

you want to come you should come under the normal, lawful process.

It is so important America reestablish the rule of law when it comes to immigration in our country. We are a nation of immigrants. We are the most generous Nation, I think, in the world for allowing people to come here. But there has to be some limit on those numbers. It has to be done in an orderly fashion, a lawful fashion.

If you do not have order and lawfulness at our border and you have huge numbers coming through every year, then it undermines respect for law and sends a signal worldwide that we are not serious.

I think we are making some progress. We need to get E-Verify going. It needs to be made permanent and mandatory. At the very least, every business that does business with the U.S. Government should have to use it. Pretty soon every business in America should use it. When we do that, we will have taken a big step toward assuring even ourselves that we mean what we say and that we are going to establish a lawful program.

Some say we need these workers. Well, let's talk about a good guest worker program that would work, and we could allow people to come legally. That is critically important. So when your unemployment rate is going over 9 percent, highest in over 20 years, then maybe we do not need as many people coming into our country, as some people have said we do.

But regardless, there ought to be a mechanism for allowing temporary workers to come, the number allowed to come should serve our national interest, and we ought not to allow the large numbers who are now coming illegally to come and be able to successfully take jobs that Americans need right now.

Maybe the reports saying that the administration is delaying implementation of mandatory E-Verify for Federal contractors are not correct. But since we have seen it happen several times already, I think it is important the American people know something is not going well here and maybe there will be an opportunity to make their voices heard and maybe we can somehow, some way get this E-Verify Program made permanent and workable.

#### TRIBUTE TO THE CAMPBELLVILLE UNIVERSITY TIGERS BASEBALL TEAM

Mr. McCONNELL. Madam President, I rise today to pay tribute to the accomplishments of the Campbellsville University Tigers' Baseball Team from my home State of Kentucky. Their recent 4-0 win over Kansas Wesleyan earned the Tigers their first trip to the NAIA Baseball World Series in Lewiston, ID.

The Tigers' hard work and dedication throughout the season has paid off as they represent their school in the tournament. The players embody the prin-

ciples of teamwork and their tireless efforts resulted in a successful season that has led to this monumental and meaningful honor.

Mr. President, I ask my colleagues to join me in honoring the team and coaches from Campbellsville for their performance during the regular season and for making it to the World Series. I further ask unanimous consent that the full article be printed in the RECORD as well as the names of the players and coaches.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

#### CAMPBELLVILLE UNIVERSITY TIGERS BASEBALL TEAM

Head Coach Beauford Sanders, Assistant Coach Scott Hortness, Assistant Coach Randy LeBleu, Assistant Coach Jake McKinley, Rob Elliott, Bryan Fuller, Spencer Frantz, Jimmy Voelker, Craig Edwards, Nick Bertolucci, Logan Smith, Zach Townsend, Chris Curley, Curtis Payne, Colin Bryan, Alex Ponich, Tyler Derby, Nathan Quesenberry, Jake Kutsukos, Chance Harker, Marc Wilson, Ian Pick, Eric Mattos, Eric Staples, Nick Smith, Alex Tolmachoff, Jon Bourassa, Brian Chase

[From ESPN, May 16, 2009]

#### CAMPBELLVILLE GAINS NAIA SERIES BERTH

Bryan Fuller told his Campbellsville University coaches he was never going to play baseball professionally, so he was willing to sacrifice his arm.

With much debate and reluctance, but knowing what was at stake and what their other options were, his coaches acquiesced.

Fuller, a senior, ended up pitching 21 shut-out innings in 26 hours as Campbellsville (Ky.) advanced to the NAIA World Series in Lewiston, Idaho, where on Friday it will face Lee (Tenn.).

Campbellsville had fallen into the loser's bracket in its NAIA super regional, and needed to win three straight to get the World Series berth. Against Lindenwood on Thursday, Fuller, who throws sidearm, pitched three scoreless innings for the save.

With just 25 minutes between games, Campbellsville's coaches decided to start Fuller in the next game, against Kansas Wesleyan, which had won 26 straight. Fuller, according to assistant coach Jake McKinley, "is an undersized kid" who had started only once previously in four seasons.

"We were nearly out of pitching and he looked comfortable," McKinley said. "We told Fuller we would need him to make his second career start and if he could give us three or four innings, that would be great, and it was in the biggest game in the history of our program against a team that had won 26 straight games."

Fuller ended up pitching a complete game as Campbellsville snapped Kansas Wesleyan's winning streak with a 11-0 victory.

That put Campbellsville in the final. According to McKinley, the coaches were prepared to start their No. 1 pitcher on two days' rest, but Fuller wanted the start.

"We told him no way, because we didn't want to hurt him . . . He just threw 12 innings the day before," McKinley said. "He told us that he was a senior that will never play pro ball and he was going to be an accountant in just a few weeks. He said he didn't care about his arm and told us he will give us a chance to win."

And he did, using just 77 pitches in his second consecutive complete-game shutout as Campbellsville (39-10) beat Kansas Wesleyan again 4-0, giving the Tigers their first NAIA World Series appearance in school history.

"We're not sure yet, but we are not opposed to using him in any role," McKinley said. "At this point, we'd be fools not to start him."

#### TRIBUTE TO DR. JAMES H. BILLINGTON

Mr. NELSON of Nebraska. Madam President, I join with Senator LISA MURKOWSKI, to convey heartfelt good wishes to Dr. James H. Billington, the Librarian of Congress, who will celebrate his 80th birthday on June 1.

Dr. Billington was educated in the public schools in the Philadelphia area and was valedictorian at Princeton University before pursuing his doctorate at Oxford University where he was a Rhodes Scholar. Following service in the Army he taught history at Harvard and Princeton. From 1973-1987, he was director of the Woodrow Wilson School for International Scholars where he founded the Kennan Institute for Advanced Russian Studies. He is a well-known scholar of Russia, has authored six books on Russian history, accompanied 10 congressional delegations to Russia and the former Soviet Union, and received more than 40 honorary doctorates from around the world.

In 1987 James Billington was nominated to be the 13th Librarian of Congress by President Reagan and was confirmed for that position by the Senate. From the day he took over the Library of Congress, he has vigorously pursued his vision for the Library and its future: to continue to acquire and preserve materials for its unparalleled collections and make them available to Congress, the American people and the world. Dr. Billington has a phrase for this, "to get the champagne out of the bottle." His aim from the beginning has been to share the riches of the world's largest collection of knowledge with ever broader audiences and to translate this wisdom into a catalyst for civilization.

Early in his tenure, even before the digital revolution, Dr. Billington saw the need to use new information technologies to get content out to users around the country so that the Library of Congress would not simply become a "warehouse of information." Through initiatives such as the pioneering American Memory Project created in 1990 he saw to it that the rich American history collections of the Library were available in new ways to a wider audience, culminating in 1995 with millions of digital items posted on the Web through the National Digital Library. The Library of Congress, through its National Digital Information Infrastructure and Preservation Program, led an ongoing effort with partner institutions to collect and preserve digital materials that would otherwise disappear. The Library is also leading the way in getting more than 15 million of its rich primary source materials out online to K-12 educators throughout the nation. In 1995 Dr.
