

This resolution rightly recognizes the suffering and the needs of Persian Gulf War veterans who continue to suffer from Gulf War Veterans' Illness, GWI, without an adequate treatment or a cure. One in four of those who served in the first Gulf War experience multiple concurrent symptoms including memory and concentration problems, chronic headaches, widespread pain and gastrointestinal problems as a result of neurotoxic exposures during their Gulf War deployment. Research also shows that Gulf War veterans suffer from Lou Gehrig's disease at double the rate of their non-deployed peers. There is still no effective treatment for these veterans.

A groundbreaking report issued by the Congressionally commissioned VA Research Advisory Committee on Gulf War Veterans' Illnesses entitled, "Gulf War Illness and the Health of Gulf War Veterans" identified two definite causes of the disease and a handful of other likely causes: exposure to pesticides and a drug given to troops to protect them from nerve gas.

The National Academy of Sciences' Institute of Medicine, IOM, released a groundbreaking report on Gulf War health in April, acknowledging that over 250,000 Gulf War veterans suffer from a chronic multisymptom illness that it is not due to psychiatric causes. Perhaps most importantly, the report recognizes the need for national research program that is likely to succeed in identifying treatments for GWI that will also benefit other U.S. military forces.

For the past several years, I have led a bipartisan effort to support the Gulf War Veterans' Illness Research Program within the Department of Defense's Congressionally Directed Medical Research Program. The program was awarded \$8 million in fiscal year, FY, 2010 and is critical following the Veteran's Administrations' decision this year to revisit rejected claims for Gulf War Veterans who have attempted to access treatment for the illness linked to their service. The research coming out of this program is among the most promising in the world for these veterans. We can and must do better than to forget the permanent sacrifices they have made. We must not rest until we identify treatments for them and ensure the exposures that caused the illnesses are not duplicated.

I urge my colleagues to continue this bipartisan effort as the FY 2011 Defense Appropriations bill and support funding for the Gulf War Veterans' Illness Research Program. We owe it to Gulf War veterans and all members of our Armed Forces to find a treatment.
