

This bill is the necessary implementing legislation for Annex VI of that Convention. This legislation will provide the Coast Guard and the Environmental Protection Agency the authority that they need to develop U.S. standards and enforce these requirements on the thousands of U.S.- and foreign-flag vessels that enter the United States each year from overseas.

Everyone here recognizes the challenge that the world faces in combating global climate change. We must pursue all avenues in the effort to turn around the rising temperatures on this planet. I am pleased that the International Maritime Organization stepped up to the plate and developed amendments to the International Convention for the Prevention of Pollution from Ships to regulate air pollution from ships.

Last year, the Committee on Transportation and Infrastructure favorably reported H.R. 5811, the MARPOL Annex VI Implementation Act of 2006. This bill was subsequently added as an amendment to H.R. 5681, the Coast Guard Authorization Act of 2006, and passed the House on October 28, 2006.

The bill that Mr. CUMMINGS and I introduce today is very similar to H.R. 5811. Pursuant to requests by the Administration, the bill allows the Environmental Protection Agency ("EPA") and the Coast Guard to enforce the standards. The Coast Guard acknowledges that the EPA has far more experience than it does on air quality emission standards. However, it is important for the EPA to develop the standards jointly with Coast Guard because of the Coast Guard's expertise regarding vessel safety issues.

I am hopeful that the Committee on Transportation and Infrastructure will report this bill to the House very quickly and that the House will have an opportunity to consider the bill in the coming weeks.

I would like to take the opportunity to thank our new Chairman of the Subcommittee on Coast Guard and Maritime Transportation, Mr. CUMMINGS, for his contributions in developing this bill.

I urge my colleagues to join us in supporting the Maritime Pollution Prevention Act of 2007.

#### PERSONAL EXPLANATION

### HON. NEIL ABERCROMBIE

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

*Monday, February 5, 2007*

Mr. ABERCROMBIE. Madam Speaker, I regret that I was unavoidably detained on Wednesday, January 24, 2007, and missed rollcall no. 56. Had I been present, I would have voted "aye."

#### DEPARTMENT OF HOMELAND SECURITY PROCUREMENT REFORM ACT OF 2007

### HON. CHRISTOPHER P. CARNEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, February 5, 2007*

Mr. CARNEY. Madam Speaker, the Department of Homeland Security purchases \$10 billion worth of goods and services per year. Un-

fortunately, the Department's procurement process is rife with problems that need to be addressed. Whether buying ice to aid disaster victims or cameras and sensors to secure our borders, the Department has struggled. The bill I am introducing today is a first step toward addressing some of the Department's most pressing needs in this area. It is an outgrowth of the excellent bi-partisan work spearheaded during the last Congress by then-Chairman MIKE ROGERS of Alabama and then-Ranking Member KENDRICK MEEK in the Subcommittee on Management, Integration, and Oversight of the Committee on Homeland Security.

Specifically, this bill requires regular procurement training for the Department's acquisition employees and the development of courses for both new and experienced employees. To assist the Chief Procurement Officer in developing policies and curriculum for the training, it establishes a "Council on Procurement Training" made up of eight component-level chief procurement officers in the Department. In order to ensure that training occurs as required, the Chief Procurement Officer is required annually to submit a report on training activities to the Secretary.

Selection of able and responsible contractors is, of course, crucial to any procurement success. To that end, this bill puts new requirements on the Department to review the past performance of all offerors seeking contracts. And to ensure that all contractors are on an equal playing field, it requires offerors to provide information concerning any role the offeror or its employees played in developing a contract solicitation or similar document. Further, if an offeror is delinquent or in default on any payment of tax, the bill requires offerors to disclose this information.

The bill also directly addresses one area that requires particular attention, the use of purchase cards. A Government Accountability Office (GAO) review released this past July revealed a disturbing lack of guidance and controls over their use. It highlighted potential incidents of fraud, waste, and abuse that could run into the millions of dollars. To address this problem, the bill directs the Department to develop and quickly disseminate Department-wide guidance concerning the use of such cards. Finally, the bill directs the GAO to issue a report on the contracting processes of the Department within six months of enactment.

This bill will not solve all of the problems of the Department's procurement operations. It will, however, start the process of reform that is badly needed.

#### MEASURE Y: IRAQ WAR ADVISORY

### HON. MIKE THOMPSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, February 5, 2007*

Mr. THOMPSON of California. Madam Speaker, I rise today in agreement with the wishes of 19,290 voters in Mendocino County, California concerning the United States military engagement in Iraq.

On November 8, 2006, Measure Y: Iraq War Advisory was on the ballot in Mendocino County. The measure asked the following: Should the United States end the military occupation of Iraq and bring the troops home now? It passed by 67.17 percent of the vote.

Madam Speaker, the voters who approved Measure Y know what has been evident for some time—we need to begin redeployment of the United States military forces out of Iraq. As of today, 3,056 brave American servicemen and women have been killed in Iraq and over 23,000 have been wounded. We must redeploy our troops as quickly and safely as possible while putting an emphasis on diplomacy and shifting security responsibilities to the Iraqi people.

The President has already spent close to half a trillion dollars on war spending and he has called for more troops and more money, but the results of our efforts have been to endanger American lives, and worsen living conditions for Iraqis. It is time to bring our troops home. The will of the American people is indisputable. They want a swift end to the U.S. involvement in Iraq.

Madam Speaker, in accordance with the wish of my constituents, I submit this advisory into the CONGRESSIONAL RECORD.

#### SUPPORT FOR THE EDUCATE ACT

### HON. DARLENE HOOLEY

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

*Monday, February 5, 2007*

Ms. HOOLEY. Madam Speaker, I rise today to urge my colleagues to support the EDUCATE Act that Congressman VAN HOLLEN introduced today on behalf of myself and Congressman MIKE FERGUSON. I believe that this bill is one of the most important pieces of legislation that will be introduced in this chamber this year because it speaks to the Federal Government keeping a promise to children.

When Congress passed the Individuals with Disabilities Education Act of 1975, we made a commitment to our country's special education students. By providing only half of the promised funding in recent years, the Federal Government has passed on another unfunded mandate to States and local school districts and failed to honor our promise that students with special education needs deserve the best education possible.

Despite the fact that current law requires the Federal Government to match State IDEA costs at 40 percent, the President's budget in recent years has included funding for less than half of the Federal Government's IDEA obligation. Budgeting shortfalls at the federal level and the rising cost of special education have forced local school districts to assume a larger percentage of the funding burden. As a result, they have had to seek out alternative funding sources such as higher taxes or diverting monies from other educational initiatives in order to comply with IDEA requirements.

Now I know that many of my colleagues have been angered with the funding that IDEA has received in the past few years, and a few of them have introduced their own legislation to correct this funding shortfall. But I believe that the EDUCATE Act is the most fiscally responsible funding solution that has been offered. In the current fiscal climate and with the PAYGO requirements that have been put in place, this legislation offers the most responsible means of achieving our goals. It will do no good if we succeed in providing these children with a quality education and then leave them a country in financial ruin.

I am proud to have been involved in the crafting of this legislation and I hope that my colleagues will support it.

TRIBUTE TO ISRAEL "IZZIE"  
BARLAS

**HON. LYNN C. WOOLSEY**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, February 5, 2007*

Ms. WOOLSEY. Madam Speaker, I rise today to honor Israel "Izzie" Barlas who passed away on January 23, 2007. Izzie led a long and full life, married for 59 years to Helene, raising his son Lance, and cherishing his two grandsons.

The youngest of six children born to Russian immigrants Max and Esther Barlas, Izzie was raised in Petaluma, California and attended Santa Rosa Junior College. He was a world traveler, but always came home to Petaluma the "best place to live, work and raise a family".

Izzie and his two brothers co-owned Barlas Feeds, founded by their father. The feed and livestock store began by supplying to local farmers, but the business grew to include shipments as far away as the South Pacific. Those business interests developed from Izzie's tour of duty as a U.S. Marine stationed in the South Pacific during World War II.

The years spent with the Marine Corp held a sense of pride for Izzie. He took part in four major battles: Guam, Bougainville, Guadalcanal, and Iwo Jima. He was present at the flag raising on Iwo Jima, a defining moment of the Pacific battles, captured on film and made into a Marine Corps War Memorial in Washington, DC.

Izzie became active in politics in the 1950s when the state legislature considered a bill requiring all chickens be sold with the head and feet off and eviscerated. The Jewish farmers in Petaluma, many of whom were customers of Barlas Feeds, were selling their chickens "New York dressed" (with the head and feet on and not eviscerated). To oppose the bill, Izzie drove carloads of farmers to meet with committee members. Each member was given a roaster and asked to cook and eat it before deciding it was not healthy. An amendment passed to allow "New York Dressed" chickens. Thus began his career as a poultry industry lobbyist.

Not satisfied with only meeting with elected officials, Izzie decided to make change from within. He ran and was successfully elected to the local Democratic Central Committee, founded the Petaluma Democratic Club, and became a delegate to the California Democratic Council. In 2004, the Sonoma County Democratic Central Committee honored him as the Democrat of the Year. He also became active with the Congress of Democratic Farmers, which led to his relationship with President John Kennedy and an appointment to the National Agricultural Advisory Committee. He fondly recalled visits to the White House pressroom denying reporters his identity, leaving them wondering who he was and his importance.

Madam Speaker, it is with sadness that I honor Israel "Izzie" Barlas, who fought and worked for his country. He touched many lives in his 84 years as a role model and inspiration as a mover and shaker.

INTRODUCING A RESOLUTION HONORING THE ARCHITECTURAL PROFESSION

**HON. EARL BLUMENAUER**

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

*Monday, February 5, 2007*

Mr. BLUMENAUER. Madam Speaker, today I am introducing a resolution which recognizes the contributions of the architectural profession during National Architecture Week. The architectural profession has made unique contributions to the history, texture, and quality of life in the United States. Through advances in building technology and design innovation, architects are vital to the creation of communities which are safe, livable and sustainable.

This year is the 150th Anniversary of the founding of the American Institute of Architects, which signifies the founding of the organized architectural profession. This bill will honor and celebrate the work of the approximately 281,000 individuals in the United States who create the structures we cherish and towns we treasure. The bill additionally requests that the President issue a proclamation calling upon the people of the United States to recognize and celebrate National Architecture Week beginning April 8th.

THE PREVENTION FIRST ACT

**HON. LOUISE McINTOSH SLAUGHTER**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Monday, February 5, 2007*

Ms. SLAUGHTER. Madam Speaker, today, I am again proud to introduce the Prevention First Act. By emphasizing prevention first, my bill will help protect women's reproductive health, reduce unintended pregnancies, decrease the spread of STDs, and give women the tools they need to make the best decisions possible for themselves. The Prevention First Act will help to achieve these goals by providing comprehensive access to all forms of contraception and sex education.

Throughout the years, conservative leaders have sought to limit women's rights and freedoms by imposing stricter penalties on doctors who help women faced with an unintended pregnancy. At the same time, these leaders have done very little to ensure that millions of unintended pregnancies and sexually transmitted diseases (STDs) are prevented in the first place. If they are opposed to abortion, if they support women's health, and if they believe that the right to choose when to start a family should apply to all women, no matter their economic or social situation, then they should be in favor of this bill.

It has been more than 40 years since the Supreme Court said women had the right to access contraception. This decision was revolutionary, for the first time allowing women to choose when to become pregnant and how many children to have. Access to contraception greatly enhanced women's equality in American Society.

It also helps to ameliorate economic disparities among women. The social and economic realities surrounding contraception could not be starker. Many poor and low-income women cannot afford to purchase contraceptive serv-

ices and supplies on their own. About 1 in 5 women of reproductive age were uninsured in 2003, and that proportion has increased by 10% since 2001. Half of all women who are sexually active, but do not want to get pregnant, need publicly funded services to help them access public health programs like Medicaid and Title X, the national family planning program. These programs provide high-quality family planning services and other preventive health care, such as pap smears, to underinsured or uninsured individuals who may otherwise lack access to health care and alternative options for birth control. What's more, each year, publicly funded family planning services help women to prevent an estimated one million unplanned pregnancies and 630,000 abortions. Despite the obvious benefits they bring, these programs are currently struggling to meet the growing demand for subsidized family planning services without corresponding increases in funding. The Prevention First Act authorizes funding for Title X clinics and strengthens states' coverage of Medicaid family planning services.

Contraception is, of course, more than a means of fighting economic inequalities. It also provides a way to save scarce public health dollars. For every \$1 spent on providing family planning services, an estimated \$3.80 is saved in Medicaid expenditures for pregnancy-related and newborn care.

And what's more, improved access to emergency contraception (EC) has been proven to significantly reduce the staggering rates of unintended pregnancy and, as a result, abortion. EC prevents pregnancy after unprotected sex or a contraceptive failure. The Alan Guttmacher Institute estimates that increased use of EC accounted for up to 43 percent of the total decline in abortion rates between 1994 and 2000. In addition, EC is often the only contraceptive option for the 300,000 women who are reported to be raped each year. Unfortunately, even with the recent FDA decision to allow EC to be sold over-the-counter to women 18 years of age and over, many women do not know about EC and many still face insurmountable barriers in accessing this important product. The Prevention First Act mandates that the Secretary of Health and Human Services implement an education campaign about EC and requires that hospitals receiving federal funds provide victims of sexual assault with information and access to EC.

Despite the fact that contraceptives have a proven track record of enhancing the health of women and children, preventing unintended pregnancy, and reducing the need for abortion, far too many insurance policies do not cover them. While most employment-related insurance policies in the United States cover prescription drugs in general, many do not include equitable coverage for prescription contraceptive drugs and devices. Although 21 states now have laws in place requiring insurers to provide contraceptive coverage if they cover other prescription drugs, 29 states still have no corresponding law on the books. Out of pocket expenses for contraception can be costly. Women of reproductive age currently spend 68 percent more in out-of-pocket health care costs than men, much of which is due to reproductive health-related supplies and services.
