

being held on board an American flag-of-truce vessel in Baltimore Harbor, took notice of the American flag still flying atop Fort McHenry. Key realized then that the Americans had survived the battle and stopped the enemy advance. He was so moved by the sight of the American flag flying following the horrific bombardment, he composed a poem called the "The Defense of Fort McHenry," which was published in the Baltimore Patriot and Advertiser newspaper later that year. This poem, and later the song, inspired love of country among the American people and not only helped usher in the Era of Good Feelings immediately after the war, but became a timeless reminder of American resolve. "The Star Spangled Banner" officially became our national anthem in 1931. The flag that flew over Fort McHenry and inspired this anthem is now a national treasure on display at the Smithsonian Institution, a very short distance from where we are today.

On this Maryland Day, Marylanders are in the midst of celebrating Baltimore's role in the bicentennial anniversary of the War of 1812. The *Pride of Baltimore II*, named in honor of the Baltimore clipper the *Chasseur*, set sail from the Baltimore Inner Harbor to the State capital while carrying a replica of the Star Spangled Banner "that was still there" after the bombardment of Fort McHenry in September 1814. Sewn by volunteers of the Maryland Historical Society, this flag will be presented to Governor Martin O'Malley and members of the Maryland General Assembly at the Annapolis Statehouse.

I am proud of the legacy of my home State and the efforts Marylanders have made and continue to make to remember those who have come before us. I thank all of those who participated in Maryland Day ceremonies and congratulate the students who learned something new about our great State today.●

CONGRATULATING PENNY REYNOLDS AND ANDREA DAVIS

● Mr. HELLER. Mr. President, I wish to congratulate Carson City teacher, Penny Reynolds, and 12th grade senior, Andrea Davis, on their Nevada Restaurant Association ProStart State culinary competition victories. Each was named Teacher and Student of the Year, respectively. Nevada is proud to offer education in a wide variety of subjects, including the culinary arts.

For nearly 30 years, Ms. Reynolds has been an educator in my home State of Nevada. Ms. Reynolds and her 173 students serve lunch four times a week to the community in their student-operated establishment. Ms. Reynolds' Teacher of the Year designation, based on her high expectations for her program and her students' knowledge, is nothing short of deserving. I commend Ms. Reynolds for her leadership and positive influence in Nevada's education system.

Along with her team of chef classmates, 18-year-old Andrea Davis competed at and won this year's ProStart State hot foods competition, making for 10 first place finishes at the annual event for my alma mater, Carson High School. The five culinary students were each awarded scholarships for their winning dish. I wish Ms. Davis the best of luck on her and the entire team's trip to the national arena.

I admire and recognize the commitment of our teachers to uphold high education standards for Nevada. Educators work tirelessly to ensure our Nation's students are prepared to compete in the 21st century, and I am grateful for Ms. Reynolds's strong leadership and positive influence on Nevada's youth. My home State of Nevada is proud and privileged to acknowledge such an extraordinary educator and leader.

Nevada is fortunate to have such strong educational leadership serving the students of the Silver State. I ask my colleagues to join me in congratulating Ms. Reynolds, Ms. Davis, and the entire Carson High Culinary Arts program on their appetizing successes thus far.●

REMEMBERING RAYMOND JOHN NOORDA

● Mr. LEE. Mr. President, this month, the Utah Valley Chamber of Commerce will honor Raymond John Noorda, posthumously, with the 2014 "Pillar of the Valley" Award. I would like to take a moment to recognize the achievements of this great Utahn.

Raymond Noorda, or "Ray," as everyone knew him, was born in Ogden, UT in 1924 to Dutch immigrants, Bertus and Alida Noorda. Like nearly all Americans who grew up during the Depression, Ray learned the virtue of hard work early on, and he never stopped working throughout his life. The *Deseret News* reports that during his youth, Ray worked "in a candy shop, setting pins in a bowling alley, as a loading clerk at a train station, picking cherries, selling magazines, and even herding sheep."

He was an outstanding baseball player, and he was asked to join a professional team right out of high school. However, his mother had other plans for young Ray, and he subsequently enrolled in classes at Weber State College. During World War II, Ray put school on hold and served in the Navy as an electronics technician, working on radar systems. At the conclusion of his military service, he returned to his studies, transferring from Weber to the University of Utah, where he earned a degree in engineering. Ray married his sweetheart Tye shortly after graduating from college, and they were together for 56 years, until Ray's passing in 2006.

After his graduation from college, Ray worked for General Electric for 21 years, where he was known as an innovator and entrepreneur. He eventually

left the company and led a number of businesses to success in the following years. In the early 1980s, Ray became the leader of a struggling Utah company called Novell Data Systems, which would shortly thereafter become Novell.

Ray worked to put together a team of engineers, dubbed "SuperSet." The team eventually invented powerful networking software, which opened the doors to modern networking. For this and other contributions, Ray has been called the "Father of Network Computing." This development set Novell on a path to success and pushed the company far ahead of their early competitors in computer networking throughout the 1980s and into the 1990s.

Of Novell's success under Ray's leadership, *The Independent* reported, "Novell's NetWare product was to become the de facto standard networking software from the late 1980s through to the mid-1990s. Noorda oversaw the growth of the company from 17 to 12,000 staff, whilst still maintaining a community spirit for his employees, whom he treated with immense respect and who, in turn, affectionately referred to him as Uncle Ray."●

Ray was a visionary and humble leader, who believed that cooperation with competitors would help grow the emerging computer networking industry. Thus, he led his company with a term he coined—"co-opetition"—and Novell was a leader in cooperative advancements in the computing industry. One of Novell's Vice Presidents once said of Ray, "What he preaches is what you always wanted to hear from your father—love, sharing—and he uses those words." When Ray spoke to employees, he was rarely, if ever, without a joke, and he was always positive and encouraging.

Ray's success in business was a testament to his personal character and virtues. He loved children, and enjoyed serving in his church. His philanthropy knew no bounds, and his family continues that legacy in Utah and throughout the country each day. Ray was a titan of business, and his life is a shining example for not only business leaders, but also Americans in general. I join with the Utah Valley Chamber in honoring his wife Tye and his family, and I thank them for their support of such a great man. I pray that we will honor the life of Ray Noorda by doing the best we can in our individual capacities, and by helping those around us achieve greatness, success, and happiness throughout life.●

TRIBUTE TO ELDER DALLIN H. OAKS

● Mr. LEE. Mr. President, this month, the Utah Valley Chamber of Commerce will honor Elder Dallin H. Oaks, of the Quorum of the Twelve Apostles of the Church of Jesus Christ of Latter-day Saints, with the 2014 "Pillar of the Valley" Award. I would like to take a moment to recognize the achievements of
