

limit in Ohio, that there will be a monitoring program and a database available. So it succeeds by getting States' different programs to work together securely, reliably, and efficiently.

I would also like to thank the Alliance of States with Prescription Monitoring Programs, which has played a pivotal role in promoting national interoperability standards.

These are examples where the Senate acted to try to make our communities safer and to help ensure that young people can achieve their God-given potential. Working together, we have been able today to help ensure the health and well-being of our communities.

Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BENNET). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DURBIN. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. DURBIN. I ask unanimous consent the Senate proceed to a period of morning business with Senators permitted to speak therein for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

FREEDOM OF INFORMATION ACT

Mr. LEAHY. Mr. President, on July 4, the Nation will celebrate the 46th anniversary of the enactment of the Freedom of Information Act, FOIA. The "right to know" is a cornerstone of our Democracy. For five decades, Americans have counted on FOIA to help shed light on the activities of their government.

As we reach this important milestone, there are many victories to celebrate. This week the Senate will enact the Food and Drug Administration Safety and Innovation Act, which includes important language that I helped craft to protect the public's ability to access information under FOIA. Section 710 of that bill will allow the Food and Drug Administration, FDA, to obtain information about drug inspections and drug investigations undertaken by foreign governments, while at the same time ensuring that the American public has access to information about potential health and safety dangers. I thank Senators HARKIN and ENZI and the many open-government and consumer groups—including OpenTheGovernment.org and Public Citizen—who worked with me to enact this FOIA provision.

Last year the Senate unanimously passed the Faster FOIA Act, a bill that I cosponsored with Republican Senator JOHN CORNYN. This legislation would create a bipartisan panel of govern-

ment and outside experts to make recommendations on improving the FOIA process. Sadly, despite the overwhelming and bipartisan support for this good-government legislation, this bill has been languishing in the House of Representatives for almost a year.

During the 3 years since President Obama made a historic commitment to restoring the presumption of openness in our government, the Obama administration has also taken steps to strengthen FOIA. I especially want to commend the Office of Government Information Services—and the inaugural Director of the OGIS, Miriam Nisbet—for working with the Environmental Protection Agency and the Department of Commerce to develop an online FOIA Module designed to help agencies better meet their requirements under the FOIA. This new FOIA program reaffirms the President's commitment to transparency in our government and will make government information more accessible to the American people.

While these and other FOIA accomplishments give us good reasons to celebrate, many other threats to the public's right to access information under FOIA remain. In the coming weeks the Senate is expected to consider several legislative exemptions to FOIA in relation to cybersecurity legislation. As this legislative process unfolds, I intend to work with Members on both sides of the aisle to ensure that the American public's ability to access information about threats to their health and safety in cyberspace is protected.

Securing our Nation's critical infrastructure information is a pressing national priority. So, too, is protecting the rights of Americans to know what their government is doing. We must strike a careful balance between security and openness in our cybersecurity policies. The anniversary of FOIA's enactment provides a timely reminder of just how important it is for the Congress to get that balance right.

As I have said many times before, open government is neither a Democratic issue, nor a Republican issue—it is truly an American value and virtue that we all must uphold. It is in this bipartisan spirit that I will continue to work to fulfill FOIA's promise of openness in our government and that I join all Americans in celebrating the 46th anniversary of the Freedom of Information Act.

TRIBUTE TO THE U.S. ARMY INTELLIGENCE COMMUNITY

Mr. McCAIN. Mr. President, it is my distinct privilege to honor the outstanding men and women who have made lasting contributions to U.S. Army Intelligence over the years. On July 1, 2012, MG Gregg C. Potter, commanding general of the U.S. Army Intelligence Center of Excellence and Fort Huachuca, will officially recognize the 50th anniversary of the found-

ing of the Military Intelligence Branch and the 25th anniversary of the Military Intelligence Corps at Fort Huachuca, AZ. This is a momentous occasion, and I congratulate all Army intelligence professionals—soldiers and civilians alike—on these distinguished achievements.

Timely and accurate intelligence information has always been critical to the success of our Armed Forces on the battlefield. Across all intelligence disciplines, Army intelligence professionals have collected, analyzed, and supplied this vital information to commanders at all levels—from the tactical to the strategic. The intelligence information they supplied has directly contributed to winning our Nation's wars and to saving lives. Army Intelligence professionals have carried out this mission with great courage, devotion, and skill since we declared our independence 236 years ago. We recognize this legacy and look forward to Army intelligence's continued success and service to our country in the future.

Two critical events shaped the Military Intelligence Corps into the organization that exists today.

On July 1, 1962, the Secretary of the Army signed a general order authorizing the creation of the Army Intelligence and Security Branch. With this authorization, all Army intelligence soldiers, including regular Army and Reserve officers, were placed into a distinct branch. It ended the practice of detailing officers from other branches into intelligence positions and facilitated the professionalization of the intelligence field. By establishing a branch equal to all others, the Army recognized the critical importance of military intelligence.

On July 1, 1987, the Military Intelligence Corps was activated at Fort Huachuca. With the activation of the Corps, all Army intelligence professionals, regardless of their discipline, were symbolically bound together into one unified organization under the U.S. Army Regimental System. Since its activation, the unity of purpose and mission of the Military Intelligence Corps has remained vital to the success of the Army.

Today, the U.S. Army Intelligence Center of Excellence at Fort Huachuca is the home of military intelligence. Every year, the center trains approximately 20,000 students in the intelligence field, including initial military training, professional military education courses for all ranks and intelligence specialties, mobile training teams, and foreign military students.

I am immensely proud of the men and women in the U.S. Army intelligence community. They work tirelessly to protect our Nation and deserve our deepest gratitude for the sacrifices they have made. As indicated by their motto "Always Out Front," Military intelligence will remain a critical element of the readiness of our Armed Forces.
