

CWWG, under the direction of Craig Williams, has played a vital role in the demilitarization of chemical weapons at the Blue Grass Army Depot in Kentucky. I have worked with the CWWG on this important issue and I know how strongly many Kentuckians feel about disposing of these weapons in the safest and quickest manner possible.

Although it took some time, the public and political pressure from CWWG was instrumental in the Department of Defense's decision to use water neutralization, not incineration, to destroy the chemical weapons at Blue Grass Army Depot. CWWG's research efforts to demonstrate effective alternatives to incineration were beneficial to all parties involved in this important decision.

I ask my colleagues in the Senate to pay tribute to the Chemical Weapons Working Group for their role in protecting the environment and the thousands of Kentuckians that live near the Blue Grass Army Depot. ●

TRIBUTE TO DR. JAMES F. JOHNSON

● Mr. SARBANES. Mr. President, I rise today to pay tribute to Dr. James F. Johnson, an outstanding public servant, who is retiring from the U.S. Army Corps of Engineers after an exemplary career spanning more than three decades. I want to extend my personal congratulations and thanks for his many years of service and contributions to improving both the water resources of our Nation and the quality of Federal Government services.

Throughout his 32-year career with the Federal Government, Dr. Johnson has distinguished himself for his leadership, commitment, and dedication to public service, to making government work better, and to addressing some of our Nation's most critical water resource problems. Beginning in Corps of Engineers Headquarters as a program manager, he quickly advanced through the ranks to positions in senior management, including service as Chief of the Eastern Planning Management Branch, Special Assistant to the Chief of Planning, and Acting Assistant Director of Civil Works for the Upper Mississippi and Great Lakes region.

I first came to know Jim when he was selected as Chief of the Planning and Policy Division at the Baltimore District in 1985. During his 13-year tenure in Baltimore, I had the opportunity to work closely with him and his planning team on a number of water resource initiatives in the State of Maryland and the broader Chesapeake Bay Region, including the restoration of the north end of Assateague Island, the Coastal Bays of Maryland, and the Anacostia River. I know first hand the extraordinary leadership, vision and expertise Jim brought not only to projects in this region, but equally important, to building and encouraging one of the finest, most responsive and innovative planning teams in the Nation.

Among his accomplishments, perhaps the one that stands out most and underscores Jim's professionalism and creativity is the role he played in the planning, design and policy development process of one of the Corps' greatest success stories—the restoration of Poplar Island. This project, which is taking clean dredged materials from the channels leading to the Port of Baltimore and using it to restore a chain of environmentally sensitive islands in the Chesapeake Bay, has become a national model for habitat restoration and the beneficial use of dredged material. But developing and winning approval of the project was no easy task. The size and scale of the project were unprecedented. Federal policies at the time greatly limited the funding and contained other disincentives to making this a viable option. Jim and his planning staff put in countless hours helping to resolve these problems and develop innovative solutions that ultimately led to the construction of the project, relief for Maryland's dredged material disposal problem and development of the largest environmentally restoration initiative ever undertaken in the Chesapeake Bay.

Jim Johnson's contributions and accomplishments over the years have been recognized through many prestigious awards including the Army Decoration for Meritorious Civilian Service and the Secretary of Army Award for Publications Improvement, but perhaps no more so than by his selection in 1998 to return to Headquarters as Chief of the Planning and Policy Division of the Directorate of Civil Works. In this prestigious position, he has been responsible for managing some \$200 million annually in water resource investments for navigation, ecosystem restoration, and flood and storm protection. He also developed and implemented a new program to expand planner training and leadership skills.

Dr. Johnson has served the Nation with distinction. His efforts, work ethic, and abiding sense of responsibility and commitment have earned him the admiration of everyone with whom he has worked. I have enormous respect for the professionalism, ingenuity, and integrity which he brought to the positions in which he has served and greatly value the assistance he has provided to me and my staff over the years.

It is my firm conviction that public service is one of the most honorable callings, one that demands the very best, most dedicated efforts of those who have the opportunity to serve their fellow citizens and country. Throughout his career Jim Johnson has exemplified a steadfast commitment to meeting this demand. I want to extend my personal congratulations and thanks for his many years of hard work and dedication and wish him well in the years ahead. ●

RETIREMENT OF JOHN B. BROWN III, ACTING ADMINISTRATOR OF THE DEA

● Mr. BIDEN. Mr. President, James Bryant Conant once said that "each honest calling, each walk of life, has its own elite, its own aristocracy, based on excellence of performance." I rise today to pay tribute to a man who is a member of the law enforcement elite, John B. Brown III, the Acting Director of the Drug Enforcement Administration.

John Brown has spent more than three decades as a special agent in the Drug Enforcement Administration. Last year he capped his law enforcement career when he was appointed deputy administrator of the agency. And when former Administrator Asa Hutchinson was appointed as under secretary at the Department of Homeland Security, John Brown was tapped to be Acting Director of the DEA.

John Brown is a dedicated, hard-working government leader. He is known at the DEA and in the larger law enforcement community as a thoughtful, personable administrator and a man of great humility.

His career at the DEA has been a distinguished one. As a young agent he worked in Mexico where he was deeply involved in the investigation into the murder of Kiki Camarena, the brave DEA agent who was tortured and killed by Mexican drug traffickers. During that time as in the rest of his career—whether it was in Miami, the Dallas field division, the El Paso intelligence center or at DEA Headquarters—John Brown rose to the challenge and excelled at each assignment.

But it was John Brown's first job as a teacher that really shaped him as an agent. John is known by the people who worked for him at DEA as a great teacher, someone who took the time to coach them, to motivate them, to counsel them. For that reason, he is one of the most popular administrators at DEA, and one of the most respected.

As a school teacher, John quickly found that many of the problems he saw among students in his classroom involved learning the skills and attitudes and character to cope with life. Drug use was becoming widespread in the early 1970s and prompted John to decide to join DEA as a special agent.

In truth, he never left the classroom. He has said many times that one of his proudest moments at DEA came when a former student—someone who as a young student had listened to one of his talks about the perils of drug use came up to him in an airport years later. He introduced himself, said that he had a great job and a wonderful family—both of which he said would have been impossible had he joined his many friends who used drugs in high school. He credited John Brown's talk on drugs with keeping away from a life of substance abuse.

I would be remiss if I did not mention John's wife, Christine Brown, who has been a source of tremendous support

and strength to John and their family. I know that she and their two children P.J. and Michael are incredibly proud of John and the superior and important work that he has done over the course of his career.

John Brown is a leader of integrity and total dedication. He has served his country well and I wish him all the best.●

SOUTH DAKOTA SCHOOL OF MINES AND TECHNOLOGY TAKE FIRST PLACE IN ROCKY MOUNTAIN REGIONAL CONCRETE CANOE COMPETITION

● Mr. JOHNSON. Mr. President, I rise today to recognize and congratulate the South Dakota School of Mines and Technology on earning first place for their remarkable display of ingenuity and design at the 2002 Rocky Mountain Regional Concrete Canoe Competition in Logan, UT.

Under the supervision of their advisor, Dr. Marion Hansen, the team earned their 14th first place regional win within the last 16 years. This win qualifies the team for the National Concrete Canoe Competition hosted by Drexel University in June. South Dakota School of Mines and Technology's American Society of Civil Engineering program has a strong record of finding ingenious solutions to complex problems, and has placed in the top five in the National Concrete Canoe Competition five times as well as winning the over all national competition in 1995.

Based on appearance, weight, presentation, and sprint and endurance races for men, women, and co-ed squads, the South Dakota School of Mines and Technology team defeated teams from Wyoming, Utah, and Colorado for their first place win. To effectively implement their strategy, students worked as a whole and within centralized teams, such as hull design, mix design, construction, and paddling, to bring the project together as an award-winning canoe. This win reflects the work ethic and dedication that is so visible in the state of South Dakota.

I want to acknowledge Dr. Richard J. Gowen, president of the South Dakota School of Mines and Technology, as well as Dr. Marion R. Hansen, for their guidance and support to help make this year's team so successful. I also want to congratulate all of this year's team members: Steve Lipetzky, Andy Coats, Ryan Hamilton, Dave Lowe, Eric Gassland, Jen Pohl, Mandy Kost, Katie Zeller, Tarar Boehmer, Wade Lein, and Marshall Cassidy.

Again, congratulations to the South Dakota School of Mines and Technology on winning their 14th regional concrete canoe competition.●

JIM WILDING

● Mr. WARNER. Mr. President, I rise today to honor a friend and an outstanding citizen of the Commonwealth of Virginia, James A. Wilding, on the

occasion of his retirement from the Metropolitan Washington Airports Authority. In the 25 years I have had the opportunity to serve in this body many Senators have come and gone. The faces of industry and its leaders have changed as well. In changing times Jim Wilding has been constant—always a trusted advisor to me and others for the more than 40 years he has served the Nation's capital airports.

In his role at the Authority, Jim is responsible for the management of two of our most important airports in the country—Washington Dulles International Airport and Ronald Reagan Washington National Airport. He has managed them through rapid growth, the transition away from Federal operation, and now into the new post 9/11 security paradigm. His vision is the result of strong knowledge, experience, and dedication to his craft.

Mr. Wilding began his career with the Federal Aviation Administration soon after graduating from the Catholic University of America in 1959 with a graduate degree in civil engineering. At the FAA, he participated in the original planning and development of Washington Dulles International Airport. I remember when that airport was being built—many scoffed at the idea. They questioned the need for a facility of that magnitude and objected to the seemingly rural location. Today we applaud the foresight that went into Dulles. Our transportation system relies on the balance between Dulles and Reagan. Jim Wilding has been an integral part of this visionary leadership.

Following the opening of Dulles in 1962, Mr. Wilding held progressively responsible positions in all phases of engineering for the two federally owned airports, eventually becoming the organization's chief engineer. He served as chief engineer until becoming the airports' deputy director in 1975, and then its director 4 years later.

Mr. Wilding served as the director of the FAA's Metropolitan Washington Airports organization from December 1979. In June 1987, the airports were transferred to the newly created Airports Authority, where he assumed his current position as president.

During his tenure as president and CEO of the Airports Authority, the Metropolitan Washington Airports Authority passenger activity at National and Dulles Airports nearly doubled to 31 million passengers in 2002. With this growth, he has overseen and managed a massive capital development program at both airports totaling well over \$3 billion dollars. Under his leadership, Reagan National Airport was modernized with a new terminal building in 1997 which brought major improvements to airport traffic management and Metro system connections. At Dulles, he directed the expansion and construction of new concourses, the building of the airport's first parking garages, and is now managing a \$3.2 billion capital improvement project. In

addition, the Smithsonian will open its new Air and Space Museum later this year located at Dulles Airport.

Mr. Wilding's career is highlighted with many accolades, which, along with his outstanding performance, have earned him a national and international reputation as an aviation industry expert.

I wish to extend my sincerest congratulations to Mr. James A. Wilding on the occasion of his retirement. I am honored to recognize his many accomplishments to our region, applaud his service to our entire Nation's aviation transportation system, and to call him a friend.●

HONORING HENRY S. SCHLEIFF, CHAIRMAN AND CEO OF COURT TV NETWORK

● Mr. LAUTENBERG. Mr. President, on April 1, 2003, Henry Schleiff, chairman and CEO of Court TV, was awarded the Cable Television Public Affairs Association, CTPAA, President's Award. CTPAA is a national organization that focuses on public affairs issues within the cable industry. I can think of no better person to be honored with this award considering the efforts Mr. Schleiff has put forth to serve his industry and the public community.

His career has featured an impressive array of both private and public service. Since his career began with HBO, Mr. Schleiff has moved up the ranks of the entertainment industry—from senior vice president of business affairs and administration for HBO and head of HBO Enterprises in the 1980s, to executive producer for Viacom International Inc. and CEO of Viacom's Broadcast and Entertainment Groups in the early 1990s, to executive vice-president for Studios USA in the late 1990s. Mr. Schleiff has been the CEO of Court TV since December 1999 and has been the catalyst for its revival. Under his leadership, Court TV has become one of the most successful basic cable networks in the industry, growing from 30 million subscribers to nearly 80 million in just 4 years.

Equally impressive are Mr. Schleiff's efforts for the public community. He is vice chairman of the board of directors for the International Radio & Television Society Foundation, Inc. IRTS, and he serves on the board of directors of the International Council, The Creative Coalition, and Theatreworks. Court TV's Choices and Consequences education program, already in more than 100,000 schools, encourages children to make responsible decisions and positive contributions to society. The "Everyday Heroes" program honors brave and courageous individuals who made personal sacrifices or significant contributions.

Mr. President, I ask unanimous consent that a copy of Mr. Schleiff's award acceptance speech be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:
