

that I rise to pay tribute to a fallen American hero. Army Sergeant First Class William Kelly Lacey of Niceville, Florida was killed on January 4, 2014, in Nangarhar Province, Afghanistan, while in support of Operation Enduring Freedom. SFC Lacey was assigned to the 201st Brigade Support Battalion, 3rd Brigade Combat Team of the 1st Infantry Division out of Fort Knox, Kentucky.

SFC Lacey was a native Northwest Floridian who came from a family deeply committed to military service, with both his father and older brother serving in our Armed Forces. He was born at Eglin Air Force Base in Valparaiso, Florida and raised in Niceville, Florida, where he graduated from Niceville High School. SFC Lacey was proud of his family's service record, and in 2003, he continued this noble tradition by joining the Army with the goal of attaining the same rank as his father, which he achieved within the past months. During his time in the Army, he served as a paratrooper with the Army's 82nd Airborne Division and as a wheeled vehicle mechanic with the 1st Infantry Division. SFC Lacey served three tours in Iraq and was completing his second in Afghanistan when his life was taken.

SFC Lacey was described by his friends and family as an easy-going and fun-loving individual, but on the battlefield, he was a fearless warrior who, according to one of his commanders, "always ran towards the gun." He dedicated his life to military service to ensure those who would do our Nation harm were defeated and that our Constitutional rights were upheld. We will never forget his ultimate sacrifice toward that honorable end. To SFC Lacey's loving wife, Ashley; his daughter, Lily, and stepdaughters, Caiden, Trinity, and Brandy-Lynn; his mother, Pam; his father, John, and stepmother, Karla; and two older brothers; three younger stepbrothers; his extended family, and friends, my wife Vicki joins me in offering our most sincere condolences and prayers.

Mr. Speaker, on behalf of a grateful United States Congress and Nation, I stand here today to honor Sergeant First Class William Kelly Lacey and all of the heroes we have lost. May God continue to bless them and the men and women of our United States Armed Forces.

CELEBRATING THE 100TH
BIRTHDAY OF DR. MARION DOWNS

HON. DIANA DeGETTE

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 16, 2014

Ms. DeGETTE. Mr. Speaker, I rise today to recognize the 100th birthday of Dr. Marion Downs and celebrate her pioneering work to expand hearing screening in newborns and early intervention for individuals with hearing problems. Dr. Downs' groundbreaking work has served as an inspiration for many generations of Coloradans and the medical community.

Dr. Downs is a Distinguished Professor Emerita at the University of Colorado School of Medicine. She began her esteemed career in Colorado, at University of Denver, where she was a professor of Audiology and Director of the Audiology Clinic from 1951 to 1959. It was there that Dr. Downs began implementing

hearing aids for infants as young as six months old during a period of time when hearing aids were typically fitted at the age of three. Her practice of applying hearing aids at such a young age has shown tremendous results in hearing, speech and communications development. Dr. Downs then moved to the University of Colorado School of Medicine where she developed the first national infant hearing screening program in 1963. Since that time, she has devoted her professional career to identifying and managing infant hearing issues and developmental strategies.

Throughout her 35 year career, Dr. Downs has received numerous awards such as the Outstanding Achievement award from the University of Minnesota, Gold Medal Recognition from the University of Colorado, Northern Colorado and the University of Arizona School of Health and Sciences. She has received honors from nearly every auditory and speech society and has co-authored textbooks such as *Hearing in Children*, which serves as a worldwide resource to educate students on childhood auditory disorders.

At the age of 100, the lively Dr. Downs continues her work on important health issues related to auditory, speech and communication disorders. There is no doubt that Dr. Downs tireless efforts will continue to inspire future generations for many years to come.

CONGRATULATING FATHER DONALD MOWERY ON RECEIVING THE 2014 BE THE DREAM MLK LEGACY AWARD

HON. STEVE COHEN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 16, 2014

Mr. COHEN. Mr. Speaker, I rise today to congratulate Father Donald Mowery on receiving the 2014 Be the Dream MLK Legacy Award. This special award is given to those individuals whose lives have "embodied the spirit and legacy of service, sacrifice and hope" that characterized the work of Dr. Martin Luther King, Jr. As an agent of change during the Civil Rights Movement, it is fitting that this award be bestowed upon Father Mowery in recognition of his accomplishments and contributions.

Donald Mowery was born in Chattanooga, Tennessee and was brought up in a funeral home, which he had intended to make his life's work before being called to ministry. He attended school in Chattanooga before finishing college then seminary school at Berkeley Divinity School at Yale. While studying at Yale, he worked with young people at St. Peter's Episcopal Church and upon completion, he was assigned to a parish in Nashville, Tennessee, where he continued this important work. In Nashville, he became involved with the police department, holding services for the officers during the shift changes on Saturdays. This garnered him recognition from his Bishop and the Mayor of Nashville.

In 1963, Father Mowery received an invitation from the Bishop to continue his work with young people and the police department at St. Mary's Cathedral in Memphis, Tennessee. He joined Youth Service and began working with kids from different social and economic backgrounds, taking them on camping, boating,

fishing and basketball trips in parks around the city. In 1968, following the assassination of Dr. King, Father Mowery received a warning that the parks would not be safe to conduct his program out of fear that he or one of the kids could be hurt among the unrest. He was advised to end the program but for Father Mowery, this only underscored the importance of the youth program.

Determined to keep the program open, Father Mowery appealed to the Navy base in Millington, Tennessee to use its facilities. Although his proposal was initially turned down, over the course of a weekend, the Navy reversed its decision and became a large supporter of the program. The Navy provided food assistance, shirts for the kids and exposure to military training techniques, which would become the first military youth training program. The program was such a success that the Department of Defense invited Father Mowery to Washington, D.C. to discuss starting 125 similar programs on military bases across the country. This led to the establishment of the national Youth Service USA.

Father Mowery's Memphis-based Youth Service and the Bridge Builders program, founded by Becky Wilson, joined to become BRIDGES in 1996. Today, BRIDGES is considered the "premier youth organization in the Memphis area." There is no doubt that Father Mowery's work is worthy of this award named after Reverend Dr. Martin Luther King, Jr. Mr. Speaker, I ask all of my colleagues to join me in congratulating Father Donald Mowery on being awarded the 2014 Be the Dream MLK Legacy Award.

"DO IT FOR YOUR DAUGHTER"
BREAST CANCER AWARENESS
CAMPAIGN GROWS

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 16, 2014

Mr. SMITH of New Jersey. Mr. Speaker, I rise today to commend Michelle Coyoti-Varela, Joyce Falotico, Morgan Fuebacher, Jacqueline Hennessy, Adriana Poznanski, and Francesca Poznanski of Girl Scout Troop 1701 of Middletown, New Jersey for their breast cancer prevention and awareness campaign. Their national initiative, "Do It For Your Daughter," encourages moms to get mammograms so as to ensure and promote early detection, and if necessary, effective treatment.

The National Cancer Institute estimates that in 2013 alone, 232,340 Americans were diagnosed with breast cancer, and 39,620 died as a result. Roughly one in eight American women will be diagnosed with breast cancer sometime in their lifetime. For them and their loved ones, research and treatment provide hope as they fight the disease. Many survivors and their families commit to awareness campaigns as an opportunity to save lives and help others going forward.

Each of one of these extraordinarily bright and articulate girls has had their life touched by someone who has had breast cancer. They realized this common thread during their Troop Health Walk while discussing what they could accomplish as a troop—and how they could change the world for the better. Through research and meetings with health experts,
