

necessary to work effectively in today's global society by making study abroad an integral part of the undergraduate educational experience.

Today, only 1 percent of all enrolled undergraduate students spend time living and studying abroad for academic credit. And only approximately one-third of those students chose to study in locations outside Western Europe, even though an estimated 95 percent of the world's population growth will occur outside that area in the next 50 years. The percentages of minorities among individuals studying abroad are extremely low, and underrepresentative of the numbers of those students in the general student population.

Minnesota ranks third in the Nation for study abroad participation rates. During the 2003–2004 school year, 8073 students enrolled in Minnesotan colleges and universities studied abroad, which is a little less than 3 percent of the overall enrolled undergraduate student population in the State. I would like to see this number grow—study abroad opportunities will help make the next generation of Minnesotans and all Americans more competitive in the global marketplace.

The reality of the global environment commands that far more of our students study abroad, regardless of their field of study, ethnicity, socioeconomic status or gender, and that more of them study in nontraditional destinations. In order for graduates to be effective in the increasingly interconnected global society, they must better understand the broad world, not just a small part of it.

Study abroad should become the norm, not the exception for U.S. college students. It can only be good for our campuses, our communities and our Nation to have more U.S. students understanding more about the rest of the world.
