

fishing, shipbuilding, and tidal-powered sawmills. The wealth produced by the sea and by hard work was invested in schools and churches to create a true community.

Boothbay was a vital center for revolutionary activity during America's fight for independence. The strategic importance of the harbor put the small town under frequent enemy attack, and more than 100 patriots rose to its defense. During the war Captain Paul Reed established himself as one of our young nation's ablest and most courageous naval commanders. The Reverend John Murray was an eloquent and fearless voice for freedom, and his powerful words called many to its cause.

In the decades that followed, Boothbay became a place of industry and innovation with such endeavors as fish processing, canning, and fish-oil production. During the 1830s, Boothbay's bracing sea breezes and crystal-clear waters made it an early health spa, and by the end of the 19th century the town became a favorite destination for vacationers and summer residents.

Today the people of Boothbay continue to build on those traditions. Fishing and lobstering are mainstays of the economy. Fine hotels, inns, and restaurants support a thriving tourism industry. Boatyards build luxury yachts, fishing boats, and advanced vessels for military and law-enforcement purposes. Since its founding in 1974, the Bigelow Laboratory for Ocean Sciences has become a global leader in oceanographic research. Lobster boat races, the annual Windjammer Days, and the Fishermen's Festival celebrate the town's maritime heritage, and the restored Opera House provides a beautiful venue for arts and entertainment.

This 250th anniversary is not just about something that is measured in calendar years. It is about human accomplishment, an occasion to celebrate the people who for more than two and a half centuries have pulled together, cared for one another, and built a community. Thanks to those who came before, Boothbay has a wonderful history. Thanks to those who are there today, it has a bright future.

TRIBUTE TO GENERAL WILLIAM L. SHELTON

Mr. UDALL of Colorado. Madam President, I wish to recognize Gen. William L. Shelton, commander of Air Force Space Command, on the occasion of his retirement from the U.S. Air Force.

Over the course of his 38-year career in the U.S. Air Force, General Shelton has served with great distinction and made countless sacrifices for our country. I join with all Coloradans in commending his service, the sacrifices of his family—including his wife Linda and their two children, Sara and Joel—and I offer my great personal appreciation for his leadership and devotion to our Nation's security.

A graduate of the U.S. Air Force Academy, General Shelton's selection as the commander of Air Force Space Command in January 2011 culminates a distinguished career that began in 1976 at the Space and Missile Test Center at Vandenberg Air Force Base, CA. In a career dedicated to the space enterprise, he commanded units at Falcon-Schriever, F.E. Warren, Offutt, Vandenberg, and Peterson Air Force Bases. He also provided valuable leadership and counsel to the Secretary of the Air Force, the Chief of Staff of the Air Force, and the Joint Staff during multiple headquarters U.S. Air Force assignments. His positive leadership had a direct and positive impact on countless men and women in our Armed Forces, and his legacy will benefit the United States and our space policy for generations to come.

Throughout his career, General Shelton has been a vigilant advocate for our national security space programs. As the commander of Air Force Space Command, he was responsible for organizing, training and equipping more than 40,000 military and civilian personnel to assure space and cyberspace capabilities for the combatant commands and for the Nation. While those capabilities clearly contribute to our military's technological and strategic superiority, they also have become essential in humanitarian and disaster relief efforts—and they are now vital assets for the global community and world economy. As a result of his leadership, the Air Force has established a truly impressive record of successful space launches while developing an acquisition regime that has led to greater mission assurance and simultaneous cost savings across the Department of Defense. Further, his vision of future space capabilities will position the military to provide resilient, capable, and affordable space operations for the joint forces and the Nation well into the future.

General Shelton established and sustained an unmatched level of success during a time of increasing challenges. He has worked closely with the Senate Armed Services Committee, and the Subcommittee on Strategic Forces, which I am proud to chair. It has been our great privilege to work with him. His frank and informed discussions of our space systems, including the global positioning satellite system, have helped leaders and citizens around the world appreciate the value and need to protect our Nation's foundational space capabilities. I am personally grateful for General Shelton's wise counsel and firm resolve to always do what is best for the Nation and for the airmen he has led. He is a leader of exceptional intellect, candor, and integrity, and his deeply held commitment to doing the right thing for the right reasons is clear to all who have been fortunate enough to work with him.

With nearly four decades of exemplary service to our Nation, Gen. William L. Shelton deserves our most

heartfelt gratitude and praise. He and his family have my very best wishes for a long, happy, and well-deserved retirement. Our Nation and our Air Force are better for his leadership and distinguished service.

ADDITIONAL STATEMENTS

HOWARD COUNTY, IOWA

• Mr. HARKIN. Madam President, the strength of my State of Iowa lies in its vibrant local communities, where citizens come together to foster economic development, make smart investments to expand opportunity, and take the initiative to improve the health and well-being of residents. Over the decades, I have witnessed the growth and revitalization of so many communities across my State. And it has been deeply gratifying to see how my work in Congress has supported these local efforts.

I have always believed in accountability for public officials, and this, my final year in the Senate, is an appropriate time to give an accounting of my work across four decades representing Iowa in Congress. I take pride in accomplishments that have been national in scope—for instance, passing the Americans with Disabilities Act and spearheading successful farm bills. But I take a very special pride in projects that have made a big difference in local communities across my State.

Today, I would like to give an accounting of my work with leaders and residents of Howard County to build a legacy of a stronger local economy, better schools and educational opportunities, and a healthier, safer community.

Between 2001 and 2013, the creative leadership in your community has worked with me to successfully acquire financial assistance from programs I have fought hard to support, which have provided more than \$12.4 million to the local economy.

Of course my favorite memories of working together have to include their tremendous success in obtaining funds from a variety of programs I fought for including farm bill funding, public safety programs, and firefighter safety equipment.

Among the highlights:

School grants: Every child in Iowa deserves to be educated in a classroom that is safe, accessible, and modern. That is why, for the past decade and a half, I have secured funding for the innovative Iowa Demonstration Construction Grant Program—better known among educators in Iowa as Harkin grants for public schools construction and renovation. Across 15 years, Harkin grants worth more than \$132 million have helped school districts to fund a range of renovation and repair efforts—everything from updating fire safety systems to building new schools. In many cases, these Federal
