

next to the plant that closes down, loses business, may go out of business. The real estate agent is faced with selling a whole bunch of homes that nobody wants to buy. Workers, all kinds of people are affected from this kind of job loss.

Now the White House, they have enlisted cheerleaders, Members of Congress, who come to this House floor and talk about this growing economy, talk about corporate profits going up and talk about how it is the best economy in memory of the Secretary of Commerce. In their play book, the White House apparently does not see this or does not care to see what happens to these families and what happens to these communities. The White House play book says between now and the election you have got to be optimistic, you have got to cheer lead, you have got to say the economy is better, you have got to make Americans think everything's great in this country; that we are going to continue to grow.

I do not question my Republican friends. I think they actually believe that. They believe that because 5 percent of the people in this country have gotten big, big tax cuts, a person making \$1 million got \$123,000 tax cut from the President Bush, somebody makes a lot less makes almost nothing. The people that Members of Congress hang around with are doing well. They have good jobs. They get tax cuts. They are doing well. Their companies are doing well because they are the CEOs.

But when they are cheerleading about how great the economy is and accusing people like Senator KERRY of being doom and gloom, the fact is we have got to change the policy. We have got to change the direction of this economy. We have got to stop doing it the way we are doing it. We need to give tax relief to those companies that are hiring domestically and not exporting jobs overseas.

HONORING LANCE CORPORAL JASON MURRAY

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Colorado (Mrs. MUSGRAVE) is recognized for 5 minutes.

Mrs. MUSGRAVE. Mr. Speaker, I rise today to honor a true American hero, 20-year-old Lance Corporal Jason Murray. Lance Corporal Murray is a United States Marine from the 2nd Battalion, 4th Marine Regiment, 1st Marine Division. Jason's home is in Sterling, Colorado, in the northeast part of our beautiful State.

Jason has wanted to serve in the military since he was a boy. He graduated from Sterling High School in 2002 and enlisted in the Marines in the fall of that year. He became engaged to his high school sweetheart, Kelsi, in the fall of 2003 following boot camp.

Jason is currently recovering from injuries he received in Iraq on March 29. Jason was patrolling near Ar Rahmadi searching for improvised ex-

plosive devices. One of the devices detonated 3 feet in front of Jason, killing the Marine in front of him and seriously injuring Jason. Jason received the full force of the explosion, with shrapnel striking him in the face, chest, and arms. He lost his right eye and currently has no vision in his left eye. He lost most of the teeth on the left side of his face and received brain trauma as well.

He spent 10 days in a drug-induced coma at the 31st Combat Support Hospital outside of Baghdad. Numerous surgeries were performed before he was stable enough to be airlifted to Landstuhl, Germany, and then on to Bethesda Naval Hospital in Maryland where his family and fiance joined him. Jason is making a remarkable recovery and has recently been transferred to Craig Medical Center in Denver for rehabilitation.

Because he received wounds while in combat, Lance Corporal Jason Murray was awarded the Purple Heart. Jason also received a flag that had been flown over the Capitol in his honor on March 23, 2004.

Mr. Speaker, we are so fortunate to live in this great country where freedom is something that we rarely have to think about and often take for granted. It is simply a way of life for us, and we are truly blessed to live in a country that honors citizens for their spirit, their ideas, their individuality, and their courage. We can maintain the blessings of our freedoms only because we have citizens like Jason who are willing to fight to defend them for us.

I am proud to honor Jason for his courage and sacrifice on behalf of all Americans. I applaud Jason for his courage and selfless dedication to duty. He has helped protect our democracy and kept our homeland safe by placing his life on the line.

Jason is truly the embodiment of all the values that have molded America into this great Nation that it is today. May God bless Jason.

SMART SECURITY AND INDIA- PAKISTAN NUCLEAR ISSUES

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. WOOLSEY) is recognized for 5 minutes.

Ms. WOOLSEY. Mr. Speaker, the border between India and Pakistan has commonly been called the world's most dangerous nuclear flashpoint. India is thought to have at least 50, maybe as many as 120, nuclear warheads; and Pakistan is thought to have 30 to 70 warheads, but the two countries took a step towards nonproliferation on Sunday when they signed their first confidence-building agreement on nuclear weapons since 1999.

As part of the agreement, both countries will keep open a permanent telephone hotline to warn the other in advance of tests of nuclear-capable missiles. The confidence-building measures also included an agreement to continue

the moratorium on testing nuclear warheads and a promise to continue nuclear talks.

While largely symbolic, this agreement is significant because it represents the desire of both India and Pakistan, two countries consistently at odds with each other, to avoid a devastating nuclear exchange that could kill hundreds of thousands of people.

The United States could take some valuable lessons, Mr. Speaker, from this India-Pakistan agreement. At the same time these two countries are seeking to reduce the threat of nuclear weapons, the United States is funding millions of dollars in research on new nuclear weapons.

Specifically, in this year's budget request, President Bush asked for over \$100 million for research and testing of new nuclear weapons, including the robust nuclear Earth penetrator and so-called yield nuclear weapon. Fortunately, these funds were initially rejected by the Committee on Appropriations Subcommittee on Energy and Water Development.

When it comes to nuclear weapons, President Bush just does not seem to get it. While countries like India and Pakistan have taken the first step to making the world safer, our President seems to think the only good defense is a good offense.

But how strong does our offense need to be? We already possess 9,000 strategic nuclear warheads. How many of these weapons of last resort do we need before we feel secure? How much money do we need to spend on new nuclear weapons while neglecting important domestic programs before we decide that we have finally spent enough?

Mr. Speaker, there has to be a better way, a more sensible way, a way more rooted in the best American values, and there is.

I have introduced H. Con. Res. 392 to create a SMART security platform for the 21st century. SMART stands for Sensible Multilateral American Response to Terrorism. We need to stop the spread of weapons of mass destruction, and keeping the American people safe must be our highest priority. On that point, the President and I agree; but we must avoid equating our security with aggression and military force.

The United States possesses the world's largest nuclear stockpile, but nuclear weapons are not the answer to our problems because conflicts between nations require a more delicate touch.

Instead, SMART security calls for aggressive diplomacy, a commitment to nuclear nonproliferation, strong regional security arrangements, and vigorous inspection regimes.

The United States must set an example, Mr. Speaker, an example for the rest of the world by renouncing the first use of nuclear weapons and the development of new nuclear weapons.

We must maintain our commitment to existing international treaties like the Nuclear Non-proliferation Treaty,
