

hadn't necessarily had the opportunity to work together before, but realized this is a very important concern, and that this particular river has enormous impacts. Because this river is in the southern part of my district, which means it is close to the southern border of Maine, it is surrounded by a very developed part of our State, although not much is that developed in Maine. We are one of the most rural States in the country with only 1.3 million people, so we are not a particularly overdeveloped State, but this is part of the southern part of the State, where there is a lot of activity going on, and people were concerned even more so because they wanted to make sure that when visitors come to our State, when residents decide to make it their home, we can count on the fact that there will be this part of the river and the area around it that will be looked at very closely when thinking about future uses and how to make sure that it is always there for those people who depend on it for jobs, for the fishing industries that are so critically important, and for the communities that care deeply about its history and about the activities that go on there. That is part of what has made this bill so particularly important to our State. I am extremely grateful to everyone on the committee who worked to help us bring it to the floor.

With that, I yield back the balance of my time.

Mr. HASTINGS of Washington. Mr. Speaker, I thank my colleague for her kind words, and I support this legislation.

I yield back the balance of my time.

Mr. MICHAUD. Mr. Speaker, I rise today to express my support for the York River Wild and Scenic River Study Act of 2013.

I want to thank my friend and colleague, Representative PINGREE, for her leadership on this bill.

A healthy York River is important to the economic and environmental vitality of Southern Maine. The river is used daily by fishermen and recreational boat users, and its beauty is a significant part of the tourist economy that is so integral to Southern Maine. The river is an important home for wildlife, providing a home to more than 100 waterbirds and 28 species of fish.

This important legislation would create a study to determine whether or not the York River and its tributaries should be included in the Wild and Scenic Rivers Program. The study would help evaluate current and future demands on the river, and determine whether or not extra federal protection is necessary to keep the river strong and healthy.

Individuals, businesses, and wildlife depend on the York River. We must keep it strong and healthy for years to come.

I urge my colleagues to vote in favor of this bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. HASTINGS) that the House suspend the rules and pass the bill, H.R. 2197.

The question was taken; and (two-thirds being in the affirmative) the

rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.
