RECOGNIZING DR. ADAM G. RIESS,
THE 2011 PHYSICS NOBEL PRIZE
WINNER, FOR HIS OUTSTANDING
ACHIEVEMENTS

HON. JOHN P. SARBANES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 5, 2011

Mr. SARBANES. Mr. Speaker, I rise today to recognize Dr. Adam G. Riess, who was recently awarded the Nobel Prize for his outstanding contributions to the field of physics. Dr. Riess is a constituent of mine living in Baltimore, Maryland.

The Nobel Prize is awarded each year to recipients for outstanding achievement in physics, chemistry, medicine, literature, and peace. These prestigious awards, which were established through the generosity and vision of Albert Nobel, are reserved for the most important discoveries and inventions.

Dr. Riess, who is a professor of physics and astronomy at Johns Hopkins University and a senior staff member at the Space Telescope Science Institute, shares the 2011 physics award with two other scientists for their combined discovery that the universe is expanding at an accelerated rate—a concept that Albert Einstein first introduced but could never fully explain or prove. This discovery was made through extensive years of studying the explosions of supernova stars.

Johns Hopkins University is a Maryland institution second to none in the world and Dr. Riess is the fourth member of the faculty to receive the Nobel Prize. Hopkins, the affiliated Applied Physics Lab, the National Institutes of Health, and other premier scientific institutions in our state showcase the best of public-private partnerships and have produced innovations that change the world and power our local economy. Dr. Riess' discoveries, and the many breakthroughs and innovations that are accomplished in partnership with the federal government, underscore the importance of federal funding for scientific research. Dr. Riess indicated that the Hubble Space Telescope, in particular, was critical to his research.

I applaud Dr. Riess' outstanding achievement as it reflects many years of study and hard work and a deep commitment to scientific innovation. Congratulations to Dr. Riess and his colleagues for their groundbreaking work in the field of physics and for their extraordinary contributions to science.
