Ms. LANDRIEU. Mr. President, I ask my colleagues to support passage of S. 1233, the SBIR/STTR Reauthorization Act of 2009, with an amendment from Dr. COBURN and Senator FEINGOLD.

This legislation is important because it reauthorizes two extremely successful programs—the Small Business Innovation Research and Small Business Technology Transfer programs—otherwise known as SBIR and STTR. These programs foster partnerships between small businesses and the Federal Government to develop cutting-edge products and technologies important to our country. The bill makes improvements to these programs that will allow them to work better for small businesses, while contributing to our economy, fulfilling the priority research needs of the Nation, and expanding and diversifying our military’s supply base.

The SBIR program expires on July 31, 2009, so time is of the essence for Congress to pass this legislation and get it to President Obama’s desk. While we need to act fast, we have not acted in haste. We have given these programs full deliberation with numerous hearings, roundtables, and meetings since 2006, including a hearing on July 12, 2006, a roundtable on August 1, 2007, a roundtable on October 18, 2007, and a roundtable on June 4, 2009. We have also reviewed the nine studies by the National Research Council, and studies by the Government Accountability Office, on the SBIR program since it was last authorized in 2000 to help guide the committee in drafting not only this bill, S. 1233, but also the SBIR and STTR reauthorization bills that the committee adopted unanimously in the 109th Congress, S. 3778, and in the 110th Congress, S. 3362.

The SBIR and STTR programs are two of the very few Federal programs that tap into the scientific and technical community found in America’s small businesses. As I noted earlier, these programs foster government-industry partnerships by making competitive awards to firms with the best scientific proposals in response to the research needs of our agencies and by helping to move technologies from the lab to the marketplace or from the lab to insertion in a government program or system.

The SBIR program was designed in 1982 to harness the innovative capacity of America’s small businesses to meet the needs of our Federal agencies and

to help grow small, high-tech firms that, in turn, grow local economies all across the Nation. The STTR program was originally created as a pilot program in 1992 to stimulate partnerships between small businesses and nonprofit research institutions, such as universities like LSU and Louisiana Tech.

Since their inception, both programs have exceeded all expectations, playing an unprecedented role in stimulating technological innovation, in allowing small business to meet Federal research and development needs, and in providing seed capital for small business to develop ideas until they are able to attract outside investment.

The SBIR program has awarded more than \$24 billion to more than 100,000 projects since it started. Recipients of SBIR and STTR awards have produced more than 85,000 patents and have generated millions of well-paying jobs across all 50 States. Both programs have garnered high praise from well-respected sources, and governments around the world are increasingly adopting SBIR-type programs to encourage innovation in their countries.

In drafting this bill, we had many policy goals and interests to balance. We wanted to improve the diversity of the programs, geographically and otherwise, so that more States and individuals could participate in Federal research and development for our country. We also wanted to maintain a fair playing field so true small businesses could continue to compete for this very small percent of the overall Federal R&D budget. We wanted to encourage exploration of high-risk, cutting-edge research. These goals, along with many others, were taken into consideration in forging this bill. We made a number of important compromises in this legislation—and the result is a fair bill that will maintain the strength of these programs.

To keep these innovation programs strong, the bill reauthorizes the programs for 8 years, as reflected in the amendment by Dr. COBURN, instead of 14 years as adopted by the committee; increases the SBIR program allocation by 1 percent, from 2.5 to 3.5 percent, at all agencies, including the NIH, spread out over 10 years; increases the STTR program allocation from .3 percent to .6 percent spread out over 6 years; makes firms majority owned and controlled by multiple venture capital firms eligible for up to 18 percent of the SBIR funds at NIH and up to 8 percent of the funds at the other agencies; and increases the award guidelines for SBIR and STTR awards from \$100,000 to \$150,000 for Phase I and from \$750,000 to \$1 million for Phase II.

The bill also reauthorizes and enhances the Federal and State Technology Partnership Program, or FAST Program, that was created by Senator BOND in 2000, and the Rural Outreach Program, programs that have been very effective in States such as Louisiana and Missouri in increasing the participation of small business in Fed-

eral research and development and the start-up of high-tech firms; strengthens the Office of Technology at the SBA so that it has the authority and resources to carry out its duty to oversee the SBIR and STTR programs across the government; streamlines and improves data collection and reporting requirements for the SBIR and STTR programs, including developing metrics for annual evaluations by each participating agency, as reflected in the amendment by Dr. COBURN; helps SBIR and STTR companies move their technologies across the “valley of death” between the lab and the marketplace and into products and technologies for the agencies; and addresses “jumbo” awards, those awards that have greatly exceeded the \$100,000 and \$750,000 guidelines for Phase I and Phase II and cut out other businesses.

Reauthorizing these programs will ensure that small businesses continue to play a part in our Federal research and development. Currently, small businesses receive only about 4 percent of Federal research and development dollars despite the fact that they employ nearly 40 percent of America’s scientists and engineers, produce more than 14 times more patents than large businesses and universities, and produce patents that are of higher quality and are more than twice as likely to be cited. This legislation will help maintain and improve the role of small businesses in our Federal research and development.

The SBIR and STTR programs have spurred so many amazing technologies. I would just like to share a few of them with you here today. Among the technologies pioneered by SBIR-funded small businesses are a machine that uses lasers and computer cameras to sort and inspect bullets at a much finer level than the human eye can manage, the technology that creates the “invisible” condensation trail of the B-2 bomber, a therapeutic drug to treat chronic inflammatory disease, and a nerve gas protection system.

With regard to the bullet sorting technology, developed by CyberNet Systems, a small, women-owned business located in Ann Arbor, MI, and currently in use in Iraq and Afghanistan, that SBIR technology is estimated to have saved taxpayers more than \$300 million. Those are real cost savings and tangible technological improvement.

In Louisiana, one company that has had great success in recent years is Network Foundation Technologies, known as NiFTy. I visited this company in Ruston, LA, a rural part of the State, in August 2008 and was extremely impressed. NiFTy used an SBIR grant from the National Science Foundation to develop technology that permits live streaming video over the Internet without using large amounts of bandwidth. They have been particularly successful bringing sporting events live over the Internet. NiFTy has grown to more than 40 employees,

many drawn from the ranks of the Louisiana Tech science and engineering programs. These are new, high-paying jobs that have been a strong asset to north Louisiana’s economy.

SBIR is a program that helps spur technology research and innovation in areas you would not normally think of as high-tech corridors. Folks think of California or Massachusetts, but not our growing high-tech corridor in rural north Louisiana. LA Tech, UL-Monroe, Grambling University, LSU-Shreveport, and Centenary College are all in that corridor. For those who don’t know, Ruston is between Monroe and Shreveport, and LA Tech helps attract good companies because we have good scientists and engineers. With SBIR and STTR, those entrepreneurs started a company.

It is stories such as these that make the SBIR and STTR programs so special to the economic and technological growth of this country. I want to once again thank all those involved for their hard work on this legislation, particularly our ranking member, Senator SNOWE, and her staff, as well as Senator LEVIN and his staff on the Committee on Armed Services, Senator DURBIN and his Appropriations staff, and Dr. COBURN and Senator FEINGOLD on the final amendment to the bill. It is my hope that we can now pass this bill in the Senate and work expeditiously with the House to get a bill on President Obama’s desk before July 31.

Mr. REID. Mr. President, Senators COBURN and FEINGOLD have an amendment at the desk, and I ask unanimous consent for its consideration; that the amendment be agreed to and the motion to reconsider be laid upon the table; that the committee-reported substitute, as amended, be agreed to and the motion to reconsider be laid upon the table; that the bill, as amended, be read a third time.

The PRESIDING OFFICER. Without objection, it is so ordered.
