the same purposes and for the same time period, as the appropriation to which transferred: Provided further, That upon a determination that all or part of the funds transferred from this appropriation are not necessary for the purposes provided herein, such amounts may be transferred back to this appropriation: Provided further, That the transfer authority provided in this paragraph is in addition to any other transfer authority contained elsewhere in this Act.

UNITED STATES COURT OF APPEALS FOR THE ARMED FORCES

For salaries and expenses necessary for the United States Court of Appeals for the Armed Forces, \$9,614,000, of which not to exceed \$2,500 can be used for official representation purposes.

ENVIRONMENTAL RESTORATION, ARMY

(INCLUDING TRANSFER OF FUNDS)

For the Department of the Army, \$395,900,000, to remain available until transferred: Provided, That the Secretary of the Army shall, upon determining that such funds are required for environmental restoration, reduction and recycling of hazardous waste, removal of unsafe buildings and debris of the Department of the Army, or for similar purposes, transfer the funds made available by this appropriation to other appropriations made available to the Department of the Army, to be merged with and to be available for the same purposes and for the same time period as the appropriations to which transferred: Provided further, That upon a determination that all or part of the funds transferred from this appropriation are not necessary for the purposes provided herein, such amounts may be transferred back to this appropriation.

ENVIRONMENTAL RESTORATION, NAVY

(INCLUDING TRANSFER OF FUNDS)

For the Department of the Navy, \$256,948,000, to remain available until transferred: Provided, That the Secretary of the Navy shall, upon determining that such funds are required for environmental restoration, reduction and recycling of hazardous waste, removal of unsafe buildings and debris of the Department of the Navy, or for similar purposes, transfer the funds made available by this appropriation to other appropriations made available to the Department of the Navy, to be merged with and to be available for the same purposes and for the same time period as the appropriations to which transferred: Provided further, That upon a determination that all or part of the funds transferred from this appropriation are not necessary for the purposes provided herein, such amounts may be transferred back to this appropriation.

ENVIRONMENTAL RESTORATION, AIR FORCE

(INCLUDING TRANSFER OF FUNDS)

For the Department of the Air Force, \$389,773,000, to remain available until transferred: Provided, That the Secretary of the Air Force shall, upon determining that such funds are required for environmental restoration, reduction and recycling of hazardous waste, removal of unsafe buildings and debris of the Department of the Air Force, or for similar purposes, transfer the funds made available by this appropriation to other appropriations made available to the Department of the Air Force, to be merged with and to be available for the same purposes and for the same time period as the appropriations to which transferred: Provided further, That upon a determination that all or part of the funds transferred from this appropriation are not necessary for the purposes provided herein, such amounts may be transferred back to this appropriation.

ENVIRONMENTAL RESTORATION, DEFENSE-WIDE

(INCLUDING TRANSFER OF FUNDS)

For the Department of Defense, \$23,498,000, to remain available until transferred: Provided, That the Secretary of Defense shall, upon determining that such funds are required for environmental restoration, reduction and recycling of hazardous waste, removal of unsafe buildings and debris of the Department of Defense, or for similar purposes, transfer the funds made available by this appropriation to other appropriations made available to the Department of Defense, to be merged with and to be available for the same purposes and for the same time period as the appropriations to which transferred: Provided further, That upon a determination that all or part of the funds transferred from this appropriation are not necessary for the purposes provided herein, such amounts may be transferred back to this appropriation.

ENVIRONMENTAL RESTORATION, FORMERLY USED DEFENSE SITES

(INCLUDING TRANSFER OF FUNDS)

For the Department of the Army, \$246,102,000, to remain available until transferred: Provided, That the Secretary of the Army shall, upon determining that such funds are required for environmental restoration, reduction and recycling of hazardous waste, removal of unsafe buildings and debris at sites formerly used by the Department of Defense, transfer the funds made available by this appropriation to other appropriations made available to the Department of the Army, to be merged with and to be available for the same purposes and for the same time period as the appropriations to which transferred: Provided further, That upon a determination that all or part of the funds transferred from this appropriation are not necessary for the purposes provided herein, such amounts may be transferred back to this appropriation.

OVERSEAS HUMANITARIAN, DISASTER, AND CIVIC AID

For expenses relating to the Overseas Humanitarian, Disaster, and Civic Aid programs of the Department of Defense (consisting of the programs provided under sections 401, 402, 404, 2547, and 2551 of title 10, United States Code), \$58,400,000, to remain available until September 30, 2004.

FORMER SOVIET UNION THREAT REDUCTION

For assistance to the republics of the former Soviet Union, including assistance provided by contract or by grants, for facilitating the elimination and the safe and secure transportation and storage of nuclear, chemical and other weapons; for establishing programs to prevent the proliferation of weapons, weapons components, and weapon-related technology and expertise; for programs relating to the training and support of defense and military personnel for demilitarization and protection of weapons, weapons components and weapons technology

and expertise, and for defense and military contacts, \$416,700,000, to remain available until September 30, 2005: Provided, That of the amounts provided under this heading, \$10,000,000 shall be available only to support the dismantling and disposal of nuclear submarines and submarine reactor components in the Russian Far East.

SUPPORT FOR INTERNATIONAL SPORTING COMPETITIONS, DEFENSE

For logistical and security support for international sporting competitions (including pay and non-travel related allowances only for members of the Reserve Components of the Armed Forces of the United States called or ordered to active duty in connection with providing such support), \$19,000,000, to remain available until expended.

TITLE III PROCUREMENT

AIRCRAFT PROCUREMENT, ARMY

For construction, procurement, production, modification, and modernization of aircraft, equipment, including ordnance, ground handling equipment, spare parts, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes, \$2,285,574,000, to remain available for obligation until September 30, 2005: Provided, That of the funds made available under this heading, \$39,100,000 shall be available only to support a restructured CH-47F helicopter upgrade program for the full fleet to facilitate increases in the planned production rate to an economically optimal rate by fiscal year 2005: Provided further, That funds in the immediately preceding proviso shall not be made available until the Secretary of the Army has certified to the congressional defense committees that the Army intends to budget for the upgrade of the entire CH-47 fleet required for the Objective Force at economically optimal production rates in order to complete this program within ten years after it is initiated.

MISSILE PROCUREMENT, ARMY

For construction, procurement, production, modification, and modernization of missiles, equipment, including ordnance, ground handling equipment, spare parts, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes, \$1,096,548,000, to remain available for obligation until September 30, 2005.

PROCUREMENT OF WEAPONS AND TRACKED COMBAT VEHICLES, ARMY

For construction, procurement, production, and modification of weapons and tracked combat vehicles, equipment, including ordnance, spare parts, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned

equipment layaway; and other expenses necessary for the foregoing purposes, \$2,266,508,000, to remain available for obligation until September 30, 2005.

PROCUREMENT OF AMMUNITION, ARMY

For construction, procurement, production, and modification of ammunition, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including ammunition facilities authorized by section 2854 of title 10, United States Code, and the land necessary therefor, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes, \$1,253,099,000, to remain available for obligation until September 30, 2005.

OTHER PROCUREMENT, ARMY

For construction, procurement, production, and modification of vehicles, including tactical, support, and non-tracked combat vehicles; the purchase of passenger motor vehicles for replacement only; and the purchase of 6 vehicles required for physical security of personnel, notwithstanding price limitations applicable to passenger vehicles but not to exceed \$180,000 per vehicle; communications and electronic equipment; other support equipment; spare parts, ordnance, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes, \$5,874,674,000, to remain available for obligation until September 30, 2005.

AIRCRAFT PROCUREMENT, NAVY

For construction, procurement, production, modification, and modernization of aircraft, equipment, including ordnance, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, including the land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway, \$8,812,855,000, to remain available for obligation until September 30, 2005.

WEAPONS PROCUREMENT, NAVY

For construction, procurement, production, modification, and modernization of missiles, torpedoes, other weapons, and related support equipment including spare parts, and accessories therefor; expansion of public and private plants, including the land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway, \$1,868,517,000, to remain available for obligation until September 30, 2005.

PROCUREMENT OF AMMUNITION, NAVY AND MARINE CORPS

For construction, procurement, production, and modification of ammunition, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including ammunition facilities authorized by section 2854 of title 10, United States Code, and the land necessary therefor, for the

foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes, \$1,165,730,000, to remain available for obligation until September 30, 2005.

SHIPBUILDING AND CONVERSION, NAVY

For expenses necessary for the construction, acquisition, or conversion of vessels as authorized by law, including armor and armament thereof, plant equipment, appliances, and machine tools and installation thereof in public and private plants; reserve plant and Government and contractor-owned equipment layaway; procurement of critical, long leadtime components and designs for vessels to be constructed or converted in the future; and expansion of public and private plants, including land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title, as follows:

Carrier Replacement Program, \$90,000,000;
Carrier Replacement Program (AP), \$403,703,000;
NSSN, \$1,499,152,000;
NSSN (AP), \$645,209,000;
SSGN, \$404,305,000;
SSGN (AP), \$421,000,000;
CVN Refuelings (AP), \$221,781,000;
Submarine Refuelings, \$435,792,000;
Submarine Refuelings (AP), \$64,000,000;
DDG-51 Destroyer, \$2,321,502,000;
LPD-17, \$596,492,000;
LHD-8, \$243,000,000;
LCAC Landing Craft Air Cushion, \$89,638,000;
Mine Hunter SWATH, \$7,000,000;
Prior year shipbuilding costs, \$1,279,899,000;
Service Craft, \$9,756,000; and
For outfitting, post delivery, conversions, and first destination transportation, \$300,608,000;

In all: \$9,032,837,000, to remain available for obligation until September 30, 2007: Provided, That additional obligations may be incurred after September 30, 2007, for engineering services, tests, evaluations, and other such budgeted work that must be performed in the final stage of ship construction: Provided further, That none of the funds provided under this heading for the construction or conversion of any naval vessel to be constructed in shipyards in the United States shall be expended in foreign facilities for the construction of major components of such vessel: Provided further, That none of the funds provided under this heading shall be used for the construction of any naval vessel in foreign shipyards.

OTHER PROCUREMENT, NAVY

For procurement, production, and modernization of support equipment and materials not otherwise provided for, Navy ordnance (except ordnance for new aircraft, new ships, and ships authorized for conversion); the purchase of passenger motor vehicles for replacement only, and the purchase of 3 vehicles required for physical security of personnel, notwithstanding price limitations applicable to passenger vehicles but not to exceed \$240,000 per unit for one unit and not to exceed \$125,000 per unit for the remaining two units; expansion of public and private plants, including the land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway, \$4,612,910,000, to remain available for obligation until September 30, 2005.

PROCUREMENT, MARINE CORPS

For expenses necessary for the procurement, manufacture, and modification of missiles, armament, military equipment, spare parts, and

accessories therefor; plant equipment, appliances, and machine tools, and installation thereof in public and private plants; reserve plant and Government and contractor-owned equipment layaway; vehicles for the Marine Corps, including the purchase of passenger motor vehicles for replacement only; and expansion of public and private plants, including land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title, \$1,388,583,000, to remain available for obligation until September 30, 2005.

AIRCRAFT PROCUREMENT, AIR FORCE

For construction, procurement, lease, and modification of aircraft and equipment, including armor and armament, specialized ground handling equipment, and training devices, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes including rents and transportation of things, \$13,137,255,000, to remain available for obligation until September 30, 2005: Provided, That amounts provided under this heading shall be used for the advance procurement of 15 C-17 aircraft.

MISSILE PROCUREMENT, AIR FORCE

For construction, procurement, and modification of missiles, spacecraft, rockets, and related equipment, including spare parts and accessories therefor, ground handling equipment, and training devices; expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes including rents and transportation of things, \$3,174,739,000, to remain available for obligation until September 30, 2005.

PROCUREMENT OF AMMUNITION, AIR FORCE

For construction, procurement, production, and modification of ammunition, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including ammunition facilities authorized by section 2854 of title 10, United States Code, and the land necessary therefor, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes, \$1,288,164,000, to remain available for obligation until September 30, 2005.

OTHER PROCUREMENT, AIR FORCE

For procurement and modification of equipment (including ground guidance and electronic control equipment, and ground electronic and communication equipment), and supplies, materials, and spare parts therefor, not otherwise provided for; the purchase of passenger motor vehicles for replacement only, and the purchase of 2 vehicles required for physical security of personnel, notwithstanding price limitations applicable to passenger vehicles but not to exceed \$232,000 per vehicle; lease of passenger motor vehicles; and expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of

structures, and acquisition of land, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon, prior to approval of title; reserve plant and Government and contractor-owned equipment layaway, \$10,672,712,000, to remain available for obligation until September 30, 2005.

PROCUREMENT, DEFENSE-WIDE

For expenses of activities and agencies of the Department of Defense (other than the military departments) necessary for procurement, production, and modification of equipment, supplies, materials, and spare parts therefor, not otherwise provided for; the purchase of passenger motor vehicles for replacement only; the purchase of 4 vehicles required for physical security of personnel, notwithstanding price limitations applicable to passenger vehicles but not to exceed \$250,000 per vehicle; expansion of public and private plants, equipment, and installation thereof in such plants, erection of structures, and acquisition of land for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; reserve plant and Government and contractor-owned equipment layaway, \$3,444,455,000, to remain available for obligation until September 30, 2005.

NATIONAL GUARD AND RESERVE EQUIPMENT

For procurement of aircraft, missiles, tracked combat vehicles, ammunition, other weapons, and other procurement for the reserve components of the Armed Forces, \$100,000,000, to remain available for obligation until September 30, 2005: Provided, That the Chiefs of the Reserve and National Guard components shall, not later than 30 days after the enactment of this Act, individually submit to the congressional defense committees the modernization priority assessment for their respective Reserve or National Guard component.

DEFENSE PRODUCTION ACT PURCHASES

For activities by the Department of Defense pursuant to sections 108, 301, 302, and 303 of the Defense Production Act of 1950 (50 U.S.C. App. 2078, 2091, 2092, and 2093), \$73,057,000, to remain available until expended, of which, \$5,000,000 may be used for a Processable Rigid-Rod Polymeric Material Supplier Initiative under title III of the Defense Production Act of 1950 (50 U.S.C. App. 2091 et seq.) to develop affordable production methods and a domestic supplier for military and commercial processable rigid-rod polymeric materials.

TITLE IV

RESEARCH, DEVELOPMENT, TEST AND EVALUATION

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, ARMY

For expenses necessary for basic and applied scientific research, development, test and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, \$7,669,656,000, to remain available for obligation until September 30, 2004.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, NAVY

For expenses necessary for basic and applied scientific research, development, test and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, \$13,946,085,000, to remain available for obligation until September 30, 2004: Provided, That funds appropriated in this paragraph which are available for the V-22 may be used to meet unique operational requirements of the Special Operations Forces.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, AIR FORCE

For expenses necessary for basic and applied scientific research, development, test and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment,

\$18,822,569,000, to remain available for obligation until September 30, 2004.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, DEFENSE-WIDE

For expenses of activities and agencies of the Department of Defense (other than the military departments), necessary for basic and applied scientific research, development, test and evaluation; advanced research projects as may be designated and determined by the Secretary of Defense, pursuant to law; maintenance, rehabilitation, lease, and operation of facilities and equipment, \$17,924,642,000, to remain available for obligation until September 30, 2004.

OPERATIONAL TEST AND EVALUATION, DEFENSE

For expenses, not otherwise provided for, necessary for the independent activities of the Director, Operational Test and Evaluation, in the direction and supervision of operational test and evaluation, including initial operational test and evaluation which is conducted prior to, and in support of, production decisions; joint operational testing and evaluation; and administrative expenses in connection therewith, \$245,554,000, to remain available for obligation until September 30, 2004.

TITLE V

REVOLVING AND MANAGEMENT FUNDS DEFENSE WORKING CAPITAL FUNDS

For the Defense Working Capital Funds, \$1,784,956,000: Provided, That during fiscal year 2003, funds in the Defense Working Capital Funds may be used for the purchase of not to exceed 315 passenger carrying motor vehicles for replacement only for the Defense Security Service, and the purchase of not to exceed 7 vehicles for replacement only for the Defense Logistics Agency.

NATIONAL DEFENSE SEALIFT FUND

For National Defense Sealift Fund programs, projects, and activities, and for expenses of the National Defense Reserve Fleet, as established by section 11 of the Merchant Ship Sales Act of 1946 (50 U.S.C. App. 1744), and for the necessary expenses to maintain and preserve a U.S.-flag merchant fleet to serve the national security needs of the United States, \$942,629,000, to remain available until expended: Provided, That none of the funds provided in this paragraph shall be used to award a new contract that provides for the acquisition of any of the following major components unless such components are manufactured in the United States: auxiliary equipment, including pumps, for all shipboard services; propulsion system components (that is; engines, reduction gears, and propellers); shipboard cranes; and spreaders for shipboard cranes: Provided further, That the exercise of an option in a contract awarded through the obligation of previously appropriated funds shall not be considered to be the award of a new contract: Provided further, That the Secretary of the military department responsible for such procurement may waive the restrictions in the first proviso on a case-by-case basis by certifying in writing to the Committees on Appropriations of the House of Representatives and the Senate that adequate domestic supplies are not available to meet Department of Defense requirements on a timely basis and that such an acquisition must be made in order to acquire capability for national security purposes: Provided further, That, notwithstanding any other provision of law, \$8,500,000 of the funds available under this heading shall be available in addition to other amounts otherwise available, only to finance the cost of constructing additional sealift capacity.

TITLE VI

OTHER DEPARTMENT OF DEFENSE PROGRAMS

DEFENSE HEALTH PROGRAM

For expenses, not otherwise provided for, for medical and health care programs of the Department of Defense, as authorized by law,

\$14,843,542,000, of which \$14,100,386,000 shall be for Operation and maintenance, of which not to exceed 2 percent shall remain available until September 30, 2004; of which \$284,242,000, to remain available for obligation until September 30, 2005, shall be for Procurement; of which \$458,914,000, to remain available for obligation until September 30, 2004, shall be for Research, development, test and evaluation, and of which not less than \$7,000,000 shall be available for HIV prevention educational activities undertaken in connection with U.S. military training, exercises, and humanitarian assistance activities conducted primarily in African nations.

CHEMICAL AGENTS AND MUNITIONS DESTRUCTION, ARMY

For expenses, not otherwise provided for, necessary for the destruction of the United States stockpile of lethal chemical agents and munitions in accordance with the provisions of section 1412 of the Department of Defense Authorization Act, 1986 (50 U.S.C. 1521), and for the destruction of other chemical warfare materials that are not in the chemical weapon stockpile, \$1,490,199,000, of which \$974,238,000 shall be for Operation and maintenance to remain available until September 30, 2004, \$213,278,000 shall be for Procurement to remain available until September 30, 2005, and \$302,683,000 shall be for Research, development, test and evaluation to remain available until September 30, 2004.

DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES, DEFENSE

(INCLUDING TRANSFER OF FUNDS)

For drug interdiction and counter-drug activities of the Department of Defense, for transfer to appropriations available to the Department of Defense for military personnel of the reserve components serving under the provisions of title 10 and title 32, United States Code; for Operation and maintenance; for Procurement; and for Research, development, test and evaluation, \$881,907,000: Provided, That the funds appropriated under this heading shall be available for obligation for the same time period and for the same purpose as the appropriation to which transferred: Provided further, That upon a determination that all or part of the funds transferred from this appropriation are not necessary for the purposes provided herein, such amounts may be transferred back to this appropriation: Provided further, That the transfer authority provided under this heading is in addition to any other transfer authority contained elsewhere in this Act.

OFFICE OF THE INSPECTOR GENERAL

For expenses and activities of the Office of the Inspector General in carrying out the provisions of the Inspector General Act of 1978, as amended, \$157,165,000, of which \$155,165,000 shall be for Operation and maintenance, of which not to exceed \$700,000 is available for emergencies and extraordinary expenses to be expended on the approval or authority of the Inspector General, and payments may be made on the Inspector General's certificate of necessity for confidential military purposes; and of which \$2,000,000 to remain available until September 30, 2005, shall be for Procurement.

TITLE VII RELATED AGENCIES

CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY SYSTEM FUND

For payment to the Central Intelligence Agency Retirement and Disability System Fund, to maintain the proper funding level for continuing the operation of the Central Intelligence Agency Retirement and Disability System, \$222,500,000.

INTELLIGENCE COMMUNITY MANAGEMENT ACCOUNT

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses of the Intelligence Community Management Account, \$163,479,000,

of which \$24,252,000 for the Advanced Research and Development Committee shall remain available until September 30, 2004: Provided, That of the funds appropriated under this heading, \$34,100,000 shall be transferred to the Department of Justice for the National Drug Intelligence Center to support the Department of Defense's counter-drug intelligence responsibilities, and of the said amount, \$1,500,000 for Procurement shall remain available until September 30, 2005 and \$1,000,000 for Research, development, test and evaluation shall remain available until September 30, 2004: Provided further, That the National Drug Intelligence Center shall maintain the personnel and technical resources to provide timely support to law enforcement authorities and the intelligence community by conducting document and computer exploitation of materials collected in Federal, State, and local law enforcement activity associated with counter-drug, counter-terrorism, and national security investigations and operations.

PAYMENT TO KAHŌ'OLAWA ISLAND CONVEYANCE, REMEDIAL, AND ENVIRONMENTAL RESTORATION FUND

For payment to Kaho'olawe Island Conveyance, Remediation, and Environmental Restoration Fund, as authorized by law, \$75,000,000, to remain available until expended.

NATIONAL SECURITY EDUCATION TRUST FUND

For the purposes of title VIII of Public Law 102-183, \$8,000,000, to be derived from the National Security Education Trust Fund, to remain available until expended.

TITLE VIII GENERAL PROVISIONS

SEC. 8001. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.

SEC. 8002. During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense: Provided, That salary increases granted to direct and indirect hire foreign national employees of the Department of Defense funded by this Act shall not be at a rate in excess of the percentage increase authorized by law for civilian employees of the Department of Defense whose pay is computed under the provisions of section 5332 of title 5, United States Code, or at a rate in excess of the percentage increase provided by the appropriate host nation to its own employees, whichever is higher: Provided further, That this section shall not apply to Department of Defense foreign service national employees serving at United States diplomatic missions whose pay is set by the Department of State under the Foreign Service Act of 1980: Provided further, That the limitations of this provision shall not apply to foreign national employees of the Department of Defense in the Republic of Turkey.

SEC. 8003. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year, unless expressly so provided herein.

SEC. 8004. No more than 20 percent of the appropriations in this Act which are limited for obligation during the current fiscal year shall be obligated during the last 2 months of the fiscal year: Provided, That this section shall not apply to obligations for support of active duty training of reserve components or summer camp training of the Reserve Officers' Training Corps.

(TRANSFER OF FUNDS)

SEC. 8005. Upon determination by the Secretary of Defense that such action is necessary in the national interest, he may, with the approval of the Office of Management and Budget, transfer not to exceed \$2,000,000,000 of working capital funds of the Department of Defense or funds made available in this Act to the Department of Defense for military functions (except military construction) between such appropria-

tions or funds or any subdivision thereof, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation or fund to which transferred: Provided, That such authority to transfer may not be used unless for higher priority items, based on unforeseen military requirements, than those for which originally appropriated and in no case where the item for which funds are requested has been denied by the Congress: Provided further, That the Secretary of Defense shall notify the Congress promptly of all transfers made pursuant to this authority or any other authority in this Act: Provided further, That no part of the funds in this Act shall be available to prepare or present a request to the Committees on Appropriations for reprogramming of funds, unless for higher priority items, based on unforeseen military requirements, than those for which originally appropriated and in no case where the item for which reprogramming is requested has been denied by the Congress: Provided further, That a request for multiple reprogrammings of funds using authority provided in this section must be made prior to May 31, 2003: Provided further, That section 8005 of the Department of Defense Appropriations Act, 2002 (Public Law 107-117) is amended by striking "\$2,000,000,000", and inserting "\$2,500,000,000".

(TRANSFER OF FUNDS)

SEC. 8006. During the current fiscal year, cash balances in working capital funds of the Department of Defense established pursuant to section 2208 of title 10, United States Code, may be maintained in only such amounts as are necessary at any time for cash disbursements to be made from such funds: Provided, That transfers may be made between such funds: Provided further, That transfers may be made between working capital funds and the "Foreign Currency Fluctuations, Defense" appropriation and the "Operation and Maintenance" appropriation accounts in such amounts as may be determined by the Secretary of Defense, with the approval of the Office of Management and Budget, except that such transfers may not be made unless the Secretary of Defense has notified the Congress of the proposed transfer. Except in amounts equal to the amounts appropriated to working capital funds in this Act, no obligations may be made against a working capital fund to procure or increase the value of war reserve material inventory, unless the Secretary of Defense has notified the Congress prior to any such obligation.

SEC. 8007. Funds appropriated by this Act may not be used to initiate a special access program without prior notification 30 calendar days in session in advance to the congressional defense committees.

SEC. 8008. None of the funds provided in this Act shall be available to initiate: (1) a multiyear contract that employs economic order quantity procurement in excess of \$20,000,000 in any 1 year of the contract or that includes an unfunded contingent liability in excess of \$20,000,000; or (2) a contract for advance procurement leading to a multiyear contract that employs economic order quantity procurement in excess of \$20,000,000 in any 1 year, unless the congressional defense committees have been notified at least 30 days in advance of the proposed contract award: Provided, That no part of any appropriation contained in this Act shall be available to initiate a multiyear contract for which the economic order quantity advance procurement is not funded at least to the limits of the Government's liability: Provided further, That no part of any appropriation contained in this Act shall be available to initiate multiyear procurement contracts for any systems or component thereof if the value of the multiyear contract would exceed \$500,000,000 unless specifically provided in this Act: Provided further, That no multiyear procurement contract can be terminated without 10-day prior notification to the congressional defense committees: Provided

further, That the execution of multiyear authority shall require the use of a present value analysis to determine lowest cost compared to an annual procurement.

Funds appropriated in title III of this Act may be used for multiyear procurement contracts as follows:

C-130 aircraft;
FMTV; and
F/A-18E and F engine.

SEC. 8009. Within the funds appropriated for the operation and maintenance of the Armed Forces, funds are hereby appropriated pursuant to section 401 of title 10, United States Code, for humanitarian and civic assistance costs under chapter 20 of title 10, United States Code. Such funds may also be obligated for humanitarian and civic assistance costs incidental to authorized operations and pursuant to authority granted in section 401 of chapter 20 of title 10, United States Code, and these obligations shall be reported to the Congress as of September 30 of each year: Provided, That funds available for operation and maintenance shall be available for providing humanitarian and similar assistance by using Civic Action Teams in the Trust Territories of the Pacific Islands and freely associated states of Micronesia, pursuant to the Compact of Free Association as authorized by Public Law 99-239: Provided further, That upon a determination by the Secretary of the Army that such action is beneficial for graduate medical education programs conducted at Army medical facilities located in Hawaii, the Secretary of the Army may authorize the provision of medical services at such facilities and transportation to such facilities, on a nonreimbursable basis, for civilian patients from American Samoa, the Commonwealth of the Northern Mariana Islands, the Marshall Islands, the Federated States of Micronesia, Palau, and Guam.

SEC. 8010. (a) During fiscal year 2003, the civilian personnel of the Department of Defense may not be managed on the basis of any end-strength, and the management of such personnel during that fiscal year shall not be subject to any constraint or limitation (known as an end-strength) on the number of such personnel who may be employed on the last day of such fiscal year.

(b) The fiscal year 2004 budget request for the Department of Defense as well as all justification material and other documentation supporting the fiscal year 2004 Department of Defense budget request shall be prepared and submitted to the Congress as if subsections (a) and (b) of this provision were effective with regard to fiscal year 2004.

(c) Nothing in this section shall be construed to apply to military (civilian) technicians.

SEC. 8011. Notwithstanding any other provision of law, none of the funds made available by this Act shall be used by the Department of Defense to exceed, outside the 50 United States, its territories, and the District of Columbia, 125,000 civilian workyears: Provided, That workyears shall be applied as defined in the Federal Personnel Manual: Provided further, That workyears expended in dependent student hiring programs for disadvantaged youths shall not be included in this workyear limitation.

SEC. 8012. None of the funds made available by this Act shall be used in any way, directly or indirectly, to influence congressional action on any legislation or appropriation matters pending before the Congress.

SEC. 8013. None of the funds appropriated by this Act shall be available for the basic pay and allowances of any member of the Army participating as a full-time student and receiving benefits paid by the Secretary of Veterans Affairs from the Department of Defense Education Benefits Fund when time spent as a full-time student is credited toward completion of a service commitment: Provided, That this subsection shall not apply to those members who have renelted with this option prior to October 1, 1987: Provided further, That this subsection applies only to active components of the Army.

SEC. 8014. None of the funds appropriated by this Act shall be available to convert to contractor performance an activity or function of the Department of Defense that, on or after the date of the enactment of this Act, is performed by more than 10 Department of Defense civilian employees until a most efficient and cost-effective organization analysis is completed on such activity or function and certification of the analysis is made to the Committees on Appropriations of the House of Representatives and the Senate: Provided, That this section and subsections (a), (b), and (c) of 10 U.S.C. 2461 shall not apply to a commercial or industrial type function of the Department of Defense that: (1) is included on the procurement list established pursuant to section 2 of the Act of June 25, 1938 (41 U.S.C. 47), popularly referred to as the Javits-Wagner-O'Day Act; (2) is planned to be converted to performance by a qualified nonprofit agency for the blind or by a qualified nonprofit agency for other severely handicapped individuals in accordance with that Act; or (3) is planned to be converted to performance by a qualified firm under 51 percent ownership by an Indian tribe, as defined in section 450b(e) of title 25, United States Code, or a Native Hawaiian organization, as defined in section 637(a)(15) of title 15, United States Code.

(TRANSFER OF FUNDS)

SEC. 8015. Funds appropriated in title III of this Act for the Department of Defense Pilot Mentor-Protege Program may be transferred to any other appropriation contained in this Act solely for the purpose of implementing a Mentor-Protege Program developmental assistance agreement pursuant to section 831 of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510; 10 U.S.C. 2301 note), as amended, under the authority of this provision or any other transfer authority contained in this Act.

SEC. 8016. None of the funds in this Act may be available for the purchase by the Department of Defense (and its departments and agencies) of welded shipboard anchor and mooring chain 4 inches in diameter and under unless the anchor and mooring chain are manufactured in the United States from components which are substantially manufactured in the United States: Provided, That for the purpose of this section manufactured will include cutting, heat treating, quality control, testing of chain and welding (including the forging and shot blasting process): Provided further, That for the purpose of this section substantially all of the components of anchor and mooring chain shall be considered to be produced or manufactured in the United States if the aggregate cost of the components produced or manufactured in the United States exceeds the aggregate cost of the components produced or manufactured outside the United States: Provided further, That when adequate domestic supplies are not available to meet Department of Defense requirements on a timely basis, the Secretary of the service responsible for the procurement may waive this restriction on a case-by-case basis by certifying in writing to the Committees on Appropriations that such an acquisition must be made in order to acquire capability for national security purposes.

SEC. 8017. None of the funds appropriated by this Act available for the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) or TRICARE shall be available for the reimbursement of any health care provider for inpatient mental health service for care received when a patient is referred to a provider of inpatient mental health care or residential treatment care by a medical or health care professional having an economic interest in the facility to which the patient is referred: Provided, That this limitation does not apply in the case of inpatient mental health services provided under the program for persons with disabilities under subsection (d) of section 1079 of title 10,

United States Code, provided as partial hospital care, or provided pursuant to a waiver authorized by the Secretary of Defense because of medical or psychological circumstances of the patient that are confirmed by a health professional who is not a Federal employee after a review, pursuant to rules prescribed by the Secretary, which takes into account the appropriate level of care for the patient, the intensity of services required by the patient, and the availability of that care.

SEC. 8018. Notwithstanding any other provision of law, during the current fiscal year, the Secretary of Defense may, by executive agreement, establish with host nation governments in NATO member states a separate account into which such residual value amounts negotiated in the return of United States military installations in NATO member states may be deposited, in the currency of the host nation, in lieu of direct monetary transfers to the United States Treasury: Provided, That such credits may be utilized only for the construction of facilities to support United States military forces in that host nation, or such real property maintenance and base operating costs that are currently executed through monetary transfers to such host nations: Provided further, That the Department of Defense's budget submission for fiscal year 2004 shall identify such sums anticipated in residual value settlements, and identify such construction, real property maintenance or base operating costs that shall be funded by the host nation through such credits: Provided further, That all military construction projects to be executed from such accounts must be previously approved in a prior Act of Congress: Provided further, That each such executive agreement with a NATO member host nation shall be reported to the congressional defense committees, the Committee on International Relations of the House of Representatives and the Committee on Foreign Relations of the Senate 30 days prior to the conclusion and endorsement of any such agreement established under this provision.

SEC. 8019. None of the funds available to the Department of Defense may be used to demilitarize or dispose of M-1 Carbines, M-1 Garand rifles, M-14 rifles, .22 caliber rifles, .30 caliber rifles, or M-1911 pistols.

SEC. 8020. No more than \$500,000 of the funds appropriated or made available in this Act shall be used during a single fiscal year for any single relocation of an organization, unit, activity or function of the Department of Defense into or within the National Capital Region: Provided, That the Secretary of Defense may waive this restriction on a case-by-case basis by certifying in writing to the congressional defense committees that such a relocation is required in the best interest of the Government.

SEC. 8021. In addition to the funds provided elsewhere in this Act, \$8,000,000 is appropriated only for incentive payments authorized by Section 504 of the Indian Financing Act of 1974 (25 U.S.C. 1544): Provided, That a prime contractor or a subcontractor at any tier that makes a subcontract award to any subcontractor or supplier as defined in 25 U.S.C. 1544 or a small business owned and controlled by an individual defined under 25 U.S.C. 4221(9) shall be considered a contractor for the purposes of being allowed additional compensation under section 504 of the Indian Financing Act of 1974 (25 U.S.C. 1544) whenever the prime contract or subcontract amount is over \$500,000 and involves the expenditure of funds appropriated by an Act making Appropriations for the Department of Defense with respect to any fiscal year: Provided further, That notwithstanding 41 U.S.C. § 430, this section shall be applicable to any Department of Defense acquisition of supplies or services, including any contract and any subcontract at any tier for acquisition of commercial items produced or manufactured, in whole or in part by any subcontractor or supplier defined in 25 U.S.C. § 1544 or a small business

owned and controlled by an individual defined under 25 U.S.C. 4221(9).

SEC. 8022. None of the funds appropriated by this Act shall be available to perform any cost study pursuant to the provisions of OMB Circular A-76 if the study being performed exceeds a period of 24 months after initiation of such study with respect to a single function activity or 48 months after initiation of such study for a multi-function activity.

SEC. 8023. Funds appropriated by this Act for the American Forces Information Service shall not be used for any national or international political or psychological activities.

SEC. 8024. Notwithstanding any other provision of law or regulation, the Secretary of Defense may adjust wage rates for civilian employees hired for certain health care occupations as authorized for the Secretary of Veterans Affairs by section 7455 of title 38, United States Code.

SEC. 8025. (a) Of the funds for the procurement of supplies or services appropriated by this Act, qualified nonprofit agencies for the blind or other severely handicapped shall be afforded the maximum practicable opportunity to participate as subcontractors and suppliers in the performance of contracts let by the Department of Defense.

(b) During the current fiscal year, a business concern which has negotiated with a military service or defense agency a subcontracting plan for the participation by small business concerns pursuant to section 8(d) of the Small Business Act (15 U.S.C. 637(d)) shall be given credit toward meeting that subcontracting goal for any purchases made from qualified nonprofit agencies for the blind or other severely handicapped.

(c) For the purpose of this section, the phrase "qualified nonprofit agency for the blind or other severely handicapped" means a nonprofit agency for the blind or other severely handicapped that has been approved by the Committee for the Purchase from the Blind and Other Severely Handicapped under the Javits-Wagner-O'Day Act (41 U.S.C. 46-48).

SEC. 8026. During the current fiscal year, net receipts pursuant to collections from third party payers pursuant to section 1095 of title 10, United States Code, shall be made available to the local facility of the uniformed services responsible for the collections and shall be over and above the facility's direct budget amount.

SEC. 8027. During the current fiscal year, the Department of Defense is authorized to incur obligations of not to exceed \$350,000,000 for purposes specified in section 2350j(c) of title 10, United States Code, in anticipation of receipt of contributions, only from the Government of Kuwait, under that section: Provided, That upon receipt, such contributions from the Government of Kuwait shall be credited to the appropriations or fund which incurred such obligations.

SEC. 8028. Of the funds made available in this Act, not less than \$21,188,000 shall be available for the Civil Air Patrol Corporation, of which \$19,688,000 shall be available for Civil Air Patrol Corporation operation and maintenance to support readiness activities which includes \$1,500,000 for the Civil Air Patrol counterdrug program: Provided, That funds identified for "Civil Air Patrol" under this section are intended for and shall be for the exclusive use of the Civil Air Patrol Corporation and not for the Air Force or any unit thereof.

SEC. 8029. (a) None of the funds appropriated in this Act are available to establish a new Department of Defense (department) federally funded research and development center (FFRDC), either as a new entity, or as a separate entity administrated by an organization managing another FFRDC, or as a nonprofit membership corporation consisting of a consortium of other FFRDCs and other non-profit entities.

(b) No member of a Board of Directors, Trustees, Overseers, Advisory Group, Special Issues Panel, Visiting Committee, or any similar entity of a defense FFRDC, and no paid consultant to

any defense FFRDC, except when acting in a technical advisory capacity, may be compensated for his or her services as a member of such entity, or as a paid consultant by more than one FFRDC in a fiscal year: Provided, That a member of any such entity referred to previously in this subsection shall be allowed travel expenses and per diem as authorized under the Federal Joint Travel Regulations, when engaged in the performance of membership duties.

(c) Notwithstanding any other provision of law, none of the funds available to the department from any source during fiscal year 2003 may be used by a defense FFRDC, through a fee or other payment mechanism, for construction of new buildings, for payment of cost sharing for projects funded by Government grants, for absorption of contract overruns, or for certain charitable contributions, not to include employee participation in community service and/or development.

(d) Notwithstanding any other provision of law, of the funds available to the department during fiscal year 2003, not more than 6,321 staff years of technical effort (staff years) may be funded for defense FFRDCs: Provided, That of the specific amount referred to previously in this subsection, not more than 1,050 staff years may be funded for the defense studies and analysis FFRDCs.

(e) The Secretary of Defense shall, with the submission of the department's fiscal year 2004 budget request, submit a report presenting the specific amounts of staff years of technical effort to be allocated for each defense FFRDC during that fiscal year.

(f) Notwithstanding any other provision of this Act, the total amount appropriated in this Act for FFRDCs is hereby reduced by \$74,200,000.

SEC. 8030. None of the funds appropriated or made available in this Act shall be used to procure carbon, alloy or armor steel plate for use in any Government-owned facility or property under the control of the Department of Defense which were not melted and rolled in the United States or Canada: Provided, That these procurement restrictions shall apply to any and all Federal Supply Class 9515, American Society of Testing and Materials (ASTM) or American Iron and Steel Institute (AISI) specifications of carbon, alloy or armor steel plate: Provided further, That the Secretary of the military department responsible for the procurement may waive this restriction on a case-by-case basis by certifying in writing to the Committees on Appropriations of the House of Representatives and the Senate that adequate domestic supplies are not available to meet Department of Defense requirements on a timely basis and that such an acquisition must be made in order to acquire capability for national security purposes: Provided further, That these restrictions shall not apply to contracts which are in being as of the date of the enactment of this Act.

SEC. 8031. For the purposes of this Act, the term "congressional defense committees" means the Armed Services Committee of the House of Representatives, the Armed Services Committee of the Senate, the Subcommittee on Defense of the Committee on Appropriations of the Senate, and the Subcommittee on Defense of the Committee on Appropriations of the House of Representatives.

SEC. 8032. During the current fiscal year, the Department of Defense may acquire the modification, depot maintenance and repair of aircraft, vehicles and vessels as well as the production of components and other Defense-related articles, through competition between Department of Defense depot maintenance activities and private firms: Provided, That the Senior Acquisition Executive of the military department or defense agency concerned, with power of delegation, shall certify that successful bids include comparable estimates of all direct and indirect costs for both public and private bids:

Provided further, That Office of Management and Budget Circular A-76 shall not apply to competitions conducted under this section.

SEC. 8033. (a)(1) If the Secretary of Defense, after consultation with the United States Trade Representative, determines that a foreign country which is party to an agreement described in paragraph (2) has violated the terms of the agreement by discriminating against certain types of products produced in the United States that are covered by the agreement, the Secretary of Defense shall rescind the Secretary's blanket waiver of the Buy American Act with respect to such types of products produced in that foreign country.

(2) An agreement referred to in paragraph (1) is any reciprocal defense procurement memorandum of understanding, between the United States and a foreign country pursuant to which the Secretary of Defense has prospectively waived the Buy American Act for certain products in that country.

(b) The Secretary of Defense shall submit to the Congress a report on the amount of Department of Defense purchases from foreign entities in fiscal year 2003. Such report shall separately indicate the dollar value of items for which the Buy American Act was waived pursuant to any agreement described in subsection (a)(2), the Trade Agreement Act of 1979 (19 U.S.C. 2501 et seq.), or any international agreement to which the United States is a party.

(c) For purposes of this section, the term "Buy American Act" means title III of the Act entitled "An Act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes", approved March 3, 1933 (41 U.S.C. 10a et seq.).

SEC. 8034. Appropriations contained in this Act that remain available at the end of the current fiscal year as a result of energy cost savings realized by the Department of Defense shall remain available for obligation for the next fiscal year to the extent, and for the purposes, provided in section 2865 of title 10, United States Code.

(INCLUDING TRANSFER OF FUNDS)

SEC. 8035. Amounts deposited during the current fiscal year to the special account established under 40 U.S.C. 485(h)(2) and to the special account established under 10 U.S.C. 2667(d)(1) are appropriated and shall be available until transferred by the Secretary of Defense to current applicable appropriations or funds of the Department of Defense under the terms and conditions specified by 40 U.S.C. 485(h)(2)(A) and (B) and 10 U.S.C. 2667(d)(1)(B), to be merged with and to be available for the same time period and the same purposes as the appropriation to which transferred.

SEC. 8036. The President shall include with each budget for a fiscal year submitted to the Congress under section 1105 of title 31, United States Code, materials that shall identify clearly and separately the amounts requested in the budget for appropriation for that fiscal year for salaries and expenses related to administrative activities of the Department of Defense, the military departments, and the defense agencies.

SEC. 8037. Notwithstanding any other provision of law, funds available for "Drug Interdiction and Counter-Drug Activities, Defense" may be obligated for the Young Marines program.

(INCLUDING TRANSFER OF FUNDS)

SEC. 8038. During the current fiscal year, amounts contained in the Department of Defense Overseas Military Facility Investment Recovery Account established by section 2921(c)(1) of the National Defense Authorization Act of 1991 (Public Law 101-510; 10 U.S.C. 2687 note) shall be available until expended for the payments specified by section 2921(c)(2) of that Act.

SEC. 8039. (a) IN GENERAL.—Notwithstanding any other provision of law, the Secretary of the Air Force may convey at no cost to the Air Force, without consideration, to Indian tribes

located in the States of North Dakota, South Dakota, Montana, and Minnesota relocatable military housing units located at Grand Forks Air Force Base and Minot Air Force Base that are excess to the needs of the Air Force.

(b) **PROCESSING OF REQUESTS.**—The Secretary of the Air Force shall convey, at no cost to the Air Force, military housing units under subsection (a) in accordance with the request for such units that are submitted to the Secretary by the Operation Walking Shield Program on behalf of Indian tribes located in the States of North Dakota, South Dakota, Montana, and Minnesota.

(c) **RESOLUTION OF HOUSING UNIT CONFLICTS.**—The Operation Walking Shield program shall resolve any conflicts among requests of Indian tribes for housing units under subsection (a) before submitting requests to the Secretary of the Air Force under subsection (b).

(d) **INDIAN TRIBE DEFINED.**—In this section, the term “Indian tribe” means any recognized Indian tribe included on the current list published by the Secretary of the Interior under section 104 of the Federally Recognized Indian Tribe Act of 1994 (Public Law 103-454; 108 Stat. 4792; 25 U.S.C. 479a-1).

SEC. 8040. During the current fiscal year, appropriations which are available to the Department of Defense for operation and maintenance may be used to purchase items having an investment item unit cost of not more than \$100,000.

SEC. 8041. (a) During the current fiscal year, none of the appropriations or funds available to the Department of Defense Working Capital Funds shall be used for the purchase of an investment item for the purpose of acquiring a new inventory item for sale or anticipated sale during the current fiscal year or a subsequent fiscal year to customers of the Department of Defense Working Capital Funds if such an item would not have been chargeable to the Department of Defense Business Operations Fund during fiscal year 1994 and if the purchase of such an investment item would be chargeable during the current fiscal year to appropriations made to the Department of Defense for procurement.

(b) The fiscal year 2004 budget request for the Department of Defense as well as all justification material and other documentation supporting the fiscal year 2004 Department of Defense budget shall be prepared and submitted to the Congress on the basis that any equipment which was classified as an end item and funded in a procurement appropriation contained in this Act shall be budgeted for in a proposed fiscal year 2004 procurement appropriation and not in the supply management business area or any other area or category of the Department of Defense Working Capital Funds.

SEC. 8042. None of the funds appropriated by this Act for programs of the Central Intelligence Agency shall remain available for obligation beyond the current fiscal year, except for funds appropriated for the Reserve for Contingencies, which shall remain available until September 30, 2004: Provided, That funds appropriated, transferred, or otherwise credited to the Central Intelligence Agency Central Services Working Capital Fund during this or any prior or subsequent fiscal year shall remain available until expended: Provided further, That any funds appropriated or transferred to the Central Intelligence Agency for agent operations and for covert action programs authorized by the President under section 503 of the National Security Act of 1947, as amended, shall remain available until September 30, 2004.

SEC. 8043. Notwithstanding any other provision of law, funds made available in this Act for the Defense Intelligence Agency may be used for the design, development, and deployment of General Defense Intelligence Program intelligence communications and intelligence information systems for the Services, the Unified and Specified Commands, and the component commands.

SEC. 8044. Of the funds appropriated to the Department of Defense under the heading “Op-

eration and Maintenance, Defense-Wide”, not less than \$10,000,000 shall be made available only for the mitigation of environmental impacts, including training and technical assistance to tribes, related administrative support, the gathering of information, documenting of environmental damage, and developing a system for prioritization of mitigation and cost to complete estimates for mitigation, on Indian lands resulting from Department of Defense activities.

SEC. 8045. Of the funds made available in this Act, not less than \$68,900,000 shall be available to maintain an attrition reserve force of 18 B-52 aircraft, of which \$3,700,000 shall be available from “Military Personnel, Air Force”, \$40,000,000 shall be available from “Operation and Maintenance, Air Force”, and \$25,200,000 shall be available from “Aircraft Procurement, Air Force”: Provided, That the Secretary of the Air Force shall maintain a total force of 94 B-52 aircraft, including 18 attrition reserve aircraft, during fiscal year 2003: Provided further, That the Secretary of Defense shall include in the Air Force budget request for fiscal year 2004 amounts sufficient to maintain a B-52 force totaling 94 aircraft.

SEC. 8046. (a) None of the funds appropriated in this Act may be expended by an entity of the Department of Defense unless the entity, in expending the funds, complies with the Buy American Act. For purposes of this subsection, the term “Buy American Act” means title III of the Act entitled “An Act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes”, approved March 3, 1933 (41 U.S.C. 10a et seq.).

(b) If the Secretary of Defense determines that a person has been convicted of intentionally affixing a label bearing a “Made in America” inscription to any product sold in or shipped to the United States that is not made in America, the Secretary shall determine, in accordance with section 2410f of title 10, United States Code, whether the person should be debarred from contracting with the Department of Defense.

(c) In the case of any equipment or products purchased with appropriations provided under this Act, it is the sense of the Congress that any entity of the Department of Defense, in expending the appropriation, purchase only American-made equipment and products, provided that American-made equipment and products are cost-competitive, quality-competitive, and available in a timely fashion.

SEC. 8047. None of the funds appropriated by this Act shall be available for a contract for studies, analysis, or consulting services entered into without competition on the basis of an unsolicited proposal unless the head of the activity responsible for the procurement determines—

(1) as a result of thorough technical evaluation, only one source is found fully qualified to perform the proposed work;

(2) the purpose of the contract is to explore an unsolicited proposal which offers significant scientific or technological promise, represents the product of original thinking, and was submitted in confidence by one source; or

(3) the purpose of the contract is to take advantage of unique and significant industrial accomplishment by a specific concern, or to insure that a new product or idea of a specific concern is given financial support:

Provided, That this limitation shall not apply to contracts in an amount of less than \$25,000, contracts related to improvements of equipment that is in development or production, or contracts as to which a civilian official of the Department of Defense, who has been confirmed by the Senate, determines that the award of such contract is in the interest of the national defense.

SEC. 8048. (a) Except as provided in subsections (b) and (c), none of the funds made available by this Act may be used—

(1) to establish a field operating agency; or
(2) to pay the basic pay of a member of the Armed Forces or civilian employee of the depart-

ment who is transferred or reassigned from a headquarters activity if the member or employee's place of duty remains at the location of that headquarters.

(b) The Secretary of Defense or Secretary of a military department may waive the limitations in subsection (a), on a case-by-case basis, if the Secretary determines, and certifies to the Committees on Appropriations of the House of Representatives and Senate that the granting of the waiver will reduce the personnel requirements or the financial requirements of the department.

(c) This section does not apply to field operating agencies funded within the National Foreign Intelligence Program.

SEC. 8049. Notwithstanding section 303 of Public Law 96-487 or any other provision of law, the Secretary of the Navy is authorized to lease real and personal property at Naval Air Facility, Adak, Alaska, pursuant to 10 U.S.C. 2667(f), for commercial, industrial or other purposes: Provided, That notwithstanding any other provision of law, the Secretary of the Navy may remove hazardous materials from facilities, buildings, and structures at Adak, Alaska, and may demolish or otherwise dispose of such facilities, buildings, and structures.

(RESCISSIONS)

SEC. 8050. Of the funds appropriated in Department of Defense Appropriations Acts, the following funds are hereby rescinded from the following accounts and programs in the specified amounts:

“Procurement of Weapons and Tracked Combat Vehicles, Army, 2001/2003”, \$9,500,000;

“Procurement of Ammunition, Army, 2001/2003”, \$4,000,000;

“Other Procurement, Army, 2001/2003”, \$8,000,000;

“Other Procurement, Navy, 2001/2003”, \$5,000,000;

“Missile Procurement, Air Force, 2001/2003”, \$93,600,000;

“Missile Procurement, Army, 2002/2004”, \$37,650,000;

“Procurement of Ammunition, Army, 2002/2004”, \$19,000,000;

“Other Procurement, Army, 2002/2004”, \$21,200,000;

“Missile Procurement, Air Force, 2002/2004”, \$114,600,000;

“Research, Development, Test and Evaluation, Navy, 2002/2003”, \$1,700,000;

“Research, Development, Test and Evaluation, Air Force, 2002/2003”, \$69,000,000; and

“Research, Development, Test and Evaluation, Defense-Wide, 2002/2003”, \$19,500,000.

SEC. 8051. None of the funds available in this Act may be used to reduce the authorized positions for military (civilian) technicians of the Army National Guard, the Air National Guard, Army Reserve and Air Force Reserve for the purpose of applying any administratively imposed civilian personnel ceiling, freeze, or reduction on military (civilian) technicians, unless such reductions are a direct result of a reduction in military force structure.

SEC. 8052. None of the funds appropriated or otherwise made available in this Act may be obligated or expended for assistance to the Democratic People's Republic of North Korea unless specifically appropriated for that purpose.

SEC. 8053. During the current fiscal year, funds appropriated in this Act are available to compensate members of the National Guard for duty performed pursuant to a plan submitted by a Governor of a State and approved by the Secretary of Defense under section 112 of title 32, United States Code: Provided, That during the performance of such duty, the members of the National Guard shall be under State command and control: Provided further, That such duty shall be treated as full-time National Guard duty for purposes of sections 12602(a)(2) and (b)(2) of title 10, United States Code.

SEC. 8054. Funds appropriated in this Act for operation and maintenance of the Military Departments, Combatant Commands and Defense

Agencies shall be available for reimbursement of pay, allowances and other expenses which would otherwise be incurred against appropriations for the National Guard and Reserve when members of the National Guard and Reserve provide intelligence or counterintelligence support to Combatant Commands, Defense Agencies and Joint Intelligence Activities, including the activities and programs included within the National Foreign Intelligence Program (NFIP), the Joint Military Intelligence Program (JMIP), and the Tactical Intelligence and Related Activities (TIARA) aggregate: Provided, That nothing in this section authorizes deviation from established Reserve and National Guard personnel and training procedures.

SEC. 8055. During the current fiscal year, none of the funds appropriated in this Act may be used to reduce the civilian medical and medical support personnel assigned to military treatment facilities below the September 30, 2002 level: Provided, That the Service Surgeons General may waive this section by certifying to the congressional defense committees that the beneficiary population is declining in some catchment areas and civilian strength reductions may be consistent with responsible resource stewardship and capitation-based budgeting.

SEC. 8056. (a) **LIMITATION ON PENTAGON RENOVATION COSTS.**—Not later than the date each year on which the President submits to Congress the budget under section 1105 of title 31, United States Code, the Secretary of Defense shall submit to Congress a certification that the total cost for the planning, design, construction, and installation of equipment for the renovation of wedges 2 through 5 of the Pentagon Reservation, cumulatively, will not exceed four times the total cost for the planning, design, construction, and installation of equipment for the renovation of wedge 1.

(b) **ANNUAL ADJUSTMENT.**—For purposes of applying the limitation in subsection (a), the Secretary shall adjust the cost for the renovation of wedge 1 by any increase or decrease in costs attributable to economic inflation, based on the most recent economic assumptions issued by the Office of Management and Budget for use in preparation of the budget of the United States under section 1104 of title 31, United States Code.

(c) **EXCLUSION OF CERTAIN COSTS.**—For purposes of calculating the limitation in subsection (a), the total cost for wedges 2 through 5 shall not include—

(1) any repair or reconstruction cost incurred as a result of the terrorist attack on the Pentagon that occurred on September 11, 2001;

(2) any increase in costs for wedges 2 through 5 attributable to compliance with new requirements of Federal, State, or local laws; and

(3) any increase in costs attributable to additional security requirements that the Secretary of Defense considers essential to provide a safe and secure working environment.

(d) **CERTIFICATION COST REPORTS.**—As part of the annual certification under subsection (a), the Secretary shall report the projected cost (as of the time of the certification) for—

(1) the renovation of each wedge, including the amount adjusted or otherwise excluded for such wedge under the authority of paragraphs (2) and (3) of subsection (c) for the period covered by the certification; and

(2) the repair and reconstruction of wedges 1 and 2 in response to the terrorist attack on the Pentagon that occurred on September 11, 2001.

(e) **DURATION OF CERTIFICATION REQUIREMENT.**—The requirement to make an annual certification under subsection (a) shall apply until the Secretary certifies to Congress that the renovation of the Pentagon Reservation is completed.

SEC. 8057. Notwithstanding any other provision of law, that not more than 35 percent of funds provided in this Act for environmental remediation may be obligated under indefinite delivery/indefinite quantity contracts with a total contract value of \$130,000,000 or higher.

SEC. 8058. (a) None of the funds available to the Department of Defense for any fiscal year for drug interdiction or counter-drug activities may be transferred to any other department or agency of the United States except as specifically provided in an appropriations law.

(b) None of the funds available to the Central Intelligence Agency for any fiscal year for drug interdiction and counter-drug activities may be transferred to any other department or agency of the United States except as specifically provided in an appropriations law.

(TRANSFER OF FUNDS)

SEC. 8059. Appropriations available in this Act under the heading "Operation and Maintenance, Defense-Wide" for increasing energy and water efficiency in Federal buildings may, during their period of availability, be transferred to other appropriations or funds of the Department of Defense for projects related to increasing energy and water efficiency, to be merged with and to be available for the same general purposes, and for the same time period, as the appropriation or fund to which transferred.

SEC. 8060. None of the funds appropriated by this Act may be used for the procurement of ball and roller bearings other than those produced by a domestic source and of domestic origin: Provided, That the Secretary of the military department responsible for such procurement may waive this restriction on a case-by-case basis by certifying in writing to the Committees on Appropriations of the House of Representatives and the Senate, that adequate domestic supplies are not available to meet Department of Defense requirements on a timely basis and that such an acquisition must be made in order to acquire capability for national security purposes: Provided further, That this restriction shall not apply to the purchase of "commercial items", as defined by section 4(12) of the Office of Federal Procurement Policy Act, except that the restriction shall apply to ball or roller bearings purchased as end items.

SEC. 8061. Notwithstanding any other provision of law, funds available to the Department of Defense shall be made available to provide transportation of medical supplies and equipment, on a nonreimbursable basis, to American Samoa, and funds available to the Department of Defense shall be made available to provide transportation of medical supplies and equipment, on a nonreimbursable basis, to the Indian Health Service when it is in conjunction with a civil-military project.

SEC. 8062. None of the funds in this Act may be used to purchase any supercomputer which is not manufactured in the United States, unless the Secretary of Defense certifies to the congressional defense committees that such an acquisition must be made in order to acquire capability for national security purposes that is not available from United States manufacturers.

SEC. 8063. Notwithstanding any other provision of law, the Naval shipyards of the United States shall be eligible to participate in any manufacturing extension program financed by funds appropriated in this or any other Act.

SEC. 8064. Notwithstanding any other provision of law, each contract awarded by the Department of Defense during the current fiscal year for construction or service performed in whole or in part in a State (as defined in section 381(d) of title 10, United States Code) which is not contiguous with another State and has an unemployment rate in excess of the national average rate of unemployment as determined by the Secretary of Labor, shall include a provision requiring the contractor to employ, for the purpose of performing that portion of the contract in such State that is not contiguous with another State, individuals who are residents of such State and who, in the case of any craft or trade, possess or would be able to acquire promptly the necessary skills: Provided, That the Secretary of Defense may waive the requirements of this section, on a case-by-case basis, in the interest of national security.

SEC. 8065. (a) None of the funds made available in this or any other Act may be used to pay the salary of any officer or employee of the Department of Defense who approves or implements the transfer of administrative responsibilities or budgetary resources of any program, project, or activity financed by this Act to the jurisdiction of another Federal agency not financed by this Act without the express authorization of Congress: Provided, That this limitation shall not apply to transfers of funds expressly provided for in Defense Appropriations Acts, or provisions of Acts providing supplemental appropriations for the Department of Defense.

(b) None of the funds in this or any other Act may be used to dismantle national memorials commemorating United States participation in World War I.

SEC. 8066. (a) **LIMITATION ON TRANSFER OF DEFENSE ARTICLES AND SERVICES.**—Notwithstanding any other provision of law, none of the funds available to the Department of Defense for the current fiscal year may be obligated or expended to transfer to another nation or an international organization any defense articles or services (other than intelligence services) for use in the activities described in subsection (b) unless the congressional defense committees, the Committee on International Relations of the House of Representatives, and the Committee on Foreign Relations of the Senate are notified 15 days in advance of such transfer.

(b) **COVERED ACTIVITIES.**—This section applies to—

(1) any international peacekeeping or peace-enforcement operation under the authority of chapter VI or chapter VII of the United Nations Charter under the authority of a United Nations Security Council resolution; and

(2) any other international peacekeeping, peace-enforcement, or humanitarian assistance operation.

(c) **REQUIRED NOTICE.**—A notice under subsection (a) shall include the following:

(1) A description of the equipment, supplies, or services to be transferred.

(2) A statement of the value of the equipment, supplies, or services to be transferred.

(3) In the case of a proposed transfer of equipment or supplies—

(A) a statement of whether the inventory requirements of all elements of the Armed Forces (including the reserve components) for the type of equipment or supplies to be transferred have been met; and

(B) a statement of whether the items proposed to be transferred will have to be replaced and, if so, how the President proposes to provide funds for such replacement.

SEC. 8067. To the extent authorized by subchapter VI of chapter 148 of title 10, United States Code, the Secretary of Defense may issue loan guarantees in support of United States defense exports not otherwise provided for: Provided, That the total contingent liability of the United States for guarantees issued under the authority of this section may not exceed \$15,000,000,000: Provided further, That the exposure fees charged and collected by the Secretary for each guarantee shall be paid by the country involved and shall not be financed as part of a loan guaranteed by the United States: Provided further, That the Secretary shall provide quarterly reports to the Committees on Appropriations, Armed Services, and Foreign Relations of the Senate and the Committees on Appropriations, Armed Services, and International Relations in the House of Representatives on the implementation of this program: Provided further, That amounts charged for administrative fees and deposited to the special account provided for under section 2540c(d) of title 10, shall be available for paying the costs of administrative expenses of the Department of Defense that are attributable to the loan guarantee program under subchapter VI of chapter 148 of title 10, United States Code.

SEC. 8068. None of the funds available to the Department of Defense under this Act shall be obligated or expended to pay a contractor under a contract with the Department of Defense for costs of any amount paid by the contractor to an employee when—

(1) such costs are for a bonus or otherwise in excess of the normal salary paid by the contractor to the employee; and

(2) such bonus is part of restructuring costs associated with a business combination.

SEC. 8069. (a) None of the funds appropriated or otherwise made available in this Act may be used to transport or provide for the transportation of chemical munitions or agents to the Johnston Atoll for the purpose of storing or demilitarizing such munitions or agents.

(b) The prohibition in subsection (a) shall not apply to any obsolete World War II chemical munition or agent of the United States found in the World War II Pacific Theater of Operations.

(c) The President may suspend the application of subsection (a) during a period of war in which the United States is a party.

(INCLUDING TRANSFER OF FUNDS)

SEC. 8070. During the current fiscal year, no more than \$30,000,000 of appropriations made in this Act under the heading "Operation and Maintenance, Defense-Wide" may be transferred to appropriations available for the pay of military personnel, to be merged with, and to be available for the same time period as the appropriations to which transferred, to be used in support of such personnel in connection with support and services for eligible organizations and activities outside the Department of Defense pursuant to section 2012 of title 10, United States Code.

SEC. 8071. During the current fiscal year, in the case of an appropriation account of the Department of Defense for which the period of availability for obligation has expired or which has closed under the provisions of section 1552 of title 31, United States Code, and which has a negative unliquidated or unexpended balance, an obligation or an adjustment of an obligation may be charged to any current appropriation account for the same purpose as the expired or closed account if—

(1) the obligation would have been properly chargeable (except as to amount) to the expired or closed account before the end of the period of availability or closing of that account;

(2) the obligation is not otherwise properly chargeable to any current appropriation account of the Department of Defense; and

(3) in the case of an expired account, the obligation is not chargeable to a current appropriation of the Department of Defense under the provisions of section 1405(b)(8) of the National Defense Authorization Act for Fiscal Year 1991, Public Law 101-510, as amended (31 U.S.C. 1551 note): Provided, That in the case of an expired account, if subsequent review or investigation discloses that there was not in fact a negative unliquidated or unexpended balance in the account, any charge to a current account under the authority of this section shall be reversed and recorded against the expired account: Provided further, That the total amount charged to a current appropriation under this section may not exceed an amount equal to 1 percent of the total appropriation for that account.

SEC. 8072. Funds appropriated in title II of this Act and for the Defense Health Program in title VI of this Act for supervision and administration costs for facilities maintenance and repair, minor construction, or design projects may be obligated at the time the reimbursable order is accepted by the performing activity: Provided, That for the purpose of this section, supervision and administration costs includes all in-house Government cost.

SEC. 8073. During the current fiscal year and hereafter, the Secretary of Defense may waive reimbursement of the cost of conferences, seminars, courses of instruction, or similar edu-

cational activities of the Asia-Pacific Center for Security Studies for military officers and civilian officials of foreign nations if the Secretary determines that attendance by such personnel, without reimbursement, is in the national security interest of the United States: Provided, That costs for which reimbursement is waived pursuant to this section shall be paid from appropriations available for the Asia-Pacific Center.

SEC. 8074. (a) Notwithstanding any other provision of law, the Chief of the National Guard Bureau may permit the use of equipment of the National Guard Distance Learning Project by any person or entity on a space-available, reimbursable basis. The Chief of the National Guard Bureau shall establish the amount of reimbursement for such use on a case-by-case basis.

(b) Amounts collected under subsection (a) shall be credited to funds available for the National Guard Distance Learning Project and be available to defray the costs associated with the use of equipment of the project under that subsection. Such funds shall be available for such purposes without fiscal year limitation.

SEC. 8075. Using funds available by this Act or any other Act, the Secretary of the Air Force, pursuant to a determination under section 2690 of title 10, United States Code, may implement cost-effective agreements for required heating facility modernization in the Kaiserslautern Military Community in the Federal Republic of Germany: Provided, That in the City of Kaiserslautern such agreements will include the use of United States anthracite as the base load energy for municipal district heat to the United States Defense installations: Provided further, That at Landstuhl Army Regional Medical Center and Ramstein Air Base, furnished heat may be obtained from private, regional or municipal services, if provisions are included for the consideration of United States coal as an energy source.

SEC. 8076. None of the funds appropriated in title IV of this Act may be used to procure end-items for delivery to military forces for operational training, operational use or inventory requirements: Provided, That this restriction does not apply to end-items used in development, prototyping, and test activities preceding and leading to acceptance for operational use: Provided further, That this restriction does not apply to programs funded within the National Foreign Intelligence Program: Provided further, That the Secretary of Defense may waive this restriction on a case-by-case basis by certifying in writing to the Committees on Appropriations of the House of Representatives and the Senate that it is in the national security interest to do so.

SEC. 8077. None of the funds made available in this Act may be used to approve or license the sale of the F-22 advanced tactical fighter to any foreign government.

SEC. 8078. (a) The Secretary of Defense may, on a case-by-case basis, waive with respect to a foreign country each limitation on the procurement of defense items from foreign sources provided in law if the Secretary determines that the application of the limitation with respect to that country would invalidate cooperative programs entered into between the Department of Defense and the foreign country, or would invalidate reciprocal trade agreements for the procurement of defense items entered into under section 2531 of title 10, United States Code, and the country does not discriminate against the same or similar defense items produced in the United States for that country.

(b) Subsection (a) applies with respect to—

(1) contracts and subcontracts entered into on or after the date of the enactment of this Act; and

(2) options for the procurement of items that are exercised after such date under contracts that are entered into before such date if the option prices are adjusted for any reason other than the application of a waiver granted under subsection (a).

(c) Subsection (a) does not apply to a limitation regarding construction of public vessels, ball and roller bearings, food, and clothing or textile materials as defined by section 11 (chapters 50-65) of the Harmonized Tariff Schedule and products classified under headings 4010, 4202, 4203, 6401 through 6406, 6505, 7019, 7218 through 7229, 7304.41 through 7304.49, 7306.40, 7502 through 7508, 8105, 8108, 8109, 8211, 8215, and 9404.

SEC. 8079. Funds made available to the Civil Air Patrol in this Act under the heading "Drug Interdiction and Counter-Drug Activities, Defense" may be used for the Civil Air Patrol Corporation's counterdrug program, including its demand reduction program involving youth programs, as well as operational and training drug reconnaissance missions for Federal, State, and local government agencies; and for equipment needed for mission support or performance: Provided, That the Department of the Air Force should waive reimbursement from the Federal, State, and local government agencies for the use of these funds.

SEC. 8080. (a) PROHIBITION.—None of the funds made available by this Act may be used to support any training program involving a unit of the security forces of a foreign country if the Secretary of Defense has received credible information from the Department of State that the unit has committed a gross violation of human rights, unless all necessary corrective steps have been taken.

(b) MONITORING.—The Secretary of Defense, in consultation with the Secretary of State, shall ensure that prior to a decision to conduct any training program referred to in subsection (a), full consideration is given to all credible information available to the Department of State relating to human rights violations by foreign security forces.

(c) WAIVER.—The Secretary of Defense, after consultation with the Secretary of State, may waive the prohibition in subsection (a) if he determines that such waiver is required by extraordinary circumstances.

(d) REPORT.—Not more than 15 days after the exercise of any waiver under subsection (c), the Secretary of Defense shall submit a report to the congressional defense committees describing the extraordinary circumstances, the purpose and duration of the training program, the United States forces and the foreign security forces involved in the training program, and the information relating to human rights violations that necessitates the waiver.

SEC. 8081. The Secretary of Defense, in coordination with the Secretary of Health and Human Services, may carry out a program to distribute surplus dental equipment of the Department of Defense, at no cost to the Department of Defense, to Indian Health Service facilities and to federally-qualified health centers (within the meaning of section 1905(l)(2)(B) of the Social Security Act (42 U.S.C. 1396d(l)(2)(B))).

SEC. 8082. The total amount appropriated in this Act is hereby reduced by \$338,000,000 to reflect savings from favorable foreign currency fluctuations, to be derived as follows:

"Military Personnel, Army", \$80,000,000;
 "Military Personnel, Navy", \$6,500,000;
 "Military Personnel, Marine Corps", \$11,000,000;
 "Military Personnel, Air Force", \$29,000,000;
 "Operation and Maintenance, Army", \$102,000,000;
 "Operation and Maintenance, Navy", \$21,500,000;
 "Operation and Maintenance, Marine Corps", \$2,000,000;
 "Operation and Maintenance, Air Force", \$46,000,000; and
 "Operation and Maintenance, Defense-Wide", \$40,000,000.

SEC. 8083. None of the funds appropriated or made available in this Act to the Department of the Navy shall be used to develop, lease or procure the T-AKE class of ships unless the main

propulsion diesel engines and propulsors are manufactured in the United States by a domestically operated entity: Provided, That the Secretary of Defense may waive this restriction on a case-by-case basis by certifying in writing to the Committees on Appropriations of the House of Representatives and the Senate that adequate domestic supplies are not available to meet Department of Defense requirements on a timely basis and that such an acquisition must be made in order to acquire capability for national security purposes or there exists a significant cost or quality difference.

SEC. 8084. None of the funds appropriated or otherwise made available by this or other Department of Defense Appropriations Acts may be obligated or expended for the purpose of performing repairs or maintenance to military family housing units of the Department of Defense, including areas in such military family housing units that may be used for the purpose of conducting official Department of Defense business.

SEC. 8085. Notwithstanding any other provision of law, funds appropriated in this Act under the heading "Research, Development, Test and Evaluation, Defense-Wide" for any advanced concept technology demonstration project may only be obligated 30 days after a report, including a description of the project and its estimated annual and total cost, has been provided in writing to the congressional defense committees: Provided, That the Secretary of Defense may waive this restriction on a case-by-case basis by certifying to the congressional defense committees that it is in the national interest to do so.

SEC. 8086. Notwithstanding any other provision of law, for the purpose of establishing all Department of Defense policies governing the provision of care provided by and financed under the military health care system's case management program under 10 U.S.C. 1079(a)(17), the term "custodial care" shall be defined as care designed essentially to assist an individual in meeting the activities of daily living and which does not require the supervision of trained medical, nursing, paramedical or other specially trained individuals: Provided, That the case management program shall provide that members and retired members of the military services, and their dependents and survivors, have access to all medically necessary health care through the health care delivery system of the military services regardless of the health care status of the person seeking the health care: Provided further, That the case management program shall be the primary obligor for payment of medically necessary services and shall not be considered as secondarily liable to title XIX of the Social Security Act, other welfare programs or charity based care.

SEC. 8087. During the current fiscal year, refunds attributable to the use of the Government travel card, refunds attributable to the use of the Government Purchase Card and refunds attributable to official Government travel arranged by Government Contracted Travel Management Centers may be credited to operation and maintenance accounts of the Department of Defense which are current when the refunds are received.

SEC. 8088. (a) REGISTERING FINANCIAL MANAGEMENT INFORMATION TECHNOLOGY SYSTEMS WITH DOD CHIEF INFORMATION OFFICER.—None of the funds appropriated in this Act may be used for a mission critical or mission essential financial management information technology system (including a system funded by the defense working capital fund) that is not registered with the Chief Information Officer of the Department of Defense. A system shall be considered to be registered with that officer upon the furnishing to that officer of notice of the system, together with such information concerning the system as the Secretary of Defense may prescribe. A financial management information technology system shall be considered a mission critical or mission essential information

technology system as defined by the Under Secretary of Defense (Comptroller).

(b) CERTIFICATIONS AS TO COMPLIANCE WITH FINANCIAL MANAGEMENT MODERNIZATION PLAN.—

(1) During the current fiscal year, a financial management major automated information system may not receive Milestone A approval, Milestone B approval, or full rate production, or their equivalent, within the Department of Defense until the Under Secretary of Defense (Comptroller) certifies, with respect to that milestone, that the system is being developed and managed in accordance with the Department's Financial Management Modernization Plan. The Under Secretary of Defense (Comptroller) may require additional certifications, as appropriate, with respect to any such system.

(2) The Chief Information Officer shall provide the congressional defense committees timely notification of certifications under paragraph (1).

(c) CERTIFICATIONS AS TO COMPLIANCE WITH CLINGER-COHEN ACT.—(1) During the current fiscal year, a major automated information system may not receive Milestone A approval, Milestone B approval, or full rate production approval, or their equivalent, within the Department of Defense until the Chief Information Officer certifies, with respect to that milestone, that the system is being developed in accordance with the Clinger-Cohen Act of 1996 (40 U.S.C. 1401 et seq.). The Chief Information Officer may require additional certifications, as appropriate, with respect to any such system.

(2) The Chief Information Officer shall provide the congressional defense committees timely notification of certifications under paragraph (1). Each such notification shall include, at a minimum, the funding baseline and milestone schedule for each system covered by such a certification and confirmation that the following steps have been taken with respect to the system:

- (A) Business process reengineering.
- (B) An analysis of alternatives.
- (C) An economic analysis that includes a calculation of the return on investment.
- (D) Performance measures.
- (E) An information assurance strategy consistent with the Department's Global Information Grid.

(d) DEFINITIONS.—For purposes of this section:

(1) The term "Chief Information Officer" means the senior official of the Department of Defense designated by the Secretary of Defense pursuant to section 3506 of title 44, United States Code.

(2) The term "information technology system" has the meaning given the term "information technology" in section 5002 of the Clinger-Cohen Act of 1996 (40 U.S.C. 1401).

(3) The term "major automated information system" has the meaning given that term in Department of Defense Directive 5000.1.

SEC. 8089. During the current fiscal year, none of the funds available to the Department of Defense may be used to provide support to another department or agency of the United States if such department or agency is more than 90 days in arrears in making payment to the Department of Defense for goods or services previously provided to such department or agency on a reimbursable basis: Provided, That this restriction shall not apply if the department is authorized by law to provide support to such department or agency on a nonreimbursable basis, and is providing the requested support pursuant to such authority: Provided further, That the Secretary of Defense may waive this restriction on a case-by-case basis by certifying in writing to the Committees on Appropriations of the House of Representatives and the Senate that it is in the national security interest to do so.

SEC. 8090. None of the funds provided in this Act may be used to transfer to any nongovernmental entity ammunition held by the Depart-

ment of Defense that has a center-fire cartridge and a United States military nomenclature designation of "armor penetrator", "armor piercing (AP)", "armor piercing incendiary (API)", or "armor-piercing incendiary-tracer (API-T)", except to an entity performing demilitarization services for the Department of Defense under a contract that requires the entity to demonstrate to the satisfaction of the Department of Defense that armor piercing projectiles are either: (1) rendered incapable of reuse by the demilitarization process; or (2) used to manufacture ammunition pursuant to a contract with the Department of Defense or the manufacture of ammunition for export pursuant to a License for Permanent Export of Unclassified Military Articles issued by the Department of State.

SEC. 8091. Notwithstanding any other provision of law, the Chief of the National Guard Bureau, or his designee, may waive payment of all or part of the consideration that otherwise would be required under 10 U.S.C. 2667, in the case of a lease of personal property for a period not in excess of 1 year to any organization specified in 32 U.S.C. 508(d), or any other youth, social, or fraternal non-profit organization as may be approved by the Chief of the National Guard Bureau, or his designee, on a case-by-case basis.

SEC. 8092. None of the funds appropriated by this Act shall be used for the support of any nonappropriated funds activity of the Department of Defense that procures malt beverages and wine with nonappropriated funds for resale (including such alcoholic beverages sold by the drink) on a military installation located in the United States unless such malt beverages and wine are procured within that State, or in the case of the District of Columbia, within the District of Columbia, in which the military installation is located: Provided, That in a case in which the military installation is located in more than one State, purchases may be made in any State in which the installation is located: Provided further, That such local procurement requirements for malt beverages and wine shall apply to all alcoholic beverages only for military installations in States which are not contiguous with another State: Provided further, That alcoholic beverages other than wine and malt beverages, in contiguous States and the District of Columbia shall be procured from the most competitive source, price and other factors considered.

SEC. 8093. During the current fiscal year and hereafter, under regulations prescribed by the Secretary of Defense, the Center of Excellence for Disaster Management and Humanitarian Assistance may also pay, or authorize payment for, the expenses of providing or facilitating education and training for appropriate military and civilian personnel of foreign countries in disaster management, peace operations, and humanitarian assistance.

SEC. 8094. (a) The Department of Defense is authorized to enter into agreements with the Department of Veterans Affairs and federally-funded health agencies providing services to Native Hawaiians for the purpose of establishing a partnership similar to the Alaska Federal Health Care Partnership, in order to maximize Federal resources in the provision of health care services by federally-funded health agencies, applying telemedicine technologies. For the purpose of this partnership, Native Hawaiians shall have the same status as other Native Americans who are eligible for the health care services provided by the Indian Health Service.

(b) The Department of Defense is authorized to develop a consultation policy, consistent with Executive Order No. 13084 (issued May 14, 1998), with Native Hawaiians for the purpose of assuring maximum Native Hawaiian participation in the direction and administration of governmental services so as to render those services more responsive to the needs of the Native Hawaiian community.

(c) For purposes of this section, the term "Native Hawaiian" means any individual who is a

descendant of the aboriginal people who, prior to 1778, occupied and exercised sovereignty in the area that now comprises the State of Hawaii.

(INCLUDING TRANSFER OF FUNDS)

SEC. 8095. Of the amounts appropriated in this Act under the heading "Research, Development, Test and Evaluation, Defense-Wide", \$136,000,000 shall be made available for the Arrow missile defense program: Provided, That of this amount, \$66,000,000 shall be available for the purpose of continuing the Arrow System Improvement Program (ASIP), and \$70,000,000 shall be available for the purpose of producing Arrow missile components in the United States and Arrow missile components and missiles in Israel to meet Israel's defense requirements, consistent with each nation's laws, regulations and procedures: Provided further, That funds made available under this provision for production of missiles and missile components may be transferred to appropriations available for the procurement of weapons and equipment, to be merged with and to be available for the same time period and the same purposes as the appropriation to which transferred: Provided further, That the transfer authority provided under this provision is in addition to any other transfer authority contained in this Act.

SEC. 8096. Funds available to the Department of Defense for the Global Positioning System during the current fiscal year may be used to fund civil requirements associated with the satellite and ground control segments of such system's modernization program.

(INCLUDING TRANSFER OF FUNDS)

SEC. 8097. Of the amounts appropriated in this Act under the heading, "Operation and Maintenance, Defense-Wide", \$68,000,000 shall remain available until expended: Provided, That notwithstanding any other provision of law, the Secretary of Defense is authorized to transfer such funds to other activities of the Federal Government.

SEC. 8098. Section 8106 of the Department of Defense Appropriations Act, 1997 (titles I through VIII of the matter under subsection 101(b) of Public Law 104-208; 110 Stat. 3009-111; 10 U.S.C. 113 note) shall continue in effect to apply to disbursements that are made by the Department of Defense in fiscal year 2003.

SEC. 8099. In addition to amounts provided in this Act, \$1,700,000 is hereby appropriated for "Defense Health Program", to remain available for obligation until expended: Provided, That notwithstanding any other provision of law, these funds shall be available only for a grant to the Fisher House Foundation, Inc., only for the construction and furnishing of additional Fisher Houses to meet the needs of military family members when confronted with the illness or hospitalization of an eligible military beneficiary.

SEC. 8100. Notwithstanding any other provision of this Act, the total amount appropriated in this Act is hereby reduced by \$850,000,000, to reflect savings to be achieved from business process reforms, management efficiencies, and procurement of administrative and management support, to be distributed as follows:

"Operation and Maintenance, Army", \$26,000,000;
 "Operation and Maintenance, Navy", \$60,300,000;
 "Operation and Maintenance, Marine Corps", \$8,400,000;
 "Operation and Maintenance, Air Force", \$91,200,000;
 "Operation and Maintenance, Defense-Wide", \$199,000,000;
 "Operation and Maintenance, Army Reserve", \$5,900,000;
 "Operation and Maintenance, Marine Corps Reserve", \$900,000;
 "Operation and Maintenance, Air Force Reserve", \$1,000,000;
 "Operation and Maintenance, Army National Guard", \$4,300,000;

"Operation and Maintenance, Air National Guard", \$2,600,000;
 "Aircraft Procurement, Army", \$3,700,000;
 "Missile Procurement, Army", \$1,100,000;
 "Procurement of Weapons and Tracked Combat Vehicles, Army", \$3,100,000;
 "Other Procurement, Army", \$17,700,000;
 "Aircraft Procurement, Navy", \$22,800,000;
 "Weapons Procurement, Navy", \$4,800,000;
 "Procurement of Ammunition, Navy and Marine Corps", \$1,000,000;
 "Shipbuilding and Conversion, Navy", \$15,700,000;
 "Other Procurement, Navy", \$7,200,000;
 "Procurement, Marine Corps", \$2,600,000;
 "Aircraft Procurement, Air Force", \$9,700,000;
 "Missile Procurement, Air Force", \$6,200,000;
 "Other Procurement, Air Force", \$6,200,000;
 "Procurement, Defense-Wide", \$1,200,000;
 "Research, Development, Test and Evaluation, Army", \$23,500,000;
 "Research, Development, Test and Evaluation, Navy", \$55,700,000;
 "Research, Development, Test and Evaluation, Air Force", \$66,200,000;
 "Research, Development, Test and Evaluation, Defense-Wide", \$154,000,000;
 "Operational Test and Evaluation, Defense", \$5,000,000;
 "National Defense Sealift Fund", \$1,000,000;
 "Defense Health Program", \$12,000,000;
 "Chemical Agents and Munitions Destruction, Army", \$20,000,000; and
 "Drug Interdiction and Counter-Drug Activities, Defense", \$10,000,000:

Provided, That these reductions shall be applied proportionally to each budget activity, activity group and subactivity group and each program, project, and activity within each appropriation account: Provided further, That none of the funds provided in this Act may be used for consulting and advisory services for legislative affairs and legislative liaison functions.

(INCLUDING TRANSFER OF FUNDS)

SEC. 8101. Of the amounts appropriated in this Act under the heading "Shipbuilding and Conversion, Navy", \$1,279,899,000 shall be available until September 30, 2003, to fund prior year shipbuilding cost increases: Provided, That upon enactment of this Act, the Secretary of the Navy shall transfer such funds to the following appropriations in the amounts specified: Provided further, That the amounts transferred shall be merged with and be available for the same purposes as the appropriations to which transferred:

To:
 Under the heading, "Shipbuilding and Conversion, Navy, 1996/03":
 LPD-17 Amphibious Transport Dock Ship Program, \$300,681,000;
 Under the heading, "Shipbuilding and Conversion, Navy, 1998/03":
 DDG-51 Destroyer Program, \$76,100,000;
 New SSN, \$190,882,000;
 Under the heading, "Shipbuilding and Conversion, Navy, 1999/03":
 DDG-51 Destroyer Program, \$93,736,000;
 LPD-17 Amphibious Transport Dock Ship Program, \$82,000,000;
 New SSN, \$135,800,000;
 Under the heading, "Shipbuilding and Conversion, Navy, 2000/03":
 DDG-51 Destroyer Program, \$51,724,000;
 LPD-17 Amphibious Transport Dock Ship Program, \$187,000,000;
 Under the heading, "Shipbuilding and Conversion, Navy, 2001/03":
 DDG-51 Destroyer Program, \$63,976,000; and
 Under the heading, "Shipbuilding and Conversion, Navy, 2002/03":
 DDG-51 Destroyer Program, \$98,000,000.

SEC. 8102. The Secretary of the Navy may settle, or compromise, and pay any and all admiralty claims under 10 U.S.C. 7622 arising out of the collision involving the U.S.S. GREENEVILLE and the EHIME MARU, in any

amount and without regard to the monetary limitations in subsections (a) and (b) of that section: Provided, That such payments shall be made from funds available to the Department of the Navy for operation and maintenance.

SEC. 8103. The total amount appropriated in title II of this Act is hereby reduced by \$97,000,000, to reflect savings attributable to improved supervision in determining appropriate purchases to be made using the Government purchase card, to be derived as follows:

"Operation and Maintenance, Army", \$24,000,000;
 "Operation and Maintenance, Navy", \$29,000,000;
 "Operation and Maintenance, Marine Corps", \$3,000,000;
 "Operation and Maintenance, Air Force", \$27,000,000; and
 "Operation and Maintenance, Defense-Wide", \$14,000,000.

SEC. 8104. Funds provided for the current fiscal year or hereafter for Operation and maintenance for the Armed Forces may be used, notwithstanding any other provision of law, for the purchase of ultralightweight camouflage net systems as unit spares.

(INCLUDING TRANSFER OF FUNDS)

SEC. 8105. During the current fiscal year and for fiscal years 2004 and 2005, notwithstanding any other provision of law, the Secretary of Defense may transfer not more than \$20,000,000 of unobligated balances remaining in a Research, Development, Test and Evaluation, Army appropriation account during the last fiscal year before the account closes under section 1552 of title 31 United States Code, to a current Research, Development, Test and Evaluation, Army appropriation account to be used only for the continuation of the Venture Capital Fund demonstration, as originally approved in Section 8150 of Public Law 107-117, to pursue high payoff technology and innovations in science and technology: Provided, That any such transfer shall be made not later than July 31 of each year: Provided further, That funds so transferred shall be merged with and shall be available for the same purposes and for the same time period as the appropriation to which transferred: Provided further, That the transfer authority provided in this section is in addition to any other transfer authority available to the Department of Defense: Provided further, That no funds for programs, projects, or activities designated as special congressional interest items in DD Form 1414 shall be eligible for transfer under the authority of this section: Provided further, That any unobligated balances transferred under this authority may be restored to the original appropriation if required to cover unexpected upward adjustments: Provided further, That the Secretary of the Army shall provide an annual report to the House and Senate Appropriations Committees no later than 15 days prior to the annual transfer of funds under authority of this section describing the sources and amounts of funds proposed to be transferred, summarizing the projects funded under this demonstration program (including the name and location of project sponsors) to date, a description of the major program accomplishments to date, and an overall assessment of the benefits of this demonstration program compared to the goals expressed in the legislative history accompanying Section 8150 of Public Law 107-117.

SEC. 8106. Notwithstanding any other provision of law or regulation, the Secretary of Defense may exercise the provisions of 38 U.S.C. 7403(g) for occupations listed in 38 U.S.C. 7403(a)(2) as well as the following:

Pharmacists, Audiologists, and Dental Hygienists.

(A) The requirements of 38 U.S.C. 7403(g)(1)(A) shall apply.

(B) The limitations of 38 U.S.C. 7403(g)(1)(B) shall not apply.

SEC. 8107. Funds appropriated by this Act, or made available by the transfer of funds in this

Act, for intelligence activities are deemed to be specifically authorized by the Congress for purposes of section 504 of the National Security Act of 1947 (50 U.S.C. 414) during fiscal year 2003 until the enactment of the Intelligence Authorization Act for fiscal year 2003.

SEC. 8108. In addition to funds made available elsewhere in this Act \$7,750,000 is hereby appropriated and shall remain available until expended to provide assistance, by grant or otherwise (such as, but not limited to, the provision of funds for repairs, maintenance, construction, and/or for the purchase of information technology, text books, teaching resources), to public schools that have unusually high concentrations of special needs military dependents enrolled: Provided, That in selecting school systems to receive such assistance, special consideration shall be given to school systems in States that are considered overseas assignments, and all schools within these school systems shall be eligible for assistance: Provided further, That up to \$2,000,000 shall be available for the Department of Defense to establish a non-profit trust fund to assist in the public-private funding of public school repair and maintenance projects, or provide directly to non-profit organizations who in return will use these monies to provide assistance in the form of repair, maintenance, or renovation to public school systems that have high concentrations of special needs military dependents and are located in States that are considered overseas assignments, and of which 2 percent shall be available to support the administration and execution of the funds: Provided further, That to the extent a federal agency provides this assistance, by contract, grant, or otherwise, it may accept and expend non-federal funds in combination with these federal funds to provide assistance for the authorized purpose, if the non-federal entity requests such assistance and the non-federal funds are provided on a reimbursable basis: Provided further, That \$2,750,000 shall be available for a grant to the Central Kitsap School District, Washington.

SEC. 8109. Notwithstanding any other provision in this Act, the total amount appropriated in this Act is hereby reduced by \$400,000,000, to reduce cost growth in information technology development, to be distributed as follows:

“Operation and Maintenance, Defense-Wide”, \$19,500,000;

“Other Procurement, Army”, \$53,200,000;

“Other Procurement, Navy”, \$20,600,000;

“Procurement, Marine Corps”, \$3,400,000;

“Other Procurement, Air Force”, \$12,000,000;

“Procurement, Defense-Wide”, \$3,500,000;

“Research, Development, Test and Evaluation, Army”, \$17,700,000;

“Research, Development, Test and Evaluation, Navy”, \$25,600,000;

“Research, Development, Test and Evaluation, Air Force”, \$27,200,000;

“Research, Development, Test and Evaluation, Defense-Wide”, \$36,600,000;

“Defense Working Capital Funds”, \$148,600,000; and

“Defense Health Program”, \$32,100,000:

Provided, That these reductions shall be applied proportionally to each budget activity, activity group and subactivity group and each program, project, and activity within each appropriation account.

SEC. 8110. Notwithstanding section 1116(c) of title 10, United States Code, payments into the Department of Defense Medicare-Eligible Retiree Health Care Fund for fiscal year 2003 under section 1116(a) of such title shall be made from funds available in this Act for the pay of military personnel.

SEC. 8111. None of the funds in this Act may be used to initiate a new start program without prior notification to the Office of Secretary of Defense and the congressional defense committees.

SEC. 8112. The amount appropriated in title II of this Act is hereby reduced by \$120,000,000, to reflect Working Capital Fund cash balance and

rate stabilization adjustments, to be derived as follows:

“Operation and Maintenance, Navy”, \$120,000,000.

SEC. 8113. Notwithstanding any other provision in this Act, the total amount appropriated in this Act is hereby reduced by \$48,000,000, to reduce excess funded carryover, to be derived as follows:

“Operation and Maintenance, Army”, \$48,000,000.

SEC. 8114. Of the amounts appropriated in title II of the Act, not less than \$1,000,000,000 is available for operations of the Department of Defense to prosecute the war on terrorism.

SEC. 8115. (a) In addition to the amounts provided elsewhere in this Act, the amount of \$3,400,000 is hereby appropriated to the Department of Defense for “Operation and Maintenance, Army National Guard”. Such amount shall be made available to the Secretary of the Army only to make a grant in the amount of \$3,400,000 to the entity specified in subsection (b) to facilitate access by veterans to opportunities for skilled employment in the construction industry.

(b) The entity referred to in subsection (a) is the Center for Military Recruitment, Assessment and Veterans Employment, a nonprofit labor-management co-operation committee provided for by section 302(c)(9) of the Labor-Management Relations Act, 1947 (29 U.S.C. 186(c)(9)), for the purposes set forth in section 6(b) of the Labor Management Cooperation Act of 1978 (29 U.S.C. 175a note).

SEC. 8116. (a) During the current fiscal year, funds available to the Secretary of a military department for Operation and Maintenance may be used for the purposes stated in subsection (b) to support chaplain-led programs to assist members of the Armed Forces and their immediate family members in building and maintaining a strong family structure.

(b) The purposes referred to in subsection (a) are costs of transportation, food, lodging, supplies, fees, and training materials for members of the Armed Forces and their family members while participating in such programs, including participation at retreats and conferences.

SEC. 8117. Section 8159 of the Department of Defense Appropriations Act, 2002 (division A of Public Law 107-117; 115 Stat. 2284), is revised as follows:

(1) in subsection (c) by inserting at the end of paragraph (1) the following new sentence: “Notwithstanding the provisions of Section 3324 of Title 31, United States Code, payment for the acquisition of leasehold interests under this section may be made for each annual term up to one year in advance.”

(2) by adding the following paragraph (g):

“(g) Notwithstanding any other provision of law, any payments required for a lease entered into under this Section, or any payments made pursuant to subsection (c)(3) above, may be made from appropriations available for operation and maintenance or for lease or procurement of aircraft at the time that the lease takes effect; appropriations available for operation and maintenance or for lease or procurement of aircraft at the time that the payment is due; or funds appropriated for those payments.”

SEC. 8118. (a) LIMITATION ON ADDITIONAL NMCI CONTRACT WORK STATIONS.—Notwithstanding section 814 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (as enacted into law by Public Law 106-398; 114 Stat. 1654A-215) or any other provision of law, the total number of work stations provided under the Navy-Marine Corps Intranet contract (as defined in subsection (i) of such section 814) may not exceed 160,000 work stations until the Under Secretary of Defense for Acquisition, Technology, and Logistics and the Chief Information Officer of the Department of Defense certify to the congressional defense committees that all of the conditions specified in subsection (b) have been satisfied.

(b) CONDITIONS.—The conditions referred to in subsection (a) are the following:

(1) The Commander of the Navy Operational Test and Evaluation Force conducts an operational assessment of the work stations that have been fully transitioned to the Navy-Marine Corps Intranet, as defined in the Test and Evaluation Strategy Plan for the Navy-Marine Corps Intranet approved on September 4, 2002.

(2) The results of the assessment are submitted to the Under Secretary of Defense for Acquisition, Technology, and Logistics and the Chief Information Officer of the Department of Defense, and they determine that the results of the assessment are acceptable.

SEC. 8119. None of the funds in this Act, excluding funds provided for advance procurement of fiscal year 2004 aircraft, may be obligated for acquisition of more than 16 F-22 aircraft until the Under Secretary of Defense for Acquisition, Technology, and Logistics has provided to the congressional defense committees:

(a) A formal risk assessment which identifies and characterizes the potential cost, technical, schedule or other significant risks resulting from increasing the F-22 procurement quantities prior to the conclusion of Dedicated Initial Operational Test and Evaluation (DIOT&E) of the aircraft: Provided, That such risk assessment shall evaluate, based on the best available current information: (1) the range of potential additional program costs (compared to the program costs assumed in the President's fiscal year 2003 budget) that could result from retrofit modifications to F-22 production aircraft that are placed under contract or delivered to the government prior to the conclusion of DIOT&E; and (2) a cost-benefit analysis comparing, in terms of unit cost and total program cost, the cost advantages of increasing aircraft production at this time to the potential cost of retrofitting production aircraft once DIOT&E has been completed; and

(b) Certification that increasing the F-22 production quantity for fiscal year 2003 beyond 16 airplanes involves lower risk and lower total program cost than staying at that quantity, or he submits a revised production plan, funding plan and test schedule.

(INCLUDING TRANSFER OF FUNDS)

SEC. 8120. Section 305(a) of the Emergency Supplemental Act, 2002 (division B of Public Law 107-117; 115 Stat. 2300), is amended by adding at the end the following new sentences: “From amounts transferred to the Pentagon Reservation Maintenance Revolving Fund pursuant to the preceding sentence, not to exceed \$305,000,000 may be transferred to the Defense Emergency Response Fund, but only in amounts necessary to reimburse that fund (and the category of that fund designated as ‘Pentagon Repair/Upgrade’) for expenses charged to that fund (and that category) between September 11, 2001, and February 19, 2002, for reconstruction costs of the Pentagon Reservation. Funds transferred to the Defense Emergency Response Fund pursuant to this section shall be available only for reconstruction, recovery, force protection, or security enhancements for the Pentagon Reservation.”

SEC. 8121. FINANCING AND FIELDING OF KEY ARMY CAPABILITIES. The Department of Defense and the Department of the Army shall make future budgetary and programming plans to fully finance the Non-Line of Sight (NLOS) Objective Force cannon and resupply vehicle program in order to field this system in the 2008 timeframe. As an interim capability to enhance Army lethality, survivability, and mobility for light and medium forces before complete fielding of the Objective Force, the Army shall ensure that budgetary and programmatic plans will provide for no fewer than six Stryker Brigade Combat Teams to be fielded between 2003 and 2008.

SEC. 8122. (a) MANAGEMENT OF CHEMICAL DEMILITARIZATION ACTIVITIES AT BLUEGRASS ARMY DEPOT, KENTUCKY.—If a technology other than the baseline incineration program is selected for

the destruction of lethal chemical munitions pursuant to section 142 of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261; 50 U.S.C. 1521 note), the program manager for the Assembled Chemical Weapons Assessment shall be responsible for management of the construction, operation, and closure, and any contracting relating thereto, of chemical demilitarization activities at Bluegrass Army Depot, Kentucky, including management of the pilot-scale facility phase of the alternative technology.

(b) MANAGEMENT OF CHEMICAL DEMILITARIZATION ACTIVITIES AT PUEBLO DEPOT, COLORADO.—The program manager for the Assembled Chemical Weapons Assessment shall be responsible for management of the construction, operation, and closure, and any contracting relating thereto, of chemical demilitarization activities at Pueblo Army Depot, Colorado, including management of the pilot-scale facility phase of the alternative technology selected for the destruction of lethal chemical munitions.

SEC. 8123. Of the total amount appropriated pursuant to this Act for any selected component of the Department of Defense that the Director of the Office of Management and Budget determines shall require audited financial statements under subsection (c) of section 3515 of title 31, United States Code, not more than 99 percent may be expended until the Inspector General of the Department of Defense certifies to the Congress of the United States that the head of the affected agency has made a formal decision as to whether to audit vouchers of the agency pursuant to section 3521(b) of title 31, United States Code: Provided, That such certification shall include a written assessment of the agency head's decision by the Inspector General.

SEC. 8124. Of the funds made available under the heading "Operation and Maintenance, Air Force", \$8,000,000 shall be available to realign railroad track on Elmendorf Air Force Base and Fort Richardson.

(TRANSFER OF FUNDS)

SEC. 8125. Upon enactment of this Act, the Secretary of the Navy shall make the following transfers of funds: Provided, That the amounts transferred shall be available for the same purpose as the appropriations to which transferred, and for the same time period as the appropriation from which transferred: Provided further, That the amounts shall be transferred between the following appropriations in the amount specified:

From:

Under the heading, "Shipbuilding and Conversion, Navy, 1994/2003":

DDG-51 Destroyer program, \$7,900,000;

LHD-1 Amphibious Assault Ship program, \$6,500,000;

Oceanographic Ship program, \$3,416,000;

Craft, outfitting, post delivery, first destination transportation, \$1,800,000;

Mine warfare command and control ship, \$604,000;

To:

Under the heading, "Shipbuilding and Conversion, Navy, 1999/2003":

LPD-17 Amphibious Transport Dock Ship program, \$20,220,000.

SEC. 8126. Of the amounts appropriated in Public Law 107-206 under the heading "Defense Emergency Response Fund", an amount up to the fair market value of the leasehold interest in adjacent properties necessary for the force protection requirements of Tooele Army Depot, Utah, may be made available to resolve any property disputes associated with Tooele Army Depot, Utah, and to acquire such leasehold interest as required: Provided, That none of these funds may be used to acquire fee title to the properties.

SEC. 8127. Up to \$3,000,000 of the funds appropriated under the heading "Operation and Maintenance, Navy" in this Act for the Pacific Missile Range Facility may be made available to

contract for the repair, maintenance, and operation of adjacent off-base water, drainage, and flood control systems critical to base operations.

SEC. 8128. Of the total amount appropriated by this Act under the heading "Operation and Maintenance, Defense-Wide", \$3,000,000 may be available for payments under section 363 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (as enacted into law by Public Law 106-398; 114 Stat. 1654A-77).

SEC. 8129. In addition to the amounts appropriated or otherwise made available in this Act, \$8,100,000, to remain available until September 30, 2003, is hereby appropriated to the Department of Defense: Provided, That the Secretary of Defense shall make grants in the amount of \$2,800,000 to the American Red Cross for Armed Forces Emergency Services; \$2,800,000 to the United Service Organizations, Incorporated; and \$2,500,000 to the Intrepid Sea-Air-Space Foundation.

SEC. 8130. None of the funds appropriated in this Act under the heading "Overseas Contingency Operations Transfer Fund" may be transferred or obligated for Department of Defense expenses not directly related to the conduct of overseas contingencies: Provided, That the Secretary of Defense shall submit a report no later than 30 days after the end of each fiscal quarter to the Committees on Appropriations of the Senate and House of Representatives that details any transfer of funds from the "Overseas Contingency Operations Transfer Fund": Provided further, That the report shall explain any transfer for the maintenance of real property, pay of civilian personnel, base operations support, and weapon, vehicle or equipment maintenance.

SEC. 8131. For purposes of section 1553(b) of title 31, United States Code, any subdivision of appropriations made in this Act under the heading "Shipbuilding and Conversion, Navy" shall be considered to be for the same purpose as any subdivision under the heading "Shipbuilding and Conversion, Navy" appropriations in any prior year, and the 1 percent limitation shall apply to the total amount of the appropriation.

SEC. 8132. The budget of the President for fiscal year 2004 submitted to the Congress pursuant to section 1105 of title 31, United States Code, and each annual budget request thereafter, shall include separate budget justification documents for costs of United States Armed Forces' participation in contingency operations for the Military Personnel accounts, the Overseas Contingency Operations Transfer Fund, the Operation and Maintenance accounts, and the Procurement accounts: Provided, That these budget justification documents shall include a description of the funding requested for each anticipated contingency operation, for each military service, to include active duty and Guard and Reserve components, and for each appropriation account: Provided further, That these documents shall include estimated costs for each element of expense or object class, a reconciliation of increases and decreases for ongoing contingency operations, and programmatic data including, but not limited to troop strength for each active duty and Guard and Reserve component, and estimates of the major weapons systems deployed in support of each contingency: Provided further, That these documents shall include budget exhibits OP-5 and OP-32, as defined in the Department of Defense Financial Management Regulation, for the Overseas Contingency Operations Transfer Fund for fiscal years 2002 and 2003.

SEC. 8133. Notwithstanding any other provision in this Act, the total amount appropriated in this Act is hereby reduced by \$59,260,000, to reduce cost growth in travel, to be distributed as follows:

"Operation and Maintenance, Army", \$14,000,000;

"Operation and Maintenance, Navy", \$9,000,000;

"Operation and Maintenance, Marine Corps", \$10,000,000;

"Operation and Maintenance, Air Force", \$15,000,000; and

"Operation and Maintenance, Defense-Wide", \$11,260,000.

SEC. 8134. None of the funds in this Act may be used for research, development, test, evaluation, procurement or deployment of nuclear armed interceptors of a missile defense system.

(INCLUDING RESCISSIONS)

SEC. 8135. (a) The total amount appropriated or otherwise made available in titles II, III, and IV of this Act is hereby reduced by \$1,374,000,000 to reflect revised economic assumptions: Provided, That the Secretary of Defense shall allocate this reduction proportionately to each budget activity, activity group, subactivity group, and each program, project, and activity within each applicable appropriation account: Provided further, That appropriations made available in this Act for the pay and benefits of military personnel are exempt from reductions under this provision.

(b) Of the funds provided in the Department of Defense Appropriations Act, 2002, (division A of Public Law 107-117), \$300,000,000 are rescinded from amounts made available under titles III and IV of that Act: Provided, That the Secretary of Defense shall allocate this rescission proportionately by program, project, and activity.

SEC. 8136. During the current fiscal year, section 2533a(f) of Title 10, United States Code, shall not apply to any fish, shellfish, or seafood product. This section is applicable to contracts and subcontracts for the procurement of commercial items notwithstanding section 34 of the Office of Federal Procurement Policy Act (41 U.S.C. 430).

SEC. 8137. None of the funds appropriated by this Act may be used to convert the 939th Combat Search and Rescue Wing of the Air Force Reserve until the Secretary of the Air Force certifies to the Congress the following: (a) that a functionally comparable search and rescue capability is available in the 939th Search and Rescue Wing's area of responsibility; (b) that any new aircraft assigned to the unit will comply with local environmental and noise standards; and (c) that the Air Force has developed a plan for the transition of personnel and manpower billets currently assigned to this unit.

SEC. 8138. NAVY DRY-DOCK AFDL-47 (a) REQUIREMENT FOR SALE.—Notwithstanding any other provision of law, the Secretary of the Navy shall sell the Navy Dry-dock AFDL-47, located in Charleston, South Carolina, to Detegens Shipyards, Inc., the current lessee of the dry-dock from the Navy.

(b) CONSIDERATION.—As consideration for the sale of the dry-dock under subsection (a), the Secretary shall receive an amount equal to the fair market value of the dry-dock at the time of the sale, as determined by the Secretary, taking into account amounts paid by, or due and owing from, the lessee.

SEC. 8139. From funds made available in this Act for the Office of Economic Adjustment under the heading "Operation and Maintenance, Defense-Wide", \$100,000 shall be available for the elimination of asbestos at former Battery 204, Odiome Point, New Hampshire.

SEC. 8140. The Secretary of Defense may, using amounts appropriated or otherwise made available by this Act, make a grant to the National D-Day Museum in the amount of \$3,000,000.

SEC. 8141. (a) PRELIMINARY STUDY AND ANALYSIS REQUIRED.—The Secretary of the Army shall carry out a preliminary engineering study and environmental analysis regarding the establishment of a connector road between United States Route 1 and Telegraph Road in the vicinity of Fort Belvoir, Virginia.

(b) FUNDING.—Of the amount appropriated by title II under the heading "OPERATION AND MAINTENANCE, ARMY", up to \$5,000,000 may be available for the preliminary study and analysis required by subsection (a).

SEC. 8142. Of the amount appropriated by title V under the heading "NATIONAL DEFENSE SEALIFT FUND", up to \$10,000,000 may be available for implementing the recommendations resulting from the Navy's Non-Self Deployable Watercraft (NDSW) Study and the Joint Chiefs of Staff Focused Logistics Study, which are to determine the requirements of the Navy for providing lift support for mine warfare ships and other vessels.

SEC. 8143. (a) Congress finds that—

(1) the Medal of Honor is the highest award for valor in action against an enemy force which can be bestowed upon an individual serving in the Armed Forces of the United States;

(2) the Medal of Honor was established by Congress during the Civil War to recognize soldiers who had distinguished themselves by gallantry in action;

(3) the Medal of Honor was conceived by Senator James Grimes of the State of Iowa in 1861; and

(4) the Medal of Honor is the Nation's highest military honor, awarded for acts of personal bravery or self-sacrifice above and beyond the call of duty.

(b)(1) Chapter 9 of title 36, United States Code, is amended by adding at the end the following new section:

"§903. Designation of Medal of Honor Flag

"(a) DESIGNATION.—The Secretary of Defense shall design and designate a flag as the Medal of Honor Flag. In selecting the design for the flag, the Secretary shall consider designs submitted by the general public.

"(b) PRESENTATION.—The Medal of Honor Flag shall be presented as specified in sections 3755, 6257, and 8755 of title 10 and section 505 of title 14."

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"903. Designation of Medal of Honor Flag."

(c)(1)(A) Chapter 357 of title 10, United States Code, is amended by adding at the end the following new section:

"§3755. Medal of honor: presentation of Medal of Honor Flag

"The President shall provide for the presentation of the Medal of Honor Flag designated under section 903 of title 36 to each person to whom a medal of honor is awarded under section 3741 of this title after the date of the enactment of this section. Presentation of the flag shall be made at the same time as the presentation of the medal under section 3741 or 3752(a) of this title."

(B) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"3755. Medal of honor: presentation of Medal of Honor Flag."

(2)(A) Chapter 567 of such title is amended by adding at the end the following new section:

"§6257. Medal of honor: presentation of Medal of Honor Flag

"The President shall provide for the presentation of the Medal of Honor Flag designated under section 903 of title 36 to each person to whom a medal of honor is awarded under section 6241 of this title after the date of the enactment of this section. Presentation of the flag shall be made at the same time as the presentation of the medal under section 6241 or 6250 of this title."

(B) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"6257. Medal of honor: presentation of Medal of Honor Flag."

(3)(A) Chapter 857 of title 10, United States Code, is amended by adding at the end the following new section:

"§8755. Medal of honor: presentation of Medal of Honor Flag

"The President shall provide for the presentation of the Medal of Honor Flag designated under section 903 of title 36 to each person to whom a medal of honor is awarded under section 8741 of this title after the date of the enactment of this section. Presentation of the flag shall be made at the same time as the presentation of the medal under section 8741 or 8752(a) of this title."

(B) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"8755. Medal of honor: presentation of Medal of Honor Flag."

(4)(A) Chapter 13 of title 14, United States Code, is amended by inserting after section 504 the following new section:

"§505. Medal of honor: presentation of Medal of Honor Flag

"The President shall provide for the presentation of the Medal of Honor Flag designated under section 903 of title 36 to each person to whom a medal of honor is awarded under section 491 of this title after the date of the enactment of this section. Presentation of the flag shall be made at the same time as the presentation of the medal under section 491 or 498 of this title."

(B) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 504 the following new item:

"505. Medal of honor: presentation of Medal of Honor Flag."

(d) The President shall provide for the presentation of the Medal of Honor Flag designated under section 903 of title 36, United States Code, as added by subsection (b), to each person awarded the Medal of Honor before the date of enactment of this Act who is living as of that date. Such presentation shall be made as expeditiously as possible after the date of the designation of the Medal of Honor Flag by the Secretary of Defense under such section.

SEC. 8144. (a) The conditions described in section 1305 of the National Defense Authorization Act for Fiscal Year 2000 (Public Law 106-65; 22 U.S.C. 5952 note) shall not apply to the obligation and expenditure of funds for fiscal years 2000, 2001, 2002 and 2003 for the planning, design, or construction of a chemical weapons destruction facility in Russia if the President submits to Congress a written certification that includes—

(1) a statement as to why waiving the conditions is important to the national security interests of the United States;

(2) a full and complete justification for exercising this waiver; and

(3) a plan to promote a full and accurate disclosure by Russia regarding the size, content, status, and location of its chemical weapons stockpile.

(b) EXPIRATION OF AUTHORITY.—The authority under paragraph (a) shall expire on September 30, 2003.

SEC. 8145. Effective as of August 2, 2002, the 2002 Supplemental Appropriations Act for Further Recovery From and Response To Terrorist Attacks on United States (Public Law 107-206) is amended—

(1) in section 305(a) (116 Stat. 840), by striking "fiscal year 2002" and inserting "fiscal years 2002 and 2003"; and

(2) in section 309 (116 Stat. 841), by striking "of" after "instead".

SEC. 8146. The Secretary of Defense may modify the grant made to the State of Maine pursuant to section 310 of the 2002 Supplemental Appropriations Act for Further Recovery From and Response To Terrorist Attacks on the United States (Public Law 107-206) such that the modified grant is for purposes of supporting community adjustment activities relating to the closure

of the Naval Security Group Activity, Winter Harbor, Maine (the naval base on Schoodic Point, within Acadia National Park), and the reuse of such Activity, including reuse as a research and education center the activities of which may be consistent with the purposes of Acadia National Park, as determined by the Secretary of the Interior. The grant may be so modified not later than 60 days after the date of the enactment of this Act.

SEC. 8147. None of the funds appropriated by this Act may be used for leasing of transport/VIP aircraft under any contract entered into under any procurement procedures other than pursuant to the Competition and Contracting Act.

SEC. 8148. (a) Funds appropriated by title II under the heading "Operation and Maintenance, Defense-Wide" may be used by the Military Community and Family Policy Office of the Department of Defense for the operation of multidisciplinary, impartial domestic violence fatality review teams of the Department of Defense that operate on a confidential basis.

(b) Of the total amount appropriated by title II under the heading "Operation and Maintenance, Defense-Wide", \$5,000,000 may be used for an advocate of victims of domestic violence to provide confidential assistance to victims of domestic violence at military installations.

(c) Not later than June 30, 2003, the Secretary of Defense shall submit to the Congress a report on the implementation of the recommendations included in the reports submitted to the Secretary by the Defense Task Force on Domestic Violence.

SEC. 8149. (a) LIMITATION ON NUMBER OF GOVERNMENT CHARGE CARD ACCOUNTS DURING FISCAL YEAR 2003.—The total number of accounts for government purchase charge cards and government travel charge cards for Department of Defense personnel during fiscal year 2003 may not exceed 1,500,000 accounts.

(b) REQUIREMENT FOR CREDITWORTHINESS FOR ISSUANCE OF GOVERNMENT CHARGE CARD.—(1) The Secretary of Defense shall evaluate the creditworthiness of an individual before issuing the individual a government purchase charge card or government travel charge card.

(2) An individual may not be issued a government purchase charge card or government travel charge card if the individual is found not credit worthy as a result of the evaluation under paragraph (1).

(c) DISCIPLINARY ACTION FOR MISUSE OF GOVERNMENT CHARGE CARD.—(1) The Secretary shall establish guidelines and procedures for disciplinary actions to be taken against Department personnel for improper, fraudulent, or abusive use of government purchase charge cards and government travel charge cards.

(2) The guidelines and procedures under this subsection shall include appropriate disciplinary actions for use of charge cards for purposes, and at establishments, that are inconsistent with the official business of the Department or with applicable standards of conduct.

(3) The disciplinary actions under this subsection may include—

(A) the review of the security clearance of the individual involved; and

(B) the modification or revocation of such security clearance in light of the review.

(4) The guidelines and procedures under this subsection shall apply uniformly among the Armed Forces and among the elements of the Department.

(d) REPORT.—Not later than June 30, 2003, the Secretary shall submit to the congressional defense committees a report on the implementation of the requirements and limitations in this section, including the guidelines and procedures established under subsection (c).

SEC. 8150. Notwithstanding any provision of the Defense Base Closure and Realignment Act of 1990 (part A of title XXIX of Public Law 101-510; 10 U.S.C. 2687 note) or any other provision of law, the Secretary of the Navy shall transfer

administrative jurisdiction of the portion of the former Charleston Naval Base, South Carolina, comprising a law enforcement training facility of the Department of Justice, together with any improvements thereon, to the head of the department of the Federal Government having jurisdiction of the Border Patrol as of the date of the transfer under this section.

TITLE IX—COMMERCIAL REUSABLE IN-SPACE TRANSPORTATION

SEC. 901. SHORT TITLE.

This title may be cited as the "Commercial Reusable In-Space Transportation Act of 2002".

SEC. 902. FINDINGS.

Congress makes the following findings:

(1) It is in the national interest to encourage the production of cost-effective, in-space transportation systems, which would be built and operated by the private sector on a commercial basis.

(2) The use of reusable in-space transportation systems will enhance performance levels of in-space operations, enhance efficient and safe disposal of satellites at the end of their useful lives, and increase the capability and reliability of existing ground-to-space launch vehicles.

(3) Commercial reusable in-space transportation systems will enhance the economic well-being and national security of the United States by reducing space operations costs for commercial and national space programs and by adding new space capabilities to space operations.

(4) Commercial reusable in-space transportation systems will provide new cost-effective space capabilities (including orbital transfers from low altitude orbits to high altitude orbits and return, the correction of erroneous satellite orbits, and the recovery, refurbishment, and refueling of satellites) and the provision of upper stage functions to increase ground-to-orbit launch vehicle payloads to geostationary and other high energy orbits.

(5) Commercial reusable in-space transportation systems can enhance and enable the space exploration of the United States by providing lower cost trajectory injection from earth orbit, transit trajectory control, and planet arrival deceleration to support potential National Aeronautics and Space Administration missions to Mars, Pluto, and other planets.

(6) Satellites stranded in erroneous earth orbit due to deficiencies in their launch represent substantial economic loss to the United States and present substantial concerns for the current backlog of national space assets.

(7) Commercial reusable in-space transportation systems can provide new options for alternative planning approaches and risk management to enhance the mission assurance of national space assets.

(8) Commercial reusable in-space transportation systems developed by the private sector can provide in-space transportation services to the National Aeronautics and Space Administration, the Department of Defense, the National Reconnaissance Office, and other agencies without the need for the United States to bear the cost of production of such systems.

(9) The availability of loan guarantees, with the cost of credit risk to the United States paid by the private-sector, is an effective means by which the United States can help qualifying private-sector companies secure otherwise unattainable private financing for the production of commercial reusable in-space transportation systems, while at the same time minimizing Government commitment and involvement in the development of such systems.

SEC. 903. LOAN GUARANTEES FOR PRODUCTION OF COMMERCIAL REUSABLE IN-SPACE TRANSPORTATION.

(a) **AUTHORITY TO MAKE LOAN GUARANTEES.**—The Secretary may guarantee loans made to eligible United States commercial providers for purposes of producing commercial reusable in-space transportation services or systems.

(b) **ELIGIBLE UNITED STATES COMMERCIAL PROVIDERS.**—The Secretary shall prescribe requirements for the eligibility of United States commercial providers for loan guarantees under this section. Such requirements shall ensure that eligible providers are financially capable of undertaking a loan guaranteed under this section.

(c) **LIMITATION ON LOANS GUARANTEED.**—The Secretary may not guarantee a loan for a United States commercial provider under this section unless the Secretary determines that credit would not otherwise be reasonably available at the time of the guarantee for the commercial reusable in-space transportation service or system to be produced utilizing the proceeds of the loan.

(d) **CREDIT SUBSIDY.**—

(1) **COLLECTION REQUIRED.**—The Secretary shall collect from each United States commercial provider receiving a loan guarantee under this section an amount equal to the amount, as determined by the Secretary, to cover the cost, as defined in section 502(5) of the Federal Credit Reform Act of 1990, of the loan guarantee.

(2) **PERIODIC DISBURSEMENTS.**—In the case of a loan guarantee in which proceeds of the loan are disbursed over time, the Secretary shall collect the amount required under this subsection on a pro rata basis, as determined by the Secretary, at the time of each disbursement.

(e) **OTHER TERMS AND CONDITIONS.**—

(1) **PROHIBITION ON SUBORDINATION.**—A loan guaranteed under this section may not be subordinated to another debt contracted by the United States commercial provider concerned, or to any other claims against such provider.

(2) **RESTRICTION ON INCOME.**—A loan guaranteed under this section may not—

(A) provide income which is excluded from gross income for purposes of chapter 1 of the Internal Revenue Code of 1986; or

(B) provide significant collateral or security, as determined by the Secretary, for other obligations the income from which is so excluded.

(3) **TREATMENT OF GUARANTEE.**—The guarantee of a loan under this section shall be conclusive evidence of the following:

(A) That the guarantee has been properly obtained.

(B) That the loan qualifies for the guarantee.

(C) That, but for fraud or material misrepresentation by the holder of the loan, the guarantee is valid, legal, and enforceable.

(4) **OTHER TERMS AND CONDITIONS.**—The Secretary may establish any other terms and conditions for a guarantee of a loan under this section, as the Secretary considers appropriate to protect the financial interests of the United States.

(f) **ENFORCEMENT OF RIGHTS.**—

(1) **IN GENERAL.**—The Attorney General may take any action the Attorney General considers appropriate to enforce any right accruing to the United States under a loan guarantee under this section.

(2) **FORBEARANCE.**—The Attorney General may, with the approval of the parties concerned, forebear from enforcing any right of the United States under a loan guaranteed under this section for the benefit of a United States commercial provider if such forbearance will not result in any cost, as defined in section 502(5) of the Federal Credit Reform Act of 1990, to the United States.

(3) **UTILIZATION OF PROPERTY.**—Notwithstanding any other provision of law and subject to the terms of a loan guaranteed under this section, upon the default of a United States commercial provider under the loan, the Secretary may, at the election of the Secretary—

(A) assume control of the physical asset financed by the loan; and

(B) complete, reconstruction, reconstruct, renovate, repair, maintain, operate, or sell the physical asset.

(g) **CREDIT INSTRUMENTS.**—

(1) **AUTHORITY TO ISSUE INSTRUMENTS.**—Notwithstanding any other provision of law, the

Secretary may, subject to such terms and conditions as the Secretary considers appropriate, issue credit instruments to United States commercial providers of in-space transportation services or system, with the aggregate cost (as determined under the provisions of the Federal Credit Reform Act of 1990 (2 U.S.C. 661 et seq.)) of such instruments not to exceed \$1,500,000,000, but only to the extent that new budget authority to cover such costs is provided in subsequent appropriations Acts or authority is otherwise provided in subsequent appropriations Acts.

(2) **CREDIT SUBSIDY.**—The Secretary shall provide a credit subsidy for any credit instrument issued under this subsection in accordance with the provisions of the Federal Credit Reform Act of 1990.

(3) **CONSTRUCTION.**—The eligibility of a United States commercial provider of in-space transportation services or systems for a credit instrument under this subsection is in addition to any eligibility of such provider for a loan guarantee under other provisions of this section.

SEC. 904. DEFINITIONS.

In this title:

(1) **SECRETARY.**—The term "Secretary" means the Secretary of Defense.

(2) **COMMERCIAL PROVIDER.**—The term "commercial provider" means any person or entity providing commercial reusable in-orbit space transportation services or systems, primary control of which is held by persons other than the Federal Government, a State or local government, or a foreign government.

(3) **IN-SPACE TRANSPORTATION SERVICES.**—The term "in-space transportation services" means operations and activities involved in the direct transportation or attempted transportation of a payload or object from one orbit to another by means of an in-space transportation vehicle.

(4) **IN-SPACE TRANSPORTATION SYSTEM.**—The term "in-space transportation system" means the space and ground elements, including in-space transportation vehicles and support space systems, and ground administration and control facilities and associated equipment, necessary for the provision of in-space transportation services.

(5) **IN-SPACE TRANSPORTATION VEHICLE.**—The term "in-space transportation vehicle" means a vehicle designed—

(A) to be based and operated in space;

(B) to transport various payloads or objects from one orbit to another orbit; and

(C) to be reusable and refueled in space.

(6) **UNITED STATES COMMERCIAL PROVIDER.**—The term "United States commercial provider" means any commercial provider organized under the laws of the United States that is more than 50 percent owned by United States nationals.

This Act may be cited as the "Department of Defense Appropriations Act, 2003".

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5010), making appropriations for the Department of Defense for the fiscal year ending September 30, 2003, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

The conference agreement on the Department of Defense Appropriations Act, 2003, incorporates some of the provisions of both the

House and Senate versions of the bill. The language and allocations set forth in House Report 107-532 and Senate Report 107-213 should be complied with unless specifically addressed in the accompanying bill and statement of the managers to the contrary.

Senate Amendment: The Senate deleted the entire House bill after the enacting clause and inserted the Senate bill. The conference agreement includes a revised bill.

DEFINITION OF PROGRAM, PROJECT, AND ACTIVITY

The conferees agree that for the purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100-119) and by the Budget Enforcement Act of 1990 (Public Law 101-508), the term program, project, and activity for appropriations contained in this Act shall be defined as the most specific level of budget items identified in the Department of Defense Appropriations Act, 2003, the accompanying House and Senate Committee reports, the conference report and accompanying joint explanatory statement of the managers of the Committee of Conference, the related classified annexes and reports, and the P-1 and R-1 budget justification documents as subsequently modified by Congressional action. The following exception to the above definition shall apply: for the Military Personnel and the Operation and Maintenance accounts, the term "program, project, and activity" is defined as the ap-

propriations accounts contained in the Department of Defense Appropriations Act.

At the time the President submits his budget for fiscal year 2004, the conferees direct the Department of Defense to transmit to the congressional defense committees budget justification documents to be known as the "M-1" and "O-1" which shall identify, at the budget activity, activity group, and subactivity group level, the amounts requested by the President to be appropriated to the Department of Defense for military personnel and operation and maintenance in any budget request, or amended budget request, for fiscal year 2004.

SPECIAL INTEREST ITEMS

Items for which additional funds have been provided as shown in the project level adjustment tables or items identified in paragraphs using the phrase "only for" or "only to" in this Statement, are congressional interest items for the purpose of the Base for Reprogramming (DD 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, or a revised amount if changed during the conference or if otherwise specifically addressed in the conference report. These items remain special interest items whether or not they are repeated in a subsequent conference report or Statement.

CLASSIFIED ANNEX

Adjustments to classified programs are addressed in the classified annex accompanying this report.

TITLE I — MILITARY PERSONNEL

The conferees agree to the following amounts for the Military Personnel

accounts:

	(In thousands of dollars)			
	Budget	House	Senate	Conference
16250 RECAPITULATION				
16300 MILITARY PERSONNEL, ARMY.....	27,079,392	26,832,217	26,939,792	26,855,017
16350 MILITARY PERSONNEL, NAVY.....	22,074,901	21,874,395	21,975,201	21,927,628
16400 MILITARY PERSONNEL, MARINE CORPS.....	8,558,887	8,504,172	8,507,187	8,501,087
16450 MILITARY PERSONNEL, AIR FORCE.....	22,142,585	21,957,757	22,036,405	21,981,277
16500 RESERVE PERSONNEL, ARMY.....	3,398,555	3,373,455	3,402,055	3,374,355
16550 RESERVE PERSONNEL, NAVY.....	1,927,152	1,897,352	1,918,352	1,907,552
16600 RESERVE PERSONNEL, MARINE CORPS.....	557,883	553,983	554,383	553,983
16650 RESERVE PERSONNEL, AIR FORCE.....	1,243,904	1,236,904	1,237,504	1,236,904
16700 NATIONAL GUARD PERSONNEL, ARMY.....	5,128,988	5,070,188	5,128,588	5,114,588
16750 NATIONAL GUARD PERSONNEL, AIR FORCE.....	2,135,611	2,124,411	2,126,061	2,125,161
	=====	=====	=====	=====
16800 GRAND TOTAL, MILITARY PERSONNEL.....	94,247,858	93,424,834	93,825,528	93,577,552

FORCE STRUCTURE CHANGES

The conferees recommend a total of \$110,100,000 in the military personnel, operation and maintenance, and procurement accounts for force structure that was not included in the budget request, as follows:

[In thousands of dollars]

	Milpers	O&M	Proc.	Total
Air Force B-52 aircraft	2,600	28,000	17,700	48,300
Army Reserve Full-Time Support	11,400	4,000	15,400
Army National Guard Full-Time Support	35,100	11,300	46,400

ACTIVE END STRENGTH

[Fiscal Year 2003]

	Budget	Conference	Conference vs. budget
Army	480,000	480,000
Navy	375,700	375,700
Marine Corps	175,000	175,000
Air Force	359,000	359,000
Total, Active Per- sonnel	1,389,700	1,389,700

MILITARY PERSONNEL, ARMY

ADJUSTMENTS TO BUDGET ACTIVITIES

Adjustments to the budget activities are as follows:

[In thousands of dollars]

Budget Activity 1: Unit
and Individual Train-
ing:

14800	Pay	Group	A
	Training/AT	Participa-	
	tion	Rates

Other Adjustments:

15370 Emergency Spill
Response Program
15390 Additional Full-
Time Support
15400 DHP Accrual Re-
estimated
15420 Adopted Legisla-
tive Proposals

ACTIVE GUARD AND RESERVE PERSONNEL

The conferees recommend a total of -18.000 \$35,100,000 for additional Active Guard and

Reserve (AGR) personnel, instead of \$28,400,000 as proposed by the House and Senate. The additional \$6,700,000, offset by a reduction in Research, Development, Test and Evaluation, Defense-Wide, line 74, will provide 52 AGRs for security at the Missile Defense Agency Test Bed site at Fort Greely, Alaska and 33 AGRs for emergency defensive operations at Fort Greely, Alaska and Colorado Springs, Colorado.

NATIONAL GUARD PERSONNEL, AIR FORCE

The conference agreement on items addressed by either the House or the

Senate is as follows:

MANAGEMENT RESERVE FUNDS

Each service headquarters retains a portion of its operation and maintenance appropriation as a reserve to meet emergent needs. From fiscal year 1999 through fiscal year 2002, the services set aside the following amounts in management reserve funds: Army, \$278,000,000; Navy, \$466,000,000; Air Force, \$200,000,000; and, Marine Corps, \$96,000,000. In fiscal year 2002 alone, the Army set aside \$128,000,000; the Navy, \$150,000,000; the Air Force, \$50,000,000; and, the Marines, \$30,000,000. These funds are used at the discretion of the service chiefs or service secretaries and, since fiscal year 1999, have been used for projects ranging in cost from \$5,000 to \$40,100,000.

The amount retained by the Army in the management reserve fund grew from \$50,000,000 in fiscal year 2001 to \$128,000,000 in fiscal year 2002. The Navy increased its management reserve from \$81,000,000 in fiscal year 1999 to \$150,000,000 in fiscal year 2002. The Marine Corps' management reserve historically has been between \$30,000,000, and \$40,000,000, significantly higher than the Army, Navy, and Air Force reserve funds when considered as a percentage of the operation and maintenance funding provided for

each service. The Air Force management reserve fund has remained constant at \$50,000,000 per year. The services have applied the reserve funds to address a broad range of requirements, ranging from employment kiosks at minority institutions, to funding for a North Atlantic Treaty Organization Meeting, to ship and aircraft depot maintenance.

The conferees acknowledge the utility of retaining a small amount of the operation and maintenance funds appropriate for each service in the service headquarters to address emergent requirements. The conferees are concerned, however, with the recent growth in the amounts retained in the management reserve funds. Further, the growing amounts that the service chiefs and service secretaries have chosen to withhold from distribution to field activities call into question the validity of the budget justification process.

The conferees direct that not more than the following amounts may be used for service chief/service secretary reserve funds:

Operation and Maintenance, Army	\$50,000,000
Operation and Maintenance, Navy	50,000,000

Operation and Maintenance, Marine Corps	10,000,000
Operation and Maintenance, Air Force	50,000,000

Additionally, the conferees direct that not later than 60 days after the end of fiscal year 2003, the Secretary of the Army, the Secretary of the Navy, and the Secretary of the Air Force shall each submit to the congressional defense committees a report detailing service chief/service secretary reserve fund expenditures during the fiscal year.

MIDWAY AIRFIELD

The conferees are aware of the continuing efforts to forge a long term solution for the operation and maintenance of the Midway Island airfield, and are aware that Department of Defense aircraft used the Midway facility 17 times in fiscal year 2002. The conferees encourage the Department of Defense, in conjunction with the Department of the Interior, to identify a long-term contracting solution to continue the availability of this airfield in a manner which meets the refueling and emergency divert airfield requirements of military aircraft.

The conferees are aware that experience in Afghanistan showed once again that while the Army is continuing to invest significant sums in developing better soldier equipment, the system to get that equipment to soldiers still has major shortcomings. Consequently, the Army now estimates that its soldiers spend on average about \$300 per year out of pocket to buy additional necessary equipment ranging from hydration systems to GPS receivers. Equipment shortages reported by American soldiers in Afghanistan and elsewhere include modern knee and elbow pads, hydration systems to replace canteens, GPS receivers, lensatic compasses, sunglasses, helmet pads, polypropylene underwear, assault packs, close combat optics, soldier intercoms, viper binoculars, black fleece and "bear suits", thermal weapons sights, body armor, and other important basic gear. In Afghanistan, some soldiers reported the loss of circulation in their arms in situations where they had to wear the new

Interceptor Body Armor with the ALICE rucksack frame or the current Load Bearing Vest instead of the MOLLE pack for which it was designed. Many Reserve Components have a far worse equipment situation. For example, soldiers from the 1-151st Infantry of the Indiana Army National Guard personally purchased radios from local discount department stores to serve as soldier intercoms for their deployment to Bosnia. With the expected increased OPTEMPO of both active and reserve forces to sustain the war on terrorism, this problem is becoming evermore acute and unacceptable.

The conferees believe the Army leadership must take a fresh look at the entire system for issuing soldier equipment. It is unacceptable for American soldiers—both active and reserve—to be deployed with anything but the best equipment the Army has developed, and it must be a priority objective to dramatically improve the situation where soldiers deploy with lower quality gear that could cost their lives. In the short term this will require more investment in the Soldier Enhancement Program, the Centralized Funding and Fielding activity, and other accounts whose purpose is to field new equipment to soldiers expeditiously. In the long term, the Army must retool its practices and procedures for equipping its soldiers, in order to field the most advanced gear faster and to more soldiers. The Secretary of the Army is directed to submit a report to the congressional defense committees by May 1, 2003 assessing and identifying the major soldier equipment shortages in all major active and reserve component units, identifying the highest priority Army-wide soldier equipment items that require higher procurement rates and faster distribution, and explaining how the Army plans to address those needs. This report shall also present the Army's plan and timetable for transforming its practices and procedures for procuring and distributing soldier equipment in order to dramatically improve the distribution of mod-

ern soldier equipment across the board to all units—both active and reserve.

NATIONAL MEMORIAL CEMETERY OF THE
PACIFIC

The conferees are pleased that the Department of the Army has been able to accomplish the necessary research and coordination with the Department of Veterans Affairs in order to bring about the remarking of 178 graves at the National Memorial Cemetery of the Pacific, to properly denote service members killed on December 7, 1941 on United States Ships *Oklahoma*, *West Virginia*, *California*, *Utah*, *Nevada*, and *Curtis*, as well as Hickam Air Field. The Conferees understand that the new grave markers will be provided to the National Cemetery in Hawaii by approximately November 20, 2002 with the goal of replacing the 178 grave markers by December 7, 2002.

INTERNET ACCESS KOREA

The conferees direct that of the funds provided in Operation and Maintenance, Army, \$2,500,000 shall be available only to accelerate the Army Knowledge Online pilot program to full implementation in order to provide access to internet and electronic mail services for soldiers stationed in the Republic of Korea.

FORT BAKER

The conference agreement provides an additional \$2,500,000 to continue infrastructure repairs at Fort Baker. The accompanying bill provides authority to transfer these funds under the same terms and conditions and to the same federal recipient as specified under Operation and Maintenance, Army, in P.L. 107-117

LOWRY BOMBING RANGE

The Conferees are aware of the unique environmental clean-up measures needed at the former Lowry Bombing and Gunnery Range, and recognize the importance of expediting restoration and containment activities to permit planned development in the

surrounding area to proceed without delay. The conferees encourage the Corps of Engineers to provide sufficient resources, and select appropriate clean-up and containment methodologies, in a timely manner, to ensure that the Jeep demolition range and the 20-millimeter range areas are safe for future economic, educational and recreational activities.

SUSTAINMENT, RESTORATION AND
MODERNIZATION

The conferees direct that facilities sustainment, restoration and modernization funds recommended in this bill shall provide the following program baseline in fiscal year 2003. Any adjustments directed in the bill shall be applied to this baseline:

[In thousands of dollars]

BROADWAY ARMORY PROJECT

The conferees direct the Secretary of the Army to provide funding, from within available funds under Operation and Maintenance, Army, for the Chicago Park District's Broadway Armory project, consistent with Section 8161 of Public Law 107-117.

OPERATION AND MAINTENANCE, NAVY

The conference agreement on items addressed by either the House or the Senate is as follows:

9530 CINCPACFLT Ultra-thin Client Pilot Program	5,000

EX-ORISKANY DISPOSAL

The conferees recommend an additional \$2,800,000 in Operation and Maintenance, Navy for the remediation, demilitarization and disposal of the Ex-Oriskany in the manner determined by the Secretary of the Navy to be most advantageous.

NAVAL SHIPYARD APPRENTICE PROGRAM

The conferees agree to provide an increase of \$10,000,000 for the Shipyard Apprentice program. The conferees direct that during

fiscal year 2003 the Navy shall induct classes of no fewer than 125 apprentices, respectively, at each of the Naval Shipyards. The conferees further direct the Navy to include the costs of the fiscal year 2004 class of apprentices in the budget request.

NAVY PILOT HUMAN RESOURCES CALL CENTER

The conferees direct that of the funds provided in Operation and Maintenance, Navy, not less than \$1,000,000 shall be made available for the Navy Pilot Human Resources Call Center, Cutler, Maine.

CASUALTY CARE RESEARCH CENTER

The conferees recommend \$4,300,000 for the Center of Excellence for Disaster Management and Humanitarian Assistance (COE), of which \$600,000 shall be made available for the Casualty Care Research Center.

CENTRAL KITSAP SCHOOL

The conferees included a general provision, Section 8108, that includes \$2,700,000 for a grant to the Central Kitsap School District for the construction and outfitting of the Central Kitsap School special needs learning center, to meet the needs of Department of Defense special needs students at Submarine Base Bangor, Washington.

CLASSIFICATION OF VESSELS

The American Bureau of Shipping has been expressly designated in 46 U.S.C. 3316(a) as the chosen instrument of the United States Government in classifying all vessels owned by the United States Government (including those leased or bareboat chartered) and in matters related to classification. The conferees therefore note with approval Military Sealift Command's compliance with those requirements in its recent request for proposal for a high speed vessel and expect continued compliance in all subsequent procurements, excluding experimental or service unique vessels, theater-assigned assets, or as designated by the service secretary. Congress designated the American Bureau of Shipping for those purposes in furtherance of the national interest in a strong merchant marine and industrial base, and the conferees expect all government agencies to comply with 46 USC 3316(a).

NAVY MARINE CORPS INTRANET

The conferees believe that the Navy has made significant progress in establishing an adequate test plan for the Navy Marine Corps Intranet. Accordingly, the conferees have included a general provision requiring

that the next NMCI decision point include an evaluation of the Operational Assessment and a certification to the congressional defense committees that the results of the assessment are acceptable for additional seat orders.

The conferees remain concerned, however, about the legacy application challenges the program faces and believe that greater attention must be paid to innovative, commercially available secure technologies and solutions to address this problem. In an NMCI Stakeholders' Council Issue Paper dated more than one year ago, CINCPACFLT proposed the exploration of using ultra thin clients as a solution to both the security and software incompatibilities certain legacy applications present to the NMCI network. To date, these recommendations have not been acted on. The conferees recommend \$5,000,000 to conduct a pilot program at CINCPACFLT using ultra thin clients integrated with a network security solution previously evaluated by the National Security Agency at a Level of Trust not less than B2, and currently at a minimum Common Criteria Evaluation Assurance Level (EAL) of not less than 4.

OPERATION AND MAINTENANCE, MARINE CORPS

The conference agreement on items addressed by either the House or the Senate is as follows:

duty and Reserve CSAR air crews to the United Kingdom to participate in an Inter-fly program to train, operate, evaluate and exchange operational techniques and procedures on the EH-101. The Air Force has identified mission deficiencies with the current

CSAR platform for future requirements, which include mission reaction time, inadequate range, insufficient cabin space, poor survivability, insufficient situational awareness, and inadequate adverse weather capability. Following the Inter-fly program, the

Secretary of the Air Force shall report to the congressional defense committees on the suitability of this aircraft as the future CSAR platform.

LEGACY

The conference agreement provides \$8,400,000 for continuation of the Legacy program. From within these funds, the conferees direct the Department to continue naval archaeology programs in the Lake Champlain basin. Of equal importance to the conferees are the reclamation of the C.S.S. *Alabama*, the recovery and preservation of the U.S.S. *Monitor*, the U.S.S. *Constitution* Museum, the Graveyard of the Atlantic Museum, the U.S.S. *Massachusetts* and other

naval vessels of Battleship Cove, the preservation of the cruiser *Olympia* of the Independence Seaport Museum, the preservation of the LST 325 in the Port of Mobile and restoration of the Lincoln Cottage of the Armed Forces Retirement Home. The Undersecretary of Defense (Comptroller) shall report to the Appropriations Committees no later than March 15, 2003, on the allocation of Legacy funding, and the status of the projects named above.

MOTOR VEHICLE SAFETY INITIATIVES

The conferees are aware of Department of Defense data showing that the leading cause of death and serious injury for all military personnel is motor vehicle crashes as opposed to training accidents or combat. Between fiscal year 2001 and the first 10 months of fiscal year 2002, Department of Defense data show fatalities among military personnel in motor vehicle crashes have increased by 35 percent—from 191 to 258. Fiscal year 2002 would appear to be the highest motor vehicle fatality rate for military personnel in at least four years, with the Marine Corps experiencing an especially high death rate compared to the other services. The Marine Corps reports that of the 25 Marines killed in motor vehicle crashes in fiscal year 2001 and 46 killed in fiscal year 2002, well over half were not wearing seat belts. During the Thanksgiving holiday period, law enforcement officials across the nation will conduct special seat belt enforcement activities as part of the U.S. Department of Transportation Click It Or Ticket program. The conferees strongly encourage the Secretary of Defense to direct all services to join the Marine Corps in actively participating in this program and other similar seat belt usage efforts throughout the year. The Secretary is directed to submit a report to the

congressional defense committees within 90 days of enactment of this Act summarizing personal motor vehicle safety statistics of each service for the last five fiscal years and outlining the plans of each service to increase efforts to reduce the level of deaths and injuries suffered by its personnel from motor vehicle accidents.

DLAMP

The conferees remain concerned about the focus and management of the Defense Leadership and Management Program (DLAMP). Though during fiscal year 2002 DLAMP restructured, the outcome of the restructure is unclear and the full costs of the program are poorly defined. The Department needs to insure that the restructured program is more mission-oriented, focused, efficient, and effective. Additionally, the conferees direct that any reductions to this program cannot be applied to the leased facility in Southbridge, Massachusetts.

STARBASE

The conferees are aware of the high demand and strong support for the STARBASE civil-military program that has reached over 200,000 youths and their families at 39 locations. The conferees urge the Department to strengthen its management of this program in line with the recommendations made in the STARBASE program annual report. The conferees direct the Secretary of Defense to provide a report to the congressional defense committees by no later than March 1, 2003 summarizing the status of implementing program improvements in the areas of systematic assessment, core curriculum, host service component regulations, STARBASE resource/training center, startup program standardization, and quality control.

OPERATION AND MAINTENANCE, ARMY RESERVE

The conference agreement on items addressed by either the House or the Senate is as follows:

ADJUSTMENTS TO BUDGET ACTIVITIES
Adjustments to the budget activities are as follows:

[In thousands of dollars]

Budget Activity 1: Operating Forces:	
19530 Division Forces/ECWCS	2,800
19640 Forces Readiness Operations Support/Controlled Humidity Preservation	2,000
19650 Land Forces System Readiness/Homeland Security DERF Transfer—Enhanced Secure Communications	5,900
19650 Land Forces System Readiness/Homeland Security DERF Transfer—Enhanced Secure Communications	25,600
19650 Land Forces System Readiness/Information Operations Sustainment	1,500

19680 Base Support/CT-FP DERF Transfer—Access Control Program	20,000
19680 Base Support/Homeland Security DERF Transfer—Enhanced Secure Communications	30,700
19680 Base Support/Salute our Services Pilot Project	170
Budget Activity 4: Administration and Servicewide Activities:	
19980 Administration/Headquarters Program Growth	–5,000
19990 Servicewide Communications/Homeland Security DERF Transfer—Enhanced Secure Communications	2,400
Other Adjustments:	
20160 Additional Military Technicians	4,000

SECURE WIRELESS TECHNOLOGY

The conferees recommend that of the funds requested in the Defense Emergency Response Fund and transferred to Operation and Maintenance, Army Reserve, for enhanced secure communications, \$4,500,000 may be available to increase the availability of current generation NSA-approved secure nationwide digital cell phones to meet urgent service needs. Furthermore, the conferees believe that significant development opportunities have arisen in this area since the submission of the budget request. An accelerated research and development investment strategy could realize advancements that would greatly benefit all defense community users of this technology. The conferees direct the Department to consider accelerating the National Security Agency's continued development of secure cellular wireless technology and multi-band functionality. To accomplish this the conferees would be supportive of a reprogramming of \$10,000,000 to support development of a more robust secure nationwide cellular capability with multi-band functionality.

OPERATION AND MAINTENANCE, NAVY RESERVE

The conference agreement on items addressed by either the House or the Senate is as follows:

TOTAL PROCUREMENT.....	67,220,034	70,285,272	71,526,725	71,548,217

PROCUREMENT OF SECURITY VEHICLES

The conferees are concerned about the justification provided for the procurement of physical security vehicles. The services' budget requests provide little explanation for the number of vehicles requested or the fluctuation in costs from one year to the next. In fact, the current budget request presents a disparity in costs by service ranging from \$180,000 to \$250,000 per physical security vehicle. The conferees believe that a better presentation of the request for procurement of these vehicles is necessary. Accordingly, the conferees direct the Under Secretary of Defense (Comptroller) to be the central coordinator of all budget justification material for physical security vehicle procurement. The Under Secretary shall submit to the

congressional defense committees a separate consolidated justification that clearly explains each service's requirement and the maximum purchase cost authority requested.

NATIONAL IMAGERY AND MAPPING AGENCY
(NIMA)

NFIP/JMIP CONSOLIDATION

The House included language directing that all NIMA funding be consolidated within the National Foreign Intelligence Program (NFIP) account. The Senate did not include such language. In response to the House direction, the Secretary of Defense stated that he is working with the Director of Central Intelligence (DCI) to determine that most efficient resource strategy for NIMA and is committed to revising the

NIMA budget appropriately in the fiscal year 2004 President's Budget Request. The conferees appreciate the commitment of the Secretary of Defense on this matter, and on the basis of this commitment, the House recedes.

SUPPORT TO SMALL BUSINESS

The conferees recognize the importance of small business to the Department's procurement chain. In order to effectively compete in federal procurement processes, small businesses require proficiency in electronic commerce and electronic business practices. As such, the conferees recommend the Department seek innovative methods for providing support to small business supply providers in these areas and full funding of the Supply Chain Management program.

AIRCRAFT PROCUREMENT, ARMY

The conference agreement on items addressed by either the House or

Senate is as follows:

(In thousands of dollars)				
	Budget	House	Senate	Conference

UH-60 BLACKHAWK HELICOPTERS

The conference agreement includes \$269,916,000 to procure 19 UH-60 Blackhawk helicopters. This is an increase of \$116,555,000, providing for an additional seven aircraft. Of the additional aircraft in the conference agreement, two UH-60L aircraft are available only for the Army Reserve as described in House Report 107-532. Of the additional aircraft, three shall be HH-60L Medical Evacuation (MEDEVAC) models available only for units of the Army National Guard, and two aircraft shall be UH-60L models available only for units of the Army National Guard.

CH-47F UPGRADE PROGRAM RESTRUCTURING

The conferees agree to provide an additional \$39,100,000 to facilitate the restructuring of the CH-47F Chinook helicopter upgrade program. Given the critical importance of this improved helicopter to the Army's Objective Force, these funds should be used to facilitate a program restructuring in order to upgrade the full fleet of helicopters (which is currently 465) at the most efficient economic rate, which the conferees believe is between 36 and 48 helicopters per year. The Army is directed to ensure that out-year budgetary and program plans are implemented to meet 100 percent of the

Army's CH-47F Objective Force helicopter requirement by no later than 2016.

ATIRCM

The conferees agree not to rescind \$3,000,000 for ATIRCM as recommended by the House. These funds should have been reprogrammed to USSOCOM when responsibility for this program was moved to USSOCOM. The conferees direct the Army to expeditiously submit a reprogramming to the Congress in order to properly realign these funds to Procurement, Defense-Wide.

M113 Carrier Modifications

The Department of Defense's budget request for this program contained funding only for the fielding of current M113A3s and the purchase of new T-150 track to be used by the Counter Attack Corps. Unfortunately, the budget request contained no funding for upgrades of the M113A2 to the more modern, more survivable A3 variant. While the conferees support the Army's desire to fund those technologies and systems that best support the Army's goal of transformation, the conferees believe our current front line soldiers should not be denied the benefits of modern technology already in the industrial base. Therefore, in addition to funds requested for fielding current M113A3s, the conferees direct that up to \$15,000,000 be used only for M113 upgrades.

Hydra Rockets

The conferees strongly urge the Army to ensure that adequate funding is included in the fiscal year 2004-2009 Program Objectives Memorandum to sustain the industrial production base for Hydra Rockets until the Advanced Precision Kill Weapons System (APKWS) is in production in the fiscal year 2005-2006 timeframe.

Bradley Fighting Vehicle Ammunition

The conferees strongly urge the Army to ensure that adequate funding is included in the fiscal year 2004-2009 Program Objectives Memorandum to sustain the industrial production base for Bradley IFV KE rounds until a new round is in production in the fiscal year 2005-2006 timeframe.

OTHER PROCUREMENT, ARMY

The conference agreement on items addressed by either the House or

Senate is as follows:

CONTINUITY OF OPERATIONS

The budget request included \$215,000,000 in funding under the Defense Emergency Response Fund for activities associated with upgrades and improvements to alternate relocation sites. The conferees have provided \$120,000,000 for these activities. The conferees note that the Army, which is the executive agent, has provided little justification for these funds, no plan for their execution, has not coordinated military construction requirements at the sites, and has not demonstrated a commitment to support funding for these activities in subsequent years. For these reasons, the conferees direct that none of the funds provided for alternate relocation

sites may be obligated until 30 days after the Secretary of the Army provides a report to the congressional defense committees which provides, in detail, the proposed use of funding, a timeline for execution, a review of necessary improvements to infrastructure, and a plan for funding in subsequent years.

STRYKER BRIGADE COMBAT TEAMS

In order to enhance the Army's transformation initiatives, the conferees provide an additional \$59,500,000 for fielding of the Stryker Brigade Combat Teams (SBAT). Of this amount, \$42,500,000 is provided in the "Operation and Maintenance, Army" appropriation and \$17,000,000 in the "Other Pro-

curement, Army" appropriation. The conferees direct that the additional operation and maintenance funding be made available to the Army Materiel Command Transformation Support Office, specifically to support the fielding of the six brigade teams.

GENERATORS

The conference agreement provides \$79,180,000, as provided in the budget request, for generators and associated equipment. Of this amount, the conferees direct that no less than \$2,400,000 shall be available only for the procurement of 2kW Military Tactical Generators, as proposed in the budget request.

AIRCRAFT PROCUREMENT, NAVY

The conference agreement on items addressed by either the House or

Senate is as follows:

CVN-77 INTEGRATED WARFARE SYSTEM (IWS)

The conferees agree to provide \$90,000,000 for the CVN-77 Integrated Warfare System (IWS) instead of \$250,000,000 as proposed by the House and no funding as proposed by the Senate. The conferees do not agree to the House restriction on the obligation of funds for the CVN-77 IWS contract data package.

It is the sense of the conferees that every opportunity should be taken to include potentially transformational technologies on the CVN-77 as it is being constructed. This will not only provide enhanced warfighting and defensive capabilities in the near-term, but also lay a cornerstone for risk and cost

reduction on the CVN(X) program which is also strongly supported by the conferees.

To that end, the conferees direct that the additional funds provided are only for transformational technologies and initiatives for other CVN-77 IWS to include: (1) design and development of a common flexible island, (2) full service integrated networks to include data, voice, sensor, and HM&E monitoring and control, (3) multi-modal display workstation concepts using middleware and open system architectures, and (4) integrated advanced strike and mission planning capabilities for both the ship and embarked airwings.

The conferees also direct the Assistant Secretary of the Navy for Research, Develop-

ment, and Acquisition to provide, no later than March 15, 2003, a revised program acquisition strategy for the CVN-77 which incorporates these transformational initiatives and establishes a foundation for regular technology refresh and product improvements during the life cycle of the ship.

ROPELESS ELEVATOR

The conferees understand the Department of the Navy is working on design concepts for ropeless elevator systems in aircraft carriers. The conferees support this effort and encourages the Navy to continue this development in future defense budgets.

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
(in thousands of dollars)

	Budget	House	Senate	Conference
3 SUBMARINE PROPELLERS	10,641	4,241	10,641	4,241
Seawolf Installation Availability Delay		-6,400		-6,400
12 STRATEGIC PLATFORM SUPPORT EQUIP	26,692	41,692	26,692	39,492
Submarine Common Electronics Equipment Replacement (Note: Only for procurement of AN/UYQ-70 family equipment to modernize submarine combat systems.)		+15,000		+12,800
16 ITEMS LESS THAN \$5 MILLION	123,449	142,449	124,949	136,049
Fuel Catalyst		+3,000		+3,000
Fuel and Engine Maintenance Savings System (FEMSS)		+3,500		+1,800
Total Ship Information Management Systems (TSIMS) for CVNs		+2,500		+1,800
Wireless Network Capable Application Processors Factory		+10,000		+8,500
ICAS			+8,000	+4,000
Premature Smartship Procurement			-6,500	-6,500
22 STANDARD BOATS	33,832	35,832	33,832	35,232
25 Person Life Rafts (Note: The additional funds provided are only to be used for 25 Person Life Rafts.)		+2,000		+1,400
24 OPERATING FORCES IPE	17,134	21,134	42,134	38,934
Expeditionary Maintenance Facility		+4,000		+2,800
IPDE Enhancement and PDM Interoperability			+10,000	+7,000
PHNSY Equipment			+15,000	+12,000
27 RADAR SUPPORT	0	10,000	0	13,700
AN/SYS-2(V) 11 Track Management System for FFG-7s		+5,000		+4,300
Back Fit of Signal Processor ECP into DDG-51, LHA, LSD, LPDs, and CVs ships		+5,000		+4,300
SPS-73(V) (Note: Only for continued upgrade and installation of the SPS-73(V) radar on Navy ships.)				+5,100
29 SSN ACOUSTICS	251,909	231,009	236,909	237,909
TB-29A - Operational Testing Delay		-22,400	-15,000	-15,000
TB-23 Towed Array		+1,500		+1,000
30 UNDERSEA WARFARE SUPPORT EQUIPMENT	3,775	15,275	3,775	12,975
CV-TSC Modernization		+4,500		+3,200
Surface Ship Torpedo Defense (Note: Funds are only to procure new improvements to the AN/SLQ-25A torpedo countermeasure system.)		+7,000		+6,000
33 SUBMARINE ACOUSTIC WARFARE SYSTEM	21,686	24,686	21,686	23,186
Submarine Acoustic Intercept Improvement Initiative		+3,000		+1,500
38 AIEWS	15,808	0	0	0
Program Termination		-15,808	-15,808	-15,808
39 INFORMATION WARFARE SYSTEMS	5,158	7,158	7,158	7,158
Transfer from DERF		+2,000	+2,000	+2,000
40 SHIPBOARD IW EXPLOIT	77,066	87,066	87,066	87,066
EW Readiness Support - Transfer from DERF		+10,000	+10,000	+10,000
42 NAVY TACTICAL DATA SYSTEM	0	9,000	0	7,700
AN/UYQ-70 Fleet Peripheral Emulation Fielding		+5,000		+4,300
Q-70 Shore Sites		+4,000		+3,400
43 COOPERATIVE ENGAGEMENT CAPABILITY	66,736	74,736	66,736	72,736
CEC Accelerated Fleet Introduction / Low Cost Planar Array Antennas		+8,000		+6,000
56 AUTOMATIC CARRIER LANDING SYSTEM	17,447	17,447	11,747	11,747
Premature Procurement			-5,700	-5,700

	Budget	House	Senate	Conference
57 NATIONAL AIR SPACE SYSTEM	20,000	20,000	5,000	5,000
Program Delays			-15,000	-15,000
61 ID SYSTEMS	32,633	31,833	32,633	31,833
MK XII Common Digital Transponder - Unjustified				
Cost Growth		-800		-800
70 INTEG COMBAT SYSTEM TEST FACILITY	4,498	8,498	4,498	7,898
Q-70 Integrated Combat Systems Test Facility				
Installations		+4,000		+3,400
72 ITEMS LESS THAN \$5 MILLION	9,037	13,037	9,037	12,437
Production of Q-70 Computer Aided Dead Reckoning				
Tracer (CADRT)		+4,000		+3,400
73 SHIP COMMUNICATIONS AUTOMATION	161,235	165,235	161,235	163,635
Mission Systems Technology and Interoperability Center				
(MSTIC) communications upgrades		+4,000		+2,400
74 COMMUNICATIONS ITEMS UNDER \$5 MILLION	16,307	30,607	16,307	28,507
Q-70 Based IT-21 Advanced Tactical Servers (Note:				
Only for procurement of AN/UYQ-70 advanced tactical				
servers to support the IT-21 Block 1 Upgrade Program.)		+9,000		+7,700
AN/UYQ-70 Secure Voice System Hardware for Surface				
Ships		+5,300		+4,500
76 SUBMARINE COMMUNICATION EQUIPMENT	132,874	127,874	117,874	122,874

F-22

The conferees agree with the language in the House and Senate reports regarding the F-22 program. In addition, the conferees agree, with some modification, to a general provision included in the House bill related to the F-22 testing program. Finally, of the amounts provided for the F-22, the conferees designate \$207,000,000, requested for the producibility improvement program, as a special interest item. If the Air Force believes it is necessary to use these funds for an alternative purpose, the Department must submit a prior approval reprogramming.

C-17 AIRCRAFT

In the Department of Defense's fiscal year 2003 budget submission, the Air Force did not request a sufficient amount to fully fund the purchase of 15 C-17 cargo aircraft per year. Instead, it requested only the amount of funds it expected to obligate each year to start production of 15 aircraft, and financed the remaining costs in later years. This financing scheme runs counter to the "full funding" principles which guide Federal government procurement practice, and thereby creates a future liability for the Air Force and Congress. For this reason, the conferees disapprove the Air Force's C-17 financing proposal. As such, the conference agreement includes an increase of \$585,900,000 over the budget request to fully fund the purchase of 15 C-17 aircraft in fiscal year 2003. Additionally, the conferees agree to retain House language which directs that funds made available within the "Aircraft Procurement, Air Force" account be used for advance procurement of 15 aircraft.

NATO AWACS

Not later than 60 days after the enactment of this Act, the Commander in Chief of the United States European Command shall submit a plan to the congressional defense committees that provides for the refurbishment and re-engining of the NATO AWACS aircraft fleet. This report should reflect the significant contribution made by the NATO AWACS fleet in response to the attack on the United States on September 11, 2001, and

the invocation of Article V of the North Atlantic Treaty. The plan shall also describe any necessary memorandum of agreement between the United States and NATO for the refurbishment and re-engining of these aircraft.

APPLICATION OF BERRY AMENDMENT TO MULTI-YEAR AIRCRAFT LEASE PILOT PROGRAM

Due to the special circumstances surrounding the Multi-Year Aircraft Lease Pilot Program authorized in fiscal year 2002, Congress enacted Section 308 of P.L. 107-206 to clarify Berry Amendment restrictions on the use of foreign sourced specialty metals in commercial aircraft to be leased under this program. In this case, the Congress concurred with views expressed by Air Force officials that the unique financial and time-sensitive requirements of the aircraft lease arrangements and the administrative complexity involved in making Berry Amendment determinations on a plane-by-plane basis for over 100 aircraft built under commercial practices instead of under military acquisition procedures would add so much cost and delay that the entire program would be undermined. Enactment of Section 308 was intended to provide the opportunity to ensure that the Air Force would be able to economically procure air refueling tanker replacement aircraft necessary to the national security while maintaining the overall integrity of the Berry Amendment for future application.

The conferees note the assertion expressed by some industry officials that if the aircraft manufacturer for this lease program were allowed to calculate Berry Amendment requirements on a system-level basis for the entire fleet of aircraft, it could demonstrate that these aircraft contain a very high percentage content of domestically produced specialty metals such as titanium. The conferees believe this data could be useful in future deliberations about this program. The Secretary of the Air Force is therefore directed to provide the congressional defense committees with estimates of the amount, value, and overall percentage of foreign and domestic-sourced specialty metals (under the definitions of the Berry Amendment) to

be used in the fleet of leased aircraft under this program and how this compares to the specialty metal content of military aircraft that have been procured by the Air Force over the last five years. The Secretary shall use such methodology as he determines will provide the most accurate estimates at a reasonable cost after consultations with the specialty metals and aircraft manufacturing industries. This report shall be submitted to Congress no later than six months after enactment of this Act.

PREDATOR UNMANNED AERIAL VEHICLE (UAV)

The conferees agree to provide an additional \$26,000,000 for the acquisition of not less than three Predator B turboprop aircraft, including spares. Should the program office determine there are additional costs for aircraft, spares, support equipment, sensors, and production efforts which cannot be accommodated within the amount appropriated, the Air Force should consider submitting to Congress the appropriate reprogramming request to fund these requirements.

The conferees agree to provide an additional \$68,000,000 in transfer from the Defense Emergency Response Fund for the acquisition of Predator A UAVs. This amount, when added to the request of \$23,068,000, is for the acquisition of 22 air vehicles.

DEFENSE AIRBORNE RECONNAISSANCE PROGRAM

The conferees agree to reduce funding for the RIVET JOINT Quick Reaction Capability (QRC) by \$12,700,000 instead of \$15,000,000 as proposed by the House and no reduction as proposed by the Senate.

The conferees are aware the Air Force preferred to have these funds transferred to a different line in the Aircraft Procurement, Air Force account to fund the same QRC on the COMPASS CALL platform. The conferees agree that should the Air Force determine that it wishes to proceed with putting this QRC on the COMPASS CALL aircraft, it should submit a request to reprogram funds and justify the requirement for expanding the program.

MISSILE PROCUREMENT, AIR FORCE

Advanced SEAL Delivery System

The conferees agree to provide \$4,800,000 for the procurement of lithium ion batteries for the Advanced SEAL Delivery System (ASDS). The conferees expect that USSOCOM will consider all available options and select the one most suitable to the operating environment of the ASDS.

NATIONAL GUARD AND RESERVE EQUIPMENT

The conference agreement on items addressed by either the House or the

Senate is as follows:

	(In thousands of dollars)			
	Budget	House	Senate	Conference

NATIONAL GUARD & RESERVE EQUIPMENT				
RESERVE EQUIPMENT				
ARMY RESERVE				
MISCELLANEOUS EQUIPMENT.....	---	---	15,000	10,000

TOTAL, NATIONAL GUARD EQUIPMENT.....	---	---	80,000	60,000
TOTAL, NATIONAL GUARD & RESERVE EQUIPMENT.....	---	---	130,000	100,000

MISCELLANEOUS EQUIPMENT

The conferees agree that the Chiefs of the Reserve and National Guard components could exercise control of modernization funds provided in this account. The conferees further agree that separate submissions of a detailed assessment of its modernization priorities by the component commanders is required to be submitted to the defense committees. The conferees expect the component

commanders to give priority consideration to the following items: HMMWV, Family of Medium Tactical Vehicles, Commercial Construction Equipment, AN/TMQ-41A Meteorological Measuring Sets, Bladefold Kits for Apache Helicopters, Combat Arms Training Systems, Firefinder Systems, the National Guard Lightway Project and the Paul Revere Portal, Next Generation Small Loader, Modern Burner unit, APN-21 beacon radar,

P4RC+(P5) airborne combat training pods, APN-241 radar, F-16 Re-engining, Abrams Full-crew Interactive Skills Trainer, Cockpit Air Bag System, and Deployable Force-on-Force Integrated Range System.

DEFENSE PRODUCTION ACT PURCHASES

The conferees agree to provide a total of \$73,057,000 for the Defense Production Act Purchases, the amount of the budget request.

TITLE IV – RESEARCH, DEVELOPMENT, TEST AND EVALUATION

The conference agreement is as follows:

(In thousands of dollars)				
	Budget	House	Senate	Conference

RECAPITULATION

MAGNETO INDUCTIVE INITIATOR

The President's budget request includes \$3,000,000 to be used for Engineering and Manufacturing Development of the Magneto Inductive Initiator. The conferees support the rapid fielding of this capability which will allow for U.S. forces to have a remote precision demolition capability that is highly reliable in hardened structures, bunkers, caves, buildings, and in the littoral surf zone. The conferees ask to be kept apprised of the progress of this important program.

SOLID STATE LASERS

There has been substantial technical progress in the ongoing solid state laser development efforts, and the need to continue rapid progress toward developing an Army tactical laser weapons capability for the Objective Force. Therefore, the conferees urge the Army to allocate \$11,200,000, as proposed in the fiscal year 2003 budget request, for High Energy Laser Technology to the current Solid State Heat Capacity Laser program.

BRILLIANT ANTI-ARMOR TECHNOLOGY (BAT) AND BAT P3I SUBMUNITION PROGRAM

The conferees agree with the recommendations found in both the House and Senate reports to terminate the BAT program, and accordingly, include a reduction of \$145,293,000 to this program. The conference agreement also provides \$45,000,000 of the funds requested for this program for the purpose of developing and testing a multi-mode seeker technology. In addition, the conferees direct the Army establish a new project code for the seeker development to distinguish this work from the base BAT and BAT P3I programs.

LOITERING ATTACK MISSILE REQUIREMENTS REVIEW

The conferees direct the Secretary of the Army to submit a report to the congressional defense committees by no later than March 31, 2003, comparing and contrasting the cost, technical risk, schedule risk, and

combat capability of replacing the planned Loitering Attack Missile (LAM) with a comparable capability centered on the use of Unmanned Aerial Vehicles (UAV) with a smart seeker munition. This report shall assess whether a UAV with a smart seeker munition can provide equal or better combat capability within the same or a shorter timeframe compared to use of the LAM under the existing Army Objective Force Transformation plan. This report shall also include an analysis of the relative capabilities of each system to discern friend or foe in real time and to limit collateral damage. It shall also assess whether a UAV/smart munition option provides better value and greater overall combat effectiveness to the Army when considering the added potential of combining surveillance and strike capability on the same platform.

FUTURE COMBAT SYSTEM AND INTELLIGENT MINEFIELDS

The conferees agree to provide an additional \$105,000,000 for the Army's next generation warfighting capability, the Future Combat System. The conferees also agree with the Senate's language that encourages the Army to invest part of this additional funding into a development program for a next generation intelligent minefield. The conferees direct that the Army clearly define the requirements for a next generation intelligent minefield and ensure compliance with the Ottawa Treaty, and report back to the House and Senate Appropriations Committee with detailed plans for such a system. The conferees understand that the Army has already begun this process with plans to incorporate the Intelligent Munitions System (IMS) into the Future Combat System. The conferees urge that the Army consider using a portion of this additional funding to begin development of the IMS. Funds for the intelligent minefield may be obligated before the Milestone B decision for the Future Combat System program, for demonstration and validation of technologies as appropriate.

FUTURE TESTING REQUIREMENTS

The conferees agree with the House report language requiring the Secretary of Defense to provide a report on Future Testing Requirements. The Senate did not address this matter. The conferees direct the Secretary of Defense to submit this report to the congressional defense committees not later than May 1, 2003. The report should provide an analysis of the capabilities of the test ranges, including the need for investment in new equipment; the capabilities of current modeling and simulation techniques used in testing and evaluation; recommend a means of using modeling and simulation techniques to make the testing of weapons systems more efficient and effective; and propose a five-year plan of integrated investment for both ranges and modeling and simulation techniques.

NON-LINE OF SIGHT (NLOS) CANNON

The conferees agree to align the funding proposed in the Crusader budget amendment of the Non-Line of Sight (NLOS) Cannon to the Artillery Systems-Demonstration/Validation program to ensure that the experienced Army staff who were developing the Crusader will lead the effort to migrate these technologies, and to develop the NLOS cannon. The conferees, therefore, have included a total of \$368,500,000, for the Non-Line of Sight Cannon and Resupply Vehicle Program in Artillery Systems Demonstration/Validation, to develop a Non-Line of Sight Cannon. This amount is an increase of \$173,000,000 above the President's budget request. The conferees direct that this additional funding be used to integrate cannon technologies with a suitable platform and munitions to ensure that this NLOS Cannon can be delivered in the 2008 timeframe. Finally, the conferees direct the NLOS Cannon program office to closely coordinate its program with the Army's Future Combat Systems program office.

COMBAT SUPPORT HOSPITAL-MOBILE SURGICAL
UNIT

The conferees understand that the Army is working to develop a replacement system to the deployable medical hospital. Accordingly, \$2,500,000 is provided to the U.S. Army Medical Research and Materiel Command, Ft. Detrick, MD, to prototype a 44-bed Combat Support Hospital consistent with the concept design of the U.S. Army Medical Center and School's ICT report on the Future Medical Support System.

M934 MORTAR—LOW COST COURSE CORRECTION
MODULE

The conferees are aware of recently concluded tests sponsored by Army PM-Mortar which support further demonstration and evaluation of the Low Cost Course Correction (LCCC) module for the M934 Mortar. The conferees also note the positive performance of the LCCC module as reported by the Army and encourage the Secretary of the Army to

address future funding requirements for the LCCC module and future testing requirements.

ARMY ASSAULT RIFLE EARLY
TRANSFORMATION

The conferees are aware of significant Army progress in developing the XM-8 assault rifle as a stand-alone module of the XM-29 assault weapon program. The XM-8 appears to offer significant improvements over the current M-4 assault rifle and may be worthy of fielding on an expedited basis. The conferees direct the Secretary of the Army to review the costs, benefits and feasibility of accelerating replacement of the M-4 with the XM-8. The Secretary shall submit a report to the congressional defense committees by no later than April 1, 2003, comparing and contrasting the cost, weapon performance/capabilities, technical risk, schedule risk, and improvements in overall combat capability of fielding the XM-8 assault

rifle module of the XM-29 assault weapon under an initial block development approach compared to the current fielding plan. This report shall specifically assess the benefits of an early block development fielding of the XM-8 in providing equal or better combat capability in a shorter timeframe, and the overall benefits to soldier effectiveness and survivability, compared to waiting for final development of the XM-29 under the existing Army Objective Force Transformation Plan.

PSEUDOFOLLICULITIS BARBE

The Conferees agree that Pseudofolliculitis Barbe (PFB) is a serious condition that impacts many African American military personnel and deserves additional attention. The conferees strongly encourage the Department of Defense to act quickly on a plan of action to initiate research into more effective treatments and control of this problem.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, NAVY

FORCENET

The conferees agree to provide an appropriation of \$13,000,000 for the Navy's FORCENET program instead of \$20,000,000 as proposed by the House and no appropriation as proposed by the Senate.

Despite the conferees interest in the goals of FORCENET, a program the Chief of Naval Operations considers a key transformation enabler for the 21st Century Navy, concerns remain about the lack of specificity and documentation provided thus far by the Navy. While a solid organizational structure for the development of FORCENET requirements has been established, the Navy must now refine the program's plan and scope. To ensure continued oversight of this important program, the conferees direct that the Secretary of the Navy submit, by May 1, 2003, a detailed report on the FORCENET program. At a minimum, the report shall identify the five-year estimated cost of the program, describe the long term and short term program objectives, define requirements, detail the spiral development and testing milestone plan, and indicate how each existing system will be integrated into the FORCENET approach.

JOINT STRIKE FIGHTER—F136
INTERCHANGEABLE ENGINE

The conferees have included an additional \$29,750,000 for the Joint Strike Fighter Interchangeable Engine Program only to continue the current effort to develop and maintain two, competing, interchangeable engine programs for the Joint Strike Fighter.

UNMANNED AERIAL VEHICLES

The conferees agree to provide a total of \$262,459,000 for the Navy's tactical unmanned aerial vehicles program.

Broad Area Maritime Surveillance (BAMS): The conferees agree to provide an additional \$42,300,000 for the Navy BAMS UAV. Of this amount, \$28,300,000 is a transfer from the Defense Emergency Response Fund and shall only be used for the projects and activities as described in justification material submitted by the Navy and detailed in House

Report 107-532; \$7,000,000 is to determine the requirement for utilizing existing infrastructure resident in the Tactical Support Centers (TSCs) at P-3/EP-3 bases for hosting the BAMS mission planning and control and to initiate equipment upgrades as necessary; and \$7,000,000 is for Global Hawk HAEUAV producibility initiatives such as tooling enhancements and improvements and special test equipment, an effort which the Navy shall coordinate with the Air Force.

The conferees believe the Navy should initiate a technology program to improve maritime ISR, including space-time processing algorithms from electro-optical data.

The conferees agree with the reporting requirements contained in House Report 107-532 with respect to the BAMS UAV.

VTOL UAV Operational Testing: The conferees agree to reduce by \$4,000,000 the Navy's request for operational testing of the Vertical Take Off and Landing UAV instead of \$9,000,000 as proposed by the House. This reduction is taken without prejudice and may be applied as a general reduction to the program.

USMC Pioneer upgrades: The conferees agree to provide a total of \$16,000,000 for upgrades to the Pioneer UAV used in support of the Marine Corps; \$7,000,000 is provided in the Research, Development, Test and Evaluation, Navy appropriation and \$9,000,000 is provided in the Weapons Procurement, Navy appropriation. The conferees direct that these funds, and any additional funds as required, shall be used only to upgrade the Pioneer UAV in support of the Marine Corps.

VTOL UAV Rescission: The conferees agree not to rescind \$2,000,000 from the \$5,000,000 appropriated to the Research, Development, Test and Evaluation, Navy account in fiscal year 2002 as proposed by the House. The conferees agree that these funds are excess to the requirement for which originally appropriated and therefore direct that these funds instead be used by the Navy to establish a Joint Program Office with the Air Force for the Predator B and Global Hawk UAVs. To the extent that there may be similar vehicle

and sensor requirements for the Navy and the Air Force, the Joint Program Office could facilitate the development of requirements, program management, acquisition support, testing and training.

Joint Operational Test Bed (JOTBS): The conferees further agree to provide an additional \$4,100,000 for the Joint Operational Test Bed System (JOTBS) project. The conferees further agree to the language contained in House Report 107-532 with respect to designation of the Deputy Chief of Naval Operations for Warfare Requirements and Programs (N7/N78), as the program sponsor. The conferees direct the Navy to evaluate the JOTBS prototype to determine if the system adequately addresses Service requirements and if so initiate the development of the necessary documentation of requirements.

NAVAL FIRES NETWORK

The conferees agree to provide an additional \$7,500,000 in the Land Attack Technology program for Naval Fires Network (NFN), of which \$2,500,000 is for the tactical dissemination module. The conferees agree that remaining funds shall be used to continue architecture design for NFN, to study and initiate a design for the Joint Fires Center, improve training devices, and support major Fleet exercises.

The conferees have also provided an additional \$1,300,000 in the Distributed Common Ground Station line to continue development of an open architecture and sustain modernization and enhancement of precision strike capabilities for NFN.

TREATMENT OF RADIATION SICKNESS
RESEARCH

The conference agreement provides \$3.4 million for the establishment of a blood bank for the purpose of treating patients exposed to high doses of radiation. The conferees agree that these funds are to establish a blood bank with an entity that has a demonstrated track record in this specific area.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, AIR FORCE

The conference agreement on items addressed by either the House or
the Senate is as follows:

B-1 DSUP PROGRAM

Despite development problems which have plagued the Air Force's B-1 Defense System Upgrade Program (DSUP), the conferees agree to provide the fiscal year 2003 funding requested for this program. Concerned, however, by the need to continue modernizing the B-1 bomber so the aircraft can undertake combat missions in various threat environments, the conferees direct the Air Force to use these funds to explore alternative towed decoy and defensive systems other than the ALE-55 towed decoy included in the Department of Defense's original request. The Secretary of the Air Force shall report to the congressional defense committees on the allocation of these funds not later than January 1, 2003. Finally, the conferees approve a rescission totaling \$45,500,000 of prior year funds in excess to the Air Force's DSUP requirements.

MC2C

The conference agreement provides a total of \$338,089,000 for the Multi-sensor Command and Control Constellation (MC2C) program. This level is more than sufficient to fully fund all planned MP-RTIP design and platform adaption activities for the coming year. Given the reported technical difficulties this program recently experienced in initial testing, the conferees strongly urge the Air Force to use any remaining funds for sensor and command and control system integration development efforts.

SPACE SURVEILLANCE (MSSS)

The conference agreement includes funding of \$48,472,000 for the MSSS program. Of this amount, \$13,000,000 shall be used to continue the Panoramic Survey Telescope and Rapid Response System. In addition, \$2,000,000 shall be used only to fund the High Accuracy Net-

work Determination System. The conferees are aware of security and electromagnetic interference concerns from antennas located near the site, and recommend allocating up to \$5,000,000 for assisting in the relocation of the antennas. The remaining research funds should be allocated by on-site officials to programs which offer the greatest potential return. The conferees expect the officials to consider the following programs for funding: MATRIX, NEAT, and HSN.

ADVANCED POWER TECHNOLOGY

To improve technology transition and the incorporation of advanced power concepts into vehicles and facilities, the conferees direct the Secretary of the Air Force to prepare a plan for establishing an Advanced Power Technology office to support the program manager for support equipment, ground vehicles, and bare base. The plan should be provided to the House and Senate Appropriations Committees with the submission of the Department of Defense fiscal year 2004 budget request.

ENDURANCE UNMANNED AERIAL VEHICLES

The conferees agree to provide a total of \$352,743,000 for the Air Force's endurance unmanned aerial vehicles program, including an additional \$31,000,000 for the continued development and testing of the Global Hawk endurance UAV system and sensor requirements.

Global Hawk Defensive System: The conferees do not agree to the Budget request for an additional \$30,000,000 for the development of a U-2 like defensive system for the Global Hawk UAV.

Global Hawk SIGINT Sensor Development: The conferees agree to transfer \$59,000,000 requested for Global Hawk SIGINT sensor development, and the development efforts

these funds were requested to support, into a new line entitled Global Hawk Advanced Payload Development and Support.

Global Hawk Advanced Payload Development and Support: The conferees agree to provide a total of \$84,000,000 in this new line, of which \$59,000,000 is a transfer from the SIGINT Sensor Development line, including the High Band Subsystem development effort, and \$15,775,000 is a transfer from the Airborne Reconnaissance Systems Sensor Development line. It is the intent of the conferees that the Air Force work with the Navy and the Army to identify new and existing sensor technologies for a high altitude UAV, including a day/night hyperspectral sensor system developed by an Air Force laboratory, and use the funds appropriated to develop, test and demonstrate payload options to enhance Global Hawk UAV mission capabilities. The conferees directed the Air Force to submit by January 15, 2003, a plan for expenditure of these funds.

The conferees support the Air Force's Airborne Signals Intelligence Payload (ASIP) program, a common high altitude SIGINT sensor based on the ongoing HBSS program and a new low band effort based on existing technology. The ASIP program is the Office of Secretary of Defense approved program designed to replace the failed Joint SIGINT Avionics Family (JSAF) program. The fiscal year 2003 estimated cost for ASIP is \$31,400,000, of which \$17,900,000 shall be funded from Global Hawk SIGINT sensor development (Advanced Payload Development and Support) and \$13,500,000 from funds provided in a separate line for U-2 SIGINT systems. The conferees direct the Navy to evaluate its requirements and participate in the ASIP effort as appropriate.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, DEFENSE-WIDE

The conference agreement on items addressed by either the House or the Senate is as follows:

CHEMICAL AND BIOLOGICAL DEFENSE

The conferees agree to establish a "Chem-bio Defense Initiatives Fund" within the Department of Defense's Chemical and Biological Defense program, and provide an increase of \$25,000,000 for this purpose. The Secretary of Defense is directed to allocate these funds among the program proposals listed below in a manner which yields the greatest gain in our chem-bio defensive posture. The program proposals to be considered are:

- The National Center for Biodefense;
- Chem-bio Threat Mitigation technologies;
- Global Pathogen Science Portal;
- Advanced Sensors for Chem-bio Agents;
- Rapid Sensitive Biowarfare Protection;
- Diagnostic Tool for Biowarfare;
- Ultra-High Field Instrumentation;
- Urban Security Initiative;
- Chemical Imaging Biothreat Detection;
- Biological Agent Sensor/Detection System;
- Chem-bio Air Filtration System;
- Food Safety and Security Sensors;
- Bioinformatics;
- Phylogenetic- and PCR-based Detector System
- Field Portable Nucleic Acid Bioterrorism Detection;
- LISA-Inspector Transportable Chem-bio Detection System;
- Distributed Chemical Agent Sensing and Transmission;
- Wide-Area Standoff Chem-bio Agent Detection System;
- Air Purification for Protection System;
- Rapid Antibody-based Countermeasures;
- Oral Anthrax Antibiotic;
- Plant Vaccine Development;
- Rapid Response Sensor Networking for Multiple Applications; and
- Chemical Biological Incident Response Force (CBIRF).

ANTHRAX VACCINE SUPPLY PREPAREDNESS

The conferees are concerned about the adequacy of the supply and production capacity for the only FDA-licensed anthrax vaccine currently available in the U.S. to protect our military and civilian defense personnel from the demonstrated and potential future threat of anthrax. The Secretary of Defense is directed to provide a report which assesses the immediate and short-term preparedness and potential future total biowarfare defense need for the FDA-licensed anthrax vaccine, the potential need for expanded production capacity to mitigate risks of an event which could result in a halt to current vaccine production. The Secretary shall submit this report to the congressional defense committees within 90 days after enactment of this Act.

CHRONIC MULTI-SYMPTOM ILLNESSES

The conferees have provided \$5,200,000 to extend research on chronic multi-symptom illnesses with a special focus on the relationship between Gulf War Illnesses and other diseases, fibromyalgia, chronic fatigue syndrome, and multiple chemical sensitivity. Within this amount up to \$2,000,000 may be made available for research in the Upper Great Plains Region.

MEDICAL FREE ELECTRON LASER

The conferees agree that the work the universities are doing in conjunction with the Department of Defense to develop the medical free electron laser is vital to address a wide variety of research problems that are important to military personnel and civilian

populations. The conferees provide \$12,000,000 to continue research within the Department of Defense for this program and expect that these funds, along with any associated out-year funding, be retained within the Department of Defense.

BALLISTIC MISSILE DEFENSE

The conferees agree to provide a total of \$7,387,856,000 for ballistic missile defense research and development and related procurement activities. This reflects a reduction of \$14,400,000 from the President's request and transfers to other accounts totaling \$28,700,000.

Last year the conferees provided guidance in the Statement of Managers accompanying the Department of Defense Appropriations Act, 2002 regarding special interest projects, budget justification material and reprogrammings. The conferees agree to sustain that guidance and, unless exceptions to the contrary are provided explicitly, expect the Department to continue abiding by this guidance in the future.

RADAR RESEARCH

The conferees agree to transfer \$22,00,000 from the Missile Defense Agency's sea-based midcourse program to the Navy (PE 0604307N) only for the development of Solid State S-Band radar. In addition, the conferees agree that \$10,000,000 in sea-based mid-course funds shall be made available for radar development, the exact technology to be decided by the agency after a careful consideration of relevant radar options.

SEA-BASED X-BAND RADAR

Subsequent to submission of the budget for fiscal year 2003, the Missile Defense Agency proposed acquisition of a sea-based X-band radar, in lieu of the land based concept previously funded by Congress. At this juncture, the conferees have little insight about the technical and cost feasibility of this initiative, or about the impact of this change on the schedule and test plan for the ground based mid-course segment. On that basis, the conferees direct that none of the funds provided for the ground based mid-course segment program may be obligated to acquire the proposed, foreign built sea-based platform until 30 days after the Director of the Missile Defense Agency provides a report to the congressional defense committees on the cost and schedule impact of this approach, including a comparison to the cost and capability of the previously proposed land based site and the technical criteria used to determine that a sea-based platform will provide effective test and operational performance for the missile defense system.

TECHNOLOGY TRANSITION PROGRAMS

The conferees agree to provide \$25,430,000 for technology transition efforts, including the Challenge program, the Quick Reaction Special Projects program, and the Technology Transition Initiative. Of this amount, \$12,800,000 shall be used only to fund the Challenge program. The remainder shall be allocate between the other listed programs, at the discretion of the Secretary of Defense. The Secretary is directed to provide to the congressional defense committees a report detailing his funding allocation decisions with the submission of the fiscal year 2004 Defense budget request.

HISTORICALLY BLACK COLLEGES AND UNIVERSITIES SCIENCE

The conferees direct the Department of Defense to evaluate the programmatic impact

of combining funding and administration for the Historically Black Colleges and Universities Science program, the Hispanic Serving Institutions program, and American Indian Tribal Colleges program under a new program element.

The Department shall provide a report to the congressional defense committees on the results of this evaluation within 120 days of enactment of this legislation.

ADVANCED SEMICONDUCTOR DEVICES

The conferees recommend that the Department of defense conduct a study to examine the long-term DoD acquisition model for advanced semiconductor devices used in military and intelligence applications. This study should address whether a consolidated U.S. semiconductor foundry could offer the U.S. Government a solution to the impending advanced technology procurement challenge. The Department is encouraged to make this study a high priority so that a preliminary assessment can be available by December 2002.

JOINT ROBOTICS

Based on reports received from the Department of Defense and U.S. military field commanders, the conferees agree the Department should proceed expeditiously to test, produce, and field technologically mature robots and other unmanned vehicles for use in combat. As such, the conferees recommend a total increase of \$24,000,000 for the Joint Robotics program. Further, the conferees strongly encourage the Department to retain oversight of this program under the Office of the Secretary of Defense, given the applicability of robots to numerous joint and combined combat missions.

STRATEGIC CAPABILITY MODERNIZATION

The conference agreement includes \$20,000,000 to fund the Department of Defense Strategic Capability Modernization program. The Department shall give priority to upgrading command and control systems and related Strategic Command communication systems in the use of these funds.

INFORMATION SYSTEMS ENGINEERING

The conferees remain interested in the Department of Defense providing a greater focus on its information systems engineering (ISE) effort. This effort is important to enabling the engineering of large-scale information systems for transformation to network-centric operations. Thus, the conferees direct DARPA to continue its efforts to pursue and support ISE research. The conferees urge that the expertise of ICICX and others be used to assist in developing and implementing new management strategies, consistent with the recommendations of the President's Information Technology Advisory Committee.

HOMELAND SECURITY COMMAND AND CONTROL
ADVANCED CONCEPT TECHNOLOGY DEMONSTRATION

The conferees recommend \$3,000,000 for the Homeland Security Command and Control Advanced Concept Technology Demonstration for upgrades to communication and display equipment, and subsequent demonstrations and spiral development at the C2 nodes in Louisiana.

OPERATIONAL TEST AND EVALUATION, DEFENSE

Total	14,579,997	14,600,748	14,961,497	14,843,542

DHP REPROGRAMMING PROCEDURES

The conferees share the concerns expressed in the report accompanying the House version of the Department of Defense Appropriations bill for fiscal year 2003 regarding the diversion of funds from DoD military medical treatment facilities (MTFs) to pay for contractor-provided medical care. To limit such transfers within the Defense Health Program operation and maintenance account, the conferees agree that the Department of Defense shall follow prior approval reprogramming procedures for transfers with a cumulative value in excess of \$25,000,000 into the Private Sector Care activity group.

In addition, the conferees agree that the Department of Defense shall provide budget

execution data for all of the Defense Health Program accounts. Such budget execution data shall be provided quarterly to the congressional defense committees through the DD-COMP(M) 1002.

PEER REVIEWED MEDICAL RESEARCH PROGRAM

The Senate recommended \$50,000,000 for a Peer Reviewed Medical Research program. The conferees agree to provide \$50,000,000 for this program, and recommend the following projects as candidates for study: acellular matrix research for military orthopedic trauma; alcoholism research; amyotrophic lateral sclerosis; and anti-diarrhea supplement; Army nutrition research; augmented care in the chain of stroke survival (AC-CESS); blood-related cancer research; bone-related disease research; cell response to

anti-cancer agents; Mt. Sinai cancer research program; casualty care research center; chiropractic care; epilepsy; infectious disease tracking system; interstitial cystitis research; low vision research; medical digital assistance; miniature renal assist devices; natural toxin detection technology; neuroscience research; Paget's disease; personal intelligent medical assistant; Providence cancer center; respiratory research; smoking cessation; social work research; and Volume Angio CAT (VAC) research.

CHEMICAL AGENTS AND MUNITIONS DESTRUCTION, ARMY

The conference agreement on items addressed by either the House or Senate is as follows:

(In thousands of dollars)

	Budget	House	Senate	Conference
CHEM AGENTS & MUNITIONS DESTRUCTION, ARMY CHEM DEMILITARIZATION—O&M	974,238	974,238	974,238	974,238

Classified	-17,900		-17,900

OFFICE OF THE INSPECTOR GENERAL

The conferees agree to provide \$157,165,000, as proposed by both the House and Senate, for the Office of the Inspector General. Of this amount \$155,165,000 shall be for operation and maintenance, and \$2,000,000 shall be for procurement.

TITLE VII—RELATED AGENCIES

CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY SYSTEM FUND

The conferees agree to provide \$222,500,000 for CIARDS instead of \$212,000,000 as proposed by both the House and Senate.

INTELLIGENCE COMMUNITY MANAGEMENT ACCOUNT

The conferees agree to provide \$163,479,000, of which \$34,100,000 is for transfer to the Department of Justice, instead of 162,254,000 as proposed by the House and \$122,754,000 as proposed by the Senate.

PAYMENT TO KAHŌ'OLAWĒ ISLAND CONVEYANCE, REMEDIATION, AND ENVIRONMENTAL RESTORATION FUND

The conference agreement provides \$75,000,000 for payment to the Kaho'olawa Island Conveyance, Remediation, and Environmental Restoration Fund, instead of \$25,000,000 as proposed by the House and \$80,000,000 as proposed by the Senate.

NATIONAL SECURITY EDUCATION TRUST FUND

The conferees agree to provide \$8,000,000 as proposed by both the House and the Senate.

TITLE VII—GENERAL PROVISIONS

The conference agreement incorporated general provisions of the House and Senate versions of the bill which were not amended. Those general provisions that were amended in conference follow:

The conferees included a general provision (Section 8005) which amends lanaguage providing transfer authority of \$2,000,000,000; requires a request for multiple reprogramming to be made prior to May 31, 2003; and provides additional fiscal year 2002 transfer authority.

The conferees included a general provision (Section 8021) which amends language to

clarify the original intent that incentives authorized in the Indian Financing Act be applied broadly. The conferees expect these adjustments will be implemented expeditiously by the publication of an interim final rule.

The conferees included a general provision (Section 8029) which amends language directing that not more than 6,321 staff years may be funded, and reduces the amount appropriated for defense FFRDCs by \$74,200,000.

The conferees included a general provision (Section 8050) that amends lanaguage recommending rescissions. The rescissions agreed to are:

(Rescissions)

Fiscal Year 2001:	
Procurement of Weapons and Tracked Combat Vehicles, Army C2V	\$9,500,000
Procurement of Ammunition, Army: WAM	4,000,000
Other Procurement, Army: Semitrailers, Tankers	8,000,000
Other Procurement, Navy: JTC TS	5,000,000
Missile Procurement, Air Force: Titan	93,600,000
Fiscal Year 2002:	
Missile Procurement, Army:	
Stinger	5,150,000
Avenger Mods	10,000,000
TOW Fire and Forget ..	13,200,000
LOSAT	9,300,000
Procurement of Ammunition, Army: RADAM	19,000,000
Other Procurement, Army:	
Combat Identification Program	11,000,000
Spares—EHF Terminal ..	10,200,000
Missile Procurement, Air Force:	
MALD	8,900,000
JSOW-B	18,000,000
Titan	87,700,000
Research, Development, Test and Evaluation, Navy:	
Naval T&E Airborne Telemetry System	1,700,000
Research, Development, Test and Evaluation, Air Force:	
B-1B DSUP	45,500,000
B-2 EHF SATCOM	23,500,000
Research, Development, Test and Evaluation, Defense-Wide:	
Towed Decoy	3,000,000

Combat Development	
Activities	4,000,000
VSWMMCM—SAHRV	1,500,000
Passive RW Surviv-	
ability	1,000,000
Chemical and Biologi-	
cal Defense Program	10,000,000

(Note: The conferees agree to rescind Titan funding in fiscal year 2001 and fiscal year 2002 budgeted for program closeout and facilities shutdown. The conferees note that launch delays have deferred the last Titan launch to fiscal year 2005. The conferees believe it is more appropriate to budget for these activities in the year of performance. The conferees have made no adjustments to funds budgeted for special termination costs.)

The conferees included a general provision (Section 8065) which amends language limiting the use of funds. The amended provision includes a government-wide appropriations limitation intended by the conferees to protect the status of a national memorial established under Section 8137 of Public Law 107-117.

The conferees included a general provision (Section 8095) which amends language making funds available for the Arrow Missile Defense Program.

The conferees included a general provision (Section 8099) which amends House language providing \$1,700,000 for the Fisher House Foundation, Inc.

The conferees included a new general provision (Section 8100) which amends Senate language which reduces funds available by \$850,000,000 to reflect savings to be achieved from efficiencies in the procurement of advisory and assistance services.

The conferees included a general provision (Section 8101) which amends language which allows the Secretary of Defense to transfer \$1,279,899,000 to fund increases in the cost of prior year shipbuilding programs.

The conferees included a general provision (Section 8105) which restores and amends a fiscal year 2002 provision which, for the period of fiscal years 2003 through 2005, provides the authority to transfer \$20,000,000 of unobligated balances in "Research, Development, Test and Evaluation, Army" to a current year account only for the continuation of the Army Venture Capital Fund demonstration.

The conferees included a general provision (Section 8108) which amends Senate language appropriating \$7,750,000 to provide assistance by grant or otherwise to public schools that have unusually high concentrations of special needs military dependents enrolled.

The conferees included a new general provision (Section 8109) which amends Senate language which reduces funds available by \$400,000,000 for cost growth in information technology development.

The conferees included a new general provision (section 8112) which amends House language reducing funds available in operation and maintenance accounts by \$120,000,000 for Working Capital Fund cash balance and rate stabilization adjustments.

The conferees included a new general provision (Section 8113) which amends House language reducing funds available in operation and maintenance accounts by \$48,000,000 for excess funded carryover.

The conferees included a new general provision (Section 8114) which amends Senate language providing funds for combating terrorism. The conferees note that the conference agreement includes funds in title II, Operation and Maintenance, above those requested by the President for the service, Defense-Wide, and Reserve component operation and maintenance appropriations. This includes funds specifically requested in the

(Rescissions)

Defense Emergency Response Fund for combating terrorism and related activities, which in this conference agreement have been provided in the operation and maintenance appropriations for proper execution. The provision provides that not less than \$1,000,000,000 of these funds are available for operations of the Department of Defense to prosecute the war on terrorism. The conferees direct that these funds be executed as specifically delineated elsewhere in this statement.

The conferees included a new general provision (Section 8115) that amends House language which provides \$3,400,000 in "Operation and Maintenance, Army National Guard" funds for a grant to the Center for Military Recruitment, Assessment and Veterans Employment.

The conferees included a new general provision (Section 8117) that amends Senate language amending Section 8159 of Public Law 107-117.

The conferees included a new general provision (Section 8118) that amends House language placing limitations on additional NMCI contract work stations until an Operational Assessment has been conducted and certified as acceptable to the congressional defense committees.

The conferees included a new general provision (Section 8119) which amends House language which prohibits acquisition of more than 16 F-22 aircraft until the Under Secretary of Defense for Acquisition, Technology, and Logistics provides a risk assessment to the congressional defense committees.

The conferees included a new general provision (Section 8120) which amends House language that allows for the transfer of funds from the Pentagon Reservation Maintenance Revolving Fund to the Defense Emergency Response Fund.

The conferees included a new general provision (Section 8121) which amends House language concerning development of the Non-Line of Sight (NLOS) Objective Force cannon and resupply vehicle program. Language directs the Army to implement an interim capability before complete fielding of the Objective Force, and ensure that budgetary and programmatic plans will provide for no fewer than six Stryker Brigade Combat Teams.

The conferees included a new general provision (Section 8123) which amends House language that limits expenditure of funds until certain audit decisions have been made.

The conferees included a general provisions (Section 8126) which amends Senate language making funds available from amounts appropriated in Public Law 107-206 under the heading "DEFENSE EMERGENCY RESPONSE FUND", for an amount up to the fair market value of the leasehold interest in adjacent properties necessary for the force protection requirements of Tooele Army Depot, Utah.

The conferees included a general provision (Section 8128) which amends Senate language providing \$3,000,000 of "Operation and Maintenance, Defense-Wide" funds for impact aid for children with severe disabilities.

The conferees included a general provision (Section 8129) which amends Senate language appropriating \$8,100,000 for grants to the American Red Cross, the United Service Organizations, Inc., and the Intrepid Sea-Air-Space Foundation.

The conferees included a new general provision (Section 8135) that amends Senate language which reduces available funds by \$1,674,000,000 to reflect savings from revised economic assumptions.

The conferees included a new general provision (Section 8140) which amends Senate

language which earmarks \$3,000,000 of funds available in this Act for a grant to the National D-Day Museum.

The conferees included a new general provision (Section 8144) which amends Senate language authorizing that up to September 30, 2003, the President may waive conditions described in section 1305 of the National Defense Authorization Act for Fiscal Year 2000 (Public Law 106-65; 22 U.S.C. 5952 note) if the President submits to Congress a written certification meeting several criteria.

The conferees included a new general provision (Section 8145) which amends Senate language amending sections 305 and 309 of the Supplemental Appropriations Act for Fiscal year 2002 (Public Law 107-206).

The conferees included a new general provision (Section 8146) which amends Senate language amending section 310 of the Supplemental Appropriations Act for Fiscal Year 2002 (Public Law 107-206) modifying a grant for the purpose of supporting community adjustment activities relating to the closure of a Naval Security Group Activity.

The conferees included a general provision (Section 8148) which amends Senate language which provides \$5,000,000 of "Operation and Maintenance, Defense-Wide" funds for operation of domestic violence fatality review teams.

The conferees included a general provision (Section 8149) which limits the issuance of government purchase and travel charge cards for Department of Defense personnel. The provision requires the Secretary of Defense to conduct a credit check before issuing to an individual a charge card, and prohibits the issuance of a charge card to an individual who is not found credit worthy. The conferees understand that this provision allows an individual with no credit history to be issued a restricted-use charge, debit, or stored value card.

The conferees included a new general provision (Section 8150) which amends Senate language directing the Secretary of the Navy to transfer administrative jurisdiction of the law enforcement training facility at the former Charleston Naval Base.

The conferees included a new title IX which provides the Secretary of Defense the authority to make loan guarantees to eligible U.S. commercial providers for the purpose of producing commercial reusable in-space transportation services or systems.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 2003 recommended by the Committee of Conference, with comparisons to the fiscal year 2002 amount, the 2003 budget estimates, and the House and Senate bills for 2003 follow:

[In thousands of dollars]

New budget (obligational) authority, fiscal year 2002	\$334,239,062
Budget estimates of new (obligational) authority, fiscal year 2003	366,671,630
House bill, fiscal year 2003	354,712,914
Senate bill, fiscal year 2003	355,405,941
Conference agreement, fiscal year 2003	355,107,380
Conference agreement compared with:

AUTHORIZATION FOR USE OF MILITARY FORCE AGAINST IRAQ RESOLUTION OF 2002

Mr. PAYNE. Mr. Speaker, it is with pleasure I yield 5 minutes to the gentleman from California (Mr. BECERRA), a member of the Committee on Ways and Means.

Mr. BECERRA. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, any nation engaged in a program of building weapons of mass destruction presents a danger to international peace and stability. Any leader who flouts the rule of law is a menace to liberty and democracy.

In my mind, the President has made a strong case that Iraq must disarm, pursuant to the United Nations resolutions enacted following the close of the Persian Gulf War. But the President did not convince me that we should go to war and go it alone, nor has he made the case that we should change our longstanding policy and defy international law and commit to a first strike.

The threat posed by Iraq is a threat which confronts the entire world, not just America. This resolution before us gives the President authorization to send American troops into Iraq to strike unilaterally and, indeed, to strike first. Congress has never before granted this extraordinary power to any previous President. We can address the threat posed by Saddam Hussein without expanding Presidential authority beyond constitutional standards.

A declaration of war is the ultimate act of humankind. It presumes to endow the declarant with the right to kill. In many instances, it amounts to a sentence of death, not just for the guilty but for the innocent as well, whether civilian or soldier. In measurable respects, that is why the Framers of our Constitution wisely assigned the power to commit America to war not to the President but to the people's democratic representatives in Congress.

The President should approach Congress and ask for a declaration of war when and only when he determines that war is unavoidable. The resolution before us leaves the question of war open-ended by both expressing support for diplomacy and authorizing the President to use force when he feels it is the correct course of action. Yet, in his own words, President Bush stated that "war is not unavoidable." So why, then, is he insisting on being given now, today, the power to go to war?

We are the lone superpower economically and militarily in the world. Our words have meaning, our actions have consequences beyond what we can see.

The implications of a unilateral first strike authorization for war are chilling. A unilateral attack could lead the world into another dangerous era of polarization and create worldwide instability. It would also set a dangerous precedent that could have a devastating impact on international norms.

Consider India and Pakistan, Armenia and Azerbaijan, Russia and Chechnya, Cyprus, Taiwan, Colombia, Northern Ireland, Central Africa. How might the people or the government in any of these countries which are engaged in or at the brink of hostilities interpret this resolution today? Why should not other countries adopt the President's unilateral and first strike policy to address conflicts or threats themselves? Would not a unilateral attack galvanize other potential enemies around the globe to strike at the United States and our interests?

In our efforts to focus on what the President described as a grave and gathering danger thousands of miles away in Iraq, let us not lose sight of the dangers which are grave and present, not gathering but present, here at home: the al Qaeda plots targeting our airports, our water treatment facilities, our nuclear power plants, our agricultural crops.

Just this Tuesday, CIA director George Tenet told Congress that Saddam Hussein, if provoked by fears that an attack by the United States was imminent, might help Islamic extremists launch an attack on the United States with weapons of mass destruction. We must consider how our actions may impact on the safety of the American people. The answer may not be always what we expect.

We must also ask, will the death and destruction it takes to eliminate a sovereign, albeit rogue government, lead

to good will by the Iraqi people toward America and Americans?

Well, let us look at the record. During the Gulf War of 1999, we dropped some 250,000 bombs, many of them smart bombs, over a 6-week period on Iraqi forces. That is close to 6,000 bombs per day. We deployed over 500,000 troops. The war cost over \$80 billion. None of that money was spent on reconstruction in Kuwait, and all of this is what it took simply to expel Iraq from tiny Kuwait.

And what is our, and for that matter the world's, recent record on supporting post-war reconstruction? Ask the people of Bosnia and of Kosovo, and now ask the Afghans.

Certainly there are situations where the United States must prepare or be prepared to act alone. I voted in September, 2001, to give the President that power to punish those who attacked this Nation on September 11. But the question is, are we at the point on the question of Iraq to go to war without international support?

Mr. Speaker, the President was clear in his speech on Monday. Iraq can lead us down a dangerous course, but I believe it is time for us to recognize that if we do this, we do this together, not alone.

Let us vote for the separate resolution, go the right way and send a good message, not just to Iraq but to the rest of the world.

Mr. ISSA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in order to have the dialogue stay focused, I think we need to periodically look at the threat.

We have no doubt in this body. Speakers on both sides of the aisle have repeated the need to deal with someone who has used mustard gas and other agents against his own people. There is no question in this body about the war crimes committed by this dictator.

But when we talk about the threat not being imminent, I just want to read from an unclassified document something for us all to focus on as we again talk about do we or do we not empower the President to deal with all the cards in his hand, not missing the one of potential military action.

"Mustard gas, potential agents based on best estimates, 200 metric tons; sarin gas, 200 metric tons; VX, up to 200 metric tons; and anthrax, at least 8,500 liters. That is 2,245 gallons, but it could be as much as 10-fold that, 22,457 gallons of anthrax."

We all know in this body all too well what an almost infinitesimal amount in an envelope can do. I hope that we will think about this as we talk about whether or not to empower the President to have all the full force of our military at his disposal in negotiations.

Mr. Speaker, I reserve the balance of my time.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentlewoman from California (Ms. ESHOO), a member of the Committee on Energy and Commerce.

Ms. ESHOO. Mr. Speaker, I thank the gentleman from New Jersey for yielding time to me.

Mr. Speaker, the Congress is now debating the most serious and sobering of issues, whether we go to war, war against Iraq. We do this as we stand on the threshold of a new century.

I believe this debate is as much about voting to declare war as it is about what kind of country we are and what we want our country to be in the future. This resolution of war is an extraordinary and unwise departure from our history of a principled American tradition, that we stand foursquare against unprovoked attacks and for a foreign policy of deterrence.

The Bush doctrine reverses this policy and sets forth that the United States of America has the unrestricted right to attack other nations. This resolution trades deterrence for preemption. This resolution trade multilateralism for unilateralism.

This go-it-alone policy has become the imprimatur of this administration. We have witnessed their abrogation of nearly every international treaty they inherited from previous Republican and Democratic administrations.

This administration has allowed the underfunding of the Nunn-Lugar law, leaving the tools of terrorists unprotected and up for grabs across the former Soviet Union.

This administration has withdrawn from the ABM Treaty, withdrawn from the Comprehensive Test Ban Treaty, withdrawn from START II, rejected the Biological Weapons Convention, and rejected the International Criminal Court.

This administration makes war the first and only option, rather than a last resort. It has, in one brief summer and fall, upended decades of our time-tested, tenacious foreign policy of deterrence, which has served our Nation and the world so well.

□ 2330

The President has not answered the haunting questions of thousands of my constituents and the American people. Why now? How many troops will we need to wage this war? What will it cost? How long will we be there? What is the plan to manage the chaos in the aftermath of regime change; and, finally, how will it affect the war on terrorism?

Respected military leaders and statesmen have testified to Congress about their deep concerns with preemption and unilateralism. These experts have seriously undercut the President's case of what Saddam Hussein has and the President's remedy to deal with it. And classified briefings have raised more questions than answers.

Today's newspapers were filled with the information that our own intelligence agencies have concluded that Saddam Hussein is unlikely to initiate a chemical or biological attack against the United States. Not one of us carries a brief for Saddam Hussein. We know

what he has done and we know how he rules. We know about his accumulation of chemical and biological weapons and the other weapons that threaten his neighbors and us.

Our answer today, send a thousand troops of weapons inspectors to Iraq. This time they must have unrestricted access to everything and with deadlines to achieve disarmament. The world community will watch and as we disarm him. He will loosen the noose he holds.

We can be tough and principled as we have been in the past. We can bring other nations with us and when we do, Saddam will know he cannot dodge or be deceitful any longer. That is why I support the Spratt resolution which calls for action only if the U.N. determines action is required and the President seeks approval from the Congress.

Finally, Mr. Speaker, when the framers wrote our Constitution, their vision spoke to the innermost yearnings of every human being, then, over the centuries, and now. They created what I have called the best idea that is ever been born: democracy. Their call is the same today in this new century that we lead through the enduring strength of our democratic principles backed by the might we possess. Today our Constitution and my conscience beckon me to oppose the President's resolution for war. I shall vote against the resolution and I urge my colleagues to do so as well.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Connecticut (Mr. LARSON), a member of the Committee on Armed Services.

(Mr. LARSON of Connecticut asked and was given permission to revise and extend his remarks, and include extraneous material.)

Mr. LARSON of Connecticut. Mr. Speaker, I thank the gentleman for yielding me time.

Mr. Speaker, I rise in an effort to unite this body behind the Spratt resolution. I oppose House Joint Resolution 114 because this resolution sets a dangerous new precedent in foreign policy, a policy of preemptive first strikes and go-it-alone unilateralism. This is a radical departure from long-standing United States policy of deterrence, diplomacy, containment and collective security. We are drifting away from the successful coalition-building of former-President George Bush in Desert Storm and our current President's administration's coalition that is currently prosecuting the war on terror in Afghanistan.

We are united behind the President in his continued prosecution of this war on terror, a mission we need to relentlessly pursue and not be deterred from. We are united behind the President in our efforts before the United Nations, and strongly support a tough, new, robust, unfettered weapons inspection process that is currently being negotiated by Colin Powell. We are in unanimous agreement about the brutal dictatorship of Saddam Hussein, the

atrocities he has perpetuated against other nations and his own people, and the need to remove him. We stand united behind our men and women of our armed services no matter the outcome of the vote.

Where we differ is not whether, but how, we address this threat. As former Secretary of State Jim Baker points out it is not whether to use military force to achieve this, but how we go about it. While we address the near-term danger presented by Saddam Hussein, we must be equally mindful of the dangerous long-term consequences of first-strike, go-it-alone policy. To that extent, there is a notable divide in past and current Bush administrations and within this Congress and amongst people across this Nation.

This divide stems from those advocating the abandonment of long-standing policy in favor of going it alone. This is not about the use of force. I voted for the use of force in Kosovo and in Afghanistan. It is about the preemptive and unilateral use of force. The United States is the undisputed preeminent military, social and economic leader in the world; but there are many issues we simply cannot solve alone. Issues like the environment, disease and global economic stability are but a few examples and only further underscore the problematic concerns of our ongoing debate about going alone.

There is no question that we have the military might or that we will prevail against Iraq or any nation. But what lingers is whether we have the restraint as the world's lone superpower to lead by the rule of law and use our terrible swift swords only as a last resort.

The goal of the administration is to isolate Saddam Hussein and bring about his demise. In the process we must make sure that it is not the United States that is isolated and alone. For even with all our military might and resources, we cannot solve all the global problems by ourselves. The internationalist wing of the Republican Party best expressed the perils of preemption, in going it alone in Brent Scowcroft, the former National Security Advisor to both President Ford and former President Bush, who has argued that attacking Iraq will take away from the effort against the war on terror and do long-term damage to the stability needed in the Middle East.

Retired generals like Norman Schwarzkopf and Secretary of State Eagleburger, hardly appeasers, come down on the side of caution and coalition building. General Zinni, retired Commander in Chief of U.S. Central Command, talks about the need to be intensely involved in the peace process between Israel and Palestine. In staying focused on Osama bin Laden and al Qaeda, he wonders aloud about those in the administration who have never served in the military who seem so anxious to place our troops in harm's way; and those in the administration

who characterize heroes like General Wesley Clark, former Commander in Chief of the U.S. European Command, who urged the two-step approach of the Spratt resolution and calls them dreamers.

This is a time that the President, Congress, and the people need to be united. It is why we have introduced the Spratt resolution. This resolution strengthens the President's hand and demonstrates national resolve. It preserves the constitutional authority that resides with Congress and does not abrogate our role to the executive branch.

The people in my district feel strongly about this and have spoken out in town hall meetings. They are deeply opposed to a go-it-alone policy; and while understanding the potential threat posed by Saddam, they want us to pursue the course the President outlined before the United Nations.

Make no mistake, there is broad support for the President and implicit understanding of the awesome responsibility he bears as Commander in Chief. There is also an equal expectation that elected representatives will ask the tough questions and will measure the consequences and collateral damage of our actions. Our system is one of checks and balances; and clearly from my perspective, the use of force preemptively and unilaterally needs to be held in check, debated, discussed and not rubber stamped in a climate of fear and crisis.

The people's House must question the unintended consequences of this new policy. What are those consequences? What will be the collateral damage associated with preemptive unilateral attacks?

I say it can be said no better than our Ambassador to Saudi Arabia, Robert Jordan, when I asked him if we were facing a gathering storm in the Middle East. He replied, no, Congressman, you are from New England. Surely you have read the book or seen the movie. This is not a gathering storm. This has all the makings of the perfect storm.

Our relationship with our allies in the Middle East in the prosecution of the war on terrorism is fragile. There is great unrest in the region from economic instability to religious fanatics spewing hate towards the United States. A preemptive unilateral attack on Saddam Hussein could accomplish what Osama bin Laden failed to do, and that is unite the Islamic world in a jihad against the United States. Going it alone may well bring down a tin pan dictator, but will the consequences of that be the recruitment of tens of thousands of new terrorists bound for our shores?

□ 2340

Thomas Friedman, noted New York Times columnist, spoke at a recent book tour about the long-term consequences of our doctrine, and I was struck by the reaction of a man who simply reached into his wallet and

showed a picture to Friedman of his children.

Nothing else need be said. Support the Spratt amendment.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. HONDA), a member of the Committee on Transportation and Infrastructure.

(Mr. HONDA asked and was given permission to revise and extend his remarks.)

Mr. HONDA. Mr. Speaker, I thank the gentleman from New Jersey for yielding me the time.

I rise this evening as Congress considers one of the most difficult decisions a nation must make. President Bush and leaders from the House negotiated a resolution to authorize the use of force against Iraq. However, this new resolution still allows the President to launch a unilateral, preemptive attack without providing any evidence to Congress that the U.S. is under imminent threat.

The President says that he is willing to go it alone against Iraq as a last resort, but there is no mechanism in this resolution to ensure that it is just that, a last resort.

Let one thing be clear. A vote for this resolution is more than an authorization for use of force. It is a declaration of war, and I will oppose it.

We all agree that it is critical for the United States and the world community to ensure that Saddam Hussein is not developing weapons of mass destruction. I believe we can accomplish this goal by working with the U.N. Security Council to gain consensus on a tough and effective plan to gain unfettered access to inspect Iraq facilities. A powerful multinational force created by the U.N. would carry legitimacy and strong support in the United States and abroad. If the U.N. does not heed our call to action, then other options should be explored.

As of today, it is clear that the administration has yet to exhaust diplomatic options.

Many generals, military strategists and Republican policy-makers have expressed reservations with President Bush's approach to Iraq. Iraq does not exist in a vacuum. The decisions our government makes relative to Iraq will have consequences that will extend to all corners of the world, as well as potentially destabilize the Middle East. Will the concentration of our Armed Forces in Iraq limit our resources for a war against al Qaeda?

Additionally, experts agree that a war against Iraq will be much different than the Gulf War. Intensive, urban combat against an entrenched force is likely. How many thousands of American lives is the administration willing to imperil? What are the long-term plans for the stabilization of Iraq, and how many billions of dollars will this cost American taxpayers?

After September 11, the United States made great strides with the international community in our war

against terror. A unilateral effort by the United States would not only weaken our relationship with our allies but also will increase resentment in the volatile Middle East and further embolden anti-American opinion throughout the world.

We must rid Saddam Hussein of any weapons of mass destruction. However, I urge the administration to continue to work with the U.N. to gain support for a tough resolution with an accompanying national multinational force, if necessary. Diplomatic efforts must continue. This war can still be avoided; and, as such, I cannot vote to put American lives and innocent civilians in harm's way, straight from our war against terror, or create uncertainty that could further hamper our struggling economy.

I will not support this resolution.

Mr. ISSA. Mr. Speaker, it is my pleasure to yield 7 minutes to the gentleman from Iowa (Mr. LEACH), a member of the Committee on International Relations, in fact, the Chairman of the Subcommittee on East Asia and the Pacific and a man who has great insight into this region.

(Mr. LEACH asked and was given permission to revise and extend his remarks.)

Mr. LEACH. Mr. Speaker, as all Members know, this resolution involves a difficult set of decisions that neither the Congress nor the executive can duck. Anyone who is not conflicted in their judgment is not thinking seriously.

For myself, I have enormous regard for our President and great respect for his sworn policy advisers, but I have come to the conclusion that this resolution misfits the times and the circumstances. There may be a case for a regime change, but not for war against Iraq and its people.

Because time is brief, I would like to emphasize three points:

One, given the events of 9/11, a doctrine of preemption has a modicum of legitimacy. But the greater our power, the more important it is to use it with restraint. Otherwise, it will be seen as hubristic, with a strong prospect of counterproductive ramifications. Engaging in war the wrong way can too easily jeopardize the underlying conflict against terrorism and undercut core American values and leadership around the world.

Two, there are many so-called end game elements that have not been adequately addressed. They range from the dilemma of street combat to problems of postwar governance to worldwide Muslim reaction.

Three, and most profoundly, this resolution is based on a misunderstanding of modern science as it applies to weapons of war. The assumption is that there is a compelling case to preempt a nuclear weapons program, but what is little understood is that Iraq already controls a weapon of mass destruction more dangerous than nuclear bombs,

biological agents, and what is underestimated is the nature of his likely response to outside intervention.

The tactical assumption is that Saddam will be on the defensive with an American and British attack, but the likelihood is that, as troubling as end game problems are, the "beginning conflict" issues may be the most difficult ever confronted in the region and possibly in all of modern warfare. When a cornered tyrant is confronted with the use or lose option with his weapons of mass destruction and is isolated in the Arab world unless he launches a jihad against Israel, it is not hard to imagine what he will choose.

Israel has never faced a graver challenge to its survival. The likelihood is that weapons of mass destruction, including biological agents, will be immediately unleashed in the event of Western intervention in Iraq. In the Gulf War, Saddam launched some 40 Scud missiles against Israel, none with biological agents. Today, he has mobile labs, tons of such agents and an assortment of means to deliver them.

It is true that his stockpiles could be larger in years to come, but Members must understand that the difference between a few and a few hundred tons of anthrax or plague may not be determinative. These are living organisms that can multiply. They can invade a region and potentially the planet.

The most important issue is not the distinction between the various resolutions before us, each should be defeated, but the need to rethink our responsibilities in the manner in which they are carried out. Regime change can be peaceful, it can be discreetly violent, but it need not necessarily entail war.

Over the last half century America's led the world in approaches expanding international law and building up international institutions. The best chance we have to defeat terrorism and the anarchy it seeks is to widen the application of law and the institutions, including international ones that make law more plausible, acceptable and, in the end, enforceable.

Strategies of going it alone, doctrines of unilateralism must be reviewed with care. Nothing plays more into the hands of terrorists than America lashing out. Nothing is more difficult for them than international solidarity. Americans would be wise to craft strategies which are based on our original revolutionary appeal to a decent respect for the opinions of mankind.

We used to have a doctrine of MAD, mutually assured destruction, between United States and the USSR. No one seriously contemplated aggression because of the consequences.

Today, for the first time in human history, we have a doctrine of mutually assured destruction between two smaller countries, Iraq and Israel, one with biological weapons, the other nuclear. The problem is that an American intervention could easily trigger an Iraqi bi-

ological attack on Israel which could be met by a nuclear response. Not only would we be the potential precipitating actor but our troops would be caught in crosswinds and crossfire.

□ 2350

This is a strategic precipice we should step back from.

The United States today faces a series of challenges unprecedented in our history.

The 20th century was symbolized by three great international struggles: World War I and the challenge of aggressive nationalism, World War II and the battle against fascism, and the Cold War challenge of defeating communism.

Now the United States is confronted with the menace of international terrorism, a phenomenon as old as recorded history, but with elements that are new because of the potential for access to weapons of mass destruction (WMD), the manipulation of religious precepts, and the transnational character of international terrorism in a globalized world.

At issue today is the potential crystallization of these challenges in the Iraqi regime of Saddam Hussein, and the appropriate response of the United States and the world community.

In American history explaining what we do and why we do it is important. Our first revolutionary document, the Declaration of Independence, was an exposition of political philosophy and an explanation of grievances that compelled Americans to act. Today, in a world in which rumor and paranoia and distrust is pervasive, we are obligated to be precise in laying out our objectives and the rationale for military or other actions.

In this regard, there is in Eastern history a hallowed intellectual methodology for determining when a particular military intervention may be considered ethical. This doctrine, developed by ecclesiastics and jurists, followed by statesmen, instinctively accepted by the peoples of many countries in tradition and right, is the doctrine of just war. What is this doctrine? Briefly, it holds that for war to be considered just, it must be animated by a just cause and informed by righteous intention, that it be undertaken by lawful political authority and only as a last resort, and that resort to force be proportionate to the nature of the wrongs committed.

The just war issue is relevant for two inter-related reasons. First, the issue of war involves the gravest of moral questions. Second, not merely the theory but the history of international relations since the First World War embodies distinctions between just and unjust causes of war. The Covenant of the League of Nations, the United Nations Charter, and the Charter of the Military Tribunal at Nuremberg all reject the doctrine of *realpolitik*, the anarchical notion that ours is a Hobbesian world where might makes right.

Although there is a "realist" school of international relations theory which asserts that raw national interest considerations alone should govern all policy making, the more progressive view is that modern world politics are founded upon a conception of international society analogous to the laws and customs of coercion in domestic societies, that resort to violence in international affairs must be regarded either as response to lawful police action or crime. In other words, resort to armed force in international affairs is legitimate only if it is used on behalf or in service to the funda-

mental principles and purposes undergirding international law.

Thus the moral philosopher Michael Walzer observes that "aggression is the name we give to the crime of war." Indeed, the founders of the United Nations were determined, in the words of the Charter, "to save succeeding generations from the scourge of war . . . and to ensure, by the acceptance of the principles and the institution of methods, that armed force shall not be used, save in the common interest." Similarly, the Charter obligates the Member States of the UN to "settle their international disputes by peaceful means," as well as "refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any State, or in any manner inconsistent with the Purposes of the United Nations" (Articles 2(3) and 2(4)). Instead, the Charter attempts to enshrine a system of collective security in which the security Council is authorized to "determine the existence of any threat to the peace, breach of the peace, or act of aggression" and to "decide what measures shall be taken . . . to maintain international peace and security" (Article 39).

In postwar American diplomacy, the classic exposition of this principle was stated by President Truman in October 1945, when he declared that the fundamentals of American foreign policy would rest in part on the proposition "that the preservation of peace between nations requires a United Nations Organization comprised of all the peace-loving nations of the world who are willing to use force if necessary to insure peace."

The concept of international law enforcement through collective security, therefore, is embodied in the UN Charter and is an integral part of international law, as well as—through the Supremacy Clause—the law of the United States.

Here, the constitutional duty of Congress is clear. Not only does the Constitution vest the power to declare war in Congress, but also it further contemplates that a status or condition fairly described by armed hostility between the U.S. and another state—whether a declared or undeclared war—must be legislatively authorized.

The framers of the Constitution believed that the gravest of all governmental decision—the making of war—should not be the responsibility of a single individual. It should be taken by a democratically elected, geographically and socially balanced legislature after careful debate and deliberation. It would either be tyrannical or irresponsible for a Congress of, by, and for the people to shirk its responsibility and transfer the power to make war to the Presidency. In America, after all, process is our most important product.

In this context, neither the Congress nor the Executive can duck the fundamental question of Constitutional fidelity.

Perspective is always difficult to apply to events of the day, but it would appear that in wake of the events of 9/11 a watershed in American history occurred. A concerned terrorist attack was perpetrated against our institutions, people, and way of life. The imperative to respond is clear. Less clear how and against whom.

In the period following 9/11 the Executive Branch began to articulate a bold new doctrine

of national security, both to shape our response to the new dangers of international terrorism and to define a new vision of leadership for the United States in world affairs.

According to this new national security concept, the United States should be prepared to act decisively and unilaterally to eliminate potential terrorist threats. Because suicidal terrorists use anarchist techniques rather than rely on traditional armies, the case for America to reserve the right to take preemptive, anticipatory military action in the name of self-defense must be considered. In practical terms, since terrorist groups may either be assisted by foreign powers, or seek sanctuary in weak countries with limited control of their own borders, the option to intervene in another nation-state to constrain rogue behavior cannot be ruled out. Likewise, the doctrine contemplates the need to counter the threat that certain despotic regimes—like those the President labeled as evil: Iran, Iraq and North Korea—may develop or actually possess weapons of mass destruction and threaten to use them or put them in the hands of terrorists. In addition, because our own power is so disproportionate, and because the threat from international terrorists so grave, the strategy suggests that America need no longer be constrained in its actions by international rules, treaties, and even traditional security partnerships.

While elements of the new doctrine are not new, the public articulation of a doctrine of preemption is in fact a novel departure. In terms of precedents, the Congressional Research Service reports that the U.S. “has never, to date, engaged in a ‘preemptive’ military attack against another nation. Nor has the U.S. ever attacked another nation militarily prior to its having first been attacked or prior to U.S. citizens or interests having first been attacked, with the singular exception of the Spanish-American War.” The latter being unique, in that the principal stated goal of U.S. military action was to compel Spain to grant Cuba its political independence.

There is of course ample precedent for the United States using its military to intervene in other nations to support our national security interests. Citing the Monroe Doctrine, which outlined American objection to European colonialism in this hemisphere, the United States intervened repeatedly in the Caribbean and Central America in the 19th and 20th centuries. In addition, the U.S. employed overt military force to seek regime change in Mexico in 1914 and Panama in 1989, as well as covert action in Iran and Central America in the 1950s.

Of greater historical relevance, the most significant instance in which the U.S. seriously contemplated preemptive military action was during the Cuban missile crisis of October 1962. Despite the introduction by the Soviet Union of nuclear-capable ballistic missiles into Cuba that could threaten most of the eastern United States, President Kennedy considered and rejected preemptive options, imposed a U.S. military “quarantine” around Cuba, and ultimately reached a peaceful diplomatic solution.

Hence it is imperative that Congress and the American people debate the long-term foreign policy consequences of a potential, largely unilateral, strike against Iraq that may well not be supported by many of our historic allies. It is also crucial that Congress review the logic and implications of a new global strategy

apparently premised on go-it-alone interventionist themes which, if taken to extreme, could erode the foundation of the rule-based, post-World War II international system the United States largely helped to create.

While the threat of transnational terrorism self-evidently requires a robust response, the implication of the United States using its extraordinary power and authority at this critical juncture in world history to enshrine and legitimize the principle of preemption as a basis for conduct in international relations is profound. One need only to contemplate the application of this principle by others elsewhere, such as South Asia, the Taiwan Strait, or the Middle East, to grasp its potential reach.

It is suggested to many around the world that the United States may be disproportionately relying on military power rather than the strength of law and persuasion to attempt to “lock in” a favorable order that commands the allegiance of others. In the language of political scientists, our new approach could suggest a strategy less of transformation than dictation.

The question is not simply whether the new doctrine of preemption has a modicum of legitimacy—the events of 9/11 suggest it does—but whether it is applied with proper judgment and appropriate restraint. The greater the power, the more important it is used with care. Otherwise, the danger is the use of force will be viewed as hubristic with its application likely to be counterproductive. Iraq is a case in point. The goal of regime change must involve an approach that enhances rather than retards international support for core American values like democracy and respect for individual rights. Engaging in war the wrong way can jeopardize the outcome not only of the underlying conflict against terrorism but American leadership on a host of international issues from arms control to commerce to the environment.

Unilateralist approaches sow unease and distrust of American power and American motives from Brussels to Johannesburg, from Sao Paulo and to Seoul. They dissipate reservoirs of good will for the United States and reduce, rather than expand, the pool of cooperation that we can draw on in the future.

The nature of the foreign policy challenges we face—curbing the proliferation of weapons of mass destruction, eliminating terrorism, combating the spread of diseases like HIV/AIDS, promoting free trade and market economics, advancing respect for human rights and the rule of law—cannot be met by one country, no matter how powerful, acting alone.

Three years ago in one of the most irrational acts of the Senate in the 20th century a comprehensive test ban (CTB) was turned down. Upon taking office, the Bush Administration concurred in this judgment, and then in a little noticed decision rejected a protocol that had been long in negotiation to the Biological and Toxin Weapons Convention (BWC) which would have added new verification provisions to that treaty. Ironically, if a CTB had been ratified, there would be more worldwide support for U.S. efforts to deter small states from obtaining nuclear arms and if the BWC protocol had been adopted the case for inspectors entering Iraq would be iron clad.

Count me among those who believe Saddam Hussein must be removed from office and his weapons of mass destruction destroyed, but also as one who is concerned

with the unilateral veer in American foreign policy. We cannot lead the world unless we pay attention and, to the maximum degree appropriate, give respect to the judgments and opinions of others.

Policeman for the world is a lonely beat. It makes us a target. More, not less, vulnerable.

Leadership requires resolve; it also demands restraint, and an understanding that there are both prudential and real limits to America's unparalleled power. Likewise leadership requires magnanimity, an understanding of what causes people to rebel, and an uplifting, inclusive vision of a world order which realistically deals with the causes of conflict.

At issue with the Iraqi crisis is less an outcome where individual nation-states may be winners or losers, but one in which the international system has an enormous stake. From challenge springs opportunity. Hopefully, once the storm clouds have passed, the international community will be able to conclude that the United Nations has functioned as its founders intended. But if this conflict is not resolved in a way that upholds the authority and the credibility of the United Nations, our current international structure will be seriously degraded and grievously jeopardized.

In this regard, as the prospect for conflict increases, the danger of unintended martyrdom also rises. The United States must be careful to ensure that its policies do not turn a tin-horn Hitler into an Islamic Allende.

Hence I would urge the Administration to make it clear to Saddam that in the event he continues to defy the will of the United Nations he will inevitably find himself in the docket before Nuremberg-like proceedings—either the newly established International Criminal Court or perhaps an ad hoc tribunal—for egregious violations of internationally recognized human rights and arms control conventions.

Potentates, whether petty or mighty, who through violation of international law attempt to take the world hostage must be held accountable.

Likewise, the U.S. and UN should make clear that if any individual in Iraq participates in usage or unleashing of a weapon of mass destruction, they also will be held accountable as war criminals.

Tragically, the United States has not been able to become a party to the new ICC, which will be the first permanent international court with jurisdiction to prosecute the most heinous individual violators of human rights—genocide, war crimes, and crimes against humanity.

By background, the United Nations, many human rights organizations, and many U.S. allies have expressed support for the new court. The Administration, however, has renounced any U.S. obligations under the treaty.

Although the U.S. has valid concerns about the ICC—chiefly that the ICC might become politicized and capriciously assert jurisdiction over U.S. soldiers or high officials charged with “war crimes”—our belligerent opposition to the Court also carries obvious downside risks to American leadership.

America's well-deserved reputation as a champion for human rights and extension of the rule of law has been called in question. Our efforts to play hardball in the UN Security Council by threatening to withhold support for UN peacekeeping missions unless the U.S. is granted immunity from the ICC alienated friends and allies abroad. The withholding of

military assistance to members of the ICC may be seen as an attempt to undermine the court and influence the decisions of other countries to join the ICC. By demanding special treatment in the form of immunity from the ICC, the United States is seen as bolstering the perception of its preference for a unilateral approach to world affairs and a determination to operate in the world exclusively on our own terms. As a result, U.S. efforts to build coalitions in support for the war against terrorism as well as the enforcement of UN resolutions against Iraq may have been impaired.

As an early advocate for the establishment of a permanent international criminal court based on balanced recognition of international statutes, I confess to being chagrined both at the inability of the international community to accommodate legitimate American concerns, and the all-or-nothing approach of our government that has left us without effective means to ensure that the ICC operates in ways that are consistent both with credible rule-of-law principles and with sensitivity to U.S. interests designed to advance democratic governance.

The problem is that as a great power called upon to intervene in areas of the world or disputes such as the Balkans, Afghanistan and troubled areas of the Middle East, the U.S. is vulnerable to charges being leveled against actions which we might reasonably consider to be peacekeeping, but another power or government might charge to be something very different. For instance, what would happen if Serbia were to bring a case against an American naval pilot when such a pilot is operating under both a U.S. and NATO mandate? The President has suggested we should, exclusive of all other countries, be allowed to veto over applicability of international law with regard to the ICC. Many other countries, including strong U.S. allies, have angst about this demand because they see this approach as establishing the principle of one country being entitled to operate above the law.

This is not an irresolvable dilemma. When the ICC treaty was under negotiation, it was the assumption of many that the Security Council where all the permanent members have a veto would play a determinative role in bringing matters better the ICC. If such was the case, the United States because of its veto power within the Security Council could fully protect itself as could the other permanent members. Unfortunately, because the past administration played an ambivalent role in development of the treaty, it failed to get the nuances right. This common sense approach was not adopted and the Bush administration was put in the embarrassing position of objecting to an important treaty because of the failed diplomacy of its predecessor.

Based on discussions with European officials it is my understanding that there may be an inclination to seek a reasonable compromise on treaty language, even at this late date. It would appear to be an umbrage to many countries to craft a provision excluding the United States alone from ICC jurisdiction, but it would seem reasonable on a process basis to return to a Security Council role. On this basis the U.S. and the international community could be credibly protected.

The court would function as a treaty organization founded on state consent, while respecting Security Council authority to refer any matters affecting international peace and security to the court's jurisdiction. This approach

has the advantage that it does not make a pure exception for the United States. Understandable concerns of some countries about inequitable protection of the nationals of permanent members of the Council would need to be balanced against the enhanced durability and legitimacy of the court. A protocol to the Treaty ensconcing this approach should be actively pursued today.

Laws, to be effective, must constrain governments in their foreign policies as well as individuals in domestic acts. In order to hold governments accountable there must be individual accountability at the highest as well as lowest levels of society. Justice must be brought to the international frontier or life for too many will, in Hobbes' piercing phrase, continue to be "nasty, brutish, and short."

The central issue in classic just-war theory is the cause question. Just-war theorists from Augustine to Grotius typically referred to an offense that was a just cause for war as an "injuria," a term that meant both injury and injustice. There were three generally accepted just causes of war: defense against aggression, recovery of property, and punishment. Wars waged for the first cause were by their nature defensive. Wars taken to avenge injustice and to punish the perpetrators of injustice were offensive in the sense that defense of one's own territory was not necessarily at issue.

It is sometimes forgotten that the United States is engaged in military combat operations over Iraq almost every day, maintaining "no-fly" zones over the northern and southern parts of the country. A decision by Iraq to ban almost all U.N. inspections on October 31, 1998, led the U.S. and Britain to conduct a 4-day air operation against Iraq on December 16–20, 1998 (Operation Desert Fox). The two allies launched approximately 415 missiles and dropped more than 600 bombs targeted at Iraqi military and logistical facilities. Since the December 1998 operation, the U.S. and Britain have carried out air strikes against Iraqi air defense units and installations on a frequent basis, in response to Iraqi attempts to target allied aircraft enforcing the no-fly zones. However, to launch a full-scale military invasion of Iraq, fully considering its potential consequences, based solely on violations of the no-fly zones would appear to be out of proportion to the offense occasioning it.

A potentially more compelling basis for just cause would be action undertaken in self-defense, in this case anticipatory self-defense.

Although the UN Charter is premised on the concept of collective security, it is important to recognize that the Charter also recognizes the right of nations to use force for the purpose of self-defense. Article 51 provides that nothing in the Charter "shall impair the inherent right of individual or collective self-defense" in the event of "armed attack." The question, of course is what constitutes armed attacks.

In this regard, no American administration has ever sought to give an expansive interpretation to the definition of an armed attack. Indeed, none of our interventions since the end of World War II have relied for justification on the doctrine of preemptive attack.

Tellingly, when the United States was directly threatened during the 1962 Cuban missile crisis, President Kennedy did not invoke any notion of "anticipatory self-defense." While the risks of nuclear conflagration were high, the president's legal arguments were

conservative: the imposition of a naval quarantine was justified by reference to the regional peacekeeping provisions of the U.N. Charter. More recently, when America has claimed self-defense, it has been in less controversial settings—citing a clearly defined threat to U.S. citizens or, after September 11, the need prevent a second attack by hostile terrorists.

Rather than expanding the scope of preemptive attack, American statesmen have historically played leading roles in carefully limiting the doctrine.

The classic formulation of the right of preemptive attack was provided by secretary of State Daniel Webster. In 1837, the British sought to stamp out a simmering revolt in Canada that had received support from private militias in the United States. To cut off this source of support, British troops launched a night raid into New York, burning an American ship and sending it over Niagara falls.

Some five years later, Secretary of State Webster reached an agreement with the Foreign Office that prohibited future cross-border raids. Preemptive force under customary international law could be justified only if there was a "necessity of self-defense, instant, overwhelming, leaving no choice of means, and no moment for deliberation," and if the use of force in such circumstance were proportional to the threat—not "unreasonable or excessive." Webster's formulation remains the core sense of international law today.

Some might object that these standards are unreasonable and inappropriate for a new era of global insecurity hallmarked by the threat of stateless terrorism. On the other hand, it surely cannot be in our interest to legitimize war by hunch. The danger is that new standards we seek to reserve exclusively for our use become legitimate as well for other nations—such as Russia, China, India and Pakistan. Do we want to empower others to claim that issues relating to self-defense are not a proper subject of international concern, but are solely unilateral national decisions unreviewable by any state or multilateral organization? Without clear standards, whenever a nation believes that its interests, which it is prepared to characterize as vital, are threatened, then its use of force in response would become permissible.

As to the precise nature of the threat posed by Saddam, the historical record is well-known. Saddam Hussein is a menace to his own people and a continuing threat to the Middle East and the Persian Gulf. Saddam is without question an international criminal with a long rap-sheet.

He began successive wars of aggression against Iran and Kuwait, amassed a large inventory of chemical and biological weapons in violation of the Biological and Toxin Weapons Convention (BWC), and has feverishly sought to build nuclear arms in violation of the Nuclear Nonproliferation Treaty (NPT). On the orders of Saddam Hussein, his army committed some of the worst war crimes in half a century, gassing Kurdish villages and killing thousands of innocent civilians. Even after its defeat in the Persian Gulf War, Saddam sought to hide and even reconstitute his weapons of mass destruction in violation of numerous UN Security Council Resolutions. There is little dissent, therefore, from the proposition that the Iraqi regime represents a continuing threat to the region and a challenge to international

order. Indeed, regime change has been the official policy of the United States under two presidents, Bill Clinton and George Bush, since 1998.

What is the urgency of the current threat from Saddam Hussein? Despite some uncertainties, a great deal is known about Iraqi military capabilities, particularly its conventional forces.

Despite the loss of some 40 percent of its army and air force as a result of the Gulf War, Iraq remains a major military power by regional standards. Iraq still has armed forces with around 425,000 men, with some 2,200 main battle tanks, 3,700 other armored vehicles, and 2,400 major artillery pieces. It also has 300 combat aircraft with potential operational status.

By all accounts, sanctions and the impact of the Gulf War have had a substantial negative impact. The regime's inability to recapitalize and modernize its armed forces means that much of its nominally large military capacity is either obsolescent or obsolete, with doubtful combat readiness, and will be difficult to sustain in combat.

Much more ominous are Iraq's weapons of mass destruction. By way of background, UN Security Resolution 687, passed in April 1991, established the formal cease-fire between Coalition forces and Iraq. Key among the terms was the prohibition against Iraq retaining, acquiring, or developing WMD and long range missiles. In addition, there was a demand that Iraq unconditionally accept the destruction, removal or rendering harmless its WMD under international supervision. However, from the start of United Nations Special Commission (UNSCOM) in 1991 through their termination in 1999 Iraq engaged in the techniques of deception and denial in order to conceal the full extent of its WMD programs. Although there were some successes in defeating Iraq's concealment efforts, many other failed.

In December 1999, one year after UNSCOM left, the UN Security Council passed Resolution 1284, reaffirming all previous UN Security Council resolutions, disbanding UNSCOM, and establishing the UN Monitoring, Verification, and Inspection Commission (UNMOVIC). Until September 16, Iraq had rejected resolution 1284 on the grounds that it does not set a clear timetable or criteria for lifting sanctions. Although the Iraqi position may well be a ruse, Baghdad now claims with semantic waffling to be willing to allow the return of weapons inspectors without conditions.

As is well known, on the eve of the Gulf War, and in violation of its commitments under the NPT, Iraq was on the verge of producing significant amounts of heavily enriched uranium that would have allowed it within two or three years to produce a nuclear weapon. Fortunately, the Gulf War heavily damaged Iraq's nuclear facilities. By the end of UN inspections in 1998, the International Atomic Energy Agency (IAEA) was confident that Iraq's indigenous nuclear weapons program had not produced more than a few grams of weapons useable material. However, Iraq's nuclear potential was not completely eliminated. The scientific and technical expertise of Iraq's nuclear program survived, and Baghdad has tried to keep its core nuclear teams in place working on various civilian projects.

Publicly available consensus analysis produced by the London Institute of International Strategic Studies and others suggests that:

Iraq does not possess facilities to produce fissile material in sufficient amounts for nuclear weapons, that it would require several years and extensive foreign assistance to build such fissile material production facilities, but that it could assemble nuclear weapons within several months to perhaps one or two years if it could obtain relevant fissile material.

Prior to the Gulf War, Iraq produced Biological Weapons (BW) agents in volume. Subsequent to its invasion of Kuwait, Baghdad accelerated large scale BW agent production and assembled rudimentary BW munitions. These weapons were distributed to military units, who were delegated to use them if allied forces advanced on Baghdad or used nuclear weapons. Most of the regime's key BW facilities, which had been hidden from Western intelligence agencies, escaped attack during the Persian Gulf conflict. But in violation of the BWC that Iraq ratified as a condition of the 1991 Gulf War cease-fire agreement, Saddam continued to conceal his BW program until 1995. Since December 1998 when UN inspectors left the country, there has been virtually no verifiable information about the status of Iraq's BW program.

Credible, public reports suggest Iraq can produce new stocks of bulk BW agent, including botulinum toxin and anthrax. BW agent could be delivered by short range munitions including artillery shells. Delivery by ballistic missile is more problematic. Refurbished L-29 trainer aircraft could operate as weapons-carrying unmanned aerial vehicles (UAVs) with a range of over 600km. Such UAVs might be considerably more effective than ballistic missiles in delivering CBW. Commando and terrorist attack is also possible.

The best estimates of the current situation suggest that: (1) Iraq has retained substantial growth media and BW agent (perhaps thousands of liters of anthrax) from pre 1991 stocks, and the regime is capable of resuming BW agent production on short notice at existing civilian facilities and in new mobile laboratories; (2) it could have produced thousands of liters of anthrax, botulinum toxin and other agents since 1998, but actual stocks are unknown.

As is well known, Iraq used chemical weapons extensively against Iranian troops from 1982-1988. In the years immediately prior to the Gulf War, Iraq made further progress in developing binary chemical munitions, producing and weaponizing the advanced nerve agent, VX. The Gulf War however devastated Iraq's primary CW production facilities and a large portion of its stockpile of CW munitions.

Through 1998, UNSCOM was able to dispose of large quantities of CW munitions, bulk agent, precursors and production equipment that were not destroyed in combat. In addition, unless Iraq has managed to modernize its 1990-era special warheads, its ability to disseminate effectively CW agent on ballistic missiles is questionable, since so much agent would be destroyed on impact. Iraq's known ability to marry chemical warheads to its rocket and artillery pieces (with ranges up to about 18.5 miles) could complicate operations for opposing forces, who would be required to wear protective gear.

The best publicly available assessment of the current situation is that: (1) Iraq has probably retained a few hundred tons of mustard and precursors for a few hundred tons of sarin/cyclosarin and perhaps similar amounts

of VX from pre-1991 stocks; (2) it is capable of resuming CW production on short notice (months) from existing civilian facilities; and (3) it could have produced hundreds of tons of agent (mustard and nerve agents) since 1998. Actual stocks, however, are not known.

Iraq of course prohibited by UN Resolutions from possessing ballistic missiles with a range greater than 150km. In the 1970s Iraq began to import Scud B missiles with a range of 300km from the Soviet Union and acquired roughly 820. In the 1980s Iraq worked to modify the Scud missiles in order to double their range. The new missile, called the al Hussein, with a range of 650km, was used during the war against Iran. In the wake of the Gulf War, much of Iraq's missile infrastructure lay in ruins. Moreover, the U. S. and U. K., during Operation Desert Fox in December 1998, attacked a number of missile related facilities.

During the inspections period Iraq continued to conduct small scale covert research and development on proscribed missiles. In addition, Iraq continued missile related procurement efforts. UNSCOM attempted to account for all imported missiles and for indigenously produced missiles, but that accounting was incomplete. It is prudent to assume that Iraq has been able to retain some of its proscribed missiles. Also, it is likely that Iraqi engineers will have been able to increase the range in its short-range al Samoud missiles to 200km with a few hundred kilograms payload suitable for CBW delivery.

The publicly available estimates of Iraq's missile capabilities suggest that: (1) Iraq has probably retained a small force of about a dozen 650km range al-Hussein missiles, which could be armed with CBW warheads, capable of striking Israel, Saudi Arabia, Turkey, Iran and Kuwait; (2) the Iraqi regime does not possess facilities to produce long range missiles and it would require several years and extensive foreign assistance to construct such facilities; (3) it may have a small number of al Samoud missiles with ranges of up to 200km able to strike Kuwait but only if deployed within the southern no fly zone; (4) Iraq is capable of manufacturing rudimentary CBW warheads, while its development of more advanced designs is unknown; and (5) Iraq has been developing very small unmanned aircraft suitable for CBW delivery.

According to the Department of State, Iraq is also a state sponsor of terrorism. Saddam Hussein's brutal regime has provided headquarters, operating bases, training camps, and other support to terrorist groups fighting the governments of neighboring Turkey and Iran, as well as to hard-line Palestinian groups. During the 1991 Gulf War, Saddam also commissioned several failed terrorist attacks on U.S. facilities. After the war, Saddam attempted to assassinate former President Bush. More recently, the question of Iraq's link to terrorism has become more urgent with Saddam's determination to develop weapons of mass destruction, which could be shared with terrorists.

At the present time, there is no hard evidence linking Saddam to the 9/11 attacks, and Iraq denies any involvement. However, his government expressed sympathy for those who attacked us and some Iraq watchers suspect Saddam was at least indirectly involved. In this regard, Czech officials reported last

year that Muhammad Atta, one of the September 11 ringleaders, met an Iraqi intelligence agent in Prague months before the hijackings, but U.S. and Czech officials subsequently cast doubt on whether such a meeting ever happened. Some militants trained in Taliban-run Afghanistan are helping Ansar al-Islam, a Kurdish extremist group that Saddam uses to harass his own Kurdish foes. Finally, al-Qaeda members fleeing Afghanistan have reportedly hid in northern Iraq, but in areas beyond Saddam's control. In addition, evidence has recently come to public light suggesting a wider array of contacts between al-Qaeda and the Iraqi regime than had previously been known, including hospital care for an al-Qaeda leader.

In this context, the case for military intervention at this time rests on three key assumptions: that the containment of Iraq through sanctions is a failed policy; that the Cold War concept of deterrence is no longer a viable strategy for dealing with an erratic Iraqi leadership potentially allied with al-Qaeda or other terrorists; and that new unrestricted weapons inspections, even if Saddam were to agree to them, are unlikely to be effective.

There is perhaps a fourth, albeit often unstated basis for intervention: that deposing Saddam and establishing a democratic, western-oriented government in Baghdad would decisively reshape the politics of the region in a manner highly beneficial to the United States, by delegitimizing the forces of radicalism and creating a powerful model of Islamic modernity and moderation.

Taken together, these assumptions make a compelling case for the United States and the United Nations to seek, both through the enforcement of existing resolutions as well as the enactment of one or more additional resolutions, Iraq's complete and unconditional compliance with all relevant UN resolutions, particularly those demanding the disarmament of its weapons of mass destruction.

To paraphrase the just war theologian Michael Walzer in his discussion of the ethics of Israel's preemptive intervention against Egypt in 1967 and an Iraqi nuclear reactor in 1981, Saddam Hussein, through his continued efforts to develop weapons of mass destruction and their means of delivery has demonstrated a manifest capability and intent to injure, and a degree of active preparation that makes that intent a positive danger. The great judgmental question is, to again cite Walzer, whether in the current situation waiting, or doing anything other than military engaging, magnifies the risk.

It is perhaps likely, even highly likely, that Saddam will ultimately refuse to meet the demands of the world community. Particularly if this is the case, authorization by the Security Council for regime change would be an appropriate response. But there is little evidence that suggests the immediate, urgent "necessity of self-defense," so instant, and overwhelming, as to leave the United States no choice of means, and no moment for deliberation. The case for regime change is compelling, but precipitating a change in leadership is different than going to war with a country and its people.

Containment through targeted sanctions—in effect, coercive arms control—is fraying, in part because of irresolution on the part of key members of the U.N. Security Council, such as Russia and France, and because both Iraq

and key regional states profit from sanctions-busting. According to the General Accounting Office, Iraq may have earned as much as \$2.2 billion last year in illicit exports and oil surcharges. Over time, the breakdown in containment would almost certainly create conditions under which Iraq could produce a nuclear weapon.

Nevertheless, flawed as sanctions may be, published reports in the press this summer suggested many senior U.S. military officers believed that Saddam Hussein poses little immediate threat and have concluded that the United States should for the time being continue its policy of containment rather than intervening directly.

Can Saddam be deterred from aggressive action now and in the future, particularly if he is able to successfully accelerate development of weapons of mass destruction? The evidence is mixed. During the Persian Gulf War, he refrained from using weapons of mass destruction because of American and Israeli threats of nuclear retaliation. He was likewise deterred from again attempting to attack Kuwait in 1994.

Yet he is so hostile to the United States and Israel, so bent on regional domination, his frames of reference and decision-making processes so opaque, and possibly irrational, and his ties to international terrorism such as obvious source of concern, that it is at best an open question whether a nuclear-armed Saddam is ultimately deterrable. In the long run, it is highly probable that no American president can afford to take that risk.

As to inspections, the evidence suggests that an intrusive inspections regime can produce positive results, but can never be fully reliable or completely effective. In their first five years, the United Nations Special Commission in Iraq (UNSCOM) made some progress toward inspecting and disarming Iraq's chemical, biological, and missile materials and capabilities. The so-called IAEA Action Team, did the same for Iraq's nuclear program. The main problem was that UNSCOM was never allowed to fully scan the country or finish its work. Since the Iraqi government terminated its work four years ago, the country has been free of monitoring and inspection.

Just war doctrine focuses on right intentions and prospects for success. Intentions and goals matter in war. A nation should only wage war for the cause of justice, rather than for self-interest or aggrandizement. The issue of intention must be balanced with concern for practicalities as well as consequences, both of which should be considered before declaring war. The decision to go to war must be essentially protective; the goal of war is to obtain a just and durable peace. The ancillary requirement that there must be prospects for success means that the use of arms must not produce negative effects and disorders graver than the evil to be eliminated.

In this case the risks of inaction are real; the risks of action extraordinary. The only certainty is that any military action involving a great power will bring about unintended consequences. It is a distinct possibility but not certainty that conflict with Saddam will be short and decisive, as it was during the Gulf War. It is also possible that a new regime can be found and put in place with as much ability and legitimacy as in Afghanistan.

On the other hand, one should always hope for the best but plan for the worst. America's

greatest living statesman, George F. Kennan, recently made the sage observation that "war has a momentum of its own, and it carries you away from all thoughtful intentions when you get into it. Today, if we went into Iraq . . . you know where you begin. You never know where you are going to end."

Many have expressed concern about the "end game"—the difficulty of potential street combat, of establishing legitimate government, of dealing with the long-term implications for American interests in the Muslim world of an intervention in Iraq. But concern for the "end game" should not cloud the enormous difficulties of the "beginning game." What happens when a strike commences?

What happens to our ability to secure cooperation in the long-term campaign against global terrorism? What about American leadership in the global economy?

From an operational perspective, the assumption in some quarters appears to be that once we initiate conflict Saddam will be on the defensive, hunkering down, perhaps waging defensive guerrilla warfare in the cities and countryside, while the United States and its allies enjoy the initiative.

This may be the case, but Saddam has had a lot of time to strategize on how to maximize American casualties, energize potential support outside Iraq—including terrorists—and increase his martyrdom.

My concern is that Israel may be underestimating the potentially devastating effects of a biological weapons assault while the United States may be understanding the potential of a pan-Muslim backlash.

In terms of military pitfalls for the United States, one "nightmare" scenario involves determined resistance in Baghdad and perhaps other major cities by the Iraqi Republican Guard. Should we be compelled to engage, the casualties on both sides, including civilians, could be substantial.

But the greatest danger that we cannot ignore is the possibility that a campaign against Iraq expands into a wider conflict within the Arab world against Israel. Indeed, it is virtually inconceivable that military intervention against Iraq will not cause an immediate retaliatory strike against Israel. In the Gulf War, Iraq sent 39 Scud missiles against Israel—missiles that could have been but were not tipped with chemical weapons. Chemical weapons were used with some devastation in World War I and in closed settings with gruesome ramifications in the Holocaust. Today the vastly greater danger is biological agents. Biological weapons pose a danger thousands of times greater than chemical weapons. The delivery of such weapons on missiles, unmanned aircraft, by hand and or through the mail could be traumatic for Israel and world society. Likewise, if Iraq were to launch any kind of weapons of mass destruction against Israel, Israel would have to seriously consider a retaliatory response, perhaps including nuclear weapons.

It is also conceivable that action against Iraq, particularly a prolonged campaign with significant civilian casualties, could spark outrage in the Muslim world, and unleash a new surge of anti-Americanism. While there is little support for Saddam Hussein outside of Iraq, there is extraordinary opposition to America going to war against a Muslim country. Terrorism around the world could be supercharged. Even without Israeli involvement, friendly governments in Jordan, Pakistan and

Saudi Arabia might be destabilized. A multi-year, multi-decade or multi-century conflict could ensue.

Should Saddam's hold on power or his personal security be in imminent jeopardy, it would appear probable that he may utilize the techniques of terrorism—possibly including weapons of mass destruction—to defend his regime and wreak revenge on his enemies.

In addition, it is also conceivable that new dangers would emerge with a feeble or hostile successor regime. Chaos, bloodshed and revenge might follow. Weapons of mass destruction might fall into a greater number of hands. An unstable Iraq could be a haven for terrorists and a continuing threat to regional peace.

Indeed, it is impressive how little, not how much we know, especially attitudinally in Iraq and the Muslim world about the potential of American intervention in Iraq. To what extent will support be manifested for Saddam? Will there be disorder, chaos, bloodshed and revenge? Will the Shia turn on the Sunni minority. Will the Kurds seek an independent state?

Moreover, it is important to ponder whether an invasion of Iraq would worsen rather than reduce the threat of terrorists gaining control of weapons of mass destruction. Saddam could decide to disperse his weapons stockpiles, and the scientists who build them, into the hands of global terrorists. Even if he did not order such, in the chaos of war it is conceivable that individual Iraqi commanders and scientists might make their own profit-oriented accommodation with terrorists.

More broadly, it is by no means clear that regime change in Iraq, even if successfully carried out, will significantly diminish the threat from Islamic extremists who share little in common with Saddam Hussein.

Hence the need for the United States to pursue a vigorous two-pronged approach in the Middle East: intensified efforts to resolve the Palestinian-Israeli conflict and greater focus on economic development and democratization in the region.

The importance of resolving the Israeli-Palestinian standoff cannot be underestimated. We know from attitudinal surveys that Muslims generally like Americans and admire American culture. Many have chosen to immigrate to the United States. They do not, however, trust our government. To win the war on terrorism we will have to convince Muslims throughout the world that we are, in fact, favor justice and the creation of just societies everywhere.

All Americans understand we share a common concern for the fate of the Israeli people and the viability of the Israeli state. The commitment of the United States to Israel must be bedrock. We must support Israel and help bring peace and stability to the region. There must be continuity of commitment, but there must also be recognition of opportunities to lead. Unfortunately, critical opportunities have been lost in partial measure because Presidents were imperfectly skilled and in some cases wanted to operate in relationship to timing they hoped to control rather than in relationship to circumstances and events in the region.

For example, optimism surrounded the Oslo accord precipitated by President Bush's father. Yet the United States lagged in efforts to push immediately thereafter the logical steps that should have been taken to create a long-term framework for peace. To his credit, President

Clinton pressed at the end of his administration for a breakthrough agreement. At Camp David, Arafat turned his back on the most forthcoming peace proposal Israel has ever formally made. The tragedy of Arafat was not that he had to accept every parameter of the proposal put forward by Prime Minister Barak, but that he failed to make a counteroffer, thereby destroying prospects for peace, implicitly thumbing his nose at Israel and the prestige of the American presidency.

Following the breakdown of the Camp David talks in July 2000, and the subsequent outbreak of violence on September 28, the sides nevertheless agreed to continue negotiations at lower levels during December and January 2001 at the Egyptian town of Taba. As President Clinton left office, Barak's government had but a few weeks of life left before the election that brought Ariel Sharon to power. The outbreak of the violence had made it unlikely that Israelis would approve any proposal of concessions to the Palestinians in a referendum. Nonetheless, both sides hammered out proposals that came much closer to each other's positions than before.

No official summaries of the proposals were issued, but subsequent leaks provided some details. The Palestinians, according to Israeli sources, agreed to a map that would allow Israel to keep most of its settlements and about 4 percent of the territory.

But given the short time left to the Barak government, the preoccupation with the transition in Washington, and the continuing violence, the proposals came to nothing. Both sides had agreed that the proposals would be binding only if they resulted in an agreement. The joint communique noted, however, that foundations had been laid for future discussions.

The new administration held that President Clinton had attempted to negotiate on his time frame and increased tension by seeking a resolution that was not ripe. My sense is that the Bush team was half right. President Clinton had pressed on his time frame but erred by being tardy instead of premature. If pressed two or three years earlier by the Clinton Administration, the Barak approach would have been more sympathetically received. And if the Taba framework had been immediately pressed on the parties by the new Bush foreign policy team which was initially so well received in the Arab world, quite possibly a breakthrough agreement could have been made.

Two opportunities for resolution of the Israeli-Palestinian issue, one in this and the other in the prior Administration, were not grasped and this circumstance hangs like dangling fruit to terrorists the world over.

The major US foreign policy concern in the region must be resolution of the Israeli-Palestinian issue. All administrations at all times must dedicate themselves to this challenge. In this context, the need to achieve peace between Israel and the Palestinians is of far greater significance than waging war with Iraq. Whether we like it or not, whether it is fair or rational or not, we are simply in a far better position to deal in whatever way we choose with Iraq after an Israeli-Palestinian settlement. It is a far less favorable circumstance if we attempt to deal with Iraq beforehand.

Some contend that Israel is in a far stronger strategic position if the United States quickly and successfully disarms Iraq. This may be

the case. But no country carries greater risks during the conflict and in its aftermath than Israel if intervention proves messy, if Iraq is able to unleash an attack on Israel.

In the Middle East, there are two sets of value scales. From a Western perspective, the case for creating and protecting the state of Israel because of the history of pogroms and the Holocaust is compelling. From a Muslim perspective, an argument can be made that Arab peoples have a historical claim to parts of the Holy Land and its holy places and no responsibility for the Holocaust. The challenge is to take these juxtaposed value systems and reach a reconciliation both sides can respect and live with on a long-term basis. My sense is that somewhere around the points laid on the table at Camp David and Taba there is a basis for a credible resolution, but it is very doubtful given the current state of enmity and distrust between the parties that slow-paced, partial steps can lead incrementally to a larger vision of peace and accommodation.

Nation-building was used pejoratively during the last campaign, but America has no choice but to do more ourselves and to press our allies much more forthrightly for assistance to Afghanistan, a country in which we effected a constructive change of government. For all the unfortunate consequences that can sometimes befall policy, we are most fortunate to have a leader in charge that the world can respect. This circumstance, however, may change quickly based on reaction to actions inside and outside of Afghanistan. A U.S. war with a Muslim country will have wide consequences elsewhere, some good, some bad, most unpredictable.

Here it should be noted that there has been relatively little discussion about the commitments, likely to be of a long-term character, that Washington must undertake after a military campaign against Iraq. The term "regime change" does not adequately describe the full scope of what we expect to achieve as a result of a military campaign in Iraq. We would be expected to work with Iraqis, including those outside Iraq, to both develop a new constitutional structure as well as find credible post-Saddam leadership—leadership that hopefully would share our objectives with respect to the elimination of weapons of mass destruction, development of democratic institutions, etc. We will almost certainly need substantial forces on the ground in order to prevent bloodletting, secure important economic and military assets, and prevent possible Iranian meddling. And although Iraq has substantial oil reserves and therefore a better resource base than Afghanistan from which to assist in financing reconstruction, the costs of humanitarian assistance and rehabilitation could nevertheless be in the billions of dollars.

We lack firm estimates of the domestic cost to the U.S. of a potential conflict. Seat of the pants White House estimates range from \$100 billion to \$200 billion, with the price of oil estimated to rise to perhaps \$30 a barrel for some unknown period of time. More recently, the Congressional Budget Office estimated that fighting a war with Iraq could cost the U.S. between \$6 and \$9 billion a month, with preparing for a conflict and terminating it later adding other \$14 billion to \$20 billion to the total.

The 1991 Persian Gulf War cost \$60 billion in 1991 dollars, with the brunt picked up by

our friends and allies, notably the Kingdom of Saudi Arabia, Kuwait and Japan. It is unlikely there will be comparable help in defraying the costs of a military action and any subsequent nation-building in Iraq.

Our war aims with Iraq also need clarification. The goal of the U.S. should not be the total disarmament of Iraq, as some appeared to have called for, but the elimination of his weapons of mass destruction. Disarmament implies that Iraq cannot have an army, a proposition no sovereign state is likely to accept. Indeed, Western policy in the region for decades advocated a balance of power, not vacuum of power. The reason to distinguish the elimination of weapons of mass destruction versus total disarmament is more than theoretical. U.S. policy should be based on establishing a strong unitary Iraq with a professional army accountable to democratic forces. As we proceed toward possible invasion, the goal should be to seek the Iraq army to identify with the United States, not Saddam.

The challenge is to make it clear that our goal is more democracy, prosperity, and the uplifting of Iraqi society, one which can lead the Muslim world with a model of modern democracy and prosperity.

Saddam is a rogue leader, but Iraqis are not a rogue people. Care must be taken to distinguish the leadership from the country itself. No country or peoples are intrinsically evil, though individual leaders such as Saddam can clearly be malevolent.

In historical terms, Saddam is a Stalinist. The case for regime change is real, but the prospect of our demolishing Iraqi society or Saddam blowing up his own country's infrastructure—bridges and oil fields—is not a happy one. Perhaps the prospect of such a catastrophe will lead to regime change precipitated internally, which could be the maximum outcome for all.

In Just War theory, the criterion of right authority determines who is to decide whether or not resorting to war is justified.

Reasonable men and women can agree in a "just war" context on the moral and legal authority of the President, acting with the express authorization of the Congress of the United States, to initiate a police action to enforce international law.

Likewise, reasonable men and women generally ought to be able to agree on the moral and legal authority of the Security Council to authorize the enforcement of UN resolutions requiring a country to abide by international conventions on weapons of mass destruction.

It should be self-evident that while a country like the United States has an obligation to protect its citizens without a formal UN resolution, it is vastly preferable for American strategy to be based on formal international support.

UN support would impress upon Saddam Hussein that he is not just facing a United States Administration, but the will of the world community. Security Council endorsement would bolster American security by helping make it politically possible for others to join in enforcing international law and by undercutting the legal and moral base of those who might object.

In this context, the President is to be commended for taking the case to the United Nations. He is to be commended for endeavoring to reach out to the world community by deciding that the United States should rejoin UNESCO. He is to be commended for laying

out the challenges Iraq poses to the world community and to the region. He is further to be commended for bringing his case to the Congress.

Words matter. Care must be taken in their use. Words lead to processes that sometimes make careful judgments difficult to obtain. At this time, for instance, the case for regime change is powerful. But this does not necessarily mean that urgency for military intervention, even with UN authorization, is compelling. There have been too many instances in history where leaders have boxed themselves in with words, and when actions tied to words may cause, domino fashion, further actions to transpire which might not be contemplated or warranted by the initial statements made.

Utterance restraint is an attribute that has received less attention and less approval than should be the case in statesmanship. In this context, the unintended consequence of describing countries as evil and personalizing strategic doctrines must be recognized.

In Vietnam, for instance, the basis for our engagement stemmed more from a domino theory of decision-making than the more widely discussed domino government-toppling potential. When American presidents make statements, policy decisions can result which lead to actions which may not fit the circumstance in which the statement was originally framed.

More recently, in the Balkans, America got involved after giving a series of warnings that if Serbia didn't go along with the Rambouillet Accord, the United States and NATO would intervene. The United States made threats which were not taken seriously by adversaries which led to intervention that might not have occurred if the warnings weren't made. The decision to intervene was made in part because of a concern about preserving presidential credibility, and the need to make a particular president's words meaningful, despite the fact that few Americans knew the president had made statements in this arena.

In the case before us it is suggested that authorization for use of force may cause others to act in such a way as to make use of force unnecessary. But the greater problem seems to me to be problem of a leader who pushes for authorization and then faces the question of follow through. The logic is force may not be inevitable but its authorization surely makes a decision for restraint difficult.

There is a thin line between the exercise of superpower responsibility and the prospect of superpower folly. The timing, perhaps more than the substance of this resolution is in doubt. Judgment and timing must go hand in hand. It may have been a mistake back in 1991 not to have pursued Saddam because of our assumption that the Iraqi people would come to their senses and replace him. But that failure to act does not necessarily legitimize assumptions that intervention today can legally be carried out in the context of resolutions both Congress and the UN applied a dozen years ago. The greatest legal case against Saddam relates less to Security Council resolutions than his development of biological weapons which contravene international law and jeopardizes the health of the region.

In general, the criterion of last resort has a common sense interpretation in which it functions as a reminder that the resort to violence must be, to a significant degree, reluctant. It enjoins us to make serious efforts at peaceful

resolutions of our political problems before going down the path of war. The term "peaceful" is itself open to varied interpretations, but is usually taken to include a comprehensive range of nonviolent methods that may involve "coercive diplomacy," including sanctions of an economic and political character.

The principle of proportionality evaluates the effects or ends of war. In this regard, proportionality is "counting the costs" or cost-benefit analysis. In just war theory this principle insists that there be due proportion, that is, less evil following from acting rather than not acting in the manner contemplated. War is not justifiable if it will produce more death and destruction than it prevents. Understood properly, proportion has the potential for overriding just cause.

Although Iraq is clearly a menace, there is little evidence to suggest that it poses a direct and immediate threat to the vital interests of the United States sufficiently grave as to lead to no other credible alternative to war. As former NATO commander General Wesley Clark testified before congress, "There is nothing that indicates that in the immediate—the next hours—the next days—that there is going to be nuclear missiles put on launch pads to go against our forces or our allies in the region. And so I think there is, based on all the evidence available, sufficient time to work through the diplomacy of this."

Former National Security Advisor Brent Scowcroft argued this summer in the Wall Street Journal, that Saddam's strategic objectives appear to be to dominate the Persian Gulf, to control oil from the region, or both. This clearly poses a real threat to U.S. interests. But there is little hard evidence to suggest Saddam has close ties to al-Qaeda, and even less to the 9/11 attacks. Given Saddam's psychology and aspirations, Scowcroft considers it unlikely that he would be willing to risk his investment in weapons of mass destruction by handing them over to terrorists who could use them for their own purposes "and leave Baghdad as the return address." Saddam, Scowcroft suggests, seeks weapons of mass destruction not to arm terrorists, but to deter us from intervening to block his aggressive designs.

In addition, as of this moment, with current sanctions in place and the Security Council contemplating reintroducing weapons inspectors under existing or new UN resolutions, it cannot credibly be claimed that America or the world have exhausted non-violent alternatives.

I accept in principle that military intervention against Iraq might be considered legitimate law enforcement under just war doctrine. What I do not accept is that it is justified at this time because of the disproportionately horrendous consequences such action may precipitate.

The reason I am doubtful relates less to the risks to American national interests which accompany intervention in the Muslim world, as real and as large as I believe them to be, but principally because of the risks invasion may pose to civilization itself.

As I have listened to various proponents, the efficacy of military intervention is based on the assumption that a cornered tyrant will not initiate the use of weapons of mass destruction, providing the U.S. and others the opportunity to destroy or otherwise seize effective control of such weapons before Baghdad can issue orders to strike.

This assumption may represent the most dangerous intelligence estimate and the safest tactical assumption in human history.

What is known is that Saddam Hussein controls tons of biological agents. What is known is that he is attempting to develop a nuclear explosive device, and while it is unlikely, it is conceivable he may control such a weapon today. Even if we assume our intelligence to be correct and his nuclear capacity is yet to be achieved, we can be sure he has a BW capacity, portable and hidden. We know he has the means of delivery.

Therefore, intervention assumes Saddam's delayed contemplation of BW usage. But what if Saddam is prepared to use BW immediately? What if he seeks wider Arab support by attempting to engage Israel? And what if Israeli leadership responds proportionately, perhaps disproportionately?

If biological agents are released in Haifa or Tel Aviv, the prospect of a nuclear response is not remote. American troops could be caught in the crossfire and crosswind of two sets of weapons of mass destruction coming from different sources, each equally dangerous. Is not the next 6–8 weeks the most dangerous in the history of the region?

Before any strike, it would seem to me the U.S. must know the location of every biological weapon cache in Iraq and have a clear plan and capacity to destroy or control these weapons within minutes of the initiation of military action. Absent that capability, military intervention would be based upon inadequate intelligence and a potentially catastrophic misjudgment of intent.

The risks are extraordinary. However, it is suggested that as large as the risks are today, they will be graver in subsequent years. Surely, it is said, we cannot allow Saddam's weapons of mass destruction to deter the United States from taking necessary action.

This line of argument has substantial merit. But it does not necessarily provide a compelling rationale to intervene today. The reason it doesn't is because of a lack of understanding of the danger of biological agents. Pounds or ounces of biological agents, such as plague or anthrax, can be devastating. Saddam Hussein controls tons. Given these quantities, adding more does not make him that much more dangerous.

While a shield may be technologically feasible to develop to shoot down a missile that leaves the earth's orbit, there is no such thing as a biological shield. Delivery systems can be rudimentary and multi-faceted.

The coming conflict with Iraq is not only symptomatic of the problem of terrorism but arguably stands as the most difficult confrontation in world history. If biological weapons through usage are legitimized as instruments of war, the survival of man is in desperate jeopardy. While the Middle East contains many conflicts rooted in differing approaches to faith, the Iraq issue is fundamentally different. It has far more to do with the conjunction of science and despotism than a clash of civilizations.

The reason the United States led the world community in the development of the Biological and Toxin Weapons Convention in the 1970s to prevent the development, production, and stockpiling of biological weapons is that we came to the conclusion not only that the use of biological weapons could jeopardize society itself but we also decided that even ex-

perimenting with these weapons was too dangerous in the world's most sophisticated scientific community. It is a public health trauma of unprecedented proportions to stockpile these agents, let alone use them in war.

In this context, the case that Iraqi leadership is lawless is compelling. And the case for lawful regime change is real. But we are courting unprecedented danger to the American national interest and the existence of the state of Israel to move from a policy of containment and deterrence to a policy of military intervention that may actually precipitate usage of such horrendous weapons of mass destruction.

Based upon the mendacity of leadership in Iraq, it is hard not to provide our President with full discretionary support. The problem is that this resolution contemplates an act of war of unprecedented consequences. The logic of its words leads to consequences too awful to contemplate. I must vote no.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentlewoman from Oregon (Ms. HOOLEY), a member of the Committee on the Budget.

Ms. HOOLEY of Oregon. Mr. Speaker, the September 11 attack claimed the lives of thousands of Americans, and dozens more have perished in our war against terrorism. Just yesterday, a U.S. Marine was killed in Kuwait by al Qaeda-trained terrorists. According to press reports, our Marine was killed in a supposedly secure area, and Kuwaiti authorities are baffled over how the terrorists were able to carry out their murder.

I bring up the death of this Marine because it should serve as a reminder that there are no guarantees in war. We must think through the consequences of a war in Iraq and get answers to our questions. Because if we do not ask the tough questions now, in a few short weeks, while Americans are comfortably at home doing their last-minute holiday shopping, hundreds of thousands of our troops are going to be deployed to another combat zone. That, in turn, makes each and every one of us taking part in this debate responsible for our national security and the welfare of our troops.

This vote is undoubtedly one of the most important that many of us will ever cast. This is not a vote on whether the President of the United States should be able to broaden our war against terrorism to include Saddam Hussein. It is a vote on whether now is the best time to attack, given that we do not yet have a new U.N. Security Council resolution or the support of our closest friends and allies in the international community. It is a vote on whether now is the best time to attack given that we have not used the full weight of our economic and diplomatic might to avert a war. It is a vote on whether we proceed with war when we have not determined what its objectives are, how long it will last, how much it will cost, or what kind of a regime will be set up afterwards.

This is not Desert Storm, where Iraq invaded Kuwait, where we had clear goals and the support of the inter-

national community, and we only paid about 10 percent of the cost of that war.

Mr. Speaker, I would not raise any of these questions if Congress had been informed that Iraq posed an imminent threat to the security of the United States. We have not received that information. And I have many more unanswered questions, such as: How will the war affect our economy? How will the war affect our homeland security? What happens to international cooperation in our hunt for terrorists? What happens if Iraq lashes out at Israel? Are we prepared to recast our military as an army of occupation for the entire Middle East?

I am raising these questions because they are the same ones posed to me every weekend back in Oregon. While there has been a lively debate on this resolution, it has been far from persuasive. Nobody seems to have the answers. And, trust me, I have tried, through briefings, through talking to experts, through going through classified materials. At this time, I cannot go home with a clear conscience and explain why I voted to broaden this war with so many questions left unanswered.

So I will oppose the resolution. And for those who have committed themselves to voting for this measure, please consider asking these tough questions. It is easier to ask questions before we go to war, not after we commit ourselves and our young people to battle. When we have received answers to our questions, and when we have received assurances that we have tried everything, and that the only way left to nullify Iraq's threat to our national security is military action, only then would I vote to use force.

We do not have the answers to the questions. We do not have those assurances, and so I will vote "no" and urge my colleagues to do the same.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentlewoman from California (Ms. MILLENDER-McDONALD), a spokesperson really for justice.

Ms. MILLENDER-McDONALD. Mr. Speaker, I thank the distinguished gentleman from New Jersey for yielding me this time.

Mr. Speaker, I join with my colleagues on both sides of the aisle in this historic debate with some trepidation and troubled feelings. I have been marshaling views, like many of my esteemed colleagues, not only to contribute to this dialogue but, more poignantly, to try to make sense of what lies ahead for our great country.

Each Member has been consumed with this very critical issue. I am sure that none of us wants a war, as we know its great cost in human capital. Therefore, we must go the extra mile necessary to exhaust all possibilities before America commits to force. That is why this debate is so critical. And the implications of our decision that follows will have such portent, not only for us but also for the parents of

the young men and women whom we ask to make perhaps the greatest sacrifice.

Until this past weekend, I was quite undecided as to how to respond to the President's insistence on moving against Iraq, and I took particular notice of the open-ended nature of the original draft resolution. Now, as the result of ongoing discussions with the leadership of the House and Senate, he has thought twice in seeking unilateral authority. Instead, this revised resolution allows for a preemptive use of force against Iraq and for his reporting to Congress after the fact. In short, Mr. Speaker, more questions were raised in my mind than answers given.

In the past, I have voted to support legislation designed to protect America's security. After 9-11, I was a clear and avid supporter of many pieces of legislation to support the President. Thus, I believe it is clear to all observers that I am a woman of conscience and not afraid to go on record when this Nation is faced with a clear and present danger to our way of life, our liberties, and our security.

I too believe that the world is dealing with a tyrannical dictator in Iraq and that he should not be allowed to terrorize neighboring states nor his own citizens. Saddam Hussein must and should be stopped. But how? What is the best and most appropriate way to contain him and destroy his unbridled power? Is it by having the U.S. go alone to confront this geopolitical problem that has a far-reaching impact on the entire world?

That is why this debate needs to be thorough and public, Mr. Speaker. We must look at the long-term domestic and international consequences and policy implications of intervening in Iraq. Before a declaration of war can be proclaimed, there must be an accounting of the cost both at home and abroad.

In his talk to the American people this past Monday, the President upped the ante, so to speak, and I, for one, was pleased to hear him say that war is the last resort. We must not forget that we are already fighting a war in Afghanistan and are deeply obligated to help bring security and reconstruction to that country. The costs are great, more than \$1 billion a month. Can we continue to meet such expenditures? How long will our commitments continue there? Can we afford to fight two wars? What is the exit strategy after we go into Iraq when there is none in place for Afghanistan as yet?

Mr. Speaker, many of my constituents have overwhelmingly called me to let me know they do not stand for having their sons and daughters go to war and return home in body bags until all possible diplomatic avenues have been exhausted. They want to see us, the political leaders of this great country, commit ourselves to working with the United Nations in every conceivable manner to exercise international action against a tyrant in Iraq. They

want to see us enter into a rigorous international alliance under the U.N.'s banner to force the dismantling of Iraq's massive weaponry through a comprehensive inspection system.

The American people are not fools. They know that war with Iraq inevitably will mean that their domestic priorities would suffer from a lack of attention and resources. Our unfinished business on health care, prescription drugs, welfare reform, and a faltering economy, due in large part to corporate greed and malfeasance, and the President's top tax cut, would remain on the back burner.

□ 0000

I agree that Iraq has carried out regression on its own people and has not met its obligations under the U.N. resolutions.

Mr. Speaker, I will not be supporting this resolution.

Mr. ISSA. Mr. Speaker, I ask unanimous consent to yield 40 minutes to the gentleman from New Jersey (Mr. PAYNE), and ask that he may control that time.

The SPEAKER pro tempore (Mr. SHUSTER). Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PAYNE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I thank the gentleman from California for yielding me the additional time. We appreciate the cooperation from the other side.

Mr. Speaker, I yield 5 minutes to the gentleman from Washington (Mr. BAIRD), a member of the Committee on Transportation and Infrastructure.

Mr. BAIRD. Mr. Speaker, the Constitution of the United States reserves to the Congress of the United States the authority to declare war. That is as it should be, for no more weighty matter confronts a nation, and it is fitting in a Republic that a decision such as this be made by the people's representatives.

Let us be clear. Saddam Hussein is a dangerous, malicious dictator. He has committed multiple atrocities, both towards his own people and others in the Middle East. He has refused to comply with U.N. resolutions or to allow weapons inspectors to fully identify and destroy his arsenal of chemical, biological and potential nuclear weapons. He has circumvented economic sanctions and has spent money from oil sales on weapons systems and personal luxuries for himself and his political cronies, rather than on the Iraqi people.

Given those facts, I believe we must increase the pressure on Iraq and insist on expanded weapons inspections with much greater resources and no restrictions. This should be done through a multinational effort coordinated through the United Nations and with the support of allies and other nations throughout the world.

The United States is absolutely right to insist on this and to take the lead in

this effort. With international support, the United States stands the greatest chance for a successful outcome; and if military intervention is necessary, the number of casualties will be reduced and the regional repercussions will be lessened.

That is why I will support the Spratt amendment authorizing the President to seek international support for expanded inspections; and if Saddam Hussein refuses to comply with such inspections and an international coalition exists, the President would be authorized to commit U.S. military resources under U.S. command.

If, however, it is not possible to achieve a multinational coalition, in those circumstances the risks, the costs, and the international implications of a unilateral attack will be far more severe. Such an attack may be necessary, but before taking that step, the President should return to the Congress, explain why agreements have not been reached. And if in his judgment force is still necessary, he should, consistent with Article I of the Constitution, seek the authorization of the Congress for military force.

Throughout the discussions of war with Iraq, I have asked fundamental questions: What threat is posed by Iraq now and in the future? What is the military strategy for reducing that threat? What will the cost of that strategy be in human casualties on all sides? What are the international implications and potential regional scenarios that might be developed, and what is our long term strategy for the region?

I believe the first question has been answered. It is apparent that, while the threat to our own Nation may not be imminent, if allowed to go on Saddam Hussein will eventually develop even more dangerous weapons. Beyond that, however, the remaining questions have not been fully addressed. For each of the issues I have raised, and many others have as well, the potential risks and costs would be dramatically greater if the U.S. acts unilaterally rather than in a multinational effort.

Even some of our strongest allies have indicated they would not support us militarily or financially if we go it alone. Yet the risks, costs and consequences of unilateral action have not been adequately explained to the American people. Whatever course is chosen, I believe we will not solve the problem of international terrorism or weapons of mass destruction solely by attacking Saddam Hussein or solely through the broad use of military force. I understand well the impulse and the desire to do something and do it now to reduce the threat and fear created by September 11, and I believe it may yet be necessary to disarm Saddam Hussein, but we must all recognize that there is no course of action without risk or that we will eliminate all risk in the future.

Ultimately, we must look at the source of international conflicts; and

we must work to reduce the perceptions and the real conditions that allow terrorists and others to foment hatred toward our Nation. If we do not understand and deal with how our actions are perceived internationally, we will run the risk of defeating Saddam Hussein only to foster new threats and new hatreds elsewhere.

We can and must dedicate ourselves to the battle against terrorism, and we can and must hope the pressure applied to the Iraqi regime will bring about change and greater security. But as we seek that end, we must not neglect the challenges we face here at home; and we must not neglect our responsibility to address those challenges with honesty, forthrightness, and a sense of justice, fairness and a sense of shared sacrifice befitting a truly great Nation in times such as these.

The President of the United States and all Members of Congress have dedicated their hearts, minds and souls to protecting the safety and well-being of the American people. There are legitimate differences about how to achieve that in these times; but whatever the result of this vote, let no one question the motives, the courage, or the patriotism of those who will make this fateful decision.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Wisconsin (Mr. BARRETT), a member of the Committee on Energy and Commerce.

Mr. BARRETT of Wisconsin. Mr. Speaker, President Bush spoke on Monday night about the many threats Saddam Hussein poses to international security and why the President believes he should have the authority to launch a preemptive, unilateral attack on Iraq to force a regime change in that nation.

While I respect the President and his sincerity in seeking this authority, I am not convinced that such an attack is in the best interest of our Nation.

We all agree that Saddam Hussein is a dangerous man, yet that is not the topic under discussion here tonight. We are debating whether a unilateral military invasion is the best way to address the threats posed by Iraq. I must vote no on this grave issue because I am not persuaded that a preemptive, unilateral attack is the most effective way to control Saddam Hussein.

I agree with President Bush that the United States, in conjunction with our allies in Europe and the Middle East, must make a new effort to readmit a weapons inspectors into Iraq. A new inspection policy must give U.N. personnel unfettered access to any and every facility and have the ability to conduct unannounced surprise inspections. This new effort needs the full and vigorous cooperation of the U.N., NATO and nations in the Middle East. A united front is essential to success, and the international community must join the U.S. in enforcing U.N. resolutions.

As we survey the international community, however, nations in Europe

and the Middle East, including key allies, range from lukewarm to downright hostile to the idea of launching a solo strike against Iraq. Many nations would react negatively to such an action, viewing such a preemptive U.S. attack as overly aggressive.

The world's response to our attack could easily include a global anti-American backlash, severely hampering our ability to fight the war on terrorism, build security and peace in the Middle East, and protect vital U.S. interests. We must not forget that the war on terror requires the support and cooperation of our key allies in the Middle East, Europe and around the world. We rely on these nations to root out terror cells within their borders and share with us important information.

We must also remember that since the end of the Gulf War the U.S. has kept a close eye on Iraq. We have maintained a strong military presence in the region, imposed sanctions, conducted thousands of military flights over no-fly zones, and focused our intelligence community on Baghdad. We have made clear that any misbehavior by Saddam would be met immediately by overwhelming force. As a result of our deterrence, Saddam Hussein has not attacked Saudi Arabia, Israel, Kuwait or others since the Gulf War because he knows that such a move would bring the full weight of the U.S. and the world upon him. His desire to cling to power supersedes his hunger for conquest.

If we strike first, we change that dynamic. Knowing his survival would be at stake, Saddam would have a powerful incentive to use every weapon in his arsenal to defeat American troops. He might target Israel, hoping to fan the flames of conflict between Israel and the Arab world to create chaos in the region.

I am concerned that our preemptive unilateral strike would trigger the very events we hope to avoid: regional war, rampant instability, and use of weapons of mass destruction.

We also must recognize that a preemptive unilateral attack against Iraq would represent a major shift in American diplomatic and strategic thinking.

□ 0010

For nearly 50 years we relied upon deterrence to check upon Soviet expansionism. Deterrence brought us victory in the Cold War without having to fight a hot shooting war under the shadow of nuclear annihilation. That same strategy has kept Iraq at bay for more than a decade.

Now that doctrine is on the verge of being discarded. The potential consequence of such a shift in strategic thinking includes an emboldened China moving against Taiwan, Russia acting aggressively against the nations of her former empire, and India and Pakistan attacking each other with nuclear weapons.

There are several other critical questions to which we have heard very few

answers. We must have a clear plan on how an attack on Iraq would transpire, including identifying our military options, determining our strategy to change the regime, calculating the potential casualties, and estimating how much an operation would cost and how it would be funded. We must also see a plan to build democratic and free market institutions in a post-Saddam Iraq. History teaches us that how we win the peace is just as critical as how we win war. Thus far these critical issues have received scant attention.

The international community has an important obligation to ensure that Saddam Hussein cannot repeat the aggression of his past; and as the world's most powerful country, we have a commitment to lead. Through U.N. inspections, continued monitoring, and increased scrutiny of Baghdad we can meet that responsibility. We cannot, however, move in a unilateral manner that could jeopardize the peace and security of the Middle East if not the world. I must vote "no" on H.J. Resolution 114 and urge my colleagues to do the same.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Virginia (Mr. SCOTT), one of our top constitutional lawyers in this House.

Mr. SCOTT. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, if our goal is to disarm Iraq, I believe the best way to accomplish that goal would be to utilize the strategy articulated a few weeks ago by Secretary of State Colin Powell, that is, to reinstate, utilizing established rules and supported by multilateral military force if necessary. This policy has the best chance of working, and it has the support of the international community. If military force is needed to enforce the inspections, it will be targeted, focused, and not requiring a massive invasion force. It will be unlikely to provoke widespread warfare all over the Middle East; and it is just as likely to fulfill the goal of disarming Iraq as widespread bombing.

If on the other hand we merely start dropping bombs, how do we even know where to bomb if we have not inspected first? If we do know where the weapons are, those locations can be placed first on the inspection list, and if there is any resistance to the inspection, multilateral military force could be targeted on those sites.

But today we are discussing a resolution authorizing the use of force before the inspectors have even had an opportunity to do their jobs. This resolution represents the last opportunity for Congress to have a meaningful input in the decision to go to war, and unfortunately there are many problems and unanswered questions with granting this authority now.

The first problem is that although the resolution suggests that the President first try to work with the U.N., that provision is unenforceable. This is a problem especially because the President has already stated that he did not

need the United Nations, and this resolution allows the President to just notify Congress that, based on the authority granted in this resolution, he has decided to attack Iraq. Furthermore, the broad authority granted in this resolution is inappropriate because of the timing of this vote, less than a month before the election.

Twelve years ago under the first President Bush, the vote to use military force in the Persian Gulf was taken after the election. The timing of this resolution also raises questions because there is nothing shown to be urgent about the situation in Iraq. If the President discovers that the U.S. is in imminent danger, he is already authorized to defend the Nation and no one would expect him to wait for a congressional resolution. If the argument is that the urgency was created a year ago on September 11, the evidence supporting the connection between 9-11 and Iraq is at best tenuous.

In addition to these problems, granting the authority in the resolution is premature because many questions are unanswered. For example, what plans have been made for the governance of Iraq after we win the war? And what chance is there that a regime change will create any better situation than we have now? And to the extent that Iraq has chemical and biological weapons, is it a good idea to invade Iraq and place our troops right in harm's way? And what will the war cost, and how will we pay for it?

Eighteen months ago we had the largest budget surplus in American history. Today even without the cost of a war, we are approaching the largest deficit in American history with huge deficits already projected for the next 10 years. So what is the plan to pay for the war? Are we going to cut funds for education and health care? Are we going to raise taxes, or will we just run up additional deficits? And what will the domino effect be? If we attack Iraq, Iraq may attack Israel, Israel will attack back, and then everyone in the Middle East will choose sides, and how will that make us better off than we are now?

If we are to make progress against terrorism, we have to recognize that hate is as big an enemy as complex weapons. That hatred may increase because others will resent the fact that we have chosen to apply rules to others that we are unwilling to have applied to us. We would not tolerate applying regime change to the United States, nor would we accept preemptive strikes as an acceptable international policy. The CIA has now reported that the chance that Iraq will use chemical or biological weapons has actually increased since all of the talk about a war began.

Mr. Speaker, all of these problems persist and questions remain unanswered, and they lead to the same basic uncertainty. What is the plan both before and after the war and what are the consequences? Some have argued that

a vote against the resolution is a vote to do nothing. That is not true. We should act, but based on the information we now have, I believe the wisest course is to proceed with the strategy proposed by Colin Powell, and that is U.N. weapons inspections in Iraq enforced with multilateral military power. That strategy has the support of the international community. It is most likely to actually disarm Iraq; it does not require a massive unilateral invasion force; and it reduces the risk of provoking widespread armed conflict in the Middle East and terrorism in the United States.

I therefore urge my fellow Members to vote against the resolution.

Mr. Speaker, these votes on the Iraq resolution pose difficult questions for all of us. A large part of the difficulty is caused by the Administration's inconsistent policies on what we should do, when we should do it, and whose approval we need. Not many days ago, the Administration articulated the policy that it could proceed unilaterally, without U.N. support, and without Congressional approval, to attack Iraq, with a preemptive strike, without the necessity of an imminent threat to the United States, for the purpose of "regime change". On one recent Sunday, Vice President CHENEY and Secretary of State POWELL articulated inconsistent descriptions of the Administration's policy. This resolution, which the Administration is now supporting, repudiates the initial Administration policy by requiring the Administration to seek both U.N. cooperation and Congressional approval. Last weekend, the Boston Globe began an article on the Administration's position on Iraq with the sentence "As administration officials struggle to reach an agreement with U.S. allies about Iraq, President Bush has been shifting his rhetoric in favor of less aggressive language that emphasizes disarming Saddam Hussein rather than ousting him." So because of these constant changes, formulating a response to the Administration's position has been difficult.

The first question we must address is this: what is the goal? If the goal is to disarm Iraq, I believe that the best way to accomplish that goal would be to utilize the strategy articulated a few weeks ago by Secretary of State POWELL: reinstate U.N. inspections, utilizing the established rules, supported by multilateral military force, if necessary. This policy has the best chance of working. At a minimum, it is an important first step. And it has the support of the international community. If military force is needed to enforce the inspections, it will be targeted, focused and not requiring a massive invasion force; it would be unlikely to provoke widespread warfare all over the Middle East; and it is also just as likely to fulfill the goal of disarming Iraq as widespread bombing.

If, on the other hand, you merely start dropping bombs—how do you even know where to bomb, if you haven't inspected first? If you do know where the weapons are, those locations could be placed first on the inspection list, and if there is any resistance to the inspection, multilateral military force could be targeted to those sites.

But today we are discussing a resolution authorizing the use of force, before inspectors have had an opportunity to do their jobs. Unlike the first Administration resolution offered a few days ago, this resolution does require the

President to cooperate with Congress and to try to work with the U.N. This resolution is not as broad as the previous draft. It is limited to Iraq, not the entire Middle East, but it still gives the President the authority to attack, if he determines it to be necessary and appropriate.

This resolution represents the last opportunity for Congress to have meaningful input in the decision to go to war. And unfortunately there are many problems and unanswered questions with granting this authority now.

The first problem is that although the resolution suggests that the President try to work with the U.N., the provision is unenforceable. The President merely has to notify Congress, if he chooses to launch an attack. If we are truly interested in making sure that the President fully exhausts diplomatic efforts before using force, then the resolution should not authorize a military attack without a subsequent statement from Congress.

There is a consensus in the United States that we should work with the U.N. to the extent possible. But after this vote, Congress will have no opportunity to require meaningful efforts to seek cooperation with the U.N. This is a problem especially because the President has already state his disdain for the U.N. by saying at first that he didn't need the U.N., and when he finally sought U.N. support, he implied that if they failed to support the United States, he would proceed to attack without them. Furthermore, the Administration is now insisting on new, unprecedented rules for inspections, a position which may provoke Iraq into resisting the inspections and creating an unnecessary impasse at the U.N. A more prudent strategy would be to require the President to come back to Congress and explain that he made the good faith effort to work with the U.N.—rather than allowing the President to just notify Congress that based on the authority granted in this resolution, he had decided to attack Iraq.

Furthermore, the broad authority granted by this resolution is inappropriate, because of the timing of this vote—less than a month before the election. This problem is magnified by the fact that nearly all of the President's statements on the need for this resolution have been made at partisan political fundraisers, where he attacks Democratic officeholders. Twelve years ago—under the first President Bush—the vote to use military force in the Persian Gulf was taken after the election. That would be a good model to follow, because then members voted without the interests of personal political considerations competing with the national interests.

The timing of the vote on this resolution also raises questions because there is nothing urgent about the situation with Iraq. We have the same information now that we had 2 years ago. For example, we have known that Iraq has had the capability to build biological and chemical weapons for years; in fact we know this because they bought some of the materials from the United States. Furthermore, no case has been made that there is an imminent threat to the United States. So why is it essential for the President to have the authority to attack Iraq now? If the President discovers that the United States is in imminent danger, he is already authorized to defend the nation, and no one would expect him to wait for a Congressional Resolution. So what is different now? If the argument is that the urgency was

created a year ago on September 11th, the evidence supporting the connection between 9/11 and Iraq is at best tenuous. So what is the urgency to authorize force right before the election?

Another problem with the broad authority granted in the resolution is that this issue appears to be personal for the President. He admitted as much when he described Saddam Hussein as "the man who tried to kill my Dad." The United States should not go to war to settle a personal vendetta.

In addition to these problems, granting the authority in the resolution is premature because many questions are unanswered. For example, if the President uses the authority granted in this resolution and attacks Iraq, what plans have been made for the governance of Iraq after we win the war.

And what chance is there that a regime change will create any better situation than we have now. We cannot forget that the United States was involved in the regime change in Cuba in which Batista was kicked out and we ended up with Castro. So why isn't it likely that Iraq will select someone who hates us even more than Saddam Hussein.

And other questions need to be addressed, such as, to the extent that Iraq has chemical and biological weapons, is it a good idea to invade Iraq and put our troops right in harm's way. "And what will the war cost and how will we pay for it? There is no question that we are willing to pay whatever it costs to be successful in the war, but we can't ignore the questions of "how long" and "how much money." Eighteen months ago, we had the largest budget surplus in American history. Today, even without the costs of a war, we are approaching the largest deficit in American history, with huge deficits projected for the next 10 years. The direct costs of the war have been estimated at \$100 billion; the indirect costs, such as higher oil costs, have not even been estimated. And so, what will we be giving up in terms of being able to fund education and health care and other needs here in the United States? Or is the plan to raise taxes? Or is the plan to just run up more deficits?

What will be the domino effect? If we attack Iraq, Iraq will attack Israel, Israel will attack back, and then everyone in the Middle East will choose sides. How will that make us better off than we are now, especially in our fight against terrorism?

And in the end, what will we have won? In making progress against terrorism, we have to recognize that hate is as much of an enemy as complex weapons. The weapons used to cause mass destruction on 9/11 were boxcutters. Firearms and explosives are easily available in the United States and can be used against buildings or modes of transportation. If the result of the war is that others hate us worse than they do now, then we have to understand that suicide bombings in the United States may increase.

Moreover, that hatred may increase because others will resent that we have chosen to apply rules to others that we are unwilling to have applied to us. We would certainly not tolerate another country applying "regime change" to the United States. And we would never approve of preemptive strikes when there is no imminent threat as an acceptable international policy. Recently, the Administration threatened Iraqi military personnel with

trials as war criminals; but the U.S. policy is not to subject our personnel to the jurisdiction of international criminal tribunals. The CIA has now reported that the chance that Iraq will use chemical or biological weapons has actually increased since all of the talk about war began.

Mr. Speaker, all of these problems persist and questions remain unanswered, and they lead to the same basic uncertainty—what is the plan, both before and after the war, and what are the consequences. Some have argued that a vote against the Resolution is a vote to do nothing. That is not true. We should act, but based on the information we have now, I believe the wisest course is to proceed with the strategy proposed by Secretary of State Powell—U.N. weapons inspections in Iraq enforced with multilateral military power. That strategy has the support of the international community; it is most likely to actually disarm Iraq; it does not require a massive, unilateral invasion force; and it reduces the risk of provoking widespread armed conflict in the Middle East and terrorism in the United States.

I therefore urge my fellow members to vote against this resolution.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Washington (Mr. INSLEE), a member of the Committee on Financial Services.

(Mr. INSLEE asked and was given permission to revise and extend his remarks.)

Mr. INSLEE. Mr. Speaker, at its heart this debate tonight is not about Saddam Hussein. That debate is finished. We know that he is a tyrant and a thug. The debate tonight is about what our vision of America in this new age of new threats should be, and the one thing we should all agree on is America is the greatest Nation on Earth because it has always hued to certain principles. It has always matched the might of its Armed Forces with the force of its principles. It has never resorted through trial and tumult and storm to shortcuts even in times of difficulty.

And there are three principles that we should think about tonight: number one, it is an American principle that we engage the international community in a system of mutual security and international law; number two, it is an American principle that countries do not engage in first strikes absent international accord or truly imminent threat; number three, it is an American principle that the United States Congress is the group that makes the declaration of war. And unfortunately, Mr. Speaker, this resolution violates every single one of those basic tenets of American democracy.

They have put some legislative lipstick on it. They put some nice fuzzy language around it. But ultimately it violates this rule: no Congress should give any President a blank check to start a unilateral, ill-timed war, to let him start a war for any reason at any time with or without any allies. And in doing so, these principles are violated.

Let me address the first one, the basic principle that America stands for

international cooperation, and this has been a bipartisan principle for decades in this country. Republican and Democratic Presidents alike have worked with the international community to develop international law, international support systems; and we have led the Nation in doing so.

□ 0020

We have led the Nation, because a world where countries can strike one another without international support, without a true imminent threat, is a law of the jungle. This Nation, even in today's threat, should lead the world forward to international law, rather than backward to the law of the jungle.

This concept is more important after September 11 than less, and it is more important because of what the generals have told us, General Hoar, General Zinni, General Clark. We need to heed their advice, because what they have told us is simple and alarming.

They have told us that if we engage in a unilateral attack in the Middle East, it has the capacity of supercharging Osama bin Laden's recruitment efforts. There is no victory in the destruction of one tyrant while breeding 10,000 terrorists. It is true that a unilateral attack that inflames the Middle East has the capacity of reducing our security rather than increasing it. This violates an American principle.

Second, we have a principle of honoring our troops. We do not owe Saddam Hussein any more time. We do not owe Saddam Hussein anything. But we owe the soldiers and sailors and our sons and our daughters who we would send into the streets of Baghdad the ultimate effort to go the last mile to see if we can resolve the disarmament, and the total disarmament of weapons of mass destruction, before war. We owe our soldiers and sailors to make war the last option, not the first step.

I got a letter from a mother from Wenatchee, Washington, this week making one plea to me that when I took this vote, to say that she understood her son could be involved in a sacrifice at the cause of liberty, but not until every option is exhausted, and every option has not been exhausted. That is why we should pass the separate resolution, which will call for the President to go to the United Nations, get a tough, certain, guaranteed disarmament effort, and get this job done.

Third, we are a people who keep our eye on the ball. We have a principle in this Nation of not becoming distracted, and we do not know why we should take our eye off the ball, off the threat of al Qaeda, which 1 month ago was listed as a high threat of repeated terrorist attacks in this Nation, and go put our precious resources in dealing with what the CIA yesterday said was a low threat of terrorist activities. It does not make sense to the American people to do that.

So for those purposes and those principles, international cooperation, honoring our troops, and keeping our eye

on the ball, Mr. Speaker, we should reject this resolution and pass the Spratt amendment. This is the American way.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Maryland (Mr. CUMMINGS), a member of the Committee on Transportation and Infrastructure.

Mr. CUMMINGS. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, this Nation once again considers a course of action that will define our moral standing in the history of free peoples. I agree that America should speak with one voice in response to the challenges to international peace, security, and human rights posed by the regime in Iraq. That voice must be founded on the most fundamental of moral principles: the sanctity of human life.

The value of human life has been the basis for the settled, bipartisan international policy toward Iraq that we in this Congress have expressed in the past. In 1998, Congress reflected a strong, unified voice when we voted to support legislation that noted Iraq's violation of U.N. disarmament demands to eliminate all weapons of mass destruction, as well as their development.

In that same year, we also enacted the Iraq Liberation Act that authorized U.S. support for Iraqi liberation forces in their efforts to replace the Iraqi regime of Saddam Hussein. We did so because Saddam Hussein has proven himself to be a serious threat to regional stability in the Middle East, a growing threat to the United States, and a leader who deserves to be tried in an international tribunal for crimes against humanity. However, we did not authorize the unilateral use of U.S. military forces towards that end.

Neither the American people nor their elected representatives have wavered in our support for the values of human rights, security, international stability, and democracy reflected in those 1998 congressional resolutions.

However, as we consider this resolution, we must not forget one essential fact. As the gentlewoman from California (Ms. PELOSI) of the Permanent Select Committee on Intelligence has concluded, we have seen no evidence or no intelligence to suggest that Iraq indeed poses an imminent threat to our Nation. In the absence of an imminent threat to the United States, I cannot support the resolution proposed by the Bush administration that would authorize preemptive military strikes by the U.S. forces to enforce all relevant U.N. resolutions, some of which deal with issues other than Iraqi weapons of mass destruction.

I agree with the senior Senator from West Virginia, who has observed that the President's proposed resolution is dangerously hasty, redefines the nature of defense, and reinterprets the Constitution to suit the will of the executive branch.

The resolution proposed by the administration would codify the doctrine of preemption, the assertion that America has the unilateral right to attack a nation that has not attacked us. This, in my view, would be a precedent with disastrous consequences. A unilateral first strike would almost certainly result in substantial loss of life, both among American troops and among Iraqi civilians. A unilateral first strike would undermine the moral authority of the United States and could set a devastating international precedent that we could then see echoed in conflicts between India and Pakistan, Russia and Georgia, China and Taiwan, and in many other corners of the world.

In addition, unilateral U.S. action may well destabilize the Middle East, harming the international cooperation that we need to defend America against terrorism.

Experts tell us that the United States might have to remain in Iraq for a decade, a commitment requiring international support and engagement.

Finally, the economic costs of going it alone would undermine the ability of our Nation to address our unmet domestic priorities.

Although this resolution would authorize the President to take this Nation to war, it is not a declaration of war, it is a blank check to use force without the moral or political authority of a declaration of war. Congress must not abandon its authority under the Constitution. This resolution would do just that.

The course of action that is more consistent with the values and security interests of the United States is to support a multinational collective security strategy towards the threats to regional peace and international stability that are posed by the regime in Iraq. The administration has indicated some progress within the United Nations Security Council towards that goal. I join the President in urging all members of the Council to act with due diligence.

I also join in the position advanced by our colleague, the gentleman from South Carolina (Mr. SPRATT), who has proposed that we once again authorize U.S. military support for a renewed and strengthened U.N. Security Council resolution that demands true disarmament by Iraq. This is a threat that the civilized world must face together. The regime of Saddam Hussein, after all, is the world's problem as well as our own.

Mr. PAYNE. Mr. Speaker, I yield 5 minutes to the gentleman from Louisiana (Mr. JEFFERSON), a member of the Committee on Ways and Means.

Mr. JEFFERSON. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, our Nation is on the verge of opening a new front in the global war on terror. It is a front fraught with peril. It is a front that may send thousands of young Americans, men and women, to uproot a

ruthless dictator that has committed unspeakable acts against his own people and wrought havoc on the world.

No decision is more difficult, more wrenching for a U.S. President, the Congress, or the American people than to commit our soldiers and our Nation's prestige to a military conflagration. It is for this reason that we must consider all possible diplomatic and military options short of war.

As noted 19th century French author Guy de Maupassant wrote, "Every government has as much of a duty to avoid war as a ship's captain has to avoid a shipwreck."

Mr. Speaker, I rise today in strong support of the Spratt substitute to House Joint Resolution 114. It offers the best and most certain way to achieve our objectives of disarming Iraq of weapons of mass destruction and the best chance of avoiding a hasty decision to go to war. It is a sensible, prudent approach to managing the use of force by our country.

Eleven years ago, then President George Bush created one of the most impressive multinational coalitions that the world has ever seen. He very wisely determined that it was not in our Nation's interest to act unilaterally to liberate Kuwait.

The Spratt substitute is informed by that experience. It limits the opportunity of our current President for unilateral action to liberate Iraq.

I am pleased that President George W. Bush has engaged the U.N. during the current crisis. I am grateful that he has recognized that our Nation should work with the United Nations Security Council and allow weapons inspections to go forward and this process to occur.

□ 0030

I am relieved the President said that war is not inevitable. And I am encouraged that he has said that he would give a diplomatic course to disarm Iraq through a U.N. process every chance to work ahead of using force.

Mr. Speaker, the Spratt resolution guarantees the President's stated intentions are made law. As set forth in the Spratt substitute, our Armed Forces should take action only against Iraq only in conjunction with a new U.N. Security Council resolution that calls for the complete elimination of Iraq's weapons of mass destruction.

If the U.N. Security Council resolution is violated or the U.N. does not act, the President would need approval from Congress for unilateral action, and then only after making certain important certifications to Congress. Thus, this vote would occur only if the President has certified that further U.N. action is not forthcoming, force remains the only viable option, a broadbased international coalition is being formed, and the global war on terrorism would not be adversely affected by an Iraqi invasion.

Mr. Speaker, there is no such thing as prudent haste. It is an understatement to say that we should take the

time for calm deliberation by the Congress in a proceeding uncomplicated by any question other than whether we should commit to a course of action that may cost a heavy toll in human lives, hundreds of billions of dollars, and the good will of the international community.

I urge support of the Spratt substitute. But what is our course if Spratt is not adopted? What then is the best course for us to address the threat of terrorism and the threat of the use of chemical and biological weapons in the hands of a brutal dictator? What is our best chance to evoke the response from Iraq that will lead to unfettered weapons inspections and eventual disarmament?

With long and careful thought I have come to the conclusion that the leadership of Iraq will only submit to a credible disarmament process based on inspections if it is faced with a credible threat of the use of force. It is the use of force authorization that I pray will never be used. And it is the use of force authorization that should never be used unilaterally. After Spratt, H.J. Res. 114 provides the only remaining prudent chance to stem these new threats of unthinkable horrific terror that our Nation and the world now face, threats that we are now only just beginning to understand. It is a chance that I believe our country through this Congress must commit to take at this time.

Mr. PAYNE. Mr. Speaker, I yield 7 minutes to the gentleman from Massachusetts (Mr. DELAHUNT), who has been a very active Member on this resolution.

Mr. DELAHUNT. Mr. Speaker, I wish to commend my colleague from New Jersey (Mr. PAYNE) for his perseverance. I know he has been here until the wee hours of the morning last night and this evening. And for those of us who oppose the underlying resolution, we are indeed in his debt. And I also want to thank him for his leadership within our caucus, not just simply on this particular issue but on many issues, particularly in terms of the continent of Africa. He is certainly someone who commands our respect.

Mr. Speaker, I think it is important to bring to the attention of the House disturbing reports that have recently appeared in the national press about alleged efforts to tailor intelligence information about Iraqi intentions and capabilities to fill the contours of administration policy. And I wish to note two particular stories from today's Washington Post and yesterday's Miami Herald.

Mr. Speaker, I will insert the articles now in the RECORD.

[From the Washington Post, Oct. 9, 2002]

ANALYSTS DISCOUNT ATTACK BY IRAQ
(By Dana Priest)

Unprovoked by a U.S. military campaign, Iraqi President Saddam Hussein is unlikely to initiate a chemical or biological attack against the United States, intelligence agencies concluded in a classified report given to select senators last week.

However, the report added, "should Saddam conclude that a US-led attack could no longer be deterred," he might launch a chemical-biological counterattack. Hussein might "decide that the extreme step of assisting Islamist terrorists in conducting a WMD [weapons of mass destruction] attack against the United States would be his last chance to exact vengeance by taking a large number of victims with him."

The assessment was first made in a classified National Intelligence Estimate, which includes the analysis and opinions of all relevant U.S. intelligence agencies, that was given to the Senate intelligence committee last week. A declassified "white paper" on Iraq was released days later. At the urging of the committee, which is controlled by Democrats, additional portions of the intelligence report were declassified by the CIA Monday and released last night.

With lawmakers poised to vote this week on a resolution giving President Bush authority to attack Iraq, the new intelligence report offers grist both for supporters and critics of the administration's policy. The CIA assessment appears to suggest that an attack on Iraq could provoke the very thing the President has said he is trying to forestall: the use of chemical or biological weapons by Hussein.

But the CIA also declassified other elements of analysis that seem to back up the President's assertion that Iraq has active ties to al Qaeda—a growing feature of the administration's case for considering military action.

Among the intelligence assessments linking Iraq with al Qaeda is "credible reporting" that the group's "leaders sought contacts in Iraq who could help them acquire WMD capabilities," according to a letter to senators from CIA Director George T. Tenet.

Tenet added: "Iraq's increasing support to extremist Palestinians, coupled with growing indications of a relationship" with al Qaeda, "suggest Baghdad's links to terrorists will increase, even absent U.S. military action."

In his speech to the nation Monday night, Bush said: "Iraq could decide on any given day to provide a biological or chemical weapon to a terrorist group or individual terrorists. Alliance with terrorists could allow the Iraqi regime to attack America without leaving any fingerprints."

The letter's release shed light on a behind-the-scenes battle over Iraq-related intelligence. The CIA's detailed, unvarnished view of the threat posed by Iraq is central, say many lawmakers, to how they will vote on the matter. Yet an increasing number of intelligence officials, including former and current intelligence agency employees, are concerned the agency is tailoring its public stance to fit the administration's views.

The CIA works for the president, but its role is to provide him with information untainted by political agendas.

Caught in the tug of war over intelligence, say former intelligence officials familiar with current CIA intelligence and analysis on Iraq, have been the CIA's rank and file and, to some extent, Tenet.

There is a tremendous amount of pressure on the CIA to substantiate positions that have already been adopted by the administration," said Vincent M. Cannistraro, former head of counterterrorism at the CIA. Tenet last night released a statement meant to dispel assertions that the letter contained new information that would undercut the case Bush made Monday night.

"There is no inconsistency between our view of Saddam's growing threat and the view as expressed by the President in his speech," the statement read. "Although we think the chances of Saddam initiating a

WMD attack at this moment are low—in part because it would constitute an admission that he possesses WMD—there is no question that the likelihood of Saddam using WMD against the United States or our allies in the region for blackmail, deterrence, or otherwise grows as his arsenal continues to build."

In explaining why the items in the letter were not also released before, Tenet said he did not want to provide "Saddam a blueprint of our intelligence capabilities and shortcomings, or with insight into our expectations of how he will and will not act."

Still, he noted, the agency could nevertheless declassify further information not previously disclosed. Included in his letter were snippets of an Oct. 2 closed-door session.

Included in that was questioning by Sen. Carl M. Levin (D-Mich.), in which he asked an unnamed intelligence official whether it "is likely that [Hussein] would initiate an attack using a weapon of mass destruction?"

The official answered: "... in the foreseeable future, given the conditions we understand now, the likelihood I think would be low."

Levin asked: "If we initiate an attack and he thought he was in extremis ... what's the likelihood in response to our attack that he would use chemical or biological weapons?"

The answer came: "Pretty high, in my view."

In his letter, Tenet responded to senators' questions about Iraq's connections to al Qaeda. "We have solid reporting of senior-level contacts between Iraq and Al Qaeda going back a decade," Tenet wrote. "Credible information" also indicates that Iraq and al Qaeda "have discussed safe haven and reciprocal non-aggression."

[From The Miami Herald, Oct. 8, 2002]

DISSENT OVER GOING TO WAR GROWS AMONG
U.S. GOVERNMENT OFFICIALS

(By Warren P. Strobel, Jonathan S. Landay
and John Walcott)

WASHINGTON.—While President Bush marshals congressional and international support for invading Iraq, a growing number of military officers, intelligence professionals and diplomats in his own government privately have deep misgivings about the administration's double-time march toward war.

These officials charge that administration hawks have exaggerated evidence of the threat that Iraqi leader Saddam Hussein poses—including distorting his links to the al Qaeda terrorist network—have overstated the extent of international support for attacking Iraq and have downplayed the potential repercussions of a new war in the Middle East.

They charge that the administration squelches dissenting views and that intelligence analysts are under intense pressure to produce reports supporting the White House's argument that Hussein poses such an immediate threat to the United States that preemptive military action is necessary.

"Analysts at the working level in the intelligence community are feeling very strong pressure from the Pentagon to cook the intelligence books," said one official, speaking on condition of anonymity.

VIEWS ECHOED

A dozen other officials echoed his views in interviews with the Knight Ridder Washington Bureau.

They cited recent suggestions by Defense Secretary Donald Rumsfeld and National Security Advisor Condoleezza Rice that Hussein and Osama bin Laden's al Qaeda network are working together.

Rumsfeld said on Sept. 26 that the U.S. government has "bulletproof" confirmation

of links between Iraq and al Qaeda members, including "solid evidence" that members of the terrorist network maintain a presence in Iraq.

The facts are much less conclusive. Officials said Rumsfeld's statement was based in part on intercepted telephone calls in which an al Qaeda member who apparently was passing through Baghdad was overheard calling friends or relatives, intelligence officials said.

The intercepts provide no evidence that the suspected terrorist was working with the Iraqi regime or that he was working on a terrorist operation while he was in Iraq, they said.

In his Monday night speech, President Bush said a senior al Qaeda leader received medical treatment in Baghdad this year—implying larger cooperation—but he offered no evidence of complicity in any plot between the terrorist and Hussein's regime.

Rumsfeld also suggested that the Iraqi regime has offered safe haven to bin Laden and Taliban leader Mullah Mohammed Omar.

While technically true, that too is misleading. Intelligence reports said the Iraqi ambassador to Turkey, a longtime intelligence officer, made the offer during a visit to Afghanistan in late 1998, after the United States attacked al Qaeda training camps with cruise missiles to retaliate for the bombings of the U.S. embassies in Kenya and Tanzania. But officials said the same intelligence reports said bin Laden rejected the offer because he didn't want Hussein to control his group.

NO IRONCLAD PROOF

In fact, the officials said, there's no ironclad evidence that the Iraqi regime and the terrorist network are working together, or that Hussein has ever contemplated giving chemical or biological weapons to al Qaeda, with whom he has deep ideological differences.

None of the dissenting officials, who work in a number of different agencies, would agree to speak publicly. But many of them have long experience in the Middle East and South Asia, and all spoke in similar terms about their unease with the way that U.S. political leaders are dealing with Iraq.

All agreed that Hussein is a threat who eventually must be dealt with, and none flatly opposes military action. But, they say, the U.S. government has no dramatic new knowledge about the Iraqi leader that justifies Bush's urgent call to arms.

"I've seen nothing that's compelling," said one military officer who has access to intelligence reports.

Some lawmakers have voiced similar concerns after receiving CIA briefings.

Sen. Richard Durbin, D-Ill., said some information he had seen did not support Bush's portrayal of the Iraqi threat.

"It's troubling to have classified information that contradicts statements made by the administration," Durbin said, "There's more they should share with the public."

Florida's Sen. Bob Graham, chairman of the Senate Intelligence Committee, last week expressed frustration with the information he was receiving from the CIA and questioned the need to elevate Iraq to "our No. 1 threat."

In his Monday night speech, Bush stressed that if Hussein gained control of radioactive material no bigger than "a softball" he could build a nuclear weapon sufficient to intimidate his region, blackmail the world and covertly arm terrorists. But a senior administration intelligence official notes that Hussein has sought such highly enriched uranium for many years without success, and there is no evidence that he has it now.

Moreover, the senior official said, Hussein has no way to deliver a nuclear weapon against a U.S. target.

"Give them a nuclear weapon and you have the problem of delivery. Give them delivery, even clandestine, and you have a problem of plausible denial. Does anyone think that a nuclear weapon detonating in a Ryder truck or tramp freighter would not automatically trigger a response that would include Iraq, Iran, North Korea?" the intelligence official asked.

Here are some other examples of questionable statements:

Vice President Dick Cheney said in late August that Iraq might have nuclear weapons "fairly soon."

A CIA report released Friday said it could take Iraq until the last half of the decade to produce a nuclear weapon, unless it could acquire bomb-grade uranium of plutonium on the black market.

Also in August, Rumsfeld suggested that al Qaeda operatives fleeing Afghanistan were taking refuge in Iraq with Hussein's assistance.

Rumsfeld apparently was referring to about 150 members of the militant Islamic group Ansar al Islam (Supporters of Islam) who have taken refuge in Kurdish areas of northern Iraq. One of America's would-be Kurdish allies controls that part of the country, however, not Hussein.

WALKOVER NOTION

Current and former military officers also question the view sometimes expressed by Cheney, Rumsfeld and their civilian advisors in and out of the U.S. government that an American-led campaign against the Iraqi military would be a walkover.

"It is an article of faith among those with no military experience that the Iraqi military is low-hanging fruit," one intelligence officer said.

He challenged that notion, citing the U.S. experience in Somalia, where militiamen took thousands of casualties in 1993 but still managed to kill U.S. soldiers and force an American withdrawal.

Iraqi commanders, some officials warned, also could unleash chemical or biological weapons—although the American military is warning them they could face war crimes charges if they do—or U.S. airstrikes could do so inadvertently.

Hussein also might try to strike Israel or Saudi Arabia with Scud missiles tipped with chemical or biological weapons.

Mr. Speaker, the Herald story states, and I am quoting now, "that a growing number of military officers, intelligence professionals and diplomats within the administration have deep misgivings about the march toward war." The story continues, and again I am quoting from the Miami Herald, "These officials charge that the administration hawks have exaggerated evidence of the threat that the Iraqi leader Saddam Hussein poses, including distorting his links to the al Qaeda terrorist network. They have overstated the extent of international support for attacking Iraq and have downplayed the potential repercussions of a new war in the Middle East. They charge that the administration squelches dissenting views and that intelligence analysts are under intense pressure to produce reports supporting the White House's arguments that Hussein poses such an immediate threat to the United States that preemptive military action is necessary. 'Analysts at the working level in the intelligence community are feeling very strong pressure

from the Pentagon to cook the intelligence books,' said one official speaking on the condition of anonymity."

The article goes on to note that, again, I am quoting, "a dozen officials echoed his views."

Now today's Washington Post discusses what it calls a "behind-the-scenes battle over Iraq-related intelligence." And, again, I am quoting: "The CIA's detailed, unvarnished view of the threat posed by Iraq is central, say many lawmakers, as to how they will vote on the matter. Yet, increasing numbers of intelligence officials, including former and current intelligence agency employees are concerned the agency is tailoring its public stance to fit the administration's views."

The article goes on to quote a former head of counterterrorism of the CIA, one Vincent Cannistraro, who says that "there is a tremendous amount of pressure on the CIA to substantiate positions that have already been adopted by the administration."

I submit, Mr. Speaker, that if these reports are accurate, they represent a dangerous state of affairs. When we began our debate on this resolution yesterday morning, we did not have the benefit of declassified intelligence estimates released only last night, which indicate that Saddam Hussein is unlikely to initiate a chemical or biological attack against the United States unless he concludes that a U.S.-led attack is inevitable. Such contradictions between classified information in the administration's public statements make it very difficult for Congress to have a meaningful debate. It puts those few Members of Congress who have access to this information as members of the Permanent Select Committee on Intelligence in a truly awkward position and leaves the rest of us and the American people in the dark.

Senator GRAHAM, who chairs the Senate Permanent Select Committee on Intelligence, has said that the classified information he has received does not tally with the public statements of the administration. But, of course, he is not permitted to explain why. Based on what he knows, he has described the focus on Iraq as a distraction from the war on terrorism that allows Syria and Iran, countries which should be at the forefront of any intelligence effort against state sponsors of terrorism, off the hook.

Let me conclude by saying that we cannot discharge our constitutional responsibilities by allowing the administration to control the flow of information and simply trusting that they know what they are doing. That is an unacceptable situation in a democracy, Mr. Speaker. And that is not what the founders had in mind when they gave Congress, not the President, the power to declare war.

Mr. Speaker, what is the responsibility of a great power? Sometimes it is to act when others cannot, or will not, do so. Sometimes it is to refrain from acting when others would, so

as not to set a dangerous precedent that others might follow. Always it is to recognize that for better or worse our actions shape the rules by which the international system operates. The rule of law is a fragile thing. And through our actions, we either strengthen or erode it.

If you think this is merely a theoretical concern, let me share with you an article from last Sunday's New York Times. It is by Stephen Sestanovich, a senior fellow at the Council on Foreign Relations and professor international diplomacy at Columbia University.

The article is entitled, "Putin Has His Own Candidate for Pre-emption." It described the efforts of senior Russian officials to co-opt the rhetoric of the Bush Administration in their war of intimidation against the neighboring Republic of Georgia, where some Chechen fighters have taken refuge. Allow me to quote a few lines:

"On the eve of President Bush's Sept. 12 speech to the United Nations on Iraq, Mr. Putin wrote Secretary General Kofi Annan charging that Georgia's passivity toward Chechen fighters on its territory violated Security Council resolutions. Russia might therefore have to act unilaterally. The chief of Russia's general staff insisted that Mr. Shevardnadze was 'in no way' different from Mullah Omar of the Taliban."

"The Russian defense minister announced that no United Nations vote was needed to attack Georgia. One Russian newspaper published military plans to occupy all of Georgia—and thereby 'dictate the terms' of its future existence as a state. The headline: 'Pre-emption Moscow-Style.'"

Such are the dangers of unilateral assertions of power by the leader of the free world. Such are the risks that other nations with aggressive intentions may use stale evidence and ill-defined allegations to settle local grievances.

This is not to deny that there are times when it is necessary to strike first against an enemy who poses a "clear and present danger" to the safety and security of the Nation. The Constitution is not a suicide pact, as Justice Jackson famously said. And the same is true of the international legal order. We are not compelled to stand by and allow ourselves to be attacked before we can lawfully take action.

But any nation that engages in the preemptive use of force bears a heavy burden of showing that its actions were justified by the nature of the threat confronting it.

The principles that apply were formulated by none other than Daniel Webster, who was Secretary of State when the British launched a surprise attack on an American ship, the *Caroline*, in 1837.

Webster set forth the two conditions that must exist: first, the need for self-defense must be "instant, overwhelming, and leaving no choice of means and no moment for deliberation." And second, the degree of force used must be proportionate to the threat.

The resolution before us permits the President to take us into war without satisfying either of these requirements. It imposes no obligation upon him to show that the danger is truly immediate and the use of force truly necessary. Indeed, it speaks of a "continuing threat," which suggests an ongoing situation of indefinite duration. And it imposes no requirement that U.S. military actions be measured or proportionate to the threat we face.

In short, the resolution offers no rationale for the exercise of its broad grant of authority. Nor has the President provided one.

Last night, President Bush presented his case for a preemptive military strike against Iraq. I studied his speech with care, hoping that he would set forth clear and convincing evidence of the threat he perceives.

The speech offered ample evidence that Saddam Hussein is a bloodthirsty tyrant who has terrorized his own people and endangered his neighbors.

The speech offered ample evidence that Saddam Hussein has defied Security Council resolutions for 11 years by continuing to develop weapons of mass destruction.

And the speech made clear—in case anyone doubted it—that Saddam Hussein is deeply hostile to American interests.

What the speech failed to demonstrate is that Saddam Hussein poses a threat to America or vital U.S. interests that—Webster's words—is "instant, overwhelming, . . . leaving no choice of means and no moment for deliberation."

In fact, it demonstrated just the opposite. The President did not say, "Saddam Hussein presents an imminent threat to the United States." He said, "The danger is . . . significant and it only grows worse with time."

That is an argument for containment. It is an argument for coercive measures, including unconditional inspections, disarmament, and the freezing of assets. It may even be an argument for sanctions. But it is not an argument for launching an unprovoked military attack.

NUCLEAR WEAPONS

The President stated that the Iraqi regime has continued to pursue the development of nuclear weapons, and could one day soon be in a position to threaten America or the Middle East. He cited the Cuban missile crisis as precedent for a preemptive strike to contain that danger.

But the missile crisis involved the imposition of a naval quarantine to interdict the delivery of nuclear missiles capable of hitting the United States—as clear an example of a proportionate response to an imminent threat as can be imagined. In the present situation, the CIA's best estimate is that Iraq "will probably have a nuclear weapon during this decade."

Perhaps anticipating that some future administration might one day cite the missile crisis to justify preemptive military action, President Kennedy's own legal adviser expressly distinguished the Cuban missiles from what he called "threatening deployments or demonstrations that do not have imminent attack as their purpose or probable outcome."

CHEMICAL AND BIOLOGICAL WEAPONS

The President noted that Saddam Hussein has used chemical agents against civilian populations in his own country. This is true. It is also true that these attacks last occurred some 14 years ago—with the full knowledge of a U.S. government that did nothing to prevent them.

What is the imminent threat that such weapons might be used against the United States? The President didn't say. He said that Saddam Hussein "could decide on any given day to provide a biological or chemical weapon to a terrorist group." Indeed he could. So could any number of other nations, from Iran to North Korea.

But the historical record suggests that he can be deterred from deploying these weap-

ons. One the eve of Operation Desert Storm, Secretary of State Baker notified Iraq that any use of its weapons of mass destruction would result in a devastating American response. And the weapons were never used.

In fact, according to declassified intelligence estimates released only last night, Saddam is unlikely to initiate a chemical or biological attack against the United States unless he concludes that "U.S.-led attack could no longer be deterred." In other words, Saddam will unleash his arsenal only when he is facing annihilation—with nothing left to lose.

SUPPORT FOR TERRORISM

The President claimed that Saddam Hussein has links to international terrorism that justify a preemptive strike against his regime. What is the evidence? The President offered four arguments. First, he said that Iraq and al-Qaida "share a common enemy—the United States of America." Well, the United States and Iraq share a common enemy—Iran. But that's hardly evidence that we support Iraqi aggression.

Second, he said that the Iraqi regime "gleefully celebrated the terrorist attacks on America." This is hardly admirable, but it is also hardly evidence that they were behind the attacks. Any more than others who shared such sentiments elsewhere in the Arab world.

The President's last two arguments are more serious: that Iraq is continuing to finance terror in the Middle East and has continued to associate with leaders of al-Qaida, offering them safe harbor, medical treatment, and training in terrorist techniques. Yet assuming that these allegations are correct, they argue, not for invasion, but for treating Iraq as we treat the many other countries that provide various kinds of support for terrorism but against whom we are not making plans for war.

I do not mean to minimize these concerns. They are serious and deserve to be addressed, whether they occur in Iraq or in any other country—especially one in which internal repression, the appetite for conquest, and the possession of advanced weaponry go hand in hand.

I applaud the President's demand for immediate Iraqi compliance with Security Council resolutions. I would support a resolution that authorizes the limited use of our Armed Forces in support of international efforts to locate and dismantle Iraq's weapons of mass destruction should Iraq fail to comply.

Such a resolution would achieve the President's desire that we "tell the United Nations and all nations that America speaks with one voice."

Instead, the President insists on a resolution that goes further. That authorizes the President to "use the Armed Forces as he determines to be necessary and appropriate."

The President says that "approving this resolution does not mean that military action is imminent or unavoidable." If so, I am relieved to hear it. But if military action is imminent or unavoidable, then the broad language that would authorize it premature.

If the American people are satisfied that our cause is just and war is forced upon us, they will do what needs to be done. But before we risk the lives of our soldiers and countless innocent Iraqi civilians, before we divert untold billions of dollars from our other battles, before

we forfeit the moral authority that has distinguished America among the family of nations, we had better be sure we've taken every reasonable step to resolve this crisis without bloodshed.

Until then, I cannot support a resolution that gives the President a blank check to launch a military strike that meets none of the legal requirements for preemptive action. We have been down that road before. It is not a lesson we should have to learn again. And it's not the kind of example that the United States should set for the world.

□ 0040

Mr. PAYNE. Mr. Speaker, I yield myself the remaining time.

Let me conclude by thanking the majority for the kindness and the thoughtfulness that they have given us. The gentleman from Illinois (Mr. HYDE) should be commended, as I mentioned earlier, a gentleman always, but to allow everyone to have a word to say.

The past 2 days with over 24 hours of debate has been an historic time in this House. A debate has endured that will be noted and will be long-remembered what was said here. We have debated fundamental changes in the manner in which this country operates, first strike preemptive. Definitely a new course of action for this Nation.

Of course, first strikes are nothing new. In the medieval times there were many, France into Germany, Spain into Italy. In 1918, Germany entered France. December 7, Japan attacked the United States. So there has been preemptive strikes but never the greatest Nation in the world taking a decision to make first strikes preemptive, and so this is a new day for this great Nation.

The Framers of the Constitution, the Jeffersons and the Adams and Washingtons and Hamiltons, said let us be careful about power. We do not want a king or emperor or dictator, and, therefore, let us give the power of war to the Congress.

Here we are abdicating that responsibility and giving the right to declare war to one person, to say it is his decision to do what he wants and he has 48 hours to tell us later what he has done. Another principle that we have changed.

We jeopardize a coalition because I believe right now our number one fight is the battle against terror. The al Qaeda cells that are in this country and in 50 other countries and a false feeling of security will emerge when we attack Iraq if that is done, and Americans will, therefore, believe that there is a sense of security now and al Qaeda is gone. There is definitely a difference between the al Qaeda cells and the government of Iraq, and so we are leading people down a wrong path to believe that a defeat of Iraq, therefore, eliminates the war on terror.

We have heard recently that there is a connection between al Qaeda and the government of Iraq. This only was revealed in the last week or so. Many

wonder where this information is coming from and whether, in fact, it is indeed true. And, once again, we should not lull our people into a false feeling of security when we look over there and say Iraq is done, we are safe again, when the war on terror will still be here.

So we talk about a new concept, regime change, Saddam Hussein should go. This is a tall order. How do we do it? How long do we stay? How dangerous will it be? How costly will it be? How are we going to rehabilitate Afghanistan? We have not drilled the pumps to reach the low water tables as we promised. We have not started construction of schools as we said. We have not built the hospitals as we promised, but now we will go into Iraq and for how much? What will the cost be? \$100 billion? \$200 billion? No one really knows.

As the DOW has dropped from close to 11,000 down to close to 7,000, almost a 40 percent drop, how can we fund this? We spend \$1 billion a day today on a \$350 billion defense budget, with another couple of hundred billion dollars on the side. How can we do it with the unmet needs of PELL grants and student loans, the needs for prescription drug benefits for seniors and section 8 housing, vouchers funding for elementary and secondary schools in the leave no child behind legislation? How do we deal with that?

So as we move to vote we should engage the U.N., we should encourage them and support the inspectors to find and destroy those biological and chemical weapons of mass destruction. We should leave no stone unturned. We should go unfettered. We should demand that, and I believe then we can have the avoidance of war. We should attempt to avoid war at any cost. I do not believe that the United States is eliminating the danger of the al Qaeda cells in this country by us having a war and attack on Iraq.

I would like to say that we are a mighty powerful country. Let us use our power and might. We love this country. In school I used to recite the poem, This is my country, land of my birth; this is my country, the grandest on earth; and I pledge thee my allegiance, America the bold, because this is my country to have and to hold.

Let us not misuse the power that we have, but let us be sure that Saddam Hussein is contained, that this world is free of tyrants like that. Let us support the inspectors going in.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. ISSA. Mr. Speaker, I yield myself the remaining time.

Mr. Speaker, as I close, I would like to thank the gentleman from New Jersey. This has been, in fact, a long debate. It has been spirited at times, but, in fact, it has always lived up to the gravity of what we are considering, and we owe that in no small part to the gentleman from New Jersey.

The gentleman from Illinois (Mr. HYDE) has empowered me to close, and I take that as a very unusual thing for a freshman and something that is pretty important for somebody who not only supports this resolution but who supports this resolution often to the dismay of other Arab Americans.

My family emigrated from the Middle East, one side of my family emigrated from the Middle East, and I bear an Arab surname, and so for me and I think for many people who are going to support this resolution tomorrow, this has to be a special case. We are not pushing an 11-year or 12-year war to the brink of a final military conflict lightly.

I would call the Speaker's attentions to these advertisements that came out of Baghdad September 11 and a year after September 11 as just another example of what is different about Saddam Hussein's regime.

After September 11, both as a member of the Committee on International Relations and I believe as one of the Members of this body whose ancestry goes back to the Middle East, I was visited by not just one but every single ambassador from the Middle East represented in this country. In every case they expressed their horror, their sympathy and distanced themselves from the terrible events of September 11; and they did so in private, not intending to do it for the camera, but so that I would understand. And I am sure they visited virtually every other Member so they would understand that that is not what the Arab people are about, that is not what Arab society, one of the great societies that helped create the world as we know it today, is about.

It is not what the Iraqi people are about, and to put out propaganda in the Baghdad press talking about September 11 being Allah's revenge, in fact, says it all about this regime.

Saddam Hussein and his party and his almost 30-year rule has been all about killing and violence and hatred. He is not alone, but he is in a league of his own. And as we close for tonight and we move into tomorrow's short debates of 1 hour and final passage probably by midday, I hope that all of us will remember that this is not about Arab people, not in this country and not anywhere in the world.

The need to empower the President to take this action, should it become necessary, is all about the uniqueness of this administration of Saddam Hussein and the actions he has taken in the past, he takes in the present, and we are quite certain that if that regime is not changed or replaced, he will take in the future.

I say as one Arab American to the many Arab Americans and Muslim Americans in this country and perhaps to the Arabs around the world, America and particularly my community in America has absolutely no hatred and no willingness to participate in anything that is adverse to the Arab people.

□ 0050

But we do have to insist that the kind of tyranny that has gone on in Iraq for so many decades must in fact stop, either by Saddam Hussein living up to his obligations under the U.N. resolutions or his being driven from power and an Arab leader who will respect the rule of law and who will provide the kind of fairness for his own people can be found.

Mr. MEEHAN. Mr. Speaker, I rise tonight with a heavy heart but with determined resolve. A member of Congress faces no more important debate than authorizing the President to use military force.

Just over a year ago, Mr. Speaker, the eyes of the world were opened to the depths to which evil men will descend in order to put fear in the hearts and minds of peace loving people.

In the post-September 11th world, Americans now understand that there are those who have no regard for human life, and that they will kill the innocent in untold numbers to achieve evil goals.

We now also know that sometimes our Nation must act to prevent that which may happen in the future.

Which brings us to Saddam Hussein and Iraq's pursuit of weapons of mass destruction.

Saddam has a unique brand of state-sponsored terror that threatens the world like no other.

Unchecked, he pursues chemical, biological, and nuclear weapons and has demonstrated the capacity to use them.

Among dictators and despots, his record stands by itself: he has brutally murdered and repressed his own people, he has used chemical weapons against his neighbors and his countrymen including women and children, he has launched unprovoked attacks on other nations, he sponsored an assassination attempt on former President Bush, he harbors terrorists including members of Al Qaeda, and he defies the will of the United Nations and the international community by refusing to disarm and continuing to develop every conceivable weapons of mass destruction known to man.

That is why it is critical that the United States asserts its unique leadership role in the international community and put an end to Saddam's pursuit of weapons of mass destruction.

Now is the time to work within the United Nations Security Council to move a tough Resolution calling for the complete disarmament of Iraq's weapons of mass destruction under threat of force by a global coalition.

It must be the policy of the United States to exhaust all forms of diplomacy within the United Nations and other appropriate forums before considering any other course of action relative to disarming Iraq.

And if that diplomacy fails, then we must act with the broadest coalition of nations as possible to force the disarmament of Saddam's weapons of mass destruction.

Mr. Speaker, the strategy that Secretary Powell briefed me on that we are pursuing with the U.N. Security Council is precisely the reason why I am such a strong supporter of the Alternative being offered by John Spratt of South Carolina.

The Spratt Alternative authorizes the use of U.S. military force in pursuit of a Security Council-sanctioned effort to disarm Iraq, by force if necessary.

That is what Secretary Powell and the Administration are pushing for within the U.N. right now and that is what the Congress should be supporting.

This alternatives makes clear that if the Security Council fails to take action that Congress will act immediately to vote on authorizing the President to use unilateral, if necessary, force against Iraq to disarm.

We are also considering the underlying resolution that provides the President with the authority to use force in accordance with United Nations Security Council Resolutions and unilaterally.

It is a significantly broader authorization than the Spratt Alternative. However, changes have been made including: (1) support for and prioritization of U.S. diplomatic efforts at the U.N.; (2) limiting the scope of the authorization to Iraq only; (3) requiring presidential determinations to Congress before the president may use force; (4) and requiring the President to consult with and report to Congress throughout this process.

I had hoped that there would have been more opportunity for the House to improve on the underlying resolution during the course of this historic debate.

However, I was deeply encouraged by the President's words Monday night when he said, "Approving this resolution does not mean that military action is imminent or unavoidable."

Likewise, I was deeply encouraged by my meeting yesterday with Secretary Powell in which he spelled out in detail our strategy for action within the U.N. Security Council.

I take both President Bush and Secretary Powell at their word. In the coming days, weeks and months, I plan on holding them to their words.

As a Ranking Member of the House Armed Services Committee, I've seen the bravery of our men and women in uniform.

In fact, I was able to visit many earlier this year in Afghanistan and I was struck by their determination to secure the peace for that nation thousands of miles from home.

It pains me that more families may be missing their loved ones soon.

Nevertheless, let there be no doubt that Saddam Hussein's unfettered pursuit of weapons of mass destruction are a real and growing threat to the United States and the international community, and that whatever course others may take—America will defend herself.

Mr. ABERCROMBIE. Mr. Speaker, I rise to speak against this resolution. We all recognize that Saddam Hussein is a tyrant and that he is a dangerous enemy. The question is whether this resolution is the right way to address the threats presented by his regime.

The Administration says that Iraq presents an imminent threat to the United States, that unless we give the President carte blanche to launch a unilateral, preemptive attack, we will be subject to attack by weapons of mass destruction. No one needs to convince us of the horror of weapons of mass destruction or the evil intentions of Saddam Hussein. But does that justify the blank check this resolution gives the President? We have listened to the testimony, read the briefs, and weighed the arguments presented by the Administration. In my view, they have yet to prove their case. They have presented no credible evidence that the United States faces imminent attack. They have presented no credible evidence that Iraq was involved in the September 11th

terrorist attacks or that it is giving material aid to those involved in those attacks.

Are we setting the bar too high? I don't think so. The evidence of imminent threat should be credible, conclusive and irrefutable if we are talking about the United States unleashing the dogs of war. Striking the first blow is unprecedented in American history. It has always been a point of honor that the United States does not start wars. If we are going to depart from a fundamental principle that has guided U.S. foreign policy for more than 200 years, the evidence of necessity must be iron clad.

This is much more than a point of pride. It is not an abstract argument. Through this action, the world's only remaining superpower is asserting a principle that the nations of the world—including the United States—have struggled to consign to the past. We have rejected the old idea that any nation which claims to feel threatened or aggrieved can unilaterally and preemptively attack another without the sanction of the international community. The power to initiate war is no longer untrammelled and absolute. Think for a moment of the precedent we are setting, of the Pandora's box we are opening. What if, tomorrow, India or Pakistan says the other constitutes an unacceptable threat? Would this justify one of these nuclear-armed countries attacking the other? What about China and Taiwan? What about any number of other countries whose relations with a neighbor are beset with tension, suspicion, threats, and insecurity?

More immediately, what about our relations with our allies, the nations on which we depend to help us keep the peace and bear the burden of protecting our interests? We should be careful not to initiate a new age of American unilateralism that leaves us without allies. The Administration thinks they are dispensable in the case of Iraq. Maybe they are. But if our alliances fray and disintegrate, it is certain that there will come a time when we do need them. Will they be there for us? Maybe, maybe not. But one thing we can be sure of: it is foolhardy in the extreme to ignore our allies' importance to the system of international relations and the maintenance of America's prosperity and national security interests.

I have every confidence that our troops will display the bravery and professionalism we have come to expect from them. But the consequences of a U.S. victory are liable to be a huge burden for the United States. We will have taken on the responsibility for peace and order, for feeding and sustaining an entire population, and guaranteeing the territorial integrity of Iraq. All this in the context of a population which may or may not be receptive to the presence of our armed forces. We will have to counter the centrifugal dynamics that drive the Kurds in the north and the Shiites in the south away from the Iraqi state. We will be responsible for defending Iraq's long border with Iran against incursions. We are talking about committing tens of thousands of troops, perhaps hundreds of billions of dollars, for many years, maybe decades.

And what will be the impact of an invasion in the rest of the Muslim world? The reaction will not be an outpouring of support for the United States. It will feed the flames of fanaticism. It could well destabilize Egypt, Jordan and other friendly nations. Are we prepared to commit more troops, more money, more prestige to shoring up these governments?

Finally, let me offer some observations as a member of the Armed Services Committee. Implications of a war against Iraq will reverberate at every level of the Department of Defense. Problematic issues the military faces today—global international commitments, increased personnel tempo, and over-reliance on the Reserves and National Guard—will only be exacerbated when military requirements for Iraq are thrown in the mix.

Of foremost concern is the inevitable enormous strain on military manpower. Secretary of Defense Donald Rumsfeld testified before the Armed Services Committee that no increase in troop end strength is necessary to carry out an invasion and peacekeeping activities in Iraq. No one else whom our Committee spoke to held this opinion. In fact, retired flag officers and distinguished military analysts all agreed that increased end strength was imperative for the ultimate success of our reconstruction of Iraq.

And the personnel problem extends far beyond the full time, active duty forces. Since the Persian Gulf war, our reliance on the Reserves and National Guard has grown to the point where it would be impossible for DoD to meet its worldwide commitments without the presence of these units. Reservists and Guardsmen no longer talk about the rare mobilization in support of a national emergency; rather, some units routinely deploy overseas alongside their active duty counterparts. How long can we continue to call upon these volunteers to shoulder more than their fair share? How long can we ask civilian employers and families of our Guard and Reserve to carry on without them? I sincerely hope that one of the first orders of business in the 108th Congress is a comprehensive overhaul of our military personnel system in order to ease the stress on our citizen soldiers. Otherwise, our Reservists and Guardsmen are sure to vote with their feet.

These considerations do not exhaust the questions raised by the prospect of an attack on Iraq. Serious as they are, the most serious questions of all are the ones none of us can anticipate. War has a way of creating new dynamics and unleashing new forces in the world. All too frequently, those consequences are inimical to the interests of established powers. Those who see the dawn of a new era of peace, stability and democracy in the Middle East as a result of a strike against Iraq would do well to think again.

Ms. HARMAN. Mr. Speaker, I rise in support of this resolution.

The threat from Iraq is very real and increasingly dangerous. Saddam Hussein's belligerent intentions and his possession and ongoing development of weapons of mass destruction to fulfill those intentions make him a clear and present danger to the United States and the world.

Particularly worrisome is the evidence of Iraq's UAV capability. Iraq's ability to use unmanned aerial vehicles to deliver biological and chemical weapons far outside its national borders represents a qualitative increase in the danger it poses.

History demonstrates Saddam Hussein's willingness to use such weapons against unarmed civilians, including his own people. And it demonstrates his unhesitating instincts to invade his neighbors—Iran and Kuwait—and to attack Israel.

That he appears, to quote Director Tenet's recent letter, to be "drawing a line short of

conducting terrorist attacks" does not persuade me that he won't.

He is impulsive, irrational, vicious, and cruel. Unchecked, he will only grow stronger as he develops capability to match his disdain for America and his Middle East neighbors.

History shows that had Israel not destroyed Iraq's nuclear reactor in 1981, Saddam Hussein would now have nuclear capability. But he did not cease his nuclear ambitions. Had coalition military forces not swept through Iraq in 1991, he would have possessed nuclear weapons by 1993.

The CIA now reports that Iraq is one year away from a functional nuclear device once it acquires missile material. Waiting one hour, one day, one month in such an environment, as some suggest, is too risky.

We have to act now because the U.N. resolutions following the gulf war have not contained the Iraqi threat.

With the passage of time, international resolve to enforce United Nations resolutions has weakened.

This resolution will demonstrate to the U.N. American resolve to act if necessary, but preferably in a peaceful and multilateral way.

The strong and forceful language in this resolution will help Secretary Powell persuade his counterparts at the U.N. and around the globe to join us.

The resolution we are considering is greatly improved from the draft the Administration proposed and I commend Leader GEPHARDT for negotiating these improvements.

This resolution narrows the scope of action to the threats to national security posed by Iraq and enforcing compliance with U.N. Resolutions.

This resolution stresses a strong preference for peaceful and diplomatic action, authorizing the use of force only if all peaceful options have failed.

This resolution requires the President to comply with the War Powers Act and report regularly to Congress should military action become necessary, as well as after the use of force is completed.

This resolution addresses post-disarmament Iraq and the role of the United States and international community in rebuilding.

And of crucial importance, this resolution requires the President to certify to Congress that action in Iraq will not dilute our ability to wage the war on terrorism.

Removing WMD from Iraq is an important priority, but it cannot replace our counterterrorism efforts at home and abroad. We must ensure that we do not divert attention from protecting our homeland—beginning with the creation of a Department of Homeland Security.

We must also strengthen and expand programs and policies aimed at stopping the proliferation of weapons of mass destruction and their components. The ready availability of material for chemical, biological and nuclear weapons, and the know-how to make them, has allowed Iraq to rebuild rapidly since 1991 and the expulsion of inspectors in 1998. But nonproliferation programs have been underfunded at a time when they need to be expanded.

If we don't stop the flow of scientists and materials for weapons of mass destruction, we will soon be faced with another Iraq. The axis of evil will grow to include more states. We will encounter the nightmare scenario of nuclear-

armed terrorist groups, capable of blackmailing or attacking our cities and citizens from within, with little hope of deterrence or diplomacy to stop them.

Sentiment in my district is high—both in favor and opposition to this resolution. I thank my constituents for sharing their views with me. I have listened carefully, learned as much as I could, and now it is time to lead.

Like all my colleagues, I fervently hope that the U.S. will not need to use force. But the best chance to avoid military action is to show the U.N. and Iraq that we will not flinch from it.

Giving diplomatic efforts every chance is the right policy and this resolution gives diplomacy its maximum chance to succeed.

Mr. RYAN of Wisconsin. Mr. Speaker, September 11, 2001, brought to light a horror that the American people and the world had up until then only seen in movies. On that day, we learned, as a nation, what it means to be terrorized. The nineteen men who hijacked airliners and used them as guided missiles showed us that even on our home soil Americans are not shielded from the reach of terrorism. Bearing in mind, we must continue to defend against these forces of evil and those who support them. We cannot spend the rest of our lives in fear. I support this resolution in order to protect the life of every American, at home and abroad, I also believe it offers the best chance for peace because it clearly communicates U.S. resolve to Saddam Hussein and makes clear that his continued refusal to disarm will be his undoing.

Mr. Speaker, granting the authority to send our brave men and women in uniform overseas to fight in hostile territory is the most difficult decision we make in Congress. That was true last year and it remains true today. Since the beginning of the first mission in Afghanistan on October 7, 2001, our military men and women have fought terrorists and disrupted their networks, liberated a country, and brought the prospect of peace and democracy to a nation that had not seen either in decades. While our military campaign in Afghanistan is slowly coming to a close, we must not lose sight of our primary objective, to rid the world of terrorists and those who sustain them. Saddam Hussein and his regime in Iraq fit this description.

Mr. Speaker, after sifting through the evidence, reviewing the facts, and probing the Administration, I am convinced Saddam Hussein's regime is a clear and present threat to the security of the United States and our allies. Since he came to power in Iraq in 1979, Hussein has waged war on his neighbors and terrorized his own people with chemical weapons. He has allowed terrorists groups, such as al Qaeda, to operate safely in Iraq. He has supported terrorist actions by compensating the families of Palestinian suicide bombers for their attacks on innocent Israeli citizens. He orders his military to fire missiles and artillery on U.S. and a coalition aircraft that patrol the U.N.-imposed no-fly zones that protect Kurd and Shi'a Muslims in Northern and Southern Iraq, respectively. He has attempted to assassinate a former U.S. President. Moreover, he has violated the basic human rights of his people, causing them to live in fear and poverty, while he builds Presidential palaces and lives of life of luxury. Currently, there is nothing stopping him from using weapons of mass destruction against the United States and our allies, or from giving them to terrorists.

After the gulf war in 1991, Saddam Hussein agreed to abide by United Nations Security Council Resolutions 686, 687, and 688. By agreeing to these resolutions, Hussein was required to, among other things: allow international weapons inspectors to oversee the destruction of his weapons of mass destruction; not develop new weapons of mass destruction; destroy all of his ballistic missiles with a range greater than 150 kilometers; stop support for terrorism and prevent terrorist organizations from operating within Iraq; help account for missing Kuwaitis and other individuals; return stolen Kuwaiti property and bear the financial liability for damage from the gulf war; and end his repression of the Iraqi people. Mr. Speaker, he has taken none of these required actions.

As a matter of fact, over the past decade, Saddam Hussein has shown nothing but contempt for the United Nations and its member-states. In all, Hussein has violated sixteen critical U.N. resolutions. It became obvious that Hussein had no intention of cooperating with the U.N. when Iraq ceased cooperation with weapons inspectors on October 31, 1998, after several years of evading, deceiving, and even harassing U.N. weapons inspectors. This flagrant violation of U.N. Resolution 687 prompted the passage of U.N. Resolution 1205, which called on Iraq to continue "immediate, complete and unconditional cooperation" with U.N. weapons inspectors. These events led to the Clinton Administration signing the Iraqi Liberation Act of 1998 into law, which clarifies the official position of the United States as promoting regime change in Iraq. Regardless, it has been four years since weapons inspectors last visited Iraq. There is no doubt that within this time Hussein has reinvigorated his weapons programs, and according to the International Institute for Strategic Studies, an independent research center based in London, there is little doubt that Hussein's nuclear capabilities are within reach.

If Saddam Hussein persists in violating U.N. Security Council resolutions and refuses to disarm and the use of force becomes our only option, then the goal of military action should not just be to remove weapons of mass destruction from Iraq. Military action must also have the end result of removing Hussein from power. In the end, nothing short of a regime change will liberate the Iraqi people, whom Saddam Hussein has repressed for more than two decades. Since April of 1991, Hussein has continued to ignore U.N. Resolution 688, which requires him to allow immediate access to international humanitarian organizations to help those in need of assistance in Iraq. Furthermore, Hussein punishes his people by diverting funds from the U.N.'s "oil-for-food" program to pay for his weapons programs. I believe Saddam Hussein will continue to do what he has done so effectively in the past: violate the basic human rights of every Iraqi citizen.

I would now like to read to you the following excerpt from the book *The Threatening Storm: The Case for Invading Iraq* by Kenneth M. Pollack. Mr. Pollack, a former analyst on Iraq for the Central Intelligence Agency who served on the National Security Council during the Clinton Administration, is one of the foremost experts on Saddam Hussein and the Iraqi regime.

This is a regime that will gouge out the eyes of children to force confessions from their parents and grandparents. This is a re-

gime that will crush all of the bones in the feet of a two-year-old-girl to force her mother to divulge her father's whereabouts. This is a regime that will hold a nursing baby at arm's length from its mother and allow the child to starve to death to force the mother to confess. This is a regime that will burn a person's limbs off to force him to confess or comply. This is a regime that will slowly lower its victims into huge vats of acid, either to break their will or simply as a means of execution. This is a regime that applies electric shocks to the bodies of its victims, particularly their genitals, with great creativity. This is a regime that in [the year] 2000 decreed that the crime of criticizing the regime (which can be as harmless as suggesting that Saddam's clothing does not match) would be punished by cutting out the offender's tongue. This is a regime that practices systematic rape against its female victims. This is a regime that will drag in a man's wife, daughter, or other female relative and repeatedly rape her in front of him. This is a regime that will force a white-hot metal rod into a person's anus or other orifices. This is a regime that employs thalium poisoning, widely considered one of the most excruciating ways to die. This is a regime that will behead a young mother in the street in front of her house and children because her husband was suspected of opposing the regime. This is a regime that used chemical warfare on its own Kurdish citizens—not just on the fifteen thousand killed and maimed at Halabja but on scores of other villages all across Kurdistan. This is a regime that tested chemical and biological warfare agents on Iranian prisoners of war, using the POWs in controlled experiments to determine the best ways to disperse the agents to inflict the greatest damage.

This is the fate that awaits thousands of Iraqis each year. The roughest estimates are that over the last twenty years more than two hundred thousand people have disappeared into Saddam's prison system, never to be heard from again. Hundreds of thousands of others were taken away and, after unforgettable bouts of torture that left them psychologically and often physically mangled, eventually were released or escaped. To give a sense of scale, just the numbers of Iraqis never heard from again would be equivalent to about 2.5 million Americans suffering such a fate.

It is true that Iraq has said publicly that it will allow weapons inspectors to return. While some members of the United Nations believe Iraq is taking the necessary steps to rectify its past transgressions, Iraq has placed several conditions that can only hamstring the U.N.'s efforts. If the U.N. bows to Hussein's demands, the legitimacy of the entire organization could be called into question.

The purpose of this resolution is to authorize the President to use such force as may be necessary to protect the national security of the United States from threats posed by Iraq and to enforce U.N. Resolutions. Yet even more clear than this language is the message it sends. This resolution sends the message of resolve. It shows that we are resolved to protect ourselves and our allies with whatever means are necessary. And, it is precisely because of this message that we open up the possibility of a peaceful settlement to this great threat. To be clear, after eleven years of dealing with Iraq one thing is certain: Saddam Hussein is motivated only when he finds he has no other options. This resolution demonstrates our unity behind action, should he fail to meet the demands of the international community. Without it, we can be assured that

Hussein's Iraq will continue stockpiling and developing weapons of mass death, providing safe haven for terrorists, and tormenting his own people. Meanwhile, the danger for American and our allies will grow even worse.

Additionally, we seem to be experiencing quite a logjam in the U.N. I believe that passage of this resolution will help break that impasse and secure a meaningful and direct resolution from the U.N., which will help build a larger multilateral coalition around this just cause. If these last attempts at a peaceful solution do fail, then we must show that we are resolved to act to rid the world of this great threat.

Mr. Speaker, war should always take a backseat to peace. I still hold out hope that a peaceful solution can be reached. Unfortunately, time and time again, Saddam Hussein has forsaken his opportunities for peace. He is aggressively seeking to acquire nuclear weapons and build up his other weapons of mass destruction. The longer he is allowed to make progress on these deadly projects, the greater the threat to us—including the threat that Iraq could supply terrorists with weapons of mass destruction. If Hussein refuses to comply, the United States must take action, or risk the use of biological, chemical, or nuclear weapons against us on our own soil.

Mr. WALSH. Mr. Speaker, the decision before the Congress this week is whether or not to give the President the option to use force with Iraq if all else fails. It is similar to the one before the Congress early in my career when the elder Bush was in the White House. The main difference was that Iraq had invaded a sovereign nation, Kuwait, to the outrage of the world community.

The world agreed that Iraq was the aggressor and must be driven out. The U.N. voted for precisely that and we led the effort. Although much clearer in circumstance, it was an extremely difficult decision.

Today things are not quite so clear. There has been no invasion and there, at least at the moment of this writing, is no U.N. sanction for military action.

The arguments are more like piling straws on a camel's back. Saddam Hussein is a murderer of his own people. He is a warmonger, witness Kuwait, Iran and the Kurds in his own country. He aggressively pursues the development of nuclear weapons. Remember Israel bombed an Iraqi nuclear facility many years ago. Hussein still pursues that goal. He has accumulated thousands of liters of chemical and biological weapons and is not afraid to use them, in fact he has used them against Iran and his own people. He planned an attempted assassination of an American president. He defies U.N. resolutions that ended the '91 Gulf War, which called for the destruction of all weapons of mass destruction. He refused to allow weapons inspectors to do their job and threatened and intimidated them at every turn.

Now we are told that Iraq may have become a weapons supermarket for terrorism. Some al Qaeda leaders are there and other terrorist organizations have close ties; i.e. Abu Nidal. We are told that Hussein provides \$25,000 to each family of the suicide bombers who attack Israel. And we can't forget that during the Gulf War Hussein rained Scud missiles down on innocent Israeli civilians in Tel Aviv and other communities. Iraq now is working to extend the range of their missiles.

Now, under the threat of U.S. action, Hussein agrees to let weapons inspectors back into his country. Can there be any doubt that the only thing this man responds to is the threat of deadly force? One is tempted to believe Hussein is now prepared to admit weapons inspectors. And indeed we should and must let that scenario play out before any act of war. But the skeptic in me doesn't believe a word that he says. History is a wonderful teacher and we all know this man's history.

The U.N. has shown itself to be incapable and unwilling to enforce its own resolutions. As a guarantor of world peace they have a checkered past at best. Without having the threat of military intervention, the U.N. is a paper tiger. I have long been a supporter of the U.N. I believe that the nations of the world must have a forum in which to settle their differences but when a tyrant like Hussein thumbs his nose at the world, something isn't right.

One last point, since the 9/11 attack on our country we have been pouring over the coals, literally and figuratively. One by one we have connected the dots that led to the attack. We have seen the threat that connects the plans to do great harm to our country and our people.

The President in these past weeks has connected the dots for us. He has pointed to Iraq with great alarm and tried to help us to understand the threat. It is real. What we don't know is how imminent and what shape the threat will take.

After much thought and prayer and consultation with my constituents and with people I love and trust, I have decided to support the resolution before the House. Not because I want to go to war. I don't, I remember the last one. I remember meeting with Marsha Connor, the mother of Patrick Connor of Marcellus who was killed in action. It was heartbreaking.

But if we don't give the President that option, Saddam Hussein and Iraq will continue to grow more troublesome and if they ever develop a nuclear weapon it would be horrific. I'll vote for the resolution but I will implore the President not to use force unless all else fails. Negotiation, weapons inspectors, and U.N. sanctions should come first.

And if we do indeed go, we should do so with the other nations of the world who should feel as threatened as we.

Mrs. MCCARTHY of New York. Mr. Speaker, I rise in support of House Joint Resolution 114 and the need to protect the United States from any threat posed by Iraq. However, my support for the resolution is coupled with several concerns associated with potential unilateral action against Iraq.

The September 11 attacks on the United States demonstrated the will of misguided, vengeful leaders whose determination to harm Americans seem boundless. Clearly, Saddam Hussein is one of these leaders. This dictator harbors terrorists, invokes chemical warfare upon his own people and openly defies United Nations Security Council Resolutions. His support of international terrorism, and pursuit of stockpiling weapons of mass destruction poses not only a threat to the United States, but also to the world.

Since 1998, this body has voted on four separate measures that appropriate funds for Iraqi opposition forces, as well as call upon Iraq to allow U.N. inspectors immediate, unconditional and unrestricted access to areas

they wish to inspect. Today's resolution takes a step further and acknowledges that sanctions, weapons inspection and containment have failed. It recognizes that Iraq and Saddam Hussein present an unrelenting hostility to the United States. And we know when it comes to the United States, Hussein has a very prolific partner in hate: al Qaeda. In fact, Saddam Hussein has openly praised the September 11 attacks.

The resolution before us authorizes United States military force under two circumstances: (1) In order to defend our national security against a threat by Iraq, and (2) enforce U.N. Security Council Resolutions relevant to Iraq.

Disarming Iraq is necessary to ensure our national security. I was encouraged to hear President Bush emphasize that Iraq can avoid military force if all weapons of mass destruction are destroyed. I hope that Saddam Hussein will heed this advice.

I was also encouraged to hear President Bush stress the importance of seeking a coalition, as I believe the support of the United Nations Security Council is critical. The President must persist in his efforts with the U.N. to approve a tougher inspection resolution. If inspection efforts fail, a U.N.-sanctioned military force is the best course of action, as it would garner support in neighboring countries, and enhance the chances of post-war success. If the U.N. were to fail to authorize force, then the President should come back to Congress and let us have a say about whether we go in unilaterally.

Finally, I was glad to hear the President pledge to rebuild a post-war Iraqi economy. This is very important, as the cost of military action must not only be weighed economically, but regionally.

Although this is one of the most difficult votes a Member of Congress will cast, I'm afraid it is an inevitable action needed to protect the United States from Iraq and the destructive weapons it seeks to acquire and use.

Today, each and every member will vote their conscience. Regardless of how we each vote, at the end of the day we must remember one thing: that we represent the people of the United States and we must come together as a body, and a people, just as we did on September 11.

Mr. SERRANO. Mr. Speaker, today I find myself standing here on the floor of the House with anguish in my heart. I have read and listened to all sides, and I have struggled to understand why our great nation would want to contemplate going to war.

When September 11th, 2001, happened, I was in New York City, and as the enormity of what terrorism could do to my City hit me, I was stunned. Then I wept for all of those innocent people who were simply doing their jobs and living their lives, who in one moment of hate lost their lives. There has, however, not been any conclusive evidence that links al Qaeda, those responsible for the tragedy of September 11th, with Iraq.

Some question whether those who oppose this resolution are forgetting those who died on September 11th; some question our patriotism. Though I should not have to affirm my patriotism, I say simply that I love my country, I love my city of New York, and I am not afraid to deal with those who attacked it. It is the most basic of our purposes as a national government, to defend our nation. But here we speak of a different matter.

I am certainly pleased that the President now recognizes that he must secure the approval of the Congress before taking our nation to war. This is progress and what our Constitution requires. However, if our ultimate goal is to disarm Iraq of all chemical and biological weapons, how does giving our President this right to go to war accomplish that goal? Wouldn't working with the United Nations to implement a program of rigorous inspections move us closer to our goal? I believe that force should always be used as a last resort, and never as the first way to accomplish a goal.

The new doctrine announced by the President, that the United States has the right to engage in a preemptive strike, which he seeks to implement through this resolution, frightens me and establishes a troubling precedent. This is a doctrine better left unused. It contravenes a half century of developed international law, of which the United States has been a champion. Taking this idea to its logical conclusion means that India and Pakistan, for instance, nations with nuclear weapons and a history of conflict, may no longer feel bound by the limitations on the use of force that have been agreed to by the family of nations. The United Nations will become irrelevant and the checks and balances that membership in the United Nations places on the member states will no longer apply. Even if we strike and successfully defeat Iraq militarily, will this make our nation a safer place to live?

The Bush Administration often talks about "regime change" in Iraq and the need to remove Saddam Hussein from power. In 1991 we decided against regime change because of concern about the overall stability of the region. What has happened since that time that has changed the goals of a military action?

As a nation we need to plan and think beyond what passage of this resolution and a military victory would mean. The United States would need to spend at least the next ten years involved in an occupation, reconstruction, and re-building effort. This will require a serious commitment of American resources and troops. Are we ready to commit to the rebuilding that will follow military action?

As a nation have we carefully considered what the impact of a unilateral attack by the United States would be on Israel? If everything that has been attributed to Hussein this evening is true, are we prepared to guarantee the stability of the entire region when Hussein finds himself threatened and decides to strike out at his neighbors?

Our State Department is actively involved in trying to improve the image of the United States in the Arab world and particularly among young Arab men and women. We do not want them to perceive the United States as an enemy. When we engage as a nation in a unilateral military action against an Arab nation, an action that our allies are cautioning against, how will the United States be viewed in the Arab world? Perhaps the result will be an increase in al Qaeda's membership and a renewed hatred toward Americans.

The United States is founded on the principles of justice and due process. If we disregard these principles and adopt a unilateral, macho and aggressive stance, we lose our moral authority in the world. Seeking the consensus of nations does not weaken us or expose us to danger; instead, it fortifies us and brings to our cause the strength of our allies.

We want nations to look at us with respect and not fear, outrage, and scorn. It is time for us to take the lead in removing all weapons from Iraq, but in a way that embraces other nations instead of isolating us from them.

I will vote against this resolution, which permits a unilateral military attack, because I do not believe that the President has made a convincing case or provided sufficient evidence to merit its passage. However, let me also make it clear that my vote against this resolution, which I do not believe will make our nation any safer, should not in any way imply that I think the men and women in our armed services are anything less than heroes. They are courageous and brave.

So I end this speech as I began it, with great sadness. I cannot agree with the course that our great nation is embarking on, one that brings the threat of war closer and the goal of peace further away.

Mr. GARY G. MILLER of California. Mr. Speaker, as Saddam Hussein continues to defy the United States and the world, the avenue of options available in dealing with Hussein shrinks with every step he takes toward attaining nuclear and other weapons of mass destruction. It is clear that Hussein does not aspire to acquire these weapons for the sake of self-defense. The goal of these weapons is aggression. This is not a man of peace. This is a man of war. He has made a mockery of the agreement ending the first Persian Gulf War, and now he holds out hope that he can continue to manipulate the world to hold on to power. And he intends to hold power and use it till he is successful in acquiring weapons of mass destruction and with it, the ability to bully and destabilize the Gulf region.

Hussein intends to use the currency of these weapons to hold hostage the entire region. What then? Some argue that if the attack is not on the U.S. (which we cannot guarantee), we should not get involved. But who believes that if he again invades another country that the United States will be able to sit on its hands as the stability of the Middle East unravels? If he uses these weapons against his neighbors, where will this nation be on moral ground to allow him to continue without reprisal? Appeasement will not be an option. Further, who believes that our country is better positioned fighting a nuclear armed Hussein than one that is currently without that capability? Who believes that the welfare of our men and women in uniform is better served in having them face an enemy with nuclear weapons than one who has not yet been successful in doing so? The answer is no one. With that being said, the urgency of dealing with Hussein is ever increasing.

If Hussein attacks, the most brilliant diplomatic minds combined will not be able to bring a peaceful end. However well intended those hopes may be, eleven years of defiance have shown that peaceful talks and negotiations are not an option for Hussein. Rather, they are an opportunity to a man who does not deserve to lead the Iraqi people and who we cannot continue to appease.

Between 1987–1989, he ordered the deaths of the Kurdish population by the tens of thousands—indiscriminately spraying their villages with poisonous gas. He has proven his imperialist nature through a path of destruction against Kuwait. He has allowed the Iraqi people to starve in favor of diverting resources to maintaining his grip on ruling Iraq. He has en-

gaged in the periodic shake-up of his own administration, brutally eliminating threats to his reign of power. He has suppressed every effort of democracy and change in Iraq with bloodied and unremorseful hands. Saddam Hussein has committed acts so far beyond the pail of decency and acceptability that it leaves one to wonder in shock why we have waited so long to end this madman's career of carnage.

Our nation stands for freedom and humanity and because it does, we had hoped we could reason with Hussein. We hoped he would comply with the conditions of the peace agreement ending the Persian Gulf War. In the 1990s, we hoped he would end the shenanigans of denying access to inspection teams and end his lies and deceit by ending his weapons program. In all these things, Saddam Hussein failed. Through no lack of effort, we have given diplomacy a chance.

No Saddam Hussein wants to fool the world again. And it is the job of this body to ensure that he does not. We have exhausted all reasonable efforts to deal with an unreasonable madman. We have risked all too much in the hope of peace, only to have these efforts manipulated by a illusional director. It has not been our President, but Saddam Hussein himself that has made the most compelling case for the need for his removal. Saddam Hussein has in his actions, told the world that he is a threat, that he is dangerous, and that he will never be able to be held accountable unless removed.

We can wait no longer as with each passing day, Saddam Hussein draws closer to attaining unclear weapons and he exponentially increases the threat he poses to this nation, our allies, and peace and stability. We owe to the future generations not to make the mistake of holding out hope for Hussein. We must act with diligence to protect this country and we must act decisively.

Let this be clear that this country loves freedom and loves peace. We deserve (and the Iraqi people deserve) more than to be held in fear by a ruthless dictator whose actions have been unconscionable and continue to pose a threat to humankind. We know what Hussein is capable of and it is time to end the nightmare that he has unleashed on his people and bring a complete end to his imperialist aspirations. Therefore, I strongly urge an aye on this resolution.

Mrs. KELLY. Mr. Speaker, in view of Iraq's history of violence, deception and hostility, and the mounting evidence about its pursuit of powerful weapons, our objective must be the disarmament of Iraq and the fundamental reform of its current political leadership.

The Administration and many members of this body realize that this task is one that must be undertaken to protect America and its citizens. As we have learned, failing to recognize the seriousness of threats posed by our enemies can have grave consequences. I support this resolution because it is critical to our national security.

It does not obligate us to carry out military action, but it makes clear to Iraq and all nations the depth of our commitment to extinguishing the threat, and ensures that the Administration has every option available to achieve our objectives, including the use of military force.

There is a looming menace to America, and we ought not delay our efforts to neutralize it.

Mr. DICKS. Mr. Speaker, I rise today in support of H.J. Res. 114, which expresses the support of Congress for the Administration's efforts to enforce the United Nations Security Council resolutions mandating the disarmament of Iraq. Passage of this measure by the Congress will authorize the President to use American military forces to defend the national security of the United States against the continuing threat posed by Iraq.

Let me state at the outset that it is my judgment that the situation in Iraq is very serious and very perilous. I have served on the Defense Appropriations Subcommittee for 24 years, and on the Intelligence Committee for eight of those years. I have thus had a continuing interest in the campaign of deceit waged by Iraqi President Saddam Hussein ever since the day he agreed to abandon his weapons of mass destruction following the Gulf War. Based on the briefings I have had, and based on the information provided by our intelligence agencies to Members of Congress, I now believe there is credible evidence that Saddam Hussein has developed sophisticated chemical and biological weapons, and that he me be close to developing a nuclear weapon. And furthermore, I believe he will not hesitate to use these and any other weapons he has in his arsenal against America and against our ships and bases in the Middle East region.

The CIA's most recent report on Iraq clearly indicates that, after the ejection of weapons inspectors in 1998, Iraq continued its chemical weapons program, energized its missile program, and invested more heavily in biological weapons. Furthermore, Iraq's growing ability to sell oil—despite the ban—increases Baghdad's capabilities to finance weapons of mass destruction programs. Using these funds, it largely has rebuilt the missile and biological weapons facilities that were damaged during Operation Desert Fox and has expanded its chemical and biological infrastructure under the cover of civilian production. The Iraqis have also exceeded UN range limits of 150 kilometers for their ballistic missiles and they are also developing unmanned aerial vehicles, which would allow for a more effective and more lethal means to deliver biological and chemical warfare agents.

Beyond these weapons programs, there is the question of nuclear weapons. In 1991, inspectors from the International Atomic Energy Agency uncovered a secret Iraqi effort to build nuclear weapons after they intercepted a shipment of trucks loaded with huge electromagnetic isotope separators used to make weapons-grade uranium. These inspectors remained on the ground, working with U.N. arms inspectors, until the day they were thrown out of Iraq by Saddam Hussein, flagrantly violating the terms of the disarmament agreements he signed to save himself in the Gulf War cease fire. Since 1998, there is credible evidence that he has attempted to purchase uranium and the hardware necessary to produce the kind of weapon that could inflict infinitely greater damage than any of the destruction we witnessed on September 11th of last year. There can be no doubt that Saddam Hussein represents a growing menace. In the four years since he expelled United Nations arms inspectors from Iraq, he has become an emboldened dictator whose hatred of the United States has only grown stronger as he has regained his military capability.

I believe that it is extremely important that we continue our diplomatic efforts to gain international support for action. Saddam Hussein has blatantly violated 16 important UN Resolutions as he has continued the arms buildup he pledged to curtail. With the growing threat of those weapons, with the assistance Iraq is providing to terrorist groups—including al Qaeda—and with the compelling need to assert the authority of the international community, President Bush has appropriately urged the UN to enforce the sanctions that its members have approved over the last 11 years. I believe H.J. Res. 114—by showing Congress's strong support for the President's position on the issue—will substantially strengthen our effort to develop a consensus at the United Nations for a new and stronger resolution demanding the verifiable removal of Iraq's weapons of mass destruction.

I believe that it is important, in the language of our Joint Resolution in Congress, to emphasize that we are determined in this cause: that if these efforts to build an international coalition within the United Nations are not successful, we believe that the United States must still take action, joined by the British and other nations who support us already, to ensure that Iraq is never able to use the weapons of mass destruction it has and those it is actively developing. In my judgment, the possibility of Saddam Hussein using these weapons against U.S. targets or our allies in the region justifies the commitment of American military forces, however much I truly hope that diplomatic efforts can succeed and that war can be avoided.

Mr. Speaker, for our own safety and national security, I believe that we should support the position that the President expressed at the United Nations last month. It is time for action. We can no longer ignore the reality of what Saddam Hussein is doing and we should no longer postpone our response to the growing dangers of this weapons programs. I urge my colleagues to vote for H.J. Res. 114.

Mr. DEMINT. Mr. Speaker, Saddam Hussein has repeatedly demonstrated he is a threat to peaceful nations around the world. He has the money to finance his hostile intentions, he has the capabilities to blackmail nations with the use of weapons of mass destruction, and has shown a willingness to use them.

Everyday our pilots in the northern and southern no-fly zones of Iraq are the targets of Iraqi fire. Perhaps even more frightening, Saddam Hussein continues to develop and stockpile weapons of mass destruction and actively support international terrorism—both in violation of bona fide international agreements. In fact, in all of his actions, Hussein has demonstrated a persistent refusal to comply with every U.N. Security Council resolution in force regarding his country.

U.N. Resolutions called for Saddam to end both his WMD programs and his support for terrorism. Yet, before Hussein kicked them out of Iraq in 1998, weapons inspection teams could testify to the large amount of research, development, and materials associated with nuclear, biological and chemical weapons—despite Iraq's success in concealing the extent of its capabilities. However, Hussein did manage to hide a great deal from these inspectors, and it was not until defectors shared crucial information about hidden stockpiles that Saddam programs were set back, but never completely shut down. Now some people say

we should have new inspections and do nothing else, believing this time that inspectors will be able to do what they could not before—identify and dismantle Iraq's WMD capabilities. Sadly, recent history teaches us otherwise.

The same can be said about Iraq's involvement with terrorism. Hussein continues to maintain his ties with terrorist organizations. Today his terrorist training camps continue to breed more people intent on harming prosperous, free, and democratic nations around the world—and endangering innocent civilians in the process.

Hussein also targets innocent civilians in his own country in violation of U.N. Security Resolutions. For example, the U.N. oil-for-food program allows Iraq to sell enough oil to provide its citizens sufficient food and medicine to sustain a decent standard of living. However, the profits from the oil never make it to the Iraqi people; instead Saddam funnels this money into his weapons programs. He then bolsters his programs with illegal proceeds from smuggled oil.

In light of these actions, it is clear that the world has a problem with Saddam and the international community agrees. Yet instead of action, many people want to limit the United States to building broad coalitions and placing international pressure on Saddam. Unfortunately, history—and the past ten years—has shown us that no amount of international pressure can stop a dictator with such disregard for international agreements and no diplomatic coalition can change his contempt for human life.

For decades Saddam Hussein has brutally trampled on freedom and muzzled the self-expression of his people. He has threatened his neighbors, supported terrorists, and stockpiled weapons of mass destruction. We cannot remove ourselves from the struggle between freedom and tyranny—good and evil. Saddam Hussein is already engaged in a battle, and he has been firing shots for the past decade. Doing nothing is not an option.

With this resolution, Congress acknowledges that something must be done and expresses full support for the President. President Bush's speech on Monday demonstrated that he—like the rest of us—does not want to go to war. And the fact that President Bush waited almost a month before using force in Afghanistan makes obvious his desire to build coalitions and utilize every peaceful opportunity to end international disagreement before resorting to war.

However, he also understands the United States carries an incredible burden of leadership in the world. For this reason when he took office, President Bush assembled one of the finest national security teams this nation has ever seen. They have proven their leadership in previous military conflicts and understand the cost of military action. Their role in the war on terrorism has also demonstrated how much they care about U.S. troops and the loss of life for anyone involved—both military and civilian. Now is the time to have faith in the President's proven leadership and allow him and his advisors to implement the strategy that finally ends the threat Saddam poses to the free world.

Mr. ROGERS of Kentucky. Mr. Speaker, today I rise in strong support of House Joint Resolution 114, authorizing the President to employ the use of our Armed Forces against Iraq, and urge its adoption by this Chamber.

For the past 2 days, the House of Representatives has had under consideration one of the most serious resolutions it is capable of adopting and, like my colleagues, I take it very seriously. Some have argued that this resolution is not necessary, that Iraq poses no immediate danger to the United States or any other nation, and that we should not employ military force against a sadistic terrorist regime that displays not the slightest regard for human life. Mr. Speaker, I disagree.

For the past 10 years, Saddam Hussein has developed and stockpiled chemical and biological weapons and continued to construct facilities capable of producing nuclear weapons. Evidence of this and other destructive activities on the part of Saddam Hussein is overwhelming. Mr. Speaker, for the sake of our Nation's safety and that of our neighbors and allies we cannot ignore this problem any longer. Either Saddam Hussein gives the U.N. weapons inspectors full, un-fettered, and unconditional access to all Iraqi facilities or the United States will take action to disarm him.

I applaud President Bush, who has prudently and methodically made a strong case for why the United States has the moral and political authority to take action against Iraq, if necessary. Mr. Speaker, we are at the end of the line and words and international declarations will no longer do against a dictator who has nothing but contempt for the freedom-loving world and his own people.

In addition to its stockpile of weapons of mass destruction, Saddam Hussein has repeatedly violated the Persian Gulf War ceasefire agreement, snubbed numerous U.N. resolutions, brutalized and killed his own people, plotted to assassinate a former U.S. President, and has aided and harbored members of terrorists cells, including al-Qaida. Clearly, we must act.

Mr. Speaker, the foremost responsibility of government is to ensure the safety and security of its citizens. We demand safety and security in our neighborhoods, schools, and workplaces; we should expect the same in the international community as well. Although I remain hopeful that this conflict with Iraq can be resolved peacefully, I am prepared, for the sake of our Nation's security, to employ force. This resolution is not, as some have stated, a "blank check" for the President. Congress has and will continue to maintain its constitutional prerogatives if armed conflict with Iraq should ensue, but as a nation, we have the right to take action. Thus, I urge the adoption of House Joint Resolution 114.

Mr. BONILLA. Mr. Speaker, today, we are debating the most fundamental issues we face as a Congress and as a country. Today we are debating whether to send America's sons and daughters into harm's way, whether a threat exists to America's security and whether we need to act now or wait. We have no more grave responsibility as legislators than defending our Nation and democratic way of life.

American foreign policy has had a single objective since the foundation of our republic. That objective has been to defend our independence and freedoms. Over the years the policies America has followed have changed to meet the changing threat.

During America's first century we followed a policy of staying out of foreign conflicts, comfortable in the security offered by two oceans.

The Monroe Doctrine represented the first expansion of American policy in its vigorous assertion of America's right to ensure that no foreign power intervenes in our hemisphere. The last century saw a further expansion of American power as we acted to prevent any hostile power or ideology from dominating the eastern hemisphere and threatening our continued independence.

Today, we face a new challenge, a homicidal dictator striving to acquire the means to threaten our civilization and kill millions of our fellow Americans. Saddam Hussein already has the means; he only lacks the material needed to build an atomic bomb. It has been widely reported that he could build a bomb within a year were he to acquire certain materials. A nuclear armed Saddam Hussein would represent a clear and present danger to our nation.

No one who has objectively looked at the facts, no one who has seen the Kurdish villagers gassed on Saddam Hussein's order, no one who remembers the invasion and looting of Kuwait, no one looking at the facts can doubt that a nuclear Saddam Hussein would be a threat to our Nation and civilization.

Given these facts I think it is important we understand what we are debating today. We are not debating whether a nuclear Saddam Hussein is a threat. No honest analysis can deny that. We are not debating how to confront Saddam Hussein. No one wants war and it is my earnest hope that our actions today will convince Saddam Hussein that he must disarm and give up his goal of acquiring nuclear weapons. However, we can only succeed in avoiding war if Saddam Hussein is convinced that he risks war and the destruction of his regime if he continues to defy us.

What we are debating today is timing. Do we confront Saddam Hussein today or wait. Do we act now when he does not possess nuclear weapons or wait until he does. Common sense tells us that the risky course is to wait. Our responsibility as legislators dictates we act against any threat to our independence. Opponents of this resolution say the risks are too great and that there is too much that is unknown, but the risks of not acting are far greater and the unknown far more terrifying.

Let us remain true to previous generations of Americans who have been vigilant in protecting our freedom and vote for this resolution. Let us live up to the expectations set by the Founding Fathers and support this resolution.

Mr. HERGER. Mr. Speaker, I rise in strong support of the resolution before us today. The principle purpose of the resolution is to authorize the use of military force—if deemed necessary—to remove Saddam Hussein from power in Iraq. The Hussein regime poses a direct threat to the security of the United States and our partners in the world. And this threat must not be allowed to stand.

In the aftermath of the Persian Gulf War, Saddam Hussein agreed to numerous United Nations Security Council resolutions—16 of them—as conditions of his political survival. Now, almost 12-years later, Iraq's leader has failed outright to comply with these terms of peace. Hussein has continued to stockpile weapons of mass destruction, subjected the people of Iraq to squalor and starvation, openly sponsored terrorist attacks, and has in all ways defied the international community. He has lied repeatedly and there is no doubt that he cannot be trusted.

Yet still, many wonder if Saddam's distant rogue regime is a real threat to our national security, and the safety of American citizens?

To answer this question we need look no further than the horrors of 9-11 and how terrorists from afar were able to strike at America. Hussein's hatred of our country has been made plain. Despite our best efforts at border security, it is conceivable that terrorists, sponsored by Hussein, might smuggle Iraqi weapons into the United States for use in an attack against our citizens.

Our intelligence reports confirm this threat as real. Iraq maintains an extensive stockpile of sophisticated chemical and biological weapons, and is continuing in its program to develop nuclear weapons and the means to deliver them. We also know that Iraq supports terrorist groups and encourages violence against Israel with cash payments to the families of suicide bombers. Under Hussein's regime, Iraq has become a new safe-harbor for al-Qaeda and other terrorist groups.

Just as we must vote to pass the resolution before us, so too must the United Nations reaffirm its importance in the global theater, approving the use of force against Iraq. As in the Gulf War, a unified coalition effort from the beginning would help foster consensus to rebuild Iraq and reconstitute a new Iraqi government following military action.

As we prepare for what may be an inevitable war scenario in Iraq, we must acknowledge the possible outcomes of such an action, both positive and negative.

Our objective would be to eliminate the threat posed by Hussein's regime, and thereby create a more stable political environment in the Middle East. Still, the decision to commit American troops to the battlefield is never easy. In addition, there are also other considerations, such as, if we are successful in our mission, what happens next? What kind of force will it take to successfully see through a transition in Iraq and foster a new democracy?

While these possibilities must be considered when weighing any action, the immediate issue is clear: Iraq is a threat that must be dealt with swiftly.

I firmly believe that our President will make the right decision, in the best interest of the United States, and I have the utmost confidence in the integrity of his counsel. Mr. Speaker—at times we must be willing to use force to protect the security of our people and of our Nation.

Now is one of those times.

I would like to thank my colleagues in the House for introducing this strong resolution, and would like to urge all to stand by the President and vote for its passage.

Mr. GREENWOOD. Mr. Speaker, more than 200 years ago, the first President of the United States addressed the Nation's first Congress with these prophetic words, "the preservation of the sacred fire of liberty and the destiny of the Republican model of government are . . . finally, staked on the experiment entrusted to the hands of the American people."

Now we find ourselves in a new century, confronted by new trials.

We have withstood attempts at invasion, survived a bloody civil war, endured two world wars and prevailed in the long twilight struggle President Kennedy spoke of more than forty years ago.

Ten years ago, confronted by the specter of Kuwait brutally overrun by Iraqi forces, the

United Nations and the United States led a coalition of more than 28 nations in a war of liberation.

Then President Bush plainly outlined our war aims. "Our objectives" he said "are clear. Saddam Hussein's forces will leave Kuwait. The legitimate Government of Kuwait will be restored. . . . and Kuwait will once again be free." All of this was achieved.

He then went on to say that once peace was restored, it was our Nation's hope, "that Iraq will live as a peaceful and cooperative member of the family of nations." this hope has gone unfulfilled.

And so, in Franklin Roosevelt's words, "there has come a time, in the midst of swift happenings, to pause for a moment and take stock—to recall what our place in history has been, and to rediscover what we are and what we may be. There is no greater example of what we are than how we responded to the terrible events of September 11.

Confronted with a massacre of innocent lives; the attack on the World Trade Center and the Pentagon, and the horror of the instruments of modern technology being used as the means of our destruction, we did not falter.

In the weeks and months since, we have buried our dead, cared for our wounded, aided the widows and orphans, improved our defenses and taken the war to our enemy.

Now we are asked to do more.

Over the past few months, I have agonized, along with many of my neighbors and constituents, on the degree of threat the renegade regime in Iraq represents to our safety and security.

It is for these and other reasons that I set the bar so high on what I would require before I would embrace any presidential action that included the use of force to remove Hussein and his henchmen from power.

The most compelling reason, as I wrote to my constituents was the realization that, "any decision to finally remove Hussein and his regime, once begun, could not be permitted to fail.

For those reasons, I urged the administration to work to promote a regime change short of the use of the military option.

I went on to argue that, should those efforts fail, then it was incumbent upon the administration to make their case to the United Nations, to the American people and to Congress before inaugurating any major military undertaking against Iraq.

This they have done. Now it is time for us to decide. I will vote "yes" on this resolution.

While I still hold out some hope that by its passage the United Nations will be empowered, to force Iraq to comply with the will of the international community, that they eliminate all their weapons of mass destruction, I bear too great a responsibility to allow my actions to be governed by that hope alone.

As a Member of Congress, I must act upon information I possess in a way that most clearly protects our people and our way of life. And what I know is this. Should the U.N. fail in its mission, we will have very little choice but to act.

I am now persuaded that, left to his own devices, Saddam Hussein will not be content until he has the means to murder his own people and the people of many nations with the most horrible weapons of war. This we cannot permit.

Neither can we permit him to cause the kind of world economic blackmail and chaos that

could ensue, should he be allowed to continue his arms build-up. As President Eisenhower once observed, "We are linked to all free peoples not merely by a noble idea but by a simple need. No free people can for long cling to any privilege or enjoy and safety in economic solitude."

I do not take this step lightly. To knowingly spend the precious blood of our sons and daughters and the wealth of this peaceable people, even in the noblest cause, is a burden no sensible man desires. But, in the end, our place in the world as the pre-eminent champion of human rights and human liberty leaves us very little choice.

At the close of his 3rd Inaugural Address, on the eve of our Nation's being drawn into the Second World War, Franklin Roosevelt spoke these words, "In the face of great perils never before encountered, our strong purpose is to protect and to perpetuate the integrity of democracy. For this we muster the spirit of America, and the faith of America. We do not retreat. We are not content to stand still. As Americans, we go forward, in the service of country. . . ."

Mr. NUSSLE. Mr. Speaker, I rise in support of this resolution. It is both reasonable and necessary.

At its essence, our debate is about the critical need to ensure Saddam Hussein fully understands our resolve to protect our citizens and to promote peace around the world. There is no question we would all prefer it if the path ahead did not include military action. Unfortunately, Saddam Hussein may not allow us that option.

The President and other members of his administration have provided a sober, convincing picture of the threats our nation faces from Iraq's current regime. As the President said earlier this week, "While there are many dangers in the world, the threat from Iraq stands alone because it gathers the most serious dangers of our age in one place."

And this "one place" is led by an evil, evil dictator who directs his intense hatred toward America, Americans, our interests and our allies.

Iraq's leadership has continued to aggressively pursue the development of weapons of mass destruction to add to his arsenal. We've all talked about these weapons but it's worth spelling out what they can be: chemical weapons, biological weapons and even nuclear weapons. Saddam Hussein has shown his cruel willingness to use such devastating weapons against his own citizens and his neighboring countries in the past. I sincerely doubt he's had a change of heart.

We must also not ignore the support of terrorism found in Hussein's Iraq. September 11, 2001 was a horrific reminder that terrorists are serious in their intent to harm Americans. This step is a continuation of the war against terrorism that our nation has been forced to undertake.

It is Saddam Hussein himself who provides the final proof that we must act. He has a robust history of disregard of the international community and its laws. Time and again, he has willingly and defied the United Nations and the world community by ignoring the agreements he has made. He has constructed a wall of delay and deception that at times is as thick as the cloud of black smoke from the malicious oil fires that greeted our troops in 1991 as they liberated Kuwait.

It's obvious that Iraq's current regime presents problems not just for the United States, but problems for international peace and stability. We can not deny the seriousness of the situation, and I believe America should provide its leadership for the sake of peace and justice.

The President has earned our confidence through his leadership since last fall's terrorist attacks. The President is determined to pursue a course of action with regard to Iraq that will both ensure our own nation's security and promote international stability and I support his efforts.

At the same time, I want to make it clear that I respect those who have sincere opposing views on the question before us. The freedom to disagree is one among many freedoms that we are vigorously trying to preserve and I would never want that to change. Few in Iraq who disagree with Saddam Hussein can share their opinions openly.

The resolution we are considering makes it clear that America prefers to find solutions together with the United Nations and other international leaders. It also provides authority for the President to use force if diplomatic or other peaceful means are not effective. It preserves America's right to act on its own as we must in self-defense of our nation's interests.

Mr. Speaker, the first major vote I took as a Member of Congress in 1991 was to support the international coalition's effort to liberate Kuwait from Iraqi aggressors. No one wanted war then, but it was necessary. No one wants war now. We don't seek it. It is my fervent hope that war with Iraq may yet be avoided. And it may. But our shared and firm commitment to the security of our nation should not be questioned by Saddam Hussein or the world community.

Mr. DOOLEY of California. Mr. Speaker, I rise today in support of H.J. Res. 114, the bipartisan resolution authorizing the use of military force against Iraq.

Like most Americans, I understand that our security is threatened by rogue nations suspected of crafting biological and chemical weapons, and by those who seek access to nuclear weapons. I am convinced that Iraq is building an arsenal of weapons of mass destruction, following repeated refusals, over many years, to comply with United Nations weapons inspections. I believe it is our responsibility to ensure that Saddam Hussein is no longer positioned to pose a major and imminent threat to U.S. national security. I further believe that the President should have the authority to use force against Iraq, if he deems it necessary.

Ms. CARSON of Indiana. Mr. Speaker, let's get this straight: a preemptive war is a war nonetheless, a war the would-be preemptor starts.

According to our Congressional Budget Office, the aggressive war the President wants to start against Iraq would cost our taxpayers between \$6 and \$9 billion a month. With most people's retirement accounts in the tank, the Federal accounts drenched in red ink and so many people out of work, don't we have better and less violently fatal ways to spend money?

Despite our using parts of Iraq for bombing practice over a ten year period, Iraq hasn't attacked us. But if we carried out a campaign to destroy the regime entirely, what would Saddam have to lose by trying to sneak biological weapons into the U.S.? As we have seen in

Afghanistan, it is not physically possible for us to bottle up a country so that no one can slip away.

A preemptive strike without U.N. Security Council compliance is, by definition, aggression and a treaty violation. A duly entered into treaty is the law of the land. Moreover, the mandate of our Constitution is that Congress alone has the authority to start a war. And the Constitution does not permit Congress to delegate any part of that authority to the President as this proposed resolution would do. In discussing that Constitutional provision (Art. 1, Sec. 8, Clause 11), Congressman Abraham Lincoln wrote in part:

Allow a President to invade a neighboring nation whenever he shall deem it necessary to repel an invasion, and you allow him to do so whenever he may choose to say he deems it necessary for such purpose—and you allow him to make war at pleasure.

There are twenty million people in Iraq not named Hussein. An invasion would kill untold thousands of those already weakened people.

On Saturday the President said, "We must do everything we can to disarm this man before he hurts one single American." Could that possibly mean that the President believes the American soldiers who would be slaughtered in the war he wants to start against Iraq would not be "hurt." Should such stark horror be so casually inflicted on so many young Americans on such flimsy and dubious evidence?

Let's get another thing straight: the al-Qaida did not invent terrorism; it is anything but "a new kind of war." It went on during the reconstruction period in America and periodically since.

Not long ago, President Reagan and Vice-President Bush were telling us one of the good things about their then-friend Hussein was that he was secular and not a religious fanatic. Now suddenly this President Bush is telling us that Hussein is in cahoots with religious fanatics who, even the most casual student of the mideast knows, hate Hussein's guts and would be delighted to overthrow him. Bear in mind that the Bush/Hussein friendship was still going strong after both the Hussein invasion of Iran and his use of gas weapons against his own people.

For 40 years, the Soviet Union was our adversary and was armed to the teeth with awesome nuclear weapons with intercontinental capability that made Hussein the pipsqueak he is. The Soviet Union also slaughtered millions of its own people and invaded neighboring countries. The Soviets were our Saddam Hussein of the time. But no U.S. "preemptive war." Not necessary because the Soviets knew use of nuclear weapons would mean their suicide.

For the sake of argument, let's say Hussein had primitive nuclear weapons now, which he almost certainly does not. He and his gang aren't so dumb that they don't know use of such weapons would mean that he and his "grizzly gang" would be vaporized within minutes by our awesome nuclear capability.

So why war now? Mr. Rove, the White House politics man, is on record as saying that war is good for his party to win elections. Is this, then, a political question or a moral one?

One of the greatest dangers to an American soldier is a poor economy at election time.

In good conscience, I cannot cast my constituents' vote for this latter-day Gulf of Tonkin

Resolution. It is said that the only thing we learn from history is that we do not learn from history.

Mrs. BONO. Mr. speaker, since coming to Washington, I have taken part in many significant and historical debates. Most of the time, Republicans and Democrats have been at odds with one another. But last week, as I and a group of my Democrat and Republican colleagues, discussed this issue with the President of the United States in the Cabinet Room of the White House, I felt a sense of purpose and bipartisanship that made me proud to serve as a Member of Congress.

To grant our President the authority to use force against the regime of Saddam Hussein as a last resort is not a vote I take lightly. However, over the course of our nation's young history, there have been many times when I wish we had been able to prevent a variety of calamities. From the assault on Pearl Harbor to the terrorist attacks of 9–11, we have been reminded time and time again that we do not live in splendid isolation.

It is for this reason we must consider taking up arms yet again to defend ourselves. While I realize the human cost of war on both sides is sobering, the cost of inaction in this case could far exceed our worst fears.

Saddam Hussein has used weapons of mass destruction on his own people. He has used them against the Iranians. There is no question in my mind that this international outlaw has a diabolical drive to acquire nuclear weapons to use against our Nation and our allies. If we do not act now, we will have put the lives of our citizens at risk and we will have failed our future generations. We will go down in history as having given up our principals out of fear. History will not forgive us.

Our World War II generation of men and women, under the leadership and strength of FDR and Churchill, fought and died to give us the freedoms we enjoy today. It is now up to us to rise to this new threat. While I believe we must work with our allies to exhaust all reasonable diplomatic means, we must also be prepared to take military action to defend our country from a tyrant who can unleash a reign of terror upon the civilized world never before seen.

Mr. Speaker, it was quite significant for so many of us with such varied backgrounds and philosophies to come together with the President in the Cabinet Room last week. We were able to prove that national security is an issue that transcends party lines and sends a signal to our aggressors that we will stand firm and united in order to protect our country and her citizens.

The world is watching us. The United States and this Congress cannot be afraid to lead and defend. We have a sacred obligation to our people and our way of life.

Mr. ROGERS of Michigan. Mr. Speaker, just a few short weeks ago, I believed the President's focus on unilateral U.S. action raised more questions than it answered. Chief among my concerns were issues such as international support, the existence of a clear and present danger to the United States, conditions for maximizing success and minimizing casualties, and the effect of unilateral action of Middle East stability.

I was pleased to see the President listen to these concerns, work closely with the Congress, and produce the bipartisan resolution currently under debate in the House. One

thing is clear, the strength of our Republic, our commitment to debate, democracy and freedom is as strong today as in any time in our Nation's history.

Like most Americans, I have wrestled with the question of how to neutralize the threat of Saddam Hussein. During my travels in Michigan, thousands of constituents have shared their concerns about a unilateral and full-scale American invasion of Iraq. In fact, I continue to share those very concerns.

This week, I will cast the toughest vote of my time in public service—a vote that may commit American men and women to a war against Iraq and its brutal dictator. This is a war in which lives surely will be lost. The first time I faced such a tough decision was in giving the President authority to send troops into Afghanistan to hunt down the terrorist who attacked our Nation on September 11, 2001.

As we all are learning, the face of war is changing. Formal declarations of war by our enemies are going the way of trench warfare and cavalry charges—relics of a different era. The resolution currently before Congress reflects that changing reality.

Today's enemies do not distinguish between civilian and military targets. Today's enemies are just as likely to use chemical and biological weapons as bullets and bombs. These are the very real threats posed by modern enemies that do not allow us to wait for an attack of catastrophic proportions.

Going to war, however, requires more than recognizing the threat. It is the immediacy of these threats that pose a clear and present danger to U.S. citizens. This was underscored in my recent briefings at the White House with National Security Advisor Condoleezza Rice, CIA Director George Tenet, and other military intelligence and foreign policy experts. Their information, some of it classified, reinforced the very real threat Saddam poses with nuclear, biological and chemical weapons, and his willingness to use them. Even against the United States.

A great deal of soul searching has gone into the process that began with talk about the U.S. attacking Iraq and has now come to an agreement on four very important points:

(1) Multilateral Action. Last month, after returning from a Middle East trip, it was absolutely clear that Saddam's neighbors who know him best, fear him deeply and would shed few tears if he were removed from power. However, the region's leaders, especially Saudi Arabia, were concerned about the fragile future of the Middle East. They want Saddam removed, but through a strong alliance, not one-on-one, America versus Saddam. This bipartisan congressional resolution authorizes President Bush to "obtain prompt and decisive action" by the United Nations Security Council to ensure that Iraq abandons its strategy of "delay, evasion and noncompliance" with all relevant international resolutions.

(2) Force As Last Resort. The Bush administration and our allies must exhaust all diplomatic efforts before resorting to armed force in Iraq. The resolution provides that President Bush must certify to Congress, before any military strike, if feasible, or within 48 hours of a U.S. attack, that diplomatic and other peaceful means alone are inadequate to protect Americans from Saddam's weapons of mass destruction. If America must go to war against a regime that threatens our lives, it will not

happen until all other possible solutions have been exhausted.

(3) Congressional Oversight. In addition to the certification to Congress before a military strike, this resolution requires President Bush to report to Congress every 60 days on "matters relevant" to the confrontation with Iraq.

(4) Retaining American Sovereignty. While the resolution authorizes the United States to work through a U.N. Security Council resolution, no American sovereignty is forfeited. If all efforts fail and the national security of the United States is under direct threat by Iraq, the resolution authorizes the President to use the Armed Forces of the United States as he determines "necessary and proper" in order to defend America.

God Bless America!

Mr. PASTOR. Mr. Speaker, I am committed to the war against terrorism, and believe that stopping Saddam Hussein from developing weapons of mass destruction is a necessary part of that effort. At this time, however, I believe it is premature to authorize a unilateral attack on Iraq.

Working with the international community is the surest means of addressing this threat effectively, sharing costs and resources, and ensuring stability in Iraq and throughout the Middle East in the event of a regime change. While the President has spoken of the value of a coalition effort, the resolution before the House today undermines the importance of our allies and of maintaining the momentum of international cooperation in the wider war on terrorism.

I support the Spratt amendment to the resolution. This amendment would authorize the use of U.S. forces in support of a new U.N. Security Council resolution mandating the elimination, by force if necessary, of all Iraqi weapons of mass destruction and means of producing such weapons. Should the Security Council fail to produce such a resolution, the amendment calls on the President to then seek authorization for unilateral military action. In this way, the amendment emphasizes our preference for a peaceful solution and coalition support while recognizing that military force and unilateral action may be appropriate at some point.

We should not rush into war without the support of our allies. We should not send American troops into combat before making a good faith effort to put U.N. inspectors back into Iraq, under a more forceful resolution. We should not turn to a policy of preemptive attack, which we have so long and so rightly condemned, without first providing a limited-time option for peaceful resolution of the threat. America has long stood behind the principle of exhausting diplomacy before resorting to war, and at times like this we must lead by example.

Mr. TIAHRT. Mr. Speaker, I rise today to support H.J. Res. 114, a resolution granting President Bush the authorization to use military force against Iraq. Never in my 8 years as a Member of Congress has there been a vote with as far reaching consequences as this one.

I am under no illusions. War is a serious matter with the real possibility of casualties. I have given this decision a great deal of thought, have sought wise counsel and have spent much time in prayer. It is with a heavy heart that I have come to the conclusion that military action against Iraq may be our only option.

For more than a decade the United States has been working with the United Nations and the international community to use diplomatic means to bring a peaceful solution to the troubling situation in Iraq. We had all hoped Saddam Hussein and his regime would ultimately comply with what the United Nations has demanded. Instead, he has violated, disregarded and openly flouted the 16 U.N. resolutions.

We now know Saddam Hussein is actively seeking nuclear weapons capability, and with fissile material, could build one within a year. A nuclear strike made against us or our allies in the region could result in millions dead. Either Saddam Hussein acquires a nuclear weapon, or we ensure he is stopped. Additionally, Hussein may have the propensity to sell or given nuclear weapons to terrorist organizations one he had acquired them. This could have devastating results.

Traditional nuclear deterrence and containment will not be effective with this regime. Hussein has consistently shown no moral concern for the Iraqi people. Instead, he has a record of acting with selfish deeds of violence against his own family and people. He has mortgaged everything in an effort to obtain nuclear weapon capability. In fighting international sanctions, he has forfeited \$180 billion in oil revenue, impoverished many of his people and allowed degradation of his military forces.

Saddam Hussein has already shown the propensity to use chemical weapons on his neighbors in the region and on his own people, and he continues to possess and develop significant chemical and biological weapons capability. One source indicates that Saddam Hussein has already used chemical and biological weapons 250 times.

In addition to these threats, the Iraqi regime continues to aid and harbor international terrorist organizations, including groups that have threatened the lives and safety of American citizens.

I have had the opportunity to participate in several classified briefings led by President Bush, National Security Advisor Condoleezza Rice and Deputy Director of Central Intelligence John McLaughlin. I am convinced that Iraq poses an unquestionable and near-term threat to the peace and security of the United States and our allies abroad.

We can not allow those who wish harm on the United States, and have the propensity to deliver that harm, to acquire weapons of terror and mass destruction. Inaction on our part could lead to the massive loss of innocent lives. The ten-year cat and mouse game Hussein has played with weapons inspectors must come to an end. There is too much at stake, and time is rapidly dwindling.

I believe it is in the national security interest of the United States to prevent Saddam Hussein from obtaining a nuclear weapon and to prosecute the war on terrorism, including Iraq's support for international terrorist groups.

President Bush must continue his efforts to get support from the United Nations Security Council and must exhaust all reasonable diplomatic options available in hopes of avoiding war. However, if Saddam Hussein and the Iraqi regime continue to rebuff the international community and threaten the peace and security of the United States, we must take swift and decisive action. To do anything less would be immoral and irresponsible.

Mr. Speaker, I support this resolution and urge my colleagues on both sides of the aisle to do the same.

Mr. ISSA. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. SHUSTER). Pursuant to section 3 of House Resolution 574, the Chair postpones further consideration of the joint resolution until the legislative day of Thursday, October 10, 2002.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Ms. Evans, one of his secretaries.

CONTINUED PRODUCTION OF THE NAVAL PETROLEUM RESERVES BEYOND APRIL 5, 2003—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 107-272)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Armed Services and ordered to be printed.

To the Congress of the United States:

In accordance with section 201(3) of the Naval Petroleum Reserves Production Act of 1976 (10 U.S.C. 7422(c)(2)), I am informing you of my decision to extend the period of production of the Naval Petroleum Reserves for a period of 3 years from April 5, 2003, the expiration date of the currently authorized period of production.

Enclosed is a copy of the report investigating the necessity of continued production of the reserves as required by section 201(3)(c)(2)(B) of the Naval Petroleum Reserves Production Act of 1976. In light of the findings contained in the report, I certify that continued production from the Naval Petroleum Reserves is in the national interest.

GEORGE W. BUSH.

THE WHITE HOUSE, October 9, 2002.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12 of rule I, the Chair declares the House in recess subject to the call of the Chair.

Accordingly (at 12 o'clock and 54 minutes a.m.), the House stood in recess subject to the call of the Chair.

□ 0752

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. HASTINGS of Washington) at 7 o'clock and 52 minutes a.m.

REPORT ON RESOLUTION WAIVING REQUIREMENT OF CLAUSE 6(a) OF RULE XIII WITH RESPECT TO CONSIDERATION OF CERTAIN RESOLUTIONS

Mrs. MYRICK, from the Committee on Rules, submitted a privileged report (Rept. No. 107-735) on the resolution (H. Res. 577) waiving a requirement of clause 6(a) of rule XIII with respect to consideration of certain resolutions reported from the Committee on Rules, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION WAIVING POINTS OF ORDER AGAINST CONFERENCE REPORT ON H.R. 5011, MILITARY CONSTRUCTION APPROPRIATIONS ACT, 2003

Mrs. MYRICK, from the Committee on Rules, submitted a privileged report (Rept. No. 107-736) on the resolution (H. Res. 578) waiving points of order against the conference report to accompany the bill (H.R. 5011) making appropriations for military construction, family housing, and base realignment and closure for the Department of Defense for the fiscal year ending September 30, 2003, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION WAIVING POINTS OF ORDER AGAINST CONFERENCE REPORT ON H.R. 5010, DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2003

Mrs. MYRICK, from the Committee on Rules, submitted a privileged report (Rept. No. 107-737) on the resolution (H. Res. 579) waiving points of order against the conference report to accompany the bill (H.R. 5010) making appropriations for the Department of Defense for the fiscal year ending September 30, 2003, and for other purposes, which was referred to the House Calendar and ordered to be printed.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. MANZULLO (at the request of Mr. ARMEY) for today on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. PAYNE) to revise and extend their remarks and include extraneous material:)

Mr. DAVIS of Illinois, for 5 minutes, today.

Mr. DEFAZIO, for 5 minutes, today.

Ms. NORTON, for 5 minutes, today.

Mr. GREEN of Texas, for 5 minutes, today.

Mr. FILNER, for 5 minutes, today.

Mr. PALLONE, for 5 minutes, today.

Ms. KAPTUR, for 5 minutes, today.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 2127. An act for the relief of the Pottawatomi Nation in Canada for settlement of certain claims against the United States; to the Committee on Resources.

ADJOURNMENT

Mrs. MYRICK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 53 minutes a.m.), under its previous order, the House adjourned until today, Thursday, October 10, 2002, at 9 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's table and referred as follows:

9573. A letter from the Administrator, Department of Agriculture, transmitting the Department's final rule — Technical Assistance for Specialty Crops Program (RIN: 0551-AA63) received October 7, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

H.R. 1086: Mr. TOWNS.
H.R. 1108: Mr. GREEN of Wisconsin.
H.R. 1269: Ms. VELAZQUEZ.
H.R. 1342: Mr. ARMY.
H.R. 1412: Mr. CHAMBLISS.
H.R. 1465: Mr. VELAZQUEZ.
H.R. 1509: Mr. PHELPS.
H.R. 1520: Mr. BOOZMAN, Mr. ISAKSON, and Mr. SKELTON.
H.R. 1724: Mr. GILLMOR and Mr. ENGEL.
H.R. 1918: Mr. TIAHRT.
H.R. 1983: Mr. HOSTETTLER.
H.R. 2373: Mr. LAMPSON, Ms. ROS-LEHTINEN, and Mr. LATOURETTE.
H.R. 2458: Mr. TOM DAVIS of Virginia.
H.R. 2630: Ms. SLAUGHTER.
H.R. 2874: Mr. HONDA and Mr. HASTINGS of Florida.
H.R. 3027: Ms. BERKLEY.
H.R. 3109: Mr. ROHRABACHER.
H.R. 3183: Mr. GREEN of Wisconsin.
H.R. 3320: Mr. WELDON of Pennsylvania.
H.R. 3430: Mr. CUNNINGHAM.
H.R. 3431: Mr. FOSSELLA, Mr. TANNER, Mr. REHBERG, Mr. WALDEN of Oregon, Mr. YOUNG of Alaska, Mr. DUNCAN, Mr. SULLIVAN, Mr. DEAL of Georgia, Mr. WU, Mr. MORAN of Kansas, and Mr. HILLEARY.
H.R. 3592: Mr. WILSON of South Carolina.
H.R. 3834: Mr. SULLIVAN and Mr. REYES.
H.R. 3884: Mr. ACKERMAN.
H.R. 3956: Ms. DEGETTE.
H.R. 3973: Mr. CRENSHAW.
H.R. 4075: Ms. SCHAKOWSKY.
H.R. 4152: Ms. LOFGREN and Mr. TAYLOR of Mississippi.
H.R. 4611: Mrs. CAPPS.
H.R. 4614: Mr. GUTIERREZ.
H.R. 4667: Mr. BROWN of South Carolina.
H.R. 4693: Mr. MICA.
H.R. 4698: Mr. ISRAEL.
H.R. 4704: Mr. HOFFFEL and Mr. TIERNEY.
H.R. 4726: Mr. ANDREWS.
H.R. 4760: Mr. BLUMENAUER.
H.R. 4763: Mr. PASTOR, Mr. GUTIERREZ, Mr. GRUCCI, and Ms. PELOSI.
H.R. 5031: Mrs. MORELLA, Mr. SHAW, Mr. JONES of North Carolina, Mr. PAYNE, Mrs. JO ANN DAVIS of Virginia, Mr. WELDON of Pennsylvania, Mr. DAVIS of Illinois, Mr. LAHOOD, Mr. ETHERIDGE, and Mr. GRUCCI.
H.R. 5044: Mr. CARDIN, Ms. SANCHEZ, and Mr. FERGUSON.
H.R. 5079: Mrs. LOWERY.
H.R. 5098: Mr. ENGEL and Mr. BROWN of Ohio.
H.R. 5119: Mrs. THURMAN and Mr. GALLEGLY.
H.R. 5146: Mr. MENENDEZ, Mr. PAYNE, Mr. PALLONE, Mr. ANDREWS, and Mr. ROTHMAN.
H.R. 5191: Mrs. THURMAN.
H.R. 5197: Mr. WATT of North Carolina.
H.R. 5250: Ms. MCCOLLUM, Mr. MENENDEZ, Ms. BERKELEY, Ms. HART, and Mr. PAUL.
H.R. 5268: Mr. SABO.
H.R. 5319: Mr. GREEN of Wisconsin, Mr. CANNON, and Mr. ISSA.
H.R. 5334: Mr. FOSSELLA and Mr. WAXMAN.
H.R. 5350: Mr. CROWLEY.
H.R. 5333: Mr. EHRLICH.
H.R. 5380: Mr. SOUDER and Ms. WATERS.
H.R. 5383: Mr. HOLDEN, Ms. DEGETTE, and Mr. JOHN.
H.R. 5411: Ms. RIVERS, Mr. DICKS, Mr. PLATTS, Mr. FRANK, Mr. MURTHA, Mr.

GRAVES, Mr. SANDLIN, Mr. ROSS, Mr. ISRAEL, Mrs. CHRISTENSEN, Mr. CROWLEY, Mr. ISAKSON, Mr. EVANS, and Mr. BOSWELL.

H.R. 5412: Mr. PASCARELL and Ms. DELAURO.
H.R. 5433: Mr. WELLER.

H.R. 5441: Mr. FROST.

H.R. 5455: Mr. OTTER, Mr. SIMPSON, Mr. SULLIVAN, Mr. ROGERS of Michigan, and Mr. BARCIA.

H.R. 5457: Ms. BALDWIN.

H.R. 5491: Mr. HOLDEN, Mr. MCGOVERN, Mr. FROST, Mr. LARSON of Connecticut, and Ms. RIVERS.

H.R. 5493: Ms. BERKLEY and Ms. DEGETTE.

H.R. 5499: Mrs. CLAYTON, Mr. JONES of North Carolina, Mr. INSLEE, Mrs. MALONEY of New York and Mr. HONDA.

H.R. 5509: Mr. DEMINT and Mr. PAUL.

H.R. 5511: Mr. LANTOS and Ms. SLAUGHTER.

H. Res. 558: Mr. WELDON of Pennsylvania.

Daily Digest

HIGHLIGHTS

House committees ordered reported nine sundry measures, including the VA, HUD and Independent Agencies Appropriations for Fiscal Year 2003.

Senate

Chamber Action

Routine Proceedings, pages S10137–S10232

Measures Introduced: Six bills and two resolutions were introduced, as follows: S. 3083–3088, S. Res. 337, and S. Con. Res. 151. **Pages S10222–23**

Measures Reported:

H.R. 2666, to amend the Small Business Act to direct the Administrator of the Small Business Administration to establish a vocational and technical entrepreneurship development program. (S. Rept. No. 107–307)

S. 2483, to amend the Small Business Act to direct the Administrator of the Small Business Administration to establish a pilot program to provide regulatory compliance assistance to small business concerns, with an amendment. (S. Rept. No. 107–308)

Page S10222

Measures Passed:

Sudan Peace Act: Senate passed H.R. 5531, to facilitate famine relief efforts and a comprehensive solution to the war in Sudan, clearing the measure for the President. **Page S10232**

Printing Authority: Senate agreed to S. Res. 337, authorizing the printing with illustrations of a document entitled “Committee on Appropriations, United States Senate, 135th Anniversary, 1867–2002”. **Page S10232**

Further Resolution on Iraq: Senate continued consideration of S.J. Res. 45, to authorize the use of United States Armed Forces against Iraq, taking action on the following amendments proposed thereto:

Pages S10145–62, S10164–S10217

Rejected:

Graham Amendment No. 4857 (to Amendment No. 4856), in the nature of a substitute. (By 88 yeas to 10 nays (Vote No. 231), Senate tabled the amendment. **Pages S10145–10162**

Pending:

Lieberman/Warner Modified Amendment No. 4856, in the nature of a substitute.

Pages S10145, S10164–S10217

Byrd Amendment No. 4868 (to Amendment No. 4856, as modified), to provide statutory construction that constitutional authorities remain unaffected and that no additional grant of authority is made to the President not directly related to the existing threat posed by Iraq. **Pages S10167–S10217**

Levin Amendment No. 4862 (to Amendment No. 4856), in the nature of a substitute.

Pages S10191–S10217

A unanimous-consent-time agreement was reached providing that immediately following the pledge tomorrow morning following the 9:15 a.m. convening, Senator Byrd be recognized to offer Amendment No. 4869; that there be a time limitation of 20 minutes; following the use, or yielding back of that time, Senate vote on the amendment; that following disposition of that amendment there be 45 minutes for debate on the motion to invoke cloture; that upon the completion of that time, Senate vote on cloture on Lieberman/Warner Modified Amendment No. 4856 (listed above); that following that vote, there be a time limitation of 60 minutes on Byrd Amendment Number 4868 (listed above); that upon the use, or yielding back of that time, Senate vote on Byrd Amendment No. 4868; further, that no second degree amendments be in order to either of the above listed amendments. **Pages S10190–91**

A unanimous-consent-time agreement was reached providing further that following disposition of Byrd Amendment No. 4868 (listed above), Senate resume consideration of Levin Amendment No. 4862 (listed above); that the amendment be in order notwithstanding the provisions of Rule 22; that there be 50 minutes under Senator Levin’s control and 45 minutes in opposition; that upon the use or yielding back of time, Senate vote on Levin Amendment No. 4862; that following disposition of that amendment, Senator Durbin be recognized to offer Amendment No. 4865; that Senator Durbin control 40 minutes for debate and 10 minutes for Senator Biden, and 15 minutes for Senators Warner and McCain in opposition; that upon the use, or yielding back of that time, Senate vote on Durbin Amendment No. 4865;

that no second degree amendments be in order to either of the above listed amendments.

Pages S10191–S10217

A unanimous-consent agreement was reached providing for further consideration of the resolution at 9:15 a.m., on Thursday, October 10, 2002.

Page S10232

Election Reform Conference Report—Agreement: A unanimous-consent-time agreement was reached providing that, notwithstanding Rule 22, when the Senate considers the conference report on H.R. 3295, to require States and localities to meet uniform and nondiscriminatory election technology and administration requirements applicable to Federal elections, to establish grant programs to provide assistance to States and localities to meet those requirements and to improve election technology and the administration of Federal elections, to establish the Election Administration Commission, it be considered under a 2 hour time limitation; that upon the use or yielding back of time, Senate proceed to vote on adoption of the conference report.

Page S10232

Treaties Approved: The following treaties having passed through their various parliamentary stages, up to and including the presentation of the resolution of ratification, upon division, two-thirds of the Senators present and having voted in the affirmative, the resolutions of ratification were agreed to:

1997 Amendment to Montreal Protocol Treaty Doc. 106–10.

Amendment to Montreal Protocol (“Beijing Amendment”) Treaty Doc. 106–32. Pages S10231–32

Messages From the President: Senate received the following message from the President of the United States:

Transmitting, pursuant to law, a report entitled “Continued Production of the Naval Petroleum Reserves Beyond April 5, 2003”; to the Committee on Armed Services. (PM–115)

Page S10162

Adjournment: Senate met at 9:30 a.m., and adjourned at 11:17 p.m., until 9:15 a.m., on Thursday, October 10, 2002. (For Senate’s program, see the re-

marks of the Acting Majority Leader in today’s Record on page S10232).

Committee Meetings

(Committees not listed did not meet)

AFFORDABLE HOUSING PRESERVATION

Committee on Banking, Housing, and Urban Affairs: Subcommittee on Housing and Transportation held oversight hearings on the need to preserve affordable housing, focusing on the existing privately-owned affordable housing stock currently supported with public funds under a variety of federal housing insurance, subsidy and assistance programs, receiving testimony from John C. Weicher, Assistant Secretary for Housing/Federal Housing Commissioner, and Robert Kension, Associate General Counsel, Office of Assisted Housing and Community Development, both of the Department of Housing and Urban Development; Katherine G. Hadley, Minnesota Housing Finance Agency, St. Paul, on behalf of the National Council of State Housing Agencies; James R. Grow, National Housing Law Project, Oakland, California; Thomas Slemmer, National Church Residences, Columbus, Ohio, on behalf of the American Association of Homes and Services for the Aging; and Louise Sanchez, National Alliance of HUD Tenants, New York, New York.

Hearing recessed subject to the call.

FINANCIAL WAR ON TERRORISM

Committee on Finance: Committee concluded hearings on the financial war on terrorism, focusing on certain Federal agency measures to identify, disrupt, and dismantle terrorist financial networks, after receiving testimony from James Gurule, Under Secretary of the Treasury for Enforcement; Michael Chertoff, Assistant Attorney General, Criminal Division, Department of Justice; and Alan Larson, Under Secretary of State for Economic, Business and Agricultural Affairs.

NOMINATIONS

Committee on Foreign Relations: Committee concluded hearings to examine the nominations of John Randle Hamilton, of North Carolina, to be Ambassador to the Republic of Guatemala, John F. Keane, of Virginia, to be Ambassador to the Republic of Paraguay, and David N. Greenlee, of Maryland to be Ambassador to the Republic of Bolivia, after the nominees testified and answered questions in their own behalf.

G–8 GLOBAL PARTNERSHIP

Committee on Foreign Relations: Committee held hearings to examine the G8 global partnership against the spread of weapons and materials of mass destruction (10+10 Over 10), and nonproliferation and threat reduction cooperation programs with Russia and other Republics of the Former Soviet Union, after receiving testimony from John R. Bolton,

Under Secretary for Arms Control and International Security, and John S. Wolf, Assistant Secretary for Nonproliferation, both of the Department of State; Lisa Bronson, Deputy Under Secretary of Defense for Technology Security and Counter-Proliferation; Linton Brooks, Acting Administrator, National Nuclear Security Administration, Department of Energy; Kenneth N. Luongo, Russian-American Nuclear Security Advisory Council, Princeton, New Jersey; and Laura S. H. Holgate, Nuclear Threat Initiative, Washington, DC.

Recessed subject to the call.

BUSINESS MEETING

Committee on Governmental Affairs: Committee ordered favorably reported the following business items:

S. 1651, to establish the United States Consensus Council to provide for a consensus building process in addressing national public policy issues, with an amendment in the nature of a substitute;

S. 3054, to provide for full voting representation in Congress for the citizens of the District of Columbia;

S. 2936, to amend chapter 84 of title 5, United States Code, to provide that certain Federal annuity computations are adjusted by 1 percent relating to periods of receiving disability payments, with an amendment;

S. 2527, to provide for health benefits coverage under chapter 89 of title 5, United States Code, for individuals enrolled in a plan administered by the Overseas Private Investment Corporation;

S. 3070, to authorize appropriations for the Merit Systems Protection Board and the Office of Special Counsel;

S. 3044, to authorize the Court Services and Offender Supervision Agency of the District of Columbia to provide for the interstate supervision of offenders on parole, probation, and supervised release;

H.R. 4878, to provide for estimates and reports of improper payments by Federal agencies, with an amendment in the nature of a substitute;

S. 2644, to amend chapter 35 of title 31, United States Code, to expand the types of Federal agencies that are required to prepare audited financial statements, with an amendment in the nature of a substitute;

S. 2829, to redesignate the facility of the United States Postal Service located at 6910 South Yorktown Avenue in Tulsa, Oklahoma, as the "Robert Wayne Jenkins Station";

S. 2840/H.R. 4102, bills to designate the facility of the United States Postal Service located at 120 North Main Street in Fallon, Nevada, as the "Rollan D. Melton Post Office Building";

S. 2918/H.R. 5336, bills to designate the facility of the United States Postal Service located at 380 Main Street in Farmingdale, New York, as the "Peter J. Ganci, Jr. Post Office Building";

S. 2929/H.R. 4797, bills to designate the facility of the United States Postal Service located at 265 South Western Avenue, Los Angeles, California as the "Nat King Cole Post Office";

S. 2931, to designate the facility of the United States Postal Service located at 5805 White Oak Avenue in Encino, California, as the "Francis Dayle 'Chick' Hearn Post Office";

H.R. 3034, to designate the facility of the United States Postal Service located at 89 River Street in Hoboken, New Jersey, as the "Frank Sinatra Post Office Building";

H.R. 3738, to designate the facility of the United States Postal Service located at 1299 North 7th Street in Philadelphia, Pennsylvania, as the "Herbert Arlene Post Office Building";

H.R. 3739, to designate the facility of the United States Postal Service located at 6150 North Broad Street in Philadelphia, Pennsylvania, as the "Rev. Leon Sullivan Post Office Building";

H.R. 3740, to designate the facility of the United States Postal Service located at 925 Dickinson Street in Philadelphia, Pennsylvania, as the "William A Cibotti Post Office Building";

H.R. 4717, to designate the facility of the United States Postal Service located at 1199 Pasadena Boulevard in Pasadena, Texas, as the "Jim Fonteno Post Office Building";

H.R. 4755, to designate the facility of the United States Postal Service located at 204 South Broad Street in Lancaster, Ohio as the "Clarence Miller Post Office Building";

H.R. 4794, to designate the facility of the United States Postal Service located at 1895 Avenida Del Oro in Oceanside, California, as the "Ronald C. Packard Post Office Building";

H.R. 5308, to designate the facility of the United States Postal Service located at 301 South Howes Street in Fort Collins, Colorado, as the "Barney Apodaca Post Office";

H.R. 5333, to designate the facility of the United States Postal Service located at 4 East Central Street in Worcester, Massachusetts, as the "Joseph D. Early Post Office Building"; and

The nominations of Ruth Y. Goldway, of California, and Tony Hammond, of Virginia, each to be a Commissioner of the Postal Rate Commission.

BUSINESS MEETING

Committee on Health, Education, Labor, and Pensions: Committee ordered favorably reported the nomination of Mark B. McClellan, of the District of Columbia, to be Commissioner of Food and Drugs, Department of Health and Human Services.

THOMASINA E. JORDAN INDIAN TRIBES OF VIRGINIA FEDERAL RECOGNITION ACT

Committee on Indian Affairs: Committee concluded hearings on S. 2694, to extend Federal recognition to the Chickahominy Tribe, the Chickahominy Indian Tribe—Eastern Division, the Upper Mattaponi

Tribe, the Rappahannock Tribe, Inc., the Monacan Tribe, and the Nansemond Tribe, after receiving testimony from Senators Allen and Warner; Michael R. Smith, Director, Office of Tribal Services, Bureau of Indian Affairs, and Lee Fleming, Chief, Branch of Acknowledgement Recognition, both of Department of the Interior; Kenneth Adams, Upper Mattaponi Indian Tribe, King William, Virginia; Stephen R. Adkins, Chickahominy Indian Tribe, Providence Forge, Virginia; Jonathan M. Barton, Virginia Council of Churches, Richmond; Danielle Moretti-Langholtz, College of William and Mary American Indian Resource Center, Williamsburg, Virginia; and Helen Roundtree, Old Dominion University, Norfolk, Virginia.

NOMINATION

Select Committee on Intelligence: Committee concluded hearings to examine the nomination of Scott W. Muller, of Maryland, to be General Counsel of the Central Intelligence Agency, after the nominee, who was introduced by Senator Bond, testified and answered questions in his own behalf.

COUNTERTERRORISM PROGRAM

Committee on the Judiciary: Subcommittee on Technology, Terrorism, and Government Information concluded oversight hearings to examine the effectiveness and efficiency of the Federal Bureau of Investigation counterterrorism program, and the implementation of the USA Patriot Act (Public Law 107-56), and the Enhanced Border Security and Visa Entry Reform Act (Public Law 107-173), after receiving testimony from Glenn A. Fine, Inspector General, Alice Fisher, Deputy Assistant Attorney General, Criminal Division, Dennis Lormel, Chief, Terrorist Financing Operations Section, Counterterrorism Division, Federal Bureau of Investigation, and Scott Hastings, Associate Commissioner for Information Resources Management and Deputy Chief Information Officer, and Michael Crolnin, Assistant Commissioner for Inspections, both of the Immigration and Naturalization Service, all of the Department of Justice; Stephen A. Edson, Acting Deputy Assistant Secretary of State for Visa Services, Bureau of Consular Affairs; and Ben Wu, Deputy Under Secretary of Commerce for Technology.

House of Representatives

Chamber Action

Referral: S. 2127 was referred to the Committee on Resources. **Page H7735**

Quorum Calls—Votes: Four yeas-and-nays votes developed during the proceedings of the House today and appear on pages H7306–07, H7307–08, H7308, and H7308–09. There were no quorum calls.

Adjournment: The House met at 10 a.m. and at 12:54 a.m. on Thursday, Oct. 10, stands in recess subject to the call of the Chair.

Committee Meetings

VA, HUD AND INDEPENDENT AGENCIES APPROPRIATIONS

Committee on Appropriations: Ordered reported the VA, HUD and Independent Agencies appropriations for fiscal year 2003.

OVERSIGHT—NIH

Committee on Appropriations: Subcommittee on Labor, Health and Human Services and Education held an oversight hearing on the National Institutes of Health. Testimony was heard from Elias A. Zerhouni, M.D., Director, NIH, Department of Health and Human Services.

QUALITY POSTSECONDARY EDUCATION

Committee on Education and the Workforce: Subcommittee on 21st Century Competitiveness held a hearing on Training Tomorrow's Teachers: Ensuring a Quality Postsecondary Education. Testimony was heard from Cornelia M. Ashby, Director, Education, Workforce, and Income Security Issues, GAO; and public witnesses.

TELECOMMUNICATIONS AND TRADE PROMOTION AUTHORITY

Committee on Energy and Commerce: Subcommittee on Commerce, Trade and Consumer Protection held a hearing entitled "Telecommunications and Trade Promotion Authority: Meaningful Market Access Goals for Telecommunications Services in International Trade Agreements." Testimony was heard from Florizelle Liser, Assistant U.S. Trade Representative, Industry and Telecommunications; and public witnesses.

PHARMACEUTICAL MARKETPLACE COMPETITION

Committee on Energy and Commerce: Subcommittee on Health held a hearing titled "Examining Issues Related to Competition in the Pharmaceutical Marketplace: A Review of the FTC Report, 'Generic Drug Entry Prior to Patent Expiration'." Testimony was heard from Lester Crawford, Acting Commissioner,

FDA, Department of Health and Human Services; Timothy J. Muris, Chairman, FTC; and public witnesses.

MISCELLANEOUS MEASURES; COMMITTEE REPORTS

Committee on Government Reform: Ordered reported the following bills: H.R. 5205, to amend the District of Columbia Retirement protection Act of 1997 to permit the Secretary of the Treasury to use estimated amounts in determining the service longevity component of the Federal benefit payment required to be paid under such Act to certain retirees of the Metropolitan Police Department of the District of Columbia; H.R. 5215, amended, Confidential Information Protection and Statistical Efficiency Act of 2002; H.R. 4187, amended, Presidential Records Act Amendments of 2002; and H.R. 2458, amended, E-Government Act of 2002.

The Committee also approved the following Committee Reports entitled: "Making Federal Computers Secure: Overseeing Effective Information Security Management;" "How Can The Federal Government Better Assist State and Local Governments Prepare for a Biological, Chemical, or Nuclear Attack?;" "The Federal Government's Continuing Efforts to Improve Financial Management;" "Defense Security Service: The Personnel Security Investigations (PSI) Backlog Poses a Threat to National Security;" "Federal Law Enforcement at the Borders and Ports of Entry: Challenges and Solutions;" and "Problems With the Presidential Gifts System."

INTERNATIONAL RELIGIOUS FREEDOM REPORT EVALUATION

Committee on International Relations: Subcommittee on International Operations and Human Rights held a hearing on An Evaluation of the International Religious Freedom Report. Testimony was heard from John Hanford, Ambassador-at-Large for International Religious Freedom, Department of State; Felice Gaer, Chair, U.S. Commission on International Religious Freedom; and public witnesses.

MISCELLANEOUS MEASURES

Committee on the Judiciary: Ordered reported the following bills: H.R. 2155, amended, to amend title 18, United States Code, to make it illegal to operate a motor vehicle with a drug or alcohol in the body of the driver at a land border port of entry; S. 1339, Persian Gulf War POW/MIA Accountability Act of 2002; H.R. 4967, Border Commuter Student Act of 2002; and H.R. 5334, to ensure that a public safety officer who suffers a fatal heart attack or stroke while on duty shall be presumed to have died in the line of duty for purposes of public safety officer survivor benefits.

OVERSIGHT—INS'S INTERACTIONS WITH HESHAM MOHAMED AL HEDAYET; PRIVATE RELIEF BILL

Committee on the Judiciary: Subcommittee on Immigration, Border Security, and Claims held an oversight hearing on "The Immigration and Naturalization Services's (INS's) Interactions with Hesham Mohamed Al Hedayet." Testimony was heard from William R. Yates, Deputy Executive Associate Commissioner, Immigration Services Division, INS, Department of Justice and public witnesses.

The Subcommittee also considered a private relief bill.

SAME DAY CONSIDERATION OF RESOLUTION REPORTED BY COMMITTEE ON RULES RELATING TO CONTINUING APPROPRIATIONS

Committee on Rules: Granted, by voice vote, a resolution waiving clause 6(a) of rule XIII (requiring a two-thirds vote to consider a rule on the same day it is reported from the Rules Committee) against certain resolutions reported from the Rules Committee. The resolution applies the waiver to any special rule reported on the legislative day of Thursday, October 10, 2002, providing for the consideration or disposition of a joint resolution making further continuing appropriations for the fiscal year 2003.

DOD APPROPRIATIONS CONFERENCE REPORT

Committee on Rules: Granted, by voice vote, a rule waiving all points of order against the conference report to accompany H.R. 5010, making appropriations for the Department of Defense for the fiscal year ending September 30, 2003 and against its consideration. The rule provides that the conference report shall be considered as read.

MILITARY CONSTRUCTION APPROPRIATIONS CONFERENCE REPORT

Committee on Rules: Granted, by voice vote, a rule waiving all points of order against the conference report to accompany H.R. 5011, making appropriations for military construction, family housing, and base realignment and closure for the Department of Defense for the fiscal year ending September 30, 2003, and against its consideration. The rule provides that the conference report shall be considered as read.

Congressional Record

provisions of Title 44, United States Code, and published for each day that one or both Houses are in session, excepting very infrequent instances when two or more unusually small consecutive issues are printed at one time. ¶Public access to the Congressional Record is available online through *GPO Access*, a service of the Government Printing Office, free of charge to the user. The online database is updated each day the Congressional Record is published. The database includes both text and graphics from the beginning of the 103d Congress, 2d session (January 1994) forward. It is available through GPO Access at www.gpo.gov/gpoaccess. Customers can also access this information with WAIS client software, via telnet at swais.access.gpo.gov, or dial-in using communications software and a modem at (202) 512-1661. Questions or comments regarding this database or GPO Access can be directed to the GPO Access User Support Team at: E-Mail: gpoaccess@gpo.gov; Phone 1-888-293-6498 (toll-free), 202-512-1530 (D.C. area); Fax: 202-512-1262. The Team's hours of availability are Monday through Friday, 7:00 a.m. to 5:30 p.m., Eastern Standard Time, except Federal holidays. ¶The Congressional Record paper and 24x microfiche will be furnished by mail to subscribers, free of postage, at the following prices: paper edition, \$211.00 for six months, \$422.00 per year, or purchased for \$5.00 per issue, payable in advance; microfiche edition, \$141.00 per year, or purchased for \$1.50 per issue payable in advance. The semimonthly Congressional Record Index may be purchased for the same per issue prices. To place an order for any of these products, visit the U.S. Government Online Bookstore at: bookstore.gpo.gov. Mail orders to: Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or phone orders to (866) 512-1800 (toll free), (202) 512-1800 (D.C. Area), or fax to (202) 512-2250. Remit check or money order, made payable to the Superintendent of Documents, or use VISA, MasterCard, Discover, American Express, or GPO Deposit Account. ¶Following each session of Congress, the daily Congressional Record is revised, printed, permanently bound and sold by the Superintendent of Documents in individual parts or by sets. ¶With the exception of copyrighted articles, there are no restrictions on the republication of material from the Congressional Record.
