

Address of Requesting Entity: 1700 Pacific Highway, San Diego, CA 92101

Description of Request: I received an earmark of \$476,000 to implement a management system to allow the County of San Diego to track medications, vaccines, supplies, equipment and people used during a health emergency response. The County is vulnerable and at high risk for such incidents due to its status as a border community and military town. The Emergency Preparedness and Public Health Management System (EPPHMS) will provide real-time visibility in the day-to-day and emergency management of pharmaceuticals, vaccines, consumable and capital assets, materiel and human resources, program management and patient tracking. Many County and local programs and agencies will use this management system concurrently for daily and emergency management in single-site, multi-site or mobile facilities, while integrating with the County's main Emergency Operations Center. This HIPAA- and PHIN-compliant system will mitigate a gap in County readiness and infrastructure, as identified by the Center for Disease Control and Prevention in 2007.

Legal Name of Requesting Entity: City of Carlsbad, California

Address of Requesting Entity: 1200 Carlsbad Village Drive, Carlsbad, California 92008

Description of Request: I received an earmark of \$237,500 to proceed with the design work to construct a replacement for the Encinas Creek Bridge. This is a critical section of the historic route Coast Highway 101 and it is the regional road alternative to Interstate 5. CALTRANS has indicated in two major reviews that this bridge must be replaced as soon as possible to meet seismic standards and repair the failing support structure. Bridge lanes have already been rerouted temporarily for public safety. This stretch of Coast Highway provides direct access to public beach parking, pedestrian access, coastal bicycle trails, state campgrounds, and several tourist serving commercial facilities. Public funding to support this very heavily utilized public road is vital to ensure traffic flow, safety, and the economic development of the region. 20% of funding will come from local or state sources, and this project is part of the State of California's transportation improvement plan and has been identified as an eligible project critical to the region.

Legal Name of Requesting Entity: County of San Diego, Sheriff's Department

Address of Requesting Entity: 9621 Ridgehaven Court, San Diego, CA 92123

Description of Request: Per my request, San Diego County has received \$1.35 million for the ongoing upgrade of the San Diego County Sheriff's Department's Regional Communications System (RCS). This funding will be used for Phase 1 of migration to P25 ca-

capacity, which will move the County and its cities forward in the implementation of an effective, efficient regional interoperable communications system. This system will be critical both in terms of daily, routine communications and during disaster emergencies and other events that demand that all public safety agencies be able to communicate effectively. It will benefit California and other States and Federal agencies by providing voice radio interoperability with those entering into the region providing mutual aid. Ultimately, it will enable San Diego County public safety agencies to seamlessly integrate with surrounding Counties as it is built out to a "network of networks."

Legal Name of Requesting Entity: Scripps Institution of Oceanography, UC San Diego

Address of Requesting Entity: 9500 Gilman Drive, La Jolla, CA 92093

Description of Request: I received \$500,000 for the Coastal Data Information Program/Southern California Beach Processes Study within the Army Corps of Engineers. Through this program, high-resolution wave data and forecasts are disseminated in real time via the internet to the National Weather Service and to tens of thousands of diverse users each day. Sea state and surf warnings are issued based on this information for the protection of life and property. In addition, beach elevations are monitored and analyzed, and this information is provided to coastal communities online where local governments and engineers use it for making educated policy decisions for protecting and enhancing local beaches. This request is consistent with the intended and authorized purpose of the Army Corps of Engineers, which has the federal responsibility for shoreline protection and uses this data for coastal dredging and construction projects. This program is critical to marine safety and operations for the coastal United States and there are no competitive funding sources available.

Legal Name of Requesting Entity: The City of Solana Beach

Address of Requesting Entity: 635 South Highway 101, Solana Beach, CA, USA 92075

Description of Request: I received \$375,000 to complete the feasibility study for the Solana Beach-Encinitas Shoreline Protection Project. The protective beaches throughout the Solana Beach area are severely eroded, leaving residences, portions of Highway 101, and public access points susceptible to dangerous wave attacks and beachgoers subject to falling rocks as bluffs are destabilized by erosion. This Shore Protection Project will build up the protective beaches along the coast, preserving public access, recreational areas, and as well as public infrastructure and private homes.

EARMARK DECLARATION

HON. JERRY MORAN

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 25, 2009

Mr. MORAN of Kansas. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information for publication in the CONGRESSIONAL RECORD regarding earmarks I received as part of H.R. 1105, the Omnibus Appropriations Act, 2009.

Requesting Member: Congressman JERRY MORAN

Bill Number: H.R. 1105

Agency/Account: Agricultural Research Service, Salaries and Expenses

Legal Name of Requesting Entities: ARS Manhattan Unit and Kansas State University

Address of Requesting Entities: 1515 College Ave, Room 101, Manhattan, KS 66502 and 110 Anderson Hall, Manhattan, KS 66506

Description of Project: I have secured \$508,000 for Karnal Bunt (KB which is a disease of wheat that is caused by the fungus *Tilletia indica*. Although total deregulation of KB is scientifically justified, international quarantine deregulation is a slow and complex process. Past funded breeding programs have been successful and developed an array of resistant breeding lines. These lines are now in final stages of testing prior to variety release. As Karnal bunt research is completed, we request these h d s be transitioned to address new, more critical disease threats, such as cereal rust diseases. Since 2001, other serious challenges to wheat crop health have emerged, including new virulent races of stripe and leaf rust and the African stem rust race Ug99 and its variants. Resources are needed to address these critical disease issues and vulnerabilities in U.S. cereal production. I certify that neither I nor my spouse has any financial interest in this project.

Requesting Member: Congressman JERRY MORAN

Bill Number: H.R. 1105

Agency/Account: Animal and Plant Health Inspection Service, Salaries and Expenses

Legal Name of Requesting Entity: Kansas State University

Address of Requesting Entity: 110 Anderson Hall, Manhattan, KS 66506

Description of Project: I have secured \$259,000 for The National Agricultural Biosecurity Center (NABC) at Kansas State University. NABC was established to help protect the U.S. agricultural infrastructure and economy from endemic and emerging biological threats. There has been progress made with Phase I and Phase II funding, but more work is necessary. The NABC requires Phase 11 continuation funding to implement international
