

spite of the fact that out of 100 high school students only two of those students will typically go on to ever get a degree in engineering or science. That is of concern.

And that is why I join with the gentleman from Illinois in urging my colleagues to adopt this resolution supporting the goals and ideals of National Engineers Week.

Mr. BOEHLERT. Madam Speaker, I rise today in strong support of H. Res. 681, a resolution recognizing the importance of engineers and supporting National Engineers Week.

From the grandest of skyscrapers to microchips and the smallest of medical devices, engineers continue to design and construct products that are vital to our daily lives and our Nation's economy. Unfortunately, American students today are losing interest in engineering. The National Academy of Sciences report, "Rising Above the Gathering Storm," notes that, "after secondary school, fewer U.S. students pursue science and engineering degrees than is the case of students in other countries. About 6% of our undergraduates major in engineering; that percentage is the second lowest among developed countries." We need to get American students at all levels back into science and engineering classes. Our Nation's continued global and economic leadership depends on our ability to inspire the next generation of engineers.

H. Res. 681 recognizes and supports the goals and ideals of National Engineers Week as an important part of educating and building a competitive workforce for the 21st century. For example, National Engineers Week exposes students that might otherwise never dream of a career in a technical field to opportunities in engineering through programs such as the "Future City Competition" (a contest for middle school student teams to design a visionary city) and the "Global Marathon For, By and About Women in Engineering" (a 24-hour long series of presentations intended to attract young women into the engineering workforce). During this week, students and professionals at all levels will be motivated to explore the vast opportunities open to them in the field of engineering.

In conclusion, I would like to thank the National Society for Professional Engineers for its ongoing efforts to educate children and adults about the importance of engineering. I would also like to thank Congressman INGLIS and Congressman LIPINSKI for their leadership on this important issue. I ask that you join me in recognizing the importance of engineering in our daily lives and the positive impact of National Engineers Week by voting in favor of H. Res. 681.

Ms. EDDIE BERNICE JOHNSON of Texas. Madam Speaker, I would like to express my strong support of H. Res. 681, supporting the goals and ideals of National Engineers Week.

Engineers put ideas into motion. They must possess the creativity and analytical skills to innovate.

Texas is our Nation's energy State. Its roots are in big oil and big skies.

These days, much of the wealth generated by Texas oil is being put to good use to "fuel" the technology economy. Engineers are a critical part of that effort.

Our State is investing millions of dollars to develop cleaner-burning alternative fuels that are more efficient and better for the environ-

ment. Engineers, working behind the scenes, are involved at every stage.

I am proud that my State is showing leadership at a time when this Nation desperately needs to invest more in research, particularly in energy research.

Texas's tenacity and frontier spirit is strong, and I commend engineers in Texas and all over this Nation for the wonderful work they do.

Madam Speaker, I join my colleagues on the House Science Committee in support of H. Res. 681 and National Engineers Week.

Mr. INGLIS of South Carolina. Madam Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mrs. BIGGERT). The question is on the motion offered by the gentleman from South Carolina (Mr. INGLIS) that the House suspend the rules and agree to the resolution, H. Res. 681.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

#### RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until approximately 6:30 p.m. today.

Accordingly (at 4 o'clock and 2 minutes p.m.), the House stood in recess until approximately 6:30 p.m.

□ 1830

#### AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. ADERHOLT) at 6 o'clock and 30 minutes p.m.

#### ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, proceedings will resume on motions to suspend the rules previously postponed.

Votes will be taken in the following order:

H.R. 4054, by the yeas and nays;

S. 2271, by the yeas and nays.

#### DEWEY F. BARTLETT POST OFFICE

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 4054.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Pennsylvania (Mr. DENT) that the House suspend the rules and pass the bill, H.R. 4054, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 413, nays 1, not voting 18, as follows:

[Roll No. 19]
