

RECOGNIZING THE ACHIEVEMENTS
OF ALBERT E. TREXLER**HON. JIM GERLACH**

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, September 23, 2011

Mr. GERLACH. Mr. Speaker, I rise today to congratulate Albert E. Trexler of the Pennsylvania Institute of Certified Public Accountants for his 42 years of service to that organization, including his 35 years as secretary, executive director, and CEO.

Under Albert's leadership, PICPA membership has grown by 184% and its membership base expanded to include future CPAs through accounting affiliate and student membership categories. He also provided more local networking and leadership opportunities as the PICPA grew from nine to eleven chapters.

Additionally, Albert has championed advocacy efforts to include a full-time presence in Harrisburg to support implementation of CPA law changes. Included in this effort was mandatory continuing professional education to bring the Commonwealth in compliance with substantial equivalency and permit interstate mobility for PICPA members.

Further, Albert Trexler has supported industry-specific conferences and robust professional education course offerings and delivery methods to respond to the growing demands for specialized knowledge, changing membership demographics, and technical advancements.

Mr. Speaker, in light of his years of service to PICPA and a litany of outstanding accomplishments, I ask that my colleagues join me today in recognizing Albert E. Trexler on the occasion of his retirement as executive director and CEO and also on the conference upon him with the lifetime designation of PICPA Executive Director Emeritus.

TRANSPARENCY IN REGULATORY
ANALYSIS OF IMPACTS ON THE
NATION ACT OF 2011

SPEECH OF

HON. BARBARA LEE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 2011

The House in Committee of the Whole House on the state of the Union had under consideration the bill (H.R. 2401) to require analyses of the cumulative and incremental impacts of certain rules and actions of the Environmental Protection Agency, and for other purposes:

Ms. LEE of California. Mr. Chair, I am proud to serve as a Representative of California's Ninth Congressional District, which has long been at the forefront of the environmental movement, including working on the critical issue of climate change, as well as fighting for renewable energy, green jobs, and environmental justice.

That is why I am speaking today against the TRAIN Act—it undermines the Clean Air Act's ability to crack down on air pollution, threatening the quality of life for our children, our families and our communities, including my constituents in the East Bay, many of whom already suffer unjustly from poor air quality.

The Clean Air Act is one of the most successful public health programs in American history—with a return of more than \$30 in benefits for every dollar invested in pollution reductions over the life of this law.

The TRAIN Act is a direct attack on the Clean Air Act and its regulations. This bill blocks EPA's ability to move forward with two long overdue Clean Air Act rules—the Mercury and Air Toxics Standard and the Cross-State Air Pollution Rule—which will reduce harmful air pollution that threatens public health, especially the health of the most vulnerable populations, including children and seniors.

The Republicans' attack on the Clean Air Act and its work to dismantle the EPA will not only result in job loss but will result in poorer public health across this Nation.

Rather than the Republicans taking action to create jobs, this bill cuts funding to create green jobs.

We should move President Obama's American Jobs Act now to begin to give Americans what they want: a job.

I urge a no vote on this measure and urge the Republicans to stop playing political games and couching deregulation as job creation. Wall Street got deregulated and the result was a financial crisis. The American people do not need an environmental and public health crisis, the American people need jobs.

HONORING SCHOOLCRAFT
COLLEGE**HON. THADDEUS G. McCOTTER**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, September 23, 2011

Mr. McCOTTER. Mr. Speaker, I rise today to pay tribute to Schoolcraft College in my hometown of Livonia, Michigan as it celebrates 50 years of serving the residents of southeastern Michigan.

In October of 1961, voters approved the formation of Northwest Wayne Community College. On February 6, 1963 the college was renamed Schoolcraft College in honor of Henry Rowe Schoolcraft, an American geographer, geologist, and ethnologist, noted for his early studies of Native American cultures, as well as for his 1832 discovery of the source of the Mississippi River.

An essential part of our community, Schoolcraft College continues to provide outstanding and affordable educational opportunities to a district reaching into three counties, sixteen municipalities and six school districts. While best known for its Culinary Arts, Nursing and Public Safety programs, Schoolcraft serves students by providing general education and transfer credits at reasonable cost.

Having served as a member of the Schoolcraft College Board of Trustees, I am impressed by the college's intelligent investment in expanding and upgrading the school's infrastructure. This has provided tremendous opportunities to educate and re-train the workforce in Southeast Michigan. In 2003, the ribbon cutting ceremony opened the VistaTech Center. A state of the art facility, it is home to Schoolcraft College's award winning culinary arts program and business development center. The Culinary Arts Department boasts four Certified Master Chefs and seven Executive Chefs. This gives Schoolcraft College a higher

Certified-Master-Chef-per-student ratio than any other culinary school in the country. The VistaTech Center also is home to the American Harvest Restaurant, a student operated restaurant, where students provide exceptional gourmet cuisine and service to the local public.

In 2008, Schoolcraft hosted the grand opening for the new Biomedical Technology Center, BTC. This cutting edge building is home to several science and technology-focused programs and its growing nursing program. This building supports the mission to train our youth in promising future careers in the high tech and biomedical fields. The Biomedical Technology Center hosts truly top-notch labs: Imaging and Analysis Lab, Anatomy and Physiology Lab, Biomedical Engineering Technology Lab, Cellular and Molecular Biology Lab.

From an initial enrollment of 2,425, attendance has now grown to more than 36,000 students each year, each of whom can choose from 70 academic majors. Schoolcraft's Continuing Education and Professional Development Courses reach an additional 16,000 annually through credential programs, professional development, personal enrichment, and courses designed to further personal interests.

Mr. Speaker, Schoolcraft College has served, trained, educated and advanced the interests of our region for 50 years. As a former Schoolcraft College trustee, I ask that we congratulate them on their devoted service as an exemplary and vibrant campus, finding innovative ways to inspire students of all ages to achieve more than they ever thought possible.

MOURNING THE PASSING AND
HONORING THE LIFE OF HARRY
"BUS" YOURELL**HON. DANIEL LIPINSKI**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, September 23, 2011

Mr. LIPINSKI. Mr. Speaker, I rise to mourn the passing, and to celebrate the life of Harry "Bus" Yourell. Mr. Yourell was a man who loved his family, his community, and his country, and had a general love of life.

Mr. Yourell's public service began on December 7, 1941, the day Pearl Harbor was attacked and the day he signed up for the Marine Corps. A proud Marine, he was awarded a Bronze Star for saving an injured friend and he earned three Purple Hearts for his own injuries. Having fought bravely at Guadalcanal, Bougainville, Guam, and Iwo Jima, Mr. Yourell exemplifies the "Greatest Generation."

Mr. Yourell continued his service in 1959 when he was elected Trustee in the Village of Oak Lawn. In 1966, he became a Representative in the Illinois House and went on to serve nine terms. He also served as Worth Township Democratic committeeman, Cook County Recorder of Deeds, and Commissioner for the Metropolitan Water Reclamation District. He retired in 2006 having won 40 elections without ever losing one. An Oak Lawn street and a Water Reclamation District aeration station bear his name, and he is remembered fondly by tens of thousands of residents of Oak Lawn, Worth Township, and Cook County.

Even as a senior citizen, Mr. Yourell still exhibited a youthful love for life. He bungee
