

the spread of this epidemic. By 2004, practically the whole Nation was blanketed by small meth labs. The only exception would be in the New England States in the Northeast, and that is rapidly being taken over as well.

So this is something that is spreading rapidly. However, it is important to realize that 70 to 80 percent of the methamphetamine in the United States is now coming from super labs, mostly in Mexico, in the form of crystal meth. So these small, clandestine meth labs are no longer quite so relevant because almost all of the meth coming into the United States is coming out of Mexico.

This legislation does something that is really critical. It seeks to cripple the super lab meth production by tracking large international shipments of pseudoephedrine. As I mentioned earlier you have to have pseudoephedrine to make methamphetamine.

It requires the five largest exporting countries of pseudoephedrine and the five largest importing countries of pseudoephedrine to report and track shipments of pseudoephedrine and report to the United States. Failure to comply would lead to a reduction in U.S. foreign aid to that country by as much as 50 percent.

We think this is the best regulation we have been able to come up with yet to track the international sale of pseudoephedrine and superlab production.

Additional provisions toughen penalties against meth producers and traffickers, improves and authorizes new funding for the drug courts program, provides help to States to protect drug-endangered children.

In Nebraska in 2005, nearly 6,000 children were living in foster care situations. This is a State with only 1.7 million people. An estimated 50 percent of foster care children in Nebraska, roughly 3,000, are in the foster care system because their parents are meth users or abusers.

An Arkansas study indicates that the average meth addict costs the State and local agencies \$47,500 per year because of crimes, child and spouse abuse, incarcerations, et cetera.

One recent study indicated that a prenatal child exposed to meth can cost as much as \$250,000 in health care just for the first year alone and can cost up to \$1.7 million to get that child to age 18.

It is a hugely important problem and very stressful. I believe this legislation is a critical first step to ridding our communities of this plague, and I urge support of the conference agreement.

I would like to just show one last picture. This is a young woman who was photographed each year from 1979 until her death in January of 1989, and as you see these pictures, you see her steady deterioration and what looks like an aging process of maybe 50 years in a period of 10 years, and it culminated in her death. This is something we have to get rid of.

MESSAGE FROM THE SENATE

A message from the Senate by Ms. Curtis, one of its clerks, announced that the Senate has passed a bill of the following title in which the concurrence of the House is requested:

S. 2320. An act to make available funds included in the Deficit Reduction Act of 2005 for the Low-Income Home Energy Assistance Program for fiscal year 2006, and for other purposes.

The message also announced that the Senate agree to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3199) entitled "An Act to extend and modify authorities needed to combat terrorism, and for other purposes."

NATIONAL INTEGRATED BALLISTIC INFORMATION NETWORK PROGRAM

The SPEAKER pro tempore (Mr. DENT). Under a previous order of the House, the gentlewoman from New York (Mrs. MCCARTHY) is recognized for 5 minutes.

Mrs. MCCARTHY. Mr. Speaker, once again we are threatened budget cuts that affect our local law enforcement agencies' effectiveness. Not only is the COPS program facing cuts and the criminal background check system for firearm purchases underfunded, but now the National Integrated Ballistic Information Network program is also in jeopardy.

The NIBIN is used by forensic experts to analyze the unique marks made on bullets and cartridge cases when guns are fired. The images of these markings can be compared with other images in more than 200 Federal, State, and local law enforcement laboratories. By tracing and comparing these markings, police can track the history of a gun used in a crime. They can determine which crimes are related and make sure the appropriate law enforcement agencies are working together to find the criminals responsible for these crimes.

NIBIN makes law enforcement agencies more efficient by making sure that two agencies are not duplicating their work. In large part, NIBIN has been a success. Last year, the Los Angeles Police Department arrested a man for vandalism and possession of a firearm. The gun was tested and identified as being used in an attempted murder only a month before. If not for ballistics testing, this individual would have gone free and the attempted murder case would still be unsolved.

In my own State of New York, an individual was arrested for unlawful possession of a weapon. The gun was entered into the NIBIN database and was discovered to have been used in an unsolved assault with a deadly weapon incident that occurred in a different jurisdiction. Again, a violent criminal was taken off the streets because of ballistics testing. This is happening on a daily basis.

There are countless other success stories throughout our Nation; but, unfortunately, NIBIN's future is in doubt. Budget cuts are jeopardizing the future of this program. The Bureau of Alcohol, Tobacco and Firearms administers NIBIN and may be forced to cut spending unless Congress acts. Cutting funding of this great program would be a tragedy resulting in more criminals getting away with horrendous acts of violence. ATF needs more, not less, funding for this particular program.

A Department of Justice report last year said the ATF needs to better promote and improve NIBIN. Many law enforcement agencies do not participate in NIBIN simply because they do not have the resources to enter the information into the database. The Justice Department report suggests purchasing equipment for high-crime areas and developing a plan for lower-incidence areas to share ballistics technology.

The report also states it is imperative that we deal with the backlog of ballistic evidence not yet entered into the database. A similar problem exists in the National Instant Background Check system, and I have introduced legislation to give States grants to make sure that data is entered.

We must also fund new ballistic technologies that can provide matches on portions or fragments of bullets found at crime scenes. Mr. Speaker, since 9/11 our law enforcement officers have accepted new responsibilities in the war on terror. But this current budget wants to cut programs that staff local police forces and provides them with bullet-proof vests. Let us work together to make their jobs easier, not more difficult. Let us fully fund the ATF's National Integrated Ballistic Information Network. This will catch repeated offenders before they commit another crime and make sure our law enforcement agencies are on the same page when it comes to investigating crimes that have been related.

A VISIT TO AREAS AFFECTED BY HURRICANE KATRINA

Mr. Speaker, I also want to take a moment or two to talk about the trip that we had with Speaker HASTERT and Leader PELOSI on Thursday, Friday, and Saturday. With grateful thanks to Speaker HASTERT, he took us down to Mississippi, Louisiana and Alabama, mainly to see the disaster areas 6 months later and what is happening in those States.

The American people, I know, tend to forget what is going on; but when you go to these States, they need our help desperately. I have been watching CNN and certainly have followed what is going on down there; but when you see it with your own eyes, it is more than anyone can ever imagine: to see whole trailer trucks just thrown into the wetlands due to force of this hurricane; to see the housing just collapsing on a daily basis; and to see our local government officials trying to make ends meet but without a budget because there are no businesses that provide a

tax base. There are no homes there. And the people certainly have to come back to bring back the communities.

In my opinion, it is up to the Federal Government. I know we are trying, but we have to do a little bit better. It is our moral responsibility to help these people. We never know when a disaster will happen in our own back yard, so I hope the American people do not forget the people of Hurricane Katrina. There is still much work to be done.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DREIER is recognized for 5 minutes.

(Mr. DREIER addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

INTRODUCTION OF H.R. 4808, UNFAIR CHINESE AUTOMOTIVE TARIFF EQUALIZATION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. JONES) is recognized for 5 minutes.

Mr. JONES of North Carolina. Mr. Speaker, on March 1, Mr. KILDEE of Michigan, a Member of Congress, joined me in a bill, H.R. 4808, which would prevent imports of passenger cars from China until the United States and Chinese tariffs on these items are equal.

Mr. Speaker, I think we all know that our trade deficit with China is well over \$200 billion. We all agree that we live in a world where we have to work with each other and trade with each other. The problem is that under the current agreement, these cars that will be coming in from China put us at a disadvantage, our workers and our car companies.

Let me just share with you that if we ship a car from America to be sold in China, the Chinese Government slaps a 28 percent tariff on American-made cars. If those Chinese cars come into America, we charge them a 2.5 percent tariff on their cars. That is not a level playing field.

I think China has enough advantages, quite frankly. They manipulate their currency, violate intellectual property rights, utilize heavy equipment, government subsidies, pay their workers just pennies a day, and they do not have to worry about the labor and environmental standards that Americans must abide by. The tariffs just give China another unfair advantage, an advantage that threatens the job of every worker in the United States auto industry.

I hope that my colleagues on both sides of the aisle will join us in this fairness issue. That is all this is about, fairness, because our workers work hard to produce a quality product. When we send it to China, they, again, put a 28 percent tariff on our cars going to China, while we only put a 2.5 percent tariff on passenger cars coming to America.

Mr. Speaker, there is something else that we fail to realize. With that \$200 billion trade deficit, in *The Wall Street Journal* this week it said: "China defends outlay to increase by 17.4 percent, the most in 4 years." The Chinese are making money off the American people, and they are taking that money and, in many cases, they are putting it into their military.

Now, I am not so concerned about China and America going to war, but I do know this: China is trying to build one of the strongest militaries we have ever seen in this world, and what they want to do is to dominate Southeast Asia.

What Mr. KILDEE and I are asking for is just a simple matter of fairness. If we are going to sell their cars, let us charge them the same tariff they are going to charge us to sell our cars in China. I would hope that my colleagues, both Republican and Democrat, would join us in this effort. This, again, is nothing but an issue of fairness.

In fact, the Economic Policy Institute has said that since 1989 through the year 2003 we have lost 1.5 million jobs to the Chinese. Here, again, on this floor tonight I am announcing H.R. 4808, a bill introduced by a Democrat and Republican, that says that we need to charge the same tariff for American cars going to China as Chinese cars coming to America. We should all pay the same. That is a simple matter of fairness.

So tonight, Mr. Speaker, I shall be speaking on this issue quite a few times, but I will tell you that we need to be aware of what is happening to the jobs that have been going overseas, and particularly those jobs going to China. So I hope tonight that my colleagues will look at the letter that is signed by Mr. KILDEE and myself asking our colleagues in the House to join us on H.R. 4808. All it is is a tariff fairness issue.

I will close by saying this again: American cars that go to China to be sold have to pay a 28 percent tariff, Chinese cars coming to America later on this year will pay only a 2.5 percent tariff. That is not fair to the American workers.

Mr. Speaker, I ask God to please bless our men and women in uniform; to please bless their families; and, God, please continue to bless America.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. GEORGE MILLER) is recognized for 5 minutes.

(Mr. GEORGE MILLER of California addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

IN SEARCH OF A COMPETENT CONSERVATIVE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. EMANUEL) is recognized for 5 minutes.

Mr. EMANUEL. Mr. Speaker, last week, a number of Americans were able to see the President on the videotape on Katrina and see also what has happened down in New Orleans since that time, or the lack of action there. We also witness every day the civil war that is engulfing Iraq and a policy of failure to bring stability to Iraq, the chaos that has engulfed our Medicare prescription drug plan, and also the flare-up over our port security and selling major assets of America's infrastructure to foreign countries.

In 2000, President Bush ran as a compassionate conservative. At this point, I would settle for a competent conservative. From Iraq to Medicare to port security to the deficit to Katrina, this administration has mismanaged the situation to the point where even die-hard supporters are acknowledging their incompetence. And this Congress has been a rubber stamp to the administration's policies and has refused to do its job, which is oversight, on every one of these issues.

On Iraq, we have \$10 billion out of \$480 billion totally missing. Not one hearing about what happened to the \$10 billion. Nobody has asked a single question. Nobody can account for it. We have soldiers over there without KEVLAR vests, where parents are left to literally do bake sales to raise the money for their children so they can have the protection that their government and their taxpayers expect and are responsible for, yet nothing. We have literally members of the armed services running around like scrap metal collectors trying to solder their Humvees, yet nobody has asked a single question as to how that happened; why is that happening?

We have Paul Bremer, the President's ambassador, who now writes a book and says that he had asked for 500,000, or doubling the size of the troop level; yet for 3 years the President of the United States said nobody ever asked for more troops. If they want more troops, we will send more troops. General Abizaid and Paul Bremer, the President's ambassador, have said that he had asked for more troops, and neither the Secretary of Defense nor the President of the United States acknowledged that memo. Yet what do we have? Nobody is holding them accountable. Nobody is holding anyone accountable in the administration.

We have a great deal of incompetence. We are at \$480 billion in Iraq, with 2,300 Americans, our fellow citizens, having lost their lives. Well over 15,000 are wounded, permanently many of them, yet not a single question of what happened here. What is the competency here?

Now, take a look at this on Medicare. It is not just isolated to Iraq. We have now had that policy, and that policy has run its course. We now have a civil war that the American people find themselves in the middle of, between the Sunnis, the Shiites and the Kurds all fighting each other, and nobody has
