The Senate met at 8:30 a.m. and was called to order by the Honorable Benjamin L. Cardin, a Senator from the State of Maryland.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Mr. REID. Mr. President, this morning there will be 60 minutes available to the Members to discuss the issues on which there will be cloture votes on the two motions to proceed. Time is equally divided and controlled between the two leaders or their designees. At approximately 9:30 a.m., the Senate will vote on the motion to invoke cloture on the motion to proceed to S. 3, the prescription drug bill. If cloture is not invoked on that motion, there will be 2 minutes of debate controlled equally by Senators Leahy and Specter, after which time the Senate will proceed to a cloture vote on the motion to proceed to S. 378, the court security bill. If cloture is invoked on that motion, then I hope the managers can work together for expeditious consideration of this measure. Later I will have more to say about the schedule for the remainder of the week.

STYMIEING LEGISLATION

Mr. REID. Mr. President, on the first cloture vote dealing with prescription drugs, I think probably I have said enough to indicate my displeasure and disappointment with what has happened this week, for our inability to proceed on something that is so basic to the security of this Nation, the Intelligence authorization bill, which deals with our espionage efforts, our ability to collect intelligence from around the world. That was stopped on a strict party-line vote because the Vice President didn't want that. So that is enough said on that.

On the prescription drug issue, when all else fails I think we should look at common sense. What we are asking is that Medicare be able to negotiate for lower prices in the purchase of drugs for senior citizens. This is opposed by the pharmaceutical industry, the insurance industry, and HMOs because they have a sweetheart deal. They can negotiate for lower prices but Medicare can't.

You can throw around all the statistics you want, it is not going to lower prices. I call upon our common sense. Doesn't it make sense that Medicare should be able to compete with these HMOs and negotiate for lower prices in the purchase of drugs? Of course. That is why AARP and dozens of other organizations that care about seniors, not about profits, are on the side of moving forward on this legislation. I hope there will be Senators on the other side of the aisle who will step up and allow us to move forward on this legislation.

Finally, it is hard to comprehend, but in addition to not being able to move forward on the issues relating to intelligence, and probably on prescription drug negotiations, we have been
