

The American people deserve a debate on the ideas, not more rhetoric and false choices from this administration and their allies.

In conclusion, God bless our troops, and we will never forget September 11th in the Global War on Terrorism.

HONORING GREG GAMBRIL AND DARYL BAILEY

(Mr. BRIGHT asked and was given permission to address the House for 1 minute.)

Mr. BRIGHT. Mr. Speaker, I rise today to honor two very talented law enforcement officials in my district. Last week, Greg Gambril and Daryl Bailey received the highest honors in their respective fields from the Alabama District Attorney's Association.

Greg received the Brad Morris Memorial DA of the Year Award. He has served in the Covington County DA's office since 1992 and elected as district attorney in 2004.

Daryl Bailey began in the Montgomery County DA's office in 1997 and has served as Chief Deputy District Attorney since 2002. He was named Assistant District Attorney of the Year and he has prosecuted capital murders as well as the domestic violence cases in his district.

Again, congratulations to Greg, along with his wife Julie and sons, Joseph and Charlie, and to Daryl Bailey and his wife, Tracy, and children, Laura and Jake, for their achievements and dedicated service to our communities.

PRESCRIPTION OF THE DAY: ENSURING A STRONG FUTURE PHYSICIAN WORKFORCE

(Mr. BURGESS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURGESS. Mr. Speaker, "Are we running out of doctors?" was a question posed by the Texas Medical Association last year. The United States population continues to grow and there is concern that there may not be enough physicians to care for Americans.

If we do nothing to assist the training of new physicians, waiting lines will grow longer, lapses in treatment will occur, and many of our smaller and rural communities will be at risk of not having physicians.

What is the prescription? Helping doctors as they enter training in medical school and continuing assistance throughout their residency in high-need specialties and medically-underserved areas to make certain that when you need help, your doctor is in.

Two bills, H.R. 914 and H.R. 916, bipartisan bills to help offer incentives for physicians to practice in rural and underserved areas of the country, will help to ensure that health care coverage actually equals access to a doctor for all Americans.

All of the recent discussion on health care reform has been on cost and cov-

erage, but it matters not if there are not enough doctors for America's patients. Ensuring that our Nation has a strong physician workforce is critical and must be part of this national health care debate.

ACKNOWLEDGING THE PROGRESS AND IMPORTANCE OF GHANA

(Mr. COHEN asked and was given permission to address the House for 1 minute.)

Mr. COHEN. Mr. Speaker, today I rise to applaud the efforts of Ghana in promoting good governance and civic participation. President Obama will wrap up the third leg of his international trip in Ghana. He will be there today.

I am reminded of the important role this democratic nation plays in the international world. Ghana is an active participant in the United Nations and the African Union. In its region, it has been extremely active in international peacekeeping.

Ghana, the first state in Sub-Saharan Africa to gain its independence, has shown that it is a stable nation whose government and people are accountable to one another. These acts are a good first step in developing future relationships between our Nation and Ghana.

One of my constituents, five-time karate and kickboxing champion, Anthony "Amp" Elmore, fulfilled his lifelong dream by visiting Ghana in 1998. The champ visited Accra, and it has changed his life.

After returning to Memphis, Amp developed his vision of educating and enlightening people about the cultural and economic importance of Africa as a continent, as well as Ghana. At his home and throughout the city, he showcased African artifacts, fabrics and arts.

This weekend, on Friday and Saturday both, he will be honoring Africa at his home and inviting the public and having a fashion show and an African dinner. I will be there. Next year, I will visit Ghana and hope to develop trade between our city, Ghana and our Nation.

COMMENDING SERVICE ORGANIZATIONS

(Mr. PAULSEN asked and was given permission to address the House for 1 minute.)

Mr. PAULSEN. Mr. Speaker, in the midst of intense policy debates, we must not forget that we are here for one reason, to serve. Thankfully I have constant reminders of that spirit of service throughout my district. During the past week, I visited two amazing service organizations where I had the great honor of joining their efforts.

Interfaith Outreach and Community Partners helps people who are facing a crisis, whether it be sudden job loss or dealing with serious health care issues.

Along with operating a local food shelf, they offer emergency financial assistance to those in need.

Feed My Starving Children provides hand-packed meals formulated specifically for children suffering from malnourishment and starvation. They ship those meals to over 60 countries, partnering with like-minded organizations worldwide. They have helped children regain their health.

The spirit of service embodied by these employees and volunteers at these organizations is something we should all be proud of and something we should strive for each day.

HEALTH CARE INNOVATION ZONE PROGRAM ACT

(Ms. SCHWARTZ asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. SCHWARTZ. Mr. Speaker, finding a uniquely American solution to our Nation's health care challenges means expanding access to high quality health coverage, containing health care costs, improving the quality of care and achieving better health outcomes. To achieve these goals, we have to think in new ways about how to bridge the current system's fragmentation, encourage coordination and promote collaboration by health care providers.

Meaningful health care reform requires that we expand delivery of care models that encourage teamwork among providers, improve efficiencies, and ensure that Americans get better value for their health dollars spent. This includes patient-centered medical homes and greater access to primary care. We should also expand opportunities for doctors and hospitals, including those based in community and academic medical centers, to design, implement and evaluate such models of care delivery.

I have introduced the Health Care Innovation Zone Program Act to create and expand these innovative models of care. When we provide incentives to payers and providers to work together to improve care to communities of patients, we will undoubtedly see better health care, better health care outcomes and lower costs for all of us.

REPUBLICANS OFFER A BETTER PLAN FOR HEALTH CARE REFORM

(Ms. FOXX asked and was given permission to address the House for 1 minute.)

Ms. FOXX. Mr. Speaker, at some point every American will see a doctor or require some form of emergency care. Whether it is the birth of a child or an aging parent sick with cancer, families are praying for the best health care possible for their loved ones. But right now, Democrats are pushing for a government takeover of health care that would severely limit many patients' access to life-saving treatment.
