AUTHORIZING THE CLERK TO
MAKE CORRECTIONS IN EN-
GROSSMENT OF H.R. 2410, FOR-
EIGN RELATIONS AUTHORIZA-
TION ACT, FISCAL YEARS 2010
AND 2011

Mr. BERMAN. Mr. Speaker, I ask unanimous consent that the Clerk be authorized to make technical corrections in the engrossment of H.R. 2410, to include corrections in spelling, punctuation, section numbering and cross-referencing, and the insertion of appropriate headings.

The SPEAKER pro tempore (Mr. ADLER of New Jersey). Is there objection to the request of the gentleman from California?

There was no objection.

CONAGRA EXPLOSION OF JUNE 9,
2009

(Mr. ETHERIDGE asked and was given permission to address the House for 1 minute.)

Mr. ETHERIDGE. Mr. Speaker, it is always difficult when tragedy rocks our small communities. Yesterday morning an explosion rocked the ConAgra Foods plant in Garner, North Carolina, causing the collapse of a significant portion of that structure and rupturing an ammonia tank. Many of my colleagues here saw that on the national news.

Many times it's nice to make national news, but yesterday was not the day to make national news. Three people tragically died: Barbara McLean Spears of Dunn, North Carolina; Lewis Junior Watson of Clayton, North Carolina; and Rachel Mae Poston Pulley of Clayton, North Carolina. Our sympathies go out to their families, friends and their loved ones. There were 40 other people injured, including four who suffered critical burns. Our thoughts and prayers are with them and their families as they recover.

As usual, when there is an emergency of this size in our community, our first responders—fire, police and EMS—were quick to the scene and prevented further loss of life or injury. Private citizens risked their well-being to come to the aid of their friends and neighbors. I'm proud of the North Carolinians who responded yesterday to the needs of these individuals and their families and those who will respond in the days to come.

Our small communities are enriched by businesses like ConAgra, which provides 900 jobs in this community. This one was the largest plant of ConAgra's plants. I am pleased to learn that they have set up a relief fund for the victims, and they are working to rebuild the plant. I ask my colleagues to join me in a moment of sympathy for these victims and their families.

The SPEAKER pro tempore. Members will rise for a moment of silence in sympathy.

IRAN'S PRESIDENTIAL ELECTION
AND ITS NUCLEAR ASPIRATIONS

(Mr. MORAN of Kansas asked and was given permission to address the House for 1 minute.)

Mr. MORAN of Kansas. This week we are experiencing Iran's presidential election. While the election is noteworthy, it will probably not have an impact on Iran's illegal nuclear program. Unlike in the United States, the President of Iran has minimal influence over the country's national security policies. Those decisions are controlled by Supreme Leader Ayatollah Ali Khomeini, the unelected head of Iran's theocratic regime.

The supreme leader has vowed to continue Iran's nuclear program, and unfortunately we see evidence of this. Just last Friday, the International Atomic Energy Agency reported that Iran has sped up production of nuclear fuel and installed more centrifuges in advance of the election. Nuclear weapons experts say Iran now has enough centrifuge capacity to fuel up to two nuclear weapons a year.

Iran is determined to acquire nuclear weapons regardless of who is president. It would be a mistake for the Obama administration and this Congress to wait and see what direction Iran takes if a new president is elected because the course appears to be already determined. If we are going to engage Iran, we must do so right away, immediately, and back engagement with tougher actions.

PAYING TRIBUTE TO SLAIN
OFFICER STEPHEN TYRONE JOHNS

(Mr. ENGEL asked and was given permission to address the House for 1 minute.)

Mr. ENGEL. Mr. Speaker, the horrible events today at the Holocaust Memorial Museum, where Officer Stephen Tyrone Johns was fatally shot and killed, is something that should give us all pause for reflection. First of all, our hearts go out to the officer's family. He's truly a first defender and is someone who was protecting all of us.

Mr. Speaker, it reminded me of an incident just a few years ago where Officer Chestnut and Detective Gibson were shot right here at the Capitol by someone who was deranged. But the person who killed Officer Johns today was a hatemonger, hating Jews, hating blacks, hating everybody. And it's time for us to pause and say that all people of goodwill will not tolerate that kind of hatred.

There's another thing that we really need to take into account as well. And that is, when deranged people can get hold of guns, we really have a serious problem in this country. We need to do something about guns that are out there in the hands of deranged people, people who should never own guns. This person who fired that fatal shot was a known hatemonger, a white supremacist who served time in jail. How

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are 2 minutes remaining in this vote.

□ 1849

Mr. ABERCROMBIE changed his vote from "no" to "aye."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated against:

Mr. BACHUS. Mr. Speaker, on rollcall No. 328, had I been present, I would have voted "no."

in God's name was he ever able to get a gun? We really need to think about this. It has nothing to do with Second Amendment rights. It has to do with sensible Second Amendment rights and sensible feelings and thinking about who should be allowed to have a gun. Certainly not a deranged person.

I would ask for a moment of silence for Officer Johns and let his family understand that the United States Congress appreciates his great service to our country. There are many, many more out there like him. We thank God that we have our first defenders and the people who are there to protect all of us.

I would ask for a moment of silence. The SPEAKER pro tempore. Members will rise for a moment of silence.

AMERICAN TAX DOLLARS SHOULD NOT BE USED TO FUND ABORTION

(Mrs. BLACKBURN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BLACKBURN. Mr. Speaker, there are few issues that divide the American conscience like abortion. There are few topics that are fraught with such conviction and emotion.

Last month the President, speaking at Notre Dame, called "for open hearts, open minds, and fair-minded words" on abortion as he pled with the country for greater understanding. The actions of his administration and this House belie the hope that the President's words implied. While calling for a constructive dialogue on one hand, on the other, he and many of my colleagues commit tax dollars to fund a practice so many find abhorrent.

This Chamber and the President seem to have forgotten that for many, tax dollars are a deeply personal contribution to our government. They are the product of hard work and often represent dreams and opportunities delayed for yet another year as we give the taxman his due. To take those dollars so patriotically sent to Washington and apply them to abortion in our Nation's Capital and abroad is heartbreaking to many Tennesseans. His administration's policy is not open minded or open hearted. It is, I believe, a cavalier disregard not only for life but for those who defend it.

□ 1900

HONORING DEPUTY SHAWN WEBB OF THE PLUMAS COUNTY SHERIFF'S DEPARTMENT

(Mr. McCLINTOCK asked and was given permission to address the House for 1 minute.)

Mr. McCLINTOCK. Mr. Speaker, I rise today to honor Deputy Shawn Webb of the Plumas County Sheriff's Department.

The entire department, joined by the people of Plumas County, are rallying behind this remarkable young man and

his family as he battles a very difficult illness. You don't see this kind of outpouring very often these days. It is a testament to the impact that Deputy Shawn Webb has had on his department and on his community.

Shawn's Commander writes, "We here in Plumas County are blessed to have a 'Grade A' California-raised, true-blooded American Hero."

So I rise to salute the bravery and dedication that Deputy Shawn Webb has brought to his professional life in protecting our community, qualities now so conspicuous in his battle in his personal life.

I also want to salute the people of Plumas County who have embraced and supported Shawn and his family in this difficult time.

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

ENERGY TAXES AND TOY CARS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

Mr. POE of Texas. Mr. Speaker, unveiled today was a new energy plan that would increase production of American-made energy in an environmentally sound manner. The American Energy Act is an all-of-the-above solution that offers more affordable energy, good-paying American jobs and American energy independence, and it is safe for the environment.

However, what the administration and the taxacrats are still proposing is a none-of-the-above approach to energy development. They call it the cap-and-trade bill. Their answer is to tax energy consumption, not actually find more energy.

Their new tax will cost the average American family over \$3,000 in additional taxes each year. If you use energy, you are going to be taxed. That will mean all sources of energy will cost all consumers more money. Electricity costs will go up. Natural gas, gasoline, and even the cost of food and consumer goods will rise. Everything is going to cost a whole lot more, because everything Americans buy is produced using the energy the administration is going to tax.

Their plan is to punish Americans who use energy by taxing them, plus there is no real plan for energy that they propose. Their new cap-and-trade national energy tax will financially devastate middle class families across America. It will be especially hard on energy-producing States like Texas that are going to lose thousands of jobs.

The nonpartisan Congressional Budget Office issued their analysis of the energy consumption tax this week. The

CBO reports say that the administration cap-and-trade tax imposes \$846 billion in new national energy taxes that will affect all of us. Not only that, the CBO told the Senate the new energy consumption tax will have little or no effect on the climate. Now, isn't that lovely?

The none-of-the-above energy plan and tax on business hammers what few manufacturing plants are left in the United States. It is going to send countless American jobs overseas to places like China and India. You see, both of these countries have said they are not going to participate in any scheme to cap-and-tax carbon like America is going to do. Thus, they will make what were American products cheaper in those countries. Also, if all of these factories and plants move overseas, along with the jobs, to so-called polluting nations, how is this going to have any positive effect on our climate?

At the same time, the taxacrats are trying to kill off carbon-based fuel supplies; that is, things like oil and its derivatives, as well as natural gas. There is no transition fuel that exists at this time. That is at least 10 years away. Now we are really in a fix; no new energy, and, literally, we are going to be in the dark and we are going to be taxed back to the stone age.

The strange part of all this is that the taxacrats say natural gas could be that transition fuel, but they are trying to kill the drilling of natural gas, especially offshore. I wonder if they understand that natural gas is a carbon-based fossil fuel that requires drilling to unearth? You cannot grow natural gas like corn.

Those taxacrats also want to force us all into small, little green cars that are death traps. Have you seen these things? These dinky cars are too small for people like me and too small for even groceries or putting children in these toy cars. There is no room, and they are unsafe at any speed.

The Institute for Highway Safety ran three 40-mile-per-hour, car-to-car, front-to-front crash tests each involving one of these little bitty microcars and a midsize car from the same manufacturer. They didn't even use large cars or those SUVs. The results weren't pretty. They found that the weight of just a midsize car was devastating to these micromini toy cars. These green cars simply do not have the weight to protect the passengers, and they are not safe on American highways. So the government is going to force us to drive small, battery-powered, unsafe vehicles, but they will be cute, Mr. Speaker.

And speaking of batteries, if all our vehicles are electric, where are we going to dispose of the millions of larger batteries that will be required to generate these little cars? The other side talks about protecting the environment, but this will create an environmental nightmare when we are trying to dispose of these batteries somewhere in America.
