

SUPPORTING THE PRESIDENT'S PLAN FOR IRAQ

(Ms. FOXX asked and was given permission to address the House for 1 minute to revise and extend her remarks.)

Ms. FOXX. Last night, the President addressed the Nation about the war in Iraq. No one is happy that we are at war, but we must remember that we were attacked by the terrorists; that the war in Iraq is critical to the global war on terror, and we must continue to fight and defend against the terrorists there as much as at home.

We must maintain our efforts to provide security and stability for the Iraqi government and its people until they are able to do so themselves. We cannot walk away or we will face increased bloodshed at home and abroad.

I applaud the President for recognizing the need for a new direction in the Iraq war in order to achieve this and presenting tangible alternatives to the problems we currently face there.

I support making sure that the Iraqis take the lead and act aggressively and swiftly against any violence. Prime Minister Maliki has issued a commitment to meet these challenges, and the President must hold him accountable to this pledge. It is my hope the proposals put forth will lead to success in Iraq.

Our troops deserve unwavering support, and this new direction the President has implemented must show progress. Now is the time to unite as Americans and not as partisan politicians.

I look forward to the day when a free and democratic Iraqi government and its people can defend themselves and be a model for others in the Middle East.

ALICE PAUL

(Mr. BACA asked and was given permission to address the House for 1 minute.)

Mr. BACA. Mr. Speaker, I rise today to honor Alice Paul, a woman who dedicated her life to equality, to give her a Congressional Gold Medal.

Alice Paul was a remarkable person who made America more democratic by fighting for equal rights and creating opportunities for women to participate in politics. Thanks to Alice Paul, NANCY PELOSI was able to become Speaker of the United States House of Representatives. Even after her death, her influence continues to be significant on our society and culture.

Yesterday marked the day that on January 10, 1918, the House of Representatives first voted to give women the right to vote by approving the 19th amendment to the U.S. Constitution. Alice Paul spearheaded the effort to pass the 19th amendment, granting all American women the right to vote.

Because of Alice Paul's legacy, my daughters, Natalie and Jennifer, have the right to participate in the electoral process. My grandchildren and their children will forever have this right.

Alice Paul's contribution to America cannot be understated. Without her, women may not enjoy many of the rights they have today.

Please cosponsor this important legislation.

SOCIAL SECURITY FOR ILLEGALS?

(Mr. POE asked and was given permission to address the House for 1 minute.)

Mr. POE. Mr. Speaker, in the darkness of back rooms and the whisper of secret phone calls, American citizens may have been betrayed. Has our government become the Judas?

For the past 2 years, our Federal Government has secretly negotiated and cooperated with the Mexican government to provide illegals a reward for breaking American law. Not only will illegal entry be forgiven by amnesty but, get this, illegals will be able to apply for and collect American Social Security. The cost of such betrayal is millions of dollars. Hardworking citizens are going to be robbed of Social Security money that they are entitled to. Now many Americans and legal immigrants may not receive Social Security benefits because they will be going to illegals.

Mr. Speaker, illegals are not citizens of this country, and they should not be taking the benefits entitled to law-abiding American citizens and legal immigrants. It is morally wrong to expect Americans to pay money to people that are not even supposed to be on our soil. Illegals should not receive Social Security benefits. The welfare of America is being sold for 30 pieces of silver.

And that's just the way it is.

ESCALATION OF FAILURE

(Mr. DOGGETT asked and was given permission to address the House for 1 minute.)

Mr. DOGGETT. President Bush has been wrong at every step along the descent into chaos in Iraq, and he is wrong once again. The terrible price for his repeated miscalculations is paid for by the blood of the brave, by hundreds of billions of dollars squandered and by greater insecurity for our families. He has no new plan, just an old delusion. This isn't a surge. It is a costly, long-term escalation that only endangers more young Americans.

Apparently the only troops he will bring home are the many generals who disagree with him. He has rejected the advice of the Iraq Study Group. He has rejected military counsel. He has rejected the voices of the people and their elected representatives. And we must firmly reject his escalation of what can only be called a spend-and-bleed policy.

STEM CELL BILL

(Mr. PITTS asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, today the House will consider H.R. 3, an expansion of taxpayer funding for embryonic stem cell research. And while today's debate is sure to be full of rhetoric about the promise of future cures, let's be clear from the outset about what is working and what is not. Embryonic stem cell research, that is, research that requires the destruction of a living human embryo, is yet to produce a single cure or treatment in humans. Not one. What many say is a false hope.

The good news is that there is an alternative that is not only successfully treating human patients but doesn't require killing little human embryos. In fact, what many consider ethical, adult stem cell research has now provided dozens of laboratory successes, successful treatments of human patients and even a handful of FDA-approved therapies.

Mr. Speaker, tax dollars are not unlimited. They should be directed towards methods that are proven to work and ethical research. H.R. 3 fails to do this.

IN SUPPORT OF EMBRYONIC STEM CELL RESEARCH

(Mrs. CHRISTENSEN asked and was given permission to address the House for 1 minute.)

Mrs. CHRISTENSEN. Mr. Speaker, I rise today, as a physician, a mother and a representative of many who would benefit from H.R. 3, in strong support of H.R. 3 which would expand Federal funding for embryonic stem cell research, increase stem cell lines and impose strict ethical guidelines. These stem cells would otherwise be destroyed. So this is not a faith issue, a theological conundrum or a partisan issue. It is a public health issue and one of maintaining this country's leadership in the world.

This bill is important to minorities and the Congressional Black Caucus because embryonic stem cell research will help reduce and even eliminate the health care disparities that now leave African Americans and other people of color more likely to be disabled or die from the diseases it can cure.

As a physician I have treated individuals with some of these diseases—Parkinson's, sickle cell, ALS and others—and despite using all we had available too often stood helplessly with their families as the conditions took their toll. Today we can change that and we must.

As a mother and a grandmother of three, I ask my colleagues to support H.R. 3 and create a healthier and better country for all of us.

essary to rein in al Qaeda and the Taliban.

VOTE "NO" ON MEDICARE PRESCRIPTION DRUG PRICE NEGOTIATION ACT

(Mrs. BLACKBURN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BLACKBURN. Mr. Speaker, I rise today in opposition to H.R. 4, the Big Government Prescription Drug Price Negotiation Act. This bill is politically driven, and it will result in a one-size-fits-all program that gives us higher drug prices, less consumer choice, and will certainly not uphold some of the access that has been made available through Medicare part D. And we know that seniors want choice. We hear that from them. They want to preserve the doctor-patient relationship, and they want access to prescriptions in their local communities.

What H.R. 4 does is to open the door for Big Government to decide what medicines patients receive instead of their doctors.

Unfortunately, the Democrats are rushing the bill to the floor to undo the hard work of Medicare part D. We know from survey after survey that over three-fourths of seniors are satisfied with this program.

There have been no discussions, no hearings, no analysis on how this proposal will impact the access of seniors. I urge my colleagues to vote "no."

AUTHORIZING EMBRYONIC STEM
CELL RESEARCH

(Mrs. CAPPS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. CAPPS. Mr. Speaker, today we will fulfill an important promise to the American people by authorizing ethical embryonic stem cell research.

Millions of people across our Nation and around the world will be paying close attention as we affirm our commitment to finding cures for diseases that have touched all of us: Alzheimer's, Parkinson's, diabetes, cancer, heart disease, multiple sclerosis, spinal cord injury, and many more.

I have been truly touched by letters of hope from constituents and from organizations representing those suffering from illnesses that may eventually be cured through stem cell research.

And our Nation's leading scientists are eagerly awaiting the opportunity to make the United States the world leader in this groundbreaking research.

As Members of Congress, we are blessed with the opportunity to take such an important vote that will pave the way to saving lives. I urge all of my colleagues to vote in favor of H.R. 3 today and be part of this monumental effort.

(Mrs. CAPITO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. CAPITO. Mr. Speaker, I have the honor of representing one of the largest congressional districts east of the Mississippi, the West Virginia Second District.

Some of the best-kept secrets in West Virginia, and certainly my district, are the wonderful small towns and the sense of community they provide. Treasures like these are worth celebrating every single day.

Last Sunday, the city of Ripley in Jackson County, West Virginia, celebrated its 175th anniversary, and I had the privilege of attending the celebration with the mayor and many fine citizens of Ripley.

I thought it was very fitting to read the city's motto, "Ripley: Proud of our past—Excited about our future."

Much has changed in America since 1832 when Ripley was founded, but the fact is that Ripley remains one of the best small towns in the country.

In fact, when the President was looking for a place to celebrate our Nation's birthday in 2002, he looked no further than Ripley, West Virginia. It was a great decision. Every year, Ripley has the largest Independence Day celebration of any small town in America. We welcomed the President, and he enjoyed his West Virginia visit.

Let us all remember that small towns are truly the heart and soul of America, just as they were in 1832 at Ripley's founding. I am honored to represent them here in Washington.

FAILURES IN IRAQ

(Mr. MCNERNEY asked and was given permission to address the House for 1 minute.)

Mr. MCNERNEY. Mr. Speaker, last night President Bush accepted responsibility for the failures in Iraq. Yet he offered no real strategy for winning the war in Iraq or the broader struggle with terrorism.

Many military and foreign policy experts, including the Joint Chiefs of Staff, have acknowledged that the President's proposal to increase troop strength is not a solution to the ongoing instability in Iraq.

I believe that an influx of troops will actually worsen the situation on the ground. Not only that, but redeploying 20,000 additional troops in Iraq will stretch our already fully deployed Armed Forces even further.

I am particularly concerned that deploying additional troops will significantly hinder our ability to effectively combat the global terrorist threat. In fact, the very consideration of redeploying troops in Iraq means that we are distracted from the wider war on terrorism, especially in Afghanistan where additional forces may be nec-

DEMOCRATS NEED TO LAY OUT
IRAQ PLAN

(Mr. KINGSTON asked and was given permission to address the House for 1 minute.)

Mr. KINGSTON. Mr. Speaker, you know, it is time for the Democrat Party to lay out its plan for Iraq. I understand the echo chamber of liberalism is going to be teeing off on the President all week long. I understand that, because that is what has been going on for 6 months and, indeed, in some circles for a year.

There are 65 Members, in fact, of the Get Out of Iraq Now Caucus, and I actually have a lot of respect for them because they have a vision, they have a plan. The plan is: get out of Iraq.

Now there is no answer to the question: What happens then? What happens then when you have an American defeat internationally in the Middle East, when you turn over the third largest oil producing nation in the world to a terrorist state? What happens to the people over there who are pro-America or pro-democracy? They don't answer that question, and I understand that.

But for the other Democrats who are so enthusiastically piling on the President right now, and certainly I want to say as a Republican it has not been going well and we do need a new change in direction, but I would say to the majority party, put your plan on the table.

PASS EMBRYONIC STEM CELL
RESEARCH

(Mr. UDALL of New Mexico asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. UDALL of New Mexico. Mr. Speaker, my uncle, Mo Udall, served here in the House of Representatives for 30 years. For the last 10 years, he served with Parkinson's disease, and every day his friends and colleagues saw this crippling disease take a little piece of him. Millions of families are facing the same kind of disabling diseases: Parkinson's, Alzheimer's, lupus and many more.

The bill we will consider today on the House floor gives these millions of American families hope. There is great promise in stem cell research. This bipartisan bill would increase the number of embryonic stem cell lines eligible for Federal research.

I hope that the President will reconsider his ill advised veto and give American families hope.

MIDDLE EAST DISASTER

(Mr. GEORGE MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)
