The objectives of this proposal are twofold: (1) to implement and operate a high-powered computing grid (a virtual computing environment) that will facilitate the solution of interdisciplinary computational and engineering models, and (2) to develop a computational model of complex electromagnetic wave transmission, propagation, and reception, and analyze that model using new Computational Science methods within the virtual computing environment. The research will be conducted in Hunt County, and will provide faculty and students with research and educational opportunities currently not available. Furthermore, the "grid" will be available for other universities and industries to utilize, thereby expanding the area of impact across the state. Legal Name of Requesting Entity: Technology Management Inc.

Address of Requesting Entity: 290 Alpha Dr., Highland Heights, Ohio 44143

Description of Request: Provide an earmark of \$500,000 to be used to continue development of a scalable fuel cell system for distributed bioenergy generation. Technology Management Inc. has produced a fully functional fuel cell system—the size of an appliance—that can be installed and used to generate power through biofuels sufficient enough to power an Ohio farm. Funds would be dedicated to engineering prototypes for manufacturing.

ive control technologies for combustion performance. This new technology will result in significant changes to combustor performance, allowing enhanced operability, increased fuel flexibility and increased life of engine components. The project will facilitate the use of syngas, a clean fuel, as a replacement for traditional fossil fuels to provide power in everything from a building generator to a power utility.
