STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. KYL (for himself, Mr. MCCONNELL, Mr. ROBERTS, and Mr. CRAPO):

S. 1259. A bill to protect all patients by prohibiting the use of data obtained from comparative effectiveness research to deny coverage of items or services under Federal health care programs and to ensure that comparative effectiveness research accounts for advancements in personalized medicine and differences in patient treatment response; to the Committee on Health, Education, Labor, and Pensions.

Mr. KYL. Mr. President, I wish to talk about a bill Senator MCCONNELL and I introduced today. I think a companion bill will also be introduced by some of the leadership in the House of Representatives. The number of the bill is S. 1259, and this bill is called the PATIENTS Act—"patient" as in doctor-patient. The idea is to focus on health care as it relates to patients.

Health care reform should be patient centered. Nothing should come between the physician and the patient. We are concerned there is something being done that we need to stop because it could, in fact, insert government bureaucracies between the patient and the physician. What has happened is that in the stimulus bill, the Congress appropriated \$1.1 billion for something called comparative effectiveness research. Comparative effectiveness research has been used for years by physicians and hospitals. Medical schools do research, and they determine what kinds of treatments are best. For example, if you have two different drugs for the same condition, they will do testing to see which one seems to work the best. It is called clinical trials. They do clinical research, and physicians and hospitals frequently use that research as recommended for the best way to treat a particular condition. It is not mandatory. Obviously, what is good for most patients may not be good for all patients. So it is not something that is obviously forced upon people, but it provides good information. The problem is that too many people now who are proposing health care reform want to use comparative effectiveness research to end up rationing care, to have a Federal entity or even a State entity, or I should say a private entity, use that research in ways that would end up rationing care, to say some care is just too expensive for you to have, and since the government is paying for it, the government is not going to give it to you.

What our bill would do is make it clear that comparative effectiveness research cannot be used to deny coverage of either a health care service or treatment by the Secretary of HHS. And we say the Secretary of Health and Human Services because all of the various entities that might do that in the Federal Government are part of HHS. So we simply prohibit the Secretary of HHS from using this comparative effectiveness research to deny
