

world," the JLC's Western Region is planning a training program for foster youth who are about to find their first jobs. In an effort to help them succeed, the training program is designed to give them an in-depth understanding of the legal, social and political intricacies of the workplace.

To mark the national organization's 75 year anniversary, the committee's Western Region is holding an awards brunch on June 14 at the Century Plaza Hyatt Regency Hotel in Los Angeles at which a number of honorees will be recognized for their outstanding service to our communities. The honorees are: State Controller John Chiang; Executive Liaison for Universal Pictures James D. Brubaker; President/CEO of the National Association for the Hispanic Elderly Dr. Carmela Lacayo; and Business Manager, Southern California District Council of Laborers, Mike Quevedo Jr.

Madam Speaker, as the Jewish Labor Committee observes this milestone and continues the fight for social and political justice in Los Angeles, California and throughout our great nation, I ask my colleagues to please join me in commending everyone involved with the national JLC and its Western Region as well as this year's honorees for their continued commitment to securing fairness for all working families. I extend to them my best wishes for many more successful years ahead.

PAYING RESPECTS TO PRESIDENT  
EPHRAIM KATZIR

**HON. SCOTT GARRETT**

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, June 3, 2009*

Mr. GARRETT of New Jersey. Madam Speaker, I rise today to pay my respects to a great statesman and an important world leader. This past Saturday, Ephraim Katzir, the fourth President of the State of Israel, passed away at the age of 93.

Over a long and remarkable life, President Katzir dedicated himself to the security of the State of Israel and the progress of mankind. In addition to being a leading Israeli statesman, President Katzir was a world-renowned biophysicist, performing groundbreaking research in defense studies and the natural sciences. After receiving his Ph.D. from the Hebrew University of Jerusalem, Katzir went on to study and teach at leading American universities, such as Harvard, Columbia, and UCLA. He then returned to Israel to lead the Department of Biophysics at the Weizmann Institute of Science, and later became the chief scientist for the Israel Defense Forces. Katzir was awarded the Israel Prize—the state's highest civilian honor—for his work in natural science, and was the inaugural recipient of the Japan Prize for "original and outstanding achievements in science" and "having advanced the frontiers of knowledge and served the cause of peace and prosperity for mankind." He was also elected into the British Royal Society of London for the Improvement of Natural Knowledge, and in 1996 became the first Israeli inducted into the American Academy of Sciences.

In 1973, Ephraim Katzir answered Prime Minister Golda Meir's call to serve as President of Israel. During the first year of his tenure, Israel was attacked by her Egyptian and Syr-

ian neighbors in the Yom Kippur War. Just four years later, President Katzir and Prime Minister Menachem Begin welcomed Egyptian President Anwar El Sadat to Jerusalem, making Sadat the first Arab leader to visit the Jewish capital. This visit, combined with President Katzir's dedication to peace and human progress, led to the Camp David Accords a year later and an easing in the previously contentious Israeli-Egyptian relations.

Like Cincinnatus returning to his field, President Katzir chose to not stand for a second term, instead returning to his studies and spending time with his beloved wife, Nina. Though an able public servant, Katzir was never motivated by power not defined by his position. His integrity and intellect had few peers, and his devotion to the State of Israel was sincere and complete. As a scientist, a politician, and a proud citizen, President Katzir dedicated his life to a Jewish state for the Jewish people. Through his stewardship of the Office of President, President Katzir handed down to later generations a safe and prosperous nation.

The prophet Isaiah writes, "Those who walk uprightly enter into peace; they find rest as they lie in death." On behalf of the Fifth District of New Jersey, I wish peace for former President Katzir, and convey my deepest condolences to his family, friends, and country.

PERSONAL EXPLANATION

**HON. GREGG HARPER**

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, June 3, 2009*

Mr. HARPER. Madam Speaker, on rollcall Nos. 292, 293 and 294, my flight was delayed due to weather. Had I been present, I would have voted "yea" on all three.

HONORING DR. LEONARD SHLAIN

**HON. LYNN C. WOOLSEY**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, June 3, 2009*

Ms. WOOLSEY. Madam Speaker, I rise today with sadness to honor Dr. Leonard Shlain of Mill Valley, California who passed away May 11, at the age of 71, after a struggle with brain cancer.

Dr. Shlain excelled in two professions simultaneously. He was a pioneering surgeon in San Francisco as well as a best-selling author. As Chairman of Laparoscopic Surgery at California Pacific Medical Center and Associate Professor of Surgery at UCSF, he developed his surgical techniques to such an extent that he was flown around the world to train other doctors and also patented several surgical instruments.

His three published books have been best-sellers, their thoughtful and provocative content earning him fans from singer Bjork to Vice President Al Gore. Despite some initial skepticism about a surgeon writing on other topics, his books wove connections between everything from art and physics to human evolution in a highly creative and accessible style.

Art & Physics (1990) was hailed as a visionary exploration of the work of scientists and

artists over the centuries. The Alphabet vs. the Goddess (1998) further enhanced his reputation as an insightful and poetic storyteller while Sex, Time and Power: How Women's Sexuality Shaped Human Evolution (2003) offers dramatic explorations into the emergence of the human species. His fourth book, Leonardo's Brain, The Right-Left Roots of Creativity, will be published next year.

Dr. Shlain won many awards and was in high demand as a speaker from Italy to Los Alamos. But the most memorable thing about him was his generous and outgoing personality matched by intellectual curiosity and encyclopedic knowledge. His colleagues, friends, and family were privileged to experience this side of him, and he instilled his enthusiasm and drive in his children.

Daughter Kimberly Brooks relates "dinner conversations typically spanned from the Heisenberg Uncertainty Principle to politics, literature to an incredibly dirty joke." He would often "diagram the operation of the day on a napkin. Later, his diagrams became more adventuresome and expanded to thought experiments that included what it would be like to sit astride a beam of light and how that corresponded with Picasso's rose period." She also remembers how, for show and tell at her elementary school, her dad brought a human brain in a white bucket of formaldehyde and how he built a stained-glass geodesic dome (complete with a hot tub) in the back yard instead of a conventional swing set.

Born in 1937 in Detroit, Michigan, to immigrant parents, Dr. Shlain graduated from high school at the age of 16 and from medical school when he was 23. After a stint as a Captain in the U.S. Army, he got married and moved to Mill Valley in the late sixties.

He is survived by his wife, Judge Ina Gyemant, and children, artist Kimberly Brooks, filmmaker and Webby Awards founder, Tiffany Shlain, and doctor/entrepreneur Jordan Shlain. He was also father-in-law to filmmaker Albert Brooks, scientist/artist Ken Goldberg, Ph.D. and Caroline Egli Shlain, Ph.D., respectively. He had two stepchildren, attorney Anne Gyemant Paris and writer Roberto Gyemant, Jr. His son-in-law Michael Paris is a medical engineer. He is pre-deceased by his sister Shirley Wollock and survived by siblings Marvin Shlain and Sylvia Goldstick, and nine grandchildren (with a tenth on the way).

Madam Speaker, although Dr. Shlain taught his children never to trust a man who needs more than one sentence to describe what he does for a living, it is impossible to sum up his own accomplishments so briefly. The world is a richer place for his work, his spirit, and his wonderful family.

TRIBUTE TO MR. DAVE SALLENGS

**HON. HAROLD ROGERS**

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, June 3, 2009*

Mr. ROGERS of Kentucky. Madam Speaker, I rise today to pay tribute to Dave Sallengs, a Kentuckian whose efforts to fight the scourge of drug addiction throughout Kentucky have made huge strides towards stopping this horrific epidemic. His extensive knowledge of scheduled prescription drug trends has impacted the method in which doctors prescribe
