

Many Lumbee Indians have served our Nation with distinction, such as Rear Admiral Michael Holmes, who hails from my hometown of Lumberton and who is the first Native American to become an admiral in the U.S. Navy. I visited with Admiral Holmes in Europe last year, as I did with Army Specialist Jonathan Brooks of Pembroke, who also is from Robeson County. These gentlemen are just two of the many Lumbees serving our country. Lumbee veterans also serve on my Seventh Congressional District Advisory Committee on Military and Veterans Affairs.

In addition to the Lumbee Tribe, I also represent two other tribes—the Coharie Tribe, which has a tribal membership of more than 2,400, and the Waccamaw-Siouan Tribe, which consists of a membership of approximately 2,000. Members of each of these tribes have served honorably in the military. For example, the Coharie Tribal Chief, Mr. Gene Faircloth, is a Vietnam combat veteran and served in the U.S. Marine Corps for 6 years. And, approximately 100 members of the Waccamaw-Siouan Tribe have served honorably in conflicts since World War II. Unfortunately, on October 2, 2004, the Waccamaw-Siouan Tribe lost one of its esteemed members, Mr. Ernest Sylvester "E.S." Jacobs, who valiantly served in the U.S. Armed Forces during World War II.

I am proud of the contributions that all Native Americans, including those that make up the Lumbee, Coharie and Waccamaw-Siouan Tribes, have made to our great country, and I applaud them for their rich tradition of strength, wisdom, commitment and service. I commend them and all those in uniform who have volunteered to defend the rights and freedoms that we all hold dear. May God bless each of them and their families as they continue to serve valiantly our country.

IN RECOGNITION OF DR. RICHARD GROSSMAN

**HON. BRAD SHERMAN**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, October 8, 2004*

Mr. SHERMAN. Mr. Speaker, I rise today to pay tribute to Dr. Richard Grossman for his devoted efforts to improving the lives of burn victims in the San Fernando Valley and the Nation.

Dr. Grossman is an ally to firefighters, children, and those who have sustained burn injuries. He brings hope, comfort, and life into situations where they might otherwise seem nonexistent.

Dr. Grossman is board certified in both general surgery and plastic surgery. He holds membership in numerous societies, including the American Burn Association, the American Society for Aesthetic Plastic Surgery, the American Society of Plastic and Reconstructive Surgery, the California Medical Association, the San Fernando Valley Surgical Society, and the International Society for Burn Victims. He has been president of the Los Angeles Society of Plastic Surgeons. He has been also associated with a number of other organizations including the Foundation for Burn Research, the Los Angeles Society of Plastic Surgeons, the National Coalition of Burn Center Hospitals, the American College of

Hyperbaric Medicine, and the Alisa Ann Ruch Foundation. In addition, he serves as Director of the Grossman Burn Center, Director of the Grossman Burn Unit, and Director of Research-Hyperbaric Oxygen Therapy.

His past involvement with the California Health Care Commission and a Judicial Nomination Evaluation Commission to the State Bar Association demonstrates Dr. Grossman's commitment to civic duty. In 1994, he was named Honorary Fire Chief for the City of Los Angeles, and was inducted into the California Department of Firefighters' Hall of Fame.

Mr. Speaker, Dr. Grossman is a compassionate and sympathetic man, which is evident through his work with San Fernando Valley firefighters. His expert care of burn-injured firefighters is indispensable. He is actively involved in developing training programs for the care of burn injuries. Please join me in recognizing Dr. Richard Grossman, a distinguished physician who has made it possible for many burn victims to triumph over their injuries. His dedication and expertise provide comfort and life to many.

RENEWABLE ENERGY FINANCING INCENTIVE ACT

**HON. STEPHANIE HERSETH**

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

*Friday, October 8, 2004*

Ms. HERSETH. Mr. Speaker, I rise today to introduce a bill that will provide important incentives for farmers and landowners across the country to invest in the construction of renewable fuels facilities.

This bill, called the Renewable Energy Financing Incentive (REFI) Act is a carefully crafted piece of legislation that would give landowners in South Dakota and across the country additional tax planning tools when they chose to dispose of real property. At the same time, it would encourage investment in renewable fuel production facilities.

Throughout the United States, the ethanol industry is growing at an impressive rate. In fact, over the past several decades, it has been one of the most dramatic success stories in manufacturing in this country.

In 1980, there were only 175 million gallons of ethanol produced in the United States. In 2004, we will produce more than 3.1 billion gallons of ethanol in 74 different processing facilities. In addition, dozens of new plants are either under construction or in meaningful planning stages across the country. According to industry sources, 30 percent of all gasoline sold in the United States this year will be blended with ethanol. That is an impressive record of growth.

Even more significant, much of this growth is driven by the agricultural producers who actually grow the primary feedstock. In dozens of instances, corn farmers and other agricultural producers have banded together to form cooperatives and other ventures that produce ethanol. This has the double benefit of increasing the compensation they receive for the corn they grow and also providing them with income from the ethanol and the byproducts these facilities produce.

This cooperative formula is one of the few tools that have driven real economic development in rural counties throughout the heart-

land in recent years. This legislation would provide additional incentives and tools to further promote this development. It would allow owners of real property to avoid capital gains upon the sale of that property, provided they then invest those proceeds into a qualifying renewable fuels facility.

This bill will provide several benefits throughout rural America and across the country. It will help farmers and ranchers diversify their operations through investment in value-added agriculture. It will extend to all landowners an additional option when they seek to sell their real property. Often, in my part of the country, older individuals are forced to sell their property as they retire from farming and ranching. They then must invest their proceeds from this sale in order to provide themselves a retirement income. This bill will enable them to avoid capital gains taxes and provide them with an equity stake in a burgeoning industry.

It also will provide a new revenue stream for the ethanol and other renewable fuel facilities that are in discussion and development stages today. This will, in turn, reduce our dependence on foreign sources of oil, promote increased use of clean-burning renewable energies, and provide new economic growth opportunities throughout rural America. I urge my colleagues to support this legislation and yield back the balance of my time.

HONORING ROBERT PARKER

**HON. MIKE THOMPSON**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, October 8, 2004*

Mr. THOMPSON of California. Mr. Speaker, I rise to pay tribute to one of the most prolific and respected wine writers in the history of our Nation, if not the entire world. It is only fitting that we recognize the distinguished career of Robert M. Parker, Jr. on this, the 25th anniversary of the first publication of his semi-annual journal, the Wine Advocate.

On October 22 and 23, 2004, the world-renowned Culinary Institute of America (C.I.A.) will host a gala weekend of events to honor the long career of Mr. Parker. I can think of no better place than the C.I.A. to have such an event, given all that Mr. Parker has done to further the enjoyment of fine wine and good food.

Robert Parker was born in Baltimore, Maryland in 1947. The first 30 years of his life were filled with college, law school and a 10-year career in corporate America. In August of 1978, the Wine Advocate was born with less than 600 subscribers. Today, the Wine Advocate has over 40,000 subscribers in all 50 states and 37 countries around the world.

Mr. Speaker, over the course of 25 years of writing his newsletter, Mr. Parker has become known as one of the world's foremost experts on wine. Mr. Parker pioneered an innovative approach to wine criticism. Rather than limiting his ratings to a letter scale or a scale of 1–10, Mr. Parker rates wine on a scale of 50–100. This scale has become a widely accepted method of reviewing wines.

However, Mr. Parker's rating scale only accounts for a small portion of his wine reviews. Mr. Parker compiles extensive tasting notes highlighting each aspect of the wines he reviews. He is known for pinpointing the color,

tastes and aroma of a wine and eloquently translating these attributes into prose.

In addition to publishing the *Wine Advocate*, Mr. Parker has written 11 books on wine. His first book, *Bordeaux*, was published in 1985 and was met with critical acclaim worldwide.

Mr. Parker has been a powerful advocate of the international wine industry. In a 1998 article, *Los Angeles Times* media critic David Shaw called Parker, "the most powerful critic of any kind, any where." Mr. Parker's reviews have steadily guided wine consumers for many years.

Mr. Speaker, at this time I think it is appropriate that we honor and congratulate Robert Parker on his 25 years of publishing the *Wine Advocate* and we thank Mr. Parker for his service as a tireless champion of the wine industry.

DISCOVERY CHANNEL YOUNG  
SCIENTIST CHALLENGE

HON. SHERWOOD BOEHLERT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, October 8, 2004*

Mr. BOEHLERT. Mr. Speaker, as Chairman of the House Committee on Science, I am an avid supporter of programs that encourage the youth of America to push the limits of innovation and originality in science. One such program is the Discovery Channel Young Scientist Challenge.

Created in 1999, Discovery Communications, Inc., designed the Discovery Channel Young Scientist Challenge as part of the solution to America's chronic underachievement in science and math. The annual national contest responds to evidence that academic performance and interest in science among American students declines dramatically as students become older. This is particularly evident during the middle school years.

For these reasons, the Discovery Channel Young Scientist Challenge identifies and honors America's top middle school student who demonstrates the best skills in leadership, teamwork, and scientific problem solving. More than 7,500 middle school students have entered the challenge since its inception in order to compete for the title of "America's Top Young Scientist of the Year." Since 1999, scholarship awards for the students have totaled more than \$450,000 and challenge winners have participated in science-related trips to far-off places, including the Roslin Institute in Midlothian, Scotland, and the El Yunque rain forest in Puerto Rico.

On September 20, 2004, Discovery Communications, Inc., announced the 40 middle school students who have advanced to the finals of the Discovery Channel Young Scientist Challenge. Selected from more than 1,700 entrants, the finalists represent an elite group of young Americans who demonstrated exceptional creativity and communications skills in original science research projects. The 40 finalists will come to Washington, D.C., October 23–27, where they will take part in the Discovery Channel Young Scientist Challenge finalist competition at University of Maryland's Cole Field House. They will compete in team-based, interactive challenges celebrating 100 years of Albert Einstein's physics discoveries. The winners will be announced at the awards ceremony on October 27, 2004.

The finalists for the 2004 Discovery Channel Young Scientist Challenge are: Kasey Borchardt of Vernon, Texas; Pinaki Bose of Fort Worth, Texas; Rebecca Chan of Encinitas, California; Sara Clark of Pipe Creek, Texas; Shireen Dhir of Kathleen, Georgia; Nicholas Ekladyous of Imlay City, Michigan; Julia Fanning of San Antonio, Texas; Austin Fullmer of Glendale, California; Sherri Gerten of Columbus Grove, Ohio; Joy Hines of Fort Wayne, Indiana; Daniel Jakubisin of Fairview Park, Ohio; Christine Johns of Cape Coral, Florida; Sravya Keremane of Gainesville, Florida; Kevin Lane of Flora Vista, New Mexico; Amanda Lu of Plano, Texas; Philip Mansour of San Ramon, California; David Marash-Whitman of Saratogo, California; Shannon McClintock of San Diego, California; Elijah Mena of Gales Ferry, Connecticut; Mary Anne Messer of Hattiesburg, Mississippi; Maryam Mohammed of Niceville, Florida; Ana Pedrajo of Coral Gables, Florida; Jordan Pennell of Jacksonville, Illinois; Molly Pettit of Portland, Oregon; Jonathan Reasoner of Tucson, Arizona; Chana Rich of Fairfield, Connecticut; Anastasia Roda of Lancaster, Pennsylvania; Michael Rutenberg-Schoenberg of Portland, Oregon; Celine Saucier of Midland, Michigan; Anton Schraut of Pittsburgh, Pennsylvania; David Sharples of East Windsor, New Jersey; Dustin Shea of Jacksonville, Illinois; Daniella Sinay of Trumbull, Connecticut; Janet Song of Audubon, Pennsylvania; Eric Stregge of La Quinta, California; Adam Tazi of Orlando, Florida; Blake Thompson of Gainesville, Florida; David Westrich of Cape Girardeau, Missouri; Kyle Yawn of Bonaire, Georgia; and Blake Zwerling of Portland, Oregon.

At a time when science and technology plays such an enormous role in our lives, I believe it is imperative that we continue to support and nurture the next generation of young scientists. I would like to congratulate these students for their dedication and hard work in the name of science and wish them all good luck during the 2004 Discovery Channel Young Scientist Challenge.

TRIBUTE TO CURESEARCH

HON. JIM SAXTON

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Friday, October 8, 2004*

Mr. SAXTON. Mr. Speaker, I rise to commend CureSearch for the admirable work it does to fight against childhood cancers, the number one disease killer of children in the United States today.

CureSearch, a coalition between the National Childhood Cancer Foundation and Children's Oncology Group; which is comprised of over 5000 children's oncologist around the country, is on the frontlines of our nation's war against childhood cancer. Their efforts are making a considerable impact upon the lives of children who have been diagnosed. CureSearch's work has enabled more than 77 percent of those diagnosed to survive these diseases. This is dramatic impact considering that forty years ago childhood cancer was almost always fatal.

Certainly, this is an improvement, but we are still not doing enough to prevent children from dying of cancer. The fact that cancer still

kills is proof enough that more research is crucial to eliminate these terrible diseases.

A cure for all children fighting cancer is within our grasp. By further developing the Federal partnership with CureSearch and increasing funding for research, we can eliminate these diseases within our lifetime. By uniting to fight childhood cancers, soon there will be a day when every child with cancer can be guaranteed a cure.

HONORING JANET REDDING ON  
HER RETIREMENT FROM SAN  
JOSE STATE UNIVERSITY

HON. ZOE LOFGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, October 8, 2004*

Ms. LOFGREN. Mr. Speaker, Congressman HONDA and I would like to congratulate Janet C. Redding, Vice President for University Advancement of San Jose State University (SJSU) as she retires after 19 years of dedicated and honorable service.

Redding was the Special Assistant to the President for Governmental and External Relations for San Jose State University, Silicon Valley's Metropolitan University. SJSU is the oldest public institution on the West Coast (founded in 1857) and one of the largest institutions in the 23-campus California State University System. With more than 3,000 employees, SJSU is the fourth largest public employer in Silicon Valley, with an annual operating budget of over \$350 million.

A former schoolteacher at both public and private schools, Redding has been at SJSU for 19 years, where she oversees External, Governmental and Community Relations. Under her leadership as Vice President for University Advancement contributions to the university have totaled more than \$100 million in the last decade. During her tenure, Redding created the Division of University Advancement by expanding the Alumni Association, the Office of Communications and Public Affairs, and the Office of Development. She also created the President's Advisory Council, whose members serve as advocates and advisors to the President of the university on issues affecting the university. In addition Janet was involved with helping to secure both public and private funds for the new Martin Luther King, Jr. joint library serving both the University and the City of San Jose. She helped raise \$10M from private sources and \$90M from the California State Legislature. Over the past two years she worked to secure Federal funding for the CSU Coastal Initiative at Moss Landing and for Nanotechnology Research in the College of Engineering here at SJSU.

A 1993 graduate of Leadership San Jose, Redding served on the San Jose Convention and Visitors Bureau Board for six years, including a term on the executive committee as treasurer. In 1997, San Jose Mayor Susan Hammer honored Janet as one of the Outstanding Women of Silicon Valley. She is a member of the National Society of Fund Raising Executives, Silicon Valley Chapter, the Council for Advancement and Support of Education, and the Silicon Valley Planned Giving Council.

Throughout the years, we have always been impressed by her energy and dedication to the
