

supporting what we are doing in terms of our approach on conservation. I am pleased with that.

The rural development provisions of this bill affect every community outside of our urban areas. The majority of Michigan—we see support through financing for water and sewer projects, small businesses, housing, working with local law enforcement, police and firefighters, local mayors and city council people, counties all across Michigan and the country, certainly in Oregon, where rural development funding and support for quality of life and jobs and rural communities is very much a part of the bill.

We think of the bill in terms of production agriculture. Obviously, it is critical. I don't know any business that has more risk than a farmer or rancher—nobody. So we all have a stake. We have the safest, most affordable, dependable food supply in the world. We wanted to make sure no farmer loses a farm because of a few days of bad weather. What we do in production agriculture is very important.

We also have a broad role, together with rural communities, with ranchers and farmers, to support our land and our water and our habitat and our air. We do that through conservation. We have rural development. We have an energy title that allows us to take what we do—the byproducts from agriculture, whether that be food or animal waste or biomass from forests or corn or wheat or soybean oil—whatever it is—to be able to create jobs through bio-based manufacturing, advanced biofuels, going beyond corn to other kinds of advanced cellulosic biofuels, which is very much a part of the bill, all of which creates jobs.

We are creating jobs in a multitude of ways in the bill. We are also supporting families who, because of no fault of their own in this recession, have been hit so hard and need temporary food help. That is also a very big and important part of the bill. For the people in my State who have been hit very hard in the last number of years, it is important that we be there. They have paid taxes all their lives and supported their neighbors. They have been there for other people. Now, if they need some temporary help, we need to make sure it is there for them as well. That is a very important part of the bill also.

In addition, we see a whole range of efforts around local food systems that also create jobs—farmers markets, children's schools being able to get fresh fruits and vegetables, schools being able to purchase locally, things that we can do to support families to put healthy food on the table for their children or make sure it is available in school—very important efforts going on there. We make sure that all of agriculture is included in our local food systems. That is a very important part of the bill.

This is a large effort. We do it every 5 years. It takes a tremendous amount

of work. Every region of the country has a different view and different crops that they grow and different perspectives, so it is a lot of hard work to bring it all together.

This evening we have been able to come together on a path to final passage, agreeing to the list of amendments. This is a democracy. I don't agree or support all of those amendments. I know other colleagues don't as well. We will talk about them and debate, and we will vote. That is the Senate at its best. That is what we are doing here by agreeing to a process or list of amendments from every part of the country.

Members on both sides have very strongly held beliefs. We respect that. We respect their right to be able to debate those amendments, and I also thank those for the amendments that will not be brought up, which were not in the unanimous consent agreement. I think we had about 300 amendments when we started. We knew it was not possible to be able to vote on every one of those. So colleagues' willingness to work with us was important, and I am grateful to the people who worked with us on both sides of the aisle and those whom we will continue to work with.

This is another step in the process, as we have put together a bill that we reported out of committee with a strong bipartisan vote. Now we have brought it to the floor with a large majority. Ninety out of 100 colleagues came together to say: Yes, we should debate and discuss and work on this Agriculture Reform, Food, and Jobs Act.

Now, with the agreement we have, Members are saying: Yes, we should go forward and work on these amendments and have a final vote. In the democratic process, people of good will are willing to come together and have the opportunity to debate and vote. That is what it is about. I am grateful that colleagues were willing to work with us to be able to do that.

We are waiting for the final wrap-up comments. At this moment, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Ms. STABENOW. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS CONSENT AGREEMENT—S.J. RES. 37

Ms. STABENOW. Mr. President, I ask unanimous consent that on Tuesday, June 19, at a time to be determined by the majority leader, after consultation with the Republican leader, the Republican leader or his designee be recognized to move to proceed to the consideration of S.J. Res. 37, a joint resolution disapproving a rule promulgated by the Administrator of the Environmental Protection Agency relating to emission standards for certain steam generating units; that there be up to 4

hours of debate on the motion to proceed, with the time equally divided and controlled between the two leaders or their designees; further, that 2 hours of debate equally divided occur on Tuesday, June 19, and the Senate resume consideration of the motion to proceed at 10:30 a.m., Wednesday, June 20, for the remaining 2 hours of debate; that at 12:30 p.m. on Wednesday, the Senate proceed to vote on the adoption of the motion to proceed; that if the motion is successful, then the time for debate with respect to the joint resolution be equally divided between the two leaders or their designees; that upon the use or yielding back of time, the joint resolution be read a third time and the Senate proceed to vote on passage of the joint resolution; finally, all other provisions of the statute governing consideration of the joint resolution remain in effect.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### MORNING BUSINESS

Ms. STABENOW. Mr. President, I ask unanimous consent the Senate proceed to a period of morning business with Senators permitted to speak therein for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### ADDITIONAL STATEMENTS

##### TRIBUTE TO CHRIS BERN

• Mr. HARKIN. Mr. President, Chris Bern retires on July 14 as president of the Iowa State Education Association after completing his second two-year term in that position. Chris is a longtime advocate for quality education within ISEA and is an important voice for teachers at the local, State, and national levels. I have valued Chris's views on a variety of education issues.

I am especially grateful to Chris for his leadership on anti-harassment and anti-bullying issues within the Iowa State Education Association and the National Education Association. Chris understood the importance of anti-bullying efforts before recent events drew national attention to the topic. Chris is a certified trainer for the NEA's program on school safety and anti-harassment issues. One of his leadership priorities at ISEA has been to promote anti-bullying awareness in our schools, traveling to locals around the State to talk about how to protect students from mistreatment by their peers.

After graduation from Buena Vista College, Chris started his teaching career as a junior high school math teacher in Woodbine, IA and then moved to Knoxville, IA, where he taught high school math. He soon became involved in the Iowa State Education Association, serving in a variety of local, State and national roles. Chris spent 11 years on various committees, including the ISEA Resolutions and
