

Sunday and thereby coincided with the Passover festival, council further decided that Easter would be commemorated on the following Sunday. The council also declared that the calendar date of Easter would be calculated at Alexandria, in Egypt, which was the leading astronomical center of the fourth century world.

This attempt to reconcile Easter celebrations proved difficult, however, as fourth century astronomy lacked the knowledge to resolve a discrepancy between the solar and lunar years. As a result, the differences between the true astronomical year and the Julian calendar then in use continued to grow. By 387 A.D., churches in France and Egypt were celebrating Easter on dates 35 days apart. In 465 A.D., the church adopted a reformed calendar that fixed the date of Easter, but churches in what is now the United Kingdom refused to adopt the changes.

In 1582, Pope Gregory XIII reformed the Julian calendar yet again, resulting in the calendar in use in much of the West today—the Gregorian calendar. This new calendar corrected many of the difficulties in fixing the date of Easter and other important ecclesiastical dates. When Great Britain and Ireland adopted the Gregorian calendar in 1752, Easter was celebrated on the same day in the Western part of the Christian world. However, the Eastern churches did not adopt the Gregorian calendar, and celebrate Easter on different dates. Occasionally, the two churches' calculations coincide, and Easter is celebrated on the same date throughout the world. The last time that happened was in 1963.

All of these details are fascinating, at least to a longtime fan of the study of history. I find it thought-provoking to consider how the study of astronomy and the development of calendars has affected our daily lives today, as they have the daily life of so many who have come before us. But does it matter, Mr. President, when we celebrate Easter? In the long run, I think, the celebration of that momentous moment in history is far more important than precision on the day of the week. Few events in history have had a more profound impact on our lives. You do not have to be a Christian or an adherent of any particular church or faith, to recognize the impact of Christ's life upon world history, regardless of which day of the week or week of the year it took place.

Christ's message, brought home by His sacrifice at Easter time and His subsequent resurrection, changed the lives of billions of people over the years. In Matthew 28:5-6, we are told, "The angel said to the women, 'Do not be afraid, for I know that you are looking for Jesus, who was crucified. He is not here; He has risen, just as He said.'" That much change is bound to have an effect on everyone else.

The rise of a new religion and the power and passion of its churches has changed empires, international bound-

aries, customs, and lifestyles. The Christian religion has grown and spread across the globe, sweeping old religions away.

On this Sunday, Christians observe Palm Sunday, recalling Christ's triumphant entry into Jerusalem with crosses made of palm leaves like those that were laid across Christ's path to welcome Him. Next Friday, Christians will commemorate Christ's sacrifice on Good Friday, when He took up His crown of thorns and carried His own cross on that long, sad, walk to be crucified. Then on April 8, church bells will ring, and sunrise services will celebrate His resurrection from the dead and His ascension into heaven with the rising sun. It is a deeply moving and uplifting period, Mr. President, and it does not matter when it happens—only that it did happen. Beautiful, blessed Easter, giving hope to us all.

Mr. President, I wish you and yours all the blessings of Easter, with all of its promise of everlasting life spent in the love of the Lord. I close with a poem by Louise Lewin Matthews, called "Easter Morn."

EASTER MORN

(By Louise Lewin Matthews)

Easter morn with lilies fair
Fills the church with perfumes rare,
As their clouds of incense rise,
Sweetest offerings to the skies.
Stately lilies pure and white
Flooding darkness with their light,
Bloom and sorrow drifts away,
On this holy hallow'd day.
Easter lilies bending low
In the golden afterglow,
Bear a message from the sod
To the heavenly towers of God.

TRIBUTE TO MICHAEL A. PARKER

Mr. McCONNELL. Mr. President, I rise today to pay tribute to a dedicated public servant and a true friend to the people of Kentucky, Mr. Michael A. Parker. After years of exemplary work as the program manager for the Assembled Chemical Weapons Alternatives Program at the Department of Defense, Mr. Parker is retiring, and I want to express to him my thanks for his service.

Mr. Parker has held the post of program manager since December 1996. In that role, he consistently worked hard toward the goal of safely and expeditiously disposing of the dangerous chemical agents stored at the Blue Grass Army Depot in Madison County, KY. The people of Madison County are living right next door to over 500 tons of the deadliest material ever conceived by man. Understandably, they would like to see these weapons disposed of as safely and quickly as possible. Mike has been a key player in working toward that goal.

Mike appreciates the unique culture at the Assembled Chemical Weapons Alternatives Program and understands the need to work closely with the local community to reach acceptable solutions. The people of the Madison County area are going to miss Mike, as will I.

Proof of Mike's drive for excellence in his work lies in his numerous honors and awards. He holds the Presidential Rank Award at both the Distinguished and Meritorious levels. He also holds the Defense Department Distinguished Civilian Service Award, the Army Decoration for Exceptional Civilian Service, the Army Research and Development Achievement Award, the Army Commander's Medal, and the Army Meritorious Civilian Service Award.

Mr. President, Kentucky has been lucky to have such a friend in Michael A. Parker, and I speak for many in the Commonwealth when I say he will be missed. I ask my fellow Senators to join me in thanking Mike for his years of dedication and service and in wishing him good luck in his future endeavors.

VOTE EXPLANATION

Mr. SPECTER. Mr. President, I voted against the supplemental appropriations bill because of the provision which specifies a withdrawal date. With President Bush's statement that he will veto the bill, it will be returned to Congress so that we can negotiate with the White House to provide funding to support the troops without a withdrawal date which allows our enemies to wait us out.

I voted against the supplemental appropriations bill for the same reasons that I voted in favor of Senator COCHRAN's amendment to strike a withdrawal date, which amendment failed. The full statement of my reasons appear in the CONGRESSIONAL RECORD in the proceedings on March 28, 2007, in relation to the Cochran amendment.

IRAQI TRANSLATOR LEGISLATION

Mr. KENNEDY. Mr. President, I strongly support legislation that would increase the number of visas available for Iraqi and Afghan translators.

America has a strong obligation to keep faith with the Iraqis and Afghans who have worked so bravely with us—and have often paid a terrible price for it. Translators have been the eyes and ears of our military, and they have saved American lives. They now have a target on their backs because of their service to our country, and we need to protect them by granting them safe refuge in the United States.

Under the current program, only 50 translators a year from Iraq and Afghanistan are eligible for admission to the United States. So far this year, we have already admitted 50, and 450 more are waiting for admission under the program. At the current rate, that is a 9-year backlog.

These men and women are in mortal danger every day and they should be permitted to come to the United States without delay. They have been recommended by the American military. The Department of Homeland Security agreed that they are eligible for admission to the United States. To ensure
