#### STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. REID (for Mr. GRAHAM of Florida):

S. 1572. A bill to authorize the expansion of the pilot program of the Department of Veterans Affairs on assisted living for veterans to include three additional health care regions of the Department of Veterans Affairs; to the Committee on Veterans' Affairs.

(At the request of Mr. REID, the following statement was ordered to be printed in the RECORD.)

• Mr. GRAHAM of Florida. Mr. President, I rise today to urge my colleagues to support an expansion of an existing Department of Veterans Affairs assisted living pilot program.

Currently, 35 percent of veterans are 65 or older, which translates into 8.75 million people. Of that, about 640,000 are 85 and older—those most in need of long-term care. VA estimates that the numbers will more than double to about 1.3 million in 2012.

The assisted living pilot program is designed to help this massive group of men and women who either need long-term care now or potentially will need it in the future. The pilot program was first established through The Veterans Millennium Health Care and Benefits Act, which gave VA clear authority to furnish an assisted living service, including to the spouses of veterans.

For my colleagues who do not know—and I doubt there can be many—assisted living is a form of institutional care for those who need help caring for themselves but who do not need to be in a nursing home. By giving them the option of assisted living in an assistive facility, we allow our elderly veterans to retain their independence. The existing pilot has also provided VA a way to offer long-term care without having to house the program within its hospitals, reducing some of the burden to increase its number of beds.

The Veterans Millennium Health Care and Benefits Act allowed for only one pilot program. After an extensive application process, on January 9, 2001, the Northwest Veterans Integrated Service Network (VISN 20) was selected as the pilot site. Though the panel which selected the winner felt that other applicants, including the second place proposal from Florida's VISN 8, warranted funding, they were tied by the law's limit of one program.

Since its inception, the VA assisted living pilot program in VISN 20 has placed a total of 181 veterans in assisted living facilities. The average veteran selected for the pilot is a 69-year-old unmarried male who was referred from an inpatient hospital setting. The average veteran enrolled in the pilot also typically shows significant functional impairment and a wide variety of physical and mental health conditions.

Initial findings show the average cost of the program is comparable to that of private assisted living—even costing less than some offered in Boise and Portland, two cities that are hosting the program. The average contract facility used for the pilot has 25 rooms.

Another valuable facet of the program is its use of a computerized database that makes it extremely efficient for components such as recruitment, processing of payments, high quality data collection, and data analysis for ongoing management feedback and evaluation.
