

PERSONAL EXPLANATION

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 2006

Mr. HYDE. Mr. Speaker, on January 31, 2006, I was absent for the following vote for personal reasons. Had I been present, I would have voted "present" on rollcall No. 1.

IN MEMORY OF THE "COLUMBIA"
AND "CHALLENGER" HEROES**HON. TOM DeLAY**

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 2006

Mr. DELAY. Mr. Speaker, I rise today to remember 14 heroes of our Nation's space program.

Three years ago today, on a clear blue morning, the space shuttle *Columbia* exploded in the skies above Texas, killing all seven members of her crew.

The tragedy reminded us of a similar cloudless morning almost 17 years to the day earlier, when the space shuttle *Challenger* was lost moments after liftoff.

The 14 men and women who died on these missions were extraordinary individuals, but they were typical of the men and women NASA employs.

Courageous.

Dauntless.

Driven by a spirit of exploration and a desire to understand the unknown.

The *Columbia* and *Challenger* crew members knew the risks of spaceflight, but they chose to serve anyway—not in spite of the risks, but in part because of them.

They gave their lives in the hard and noble work of discovery, in service to their country and for all mankind.

Though these 14 heroes have slipped the "surlly bonds of earth," their legacy remains, grounded in the hearts and memories of those who strive every day to finish their life's work.

COMMENTS ON SECTION 1403 OF
ENERGY POLICY ACT OF 2005**HON. JOE BARTON**

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 2006

Mr. BARTON of Texas. Mr. Speaker, I rise today to address the Energy Policy Act of 2005 that was signed by the President in August. This Act is the most comprehensive energy legislation in 30 years, and I believe it will lower energy prices for consumers, spur our economy, create hundreds of thousands of jobs, and take unprecedented steps to promote greater energy conservation and efficiency. I want to highlight one provision that I included in the House passed version of this legislation and which was retained in the final conference report. This provision promotes energy efficiency of electric transformers and improved public safety, but also promotes strong environmental stewardship. This provision, [section 1403,] governs the use of non petro-

leum oil in electric transformers as electrical insulation.

The intent of section 1403 was to provide clarity for the new Oil Spill Prevention, Containment, and Countermeasures (SPCC) regulations. As some of my colleagues know, electric transformers, whether the small buckets on telephone poles or those pad mounted on the ground, include some quantities of oil used as an electrical insulation and thermal dissipation medium.

Under SPCC, small and rural utilities and institutions that have their own electric transformers—including hospitals, schools, and military bases—will be required to build secondary containment diking around their electric transformers in case there is a spill of the oil used in transformers as thermal insulation. It should be noted that by the government's own estimates, facilities with less than 10,000 gallons of storage capacity account for less than 2 percent of the total volume of oil spilled in the United States. Furthermore, the amount of volume contained in electric transformers is well below this figure.

All those facts aside, section 1403 was included in the Energy Policy Act of 2005 as a means to provide an alternative to the increased costs of Federal regulations on rural communities and institutions that have electric transformers, providing regulatory relief for bio-based oils that have proven environmental benefits. Specifically, local communities and institutions that have electric transformers can avoid the costs of constructing secondary diking containment around their transformers if they use bio-based, non petroleum oils as insulation. In addition, many older electric transformers still contain Polychlorinated Biphenyls (PCBs) in their electrical insulation. By promoting these alternatives to petroleum-based oil used as thermal insulation in electric transformers, we provide a smart and environmentally friendly option to encourage the replacement of PCBs. It should be noted that this provision was retained in the final legislation without opposition or controversy.

Additionally, in 1995, Congress passed the Edible Oil Regulatory Reform Act. This statute set forth specific guidelines for implementing regulations on oil spills. The Edible Oil Regulatory Reform Act states ". . . in issuing or enforcing any regulation or establishing any interpretation or guideline relating to the transportation, storage, discharge, release, emission, or disposal of a fat, oil, or grease under any Federal law, the head of that Federal agency shall differentiate between and establish separate classes . . . and consider differences in the physical, chemical, biological, and other properties, and in the environment." Nearly a decade later, EPA continues to maintain the position that "oil is oil." EPA has either been unwilling or unable to differentiate between the different classes of oils. I raise this issue because I want to make clear how the author of section 1403 intends it to be interpreted.

Section 1403, Regulation of Certain Oil Used in Transformers, reads as follows: "Notwithstanding any other provision of law, or rule promulgated by the Environmental Protection Agency, vegetable oil made from soybeans and used in electric transformers as thermal insulation shall not be regulated as an oil identified under section 2(a)(1)(B) of the Edible Oil Regulatory Reform Act (33 U.S.C. 2720(a)(1)(B))."

EPA's broad generalization that "oil is oil" disregards renewable oils that, I believe, have an improved effect on the environment in case of a spill. EPA's broad policy impedes the replacement of fluids known to be harmful to the environment with fluids that have proven, tested benefits for the environment.

CHARLES WARREN CILISKE

HON. TED POE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 2006

Mr. POE. Mr. Speaker, today I want to congratulate Charles Warren Ciliske on his recent offer of appointment to the U.S. Military Academy at West Point. Charles sought a nomination to West Point through my office, competing with a group of highly qualified applicants. He was selected for a nomination and West Point has offered him an appointment to their celebrated institution. I am proud to give him a Congressional nomination.

Charles is currently a senior at Kingwood High School in Kingwood, Texas and he possesses many qualities that will make him an excellent cadet at West Point, and an excellent officer in the United States Army. He has shown the ability to dedicate himself to a goal over the long-term, and to succeed with this dedication. Charles is a 4-year varsity swimmer on the Kingwood High School Swim Team and was Captain of the team this season. He is a 5-time High School All-American, 2003 Rookie of the Year and 2005 District Swimmer of the Year. Also in 2005, he was on the Team 5A Texas State Champs and was a National Runner-Up.

Charles has proven himself academically as well, earning the AP Scholar Award. He is a member of the USA Swimming Academic All-American Team and a member of the National Honor Society.

The clincher for Charles was the interview by my Service Academy Nomination Board. Nothing can replace a personal encounter to establish credibility and repute. His interviewers said that he was an exceptional candidate, with excellent character and strong moral values. They were impressed by Charles's professed dream to attend the U.S. Military Academy, and knew he understood the gravity of the commitment to the Academy and of becoming an officer in the U.S. Army. They recommended him to me without reservation.

Mr. Speaker, I believe that Charles is a fine Texan who will serve his country with distinction and I wish him good fortune in this new chapter of his life.

COMMENDING THE SAN ANTONIO
STOCK SHOW AND RODEO**HON. HENRY BONILLA**

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 2006

Mr. BONILLA. Mr. Speaker, today I wish to recognize and offer my congratulations to the San Antonio Stock Show and Rodeo for receiving honors as the "Large Indoor Rodeo of the Year for 2005" and "Top Rough Stock Rumba of the Year Award." Everyone who
