SENATE CONCURRENT RESOLUTION 33—REORGANIZING THE NEED TO IMPROVE PHYSICAL ACCESS TO MANY FEDERALLY FUNDED FACILITIES FOR ALL PEOPLE OF THE UNITED STATES, PARTICULARLY PEOPLE WITH DISABILITIES

Mr. BLUMENTHAL submitted the following concurrent resolution; which was referred to the Committee on Health, Education, Labor, and Pensions:

S. CON RES. 33

Whereas in 2009, 12 percent of all people in the United States reported having some disability;

Whereas in 2008, 16.9 percent of veterans, amounting to more than 13,000,000 people, reported having a service-related disability to the Department of Veterans Affairs;

Whereas according to the Current Population Survey of the Bureau of the Census, the number of people in the United States that report having a disability is at a 20-year high;

Whereas the Act entitled “An Act to insure that certain buildings financed with Federal funds are so designed and constructed as to be accessible to the physically handicapped”, approved August 12, 1968 (42 U.S.C. 4151 et seq.), referred to in this preamble as the “Architectural Barriers Act of 1968”, was enacted to ensure that certain federally funded facilities are designed and constructed to be accessible to people with disabilities and requires that physically handicapped persons have ready access to, and use of, post offices and other Federal facilities;

Whereas automatic doors, though not mandated by either the Architectural Barriers Act of 1968 or the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.), provide a greater degree of self-sufficiency and dignity for people with disabilities, and the elderly, who may have limited strength to open a manual door;

Whereas a report commissioned by the Architectural and Transportation Barriers Compliance Board (referred to in this preamble as the “Access Board”), an independent Federal agency created to ensure access to federally funded facilities for people with disabilities, recommends that all new buildings used by the public should have at least 1 automated door at an accessible entrance, except for small buildings where adding such a door may be a financial hardship for the building owners;

Whereas States and municipalities have begun to recognize the importance of automatic doors in improving accessibility;
