#### EARMARK DECLARATION

### HON. STEVAN PEARCE

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 25, 2008*

Mr. PEARCE. Madam Speaker, Pursuant to the Republican Leadership standards on earmarks, I am submitting the following information for publication in the CONGRESSIONAL RECORD regarding earmarks I received as part of H.R. 2638, The Consolidated Security, Disaster Assistance, and Continuing Appropriations Act, 2009 of which:

\$7,000,000 shall be appropriated to New Mexico Tech for the Magdalena Ridge Observatory (MRO) under the RDTE, Navy Account.

Contact: Office of Naval Research 875 North Randolph Street, Suite 1425, Code 03T, Arlington, VA 22203-1995.

MRO requires specialized capabilities to develop and support advanced instrumentation and telescopes for use in astronomical and Department of Defense missions. The use of smart instrumentation provides a means of reducing costs, maintaining expertise, and providing long term operational assurance and education benefits. Recent events have highlighted the need to image objects in various locations. A single stand-alone telescope is essential to locating targets of interest but a multi-telescope interferometer is needed to form model independent images.

\$5,000,000 shall be appropriated to New Mexico State University for UAV Systems Operations Validation Program.

Contact: Office of the Secretary of Defense CTEIP Program Manager.

Building upon the strong capabilities and broad expertise developed under the USOVP, this project will focus and address requirements for small to mid size UAS—a critical need identified by the DoD. Currently, USOVP provides DoD an environment in which to evaluate operations and performance of UAV platforms and systems in civil airspace. USOVP is headquartered at the Las Cruces International Airport with partners in AK and HI. USOVP demonstrations of UAV flights in civil airspace, both long distance and regional, are used to advance the integration of UAS in the NAS.

\$4,000,000 shall be appropriated to General Atomics for the Holloman High Speed Test Track.

Contact: US Air Force/USAF 846th Test Squadron, Holloman AFB, Holloman High

Speed Test Track 1521 Test Track Rd., Holloman AFB, NM 88330.

This effort continues the development and construction of the prototype magnetic levitation test track to support high speed test operations at Holloman AFB, NM. This project will continue to deliver to the Air Force and US Government test community the capability of conducting high speed (up to mach 9) testing of critical missile, propulsion, and sensor subsystems in a vibration-free environment while reducing the need to conduct expensive and time-consuming flight tests.

#### MEMORIAL TRIBUTE IN RECOGNITION OF THE 25TH ANNIVERSARY OF THE BEIRUT BOMBING

### HON. KIRSTEN E. GILLIBRAND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 25, 2008*

Mrs. GILLIBRAND. Madam Speaker, it is with a heavy heart that I rise today to recognize the sacrifices of the servicemembers who lost their lives on October 23, 1983, when terrorists bombed the barracks housing American and French troops in Beirut, Lebanon. On that day, 241 American servicemen lost their lives: 220 Marines, 18 Navy personnel and 3 Army soldiers.

I would like to pay special tribute to two servicemembers from my district—Corporal James J. Jackowski of Salem, and Corporal Ronald L. Shallo of Hudson. Their ultimate sacrifice is a debt that can never be recovered or repaid—only honored.

While our great nation suffered from that attack, the families of fallen servicemembers continue to feel the pain from that day. A candlelight vigil honoring those who fell in Beirut that day will be held October 23, 2008 near Camp Lejeune in Jacksonville, NC. My thoughts and prayers are and will be with those family members on this 25th anniversary of that dreadful day.

Madam Speaker, I join my colleagues today in expressing my deepest sympathy to the family members of all of the fallen servicemembers from the Beirut bombing and wish them solace in their time of healing.
