#### EARMARK DECLARATION

### HON. VERN BUCHANAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, March 10, 2009*

Mr. BUCHANAN. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 1105, the Omnibus Appropriations Act, 2009:

Requesting Member: Congressman VERN BUCHANAN

Bill Number: H.R. 1105

Account: NOAA—Operations, Research, and Facilities

Legal Name of Requesting Entity: Mote Marine Laboratory

Address of Requesting Entity: 1600 Ken Thompson Parkway, Sarasota, Fl. 34236

Description of Request: I secured \$500,000 for Science Consortium for Ocean Replenishment (SCORE) at Mote Marine Laboratory.

SCORE is a multi-state initiative for the recovery of the nation's ocean fisheries. Its approach is to replenish diminishing marine fisheries stocks based on scientific protocols developed through a highly coordinated national effort focused on demonstration of successful stock enhancement. This fast-track strategy has the potential to be more cost-effective and timely than policy measures traditionally used to conserve and sustain ocean resources. The consortium includes institutions from Florida, New Hampshire, Washington and University of Southern Mississippi.

Requesting Member: Congressman VERN BUCHANAN

Bill Number: H.R. 1105

Account: Cooperative State Research Education and Extension Service—SRG  
Legal Name of Requesting Entity: Mote Marine Laboratory

Address of Requesting Entity: 1600 Ken Thompson Parkway, Sarasota, Fl. 34236

Description of Request: I secured \$416,000 sustainable aquaculture food technology innovations.

Mote Marine Laboratory and the University of Texas Marine Science Institute are seeking funds for a five-year research program to develop innovative and sustainable technologies to farm marine fishes on land and to expand the supply of safe seafood for U.S. consumers. A critical need exists for inland recirculating aquaculture technologies to reduce

the large and growing global demand for seafood, to reduce fishing pressure on declining wild fish populations, and to improve our nation's food security and health. The growing demand for marine fishery resources is currently being met through imported seafood produced in coastal ponds or sea cages in other countries around the world.
