HENRY FORD HEALTH SYSTEM,

Detroit, MI, December 12, 2005.

Re Morris K. Udall Parkinson’s Disease Research Act Amendments of 2005.

Hon. DEBBIE STABENOW,

U.S. Senate,

Washington, DC.

DEAR SENATOR STABENOW: The Henry Ford Health System strongly supports your legislation which would reauthorize the Morris K. Udall Parkinson’s Disease Research Centers and allow an expansion of this important research to other states, including Michigan.

The Henry Ford Health System has been engaged in significant Parkinson’s Disease research for many years, with published research on linkages between Parkinson’s Disease and occupational exposure to lead, copper and agricultural pesticides, as well as life-style going back to 1993. The etiology of Parkinson’s Disease is considered to have a strong environmental component, but relatively few studies have investigated the potential association between occupation and the disease. The HFHS research is enriched by our strong clinical and research programs in Neurology, Biostatistics, and Research Epidemiology at the HFHS Health Sciences Center, as well as our formal affiliation with Wayne State University and the National Institute of Environmental Health Sciences Center in Molecular and Cellular Toxicology with Human Applications at WSU.

Henry Ford Health System provides healthcare to more than 1 million patients, including approximately 25% of residents in the greater Southeast Michigan region, as well as many patients from virtually every state in the nation. Patients are drawn to Henry Ford Health System because of important advancements in diagnostics and treatment that may not be readily available elsewhere. Because of our ability to combine research with our strong clinical programs, HFHS offers an ideal setting for the kinds of changes called for in this legislation. We believe the intent to focus more of the National Institutes of Health Parkinson’s dollars on translational research and therapies will bring a strong return on investment and lead to better treatments for more than one million Americans fighting Parkinson’s disease.

Thank you for your leadership on this important health care issue. We appreciate your dedication and support for funding the research that can eventually lead to a cure for Parkinson’s Disease. We look forward to working with you on this legislation and offer our assistance in achieving the positive changes called for in the Udall Act Amendments.

Sincerely,

NANCY M. SCHLICHTING,
President & CEO.

Hon. DEBBIE STABENOW,

U.S. Senate,

Washington, DC.

Hon. GORDON SMITH,

U.S. Senate,

Washington, DC.

DEAR SENATOR STABENOW AND SENATOR SMITH: The Parkinson’s community strongly supports your legislation, the Morris K. Udall Parkinson’s Disease Research Act Amendments of 2005.

Recognizing the need to accelerate the pace of Parkinson’s disease research, Congress passed the Morris K. Udall Parkinson’s Research Act of 1997 (Udall Act) and it was signed into law. The Udall Act Amendments builds on the historic 1997 Udall Act to strengthen and focus critical Parkinson’s disease research.

Your legislation will ensure that NIH-funded research will hasten discovery of better treatments and a cure for Parkinson’s disease. We believe the positive changes called for in the Udall Act Amendments will require the NIH to focus more of its Parkinson’s dollars on translational research and therapies, recognize the unique aspects of the Udall Centers, and give us a stronger understanding of who is impacted by this devastating disease and why. We are confident that the Udall Act Amendments will ensure that federally-funded Parkinson’s disease research brings the strongest return on investment possible and will ultimately lead to better treatments and a cure for the more than one million Americans fighting Parkinson’s disease.

The Parkinson’s community applauds your legislation and looks forward to working with you to ease the burden and find a cure for Parkinson’s disease. We thank you for your leadership and dedicated efforts on behalf of the entire Parkinson’s community.
