

Dr. Gutierrez was a leader and role model in the Del Rio community. His passion and love for Del Rio was most exemplified through his work as a doctor and leadership as mayor. Dr. Gutierrez served for 20 years as Del Rio's mayor, earning the title "dean of Del Rio's mayors." He was also as equally dedicated to serving the community through his medical practice, delivering nearly 5,000 babies over a career that spanned five decades. Only after suffering a heart attack in 2010 did he decide to close his practice.

While Del Rio has lost an icon and hero, Dr. Gutierrez's impact and passion for the community will certainly live on.

TAIWAN PRESIDENT MA YING-JEU'S SECOND INAUGURATION

HON. BLAINE LUETKEMEYER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, May 18, 2012

Mr. LUETKEMEYER. Mr. Speaker, Ma Ying-jeou will be sworn in for a second term on May 20, 2012, as Taiwan's president. It's worth saluting President Ma on this special occasion, as the United States has a no better friend or ally than Taiwan. For decades, Taiwan has been of significant security, economic and political interest to the United States. Today, Taiwan's 23 million people enjoy self-governance with free elections, and Taiwan's economy is the 17th largest in the world—and growing. Taiwan is the ninth-largest U.S. trading partner, including the sixth-largest market for U.S. agricultural exports, a significant economic consideration for my district.

Going back to the onset of the Cold War, Taiwan and the United States have stood beside one another in some of our countries' darkest hours and most challenging times. Taiwan was an indispensable link in America's Korean War effort. U.S. General Douglas MacArthur rightly labeled Taiwan "an unsinkable aircraft carrier in the Pacific" when speaking of the joint U.S.-Taiwan Korean War effort. Taiwan ground troops fought side by side with U.S. forces in the fierce battles at, below and above the 38th Parallel. The Washington-Taipei alliance was later institutionalized in the Sino-American Mutual Defense Treaty and Formosa Resolution of 1955. Taiwan was also a key base, and intelligence-gathering source, for U.S. forces in the Vietnam War. Under President Ma's leadership, our relationship has remained strong, as he has sought U.S. support for his policies, including U.S. arms sales, to ensure Taiwan is in a strong position to continue cross-strait talks.

The United States has stood by Taiwan as it has faced challenges from across the strait over the last 62 years. And while travel, trade and investment flourish across the strait today, threats remain, as Beijing refuses to renounce its right to use force against Taiwan. And yet, Taiwan has shown that a strong democracy can thrive even in the face of continued threats.

Mr. Speaker, I urge all my colleagues to join me in congratulating President Ma on his second inauguration. I also would ask my colleagues to remain mindful of the promise we made to the people of Taiwan almost 33 years ago under the Taiwan Relations Act (TRA) of 1979, the cornerstone of our two nations' bilat-

eral relationship. Ties or tension across the Taiwan Strait affect global peace and stability, and a more stable East Asia is not only in the best interest of Taiwan, but also in the best interest of the United States.

HONORING SOUTH GIBSON HIGH SCHOOL

HON. STEPHEN LEE FINCHER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, May 18, 2012

Mr. FINCHER. Mr. Speaker, it is my privilege to rise today to honor the first ever graduating class of South Gibson High School, located in Medina, Tennessee.

Undoubtedly the work of starting a brand new high school is extremely difficult but today's graduation offers the opportunity to celebrate in a job well done. Congratulations to Principal Phil Rogers and his dedicated team of teachers and staff in preparing the young minds of the Class of 2012 to enter their next phase of life.

The vision of South Gibson High School is to create a community of empowered learners. Although today ends their journey in high school; the ever-changing demands of the 21st century economy requires them to always be thinking, challenging, and innovating. And it's that kind of life-long learning that will keep America's place, as President Ronald Reagan said, "a shining city on the hill."

Please join me in honoring the first graduating class in the history of South Gibson County High School.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2013

SPEECH OF

HON. ELIJAH E. CUMMINGS

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 17, 2012

The House in Committee of the Whole House on the state of the Union had under consideration the bill (H.R. 4310) to authorize appropriations for fiscal year 2013 for military activities of the Department of Defense, to prescribe military personnel strengths for fiscal year 2013, and for other purposes:

Mr. CUMMINGS. Mr. Chair, I offer this bipartisan amendment with Congressman JEFF LANDRY to increase transparency surrounding the issuance of waivers allowing foreign vessels to carry cargo between points in the United States. I thank Congressman LANDRY for his leadership on this issue.

A report recently released by PriceWaterhouseCoopers found that in 2006, the most recent year for which data were available, the Jones Act fleet supported nearly 74,000 direct jobs in the U.S. shipbuilding and domestic waterborne transportation industries.

These jobs, in turn, supported more than \$36 billion in economic output in 2009 and provided \$6.5 billion in labor compensation.

Among other provisions, the Jones Act requires that a vessel cannot carry cargo between two U.S. points unless the vessel has been built in the United States, and is owned and crewed by Americans.

The Jones Act can be waived in the interest of national defense. However, the Maritime Administration (MARAD) must first assess whether Jones Act-qualified vessels are available to carry the cargo under consideration.

Following the release of oil from the Strategic Petroleum Reserve in 2011, the Department of Homeland Security waived the Jones Act dozens of times despite the availability of Jones Act-qualified vessels.

According to documents provided by the Department of Transportation, waivers were issued at the request of firms such as Shell Oil Company, ConocoPhillips Company, and BP Products North America.

As a result, the American oil released from the American Strategic Petroleum Reserve was then carried by vessels flagged in such countries as Liberia, the Marshall Islands, Singapore, the Bahamas, and Panama.

The amendment I offer with Congressman LANDRY is a simple one. Let me be clear: though I think waivers should be issued only in the rarest of circumstances, this amendment does not prohibit the issuance of any waivers.

Instead, it would require the Maritime Administration (MARAD) to include in its assessments of the availability of Jones Act-compliant vessels information on the actions that could be taken to enable Jones Act-qualified vessels to carry the cargo for which a waiver is sought.

MARAD would also be required to publish its assessments on its website and provide notification to Congress when a waiver is requested or issued.

Adoption of these provisions will significantly enhance the transparency surrounding the issuance of Jones Act waivers so that we can assess whether every possible opportunity to utilize Jones Act-compliant vessels in the coastwise trade has been utilized.

I urge Members on both sides of the aisle to support our bi-partisan amendment to ensure that every available step is taken to utilize American mariners to carry American cargoes on American ships between American ports.

KIPP BALTIMORE'S BRAD NORNHOLD WINS BALTIMORE CITY "TEACHER OF THE YEAR"

HON. MIKE ROGERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, May 18, 2012

Mr. ROGERS of Michigan. Mr. Speaker, Bradley Nornhold was a founding teacher at KIPP Ujima Village Academy when the public charter school opened in 2002. In the past ten years, Brad has been a transformational force in the lives of the students in Northwest Baltimore. As a middle school math teacher, his results speak for themselves. In 2011, his seventh grade students produced the highest math test scores in the city as measured by the Maryland School Assessment. Brad makes no excuses and leaves no child behind. 100 percent of his students passed the test. The advanced scores were the fourth highest in the State of Maryland.

But test scores do not tell the whole story. Brad's students embrace the work that it takes to produce such results, and believe that the
