

index fund. And each of those will have slightly greater return.

So people do not need investment knowledge and that is very important because some critics say that one has to be a savvy investor to be able to make this work. That is simply not true.

The other point is that, because the investment decisions are made by an entity contracting with the government, the management fees are extremely low, and because they are managing a huge amount of money, the cost of investing remains extremely low.

The last point I want to make is the restriction and the difference between a personal account and a private account is not just that the government will control the funds that are picked and the manager of those funds, but also people will not be able to invest them in risky investments. Unfortunately, both Chile and England allowed true private accounts where they picked their individual stock market in which to place the money and they picked the broker and the fees were high and the investments were risky. That is not what is being talked about here.

I urge Americans to study the issue of GROW accounts. There is, I think, in reality no downside to these accounts. They enable the Congress to stop spending Social Security on anything other than Social Security, and they let each American have an individual share of the Social Security surplus that is theirs forever and can never be taken from them.
