The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. CARTER of Georgia).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC, May 20, 2015.
I hereby appoint the Honorable EARL L. CARTER to act as Speaker pro tempore on this day.

JOHN A. BORRNER,
Speaker of the House of Representatives.

MORNING-HOUR DEBATE

The SPEAKER pro tempore. Pursuant to the order of the House of January 6, 2015, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning-hour debate.

The Chair will alternate recognition between the parties, with each party limited to 1 hour and each Member other than the majority and minority leaders and the minority whip limited to 5 minutes, but in no event shall debate continue beyond 11:50 a.m.

WOMEN ON 20s CAMPAIGN

The SPEAKER pro tempore. The voting was going on for months spearheaded by the Women on 20s campaign. A nominee was announced last week. Women on 20s is a campaign that has been agitating to have a woman's portrait, the portrait of a great American woman, placed on the $20 bill by at least 2020, the 100th anniversary of the U.S. recognizing a woman's right to vote.

The Women on 20s campaign narrowed down their nominees for this honor to four women: Wilma Mankiller, a trailblazer and first woman chief of the Cherokees; Rosa Parks, credited with starting the Montgomery bus boycott by not relinquishing her seat and sparking the modern civil rights movement in 1955; Harriet Tubman, an abolitionist born a slave who became one of the most noted conductors on the Underground Railroad; and Eleanor Roosevelt, who redefined the role of First Lady while being a noted civil rights and human rights activist in her own right.

More than 600,000 votes were cast in an online poll, and the winner announced with great fanfare last week is Harriet Tubman. I am overjoyed that this great American leader was selected.

As the author of Put a Woman On the Twenty Act of 2015, H.R. 1910, I think matching a specific person with a specific biography will sharpen the focus of this remarkable grassroots effort to put a woman's face on our currency. My legislation does not limit the idea of putting a woman on our money to Harriet Tubman or any particular nominee. It instructs the Secretary of the Treasury to convene the citizen panel that will make recommendations and get it done.

From my perspective, as we see women breaking barriers at every level of our society and as we see people of color breaking barriers at every level of our society, our money ought to more accurately reflect who we are as a nation in the 21st century.

I am not saying that Andrew Jackson or any of the men we honor on our money are not worthy. Many of our Founding Fathers made important contributions to this country which we continue to enjoy today in the United States and throughout the world by the spread of democracy.

It is also true that part of our history includes the practices and decisions we certainly are not proud of as a nation. Let's be straight: President Jackson was, for many, a war hero, a great defender of the young American Republic and, really, the first President and founder of the Democratic Party. He oversaw our Nation as it expanded west. It is the expansion of this Nation, the manifest destiny that pushed settlers west, that pushed the institution of slavery west, and that pushed the extermination and forced migration of Native peoples west.

That is precisely the nexus of Andrew Jackson and Harriet Tubman and illustrates why putting a new face on our money makes so much sense. The forced removal of Native peoples from their lands so that we could expand the practice of slavery is at the heart of Andrew Jackson's legacy. The landgrab and the Trail of Tears of the Cherokee people is key to contextualizing President Jackson.

It was when Harriet Tubman was about 6 years old that Jackson became President. She was born a slave in Maryland and eventually walked to freedom in Pennsylvania. She went back again and again, at least 19 times, telling more than 300 former slaves how to follow the Big Dipper constellation that pointed to the North Star and the way to freedom to the north.

She was an agitator. She was a subversive. She used the tools of social change to improve America. She fought for the little guy against the strong guy. She was willing to put herself at great risk to ensure justice for others. She was a woman, and she was Black. In other words, she is an ideal American.

The other women honored as nominees by the Women on 20s campaign were also great Americans. They were also subversive troublemakers, agitators, and, therefore, exactly the kind of people I think we need on our currency. But Harriet Tubman, because she is a woman, because she is a woman of color, because she fought for...
freedom and for a better America in the face of this Nation’s greatest and, for many like me, still unresolved sin of slavery and racism, because she turned the tide of history for the better, she is very, very worthy of this great honor.

In a few years, maybe in a few months, we will all wonder why it took so long to put an American woman on our $20 bill. Well, it shouldn’t take so long. Members of this body, Mr. Speaker, have the ability to do something about it and speed this process along.

Cosponsor the Put a Woman on the Twenty Act of 2015. It is H.R. 1910. Join me in calling on the Secretary of the Treasury to do this, whether it is Harriet Tubman or anyone else that a fair and open process arrives at. Let us stand as a Congress to put a great American woman on our money.

HOUSTON POLICE OFFICER—RICHARD MARTIN

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas (Mr. Poe) for 15 minutes.

Mr. Poe of Texas. Mr. Speaker, in the early morning hours of Monday, while most of the city was asleep, the diligent Houston Police Department responded to a robbery call at an Exxon service station.

The lawmen approach the scene, and they see a suspect speed off in what turned out to be a stolen U-Haul truck. The police follow the truck, and the high-speed chase is on.

The bulletproof vest is lost. The truck, carjacks a woman, pushes her out of the minivan, and continues his flight. The outlaw fires shots at the police and keeps fleeing in the darkness of the morning hours.

Houston Police Officer Richard Martin, aware of the chase and ahead of it, jumps out of his patrol car and starts placing spike strips on the road to stop the approaching vehicle. The criminal sees Officer Martin and intentionally runs over him and kills him. Then the criminal continues on a 20-mile run from the law in the city of Houston.

He is later cornered by the police in a standoff, and then he shoots himself and is taken to the hospital. As he lingered in the hospital, the district attorney, Devon Anderson, prepared capital murder charges against him, but the killer died, thus avoiding the hangman.

The outlaw had a long criminal history.

Officer Richard Martin was a Houston police officer. He was 47 years of age. He had only been a peace officer for 4 years, and he worked at the Westside patrol division.

Prior to being a police officer, he had been in private industry for 20 years. Officer Martin was also a veteran. He spent 4 years on Active Duty in the United States Air Force, then spent 8 years as a reservist in the United States Air Force.

Being a police officer was his ultimate goal, so in his early forties, he became a Houston police officer. In just 4 short years, Officer Martin became a field officer. His captain said that he crammed 20 years of policing in the 4 years that he served as a Houston police officer. This speaks volume about his character as a lawman.

He was the father of two, a 22-year-old daughter and a 17-year-old son; and he loved being actively involved in his children’s lives, including his son’s baseball team.

Mr. Speaker, just last week, our Nation celebrated National Police Week, honoring the daily sacrifices of peace officers like Officer Martin.

Just across the way here, on the west side of the Capitol, last Friday, the families of those who had lost peace officers were here, surrounded by thousands and thousands of other police officers and the public to show their respect for those who are killed in the line of duty; and how quickly we are reminded, again, of these sacrifices.

Officer Martin’s life was callously and coldly robbed and stolen from us and his family, and the Houston community is now in mourning.

Our first responders are a special breed, those like Officer Richard Martin. They work selflessly to maintain and restore order in communities and neighborhoods across America. While we sleep, those that wear the badge are vigilantly and always on patrol, protecting us from the evil ones.

For these remarkable men and women, their safety is never guaranteed. While the badge and the uniform represents safety for citizens, it is a target for the unlawful.

We do take comfort in the fact that as long as criminals walk and wander our streets looking to do mischief, refusing to follow the law, peace officers will always be there on patrol, officers like Richard Martin.

Officer Martin was one of those officers. He was one of Houston’s finest. Friday, the city of Houston will lay to rest Officer Richard Martin. Peace officers will wear the black cloth ribbon of sacrifice across their badges as they stand in silent mourning for one of their brothers in blue.

The bagpipes will play “Amazing Grace,” and the flags will be lowered, as yet one more of our best is laid to rest for sacrificing his life for the rest of us. Peace officers wear the badge over their heart as a symbol of their willingness to put themselves between us and the lawless.

Officer Martin was a noble citizen who represented everything that is good and right about our society. With heavy hearts, we send prayers and thoughts to his family and those of the thin blue line in the Houston Police Department.

We thank Officer Martin for giving his life for our town.

And that is just the way it is.

THE 100TH ANNIVERSARY OF THE ARMENIAN GENOCIDE

The SPEAKER pro tempore. The Chair recognizes the gentleman from California (Mr. Schiff) for 5 minutes.

Mr. SCHIFF. Mr. Speaker, on April 24, the 100th anniversary of the Armenian genocide, runners and cyclists set out from Los Angeles on the Race for Recognition. I had the great pleasure of riding the first 28 miles of their journey with them. On May 7, they completed their 3,000-mile ride across the United States.

They undertook their ride to raise awareness of the Armenian genocide and genocides all around the world and to commemorate and remember the victims. It is my honor to read a portion of the petition that they carried with them across the Nation and to enter the entirety into the Congressional Record.

It provides:

On this 100th anniversary of the Armenian genocide, LA2DC organizing committee members wish to recognize and honor the contributions of the following people and organization:

The American people, for setting the standard in the world for compassion, social activism, human rights and prevention of crimes against humanity—in their first nationwide relief campaign from 1915 to 1930, Americans donated the equivalent of $2.7 billion to help save over 1 million Christian Armenians, Greeks, Assyrians, and other minorities during the first mass atrocity of the 20th century, when these minorities were targeted for extermination and deportation by the Ottoman Empire;

Ambassador Henry Morgenthau, who, as the United States Ambassador to the Ottoman Empire, alerted the United States Government and the rest of the world to the “destruction of the Armenian race”;

The Near East Foundation, for providing relief to 1 million refugees and 132,000 orphan survivors of the atrocities perpetrated by the Ottoman Empire;

The American Red Cross, for providing relief to survivors of genocides and mass atrocities for the past 100 years, starting with its first international assistance program in 1915 that provided relief to survivors of the Armenian genocide;

The Museum of Tolerance, for educating and enlightening more than 250,000 visitors per year since 1993 and challenging them to understand the Holocaust and genocides in both historic and contemporary contexts;

The American Museum of Immigration, for inventing the term “genocide” to describe atrocities that target groups for annihilation, and for working tirelessly to gain approval of the Convention on the Prevention and Punishment of the Crime of Genocide by the United Nations in 1948;

USC’s Shosh Foundation and its founder, Mr. Steven Spielberg, for collecting nearly 52,000 eyewitness testimonies of the Holocaust, the Armenian genocide, and other genocide survivors;

Facing History and Ourselves, for educating over 10,000 teachers and, through them, hundreds of thousands of students on the history of prejudice and racism and the role they play in the events that lead to genocide;

The International Committee of the Red Cross and the United Nations’ Children’s Fund, starting a vast relief mission in 1979 for the people of Cambodia, threatened by famine and disease in the aftermath of
the Cambodian genocide, which claimed millions of lives;

United States Army Europe and United States Air Force Europe, for delivering humanitarian aid and relief to the survivors of the Bosnian genocide, during which an estimate 100,000 Bosniaks were systematically targeted and killed;

Senator William Proxmire, for delivering a speech every day the U.S. Senate was in session in support of the ratification of Convention for the Prevention and Punishment of the Crime of Genocide. After 20 years and 3,211 speeches, the United States Senate ratified the convention on February 11, 1986;

President Ronald Reagan, for signing the Genocide Convention Implementation Act of 1987 into law;

The International Rescue Committee, for providing relief to Rwandan genocide survivors, when an estimated 800,000 mostly Tutsi minorities were massacred;

Not On Our Watch and George Clooney, for using his public profile to raise awareness of the genocide in Darfur, where 300,000 civilians were targeted and murdered and 2 million displaced;

U.N. Ambassador Samantha Power, for her ground-breaking book published in 2003, “A Problem from Hell,” which recounts the history of genocide and offers a framework for policymakers that can help detect and prevent genocides;

The Armenian National Committee of America, for advocating for the recognition of the Armenian genocide and raising awareness of genocides as crimes against humanity.

Mr. Speaker, these riders carried this important message of truth and gratitude with them across our great Nation. It is an honor to do my small part to make sure they are heard.

Mr. Speaker, on April 24th, the 100th anniversary of the Armenian Genocide, runners and cyclists set out from Los Angeles on a “Race for Recognition.” I had the great pleasure of riding the first 28 miles of their journey with them. And on May 7th, they completed their 3,000 mile ride across the United States. They ran to raise awareness of the Armenian Genocide, and Genocides around the world, and to commemorate and remember the victims. It is my honor to read a portion of the petition that they carried with them across the nation, and to enter the entirety into the CONGRESSIONAL RECORD.

On this 100th anniversary of the Armenian Genocide, LA2DC organizing committee members wish to recognize and honor the contributions of the following people and organizations:

In the past 100 years, over 100 million lives have been lost in genocides and mass atrocities;

During the same period, heroic American citizens, politicians, diplomats, faith based organizations, and non-government organizations have made it a part of their mission to raise awareness of genocides, help prevent genocides, and provide relief to survivors of genocides;

Some of these citizens, relief organizations, diplomats, and politicians put their lives and treasure at risk by working in conflict zones to alert the world of impending genocides and genocides in progress, rescue genocide survivors, and provide relief.

On this 100th anniversary of the Armenian Genocide, and through this petition, LA2DC organizing committee members wish to recognize and honor the contributions of the following people and organizations for their work in raising awareness of genocides, providing relief to genocide survivors, and working to prevent genocides:

The American people—for setting the standard in the world for philanthropy, social activism, human rights, justice, and prevention of crimes against humanity. In their first act of large scale, nationwide, organization and execution of a relief campaign, from 1915 to 1930, Americans donated more than $117 million—or the equivalent of $2.7 billion in 2015 dollars—to relief organizations that saved over 1 million Christian Armenians, Greeks, Assyrians, and other minorities during the first mass atrocity of the 20th century, when these minorities were targeted for extermination and deportation by the Ottoman Empire. Over the past 100 years, Americans continue to be in the front line of helping to prevent genocides, and providing relief and hope to survivors of atrocities.

Ambassador Henry Morgenthau—who as United States Ambassador to the Ottoman Empire, alerted the United States government of “Destruction of the Armenian Race . . .” and called on Americans to get organized to help the survivors.

The Near East Foundation (formerly known as Near East Relief or NER)—for providing relief to 1 million refugees and 132,000 orphan survivors of the atrocities perpetrated by the Ottoman Empire from 1915–1923. During this period, NER raised the equivalent of $2.7 billion in 2015 dollars, and mobilized over 1,000 volunteers to help build orphanages, food and clothing distribution centers, clinics and hospitals, and vocational training schools for the survivors.

The American Red Cross—for providing relief to survivors of genocides and mass atrocities for the past 100 years, starting with its first international assistance program in 1915 that provided relief to the survivors of the Armenian Genocide.

The United States Holocaust Memorial Museum—for leading national and international efforts to promote, confront hatred, and prevent the next genocide.

The Museum of Tolerance—for educating and enlightening more than 250,000 visitors per year since 1993, and challenging them to understand the Holocaust and genocides in both historic and contemporary contexts and confront all forms of prejudice and discrimination in our world today.

Raphael Lemkin—for inventing the term “genocide” to describe the atrocities that target groups for annihilation, and for working tirelessly to get the convention on the Prevention and Punishment of the Crime of Genocide by United Nations in 1948.

University of Southern California’s Shoah Foundation and its founder, Mr. Steven Spielberg—for painstakingly collecting nearly 52,000 eyewitness testimonies of the Holocaust, the Armenian Genocide, and other genocide survivors, and using their first hand accounts to teach the world about the horrors of genocides and the importance of preventing them.

Facing History and Ourselves—for educating over ten thousand teachers in the United States and worldwide, and through them, hundreds of thousands of students, on the history of prejudice and racism, and the role they play in the events that lead to genocide. Since 1976, Facing History has been engaged in genocide prevention work by promoting global citizenship and heightened awareness of genocides.

The International Committee of The Red Cross and United Nations Children’s Fund for their relentless efforts for the people of Cambodia threatened by famine and disease in the aftermath of the Cambodian Genocide, which claimed millions of lives.

United State Army Europe and United States Air Force Europe—for delivering humanitarian aid in 1995 and 1996 to the survivors of the Bosnian Genocide, during which an estimated 100,000 Bosniaks were systematically targeted and killed.

Senator William Proxmire—for following through his commitment to deliver a speech every day the United States Senate was in session in support of the ratification of United Nations Convention on the Prevention and Punishment of the Crime of Genocide. After 20 years and 3,211 speeches, the United States Senate ratified the convention on February 11, 1986.

President Ronald Reagan—for signing the Genocide Conventions Implementation Act of 1987 into law, making genocide a Federal offense, and declaring, “This legislation still represents a strong and clear statement by the United States that it will punish acts of genocide with the force of law and the righteousness of justice.”

The International Rescue Committee—for providing emergency supplies and restoring infrastructure following the 1994 genocide in Rwanda, where an estimated 800,000 mostly Tutsi minorities were massacred.

Not On Our Watch, and Members, George Clooney, Don Cheadle, Matt Damon, Brad Pitt, David Pressman, and Jerry Weintraub for using their public profiles to bring attention to atrocities around the world, and raising awareness of the genocide in Darfur, where 300,000 civilians were targeted and murdered, and 2 million displaced.

United States Institute of Peace Genocide Prevention Task Force, and Co-Chairs Honorable Madeleine K. Albright and Honorable William S. Cohen—for developing a genocide prevention blueprint entitled, “Preventing Genocide: A Blueprint for U.S. Policymakers”, which affirmed that genocides are preventable, and issued 34 specific actionable recommendations that United States can implement to help detect and prevent genocides.

Ambassador Samantha Power, the United States Ambassador to the United Nations—for her groundbreaking research documented in her book published in 2003, “A Problem from Hell”, which recounts the history of genocide and offers a framework for policy makers that can help detect and prevent genocides.

Congressman ADAM SCHIFF—for being the leading voice in the United States Congress advocating for recognition of past genocides as an important step towards detecting and preventing future genocides and atrocities.

The Armenian National Committee of America—for advocating for the recognition of the Armenian Genocides and raising awareness of genocides as crimes against humanity.

Countless other Americans and organizations who have made it their mission to help prevent the next genocide and promote peaceful resolution of conflicts.
150TH ANNIVERSARY OF THE TOWN OF CLINTON, NEW JERSEY

The SPEAKER pro tempore. The Chair recognizes the gentleman from New Jersey (Mr. LANCE) for 5 minutes.

Mr. LANCE. Mr. Speaker, I rise today to celebrate the 150th anniversary of the incorporation of the town of Clinton in Hunterdon County, New Jersey. Established as a separate municipality in 1865, Clinton has a rich history and is known for its natural beauty and sense of community.

The 2010 Census counted the town’s population at 17,000.

As the recently deceased Clinton town historian and longtime mayor, Allie McGahean, has written, the area was settled on the convergence of two rivers, the Spruce Run and the south branch of the Raritan, surrounded by excellent farmland, attracting English and German settlers. One of those settlers, David McKenny, built two mills directly across the river from each other.

These treasured mills—the first dating to 1810—now the Red Mill Museum Village and the Hunterdon Museum of Art, were owned by Daniel Hunt, the namesake of the town’s first moniker, Hunt’s Mill. These mills have been the center of Clinton’s economic and cultural life for two centuries.

Later, mill owners John Taylor and John Bray championed renaming the town after DeWitt Clinton, the builder of the Erie Canal and Governor of New York.

A limestone quarry, located immediately behind the Red Mill, brought Irish immigrants crossing the ocean to the United States and German settlers. One of those settlers, David McKenny, built two mills directly across the river from each other.

These treasured mills—the first dating to 1810—now the Red Mill Museum Village and the Hunterdon Museum of Art, were owned by Daniel Hunt, the namesake of the town’s first moniker, Hunt’s Mill. These mills have been the center of Clinton’s economic and cultural life for two centuries.

The present municipal building, a handsome Victorian structure, was the residence of John Leigh, a brick maker and farmer who served as the town’s second mayor. The Lehigh Valley Railroad選擇 the site for its station directly across the river from the Red Mill, bringing exporters to the town and their families to the new world.

The town is a yearlong re-telling of Hunterdon County, a yearlong re-telling of Hunterdon County’s studied founding and its 300-year journey in advancement from the English colonies in North America to its present-day status as one of America’s premier places to live and work.

Clinton’s history is ingrained in the fabric of Hunterdon County. We have also just celebrated New Jersey’s 350th anniversary.

Public-spirited residents have worked to keep Clinton beautiful and the epitome of small-town American life. Their efforts maintain a charming and vibrant merchant district, excellent public schools, meaningful cultural events, and significant engagement in public affairs.

The town of Clinton thrives on neighboring prosperity and is deeply honored to represent the town here in the House of Representatives. And all who love Clinton congratulate the town on its landmark celebration.

TRANS-PACIFIC PARTNERSHIP

The SPEAKER pro tempore. The Chair recognizes the gentleman from Oregon (Mr. BLUMENAUER) for 5 minutes.

Mr. BLUMENAUER. Mr. Speaker, the near hysteria over trade promotion authority and the pending Trans-Pacific Partnership, the so-called TPP, is unfortunate because it is so misguided. The stakes are too high to get it wrong, and the negative arguments are unfounded because they are so wrong.

Being against TPP, which has yet to be finished, is premature, at best. Being against the TPA is misguided because those provisions guarantee people will actually know the details and have stronger tools to evaluate whether it is worthy of support.

The trade agenda and the role of America in the global economy has been front and center in Congress over the last few weeks, and well it should be. The United States has an opportunity to make further inroads in 95 percent of the markets that are outside our borders and to be able to gain that access under more favorable terms.

The President wants to sell their products overseas run into much more difficult barriers, procedures, and costs than people who sell their goods to America, which has one of the most open markets in the world. In Oregon, there are competing narratives: those who are opposed to further competition for American goods in American markets, fearing a loss of business and jobs; and those who see significant opportunity selling goods and services abroad, creating more family-wage jobs at home.

The people I talk to in Oregon who are in business overwhelmingly support access. They feel they have far more to gain than they have to lose. They want more wine, bicycles, agricultural products, and small tools. They think they can compete overseas, creating family-wage jobs at home, if that playing field is level.

There are others who are deeply concerned that this perceived leveling of the playing field will not be achieved. They are concerned about a lack of labor and environmental standards overseas.

Having spent time with the people who are negotiating the agreements, having reviewed documents myself, and working to reflect Oregon values and interests, these agreements, I am confident, hold promise for Oregon. But it is too soon to tell for sure because the agreement is still being negotiated, and people like me are still trying to influence it to make it stronger still.

For instance, I have provisions I am working on in both the House and the Senate to provide an enforcement mechanism.

As the agreement potentially enters its final stages, where there are some of the more difficult concessions with decisions yet to be made, the United States and other countries are reluctant to show their full hand while things are in flux.

That is why the trade promotion authority that is working its way through the Senate—and may be in front of the House early in June—is so important.

This trade promotion authority is a significant enhancement over any similar provision in the past. It guarantees that the entire country—not just Congress—will be able to examine all of the provisions 2 months before the President even signs the agreement and for months after that, before Congress votes. The authority also sets out provisions that speak to the concerns I have heard about for years about the weaknesses in NAFTA, not having enforceable, strong provisions for environmental and labor.

That is why I thought it was important to vote to establish these rules.
which were significantly strengthened and made more transparent as a result of the tremendous efforts on behalf of my friend and colleague from Oregon, Senator Ron Wyden, in the Senate.

If an agreement is reached under these new rules, we will have the strongest standards ever to evaluate a trade agreement, and everyone in America will be able to evaluate for themselves, not conjure up some sort of speculation. They will have months to do what I am going to do: see if this agreement is in the best interest of the people in Oregon who I represent. If it is, then they, like I, will support it. If it is not, then I will do, as I have sometimes done in the past, and vote “no” on things I don’t think measure up.

The time to draw the lines in the sand ‘‘yes’’ or ‘‘no’’ is after an agreement is reached, not before. And thanks to the new trade promotion authority, everyone will have an opportunity to make that judgment for themselves well in advance of any decision that Congress makes.

SYRIA

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. Kinzinger) for 5 minutes.

Mr. KINZINGER of Illinois. Mr. Speaker, I remember a few years ago visiting Israel, standing in the Golan Heights and looking to the border of Syria. It was at this time, our guide began talking about the peaceful protests in Syria, the beginning of an era of discontent.

As I looked into the seemingly peaceful area, I never imagined the carnage that was to come: children who on that day attended school, filled with hope for the future and with dreams of becoming a businessman, a policeman, an architect, or any of the host of things building in the minds of such a young person at that age; children and parents who did not know that in a few short years, their lives would be cut down by a ruthless dictator, bent on keeping power at all cost.

As the peaceful protests built in strength, Bashar al-Assad responded in violence. And so began what history will likely judge to be the start of among the most brutal times in Middle East modern history.

Bashar-al Assad began using barrel bombs to attack innocent people and famously gassed thousands who struggled to get that last breath of life, only to choke to death, completely aware that that breath would be their last.

As family members died, others joined a group now dubbed the Free Syrian Army, a group the President referred to as a bunch of pharmacists, lawyers, and businessmen, all standing up to reclaim what was theirs rightfully, which was a free Syria. And they fought bravely for a Syria today.

Through the carnage of this terrible war, a more nefarious group began to assemble, a group not concerned with human carnage but inspired by it; a group not fighting to protect life but fighting to cut it down; and a group not inspired by freedom of religion but inspired by a hollow and a shallow world view. The group today is now known as ISIS.

Mr. Speaker, before the world paid any attention, this group occupied not just Syria, but also Fast Pack of Iraq. Also Fast Pack of Iraq, an area fought with American blood and treasure to bring peace and stability to the people of Iraq. The border of Syria and Iraq was torn down, and the world continued to sleep.

I called for America to lead airstrikes against this fledgling group at that time numbering in the low four figures. The reaction I received was not unexpected: people angry that I was in favor of ISIS. As a matter of fact, I was. Yet as this cancer continued to grow, the carnage became worse, and today we find ourselves engaged in limited action against a group growing in numbers faster than they are being dispatched by conventional forces.

Americans feel saddened that the areas that our brave military members fought so hard to win was being thrown away to political expedience, and I am one of those people. I spent a little bit of time in Iraq, on behalf of the United States Air Force, flying airplanes, and I just saw a week ago or a few days ago that Ramadi, the capital of Anbar province, where we saw so much success in the Sunni awakening, has fallen to ISIS.

Now, by the way, Anbar and Ramadi serve as a transportation center for getting goods from Jordan and Syria into Baghdad and are resupply routes for ISIS’s scourge “Iraq Weasel.” Yet as this cancer continued to grow, the carnage became worse, and today we find ourselves engaged in limited action against a group growing in numbers faster than they are being dispatched by conventional forces.

We also see that these terrorist groups, these jihadist groups, are coming under the umbrella of ISIS, whether it is al Shabaab, Boko Haram, or al Qaeda in Yemen, or we see the Taliban beginning to join under this supposedly successful group.

What is it we need to do to push them back? In Iraq, I believe we need to use the number of troops and the amount of military force necessary to destroy ISIS and not just necessary to follow the President’s promise of no troops on the ground. I don’t think we need another 200,000 troops in Iraq, and I haven’t heard a single person actually fighting on the ground talk about what is necessary to put this back.

By the way, the American military is fierce and desperate to do what needs to be done, and they are ready to do what the American people and the President calls on.

Lastly, ISIS must be destroyed in Syria; and you can not destroy ISIS in Syria without destroying the incubator of ISIS, who are the evil dictator, Bashar al-Assad. There are negotiations in progress now, but until the Syrian people know that the American people stand behind them through a no-fly zone and other means, ISIS will not be destroyed in Syria until that point.

Mr. Speaker, it is time for the President to stand up.

REESTABLISH THE GOLDEN FLEECHE AWARD

The SPEAKER pro tempore. The Chair recognizes the gentleman from Arkansas (Mr. Hill) for 5 minutes.

Mr. HILL. Mr. Speaker, at a time when our Nation is currently over $18 trillion in debt, we must carefully scrutinize our government programs to ensure that we are funding essential programs, policies, and projects while eliminating frivolous and wasteful spending.

Every day in the news, Americans hear of government waste, fraud, abuse, and regulations that are hindering our small businesses and costing American taxpayers billions of dollars that could be better spent in creating jobs to boost our economy.

Today, I rise to establish the Golden Fleece Award to once again uncover and bring public attention to the wasteful spending across our Federal Government. The Golden Fleece Award will highlight some of the most egregious examples of government waste of hard-working taxpayers’ dollars and will shed new light on some of the rampant, unnecessary spending by our Federal agencies.

The inspiration behind the Golden Fleece Award was pioneered by the Democratic U.S. Senator from Wisconsin, Bill Proxmire, in March 1975.

For the next 13 years, Senator Proxmire would go on to issue bulletins announcing a monthly Golden Fleece Award. The Golden Fleece Award became a staple in the U.S. Senate during this time. Senator Robert Byrd once said, “It is a race to see who can get the most government waste on the floor in a single session.”

Mr. Speaker, the Golden Fleece Award will once again serve as an important reminder that taxpayers need to watch, control, and provide the necessary reforms, through this Congress, about Federal spending and regulations.

I will utilize social media and the Internet to provide a unique platform for my constituents to share with me examples that they spot, that they see, of waste of our Federal Government resources and how to stop them. #goldenfleeceoversight on Twitter, or emailing me at goldenfleece@mail.house.gov. I have
also established a Web site that allows users to submit their recommendations for future Golden Fleece Awards at hill.house.gov/goldenfleece.

Americans are crying out for accountability from our leaders, and I look forward to working with them and my colleagues to spot waste and find ways to effectively eliminate that kind of spending and regulatory overreach in Washington.

DO UNTO OTHERS AS WE WOULD HAVE THEM DO UNTO US

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas (Mr. AL GREEN) for 5 minutes.

Mr. AL GREEN of Texas. Mr. Speaker, the great Mahalia Jackson was a gospel singer. The great singer and civil rights activist Mahalia Jackson, once proclaimed by Harry Belafonte to be the most powerful woman in America, to Whom Mahalia Jackson gave some words to live by, some words that can add meaning to life. She, in one of her songs, indicated that, and I shall paraphrase, if I can help somebody as I travel along, then my living shall not be in vain; help somebody—that is the essence of the message that she presented.

I am here today to speak of persons who are in harm’s way and who are suffering. The people of Nepal have had two earthquakes visited upon them: one a 7.8 magnitude, the other a 7.3 magnitude. These two earthquakes have done great damage. More than 8,000 people are dead. I am looking at the statistical information: more than 16,000 injured, 8 million persons affected, nearly 500,000 homes destroyed, another 200,000-plus damaged. They are still in harm’s way, but there is something we can do. We can do unto others as we would have them do to us if we had suffered a similar tragedy.

Mr. Speaker, this is a great opportunity for us to do something to help without actually expending a lot of American dollars, although we have spent quite a bit. I am proud to say that the United States has accorded approximately $40 million to this effort—$40 million. It will take a lot more, but the United States is involved in doing its part. We have had our rescue teams there; and one of our rescue teams, unfortunately, suffered some tragedy.

Mr. Speaker, this is a great opportunity for us to do something to help without actually expending a lot of American dollars, although we have spent quite a bit. I am proud to say that the United States has accorded approximately $40 million to this effort—$40 million. It will take a lot more, but the United States is involved in doing its part. We have had our rescue teams there; and one of our rescue teams, unfortunately, suffered some tragedy.

Speaking just moments ago, Mike prayed for all of us serving this great institution and the work we do each and every day. I have been fortunate to know Mike as my minister in Bowling Green, Kentucky, and have always appreciated his prayers.

Throughout his 44 years as a minister, Mike has served Churches of Christ in Kentucky, Tennessee, and Georgia. He also serves on the board of directors of Foundation Christian Academy in Bowling Green.

I always enjoy having a little bit of Kentucky here in Washington. Today, I am proud to welcome you, Mike, to the U.S. Capitol. Thank you for your prayers and for taking the time to be with us in our Nation’s Capitol today.

WHY WE PRAY

Mr. Speaker, this bill has many persons who are supporting it. More than 50 persons have supported this piece of legislation. I am proud to say that some of the persons who have supported it are persons who have great Nepalese communities, and there are others who do not. They just want to be of help.

I want to mention a few whose names I did not mention when I mentioned names previously, or I did not state them correctly. This is a chance for me to correct the Record: Congressman MIKE CAPUANO, Congressman TONY Cárdenas, Congressman JOE CROWLEY, Congressman MARK DeSaulnier, Congressman RÁUL Grijalva, Congressman LUIS GUTIERREZ, Congressman CARED POLIS, Congressman CHARLES Rangel, Congressman CEDRIC RICHMOND, Congresswoman LORETTA SANCHEZ, and Congresswoman LINDA SÁNCHEZ—all persons who are supportive, along with many others, nearly 50.

I am proud to say that the community in Houston, the Nepalese community has come together, and they have a goal of raising $100,000. They have exceeded that goal, under the leadership of Mr. Ghimirey and Mr. Nepal. They have exceeded the goal of $100,000, and they are still raising additional funds.

I believe that H.R. 2033 affords all of us to live not in vain. I think this is a great opportunity to do unto others as we would have them do unto us. I ask that we support H.R. 2033 and live not in vain. Help somebody as we travel along our way.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until noon today.

Accordingly (at 10 o’clock and 41 minutes a.m.), the House stood in recess.

1200

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at noon.

PRAYER

Minister Michael Greene, Lehman Avenue Church of Christ, Bowling Green, Kentucky, offered the following prayer:

Dear God, Our Creator and the One from whom we receive our unalienable rights, we give You our thanks for this day and for all the bountiful blessings You have poured out upon this great land, this country, and these peoples. We pray these blessings will continue through Your grace.

We are thankful for the opportunity to serve wherein is found greatness. We pray for those assembled here today as they deliberate in this august body. We pray Your guiding hand be upon them. Bless them with wisdom. Bless them with courage to do the right as You have revealed the right.

Help them to remember that what is being done in this place is not just an exercise in debate but will affect millions of people.

Help us, Father, to preserve our heritage of freedom for future generations. This we pray on this 20th day of May in the year of our Lord.

Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day’s proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentlewoman from New Hampshire (Ms. KUSTER) come forward and lead the House in the Pledge of Allegiance.

Ms. KUSTER led the Pledge of Allegiance.

WELCOMING MINISTER MICHAEL GREENE

The SPEAKER. Without objection, the gentleman from Kentucky (Mr. GUTHRIE) is recognized for 1 minute.

There was no objection.

Mr. GUTHRIE. Mr. Speaker, I rise today to welcome Mr. Michael Greene to Washington. Mike is serving today as guest chaplain in the U.S. House of Representatives.

Speaking just moments ago, Mike prayed for all of us serving this great institution and the work we do each and every day. I have been fortunate to know Mike as my minister in Bowling Green, Kentucky, and have always appreciated his prayers.

I want to mention a few whose names I did not mention when I mentioned names previously, or I did not state them correctly. I always enjoy having a little bit of Kentucky here in Washington. Today, I am proud to welcome you, Mike, to the U.S. Capitol. Thank you for your prayers and for taking the time to be with us in our Nation’s Capitol today.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. DUNCAN of Tennessee). The Chair will
entertain up to 15 further requests for 1-minute speeches on each side of the aisle.

VA ACCOUNTABILITY

(Mr. BOEHNER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOEHNER. My colleagues, next week marks the 1-year anniversary since General Eric Shinseki resigned as the Secretary of the Veterans Affairs Department.

At the time, the President promised reform. He said: "The number one priority is making sure that problems get fixed." Instead of a new day at the VA, the American people are still seeing more of the same. Last year, Congress gave the VA Secretary new authority to fire employees. While some 110 VA facilities kept secret lists to hide their wait times, just one person has been fired—one.

What the hell happened to the rest of them? Some got to retire with their benefits, some got transfers, some got paid time off, some got a slap on the wrist. All of them went on collecting checks from taxpayers. If only the Veterans Administration did half as good a job of taking care of our veterans as they do the bureaucrats, we would be in a lot better shape.

Congress also gave the VA more than $16 billion to improve care and to shorten waiting times, yet the number of patients facing long waits is about the same. The number of patients waiting more than 90 days has doubled. At this point, the VA can’t even build a hospital. Just about every project ends up years behind schedule and hundreds of millions, if not billions, over cost.

Last week, the public learned that the VA is spending $6 billion a year illegally. An internal report exposed examples of overspending on conferences, improper gifts, inappropriate purchases, and promotional items—again, if only VA bureaucrats did as good a job taking care of our veterans as they do themselves.

The author of the report at the VA wrote, "doors are swung wide open for fraud, waste, and abuse," and that these actions "may potentially result in serious harm or death to America’s veterans."

That is their own expert saying this. This isn’t run-of-the-mill incompetence. It is arrogance; and it is arrogance that allows our veterans to be lied to, ignored, and, frankly, left to die.

My colleagues, it is almost Memorial Day. This is when we slow down and reflect on the debt of gratitude that we owe to our heroes. I commend Chairman MILLER and all of the members of the Veterans Affairs’ Committee for striving every day to fulfill this obligation. Congress will continue to pass legislation to hold the VA accountable, but only the administration can change the culture from within.

The President owes the American people a real, long-term plan to fix the VA—not a promise, not a pledge, not rearranging the chairs on a deck—a real plan to clean up this scandal.

I will keep coming back to this podium until the administration produces such a plan.

Volvo Ocean Race

(Mr. CICILLINE asked and was given permission to address the House for 1 minute.)

Mr. CICILLINE. Mr. Speaker, I rise today to congratulate the city of Newport, Rhode Island, in my district, on hosting, this month, the Volvo Ocean Race, the world’s premier sailing race around the world.

This 12-day event brought 125,000 visitors to Rhode Island, far exceeding even the most optimistic projections, as well as millions of dollars in economic activity that supported Rhode Island’s tourism industry and our small-business community. Most importantly, the success of this event offered an opportunity to tell our story about the great things that are happening in Rhode Island today.

I want to thank everyone who helped make the only North American stopover for this year’s Volvo Ocean Race such an incredible success, including Bill Newland and Rhode Island’s public Sailing Center, Discover Newport, the Rhode Island Department of Environmental Management, the Newport Chamber of Commerce, Senate President Teresa Paiva-Weed, Speaker Mattiello, members of the general assembly, and Governor Gina Raimondo.

I want to especially acknowledge Senator Whitehouse for all of his work to bring this race to Rhode Island and his ongoing efforts to enhance our State’s position in the maritime industry.

Congratulations to everyone who made this such a success.

Tribute to Staff Sergeant Robert H. Dietz

(Mr. GIBSON asked and was given permission to address the House for 1 minute.)

Mr. GIBSON. Mr. Speaker, I rise today to recognize Staff Sergeant Robert H. Dietz who was awarded the Medal of Honor for his courageous actions during World War II. Sergeant Dietz hailed from Kingston, New York, a proud and historical city in New York’s 19th Congressional District.

In March 1945, Sergeant Dietz led his squad on an attack of a heavily fortified German position. Under heavy machine gun fire, Sergeant Dietz advanced forward, clearing enemy obstacles, providing a path for the men of his squad to advance. His selfless act enabled the success of this attack; but in the process, Sergeant Dietz lost his life.

With strong local support, we submitted a bill to rename the post office in Kingston for Sergeant Dietz. Yesterday that bill passed in the Oversight and Government Reform Committee. I thank Chairman CHAFFETZ, his colleagues, and the New York delegation for their strong support; and I look forward to its passage in the full House soon.

Mr. Speaker, as we approach Memorial Day weekend, we pause to remember Sergeant Dietz and all those men and women who lost their lives in defense of our freedoms.

Bring Back Our Girls

(Ms. WILSON of Florida asked and was given permission to address the House for 1 minute.)

Ms. WILSON of Florida. Mr. Speaker, today I, along with many of my colleagues—both women and men, Republicans and Democrats—wear red to pressure Nigerian President-elect Muhammadu Buhari into taking aggressive action against Boko Haram.

Next week, as Nigeria welcomes the new President and celebrates Democracy Day, we here in Congress want to put a spotlight on the immense threat Boko Haram poses to Nigeria’s democracy and freedom.

Mr. Speaker, we want President-elect Buhari to know we will hold him accountable, just as we held his predecessor, because we expect the new administration to bring with it a swift and lasting change in attitude on this issue. We hope the new President will have a sense of urgency in finding the Chibok schoolgirls and defeating Boko Haram.

Mr. Speaker, we expect the new President to find the girls, whether they have been married off against their will or not, are alive or in a mass grave. Wherever they are, we want to know.

Until they are found, we will continue to tweet, tweet, tweet #Bringbackourgirls; tweet, tweet, tweet #Joinreepwison.

21st Century Cures Act

(Mrs. BLACKBURN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. BLACKBURN. Mr. Speaker, I rise today to talk about the 21st Century Cures Act. This is legislation that we, at the Energy and Commerce Committee, are working on in a bipartisan basis, and we look forward to moving it to the House floor and seeing this passed and signed into law. Why are we doing it? Because we want to put the focus on cures, real cures that will enable people to live better lives.

Let’s take just one disease, Alzheimer’s. There are 5 million Americans that currently have Alzheimer’s. The cost to the Nation is $215 billion a year. When you look out several decades to 2050, the cost is estimated to be...
$1 trillion a year for one disease. Yes, we need to focus on finding cures.

And there are other disorders and diseases that need that attention. Take autism, diabetes, ALS, cancer, the list moves on.

It is time for us to encourage and support young scientists, to put the focus on our most challenging health conditions, and we want the regulatory agencies to be there to encourage this effort, and I encourage support for the 21st Century Cures Act.

RECOGNIZING NHTI, CONCORD, NEW HAMPSHIRE’S COMMUNITY COLLEGE

(Ms. KUSTER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KUSTER. Mr. Speaker, today I rise to underscore the importance of increasing higher education, including crucial workforce development programs that help our students gain the high-tech skills they need to succeed in our 21st century economy.

In New Hampshire, we are blessed to have some of the very best community colleges in the country, and I am proud to have visited every single community college in my district.

Today I would like to recognize one institution, the New Hampshire Technical Institute, the community college in our capital of Concord, which was just ranked number one in the country for value added by the Brookings Institution. That means that NHTI students are meeting and surpassing expected outcomes after graduation, and many of them are going on to extremely successful careers.

Every student should have access to this type of opportunity, and I am pushing for a number of initiatives that will help business partners join with community colleges to provide specific job training. Let’s all join together to make sure that students across the country can access the kind of value-added programs offered at NHTI. And together, we can move forward so that every American can realize the American Dream.

☐ 1215

VETERAN HEALTH CARE, FIGHTER ACES

(Mr. SAM JOHNSON of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SAM JOHNSON of Texas. Mr. Speaker, one of my top priorities is standing up for our servicemen and -women. That is why I am proud to reintroduce the Help Veterans Save for Health Care Act, because right now the IRS makes a veteran choose between receiving VA care or continuing to fund a savings account. That is wrong. My bill fixes that.

In addition to this bill, today Congress will recognize America’s fighter aces with its highest honor—the Congressional Gold Medal. Last year, Congress passed this resolution honoring these patriots who are simply the best of the best.

We are the land of the free because of all our troops and veterans who have put their lives on the line for us, and I salute them today as we remember their sacrifices on this Memorial Day.

DAVID LETTERMAN

(Mr. COHEN asked and was given permission to address the House for 1 minute.)

Mr. COHEN. Mr. Speaker, I want to take this occasion to thank David Letterman for 33 years of late-night television and giving his genius to America. I want to thank him on behalf of my friend Warren Zevon for being the best friend his music ever had, and for helping so many other musicians get an opportunity to play for America; as a Memphian who attended the Andy Kaufman-Jerry Lawler match, for Dave giving Andy Kaufman the opportunity to give his zany sense of humor to America, and many other comedians that he gave a forum to.

Dave was in the Ed Sullivan Theater, but he should have been in the Steve Allen Theater, Ed’s rival, because he was more like Steve Allen, the first late-night host. The “Man on the Street” interview with Steve Allen was like “Stupid Pet Tricks.”

Dave Letterman was a genius. Tonight I will be watching his last show—we all will—the 6,028th. We will all watch it.

Dave, don’t stay away. Come back. We thank you for all you have given us.

HONORING MONTANA VETERANS

(Mr. ZINKE asked and was given permission to address the House for 1 minute.)

Mr. ZINKE. Mr. Speaker, today I rise in honor of Montana veterans and all the men and women who have fallen in defense of our great Nation.

I would like to recognize one in particular, Private 1st Class Nicholas Cook, from Hungry Horse, Montana, who was killed in action in Afghanistan. He bravely sacrificed himself to save his fellow paratroopers by exposing his position, providing suppressive fire. His valor earned him the Silver Star.

Mr. Speaker, no veteran should ever be forgotten. Today I would like to also recognize the following Montana veterans for their service to our Nation:

God bless the United States, and God bless the troops that defend her.

VETERANS DESERVE ACCOUNTABILITY

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, this week, an internal report from the Department of Veterans Affairs revealed that the Department annually spends $6 billion on illegal contracts and out-of-control spending. This fraud is unacceptable, an insult to the men and women who have risked their lives in service to our country.

Unfortunately, this lack of accountability at the Department of Veterans Affairs is all too common under President Obama’s failed leadership.

Our veterans deserve the best care, and I will continue working to give our veterans the treatment they have earned as promoted by Veterans Affairs Chairman Jeff Miller of Florida. Congress has needed to promote change at the VA. For example, this week, we passed the Ensuring VA Accountability Act, sponsored by Congressman Ryan Costello. This bipartisan effort clearly demonstrates meaningful reforms for our veterans and military families.

I hope President Obama can live up to his commitment to end delays and denial of services to our veterans.
In conclusion, God bless our troops, and may the President by his actions never forget September the 11th in the global war on terrorism.

CELEBRATING THE 50TH ANNIVERSARY OF HEAD START
(Ms. LORETTA SANCHEZ of California asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. SANCHEZ of California. Mr. Speaker, I am proud to say that this week marks the 50-year anniversary of the Head Start program, a momentous achievement in our Nation’s fight to break the cycle of poverty and open the windows of opportunity for low-income families and children.

Now, I don’t want to date myself, actually, but I was in the first class of Head Start, and today I bring with me my original certificate of completion from that program. I am proud to say that, if it were not for Head Start, I wouldn’t be here today. You see, as the daughter of poor immigrants from Mexico, not many people would think I would graduate from high school, let alone go on to get my MBA and eventually make my way to the House of Representatives.

Head Start has served over 32 million children, and, more importantly, it has helped families know how to navigate the school system, meet their needs, and get employment. It has helped students, teachers, to the community volunteers, to the healthcare coordinators, and to so many who helped to implement Head Start programs in their communities. Your work is transforming our Nation. It is giving that head start to our children because they are the future of this Nation.

So, Mr. Speaker, I say today, “Happy birthday, Head Start.”

REMEMBERING CAPTAIN DUSTIN LUKASIEWICZ OF ALMA, NEBRASKA
(Mr. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Nebraska. Mr. Speaker, I rise today in remembrance of Third District constituent Captain Dustin Lukasiewicz of Alma, Nebraska. He and nine other service members were killed in a helicopter crash last week while providing humanitarian aid to earthquake victims in Nepal.

Captain Lukasiewicz made the ultimate sacrifice while trying to assist victims no one else could reach. His service reflects the goodness of America, accepting the call to help those who need it most.

When I spoke with the captain’s mother yesterday, she told me how her son called to wish her a happy Mother’s Day just hours before the crash. His attention to loved ones is a reflection of his life of service and devoting himself to the care of others.

Mr. Speaker, please join me in praying for the captain’s mother, father, wife, daughter, unborn child, and all others who lost loved ones in this terrible tragedy. As Memorial Day approaches, we must make it our priority to honor and remember our military heroes, and Captain Lukasiewicz is certainly one of our heroes.

CELEBRATING THE 50TH ANNIVERSARY OF HEAD START
(Mr. NOLAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NOLAN. Mr. Speaker, Members of the House, as Congresswoman SCHAKOWSKY and Congresswoman SANCHEZ just pointed out their involvement in Head Start, I want you to know I directed a 19-unit Head Start program up in north central Minnesota in my youth, and so I am proud to join them in celebrating this 50th anniversary that served over 32 million children, because I was able to see firsthand how this impacted children’s lives. And what a testimonial it is to see one of the first participants go on to become a Member of the United States Congress and running for the United States Senate.

Clearly, Head Start is so critical to our national commitment to every child, regardless of their circumstances at birth, to have an opportunity to succeed in life, developing that wonderful spark for learning that sets kids up for success.

So once again, hats off to the educators, to the directors, to the faculty, and to the parents, all those who have made this program such a wonderful, great success for children all across America.

NATIONAL FOSTER CARE MONTH
(Mrs. LAWRENCE asked and was given permission to address the House for 1 minute.)

Mrs. LAWRENCE. Mr. Speaker, today I stand here to recognize May as National Foster Care Month. More than 60,000 of our Nation’s youth are currently living in the child welfare system. More than 23,000 youth age out of the foster care system when they turn 18, putting them at risk for homelessness, criminal exposure, and mental illness. These statistics paint a grim picture.

Today I stand here to recognize a young woman who aged out of the foster care system, Kamille Tynes, a success story. Kamille spent 5 years in the child welfare system, Kamille’s unique experience fostered a tireless advocacy for foster care and resources that our children need. She has been given awards and recognized for her amazing leadership, such as the foster care Outstanding Young Leaders programs. She is now creating her own consulting firm to address those needs. She is a graduate of the University of Michigan.

Ladies and gentlemen, I ask my colleagues to please continue to understand the importance of recognizing and funding our foster care program.

NATIONAL FOSTER CARE MONTH
(Mr. THOMPSON of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I rise today to recognize May as National Foster Care Month and welcome many of the foster care youth who are visiting the House of Representatives today.

This year’s theme is “Get to Know the Many Faces of Foster Care.” The goal of this special month is to celebrate the experiences of the more than 400,000 youth in the child welfare system and raise awareness about their needs.

Mr. Speaker, the foster care system has and always will hold a special place in my heart. When I was 11 years old, a my family welcomed a foster care child, Bob, into our home. Bob, throughout the years, has taught me so much and will be my brother for life.

Today I have the honor of being shadowed for the day by Nyeelah Innis of New Castle, Georgia. Nyeelah has been in foster care for 8 years, with her first foster care setting starting when she was 10 years old. Mr. Speaker, in just
these few hours, Nyelah has impressed me with her positive attitude and eagerness to learn about the legislative branch of our Federal Government. I know for certain that this young lady has a very bright future ahead, like so many other youth whom we will see through the Halls of Congress today.

CONGRESSIONAL FOSTER YOUTH SHADOW DAY

(Ms. BASS asked and was given permission to address the House for 1 minute.)

Ms. BASS. Mr. Speaker, I join my colleagues today in celebration of 63 foster youth and 63 bipartisan Members of Congress who are participating in the fourth annual Congressional Caucus on Foster Youth Shadow Day experience.

The goal of this event is to give foster youth the opportunity to share their unique experience with Members of Congress and as gain intimate insight into the legislative process.

Far too often, we legislate from a glass tower, far removed from the people and places that our laws affect. Shadow Day was created to address this very issue, empowering foster youth from across the country to come to our Nation’s Capital and share their stories, while giving Members of Congress the opportunity to learn from the very young people whose lives we genuinely want to improve.

Shadowing me today is Briana, a beautiful young woman from my hometown of Los Angeles. Briana became an open case of the department of child and family services at the age of 15 due to abuse by her father. Multiple placements, neglect, and instability defined her foster care experience.

As she pursues her bachelor’s degree in accounting at Dillard University in New Orleans, Briana strives to voice the needs of foster youth and give strength to her foster peers by moving towards change. Briana’s ultimate goal is to become a foster care advocate, encouraging other youth like her to stand up for themselves in the child welfare system.

I look forward to hearing more about Briana’s experience and listening to her legislative recommendations. Thank you, Briana, for your resiliency and your commitment to reforming the child welfare system.

In honor of Briana and the other 62 foster youth here on the Hill, I invite my colleagues to join the Congressional Caucus on Foster Youth.

NATIONAL FOSTER CARE MONTH

(Mr. MARINO asked and was given permission to address the House for 1 minute.)

Mr. MARINO. Mr. Speaker, I rise today to recognize May as National Foster Care Month.

On September 30, 2012, there was an estimated 400,000 children in foster care. Sixty-five percent of foster children experience at least seven school changes while in care. Fifty percent of former foster and probation youth become homeless within the first 18 months of emancipation.

My foster shadow today is Damara. She is from Pennsylvania, and we are exchanging some great ideas about foster care.

All children deserve a safe, loving, and permanent home. Please become a foster care parent. My wife and I are foster care parents and are associated with working with children throughout my life. We have provided so much for them, but equally important, they have provided so much for us.

GREEN SCHOOLS

(Mr. ASHFORD asked and was given permission to address the House for 1 minute.)

Mr. ASHFORD. Mr. Speaker, I rise today to applaud several Nebraska schools for their nationally recognized roles in protecting the environment.

Two Omaha schools—the Edward "Babe" Gomez Heritage Elementary School and the Wilson Focus School—have been named 2015 Green Ribbon Schools by the U.S. Secretary of Education, Arne Duncan.

These schools have been honored for their promising efforts to reduce negative environmental impact, ensure environmental education, promote better health, and cut utility costs.

As Secretary Duncan has noted, these schools are “an inspiration and deserve the spotlight for embodying strong examples of innovative learning and civic engagement.”

It is clear that the honorees are powerful examples of the ways in which schools can help students cut school costs, provide healthy learning environments, and prepare for the real world ahead.

I also want to take this opportunity to honor my good and late friend, Senator Ron Raikes from Ashland, Nebraska, who with me developed the legislation for the focus schools in Nebraska. He has been and is sorely missed.

FIX OUR MENTAL HEALTH SYSTEM

(Mr. GUINTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUINTA. Mr. Speaker, I rise today to advocate on behalf of a cause near and dear to my heart, fixing our mental health system.

As some of you may know, I have a family member with a mental illness. This has allowed me to witness firsthand where our system fails those with a mental illness as well where the opportunities are for improvement.

As part of my effort to bring about change to New Hampshire’s mental health system, I joined my colleague, Representative KUSTER, last week in hosting a mental health summit with local advocates, healthcare providers, and New Hampshire lawmakers.

These experts are essential in the fight to reform and strengthen our mental health system. It is with their feedback, perspective, and opinion that myself, Representative KUSTER, and my colleagues in Congress can devise bipartisan solutions to fix this very important issue.

As a country, we can bring about real bipartisan change for individuals and families affected by mental illness. We need to change this to a patient-centered and metrics-driven environment to ensure that Granite State patients and their families are provided with the necessary care, support, and resources they deserve.

ASIAN AMERICAN AND PACIFIC ISLANDERS HERITAGE MONTH

(Ms. TITUS asked and was given permission to address the House for 1 minute.)

Ms. TITUS. Mr. Speaker, Asian American and Pacific Islanders’ achievements in art, technology, business, and education serve as a reminder that our Nation’s success is built upon the foundation of diversity.

This is particularly evident in my district, which is home to the largest API community in Nevada. The Las Vegas Asian Chamber of Commerce facilitated the reinvigoration of our economy after the 2008 crash.

Chinatown Plaza on Spring Mountain Road is home to one of the country’s most popular Chinese New Year celebrations. There is a thriving Filipino district along Maryland Parkway. Dozens of Thai, Japanese, Korean, and Vietnamese shops, restaurants, markets, and festivals enrich our society and strengthen our economy.

As we celebrate API Heritage Month, let us acknowledge the value immigrants bring to our lives and recognize how much we all stand to gain from enacting comprehensive immigration reform that honors our country’s legacy as the land of opportunity.

We don’t simply benefit from the myriad contributions of immigrants; we thrive and flourish because of them.

RECOGNIZING COLONEL ARTHUR JEFFREY

(Mr. NEWHOUSE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NEWHOUSE. Mr. Speaker, today, we present a Congressional Gold Medal, the highest civilian honor bestowed by Congress, to recognize the distinguished service of the American Fighting Aces.

One of the Fighter Aces being honored is Colonel Arthur Jeffrey, who was credited with shooting down 14 enemy aircraft during World War II. Colonel
Jeffrey flew air cover missions during D-day. In December 1944, he was awarded the Silver Star for his “courage, combat skills, and gallant leadership” while thwarting an enemy mission.

Colonel Jeffrey ended his tour as commander of the 434th Fighter Squadron. His exceptional leadership during the time with the Distinguished Flying Cross, with one oakleaf cluster, and the Air Medal, with 16 oakleaf clusters.

Colonel Jeffrey passed away this April in Yakima, Washington, at the age of 95, regrettably before this honor was bestowed.

Please join me in honoring the memory of Colonel Arthur Jeffrey, a remarkable American, for his outstanding service defending our Nation. 

HEAD START 50TH ANNIVERSARY

(Mr. CLYBURN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CLYBURN. Mr. Speaker, this week marks the 50th anniversary of Head Start, a wonderful success story that empowered 32 million children in America.

Unfortunately, the future of Head Start today stands in grave peril due to the misplaced priorities of the Republican budget which cuts $759 billion from nondefense discretionary funds and will result in 35,000 fewer children participating in Head Start.

House Democrats want to embrace the future by investing in early childhood education and enacting universal prekindergarten. Democrats strongly support President Obama’s initiative to fully fund Head Start and expand the Early Head Start-Childcare Partnerships. Research shows that high-quality early education is a great investment in a child’s life and our Nation’s future.

Mr. Speaker, our children are our future. As Head Starters across the country plant rose bushes this week to commemorate President Johnson’s Rose Garden launching of Head Start, this Congress must reject the misplaced priorities of the Republican budget and embrace a brighter future for our children.

HONORING WARRIORS WEEKEND

(Mr. FARENTHOLD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FARENTHOLD. Mr. Speaker, I am here today to pay tribute to our veterans and to the men and women of our Armed Forces who wake up every day, put on our Nation’s uniform, and don’t know if they are going to be home that evening safely with their families.

Last weekend, volunteers came together in Port O’Connor, Texas, to honor more than 900 veterans and current members of the Armed Forces for the ninth annual Warriors Weekend.

Warriors Weekend brings together military members who have been wounded during combat in the global war on terror—and not just those who are wounded physically, but also those with invisible scars, like PTSD and depression.

Mr. Speaker, many of these current and former military members are still in recovery and physical rehabilitation, but the weekend event gives them the chance to build a support network and have a great time enjoying the Texas outdoors.

Warriors Weekend was created in part by veterans who served during Vietnam. They knew all too well how it felt to return home from war and be looked down on. They wanted to make sure every member of the military is welcomed home properly, and they knew that our wounded veterans often times have needs that are overlooked.

I urge Members to support Warriors Weekend again next year.

PASS A LONG-TERM PLAN TO FIX OUR NATION’S TRANSPORTATION INFRASTRUCTURE

(Mrs. CAROLYN B. MALONEY of New York asked and was given permission to address the House for 1 minute.)

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, the House voted yesterday to approve a 2-month extension of the highway trust fund. I am pleased we were able to pass a short term fix, but it is time to stop kicking the can down the road.

I urge my colleagues to use the next 60 days to come up with a long-term plan to invest in our Nation’s transportation infrastructure, a plan that will create jobs, strengthen American competitiveness, and lay the groundwork for future economic growth.

I asked the Joint Economic Committee staff to analyze the costs of U.S. underinvestment in infrastructure, and this map tells an important part of the story.

Across the country, one in four bridges are structurally deficient or functionally obsolete. That is scary, and it is a matter of public safety. Americans are taking tens of millions of trips every day over bridges that are in need of repair.

As you can see on the map, in some States, over one-third of the bridges are failing. Here in the Nation’s Capital, 70 percent of our bridges are failing. We should fix our crumbling infrastructure as a matter of public safety and as a matter of national pride.

To see how your State is doing, you can download the map and the raw data behind it from the JEC, jec.senate.gov.

I urge my colleagues to support infrastructure. It is time to move beyond a 2-month extension bill, instead, work on a long-term solution to this critical and important development challenge.

NATIONAL FOSTER CARE MONTH

(Ms. ROS-LEHTINEN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ROS-LEHTINEN. Mr. Speaker, as we celebrate National Foster Care Month, first recognized by President Ronald Reagan in 1988, I would like to thank the dedicated foster families, social workers, and service providers for their commitment to help children.

May is also a time to shed light on the plight of nearly 400,000 children and youth who are currently in our country’s foster care system, and call for safe and nurturing environments for these vulnerable members of our society.

In an effort to give qualified adoptive and foster parents an opportunity to make a lasting difference in the lives of these children, I will be introducing bipartisan, bicameral legislation that would help ensure that more children have the opportunity to be raised in a loving and supportive home that they call their own.

The Every Child Deserves a Family Act would ensure that prejudices play no part in adoption and foster care placements. A parent’s ability to care for a child should not be determined by any parent’s sexual orientation or gender identity, but by their love.

Mr. STIVERS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 273 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. Res. 273

Resolved, That at any time after adoption of the resolution the Speaker may, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House on the state of the Union for consideration of the bill (H.R. 2262) to facilitate a pro-growth environment for the developing commercial space industry by encouraging private sector investment and creating reliable and predictable conditions, and for other purposes. The first reading of the bill shall be dispensed with. All points of order against consideration of the bill are waived. General debate shall be confined to the bill and shall not exceed one hour equally divided and controlled by the chair and ranking minority member of the Committee on Science, Space, and Technology or their respective designees. After general debate the bill shall be considered

May 20, 2015

CONGRESSIONAL RECORD — HOUSE H3403
for amendment under the five-minute rule. In lieu of the amendment in the nature of a substitute recommended by the Committee on Science, Space, and Technology now printed in the bill, it shall be in order to consider an original bill for the purpose of amendment under the five-minute rule an amendment in the nature of a substitute consisting of Rules Committee Print 114-17. That amendment in the nature of a substitute shall be considered as read. All points of order against that amendment in the substitute are waived. The report of the Committee on Rules accompanying this resolution. Each such amendment may be offered only in the order printed in the report, may be offered only by a Member designated in the report, shall be considered as read, shall be debatable for the time specified in the joint resolution, and shall not be subject to a demand for division of the question in the House or in the Committee on the Whole. Any amendment against which amendments are waived. At the conclusion of consideration of the bill for amendment the Committee shall rise and report the bill to the House on its original text. The previous question shall be considered ordered on the bill and amendments to the bill without intervening motion except one motion to recommit with or without instructions.

The Speaker may appoint Members of the House of Representatives as Special Counsel for the purpose of debate only.

The Speaker pro tempore. Is there objection to the request of the gentlemen from Ohio?

There was no objection.

The Speaker. Mr. STIVERS. On Tuesday, the Rules Committee met and reported H. Res. 2262, the HOUSE RESOLUTION 273, provides for a structured rule for the consideration of H.R. 2262 and a closed rule for the consideration of H.R. 880. The resolution provides for 1 hour of debate, equally divided between the chair and the ranking minority member of the Committee on Science, Space, and Technology, for H.R. 2262, and 1 hour of debate, equally divided between the chair and ranking minority member of the Committee on Science, Space, and Technology, for H.R. 880. The resolution also provides for the consideration of seven amendments to H.R. 2262, and three amendments to this resolution, to recommit each bill. In addition, the rule provides for the normal recess authorities to allow the chair to manage pro forma sessions; it provides for the Committee on Appropriations to have the opportunity to file reports during the district work period; and it provides for suspension authority for Thursday to provide flexibility on the last day prior to the district work period.

Mr. Speaker, I rise today in support of the resolution and the underlying legislation.

Both of these bills represent critical investments in science and technological innovation. On the floor this week, we have debated and passed several pieces of legislation to encourage the research and development of new technologies and ideas, moving our economy and our country forward and cementing our place in the world as the leader in scientific discovery.

These discoveries and the research they result from will protect and create high-tech, high-paying jobs that can untold benefits to our economy, benefiting all Americans. The rule and the underlying legislation we have under consideration today continues that objective, and I look forward to discussing these critical issues with our colleagues here in the House.

H.R. 2262, the SPACE Act of 2015, is a package of four bills that update the Commercial Space Launch Act. H.R. 2262, the SPACE Act, as introduced by the majority leader, the gentleman from California (Mr. McCARTHY), will facilitate a progrowth environment for the commercial space industry by encouraging private sector investment and by creating a more stable and predictable regulatory environment.

H.R. 1508, the Space Resource Exploration and Utilization Act, introduced by the gentleman from Florida (Mr. POSEY), will promote the development of a United States commercial space resource exploration and utilization industry, and will increase the exploration and utilization of resources in outer space.

H.R. 2261, the Commercial Remote Sensing Act, introduced by the gentleman from Oklahoma (Mr. BUCKNUM), will facilitate the continued development of the commercial remote sensing industry and protect our national security.

Finally, H.R. 2263, the Office of Space Commerce Act, proposed by the gentleman from California (Mr. ROHRABACHER), will rename the Office of Space Commercialization to the Office of Space Commerce, and it will seek to foster the conditions for the economic and technological growth of the United States space commerce industry.

This package of bills will ensure American leadership in space by fostering a strong and vibrant commercial space industry. Without this legislation, the commercial space industry may face a myriad of regulatory hurdles that would threaten America's continued exceptionalism in space exploration.

The other underlying bill in this rule, H.R. 880, addresses the research and development tax credit. In 1981, President Reagan signed into law a critical research and development tax credit, but Washington has let it expire and then has renewed it over a dozen times since then.

As we discussed last month as to our tax credits, Mr. Speaker, the R&D tax credit was included in the package of retroactive bills and extenders that were signed into law by the President on December 19 of last year, providing just 7 business days of certainty for businesses seeking to utilize this provision of our Tax Code. It, along with all of the others that expired again on December 31 of last year, have finally re-
mained expired. The temporary nature of the now expired research credit limits its effectiveness, which prevents some businesses from having certainty on long-term investments in U.S.-based research and development.

More research and development means more innovation, greater economic growth, and more American
In 2012, American companies invested $302 billion in research and development. As of 2011, 1.47 million Americans worked directly in research and development. Increased certainty, combined with the simplification of our tax code, would lead to more research and more American jobs.

Investment in research and development is the key to America remaining the world’s leader in innovation. The percentage of patents awarded by the U.S. Patent Office has increased each year, and more than 54 percent of the patents awarded were of American origin. By 2014, the number fell to 48 percent. From 2001 to 2011, America’s share of global research and development declined from 37 percent to just 30 percent.

By making the research credit permanent, researchers can stop worrying about whether Congress is going to extend the tax credit and can, instead, focus on new discoveries that will help fuel economic growth. I look forward to debating these bills with our House colleagues, and I urge support for the rule and the underlying legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. HASTINGS. Mr. Speaker, I yield myself such time as I may consume, and I thank the gentleman from Ohio for yielding me the customary 30 minutes for debate.

I rise today in opposition to the rule and the underlying bills.

Before I proceed, I did not speak during the 1 minutes, and I want to also take cognizance of this being the 50th anniversary of Head Start and, additionally, this month of May as being Foster Care Month. Like many Members, I have a young person who has a more compelling story about foster care—Ke’onda Johnson from Royal Palm, Florida—who is shadowing me today, and I am delighted that she and other youngsters have this opportunity.

Mr. Speaker, this rule provides for the consideration of H.R. 880, the American Research and Competitiveness Act of 2015, and H.R. 2262, the SPACE Act of 2015—two separate bills, wholly unrelated in content and purpose.

As a first order of business, I believe it is critical that I take a moment to highlight the manner in which we are debating this rule today. The deliberation of multiple, unrelated bills under a single rule is a disturbing trend that has ballooned under Republican leadership and is one that threatens the very foundation of the democratic process. Forcing several pieces of legislation into a single rule not only prevents Members of this Chamber from making informed judgments about the proper floor procedure for each measure, but it also leads to disjointed and often perplexing debates about an assortment of unconnected issues.
While it is uncontested that the issues these bills seek to address are important, the partisan way in which they have been presented prevents a robust deliberation, and I therefore oppose both the rule and the underlying bills.

I reserve the balance of my time, Mr. Speaker.

Mr. STIVERS. Mr. Speaker, I would like to respond to some of the comments of the gentleman from Florida and remind him that each bill will be separately debated and that, obviously, this combined rule is a floor time management technique that the chairman of the Committee on Rules yesterday said was an aberration. I take him at his word; and I think it is important to note that, during Democratic majorities, this was certainly not an unheard-of practice, either.

I do want to make sure that I reiterate that every bill will be separately debated; and I would remind the gentleman that, during the time we have to debate the rule, if we actually stick to the topics related to the bills and the rules, it will help us manage our floor time even better.

With that, I yield 5 minutes to the gentleman from Ohio (Mr. Posey).

Mr. POSEY. I thank the gentleman from Ohio for yielding.

Mr. Speaker, I rise today in support of the rule and the underlying legislation.

Despite some of the comments we have heard from across the aisle this morning, I remember my first 2 years, my first term here, and not one time was I allowed to even file a single amendment to a single bill here. All the rules were closed, and it was run like a king would run a kingdom, not a democratic republic. Here, today, I think the other side has already filed seven amendments on one of these bills. That is seven times more than I ever got to do about filling when you ran this place.

Another great thing about this bill, you actually get to read it before we pass it. We have done all our bills like that since we have taken control. You actually get to read the bills before they are passed. When you all were in the majority, we had to pass them before we were. When you all were in the majority, I think the way you read them is you remember the famous quote.

You refer to this as a grab bag. The only place there is the litany of totally unrelated subjects rattled off, as if they somehow related to this bill. I mean, that doesn't pass the straight face test.

Now to the bill. I would like to thank the majority leader, Kevin McCarthy, and Chairman Lamar Smith for their hard work on the SPACE Act. The SPACE Act will help ensure American leadership in space, facilitating the growth and stability of the commercial space industry. This is an important, historic, and exciting piece of legislation.

This legislation includes many important provisions to update our laws and the oversight of the commercial space industry, including title 2 of the Space Resource Exploration and Utilization Act—historic, bipartisan, bicameral legislation introduced with my colleague from the State of Washington, Doug Lamborn.

I appreciate the support H.R. 1508, incorporated herein, has received from many members of the Committee on Science, Space, and Technology and the thorough work and research of Senator Marco Rubio, who introduced identical legislation in the United States Senate.

The SPACE Act also includes a provision which would streamline regulations and encourage cooperation between government agencies’ commercial space activities to eliminate red tape and bureaucracy that are impeding development of America’s commercial space industry.

The Federal Aviation Administration, the Department of Defense, the National Aeronautics and Space Administration, and other agencies are all involved in overseeing many commercial space launches, and sometimes there are procedures that could be streamlined, cutting costs to both the Federal Government and commercial companies and making the United States companies more competitive in the global marketplace.

Let me add that this bill includes a provision requiring the FAA to provide direction for space support vehicles, also known as experimental aircraft. Unfortunately, for too long, the FAA has held up any streamlining direction for space support vehicles, which the FAA grounded because they use experimental aircraft. This is a testament that FAA needs serious reform and needs to be brought into the 21st century.

In short, the SPACE Act is a critical piece of legislation to the future of our commercial space industry, and it is important to our space exploration efforts as well.

I thank my colleagues again for their work on the SPACE Act and urge all Members to support the rule today and passage of this important legislation.

The SPEAKER pro tempore (Mr. MARCHANT). Members are reminded to direct their remarks to the Chair and not to other Members in the second person.

Mr. HASTINGS. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Michigan (Mr. Levin), who is the ranking member on the Committee on Science and Means and a good friend of mine.

(Mr. LEVIN asked and was given permission to revise and extend his remarks.)

Mr. LEVIN. I thank Mr. HASTINGS for yielding me the time.

Mr. Speaker, this debate is not about support for the R&D credit. Democrats have a long track record of supporting the R&D tax credit. Indeed, I have often been the author of legislation to strengthen it.

This debate, purely and simply, is about fiscal responsibility, about taking the tax provision and making it permanent without paying one dime for it.

When former Chairman Camp unveiled a tax reform proposal last year, he undertook a comprehensive consideration of the more than 50 tax provisions that expired at the end of last year, but in a fiscally responsible manner.

□ 1315

This bill does just the opposite. It continues a helter-skelter approach toward tax extenders, without any regard whatsoever for paying the hundreds of billions of dollars they cost to make them permanent.

Last year, Ways and Means Republicans passed 14 permanent extensions at a cost of $825 billion. They went nowhere because the President has made clear his opposition to those provisions.

With this bill, this year’s price tag has reached $586.3 billion. It is particularly glaring that the majority is passing unpaid-for tax cuts the very same week that they once again put off a long-term extension of highway funding because they are unable to find a revenue stream.

There is no lack of support for the R&D credit among us Democrats. It is the approach Republicans are taking that we oppose and strongly so. It is fiscally irresponsible indeed, and it would leave behind vital provisions that help hard-working American families, like the expansion of the earned income tax credit, the child tax credit, and the American opportunity tax credit.

We stand ready to work with the majority on tax reform and on a long-term extension of highway funding. Today’s R&D bill is tax reform in reverse. It is talk of feasibility and responsibility but hypocrisy and creates another big financial pothole standing in the way of long-term highway funding.

Vote “no” on this rule, and vote “no” on the bill relating to R&D tax credits.

Mr. STIVERS. Mr. Speaker, I reserve the balance of my time.

Mr. HASTINGS. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, in closing, I stand steadfastly against not only the way in which we have been conducting business with regard to the way we report our rules, but also to both underlying bills for their partisan posturing and failure to address the important issues facing the middle class in this country.

We cannot continue to provide tax credits without establishing a revenue offset, enact tax policies that favor a partisan agenda and push us further away from needed comprehensive tax reform, or offer legislative gifts to industry giants at the expense of the American public.
Mr. Speaker, Memorial Day is next Monday. If we defeat the previous question, I am going to offer an amendment to the rule to bring up Representative Brownley’s Help Hire Our Heroes Act, H.R. 670. H.R. 670 would reauthorize the Veterans Retraining Assistance Program, which expired in March 2014. That program paid for veterans to get training for high-demand occupations, and during its 3 years in existence, it helped more than 76,000 veterans.

Mr. Speaker, I ask unanimous consent to insert the text of the amendment in the RECORD, along with extra- material, immediately prior to the vote on the previous question.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. HASTINGS. Mr. Speaker, I urge my colleagues to support and defeat the previous question; vote “no” on the underlying bills.

I yield back the balance of my time.

Mr. STIVERS. Mr. Speaker, I yield myself the balance of my time.

I appreciate the remarks of the gentleman from Florida, but I would like to respond to a few of the comments.

The R&D tax credit has been overwhelmingly supported for the last 16 extensions, the last time garnering 378 votes. Only 46 Members voted against the R&D tax credit.

The R&D tax credit will be passed again. In fact, the gentleman from Michigan admitted, Mr. Speaker, that the vast majority of Democrats will vote to extend the R&D tax credit. In fact, they will do it every year for the next 10 years, like they have the last few years. When it is done every year, they don’t insist it is paid for.

If we do it for 9 or 10 years in a row without paying for it—the entire budget window—why don’t we just create some certainty for our businesses so we can invest in high-tech jobs and growing our economy, Mr. Speaker?

Let’s create certainty for the American people. Let’s pass the bill. Let’s pass the rule. Let’s pass the previous question.

I think, unfortunately, the arguments from the gentleman from Florida, Mr. Speaker, really encourage cliff politics—high-stakes, expiring legislation that the American people don’t want. The American people want us to create certainty. They want us to support the bills that want us to support our technological innovation in this country, Mr. Speaker.

I would urge my colleagues to support the rule and support the underlying bills, Mr. Speaker.

Mr. Speaker, I rise to support the Rule on H.R. 2262, the Spurring Private Aerospace Competitiveness and Entrepreneurship Act of 2015 (the SPACE Act of 2015). And I thank Majority Leader MCCARTHY for sponsoring this important legislation. The space community is well served having Leader MCCARTHY as a champion.

This bill is the product of over three years of work. Congress solicited input from nearly every stakeholder group. That is reflected in the broad support that this bill has received.

From industry, to education groups, to grassroots citizen advocacy groups, this bill has been praised by virtually every interested party.

The process to getting here was inclusive and exhaustive. The Science, Space, and Technology Committee held numerous hear- ings on the topic over the last three years.

On November 19, 2013, the Committee held a hearing on updates to the Commercial Space Launch Act. On February 14, 2014, the Committee held a hearing on updates to the Commercial Space Launch Act. On April 29, 2014, the Committee held a hearing on the Federal Aviation Administration’s (FAA) space traffic management proposal and orbital debris. On February 27, 2015, the Committee held a hearing on the Commercial Crew program.

Last October, staff formally submitted a draft to the minority. Within the last two months, the majority and minority have worked to write committee that would pass this bill. For instance, Section 101, which deals with Consensus Standards, is the result of bipartisan negotiations. The same can be said for Section 102, which calls for an update to the maximum probable loss calculation under indemnification.

Section 103, which pertains to Launch Vehicle Flexibility, is identical to the bipartisan provision sponsored by Senators HEINRICH and RUBIO that easily passed the Senate Commerce, Science, and Transportation Committee last year by voice vote.

Section 104 clarifies the role of Government Astronauts and is almost identical to the provision requested by the FAA and NASA.

The minority also played a role in writing Section 108 on Orbital Traffic Management. Section 109 on Commercial Spaceports also addressed bipartisan requests.

Section 111 on the Streamlining of Commercial Space Launch Activities is similar to language already in the Senate’s bill, and Section 112 was the result of an amendment in Committee that was removed by the Senate leader.

Title 2 of the bill focuses on Space Resource Exploration and Utilization. As a stand-alone bill, it was the subject of a hearing last September and it is cosponsored by both Republicans and Democrats. It even has a Democratic champion on the Senate side, Senator MURRAY.

Title 3 of the bill addresses Commercial Remote Sensing and also benefits from bipartisan co-sponsorship. When it was marked up in Committee last week, it enjoyed unanimous support. The same can be said of Title 4 of the bill that pertains to the Office of Space Commerce.

At the Committee’s recent markup, eight amendments to the provisions we are consid- ering today—two approved—three of which were amendments offered by Democrats.

The Rule before us today allows for consid- eration of five Democratic amendments and two Republican amendments. The majority has gone out of its way to include the minority in this process.

In fact, the Administration said in a state- ment that it, “does not oppose House passage of the bill”—a rarity for bills considered under a Rule.

This bill facilitates a pro-growth environment for the developing commercial space industry by encouraging private sector investment, creating more stable and predictable regulatory conditions, and improving safety.

The Act ensures American leadership in space and fosters the development of advanced technologies. I urge my colleagues to support this Rule as well as the underlying bill, and I thank the Majority Leader once again for his initiative on this legislation.

Ms. JACKSON LEE. Mr. Speaker, I rise to speak on the rule for H.R. 2262, the SPACE Act of 2015.

Article 1 Section 8 of the United States Constitution states that “The Congress shall have Power to promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries.”

It does not say that the Congress shall have the right to ignore.

The United States space program has existed for over half a century and my commit- ment to providing NASA with the resources to carry the agenda forward with its ambitious agenda of research, exploration, and discovery is unwavering.

NASA continues to push the boundaries of what is possible, keeping our Nation on the forefront of innovation and exploration.

It is the responsibility of this Congress to ensure that the future of space exploration re- mains a part of our national destiny.

It inspires our children to look to the stars and dream of what they too, one day, may achieve.

The Jackson Lee Amendments made in order by the Rules Committee are intended to improve the Space Act.

My amendments are simple and will improve the bill.

1. Jackson Lee Amendments to H.R. 2262

This Jackson Lee Amendment Number 8, would facilitate the participation of HBCU, His- panic Serving Institutions, National Indian institu- tions, in fellowships, work-study and employ- ment opportunities in the emerging commercial space industry.

My amendment would increase awareness among underrepresented groups in STEM em- ployment and education opportunities in the commercial space industry.

One of the most enduring difficulties faced by underrepresented populations in the STEM field is a lack of awareness and understanding of the connection between STEM and employ- ment opportunities.

In 2012, a survey found that despite the na- tion’s growing demand for more workers in science, technology, engineering, and math, the skills gap among the largest ethnic and racial minorities groups remains stubbornly wide.

Blacks and Latinos account for only 7 per- cent, of the STEM workforce despite rep- resenting 28 percent of the U.S. population.

2. Jackson Lee Amendment on Minority and Women Owned Businesses

The Jackson Lee Amendment requires that provisions of the bill that address future legis- lation also lay the foundation for the commer- cial space industry include work on how to ef- fectively conduct outreach to small business concerns owned and controlled by women and minorities.

I have worked hard to help small business owners to fully realize their potential.

That is why I support entrepreneurial devel- opment programs, including the Small Busi- ness Development Center and Women’s Busi- ness Center programs.

These initiatives provide counseling in a va- riety of critical areas, including business plan development, finance, and marketing.
Outreach is key to developing healthy and diverse small businesses.

There are approximately 6 million minority owned businesses in the United States, representing a significant aspect of our economy. According to the most recent available Census data, minority owned businesses employ nearly 6 million Americans and generate $1 trillion dollars in economic output.

Women owned businesses have increased 20% between 2002 and 2007, and currently total close to 8 million.

My home city of Houston, Texas, the home of the Johnson Space Center, is also home to more than 60,000 women owned businesses, and more than 60,000 African American owned businesses.

Final Jackson Lee Amendment Seeks Funding To Continue Space Exploration R&D

The taxpayer has invested in space exploration for decades.

This investment is reaping benefits for the commercial space industry today.

Although commercial transportation is not 100 percent without risk, it is much safer than it would have been without dedicated and focused basic and applied research to address safety issues.

While the government supports the aspirations of small companies and small to become part of the commercial space industry, it should still be the responsibility of NASA to pursue research that can save lives and improve space travel.

If the future we envision is one where thousands of businesses will benefit from commercial and government space exploration and investment efforts then investing today in tomorrow’s economy makes good sense.

Although I believe the Jackson Lee Amendment would improve the bill, there exist tradeoffs in any effort to improve the bill.

First, it is regrettable that the SPACE Act will restrict the “learning period” of the Federal Aviation Administration (FAA) regulation of spacecraft.

This learning period should be extended for a shorter period than the ten-year extension through 2025 included in the bill.

Second, a voluntary industry consensus standard would provide a strategy that improves the overall safety of the industry as opposed to performance-based regulations.

Finally, there are concerns about the authority of U.S. companies to move forward with innovative space initiatives without authority to ensure continuing supervision of these initiatives as delineated in the Outer Space Treaty.

This report works all together in addressing these troubling aspects of the bill.

I ask my colleagues to vote for the Jackson Lee Amendments.

The material previously referred to by Mr. HASTINGS is as follows:

An amendment to H. Res. 293 offered by Rep. HASTINGS of FLORIDA

At the end of the resolution, add the following new sections:

SEC. 7. Immediately upon adoption of this resolution the Speaker shall, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House on the State of the Union.

The Speaker shall consider the report of the bill, and shall, immediately and without delay, determine whether the bill shall be considered in the House, and shall, immediately thereafter, proceed to a vote on the adoption of the bill. The Speaker shall not permit any debate upon the bill.

The previous question shall be agreed to without further debate.

THE VOTE ON THE PREVIOUS QUESTION: WHAT IT REALLY MEANS

This vote, the vote on whether to order the previous question on a special rule, is not merely a procedural vote. A vote against ordering the previous question is a vote against the Republican major party and a vote to allow the Democratic minority to offer an alternative plan. It is a vote about what the House should be debating.

Mr. Clarence Cannon’s Precedents of the House of Representatives (VI, 308–311), describes the vote on the previous question on the rule as “a motion to direct or control the consideration of the subject before the House being made by the Member in charge.” To defeat the previous question is to give the Committee of the Whole the power to make the decision about the subject before the House. Cannon cites the Speaker’s ruling of January 13, 1920, to the effect that “the refusal of the House to sustain the demand for the previous question passes the control of the resolution to the opposition” in order to offer an amendment. On March 15, 1969, a member of the majority party offered a motion to reconsider. The House defeated the previous question and a member of the opposition rose to a parliamentary inquiry, asking who was entitled to recognition. Speaker Joseph G. Cannon (R-Illinois) said: “The previous question having been refused, the gentleman from New York, Mr. Fitzgerald, who had asked the gentleman to yield to him for an amendment, is entitled to the first recognition.”

The Republican minority may say “the vote on the previous question is merely a vote on whether to proceed to an immediate vote on adopting the resolution . . . [and] has no substantive legislative or policy implications whatsoever.” But that is not what the rule says. Listen to the Republican Leadership Manual on the Legislative Process in the United States House of Representatives (6th edition, page 153). Here’s how they describe the previous question vote in their own manual: “Although it is generally not possible to amend the rule because the majority Member controlling the House will not permit for the purpose of offering an amendment, the same result may be achieved by voting down the previous question on the rule. . . . When the motion for the previous question is defeated, control of the time passes to the Member who led the opposition to ordering the previous question. That Member is the author of the amendment, because he then controls the time, may offer an amendment to the rule, or yield for the purpose of amendment.”

In Coffman’s Procedure in the U.S. House of Representatives, the subchapter titled “Amending Special Rules” states: “a refusal to order the previous question on such a rule . . . [which reports from the Committee on Rules] opens the resolution to amendment and further debate.” (Chapter 21, section 21.2) Section 21.3 continues: “Upon rejection of the motion for the previous question on a resolution reported from the Committee on Rules, control shifts to the Member leading the opposition to the previous question, who may offer an amendment or motion and who controls the time for debate thereon.”

Clearly, the vote on the previous question on a rule does have substantive policy implications. It is one of the only available tools for those who oppose the Republican majority’s agenda and allows those with alternative views the opportunity to offer an alternative plan.

Mr. STIVERS. Mr. Speaker, I yield back the balance of my time, and I move the previous question.

The SPEAKER pro tempore. The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HASTINGS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 9 of rule XX, the Chair will reduce to 5 minutes the minimum time for any electronic vote on the question of adoption of the resolution.

The vote was taken by electronic device, and there were—yeas 241, nays 183, not voting 8, as follows:
Messrs. BEN RAY Lujan of New Mexico, Takai, and Rush changed their vote from ‘yea’ to ‘nay.’

So the previous question was ordered.

The result of the vote was announced as above recorded.

Stated against:

Mr. FRANKEL of Florida, Mr. Speaker, on rollcall vote 250, I was not present because I was unavoidably detained. Had I been present, I would have voted ‘nay.’

(By unanimous consent, Mr. BRADY of Pennsylvania was allowed to speak out of order.)

MOMENT OF SILENCE FOR THOSE LOST IN THE PHILADELPHIA TRAIN DERAILMENT

Mr. BRADY of Pennsylvania, Mr. Speaker, on Tuesday, May 12, we had a horrific train derailment crash in the city of Philadelphia. So first off, our thoughts and prayers are with the eight men and women who lost their lives and the over 200 who were injured.

I have never been more proud of the men and women who live and work in the city of Philadelphia, the city of brotherly love and sisterly affection. We had this major catastrophe at 9:15 at night. Within 4 minutes, our first responders—our police, our fire, Police Commissioner Ramsey, Fire Commissioner Sawyer—were on the scene.

The scene was in total darkness, and we had volunteers from the neighborhood who even joined in. Imagine, total darkness. The only light was flashlight shining back and forth.

I stand here as proud as I could be of the mayor of the city of Philadelphia, Michael Nutter, who, from Tuesday until Sunday, was on that scene constantly, orchestrating the administration people, moving them around, consoling families, making sure that all were accounted for, and even making sure that their belongings were given back to them.

I can’t be more proud of our hospitals and our universities. Universities opened their doors for loved ones to come. And our hospitals, the doctors, nurses, all the men and women who worked there—there were doctors who worked 30 hours and went back home and couldn’t sleep and came back to work another 12 hours.

But most importantly, two things really struck me. Temple University Hospital in the city of Philadelphia had a lot of the injured people admitted to their hospital. The students who go to Temple University heard about it, jumped on their bicycles, and rode down to assist all those in the hospital, whether it be by pushing a gurney or whether it would be consoling a family member or putting a family member with a loved one.

And the neighbors, the neighbors ran out again, in total darkness. There were 200 people-plus injured. Neighbors ran through, helping out through all the soot, picking them up, pulling them out of the trains, bringing them into their house, bringing out water, going to a nearby store and buying water, bringing towels, wiping them down.

One person said:

I am sorry I am in your home. I am full of soot, and I am dirtying your rug and your couch.

And in response, the lady said:

That is okay. We can buy more couches, and we can buy more things, more whatever we need to buy. But you can’t buy your health back. So we want to be here to help you in the best way we can.

I am honored to be standing here with my colleagues from Pennsylvania and some others from throughout the country. Some lost a loved one.

I am extremely proud to recognize Chairman Jeff Denham and Ranking Member Mike Capuano, who assisted me and toured the site with me. I appreciate their concern, and I appreciate them being there.

So, Mr. Speaker, the best way we can honor these men and women is to make sure that this accident never again happens in the United States of America.

With that, I ask for a moment of silence.

The SPEAKER pro tempore. Without objection, 5-minute voting will continue.

There was no objection.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HASTINGS, Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. This is a 5-minute vote.

The vote was taken by electronic device, and there were—a yes 240, noes 185, not voting 7, as follows:

AYES—240

Mr. REFORM, Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

Mr. HASTINGS pro tempore. This is a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 240, noes 185, not voting 7, as follows:

Mr. HASTINGS, Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. This is a 5-minute vote.

The vote was taken by electronic device, and there were—a yes 240, noes 185, not voting 7, as follows:

Mr. HASTINGS, Mr. Speaker, on rollcall vote 250, I was not present because I was unavoidably detained. Had I been present, I would have voted ‘nay.’

(By unanimous consent, Mr. BRADY of Pennsylvania was allowed to speak out of order.)

MOMENT OF SILENCE FOR THOSE LOST IN THE PHILADELPHIA TRAIN DERAILMENT

Mr. BRADY of Pennsylvania, Mr. Speaker, on Tuesday, May 12, we had a horrific train derailment crash in the city of Philadelphia. So first off, our thoughts and prayers are with the eight men and women who lost their lives and the over 200 who were injured.

I have never been more proud of the men and women who live and work in the city of Philadelphia, the city of brotherly love and sisterly affection. We had this major catastrophe at 9:15 at night. The SPEAKER pro tempore. This is a 5-minute vote.

The vote was taken by electronic device, and there were—aes 240, nos 185, not voting 7, as follows:
CONGRESSIONAL RECORD — HOUSE
May 20, 2015

H.R. 880

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.
This Act may be cited as the “American Research and Competitiveness Act of 2015”.

SEC. 2. RESEARCH CREDIT SIMPLIFIED AND MADE PERMANENT.
(a) In General.—Section 41(a) of the Internal Revenue Code of 1986 is amended to read as follows:

(1) Section 41(c) of such Code is amended to read as follows:

(2) In General.—For purposes of section 38, the research credit determined under this section for the taxable year shall be an amount equal to the sum of—

(1) 20 percent of so much of the qualified research expenses for the taxable year as exceed 50 percent of the average basic research payments for the 3 taxable years preceding the taxable year for which the credit is being determined, plus—

(2) 20 percent of such basic research payments for the tax year by a corporation to a qualified organization for basic research but only if—

(a) Such payment is pursuant to a written agreement between such corporation and such qualified organization, and

(b) Such basic research is to be performed by such qualified organization.
(B) by redesignating paragraphs (6) and (7) as paragraphs (3) and (4), respectively, and (C) in paragraph (4), as so redesignated, by striking subparagraphs (B) and (C) and by redesignating paragraphs (D) and (E) as subparagraphs (B) and (C), respectively.

(3) Section 41(f)(3) of such Code is amended—

(A)(i) by striking “-, and the gross receipts” in subparagraph (A)(i) and all that follows through “determined under clause (iii)”,

(ii) by striking clause (ii) of subparagraph (A) and redesignating clauses (iv), (v), and (vi), thereof, as clauses (iii), (iv), and (v), respectively,

(iii) by striking “and (iv)” each place it appears in subparagraph (A)(iv) (as so redesignated) and inserting “and (iii)”,

(iv) by striking subclause (IV) of subparagraph (A)(iv) (as so redesignated),

(B) by striking “and the gross receipts” of, in subparagraph (B),

(D) by striking “, or gross receipts of,” in subparagraph (B)(i)(1), and

(E) by striking subparagraph (C) and inserting the following new subparagraph:

“(C) ADJUSTMENTS FOR BASIC RESEARCH PAYMENTS.—In the case of basic research payments, rules similar to the rules of subparagraph (A)(iv)(II) shall apply.”

(4) Section 41(f)(4) of such Code is amended by striking “and gross receipts” and inserting “and basic research payments”.

(5) Section 28C(c) of such Code is amended by striking subparagraph (D).

(6) Section 45C(c)(2) of such Code is amended—

(A) by striking “base period research expenses” and inserting “average qualified research expenses”, and

(B) by striking “BASE PERIOD RESEARCH EXPENSES” in the heading and inserting “AVERAGE QUALIFIED RESEARCH EXPENSES”.

(7) Section 28A of such Code is amended—

(A) by striking “basic research expenses” in paragraph (2)(B) and inserting “basic research payments”,

(B) redesignating paragraphs (1) of such Code is amended—

(c) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to taxable years beginning after December 31, 2013.

(2) SUBSECTION (B).—The amendment made by subsection (b) shall apply to amounts paid or incurred after December 31, 2014.

SEC. 3. SECURITIZATION EFFECTS.

The budgetary effects of this Act shall not be entered on either PAYGO scorecard maintained pursuant to section 4(d) of the Statutory Pay-As-You-Go Transparency Act of 2010.

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. RYAN) and the gentleman from California (Mr. THOMPSON) each will control 30 minutes.

The Chair recognizes the gentleman from Wisconsin.

Mr. RYAN of Wisconsin. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on H.R. 880, the American Research and Competitiveness Act of 2015.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. RYAN of Wisconsin. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is really simple. We have had the research and development tax credit in law since 1981. It has periodic expirations in it. Every time the law expires, we renew the law. Why? Because we think this is a good policy, and on a bipartisan basis our votes have always reflected that.

We believe that since we renew this specifically 1 year at a time, it does not do very well in giving businesses the time to plan and the ability to consider long-term investments. They need certainty. One of the problems plaguing this economy is the lack of certainty. So what this bill does is it makes it permanent. This is something that we think ought to be a permanent feature of our Tax Code.

Mr. Speaker, one of the arguments you are going to hear is, well, this has to be paid for. I want people to understand what that means when people say that. They are saying that to keep taxes where they are, we need to go raise them on other people. To put it another way, the minority is telling us they want a permanent extension of tax credits from the stimulus bill which was temporary, but they are saying if we make permanent provisions that have bipartisan support that are extended on an annual basis, if we make them permanent, all of a sudden we have to go raise taxes on some other hard-working Americans just to keep these taxes in place.

I think that is incorrect. We don’t think it jibes with reality. More importantly, we think it is very important, to help unleash job creation, to keep research and development jobs in America, that we make the research and development tax credit permanent.

PERMISSION TO POSTPONE PROCEEDINGS ON MOTION TO RECOMMIT

Mr. RYAN of Wisconsin. Mr. Speaker, I ask unanimous consent that the question of adopting a motion to recommit on H.R. 880 may be subject to postponement as though under clause 8 of rule XX.

The SPEAKER pro tempore. Is there objection to the motion of the gentleman from Wisconsin?

There was no objection.

Mr. RYAN of Wisconsin. Mr. Speaker, at this time, I ask unanimous consent that the gentleman from Texas (Mr. BRADY), the author of H.R. 880 and a Ways and Means Committee member, manage and control the remaining time for the debate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?
What is particularly glaring is that we can’t even pass a long-term transportation bill, which is, by far, more important to our national security, our economic growth, and our competitive- ness. The reason we can’t pass it is because the majority is unable to find a way to pay for it.

Yet here we are taking up a bill that costs $181 billion. Add that to the other unpaid-for tax cut bills that this body has already passed this year, and we will have added $586 billion to the deficit. That is almost half a trillion dollars. That is over half a trillion dollars. And what do we have to show for it? The President has already said that he is going to veto this bill, so what is the point? Why are we wasting the time and expense of debating this? It is going to be vetoed anyway.

What we should be doing is working together to pass legislation that is vital to every congressional district’s long-term transportation bill and comprehensive tax reform.

Mr. Speaker, we stand ready to work with the majority on these important initiatives. Today’s bill just takes us further away from that goal. Therefore, I ask that we vote “no” on this bill and make sure we vote for America. I reserve the balance of my time.

Mr. BRADY of Texas. Mr. Speaker, I yield myself such time as I may consume.

When it comes to research and development initiatives, America is rapidly falling behind our global competitors. Unless the U.S. remains the world’s leading innovator, our economy will suffer while middle class families and talented college graduates will see jobs and opportunities lost to foreign countries. Making permanent the tax incentives for companies to invest in research and development is right here in the United States will ensure lifesaving technologies, state-of-the-art computer systems, and breakthroughs in manufacturing products.

What America has done is lead the world in R&D incentives, the U.S. has now dropped to—get this—27th among our global competitors. America’s share of global research and development, while it is still big, has dropped from 39 percent, before the turn of this new century, to 31 percent.

So look at China. By contrast, China’s R&D spending has increased fourfold. It is poised to surpass that of America by 2022.

Permanency provides certainty to U.S. innovators. It makes the Federal budget scorekeeping far more honest, and it removes the astersick from this temporary provision so that progrowth tax reform can advance.

This bill avoids a new provision that will allow eligible small businesses to count the credit against the AMT, the alternative minimum tax. This is an important provision to enable America’s newest innovators to develop cutting-edge, market dominating technologies.

I am proud to have worked on this important tax incentive with my friend JOHN LARSON, a Democrat from Connecticut. The House passed this provision with a strong bipartisan vote last year.

While the economy is improving, there are millions of Americans still looking for full-time work and millions more struggling whose pay checks have been stagnant for years. If we want a permanently strong economy, we need a permanent research and development tax credit.

The time for excuses is over. Stand with innovators or stand with China and other countries with the R&D being shipped to the rest of the world. I say we stand with America, our innovators, our college graduates, and our businesses.

I reserve the balance of my time.

Mr. THOMPSON of California. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. RANGEL), former chair of the committee and a strong proponent of responsible tax policy.

Mr. RANGEL. Mr. Speaker, I was listening to the eloquent words of my friend from Texas about the importance of research and development, and I can’t think of any member on our committee that could not agree with him more.

While he was eloquently speaking about how important it was to our great Nation, I was even thinking about our trade bill if this is packaged in such a way that we would have our workforce with the backup of research and development, a trade bill that would include in it educational possibilities for the workforce, that would have infrastructure there and would have America knowing that we just weren’t talking about success of the corporations, but for success of America.

Also, the part that he mentioned continuity so that our businesses would know exactly what they could depend on. I just can’t, for the life of me, see how they will know which part of the Tax Code or which week that we intend to bring up knowing it is going to be vetoed, if really in our hearts what we want is continuity. There is only one way to get continuity, and that is to review the Tax Code, to reform the Tax Code.

If you take out all of the gems just to get a “no” vote against it politically, you are really harming bipartisanship. That is what we need; that is what the Tax Code needs; that is what our country needs, a Tax Code that eliminates all of the loopholes, and concentrate on those things our country needs.

Of course, if politics is more important than policy, if all we are trying to do is play “I gotcha,” if all we want to say is we love research and development, but we know darn well politically we are not going to say that we all want reform, but now that we have both Houses Republican—House and the Senate—but we dare not talk about tax reform, well, I don’t think we want to play this political game.

What we do want to do—and I want to agree with the majority—research and development is what keeps America competitive. It should not be played with. It should not be politicalized. It should be a part of the tax reform bill.

If you can’t do it, then you have control of the Finance Committee in the Senate and refuse to do it when you are in charge of the Ways and Means Committee and have a President that is calling out for overall comprehensive fairness and equity and tax reform, it is painful to see how the eloquence of love for this country can be distorted by having votes on legislation that we know is never to become law.

I say, as I take my seat, I am not giving up on tax reform. I hope that the Republicans come together and have a meaningful bill not for our committee, but for our conscience.

Mr. BRADY of Texas. Mr. Speaker, I yield myself 15 seconds.

The President has threatened to veto this bill. The question is clear: Why is the President standing for those who would ship jobs overseas? Why isn’t he standing with Republicans and Democrats in Congress in this House to keep those jobs in research here in America? I yield 2 minutes to the gentleman from North Carolina (Mr. HOLDING), a new member of the Ways and Means Committee, who understands research and development in the Triangle of North Carolina.

Mr. HOLDING. Mr. Speaker, I want to thank Chairman BRADY for offering this important piece of legislation.

The research and development credit plays a crucial role in the continued economic growth of our Nation, spurring innovation and supporting high-skilled, high-paying jobs. Innovation has been a huge driver of growth in my district. Because of the breakthrough technologies coming out of Research Triangle Park, North Carolina has become a leader in American innovation.

In and around my district, I have seen how important the R&D credit has been to our Nation’s innovative companies, like Biogen, Cisco, GSK, SAS, UTC, and Siemens, amongst a host of others. I urge my colleagues to support such companies and their employees and the families of those employees by making this important credit permanent.

Right now, Mr. Speaker, a growing number of foreign countries are increasing innovation and advancing manufacturing by providing generous and permanent R&D tax credits along with lower corporate tax rates.

In fact, according to an OECD study, the U.S. ranks 22nd in research incentives among industrialized countries. We owe our innovators better, and in order to remain a leader in the increasing number of countries that continue to support and incentivize research and innovation here in the United States.
Passage of this bill will provide companies and researchers with the certainty and support they need to keep America and my district and North Carolina in the forefront of global innovation and send a strong message that we stand behind the groundbreaking research being conducted by our Nation's innovators.

Mr. Speaker, I urge support for this bill.

Mr. THOMPSON of California. Mr. Speaker, I yield myself such time as I may consume.

I just want to point out that the President is standing with those of us who support the R&D credit, but he wants it done responsibly. He wants it paid for, and he wants it part of tax reform. Just like all of us, we support the R&D credit. We want it paid for, and we want it part of tax reform.

To suggest that voting against this is standing with China, I find somewhat an ironic statement made by my friend from Texas, given the fact that China already holds so much of the U.S. debt. All this does is empower them more, give them more of our debt.

I yield 3 minutes to the gentleman from Texas (Mr. DOGGETT).

Mr. DOGGETT. Mr. Speaker, there is one type of innovation in which these Republicans are truly unexcelling—there is no competition. And that is the innovation in names, in naming these bills.

They salute climate deniers and The Flat Earth Society by slashing funding for earth science that is strongly opposed by geophysicists and one academic after another. What do they call it? The “America COMPETES Act.”

On this measure, its companion, they borrow almost $200 billion from anyone who will lend it to us to give mostly to the largest corporations, largely for doing research that they would be doing, even if they weren't rewarded. And that is the “American Research and Competitiveness Act.” Now, that is true innovation. They don't need a credit; they ought to get a prize for being contortionists when it comes to labeling these measures.

“This particular bill just digs us deeper and deeper into debt, while adding very little to our research capability. That is truly unfortunate, since America's future competitiveness is in jeopardy. And that is outlined this very day by the report, Lies on Weak Foundation,” a New York Times economic column.

As Eduardo Porter notes, “Investment in research and development has flattened over the last several years as a share of the economy... other countries are now leaving the United States behind... government budgets for basic research, the biggest source of financing for scientific inquiry... fell in 2013 to substantially below its level 10 years ago.”

Indeed, the Republican budget makes significant cuts to research, including hundreds fewer research grants that the President sought at both the National Institutes of Health and the National Science Foundation. I think we need more than another Ice Bucket Challenge to fund research for cures for cancer and diabetes, ALS, AIDS, and the like. We need the resources to tackle problems that are touching every family in this country.

Unfortunately, this R&D credit that is being made permanent without reform has required American taxpayers to subsidize the development of electronic cigarettes and other products to avoid corporate income taxes, instead of using those dollars to fight those dreaded diseases to which nicotine contributes.

Corporate research generally is focused more and more on the next quarter's reports to Wall Street to which excessive corporate compensation is tied, instead of focusing on basic research. Porter concludes in the same article that this particular bill is “unlikely to help much.” And he notes the Congressional Research Service, an objective source, that this regularly renewed credit “delivered, at most, a modest stimulus to domestic business R&D investment from 2000-2010.”

Mr. Speaker, I yield 3 minutes to the gentleman from Oregon (Mr. BLUMENAUER), a distinguished member of our Ways and Means Committee, from a district filled with innovators, all of whom would benefit from doing this policy the right way.

Mr. BLUMENAUER. Mr. Speaker, I appreciate the gentleman's courtesy.

I was listening to my dear friend, the gentleman from Texas, talk about the problem of climate change, and I was struck for a moment when he talked about the disadvantage vis-a-vis China, how—in a few years—we are going to slip behind China in R&D development.

He talked about the hundreds of thousands of jobs that could be made available if we were able to redouble our efforts in research and development and the concerns about the overall damage of the United States into the middle of the pack when it comes to research.

I was struck by those words. For a moment, I thought he was talking about the United States infrastructure because we don't have to wait for 3 or 4 or 5 years to slip behind China; we are already being overshadowed by their efforts. We are investing less than 2 percent of our gross domestic product in infrastructure; the Chinese are investing 8 percent.

The United States once had the finest infrastructure in the world—not anymore. Those international ratings that my good friend from Texas talked
Mr. Speaker, I want to just address my good friend from Texas for his leadership.

Mr. Speaker, I want to just address my good friend from Oregon to say, as someone on this side of the aisle, I, too, sense an urgency on transportation and infrastructure. I know that we need to step up and do something about it so that we can be moving our goods and services around. I do look forward to our working on tax reform, but, today, we are talking about research and development.

As we talk about certainty, certainly we need certainty with regard to our transportation and infrastructure system, but we need certainty when it comes to research and development. Business all across our country, as they are looking to try to create that next new product, as they are looking to innovate, as they are looking to create that next new thing in order to improve what we are doing and to enhance our Nation, they need to have that certainty to be able to look around the corner.

We are moving forward on research and development a step at a time. We are reauthorizing it a year at a time. Sometimes we are doing it retroactively, which means that those businesses don’t have the ability to plan and oftentimes don’t. They are happy to take the tax relief, but they are not really willing to plan and invest in it, oftentimes the following year, programs in which they are investing billions of dollars, creating thousands of jobs.

Innovation, Mr. Speaker, is something that we should all be united behind. We want to innovate here in the United States. We want to create things here in the United States. We do not want to have a research and development situation which really fosters innovation outside of the United States. Yes, we have slipped behind, and Republicans and Democrats alike want to make sure that the United States is leading the charge. We need to be globally competitive. We are not in a domestic economy—we are in a global economy. If we want to be globally competitive, we cannot be ranked 22nd when it comes to research incentives.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. THOMPSON of California. I yield the gentleman an additional 30 seconds.

Mr. BLUMENTHAUER. Where is the sense of urgency for the cost to families who are having $300 a year or more in damage to their cars? The fact that we are not being able to move product because we are stuck in traffic? Then our ports, our airports, our roads, our rail—we just had an example of its instability—where is the urgency?

I would, respectfully, suggest that we reject this wrongheaded approach and deal with real tax reform and the R&D tax credit. But in the meantime, maybe the Ways and Means Committee could find a week that we could spend working together to rebuild and renew America.

Mr. BRADY of Texas. Mr. Speaker, I am proud to yield 2 minutes to the gentleman from Illinois (Mr. DOLD), a new member of the Ways and Means Committee who comes from a research-driven State.

Mr. DOLD. Mr. Speaker, I come from a northern district in Illinois. We are the fourth-largest manufacturing district in the Nation. Yes, we rely on that infrastructure because we need to know how our raw materials come in, how our finished product goes out, and how we move people around. We also realize that those manufacturers rely on that research and development tax credit in order to innovate, in order to create that next new thing, that next new innovation. If we don’t do it in the United States, they will be doing it elsewhere.

Mr. Speaker, I just got back from Israel. One of the things that struck me as I swung by one of their companies is that they had a sign out front that read: “Where Innovation Never Stops.”

We either choose to innovate here, or they will do it elsewhere. This is a bipartisan initiative, and I ask my colleagues to support this initiative.

Mr. THOMPSON of California, Mr. Speaker, I yield myself such time as I may consume.

I just want to point out that my friend who just spoke said that he, too, believes in transportation, that we should be working on transportation and tax reform. But, today, we are talking about the R&D credit.

Mr. Speaker, the majority party sets the agenda. The reason we are not talking about transportation or tax reform is that they don’t want to talk about it. They set the agenda. They are the ones who decided that today we were going to do this irresponsible tax bill rather than look at comprehensive tax reform or look at transportation funding for our crumbling infrastructure.

Mr. Speaker, I am proud to yield 3 minutes to the gentleman from California (Mr. BECERRA), my colleague and friend and the chair of the Democratic Caucus.

Mr. BECERRA. I thank my friend for yielding.

Mr. Speaker, let’s make sure we get something straight. I don’t think there is a Member here on the floor who doesn’t agree that we want to invest in research and development so that we keep that innovation here at home and create jobs that pay well here at home. We all want to incentivize that job creation. We all want to make sure that the economy grows in the future. That is what is at issue. What is at issue is that this bill sends exactly the wrong message about our commitment to invest not just in our future but in our children and in what we call the middle class and the American Dream. See, there is a cost involved in doing research and development tax credits. That is a tax break. We are willing to give companies a tax break that the families who are up in this gallery won’t get. When they file their taxes, they won’t get to write off some of their costs for doing certain things because they are not companies, and they are not doing research and development.

We, as a community, as a country, are saying it is valuable to give a country a tax break to do that research that gives us the next invention. Great, but there is a cost. How much? $180 billion. It ain’t free. We have got to pay for it. So it is not an issue of not supporting research and development, it is wanting to be responsible and wanting to be honest with the American people in saying let’s pay for it. Democrats are saying we can pay for it. Let’s close those tax breaks that are essentially tax loopholes that everyone in America would agree are not fair. Use the money you save from closing tax loopholes to pay for something we all want, which is research and development tax credits.

Mr. Speaker, this isn’t free. If we don’t pay for it, what happens? Guess what? You don’t want to pay for it? You know this is going to cost three times more than what we spend on our veterans. So we
are going to say. Veterans, you shouldn’t get any services because we had to do this research and development tax credit, and we didn’t pay for it.

Perhaps you want to tell that to all of those who are looking for a cure for cancer or for the cure for diabetes. Guess what? We are spending about three times as much with this research and development tax credit—unpaid for—than what we pay for all of that medical research we do through the National Institutes of Health. This is not free.

Student loans. How many folks have to worry about paying for their student loans for their kids to go to college? Guess what? The cost of this bill is about what it would cost to continue the programs that we have in place for our kids who go on to college so we can keep the cost of student loans low. You want to eliminate that so people have to pay a lot more—market rate interest instead of the student loan interest rate? Guess what? That is what we would have to do.

There are consequences. If we are going to get away from deficit spending, you have got to pay for things. If you don’t, it is a priority, then let’s pay for it, but don’t act like you can do these things for free. They cost money. All we are saying is let’s pay for what we all agree is important—a research and development tax credit for companies that will do that research here in America. Let’s not try to hoodwink the American public. This is not free. It is the right thing to do. Just about every American family would say, Guess what? Maybe I have to pay a few more dollars in taxes, but I am keeping that student loan very low. You think it is a priority, then let’s pay for it.

Mr. Speaker, I yield 1 minute to the gentleman from California (Mr. MCCAVER). The majority leader of the United States House of Representatives.

Mr. MCCAVER. Mr. Speaker, I thank the gentleman for yielding, and I want to take a moment to thank the gentleman from Texas for his leadership.

Mr. Speaker, I have listened to a lot of speakers on this floor. What is the cost not to invest in the future? There are 4 out of 10 graduates out of college today who can’t find a job. How do you pay for that?

You look towards the future. I will tell you many in this country have followed the innovators in our history. Mr. Speaker, one happened to be Steven Jobs. Steven Jobs said that innovation distinguishes between a leader and a follower.

That is true with people, and it is also true with countries. America leads because we take the principles of our past, and we apply them to a changing future. We are the pioneers who always look to the next frontier, ready to challenge what others believe is impossible. Innovation is key to our leadership and prosperity. America today is a competitive 21st century. What Washington needs to understand is that the greatest innovations don’t come from Washington—they come from the people.

It reminds me of going on in the early 1900s in this country. Washington wanted to figure out the invention of flight, so the wisdom of government said, “Let’s just pay Samuel Langley to discover how to fly,” but we all knew what came true. We watched two brothers who owned a bicycle store take to the skies from a small field in Kitty Hawk, transforming what we know of today.

The R&D tax credit harnesses that American spirit. It makes space for the American people to lead us into the future. When Ronald Reagan first signed the R&D tax credit into law, he knew it would grow our economy and make America strong because it put our faith in the country’s greatest assets—its people and its ideas. Mr. Speaker, today, we are voting to make this tax credit permanent. I think that is very good policy. I also think it shows what our values are. It shows that it is everyday heroes who can lead us into the future of tomorrow. So I urge my colleagues to vote for this bill, and I urge my colleagues to give the American people the tools to move America forward.

Mr. THOMPSON of California. Mr. Speaker, I yield 1 minute to the gentlewoman from California (Ms. PELOSI), the Democratic leader.

Ms. PELOSI. I thank the gentleman for yielding. I thank Mr. THOMPSON and my Republican colleagues for their speeches, and I thank the ranking member, Mr. LEVIN, and the majority leader for bringing to the floor a COMPETES Act that is a part of a larger package of permanent, completely unpaid-for Republican tax measures this year that will add almost $900 billion to the deficit—over half a trillion dollars added to the deficit—including this bill, their bill to hand $299 billion to the 5,400 richest families in America, 5,400 families, and their estate tax bill would be getting the benefit of $269 billion paid for by the middle class in our country, depriving us of investments in our children’s future.

The fact is that House Republicans have spent this entire Congress blowing the biggest, the completely unpaid-for tax giveaways overwhelmingly tilted toward wealthy special interests. My colleagues, hear this: it is worth noting that this bill on the floor has nothing to do with enterprise startups that are unable to claim the R&D tax credit. Some of you have said to me: Well, we have all these startups in my district. By and large, they cannot benefit from this bill the way it is written. We would like to have written our motion to recommit to go further, to do that, but the Parliamentarians say, because you prevent it in your base bill, we can’t go further.

This is what is really stunning in the look of it all. On the same day as you are saying we are going to do a gotcha bill on R&D and challenge, Republicans are coming to the floor of this House today with not one but two bills that do violence to that aspiration.

First of all, we have the so-called Republican R&D bill, a completely unpaid-for, permanent, and deficit-exploiting tax extension. Democrats support the R&D tax credit, and we will be offering a motion to recommit for a 2-year extension to give Congress—Democrats and Republicans—to work together to pass comprehensive tax reform that closes loopholes and pays for making this tax credit permanent.

With this bill alone, Republicans will explode the deficit by $182 billion. This is just a part of a larger package of permanent, completely unpaid-for Republican tax measures this year that will add almost $900 billion to the deficit—including this bill, their bill to hand $299 billion to the 5,400 richest families in America, 5,400 families, and their estate tax bill would be getting the benefit of $269 billion paid for by the middle class in our country, depriving us of investments in our children’s future.

However, according to the American Academy of Arts and Sciences, these days, the United States has dropped to 10th place in national R&D investment as a percentage of the GDP. As their report makes clear: Unleas basic research becomes a higher government priority than it has been in recent decades, the potential for fundamental scientific breakthroughs and future technological advances will be severely constrained.

Instead of meeting this urgent need and challenge, Republicans are coming to the floor of this House today with not one but two bills that do violence to that aspiration.
In the 110th Congress we put forth the Innovation Agenda, a bill developed in a totally nonpartisan way. ANNA ESHOO, ZOE LOFGREN, and George Miller took the lead going across the country, getting input, nonpartisan input, and democratic input on a number of input. This tacking science they have consistently tried to hear. Just because you don't want to hear. This is a Republican bill that tacks science they don't even want.

This is a trap in order to keep us from investing in Innovation Agenda, and that was something that Bart Gordon, as chair of the Science and Technology Committee, fought for and achieved. ARPA-E, you know that, to name one thing. But instead, today, Republicans are bringing a bill that totally does violence to all this. I hope Members will listen to and support the alternative presented by Congresswoman EDDIE BERNICE JOHNSON, our ranking member on the committee.

But, anyway, the original COMPETES Act by the Democratic Congress, and the Senate Committee, by the overwhelming number of Republicans. A majority of the Republicans defied their leadership and voted for the COMPETES Act in the 110th Congress, and that original bill passed in a bipartisan way. It was the Innovation Agenda for new industries that provide jobs for our workers, that open new markets for American products, that ensure that we can continue to "rise above the gathering storm." Norm Augustine and others led the way to show what the gathering storm was unless we made those investments in science and technology. As I said, we created ARPA-E, so important.

This Republican bill betrays everything that the COMPETES Act did. The Republican bill betrays everything that the COMPETES Act did. It is an assault on science and a plan to surrender American leadership on innovation. Instead of investing in research and development, their bill slashes 30 percent below what was appropriated in regard to unpaid-for tax cuts, $182 billion added to the deficit, with the impression that they care about R&D. R&D into what? R&D into nothing that is about innovation to keep America number one. These Republican bills represent a perfect manifestation of Republican trickle-down economics.

The choice that our country has to make in the economy as we go forward is trickle-down economics versus middle-class economics. Trickle-down theories have not worked. They are what got us in trouble in 2008, and it is exactly what the Republicans are trying to take us back to. Today is one manifestation of that.

Republicans are seeking to ransack our Nation's investments in the future, our commitment to science, our commitment to our children's education, our commitment to bigger paychecks, and our commitment to better infrastructure for all of our families.

We need to come together in a bipartisan way, and that is very possible. We did it with the COMPETES Act before. To pay for R&D tax credit extension, we need to reject this Republican assault on R&D tax credits made permanent and modernized and that will happen later today. We need to invest in the future of innovation of our country, of hard-working American families. We need to reject failed trickle-down economic theories and accept that the success of our Nation depends on bigger paychecks for America's working families. R&D tax credits made permanent and modernized are a significant part of that, but they are not a part of it if they take us deeper into debt, preventing us from making the investments in the future.

I urge my colleagues to vote "no" on this fiscally irresponsible R&D bill, "no" on their destructive COMPETES Act, and "yes" on the proposal made by Congresswoman EDDIE BERNICE JOHNSON, who I thank for her great leadership for keeping America number one.

Mr. BRADY of Texas. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia (Mr. ALLEN).

Mr. ALLEN. I thank Mr. BRADY for yielding me this time.

Mr. Speaker, I would like to remind my colleagues on the other side that, under the leadership of the former presenter, almost a trillion dollars was spent on a stimulus package with nothing to show for it.

I was in the business world then, and I have been in the business world 37 years. The reason I ran for Congress was to bring real-world experience to this body. That is why I rise today in support of H.R. 880. The reason for that is because, when you invest and you invest properly, there is a return. Those families find jobs, and that is what this bill is about.

H.R. 880 is to simplify and make permanent the research and development tax credit. Despite the fact that the research tax credit has been extended 16 times since its enactment, it remains a temporary measure. It is very difficult to plan based on temporary measures. Clearly, it is high time that we provide certainty for innovators in Georgia and across the Nation by making this tax credit permanent.

Innovation is the lifeblood of the small-business community, which employs over 70 percent of the workforce. Innovation in the private sector is essential to driving our economy forward and in fostering growth and creating jobs for Americans now and in the future. It is our duty in Congress to incentivize businesses so that innovators and entrepreneurs can do what they do best and fill the ever growing demand for jobs across our great Nation.

We have so many capable men and women willing to work, so let's get out of the way of the entrepreneurial American spirit and pass this permanent tax credit.
Mr. THOMPSON of California. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, I rise in support, as I said earlier, of the R&D tax credit. My colleagues on this side of the aisle support the R&D tax credit. As we have been saying here today on the floor, it is an important credit that is vital to our global competitiveness, job and economic growth, and maintaining our position as the world’s leader in innovation.

As I have also stated—and I will say it again—this bill isn’t paid for. The majority is adding $181 billion to the deficit with just this one bill. This is fiscally irresponsible. What I haven’t been able to understand—and I am having trouble today trying to figure it out—is how we can pass bills that help corporations and the wealthy, adding the cost of that to the deficit, and then turn around and try to balance the budget and close the deficit on the backs of hard-working American families.

They are trying to do this by cutting the programs we need to grow our economy, like education and infrastructure. We have an infrastructure bill that we are still waiting for a hearing on, which we are still waiting to see scheduled. It is a double standard; it is hypocritical, and it is harmful to the people that all of us represent. We are ready and willing to work with the majority to strengthen the economy, including pro-growth reforms that benefit businesses and comprehensive tax reform that will benefit all of America, but this is the wrong approach, and we should not be party to this political gamesmanship that is taking place on the floor today.

I urge my colleagues to vote “no” on this bill, and I yield back the balance of my time.

Mr. BRADY of Texas. Mr. Speaker, I yield myself such time as I may consume.

I think one of the big problems with Washington is that everyone finds excuses not to do the right thing. The truth is we need research and development here in America, not overseas. We need the jobs that come with that here in America, not overseas. We need, frankly, the future of America here, rather than overseas. Republicans and Democrats both agree on that; both sincerely agree on that. Today, we heard excuses, and we will hear excuses. We are told this doesn’t fund infrastructure. It doesn’t. This is about funding the infrastructure of research and development, and innovation, but not on the government. This is through our entrepreneurs, like Apple and Microsoft, and all the new research and groundbreaking drugs and medical breakthroughs. That is how we are funding the infrastructure of our future. Roads and bridges, we will tackle in another bill.

We are told this isn’t comprehensive tax reform. No, it is not. It is a critical step forward in that by taking a provision that has been temporary far too long and making it a permanent part of our Tax Code so that we can invest in R&D with certainty, so we can have honest scorekeeping in our budget, and so we can take that first step toward real, comprehensive pro-growth tax reform.

We are told today, as we have heard in the past, that it is not paid for, but in fact, to the extensions since 1981, these provisions haven’t been paid for. Our Democrat friends passed bills and supported them. They weren’t paid for. We have done the same. It was 1 year or 2 years at a time. To say this is fiscally irresponsible, when they voted so many times to do the same thing, seems to me to be another excuse.

The cost of doing this permanently is no more than the cost of doing it 1 or 2 years at a time. To think otherwise is sort of in the line of saying: You know, that dessert doesn’t have calories if I eat it standing up.

Well, the cost of R&D is the same, but the cost of not making it permanent is very much not the same. We know the impact will be fewer jobs here in America, more R&D in China, and we will lose our lead in the world as the world’s innovator.

No more excuses—what we are looking for today is a bipartisan effort to make sure those jobs are here in America, that our companies have a chance to invest more and more and more each year. That is what we want them to do.

We want to give college graduates hope. As the majority leader from California noted, 4 out of 10 college graduates either can’t find jobs, or they are working behind a cash register. Well, it is wrong. We ought to give them an opportunity. We ought to give them some jobs and some hope. Those college graduates are skilled and talented, and they deserve to be part of America’s innovative society. That is what they deserve. That is what we are going to deliver to them.

While I am thrilled my Democrat friends are talking about the deficit, I wish they would have acted upon it earlier. The first year they took control of this House under the former Speaker, they doubled the deficit. The second year, they tripled the deficit. The third year, they took it over a trillion dollars and a trillion dollars again, until the American public said enough.

What we got for all that spending was the worst economic recovery in half a century. We are missing 6 million jobs from the American economy. We have fewer people working the workforce than we did before the recovery actually began. In some ways, we are going backwards, especially for our young people.

Today, with this bill, this is research and development both parties support. The only reason we are hearing the excuses is that it is a Republican bill this time. That is the only reason.
We know this credit is vital to keeping America at the innovation forefront, and we understand that the short-and-stop nature of this credit has put a damper on the willingness of firms to invest because they don’t know if the credit is going to be gone tomorrow.

Now, a chance to point something out that I think bears noting, as a percent of gross domestic product, research and development now is the lowest it has been in decades. Why is that? Because of the rejection of science on my Republican friend’s side, private sector R&D is way down.

The encouragement in the Tax Code is simply to buy smaller companies, merge, and take advantage of the innovation they have done. There is the opportunity here to build something around the R&D that we should be taking advantage of here today, but we are not doing that because of the notion of having rejected this science.

The fickle nature of Congress toward this credit is attributable to one fact: we have not reformed the Tax Code since 1986. Now, Congressman Brad was not even born the last time that we did tax reform 30-some odd years ago. He was but a wish in a couple’s eye. That is how dated this argument is.

He said: Why can’t we agree on some things here?

There are some things we can agree upon: Barack Obama was not born in Kenya; secondly, and just importantly, there is no imminent invasion of Texas that is being planned; And third, very simply, the tax cuts don’t pay for themselves. They have to score some place.

We are taking up the time today debating this extender—or extenders—when we should be talking about tax reform that works for the middle class, a tax reform that does not reward investment; Instead, we are doing this hodgepodge effort on tax extenders that really make no sense. Guess what, come December, we are going to be right back here on this floor tackling the R&D credit for another year or two.

Now, before they say to me, Mr. Neal, you are wrong, I certainly have been right in the last two cycles about what happened as to where we ended up with tax extenders. The President has already said he would veto a permanent R&D tax credit at this point, and understand the whole nature of why we need to do talking points.

I would submit this to my friend, Mr. Brady, and he is my friend, and we work together on many pieces of legislation. Why don’t we commit ourselves to building an R&D tax credit for 10 years, so it can be built into the investment code of the American entrepreneur, so they know precisely what the speaker's text is about. The speaker's key points are as follows: empirical research and development (R&D) is crucial for innovation, job creation, and economic growth. The bipartisan H.R. 880, the American Research and Competitiveness Act of 2015, is important to support this. The Speaker is opposed to the bill in its current form and would like to see a permanent extension of the R&D tax credit.

The current tax code does not adequately reward investments in R&D, which is critical for America’s innovation and economic competitiveness.

The Speaker suggests that instead of extending R&D credits on a temporary basis, Congress should pass a permanent extension to foster long-term investment in R&D.

The Speaker also criticizes the previous tax code, which has not kept up with changes in technology and the economy, and calls for a revised tax code that rewards innovation and supports job creation.

The Speaker believes that investing in R&D is a sound economic strategy, pointing out that R&D spending is down and that the US economy needs to grow not in Washington, but back home, where innovation happens.

The Speaker urges Congress to work together on this important measure to support America’s innovation and economic growth.
is going to be out there, instead of taking this tactic today that is never going to see the light of day as we go forward?

This Congress could have been spending its time today talking about income disparity, downward pressure on wages, robotics, and what is putting the American worker behind the curve of opportunity; but, no, we can’t do that. We spend our time instead on these sorts of arguments.

I hope that we can send this back to committee and come up with something that we can all live with.

Mr. Speaker, I yield back the balance of my time.

Mr. BRADY of Texas. Mr. Speaker, I rise in opposition to the motion.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit. The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. NEAL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the order of the House of today, further proceedings on this question will be postponed.

AMERICA COMPETES REAUTHORIZATION ACT OF 2015
GENERAL LEAVE
Mr. SMITH of Texas. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on the bill, H.R. 1806.

The SPEAKER pro tempore (Mr. DENTHRAI). Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. Pursuant to House Resolution 271 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the state of the Union for the consideration of the bill, H.R. 1806.

The Chair appoints the gentleman from Kansas (Mr. YODER) to preside over the Committee of the Whole.

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H.R. 1806) to provide for technological innovation through the prioritization of Federal investment in basic research, fundamental scientific discovery, and development to improve the competitive-ness of the United States, and for other purposes.

The Clerk read the title of the bill.

The CHAIR. Pursuant to the rule, the bill is considered read the first time.

The gentleman from Texas (Mr. SMITH) and the gentleman from Texas (Ms. EDDIE BERNICE JOHNSON) each will control 30 minutes.

The Chair recognizes the gentleman from Texas (Mr. SMITH).

Mr. SMITH of Texas. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am pleased to sponsor H.R. 1806, the America COMPETES Reauthorization Act of 2015, a pro-actively, fiscally responsible bill that sets America on a path to remain the world’s leader in innovation.

This bill reauthorizes civilian re-search programs at the National Science Foundation, the National Institute of Standards and Technology, the Department of Energy, and the Office of Science and Technology Policy.

H.R. 1806 prioritizes basic research and development, while staying within the caps set by the Budget Control Act.

America’s businesses rely on government support for basic research to produce the scientific breakthroughs that spur technological innovation, jump-start new industries, and spur economic growth.

Title I of the bill reauthorizes the National Science Foundation for 2 years and provides a 4.3 percent increase for research and related activities.

The bill prioritizes funding for the Directorates of Biological Sciences, Computer and Information Science and Engineering, Engineering, and Mathematics and Physical Sciences and recognizes the need to make strategic in-

vestments in basic R&D for the U.S. to remain the global leader in science and innovation.

The bill reprioritizes re-

search spending at NSF by cutting funds for the Directorate for Social, Behavioral, and Economic Sciences and the Directorate for Geosciences.

Federal budget restraints require all taxpayers’ dollars to be spent on high-

value science in the national interest. Unfortunately, NSF has funded a num-

ber of projects that do not meet the highest standards of scientific merit, from climate change musicals, to e-

valuating animal photographs in National Geographic, to studying human-set fires in New Zealand in the 1800s. There are dozens of other examples.

The bill ensures accountability by re-

storing the original intent of the 1950 NSF Act and requiring that all grants serve the “national interest.” The NSF has endorsed this goal.

Title II represents the Science, Space, and Technology Committee’s commitment to enhancing STEM education programs. A healthy and viable STEM workforce is critical to American industries and ensures our future economic prosperity.

The definition of STEM is expanded to include computer science, which connects all STEM subjects. The bill also creates an advisory panel on STEM education to ensure outside stakeholders have a role in assessing the Federal STEM education portfolio.

Title III includes three bipartisan bills the Science, Space, and Tech-nology Committee approved in March.

Those bills, H.R. 1119, the Research and Development Efficiency Act; H.R. 1156, the International Science and Techno-logy Cooperation Act of 2015; and H.R. 1162, the Science Prize Competi-
tions Act, passed the committee by voice vote. Two of these were spon-
ored by the Democrats.

Title IV supports the important measurement, standards, and technol-

ogy work taking place at the Na-

tional Institute of Standards and Technology laboratories, the Manufacturing Extension Partnership program, and the recently authorized Network for Manufacturing Innovation.

Measurement science conducted at NIST contributes to industrial com-

petitiveness by supporting tech-nical infrastructure and advancements for nanotechnology, global positioning systems, material sciences, cybersecurity, health information technology, and a variety of other fields.

The bill prioritizes basic research that enables researchers in all 50 States to have access to world-class user facilities, including supercom-

puters and high-intensity light sources.

This bill also prevents duplication and requires DOE to certify that its climate science work is unique and not being undertaken by another Federal agency.

Title VI reauthorizes the DOE ap-

plied research and development pro-

grams and activities for fiscal year 2016 and 2017. They include the Office of Electricity Delivery and Energy Reli-

ability, the Office of Nuclear Energy, the Office of Energy Efficiency and Re-

H.R. 1806 refocuses some spending on late-stage commercialization efforts within the Office of Energy Efficiency and Renewable Energy to research and development efforts.

The bill requires DOE to provide a regular strategic analysis of science and technology activities within the Department, identifying key areas for collaboration across science and applied research programs.

Title VII proposes to cut red tape and bureaucracy in the DOE technology transfer process. It allows contractor-operated laboratories at DOE national laboratories to work with the private sector more efficiently by delegating signature au-

thority to the directors of the labs.
themselves, rather than to DOE contracting officers, for cooperative agreements valued at less than $1 million.

This title also requires DOE to assess its capability to authorize, host, and oversee privately funded fusion research and the next generation fusion reactor prototypes. Currently, the private sector has little incentive to build reactor prototypes due to regulatory uncertainty from the Nuclear Regulatory Commission.

In summary, Mr. Chairman, H.R. 1806 sets the priorities for Federal civilian research, which enhances innovation and U.S. competitiveness without adding to the Federal deficit and debt. I encourage my colleagues to support this bill.

I reserve the balance of my time.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I yield myself such time as I may consume.

Today, I must unfortunately rise in opposition to the America COMPETES Reauthorization Act. It is unfortunate because I was a strong supporter of both the original COMPETES Act, as well as the 2010 reauthorization.

Both of those bills passed with bipartisan support, and both bills reflected the recommendations of the National Academy of Sciences’ groundbreaking 2005 report, “Rising Above the Gathering Storm.”

It is worth reflecting on what the National Academy’s panel found and why they made the recommendations they did.

First, the panel that wrote the report was composed of a distinguished group of individuals from industry, academia, and science, and it was headed by the former Lockheed CEO Norm Augustine.

The panel noted that much of America’s economic growth and success in the decades following World War II was the direct result of our Nation’s sustained investment in research and development. However, they noted that a gathering storm was approaching. America’s economic and military competitors around the world had begun to catch up with our Nation’s technological lead.

Moreover, research and development budgets in the United States were stagnating. The panel determined that America was sorely in need of a commitment to research and development in order to maintain our competitive edge.

The Augustine panel gave specific recommendations that we increase R&D spending, revitalize STEM education across the country, and create and support a new ARPA-E for breakthrough energy research modeled on the renowned DARPA program at the Department of Defense.

The original COMPETES Act implemented these recommendations across the board. Supporting this bill was one of the highlights of my two decades of service here in Congress.

I have highlighted this history because it is important to understand what we are doing here today and why these issues are so important. Since 2010, when we passed the last COMPETES reauthorization, R&D spending in America has begun to stagnate again and, by some measures, even declined.

In the meantime, our economic competitors have doubled down on their investments in research and development. Over the past decade, China has averaged a 23 percent increase in R&D spending each year. Perhaps, not surprisingly, in 2014, China overtook the United States to become the world’s largest economic power.

The crisis that the Augustine committee warned us about in 2005 has now arrived.

What is the response of our majority to this crisis? Absolutely nothing. That is what is in H.R. 1806: absolutely nothing.

H.R. 1806 completely abandons the recommendations of the Augustine committee and the original COMPETES Act. It abandons the legacy of COMPETES by flat-funding R&D investments. It abandons the legacy by slashing funding for the very ARPA-E program envisioned by this committee, the Augustine committee. It abandons that legacy by politicizing the scientific grant-making process and pitting different research disciplines against each other.

I want to be clear about what it is that this majority is abandoning. They are abandoning our future.

America is the greatest nation on Earth, but our greatness is not guaranteed. We have to work for it. We have to do the things that are necessary to ensure a bright future for our country. That means making the same kinds of investments in science and technology that previous generations made. Our predecessors understood what was at stake. They made a commitment to invest in research and development and science education, and we still benefit from those past investments today.

The world is not standing still. If we do not recommit to our investments in science education, research, and development, we will be surpassed.

The bill before us fails to secure our Nation’s future, and for that reason, I must strenuously oppose it.

I am not alone in my opposition. We have received more than 40 letters or statements of concern or outright opposition from over 70 different groups, including the American Association for the Advancement of Science, the Association of American Universities, the Association of Public and Land-grant Universities, the Business Council for Sustainable Energy, the Coalition for National Science Funding, the STEM Education Coalition, the Truman National Security Project, and many, many others. I will put the full list of these organizations in the RECORD at this time.

75 Organizations in Opposition to H.R. 1806, the America COMPETES Reauthorization Act of 2015

1. Alliance to Save Energy
2. American Academy of Political and Social Science
3. American Anthropological Association
4. American Association for the Advancement of Science
5. American Association of Petroleum Geologists
6. American Association of Physics Teachers
8. American Geophysical Union
9. American Geosciences Institute
10. American Institute of Biological Sciences
11. American Institute of Physics
12. American Meteorological Society
13. American Physical Society
14. American Political Science Association
15. American Psychological Association
16. American Society for Microbiology
17. American Sociological Association
18. Association for Behavioral and Cognitive Therapies
19. Association for the Sciences of Limnology and Oceanography
20. Association of American Universities
21. Association of Population Centers
22. Association of Public and Land-grant Universities
23. AVS: Science & Technology of Materials, Interfaces, and Processing
24. Biophysical Society
25. Business Council for Sustainable Energy
26. Center for Small Business and the Environment
27. Clay Minerals Society
28. Coalition for National Science Funding
29. Computing Research Association
30. Consortium for Ocean Leadership
31. Consortium of Social Science Associations
32. Council of Undergraduate Research
33. Department of Energy Secretary Ernest Moniz
34. Earth Day Network
35. Ecological Society of America
36. Energy Sciences Coalition
37. Environment America
38. Environment and Energy Study Institute
39. Environmental Defense Fund
40. Federation of American Societies for Experimental Biology
41. Federation of Associations in Behavioral and Brain Sciences
42. Geological Society of America
43. Incorporated Institutions for Seismology
44. Institute of Electrical and Electronics Engineers, Inc.
45. Law and Society Association
46. League of Conservation Voters
47. Learning and Education Academic Research Network
48. Michigan State University
49. National Association of Geoscientists Teachers
50. National Association of Marine Laboratories
51. National Cave and Karst Research Institute
52. National Ground Water Association
53. Natural Resources Defense Council
54. Nobel Laureates
55. Ohio State University
56. Paleontological Research Institution
57. Pew
58. Population Association of America
59. Princeton University
60. ResearchAmerica
61. Seismological Society of America
We simply cannot afford to spend limited Federal dollars on promoting today's technology. This is so yesterday when we do that. Instead of duplicating work that could be done in the private sector, the America COMPETES Act prioritizes basic research and development with broad application to all forms of energy and energy efficiencies.

Mr. Chairman, over the past 5 months, the Science Committee has held hearings on the Department of Energy research program for advanced nuclear reactors, high-performance computing, energy efficiency and renewable energy, energy storage, and the Department of Energy budget proposal. With limited time, this Science Committee in this Congress has conducted five hearings in support of this legislation, prioritizing oversight of the DOE programs authorized in this bill.

By supporting the America COMPETES Act, Congress can promote fundamental research, build a foundation for the private sector to bring innovative new technologies to market, and grow the American economy.

I urge my colleagues to support the America COMPETES Reauthorization Act.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I now yield 3 minutes to the gentlewoman from Maryland (Ms. Edwards).

Ms. EDWARDS. This is a dangerous bill to the 21st century workforce. It flat-funds the education directorate at the National Science Foundation.

I can't think of anything more harmful than doing a COMPETES legislation that is, at its core, the most anti-science legislation that could be put on this floor. It is a danger to the 21st century workforce.

Mr. SMITH of Texas. Mr. Chairman, I am pleased to yield 2 minutes to the gentleman from Louisiana (Mr. Scalise), who is the majority whip.

Mr. SCALISE. I thank my colleague, the chairman from Texas, for yielding and for his leadership in bringing the America COMPETES Act to the floor.

Mr. Chairman, I rise in strong support of this America COMPETES Act. If you look at what we are trying to do here, we want America to maintain our competitive edge, to create good-paying jobs here at home. But to do that, we need to invest wisely and responsibly in basic scientific research.

After years of overspending and the administration expanding programs way beyond the core missions of the National Science Foundation and the Department of Energy, the COMPETES Act prioritizes taxpayer dollars to support truly important research in biology, chemistry, math, engineering, and computer science. American taxpayers' dollars are being spent on programs that do
Mr. HOYER. I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to the COMPETES Reauthorization Act, which is an attempt to disinvest, in my view, in research, innovation, and education at a time when we ought to be investing in those areas even more greatly.

This bill places our competitiveness at a serious risk over the long term. The public must be awfully confused, I understand, by both sides claiming to be trying to do to promote science, to promote computer science, as a computer scientist, the things that are going on, that American workers be successful—not all of this foolishness that is wasting taxpayer money. It is a great bill that actually prioritizes the taxpayer dollars of this country. I urge my colleagues to pass it.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I yield 3 minutes to the gentleman from Maryland (Mr. HOYER).

Mr. HOYER. I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to the COMPETES Reauthorization Act, which is an attempt to disinvest, in my view, in research, innovation, and education at a time when we ought to be investing in those areas even more greatly.

This bill places our competitiveness at a serious risk over the long term. The public must be awfully confused, I understand, by both sides claiming to be trying to do to promote science, to promote computer science, as a computer scientist, the things that are going on, that American workers be successful—not all of this foolishness that is wasting taxpayer money. It is a great bill that actually prioritizes the taxpayer dollars of this country. I urge my colleagues to pass it.

Mr. HOYER. Now, Bush did better after 2001 and 2003. He only increased the deficit 67 percent, or almost three times that, increased it after President Clinton; and none of the tax cuts ended up paying for themselves, and Greenspan said so.

Since the beginning of this Congress, Republicans have brought to the floor and passed nine tax cuts. It is so easy for Republicans to vote for tax cuts to pay for what we are buying. And that is why we have a deficit, because we do not pay for what we buy.

Today the House is being asked to vote on another unpaid-for tax extender that, on its own, would increase the deficit by $182 billion. That is a total of $586 billion—over half a trillion dollars—that Republicans are proposing to add to the deficit this year. We have heard Republicans argue that making the R&D tax credit permanent would benefit the economy.

The CHAIR. The time of the gentleman has expired.

Ms. EDDIE BERNICE JOHNSON of Texas. I yield the gentleman from Maryland an additional 1 minute.

Mr. HOYER. The CHAIR. The time of the gentleman has expired.

Ms. EDDIE BERNICE JOHNSON of Texas. I yield the gentleman from Maryland an additional 1 minute.

Mr. HOYER. The CHAIR. The time of the gentleman has expired.

Ms. EDDIE BERNICE JOHNSON of Texas. I yield the gentleman from Maryland an additional 1 minute.

Mr. HOYER. The CHAIR. The time of the gentleman has expired.

Ms. EDDIE BERNICE JOHNSON of Texas. I yield the gentleman from Maryland an additional 1 minute.

Mr. HOYER. The CHAIR. The time of the gentleman has expired.

Ms. EDDIE BERNICE JOHNSON of Texas. I yield the gentleman from Maryland an additional 1 minute.

Mr. HOYER. The CHAIR. The time of the gentleman has expired.

Ms. EDDIE BERNICE JOHNSON of Texas. I yield the gentleman from Maryland an additional 1 minute.

Mr. HOYER. The CHAIR. The time of the gentleman has expired.

Ms. EDDIE BERNICE JOHNSON of Texas. I yield the gentleman from Maryland an additional 1 minute.

Mr. HOYER. The CHAIR. The time of the gentleman has expired.

Mr. HOYER. The CHAIR. The time of the gentleman has expired.

Ms. EDDIE BERNICE JOHNSON of Texas. I yield the gentleman from Maryland an additional 1 minute.

Mr. HOYER. The CHAIR. The time of the gentleman has expired.
COMPETES Act was visionary in its commitment to increased R&D funding, and I strongly believe we should continue to increase funding for worthwhile investments in our Nation’s future. However, I have serious concerns with this bill that the majority has offered.

In 2010, as a member of the Science, Space, and Technology Committee, I had the opportunity to work on a truly bipartisan authorization of the COMPETES. We worked together and chose to make certain that we innovate and we made certain that we would compete.

This year I returned to the Science, Space, and Technology Committee, excited to again work on a smart and targeted COMPETES reauthorization. Unfortunately, there was no bipartisan process, and the result is a bill that does not live up to the original COMPETES vision. It would instead appropriately named the “America Concedes” bill. Why? Because at a time when the rest of the world is taking extraordinary steps to innovate, this bill would make America do the opposite.

Its efforts are misguided, at the least. Major areas of research are not adequately funded, and the policy changes would take us in the wrong direction.

Mr. Chair, I am concerned by the majority’s fixation on allocating funding for NSF by directorate. This creates a dangerous precedent in denying NSF adequate flexibility and instead places political whims ahead of the need to independently foster true innovative research. I am also concerned by the effort to impose political review on NSF’s gold-standard merit review system. The scientific community in our Nation and around the world agrees that NSF’s review system works, and works very well. Why would we make it more difficult to encourage high risk, high rewards research?

Instead, we should be increasing research funding, providing NSF the appropriate flexibility to fund important research that should be investing in a sustained commitment to STEM education. My district needs and deserves STEM as an education process. It doesn’t want simple buzzwords. It wants a real STEM education effort.

As a nation, we are woefully underproducing scientists and engineers. In order to remain a competitive global economic power in the 21st century, we must place a strong focus on STEM education. This bill poorly addresses the problem worse. The best way to reduce our budget deficit is by fostering new businesses and industries that generate economic wealth, revenue, and jobs, and the fuel for that task is research and development. We are missing a golden opportunity with this measure.

For these reasons I urge a “no” vote on this bill.

Mr. SMITH of Texas. Mr. Chairman, this bill does not touch merit review. Mr. Chair, I yield 2 minutes to the gentleman from Texas (Mr. BABIN), who is a valuable member of the Science, Space, and Technology Committee.

Mr. BABIN. Mr. Chairman, I rise today in strong support of H.R. 1806, the America COMPETES Act.

Mr. Chairman, when the American people pay their taxes, they expect their tax dollars to be spent effectively and efficiently. Too often that has not been the case, and there is nothing worse than seeing taxes taken out of their paychecks and wasted. Not only is that fiscally irresponsible, it is insulting to the taxpayers.

The bill before us is fiscally responsible and takes important steps to cut wasteful spending. Traditionally, when the National Science Foundation was mentioned, Americans thought of hard sciences—basic research, advanced technology, engineering, mathematics, and the physical sciences. It is investments in these fields that advance American technology and help the United States maintain its competitive edge.

Unfortunately, some recent National Science Foundation expenditures have brought widespread criticism to the NSF and its priorities. There was the expenditure, for example, of $856,000 on a grant to teach three captive mountain lions how to use a treadmill. NSF spent $389,000 on a mechanical device that simulates Swedish massages for rabbits. This is unquestionably a waste of taxpayer money, particularly when we are over $18 trillion in debt.

Our bill cuts spending on lower priority government social and behavioral programs at the National Science Foundation by 45 percent, saving taxpayers billions and setting a higher priority on the money.

The American people want Washington to be responsible with their money, and when Federal agencies get out of hand, they need to be reined in, and our bill does just that.

I want to thank Chairman SMITH and his staff for their hard work and leadership on this bill, and I ask my colleagues to join me in supporting it.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I yield 3 minutes to the gentlewoman from Massachusetts (Ms. CLARK).

Ms. CLARK of Massachusetts. Mr. Chairman, I thank the gentlewoman from Texas for yielding.

University of New England is a renowned business school in my district, and when a class from Bentley visited me just a few weeks ago, they were advocating for a critical underpinning of our economy. These students came to discuss the importance of funding the geosciences in the NSF. Why? Because it is good business.

These students and the business community understand the critical role that geoscience has in disaster resilience, helping us to address drought, overpopulation, and climate change. They want to stop Federal agencies from spending their tax dollars on projects that are more likely to make the problem worse.

Rather than support investment in geoscience research, this legislation specifically targets it for drastic cuts. Human activity contributes to it, and they need to be reined in, and our bill does just that.

Rather than support investment in geoscience research, this legislation specifically targets it for drastic cuts. Rather than support investment in geoscience research, this legislation specifically targets it for drastic cuts.
Norwegian tourism, teaching TV meteorologists about climate change, and creating climate change video games.

Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. McCaul), my colleague and the chairman of the Homeland Security Committee.

Mr. McCaul. Mr. Chairman, I rise today in support of reauthorization of the America COMPETES Act. In this tough budget environment, I applaud Chairman Smith and the Science, Space, and Technology Committee for crafting a bill that provides for much-needed investments in scientific research in a fiscally responsible manner. By setting priorities and eliminating duplicative activities, we are actually able to increase funding for new and promising research while keeping overall spending constant.

This bill is designed to secure America's premier status in scientific and technological advancement in several ways. First, it improves our STEM education by adding computer sciences to the definition of STEM education, which will allow these programs to be used to train the next generation of high-tech workers and cybersecurity professionals. As our high-tech sector continues to expand in places like my hometown of Austin, it is important to make sure that we are producing enough qualified workers to fill these jobs.

Second, this bill also helps researchers at our national labs commercialize their discoveries by removing bureaucratic obstacles. This will bring innovative new products to market faster, encouraging job creation and private sector investment.

Most importantly, the America COMPETES Reauthorization Act provides a substantial increase in funding for research activities at the National Science Foundation, the National Institute of Standards and Technology, and the Department of Energy. This will allow the scientists at our universities, such as the University of Texas, to advance our understanding of the physical world and provide the foundation for future innovations by business and new entrepreneurs.

I urge strong support of this bill.

Ms. EDDIE BERNICE JOHNSON. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. Ted Lieu).

Mr. Lieu. Mr. Chairman, I rise today to oppose the America COMPETES Act in part because it cuts over $26 million of funding to the hard science of studying the effects of climate change.

The effects of climate change are not a partisan issue. We know that our sea levels have risen by over 6.7 inches in the last century, and they have accelerated in the last decade. Rising sea levels affect not just Democratic districts, it also affects Republican districts.

We can measure with precision that we have had, over 20 years, the hottest records in terms of temperatures in recorded history having occurred since 1980. We know that, in 2012, over 19 States broke the hottest records in their States. More extreme weather events and more weather uncertainty affect not just red States and blue States but it affects all of America. And that is why, last month, former Reagan Secretary of State George Shultz wrote an op-ed in The Washington Post saying: Climate change is happening. We need to take action now to ensure our future against climate change. He called it the Reagan way. He said that is what President Reagan would have done.

As you know, this America COMPETES Act, the funding for the hard science of the effects of climate change, was put in place under President Bush in 2007. Just today, our President announced what the U.S. military is saying about climate change.

I served on Active Duty in the United States Air Force. I am now 19 years in with the Reserves. One of the amazing strengths of America is that our military is nonpartisan, nonideological, and our military leaders know that it is not, as they hope it to be. Our military does not live in a fantasy world, and they understand that climate change is happening. They know it is a national security threat. They are telling the American public we need to act on climate change now because we can't have flooding of our bases; we can't have droughts and more severe weather events that cause conflicts in all the parts of the world.

So I ask the American public to trust former Reagan Secretary of State George Shultz, trust President Bush, trust our United States military who are saying climate change is a problem. Keep in mind, our military relies on hard science and technology and all that makes this world possible. So let us trust our military, and trust everyone who has looked at it. Please reject the America COMPETES Act because we need to deal with climate change. We need to deal with it now.

Mr. SMITH of Texas. Mr. Chairman, I yield 1 minute to the gentleman from Michigan (Mr. Moolenaar), who is a member of the Science Committee and also a vice chairman of the Research and Technology Subcommittee.

Mr. MOOLENAAR. Mr. Chairman, the America COMPETES Act is good legislation that will help build a better future for our country. The COMPETES Act expands the definition of STEM education to include computer science.

According to the Bureau of Labor Statistics, for every computer science graduate between 2013 and 2023, there will be two jobs available. That is why programs in my district like Go IT, offered free of charge to middle and high school students, are so important to creating career awareness in computer science and other STEM fields.

This legislation increases government accountability. It requires the National Science Foundation grants meet a national interest standard and to publicly justify why they should receive taxpayer dollars. Requiring government agencies to prioritize the national interest is common sense. It enhances accountability to the American people.

I am proud to be a cosponsor of the America COMPETES Act and I urge my colleagues to vote ‘yes.’

Ms. EDDIE BERNICE JOHNSON. Mr. Chairman, I reserve the balance of my time.

Mr. SMITH of Texas. Mr. Chair, I have no further requests for speaking. I urge everyone to vote ‘no’ on this bill, and I yield back the balance of my time.

Mr. SMITH of Texas. Mr. Chairman, I yield myself such time as I may consume.

Our colleagues on the other side of the aisle today would have you believe that the only way you can be pro-science is to spend more taxpayer money than the Budget Control Act allows. That is irresponsible. If everything is a priority, then nothing is. Real priorities require making real choices.

If synthetic biology research at NSF is a priority, we should stop using the American people's tax dollars to fund reviews of animal photographs in National Geographic magazine. If robotics and batteries are priorities, we should not continue to spend taxpayer dollars on climate change musicals.

H.R. 1806 proves that we can set priorities, make tough choices, and still invest more in breakthrough research and innovation.

I thank the members of the Science Committee who provided valuable input into H.R. 1806, the America COMPETES Reauthorization Act of 2015; H.R. 1806, the America COMPETES Reauthorization Act of 2015; and H.R. 1806, the America COMPETES Reauthorization Act of 2015.

I urge the adoption of this pro-science, fiscally responsible bill.

Mr. Chairman, I would like to enter into the RECORD an exchange of letters between the Committee on Science, Space, and Technology and the Committee on Education and the Workforce, Oversight and Government Reform, and Energy and Commerce.

H. R. 1806 is an exchange of letters between the Committee on Science, Space, and Technology and the Committee on Education and the Workforce, Oversight and Government Reform, and Energy and Commerce.

H. R. 1806 is an exchange of letters between the Committee on Science, Space, and Technology and the Committee on Education and the Workforce, Oversight and Government Reform, and Energy and Commerce.

H. R. 1806 is an exchange of letters between the Committee on Science, Space, and Technology and the Committee on Education and the Workforce, Oversight and Government Reform, and Energy and Commerce.

H. R. 1806 is an exchange of letters between the Committee on Science, Space, and Technology and the Committee on Education and the Workforce, Oversight and Government Reform, and Energy and Commerce.

H. R. 1806 is an exchange of letters between the Committee on Science, Space, and Technology and the Committee on Education and the Workforce, Oversight and Government Reform, and Energy and Commerce.
to H.R. 1806, the America COMPETES Reauthorization Act of 2015. Thank you for con-
sulting with the Committee on Education and the Workforce with regard to H.R. 1806 on a
matter within the Committee’s ju-
risdiction.

In the interest of expediting the House’s consideration of H.R. 1806, the Committee on Education and the Workforce will forgo fur-
ther consideration of this bill. However, I do
so only with the understanding that this pro-
cedural route will not be construed to preju-
dice my Committee’s jurisdictional interest
and prerogatives on this bill or any other
similar legislation and will not be considered
as precedent for consideration of matters of
jurisdictional interest to my Committee in the
future.

I respectfully request your support for the appointment of outside conferees from the Commit-
tee on Education and the Workforce should this bill or a similar bill be consid-
ered in a conference with the Senate. I also
request you include our exchange of letters
on this matter in the Committee Report on H.R. 1806 and in the Congressional Record
during consideration of this bill on the House
Floor. Thank you for your attention to these
matters.

Sincerely,

JOHN KLINE, Chairman.

HOUSE OF REPRESENTATIVES, COM-
MITTEE ON SCIENCE, SPACE, AND
TECHNOLOGY,

Hon. LAMAR SMITH,
Chairman, Committee on Education and the
Workforce, Rayburn House Office Building,
Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your
letter regarding the Committee on
Education and the Workforce’s jurisdictional
interest in H.R. 1806, the “America COM-
PETES Reauthorization Act of 2015,” and
your willingness to forego consideration of
H.R. 1806 by your committee.

I agree that the Committee on Education and the Workforce has a valid jurisdic-
tional interest in certain provisions of H.R. 1806, and that the Committee’s jurisdiction will
not be adversely affected by your decision to
forego consideration of H.R. 1806. As you have
requested, I will support your request for an
appropriate appointment of outside con-
ference members from your Committee in the
event of a House-Senate conference on this
matter.

Finally, I will include a copy of your letter
and this response in the Committee Report and
in the Congressional Record during the
floor consideration of this bill. Thank you
again for your cooperation.

Sincerely,

LAMAR SMITH, Chairman.

HOUSE OF REPRESENTATIVES, COM-
MITTEE ON OVERSIGHT AND GOV-
ERNMENT REFORM,

Hon. FRED UPTON,
Chairman, Committee on Energy and Commerce,
Rayburn House Office Building, Washing-
ton, DC.

DEAR MR. CHAIRMAN: Thank you for your
letter regarding the Committee on Energy
and Commerce’s jurisdictional interest in
H.R. 1806, the “America COMPETES Reau-
 thorization Act of 2015,” and your will-
ingness to forego consideration of H.R. 1806 by
your committee.

I agree that the Committee on Energy and
Commerce has a valid jurisdictional interest
in certain provisions of H.R. 1806, and that
the Committee’s jurisdiction will not be adver-
sely affected by your decision to
forego consideration of H.R. 1806. As you have
requested, I will support your request for an
appropriate appointment of outside con-
ference members from your Committee in the
event of a House-Senate conference on this
matter.

Finally, I will include a copy of your letter
and this response in the Committee Report and
in the Congressional Record during the
floor consideration of this bill. Thank you
again for your cooperation.

Sincerely,

LAMAR SMITH, Chairman.

HOUSE OF REPRESENTATIVES, COM-
MITTEE ON SCIENCE, SPACE, AND
TECHNOLOGY,

Hon. LAMAR SMITH,
Chairman, Committee on Science, Space, and
Technology, Rayburn House Office Build-
ing, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your
letter regarding the Committee on Science,
Space, and Technology’s jurisdictional inter-
est in H.R. 1806, the “America COM-
PETES Reauthorization Act of 2015,” and
your willingness to forego consideration of
H.R. 1806 by your committee.

I agree that the Committee on Science, Space,
and Technology has a valid jurisdictional
interest in H.R. 1806, and that the Committee’s
jurisdiction will not be adversely affected by
your decision to forego consideration of H.R. 1806. As you have requested, I will support your request for an
appropriate appointment of outside con-
ference members from your Committee in the
event of a House-Senate conference on this
matter.

Finally, I will include a copy of your letter
and this response in the Committee Report
and in the Congressional Record during the
floor consideration of this bill. Thank you
again for your cooperation.

Sincerely,

LAMAR SMITH, Chairman.

HOUSE OF REPRESENTATIVES, COM-
MITTEE ON ENERGY AND COM-
MERCE,

Hon. LAMAR SMITH,
Chairman, Committee on Science, Space, and
Technology, Rayburn House Office Build-
ing, Washington, DC.

DEAR CHAIRMAN SMITH: I write in regard to
H.R. 1806, America COMPETES Reau-
 thorization Act of 2015. As you are aware, the
bill was referred to the Committee on Science,
Space, and Technology, but the Committee on
Energy and Commerce has a jurisdic-
tional interest in the bill. I wanted to notify
you that the Committee on Energy and Com-
merce will forego requesting a sequential re-
feral on the bill so that it may proceed ex-
peditiously to the House floor for consider-
ation.

This is done with the understanding that
the Committee on Energy and Commerce’s jurisdic-
tional interests over this and similar legisla-
tion are in no way diminished or altered.

I would appreciate your response con-
firming this understanding with respect to
H.R. 1806 and ask that a copy of our ex-
change of letters on this matter be included
in the Congressional Record during consid-
eration of the bill on the House floor.

Sincerely,

FRED UPTON, Chairman.

Mr. SMITH of Texas. Mr. Chairman, I
yield back the balance of my time.

Mrs. CAPPS. Mr. Chair, I would like to sub-
mit for the RECORD my strong opposition to
H.R. 1806, the America COMPETES Reau-
 thorization Act of 2015.

This harmful bill undermines key invest-
ments in science and innovation, as well as
our nation’s commitment to world class re-
search, including the research that is taking
place in my congressional district in the Cen-
tral Coast of California.

Specifically, this bill cuts several important
programs at NSF, including research and de-
velopment related to climate science, natural
hazards, and renewable energy.

Furthermore, H.R. 1806 cripples support for
international research collaborations—an in-
strumen
tal tool at UC Santa Barbara, which has
led to groundbreaking research and pro-
duced multiple Nobel Prize winners.

As we move to affirm our nation’s leader-
ship in science and technology, we should be
working in a bipartisan manner to strengthen
our investments in scientific research—not
weaken them.

This bill is sadly a step backward for Amer-
ican innovation, and I urge my colleagues to
oppose H.R. 1806.

The Acting CHAIR (Mr. Poe of Texas). All time for general debate has expired.

Pursuant to the rule, the bill shall be
considered for amendment under the 5-
minute rule.

In lieu of the amendment in the na-
ture of a substitute recommended by the
Committee on Science, Space, and
Technology, printed in the bill, it shall
be in order to consider as an original bill for the purpose of amendment under the 5-minute rule an amendment in the nature of a substitute consisting of the text of Rules Committee Print 114-15. That amendment in the nature of a substitute shall be considered as read.

The text of the amendment in the nature of a substitute is as follows:

H.R. 1806

Be it enacted by the Senate and House of Representatatives of the United States of America in Congress assembled, that:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the “America COMPETES Reauthorization Act of 2015.”

(b) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

Sec. 1. Short title; table of contents.
Sec. 2. Definitions.

TITLE I—NATIONAL SCIENCE FOUNDATION

Sec. 101. Authorization of appropriations.
Sec. 102. Findings.
Sec. 103. Policy objectives.
Sec. 104. Definitions.
Sec. 105. Accountability and transparency.
Sec. 106. Graduate accountability in Federal funding for research.
Sec. 107. Obligation of major research equipment and facilities construction funding.
Sec. 108. Management and oversight of large facilities.
Sec. 109. Whistleblower education.
Sec. 110. Graduate student support.
Sec. 111. Permissible support.
Sec. 112. Expanding STEM opportunities.
Sec. 113. Review of education programs.
Sec. 114. Reorganization of awards.
Sec. 115. Sense of the Congress regarding industry investment in STEM education.
Sec. 116. Misrepresentation of research results.
Sec. 117. Research reproducibility and replication.
Sec. 118. Research grant conditions.
Sec. 119. Graduate student support.
Sec. 120. Scientific breakthrough prizes.
Sec. 121. Rotating personnel.
Sec. 122. Sense of Congress regarding Innovation Corps.
Sec. 123. Brain Research through Advancing Innovative Neurotechnologies Initiative.
Sec. 124. Noyce scholarship program amendments.
Sec. 125. Informal STEM education.
Sec. 126. Experimental Program to Stimulate Competitive Research.

TITLE II—SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS

Sec. 201. Findings; sense of Congress.
Sec. 202. STEM Education Advisory Panel.
Sec. 203. Committee on STEM Education.
Sec. 204. STEM Education Coordinating Office.

TITLE III—OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Sec. 301. Authorization of appropriations.
Sec. 302. Regulatory efficiency.
Sec. 303. Coordination of international science and technology partnerships.
Sec. 304. Alternative research funding models.
Sec. 305. Amendments to prize competitions.
Sec. 306. United States Chief Technology Officer.
Sec. 307. National Research Council study on assessment methodology for emergency notifications on university campuses.

TITLE IV—NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY

Sec. 401. Authorization of appropriations.
Sec. 402. Standards and conformity assessment.
Sec. 403. Visiting Committee on Advanced Technology.
Sec. 404. Police and security authority.
Sec. 405. Education and outreach.
Sec. 406. Programmatic planning report.
Sec. 407. Assessments by the National Research Council.
Sec. 408. Hollings Manufacturing Extension Partnership.
Sec. 409. Elimination of obsolete reports.
Sec. 410. Modifications to grants and cooperative agreements.
Sec. 411. Information systems standards consultation.
Sec. 412. United States-Israeli cooperation.

TITLE V—DEPARTMENT OF ENERGY SCIENCE

Sec. 501. Mission.
Sec. 502. Basic energy sciences.
Sec. 503. Advanced scientific computing research.
Sec. 504. High energy physics.
Sec. 505. Biological and environmental research.
Sec. 506. Fusion energy.
Sec. 507. Nuclear physics.
Sec. 508. Science laboratories infrastructure programs.
Sec. 509. Domestic manufacturing.
Sec. 510. Authorization of appropriations.
Sec. 511. Definitions.

TITLE VI—DEPARTMENT OF ENERGY TECHNOLOGY AND INNOVATION

Sec. 601. Crosscutting research and development.
Sec. 602. Strategic research portfolio analysis and coordination plan.
Sec. 603. Strategy for facilities and infrastructure programs.

Subtitle A—Crosstown Research and Development

Sec. 603A. Nuclear Energy Research and Development.

Sec. 605. Electric power transmission and distribution.
Sec. 606. Nuclear fuel cycle and waste.
Sec. 607. Nuclear energy enabling technologies program.
Sec. 608. Nuclear standards.
Sec. 609. Advanced energy technologies.

Subtitle B—Electric Power Management

Sec. 609A. Electric power management.

Subtitle C—Electricity Delivery and Energy Efficiency

Sec. 609B. Electricity delivery.
Sec. 609C. Energy efficiency.

Subtitle D—Energy Technologies

Sec. 609D. Energy efficiency and renewable energy research and development.
Sec. 609E. Advanced energy technologies.

Subtitle E—Nuclear Energy Research and Development

Sec. 609E. Nuclear energy research and development.
Sec. 609F. Advanced energy technologies.
Sec. 609G. Nuclear energy infrastructure.
Sec. 609H. Nuclear energy enabling technologies.

Subtitle F—Advanced Research Projects Agency-Energy

Sec. 611. ARPA-E amendments.

Subtitle G—Authorization of Appropriations

Sec. 612. Authorization of appropriations.

Subtitle H—Definitions

Sec. 613. Definitions.

TITLE VII—DEPARTMENT OF ENERGY TECHNOLOGY TRANSFER

Subtitle A—In General

Sec. 701. Definitions.
Sec. 702. Savings clause.

Subtitle B—Innovation Management at Department of Energy

Sec. 711. Under Secretary for Science and Energy.
Sec. 712. Technology transfer and transitions assessment.
Sec. 713. Sense of Congress.
Sec. 714. Nuclear energy innovation.

Subtitle C—Cross-Sector Partnerships and Grant Competitiveness

Sec. 721. Agreements for Commercializing Technology pilot program.
Sec. 722. Public-private partnerships for commercialization.
Sec. 723. Inclusion of early-stage technology demonstration in authorized technology transition programs.
Sec. 724. Funding competitiveness for institutions of higher education and other nonprofit institutions.
Sec. 725. Participation in the Innovation Corps program.

Subtitle D—Assessment of Impact

TITLE VIII—SENSE OF CONGRESS

Sec. 801. Sense of Congress.

SEC. 2. DEFINITIONS.

In this Act—

(1) the term “STEM” means the subjects of science, technology, engineering, and mathematics;

(2) the term “STEM education” means education in the subjects of STEM, including computer science; and

(3) the term “Committee on STEM Education” means the Committee on Science, Technology, Engineering, and Mathematics Education established under section 102 of the America COMPETES Reauthorization Act of 2010 (42 U.S.C. 6621).

TITLE I—NATIONAL SCIENCE FOUNDATION

SEC. 101. AUTHORIZATION OF APPROPRIATIONS.

(a) FISCAL YEAR 2016.—(1) IN GENERAL.—There are authorized to be appropriated to the Foundation $7,597,140,000 for fiscal year 2016.

(2) SPECIFIC ALLOCATIONS.—Of the amount authorized by paragraph (1)—

(A) $6,186,300,000 shall be made available to carry out research and related activities, including—

(i) $834,800,000 for the Biological Sciences Directorate; 
(ii) $1,050,000,000 for the Computer and Information Science and Engineering Directorate; 
(iii) $1,034,000,000 for the Engineering Directorate; 
(iv) $1,050,000,000 for the Mathematical and Physical Sciences Directorate; 
(v) $150,000,000 for the Social, Behavioral, and Economic Sciences Directorate, of which $50,000,000 shall be for the National Center for Science and Engineering Statistics; 
(vi) $33,200,000 for the Office of International Science and Engineering; 
(vii) $377,000,000 for Integrative Activities; and 

Subtitle F—Advanced Research Projects Agency—Energy

Sec. 617. Renewable energy.
Sec. 618. Biosphere programs.
Sec. 619. Concentrating solar power research program.
Sec. 620. Renewable energy in public buildings.

Subtitle E—Fossil Energy Research and Development

Sec. 621. Fossil energy.
Sec. 622. Coal research, development, demonstration, and commercial application programs.
Sec. 623. High efficiency gas turbines research and development.
(ix) $1,480,000 for the United States Arctic Commission;

(x) $866,000,000 shall be made available for education and human resources;

(xi) $75,160,000 shall be made available for major research equipment and facilities construction;

(xii) $325,000,000 shall be made available for agency operations and award management;

(xiii) $4,370,000 shall be made available for the Office of Inspector General.

(b) FISCAL YEAR 2017.—

(1) IN GENERAL.—There are authorized to be appropriated for the Foundation $7,597,140,000 for fiscal year 2017.

(2) SPECIFIC ALLOCATIONS.—Of the amount authorized by paragraph (1):

(A) $107,186,200 shall be made available to carry out research and related activities, including—

(i) $834,800,000 for the Biological Science Directorate;

(ii) $1,050,000,000 for the Computer and Information Science and Engineering Directorate;

(iii) $1,034,000,000 for the Engineering Directorate;

(iv) $1,200,000,000 for the Geosciences Directorate;

(v) $1,500,000,000 for the Mathematical and Physical Science Directorate;

(vi) $150,000,000 for the Social, Behavioral, and Economics Directorate, of which $50,000,000 shall be made available to the National Center for Science and Engineering Statistics;

(vii) $38,520,000 for the Office of International Science and Engineering;

(viii) $377,200,000 for Integrative Activities; and

(ix) $1,480,000 for the United States Arctic Commission;

(B) $97,300,000 shall be made available for education and human resources;

(C) $200,310,000 shall be made available for major research equipment and facilities construction;

(D) $325,000,000 shall be made available for agency operations and award management;

(E) $1,200,000,000 shall be made available for the Office of the National Science Board; and

(F) $15,160,000 shall be made available for the Office of Inspector General.

SEC. 102. FINDINGS.

Congress finds the following:

(1) Taxpayer-supported research investments administered by the Foundation should serve the national interest.

(2) The Foundation has made major contributions for more than 60 years to strengthen and sustain the Nation’s academic enterprise.

(3) The economic strength and national security of the United States, and the quality of life of all Americans, are grounded in the Nation’s scientific and technological capabilities.

(4) Providing support for basic research is an investment in our Nation’s future security and economic prosperity.

(5) Congress applauds the Foundation’s recognition that wise stewardship of taxpayer dollars is necessary to maintain and ensure the public’s trust for funding of fundamental scientific and engineering research.

(6) Other nations are increasing their public investments in basic research in the physical sciences in order to boost long-term economic growth.

(7) Longstanding United States leadership in supercomputing, genomics, nanoscience, photonics, quantum physics, and other key technologies is jeopardized if United States investments in basic research in the natural sciences do not keep pace.

(8) Redundant regulations and reporting requirements imposed by Federal agencies on research institutions and researchers increase costs by tens of millions of dollars annually.

(9) The Foundation carries out important functions by supporting basic research in all science and engineering disciplines and in supporting STEM education at all levels.

(10) The research and education activities of the Foundation promote the discovery, integration, dissemination, and application of new knowledge in service to society and prepare future generations of scientists, mathematicians, and engineers who will be necessary to ensure America’s leadership in the global marketplace.

(11) Many of the complex problems and challenges facing the Nation increasingly require the collaboration of multiple scientific disciplines. The Foundation should continue to emphasize cross-directorate research collaboration and active missions address these issues and encourage interdisciplinary research.

(12) The Foundation should meet the highest standards of efficiency, transparency, and accountability in its stewardship of public funds.

(13) The Foundation is charged with the responsibilities—

(A) to develop and encourage the pursuit of a national policy for the promotion of basic research and education in the sciences;

(B) to initiate, support, and conduct basic scientific research and to appraise the impact of research on industrial development and the general welfare;

(C) to initiate, support, and conduct scientific research activities in connection with matters relating to the national defense, at the request of the Secretary of Defense;

(D) to award scholarships and graduate fellowships in the sciences;

(E) to foster the interchange of scientific information among scientists and across scientific disciplines;

(F) to evaluate scientific research programs undertaken by agencies of the Federal Government, and to correlate the Foundation’s scientific research with that undertaken by individuals and by public and private research groups;

(G) to communicate effectively to American citizens the relevance of public investments in scientific discovery and technological innovation to the Nation’s security, prosperity, and welfare;

(H) to establish such special commissions as the Board considers necessary.

(14) The emerging global economic, scientific, and technical environment challenges long-standing assumptions about domestic and international policy. The Foundation should play a more proactive role in sustaining the competitive advantage of the United States through superior research capabilities.

SEC. 103. POLICY OBJECTIVES.

In allocation of funds made available under this title, the Foundation shall have the following policy objectives:

(1) To renew and maintain the Nation’s international leadership in science and technology by—

(A) increasing the national investment in basic scientific research and increasing interdisciplinary integration in strategic areas vital to the national interest;

(B) balancing the Nation’s research portfolio among the life sciences, mathematics, the physical sciences, computer and information science, geosciences, engineering, and social, behavioral, and economic sciences, all of which are important for the continued development of enabling technologies necessary for sustained economic competitiveness;

(C) encouraging investments in potentially transformative scientific research to benefit our Nation and the American people;

(D) expanding the pool of scientists and engineers in the United States, including among segments of the population that have been historically underrepresented in STEM fields; and

(E) modernizing the Nation’s research infrastructure and establishing and maintaining co-operative international relationships with premier research institutions.

(2) To increase overall workforce skills by—

(A) improving the quality of STEM education and training provided both inside and outside of the classroom, including in kindergarten through grade 12; and

(B) expanding STEM training opportunities at institutions of higher education.

(3) To strengthen innovation by expanding the focus of competitiveness and innovation at the regional and local level.

SEC. 104. DEFINITIONS.

In this title:

(1) BOARD.—The term “Board” means the National Science Board.

(2) DIRECTOR.—The term “Director” means the Director of the Foundation.

(3) FOUNDATION.—The term “Foundation” means the National Science Foundation established under section 2 of the National Science Foundation Act of 1950 (42 U.S.C. 1861).

(4) INSTITUTION OF HIGHER EDUCATION.—The term “institution of higher education” has the meaning given such term in section 101(a) of the Higher Education Act of 1965 (20 U.S.C. 1001(a)).

(5) STATE.—The term “State” means one of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and any other territory or possession of the United States.

(6) UNITED STATES.—The term “United States” means the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and any other territory or possession of the United States.

SEC. 105. ACCOUNTABILITY AND TRANSPARENCY.

It is the sense of Congress that—

(1) sustained, predictable Federal funding is essential to United States leadership in science and technology;

(2) building understanding of and confidence in investments in basic research are essential to public support for sustained, predictable Federal funding; and

(3) the Foundation should commit itself fully to transparency and accountability and to clear, consistent public communication regarding the national interest for each Foundation- funded grant or cooperative agreement.

SEC. 106. GREATER ACCOUNTABILITY IN FEDERAL FUNDING FOR RESEARCH.

(a) STANDARD FOR AWARD OF GRANTS.—The Foundation shall provide Federal funding for basic research and education in the sciences through a new research grant or cooperative agreement only if an affirmative determination is made by the Foundation under subsection (b) and written justification relating thereto is published under subsection (c).

(b) DETERMINATION.—A determination referred to in subsection (a) is a determination by the responsible Foundation official as to how the research grant or cooperative agreement promotes the progress of science in the United States, consistent with the Foundation mission as established in the National Science Foundation Act of 1950 (42 U.S.C. 1861 et seq.), and further—

(1) is worthy of Federal funding; and

(2) is in the national interest, as indicated by having the potential to achieve—

(A) increased economic competitiveness in the United States;

(B) advancement of the health and welfare of the American public;

(C) development of an American STEM workforce that is globally competitive;

(D) increased public scientific literacy and public engagement with science and technology in the United States;

(E) increased partnerships between academia and industry in the United States;
SEC. 107. OBLIGATION OF MAJOR RESEARCH EQUIPMENT AND FACILITIES CONSTRUCTION FUNDS.

No funds may be obligated for a fiscal year for a construction project for the Foundation that has not commenced before the date of enactment of this Act until 30 days after the report required with respect to such fiscal year under section 4712 of title 41, United States Code, is transmitted to the Congress.

SEC. 108. MANAGEMENT AND OVERSIGHT OF LARGE FACILITIES.

(a) LARGE FACILITIES OFFICE.—The Director shall maintain a Large Facilities Office within the Office of the Director. The functions of the Large Facilities Office shall be to support the research directorates in the development, implementation, and management of major multi-user research facilities, including—

(1) serving as the Foundation’s primary resource for all policy or process issues related to the development and implementation of major multi-user research facilities;

(2) serving as a Foundation-wide resource on project management, including providing expert assistance on nonscientific and nontechnical aspects of project planning, budgeting, implementation, management, and oversight;

(3) coordinating and collaborating with research directorates to share best management practices and lessons learned from prior projects; and

(4) assessing projects during preconstruction and construction phases for cost and schedule risks.

(b) OVERSIGHT OF LARGE FACILITIES.—The Director shall appoint a senior agency official within the Office of the Director whose primary responsibility shall be to support the research directorates in the development, implementation, and management of major multi-user research facilities. The duties of this official shall include—

(1) oversight of the development, construction, and operation of major multi-user research facilities across the Foundation;

(2) in collaboration with the directors of the research directorates and other senior agency officials as appropriate, ensuring that the requirements of section 14(a) of the National Science Foundation Authorization Act of 2002 are satisfied;

(3) serving as a liaison to the National Science Board for approval and oversight of major multi-user research facilities; and

(4) periodically reviewing and updating as necessary Foundation policies and guidelines for the development and construction of major multi-user research facilities.

(c) MANAGEMENT OF LARGE FACILITY COSTS.—

(1) IN GENERAL.—The Director shall ensure that the Foundation’s policies for developing and managing major multi-user research facility construction costs are in compliance with the best practices described in the March 2009 Government Accountability Office Report GAO-09-3SP, or any successor report thereto.

(b) GOVERNMENT ACCOUNTABILITY OFFICE REPORT.—Not later than 12 months after the date of enactment of this Act, the Director shall submit to Congress the results of a study and a report reforming the Foundation’s policies on financial management of major multi-user research facilities, including a description of any aspects of the policies that diverge from the best practices described in the Government Accountability Office Report GAO-09-3SP and the Uniform Guidance in 2 C.F.R. Part 200.

(3) MANAGEMENT FEES.—(A) DEFINITION.—In this paragraph, the term “management fee” means a portion of an award made by the Foundation for the purpose of covering ordinary and necessary business expenses for the administration and operation of a facility, which are not otherwise allowable under Cost Principles Uniform Guidance in 2 C.F.R. part 200, Subpart E, or any successor regulation thereto.

(B) LIMITATION.—The Foundation may provide management fees under an award only if the awardee has demonstrated that it has limited or no other financial resources for covering the expenses for which the management fees are sought.

(C) FINANCIAL INFORMATION.—The Foundation shall require award applicants to provide income and financial information covering a period of no less than three prior years (or in the case of a new or successor case or a separate case three years prior to the entity’s application date, the period beginning on the date of establishment and ending on the application date), including financial information on the most currently available evidence-based pedagogical leadership model.

SEC. 109. WHISTLEBLOWER EDUCATION.

(a) IN GENERAL.—The Foundation shall be subject to section 4712 of title 41, United States Code, and the Uniform Guidance in 2 C.F.R. Part 200.

(b) EDUCATION AND TRAINING.—The Foundation shall provide education and training for Foundation managers and staff on the requirements of that section and provide information on the law to all grantees, contractors, and employees of such grantees and contractors.

SEC. 110. GRADUATE STUDENT SUPPORT.

(a) SENSE OF CONGRESS.—It is the sense of Congress that the essential elements of the NSF Research Traineeship Programs, formerly the Graduate Research Assistantship Program, and any successor thereto should be maintained, including—

(1) collaborative research that transends traditional disciplinary boundaries and addresses large and complex research problems of significant scientific and societal importance; and

(2) providing students the opportunity to become leaders in the science and engineering of the future.

(b) MODELS FOR SUPPORT.—The Director shall enter into an agreement with the National Research Council to convene a workshop or roundtable to examine models of Federal support for STEM graduate students, including the Foundation’s Graduate Research Fellowship program and comparable fellowship programs at other agencies, traineeship programs, and the research assistant model.

(c) PURPOSE.—The purpose of the workshop or roundtable shall be to compare and evaluate the extent to which each of these models helps to support graduate students for diverse careers under STEM degrees in diverse types of institutions of higher education, in industry, and at government agencies and research laboratories, and to make recommendations accordingly.

(1) how current Federal programs and models, including programs and models at the Foundation, can be improved;

(2) the appropriateness of the current distribution of funding among the different models at the Foundation and across the agencies; and

(3) the appropriateness of creating a new educational training program distinct from programs that provide direct financial support, including the grants authorized in section 527 of the America COMPETES Reauthorization Act of 2002 (42 U.S.C. 1920q-2p),

(d) CRITERIA.—At a minimum, in comparing programs and models, the workshop or roundtable participants shall consider the capacity of such programs or models to provide students with knowledge and skills—

(1) to become independent, creative, successful researchers;

(2) to participate in large interdisciplinary research projects, including in an international context;

(3) to adhere to the highest standards for research ethics;

(4) to become high-quality teachers utilizing the most currently available evidence-based pedagogical leadership model.

(5) in oral and written communication, to both technical and nontechnical audiences;

(6) in innovation, entrepreneurship, and business ethics; and

(7) in program management.

(e) GRADUATE STUDENT INPUT.—The participants in the workshop or roundtable shall include current or recent STEM graduate students.

(f) REPORT.—Not later than 1 year after the date of enactment of this Act, the National Research Council shall submit to Congress a summary report of the findings and recommendations of the workshop or roundtable convened pursuant to subsection (a).

SEC. 111. PERMISSIBLE SUPPORT.

A grant made by the Education and Human Resources Directorate to support informal educational programs shall be used—

(1) to support the participation of underrepresented students in nonprofit competitions, out-of-school activities, and field experiences related to subjects such as mathematics, science research, invention, mathematics, and technology competitions); including—
(A) The purchase of parts and supplies needed to participate in such competitions; and

(b) Incentives and stipends for teachers and instructional leaders who are involved in assisting students who are applicable for such competitions, if such activities fall outside the regular duties and responsibilities of such teachers and instructional leaders; and

(2) Engaging underrepresented secondary school students’ access to, and interest in, careers that require academic preparation in STEM subjects.

SEC. 112. EXPANDING STEM OPPORTUNITIES.

(a) In GENERAL.—Within the Directorate for Education and Human Resources (or any successor thereto), under existing programs targeting broadening participation, the Director shall in a merit-reviewed, competitive basis for research on programming that engages underrepresented students in grades kindergarten through 8 in STEM.

(b) USE OF FUNDS.—

(1) IN GENERAL.—Grants awarded under this section shall be used for research to advance the engagement of underrepresented students in grades kindergarten through 8 in STEM through the development and implementation of innovative before-school, after-school, out-of-school, or summer activities, including programs (if applicable to the student population provided in a single-gender environment, that are designed to encourage interest, engagement, and skills development of underrepresented students in STEM. Such research shall be conducted in learning environments that actively provide programming to underrepresented students in grades kindergarten through 8 in STEM.

(2) PERMITTED ACTIVITIES.—Such activities may include—

(A) the development and implementation of programming described in subsection (a) for the purpose of research;

(B) the use of a variety of engagement methods, including cooperative and hands-on learning;

(C) exposure of underrepresented youth to role models in the fields of STEM, including researchers in the National Laboratories, and near-peer mentors;

(D) training of informal learning educators and youth-serving professionals using evidence-based methods consistent with the target student population; and

(E) education of students on the relevance and significance of STEM careers, provision of academic advice and assistance, and activities designed to make real-world connections to STEM content areas;

(F) the attendance of underrepresented youth at events, competitions, and academic programs to provide a broad perspective and encourage career exposure in STEM;

(G) activities designed to engage parents of underrepresented youth;

(H) implementation of strategies to engage underrepresented youth, such as using leadership skill outcome measures to encourage youth with the confidence to pursue STEM course tracks and academic preparation in STEM, and;

(I) coordination with STEM-rich environments, including other nonprofit, nongovernmental organizations, classroom and out-of-classroom programs, and partnerships with education providers, STEM-focused, and legislative action that could optimize the effectiveness of the activities described in this section, in the development of and implementation of strategies and initiatives designed to help ensure that underrepresented youth have access to, and are engaged in, STEM activities.

(b) APPLICATION.—An applicant seeking funding under paragraph (1), the Director shall submit to Congress and make widely available to the public a report that includes—

(1) not later than 45 days after the date of enactment of this Act, the Director shall submit to Congress and make widely available to the public a report that includes—

(A) the results of the evaluation; and

(B) any recommendations for administrative and legislative action that could optimize the effectiveness of the activities described in this section, in the development of and implementation of strategies and initiatives designed to help ensure that underrepresented youth have access to, and are engaged in, STEM activities.

SEC. 113. REVIEW OF EDUCATION PROGRAMS.

(a) IN GENERAL.—The Director shall review the education programs of the Foundation that are in operation within 18 months after the date of enactment of this Act to determine—

(1) whether any of such programs duplicate target groups, services provided, fields of focus, or objectives and;

(2) how those programs are being evaluated and assessed for outcome-oriented effectiveness.

(b) REPORT.—Not later than 1 year after the date of enactment of this Act, and annually thereafter as part of the annual budget submission to Congress, the Director shall complete a report on the review carried out under this section and shall submit the report to the Committee on Science, Space, and Technology and the Committee on Appropriations of the House of Representatives, and to the Committee on Commerce, Science, and Transportation, the Committee on Health, Education, Labor, and Pensions, and the Committee on Appropriations of the Senate, and shall make the report widely available to the public.

SEC. 114. RECOMPETITION OF AWARDS.

(a) FINDINGS.—The Congress finds that—

(1) the merit-reviewed competition of grant and award proposals is a hallmark of the Foundation grant and award making process;

(2) the majority of Foundation-funded multi-user research facilities have transitioned to five-year renewals, and every five years the program officer responsible for the facility makes a recommendation to the National Science Board as to the renewal, recompetition, or termination of support for the facility; and

(3) requiring the recompetition of expiring awards is based on the conviction that competition is most likely to ensure the effective stewardship of Foundation funds for supporting research and education.

(b) RECOMPETITION.—The Director shall ensure that the system for recompetition of Maintenance and Operations of facilities, equipment and instrumentation is fair, consistent, and transparent and is applied in a manner that results in an efficient and effective manner. The Director shall periodically evaluate whether the criteria of the system are being applied in a manner that is transparent, reliable, and valid.

SEC. 115. SENSE OF THE CONGRESS REGARDING INDUSTRY INVESTMENT IN STEM EDUCATION.

It is the sense of Congress that—

(1) not later than 60 days after receiving the results of the assessment under paragraph (1), submit a report to the Committee on Science, Space, and Technology and the Committee on Appropriations of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate on
the findings of the assessment, together with the agreement or disagreement of the Director and Board with each of its findings and recommendations.

SEC. 117. SEARCH GRANT CONDITIONS.

The Foundation shall establish procedures to ensure that—

(1) a research grant awarded by the Foundation to a principal investigator supports a scope of work not otherwise being directly funded by grants provided by other Federal agencies;

(2) a principal investigator includes in any applicable research grants research-related expenses, including taking into account the broader accomplishments and potential of the individual investigator in addition to the potential impact of the project.

SEC. 118. SOURCES STUDY.

Not later than 1 year after the date of enactment of this Act, the Comptroller General shall transmit to the Congress a report detailing the results of a study on the use of scientific computing resources funded by the Foundation at institutions of higher education. Such study shall assess—

(1) efficiencies that can be achieved by using shared scientific computing resources for projects that have similar scientific computing requirements or projects where specialized software resources could be shared with other practitioners in the scientific community;

(2) efficiencies that can be achieved by using shared hardware that can be cost effectively procured from cloud computing services;

(3) efficiencies that can be achieved by using shared software from an open source repository or platform; and

(4) cost savings that could be achieved by potential sharing of scientific computing resources across all Foundation grants.

SEC. 120. SCIENTIFIC BREAKTHROUGH PRIZES.

The Foundation shall place a high priority on designing and administering pilot programs for scientific breakthrough prizes, in conjunction with private entities, that are consistent with Office of Science Technology Policy guidelines. Breakthrough prizes shall center around technological breakthroughs that are of strategic importance to the Nation, and have the capacity to spur new economic growth.

SEC. 121. ROTATING PERSONNEL.

In order to control the costs to the Foundation of individuals employed pursuant to the Intergovernmental Personnel Act of 1970 (42 U.S.C. 4701 note)—

(1) the Foundation shall provide to Congress a written justification and waiver by the Deputy Director in instances in which such an individual is to be paid at a rate that exceeds the maximum rate of pay for the Senior Executive Service, including, if applicable, adjustment for the certified Senior Executive Service Performance Appraisal System;

(2) the Foundation shall provide to Congress a written justification and waiver by the Director in instances in which such an individual is to be paid at a rate that exceeds the annual salary rate of the Vice President of the United States; and

(3) the Foundation shall provide an annual report to Congress on the costs to the Foundation of employing such individuals, including—

(A) the timeliness and completeness of Foundation actions in response to recommendations and findings from the Office of Inspector General related to the employment of such individuals;

(B) actions taken by the Foundation to reduce the cost to the Foundation of the employment of such individuals at pay levels that exceed the threshold described in paragraph (1) and (2) or (3); and

(C) the value to the Foundation of employing individuals pursuant to the Intergovernmental Personnel Act of 1970 (42 U.S.C. 4701 note) whose pay is set below the threshold described in paragraph (1); and

(D) the value to the Foundation of employing individuals who are not permanent employees whose pay is set below the threshold described in paragraph (1) or (2).

SEC. 122. SENSE OF CONGRESS REGARDING INNOVATION CORPS.

It is the sense of Congress that—

(1) the Foundation’s Innovation Corps (I-Corps) was established to foster a national innovation ecosystem by encouraging institutions, scientists, engineers, and entrepreneurs to identify and explore the innovation and commercial potential of Foundation-funded research well beyond the laboratory;

(2) the Foundation’s I-Corps includes investment in entrepreneurship and commercialization education, training, and mentoring, ultimately leading to the practical deployment of technological innovations that serve to improve the Nation’s competitiveness, promote economic growth, and benefit society; and

(3) by building networks of entrepreneurs, educators, mentors, institutions, and collabora-

tions, and supporting specialized education and training, I-Corps is at the leading edge of a strong, lasting foundation for an American innovation ecosystem.

SEC. 123. BRAIN RESEARCH THROUGH ADVANCING INNOVATIVE NEUROTECHNOLOGIES INITIATIVE.

The Foundation shall support research activities related to the Brain Research through Advancing Innovative Neurotechnologies Initiative. The Foundation is encouraged to work in conjunction with the Interagency Working Group on Neuroscience (IWN) to determine how to use the data infrastructure of the Foundation and other applicable agencies to help neuroscientists organize, manage, and analyze the large amounts of data that will result from research attempting to understand how the brain functions.

SEC. 124. SCHOLARSHIP PROGRAM AMENDMENTS.

(a) AMENDMENTS.—Section 10A of the National Science Foundation Authorization Act of 2002 (42 U.S.C. 1862n—1(i)(4)(A)) is amended by inserting—

(iii) the Foundation shall provide an annual report to Congress on the costs to the Foundation of employing such individuals, including—

(A) the timeliness and completeness of Foundation actions in response to recommendations and findings from the Office of Inspector General related to the employment of such individuals;

(B) actions taken by the Foundation to reduce the cost to the Foundation of the employment of such individuals at pay levels that exceed the threshold described in paragraph (1) and (2) or (3); and

(C) the value to the Foundation of employing individuals pursuant to the Intergovernmental Personnel Act of 1970 (42 U.S.C. 4701 note) whose pay is set below the threshold described in paragraph (1); and

(D) the value to the Foundation of employing individuals who are not permanent employees whose pay is set below the threshold described in paragraph (1) or (2).

(b) DEFINITION.—Section 10(i)(5) of the National Science Foundation Authorization Act of 2002 (42 U.S.C. 1862n—1(i)(5)) is amended by inserting—

(1) research and development that promotes understanding of learning and engagement in informal environments, including the role of informal environments in broadening participation in STEM; and

(2) design and testing of innovative STEM learning environments in order to improve STEM learning outcomes and engagement in STEM; and

SEC. 125. INFORMAL STEM EDUCATION.

(a) GRANTS.—The Director, through the Director for Education and Human Resources, shall continue to award competitive, merit-reviewed grants to support—

(1) research and development of innovative out-of-school STEM learning and emerging STEM learning environments in order to improve STEM learning outcomes and engagement in STEM; and

(2) research that advances the field of informal STEM education.

(b) USES OF FUNDS.—Activities supported by grants under this section may encompass a single STEM discipline, multiple STEM disciplines, or integrative STEM initiatives and shall include—

(1) research and development that improves our understanding of learning and engagement in informal environments, including the role of informal environments in broadening participation in STEM; and

(2) design and testing of innovative STEM learning environments in order to improve STEM learning outcomes and increase engagement for K-12 students, K-12 teachers, and the general public, including the scaling of the scalability of models, programs, and other resources.

SEC. 126. EXPERIMENTAL PROGRAM TO STIMULATE LATE COMPETITIVE RESEARCH.

The Foundation shall continue to operate a robust Experimental Program to Stimulate Competitive Research (EPSCoR). The EPSCoR program helps ensure that academic research institutions in more than half the States develop a strong research infrastructure and participate fully in federally funded research activities. The program should be a high priority for the Foundation.

TITLE II—SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS

SEC. 201. FINDINGS; SENSE OF CONGRESS.

(a) FINDINGS.—Congress finds the following:

(1) According to the National Science Board’s Science and Engineering Indicators, the science and engineering workforce has shown sustained growth for more than half a century, and works with science and engineering degrees tend to earn more than comparable workers in other fields.

(2) According to the Program for International Student Assessment 2012 results, American adults lag behind many other nations in STEM education, American students rank 21st in science and 26th in mathematics.

(3) Achievement USA and ING found a decrease of 25 percent in the percentage of teen-

age students interested in STEM careers.
(4) According to a 2007 report from the Department of Labor, industries and firms depend on a strong science and mathematics workforce have launched a variety of programs that target high school, undergraduate and graduate students in STEM fields.

(5) The Federal Government spends nearly $3 billion annually on STEM education related programs. But encouraging STEM education activities beyond the scope of the Federal Government, including privately sponsored competitions and programs in our schools, is crucial for the technical and economic competitiveness of the United States.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the effective coordination and adoption of performance measurement based on objective outcomes for federally supported STEM programs is needed;

(2) leveraging private and nonprofit investments in STEM education will be essential to strengthening the Federal STEM portfolio;

(3) strengthening the Federal STEM portfolio may require program consolidations and terminations, but such changes should be based on evidence with stakeholder input;

(4) coordinating STEM programs and activities across the Federal Government in order to limit duplication and engage stakeholders in STEM programs and related activities for which objective outcomes can be measured will bolster results from STEM education investments, improve the return on taxpayers’ investments in STEM education programs, and in turn strengthen the United States’ economy; and

(5) as the Committee on STEM Education implements the 5-year Strategic Plan for Federal STEM education required under section 101(b)(5) of the America COMPETES Reauthorization Act of 2010 (42 U.S.C. 6621), and any needs or opportunities to update the strategic plan;

SEC. 202. STEM EDUCATION ADVISORY PANEL.

(a) ESTABLISHMENT.—The President shall establish or designate a STEM Education Advisory Panel that incorporates key stakeholders from the education and industry sectors. The co-chairs shall be members of the President’s Council of Advisors on Science and Technology.

(b) DUTIES.—The Advisory Panel may retain or designate the President under subsection (a) shall consist primarily of members from academic institutions, nonprofit organizations, Federal agencies, a description of the progress made in implementing the STEM education programs, and in turn strengthen the United States’ economy; and

(c) DUTIES.—The Advisory Panel shall advise and information on STEM education, development, training, implementation, interventions, professional development, or workforce needs or concerns. In selecting or designating an Advisory Panel, the President may also seek and give consideration to recommendations from the Congress, industry, the scientific community (including the National Academy of Sciences, scientific professional societies), State and local governments, and other appropriate organizations.

(c) DUTIES.—The Advisory Panel shall advise the President, the Committee on STEM Education, and the STEM Education Coordinating Office established under section 204 on matters relating to STEM education, and shall each year provide general guidance to every Federal agency with STEM education programs or activities, including in the preparation of requests for appropriations for activities related to STEM education programs.

(d) TRAVEL EXPENSES OF NON-FEDERAL MEMBERS.—Non-Federal members of the Advisory Panel, while attending meetings of the Advisory Panel or while in the United States under the request of the President at the request of the Advisory Panel away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for individuals in the Government serving without pay.

Nothing in this subsection shall be construed to prohibit members of the Advisory Panel who are officers or employees of the United States from being allowed travel expenses, including per diem in lieu of subsistence, in accordance with existing law.

SEC. 203. COMMITTEE ON STEM EDUCATION.

Section 101 of the America COMPETES Reauthorization Act of 2010 (42 U.S.C. 6621) is amended—

(1) in the first subsection (b) —

(A) by redesignating paragraphs (3) through (6) as paragraphs (5) through (8), respectively;

(B) by inserting after paragraph (2) the following new paragraphs:

(3) collaborate with the STEM Education Advisory Panel established under section 202 of the America COMPETES Reauthorization Act of 2015 and other outside stakeholders to ensure the engagement of the STEM education community;

(4) review evaluation measures used for Federal STEM education programs; and

(C) in paragraph (6), as so redesignated by subparagraph (A) of this paragraph, by striking “periodically update.”; and

(2) in the second subsection (b) and in subsection (c), by striking “subsection (b)(5)” and inserting “subsection (b)(7)”.

SEC. 204. STEM EDUCATION COORDINATING OFFICE.

(a) ESTABLISHMENT.—The Director of the National Science Foundation shall establish within the Directorate for Education and Human Resources a STEM Education Coordinating Office, which shall have a Director and staff that shall be responsible for coordinating Federal agencies that fund STEM education programs and activities.

(b) RESPONSIBILITIES.—The STEM Education Coordinating Office shall—

(1) provide technical and administrative support to the Committee on STEM Education, especially in its coordination of Federal STEM programs and strategic planning responsibilities;

(2) the Advisory Panel established under section 202; and

(3) Federal agencies with STEM education programs;

(2) periodically update and maintain the inventory of federally sponsored STEM education programs and activities established under section 101(b)(8) of the America COMPETES Reauthorization Act of 2010 (42 U.S.C. 6621), and any needs or opportunities for the Federal STEM portfolio.

(2) in the second subsection (b) and in subsection (c), by striking “subsection (b)(5)” and inserting “subsection (b)(7)”.

SEC. 203. COMMITTEE ON STEM EDUCATION.

Section 101 of the America COMPETES Reauthorization Act of 2010 (42 U.S.C. 6621) is amended—

(1) in the first subsection (b) —

(A) by redesignating paragraphs (3) through (6) as paragraphs (5) through (8), respectively;

(B) by inserting after paragraph (2) the following new paragraphs:

(3) collaborate with the STEM Education Advisory Panel established under section 202 of the America COMPETES Reauthorization Act of 2015 and other outside stakeholders to ensure the engagement of the STEM education community;

(4) review evaluation measures used for Federal STEM education programs; and

(C) in paragraph (6), as so redesignated by subparagraph (A) of this paragraph, by striking “periodically update.”; and

(2) in the second subsection (b) and in subsection (c), by striking “subsection (b)(5)” and inserting “subsection (b)(7)”.

SEC. 204. STEM EDUCATION COORDINATING OFFICE.

(a) ESTABLISHMENT.—The Director of the National Science Foundation shall establish within the Directorate for Education and Human Resources a STEM Education Coordinating Office, which shall have a Director and staff that shall be responsible for coordinating Federal agencies that fund STEM education programs and activities.

(b) RESPONSIBILITIES.—The STEM Education Coordinating Office shall—

(1) provide technical and administrative support to the Committee on STEM Education, especially in its coordination of Federal STEM programs and strategic planning responsibilities;

(2) the Advisory Panel established under section 202; and

(3) Federal agencies with STEM education programs;

(2) periodically update and maintain the inventory of federally sponsored STEM education programs and activities established under section 101(b)(8) of the America COMPETES Reauthorization Act of 2010 (42 U.S.C. 6621), and any needs or opportunities for the Federal STEM portfolio.

(2) in the second subsection (b) and in subsection (c), by striking “subsection (b)(5)” and inserting “subsection (b)(7)”.

SEC. 203. COMMITTEE ON STEM EDUCATION.

Section 101 of the America COMPETES Reauthorization Act of 2010 (42 U.S.C. 6621) is amended—

(1) in the first subsection (b) —

(A) by redesignating paragraphs (3) through (6) as paragraphs (5) through (8), respectively;

(B) by inserting after paragraph (2) the following new paragraphs:

(3) collaborate with the STEM Education Advisory Panel established under section 202 of the America COMPETES Reauthorization Act of 2015 and other outside stakeholders to ensure the engagement of the STEM education community;

(4) review evaluation measures used for Federal STEM education programs; and

(C) in paragraph (6), as so redesignated by subparagraph (A) of this paragraph, by striking “periodically update.”; and

(2) in the second subsection (b) and in subsection (c), by striking “subsection (b)(5)” and inserting “subsection (b)(7)”.

SEC. 204. STEM EDUCATION COORDINATING OFFICE.

(a) ESTABLISHMENT.—The Director of the National Science Foundation shall establish within the Directorate for Education and Human Resources a STEM Education Coordinating Office, which shall have a Director and staff that shall be responsible for coordinating Federal agencies that fund STEM education programs and activities.

(b) RESPONSIBILITIES.—The STEM Education Coordinating Office shall—

(1) provide technical and administrative support to the Committee on STEM Education, especially in its coordination of Federal STEM programs and strategic planning responsibilities;

(2) the Advisory Panel established under section 202; and

(3) Federal agencies with STEM education programs;

(2) periodically update and maintain the inventory of federally sponsored STEM education programs and activities established under section 101(b)(8) of the America COMPETES Reauthorization Act of 2010 (42 U.S.C. 6621), and any needs or opportunities for the Federal STEM portfolio.

(2) in the second subsection (b) and in subsection (c), by striking “subsection (b)(5)” and inserting “subsection (b)(7)”.
costs of federally funded research be streamlined so that a higher proportion of taxpayer dollars flow into direct research activities.

(b) In general.—The Director of the Office of Science and Technology Policy shall establish a working group under the authority of the National Science and Technology Council, to include the Office of Management and Budget. The working group shall be responsible for reviewing Federal regulations affecting research and research universities and making recommendations on how to—

(1) prioritize, streamline, and eliminate duplicative Federal regulations and reporting requirements;

(2) minimize the regulatory burden on United States institutions of higher education performing federally funded research while maintaining accountability for Federal tax dollars; and

(3) identify and update specific regulations to refocus on performance-based goals rather than on process while still meeting the desired outcome.

(c) Stakeholder input.—In carrying out the responsibilities under subsection (b), the working group shall take into account input and recommendations from non-Federal stakeholders, including federally funded and nonfederally funded researchers, institutions of higher education, scientific disciplinary societies and associations, nonprofit institutions, industry, including small businesses, federally funded research and development centers, and others with a stake in ensuring effectiveness, efficiency, and accountability in the performance of scientific research.

(d) Report.—Not later than 1 year after the date of enactment of this Act, and annually thereafter for 3 years, the Director shall report to the Committee on Science, Space, and Technology the House of Representatives and the Committee on Commerce, Science, and Transportation the Senate, a report that describes all foreign travel by Office of Science and Technology Policy staff and details. Each report shall specify the dates of each trip, the purpose of the trip, the Office of Science and Technology Policy participants on the trip, total Office of Science and Technology Policy costs associated with the trip, and details of all international meetings, including meeting participants and topics addressed.

SEC. 303. COORDINATION OF INTERNATIONAL SCIENCE AND TECHNOLOGY PARTNERSHIPS.

(a) Establishment.—The Director of the Office of Science and Technology Policy shall establish a body under the National Science and Technology Council with the responsibility to identify and coordinate international science and technology cooperation that can advance the United States science and technology enterprise, improve economic and national security, and support United States foreign policy goals. (b) BODIES ESTABLISHED—The bodies established under subsection (a) shall be co-chaired by senior level officials from the Office of Science and Technology Policy and the Department of State.

(c) Responsibilities.—The body established under subsection (a) shall—

(1) plan and coordinate interagency international science and technology cooperation and train and training activities and partnerships supported or managed by Federal agencies and work with other National Science and Technology Council agencies to help plan and coordinate the international component of national science and technology priorities;

(2) establish Federal priorities and policies for aligning, as appropriate, international science and technology cooperative research and training activities and partnerships supported or managed by Federal agencies with the foreign policy goals of the United States;

(3) identify opportunities for new international science and technology cooperative research and training partnerships that advance both the science and technology and the foreign policy priorities of the United States;

(4) in carrying out paragraph (3), solicit input and recommendations from non-Federal science and technology stakeholders, including universities, scientific and professional societies, industry, and relevant organizations and institutions; and

(5) identify broad issues that influence the ability of United States scientists and engineers to compete abroad and to address barriers to collaboration and access to scientific information.

(d) Reports to Congress.—The Director of the Office of Science and Technology Policy shall transmit a report, to be updated every 2 years, to the Committee on Science, Space, and Technology and the Committee on Foreign Affairs of the House of Representatives, and to the Committee on Commerce, Science, and Transportation and the Committee on Foreign Relations of the Senate. The report shall also be available to the public on the reporting agency’s website. The report shall contain a description of—

(1) the priorities and policies established under subsection (c)(2);

(2) the ongoing and new partnerships established since the last update to the report;

(3) the means by which stakeholder input was received, as well as summary views of stakeholder input; and

(4) the issues influencing the ability of United States scientists and engineers to collaborate with foreign counterparts.

(e) Additional Reports to Congress.—The Director of the Office of Science and Technology Policy shall transmit, not later than 60 days after the date of enactment of this Act and annually thereafter, to the Committee on Science, Space, and Technology and the Committee on Foreign Relations of the Senate, a report that lists and describes all foreign travel by Office of Science and Technology Policy staff and details.

(f) Definitions.—In this section—

(1) the term ''prize'' means--

(A) in paragraph (1)(B), by inserting ''prize'' before ''competition'';

(B) in paragraph (2)(A), by inserting ''prize'' before ''competition'';

(C) by redesignating paragraph (3) as paragraph (2); and

(D) by inserting after paragraph (2) the following new paragraph:

"(2) WAIVER.—An agency may waive the requirements under paragraph (2) if a waiver is approved by the National Science and Technology Council;"

(g) Amendments to Prize Competitions.

(1) in subsection (c)—

(A) by inserting ''competition'' after ''section'', and ''prize'' after ''following''; and

(B) by inserting ''cash prize purse'' after ''prize'';

(2) in subsection (d), by striking ''prize'' and inserting ''cash prize purse'';

(3) in subsection (g), by striking ''prize'' and inserting ''cash prize purse'';

(4) in subsection (h), by inserting ''prize'' before ''competition'' both places it appears;

(5) in subsection (i)—

(A) in paragraph (1)(B), by inserting ''prize'' before ''competition'';

(B) in paragraph (2)(A), by inserting ''prize'' before ''competition'' both places it appears; and

(C) by redesignating paragraph (3) as paragraph (4); and

(D) by inserting after paragraph (2) the following new paragraph:

"(3) WAIVER.—An agency may waive the requirements under paragraph (2) if a waiver is approved by the National Science and Technology Council;"

(h) Amendments to Federal Regulations.

(1) in subsection (i)—

(A) by striking ''in the Federal Register'' and inserting ''on a publicly accessible Government website, such as www.whitehouse.gov''; and

(B) by inserting ''cash prize purse'' after ''prize'';

(2) in subsection (j), by striking ''prize'' and inserting ''cash prize purse'';

(3) in subsection (k), by striking ''prize'' and inserting ''cash prize purse'';

(4) in subsection (l), by striking all after ''may enter into'' and inserting ''a grant, contract, cooperative agreement, or other agreement with a private sector for-profit or nonprofit entity to administer the prize competition, subject to the provisions of this section.'';

(5) in subsection (m)—

(A) in paragraph (2)(A), by inserting ''prize'' before ''competition'';

(B) in paragraph (3), by inserting ''prize'' before ''competition'' both places it appears; and

(C) in paragraph (4), by striking all after ''may enter into'' and inserting ''a grant, contract, cooperative agreement, or other agreement with a private sector for-profit or nonprofit entity to administer the prize competition, subject to the provisions of this section.'';

(6) in subsection (n)—

(A) by striking ''in the Federal Register'' and inserting ''on a publicly accessible Government website, such as www.whitehouse.gov''; and

(B) by inserting ''cash prize purse'' after "prize";

(7) in subsection (o), by striking all after ''may enter into'' and inserting ''a grant, contract, cooperative agreement, or other agreement with a private sector for-profit or nonprofit entity to administer the prize competition, subject to the provisions of this section.'';

(8) in subsection (p) shall include a list of such waivers granted during the preceding fiscal year, along with a detailed explanation of the reasons for granting the waivers.'';

(9) in subsection (q) —

(A) in paragraph (2)(A), by inserting ''prize'' before ''competition'';

(B) in paragraph (3), by inserting ''prize'' before ''competition'' both places it appears; and

(C) by redesignating paragraph (3) as paragraph (4); and

(D) by inserting after paragraph (2) the following new paragraph:

"(2) WAIVER.—An agency may waive the requirements under paragraph (2) if a waiver is approved by the National Science and Technology Council;"
(C) in paragraph (3)(A)—
   (i) by striking “No prize” and inserting “No prize competition”;
   and
   (ii) by striking “the prize” and inserting “the cash prize”;

(D) in paragraph (3)(B), by striking “a prize” and inserting “a cash prize purse”;

(E) in paragraph (3)(B)(i), by inserting “competition” after the United States Chief Technology Officer;

(F) in paragraph (4)(A), by striking “a prize” and inserting “a cash prize purse”;

(G) in paragraph (4)(B), by striking “cash prizes” and inserting “cash prize purses”; and

(H) in section (n), by inserting “for-profit and nonprofit entities,” after “commercial vehicle.”

SEC. 306. UNITED STATES CHIEF TECHNOLOGY OFFICER.

Title II of the National Science and Technology Policy, Organization, and Priorities Act of 1976 (42 U.S.C. 6611 et seq.) is amended by adding at the end the following new section:

“UNITED STATES CHIEF TECHNOLOGY OFFICER.

Sec. 210. (a) APPOINTMENT.—The President may appoint a United States Chief Technology Officer. Not later than 1 year after the date of enactment of this Act, the Director of the Office of Science and Technology Policy shall enter into an arrangement with the National Science Foundation to conduct and provide a study for the Office of Science and Technology Policy to recommend the establishment of an Office of Innovation Policy within the National Science Foundation.

(b) ACTIVITIES.—The duties of the United States Chief Technology Officer shall include—
   (1) advising the President and the Director of the Office of Science and Technology Policy on Federal information systems, technology, data, and innovation policies and initiatives;
   (2) promoting an improved exchange of information among the Federal Government, the public, and Congress;
   (3) promoting the use of innovative technological approaches across the Federal Government to ensure a modern information technology infrastructure;
   (4) working with the Chief Technology Officers and Chief Information Officers of all Federal agencies to ensure the use of best technologies and security practices for information systems;
   (5) establishing a working group with such Officers to exchange best practices about information systems;
   (6) promoting transparency and accountability across the Federal Government for all technological implementation by working with agencies to manage each arm of the Federal Government, including the executive branch, to make its records open and accessible;
   (7) promoting security and privacy protection policies for all Federal information technology systems that are consistent with Federal law, regulations, and current best practices;
   (8) promoting technological interoperability of key Government functions;
   (9) in consultation with the Office of Management and Budget, providing an annual report to the President, the Director of the Office of Science and Technology Policy, and Congress on the current state of information systems of all Federal agencies, including—
      (A) the status of information systems, including any interagency integration or security concerns about these information systems in all Federal agencies;
      (B) a review of all Federal websites with third-party embedded tools that—
         (i) identifies each embedded tool, who it belongs to, and the data it collects; and
         (ii) adds data on the use of cybersecurity and consumer privacy, including whether each website provides prominent notice to consumers about the presence of the tool and whether the consumer can opt out of the tool;
      (C) the amount of money being spent on various technologies and
      (D) technology recommendations and best practices; and
   (10) such other functions and activities as the President and Director of the Office of Science and Technology Policy may assign.

(c) REPORT.—In the absence of a United States Chief Technology Officer, the Director of the Office of Science and Technology Policy shall be responsible for providing the report required under subsection (b)(9).”.

SEC. 307. NATIONAL RESEARCH COUNCIL STUDY ON TECHNOLOGY FOR EMERGENCY NOTIFICATIONS ON UNIVERSITY CAMPUSES.

(a) IN GENERAL.—Not later than 90 days after the date of enactment of this Act, the Director of the Office of Science and Technology Policy shall enter into an arrangement with the National Research Council to conduct and provide a study for the Office of Science and Technology Policy to recommend the establishment of an Office of Innovation Policy within the National Science Foundation.

(b) DUTIES.—The study shall include—
   (1) the timeline of notifications during emergency situations provided by various technologies to successfully deliver notifications not more than 30 seconds after the institution of an emergency situation provided by various technologies to successfully deliver notifications not more than 30 seconds after the institution of an emergency situation provided by various technologies; and
   (2) recommendations to improve the delivery of emergency notifications.

(c) REPORT.—In the absence of a United States Chief Technology Officer, the Director of the Office of Science and Technology Policy shall submit to Congress a report on the study conducted under such subsection.

TITLE II—NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY

SEC. 401. AUTHORIZATION OF APPROPRIATIONS.

(a) FISCAL YEAR 2016.—
   (1) IN GENERAL.—There are authorized to be appropriated to the National Institute of Standards and Technology $933,700,000 for the National Institute of Standards and Technology for fiscal year 2016.

   (2) SPECIFIC ALLOCATIONS.—Of the amount authorized by paragraph (1)—
      (A) $744,000,000 shall be for scientific and technical research and services laboratory activities;
      (B) $59,000,000 shall be for the construction and maintenance of facilities; and
      (C) $130,000,000 shall be for industrial technology services activities, of which $125,000,000 shall be for the Manufacturing Extension Partnership Program under sections 25 and 26 of the National Institute of Standards and Technology Act (15 U.S.C. 278b and 278i) and $5,000,000 shall be for the Network for Manufacturing Innovation Program under section 34 of the National Institute of Standards and Technology Act (15 U.S.C. 278b).”.

SEC. 402. STANDARDS AND CONFORMITY ASSESSMENT.

Section 2 of the National Institute of Standards and Technology Act (15 U.S.C. 272a) is amended—

(1) in subsection (b)—
   (A) by striking “controlled” and inserting “controlled”;
   (B) by redesigning paragraph (2) as paragraph (2); and
   (C) by inserting after paragraph (2) the following:

   (23) participate in and support scientific and technical conferences;
   (24) perform pre-competitive measurement science and technology research in partnership with institutions of higher education and industry to promote United States industrial competitiveness; and .”.

SEC. 403. VISITING COMMITTEE ON ADVANCED TECHNOLOGY.

Section 10 of the National Institute of Standards and Technology Act (15 U.S.C. 278b) is amended—

(1) in subsection (a)—
   (A) by striking “15 members” and inserting “not fewer than 11 members”; and
   (B) by striking “at least” and inserting “at least two”;

(2) by adding at the end the following: “The Committee may consult with the National Research Council in making recommendations regarding general policy for the Institute.”;

(3) in subsection (b)(1), by striking “, including the Program established under section 28,”.

SEC. 404. POLICE AND SECURITY AUTHORITY.

Section 15 of the National Institute of Standards and Technology Act (15 U.S.C. 275a) is amended—

(1) by striking “of the Government; and” and inserting “of the Government; and”;

(2) by inserting “United States Code,” and inserting “United States Code; and”.

SEC. 405. EDUCATION AND OUTREACH.

(a) The National Institute of Standards and Technology Act (15 U.S.C. 275 et seq.) is amended by striking sections 18, 19, and 19A and in-
measurement sciences, standards, and technology by the general public, industry, and academia in support of the Institute’s mission.

(b) RESEARCH FELLOWSHIPS—

(1) IN GENERAL.—The Director may award research fellowships and other forms of financial and logistical assistance, including direct stipend awards, to—

(A) United States citizens for research and technical activities of the Institute.

(B) students at institutions of higher education within the United States who show promise as present or future contributors to the mission of the Institute; and

(2) SELECTION.—The Director shall select persons to receive such fellowships and assistance on the basis of the relative importance of the proposed work to the mission and programs of the Institute.

(c) POST-DOCTORAL FELLOWSHIP PROGRAM.—The Director shall establish and conduct a post-doctoral fellowship program, subject to the availability of appropriations, that shall include not fewer than 20 fellows per fiscal year. In evaluating applications for fellowships under this subsection, the Director shall give consideration to the goal of promoting the participation of underrepresented students in research areas supported by the Institute.

(d) ADDITIONAL ASSESSMENTS.—The Institute, at the discretion of the Director, also may conduct additional assessments of Institute programs and projects that involve collaboration across the Institute laboratories and centers and shall include assessments of selected scientific and technical topics.

(e) CONSULTATION WITH VISITING COMMITTEE ON ADVANCED TECHNOLOGY.—The National Research Council shall consult with the Visiting Committee on Advanced Technology established under section 10 in performing the assessments under this section.

(f) REPORT.—Not later than 60 days after the completion of each assessment, the Institute shall transmit the report on such assessment to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate.

SEC. 406. PROGRAMMATIC PLANNING REPORT.

Section 29(d) of the National Institute of Standards and Technology Act (15 U.S.C. 278d(d)) is amended by adding at the end the following:—

‘‘The 3-year programmatic planning document shall also describe how the Director is addressing recommendations from the Visiting Committee on Advanced Technology established under section 10.’’

SEC. 407. ASSESSMENTS BY THE NATIONAL RESEARCH COUNCIL.

(a) NATIONAL ACADEMY OF SCIENCES REVIEW.—Not later than 6 months after the date of enactment of this Act, the Director of the National Institute of Standards and Technology shall enter into a contract with the National Academy of Sciences to conduct a single, comprehensive review of the Institute’s laboratory programs. The review shall—

(1) assess the technical merits and scientific caliber of the research conducted at the laboratories;

(2) examine the strengths and weaknesses of the 2010 laboratory reorganization on the Institute’s ability to fulfill its mission;

(3) assess how-cutting research and development activities are planned, coordinated, and executed across the laboratories; and

(4) assess how the laboratories are engaging industry, including the incorporation of industry need, into the research goals and objectives of the Institute.

(b) ADDITIONAL ASSESSMENTS.—Section 24 of the National Institute of Standards and Technology Act (15 U.S.C. 278b) is amended to read as follows:

‘‘SEC. 24. ASSESSMENTS BY THE NATIONAL RESEARCH COUNCIL.—

‘‘(a) IN GENERAL.—The Institute shall contract with the National Research Council to perform and report on assessments of the technical quality and impact of the work conducted at Institute laboratories.

‘‘(b) SCHEDULE.—Two laboratories shall be assessed under subsection (a) each year, and each laboratory shall be assessed at least once every 3 years.

‘‘(c) SUMMARY REPORT.—Beginning in the year after the first assessment is conducted under this subsection and each year thereafter, the Institute shall contract with the National Research Council to prepare a report that summarizes the findings common across the individual assessment reports.

‘‘(d) ADDITIONAL ASSESSMENTS.—The Institute, at the discretion of the Director, also may conduct additional assessments of Institute programs and projects that involve collaboration across the Institute laboratories and centers and shall include assessments of selected scientific and technical topics.

‘‘(e) CONSULTATION WITH VISITING COMMITTEE ON ADVANCED TECHNOLOGY.—The National Research Council shall consult with the Visiting Committee on Advanced Technology established under section 10 in performing the assessments under this section.

(f) REPORT.—Not later than 60 days after the completion of each assessment, the Institute shall transmit the report on such assessment to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate.’’

SEC. 408. HOLLINGS MANUFACTURING EXTENSION PARTNERSHIP.

Section 25 of the National Institute of Standards and Technology Act (15 U.S.C. 278k) is amended to read as follows:

‘‘SEC. 25. HOLLINGS MANUFACTURING EXTENSION PARTNERSHIP.

‘‘(a) ESTABLISHMENT AND PURPOSE.—

‘‘(1) IN GENERAL.—Through the Director and, if appropriate, through other officials, shall provide assistance for the creation and support of manufacturing extension centers, to be known as the ‘Hollings Manufacturing Extension Centers’, for the transfer of manufacturing technology and best business practices (in this Act referred to as the ‘Centers’). The Centers shall be known as the ‘Hollings Manufacturing Extension Partnership’.

‘‘(2) AFFILIATIONS.—Such Centers shall be affiliated with a small or nonprofit institution or organization, or group thereof, that applies for and is awarded financial assistance under this section.

‘‘(3) OBJECTIVE.—The objective of the Centers is to enhance competitiveness, productivity, and technological performance in United States manufacturing through—

(A) the transfer of manufacturing technology and techniques developed at the Institute to Centers and, through them, to manufacturing companies throughout the United States;

(B) the participation of individuals from industry, institutions of higher education, State governments, other Federal agencies, and, when appropriate, the private sector in cooperative technology transfer activities;

(C) efforts to make new manufacturing technology and processes usable by United States-based small and medium-sized companies;

(D) the active dissemination of scientific, engineering, technical, and management information about manufacturing to industrial firms, including small and medium-sized manufacturing companies;

(E) the utilization, when appropriate, of the expertise and capability that exists in Federal laboratories and other Federal agencies, and, when appropriate, the private sector in cooperative technology transfer activities;

(F) the provision to community colleges and area career and technical education schools of information about the job skills needed in small and medium-sized manufacturing businesses in the regions they serve; and

(G) promoting and expanding certification systems offered through industry, associations, and local colleges.

‘‘(b) ACTIVITIES.—The activities of the Centers shall include—

(1) the establishment of automated manufacturing systems and other advanced production technologies, based on Institute-supported research, for the purpose of demonstrations and technology transfer applications;

(2) the active transfer and dissemination of research findings and Center expertise to a wide range of companies and enterprises, particularly small and medium-sized manufacturers; and

(3) the facilitation of collaborations and partnerships between small and medium-sized manufacturers and companies and community colleges and area career and technical education schools to help such colleges and schools better understand the specific needs of manufacturers and help manufacturers understand the skill sets that students learn in the programs offered by such centers and schools.

‘‘(c) OPERATING AGREEMENT.—

‘‘(1) GENERAL.—The Secretary may provide financial support to any Center created under subsection (a). The Secretary may not provide financial support to any Center unless the Secretary determines that the cost of the financial support provided to such Center shall be matched by the total of 50 percent of the capital and annual operating and maintenance funds required to create and maintain such Center.

‘‘(2) REGULATIONS.—The Secretary shall implement, review, and update the sections of the Code of Federal Regulations related to this section at least once every 3 years.

‘‘(3) APPLICATION.—

(A) IN GENERAL.—Nonprofit institutions, or consortium thereof, or State or local government, may submit to the Secretary an application for financial support under this section, in accordance with the procedures established by the Secretary.

(B) COST SHARING.—In order to receive assistance under this section, financial assistance under subparagraph (A) shall provide adequate assurances that non-Federal assets obtained from the applicant and the applicant’s partners will be used as a funding source to meet not less than 50 percent of the costs incurred. For purposes of the preceding sentence, the costs incurred means the costs incurred in connection with the activities undertaken to improve the competitiveness, management, productivity, and technological performance of small and medium-sized manufacturing companies.

(C) AGREEMENTS WITH OTHER ENTITIES.—In meeting the 50 percent requirement, it is anticipated that a Center will enter into agreements with other entities such as private industry, institutions of higher education, and State governments to accomplish programmatic objectives and access new and existing resources that will further the impact of the Federal investment made on behalf of small and medium-sized manufacturing companies.

(D) LEGAL RIGHTS.—Each applicant under subparagraph (A) shall also submit a proposal for the allocation of the legal rights associated with any invention which may result from the proposed Center’s activities.

(E) MERIT REVIEW.—The Secretary shall select each such application to merit review. In making a decision whether to approve such application and provide financial support under this section, the Secretary shall consider, at a minimum, the following:

(A) The merit of the application, particularly the portion of the application regarding technology transfer, training and education, and adaptation of manufacturing technologies to the needs of particular industrial sectors.

(B) The geographical area served by the applicant.

(C) Geographical diversity and extent of service area.

(D) The percentage of funding and amount of in-kind commitment from other sources.

(E) EVALUATION.—

(A) IN GENERAL.—Each Center that receives financial assistance under this section shall be evaluated during its third year of operation by an evaluation panel appointed by the Secretary.

(B) COMPOSITION.—Each such evaluation panel shall be composed of none of whom shall be connected with the involved Center, and Federal officials.

(C) CHAIR.—An official of the Institute shall chair the evaluation panel.

(D) PERFORMANCE MEASUREMENT.—Each evaluation panel shall measure the involved
Center’s performance against the objectives specified in this section.

“(E) POSITIVE EVALUATION.—If the evaluation is positive, the Secretary may provide continued funding under this section.

“(F) PROBATION.—The Secretary shall not provide funding unless the Center has received a positive evaluation. A Center that has not received a positive evaluation by the expiration date of the probation panel shall be placed on probation for one year, after which time the panel shall reevaluate the Center. If the Center has not addressed the deficiencies identified by the panel, or shown a significant improvement in its performance, the Director shall conduct a new competition to select an operator for the Center or may close the Center.

“(G) ADDITIONAL FINANCIAL SUPPORT.—After the sixth year, a Center may receive additional financial support under this section if it has received a positive evaluation through an independent review, under procedures established by the Institute.

“(H) EIGHT-YEAR REVIEW.—A Center shall undergo an independent review in the 8th year of operation. Each evaluation panel shall measure the Center against the objectives specified in this section. A Center that has not received a positive evaluation as a result of an independent review shall be notified by the Program in its determination of whether the Center shall be placed on probation for one year, after which time the Program shall reevaluate the Center. If the Center has not addressed the deficiencies identified by the panel, or shown a significant improvement in its performance, the Director shall conduct a new competition to select an operator for the Center consistent with the plan required in this Act. Incumbent Center operators in good standing shall be eligible to compete for the new award.

“(I) RECOMPETITION.—If a recipient of a Center award has received financial assistance for 10 consecutive years, the Director shall conduct a new competition to select an operator for the Center consistent with the plan required in this Act. The incumbent operator in good standing shall be eligible to compete for the new award.

“(J) REPORTS.—Not later than 180 days after the date of enactment of the America COMPETES Reauthorization Act of 2015, the Director shall transmit to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a plan as to how the Institute will conduct reviews, assessments, and reappointment competitions under this paragraph.

“(K) INDEPENDENT ASSESSMENT.—The Director shall contract with an independent organization to perform an assessment of the implementation of the reappointment competition process under this paragraph within 3 years after the transmittal of the report under clause (i). The organization conducting the assessment under this clause may consult with the MEP Advisory Board.

“(L) COMPARISON OF CENTERS.—Not later than 180 days after the date of enactment of the America COMPETES Reauthorization Act of 2015, the Director shall transmit to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a report providing information on the first and second years of operations for centers operating under predecessor awards or constraints as compared to longstanding centers. The report shall provide detail on the engagement in services provided by Centers and the characteristics of the participants, including volume and type of services, so that the Committees can evaluate whether the cost-sharing ratio has an effect on the services provided at Centers.

“(M) PROVISIONS OF chapter 18 of title 35, United States Code, shall apply, to the extent not inconsistent with this section, to the promotion of technology from research by Centers under this section except for contracts for such specific technology extension or transfer services as may be specified by statute or by the Director.

“(N) PROTECTION OF CENTER CLIENT CONFIDENTIAL INFORMATION.—Section 552 of title 5, United States Code, shall apply to the following, in addition to any other program of the Federal Government on a confidential basis in connection with the activities of any participant involved in the Hollings Manufacturing Extension Partnership:

“(1) In general.—In discharging its duties under this subsection, the MEP Advisory Board shall function solely in an advisory capacity, in consultation with the Federal Advisory Committee Act.

“(2) EXCEPTION.—Section 14 of the Federal Advisory Committee Act shall not apply to the MEP Advisory Board.

“(O) REPORT.—The MEP Advisory Board shall transmit an annual report to the Secretary for submission to Congress under the submission of the President’s annual budget request in each year. Such report shall address the status of the program established under this section and comment on the relevant sections of the programmatic planning document and updates thereto transmitted to Congress by the Director under subsections (c) and (d) of section 33.

“(P) COMPETITIVE GRANT PROGRAM.—

“(1) ESTABLISHMENT.—The Director shall establish, within the Hollings Manufacturing Extension Partnership, a program of competitive awards among participants described in paragraph (2) for the purposes described in paragraph (3).

“(2) PARTICIPANTS.—Participants receiving awards under this subsection shall be the Centers, or a consortium of such Centers.

“(3) PURPOSE.—The purpose of the program under this subsection is to add capabilities to the Hollings Manufacturing Extension Partnership, including the development of projects to solve new or emerging manufacturing problems and to enhance by the Director, in consultation with the Director of the Hollings Manufacturing Extension Partnership program, the MEP Advisory Board, and small and medium-sized manufacturer associations, small and medium-sized manufacturers from effectively competing in the global marketplace.

“(Q) SMALL MANUFACTURERS.—The Director shall—

“(1) evaluate obstacles that are unique to small manufacturers from effectively competing in the global market;

“(2) promote the transfer and commercialization of research and technology from institutions of higher education, national laboratories, and nonprofit research institutions.

“(R) PROGRAM CONTRIBUTION.—Recipients of awards under this subsection shall be required to provide a matching contribution.

“(S) GLOBAL MARKETPLACE PROJECTS.—In making awards under this subsection, the Director, in consultation with the MEP Advisory Board and the Secretary, may take into consideration whether an application has significant potential for enhancing the competitiveness of small and medium-sized United States manufacturers in the global marketplace.

“(T) DURATION.—Awards under this subsection shall be required to provide a matching contribution.

“(U) EVALUATION OF OBSTACLES UNIQUE TO SMALL MANUFACTURERS.—The Director shall—

“(1) evaluate obstacles that are unique to small manufacturers from effectively competing in the global market;
“(2) implement a comprehensive plan to train the Centers to address such obstacles; and
“(3) facilitate improved communication between the Centers to assist such manufacturers in implementing any appropriate, targeted solutions to such obstacles.

“(b) DEFINITIONS.—In this section—
“(1) the term ‘career and technical education school’ has the meaning given such term in section 3 of the Carl D. Perkins Career and Technical Education Improvement Act of 2002 (20 U.S.C. 2232); and
“(2) the term ‘community college’ means an institution of higher education (as defined under section 101(a) of the Higher Education Act of 1965 (20 U.S.C. 1001(a))) at which the highest degree that is predominately awarded to students is an associate’s degree.’’.

SEC. 409. ELIMINATION OF OBSCURE TERMS.
Section 28 of the National Institute of Standards and Technology Act (15 U.S.C. 278n) is amended—

(1) by striking subsection (j); and

(2) in subsection (k),—

(A) in paragraph (3), by inserting ‘‘and’’ after the semicolon at the end; and

(B) in paragraph (4)(B), by striking ‘‘;’’ and, at the end, by striking ‘‘; and’’.

SEC. 410. MODIFICATIONS TO GRANTS AND COOP- ERATIVE AGREEMENTS.
Section 804 of the Gordon–Wyler Technology Innovation Act of 1989 (15 U.S.C. 3706(a)) is amended by striking ‘‘The total amount of any such grant or cooperative agreement may not exceed 75 percent of the total cost of the program.’’.

SEC. 411. INFORMATION SYSTEMS STANDARDS CONSULTATION.
Section 20(c)(1) of the National Institute of Standards and Technology Act (15 U.S.C. 278q–

3(c)(1)) is amended by striking ‘‘the National Security Agency.’’

SEC. 412. UNITED STATES-ISRAELI COOPERATION.
It is the Sense of Congress that—

(1) partnerships that facilitate basic scientific research between the United States and Israel advance technology development, innovation, and commercialization leading to growth in various sectors, including manufacturing, and creating benefits for both nations;

(2) joint research and development agreements carried out through government organizations like the National Institute of Standards and Technology support these efforts;

(3) collaboration between the United States and Israel that further the basic scientific enterprise should be encouraged; and

(4) the National Institute of Standards and Technology continue to facilitate scientific collaborations between Israel and United States’ technical agencies working in measurement science and standardization.

TITLE V—DEPARTMENT OF ENERGY SCIENCE
SEC. 501. MISSION.
Section 209 of the Department of Energy Organization Act (42 U.S.C. 7139) is amended by adding the following:

“(e) MISSION.—The mission of the Office of Science shall be the delivery of scientific discoveries, capabilities, and major scientific tools to transform our understanding of nature and to advance the energy, economic, and national security of the United States. In support of this mission, the Director shall carry out programs on basic and applied scientific research, accelerated scientific computing research, high energy physics, biological and environmental research, fusion energy sciences, and nuclear physics, including as provided for in section V of the America COMPETES Reauthorization Act of 2010, through activities focused on—

(1) fundamental scientific discoveries through the study of matter and energy;

(2) science in the national interest, includ-
SEC. 505. BIOLOGICAL AND ENVIRONMENTAL RESEARCH.

(a) PROGRAM.—The Director shall carry out a research program on the fundamental constituents of matter and energy and the nature of space and time.

(b) SENSE OF CONGRESS.—It is the sense of the Congress that—

(1) in general.—The Director shall conduct a coordinated research program to develop exascale computing systems to advance the missions of the Department.

(2) execution.—The Secretary shall, through competitive merit review, establish two or more National Laboratory-industry-university partnerships to conduct integrated research, development, and engineering of multiple exascale systems.

(3) administration.—In carrying out this program, the Secretary shall—

(A) carry out the program on a competitive, merit-reviewed basis, access for researchers in United States industry, institutions of higher education, National Laboratories, and other Federal agencies to these exascale systems, as appropriate; and

(B) conduct outreach programs to increase the readiness for the use of such platforms by domestic industries, including manufacturers.

(4) report.—The Secretary shall submit to Congress, not later than 90 days after the date of enactment of this Act, a report detailing in the areas of biological systems and climate and environmental science to support the energy and environmental missions of the Department.

(b) PRIORITY RESEARCH.—In carrying out this section, the Director shall prioritize fundamental research on biological systems and genomics science with the greatest potential to enable scientific discovery.

(c) ASSESSMENT.—Not later than 12 months after the date of enactment of this Act, the Director shall submit to Congress a report assessing the current status and development of a long-term strategy for low-dose radiation research. Such report shall include—

(1) in general.—The study shall be conducted in coordination with the National Academies to conduct a study assessing the current status and development of a long-term strategy for low-dose radiation research. Such study shall include—

(A) an assessment of the overlap or duplication of existing low-dose radiation research and shall leverage the findings of such study for low-dose radiation research shall be carried out through the Office of Science without making a determination that such work is unique and not duplicative of work by other agencies.

(b) Low Dose Radiation Research Program.

(1) in general.—The Department shall carry out a research program on low dose radiation. The purpose of the program is to enhance the scientific understanding of and reduce uncertainties associated with the effects of exposure to low dose radiation in order to inform improved risk management methods.

(2) Study.—Not later than 60 days after the date of enactment of this Act, the Secretary shall request—

(A) an agreement with the National Academies to conduct a study assessing the current status and development of a long-term strategy for low-dose radiation research. Such study shall include—

(B) an assessment of the current status, and development of a long-term strategy for low-dose radiation research. Such study shall include—

(C) an assessment of the current status and development of a long-term strategy for low-dose radiation research. Such study shall include—

(d) Dark Energy and Dark Matter Research.

As part of the program described in subsection (a), the Director shall carry out research activities on dark energy and dark matter, which may include collaborations with the National Science Foundation or international collaborations.

(e) Accelerator Research and Development.

The Director shall carry out research and development focused on accelerator concepts and technologies, including laser technologies, to reduce the necessary scope and cost for the next generation of particle accelerators. The Director shall ensure access to national laboratory accelerator facilities, infrastructure, and technology for users and developers of accelerators that advance applications in energy and the environment, medicine, industry, national security, and discovery science.

(f) International Collaboration.

The Director shall, in coordination with other appropriate Federal agencies as necessary, ensure the access of United States researchers to the most advanced accelerator facilities and research capabilities in the world, including the Large Hadron Collider.
shall deliver to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a 5-year research plan that builds on the study’s findings and recommendations and identifies and prioritizes research needs.

4. **DEFINITION.**—In this subsection, the term ‘low dose’ means a radiation dose of less than 100 millisieverts.

5. **RULE OF CONSTRUCTION.**—Nothing in this subsection shall be construed to subject any research funded by the Director under the research program under this subsection to any limitations described in section 977(e) of the Energy Policy Act of 2005 (42 U.S.C. 16317(e)).

SEC. 409. DOMESTIC MANUFACTURING.

(a) **PROGRAM.**—The Director shall carry out a program of experimental and theoretical research and support associated facilities, to discover, explore, and understand all forms of nuclear matter.

(b) **ISOPODE DEVELOPMENT AND PRODUCTION FOR RESEARCH APPLICATIONS.**—The Director shall carry out a program for the production of isotopes, including the development of technologies to produce isotopes, that the Secretary determines are needed for medical, industrial, or other purposes. In making this determination, the Secretary shall—

1. ensure that, as has been the policy of the United States to play a leadership role in the international fusion research community, Fusion energy concepts and activities explored under this paragraph shall be consistent with the scientific and technical basis for fusion, providing research resources.

2. ensure that activities undertaken pursuant to this section, to the extent practicable, promote the growth of a robust domestic isotope production industry; and

3. consider any relevant recommendations made by the National Academies, and interagency working groups in which the Department participates.

SEC. 508. SCIENCE LABORATORIES INFRASTRUCTURE PROGRAM.

(a) **PROGRAM.**—The Director shall carry out a program to improve the safety, efficiency, and mission readiness of infrastructure at Office of Science laboratories. The program shall include projects to—

1. renovate or replace space that does not meet research needs;

2. replace facilities that are no longer cost effective to renovate or operate;

3. modernize utility systems to prevent failures; and

4. remove excess facilities to allow safe and efficient operations; and

(b) **APPROACH.**—In carrying out this section, the Director shall utilize all available approaches and mechanisms, including capital line items, minor construction projects, energy savings performance contracts, utility energy service contracts, alternative financing, and expense funding, as appropriate.

SEC. 509. DOMESTIC MANUFACTURING.

Not later than 1 year after the date of enactment of this Act, the Secretary shall submit to Congress a report providing an assessment of—

1. the most recent schedule for ITER that has been approved by the ITER Council; and

2. progress of the ITER Council and the ITER program toward implementation of the recommendations of the Third Biennial International Organization Management Assessment Report.

**REPORTS IN COMPETITION FOR SOLICITATIONS FOR INTERNATIONAL PROJECT ACTIVITIES.**—Section 33 of the Atomic Energy Act of 1954 (42 U.S.C. 2053) is amended by adding at the end the following paragraph: ‘‘Notwithstanding the purposes of this section with respect to international research projects, the term ‘private facilities or laboratories’ shall refer to facilities or laboratories located in the United States.’’

**SENSE OF CONGRESS.**—It is the sense of Congress that the United States should support a robust, diverse fusion program. It is further the sense of Congress that developing the scientific basis for fusion, providing research results key to the success of ITER, and training the next generation of fusion scientists are of critical importance to the United States and should in no way be diminished by participation of the United States in the ITER project.

(d) **INITIAL FUSION ENERGY RESEARCH AND DEVELOPMENT PROGRAM.**—The Director shall carry out a program of research and technology development in inertial fusion for energy applications, including ion beam, laser, and pulsed power fusion systems.

(e) **ALTERNATIVE AND ENABLING CONCEPTS.**—

1. **IN GENERAL.**—As part of the program described in paragraph (a), the Secretary shall—

(a) carry out a program of research and development activities and facility operations at United States universities, national laboratories, and private facilities for a portfolio of alternative and enabling fusion energy concepts that may provide solutions to significant challenges to the establishment of a commercial magnetic fusion power plant, providing results for United States to play a leadership role in the international fusion research community.

(b) identify priorities for the development of non-tokamak confinement configurations operating at low magnetic fields;

(c) assess the potential for any fusion energy concept supported by ARPA-E to represent a promising approach to a commercially viable fusion power plant;

(d) determine whether the results of any fusion energy concept supported by ARPA-E merit the support of follow-on research activities carried out by the Office of Science; and

(e) avoid unintentional duplication of activities.

(f) **GENERAL PLASMA SCIENCE AND APPLICATIONS.**—Not later than 2 years after the date of enactment of this Act, the Secretary shall provide to Congress an assessment of opportunities in which the United States can provide world-leading contributions to advancing plasma science and non-fusion energy applications, and identify opportunities for partnering with other Federal agencies both within and outside of the Department of Energy.

(g) **IDENTIFICATION OF PRIORITIES.**—

1. **REPORT.**—Not later than 2 years after the date of enactment of this Act, the Secretary shall transmit to Congress a report on the Department’s proposed fusion energy research and development activities over the following 10 years under at least 3 realistic budget scenarios, including a scenario based on 3 percent annual growth in the FY2016-FY2026 portion of the budget for fusion energy research and development activities.

2. **REPORT.**—Not later than 2 years after the date of enactment of this Act, the Secretary shall—

(a) identify specific areas of fusion energy research and development activities in which the United States can and should establish or solidify a lead in the global fusion energy development effort;

(b) identify priorities for initiation of facility construction and facility decommissioning under each of those scenarios; and

(c) assess the ability of the United States fusion workforce to carry out the activities identified in subparagraphs (A) and (B), including the adequacy of college and university programs to train the leaders and workers of the next generation of the ITER fusion generation.

2. **PROCESS.**—In order to develop the report required under paragraph (1), the Secretary shall leverages any costs and lessons learned from the ITER project. The most recent report of the Particle Physics Project Prioritization Panel of the High Energy Physics Advisory Panel. No member of the Fusion Energy Sciences Advisory Committee shall be excluded from participating in developing or voting on final approval of the report required under this section.
(7) $113,600,000 shall be for Science Laboratories Infrastructure; (8) $181,000,000 shall be for Science Program Directions; (9) $103,000,000 shall be for Safeguards and Security; and (10) $20,500,000 shall be for Workforce Development for Teachers and Scientists.

(b) FISCAL YEAR 2017.—There are authorized to be appropriated to the Secretary for the Office of Science for fiscal year 2017 $5,339,800,000, of which—

(1) $1,850,000,000 shall be for Basic Energy Science; (2) $788,000,000 shall be for High Energy Physics; (3) $550,000,000 shall be for Biological and Environmental Research; (4) $2,700,000 shall be for Nuclear Physics; (5) $621,000,000 shall be for Advanced Scientific Computing Research; (6) $480,000,000 shall be for Fusion Energy Sciences; (7) $112,600,000 shall be for Science Laboratories Infrastructure; (8) $181,000,000 shall be for Science Program Directions for Teachers and Scientists.

SEC. 611. DISTRIBUTED ENERGY AND ELECTRIC INFRASTRUCTURE.

Section 921 of the Energy Policy Act of 2005 (42 U.S.C. 16211) is amended to read as follows:

“SEC. 921. DISTRIBUTED ENERGY AND ELECTRIC ENERGY SYSTEMS.

“(a) In general.—The Secretary shall carry out programs of research, development, demonstration, and commercial application on distributed energy resources and systems reliability and efficiency, to improve the reliability and efficiency of the distribution of energy resources and systems, integrating advanced energy technologies with grid connectivity, including activities described in this subtitle. The programs shall address activities within the Department to promote collaboration and crosscutting approaches, throughout the Department to promote collaboration and crosscutting approaches, including activities of the Department in a strategic framework that takes into account the frontiers of science to which the Department can contribute, pursuant to the Secretary's plans and determinations as provided by the Department’s statutory missions, and global energy dynamics.

“(b) OBJECTIVES.—To the maximum extent practicable, the Secretary shall seek to—

“(1) leverage existing programs; 

“(2) consolidate and coordinate activities throughout the Department to promote collaboration and crosscutting approaches; 

“(3) ensure activities are undertaken in a manner that does not duplicate other activities within the Department or other Federal Government activities; and 

“(4) identify programs that may be more effectively left to the States, industry, nongovernmental organizations, institutions of higher education, or other stakeholders.”.

SEC. 612. ELECTRIC TRANSMISSION AND DISTRIBUTION RESEARCH AND DEVELOPMENT

(a) AMENDMENTS.—Section 925 of the Energy Policy Act of 2005 (42 U.S.C. 16215) is amended—

(1) by amending the section heading to read as follows: “ELECTRIC TRANSMISSION AND DISTRIBUTION RESEARCH AND DEVELOPMENT”; and

(2) by amending subsection (a) to read as follows:

“(a) PROGRAM.—The Secretary shall establish a comprehensive research, development, and demonstration program to ensure the reliability, efficiency, and environmental integrity of electrical transmission and distribution systems, which shall include innovations for—

“(A) enhanced electric energy generation, transmission, distribution, or storage systems; 

“(B) integration of power systems, including systems to deliver high-quality electric power, electric power reliability, and combined heat and power; 

“(C) supply of electricity to the power grid by small scale, distributed, and residential-based power generators; 

“(D) development and use of advanced grid design, operation, and planning tools; and 

“(E) any other infrastructure technologies, as appropriate.”.

(3) by amending subsection (c) to read as follows:

“(c) IMPLEMENTATION.—

“(1) CONSORTIUM.—The Secretary shall consider implementing the program under this section using a consortium of participants from industry, institutions of higher education, and National Laboratories.

“(2) OBJECTIVES.—To the maximum extent practicable the Secretary shall seek to—

“(A) leverage existing programs; and 

“(B) consolidate and coordinate activities, throughout the Department to promote collaboration and crosscutting approaches; 

“SEC. 994. STRATEGY FOR FACILITIES AND INFRASTRUCTURE.

(a) AMENDMENTS.—Section 993 of the Energy Policy Act of 2005 (42 U.S.C. 16337) is amended—

(1) by amending the section heading to read as follows: “SEC. 993. STRATEGY FOR FACILITIES AND INFRASTRUCTURE”; and

(2) in subsection (b), by striking “2008” and inserting “2018”.

(b) TABLE OF CONTENTS AMENDMENT.—The item relating to section 993 in the table of contents of the Energy Policy Act of 2005 is amended to read as follows:

“Sec. 993. Strategy for facilities and infrastructure.”.

Subtitle B—Electricity Delivery and Energy Reliability Research and Development

SEC. 611. DISTRIBUTED ENERGY AND ELECTRIC INFRASTRUCTURE.

Section 921 of the Energy Policy Act of 2005 (42 U.S.C. 16211) is amended to read as follows:

“SEC. 921. DISTRIBUTED ENERGY AND ELECTRIC INFRASTRUCTURE.

“(a) In general.—The Secretary shall carry out programs of research, demonstration, and commercial application on distributed energy resources and systems reliability and efficiency, to improve the reliability and efficiency of the distribution of energy resources and systems, integrating advanced energy technologies with grid connectivity, including activities described in this subtitle. The programs shall address activities within the Department to promote collaboration and crosscutting approaches, throughout the Department to promote collaboration and crosscutting approaches, including activities of the Department in a strategic framework that takes into account the frontiers of science to which the Department can contribute, pursuant to the Department’s statutory missions, and global energy dynamics.

“(b) OBJECTIVES.—To the maximum extent practicable, the Secretary shall seek to—

“(1) leverage existing programs; and 

“(2) consolidate and coordinate activities throughout the Department to promote collaboration and crosscutting approaches; 

“(3) ensure activities are undertaken in a manner that does not duplicate other activities within the Department or other Federal Government activities; and 

“(4) identify programs that may be more effectively left to the States, industry, nongovernmental organizations, institutions of higher education, or other stakeholders.”.

SEC. 994. STRATEGY FOR FACILITIES AND INFRASTRUCTURE.
“(C) ensure activities are undertaken in a manner that does not duplicate other activities within the Department or other Federal Government activities; and
“(D) a fuel cycle research, development, demonstration, and commercial application program to advance nuclear power systems as well as technologies to sustain currently deployed systems.

2. CONCLUSIONS.—The item relating to section 925 in the table of contents of the Energy Policy Act of 2005 is amended to read as follows:

‘‘Sec. 925. Electric transmission and distribution research and development.’’

Subtitle C—Nuclear Energy Research and Development

SEC. 621. OBJECTIVES.
Section 953 of the Energy Policy Act of 2005 (42 U.S.C. 16271) is amended—

(1) by adding subsection (a) to read as follows:

“(a) IN GENERAL.—The Secretary shall conduct programs of civilian nuclear energy research, development, demonstration, and commercialization to enhance activities described in this subtitle. Such programs shall take into consideration the following objectives:

(1) Enhancing nuclear power’s viability as part of our energy portfolio;

(2) Reducing used fuel nuclear and fuel cycle waste products generated by nuclear energy programs;

(3) Supporting technological advances in areas that industry by itself is not likely to undertake because of technical and financial uncertainties.

(4) Providing the technical means to reduce the likelihood of nuclear proliferation.

(5) Maintaining a cadre of nuclear scientists and engineers.

(6) Establishing a National Laboratory and university nuclear programs, including their infrastructure.

(7) Encouraging both individual researchers and multidisciplinary teams of researchers to pioneer new approaches in nuclear energy, science, and technology.

(8) Developing, planning, constructing, acquiring, and operating special equipment and facilities for the use of researchers.

(b) Supporting technology transfer and other appropriate activities to assist the nuclear energy industry, and other users of nuclear science and engineering, including activities addressing availability, productivities, component aging, safety, and security of nuclear power plants.

(c) Reducing the environmental impact of nuclear energy activities.

(d) Researching and developing technologies and processes to meet Federal and State requirements and standards for nuclear power systems.

(2) by striking subsection (b) through (d); and

(3) by redesignating subsection (e) as subsection (b).

SEC. 622. PROGRAM OBJECTIVES STUDY.
Section 953 of the Energy Policy Act of 2005 (42 U.S.C. 16271) is further amended by adding at the end the following new subsection:

“(e) PROGRAM OBJECTIVES STUDY.—In furtherance of the program objectives listed in subsection (a) of this section, the Government Accountability Office shall, within one year after the date of enactment of this section, transmit to the Congress a report on the results of a study on the scientific and technical merit of major Federal and State requirements and standards, including moratoria, that delay or impede the further development and commercialization of a nuclear power, and how the Department can assist in overcoming such delays or impediments.”.

SEC. 623. NUCLEAR ENERGY RESEARCH AND DEVELOPMENT PROGRAMS.
Section 952 of the Energy Policy Act of 2005 (42 U.S.C. 16272) is amended by striking sections (c) through (e) and inserting the following:

“(c) REACTOR CONCEPTS.—

(1) IN GENERAL.—The Secretary shall carry out a program of reactor development, demonstration, and commercial application to advance nuclear power systems as well as technologies to sustain currently deployed systems.

(2) CONSULTATION.—In conducting the program under this subsection, the Secretary shall examine advanced reactor designs and nuclear technologies, including those that—

(A) have higher efficiency, lower cost, and improved safety compared to reactors in operation as of the date of enactment of the America COMPETES Reauthorization Act of 2010;

(B) utilize passive safety features;

(C) minimize proliferation risks;

(D) substantially reduce production of high-level waste per unit of output;

(E) increase the life and sustainability of reactor systems currently deployed;

(F) use improved instrumentation;

(G) are capable of producing large-scale quantities of hydrogen or process heat;

(H) minimize water usage or use alternatives to water as a cooling mechanism; or

(II) use nuclear energy as part of an integrated energy system.

(3) INTERNATIONAL COOPERATION.—In carrying out the program under this subsection, the Secretary shall seek opportunities to enhance the progress of the program through international cooperation, such arrangements as the Generation IV International Forum or any other international collaboration the Secretary considers appropriate.

(4) EXCEPTIONS.—No funds authorized to be appropriated to carry out the activities described in this subsection shall be used to fund the activities authorized under sections 641 through 645.”.

SEC. 624. SMALL MODULAR REACTOR PROGRAM.
Section 952 of the Energy Policy Act of 2005 (42 U.S.C. 16272) is amended by adding at the end the following new subsection:

“(d) SMALL MODULAR REACTOR PROGRAM.—

(1) IN GENERAL.—The Secretary shall carry out a small modular reactor program to promote research, development, demonstration, and commercial application of small modular reactors, including through cost-shared projects for commercial application of reactor systems designs.

(2) CONSULTATION.—The Secretary shall consult with and utilize the expertise of the Secretary of the Navy in establishing and carrying out such program.

(3) ADDITIONAL ACTIVITIES.—Activities may also include development of advanced computer modeling and simulation tools, by Federal and non-Federal entities, which demonstrate and validate new design capabilities of innovative small modular reactor designs.

(4) DEFINITION.—For the purposes of this subsection, the term ‘‘small modular reactor’’ means a nuclear reactor meeting generally accepted industry standards—

(A) with a rated capacity of less than 300 megawatts electric;

(B) with respect to which most parts can be factory assembled and shipped as modules to a reactor plant site for assembly; and

(C) that can be constructed and operated in combination with similar reactors at a single site.”.

SEC. 625. FUEL CYCLE RESEARCH AND DEVELOPMENT PROGRAMS.
(a) AMENDMENTS.—Section 953 of the Energy Policy Act of 2005 (42 U.S.C. 16273) is amended—

(1) in the section heading by striking ‘‘ADVANCED RECYCLING AND CROSSCUTTING ACTIVITIES’’ and inserting ‘‘FUEL CYCLE RESEARCH AND DEVELOPMENT’’;

(2) by striking subsection (a); and

(b) by redesignating subsections (b) through (d) as subsections (d) through (f), respectively, and—

(4) by inserting before subsection (d), as so redesignated by paragraph (3) of this subsection, the following new subsections:

“(A) in general.—The Secretary shall conduct a fuel cycle research, development, demonstration, and commercial application program to advance nuclear options that improve uranium resource utilization, reduce proliferation risks, and minimize radiotoxicity, decay heat, and mass and volume of nuclear waste to the greatest extent possible.

(B) ADVANCED TECHNOLOGIES.—Developing advanced fuel cycle storage technologies for both on-site and long-term storage that substantially prolong the effective life of current storage designs and that substantially advance nuclear waste storage technologies and methods, including repositories.

(4) FAST REACTOR.—Investigating the potential research benefits of a fast reactor user facility to conduct experiments on fuels and materials related to fuel forms and fuel cycles that will increase fuel utilization, reduce proliferation risks, and reduce nuclear waste products.

(5) ADVANCED REACTOR INNOVATION.—Developing an advanced reactor innovation testbed where national laboratories, universities, and industry can address advanced reactor design challenges to enable construction and operation of privately funded reactor prototypes to resolve technical uncertainty for United States-based designs for future domestic and international markets.

(6) OTHER TECHNOLOGIES.—Developing any other technology or initiative that the Secretary determines is likely to advance the objectives of the program.

(b) CONFORMING AMENDMENT.—The item relating to section 952 in the table of contents of the Energy Policy Act of 2005 is amended to read as follows:
“Sec. 958. Nuclear Energy Enabling Technologies.”

SEC. 626. NUCLEAR ENERGY ENABLING TECHNOLOGIES PROGRAM.

(a) AMENDMENT.—Subtitle E of title IX of the Energy Policy Act of 2005 (42 U.S.C. 16271 et seq.) is amended by adding at the end the following new section:

“Sec. 958. Nuclear Energy Enabling Technologies.”

“(a) IN GENERAL.—The Secretary shall conduct a program to support the integration of activities within and across the reactor concepts research, development, demonstration, and commercial application program under section 952(c) and the fuel cycle research and development program under section 953, and support crosscutting nuclear energy concepts. Activities commenced under this section shall be concentrated on broadly applicable research and development focus areas.

“(b) ACTIVITIES.—Activities conducted under this section may include research involving—

“(1) advanced reactor materials;
“(2) advanced radiation mitigation methods;
“(3) advanced proliferation and security risk assessment methods;
“(4) advanced sensors and instrumentation;
“(5) computational analysis and simulation modeling, including multiphysics, multidimensional modeling simulation for nuclear energy systems, and continued development of advanced modeling simulation tools through national laboratories, industry, and university partnerships for operations and safety performance improvements of light water reactors for currently deployed and near-term reactors and advanced reactors; and for the development of small modular reactors; and
“(6) any crosscutting technology or transformational concept aimed at establishing substantial and revolutionary advancements in the performance of future nuclear energy systems that the Secretary considers relevant and appropriate pursuant to this section.

“(c) REPORT.—The Secretary shall submit, as part of the annual budget submission of the Department, a report on the activities of the program conducted under this section, which shall include a brief evaluation of each activity’s progress.

E CONFORMING AMENDMENT.—The table of contents of the Energy Policy Act of 2005 is amended by adding at the end of the items for subtitle E of title IX the following new item:

“Sec. 958. Nuclear energy enabling technologies.”

SEC. 627. TECHNICAL STANDARDS COLLABORATION.

(a) IN GENERAL.—The Director of the National Institute of Standards and Technology, in consultation with the National Technology and a representative from a private sector, regional, or international effort on nuclear energy standards, shall conduct a program to support the integration of activities involved in the development or application of nuclear energy-related standards.

(b) MEMBERSHIP.—

(1) IN GENERAL.—The technical standards committee shall include representatives from appropriate Federal agencies and the private sector, and be open to materially affected organizations involved in the development or application of nuclear energy-related standards.

(c) DUTIES.—The technical standards committee shall be co-chaired by a representative from the National Institute of Standards and Technology and a representative from a private sector organization.

SEC. 628. AVAILABLE FACILITIES DATABASE.

The Secretary shall prepare a database of non-Federal user facilities receiving Federal funds that may be used for unclassified nuclear energy research. The Secretary shall make the database accessible on the Department’s website.

SEC. 629. NUCLEAR WASTE DISPOSAL.

To the extent consistent with the requirements of current law, the Secretary shall be responsible for disposal of high-level radioactive waste or spent nuclear fuel generated by reactors under the programs authorized in this subtitle, and the amendment made by this subtitle.

SEC. 630. SAFETY AND SECURITY.

Subtitle D—Energy Efficiency and Renewable Energy Research and Development

SEC. 641. ENERGY EFFICIENCY.

Section 911 of the Energy Policy Act of 2005 (42 U.S.C. 16191) is amended to read as follows:

“SEC. 911. ENERGY EFFICIENCY.

“(a) OBJECTIVES.—The Secretary shall conduct programs of energy efficiency research, development, demonstration, and commercial application, including activities described in this subtitle. Such programs shall prioritize activities that industry by itself is not likely to undertake because of technical challenges or regulatory uncertainty that may be taken into consideration the following objectives:

“(1) Increasing energy efficiency.
“(2) Reducing the cost of energy.
“(3) Reducing the environmental impact of energy-related activities.
“(b) PROGRAMS.—Programs under this subtitle shall include research, development, demonstration, and commercial application, including activities described in this subtitle. Such programs shall prioritize discovery research and development and take into consideration the following:

“(1) Innovative, affordable technologies to improve the energy efficiency and environmental performance of vehicles, including weight and drag reduction technologies, technologies, modeling, and simulation for increasing vehicle connectivity and automation, and whole-vehicle design optimization;
“(2) cost-effective technologies, for new construction and retrofit, to improve the energy efficiency and environmental performance of buildings, using a whole-buildings approach.
“(3) Programs to improve the energy efficiency, environmental performance, and process efficiency of energy-intensive and waste-intensive industries;
“(4) technologies to improve the energy efficiency of appliances and mechanical systems for buildings in extreme climates, including cogeneration, trigeneration, and polygeneration units;
“(5) advanced battery technologies; and
“(6) fuel cell and hydrogen technologies.”.

SEC. 642. NEXT GENERATION LIGHTING INITIATIVE.

Section 912 of the Energy Policy Act of 2005 (42 U.S.C. 16192) is amended by striking the item relating thereto in the table of contents of this Act and repealing the section.

SEC. 643. BUILDING STANDARDS.

SEC. 644. SECONDARY ELECTRIC VEHICLE BATTERY USE PROGRAM.

Section 915 of the Energy Policy Act of 2005 (42 U.S.C. 16195) and the item relating thereto in the table of contents of this Act are repealed.

SEC. 645. NETWORK FOR MANUFACTURING INNOVATION PROGRAM.

To the extent provided for in advance by appropriations Acts, the Secretary may transfer to the National Institute of Standards and Technology up to $150,000,000 for the period encompassing fiscal years 2015 through 2017 from amounts appropriated for advanced manufacturing research and development under this chapter and the amendments made by this Title to carry out the Network for Manufacturing Innovation Program, authorized under section 34 of the National Institute of Standards and Technology Act (15 U.S.C. 276a).

SEC. 646. ADVANCED ENERGY TECHNOLOGY TRANSFER CENTERS.

Section 917 of the Energy Policy Act of 2005 (42 U.S.C. 16197) is amended—

(A) by inserting “and” at the end of paragraph (2); (B) by striking “;” and “at the end of paragraph (3) and inserting a period; and
“(c) by striking paragraph (4);”.

SEC. 647. RENEWABLE ENERGY.

Section 918 of the Energy Policy Act of 2005 (42 U.S.C. 16199) is amended to read as follows:

“SEC. 918. RENEWABLE ENERGY.

“(a) IN GENERAL.—

“(1) OBJECTIVES.—The Secretary shall conduct programs of renewable energy research, development, demonstration, and commercial application, including activities described in this subtitle.

“(A) Programs shall prioritize discovery research and development and take into consideration the following objectives:

“(1) Increasing the conversion efficiency of all forms of renewable energy through improved technologies.
“(2) Decreasing the cost of renewable energy generation and delivery.
“(3) Promoting the diversity of the energy supply.
“(4) Decreasing the dependence of the United States on foreign mineral resources.
“(5) Decreasing the environmental impact of renewable energy-related activities.
“(6) Decreasing the export of renewable generation technologies from the United States.
“(B) Programs shall prioritize discovery research, demonstration, and commercial application for solar energy, including innovations in—

May 20, 2015
CONGRESSIONAL RECORD — HOUSE
H3441

""Sec. 953. Fuel cycle research and development.”"
(i) photovoltaics; 
(ii) solar heating; 
(iii) concentrating solar power; 
(iv) lighting systems that integrate sunlight and electrical lighting in complement to each other; and 
(v) development of technologies that can be easily integrated into new and existing buildings.

(B) WIND ENERGY.—The Secretary shall conduct a program of research, development, demonstration, and commercial application for wind energy, including innovations in— 
(i) low speed wind energy; 
(ii) testing and verification technologies; 
(iii) energy storage and energy generation; and 
(iv) transformational technologies for harnessing wind energy.

(C) GEO THERMAL.—The Secretary shall conduct a program of consumption, demonstration, and commercial application for geothermal energy, including technologies for— 
(i) improving detection of geothermal resources; 
(ii) decreasing drilling costs; 
(iii) decreasing maintenance costs through improved materials; 
(iv) increasing the potential for other recovery sources, such as mineral production; and 
(v) increasing the understanding of reservoir life cycle and management.

(D) HYDROPOWER. The Secretary shall conduct a program of research, development, demonstration, and commercial application for technologies that enable the development of new and incremental hydropower capacity, including— 
(i) advanced technologies to enhance environmental performance and yield greater energy efficiencies; 
(ii) ocean energy, including wave energy.

(E) MISCELLANEOUS PROJECTS.—The Secretary shall carry out a program of research, development, demonstration, and commercial application programs for— 
(i) the combined use of renewable energy technologies with one another and with other energy technologies, including the combined use of renewable power and fossil technologies; 
(ii) renewable energy technologies for cogeneration of hydrogen and electricity; and 
(iii) kinetic hydro turbines.

(b) RURAL DEMONSTRATION PROJECTS.—In carrying out this section, the Secretary, in consultation with the Secretary of Agriculture, shall give priority to demonstrations that assist in delivering electricity to rural and remote locations including— 
(i) advanced renewable power technology, including combined use with fossil technologies; 
(ii) biomass; and 
(iii) geothermal energy systems.

(c) ANALYSIS AND EVALUATION.— 
(I) IN GENERAL.—The Secretary shall conduct analysis and evaluation in support of the research, demonstration, and commercial application programs under this subtitle. These activities shall be used to guide budget and program decisions, and shall include— 
(A) economic and technical analysis of renewable energy potential, including resource assessment; 
(B) analysis of past program performance, both in terms of technical advances and in market introduction of renewable energy; 
(C) assessment of domestic and international market drivers, including the impacts of any Federal, State, or local grants, loans, loan guarantees, tax incentives, statutory or regulatory requirements, or other government initiatives; and 
(D) any other analysis or evaluation that the Secretary determines appropriate.

(2) FUNDING.—The Secretary may designate up to 1 percent of the funds appropriated for carrying out this subtitle for analysis and evaluation activities under this subsection.

(3) SUBMITTAL TO CONGRESS.—This analysis and evaluation shall be submitted to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate at least 30 days before each annual budget request submitted thereto.

SEC. 648. BIOENERGY PROGRAM.

Section 932 of the Energy Policy Act of 2005 (42 U.S.C. 16232) is amended to read as follows: 

"SEC. 932. BIOPOWER PROGRAM. 

(1) PROGRAM.—The Secretary shall conduct a program of research, development, demonstration, and commercial application for bioenergy, including improvements to— 
(A) biopower energy systems; 
(B) biofuels; 
(C) bioproducts; 
(D) integrated biorefineries that may produce biopower, biofuels, and bioproducts; and 
(E) cross-cutting research and development in feedstocks.

(2) BIOFUELS AND BIOPRODUCTS.—The goals of the biofuels and bioproducts programs shall be to develop, in partnership with industry and institutions of higher education— 
(A) advanced biochemical and thermochemical conversion technologies capable of making fuels from lignocellulosic feedstocks that are price-competitive with fossil-based fuels and fully compatible with either internal combustion engine or advanced vehicles; 
(B) advanced conversion of biomass to biofuels and bioproducts as part of integrated biorefineries based on either biochemical processes, thermochemical processes, or hybrids of these processes; and 
(C) other advanced processes that will enable the development of cost-effective bioproducts, including biofuels.

(3) RETROFIT TECHNOLOGIES FOR THE DEVELOPMENT OF ETHANOL FROM CELLULOSIC MATERIALS.—The Secretary shall establish a program of research, development, demonstration, and commercial application for technologies and processes to enable biorefineries that exclusively use corn grain as a feedstock to produce ethanol to be retrofitted to accept a range of biomass, including lignocellulosic feedstock.

(4) LIMITATIONS.—None of the funds authorized for carrying out this section may be used to fund commercial biofuels production for defense purposes.

(5) DEFINITIONS.—In this section: 
(A) BIOMASS.—The term ‘biomass’ means— 
(i) any organic material grown for the purpose of being converted to energy; 
(ii) any organic byproduct of agriculture (including wastes from food production and processing that can be converted to energy); 
(iii) any waste material that can be converted to energy, is segregated from other waste materials, and is derived from— 
(I) any of the following forest-related resources: mill residues, precommercial thinnings, slash, brush, or otherwise nonmerchantable material; 
(II) wood waste materials, including waste pallets, crates, dunnage, manufacturing and construction waste (other than pressure-treated, chemically treated, or painted wood wastes), and landscape and right-of-way tree trimmings, but not including municipal solid waste, generated from the biodigester of municipal solid waste, or paper that is commonly recycled; or 
(III) solids derived from waste water treatment processes. 
(B) LIGNOCELLOUS FEEDSTOCK.—The term ‘lignocellulosic feedstock’ means any portion of 
(i) a plant or coproduct from conversion, including crops, trees, forest residues, and agricultural residues not specifically grown for food, including corn stover, rice straw, sugarcane bagasse, and 
(ii) biorefineries based on either biochemical processes, thermochemical processes, or hybrids of these processes; and 
(iii) algae.

SEC. 649. CONCENTRATING SOLAR POWER RESEARCH PROGRAM.

Section 934 of the Energy Policy Act of 2005 (42 U.S.C. 16234) and the item relating thereto in the table of contents of that Act are repealed.

SEC. 650. RENEWABLE ENERGY IN PUBLIC BUILDINGS.

Section 935 of the Energy Policy Act of 2005 (42 U.S.C. 16235) and the item relating thereto in the table of contents of that Act are repealed.

Subtitle E—Fossil Energy Research and Development

SEC. 661. FOSSIL ENERGY.

Section 961 of the Energy Policy Act of 2005 (42 U.S.C. 16236) is amended to read as follows: 

"SEC. 961. FOSSIL ENERGY. 

(a) IN GENERAL.—The Secretary shall carry out research, development, demonstration, and commercial application programs in fossil energy, including improvements to— 
(I) increasing the efficiency, effectiveness, and environmental performance of fossil energy production, upgrading, conversion, and consumption; 
(II) improving energy security; 
(III) reducing the cost of fossil energy production, generation, and delivery; 
(IV) increasing the use of fossil energy for purposes other than producing electricity; 
(V) decreasing the dependence of the United States on foreign energy supplies; 
(VI) increasing the environmental impact of energy-related activities. 
(b) OBJECTIVES.—To the maximum extent practicable, the Secretary shall seek to— 
(1) leverage existing programs; 
(2) consolidate and coordinate activities throughout the Department to promote collaboration and crosscutting approaches; 
(3) ensure activities are undertaken in a manner that does not duplicate other activities within the Department or other Federal Government activities; and 
(4) identify programs that may be more effectively left to the States, industry, nongovernmental organizations, institutions of higher education, or other stakeholders.

(c) LIMITATIONS.—None of the funds authorized for carrying out this section may be used for Fossil Energy Environmental Restoration.

(d) INSTITUTIONS OF HIGHER EDUCATION.—Not less than 20 percent of the funds appropriated for carrying out this section for each fiscal year shall be dedicated to research and development carried out at institutions of higher education.

(e) USE FOR REGULATORY ASSESSMENTS OR DETERMINATIONS.—The results of any research, development, demonstration, or commercial application projects or other activities authorized under this subtitle may not be used for regulatory assessments or determinations by Federal regulatory authorities.

(f) CONSTRAINTS AGAINST BRINGING RESOURCES TO MARKET.—Not later than 1 year after the date of enactment of the America COMPETES Reauthorization Act of 2015, the Secretary shall submit to Congress an assessment of the technical, institutional, policy, and regulatory constraints to bringing new domestic fossil energy resources to market.

(g) TECHNOLOGY CAPABILITIES.—Not later than 2 years after the date of enactment of the America COMPETES Reauthorization Act of 2015, the Secretary shall submit to Congress a long-term assessment of existing and projected technological capabilities for expanded production from domestic unconventional oil, gas, and coal reserves.

SEC. 662. COAL RESEARCH, DEVELOPMENT, DEMONSTRATION, AND COMMERCIAL APPLICATION PROGRAM.

(a) IN GENERAL.—Section 962 of the Energy Policy Act of 2005 (42 U.S.C. 16237) is amended— 
(1) in subsection (a)—
(A) in paragraph (10), by striking "and" at the end;
(B) in paragraph (11), by striking the period at the end and inserting a semicolon and (C) by adding at the end the following:
"(12) specific additional programs to address efficiency on a lower heating value basis; and
(13) the testing, including the construction of testing facilities, of high temperature materials for use in advanced systems for combustion or use of coal; and
(14) innovative applications to existing coal combustion systems designed to increase efficiency of conversion, flexibility of operation, and other modifications to address existing usage requirements.''

(2) by redesigning subsections (b) through (d) as subsections (c) through (e), respectively;
(3) by inserting after subsection (a) the following:
"(b) TRANSFORMATIONAL COAL TECHNOLOGY PROGRAM.—
(1) IN GENERAL.—As part of the program established under subsection (a), the Secretary may carry out a program designed to undertake research, development, demonstration, and commercial application of technologies, including the accomplishment of:
"(A) chemical looping technology;
"(B) supercritical carbon dioxide power generation cycles;
"(C) pyrolyzed oxycombustion, including new and retrofit technologies; and
"(D) other technologies that are characterized by the use of:
"(i) innovative energy cycles;
"(ii) thermionic devices using waste heat;
"(iii) fuel cells; and
"(iv) replacement of chemical processes with biotechnology;
"(v) nanotechnology;
"(vi) new materials in applications (other than enhanced performance (that is higher temperature and pressure), such as membranes or ceramics;
"(vii) carbon utilization, such as in construction materials, using low quality energy to reconvert back to a fuel, or manufactured food;
"(viii) advanced gas separation concepts; and
"(ix) other technologies, including—
"(I) modular, manufactured components; and
"(II) innovative production or research technologies, such as using 3-D printer systems, for the production of early research and development prototypes.
(2) COORDINATE.—In carrying out the program described in paragraph (1), the Secretary shall enter into partnerships with private entities to share the costs of carrying out the program, in order to reduce the non-Federal cost share requirement if the Secretary determines that the reduction is necessary and appropriate considering the technological risks involved in the project.; and
(4) in subsection (c) (as so redesignated by striking paragraph (1) and inserting the following:
"(1) IN GENERAL.—In carrying out programs authorized by this section, the Secretary shall identify cost and performance goals for coal-based systems that would permit the continued cost-competitive use of coal for the production of electricity, chemical feedstocks, transportation fuels, and other marketable products.
(b) ADVISORY COMMITTEE; AUTHORIZATION OF APPROPRIATIONS.—Section 963 of the Energy Policy Act of 2005 (42 U.S.C. 16290) is amended—
(1) by amending paragraph (6) of subsection (c) to read as follows:
"(6) ADVISORY COMMITTEE.—
"(A) IN GENERAL.—Subject to subparagraph (B), the Secretary shall establish an advisory committee to undertake, not less frequently than once every 5 years, a review and prepare a report on the progress being made by the Department towards the goals described in sub-subsections (a) and (b) of section 962 and subsection (b) of this section.
"(B) MEMBERSHIP REQUIREMENTS.—Members of the advisory committee established under sub-paragraph (A) shall be appointed by the Secretary; and
(2) by amending paragraph (12) as follows:
"(d) STUDY OF CARBON DIOXIDE PIPELINES.—
Not later than 1 year after the date of enactment of the America COMPETES Reauthorization Act of 2015, the Secretary shall transmit to Congress the results of a study to assess the cost and feasibility of engineering, permitting, building, maintaining, regulating, and insuring a national system of carbon dioxide pipelines.'';
 SEC. 663. HIGH EFFICIENCY GAS TURBINE RESEARCH, SEARCH AND DEVELOPMENT.
(a) IN GENERAL.—The Secretary, through the Office of Fossil Energy, shall carry out a multiyear, multiphase program of research, development, demonstration, and commercial application to innovate technologies to maximize the efficiency of gas turbines used in power generation systems.
(b) PROGRAM ELEMENTS.—The program under this section shall—
(1) support innovative engineering and designed gas turbine design for megawatt-scale and utility-scale electric power generation, including—
"(A) high temperature materials, including superalloys, coatings, and ceramics;
"(B) improved aerodynamic efficiency; and
"(C) manufacturing technology required to construct complex three-dimensional geometry parts with improved efficiency and cost;
"(D) combustion technology to produce higher firing temperature while lowering nitrogen oxide and carbon monoxide emissions per unit of output;
"(E) advanced controls and systems integration;
"(F) advanced high performance compressor technology; and
"(G) validation facilities for the testing of components and subsystems;
(2) include technology demonstration through component testing, sub-scale testing, and full scale testing in existing fleets;
(3) include field demonstrations of the developed technology elements so as to demonstrate technical and economic feasibility; and
(4) assess overall combined cycle and simple cycle system performance.
(c) PROGRAM GOALS.—The goals of the multiphase program established under subsection (a) shall be—
(1) in phase I—
"(A) to develop the conceptual design of advanced high efficiency gas turbines that can achieve at least 62 percent combined cycle efficiency or 47 percent simple cycle efficiency on a lower heating value basis; and
"(B) to develop and demonstrate the technology required for advanced high efficiency gas turbines that can achieve at least 62 percent combined cycle efficiency or 47 percent simple cycle efficiency on a lower heating value basis; and
(2) in phase II, to develop the conceptual design for advanced high efficiency gas turbines that can achieve at least 65 percent combined cycle efficiency or 50 percent simple cycle efficiency on a lower heating value basis.
(d) PROPOSALS.—Within 180 days after the date of enactment of this Act, the Secretary shall solicit grant and contract proposals from industry, universities, the National Laboratories, and other appropriate parties for conducting activities under this section. In selecting proposals, the Secretary shall emphasize—
(1) the extent to which the proposal will stimulate the creation or increased retention of jobs in the United States; and
(2) the extent to which the proposal will promote and enhance United States technology leadership.
(e) COMPETITIVE AWARDS.—The provision of funds pursuant to a proposal shall be on a competitive basis with an emphasis on technical merit.
(f) COST SHARING.—Section 508 of the Energy Policy Act of 2005 (42 U.S.C. 16352) shall apply to an award of financial assistance made under this section.
Subtitle F—Advanced Research Projects Agency-Energy
SEC. 671. ARPA-E AMENDMENTS.
Section 5021 of the America COMPETES Act (42 U.S.C. 16538) is amended—
(1) by redesigning paragraph (1) of subsection (c) to read as follows:
"(1) IN GENERAL.—The goals of ARPA-E shall be to enhance the economic and energy security of the United States and to ensure that the United States maintains a technological lead through the development of advanced energy technologies.'';
(2) in subsection (i)(1), by inserting "ARPA-E shall not provide funding for a project unless the prospective grantee demonstrates sufficient attempts to secure private financing or indicates that the project is not independently commercially viable." after "relevant research agencies.";
(4) by redesignating subsection (n) as subsection (o) and inserting after subsection (m) the following new subsection:
"(m) PROTECTION OF PROPRIETARY INFORMATION.—
"(1) IN GENERAL.—The following categories of information collected by the Advanced Research Projects Agency–Energy from recipients of institutional assistance awards shall be considered privileged and confidential and not subject to disclosure pursuant to section 552 of title 5, United States Code:
"(A) Plans for commercialization of technologies developed under the award, including business plans, technology to market plans, market studies, and cost and performance models;
"(B) Investments provided to an awardee from third parties, such as venture capital, hedge fund, or private equity firms, including amounts and percentage of ownership of the awardee provided in return for such investments;
"(C) Additional financial support that the awardee plans to invest or has invested into the technology developed under the award, or that the awardee is seeking from third parties;
"(D) Revenue from the licensing or sale of new products or services resulting from the research conducted under the award.
"(2) EFFECT OF SUBSECTION.—Nothing in this subsection affects—
"(A) the authority of the Secretary to use information without publicly disclosing such information; or
"(B) the responsibility of the Secretary to transmit information to Congress as required by law.''.
Subtitle G—Authorization of Appropriations
SEC. 681. AUTHORIZATION OF APPROPRIATIONS.
(a) ELECTRICITY DELIVERY AND ENERGY RELIABILITY RESEARCH AND DEVELOPMENT.—There are authorized to be appropriated to the Secretary for research, development, demonstration, and commercial application for electrical delivery and energy reliability technology activities within the Office of Electricity $113,000,000 for each of fiscal years 2016 and 2017.
(b) NUCLEAR ENERGY.—
(1) IN GENERAL.—There are authorized to be appropriated to the Secretary for research, development, demonstration, and commercial applications for nuclear energy technology activities within the Office of Nuclear Energy $304,600,000 for each of fiscal years 2016 and 2017.
(2) LIMITATION.—Any amounts made available pursuant to the authorization of appropriations under paragraph (1) shall not be derived from the Nuclear Waste Fund established under paragraph (1) of subsection (b) of section 5012 of the America COMPETES Act (42 U.S.C. 10222(c)).
(c) ENERGY EFFICIENCY AND RENEWABLE ENERGY.—There are authorized to be appropriated to the Secretary for research, development, demonstration, and commercial application for energy efficiency and renewable energy technology activities within the Office of Energy Efficiency and Renewable Energy $1,198,500,000 for each of fiscal years 2016 and 2017.

(d) MULTIPARTY COLLABORATIONS.—The Secretary shall prescribe, consistent with this section, regulations, rules, and guidelines for the implementation and management of those innovation, technology transfer, and commercialization activities under the jurisdiction of the Secretary; and

(e) ARPA-E.—There are authorized to be appropriated to the Secretary for the Advanced Research Projects Agency–Energy $140,000,000 for each of fiscal years 2016 and 2017.

SEC. 712. TECHNOLOGY TRANSFER AND TRANSITIONS ASSESSMENT.

Not later than 1 year after the date of enactment of this Act, and annually thereafter, the Secretary, in consultation with the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a report a report which shall include—

(1) an assessment of the Department’s current ability to carry out the goals of section 1001 of the Energy Policy Act of 2005 (42 U.S.C. 16381), including an assessment of the role and effectiveness of the Director of the Office of Technology Transitions; and

(2) recommended departmental policy changes and legislative changes to section 1001 of the Energy Policy Act of 2005 (42 U.S.C. 16381) to improve the Department’s ability to successfully transfer new energy technologies to the private sector.

SEC. 713. SENSE OF CONGRESS.

It is the sense of the Congress that the Secretary should encourage the National Laboratories and federally funded research and development centers to inform small businesses of the opportunities and resources that exist pursuant to this title.

SEC. 714. NUCLEAR ENERGY INNOVATION.

Not later than 180 days after the date of enactment of this Act, the Secretary, in consultation with the Directors of the National Laboratories, relevant Federal agencies, and other stakeholders, shall transmit to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a report assessing the Department’s capabilities to authorize, host, and oversee privately funded fusion and non-light water reactor prototypes and related demonstration facilities at Department-owned sites. For purposes of this report, the Secretary shall consider the Department’s capabilities to facilitate private-sector fusion and 20 megawatts thermal output. The report shall address the following:

(1) The Department’s safety review and oversight capabilities.

(2) Potential sites capable of hosting research, development, and demonstration of prototype reactors and related facilities for the purpose of reducing technical risk.

(3) The Department’s and National Laboratories’ existing physical and technical capabilities relevant to research, development, and oversight.

(4) The efficacy of the Department’s available contractual mechanisms, including cooperative research and development agreements, blanket purchase orders, and other agreements, and agreements for commercializing technology.

(5) Potential cost structures related to physical security, decommissioning, liability, and other long-term project costs.

(6) Other challenges or considerations identified by the Secretary, including issues related to potential cases of demonstration reactors up to 2 gigawatts of thermal output.

SEC. 715. AGREEMENTS FOR COMMERCIALIZING TECHNOLOGY PILOT PROGRAM.

(a) IN GENERAL.—The Secretary shall carry out the Agreements for Commercializing Technology Pilot Program of the Department, as announced by the Secretary on December 8, 2011, in accordance with this section.

(b) TERMS.—Each agreement entered into pursuant to the pilot program referred to in subsection (a) shall provide to the contractor of the applicable National Laboratory, to the manufacturer determined to be appropriate by the Secretary, increased authority to negotiate contract terms, such as intellectual property rights, payment structures, performance guarantees, and multiparty collaborations.

(c) ELIGIBILITY.—

(1) IN GENERAL.—Any director of a National Laboratory may enter into an agreement pursuant to the pilot program referred to in subsection (a).

(2) AGREEMENTS WITH NON-FEDERAL ENTITIES.—Each agreement entered into pursuant to paragraph (1) shall—

(A) be a funding agreement;

(B) be a technology transfer agreement;

(C) ensure that Federal funds are used to carry out the purposes of the Federal award.

(3) RESTRICTION.—The requirements of section 18 of title 35, United States Code (commonly known as the “Bayh-Dole Act”) shall apply if—

(A) the agreement is a funding agreement (as that term is defined in section 201 of that title); and

(B) at least 1 of the parties to the receiving agreement is eligible to receive funding under that chapter.

(d) SUBMISSION TO SECRETARY.—Each affected director of a National Laboratory shall submit to the Secretary, with respect to each agreement entered into under this section—

(1) a summary of information relating to the relevant project;

(2) the total estimated costs of the project;

(3) estimated commencement and completion dates of the project; and

(4) any documentation determined to be appropriate by the Secretary.

(e) CERTIFICATION.—The Secretary shall require the contractor of the affected National Laboratory to certify that each activity carried out under a project for which an agreement is entered into under this section—

(1) is not in direct competition with the private sector; and

(2) does not present, or minimize, any apparent conflict of interest, and avoids or neutralizes any such conflict, in accordance with the Federal Acquisition Regulation, as a result of the agreement under this section.

(f) EXTENSION.—The pilot program referred to in subsection (a) shall be extended until October 2017.

(g) REPORTS.—

(1) OVERALL ASSESSMENT.—Not later than 60 days after the date described in subsection (f), the Secretary, in coordination with directors of the National Laboratories, shall submit to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a report that—

(A) assesses the overall effectiveness of the program referred to in subsection (a); and

(B) identifies opportunities to improve the effectiveness of the pilot program;

(C) assesses the potential for program activities to interfere with the responsibilities of the National Laboratories to the Department; and

(D) provides a recommendation regarding the future of the pilot program.

(h) TRANSPARENCY.—The Secretary, in coordination with directors of the National Laboratories, shall submit to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate an annual report that accounts for all incurrences of, and provides a justification for, non-Federal entities entered into by the Secretary, increased authority to negotiate contract terms, such as intellectual property rights, payment structures, performance guarantees, and multiparty collaborations.

(2) AGRICULTURE.—Any director of a National Laboratory may enter into an agreement pursuant to the pilot program referred to in subsection (a).

(b) TERMS.—Each agreement entered into pursuant to the pilot program referred to in subsection (a) shall provide to the contractor of the applicable National Laboratory, to the manufacturer determined to be appropriate by the Secretary, increased authority to negotiate contract terms, such as intellectual property rights, payment structures, performance guarantees, and multiparty collaborations.

(c) ELIGIBILITY.—

(1) IN GENERAL.—Any director of a National Laboratory may enter into an agreement pursuant to the pilot program referred to in subsection (a).

(2) AGREEMENTS WITH NON-FEDERAL ENTITIES.—Each agreement entered into pursuant to paragraph (1) shall—

(A) be a funding agreement;

(B) be a technology transfer agreement;

(C) ensure that Federal funds are used to carry out the purposes of the Federal award.

(3) RESTRICTION.—The requirements of section 18 of title 35, United States Code (commonly known as the “Bayh-Dole Act”) shall apply if—

(A) the agreement is a funding agreement (as that term is defined in section 201 of that title); and

(B) at least 1 of the parties to the receiving agreement is eligible to receive funding under that chapter.

(d) SUBMISSION TO SECRETARY.—Each affected director of a National Laboratory shall submit to the Secretary, with respect to each agreement entered into under this section—

(1) a summary of information relating to the relevant project;

(2) the total estimated costs of the project;

(3) estimated commencement and completion dates of the project; and

(4) any documentation determined to be appropriate by the Secretary.

(e) CERTIFICATION.—The Secretary shall require the contractor of the affected National Laboratory to certify that each activity carried out under a project for which an agreement is entered into under this section—

(1) is not in direct competition with the private sector; and

(2) does not present, or minimize, any apparent conflict of interest, and avoids or neutralizes any such conflict, in accordance with the Federal Acquisition Regulation, as a result of the agreement under this section.

(f) EXTENSION.—The pilot program referred to in subsection (a) shall be extended until October 2017.

(g) REPORTS.—

(1) OVERALL ASSESSMENT.—Not later than 60 days after the date described in subsection (f), the Secretary, in coordination with directors of the National Laboratories, shall submit to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a report that—

(A) assesses the overall effectiveness of the program referred to in subsection (a); and

(B) identifies opportunities to improve the effectiveness of the pilot program;

(C) assesses the potential for program activities to interfere with the responsibilities of the National Laboratories to the Department; and

(D) provides a recommendation regarding the future of the pilot program.

(h) TRANSPARENCY.—The Secretary, in coordination with directors of the National Laboratories, shall submit to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate an annual report that accounts for all incurrences of, and provides a justification for, non-Federal entities entered into by the Secretary, increased authority to negotiate contract terms, such as intellectual property rights, payment structures, performance guarantees, and multiparty collaborations.
SEC. 722. PUBLIC-PRIVATE PARTNERSHIPS FOR COMMERCIALIZATION.

(a) In general.—Subject to subsections (b) and (c), the Secretary shall delegate to directors of the National Laboratories the authority with respect to any agreement described in subsection (b) to carry out early-stage and pre-commercial technology demonstration activities to remove technology barriers that limit private sector interest and demonstrate potential commercial applications of any research and technologies arising from National Laboratory activities.

(b) AGREEMENTS.—Subsection (a) applies to—

(1) a cooperative research and development agreement;

(2) a non-Federal work-for-others agreement; and

(3) any other agreement determined to be appropriate by the Secretary, in consultation with the directors of the National Laboratories.

(c) ADMINISTRATION.—

(1) ACCOUNTABILITY.—The director of the affected National Laboratory and the affected contractor shall carry out an agreement under this section in accordance with appropriate policies of the Department, including ensuring that the agreement does not compromise any national security, economic, or environmental interest of the United States.

(2) CERTIFICATION.—The director of the affected National Laboratory and the affected contractor shall certify that each activity carried out pursuant to this section, regardless of the total cost of which (including the National Laboratory contributions and project recipient cost share) is less than $1,000,000.

SEC. 723. FUNDING COMPETITIVENESS FOR INSTITUTIONS OF HIGHER EDUCATION AND OTHER NONPROFIT INSTITUTIONS.

Section 988(b) of the Energy Policy Act of 2005 (42 U.S.C. 16352(b)) is amended—

(1) in paragraph (3) striking “Except as provided in paragraphs (2) and (3)” and inserting “Except as provided in paragraphs (2), (3), and (4)”;

(2) by adding at the end the following:

“(4) EXEMPTION FOR INSTITUTIONS OF HIGHER EDUCATION AND OTHER NONPROFIT INSTITUTIONS.

(A) IN GENERAL.—Paragraph (1) shall not apply to a research or development activity performed by an institution of higher education or nonprofit institution (as defined in section 4 of the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3703)).

(B) TERMINATION DATE.—The exemption under subparagraph (A) shall apply during the 6-year period beginning on the date of enactment of this paragraph.”.

SEC. 725. PARTICIPATION IN THE INNOVATION CORPS PROGRAM.

The Secretary may enter into an agreement with the Director of the National Science Foundation to enable researchers funded by the Department to participate in the National Science Foundation Innovation Corps program.

Subtitle D—Assessment of Impact

SEC. 731. REPORT BY GOVERNMENT ACCOUNTABILITY OFFICE.

Not later than 3 years after the date of enactment of this Act, the Comptroller General of the United States shall submit to Congress a report—

(1) describing the results of the projects developed under sections 721, 722, and 723, including information regarding—

(A) partnerships initiated as a result of those projects and the potential linkages presented by those partnerships with respect to national priorities and other taxpayer-funded research; and

(B) whether the activities carried out under those projects result in—

(i) fiscal savings; (ii) expansion of National Laboratory capabilities; (iii) increased efficiency of technology transfers; or (iv) an increase in general efficiency of the National Laboratory system; and

(2) assess the scale, scope, efficacy, and impact of the Department’s efforts to promote technology transfer and private sector engagement at the National Laboratories, and make recommendations on how the Department can improve these activities.

TITLE VIII—SENSE OF CONGRESS

SEC. 801. SENSE OF CONGRESS.

It is the sense of Congress that climate change is real.

The Acting CHAIR. No amendment to that amendment in the nature of a substitute shall be in order except those printed in part A of House Report 114–120.

Each such amendment may be offered only in the order printed in the report, by a Member designated in the report, shall be considered as read, shall be debatable for the time specified in the report equally divided and controlled by the proponent and an opponent, shall not be subject to amendment, and shall not be subject to a demand for division of the question.

AMENDMENT NO. 1 OFFERED BY MR. SMITH OF TEXAS

The Acting CHAIR. It is now in order to consider amendment No. 1, printed in part A of House Report 114–120.

Mr. SMITH of Texas. Mr. Chairman, I have an amendment made in order under the rule.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 5, line 13, strike “$834,800,000” and insert “$823,000,000”.

Page 5, line 15, strike “$1,050,000,000” and insert “$1,036,500,000”.

Page 5, line 18, strike “$1,013,000,000” and insert “$1,010,000,000”.

Page 6, line 6, strike “$377,500,000” and insert “$325,300,000”.

Page 7, line 6, strike “$383,800,000” and insert “$323,000,000”.

Page 7, line 8, strike “$1,050,000,000” and insert “$1,036,500,000”.

Page 7, line 11, strike “$1,036,500,000” and insert “$919,000,000”.

Page 7, line 24, strike “$377,500,000” and insert “$253,300,000”.

Page 20, line 19, insert “available” after “financial resources”.

Page 21, lines 7 through 11, strike “The Foundation shall also require awardees to report the Foundation, within 30 days of receipt, any sources of non-Federal funds received in excess of $50,000 during the award period.” and insert “The Foundation shall also require awardees seeking subsequent management fees to report to the Foundation, prior to the consideration of such a request, any sources of non-Federal funds received in excess of $100,000. This reporting requirement pertains to the period following any initial management fee award and for the consideration of any subsequent fee.”.

Page 21, line 20, strike “AUDITORS” and insert “REVIEW”.

Page 21, line 21, insert “or review” after “may audit”.

Page 21, line 22, strike “paragraph” and insert “subsection”.

Page 22, line 13, insert “or social activities” after “meals”.

Page 22, line 16, insert “or PAR 31.205-22” after “2 C.F.R. 200.450”.

Page 29, line 20, strike “and”.

Page 29, line 23, strike the period and insert “;”.

Page 29, after line 23, insert the following:

(E) efforts to effectively expand, broaden, or scale-up existing activities or programs.

Page 65, line 23, insert “; to be available to the extent provided by appropriations Acts,” after “nonprofit entities,”.

Page 76, line 9, insert “government,” after “industry,”.

Page 91, line 16, insert “; to be available to the extent provided by appropriations Acts,” after “sector,”.

Page 132, line 19, strike “and”.

Page 132, line 23, strike the period and insert “;”.

Page 132, after line 23, insert the following:

(C) detailed proposals for innovation hubs, institutes, and research centers prior to establishment or renewal by the Department, including—

(A) certification that all hubs, institutes, and research centers will advance the mission of the Department, and prioritize research, development, and demonstration;

(B) certification that the establishment or renewal of hubs, institutes, or research centers will not displace funds available for basic research and development within the Office of Science; and
The Acting CHAIR. Pursuant to House Resolution 271, the gentleman from Texas (Mr. SMITH) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Texas.

Mr. SMITH of Texas. Mr. Chairman, this manager’s amendment makes some changes to improve the underlying legislation.

The amendment shifts $48 million in funding within the research and related activities account at the National Science Foundation. This is at the request of Appropriations Commerce, Justice, Science and Related Agencies Subcommittee chairman, JOHN CULBerson of Texas, and provides additional funding for integrative activities to keep it at the fiscal year ’15 level.

This account includes the Graduate Research Fellowship Program and the Experimental Program to Stimulate Competitive Research, which will be fully funded at this level.

The amendment directs the Department of Energy to develop technologies to enhance security for electrical transmission and distribution systems.

The amendment includes additional direction on the development of hubs, innovation institutes, and research centers at the Department of Energy.

I urge my colleagues to support this amendment, and I reserve the balance of my time.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I claim the time in opposition to this amendment, although I do not oppose the amendment.

The Acting CHAIR. Without objection, the gentlewoman is recognized for 5 minutes.

There was no objection.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I yield myself such time as I may consume.

I appreciate that this amendment makes a few small improvements to the bill, so I will not oppose it. However, I want to take a moment to reflect on how this amendment demonstrates how flawed the process on the majority’s bill has been.

In this amendment, the chairman restored an arbitrary 11 percent cut to the EPSCoR Appropriations Section 309(c) of the Department of Energy Organization Act (42 U.S.C. 7139(c)).

Page 136, line 14, strike “and” the end of paragraph (9).

Page 136, line 15, redesignate paragraph (10) as paragraph (11).

Page 136, after line 14, insert the following: “(10) technologies to enhance security for electrical transmission and distributions systems.”

Page 151, lines 9 through 14, strike section 629.

Page 180, line 20, through page 182, line 3, strike section 711.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Texas (Mr. SMITH). The amendment was agreed to.

AMENDMENT NO. 2 OFFERED BY MS. EDDIE BERNICE JOHNSON OF TEXAS

The Acting CHAIR. It is now in order to consider amendment No. 2 printed in part A of House Report 114–120.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I have an amendment at the desk as the desigee of the gentleman from Illinois (Mr. FOSTER).

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 15, line 13, through page 17, line 9, strike section 106.

The Acting CHAIR. Pursuant to House Resolution 271, the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from Texas.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I want to thank Mr. FOSTER for his leadership on this important issue.

Section 106 exemplifies the majority’s efforts to impose their own personal beliefs and ideologies on the process of scientific discovery. Colleagues, science is not about belief; it is about discovery and the pursuit of questions about both the natural world and the human world.

We should hold NSF accountable, and NSF should hold its grantees accountable. However, accountability should be measured according to the transparency and integrity of the grant review process, not according to what type of science some of us believe in and some don’t.

Had we imposed the section 106 requirement on NSF earlier, they may have never funded the grant that led to billions in revenue from the spectrum because they may have found the grant that the DOD now uses to help train our soldiers on the front lines to differentiate between friend and foe. They may never have funded the grant that led to the creation of Google.

Chairman SMITH has been investigating NSF grants he doesn’t like since he became chairman of this committee. The entire purpose of section 106 is to give him a bigger club to continue his unfounded investigations in the future.

This is bad for NSF, and it is worse for the U.S. leadership in science and innovation. I urge my colleagues to think long and hard about the consequences of imposing our own political views and review on the NSF’s gold-standard scientific merit review process.

I urge the support of Mr. FOSTER’s amendment.

I reserve the balance of my time.

Mr. SMITH of Texas. Mr. Chairman, I claim time in opposition to this amendment.

The Acting CHAIR. The gentleman is recognized for 5 minutes.

Mr. SMITH of Texas. Mr. Chairman, it is just inconceivable to me that any U.S. Representative would oppose requiring government grants funded by the U.S. taxpayer to be spent in the national interest.

Throughout its history, the National Science Foundation has played an integral part in funding breakthrough discoveries in fields as diverse as mathematics, physics, chemistry, computer science, engineering, and biology.

However, the NSF has approved a number of grants for which the scientific merits and national interest are not obvious, to put it politely. These include a climate change musical costing $800,000, evaluating animal photographs in National Geographic for at least $200,000, and studying early human-set fires in New Zealand, in the 1800s, for several hundred thousand dollars.

The section this amendment strikes ensures that the NSF is transparent and accountable to the taxpayers about how their hard-earned dollars are spent. The bill requires that every NSF public announcement of a grant award be accompanied by a nontechnical explanation of the project’s scientific merits and how it serves the national interest.

The NSF itself has recognized the need for this transparency and accountability. Last January, the NSF released a new policy that acknowledges that the NSF must communicate clearly and in nontechnical terms the research projects it funds. The policy
emphasizes that the title abstract for each funded grant should explain how the project serves the national interest, a requirement first cited in the 1950 legislation that created the National Science Foundation. Again, the national interest standard that the gentleman from Texas opposes was in the NSF’s first charter.

The current Director of the NSF herself has endorsed the national interest standard. In her testimony before the House Science, Space, and Technology Committee on February 25, NSF Director France Cordova spoke about the very section the gentlewoman seeks to eliminate.

Dr. Cordova said: “It is very compatible with the new internal NSF guidelines and with the mission statement of NSF.”

The national interest standard does not interfere with the merit review process. The bill clearly states: “Nothing in this section shall be construed as altering the Foundation’s intelligence, merit or broader impacts criteria for evaluating grant applications.”

I urge my colleagues to oppose this amendment and to support the underlying legislation. I reserve the balance of my time.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois (Mr. FOSTER), a physicist.

Mr. FOSTER. Mr. Chairman, my amendment, which I understand has been introduced, would strike section 106 of the bill, which, in my view, adds a dangerous political filter to NSF’s gold-standard merit review process.

I do not stand alone in this view. The overwhelming majority of my colleagues in the scientific community are still quite uncomfortable with this language that would, as the American Society for Microbiology stated, “have an adverse impact on NSF’s peer review process, which is essential to funding meritorious research.” All of us here want to be good stewards of taxpayer money.

This is also true of the National Science Foundation, which currently already requires that the NSF public award abstract consist of a nontechnical component which will include “a public justification for NSF funding by articulating how the project serves the national interest,” as stated by NSF’s mission to promote the progress of science: to advance the national interest. Again, the principle that all Foundation-funded research must further the national interest, often based on nothing but their titles. Not only is this wrong, it is blatantly political.

It is easy to make cheap shots here. My parents worked for Senator Bill Proxmire, who for years and years did the Golden Fleece Awards. He was a wonderful and thoughtful Senator, but on this one, he consistently missed the mark. It is easy to make fun of projects with funny sounding names or with strange topics, but the NSF is the gold standard for a reason.

Take, for example, anthropologist Dr. Scott Atran, who received funding from the Foundation in 1984 for a study that was entitled, “Local Ecological Knowledge of Common-Pool Resources in Campeche, Mexico.” Dr. Atran subsequently applied what he learned to counterextremism in the Middle East, valued as a consultant by the Department of Defense and the Department of State.

The Acting CHAIR. The time of the gentleman from Texas has expired.

Mr. SMITH of Texas. Mr. Chairman, I will simply say to the gentleman from Illinois (Mr. FOSTER) that I recognize and appreciate him. He is a smart, thoughtful, and well-motivated member of the Science, Space, and Technology Committee, so I am really sorry he opposes this national interest standard that, I think, is the right thing to do for America and for the American taxpayers.

I yield the balance of my time to the gentleman from Illinois (Mr. LIPINSKI), who is a very active and talented member of the Science, Space, and Technology Committee.

Mr. LIPINSKI. Mr. Chairman, I want to commend my good friend from Illinois for his strong commitment to advocating for scientific research. I share many of his concerns about the underlying bill, and I will be voting against this bill. However, I must also oppose the gentleman’s bill. I agree with Mr. FOSTER and I disagree with the chairman on some of the attacks on some past grants that have been granted by the NSF. I think section 106 helps to avoid that.

The first incarnation of what is now section 106 was the High Quality Research Act, which was unveiled nearly 2 years ago. I strongly opposed that, as did the vast majority of the research community, and we set about getting that changed. Through a series of discussions, the current language—vastly different and vastly improved from the original—was reached with a broad definition of national interest that does not do anything to undermine the gold-standard NSF peer review system. I invite all to read the section and decide for themselves, or to simply listen to the NSF and to the NSB, which oversees the NSF.

As the chairman said, NSF Director France Cordova stated her support for section 106 at a committee hearing in February, saying it is “very compatible with the NSF internal guidelines and with the mission statement of NSF.”

I applaud NSF for these new guidelines which explain to the public why each proposal is being funded and how it is in the national interest. This will help the NSF defend worthwhile grants that are attacked by critics who sometimes misrepresent projects. In doing so, it will also protect the NSF.

While the National Science Board does not formally endorse legislation, at the meeting 2 weeks ago, the board approved a resolution strongly endorsing the principle that all Foundation-funded research must further the national interest by contributing to the Foundation’s mission.

So, while I agree with my friend on almost everything else in science policy, I must reluctantly oppose this amendment. I wish we could have been able to have worked out a COMPETES bill we could all support. Regrettably, we did not, but let’s not throw out this language that was worked out and that will help the NSF defend its peer review process.

Mr. SMITH of Texas. I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON).

The question was taken; and the Acting Chair announced that the noes opposed to have it.

Mr. FOSTER. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentlewoman from Texas will be postponed.

AMENDMENT NO. 3 OFFERED BY MS. JACKSON

The Acting CHAIR. It is now in order to consider amendment No. 3 printed in Part A of House Report 114–120.

Ms. JACKSON LEE. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 29, line 20, strike “and”.
Page 29, line 23, strike the period and insert a semicolon.
Page 29, line 23, insert the following: (K) creating State and regional workshops to train K-12 teachers in science and technology project-based learning to provide infrastructure in how to initiate robotics and other STEM competition team development programs; and

(L) encouraging and supporting efforts led by institutions of higher education, businesses, and local public and private educational agencies to establish collaborative
House Resolution 271, the gentlewoman from Texas (Ms. JACKSON LEE) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from Texas.

Ms. JACKSON LEE. Mr. Chair, let me take a moment to thank both of my fellow Texans and to acknowledge that I know that there is a difference of opinion, but no one can disagree with the crucialness of America’s competitiveness, the necessity of creating a workforce that can compete.

Allow me to acknowledge Congresswoman JOHNSON for the steadfast commitment and service to the Science, Space, and Technology Committee. I had the privilege of serving with her in the early stages of my membership here in this august body, and I want to thank her personally for the great strides and successes that she has had in expanding opportunities for the most vulnerable in our community.

Mr. Chairman, my amendment speaks to this issue, and it continues to seek to address the STEM education gap that exists. Jackson Lee Amendment No. 3 creates State and regional workshops to train K–12 teachers in project-based science and technology learning, which will allow them to provide instruction in initiating robotics and other STEM competition team development programs.

I now serve on the Homeland Security Committee, and I note that the extent of technology in securing this Nation is without comparison. It is necessary. This amendment also leverages the collaboration among higher education businesses and local and private/public education agencies to support STEM efforts at schools located in areas with unemployment higher than 1 percent or more above the national rate.

We want to get right to the core of the most vulnerable and the most needy, robotics competitions and other similar competitive opportunities have proven to be one of the most successful paths for engaging young minds in STEM education. I have held a robotics competition, and it is absolutely amazing to see the young people’s minds and hearts gather around it. My amendment has that capacity to it. Of course, it responds to the fact that only 1 out of 10 high schools in the U.S. offers computer science programs, and it is estimated that the education systems in 25 States do not count computer science classes toward high school graduation.

I ask my colleagues to support the Jackson Lee Amendment, and I reserve the balance of my time.

Mr. SMITH of Texas. Mr. Chairman, I claim the time in opposition to the amendment, although I do not oppose the amendment at the desk.

The Acting CHAIR. Pursuant to an earlier agreement, the Chair recognizes the gentleman for 5 minutes.

Mr. SMITH of Texas. Mr. Chair, I want to focus just a little bit on competitions regarding this amendment, competitions such as FIRST, which is a national robotics competition that engages 400,000 students each year and that in 2010, to increase dollars in scholarships, paving the way for future STEM success.

I submit for the RECORD a document entitled, “Disparities in STEM Employment by Sex, Race, and Hispanic Origin.”

[From census.gov, Sept. 2013]

**DISPARITIES IN STEM EMPLOYMENT BY SEX, RACE, AND HISPANIC ORIGIN**

(By Liana Christin Landivar)

**AMERICAN COMMUNITY SURVEY REPORTS**

Introduction

Industry, government, and academic leaders cite increasing the science, technology, engineering, and mathematics (STEM) workforce as a top concern. The National Academy of Sciences, National Academy of Engineering, and the Institute of Medicine describe STEM as “high-quality, knowledge-intensive jobs . . . that lead to discovery and new technology,” improving the U.S. economy and standard of living. In 2007, Congress passed the America COMPETES Act, reauthorized in 2010, to increase funding for STEM education and research.

One focus area for increasing the STEM workforce has been to reduce disparities in employment by sex, race, and Hispanic origin. Historically, women, Blacks, and Hispanics have been underrepresented in STEM employment. Researchers find that women, Blacks, and Hispanics are less likely to be in a science or engineering major at the start of their college experience, and less likely to remain in these majors by its conclusion. Because most STEM workers have a science or engineering college degree, under-representation among science and engineering majors could contribute to the under-representation of women, Blacks, and Hispanics in STEM employment.

This report details the historical demographic composition of STEM occupations followed by a detailed examination of current STEM employment by age and sex, presence of children in the household, and race and Hispanic origin based on the 2011 American Community Survey (ACS). The report concludes with an examination of the demographic characteristics of science and engineering graduates who are currently employed in a STEM occupation.

Ms. JACKSON LEE. Specifically, the language says: “Industry, government, and academic leaders cite increasing the science, technology, engineering, and mathematics (STEM) workforce as a top concern.”

This is in the American Community Survey Reports.

“One focus area for increasing the STEM workforce has been to reduce disparities in STEM employment by sex, race, and Hispanic origin. Historically, women, Blacks, and Hispanics have been underrepresented in STEM employment,” and it goes on to elaborate.

This amendment gives an added opportunity to focus in on how in on teacher training and reaching out to those very hungry minds in the minority communities who are eager to be part of the changing fabric of America that focuses on science, technology, engineering, and math. From financial services, to homeland security, to space and aeronautics, to manufacturing, to the Silicon Valleys of the Nation, STEM is crucial.

I would like to now acknowledge both the committee staff on the majority and minority who assisted us, and I would like to acknowledge my staff, Lillie Coney, for her excellent work on these matters.

With that, Mr. Chairman, I ask for support of the Jackson Lee amendment.

Ms. JACKSON LEE. Mr. Chair, I have an amendment at the desk.

I thank Chairman Smith and Ranking Member JOHNSON for the opportunity to speak on my amendment to H.R. 1806, the America COMPETES Reauthorization Act of 2015.

My amendment included in the Rule to H.R. 1806 would improve the bill by addressing the STEM education gap for K–12 students. Jackson Lee Amendment #3, creates state and regional workshops to train K–12 teachers in project-based science and technology learning, which will allow them to provide instruction in initiating robotics and other STEM competition team development programs.

This amendment also leverages the collaboration among higher education businesses and local and private/public education agencies to support STEM efforts at schools located in areas with unemployment is 1 percent or more above the national rate.

Robotics competitions and other similar competitive opportunities have proven to be one of the most successful paths for engaging young minds in STEM education.

Competitions such as FIRST, a national robotics competition that engages 400,000 students each year and awards millions of dollars in scholarships are paving the way for future STEM success.

The Jackson Lee amendment focuses on reducing the STEM gaps that currently exists between K–12 students attending schools in different geographic regions or who come from diverse socioeconomic backgrounds.

Only 1 out of 10 high schools in the U.S. offers computer science programs. It is estimated that the education systems in 25 states do not count computer science classes toward high school graduation.

Both economists and business leaders have identified that the future of the American economy will be in STEM fields, which the Bureau of Labor Statistics estimates: more than 9 million jobs between 2012 and 2022. The STEM gap is more pronounced when considering minority groups.
Jackson Lee Amendment #17 would have increased awareness among underrepresented groups in STEM degree programs and have that information disseminated to the public.

In 2012, a survey found that despite the nation’s growing demand for more workers in science, technology, engineering, and math, the skills gap among the largest ethnic and racial minorities groups remain stubbornly wide.

Blacks and Latinos account for only 7 percent of the STEM workforce despite representing 28 percent of the U.S. population.

Jackson Lee Amendment #18 would have made sure that the issue of reducing the skills and education gap of underrepresented groups in STEM degree programs is considered every round of STEM education federal programs were reviewed.

Jackson Lee Amendment #19 could have furthered the skills development and training of teachers who provide instruction in K–12 STEM courses who 40 percent of the students are on free or reduced lunch programs or in areas where unemployment is 1 percent or more above the national average.

Although most STEM specific education occurs in college and graduate school, interest in STEM fields must be fostered from a young age through successful K–12 programs.

Many schools serving low-income students lack the resources to provide continuity of STEM K–12 education, and as a result, students lose the opportunity to develop the skills that will prepare them for higher STEM education.

Jackson Lee Amendment #21 was an effort to identify no-cost or low-cost summer and to identify no-cost or low-cost summer and job training programs and have that information disseminated to the public.

Types of STEM Mathematics Jobs: Biologists; Zoologists; Agricultural; Food Scientists; Conservation Scientists; Medical Scientists; Climatologists.

Jackson Lee Amendment #22 made grants available to local education agencies to support training in STEM education methods to teachers to improve their instruction at schools serving neglected, delinquent, and migrant students, English learners, at-risk students, and Native Americans as determined by the director.

Jackson Lee Amendment #23 establishes in the Directorate for Education and Human Resources an Office of STEM Education Gap Awareness with the duties of reducing the STEM gap in K–12 and post-secondary education among underrepresented populations.

The Jackson Lee amendments are intended to bridge the gaps in rural and urban areas where opportunities for training in STEM that can enhance the productivity of businesses large and small are lacking.

The Brookings’ Metropolitan Policy Program’s report “The Hidden STEM Economy,” reported that in 2011, 26 million jobs or 20 percent of all employment required knowledge in 1 or more STEM areas.

Half of all STEM jobs are available to workers without a 4 year degree and these jobs pay on average $53,000 a year, which is 10 percent higher than jobs with similar education requirements.

There will be STEM winners and losers not because the skills needed are too difficult to obtain, but because people are not aware of the jobs that are going unfilled today nor do they know what education or training will create job security for the next 2 to 3 decades.

I am very aware of the importance of STEM job training and education.

A third of Houston jobs are in STEM-based fields.

Houston has the second largest concentrations of engineers (22.4 for every 1,000 workers according to the Greater Houston Partnership).

By 2018 the United States will need: 710,000 Computer workers; 160,000 Engineers; 70,000 Physical Scientists; 40,000 Life Science workers; 20,000 Mathematics workers.

STEM Computing Jobs are critical to America’s future: Software engineers; Computer networking workers; Systems analysts; Computer researcher or support workers.

Types of STEM Engineering Jobs: Structural Engineers; Mechanical Engineers; Software Engineers; Electrical Engineers; Automotive Engineers; Aeronautical Engineers; Naval Engineers; Archaeologists.

Types of STEM Physical Sciences Jobs: Biologists; Zoologists; Agricultural; Food Scientists; Conservation Scientists; Medical Scientists; Climatologists.

Types of STEM Life Scientists [PhDs]: Political Science; Economists; Anthropologists; Archaeologists; Cultural Resources; Language Experts (Linguistic and Language Skills).

Types of STEM Mathematics: Teachers; Physicists; Cryptographers; Statisticians; Accountants.

In order to ensure that underserved populations reach the level of STEM education and opportunity they choose to pursue, I believe it is integral to create an office that will focus on closing the STEM education gap.

I ask that my colleagues from both sides of the aisle support this amendment.

I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Texas (Ms. JACKSON LEE).

The amendment was agreed to.

AMENDMENT NO. 4 OFFERED BY MS. ESTY

The Acting CHAIR. It is now in order to consider amendment No. 4, printed in part A of House Report 114-120.

Ms. ESTY. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 41, line 7, strike “and” after “society.”

Page 41, line 12, strike the period at the end and insert “.”

Page 41, after line 12, insert the following new paragraph:

(4) I-Corps would continue to promote a strong innovation system by investing in and supporting female entrepreneurs, who are historically underrepresented in entrepreneurial fields, through mentorship, education, and training.

The Acting CHAIR. Pursuant to House Resolution 271, the gentlelady from Connecticut (Ms. Esty) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlelady from Connecticut.

Ms. ESTY. Mr. Chairman, my amendment would increase support for women in entrepreneurship at the National Science Foundation Innovation Corps, also known as the I-Corps. It has been an honor and privilege to meet with women across Connecticut who are creating and building their own startups and small businesses.

In March I hosted a Women in Science, Technology, Engineering, and Math roundtable, bringing together educators, innovators, and business owners to identify barriers that women face when looking to advance in the critical STEM and entrepreneurial fields.

These local leaders all agreed that one of the biggest problems for women in the STEM fields is the lack of mentorship and support, and, quite simply, women do not have the same support and mentorship as their male counterparts because they are often the first women in leadership positions in their fields.

In fact, our Smaller Manufacturers Association in Connecticut just elected their first female president, Anne Strobel, and she has already hit the ground running to build on our State’s strong manufacturing tradition.

National studies and experts echo the concerns women raised at the STEM roundtable in my own district. The Kauffman Foundation recently surveyed 350 female tech startup founders and found that the number one shared concern is a lack of role models and mentors for women thinking of going into business for themselves.

Recent news reports have noted the chronic underrepresentation of women
in the booming tech sector, including startups. In fact, women make up only 30 percent of the tech workforce and 22 percent of the leadership roles, despite being 60 percent of the workforce. It is clear that we must do more for women so they can build businesses and create good-paying jobs.

My amendment would provide support to women through the NSF’s Innovation Corps, known as the I-Corps, by expanding their mission to specifically include support for and investment in female entrepreneurs through mentorship, education, and training.

The I-Corps program fosters entrepreneurship by giving students the tools they need to move discoveries and technology from the research lab to the market. I-Corps is making a difference in helping teach and support entrepreneurs across the country.

In my own State, the University of Connecticut recently received I-Corps funding. I-Corps is designated as an I-Corps site. Accelerate UConn will build on the investment the State of Connecticut is already making to ensure that they remain a leader in our national innovation ecosystem.

Our success as a nation depends on robust research and technology and on ensuring that we draw on the best and the brightest, whether they be men or women. By increasing the number of women entrepreneurs in the fields of science, technology, engineering, and math, we as a nation will all benefit from the innovation that comes from a diverse workforce.

It is not only morally right, but economically smart to foster entrepreneurship of women. I encourage all my colleagues to support my amendment. I reserve the balance of my time.

Mr. SMITH of Texas. Mr. Chairman, I claim the time in opposition to the amendment, though I don’t oppose the amendment.

The Acting CHAIR. Without objection, the gentleman is recognized for 5 minutes.

There was no objection.

Mr. SMITH of Texas. Mr. Chairman, this amendment would add a sense of Congress of Congress’ support for the NSF’s Innovation Corps program in the underlying bill. This language would include the promotion of a strong innovation system with investments and support for female entrepreneurs. I-Corps is an excellent program. I support the gentlewoman’s amendment and appreciate her offering it.

I reserve the balance of my time.

Ms. ESTY. Mr. Chairman, may I inquire how much time I have remaining?

The Acting CHAIR. The gentleman from Connecticut has 2 minutes remaining.

Ms. ESTY. Mr. Chairman, I yield 1½ minutes to the gentleman from Virginia (Mr. BEYER).

Mr. BEYER. Mr. Chairman, I thank my friend for yielding and for her leadership on this important issue. I especially enjoy being on the same side of this issue with the chairman of the Committee on Science, Space, and Technology.

Mr. Chairman, I would like to add my voice to Representative Esty’s voice in support of her amendment. I-Corps is a revolutionary partnership that helps maximize the economic impact of taxpayer-funded research by connecting the brilliant minds at NSF to the brilliant minds in the private sector.

This amendment offered by Representative Esty today ensures that we foster all of the brilliant minds by supporting female entrepreneurs. Gender diversity makes good business sense. Research conducted by Dow Jones on venture-backed companies found that successful ones had twice the number of women on the founding teams, and there is more research that shows that women-owned firms outperformed those owned by male counterparts. Despite this and despite the fact that women have more college degrees than men, they comprise only 5 percent of Fortune 500 CEOs and only 19 percent of corporate board seats. Clearly, something is wrong.

For us to fully realize our economic potential, we have got to do a better job of supporting female entrepreneurs. That is why I strongly support her amendment and urge my colleagues to do the same.

Mr. SMITH of Texas. Mr. Chairman, I do not think I am wrong in disagreeing with what the gentlewoman from Connecticut has to say during her remaining time, so I yield back the balance of my time.

Ms. ESTY. Mr. Chairman, how much time do I have remaining?

The Acting CHAIR. The gentlewoman from Connecticut has 1 minute remaining.

Ms. ESTY. I yield such time as she may consume to the gentlewoman from Texas (Ms. BERNICE JOHNSON), the ranking member, with my thanks.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I rise in support of this amendment and want to thank the author for bringing it forward and thank the chairman of the committee for supporting it.

Our support historically goes back to Congresswoman ConnieMorella. The two of us did a study maybe 15 or 16 years ago, and we both have been very, very lucky in the sciences and hope that we can get a better bill so that we can address getting them ready for these jobs.

Ms. ESTY. I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentlewoman from Connecticut (Ms. ESTY).

The amendment was agreed to.

AMENDMENT NO. 5 OFFERED BY MR. CROWLEY

The Acting CHAIR. I now in order to consider Amendment No. 5 printed in part A of House Report 114–120.

Mr. CROWLEY. Mr. Chairman, I have an amendment at the desk.
The Acting CHAIR. Without objection, the gentleman is recognized for 5 minutes.

There was no objection.

Mr. SMITH of Texas. Mr. Chairman, this amendment would require the establishment of a program originally authorized in the 2007 COMPETES Act. I support the gentleman’s amendment. I reserve the balance of my time.

Mr. CROWLEY. Mr. Chairman, I appreciate the comments from the chairman. I yield 1 minute to the gentleman from New York (Mr. SERRANO), my friend and a cosponsor of the amendment.

Mr. SERRANO asked and was given permission to revise and extend his remarks.

Mr. SERRANO. I thank my colleague for yielding me this time.

Mr. Chairman, as my colleague has said, in 2007 he added a provision to the original America COMPETES Act to give the NSF the discretion to establish a dedicated grant program. However, after years of persistence, the NSF has refused to act. That is why last month Mr. CROWLEY, Mr. LUJÁN, and myself introduced the HOPES Act.

Today’s amendment replicates the HOPES Act and requires the NSF to establish an undergraduate grant program for Hispanic-Serving Institutions. Hispanics are underrepresented in the STEM fields, and more needs to be done to ensure that we are not missing the best and the brightest from all the parts of America in developing the next generation of scientists, engineers, and mathematicians.

This amendment is a big step in the right direction. I thank Representative CROWLEY for his leadership on this issue. I thank the chairman for accepting the amendment.

Mr. SMITH of Texas. Mr. Chairman, I yield 2 minutes to the gentleman from Texas (Mr. HURD).

Mr. HURD of Texas. Mr. Chairman, I rise in support of this amendment, which will benefit the students at several fine institutions in the 23rd Congressional District of Texas.

One thing that everybody here wants is a healthy economy. We want the American economy to continue to be the strongest in the world, and if American businesses are going to compete and win in a global economy, we have to have the best trained and best equipped workforce possible.

The institutions of higher learning need to be fully capable of offering their students the opportunities to learn the skills that are going to drive a 21st century economy, and that means STEM degrees must be a priority in our colleges and universities. This amendment will allow institutions that are designated as Hispanic-Serving Institutions to have access to grant programs with the National Science Foundation that they have been excluded from participating in in the past.

There are 47 institutions like this in the State of Texas, and more than a dozen of them serve students in my district. This increased access to grants will help increase the recruitment, retention, and graduation rates of Hispanic students pursuing degrees in STEM fields. That is good for these students; that is good for our universities, our businesses, and our economy.

I want to thank the gentleman from New York, Mr. CROWLEY, for introducing this amendment. I encourage my colleagues to support it. Mr. CROWLEY, I thank you for yielding the 2 minutes to Mr. HURD.

With that, I yield 1 minute to the gentleman from New Mexico (Mr. BEN RAY LUJÁN).

Mr. BEN RAY LUJÁN of New Mexico. Mr. Chairman, I rise today in support of this amendment that I am proud to offer with my colleagues.

I want to thank Congressman CROWLEY for his leadership. I want to recognize Chairman SMITH for his responsibility in working and looking out for these students as well.

In today’s world, science, technology, engineering, and math degrees translate into high-paying, in-demand jobs. While we are still struggling with high unemployment in my home State of New Mexico, there are sectors, especially in STEM, that are having difficulty finding qualified workers. To help meet this need, the National Science Foundation manages a number of programs at minority-serving institutions, including Historically Black Colleges and Universities and Tribal Colleges and Universities.

These programs have filled an important void by preparing minority students for meaningful careers in STEM. However, this program and, therefore, a lack of critical support for Hispanic Americans. This is also evident in the fact that Hispanics are severely underrepresented in the STEM workforce.

It is time that we fund the creation of a program for Hispanic-Serving Institutions to develop infrastructure, curriculum, and recruit Hispanic students into STEM fields. To do what is best for America, we need to invest and promote these programs.

Mr. SMITH of Texas. Mr. Chairman, I have no further speakers, and I yield back the balance of my time.

Mr. CROWLEY. Mr. Chairman, how much time do I have remaining?

The Acting CHAIR. The gentleman from New York (Mr. CROWLEY) has 1½ minutes remaining.

Mr. CROWLEY. Mr. Chairman, I yield 1 minute to the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON).

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, let me thank the gentleman and all of the persons who sponsored this amendment. I want to commend them.

When Mr. LUJÁN was on the Science Committee, we actually developed that language that did pass in the last COMPETES Act, so I fully support this amendment.

Mr. CROWLEY. Mr. Chairman, let me just use the remaining time to thank Chairman SMITH for his cooperation and that of his staff, as well as the cooperation of Ms. JOHNSON and her staff.

I do think that this amendment is the final tooth we need to make this law work and to drive the money and the resources to the people we intended for them to go to, and that is Latino or Hispanic young men and women who want to strive to succeed in the fields of science and medicine to help make our country an even better country.

I thank you both again for your cooperation, and I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from New York (Mr. CROWLEY). The amendment was agreed to.

AMENDMENT NO. 6 OFFERED BY MR. GRIFFITH

The Acting CHAIR. It is now in order to consider amendment No. 6 printed in part A of House Report 114–120.

Mr. GRIFFITH. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 171, line 2, insert “The Advisory Panel shall consist of 15 members, with 3 members appointed by the Speaker of the House of Representatives and 2 members appointed by the Majority Leader of the Senate.” after “other appropriate organizations.”.

Page 171, line 2, insert “, except that 3 members shall be appointed by the Speaker of the House of Representatives and 2 members shall be appointed by the Majority Leader of the Senate. The total number of members of the advisory committee shall be 15.” after “by the Secretary.”.

The Acting CHAIR. Pursuant to House Resolution 271, the gentleman from Virginia (Mr. GRIFFITH) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Virginia.

Mr. GRIFFITH. Mr. Chairman, my amendment would make a couple of slight changes to two new advisory boards created in this bill: the STEM education advisory panel and a new Department of Energy advisory committee.

My amendment sets the total number of members for these two new advisory boards at 15 each, and most importantly, it means that half of the members on each board are chosen by Congress, three by the Speaker of the House and two by the Senate majority leader.

The purpose of my amendment is to ensure that the advisory boards have congressional representation, that we have people on there who work with Congress. The legislative branch is
coequal branch of government, and I believe that, as an institution, Congress should more aggressively assert itself as a coequal branch.

This amendment has nothing to do with which party controls the legislative branch of government, or which party, for that matter, controls the executive branch at any given time, nor does it ask for a majority of the members of these new boards to be congressionally appointed.

The amendment would simply ensure that the legislative branch is involved in these boards that it, the legislative branch, is creating and that we are involved in the process of creating the reports which both the legislative branch and executive branch will rely on to make important decisions for these United States.

If Congress deems an issue important enough to warrant an advisory board that is included in a bill we are passing, it just makes sense that we also appoint a portion of that board’s membership.

I hope we will do that as we go forward with many of our boards. I also think it will facilitate more conversation between the executive branch and the legislative branch as time goes forward.

Mr. Chairman, I reserve the balance of my time.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I claim the time in opposition to the amendment.

The Acting CHAIR. The gentlewoman from Virginia is recognized for 5 minutes.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I yield myself such time as I may consume.

This amendment allows the Speaker of the House of Representatives and the majority leader of the Senate to appoint members to two scientific advisory boards created in the bill. This amendment is the very definition of politicizing these boards, for the Speaker of the House or of a different party, we generally found that, by having people that were familiar with both sides of the issue, but people who also relied on and came to talk to us on a regular basis in the legislature, we felt more comfortable with those recommendations that had been made. We understood better what the background was. It made for better government.

That is what this is intended to do. I didn’t ask for a majority. I didn’t say they have complete control. It just says there ought to be some members appointed by the Senate and appointed by the House. It doesn’t matter which party is in control of the House or Senate. Recently, that was divided. It doesn’t matter which party is in the executive branch.

It just says this is a way to make sure that when you think it is important enough—when Congress thinks it is important enough to create an advisory board, then both the House and Senate, both the House and Senate, on that advisory board to make sure that there is interaction with us, as well as with the executive branch.

Unless the belief is that the executive branch wants to politicize it because they get all the appointments, I don’t know why they would think these appointments would be politicizing it. It is just for informational purposes and to make sure that everybody is happy at the table and that those ideas are shared.

Ms. EDDIE BERNICE JOHNSON of Texas. Will the gentleman yield?

Mr. GRIFFITH. I yield to the gentlewoman.

Ms. EDDIE BERNICE JOHNSON of Texas. I served in both the house and senate in Texas before coming here; I believe strongly in input, but this very bill and its structure has become so political and so politically tainted in attempting to manipulate what is going on in our agencies, I just don’t trust your amendment.

Mr. GRIFFITH. Reclaiming my time, I would say that I don’t know the gentleman’s concerns on this particular bill. I do believe, as a Congress, we ought to be working to make sure that we have input on all of these advisory committees, whether it is on this bill or any other bill.

Mr. Chairman, how much time do I have remaining?

The Acting CHAIR. The gentleman from Virginia has 1 minute remaining.

Mr. GRIFFITH. I yield 1 minute to the gentleman from Texas (Mr. SMITH).

Mr. SMITH of Texas. Thank the gentleman from Virginia for yielding.

Mr. Chairman, I will be very brief. I support the gentleman’s amendment that will ensure that Congress has input on the composition of the new boards and panels created in the bill, and I urge my colleagues to support this amendment as well.

Mr. GRIFFITH. Mr. Chairman, I yield back the balance of my time.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Virginia will be postponed.

The Acting CHAIR. The question was taken; and the Acting Chair announced that the ayes appeared to have it.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. The gentleman from Pennsylvania is recognized for 1 minute.

Mr. GRIFFITH. The gentleman from Pennsylvania is recognized for 1 minute.

Mr. Kelly of Pennsylvania. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Cleric will designate the amendment.

The text of the amendment is as follows:

Page 71, line 21, strike ‘‘$933,700,000’’ and insert ‘‘$938,700,000’’.

Page 72, line 6, strike ‘‘$130,000,000’’ and insert ‘‘$135,000,000’’.

Page 72, line 8, strike ‘‘$125,000,000’’ and insert ‘‘$130,000,000’’.
With the average small- and mid-size American manufacturing employee earning more than $77,000 a year in pay and benefits, these are exactly the types of jobs that policymakers need to be encouraging. And at a time when our economy is starting to recover, the MEP programs are crucial in helping America’s small manufacturers be stronger long-term competitors, both domestically and internationally.

In turn, this will allow them to create good-paying, high-skilled jobs for American workers across the country. A growing manufacturing sector in America means more well-paying jobs for low- to moderate-income American families, reduced trade deficit and a robust economy, and a flourishing innovation sector which can drive future growth.

By supporting this amendment, Congress will be sending a clear signal to our small American manufacturers and our job creators that they will continue to play a vital role in the reinvigoration of our economy.

MEP is currently appropriated at $130 million, and this amendment would simply ensure that this popular, bipartisan program continues to be authorized at its current funding level.

Mr. Chairman, I reserve the balance of my time.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I rise in opposition to this amendment.

The Acting CHAIR. Pursuant to House Resolution 271, the gentleman from Pennsylvania (Mr. KELLY) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Pennsylvania. Mr. KELLY of Pennsylvania. Mr. Chairman, my amendment increases the authorized funding for the Manufacturing Extension Partnership by $5 million and it offsets it by decreasing the authorized funding for the Office of Energy Efficiency and Renewable Energy by $5 million, for level funding.

If our goal is to create and retain more American jobs, there is no better program to fund than that of the Manufacturing Extension Partnership. Administered by the National Institute of Standards and Technology, with centers in each State, for every $1 of Federal investment, this public-private partnership generates nearly $21 in new sales. As a result, this translates into $2.5 billion annually. For every $2,900 of Federal investment, MEP creates or retains one American manufacturing job.

The MEP programs provide our Nation’s nearly 350,000 small manufacturers with services and access to resources that enhance growth, improve productivity, and expand capacity. This program is a win-win for our hard-working American taxpayers. Few, if any, other Federal programs can claim such a good return on our taxpayers’ investment.

Considering this amendment authorizes the program at $135 million that helps small American manufacturers directly and at a 50 percent cost share, this gives taxpayers more bang for their buck.

The Office of Energy Efficiency and Renewable Energy, or EERE, as they call it, has a total budget of over $1 billion, so moving $5 million to this valuable program for small businesses is simply good economic policy.

This program is not a government handout. Instead, it requires small manufacturers to partner with their local MEP to have skin in the game with a 50 percent cost share. That is good for our taxpayers; it is good for manufacturing sectors, and it is good for American jobs.

Since 1988, MEP has worked with nearly 80,000 American manufacturers, leading to $88 billion in sales and 14 billion in cost savings. It has helped create more than 729,000 American jobs.

Last year alone, MEP projects created or retained nearly 64,000 American jobs, generated more than $6.7 billion in new and retained sales, and provided cost savings of more than $1.1 billion to small American manufacturers.

Mr. KELLY of Pennsylvania. Mr. Chairman, I yield 30 seconds to the gentleman from Texas (Mr. SMITH).

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I yield myself such time as I may consume.

I strongly support the Manufacturing Extension Partnership program, or the MEP, at NIST. Since its establishment in 1988, the MEP program has generated billions of dollars in new sales; it has saved MEP clients billions of dollars; and it has helped create more than 700,000 jobs.

I cannot support this amendment because it increases the authorization for MEP by decreasing the authorization for the Office of Energy Efficiency and Renewable Energy at the Department of Energy. EERE conducts important research on energy efficiency and renewable energy technologies, including critical advance manufacturing initiatives.

Unfortunately, EERE has become a favorite target for my friends on the other side of the aisle. The underlying bill cuts this office by almost 30 percent, and this amendment would make that cut even larger.

I supported an amendment that would have increased MEP authorization to $141 million for fiscal year 2016, at the President’s request, without cutting EERE. But the amendment was not made in order.

I strongly believe in MEP and want to see this funding level increased. I think it is important to note that this bill is an authorization bill, not an appropriations bill. In authorization bills, Congress should be deciding authorization levels by determining what the program needs to accomplish its responsibilities.

Notwithstanding current Republican protocols, authorization bills should not have the same constraints as appropriation bills, including needing to offset any increases. This is a bizarre approach to legislating.

Because of the unnecessary cut to EERE, I cannot support this amendment, and I urge my colleagues on both sides of the aisle to reject the false notion of needing to offset authorizations.

Mr. Chairman, I reserve the balance of my time.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I continue to reserve the balance of my time.

Mr. KELLY of Pennsylvania. Mr. Chairman, I would just remark that if we are really trying to create jobs, if we are really trying to boost our economy, if we are really trying to do all these things, if we are really trying to help small manufacturers, I don’t think that asking to transfer $15 million out of a $1 billion allotment is going to really have that much effect on that.

This is not turning our back on some of the issues that you have, but this is looking forward to the future and saying we have got to help these people move forward.

This is not a government handout. This is not a free amount of money. This is a 50 percent match. There are very few programs in our government that require that.

This is something that just makes sense for America. It makes sense for all those folks that I represent and you represent back home.

I have got to tell you something. Back in Western Pennsylvania, where I come from, Pennsylvania’s Third District, every morning, moms and dads get up and they throw their feet out over their bed and they go to work so that they can put a roof over the head for their children, food on their table, clothes on their back, and a promise for the future.

This is a small investment. All we are doing is keeping it at $130 million. And in a government that spends trillions of dollars every year, I don’t know why we would quibble over $5 million because it is going to help job creation and job retention. It allows us to compete in a global market in a way that we actually win.
We don’t have to get political about this. What I want to do is, I want to think about all the people we represent and where those dollars go because every single dollar belongs to the American taxpayer.

The Acting CHAIR. The gentleman is reminded to address all of his remarks to the Chair and not to other Members of the House.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I appreciate those remarks. He is describing my constituents as well. And if we had done as requested by the President, we would have left the authorization levels at the level he is trying to bring it to, and it would not have taken away from the other part of the research that is needed so badly in the other areas.

I do not oppose what he is trying to do. What I oppose is how he is trying to do it. And for that, I still oppose the total amount because it is not treating the other fairly. It is not that I oppose MEP. My constituents are no different than yours. They get up every day to work hard and need opportunities. I am sure many of yours get more opportunities than some of mine. And so I agree with that totally.

I agreed with the President’s level of recommendation of where he wants to take it. What I disagree with is he is taking it out of another area when it is not necessary. We are not appropriations. We are to recommend authorizations. We can do the authorization for his level without taking away from an area they don’t like.

Mr. Chairman, I yield back the balance of my time.

The Acting CHAIR. Members are advised to address their remarks to the Chair and not to each other.

The question is on the amendment offered by the gentleman from Pennsylvania (Mr. KELLY).

The amendment was agreed to.

AMENDMENT NO. 8 OFFERED BY MR. LOWENTHAL

The Acting CHAIR. It is now in order to consider amendment No. 8 printed in part A of House Report 114–120.

Mr. LOWENTHAL. Mr. Chair, I have an amendment at the desk.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 114, line 23, through page 115, line 18, strike subsections (b) through (d).

The Acting CHAIR. Pursuant to House Resolution 271, the gentleman from California (Mr. LOWENTHAL) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from California.

Mr. LOWENTHAL. Mr. Chair, I yield myself such time as I may consume.

My amendment would do two important things. First, it would preserve the Energy Department’s ability to select projects based on merit, and, second, it would preserve a very basic scientific tenet, the ability of the Department of Energy to replicate scientific results.

Right now, the underlying bill mandates the prioritization of certain scientific fields over others, and it termi- nates science initiatives that can validate or question the results of previous scientific research.

It is additionally unfortunate that in this formerly bipartisan bill, the majority is again attempting to specify which research programs of some of our Nation’s brightest scientists if they study climate change. I think this is shortsighted. I think it is irresponsible, and I believe it is wrong.

In order to ensure America’s energy security, we must understand the multiplying risks to our energy infrastructure due to a changing climate. In order to ensure America’s energy security, we must understand the lifecycle impacts of the fuels we use. And in order to ensure energy security, we must lead the world in developing clean renewable sources of energy.

For this vision to become a reality, the Department of Energy must support sound scientific processes that in- clude selecting the most meritorious methods and questions that they wish to research and verifying those results through replication.

H.R. 1806, as it is currently written, specifically targets the climate change research program in the Energy Department and instructs the director to cease those climate science-related initiatives that are identified as overlapping or duplicative.

A basic tenet of science is that you have to reproduce scientific results. You don’t run an experiment once and go to the world and say, “It’s true. We’ve figured it out.”

No—science requires separate and independent peer-reviewed results in order to draw conclusions. But now Congress is trying to legislate changes to the scientific method, and I think that is a shame.

Science works best when multiple groups and agencies collaborate to find answers to important questions. And guess what? Congress has already created a way to coordinate among the 13 Federal agencies to ensure that each agency is researching the causes and effects of global changes most relevant to their missions. And it is called the U.S. Global Change Research Program.

The proposed requirements in section 505 of H.R. 1806 are really just an attempt to create more roadblocks to studying climate change.

My amendment preserves the scientific integrity of the Office of Science, the U.S. Global Change Research Program and, more importantly, the scientific process.

I urge a “yes” vote on the Lowenthal amendment and I reserve the balance of my time.

Mr. SMITH of Texas. Mr. Chairman, I claim the time in opposition.

The Acting CHAIR. The gentleman is recognized for 5 minutes.

Mr. SMITH of Texas. Mr. Chairman, I yield as much time as he may consume to the gentleman from Arkansas (Mr. WESTERMAN), who is a member of the Committee on Science, Space, and Technology.

Mr. WESTERMAN. Mr. Chairman, I rise today in opposition to the gentleman’s amendment and in support of the underlying reforms included in H.R. 1806, the America COMPETES Reauthorization Act of 2015.

This amendment would remove important measures that ensure greater transparency for the Federal Government’s climate science initiative and require accountability for the Office of Science to justify the value of related work going forward.

The gentleman’s amendment would also remove underlying language in the America COMPETES Act that would require the Government Accountability Office to identify duplicative climate science initiatives across the entire Federal Government.

All Members of Congress should support transparency in federally funded research. It is our core responsibility to provide oversight for Federal programs and make sure American taxpayer dollars are being spent responsibly, not duplicating work that has already been done.

That said, the language in the America COMPETES Act does not ban any particular area of science but, instead, requires that DOE justify the science’s merit and provide greater transparency if climate science work is intentionally duplicated.

This provision in the America COMPETES Act is simply good governance and is more important now than ever. The Obama administration has unapologetically pushed forward a politicized climate agenda through the Federal Government, prioritizing climate change research above all else. Better transparency can help prevent wasteful spending and prioritize the most valuable research.

H.R. 1806 authorizes the Office of Science within the Department of Energy to support basic research in the physical sciences, including research on Earth’s atmosphere. By including these good government measures, the America COMPETES Act gives Congress appropriate oversight, funds valuable research, but does not provide a blank check for the President’s climate agenda.

This amendment would strike these important accountability measures from the America COMPETES Act research. For that reason, I oppose the amendment and encourage my colleagues to do the same.

Mr. LOWENTHAL. Mr. Chairman, could you tell me how much time I have left?

The Acting CHAIR. The gentleman from California has 1½ minutes remaining.
Mr. LOWENTHAL. I yield 1 minute to the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON).

Ms. EDDIE BERNICE JOHNSON of Texas. I thank the gentleman for yielding.

Mr. Chairman, it is not surprising that the Biological and Environmental Research program at DOE is targeted with harmful provisions in this bill. It is targeted because the program is a leader in advancing our understanding of the causes and impacts of climate change.

Hiding our heads in the sand will not solve anything, and it certainly won’t stop the Earth from warming. Allowing partisan politics to skew the scientific understanding of climate change is cynical and shortsighted.

It is especially cynical considering that in the majority’s own bill, they state that climate change is happening. They just had to take the statement out that it is caused by human beings.

The gentleman from California’s amendment would simply strike those harmful provisions so that scientists supported by BER can continue their important work without political interference.

I urge my colleagues to support this important amendment.

Mr. SMITH of Texas. Mr. Chairman, I am proud to close, so I reserve the balance of my time.

Mr. LOWENTHAL. Mr. Chair, I repeat: duplication is good science. Let me repeat that: duplication is good science.

I urge a “yes” vote on the Lowenthal amendment to maintain the Department of Energy’s ability to select scientific projects based upon scientific merit, that support the mission of the Department of Energy and the broader energy security of our country.

I yield back the balance of my time.

Mr. SMITH of Texas. Mr. Chairman, this amendment would strike good government accountability measures within the House energy bill that require DOE’s Office of Science to prioritize biological systems and genomic science. It would also strike reforms included in the America COMPETES Act that prevent duplication of research, which saves taxpayer dollars.

I encourage Members to oppose the amendment, and I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from California (Mr. LOWENTHAL).

The question was taken; and the Acting Chair announced that the noes appeared to have it.

Mr. LOWENTHAL. Mr. Chair, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from California will be postponed.

AMENDMENT NO. 9 OFFERED BY MR. GRAYSON

The Acting CHAIR. It is now in order to consider amendment No. 9 printed in part A of House Report 114–120.

Mr. GRAYSON. Mr. Chair, I have an amendment at the desk.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 133, before line 19, insert the following new section:

SEC. 604. ENERGY INNOVATION HUBS.

(a) AUTHORIZATION OF PROGRAM.—

(1) IN GENERAL.—The Secretary of Energy shall carry out a program to enhance the Nation’s energy security by making awards to consortia for establishing and operating Energy Innovation Hubs to conduct and support, whenever appropriate, research, development and demonstration of advanced energy technologies within the technology development focus designated under subsection (a)(2). Each Hub shall—

(A) encourage collaboration and communication among the consortia and entities of the consortium and awardees by conducting activities whenever practicable at one centralized location;

(B) develop and publish on the Department of Energy’s website proposed plans and programs;

(C) submit an annual report to the Secretary summarizing the Hub’s activities, including detailing organizational expenditures, and describing each project undertaken by the Hub; and

(D) monitor project implementation and coordination.

(2) CONFLICTS OF INTEREST.—

(A) PROCEDURES.—Hubs shall maintain conflict of interest procedures, consistent with those of the Department of Energy, to ensure that employees and consortia designers for Hub activities who are in decision-making capacities during the Hub’s activities, including scientific research, do not have conflicts of interest.

(B) DISQUALIFICATION AND REVOCATION.—

The Secretary may disqualify an application or discontinue funding if the Secretary determines that the Hub and its awardees have a conflict of interest.

(C) TERM.—Nothing in this section shall prohibit the use of funds provided pursuant to this section, or any Federal funds provided to the Hub, for research or for the construction of a test bed or for renovations to existing buildings or facilities for purposes of research if the Secretary determines that the test bed or renovations are limitations on the scale necessary for the research to be conducted.

(d) HUB OPERATIONS.—

(1) IN GENERAL.—Each Hub shall conduct or provide for multidisciplinary, collaborative research, development, and demonstration of advanced energy technologies within the technology development focus designated under subsection (a)(2). Each Hub shall—

(A) encourage collaboration and communication among the consortia and entities of the consortium and awardees by conducting activities whenever practicable at one centralized location;

(B) develop and publish on the Department of Energy’s website proposed plans and programs;

(C) submit an annual report to the Secretary summarizing the Hub’s activities, including detailing organizational expenditures, and describing each project undertaken by the Hub; and

(D) monitor project implementation and coordination.

(2) CONFLICTS OF INTEREST.—

(A) PROCEDURES.—Hubs shall maintain conflict of interest procedures, consistent with those of the Department of Energy, to ensure that employees and consortia designers for Hub activities who are in decision-making capacities during the Hub’s activities, including scientific research, do not have conflicts of interest.

(B) DISQUALIFICATION AND REVOCATION.—

The Secretary may disqualify an application or discontinue funding if the Secretary determines that the Hub and its awardees have a conflict of interest.

(C) TERM.—Nothing in this section shall prohibit the use of funds provided pursuant to this section, or any Federal funds provided to the Hub, for research or for the construction of a test bed or for renovations to existing buildings or facilities for purposes of research if the Secretary determines that the test bed or renovations are limitations on the scale necessary for the research to be conducted.

(e) TERMINATION.—

Consistent with the existing authorities of the Department, the Acting Chair announced that the lowenthal Hub would not be operating Hub for cause during the performance period.

(f) DEFINITIONS.—

For purposes of this section—

(1) ADVANCED ENERGY TECHNOLOGY.—The term “advanced energy technology” means—

(i) that produces energy from solar, wind, geothermal, biomass, tidal, wave, ocean, or other renewable energy resources;

(ii) that produces nuclear energy;

(iii) for carbon capture and sequestration; and

(iv) that enables advanced vehicles, vehicle components, and related technologies that result in significant energy savings;

(b) research, development, and demonstration activities necessary to ensure the long-term, secure, and sustainable supply of energy resources;

(c) another innovative energy technology area identified by the Secretary.

Mr. GRAYSON. Mr. Chair, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from California will be postponed.
The term "Hub" means an Energy Innovation Hub established or operating in accordance with this section, including any Energy Innovation Hub existing as of the date of enactment of this Act.

(3) Qualifying entity. The term "qualifying entity" means—
(A) an institution of higher education;
(B) an appropriate State or Federal entity, including the Department of Energy Federally Funded Research and Development Centers;
(C) a nongovernmental organization with expertise in advanced energy technology research, development, demonstration, or commercial application; or
(D) any other entity that the Secretary considers appropriate.

The Acting CHAIR. Pursuant to House Resolution 271, the gentleman from Florida (Mr. Grayson) and a Member opposed each will control 5 minutes.

Mr. Grayson. Mr. Chair, this amendment seeks to authorize the Energy Innovation Hubs program within the Department of Energy.

I would like to thank Chairman Smith and his staff for working with me to craft this amendment. Because I know that the chairman supports the amendment, I will keep my remarks brief.

Energy Innovation Hubs are collaborative research centers that bring together teams of scientists and engineers to accelerate discoveries that address critical energy issues. They were created in 2010 and have received almost $500 million in funding already.

The four hubs currently focus on everything from improving nuclear reactors through computer-based modeling to improving battery technology for transportation and the grid.

The amendment before us would not only authorize this important research but also provide critical guidelines and accountability measures for the program.

A rigorous merits-based renewal process would be implemented. The Secretary would be empowered to terminate underperforming hubs at any time, and funds would be prohibited from being used for the purpose of constructing buildings so that every taxpayer dollar goes toward the research for which it is intended.

Again, I thank the gentleman from Texas, Chairman Smith, for his help and guidance in developing this amendment. I urge my colleagues to support it.

I reserve the balance of my time.

Mr. Smith of Texas. Mr. Chairman, I claim the time in opposition to the amendment, though I do not oppose the amendment.

The Acting CHAIR. Pursuant to House Resolution 271, the gentleman from Oregon (Ms. Bonamici) and a Member opposed each will control 5 minutes.

Ms. Bonamici. Mr. Chairman, I yield myself such time as I may consume.

I rise today to address an issue of national security.

The Department of Defense is the world’s largest institutional consumer of fuel. As a result, the volatility of oil prices directly affects military readiness. Every $10 increase on a barrel of oil costs the Department of Defense an additional $1.3 billion a year.

To reduce our military’s and our Nation’s dependence on a single source of fuel, the Departments of Defense, Energy, and Agriculture have been working closely over the past 4 years with the private sector to scale up an advanced "drop-in" biofuel production capability.

One of those projects is in Lakeview, Oregon, where a forest biomass plant will produce fuel for the U.S. Navy and Marines. It is one of three companies selected by the Department of Defense, Energy, and Agriculture to produce cost-competitive drop-in military biofuels. Once at scale, these bio refineries will have a combined capacity to produce 100 million gallons of fuel for military ships and planes while reducing their greenhouse gas emissions by 50 percent compared to conventional fuels.

Our military and Nation are faced with a growing global demand for energy. We need to have a greater emphasis on renewable energy and energy-efficient technologies. Yet, without any apparent logic, this bill would prohibit the Department of Energy—the lead agency with deep technical expertise in the area—from partnering with the Department of Defense to develop biofuels.

The amendment that I am offering strikes this prohibition and would allow the Departments of Energy and Defense to continue their efforts to learn from each other's expertise.

Mr. Chairman, I will introduce into the RECORD a letter opposing the prohibition from the Truman National Security Project, where these companies are retired military—that 4 years of partnership between the Departments of Defense, Energy, and Agriculture have seen impressive progress in the development of advanced drop-in biofuels that will allow the military to turn away from fossil fuels as a fuel source. Members of the military from every rank and service have spoken out in favor of the continued investment in biofuels for the reasons of cost and capability.

Hon. Lamar Smith, Hon. Eddie Bernice Johnson, House Committee on Science, Space, and Technology, Washington, DC.

Dear Chairman Smith and Ranking Member Johnson:

The American military is the greatest fighting force the world has ever seen. The United States Congress has the responsibility of empowering our military leaders by equipping that force with the tools they need to remain relevant in a world of ever-increasing security threats.

Accordingly, we urge you to withdraw the America COMPETES Reauthorization Act of 2015, which would bar the Department of Energy from continuing a four-year collaboration with the Departments of Defense and Agriculture to develop cost-effective advanced biofuels.

Time and again throughout our history, the military has chosen to innovate towards new solutions. While the advances resulting from these efforts have often benefited our nation as a whole, they are undertaken not for the sake of novelty or adventure but to keep operational or tactical need. Advanced biofuels fill that need. Reducing the dangerous dependence of the U.S. military on fossil fuels.

The Department of Defense is the world’s largest institutional consumer of fuel. With approximately $15 billion per year budgeted simply to maintain freedom of movement, the U.S. military is dangerously sensitive to the volatility of oil prices; a $10 change in the price per barrel of crude oil leaves the Department of Defense with a $1.3 billion shortfall and sees increased profits to countries who oppose our interests around the world. And because oil is priced in a global market, no amount of domestic production can insulate the military from its effects.

We have learned firsthand that oil truly is the Achilles’ heel of our military. With most
of the world’s oil traveling through two or three major chokepoints, the military must allocate significant manpower and resources to keeping those sea lanes open and secure. Moreover, as the strategic transitions from large-scale land engagements in the Middle East and towards a broader engagement in the Asia-Pacific, the costs and logistical challenges associated with moving fuel over thousands of miles of ocean will only increase.

The threat of oil dependence along with the need for energy security isn’t going away any time soon. And we shouldn’t impede progress of alternatives that are moving forward now. Four years of partnership between the Department of Defense, Energy, and Agriculture have seen impressive progress in the development of advanced, “drop in” biofuels that will allow the military to turn away from an outdated fuel source. Top line military platforms as diverse as the supersonic F/A–18 “Green Hornet,” the Air Force’s F16 fighter jets, the MH-60S Seahawk helicopter, the AV–8B Harrier, the Fire Scout unmanned vehicle, the Riverine Command Boat (RCB-X) and the frigate USS Ford have all operated at full capacity and with no adverse side effects using American-made biofuels.

Members of the military from every rank and service have spoken out in favor of the continued investment in biofuels for reasons of cost and capabilities alike. These voices, rather than political leanings or parochial interests, must now have national security policy accorded. Accordingly, we urge you to withdraw the America COMPETES Reauthorization Act of 2015 and to ensure that the U.S. military is free to pursue the fuel sources its leaders deign necessary for maximum operational and tactical success.

Respectfully,

MICHAEL BREEN, Executive Director, Truman National Security Project Army Captain (Swr.), RADM LEENDERT “LEN” HERING, USN (Ret.), LT GEN NORMAN SKIP, USAF (Ret.),

Ms. BONAMICI. I urge adoption of the amendment, and I reserve the balance of my time.

Mr. SMITH of Texas. Mr. Chairman, I claim the time in opposition to the amendment.

The Acting CHAIR. The gentleman is recognized for 5 minutes.

Mr. SMITH of Texas. I yield 4 minutes to the gentleman from Texas (Mr. WEBER), who is the chairman of the Energy Subcommittee of the Science, Space, and Technology Committee.

Mr. WEBER of Texas. I thank the gentleman from Texas for yielding to me.

Mr. Chair, I rise today in opposition to the gentleman’s amendment and in support of the underlying reforms included in H.R. 1806, the America COMPETES Reauthorization Act of 2015.

This amendment would remove a limitation included in the underlying bill that prevents the Department of Energy from using funding authorized for the EERE Biofuels program to conduct commercialized production of biofuels for defense purposes.

The fact is that EERE already spends too much of their current budget on deployment and commercialization of renewable and energy efficient technologies instead of research and development.

The DOE’s ongoing effort to fund commercial-scale biofuels production for military purposes in cooperation with the Department of Defense and USDA, through the Bioenergy Technologies Office, study concluded that the Department of Defense paid $150 per gallon for 1,500 gallons of alternative jet fuel derived from algal oil. Taxpayers should be outraged.

The other side may be, in fact, promoting their global warming theory because when taxpayers find out about this kind of waste, there are going to be a lot of them hot under the collar.

The Department of Energy should focus on research and development, not commercial biofuels production. This limitation is consistent with the broader goals of the America COMPETES Reauthorization Act, which prioritizes research and development in all R&D program areas while cutting spending on deployment and commercialization.

I am aghast, Mr. Chairman, that the other side somehow thinks Congress shouldn’t be paying attention to the way taxpayer dollars are spent.

For these reasons, I encourage my colleagues to vote “no” on this amendment.

Ms. BONAMICI. Mr. Chair, may I please inquire as to the amount of time remaining.

The Acting CHAIR. The gentlewoman from Oregon has 2½ minutes remaining.

Ms. BONAMICI. I yield 2 minutes to the gentleman from California (Mr. PETERS), a member of the Science, Space, and Technology Committee.

Mr. PETERS. I thank the gentlewoman for yielding.

Mr. Chairman, I rise as a cosponsor of this amendment, and I am glad to be working with Congresswoman BONAMICI and my colleagues on the Armed Services Committee, Ranking Member ADAM SMITH.

Our amendment simply allows the Department of Energy to continue its collaborative work with the Department of Defense to produce biofuels for the military.

The Department of Defense is the single largest institutional consumer of fuel in the world, and this is all the more reason why our military spends about $20 billion a year on energy, $16 billion of which goes to oil fuels.

As we have seen in recent years, global oil markets are volatile. And despite aggressive production increases in the United States, according to the Energy Information Administration, last year, our net imports of petroleum were 5 million barrels per day, with our top five suppliers being Canada, Saudi Arabia, Mexico, Venezuela, and Iraq. That reliance on a volatile, foreign-produced source of fuel puts our national security at risk, particularly when we face dynamic, new threats from nonstate actors such as ISIS, al Qaeda, and individual terrorists who can disrupt oil production and supply lines in new and intimidating ways.

The constraints of depending so heavily on a single source of fuel also puts our readiness at risk, a problem that will only increase when we are required to respond to international incidents across the globe at a moment’s notice and as our military makes its strategic pivot toward the vast Pacific Ocean.

Instead of standing idly by and waiting for fuel supplies to disappear, Congress should be laying the groundwork for more strategic public-private partnerships to develop like those in San Diego, not mandating that they cannot exist.

The military is not pursuing this fuel supply diversity because they are tree-hugging environmentalists but because it is a national security imperative.

Foolishly, today’s COMPETES Act would bar the Department of Defense from working with the Department of Energy on developing biofuels. Why would we undercut an effort that our military commanders are for and say will save lives?

Mr. SMITH of Texas. Mr. Chairman, I reserve the balance of my time.

Ms. BONAMICI. Mr. Chairman, I yield 30 seconds to the gentleman from Virginia (Mr. BEYER), a member of the Science, Space, and Technology Committee.

Mr. BEYER. Mr. Chairman, I thank my dear friend, Ms. BONAMICI, for yielding to the gentleman from Texas for his leadership on this important issue.

Mr. Chair, I rise in strong support of this commonsense amendment to allow
the Department of Energy and the Department of Defense to continue working together to develop biofuel options for our Nation’s military.

DOD’s reliance on a single source of fuel deepens dependence on foreign oil, threatens our national security, and contributes significantly to spending. Why would we not want the Department of Energy with their deep technical expertise in this area to assist DOD to create alternatives for petroleum-based fuels? It makes no sense, and I urge your colleagues to support this amendment.

Ms. BONAMICI. Mr. Chairman, I yield back the balance of my time.

Mr. SMITH of Texas. Mr. Chairman, in closing, the gentlewoman’s amendment would remove an important limitation from the underlying bill that prevents the Department of Energy from spending research dollars to fund commercial-scale biofuels development for defense purposes. DOE should focus on innovative research and development to increase commercial production of any particular form of energy.

For those reasons, Mr. Chairman, I encourage Members to oppose this amendment, and I yield back the balance of my time.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Oregon (Ms. BONAMICI) were postponed.

AMENDMENT NO. 11 OFFERED BY MR. BEYER

The Acting CHAIR. The question was taken; and the Acting CHAIR announced that the noes appeared to have it.

Ms. BONAMICI. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. Pursuant to House Resolution 271, the gentleman from Virginia (Mr. BEYER) and a Member of the Committee (Ms. BONAMICI) will control 5 minutes.

The Chair recognizes the gentleman from Virginia.

Mr. BEYER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am proud to speak in support of our amendment, which would restore the ARPA-E goal of developing energy technologies that result in reductions in energy-related emissions, including greenhouse gases. I believe this is an important and urgent area of research and that it should remain explicitly stated in the statute as a goal for ARPA-E.

When I look at the existing statute, it says:

The goals of ARPA-E shall be reductions of imports of energy from foreign sources; reductions of energy-related emissions, including greenhouse gases; and improvement in the energy efficiency of all economic sectors. These are the three goals which have been removed from the current bill.

Global carbon dioxide concentrations have risen more than 120 parts per million since preindustrial times, half of that arrived just since 1980. The burning of coal and natural gas is driving the acceleration of greenhouse gas concentrations in our atmosphere. Just 2 weeks ago, NOAA reported that the monthly global average of concentration of carbon dioxide has surpassed 400 parts per million. The last time this happened was over 1 million years ago.

We must look to develop alternative energy sources that will reduce man-made emissions. ARPA-E is a unique agency that can help us with this mission. Since 2009, it has funded over 400 potentially transformational energy technology projects. A number of these projects have spurred follow-on private sector funding, and a number of ARPA-E awardees have formed startup companies or partnered with other parts of the government to advance their technologies.

Reducing energy-related emissions, including greenhouse gases, is an important component to our Nation’s economic and energy security. Therefore, Mr. Chairman, I urge my colleagues to support our amendment to reinstate these three goals for ARPA-E, and I reserve the balance of my time.

Mr. SMITH of Texas. Mr. Chairman, I rise in opposition to the amendment.

The Acting CHAIR. The gentleman is recognized for 5 minutes.

Mr. SMITH of Texas. Mr. Chairman, I yield such time as he may consume to the gentleman from Georgia (Mr. LOUDERMILK), who is also the chairman of the Oversight Subcommittee of the Science, Space, and Technology Committee.

Mr. LOUDERMILK. Mr. Chairman, I rise to oppose this amendment to H.R. 1806 because I support research that will enhance both the economic security and the energy security of the United States.

The original America COMPETES Act, which established the Advanced Research Projects Agency within the Department of Energy, ARPA-E, required the Department of Energy, ARPA-E, to competitively pursue projects that reduce greenhouse gases. The bill before us today, the America COMPETES Reauthorization Act, allows any advanced energy technology that could enhance U.S. economic and energy security to compete for ARPA-E funding. This levels the playing field and ensures that ARPA-E funds research with the greatest potential to have a positive impact on the American economy.

The COMPETES Act provides a balanced approach to ARPA-E by reprioritizing funding towards innovative projects that are truly in need of Federal research dollars. The bill also removes restrictions that allow the administration to play favorites in the energy sector. However, this amendment would strike the language which expands the ARPA-E project eligibility. As a result, this amendment would then limit innovative research and development.

With all of the national security challenges we face today, from terrorism, to cybersecurity breaches, to our skyrocketing national debt, we should focus our attention on broadening our energy base and achieving energy independence, not limiting ourselves to one small area of environmental science. I believe we must adopt an all-of-the-above energy strategy that improves our energy security and emphasizes all energy opportunities, including those which reduce greenhouse gases.

Congress should not put in place arbitrary limits on innovation that will prevent groundbreaking technologies from accessing the energy sector. I urge my colleagues to oppose this amendment.

Mr. BEYER. Mr. Chair, I yield 1 minute to the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON), the ranking member of the Science, Space, and Technology Committee.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, it is deeply troubling to me that this amendment had to be offered. This amendment fixes a provision in this bill that strips away a foundational component of the ARPA-E program. As virtually every preeminent climatologist in the world agrees, greenhouse gas emissions are growing so rapidly and are a growing threat to our way of life. Why wouldn’t we want one of the most innovative agencies to develop our energy base and achieving energy independence that could address this critical issue?

ARPA-E has made good funding choices supporting valuable research, as proven by its impressive track record of successful projects since it was first authorized. I certainly see no value in changing something that has serious energy policy analyst believes is broken.

Mr. DESAULNIER’s and Mr. BEYER’s amendment sets this clearly misguided policy aside. I enthusiastically support it and urge my colleagues to do so as well.

Mr. SMITH of Texas. Mr. Chairman, I reserve the balance of my time.

Mr. BEYER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I listened with great interest to the rebuttal of the alternative argument from my friend, Mr. LOUDERMILK, and I found myself agreeing with almost everything that he said, but misunderstanding why retaining these three goals somehow make favorites, how they created arbitrary limits on innovation, and how they opposed efforts to find our economic and
energy security. The purpose of the amendment is to recognize that reduc-
ing dependence on foreign oil, that try-
ing to find ways to limit greenhouse
 gases, and improving the energy effi-
ciency of all economic sectors are wor-
gthy goals.

Perhaps what we need to do is add a
fourth one, which I would be happy to
place first if the chairman would agree,
that says the goals will be, first, to de-
velop any breakthroughs in innovation
that have the economic and energy sec-
urity of the Nation so that there is no
playing of favorites and there are no
arbitrary limitations. If we could work
that out, that would be great. Other-
wise, Mr. Chairman, I urge my col-
leagues to support the amendment as
offered, and I yield back the balance of
my time.

Mr. SMITH of Texas. Mr. Chairman,
the gentleman’s amendment would re-
move key policy reforms to ARPA-E
from the COMPETES bill and instead
place limitations on the research and
development conducted at ARPA-E.
Federally funded research should in-
clude innovative technologies for all
forms of energy, not just the Presi-
dent’s personal preferences. So I en-
courage Members to oppose the amend-
ment.

I yield back the balance of my time.

The Acting CHAIR. The question is
on the amendment offered by the gen-
tleman from Virginia (Mr. BEYER).

The question was taken; and the Act-
ing Chair announced that the noes ap-
pared to have it.

Mr. BEYER. Mr. Chairman, I demand
a recorded vote.

The Acting CHAIR. Pursuant to
clause 6 of rule XVIII, further pro-
ceedings on the amendment offered by
the gentleman from Virginia will be
postponed.

AMENDMENT NO. 12 OFFERED BY MS. EDDIE
BERNICE JOHNSON OF TEXAS

The Acting CHAIR. It is now in order
to consider amendment No. 12 printed
in part VI of the Report 114–120 of
Ms. EDDIE BERNICE JOHNSON of
Texas. Mr. Chairman, I have an amend-
ment at the desk.

The Acting CHAIR. The Clerk will
designate the amendment.

The text of the amendment is as fol-
ows:

Strike all after the enacting clause and in-
sert the following:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.
(a) Short Title.—This Act may be cited as the “America Competes Reauthorization Act of 2015”.
(b) Table of Contents.—The table of con-
ents for this Act is as follows:

TITLE I—OSTP; GOVERNMENTWIDE SCIENCE

Subtitle A—General Provisions
Sec. 101. Federal research and development funding.
Sec. 102. National Science and Technology Council amendments.
Sec. 103. Review of Federal regulations and reporting requirements.
Sec. 104. Amendments to prize competitions.
Sec. 105. Coordination of international science and technology partner-
ships.

Subtitle B—Reauthorization of the National Nanotechnology Initiative
Sec. 111. Short title.
Sec. 112. National Nanotechnology Program amendments.
Sec. 113. Societal dimensions of nanotechno-

TITLE II—STEM EDUCATION AND DIVERSITY
Subtitle A—STEM Education and Workforce
Sec. 201. Sense of Congress.
Sec. 202. Coordination of Federal STEM edu-

TITLE III—NATIONAL SCIENCE FOUNDATION
Subtitle A—General Provisions
Sec. 304. Authorization of appropriations.

SEC. 101. FEDERAL RESEARCH AND DEVELOP-
MENT FUNDING.

Congress finds the following:

(1) The predominant driver of gross domes-
tic product growth over the past half cen-
tury has been scientific and technological
advancement.

(2) Investments in research and develop-
ment have also delivered significant benefits
for national security, health, energy secu-
ry, education, and the personal well-being of
all Americans.

(3) Virtually every new technological prod-
uct is traceable to a research discovery,
often one pursued with no application in
mind.

(4) Nondefense Federal research and devel-
opment accounts for only 1.7 percent of the

CONGRESSIONAL RECORD — HOUSE
SEC. 102. NATIONAL SCIENCE AND TECHNOLOGY AMENDMENTS.

Section 401 of the National Science and Technology Policy, Organization, and Priorities Act of 1977 (42 U.S.C. 6651) is amended—

(1) in subsection (a), by striking “Federal Coordinator for Science, Engineering, and Technology” and inserting “National Science and Technology Council”; and

(2) in subsection (b), by striking “Engineering and Development Administration” and inserting “Department of Energy, and any other agency designated by the President”; and

(3) in subsection (c)—

(A) by striking “engineering, and technology” and inserting “engineering, technology, innovation, and STEM education”;

(B) by striking “types” after “following”;

(C) by redesigning paragraphs (3) and (4), as paragraphs (4) and (5), respectively; and

(D) by inserting after paragraph (2) the following new paragraph:

“(3) address research needs identified under paragraph (2) through appropriate funding mechanisms, which may include solicitations involving 2 or more agencies and public-private partnerships.”

SEC. 103. REVIEW OF FEDERAL REGULATIONS AND REPORTING REQUIREMENTS.

(a) ESTABLISHMENT.—The Director of the Office of Science and Technology Policy, in collaboration with the Office of Management and Budget’s Agency Good Guidance Practices bulletin; and

(b) RESPONSIBILITIES.—The working group established or designated under subsection (b)(3), the working group shall—

(1) periodically review all Federal regulations and reporting requirements that affect the conduct of United States research in an environment; and

(2) identify any specific regulations which could be refocused on performance-based goals rather than continuing to fit those regulations to diverse research environments; and

(3) report annually to the Congress on the results of the review and recommendations developed under paragraph (1) and (2).

(b) in paragraph (1)(B), by inserting “prize” before “competition”;

(c) in paragraph (2)(A), by inserting “prize” before “competition” both places it appears;

(d) by redesigning paragraph (3) as paragraph (4); and

(e) by inserting after paragraph (2) the following new paragraph:

“(3) WAIVER.—An agency may waive the requirement under paragraph (2). The annual report under subsection (p) shall include a list of such waivers granted during the preceding fiscal year, along with an explanation of the reasons for granting the waivers.”;

(f) in subsection (e)(1) by amending paragraph (2) to read as follows:

“(2) INTELLECTUAL PROPERTY.—

(A) LICENSES.—The Federal Government may negotiate a license for use of intellectual property developed by a participant for a prize competition.

(B) OTHER CONDITIONS.—A Federal agency or agencies in cooperation may require participants to agree in advance to a specific approach to intellectual property as a condition for eligibility to participate in a prize competition.”;

(g) in subsection (k)—

(A) in paragraph (2)(A), by inserting “prize” before “competition”; and

(B) in paragraph (3), by inserting “prize” before “competitions” both places it appears;

(h) in subsection (l), by striking all after “any party enter into” both places it appears;

(i) by striking all after “competitions,”;

(j) in subsection (m)—

(1) by amending paragraph (1) to read as follows:

“(1) IN GENERAL.—Support for a prize competition under this section, including financial support for the design and administration of a prize competition or funds for a cash prize purse, may consist of Federal appropriated funds and funds provided by private sector for-profit and nonprofit entities. The Head of an agency may accept funds from other Federal agencies, private sector for-profit entities, and nonprofit entities, to be used to help agencies to provide funding for Appropriations Acts, to support such prize competitions. The head of an agency may not provide funding to any private sector for-profit or nonprofit entity in return for a donation.”;

(k) in paragraph (2), by striking “prize award” and inserting “no prize competition”; and

(l) in paragraph (3)(A)—

(i) by striking “No prize” and inserting “No prize competition”;

(ii) in paragraph (1), by striking “prize” and inserting “the prize”;

(iii) in paragraph (2), by striking “prize” and inserting “the prize purse”;

(iv) in paragraph (3), by striking “prize” and inserting “the prize purse”;

(v) in paragraph (4), by striking “prize” and inserting “the prize purse”;

(vi) in paragraph (5), by striking “prize” and inserting “the prize purse”;

(vii) in paragraph (6), by striking “prize” and inserting “the prize purse”;

(viii) in paragraph (7), by striking “prize” and inserting “the prize purse”;

(ix) in paragraph (8), by striking “prize” and inserting “the prize purse”;

(x) in paragraph (9), by striking “prize” and inserting “the prize purse”;

(xi) in paragraph (10), by striking “prize” and inserting “the prize purse”;

(xii) in paragraph (11), by striking “prize” and inserting “the prize purse”;

(xiii) in paragraph (12), by striking “prize” and inserting “the prize purse”;

(xiv) in paragraph (13), by striking “prize” and inserting “the prize purse”;

(xv) in paragraph (14), by striking “prize” and inserting “the prize purse”;

(xvi) in paragraph (15), by striking “prize” and inserting “the prize purse”;

(xvii) in paragraph (16), by striking “prize” and inserting “the prize purse”;

(xviii) in paragraph (17), by striking “prize” and inserting “the prize purse”;

(xix) in paragraph (18), by striking “prize” and inserting “the prize purse”;

(xx) in paragraph (19), by striking “prize” and inserting “the prize purse”;

(2) INTELLECTUAL PROPERTY.—

(A) LICENSES.—The Federal Government may negotiate a license for use of intellectual property developed by a participant for a prize competition.

(B) OTHER CONDITIONS.—A Federal agency or agencies in cooperation may require participants to agree in advance to a specific approach to intellectual property as a condition for eligibility to participate in a prize competition.”;

(g) in subsection (k)—

(A) in paragraph (2)(A), by inserting “prize” before “competition”; and

(B) in paragraph (3), by inserting “prize” before “competitions” both places it appears;

(C) by redesigning paragraph (3) as paragraph (4); and

(D) by inserting after paragraph (2) the following new paragraph:

“(3) WAIVER.—An agency may waive the requirement under paragraph (2). The annual report under subsection (p) shall include a list of such waivers granted during the preceding fiscal year, along with an explanation of the reasons for granting the waivers.”;

(E) in subsection (e)(1) by amending paragraph (2) to read as follows:

“(2) INTELLECTUAL PROPERTY.—

(A) LICENSES.—The Federal Government may negotiate a license for use of intellectual property developed by a participant for a prize competition.

(B) OTHER CONDITIONS.—A Federal agency or agencies in cooperation may require participants to agree in advance to a specific approach to intellectual property as a condition for eligibility to participate in a prize competition.”;

(C) in paragraph (2), by striking “prize” and inserting “the prize” and inserting “the prize purse”;

(D) in paragraph (3)(A), by striking “No prize” and inserting “No prize competition”;

(E) in paragraph (3)(B), by striking “prize” and inserting “a cash prize purse”;

(F) in paragraph (4)(A), by inserting “competition” after “prize”;

(G) in paragraph (4)(B), by striking “cash prizes” and inserting “cash prize purse”;

(H) in paragraph (5)(A), by inserting “contract vehicle”;

(I) in subsection (o)(1), by striking “prize” and inserting “prize competition” or providing a prize and inserting “a prize competition or providing a cash prize purse”; and

(J) in subsection (p)—

(A) in the heading, by striking “ANNUAL” and inserting “BIENNIAL”;

(B) in paragraph (3)(Bi), by striking “contract vehicle”;

(C) by striking “each of” and inserting “of each odd-numbered year”; and

(D) by inserting “prize” before “competition” both places it appears; and

(E) in subsection (m)—

(A) by amending paragraph (1)B, by inserting “prize” before “competition”;

(B) in paragraph (2)(A), by inserting “prize” before “competition” both places it appears;

(C) by redesigning paragraph (3) as paragraph (4); and

(D) by inserting after paragraph (2) the following new paragraph:

“(3) WAIVER.—An agency may waive the requirement under paragraph (2). The annual report under subsection (p) shall include a list of such waivers granted during the preceding fiscal year, along with an explanation of the reasons for granting the waivers.”;

(E) in subsection (e)(1) by amending paragraph (2) to read as follows:

“(2) INTELLECTUAL PROPERTY.—

(A) LICENSES.—The Federal Government may negotiate a license for use of intellectual property developed by a participant for a prize competition.

(B) OTHER CONDITIONS.—A Federal agency or agencies in cooperation may require participants to agree in advance to a specific approach to intellectual property as a condition for eligibility to participate in a prize competition.”;

(C) in paragraph (2), by striking “prize” and inserting “the prize” and inserting “the prize purse”;

(D) in paragraph (3)(A), by striking “No prize” and inserting “No prize competition”;

(E) in paragraph (3)(B), by striking “prize” and inserting “a cash prize purse”;

(F) in paragraph (4)(A), by inserting “competition” after “prize”;

(G) in paragraph (4)(B), by striking “cash prizes” and inserting “cash prize purse”;

(H) in subsection (n), by inserting “for both profit and nonprofit entities” after “contract vehicle”;

(I) in subsection (o)(1), by striking “prize” or providing a prize and inserting “a prize competition or providing a cash prize purse”; and

(J) in subsection (p)—

(A) in the heading, by striking “ANNUAL” and inserting “BIENNIAL”;

(B) in paragraph (3)(Bi), by striking “contract vehicle”;

(C) by striking “each of” and inserting “of each odd-numbered year”; and
(ii) by striking “preceding fiscal year” and inserting “preceding 2 fiscal years”; and
(C) in paragraph (2)—
(1) in subparagraph (C), by striking “cash prizes in both places if: occurs and inserting “cash prize purses”; and
(2) by adding at the end the following new subparagraph:
“(D) the ongoing and new partnerships established by the National Nanotechnology Coordination Office shall be supported by funds from each agency participating in the Program.”

SEC. 111. SHORT TITLE.
This subtitle may be cited as the “National Nanotechnology Amendment Act of 2015.”

SEC. 112. NATIONAL NANOTECHNOLOGY PROGRAM AMENDMENTS.
The 21st Century Nanotechnology Research and Development Act (15 U.S.C. 7501 et seq.) is amended—
(1) in section 2—
(A) in subsection (c), by amending paragraph (4) to read as follows:
“(4) develop, every 3 years thereafter, a strategic plan to guide the activities described under subsection (b) that specifies near-term and long-term objectives for the Program, the anticipated timeframe for achieving the near-term objectives, and the metrics to be used for assessing progress toward the objectives, and that describes—
“(A) how the Program will move results out of the laboratory and into applications for the benefit of society, including through the activities of committees involved in the development of standards for nanotechnology, research, development, and technology transition initiatives supported by the States; and
“(B) proposed research in areas of national importance in accordance with the requirements of section 116 of the National Nanotechnology Initiative Amendments Act of 2015.”

(B) in subsection (d)—
(i) by redesignating paragraphs (1) through (5) as paragraphs (2) through (6), respectively;
(ii) by inserting before paragraph (2), as redesignated by clause (i), the following:
“(1) the Program, for the previous fiscal year, for each agency that participates in the Program, and for each program component area;”; and
(iii) by amending paragraph (6), as redesignated by clause (i), to read as follows:
“(6) an assessment of how Federal agencies are implementing the plan described in subsection (c)(7) and a description of the amount of funds from the Small Business Innovative Research and Small Business Technology Transfer Research funds supporting the plan.”;

(C) by adding at the end the following new subsection:
“(e) STANDARDS SETTING.—The agencies participating in the Program shall support the activities of committees involved in the development of standards for nanotechnology and may reimburse the travel costs of scientists and engineers who participate in activities of such committees.”;

(2) in section 3—
(A) by amending subsection (b)(1) to read as follows:
“(B) ORGANIZATION.—Projects shall be grouped by major objective as defined by the research plan required under section 113(b) of the 21st Century Nanotechnology Research and Development Act (15 U.S.C. 7501 et seq.) is amended—
(1) DATABASE.—
(1) IN GENERAL.—The National Nanotechnology Coordination Office shall develop and maintain a database accessible by the public on the reporting agency’s website. The report shall also be made available to the public on the reporting agency’s website. The report shall contain a description of—
(1) the priorities and policies established by subsection (d)(2); and
(2) the ongoing and new partnerships established since the last update to the report.
(2) ACCESIBLE FACILITIES.—

(2) the ongoing and new partnerships established since the last update to the report.
(2) ACCESIBLE FACILITIES.—
“(A) IN GENERAL.—The National Nanotechnology Coordination Office shall develop, maintain, and publicize information on nanotechnology facilities supported under the Program, which may include information on nanotechnology facilities supported by the States, that are accessible for use by individuals from academic institutions and from the private sector.

“(B) WEBSITES.—The National Nanotechnology Coordination Office shall maintain active web links to the websites for each of these facilities and shall work with each facility supported under the Program to ensure that each facility publishes on its respective website updated information on the terms and conditions of how the use of the facility, a description of the capabilities of the instruments and equipment available for use at the facility, and a description of the technical support available to assist users of the facility.

“(3) in section 4—

(A) in subsection (a), by adding at the end the following: “The co-chairs of the Advisory Panel shall meet the qualifications of Panel membership required under subsection (b) and may be members of the President’s Council of Advisors on Science and Technology. The Advisory Panel shall include members having specific qualifications tailored to enable it to carry out the requirements of subsection (b).

(B) in subsection (c)—

(i) by striking paragraph (1); and

(ii) by redesigning paragraphs (2) through (7) paragraphs (1) through (6), respectively; and

(C) by amending subsection (d) to read as follows:

(d) REPORTS.—The Advisory Panel shall report not less frequently than every 3 years, and, to the extent practicable, 1 year following review of nanotechnology research and development activities by the Office of Science and Technology Coordination, to the Committee on Science, Space, and Technology of the House of Representatives, and, to the extent practicable, 1 year following review of nanotechnology research and development activities by the Committee on Commerce, Science, and Transportation of the Senate, the Committee on Science, Space, and Technology of the House of Representatives, and other appropriate committees of the Congress.

(4) by amending section 5 to read as follows:

“SEC. 5. TRIENNIAL EXTERNAL REVIEW OF THE NATIONAL NANOTECHNOLOGY PROGRAM.

“(a) IN GENERAL.—The Director of the National Nanotechnology Coordination Office shall enter into an arrangement with the National Research Council of the National Academy of Sciences to conduct a triennial review of the Program. The Director shall ensure that the arrangement with the National Research Council is concluded in order to allow sufficient time for the reporting requirements of this section to be satisfied. Each triennial review shall include an evaluation of the—

“1. research priorities and technical content of the Program, including whether the balance of funding among program component areas, as designated according to section 2(b), is appropriate;

“2. Program’s scientific and technological accomplishments and its success in transferring technology to the private sector; and

“3. adequacy of the Program’s activities addressing ethical, legal, environmental, and other appropriate societal concerns, including human health concerns.

“(b) PROCEDURES.—The Director of the National Nanotechnology Coordination Office, working with the National Research Council and with input from the Advisory Panel, determines that a more narrowly focused review of the Program is in the best interests of the Program, the Director may enter into an arrangement with the National Research Council in lieu of a full review as required under subsection (a), but not more often than every second triennial review.

“(c) EVALUATION TO BE TRANSMITTED TO CONGRESS.—The National Research Council shall transmit a triennial review report carried out in accordance with this section in a report that includes any recommendations for changes to the Program’s mission, objectives, or governance, or for other policy or Program changes. Each report shall be submitted to the Director of the National Nanotechnology Coordination Office, who shall transmit it to the Advisory Panel, the Committee on Commerce, Science, and Transportation of the Senate, and the Committee on Science, Space, and Technology of the House of Representatives.

“(5) in section 10—

(A) by amending paragraph (2) to read as follows:

“(2) NATIONAL TECHNOLOGY.—The term ‘nanotechnology’ means the science and technology that will enable one to understand, measure, model, image, manipulate, and manufacture at the nanoscale, aimed at creating materials, devices, and systems with fundamentally new properties or functions.

“(B) WEBSITES.—The National Nanotechnology Coordination Office shall maintain, and publicize information on the performance and capabilities of the facilities supported under the Program to ensure that each facility publishes on its respective website updated information on the terms and conditions of how the use of the facility, a description of the capabilities of the instruments and equipment available for use at the facility, and a description of the technical support available to assist users of the facility.

“(6) SOCIETAL DIMENSIONS OF NANOTECHNOLOGY.

“(a) COORDINATION FOR ENVIRONMENTAL, HEALTH, AND SAFETY RESEARCH.—The Director of the Office of Science and Technology Policy shall designate an associate director of the Office of Science and Technology Policy or another appropriate senior government official as the Coordinator for Environmental, Health, and Safety Research. The Coordinator shall be responsible for oversight of the coordination, planning, and budget prioritization of research and other activities related to environmental, health, safety, and other appropriate societal concerns related to nanotechnology. The responsibilities of the Coordinator shall include—

“(1) ensuring that a research plan for the environmental, health, safety research activities required under subsection (b) is developed, updated, and implemented and that the plan is responsive to the recommendations of the Advisory Panel established under section 4(a) of the 21st Century Nanotechnology Research and Development Act (15 U.S.C. 7503); and

“(2) encouraging and monitoring the efforts of the agencies participating in the Program to allocate the level of resources and management attention necessary to ensure that the environmental, health, safety, and other appropriate societal concerns related to nanotechnology are addressed under the Program.

“(b) RESEARCH PLAN.—

“(1) IN GENERAL.—The Coordinator for Environmental, Health, and Safety Research shall convene and chair a panel comprised of representatives from the agencies funding research activities under the Environmental, Health, and Safety program component area of the Program, or any successor Program, for the component area, and from such other agencies as the Coordinator considers necessary to develop, periodically update, and coordinate the research plan for this program component area. Such panel may be a subgroup of the Nanoscale Science, Engineering, and Technology Subcommittee of the National Science and Technology Council. In developing and updating the plan, the panel convened by the Coordinator shall consult with the National Nanotechnology Research and Development Act (15 U.S.C. 7503(a)); and

“(B) the agencies responsible for environmental, health, and safety regulations associated with the production, use, and disposal of nanoscale materials and products.

“(2) DEVELOPMENT OF STANDARDS.—The plan required under paragraph (1) shall include a list of standards that the Program will help to ensure the development of—

“(A) standards related to nomenclature associated with engineered nanoscale materials;

“(B) engineered nanoscale standard reference materials for environmental, health, and safety testing; and

“(C) standards related to methods and procedures for detecting, measuring, monitoring, sampling, and testing engineered nanoscale materials for environmental, health, and safety impacts.

“(3) COMPONENTS OF PLAN.—The plan required under paragraph (1) shall, with respect to activities described in paragraphs (1) and (2),—

“(A) specify near-term research objectives and long-term research objectives;

“(B) specify milestones associated with each near-term objective and the estimated time and resources required to reach each milestone;

“(C) with respect to subparagraphs (A) and (B) describe the role of each agency carrying out or sponsoring research in order to meet the objectives specified under subparagraph (A) and to achieve the milestones specified under subparagraph (B);

“(D) specify the funding allocated to each major objective of the plan and the source of funding by agency for the current fiscal year.

“(4) TRANSMITTAL TO CONGRESS.—Not later than 6 months after the date of enactment of this Act, the plan required under paragraph (1) shall be transmitted to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science, Space, and Technology of the House of Representatives.

“(5) UPDATING AND APPENDING TO REPORT.—

“The plan required under paragraph (1) shall be updated at least every 3 years and may be updated as part of an appendix required under section 2(c)(4) of the 21st Century Nanotechnology Research and Development Act (15 U.S.C. 7503(c)).

“SEC. 114. NANOTECHNOLOGY EDUCATION.

“(a) UNDERGRADUATE EDUCATION PROGRAMS.—The Program shall support efforts to introduce nanoscale science, engineering, and technology into undergraduate science and engineering education through a variety of interdisciplinary approaches. Activities supported may include—

“(1) development of courses of instruction or modules to existing courses;

“(2) faculty professional development; and

“(3) acquisition of equipment and instrumentation suitable for undergraduate education and research in nanotechnology.

“(b) INTERAGENCY COORDINATION OF EDUCATION.—The Committee established under section 4(a) of the 21st Century Nanotechnology Research and Development Act (15 U.S.C. 7503(c)) shall coordinate, as appropriate, with the Committee established under section 101 of the America COMPETES Reauthorization Act of 2010 (42 U.S.C. 6621)
to prioritize, plan, and assess the educational activities supported under the Program.

(c) SOCIETAL DIMENSIONS IN NANOTECHNOLOGY RESEARCH ACTIVITIES.—Activities supported under the Education and Societal Dimensions program component area, or any successor program component area, that involve interdisciplinary nanotechnology education shall include education regarding the environmental, health and safety, and other societal aspects of nanotechnology.

(d) REMOTE ACCESS TO NANOTECHNOLOGY FACILITIES.—

(1) IN GENERAL.—Agencies supporting nanotechnology research facilities as part of the Program shall require the entities that operate such facilities to allow access via the Internet, and support the costs associated with the provision of such access, by secondary school students and teachers, to instruments and equipment within such facilities for educational purposes. The agencies may waive this requirement for cases when particular facilities would be inappropriate for educational purposes or the costs for providing such access would be prohibitive.

(2) PROCEDURES.—The agencies identified in paragraph (1) shall require the entities that operate such nanotechnology research facilities to establish and publish procedures, guidelines, and conditions for the submission and approval of applications for the use of the facilities for the purpose identified in paragraph (1) and shall authorize personnel who operate the facilities to provide necessary technical support to students and teachers.

SECTION 115. TECHNOLOGY TRANSFER.

(a) ACCESS TO FACILITIES.

(1) ACCESS TO FACILITIES.—In accordance with section 2(b)(7) of the 21st Century Nanotechnology Research and Development Act (15 U.S.C. 7501(b)(7)), the agencies supporting nanotechnology research facilities as part of the Program shall provide access to such facilities to companies for the purpose of access via the Internet, and may involve nonprofit research institutions as part of the Program.

(b) PROTOTYPING.—

(1) IN GENERAL.—The Program shall include at a minimum the readiness of prototypes of nanoscale products, devices, or instruments and equipment within such facilities to allow access via the Internet, and may involve nonprofit research institutions as part of the Program.

(2) DEVELOPMENT OF RESEARCH DISCOVERIES AND THE RESULTS OF RESEARCH SUPPORTED.—The Program shall include support for nanotechnology research and development activities directed toward topical and application areas that have the potential for significant contributions to national economic competitiveness and for other significant beneficial effects. The activities supported shall be designed to advance the development of research discoveries by demonstrating technical solutions to important national challenges. The Advisory Panel shall make recommendations to the Program for candidate research and development areas for support under this section.

(b) CHARACTERISTICS.—

(1) IN GENERAL.—Research and development activities under this section shall—

(A) include projects selected on the basis of applications for support through a competitive, merit-based process;

(B) involve collaborations among researchers from academic institutions and industry, and may involve nonprofit research institutions and Federal laboratories, as appropriate;

(C) when possible, leverage Federal investments through collaboration with related State initiatives; and

(D) include fostering the transfer of research discoveries and the results of technology demonstration activities to industry for commercial development.

(2) IN GENERAL.—Research and development activities supported under this section shall—

(A) include projects for which determination of the requirements for applications, review and selection of applications for support, and subsequent funding of projects shall be carried out by a collaboration of no fewer than 2 agencies participating in the Program. In selecting applications for support, and may, as appropriate, give special consideration to projects that include cost sharing from non-Federal sources.

(B) INVESTIGATOR-DRIVEN RESEARCH CENTERS.—Research and development activities under this section may be supported through investigator-driven nanotechnology research centers, under section 2(d) of the 21st Century Nanotechnology Research and Development Act (15 U.S.C. 7501(b)(4)), that are organized to investigate basic research questions and carry out technology demonstration activities in areas such as those identified in subsection (a).

SECTION 117. NANOMANUFACTURING RESEARCH.

(a) RESEARCH AREAS.—The Program shall include research on—

(1) the development of instrumentation and tools required for the rapid characterization of nanoscale materials and for monitoring of nanoscale manufacturing processes; and

(2) approaches and techniques for scaling the synthesis of new nanoscale materials to achieve industrial-level production rates.

(b) GREEN NANOTECHNOLOGY.—Interdisciplinary research centers supported under the Program in accordance with section 2(b)(4) of the 21st Century Nanotechnology Research and Development Act (15 U.S.C. 7501(b)(4)) that are focused on nanomanufacturing research shall include as part of the activities of centers—

(1) research on methods and approaches to develop environmentally benign nanoscale products and nanoscale manufacturing processes, including consideration of relevant findings and results of research supported under the Environmental, Health, and Safety Program component area, or any successor program component area;

(2) fostering the transfer of the results of such research to industry; and

(3) providing for the education of scientists and engineers through interdisciplinary studies in the principles and techniques for the design and development of environmentally benign nanoscale products and processes.

SECTION 118. DEFINITIONS.

In this subtitle, terms that are defined in section 10 of the 21st Century Nanotechnology Research and Development Act (15 U.S.C. 7509) have the meaning given those terms in that section.

Subtitle C—Engineering Biology

SECTION 121. SHORT TITLE.

This subtitle may be cited as the “Engineering Biology Research and Development Act of 2015”.

SECTION 122. FINDINGS.

The Congress makes the following findings:

(1) Cellular and molecular processes may be mimicked, or redesigned to develop new products and processes, that improve societal well-being, strengthen national security, and contribute to the economy.

(2) Engineering biology relies on scientists and engineers with a diverse and unique set of skills combining the biological, physical, and information sciences.

(3) Long-term research and development is necessary to create breakthroughs in engineering biology. Such research and development requires government investment as the benefits are too distant or uncertain for industry to support alone.

(4) The Federal Government can play an important role by facilitating the development of tools and technologies to further advance engineering biology, including multiplex user facilities that the Federal Government is uniquely able to support.

(5) Since other countries are investing significant resources in engineering biology, the United States is at risk of losing its competitive lead in this emerging area if it does not invest the necessary resources and have a national strategy.
(6) A National Engineering Biology Initiative can serve to establish new research directions and technology goals, improve interagency coordination and planning processes, enhance technology transfer, and help ensure optimal returns on the Federal investment.

SEC. 123. DEFINITIONS.

In this subtitle—

(1) the term ‘‘Advisory Committee’’ means the advisory committee designated under section 125;

(2) the term ‘‘biomanufacturing’’ means the manufacturing of products using biological manufacturing technologies;

(3) the term ‘‘engineering biology’’ means the science and engineering of cellular and molecular manufacturing technologies and the fundamental understanding of complex natural systems and to develop new and advance existing products, processes, and systems, that will contribute significantly to societal well-being, national security, and the economy;

(4) the term ‘‘Interagency Committee’’ means the interagency committee designated under section 124(e); and

(5) the term ‘‘Program’’ means the National Engineering Biology Research and Development Program established under section 124.

SEC. 124. NATIONAL ENGINEERING BIOLOGY RESEARCH AND DEVELOPMENT PROGRAM.

(a) In General.—The President shall implement a National Engineering Biology Research and Development Program to advance societal well-being, national security, and economic productivity and competitiveness through—

(1) advancing areas of research at the intersection of the biological, physical, and information sciences and engineering;

(2) supporting social science research that advances the field of engineering biology and contributes to the adoption of new products, processes, and technologies;

(3) expanding the number of researchers, educators, and students with engineering biology training;

(4) accelerating the translation and commercialization of engineering biology research and development by the private sector; and

(5) improving the interagency planning and coordination of Federal Government activities related to engineering biology.

(b) Priority Research Areas.—The activities of the Program shall include—

(1) sustained support for engineering biology research and development through—

(A) the balance of investigator- and interdisciplinary teams of investigators;

(B) projects funded under joint solicitations by a collaboration of no fewer than two Federal agencies that participate in the Program, and for the development and acquisition of any research facilities and instrumentation; and

(C) interdisciplinary research centers that are qualified to provide advice on the Program;

(2) education and training of under-graduate and minority-serving institutions; and

(3) activities to develop robust mechanisms for tracking and quantifying the outputs and information sciences and engineering;

(4) supporting proof of concept activities and the formation of startup companies in the Small Business Innovation Research and Small Business Technology Transfer Program.

(c) EXPANDING PARTICIPATION.—The Program shall include, to the maximum extent practicable, outreach to primarily under-graduate and minority-serving institutions about Program opportunities, and shall encourage the development of research collaborations between research-intensive universities and primarily undergraduate and minority-serving institutions.

(d) ETHICAL, LEGAL, ENVIRONMENTAL, AND SOCIETAL ISSUES.—Program activities shall take into account ethical, legal, environmental, and other appropriate societal issues, including the need for safeguards and monitoring systems to protect society against the unintended release of engineered materials produced, by—

(1) supporting research, including in the social sciences, and other activities address- ing ethical, legal, and other appropriate societal issues related to engineering biology, including integrating research and development, and other activities undertaken pursuant to the Program;

(2) ensuring that the results of such research are widely disseminated, including through interdisciplinary engineering biology research centers described in subsection (b)(1)(C); and

(3) the term ‘‘Program’’ means the Na- tional Engineering Biology Research and De- velopment Program.

(e) INTERAGENCY COMMITTEE.—The President shall designate an interagency com- mittee on engineering biology, which shall include representatives from the Office of Science and Technology Policy, the National Science Foundation, the Department of Energy, the National Aeronautics and Space Administration, the National Institute of Standards and Technology, the Environ- mental Protection Agency, and any other agency that the President considers appro- priate. The Director of the Office of Science and Technology Policy shall select a chair- person from among the members of the Interagency Committee. The Interagency Committee shall oversee the planning, man- agement, and coordination of the Program. The Interagency Committee shall—

(1) provide for interagency coordination of Federal engineering biology research, development, and production activities undertaken pursuant to the Program;

(2) establish and periodically update goals and priorities for the Program;

(3) develop, not later than 12 months after the date of enactment of this subtitle, and update every 5 years, a strategic plan to guide the activities of the Program and meet the goals and priorities established under paragraph (2) and describe—

(A) the Program’s support for long-term funding for interdisciplinary engineering biology research and development;

(B) the Program’s support for education and public outreach activities;

(C) the Program’s support for research and other activities that are environmental, and other appropriate societal issues related to engineering biology; and

(D) how the Program will move results out of the laboratory and into application for the benefit of society and United States competitiveness;

(4) propose an annually coordinated inter- agency budget for the Program that will en- sure the maintenance of a robust engineering biology research and development portfolio and ensure that the appropriate level of funding across the Program is sufficient to meet the goals and priorities established for the Program;

(5) develop a plan to utilize Federal pro- grams, such as the Small Business Innova- tion Research Program and the Small Busi- ness Technology Transfer Program, in sup- port of the goals described in subsection (b)(4); and

(6) in carrying out its responsibilities under this section, take into consideration the recommendations of the Interagency Committee, the results of the workshop convened under section 126, existing reports on related topics, and the views of academic, State, indus- try, and other appropriate groups.

(f) ANNUAL REPORT.—The Interagency Committee shall prepare an annual report, to be submitted to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate, on its findings of the assessment carried out under section 127, and on any recommendations for ways to improve the Program.

SEC. 125. ADVISORY COMMITTEE.

(a) In General.—The President shall des- ignate an advisory committee on engineer- ing biology research and development with at least 12 members, including representa- tives of research and academic institutions, industry, and nongovernmental entities, who are qualified to provide advice on the Program.

(b) ASSOCIATE.—The Advisory Committee shall—

(1) progress made in implementing the Program;

(2) the need to revise the Program;

(3) the balance of activities and funding across the Program;

(4) whether the Program priorities and goals developed by the Interagency Com- mittee are helping to maintain United States leadership in engineering biology;

(5) the management, coordination, imple- mentation, and activities of the Program; and

(6) whether ethical, legal, environmental, and other appropriate societal issues are ade- quately addressed by the Program.

(c) REPORTS.—The Advisory Committee shall report, not later than 12 months after the date of enactment of this Act, and thereafter not less frequently than once every 5 years, to the President, the Committee on Science, Space, and Technology of the House of Representa- tives, and the Committee on Com- merce, Science, and Transportation of the Senate, on its findings and rec- ommendations for ways to improve the Program.

(d) FEDERAL ADVISORY COMMITTEE ACT AP- PENDIX.—Section 14 of the Federal Advi- sory Committee Act (5 U.S.C. App.) shall not apply to the Advisory Committee.
SEC. 126. EXTERNAL REVIEW OF ETHICAL, LEGAL, ENVIRONMENTAL, AND SOCIETAL ISSUES.

(a) In General.—Not later than 12 months after the date of enactment of this Act, the Director of the National Science Foundation shall enter into an agreement with the National Academies of Science, Engineering, and Medicine to review the ethical, legal, environmental, and other appropriate societal issues related to engineering biology and to recommend actions to the National Science Foundation and the National Academies of Science, Engineering, and Medicine. The goals of the workshop shall be to—

(1) assess the current research on such issues;
(2) evaluate the research gaps relating to such issues; and
(3) provide recommendations on how the Program can address the research needs identified.

(b) Report to Congress.—Not later than 2 years after the date of enactment of this Act, the Director of the National Science Foundation shall transmit to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a summary report containing the findings of the workshop convened under this subsection.

SEC. 127. AGENCY ACTIVITIES.

(a) NATIONAL SCIENCE FOUNDATION.—As part of the Program, the National Science Foundation shall—

(1) support basic research at the intersection of the biological, physical, and information sciences and engineering through individual and collaborative research grants and through interdisciplinary research centers;
(2) support research on the environmental and societal effects of engineering biology;
(3) provide research instrumentation support for engineering biology disciplines; and
(4) award grants, on a competitive basis, to enable institutions and individuals to train graduate students and postdoctoral fellows who perform some of their engineering biology research in an industry setting.

(b) DEPARTMENT OF COMMERCE.—As part of the Program, the Director of the National Institute of Standards and Technology shall—

(1) establish a bioscience research program to advance the development of standard reference materials and measurements and to create and validate new techniques and processes necessary to advance engineering biology and biomanufacturing;
(2) provide access to user facilities with advanced equipment, services, materials, and other resources, as appropriate, to industry, institutions of higher education, nonprofit organizations, and government agencies to perform research and testing; and
(3) provide technical expertise to inform the development of guidelines and safeguards for new products, processes, and systems of engineering biology.

(c) DEPARTMENT OF ENERGY.—As part of the Program, the Secretary of Energy shall—

(1) conduct and support basic research, development, and application activities in engineering biology disciplines, including in the areas of synthetic biology, advanced biofuel development, biobased materials, and crop to mental remediation; and
(2) provide access to user facilities with advanced or unique equipment, services, materials, and other resources, as appropriate, to industry, institutions of higher education, nonprofit organizations, and government agencies to perform research and testing.

(d) NATIONAL AERONAUTICS AND SPACE ADMINISTRATION.—As part of the Program, the National Aeronautics and Space Administration shall—

(1) conduct and support basic and applied research in engineering biology fields, including in the field of synthetic biology, and related to Earth and space sciences, aeronautics, space technology, and space exploration and experimentation, consistent with the priorities identified in the National Academies’ decadal surveys; and
(2) award grants, on a competitive basis, that enable institutions to support graduate students and postdoctoral fellows in performing some of their engineering biology research in an industry setting.

(e) ENVIRONMENTAL PROTECTION AGENCY.—As part of the Program, the Environmental Protection Agency shall support research on how products, processes, and systems of engineering biology will affect the environment.

TITLE II—STEM EDUCATION AND DIVERSITY

Subtitle A—STEM Education and Workforce

SEC. 201. SENSE OF CONGRESS.

It is the sense of Congress that the National Science and Technology Council’s Committee on STEM Education (CoSTEM), established under section 101 of the America COMPETES Reauthorization Act of 2010 (42 U.S.C. 6621), has taken important initial steps toward developing and implementing a strategic plan and comprehensive capacities in STEM education, but that more work must be done to solicit and take into account views and experience from stakeholders who help define the beneficiaries of Federal STEM programs across the Nation. It is further the sense of Congress that science and engineering disciplines such as those addressed by the National Aeronautics and Space Administration, the National Oceanic and Atmospheric Administration, and the Department of Energy are key to contributing to the goals and implementation of a Federal STEM strategic plan because such agencies have unique scientific and technological facilities that enable them to train scientists who are eager and able to contribute to improved STEM learning outcomes in their own communities.

SEC. 202. COORDINATION OF FEDERAL STEM EDUCATION.

Section 101 of America COMPETES Reauthorization Act of 2010 (42 U.S.C. 6621) is amended—

(1) in subsection (b)(5)—

(A) by redesignating subparagraphs (A) through (B) through (D) as subparagraphs (A) through (B), respectively; and

(B) by striking the second subsection (b); and

(2) by striking subsection (c) as a section.

(b) SUNSET.—The authorization for the American Competes Reauthorization Act of 2010, on options for evidence-based implementation of the Federal STEM strategic plan required under subsection (b)(5), including methods for demonstrating the benefits of Federal STEM education programs, is extended for 4 years after the date of enactment of the America Competes Reauthorization Act of 2015.

(4) REPORT.—The Advisory Panel shall report to the President and the committee established under subsection (a) on implementing the Federal STEM education strategic plan described in subsection (b)(5).

(5) SunSet.—The authorization for the Advisory Panel established under subsection (a) shall expire 3 years after the date of enactment of the America Competes Reauthorization Act of 2015.

SEC. 203. GRAND CHALLENGES IN EDUCATION.

(a) In General.—The Director of the National Science Foundation and the Secretary of Education shall collaborate in—

(1) identifying, prioritizing, and developing strategies to address grand challenges in research and development, including assessment, on the teaching and learning of STEM at the K–12 level, in higher education, in informal settings, for diverse learning populations, including individuals identified in section 33 or...
34 of the Science and Engineering Equal Opportunities Act (42 U.S.C. 1886a or 1888b); and
(2) ensuring the dissemination and promoting the utilization of the results of such research investment.
(b) STAKEHOLDER INPUT.—In identifying the grand challenges under subsection (a), the Director and the Secretary shall—
(1) take into consideration critical research gaps identified in existing reports, including reports by the National Academies, on the teaching and learning of STEM at the pre-K–12 level in formal and informal settings; and
(2) solicit input from a wide range of stakeholders, including State educational agencies and local educational agencies, STEM teachers, STEM education researchers, scientific and engineering societies, STEM faculty at institutions of higher education, informal STEM education providers, businesses with a large STEM workforce, and other stakeholders in the teaching and learning of STEM at the pre-K–12 level, and may enter into an arrangement with the National Research Council for these purposes.
(c) TOPICS TO CONSIDER.—In identifying the grand challenges under subsection (a), the Director and the Secretary shall, at a minimum, consider research and development on—
(1) scalability, sustainability, and replication of successful STEM activities, programs, models, and tools in formal and informal environments;
(2) model systems that support improved teaching and learning of STEM across entire local educational agencies and States, including rural areas, and encompassing and integrating the teaching and learning of STEM in formal and informal venues;
(3) the integration of arts and science standards;
(4) what makes a STEM teacher effective and STEM teacher professional development effective, including development of tools and methodologies to measure STEM teacher effectiveness;
(5) cyber-enabled and other technology tools for teaching and learning, including massive open online courses;
(6) STEM teaching and learning in informal environments, including development of tools and methodologies to measure STEM teaching and learning in informal environments; and
(7) how integrating engineering with mathematics and science education may improve student understanding of mathematics and science and increase student interest and persistence in STEM, or
(C) improve student understanding of engineering design principles and of the built world;
(D) REPORT TO CONGRESS.—Not later than 12 months after the date of enactment of this Act, the Director and the Secretary shall report to Congress on implementation of the grand challenges, including progress toward meeting the grand challenges;
(1) the grand challenges identified pursuant to this section;
(2) the role of each agency in supporting research and development activities to address the grand challenges;
(3) the common metrics that will be used to assess progress toward meeting the grand challenges;
(4) plans for periodically updating the grand challenges;
(5) how the agencies will disseminate and promote the utilization of the results of research and development activities carried out under this section to STEM education practitioners, to other Federal agencies that support STEM education and learning for K–12 students, and to non-Federal funders of STEM education; and
(6) how the agencies will support implementation of best practices identified by the research and development activities.
SEC. 204. NATIONAL RESEARCH COUNCIL WORKSHOP.
(a) SENSE OF CONGRESS.—It is the sense of Congress that—
(b) National Research Council Workshop Program set an important goal of increasing the number of students graduating with associate or bachelor degrees in the STEM fields, and this should continue to be a focus of that program;
(2) to further the goal of the STEM Talent Expansion Program set an important goal of increasing the number of students graduating with associate or bachelor degrees in the STEM fields, and this should continue to be a focus of that program;
(3) STEAM, which is the integration of arts and design, broadly defined, into Federal STEM programming, research, and innovation activities, is a method-validated approach to maintaining the competitiveness of the United States in both workforce and innovation and to increasing and broadening student participation in the STEM fields; and
(4) STEM graduates need more than technical skills to thrive in the 21st century workplace; they need to be creative, innovative, collaborative, and able to think critically;
(5) STEAM should be recognized as providing the link to STEM research and education programs across Federal agencies, without supplanting the focus on the traditional STEM disciplines;
(6) Federal agencies should work cooperatively on interdisciplinarian initiatives to support the integration of arts and design into STEM, and current interdisciplinarian programs should continue;
(7) Federal agencies should allow for STEAM activities under current and future grant-making and other activities; and
(8) Federal agencies should clarify that, where appropriate, data collection, surveys, and reporting on STEM activities and grant-making should examine activities that integrate cross-disciplinary learning that integrates specialized skills and expertise from both art and science.
(b) NATIONAL RESEARCH COUNCIL WORKSHOP.—The National Science Foundation shall enter into an arrangement with the National Research Council to conduct a workshop on the integration of arts and design with STEM education. The workshop shall include a discussion of—
(1) how the perspectives and experience of artists and designers contribute to the advancement of science, engineering, and innovation, for example through the development of visualization aids for large experimental and observational data sets;
(2) how arts and design-based education experiences might support formal and informal STEM education at the pre-K–12 level, particularly in fostering creativity and risk-taking, and encourage more students to pursue STEM studies, including students from groups historically underrepresented in STEM;
(3) how the teaching of design principles can be better integrated into undergraduate engineering and other STEM curricula, including in the context of undergraduate studies, to enhance student capacity for creativity and innovation and improve student retention, including students from groups historically underrepresented in STEM; and
(4) what additional steps, if any, Federal science agencies should take to promote the integration of arts and design principles in their respective STEM programs and activities in order to improve student STEM learning outcomes, increase the recruitment and retention of students into STEM studies and careers, and increase innovation in the United States.
(c) REPORT.—Not later than 18 months after the date of enactment of this Act, the National Science Foundation shall submit a report to the Congress providing a summary description of the discussion and findings from the workshop required under subsection (b).
SEC. 205. ENGAGING FEDERAL SCIENTISTS AND ENGINEERS IN STEM EDUCATION.
(a) GENERAL.—The Director of the Office of Science and Technology Policy shall take appropriate action, including through grants, to engage Federal scientists and engineers to participate in STEM engagement activities through their respective agencies and in local communities.
(b) TOPIC.—The Director of the Office of Science and Technology Policy shall develop guidance for Federal agencies to increase opportunities for Federal scientists and engineers, as appropriate, to work with education and outreach organizations to facilitate science and engineering education activities.
(c) R EPORT.—Not later than 18 months after the date of enactment of this Act, the Director of the Office of Science and Technology Policy shall submit a report to the Congress describing the process for, and the activities under, this section, and the status of the implementation of this section.
applications for merit-reviewed research and such policies to current and potential grantee shall maintain or develop and implement policies consistent with the guidance provided under this section, disaggregated and cross-agency uniformity and consistency in the policies across all agencies.

 SECTION 214. COLLECTION AND REPORTING OF DATA ON FEDERAL RESEARCH GRANTS. (a) COLLECTION OF DATA. (1) IN GENERAL.—Each Federal science agency shall collect standardized record-level annual information on demographics, primary research area, salary, teaching and research, funding outcome, and awarded budget for each application for merit-reviewed research and development grants to institutions of higher education and Federal laboratories supported by that agency.

(b) UNIFORMITY AND STANDARDIZATION.—The Director of the Office of Science and Technology Policy in such form as required by the National Science Foundation record-level data collection under paragraph (c), each Federal science agency shall submit to the Director of the National Science Foundation record-level data collected under paragraph (1) in the form required by such Director.

(c) DEADLINE.—The deadline under this paragraph is 2 years after the date of enactment of this Act.

(b) REPORTING OF DATA.—The Director of the National Science Foundation shall publish statistical summary data collected under this section, disaggregated and cross-tabulated by race, ethnicity, gender, age, and years since completion of doctoral degree, including teaching and research.

(c) DEADLINE.—The deadline under this paragraph is 2 years after the date of enactment of this Act.

(b) REPORTING OF DATA.—The Director of the Office of Science and Technology Policy, in collaboration with the Director of the National Science Foundation, shall identify information and best practices useful for educating program officers and members of standing peer review committees at Federal science agencies about—

(1) research on implicit bias based on gender, race, or ethnicity; and
(2) the potential for unconscious bias in the review of extramural and intramural Federal research grants.

(b) GUIDANCE TO ALL FEDERAL SCIENCE AGENCIES.—The Director of the Office of Science and Technology Policy shall disseminate the information and best practices identified in subsection (a) to all Federal science agencies and provide guidance as necessary on policies to implement such practices with the National Science Foundation.

(c) ESTABLISHMENT OF POLICIES.—Consistent with the guidance provided in subsection (b), Federal science agencies shall maintain and develop policies and practices to minimize the effects of implicit bias in the review of extramural and intramural Federal research grants.

(d) DEADLINE.—The deadline under this paragraph is 2 years after the date of enactment of this Act.

(b) GUIDANCE TO ALL FEDERAL SCIENCE AGENCIES.—The Director of the Office of Science and Technology Policy shall disseminate the information and best practices identified in subsection (a) to all Federal science agencies and provide guidance as necessary on policies to implement such practices with the National Science Foundation.

(c) ESTABLISHMENT OF POLICIES.—Consistent with the guidance provided in subsection (b), Federal science agencies shall maintain and develop policies and practices to minimize the effects of implicit bias in the review of extramural and intramural Federal research grants.

(d) DEADLINE.—The deadline under this paragraph is 2 years after the date of enactment of this Act.

(b) GUIDANCE TO ALL FEDERAL SCIENCE AGENCIES.—The Director of the Office of Science and Technology Policy shall disseminate the information and best practices identified in subsection (a) to all Federal science agencies and provide guidance as necessary on policies to implement such practices with the National Science Foundation.

(c) ESTABLISHMENT OF POLICIES.—Consistent with the guidance provided in subsection (b), Federal science agencies shall maintain and develop policies and practices to minimize the effects of implicit bias in the review of extramural and intramural Federal research grants.

(d) DEADLINE.—The deadline under this paragraph is 2 years after the date of enactment of this Act.

(b) GUIDANCE TO ALL FEDERAL SCIENCE AGENCIES.—The Director of the Office of Science and Technology Policy shall disseminate the information and best practices identified in subsection (a) to all Federal science agencies and provide guidance as necessary on policies to implement such practices with the National Science Foundation.

(c) ESTABLISHMENT OF POLICIES.—Consistent with the guidance provided in subsection (b), Federal science agencies shall maintain and develop policies and practices to minimize the effects of implicit bias in the review of extramural and intramural Federal research grants.

(d) DEADLINE.—The deadline under this paragraph is 2 years after the date of enactment of this Act.

(b) GUIDANCE TO ALL FEDERAL SCIENCE AGENCIES.—The Director of the Office of Science and Technology Policy shall disseminate the information and best practices identified in subsection (a) to all Federal science agencies and provide guidance as necessary on policies to implement such practices with the National Science Foundation.

(c) ESTABLISHMENT OF POLICIES.—Consistent with the guidance provided in subsection (b), Federal science agencies shall maintain and develop policies and practices to minimize the effects of implicit bias in the review of extramural and intramural Federal research grants.

(d) DEADLINE.—The deadline under this paragraph is 2 years after the date of enactment of this Act.

(b) GUIDANCE TO ALL FEDERAL SCIENCE AGENCIES.—The Director of the Office of Science and Technology Policy shall disseminate the information and best practices identified in subsection (a) to all Federal science agencies and provide guidance as necessary on policies to implement such practices with the National Science Foundation.

(c) ESTABLISHMENT OF POLICIES.—Consistent with the guidance provided in subsection (b), Federal science agencies shall maintain and develop policies and practices to minimize the effects of implicit bias in the review of extramural and intramural Federal research grants.

(d) DEADLINE.—The deadline under this paragraph is 2 years after the date of enactment of this Act.

(b) GUIDANCE TO ALL FEDERAL SCIENCE AGENCIES.—The Director of the Office of Science and Technology Policy shall disseminate the information and best practices identified in subsection (a) to all Federal science agencies and provide guidance as necessary on policies to implement such practices with the National Science Foundation.

(c) ESTABLISHMENT OF POLICIES.—Consistent with the guidance provided in subsection (b), Federal science agencies shall maintain and develop policies and practices to minimize the effects of implicit bias in the review of extramural and intramural Federal research grants.

(d) DEADLINE.—The deadline under this paragraph is 2 years after the date of enactment of this Act.

(b) GUIDANCE TO ALL FEDERAL SCIENCE AGENCIES.—The Director of the Office of Science and Technology Policy shall disseminate the information and best practices identified in subsection (a) to all Federal science agencies and provide guidance as necessary on policies to implement such practices with the National Science Foundation.

(c) ESTABLISHMENT OF POLICIES.—Consistent with the guidance provided in subsection (b), Federal science agencies shall maintain and develop policies and practices to minimize the effects of implicit bias in the review of extramural and intramural Federal research grants.

(d) DEADLINE.—The deadline under this paragraph is 2 years after the date of enactment of this Act.
of workshops that educate STEM department chairs at institutions of higher education, senior managers at Federal laboratories, and other federally funded researchers about methods that minimize the effects of implicit bias in the career advancement, including hiring, tenure, promotion, and selection for any honor based in part on the recipient's research record, of academic and Federal STEM researchers.

(2) INTERAGENCY COORDINATION.—The Director of the National Science Foundation shall ensure that workshops supported under this subsection are coordinated across Federal science agencies and jointly supported as appropriate.

(3) MINIMIZING COSTS.—To the extent practicable, workshops shall be held in conjunction with national or regional STEM disciplinary meetings to minimize costs associated with participant travel.

(4) PRIORITY FIELDS FOR ACADEMIC PARTICIPANTS.—In considering the participation of STEM department chairs and other academic researchers, the Director of the National Science Foundation shall prioritize workshops for the broad fields of STEM in which the national rate of representation of women among tenured or tenure-track faculty at granting institutions of higher education is less than 25 percent, according to the most recent data available from the National Center for Science and Engineering Statistics.

(5) ORGANIZATIONS ELIGIBLE TO CARRY OUT WORKSHOPS.—Federal science agencies may carry out the program of workshops under this subsection by making grants to eligible organizations. In addition to any other organizations made eligible by the Federal science agencies, the following organizations are eligible for grants under this subsection:

(A) Nonprofit scientific and professional societies and organizations that represent one or more STEM disciplines.

(B) Nonprofit organizations that have the primary mission of advancing the participation of women or underrepresented minority groups in STEM.

(6) CHARACTERISTICS OF WORKSHOPS.—The workshops shall have the following characteristics:

(A) Invites to workshops shall include at least—

(i) the chairs of departments in the relevant STEM discipline or disciplines from at least 50 institutions of higher education, as determined by the amount of Federal research and development funds obligated to each institution of higher education in the prior year based on data available from the National Science Foundation; and

(ii) in the case of Federal laboratories, individuals with personnel management responsibilities comparable to those of an institution of higher education department chair.

(B) Activities at the workshops shall include roundtable discussions and breakout sessions to identify and discuss issues in the recruitment, retention, and advancement of faculty members from underrepresented minority groups, including the following:

(1) a description and evaluation of the status and effectiveness of the program of workshops required by subsection (c), including a summary of any data reported under paragraph (4) of such subsection; and

(2) an evaluation of the status and effectiveness of the program of workshops required by subsection (c), including a summary of any data reported under paragraph (8) of such subsection.

(C) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Director of the National Science Foundation $2,000,000 for each of fiscal years 2016 through 2020 to carry out the program of workshops under this section.

SEC. 218. RESEARCH AND DISSEMINATION AT THE NATIONAL SCIENCE FOUNDATION.

(a) IN GENERAL.—The Director of the National Science Foundation shall award research grants and carry out dissemination activities consistent with the purposes of this subtitle, including—

(1) research grants to analyze the record-level data collected under section 214 and section 216, consistent with policies to ensure the privacy of individuals identifiable by such data; and

(2) research grants to study best practices for work-life accommodation.

(b) PROGRAM FOR INCREASING DIVERSITY AMONG STEM FACULTY AT INSTITUTIONS OF HIGHER EDUCATION.

(1) GRANTS.—The Director of the National Science Foundation shall award grants to institutions of higher education (or consortia thereof) for the development of innovative services and strategies designed to improve the recruitment, retention, and advancement of individuals from underrepresented minority groups in academic STEM careers.

(b) MERIT REVIEW; COMPETITION.—Grants shall be awarded under this section on a merit-reviewed, competitive basis.

(c) USE OF FUNDS.—Activities supported by grants under this section may include—

(1) institutional assessment activities, such as data analyses and policy review, in order to identify and address issues in the recruitment, retention, and advancement of faculty members from underrepresented minority groups;

(2) activities to implement institution-wide improvements in workload distribution, such as faculty members from underrepresented minority groups are not disadvantaged in the amount of time available to focus on research, publishing papers, and engaging in other activities required to achieve tenure status and run a productive research program;

(3) development and implementation of training courses for administrators and search committee members to ensure that candidates from underrepresented minority groups are not subject to implicit biases in the search and hiring process;

(4) development and hosting of intra- or inter-institutional workshops to propagate best practices in recruiting, retaining, and advancing faculty members from underrepresented minority groups;

(5) professional development opportunities for faculty members from underrepresented minority groups;

(6) activities aimed at making undergraduate STEM students from underrepresented minority groups aware of opportunities for academic careers in STEM fields;

(7) activities to identify and engage exceptional graduate students from underrepresented minority groups at various stages of their studies and to encourage them to enter academic careers; and

(8) other activities consistent with section (a), as determined by the Director of the National Science Foundation.

(2) SELECTION PROCESS.

(a) APPLICATION.—An institution of higher education (or consortia thereof) seeking funding under this section shall submit an application to the Director of the National Science Foundation at such time, in such manner, and containing such information and assurances as such Director may require. The application shall include, at a minimum, a description of—

(1) a description of the reform effort that is being proposed for implementation by the institution of higher education;

(b) any available evidence of specific difficulties in the recruitment, retention, and advancement of faculty members from underrepresented minority groups in STEM academic careers within the institution of higher education submitting an application,
and how the proposed reform effort would address such issues;
(C) the institution of higher education submitting an application plans to sustain the proposed reform effort beyond the duration of the grant; and
(D) how the success and effectiveness of the proposed reform effort will be evaluated and assessed, and the contributions of the institutional knowledge base about models for catalyzing institutional change.

(2) REVIEW OF APPLICATIONS.—In selecting grants under this section, the Director of the National Science Foundation shall consider, at a minimum—
(A) the likelihood of success in undertaking the proposed reform effort in the institution of higher education submitting the application, including the extent to which the administrators of the institution are committed to making the proposed reform effort a priority;
(B) the degree to which the proposed reform effort will contribute to change in institutional culture and policy such that greater value is placed on the recruitment, retention, and advancement of faculty members from underrepresented minority groups;
(C) evidence of an institutional commitment to increasing the number of STEM students from underrepresented minority groups in STEM fields;
(D) expansion of successful reforms aimed at increasing the number of STEM students from underrepresented minority groups beyond a single course or group of courses to achieve reform within an entire academic unit, a program, or an entire institution;
(E) expansion of successful reforms beyond a single academic unit to other STEM academic units within an institution of higher education;
(F) the likelihood of success of the proposed reform effort in expanding opportunities for students from underrepresented minority groups to conduct STEM research in industry, at Federal laboratories, and at international research institutions;
(G) the likelihood that the institution of higher education will sustain or expand the proposed reform effort beyond the period of the grant; and
(H) the degree to which evaluation and assessment plans are included in the design of the proposed reform effort.

(3) GRANT DISTRIBUTION.—The Director of the National Science Foundation shall ensure, to the extent practicable, that grants awarded under this section are made to a variety of types of institutions of higher education.

(4) USE OF FUNDS.—Activities supported by grants under this section shall be awarded under this section on a competitive basis.

(5) SELECTION PROCESS.—
(A) an institution of higher education (or consortium thereof) seeking a grant under this section shall submit an application to the Director of the National Science Foundation at such time, in such manner, and containing such information and assurances as such Director may require. The application shall include, at a minimum—
(i) a description of the proposed reform effort;
(ii) a description of the research findings that will serve as the basis for the proposed reform effort or, in the case of applications that propose an expansion of a previously implemented reform, a description of the previously implemented reform effort, including data about the recruitment, retention, and academic achievement of students from underrepresented minority groups;
(iii) evidence of institutional commitment to, and support for, the proposed reform effort, including a long-term commitment to implement successful strategies within the proposed reform effort beyond the academic unit or units included in the grant proposal;
(iv) a description of existing or planned institutional policies and practices regarding faculty hiring, promotion, tenure, and teaching assignment that reward faculty contributions to improving the education of students from underrepresented minority groups in STEM; and
(v) how the success and effectiveness of the proposed reform effort will be evaluated and assessed in order to contribute to the national knowledge base about models for catalyzing institutional change.

(6) REVIEW OF APPLICATIONS.—In selecting grant recipients under this section, the Director of the National Science Foundation shall consider, at a minimum—
(A) the likelihood of success of the proposed reform effort in attracting participation in the national knowledge base about models for catalyzing institutional change;

(7) MECHANISMS.—Activities supported by grants under this section shall be awarded under this section on a merit-reviewed, competitive basis.

(8) USE OF FUNDS.—Activities supported by grants under this section may include—
(a) implementation or expansion of innovative, research-based approaches to broaden participation of underrepresented minority groups in STEM fields;
(b) implementation or expansion of bridge, cohort, tutoring, or mentoring programs designed to enhance the recruitment and retention of students from underrepresented minority groups in STEM fields;
(c) implementation or expansion of outreach programs linking institutions of higher education and K-12 school systems in order to heighten awareness among precollege students from underrepresented minority groups of opportunities in college-level STEM fields and STEM careers;
(d) an expansion of faculty development programs focused on improving retention of undergraduate STEM students from underrepresented minority groups;
(e) the implementation of institutional mechanisms designed to recognize and reward faculty members who demonstrate a commitment to increasing the participation of students from underrepresented minority groups in STEM fields;
(f) expansion of successful reforms aimed at increasing the number of STEM students from underrepresented minority groups beyond a single course or group of courses to achieve reform within an entire academic unit, a program, or an entire institution;
(g) an expansion of successful reforms beyond a single academic unit to other STEM academic units within an institution of higher education;
(h) the degree to which the proposed reform effort will contribute to change in institutional culture and policy such that greater value is placed on faculty engagement with students from underrepresented minority groups; and
(i) the likelihood that the institution will sustain or expand the proposed reform effort beyond the period of the grant.

(9) DISTRIBUTION.—For applications that include an expansion of existing reforms beyond a single academic unit, the Director of the National Science Foundation shall coordinate with relevant Federal agencies in disseminating the results of the research under this subsection to ensure that best practices in broadening participation in STEM education at the undergraduate level are made readily available to all institutions of higher education.

(10) NATIONAL SCIENCE FOUNDATION.—The term ‘‘National Science Foundation’’ means any Federal agency with at least $100,000,000 in research and development expenditures in fiscal year 2012.

(11) INSTITUTION OF HIGHER EDUCATION.—The term ‘‘institution of higher education’’ has the meaning given such term in section 101(a) of the Higher Education Act of 1965 (20 U.S.C. 1001(a)).

(12) STEM.—The term ‘‘STEM’’ means science, technology, engineering, and mathematics, including other academic subjects that build on these disciplines such as computer science.

(13) NATIONAL SCIENCE FOUNDATION AUTHORIZATION.—The National Science Foundation Authorization Act of 2002 (42 U.S.C. 1862n note) is amended—
(1) by redesigning paragraph (16) as paragraph (15) and inserting after paragraph (15) the following new paragraph:
‘‘STEM.—The term ‘STEM’ means science, technology, engineering, and mathematics, including other academic subjects that build on these disciplines such as computer science.’’

**TITLE III—NATIONAL SCIENCE FOUNDATION**

**Subtitle A—General Provisions**

**SEC. 301. AUTHORIZATION OF APPROPRIATIONS.**

(a) **FISCAL YEAR 2018.**—

(1) IN GENERAL.—There are authorized to be appropriated to the Foundation $7,723,550,000 for fiscal year 2018.

(2) SPECIFIC ALLOCATIONS.—Of the amount authorized under paragraph (1)—

(A) $6,186,300,000 shall be made available for research and related activities;

(B) $578,510,000 shall be made available for education and human resources;

(C) $200,310,000 shall be made available for major research equipment and facilities construction;

(D) $354,840,000 shall be made available for agency operations and award management;

(E) $4,370,000 shall be made available for the Office of the National Science Board, including salaries and compensation for members of the Board and staff appointed under section 4 of the National Science Foundation Act of 1950 (42 U.S.C. 1863), travel and training costs for members of the Board and such staff, general and Board operating expenses, representational expenses for the Board, and Board reports (other than the report entitled ‘‘Science and Engineering Indicators’’), and contracts; and

(F) $15,160,000 shall be made available for the Office of Inspector General.

(b) **FISCAL YEAR 2019.**—

(1) **IN GENERAL.—**There are authorized to be appropriated to the Foundation $8,099,010,000 for fiscal year 2019.

(2) **SPECIFIC ALLOCATIONS.—**Of the amount authorized under paragraph (1)—

(A) $7,161,420,000 shall be made available for research and related activities;

(B) $1,114,300,000 shall be made available for education and human resources;

(C) $200,000,000 shall be made available for major research equipment and facilities construction;

(D) $410,770,000 shall be made available for agency operations and award management;

(E) $4,780,000 shall be made available for the Office of the National Science Board, including salaries and compensation for members of the Board and staff appointed under section 4 of the National Science Foundation Act of 1950 (42 U.S.C. 1863), travel and training costs for members of the Board and such staff, general and Board operating expenses, representational expenses for the Board, and Board reports (other than the report entitled ‘‘Science and Engineering Indicators’’), and contracts; and

(F) $16,570,000 shall be made available for the Office of Inspector General.

(c) **FISCAL YEAR 2020.**—

(1) **IN GENERAL.—**There are authorized to be appropriated to the Foundation $8,897,320,000 for fiscal year 2020.

(2) **SPECIFIC ALLOCATIONS.—**Of the amount authorized under paragraph (1)—

(A) $7,519,490,000 shall be made available for research and related activities;

(B) $1,170,010,000 shall be made available for education and human resources;

(C) $200,310,000 shall be made available for major research equipment and facilities construction;

(D) $431,310,000 shall be made available for agency operations and award management;

(E) $4,920,000 shall be made available for the Office of the National Science Board, including salaries and compensation for members of the Board and staff appointed under section 4 of the National Science Foundation Act of 1950 (42 U.S.C. 1863), travel and training costs for members of the Board and such staff, general and Board operating expenses, representational expenses for the Board, honorary awards made by the Board, Board reports (other than the report entitled ‘‘Science and Engineering Indicators’’), and contracts; and

(F) $15,160,000 shall be made available for the Office of Inspector General.

(d) **FISCAL YEAR 2021.**—

(1) **IN GENERAL.—**There are authorized to be appropriated to the Foundation $9,342,790,000 for fiscal year 2021.

(2) **SPECIFIC ALLOCATIONS.—**Of the amount authorized under paragraph (1)—

(A) $7,918,490,000 shall be made available for research and related activities;

(B) $1,310,010,000 shall be made available for education and human resources;

(C) $200,000,000 shall be made available for major research equipment and facilities construction;

(D) $431,310,000 shall be made available for agency operations and award management;

(E) $4,920,000 shall be made available for the Office of the National Science Board, including salaries and compensation for members of the Board and staff appointed under section 4 of the National Science Foundation Act of 1950 (42 U.S.C. 1863), travel and training costs for members of the Board and such staff, general and Board operating expenses, representational expenses for the Board, honorary awards made by the Board, Board reports (other than the report entitled ‘‘Science and Engineering Indicators’’), and contracts; and

(F) $15,160,000 shall be made available for the Office of Inspector General.

(e) **FISCAL YEAR 2022.**—

(1) **IN GENERAL.—**There are authorized to be appropriated to the Foundation $9,820,400,000 for fiscal year 2022.

(2) **SPECIFIC ALLOCATIONS.—**Of the amount authorized under paragraph (1)—

(A) $8,493,560,000 shall be made available for research and related activities;

(B) $1,170,010,000 shall be made available for education and human resources;

(C) $200,000,000 shall be made available for major research equipment and facilities construction;

(D) $431,310,000 shall be made available for agency operations and award management;

(E) $4,920,000 shall be made available for the Office of the National Science Board, including salaries and compensation for members of the Board and staff appointed under section 4 of the National Science Foundation Act of 1950 (42 U.S.C. 1863), travel and training costs for members of the Board and such staff, general and Board operating expenses, representational expenses for the Board, honorary awards made by the Board, Board reports (other than the report entitled ‘‘Science and Engineering Indicators’’), and contracts; and

(F) $15,160,000 shall be made available for the Office of Inspector General.

(f) **FISCAL YEAR 2023.**—

(1) **IN GENERAL.—**There are authorized to be appropriated to the Foundation $10,342,790,000 for fiscal year 2023.

(2) **SPECIFIC ALLOCATIONS.—**Of the amount authorized under paragraph (1)—

(A) $8,960,490,000 shall be made available for research and related activities;

(B) $1,170,010,000 shall be made available for education and human resources;

(C) $200,000,000 shall be made available for major research equipment and facilities construction;

(D) $431,310,000 shall be made available for agency operations and award management;

(E) $4,920,000 shall be made available for the Office of the National Science Board, including salaries and compensation for members of the Board and staff appointed under section 4 of the National Science Foundation Act of 1950 (42 U.S.C. 1863), travel and training costs for members of the Board and such staff, general and Board operating expenses, representational expenses for the Board, honorary awards made by the Board, Board reports (other than the report entitled ‘‘Science and Engineering Indicators’’), and contracts; and

(F) $15,160,000 shall be made available for the Office of Inspector General.
agency officials as appropriate, ensuring that the requirements of section 10(a) of the National Science Foundation Authorization Act of 2002 are satisfied; (3) on a regular basis to the National Science Board for approval and oversight of major research facilities; and (4) periodically reviewing and updating as necessary, the policies and guidelines for the development and construction of major research facilities. (c) POLICIES FOR COSTING LARGE FACILITIES.— (1) IN GENERAL.—The Director shall ensure that the Foundation’s policies for developing and managing major research facilities, including construction costs, including a description of any aspects of the policies that diverge from the best practices recommended in GAO–09–3SP. (2) REPORT.—Not later than 12 months after the date of enactment of this Act, the Director shall submit to Congress a report describing the Foundation’s policies for developing and managing major research facility construction costs, including a description of any aspects of the policies that diverge from the best practices recommended in GAO–09–3SP. SEC. 305. SUPPORT FOR POTENTIALLY TRANSFORMATIVE RESEARCH. (a) IN GENERAL.—The Director shall establish and periodically update grant solicitation, merit review, and funding policies and mechanisms designed to identify and provide support for an analysis, risk, high-reward basic research proposals. (b) POLICIES AND MECHANISMS.—Such policies and mechanisms may include— (1) development of solicitations specifically for high-risk, high-reward basic research proposals; (2) establishment of review panels for the primary purpose of selecting high-risk, high-reward proposals; (3) development of guidance to standard review panels to encourage the identification and consideration of high-risk, high-reward proposals; and (4) support for workshops and other conferences with the primary purpose of identifying new opportunities for high-risk, high-reward basic research, especially at interdisciplinary interfaces. (c) EXCLUSION.—For purposes of this section, the term “high-risk, high-reward basic research” means research driven by ideas that have the potential to radically change current understanding of an important scientific or engineering concept, or leading to the creation of a new paradigm or field of science or engineering, and that is characterized by its challenge to current understanding or its pathway to new frontiers. SEC. 306. STRENGTHENING INSTITUTIONAL RELATIONSHIPS. (a) IN GENERAL.—For any Foundation research grant, in an amount greater than $5,000,000, to be carried out through a partnership that includes one or more minority-serving institutions or predominantly undergraduate institutions and one or more institutions described in subsection (b), the Director shall award funds directly, according to the budget justification described in the grant proposal, to at least two of the institutions of higher education in the partnership, including the minority-serving institution or one predominantly undergraduate institution, to ensure a strong and equitable partnership. (b) HOW URGED.—The institutions referred to in subsection (a) are institutions of higher education that are among the 100 institutions receiving, over the 3-year period immediately preceding the awarding of grants, the highest amount of research funding from the Foundation.

agency officials as appropriate, ensuring that the requirements of section 10(a) of the National Science Foundation Authorization Act of 2002 are satisfied; (3) on a regular basis to the National Science Board for approval and oversight of major research facilities; and (4) periodically reviewing and updating as necessary, the policies and guidelines for the development and construction of major research facilities. (c) POLICIES FOR COSTING LARGE FACILITIES.— (1) IN GENERAL.—The Director shall ensure that the Foundation’s policies for developing and managing major research facilities, including construction costs, including a description of any aspects of the policies that diverge from the best practices recommended in GAO–09–3SP. (2) REPORT.—Not later than 12 months after the date of enactment of this Act, the Director shall submit to Congress a report describing the Foundation’s policies for developing and managing major research facility construction costs, including a description of any aspects of the policies that diverge from the best practices recommended in GAO–09–3SP. SEC. 305. SUPPORT FOR POTENTIALLY TRANSFORMATIVE RESEARCH. (a) IN GENERAL.—The Director shall establish and periodically update grant solicitation, merit review, and funding policies and mechanisms designed to identify and provide support for an analysis, risk, high-reward basic research proposals. (b) POLICIES AND MECHANISMS.—Such policies and mechanisms may include— (1) development of solicitations specifically for high-risk, high-reward basic research proposals; (2) establishment of review panels for the primary purpose of selecting high-risk, high-reward proposals; (3) development of guidance to standard review panels to encourage the identification and consideration of high-risk, high-reward proposals; and (4) support for workshops and other conferences with the primary purpose of identifying new opportunities for high-risk, high-reward basic research, especially at interdisciplinary interfaces. (c) EXCLUSION.—For purposes of this section, the term “high-risk, high-reward basic research” means research driven by ideas that have the potential to radically change current understanding of an important scientific or engineering concept, or leading to the creation of a new paradigm or field of science or engineering, and that is characterized by its challenge to current understanding or its pathway to new frontiers. SEC. 306. STRENGTHENING INSTITUTIONAL RELATIONSHIPS. (a) IN GENERAL.—For any Foundation research grant, in an amount greater than $5,000,000, to be carried out through a partnership that includes one or more minority-serving institutions or predominantly undergraduate institutions and one or more institutions described in subsection (b), the Director shall award funds directly, according to the budget justification described in the grant proposal, to at least two of the institutions of higher education in the partnership, including the minority-serving institution or one predominantly undergraduate institution, to ensure a strong and equitable partnership. (b) HOW URGED.—The institutions referred to in subsection (a) are institutions of higher education that are among the 100 institutions receiving, over the 3-year period immediately preceding the awarding of grants, the highest amount of research funding from the Foundation.
(3) the appropriateness of creating a new education and training program for graduate students distinct from programs that provide direct financial support, including the grants authorized under section 506 of the America COMPETES Reauthorization Act of 2010 (42 U.S.C. 1862p–15); and

(c) CRITERIA.—At a minimum, in comparing models, the workshop or roundtable participants shall consider the capacity of such programs or models to provide students with knowledge and skills—

(1) to become independent, creative, successful researchers;

(2) to participate in large interdisciplinary research projects, including in an interdisciplinary context;

(3) to adhere to the highest standards for research ethics;

(4) to become high-quality teachers utilizing the most currently available evidence-based pedagogy;

(5) in oral and written communication, to both technical and nontechnical audiences;

(6) in innovation, entrepreneurship, and business ethics; and

(7) in program management.

(d) GRADUATE STUDENT INPUT.—The participants of the workshop or roundtable shall include current or recent STEM graduate students.

(e) REPORT.—Not later than 1 year after the date of enactment of this Act, the National Research Council shall submit to Congress a summary report of the findings and recommendations of the workshop or roundtable convened under this section.

SEC. 323. UNDERGRADUATE STEM EDUCATION REFORM.

Section 17 of the National Science Foundation Authorization Act of 2002 (42 U.S.C. 1862n–6) is amended to read as follows:

"SEC. 17. UNDERGRADUATE STEM EDUCATION REFORM.

"(a) In General.—The Director, through the Directorate for Education and Human Resources, shall award grants, on a competitive, merit-reviewed basis, to institutions of higher education (or to consortia thereof) and to other eligible nonprofit organizations to reform undergraduate STEM education for the purpose of increasing the number and quality of students completing bachelor's degrees in STEM and improving the STEM learning outcomes for all undergraduate students.

"(b) INTERDIRECTORATE WORKING GROUP ON UNDERGRADUATE STEM EDUCATION.—In carrying out the requirements of this section, the Directorate for Education and Human Resources shall coordinate and collaborate with the Research Directorates, including through the establishment of an interdirec
torate working group on undergraduate STEM education reform, in order to identify and implement new and expanded opportunities for collaboration between STEM discipli
nary researchers and education re
searchers on the reform of undergraduate STEM education.

"(c) GRANTS.—Research and development supported by grants under this section may encompass a single discipline, multiple disciplines, or interdisciplinary education at the undergraduate level, and may include—

(1) research foundational to the improve
ment of teaching, learning, and retention in STEM education, in order to identify and implement new and expanded opportunities for collaboration between STEM disciplinary researchers and education researchers on the reform of undergraduate STEM education.

(2) development, implementation, and assessment of innovative, research-based approaches to transforming teaching, learning, and retention in STEM education, in order to identify and implement new and expanded opportunities for collaboration between STEM disciplinary researchers and education researchers on the reform of undergraduate STEM education.

(3) scaling of successful efforts on learning and learning environments, broadening participation, workforce preparation, employment in technology, or other reforms in STEM education, including expansion of successful STEM reform efforts beyond a single course or group of courses to achieve reform within an entire academic unit, or expansion of successful reform efforts beyond a single academic unit to other academic units within an institution or to comparable academic units at other institutions.

(4) SELECTED PROCESS.—(1) A proposal may include institutional development of an advanced manufacturing workforce. Activities supported by grants under this subsection may include, at a minimum—

(A) evidence of institutional support for, and commitment to, the proposed effort, including long-term commitment to implement and scale successful strategies resulting from the current effort;

(B) a description of existing or planned institutional policies and practices regarding faculty hiring, promotion, tenure, and teaching and research contributions to undergraduate STEM education; and

(C) a description of the plans for assessment and evaluation of the effort, including evidence of participation by individuals with experience in assessment and evaluation of teaching and learning programs.

"(2) REVIEW OF APPLICATIONS.—In selecting grant recipients for funding under this section, the Director shall consider, as appropriate to the scale of the proposed effort—

(A) the likelihood of success in under-
taking the proposed effort at the institution submitting the application, including the extent to which the faculty, staff, and administra
tors of the institution are committed to making undergraduate STEM education reform a priority of the participating academic unit or units;

(B) the degree to which the proposed effort will contribute to change in institutional culture and policy such that a greater value is placed on faculty engagement in under-
graduate education;

(C) the extent to which the institution will sustain or expand the effort beyond the period of the grant; and

(D) the degree to which the proposed effort will contribute to the accu-
mulation of knowledge on STEM education.

"(3) PRIORITY.—The Director shall give priority to proposals focused on the first 2 years of undergraduate STEM education at 2-year institutions of higher education.

"(4) GRANT DISTRIBUTION.—The Director shall ensure, to the extent practicable, that grants awarded under this section are made to a variety of types of institutions of higher education.

SEC. 234. ADVANCED MANUFACTURING EDUCATION.

Section 506(b) of the America COMPETES Reauthorization Act of 2010 (42 U.S.C. 1862p–1(b)) is amended to read as follows:

"(b) ADVANCED MANUFACTURING EDUCATION.—The Director shall award grants, on a competitive, merit-reviewed basis, to institutions of higher education for the purpose of increasing the number and quality of students completing bachelor's degrees in their field" after "Teaching Fel-

"(13) by striking "30%" and inserting "50%"; and

(14) by striking subsection (d).

SEC. 326. NOVICE SCHOLARSHIP PROGRAM AMENDMENTS.

Section 10a of the National Science Founda
tion Authorization Act of 2002 (42 U.S.C. 1862n–1a) is amended—

(1) in subsection (a)(2)(B), by inserting "or bachelor's" after "master's";

(2) in subsection (c)—

(A) by striking "and" at the end of para
graph (2)(B);

(B) in paragraph (3), by—

(1) inserting "for teachers with master’s degrees in their field" after "Teaching Fel-

(1) the development or expansion of educational materials, courses, curricula, strat-
egies, or other activities that lead to improved advanced manufacturing degree or certification programs, including the inte-

(2) the development and implementation of faculty professional development pro-
grams to enhance a faculty member’s ca-

(3) the establishment of centers that pro-
vide models and leadership in advanced man-
ufacturing education and serve as regional or national clearinghouses for educational materials and methods, including in rural areas;

(4) activities to enhance the recruitment and retention of students into certification and associate programs in advanced manufac-
turing, including the provision of improved mentoring and internship opportunities;

(5) the establishment of partnerships with private sector entities to ensure the develop-
ment of an advanced manufacturing work-
force with the skills necessary to meet re-
geonial economic needs; and

(6) other activities as determined appro-
priate by the Director.".

"SEC. 325. STEM EDUCATION PARTNERSHIPS.

Section 9 of the National Science Founda
tion Authorization Act of 2002 (42 U.S.C. 1862n) is amended—

(1) in the section heading, by striking "MATHEMATICS AND SCIENCE" and inserting "STEM";

(2) by striking "mathematics and science" each place it appears in subsections (a) and (b) and inserting "STEM";

(3) by striking "mathematics or science" each place it appears in subsections (a)(3) and (4)(A) and inserting "STEM";

(4) by striking "mathematics, science, or engineering" in subsection (a)(2)(B) and in-

serting "STEM";

(5) by striking "mathematics, science, and technology" in subsections (a)(3)(B)(ii)(II) and (B) and inserting "STEM" in subsections (a)(3)(B)(ii)(II) and (B); and

(6) by striking "professional mathematici-
s, scientists, and engineers" in subsection (a)(3)(F) and inserting "STEM professionals";

(7) by striking "mathematicians, sci-
entists, and engineers" in subsections (a)(3)(J) and (M) and inserting "STEM professionals";

(8) by striking "scientists, technologists, engineers, or mathematicians" in subsections (a)(7) and inserting "STEM professionals";

(9) by striking "science, technology, engi-
neering, and mathematics" each place it ap-
ppears in subsections (a)(3)(K) and (10) and in-

serting "STEM";

(10) by striking "science, technology, engi-
neering, and mathematics" and inserting "STEM" in subsections (a)(10)(A)(ii)(II) and inserting "STEM";

(11) by striking "science, mathematics, en-
gineering, and technology" each place it ap-
ppears in subsection (a)(5) and inserting "STEM";

(12) by striking "science, mathematics, en-
gineering, or technology" in subsection (a)(5) and inserting "STEM";

(13) by striking "mathematics, science, en-
gineering, or technology" in subsection (b)(1) and (2) and inserting "STEM"; and

SEC. 326. NOVICE SCHOLARSHIP PROGRAM AMENDMENTS.

Section 10a of the National Science Foun-
dation Authorization Act of 2002 (42 U.S.C. 1862n–1a) is amended—
(ii) by striking the period at the end of subparagraph (B) and inserting "and"; and
(C) by adding at the end the following new paragraph:
"(4) offering academic courses leading to a master's degree and leadership training to prepare individuals to become master teachers in elementary and secondary schools; and
"(B) offering academic programs both during and after matriculation in the program for which the fellowship is received to enable fellows to become highly effective mathematicians and scientists, including mentoring, training, induction, and professional development activities, to fulfill the service requirements of this section, including the requirements of subsection (e), and to exchange ideas with others in their fields.";
(3) in subsection (e), by striking "subsection (g)" and inserting "subsection (h)";
and
(4) by adding after subsection (f) the following new subsection:
"(g) SUPPORT FOR MASTER TEACHING FELLOWS AND FACULTY IN A MASTER'S DEGREE PROGRAM.—A National Science Foundation Master Teacher Fellow may receive a maximum of one full academic year of support at a level that is prorated such amount shall be prorated according to the length of the fellowship period.

SEC. 327. INFORMAL STEM EDUCATION.

(a) GRANTS.—The Director, through the Directorate for Education and Human Resources, shall continue to award competitive, merit-reviewed grants to support—
(1) research and development of innovative out-of-school STEM learning and emerging STEM learning environments in order to improve STEM learning outcomes and engagement in STEM; and
(2) research that advances the field of informal STEM education.

(b) USES OF FUNDS.—Activities supported by grants under this section may encompass a single STEM discipline, multiple STEM disciplines, or a combination of innovative STEM initiatives and shall include—
(1) research and development that improves our understanding of learning and engagement in informal environments, including the role of informal environments in broadening participation in STEM; and
(2) design and testing of innovative STEM learning programs, and other resources for informal learning environments to improve STEM learning outcomes and increase engagement for K–12 students, K–12 teachers, and the general public, including design and testing of the scalability of models, programs, and other resources.

SEC. 328. RESEARCH AND DEVELOPMENT TO SUPPORT IMPROVED K–12 LEARNING.

(a) IN GENERAL.—The Director, acting through the Directorate for Education and Human Resources, shall award competitive, merit-reviewed grants to support research and development on alignment, implementation, impact, and ongoing improvement of standards and equivalent learning expectations used by States in mathematics, science, and, as appropriate, other State-based STEM standards.

(b) RESEARCH AREAS.—In making awards under this section, the Director shall consider proposals for research and development, including, as appropriate, large-scale research and development, of—
(1) identifying virtual resources such as web portals, for content, professional development, and research results;
(2) teacher education and professional development;
(3) learning progressions;
(4) assessments;
(b) metrics for evaluating the impact of standards; and
(5) other areas of research and development that are likely to contribute to the alignment, implementation, impact, and ongoing improvement of standards in STEM subjects.

TITLE IV—NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY

SEC. 401. SHORT TITLE.

This title may be cited as the "National Institute of Standards and Technology Authorization Act of 2015."

SEC. 402. AUTHORIZATION OF APPROPRIATIONS.

(a) FISCAL YEAR 2016.—
(1) IN GENERAL.—There are authorized to be appropriated to the Secretary of Commerce $1,119,700,000 for the National Institute of Standards and Technology for fiscal year 2016.

(2) SPECIFIC ALLOCATIONS.—Of the amount authorized by paragraph (1)–
(A) $754,700,000 shall be authorized for scientific and technical research and services laboratory activities;
(B) $59,000,000 shall be authorized for the construction and maintenance of facilities; and
(C) $306,000,000 shall be authorized for industrial technology services activities of which—
(i) $141,000,000 shall be authorized for the Hollings Manufacturing Extension Partnership under section 25 of the National Institute of Standards and Technology Act (15 U.S.C. 278k) and the program under section 26 of such Act (15 U.S.C. 278l), of which not more than $20,000,000 shall be for the competitive grant program under section 25(f) of such Act; and
(ii) $150,000,000 shall be authorized for the Hollings Manufacturing Extension Program established under section 34 of such Act (15 U.S.C. 278b).

(b) FISCAL YEAR 2017.—
(1) IN GENERAL.—There are authorized to be appropriated to the Secretary of Commerce $1,299,060,000 for the National Institute of Standards and Technology for fiscal year 2017.

(2) SPECIFIC ALLOCATIONS.—Of the amount authorized by paragraph (1)–
(A) $792,440,000 shall be authorized for scientific and technical research and services laboratory activities;
(B) $61,950,000 shall be authorized for the construction and maintenance of facilities; and
(C) $320,000,000 shall be authorized for industrial technology services activities of which—
(i) $160,000,000 shall be authorized for the Hollings Manufacturing Extension Partnership under section 25 of the National Institute of Standards and Technology Act (15 U.S.C. 278k) and the program under section 26 of such Act (15 U.S.C. 278l), of which not more than $20,000,000 shall be for the competitive grant program under section 25(f) of such Act; and
(ii) $150,000,000 shall be authorized for the Hollings Manufacturing Extension Program established under section 34 of such Act (15 U.S.C. 278b).

(c) FISCAL YEAR 2018.—
(1) IN GENERAL.—There are authorized to be appropriated to the Secretary of Commerce $1,369,060,000 for the National Institute of Standards and Technology for fiscal year 2018.

(2) SPECIFIC ALLOCATIONS.—Of the amount authorized by paragraph (1)–
(A) $832,060,000 shall be authorized for scientific and technical research and services laboratory activities;
“(1) In general.—The Secretary, through the Director shall provide assistance for the creation and support of regional manufacturing extension centers for the transfer of manufacturing and technological best practices to manufacturing companies throughout the United States.

“(2) Regulations.—The Secretary shall implement, review, and update the sections of the Code of Federal Regulations related to this section every 5 years.

“(3) Application.—

“(A) In general.—Any public or nonprofit organization, or consortium thereof, may submit a proposal to the Secretary for financial support under this section, in accordance with the procedures established by the Secretary.

“(B) Cost-sharing.—In order to receive assistance under this section, an applicant for financial assistance under subparagraph (A) shall provide adequate assurances that non-Federal assets obtained from the applicant and the applicant’s partnering organizations will be used as a funding source to meet not less than 50 percent of the costs incurred.

“(A) The transfer of manufacturing technology and techniques to Centers and, through them, to manufacturing companies throughout the United States;

“(B) The participation of individuals from industry, institutions of higher education, State governments, other Federal agencies, and, when appropriate, the Institute in cooperative technology transfer activities;

“(C) Efforts to make new manufacturing technology and processes usable by United States-based small and medium-sized companies;

“(D) The active dissemination of scientific, engineering, technical, and management information about manufacturing to industrial firms, including small and medium-sized manufacturing companies;

“(E) The development of new partnerships, networks, and services that will assist small and medium-sized manufacturing companies expand into new markets, including global markets;

“(F) The utilization, when appropriate, of the expertise and capability that exists in Federal laboratories other than the Institute; and

“(G) The provision to community colleges and area career and technical education schools of information about the job skills needed in small and medium-sized manufacturing businesses in the regions they serve.

“(b) Activities.—The activities of the Centers shall include:

“(1) The establishment of automated manufacturing systems and other advanced production technologies, based on research by the Institute and other entities, for the purpose of demonstrations and technology transfer;

“(2) Assistance to Federal agencies in support of United States-based manufacturing by identifying and providing technical assistance to small and medium-sized manufacturers to help them meet Federal agency procurement and accreditation needs;

“(3) The active transfer and dissemination of research findings and Center expertise to a wide range of companies and enterprises, particularly small and medium-sized manufacturers; and

“(4) The facilitation of collaborations and partnerships between small and medium-sized manufacturing companies and community colleges and area career and technical education schools to help such colleges and schools develop and implement the best practices of manufacturers and to help manufacturers better understand the skill sets that students learn in the programs offered by such colleges and schools.

“(c) Financial Assistance and Requirements.—

“(1) Financial Support.—The Secretary may provide initial support to any Center created under subsection (a) for an initial period of 5 years, which may be renewed for an additional 5-year period. The Secretary may provide to a Center up to 50 percent of the capital and annual operating and maintenance funds required to create and maintain such Center.

“(2) Regulations.—The Secretary shall implement, review, and update the sections of the Code of Federal Regulations related to this section every 5 years.

“(3) Application.—

“(A) In general.—Any public or nonprofit institution or organization, affiliated with any United States-based public or nonprofit institution or organization, may provide financial support to any Center created under subsection (a) for the purposes specified in this section.

“(B) Cost-sharing.—In order to receive assistance under this section, an applicant for financial assistance under subparagraph (A) shall provide adequate assurances that non-Federal assets obtained from the applicant and the applicant’s partnering organizations will be used as a funding source to meet not less than 50 percent of the costs incurred.

“(c) Merit Review.—The Secretary shall subject each such application to merit review. In making a decision whether to approve such application and provide financial support under this section, the Secretary shall consider, at a minimum, the following:

“(A) The merits of the application, particularly with respect to the provision of demonstrations and technology transfer;

“(B) The quality of service to be provided;

“(C) Geographical diversity and extent of service area;

“(D) The percentage of funding and amount of in-kind commitment from other sources.

“(d) Evaluation.—

“(1) In general.—Each Center that receives financial assistance under this section shall be evaluated during its third year of operation by an evaluation panel appointed by the Secretary.

“(2) Composition.—Each such evaluation panel shall be composed of independent experts, none of whom shall be connected with the involved Center, and Federal officials.

“(3) Chair.—An official of the Institute shall chair the panel.

“(d) Performance Measurement.—Each evaluation panel shall measure the involved Center’s performance against the objectives specified in this section.

“(E) Positive Evaluation.—If the evaluation is positive, the Secretary may provide continued funding through the fifth year.

“(F) Corrective Action Plan.—The Secretary shall develop and approve the remaining years of a Center’s operation unless the evaluation is positive. A Center that has not received a positive evaluation by the evaluation panel shall be notified by the Secretary that the deficiencies in its performance shall be addressed. The Secretary shall provide the Center with a corrective action plan to address the deficiencies unless immediate action is necessary to protect the public interest. The program shall re-evaluate the Center within one year, and if the Center has not addressed the deficiencies identified by the panel, or shown a significant improvement in its performance, the Secretary shall conduct a new competitive re-evaluation or may close the Center.

“(G) Additional Financial Support.—After the fifth year, a Center may receive additional financial support under this section if it has received a positive evaluation through an independent review, under procedures established by the Institute.

“(h) Reevaluation.—If a Center has received financial support for 10 consecutive years, the Director shall conduct a new competitive re-evaluation. An existing Center may submit an application as part of the new competition.

“(1) Recompetitive Plan.—Not later than 180 days after the date of enactment of the America Compete Reauthorization Act of 2015, the Director shall submit a plan to the Committee on Commerce, Science, and Technology of the House of Representatives and the Committee on Commerce, Science, and Technology of the Senate detailing how the program will implement the new competitions required under subparagraph (H). The Director shall consult with the MEP Advisory Board and the Oversight Board established under subsection (f) in the development and implementation of the plan.

“(2) Oversight Board.—

“(A) In general.—Each Center that receives financial assistance under this section shall establish an oversight board that is representative of stakeholders with a majority of board members drawn from local small and medium-sized manufacturing firms.

“(B) Bylaws and Conflict of Interest.—Each board under subparagraph (A) shall adopt and submit to the Director bylaws to govern the operation of the board, including a conflict of interest policy to ensure relevant relationships are disclosed and proper recusal procedures are in place.

“(C) Limitation.—Board members may not serve simultaneously on not more than one Center’s oversight board or serve as a contractor providing services to a Center.

“(D) Protection of Confidential Information.—The Secretary shall limit the following to the extent possible:

“(i) Confidential information on the business operations of—

“(ii) A participant under the program; or

“(iii) A client of a Center.

“(E) Trade Secrets.—Each board under subparagraph (A) shall adopt and submit to the Director procedures for the protection of trade secrets possessed by any client of a Center.

“(F) Peremptory Right.—The provisions of chapter 18 of title 35, United States Code, shall apply, to the extent not inconsistent with this section, to the promotion of technology transfer from research funded under this section except for contracts for such specific technology extension or transfer services as may be specified by statute or by the Director.

“(G) Reporting and Auditing Requirements.—The Director shall establish procedures regarding Center financial reporting and auditing to ensure that the Center is in compliance with the provisions of this section and that the purposes specified in this section are in accordance with sound accounting practices.

“(H) Acceptance of Funds.—

“(1) In general.—In addition to such sums as may be appropriated to the Secretary and Director for the program, the Secretary and Director also may accept funds from
other Federal departments and agencies and, under section 2(c)(7), from the private sector, to be available to the extent provided by appropriations Acts, for the purpose of strengthening Hollings Manufacturing Extension Partnership programs, including competitive grants under section 23.

(2) ALLOCATION OF FUNDS.—

(A) FUNDS ACCEPTED FROM OTHER FEDERAL DEPARTMENTS OR AGENCIES.—The Director shall accept funds accepted by or on an advisory board for the Centers, if allocated to a Center, may not be considered in the calculation of the Federal share of capital and annual operating and maintenance costs under subsection (c).

(B) FUNDS ACCEPTED FROM THE PRIVATE SECTOR.—Funds accepted from the private sector shall meet not less than 10 members broadly representative of stakeholders, to be appointed by the Director. At least one member shall represent a community college, and at least 5 other members shall be from small and medium-sized manufacturers, and no member shall be an employee of the Federal Government.

(3) VACANCIES.—Any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term.

(4) SERVING CONSECUTIVE TERMS.—Any person who has completed two consecutive full terms of service on the MEP Advisory Board shall thereafter be ineligible for appointment during the one-year period following the expiration of the second such term.

(5) MEETINGS.—The MEP Advisory Board shall meet not less than 2 times annually and shall provide to the Director—

(A) advice on Hollings Manufacturing Extension Partnership programs, plans, and policies;

(B) assessments of the soundness of Hollings Manufacturing Extension Partnership plans and strategies; and

(C) assessments of current performance against Hollings Manufacturing Extension Partnership program plans.

(6) FEDERAL ADVISORY COMMITTEE ACT APPLICATION.—

(A) IN GENERAL.—The MEP Advisory Board shall not apply to the MEP Advisory Board.

(B) EXCEPTION.—Section 14 of the Federal Advisory Committee Act shall not apply to the MEP Advisory Board.

(7) REPORT.—The MEP Advisory Board shall transmit an annual report to the Secretary of Commerce containing such information as the Director deems appropriate.

(8) PROGRAM CONTRIBUTION.—Recipients of awards under this subsection shall not be required to provide a matching contribution.

(9) DURATION.—Awards under this subsection shall last no longer than 5 years.

(1) INNOVATIVE SERVICES INITIATIVE.—

(A) ESTABLISHMENT.—The Director may establish, within the Hollings Manufacturing Extension Partnership, a program of competitive awards among participants described in paragraph (3) for the purposes described in paragraph (3).

(B) PARTICIPANTS.—Participants receiving awards under this subsection shall be the Centers, or eligible entities.

(C) PURPOSE.—The purpose of the program under this subsection is to add capabilities to the Hollings Manufacturing Extension Partnership to assist in the development of projects to solve new or emerging manufacturing problems as determined by the Director, in consultation with the Director of the Hollings Manufacturing Extension Partnership, the MEP Advisory Board, and small and medium-sized manufacturers.

(2) THEMES.—One or more themes for the competition may be identified, which may vary from year to year, depending on the needs of manufacturers and the success of previous competitions. These themes may include—

(A) supply chain integration and quality management;

(B) the creation of partnerships to encourage the development of a workforce with the skills needed by small and medium-sized manufacturers;

(C) energy efficiency, including efficient building technologies and environmentally friendly materials, processes, and products;

(D) enhancing the competitiveness of small and medium-sized manufacturers in the global marketplace;

(E) the transfer of technology based on the technical, industrial, and economic development of small and medium-sized manufacturers that can lead to the commercialization of new product technology, including projects related to construction industry modernization.

(3) SELECTION.—Awards under this subsection shall be peer reviewed and competitively awarded. The Director shall select proposals to receive awards that will—

(A) utilize innovative or collaborative approaches to solving the problem described in the competition;

(B) improve the competitiveness of industries in the region in which the Center or Centers are located, and

(C) contribute to the long-term economic stability of that region, including the creation of jobs or training employees.

(4) PROGRAM CONTRIBUTION.—Recipients of awards under this subsection shall not be required to provide a matching contribution.

(5) DURATION.—Awards under this subsection shall last no longer than 5 years.

(6) INNOVATIVE SERVICES INITIATIVE.—

(A) ESTABLISHMENT.—The Director, in coordination with the Advanced Manufacturing Partnership, shall establish, within the Hollings Manufacturing Extension Partnership, an innovative services initiative to assist small and medium-sized manufacturers in—

(A) reducing their energy usage, greenhouse gas emissions, and environmental waste to improve profitability;

(B) accelerating the domestic commercialization of new products, including components for renewable energy and energy efficiency systems; and

(C) identifying and diversifying to new markets, including such part of the production for renewable energy and energy efficiency systems.

(7) MARKET DEMAND.—The Director may not make any action or activities that accelerate the domestic commercialization of a new product technology in this subsection unless and until the activities of an action or activity under this subsection that new product technology has been conducted.

(8) EXPORT ASSISTANCE TO SMALL AND MEDIUM-SIZED MANUFACTURERS.—

(A) IN GENERAL.—The Director shall—

(A) develop programs to assist small and medium-sized manufacturers that prevent such manufacturers from effectively competing in the global market.

(B) implement a comprehensive export assistance initiative through the Centers to help small and medium-sized manufacturers access such obstacles; and

(C) to the maximum extent practicable, ensure that the activities carried out under subsection (A) and (B) do not duplicate the efforts of other export assistance programs within the Federal Government.

(9) REQUIREMENTS.—The initiative shall include—

(A) export assistance counseling;

(B) the development of partnerships that will provide small and medium-sized manufacturers with greater access to and knowledge of global markets; and

(C) improved communication between the Centers and other entities that assist such manufacturers in implementing appropriate, targeted solutions to such obstacles.

(10) DEFINITIONS.—In this section:

(A) AREA CAREER AND TECHNICAL EDUCATION SCHOOL.—The term ‘area career and technical education school’ means an institution of higher education (as defined under section 101(a) of the Higher Education Act of 1965 (20 U.S.C. 1001(a))) at which the highest degree that is predominately awarded to students is an associate’s degree.

(B) COMMUNITY COLLEGE.—The term ‘community college’ means an institution of higher education (as defined under section 101(a) of the Higher Education Act of 1965 (20 U.S.C. 1001(a)) at which the highest degree that is predominately awarded to students is an associate’s degree.

SEC. 404. NATIONAL ACADEMIES REVIEW.

Not later than 6 months after the date of enactment of this Act, the Director of the National Institute of Standards and Technology shall enter into a contract with the National Academies to conduct a single, comprehensive review of the Institute’s laboratory programs. The review shall—

(1) assess the technical merits and scientific caliber of the research conducted at the laboratories;

(2) examine the strengths and weaknesses of the 2010 laboratory reorganization on the Institute’s ability to fulfill its mission;

(3) evaluate how cross-cutting research and development activities are planned, coordinated, and executed across the laboratories; and

(4) assess how the laboratories are engaging industry, including the incorporation of industry need, into the research goals and objectives of the Institute.

SEC. 405. INNOVATIVE COLLABORATION WITH OTHER AGENCIES.

Section 8 of the National Bureau of Standards Authorization Act for Fiscal Year 1983 (15 U.S.C. 276c) is amended—

(1) in the heading, by inserting ‘AND WITH’ after ‘PERFORMED FOR’; and
(2) by adding at the end the following:

"The Secretary may accept, apply for, use, and spend Federal, State, and non-governmental acquisition and assistance funds to further the purposes and activities of the Institute without regard to the source or the period of availability of these funds as well as share personnel, associates, facilities, and property with governmental and other partner organizations, with or without reimbursement, upon mutual agreement."

SEC. 406. MISCELLANEOUS PROVISIONS.

(a) TECHNOLOGY ACTIVITIES.—Section 15 of the National Institute of Standards and Technology Act (15 U.S.C. 278e) is amended—

(1) by striking "of the Government;" and inserting "of the Government;"

(2) by striking "transportation services for employees of the Institute" and inserting "transportation services for employees, associates, or fellows of the Institute;" and

(3) by striking "Code," and inserting "Code; and (i) the protection of Institute buildings and other plant facilities, equipment, and property, and of employees, associates, visitors, or other persons located therein or associated therewith, notwithstanding any provision of law;"

(b) POST-DOCTORAL FELLOWSHIP PROGRAM.—Section 19 of the National Institute of Standards and Technology Act (15 U.S.C. 278e-2) is amended to read as follows:

"SEC. 19. POST-DOCTORAL FELLOWSHIP PROGRAM.

The Director, in conjunction with the National Academy of Sciences, shall establish and conduct a post-doctoral fellowship program that shall include not less than 20 new fellows per fiscal year. In evaluating applications for fellowships under this section, the Director shall give consideration to the goals of promoting the participation of underrepresented minorities in research areas supported by the Institute."

TITLE V—INNOVATION

SEC. 501. OFFICE OF INNOVATION AND ENTREPRENEURSHIP.

(1) in subsection (a) by inserting "with a Director and full-time staff" after "Office of Innovation and Entrepreneurship";

(2) in subsection (b)—

(A) by amending paragraph (3) to read as follows:

"(3) providing access to relevant data, research, and technical assistance on innovation and commercialization, including best practices for university-based incubators and accelerators;"

(B) by redesigning paragraphs (4) and (5) as paragraphs (6) and (7), respectively; and

(C) by inserting the following after paragraph (3):

"(4) overseeing the implementation of the loan guarantee programs and the Regional Innovation Program established under sections 26 and 27, respectively;

(5) developing, within 180 days after the date of enactment of the Competes Reauthorization Act of 2015, and updating at least every 5 years, a strategic plan to guide the activities of the Office of Innovation and Entrepreneurship that shall—

(A) specify and prioritize near-term and long-term goals, objectives, and policies to accelerate innovation and advance the commercialization of research and development, including needed resources and development, set forth the anticipated time for achieving the objectives, and identify metrics for use in assessing progress toward such objectives;

(B) describe how the Department of Commerce is working in conjunction with other Federal agencies to foster innovation and commercialization across the United States; and

(C) provide a summary of the activities, including the development of metrics to evaluate regional innovation strategies undertaken through the Regional Innovation Research and Information Program established under this subsection;

(3) by amending subsection (c) to read as follows:

"(C) ADVISORY COMMITTEE.—(1) ESTABLISHMENT.—The Secretary shall establish or designate an advisory committee, which shall meet at least twice each fiscal year, to provide advice to the Secretary on carrying out the duties and responsibilities of the Office of Innovation and Entrepreneurship.

(2) REPORT TO CONGRESS.—The advisory committee shall prepare a report, to be submitted to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate every 3 years. The first report shall be submitted not later than 1 year after the date of enactment of the Competes Reauthorization Act of 2015 and shall include—

(A) an assessment of the strategic plan developed under paragraph (3) and the progress made in implementing the plan and the duties of the Office of Innovation and Entrepreneurship;

(B) an assessment of how the Office of Innovation and Entrepreneurship is working with other Federal agencies to meet the goals and duties of the office; and

(C) any recommendations for how the Office of Innovation and Entrepreneurship could be improved.;" and

(4) by adding at the end the following:

"(d) AUTHORIZED EXPENDITURES.—There are authorized to be appropriated to the Secretary $5,000,000 for each of fiscal years 2016 through 2020 to carry out this section."

SEC. 502. FEDERAL LOAN GUARANTEES FOR INNOVATIVE TECHNOLOGIES IN MANUFACTURING.

SEC. 503. INNOVATION VOUCHER PILOT PROGRAM.

Section 25 of the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 372a) is amended by adding after section 501 of this Act, further amended by adding at the end the following:

"(e) INNOVATION VOUCHER PILOT PROGRAM.—

(1) IN GENERAL.—The Secretary, acting through the Office of Innovation and Entrepreneurship and in conjunction with the States, shall establish an innovation voucher pilot program to accelerate innovative activities and enhance the competitiveness of small and medium-sized manufacturers in the United States. The program shall—

(A) foster collaborations between small and medium-sized manufacturers and research institutions; and

(B) enable small and medium-sized manufacturers to access technical expertise and capabilities that will lead to the development of innovative products or manufacturing processes, including through—

(i) research and development, including proof of concept, technical development, and compliance activities;

(ii) early-stage product development, including engineering design services; and

(iii) technology transfer and related activities;

(2) AWARD SIZE.—The Secretary shall competitively award vouchers worth up to $20,000 to small and medium-sized manufacturers for use at eligible research institutions to acquire the services described in paragraph (1)(B);

(3) PROGRAM ELIGIBILITY.—Prior to awarding any voucher under the program, the Secretary shall promulgate regulations—

(A) establishing criteria for the selection of recipients of awards under this subsection; and

(B) establishing procedures for the financial reporting and auditing of the funds described in paragraph (1)(B) to ensure that funds are used for the purposes of the program; and

(4) REGULATIONS.—Prior to awarding any voucher under the program, the Secretary shall promulgate regulations—

(A) establishing criteria for the selection of recipients of awards under this subsection; and

(B) establishing procedures regarding financial reporting and auditing to ensure that funds are used for the purposes of the program; and

(ii) that in accordance with sound accounting practices; and

(C) describing any other policies, procedures, or information necessary to implement this subsection, including those intended to streamline and simplify the program in accordance with paragraph (5).

(5) TRANSFER AUTHORITY.—The Secretary may transfer funds appropriated to the Department of Commerce to other Federal agencies for the performance of services authorized under this program.

(6) ADMINISTRATIVE COSTS.—All of the amounts appropriated to carry out this subsection, including administrative and legislative action that could optimize the effectiveness of the pilot program, shall be used for vouchers awarded under this subsection, except that the Secretary may set aside a percentage of such amounts for eligible research institutions performing services described in paragraph (1)(B) to defray administrative costs associated with the services.

(7) OUTREACH.—The Secretary may use centers established under section 25 of the National Institute of Standards and Technology Act (15 U.S.C. 278k) to provide information about the program established under this subsection and to conduct outreach to potential applicants, as appropriate.

(8) REPORTS TO CONGRESS.—

(A) PLAN.—Not later than 180 days after the date of enactment of the Competes Reauthorization Act of 2015, the Secretary shall submit to Congress a plan that will serve as a guide for the activities of the program. The plan shall include a description of the specific activities and the metrics that will be used in assessing progress toward those objectives.

(B) OUTCOMES.—Not later than 3 years after the date of enactment of the Competes Reauthorization Act of 2015, the Secretary shall submit a report containing—

(i) a summary of the activities carried out under this subsection;

(ii) an assessment of the impact of such activities on the innovative capacity of small and medium-sized manufacturers receiving assistance under the pilot program; and

(iii) any recommendations for administrative and legislative action that could optimize the effectiveness of the pilot program.

(9) COORDINATION AND NONDUPICATION.—To the maximum extent practicable, the Secretary shall ensure that the activities carried out under this subsection are coordinated with, and do not duplicate the efforts of, other programs within the Federal Government.

(10) ELIGIBLE RESEARCH INSTITUTIONS DEFINED.—For purposes of this subsection, the term "eligible research institution" means—

(A) an institution of higher education, as such term is defined in section 101(a) of the
Higher Education Act of 1965 (20 U.S.C. 1001(a));

"(b) A Federal laboratory;

"(c) A federally funded research and development center;

"(d) A Hollings Manufacturing Extension Center established under section 25 of the National Institute of Standards and Technology (15 U.S.C. 1524);

"(11) AUTHORIZATION OF APPROPRIATIONS.—

There are authorized to be appropriated to the Secretary to carry out the pilot program in subsection (b), $200,000,000 for each of fiscal years 2016 through 2020.

"SEC. 504. FEDERAL ACCELERATION OF STATE TECHNOLOGY COMMERCIALIZATION PILOT PROGRAM.

The Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3701 et seq.) is amended by adding at the end the following:

"SEC. 28. FEDERAL ACCELERATION OF STATE TECHNOLOGY COMMERCIALIZATION PILOT PROGRAM.

"(a) AUTHORITY.—

"(1) ESTABLISHMENT.—The Secretary shall establish a Federal Acceleration of State Technology Commercialization Pilot Program to award grants to States, or consortia thereof, for the purposes described in paragraph (2). Awards under this section shall be made through a competitive, merit-based process.

"(2) PURPOSE.—The purpose of the program under this section is to advance United States competitiveness by accelerating commercialization of innovative technology by leveraging Federal support for State commercialization efforts. The program shall provide matching funds to a State, or consortium thereof, for the acceleration of commercialization activities and the promotion of small manufacturing enterprises.

"(b) APPLICATION.—Applications for awards under this section shall be submitted in such a manner, at such a time, and containing such information as the Secretary shall require, including—

"(1) a description of the current state of technology commercialization in the State or States, including successes and barriers to commercialization; and

"(2) a description of the State’s or consortium’s existing efforts to promote commercialization of new technologies, products, processes, and services.

"(c) SELECTION CRITERIA.—The Secretary shall solicit and receive applications for the Pilot Program awards, which shall consider at a minimum a review of efforts during the fiscal year prior to submitting an application to—

"(1) promote manufacturing; and

"(2) commercialize new technologies, products, processes, and services, including activities to translate federally funded research and development into new manufacturing enterprises.

"(d) MATCHING REQUIREMENT.—A State or consortium receiving a grant under this section shall, in accordance with Federal cash contributions, provide such State or consortium with an in-kind amount equal to 50 percent of the total cost of the project for which the grant is provided.

"(e) COORDINATION AND NONDUPlication.—

In carrying out the program under this section, the Secretary shall ensure that grants made under the program are coordinated with, and do not duplicate, the efforts of other commercialization programs within the Federal Government.

"(f) EVALUATION.—

"(1) IN GENERAL.—Not later than 3 years after the date of enactment of the America COMPetes Reauthorization Act of 2015, the Secretary shall evaluate the program under this section in accordance with any contracts entered into as independent entities, such as the National Academy of Sciences, to conduct an evaluation of the program established under subsection (a).

"(2) REQUIREMENTS.—The evaluation shall—

"(A) assess whether the program is achieving its goals;

"(B) include any recommendations for how the program may be improved; and

"(C) include an evaluation as to whether the program should be continued or terminated.

"(g) DEFINITIONS.—In this section—

"(1) the term ‘State’ has the meaning given that term in section 3 of the Public Works and Economic Development Act of 1965 (42 U.S.C. 3122); and

"(2) the term ‘commercialization’ has the meaning given that term in section 9(e)(10) of the Small Business Act (15 U.S.C. 638(e)(10)).

"(h) DURATION.—Each award shall be for a 5-year period.

"(1) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary $50,000,000 for each of fiscal years 2016 through 2018 to carry out this section.

TITLE VI—DEPARTMENT OF ENERGY

Subtitle A—Office of Science

SEC. 601. SHORT TITLE.

This subtitle may be cited as the "Department of Energy Office of Science Authorization Act of 2015.

SEC. 602. DEFINITIONS.

Except as otherwise provided, in this subtitle—

"(1) DEPARTMENT.—The term ‘Department’ means the Department of Energy.

"(2) DIRECTOR.—The term ‘Director’ means the Director of the Office of Science.

"(3) OFFICE OF SCIENCE.—The term ‘Office of Science’ means the Department of Energy Office of Science.

"(4) SECRETARY.—The term ‘Secretary’ means the Secretary of Energy.

"(5) NATIONAL SCIENTIFIC USER FACILITIES.—The term ‘National Scientific User Facilities’ means the National Scientific User Facilities Program.

"(7) UNDER SECRETARY.—The term ‘Under Secretary’ means the Under Secretary for Science and Energy.

"(8) TECHNOLOGY.—The term ‘Technology’ means the technology advancement activities of the Office of Science.

SEC. 603. MISSION OF THE OFFICE OF SCIENCE.

Section 209 of the Department of Energy Organization Act (42 U.S.C. 7139) is amended by adding at the end the following:

"(m) MISSION.—The mission of the Office of Science shall be to support the highest level of excellence in scientific research in the United States. The mission shall include—

"(1) advancing a broad range of key science disciplines and the scientific foundations of the global economy; and

"(2) delivering the 21st century tools of science, engineering, and technology and provide the Nation’s researchers with the most advanced tools of modern science including accelerators, colliders, supercomputers, light sources and neutron sources, and facilities for studying complex molecular systems and the nanoworld.

"(n) SUPPORTING ACTIVITIES.—The activities described in subsection (d) shall include providing for relevant facilities and infrastructure, programmatic analysis, interagency coordination, and improve development and outreach activities.

"(o) USER FACILITIES.—

"(1) IN GENERAL.—The Director shall carry out the construction, operation, and maintenance of user facilities, including underground research facilities, to support the activities described in subsection (d). As practicable, these facilities shall be a part of the Department, industry, the academic community, and other relevant entities for the purposes of advancing the missions of the Department.

"(p) COORDINATION WITH OTHER FEDERAL AGENCIES.—The Director may form partnerships to enhance the utilization of and ensure access to user facilities, including underground research facilities, by other Federal agencies.

SEC. 604. BASIC ENERGY SCIENCES PROGRAM.

"(a) PROGRAM.—As part of the activities authorized under the Department of Energy Office of Science Authorization Act of 2015, the Director shall carry out a program in basic energy sciences, including materials sciences and engineering, chemical sciences, physical biosciences, and geo-sciences, for the purposes of providing the scientific foundations for new technologies and addressing scientific grand challenges.

"(b) DOMESTIC MANUFACTURING CAPABILITY FOR OFFICE OF SCIENCE FACILITIES REPORT.—Not later than one year after the date of enactment of the Department of Energy Office of Science Authorization Act of 2015, the Secretary shall transmit a report to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

"(c) MISSION OF THE OFFICE OF SCIENCE.—The Director shall carry out the Program described in subsection (a) in order to increase the capability of domestic manufacturers to meet the procurement requirements for major ongoing projects funded by the Office of Science, including a call to manufacturers to meet the demand for advanced manufacturing equipment acquired from domestic manufacturers for this purpose; and

"(1) identify steps that can be taken by the Federal Government and by private industry to increase the capability of domestic manufacturers to meet procurement requirements of the Office of Science for major projects.

"SEC. 605. NATIONAL SCIENTIFIC USER FACILITIES.
The Director shall carry out a program of research and development on advanced accelerator and storage ring technologies relevant to the Basic Energy Sciences Advisory Committee, established under subparagraph (A), shall—

1. identify current scientific challenges for understanding the long-term effects of ionizing radiation;
2. assess the status of current low dose radiation research in the United States and internationally;
3. formulate overall scientific goals for the future of low-dose radiation research in the United States;
4. recommend a long-term strategic and priority research agenda to address scientific research goals for overcoming the identified scientific challenges in coordination with other research efforts;
5. outline the elements of a research program that would address this research agenda within the universities and the National Laboratories; and
6. assess the cost-benefit effectiveness of such a program.

E) 5-YEAR RESEARCH PLAN.—Not later than 90 days after the completion of the assessment performed under subparagraph (C), the Secretary shall deliver a report to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate within a five-year research plan that responds to the assessment's findings and recommendations and identifies and prioritizes research needs.

(c) CLIMATE AND ENVIRONMENTAL SCIENCE ACTIVITIES.—

1. IN GENERAL.—As part of the activities authorized under subsection (a), the Director shall carry out research and development activities to—
(a) understand, observe, and model the response of Earth's atmosphere and biosphere to increased concentrations of greenhouse gas emissions and any associated changes in climate;
(b) understand the processes for immobilization, or removal of, and understand the movement of, energy production-derived contaminants such as radionuclides and heavy metals, and understand the process of sequestration and transformation of carbon dioxide in subsurface environments; and
(c) inform potential mitigation and adaptation options for increased concentrations of greenhouse gas emissions and any associated changes in climate.

2. SUBSURFACE BIOCHEMICAL RESEARCH.—

(A) IN GENERAL.—As part of the activities described in paragraph (1), the Director shall carry out research to understand the potential for bioenergy production at environmental disposal sites. The study shall be conducted in coordination with activities carried out under subsection (b), the Director shall carry out research on low dose radiation in the United States and internationally;

(ii) low dose radiation means a radiation dose of less than 100 millisieverts.

(B) DEFINITION.—In this paragraph, the term "low dose radiation" means a radiation dose of less than 100 millisieverts.

(C) STUDY.—Not later than 60 days after the date of enactment of this Act, the Director shall submit to the Under Secretary to support and accelerate the decontamination of relevant facilities managed by the Department.

3. CLIMATE AND EARTH MODELING.—As part of the activities described in paragraph (1), the Director, in collaboration with the Advanced Scientific Computing Research program described in section 606, shall carry out research to develop, evaluate, and use high-resolution regional climate, global climate, and Earth models to inform decisions on reducing the impacts of a changing climate. Such modeling shall include, among other things, simulations, predictions, land use, and interaction among human and Earth systems.
SEC. 606. ADVANCED SCIENTIFIC COMPUTING RESEARCH PROGRAM.

(a) IN GENERAL.—As part of the activities authorized under section 208 of the Department of Energy Organization Act (42 U.S.C. 7319), the Director shall carry out a research, development, demonstration, and commercial application program to advance computationally and networking capabilities for data-driven discovery and to analyze, model, simulate, and predict complex phenomena relevant to Department of Energy technologies and the competitiveness of the United States.

(b) COORDINATION.—The Under Secretary shall coordinate the activities of the Department, including activities under this section, to determine and meet the computational and networking research and facility needs of the Office of Science and all other relevant energy technology and energy efficiency programs within the Department.

(c) RESEARCH TO SUPPORT ENERGY APPLICATIONS.—

(1) IN GENERAL.—As part of the activities authorized under subsection (a), the program shall focus on research and development in high-end computing and networking relevant to energy applications including modeling, simulation, data analytics, and application programs supported by the Federal Government, to ensure the missions of the Department are accomplished.

(2) REPORT.—Not later than 1 year after the date of enactment of this Act, the Secretary shall submit to the Congress a report to Congress that describes the status of the high-end computing systems and resources supported by the Federal Government, to ensure the missions of the Department are accomplished.

(d) APPLIED MATHEMATICS AND SOFTWARE DEVELOPMENT FOR HIGH-END COMPUTING SYSTEMS.—The Director shall carry out activities to develop, test, and support applied mathematics, models, and algorithms for complex systems, as well as programming environments, tools, languages, and operating systems for high-end computing systems (as defined in subsection (a), as well as other relevant computational and networking research programs and resources supported by the Federal Government, to ensure the missions of the Department are accomplished.

(e) EXASCALE COMPUTING PROGRAM.—Section 3 of the Department of Energy High-End Computing Revitalization Act of 2001 (42 U.S.C. 5942) is amended by—

(1) in subsection (a)—

(A) in paragraph (1), by striking "program" and inserting "coordinated program across the Department";

(B) by striking "and" at the end of paragraph (1); and

(C) by striking the period at the end of paragraph (2) and inserting "; and";

(D) by adding at the end the following new paragraph:

"(3) in general, the Secretary shall conduct a coordinated research program to develop exascale computing systems to advance the missions of the Department.";

(2) EXECUTION.—The Secretary shall, through competitive merit review, establish a two or more laboratory-industry-university partnerships to conduct integrated research, development, and engineering of multiple exascale architectures, and—

(3) INTEGRATED STRATEGY AND PROGRAM MANAGEMENT PLAN.—The Secretary shall submit to Congress not later than 90 days after the date of enactment of the Department of Energy High-End Computing Revitalization Act of 2001 a report outlining an integrated strategy and program management plan, including target dates for prototypical and production exascale systems, interim milestones to reaching these targets, functional requirements, roles and responsibilities of National Laboratories and industry, acquisition strategy, and estimated resources required, to achieve this exascale system capability. The report shall include the Secretary's plan for Departmental organization to manage and execute the Exascale Computing Program. The report shall describe in detail the roles and responsibilities within the Department to ensure an integrated program across the Department. The report shall also include the balance and prioritizing across ASCR subprograms in a flat or slow-growth budget environment.

(4) STATUS REPORTS.—At the time of the budget submission of the Department for each fiscal year, the Secretary shall submit a report to Congress that describes the status of milestones and costs in achieving the objectives of the exascale computing program.

(5) EXASCALE MERIT REPORT.—At least 18 months prior to the initiation of construction of an example-class international exascale-class computing facility, the Secretary shall transmit a plan to the Congress detailing—

(i) the proposed facility's cost projections and projected operational budget and the Department's plan to fully fund the facility; and

(ii) technical risks and challenges that must be overcome to achieve successful completion and operation of the facility; and

(iii) an independent assessment of the scientific and technological advances expected from such a facility relative to those expected from investments in expanded research and applications at terascale-class and petascale-class computing facilities, including an evaluation of where the investment would be made in the system software and algorithms to enable these advances.

(f) DEFINITIONS.—Section 2 of the Department of Energy High-End Computing Revitalization Act of 2001 (42 U.S.C. 5541) is amended by striking paragraphs (1) through (3) and inserting the following:

"(1) CO-DESIGN.—The term 'co-design' means the joint development of application algorithms, models, and codes with computer technology architectures to systems to maximize effective use of high-end computing systems.

(2) EXECUTION.—The term 'Department' means the Department of Energy.

(3) EXASCALE.—The term 'exascale' means computing system performance at or near 10 000 times greater power floating point operations per second.

(4) HIGH-END COMPUTING SYSTEM.—The term 'high-end computing system' means a computing system with performance that substantially exceeds that of systems that are commonly available for advanced scientific and engineering applications.

(5) LEADERSHIP SYSTEM.—The term 'Leadership System' means a high-end computing system that is among the most advanced in the world in terms of performance in solving science and engineering problems.

(6) INSTITUTION OF HIGHER EDUCATION.—The term 'institution of higher education' has the meaning given in the Act in section 2 of the Energy Policy Act of 2005 (42 U.S.C. 15801).

(7) NATIONAL LABORATORY.—The term 'National Laboratory' has the meaning given in the Act in section 2 of the Energy Policy Act of 2005 (42 U.S.C. 15801).

(8) SECRETARY.—The term 'Secretary' means the Secretary of Energy.

(9) SOFTWARE TECHNOLOGY.—The term 'software technology' includes optimal algorithms, programming environments, tools, languages, and operating systems for high-end computing systems.
(ii) progress of the ITER Council and the ITER Director-General toward implementation of the recommendations of the Third Biennial International Organization Management Assessment Report.

(C) FAIRNESS IN COMPETITION FOR SOLICITATIONS FOR INTERNATIONAL PROJECT ACTIVITIES.—Section 33 of the Atomic Energy Act of 1954 is amended by adding at the end the following: ‘‘For purposes of this section, with respect to international research projects, the term ‘private facilities or laboratories’ refers to facilities or laboratories located in the United States.’’.

(D) SENSE OF CONGRESS.—It is the sense of Congress that the United States should in no way be diminished by participation of the United States in the ITER project.

(c) INITIAL FUSION ENERGY RESEARCH AND DEVELOPMENT.—The Secretary shall carry out a program of research and technology development in inertial fusion for energy applications, including ion beam, laser, and pulsed power fusion systems.

(d) ALTERNATIVE AND ENABLING CONCEPTS.—(1) IN GENERAL.—As part of the program described in subsection (a), the Director shall support research and development activities and facility operations at United States universities, national laboratories, and private facilities for a portfolio of alternative and enabling fusion energy concepts that may provide solutions to significant challenges to the establishment of a commercial fusion power plant, prioritized based on the ability of the United States to play a leadership role in the international fusion research community. Fusion energy concepts and activities explored under this paragraph may include—

(A) high magnetic field approaches facilitated by high temperature superconductors;

(B) advanced stellarator concepts;

(C) non-tokamak confinement configurations operating at low magnetic fields;

(D) magnetized target fusion energy concepts;

(E) liquid metals to address issues associated with fusion plasma interactions with the insulating plasma boundary;

(F) immersion blankets for heat management and fuel breeding;

(G) advanced scientific computing activities; and

(H) other promising fusion energy concepts identified by the Director.

(2) COORDINATION WITH ARPA–E.—The Under Secretary for Science shall coordinate with the Director of the Advanced Research Projects Agency–Energy (in this paragraph referred to as ‘‘ARPA–E’’) to—

(A) identify specific areas of fusion energy research and development in which the United States can and should establish or solidify a lead in the global fusion energy development effort;

(B) identify priorities for initiation of facility construction and facility decommissioning under each of those scenarios;

(C) provide a roadmap addressing critical scientific challenges to ensure that within 10 years after the date of enactment of this Act, there is sufficient basis to justify and motivate the initiation of an applied fusion energy development program; and

(D) assess the ability of the United States fusion workforce to carry out the activities identified in subparagraphs (A) through (C), including the adequacy of college and university programs, leadership and workers of the next generation of fusion energy researchers.

(3) PROCESS.—In order to develop the report required under paragraph (1), the Secretary shall leverage best practices and lessons learned from the process used to develop the most recent report of the Particle Physics Project Prioritization Panel of the High Energy Physics Advisory Panel.

SEC. 608. HIGH ENERGY PHYSICS PROGRAM.

(a) PROGRAM.—As part of the activities authorized under section 209 of the Department of Energy Organization Act (42 U.S.C. 7139), the Director shall carry out a research program on the elementary constituents of matter and energy and the nature of space and time.

(b) ENERGY FRONTIER RESEARCH.—As part of the program described in subsection (a), the Director shall carry out research using high energy accelerators and advanced detectors to create and study interactions of novel particles and investigate fundamental forces.

(c) NEUTRINO RESEARCH.—As part of the program described in subsection (a), the Director shall carry out research activities on rare decay processes and the nature of the neutrino, which may include collaborations with the National Science Foundation or international collaborations on relevant research projects.

(d) DARK ENERGY AND DARK MATTER RESEARCH.—As part of the program described in subsection (a), the Director shall carry out research activities on the nature of dark energy and dark matter. These activities shall be consistent with the research priorities identified by the High Energy Physics Advisory Panel of the National Academy of Sciences and may include—

(1) collaborations with the National Aeronautics and Space Administration, the National Science Foundation, or international collaborations on relevant research projects; and

(2) the development of space-based, land-based, and underground facilities and experiments.

(e) FACILITY CONSTRUCTION AND MAJOR ITEMS OF EQUIPMENT.—Consistent with the Office of Science’s project management practices, the Director shall support construction or fabrication of—

(1) an international Long-Baseline Neutrino Facility based in the United States;

(2) the Muon to Electron Conversion Experiment;

(3) Second Generation Dark Matter experiments;

(4) the Dark Energy Spectroscopic Instrument;

(5) the Large Synoptic Survey Telescope camera; and

(6) upgrades to components of the Large Hadron Collider and

(7) other high priority projects recommended in the most recent report of the Particle Physics Project Prioritization Panel of the High Energy Physics Advisory Panel.

(f) ACCELERATOR RESEARCH AND DEVELOPMENT.—As part of the program described in subsection (a), the Director shall carry out research and development in advanced accelerators and concepts including laser technologies, to reduce the necessary scope and cost for the next generation of particle accelerators, in coordination with the Office of Science, the National Science Foundation, or international Energy Sciences and Nuclear Physics programs.

(g) INTERNATIONAL COLLABORATION.—The Director, as practicable and in coordination with other appropriate Federal agencies as necessary, shall ensure the access of United States researchers to the most advanced accelerator facilities and research capabilities in the world, including the Large Hadron Collider.

SEC. 609. NUCLEAR PHYSICS PROGRAM.

(a) PROGRAM.—As part of the activities authorized under section 209 of the Department of Energy Organization Act (42 U.S.C. 7139), the Director shall carry out a research program that support relevant facilities, to discover and understand the fundamental forces of nuclear matter.

(b) FACILITY CONSTRUCTION.—In general.—The Director shall carry out a program for the production of isotopes...
that the Director determines are needed for research and applications, including—
(A) the development of techniques to produce isotopes; and
(B) the design of new infrastructure required for isotope production and research.

(2) COORDINATION.—In making the determination described in paragraph (1), the Secretary shall—
(A) ensure that isotope production activities do not compete with private industry unless critical national interests necessitate the Federal Government's involvement; and
(B) consider any relevant recommendations made by Federal advisory committees, the National Academies, and interagency working groups in which the Department participates.

SEC. 610. SCIENCE LABORATORIES INFRASTRUCTURE PROGRAM.

(a) PROGRAM.—The Director shall carry out a program to improve the safety, efficiency, and mission readiness of infrastructure at Office of Science laboratories. The program shall include projects to—
(1) renovate or replace space that does not meet research needs;
(2) replace facilities that are no longer cost effective or safe to operate;
(3) modernize utility systems to prevent failures and ensure efficiency;
(4) remove excess facilities to allow safe and efficient operation;
and
(5) construct modern facilities to conduct advanced research in controlled environmental conditions.

(b) APPROACH.—In carrying out this section, the Director shall utilize all available approaches and mechanisms, including capital line items, minor construction projects, energy efficiency performance contracts, utility energy service contracts, alternative financing, and expense funding, as appropriate.

(c) DEFINITION.—The term ‘Office of Science laboratory’ means a subset of National Laboratories as defined in section 2(3) of the Energy Policy Act of 2005 (42 U.S.C. 18001) consisting of subparagraphs (A), (B), (C), (D), (F), (K), (L), (M), (P), and (Q).

SEC. 611. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Secretary for the activities of the Office of Science for fiscal years ending in the years 2016 through 2020—
(1) $5,339,794,000 for fiscal year 2016;
(2) $5,606,783,700 for fiscal year 2017;
(3) $5,887,122,885 for fiscal year 2018;
(4) $6,181,479,029 for fiscal year 2019; and
(5) $6,490,552,981 for fiscal year 2020.

Subtitle B—ARPA-E

SEC. 621. SHORT TITLE.

This subtitle may be cited as the ‘‘ARPA-E Reauthorization Act of 2015’’.

SEC. 622. ARPA-E AMENDMENTS.

Section 502 of the America COMPETES Act (42 U.S.C. 15638) is amended—
(1) by redesignating subsection (n) as subsection (o); and
(2) by inserting after subsection (m) the following new subsection:

‘‘(n) PROTECTION OF PROPRIETARY INFORMATION.—The following categories of information collected by the Advanced Research Projects Agency-Energy from recipients of financial assistance awards shall be considered privileged and confidential and not subject to disclosure pursuant to section 522 of title 5, United States Code:—

‘‘(1) Plans for commercialization of technologies developed under the award, including technology transfer to market plans, market studies, and cost and performance models.

‘‘(2) Investments provided to an awardee from third parties, such as venture capital, hedge fund, or private equity firms, including amounts and percentage of ownership of the awardee provided in return for such investments.

‘‘(3) Additional financial support that the awardee plans to invest or has invested into technologies resulting from the award, or that the awardee is seeking from third parties.

‘‘(4) Revenue from the licensing or sale of new technologies resulting from the research conducted under the award.’’;

SEC. 641. ENERGY INNOVATION HUBS.

(a) AUTHORIZATION OF PROGRAM.—

(1) IN GENERAL.—The Secretary of Energy shall carry out a program to enhance the Nation’s economic, environmental, and energy security by making awards to consortia for establishing and operating Energy Innovation Hubs to conduct and support, whenever practicable at one centralized location, multidisciplinary, collaborative research, development, demonstration, and commercial application of advanced energy technologies.

(2) TECHNOLOGY DEVELOPMENT FOCUS.—The Secretary shall designate for each Hub a unique advanced energy technology focus.

(3) COORDINATION.—The Secretary shall ensure the coordination of, and avoid unnecessary duplication of, the activities of Hubs with those of other Department of Energy research entities, including the National Laboratories, the Advanced Research Projects Agency-Energy, Energy Frontier Research Centers, and within industry.

(b) CONSORTIA.—

(1) ELIGIBILITY.—To be eligible to receive an award under this section for the establishment and operation of a Hub, a consortium shall—

(A) be composed of no fewer than 2 qualifying entities; and

(B) operate subject to an agreement entered into by its members that—

(i) the proposed partnership agreement, including a detailed description of the activities of the Hub and the governance and management structure of the Hub;

(ii) measures to enable cost-effective implementation of the program under this section; and

(iii) a proposed budget, including financial contributions from non-Federal sources;

(iv) a plan for managing intellectual property rights; and

(v) an accounting structure that enables the Secretary to ensure that the consortium has complied with the requirements of this section.

(2) APPLICATION.—A consortium seeking to establish and operate a Hub under this section, acting through a prime applicant, shall transmit to the Secretary an application at such time, in such form, and accompanied by such information as the Secretary shall require, including a detailed description of the elements of the consortium agreement required under paragraph (1)(B). If the consortium members will not be located at one centralized location, such application shall include communications plans that ensure close coordination and integration of the Hub’s activities.

(c) SELECTION AND SCHEDULE.—The Secretary shall select consortia for awards for the establishment and operation of Hubs through competitive selection processes. In selecting consortia, the Secretary shall consider the information a consortium must disclose according to subsection (b), as well as the following factors, and shall provide for Hub activities. Awards made to a Hub shall be for a period not to exceed 5 years, after which the award may be reviewed, subject to a rigorous merit review. A Hub already in existence on the date of enactment of this Act may continue to receive funding for a period not to exceed 5 years, after which the award may be reviewed, subject to a rigorous merit review.

(d) HUB OPERATIONS.—

(1) IN GENERAL.—Each Hub shall conduct or provide for multidisciplinary, collaborative research, development, demonstration, and, where appropriate, commercial application of advanced energy technologies within the technology development focus designated under subsection (a)(2). Each Hub shall—

(A) encourage collaboration and communication among the members qualifying entities of the consortium and awardees by conducting activities whenever practicable at one centralized location;

(B) develop and publish on the Department of Energy’s website proposed plans and programs;

(C) submit an annual report to the Secretary to ensure that the consortium and awardees comply with the requirements of this section.

(2) CONFLICTS OF INTEREST.—

(A) PROCEDURES.—Hubs shall maintain conflict of interest procedures, consistent with those of the Department of Energy, to ensure that employees and consortia designees for Hub activities who are in decision-making capacities disclose all material conflicts of interest.

(B) DISQUALIFICATION AND REVOCATION.—The Secretary may disqualify an application or revoke funds distributed to a Hub if the Secretary discovers a failure to comply with conflict of interest procedures established under subparagraph (A).

(3) PROHIBITION ON CONSTRUCTION.—

(A) IN GENERAL.—No funds provided pursuant to this section may be used for construction of new buildings or facilities for Hubs. Funds provided to construct new buildings or facilities shall not be considered as part of the non-Federal share of a Hub cost-sharing agreement.

(B) TEST BED AND REMOVAL EXCEPTION.—Nothing in this subsection shall prohibit the use of funds provided pursuant to this section, or non-Federal cost share funds, for research or for the construction of a test bed or renovations to existing buildings or facilities for the purposes of research if the Secretary determines that the test bed or renovations are limited to a scope and scale necessary for the research to be conducted.

(4) TERMINATION.—Consistent with the existing authorities of the Department, the Secretary may temporarily disestablish a Hub for cause during the performance period.

DEFINITIONS.—For purposes of this section:

(1) ADVANCED ENERGY TECHNOLOGY.—The term ‘‘advanced energy technology’’ means—

(A) any innovative technology—

(i) that produces energy from solar, wind, geothermal, biomass, tidal, wave, ocean, or other renewable energy resources;

(ii) that produces nuclear energy;

(iii) for carbon capture and sequestration;

(iv) that enables advanced vehicles, vehicle components, and related technologies that result in significant energy savings;

(v) that produces hydrogen;

(vi) for the construction of a test bed or renovations to existing buildings or facilities for the purposes of research if the Secretary determines that the test bed or renovations are limited to a scope and scale necessary for the research to be conducted.

(2) CONFLICTS OF INTEREST.—The Secretary may disqualify an application or revoke funds distributed to a Hub if the Secretary discovers a failure to comply with conflict of interest procedures established under subparagraph (A).

(3) PROHIBITION ON CONSTRUCTION.—

(A) IN GENERAL.—No funds provided pursuant to this section may be used for construction of new buildings or facilities for Hubs. Funds provided to construct new buildings or facilities shall not be considered as part of the non-Federal share of a Hub cost-sharing agreement.

(B) TEST BED AND REMOVAL EXCEPTION.—Nothing in this subsection shall prohibit the use of funds provided pursuant to this section, or non-Federal cost share funds, for research or for the construction of a test bed or renovations to existing buildings or facilities for the purposes of research if the Secretary determines that the test bed or renovations are limited to a scope and scale necessary for the research to be conducted.

(4) TERMINATION.—Consistent with the existing authorities of the Department, the Secretary may temporarily disestablish a Hub for cause during the performance period.

DEFINITIONS.—For purposes of this section:

(1) ADVANCED ENERGY TECHNOLOGY.—The term ‘‘advanced energy technology’’ means—

(A) any innovative technology—

(i) that produces energy from solar, wind, geothermal, biomass, tidal, wave, ocean, or other renewable energy resources;

(ii) that produces nuclear energy;

(iii) for carbon capture and sequestration;
than conventional technologies, including through Smart Grid technologies; or
(vi) that enhances the energy independence and security of the United States by enab-
ling the development and implementation of technologies that reduce reliance on foreign energy resources, including
coal, oil, and natural gas;
(B) research, development, demonstration, and commercialization of technologies and systems that improve the
energy efficiency and performance of buildings, appliances, transportation, and industrial systems; and
(C) through direct investment, partnerships, and other agreements, to promote the produc-
tion of domestic energy resources, including coal, oil, and natural gas;
(2) research, development, demonstration, and commercialization of technologies that enable the Department of
Energy to participate in the Innovation Corps program, to incorporate experts from the Federal Laborato-
ries in the training curriculum of the Innovation Corps program authorized by section 207.
SEC. 642. PARTICIPATION IN THE INNOVATION CORPS PROGRAM.
(a) AGREEMENT.—The Secretary of Energy shall enter into an agreement with the Di-
rector of the National Science Foundation to enable researchers funded by the Department of
Energy to participate in the Innovation Corps program authorized by section 207.
(b) AUTHORIZATION.—The Secretary of Energy may also establish a Department of Energy
Innovation Corps program, modeled after the National Science Foundation Innovation
Corps program, to incorporate experts from the Department of Energy National Laboratories in the training curriculum of
the program.
SEC. 643. TECHNOLOGY TRANSFER.
(a) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, and annu-
ally thereafter, the Secretary of Energy shall transmit to the Committee on Science, Space, and Technology of the House of
Representatives and the Committee on Energy and Natural Resources of the Senate a report which shall include—
(1) an assessment of the Department’s current ability to carry out the goals of section
101 of the Energy Policy Act of 2005 (42 U.S.C. 16391), including an assessment of the role and effectiveness of the
Director of the Office of Technology Transitions; and
(2) recommendations for policy changes that the Department of Energy may make to
better enable the Department’s ability to successfully transfer new energy technologies to the private sector.
(b) AMENDMENTS.—Section 101 of the Energy Policy Act of 2005 (42 U.S.C. 16391) is
amended by—
(1) inserting after subsection (e) the following new subsection:
"(f) AGREEMENTS FOR COMMERCIALIZING TECHNOLOGY PILOT PROGRAM.—"(1) In each fiscal year, the Secretary shall carry out the Agreements for Commercializing
Technology Pilot program of the Department, as announced by the Secretary on December 8, 2011, in accordance with this
subsection.
"(2) TERMS.—Each agreement entered into pursuant to the pilot program referred to in
paragraph (1) shall provide to the contractor of the applicable National Laboratory, to the maximum extent determined to be appro-
priate by the Secretary, increased authority to negotiate contract terms, such as intellectual
property rights, payment structures, performance guarantees, and multiparty collabor-
ations.
"(3) ELIGIBILITY.—
"(A) IN GENERAL.—Any director of a Na-
tional Laboratory may enter into an agreement pursuant to the pilot program referred to in paragraph (1).
"(B) AGREEMENTS WITH NON-FEDERAL ENTITIES.—To carry out subparagraph (A) and subject to subparagraph (C), the Secretary shall permit the directors of the National Laboratories to execute agreements with non-Federal entities, including a non-Federal entity already receiving Federal funding that will be used to support activities under agreements executed pursuant to subparagraph (A) provided that such funding is vol-
untarily used for purposes of the Federal
award.
"(C) RESTRICTION.—The requirements of chapter 18 of title 35, United States Code
(commonly known as the ‘Bayh-Dole Act’) shall apply if—
"(i) the agreement is a funding agreement (as that term is defined in section 201 of that
chapter); and
"(ii) at least 1 of the parties to the funding agreement is eligible to receive rights under
that chapter.
"(4) SUBMISSION TO SECRETARY.—Each af-
fected director of a National Laboratory shall submit to the Secretary, with respect to each agreement entered into under this subsection—
"(A) a summary of information relating to the relevant National Laboratory activities.
"(B) the total estimated costs of the project;
"(C) estimated commencement and completion dates for all records of the National Laboratory;
"(D) other documentation determined to be appropriate by the Secretary.
"(5) CERTIFICATION.—The Secretary shall require the contractor of the affected Na-
tional Laboratory to certify that each activity carried out under a project for which an agreement is entered into under this sub-
section—
"(A) is not in direct competition with the private sector; and
"(B) does not present, or minimize, any apparent conflict of interest, and avoids or
neutralizes any actual conflict of interest, as a result of the agreement under this sub-
section.
"(6) EXTENSION.—The pilot program referred to in paragraph (1) shall be extended until
October 31, 2017.
"(7) REPORTS.—
"(A) OVERALL ASSESSMENT.—Not later than
60 days after the date described in paragraph (6), the Secretary, in coordination with di-
rectors of the National Laboratories, shall submit to the Committee on Science, Space, and Technology of the House of Representa-
tives and the Committee on Energy and Natural Resources of the Senate a report that—
"(i) identifies opportunities to improve the effectiveness of the pilot program;
"(ii) assesses the potential for program activities to interfere with the responsibilities of National Laboratories to the Depart-
ment; and
"(iii) provides a recommendation regarding the future of the pilot program.
"(B) IN GENERAL.—The Secretary, in co-
ordination with directors of the National Laboratories, shall submit to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate an annual report that accounts for all inci-
cences of, and provides a justification for, Federal assistance that has been received from a Federal contract or award to carry out agreements pursuant to this subsection.
"(g) INCLUSION OF TECHNOLOGY MATURATION IN AUTHORIZED TECHNOLOGY TRANSFER AC-
TIVITIES.—The Secretary shall permit the di-
rectors of the National Laboratories to use funds authorized to support technology transfer, following the standards practices of the Department, to carry out technology maturation activities to identify and im-
prove potential commercial application options for all relevant energy technologies arising from Na-
tional Laboratory activities.’’.
(c) DELEGATION OF AUTHORITY FOR TECH-
NOLOGY TRANSFER AGREEMENTS.
(1) AUTHORITY.—The Secretary of Energy shall delegate to directors of the National Laboratories signature authority for any technology transfer agreement in which the total cost of more than $500,000, including both National Laboratory contributions and the project recipient cost share contribution, falls within the scope of a strategic plan for the National Laboratory that has been approved by the Department.
(2) AGREEMENTS INCLUDED.—The agree-
ments to which this subsection applies in-
clude—
(A) Cooperative Research and Development Agreements; and
(B) non-Federal Work for Others Agreements.
(3) AVAILABILITY OF RECORDS.—
(A) Not later than 7 days after the date on which the director of a specific National Laboratory enters into an agreement under this subsection, such director shall transmit to the Secretary of Energy for monitoring and re-
view all records of the National Laboratory relating to the agreement.
(B) Not later than 30 days after the date on which the director of a specific National Laboratory enters into an agreement under this subsection, the Secretary may termi-
nate the agreement and the authority of any director of such National Laboratory to enter into agreements under this subsection if—
"(i) all records of the National Laboratory relating to the agreement have not been transmitted to the Secretary in accordance with subparagraph (A); or
"(ii) the Secretary determines that this agreement is inconsistent with the mission of
the Department.
"(4) LIMITATION.—This subsection does not apply to any agreement with a majority for-
eign-owned company.
(d) IN GENERAL.—This subsection shall apply only during the 4-year period begin-
ing on the date of enactment of this Act.
(e) ASSESSMENT.—Not later than the date
that is 180 days prior to the last day of the period described in subparagraph (A), the Secretary shall submit to the Committee on Science, Space, and Technology of the House of Representa-
tives and the Committee on Energy and Natural Resources of the Senate a report that—
"(1) identifies opportunities to improve the effectiveness of the pilot program;
"(ii) assesses the potential for program activities to interfere with the responsibilities of National Laboratories to the Depart-
ment; and
"(iii) provides a recommendation regarding the future of the pilot program.
an assessment of the effectiveness of the auth-
ity provided to the directors of the Na-
tional Laboratories under this subsection to
accelerate the development of new tech-
ologies, and an assessment of any incidences of potential misuse of this author-
ity in the opinion of the Secretary.

SEC. 644. FUNDING COMPETITIVENESS FOR IN-
stitutions of Higher Education and Other Nonprofit Institu-
tions.

Section 988(b) of the Energy Policy Act of 2005 (42 U.S.C. 16352(b)) is amended—
(1) in paragraph (1), by striking “Except as provided in paragraphs (2) and (3)” and in-
serting “Except as provided in paragraphs (2), (3), and (4)”;
and
(2) by adding at the end the following:

“(4) EXEMPTION FOR INSTITUTIONS OF HIGHER
EDUCATION AND OTHER NONPROFIT INSTITU-
tIONS.—
(A) IN GENERAL.—Paragraph (1) shall not apply to a research or development activity
performed by an institution of higher edu-
cation or nonprofit institution (as defined in
section 4 of the Stevenson-Wydler Tech-
3703)).

(B) TERMINATION DATE.—The exemption
under paragraph (A) shall apply during the
5-year period beginning on the date of
enactment of this paragraph.”.

SEC. 645. UNDER SECRETARY FOR SCIENCE AND
ENERGY.

(a) In General.—Section 2002(b) of the De-
partment of Energy Organization Act (42 U.S.C. 7132(b)) is amended—
(1) by striking “Under Secretary for
Science” each place it appears and inserting “Under Secretary for Science and Energy”;
and
(2) in paragraph (4)—
(A) in subparagraph (F), by striking “and” at
the end;
(B) in subparagraph (G), by striking the pe-
diod at the end and inserting a semicolon; and
(C) by inserting after subparagraph (G) the
following:

“(H) establish appropriate linkages be-
tween offices under the jurisdiction of the
Under Secretary; and

“(I) perform such functions and duties as
the Secretary shall prescribe, consistent with
this section.”;

(b) CONFORMING AMENDMENTS.—
(1) Section 5307(a)(1) of title 5, United States
Code, is amended by adding at the end the
following:

“Chapter 53—Civil Service Pay and
Leave: Rates, Compensation, and Benefit
Payments

Sec. 5307. Pay rates.

(a) Pay rates.

(1) Pay rates for grades and other
positions. For the purposes of this title, the
basic pay of any employee shall be determined by the Under Secretary at rates not in excess of the Executive Schedule (EX-
II) without regard to the civil service laws; and

(2) pay any employee appointed under this
section payments in addition to basic pay,
except that the total amount of additional payment for an employee under this
subsection for any 12-month period shall not
exceed the least of the following amounts:

(A) $25,000.

(B) The amount equal to 25 percent of the
annual rate of basic pay of that employee.

(C) The amount of the limitation that is
applicable for a calendar year under section
5507(a)(1) of title 5, United States Code.

(b) TERM.—
(1) IN GENERAL.—The term of any employee
appointed under this section shall not exceed
3 years.

(2) TERMINATION.—The Under Secretary
shall have the authority to terminate any employee appointed under this section at
any time based on performance or changing
project or research needs of the Department.

The Acting CHAIR. Pursuant to House
Resolution 271, the gentlewoman from Texas (Ms. EDDIE BERNICE JOHN-
son) and a Member opposed each will
control 10 minutes.

The Chair recognizes the gentle-
woman from Texas.

Ms. EDDIE BERNICE JOHNSON of
Texas, Mr. Chairman, I yield myself
such time as I may consume.

Mr. Chairman, so much of today’s de-
bate has been about how harmful the
underlying legislation is for our Nation and
how it violates every one of the
principles of the original COMPETES
bill. I am now pleased to be offering a
positive alternative. The essence of my
substitute bill cosponsored by every
Democratic member of the committee
in addition to the minority leader, Mr. HOYER.

I spoke earlier about the history of the
COMPETES bill and the principles
it has embodied since the Rising Above
the Gathering Storm report set us on
this path 10 years ago. The substitute
amendment, which we introduced as
H.R. 1898, stays true to one of these
principles.

It sets targets that provide for steady
and sustained real growth in funding for
our research and development agen-
cies. It makes a strong statement that the
U.S. Congress sees funding for re-
search as a top national priority. It
does not include false and detrimental
choices and tradeoffs among different
fields of science and engineering. It en-
sures that scientific experts, not politi-
cians, continue to set priorities for
funding within and among different
fields of basic research and for in-
dividual grants.

The principles embodied in my sub-
stitute amendment continue a pact
that the Federal Government made
with our Nation’s research uni-
versities following our victory in World
War II and the onset of the space race
that led us to the creation of NSF and
NASA.

This pact is what has made NSF, the
National Institute of Standards and
Technology, or NIST, and the Depart-
ment of Energy among the world’s
greatest and most admired research
agencies.

Specifically, my amendment fully
funds these agencies at the fiscal year
2016 request level and continues to pro-
vide 5 percent annual increases for 5
years. This modest investment is al-
ready a compromise, given the im-
mense economic return on our basic re-
search investments. The original Ris-
ing Above the Gathering Storm report
called for even greater increases.

My amendment also reauthorizes and
fully funds ARPA-E, which was created in
the 2007 COMPETES Act and has ex-
ceeded every expectation for creating
innovative new energy technologies
and spurring private sector follow-on
investment.

In addition, my amendment author-
izes and funds important innovation
programs at the Department of Com-
merce, including an innovation voucher
program that will help small-
and medium-sized manufacturers
across the country grow their busi-
nesses and create new jobs.

My amendment fully funds the stand-
ards work of NIST, in addition to their
work to help accelerate growth in U.S.
advanced manufacturing. We need to
bring those manufacturing jobs back
home, and we need to Make It In Amer-
ica. NIST is an essential partner in this
effort.

Finally, my amendment takes seri-
ously the issue of STEM education, in-
cluding broadening participation in
STEM. Our STEM language is not just
senses of Congress about how import-
ant STEM is and other filler provi-
sions.

Our language directs real important
policy changes to help ensure that all
U.S. students and researchers have the
opportunity to fully develop their tal-
ents in STEM and pursue successful
STEM careers.

We are facing a demographic impera-
tive. If we do not find a way to turn
around the underrepresentation of
women and minorities in STEM fields,
our Nation will fall well short of the
skilled workforce our industries de-
mand. Our substitute puts our money
before where our mouth is when it
comes to STEM and corrects a glaring
deficit in the underlying legislation.

I am proud of my work that I have
done on this committee for many years
and of the contributions that many of
my colleagues made to this substitute
amendment. It truly is a COMPETES
Reauthorization Act in every way.

I urge my colleagues on both sides of
the aisle to carefully consider the fork
in the road before us. If you really
want to do right by this great Nation
and by our children and our grand-
children, you will vote for the sub-
stitute amendment and replace the un-
derlying legislation with a positive
path forward.

This amendment will open the doors
for innovation and education for our
Nation’s future. It will not be trade, as
many have said, that will cause us to
lose these jobs; it will be our compa-
nies searching around the world look-
ing for talent and innovation.

Look out for America’s future. Vote
for this amendment.

Mr. SMITH of Texas. Mr. Chairman, I
claim the time in opposition to the
amendment.
The Acting CHAIR. The gentleman is recognized for 10 minutes.

Mr. SMITH of Texas. Mr. Chairman, I oppose the gentlewoman’s amendment.

As I mentioned in my opening remarks, I support a responsible and sustainable path forward for U.S. science, research, and development. We must prioritize the areas of basic research to ensure future U.S. economic competitiveness and spur private sector innovation.

This amendment ignores the caps set by the Budget Control Act, which the ranking member herself supported, and ignores the tough choices that must be made to protect the American taxpayer and future generations from more debt. It is irresponsible not to adhere to the Budget Control Act, which was signed into law by President Obama.

The Budget Control Act was a bipartisan agreement that 95 Democrats voted for, including the ranking member. Now, she wants to ignore that particularly many Members would like to see the Budget Control Act replaced, it is the law of the land, and we should abide by it.

Of course, it is easy just to propose more spending, knowing it will sound good in the short run. It is irresponsible and against the law. In fiscal year 2016 alone, this amendment would increase spending by $600 million over the current level and the underlying bill. The amendment increases spending on later-stage research and technology, best done by the private sector.

Since last Congress, we have worked hard to reach an agreement with the minority on numerous policy issues, and we have accepted many of their provisions and ideas to make this bill stronger.

For example, we strengthened STEM provisions related to a new advisory panel and coordinating office. We also included language in support of NIST that recognized the increase floor on a bipartisan vote last year.

Also, in title III of the bill are three pieces of bipartisan legislation that passed the Science Committee by voice vote in March. Two of those three pieces of legislation were sponsored by Democrats.

I urge my colleagues to support a balanced approach of fiscal responsibility and targeted investments in priority science and basic research and vote for the Democratic substitute. The Democratic substitute ignores the Budget Control Act and does not advance good science in America.

I reserve the balance of my time.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois (Mr. LIPINSKI).

Mr. LIPINSKI. Mr. Chairman, I thank Ms. JOHNSON for yielding.

Mr. Chairman, in 2007, I served on the conference committee that worked out the House-Senate compromise on the original COMPETES bill. In 2010, I wrote the reauthorization. These are two of my proudest moments in Congress because those were bipartisan bills that set us on a path to continue leading the world in scientific research and innovation for the next generation.

Sadly, in recent years, we have let that progress stall. Make no mistake, other nations are continuing to invest and are continuing to innovate. If we don’t come together to send a strong message and provide strong support for scientific research, America will no longer be able to compete.

The COMPETES bill is an investment bill. I understand the threat of our enormous Federal debt; but, without the types of investments that are made in the COMPETES bill, we will not promote the economic growth that we need to end our deficits and pay down our debt.

Ranking Member JOHNSON’s alternative makes those investments. Unluckily, ranking MEMBER CHAIRMAN’s bill does not make drastic cuts to Advanced Research Projects Agency-Energy, which promotes and funds research and development of advanced energy technologies. It does not make drastic cuts to the Office of Energy Efficiency and Renewable Energy that invests in high-risk, high-value research and development in the fields of energy efficiency and renewable energy technologies. It doesn’t cut the geosciences or make a more than 50 percent cut to research in the social, behavioral, and economic sciences.

Some might think that last one is warranted; but, in the Science Committee, we are constantly hearing from witnesses about how social science is vital to the work going on in other fields. Members of Congress have frequently relied on spectrum auctions, developed by NSF social science research, to raise billions of dollars.

Social science is perhaps the most critical component to preventing cyber crimes. Considering that the majority of all cyber breaches occur because of social factors, like using easy-to-guess passwords or clicking on a link in a phishing scam, we should want to increase funding in these areas.

Mr. Chairman, Ms. JOHNSON’s amendment provides robust support in all of these areas. I agree that the chairman’s bill has gotten better and things have been added to the bill which have made it a better bill, but still, I think there is no question that Ms. JOHNSON’s substitute is a much better bill for prioritizing science and basic research and technology and targeted investments in priority scientific fields: energy efficiency and renewable energy technologies. It does not make drastic cuts to the Office of Energy Efficiency and Renewable Energy that invests in high-risk, high-value research and development in the fields of energy efficiency and renewable energy technologies. It doesn’t cut the geosciences or make a more than 50 percent cut to research in the social, behavioral, and economic sciences.

Some of this funding has been used, by setting authorization levels according to directorate, this bill would limit the flexibility NSF needs to set strategic priorities and adapt and capitalize on unanticipated discoveries.

I share the concerns of many experts that the underlying bill would reduce authorized funding levels for specific directorates: the Directorate for Social, Behavioral, and Economic Sciences and the Directorate for Geosciences.

Some of this funding has been used, for example, for Oregon State University to conduct research on ocean acidification. It has also been used critically to support the work in Oregon to develop our understanding of the risks posed by a Cascadia subduction zone earthquake. Other examples are around the country.

In summary, the underlying bill diminishes the ability of the National Science Foundation to make strategic science-based decisions.
I urge my colleagues to join me in supporting the substitute amendment. Mr. SMITH of Texas, Mr. Chairman, we are prepared to close, so I reserve the balance of my time.

Ms. EDDIE BERNICE JOHNSON of Texas, Mr. Chairman, I simply will close by saying, as we have been on this floor, we continue to get emails and letters from universities and scientists around this Nation. I am not presenting this substitute to be perfect; I am presenting this substitute to us to take the professional level that the research brought us when we first had America COMPETES. It is not a picking and choosing; it is a professional approach to funding scientific projects.

If we mean to look out for the future of the Nation, as we say we are, this is the legislation that will do it.

I urge everyone to support it, and I yield back the balance of my time.

Mr. SMITH of Texas, Mr. Chairman, the gentleman’s amendment ignores the law of the land. She and more than 90 other Democrats supported the Budget Control Act, which was signed into law by the President. This amendment ignores those budget caps.

I support a responsible and sustainable path forward for U.S. science, research, and development; but it is neither responsible, nor sustainable, to spend more and more taxpayer dollars and increase the debt that future generations and the working Chair announced that the noes appeared to have it.

Ms. EDDIE BERNICE JOHNSON of Texas, Mr. Chairman, I request a recording vote.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chairman, I simply will close by saying, as we have been on this floor, we continue to get emails and letters from universities and scientists around this Nation. I am not presenting this substitute to be perfect; I am presenting this substitute to us to take the professional level that the research brought us when we first had America COMPETES. It is not a picking and choosing; it is a professional approach to funding scientific projects.

If we mean to look out for the future of the Nation, as we say we are, this is the legislation that will do it.

I urge everyone to support it, and I yield back the balance of my time.

Mr. SMITH of Texas, Mr. Chairman, the gentlewoman from Texas (Ms. EDDIE BER-

CONGRESSIONAL RECORD — HOUSE

May 20, 2015

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT NO. 12 OFFERED BY MS. EDDIE BERNICE JOHNSON OF TEXAS

The Acting CHAIR. The unfinished business is the demand for a recorded vote on the amendment printed in part A of House Report 114–120 offered by the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.
SO the amendment was rejected.

The result of the vote was announced as above recorded.

Stated for:
Mr. SHERMAN. Mr. Chair, on rollcall No. 257, had I been present, I would have voted ‘yes’.

The Acting CHAIR. The question is on the amendment in the nature of a substitute, as amended.

The amendment was agreed to.

The Acting CHAIR. Under the rule, the question is on the engrossment and the Speaker pro tempore (Mr. FLEISCHMANN) having assumed the chair, Mr. Poe of Texas, Acting Chair of the Committee of the Whole House on the state of the Union, reported that that Committee, having had under consideration the bill (H.R. 1806) to provide for technological innovation through the prioritization of Federal investment in basic research, fundamental scientific discovery, and development to improve the competitiveness of the United States and for other purposes, and, pursuant to House Resolution 271, he reported the bill back to the House with an amendment adopted in the Committee of the Whole.

The SPEAKER pro tempore. Pursuant to the rule, the question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the yeas had three-fifths of the members present, and thereupon the bill (H.R. 1806) passed the House of Representatives.

So the amendment was rejected.
MOMENT OF SILENCE IN HONOR OF THE MARINES WHO LOST THEIR LIVES ON MAY 12, 2015, IN NEPAL

(Mr. MICA asked and was given permission to address the House for 1 minute.)

Mr. MICA. Mr. Speaker, I rise today to pay tribute to six United States Marines who lost their lives on May 12, 2015. They died not in combat but in a mission of mercy, aiding the people of Nepal, who, as we have read, have been devastated by a horrific and deadly earthquake.

I would like to at this time yield to their Members of Congress to recognize each of the Marines who sacrificed their lives.

First, I yield to the gentleman from Kansas (Mr. POMPEO).

Mr. POMPEO. Captain Christopher Lee Norgren, Wichita, Kansas, Kansas’ Fourth Congressional District.

Mr. MICA. Mr. Speaker, I will now read the name of the brave Marine from my district:

Sergeant Ward Mark Johnson IV, Alhambra, California, California’s 42nd Congressional District.

Mr. MICA. I yield to the gentleman from Illinois (Mr. FOSTER).

Mr. FOSTER. Corporal Sara Abigail Medina, Aurora, Illinois, Illinois’ 11th Congressional District.

Mr. MICA. I yield to the gentleman from Arizona (Mr. FRANKS).

Mr. FRANKS. Marines of Arizona. Lance Corporal Andrew Hug, Phoenix, Arizona, Arizona’s Eighth Congressional District.

Mr. MICA. Mr. Speaker, I will now read the name of the brave Marine from my district:

Sergeant Mark Johnson IV, Alhambra, California, California’s 42nd Congressional District.

Mr. MICA. I yield to the gentleman from Illinois (Mr. FOSTER).

Mr. FOSTER. Corporal Sara Abigail Medina, Aurora, Illinois, Illinois’ 11th Congressional District.

Mr. MICA. I yield to the gentleman from Arizona (Mr. FRANKS).

Mr. FRANKS. Marines of Arizona. Lance Corporal Andrew Hug, Phoenix, Arizona, Arizona’s Eighth Congressional District.

Mr. MICA. Mr. Speaker, I will now read the name of the brave Marine from my district:

Sergeant Mark Johnson IV, Alhambra, California, California’s 42nd Congressional District.
CONGRESSIONAL RECORD — HOUSE

PROVIDING FOR CONSIDERATION OF H.R. 1335, STRENGTHENING FISHING COMMUNITIES AND INCREASING FLEXIBILITY IN FISHERIES MANAGEMENT ACT

Mr. BYRNE. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 274 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That at any time after adoption of this resolution the Speaker may, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House on the state of the Union for consideration of the bill (H.R. 1335) to amend the Magnuson-Stevens Fishery Conservation and Management Act to provide flexibility for fishery managers and stability for fisheries, and for other purposes. The first reading of the bill shall be dispensed with. All points of order against consideration of the bill are waived. General debate shall be confined to the bill and shall not exceed one hour equally divided and controlled by the chair and ranking minority member of the Committee on Natural Resources. After general debate the bill shall be considered as ordered to be reported with an amendment. All points of order against consideration of the bill are waived. General debate shall be confined to the bill and shall not exceed one hour equally divided and controlled by the chair and ranking minority member of the Committee on Natural Resources. After general debate the bill shall be considered as ordered to be reported with an amendment.
amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute made in order as original text. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore (Mr. Young of Iowa). The gentleman from Alabama (Mr. Polis), pending my yield myself such time as I may consume to the gentleman from Colorado (Mr. Polis), pending my objection to the request of the gentleman from Alabama?

There was no objection.

Mr. BYRNE. Mr. Speaker, H. Res. 274 provides a structured rule for consideration of amendments, strengthening Fishing Communities and Increasing Flexibility in Fisheries Management Act. The rule makes in order eight amendments, five of which are from Democratic sponsors. One of the amendments is a Democrat substitute, which will be debated for twice as long as the other amendments.

As someone who has lived his whole life on the Gulf Coast, I can tell you just how important this bill is. For many people who live on our Nation's coast, this bill is about a way of life.

This bill is for our Nation's commercial fishermen, who depend on a reliable fishing stock in order to make a living. This bill is also for our Nation's charter fleets, which are an important source of tourism. That means jobs, Mr. Speaker, and all too often people in this town and government scientists seem not to care about that.

Just as importantly, this bill is for our recreational fishermen and everyday anglers who just enjoy spending time on the waters. For my family, this is a lifelong tradition. I remember fishing with my dad on the Gulf of Mexico. I treasured opportunities to fish with my four children, and as a new grandfather, I look forward to fishing with my grandson.

This is a good bill, and as a former member of the committee of jurisdiction, the Natural Resources Committee, I can tell you that a great amount of time and effort have gone into this bill. This process started over 2 years ago, and there was a lot of work to bring our parties together to get a bill that everyone can agree on.

Unfortunately, as happens far too often in Washington, my colleagues on the other side of the aisle have decided to make this into a partisan fight. President Obama has said he will veto this bill. All this despite real efforts to work together, across the aisle, to get a bill that works for everyone.

Now I want to briefly talk about the idea of science that the President and my colleagues on the other side claim the bill undermines. Those who fish here in D.C., whether for science is just political ideology dressed up with some technical language with no real basis in observable data.

I don't know if the gentleman from Colorado (Mr. Polis) realized that his bill undermines the Strengthening Fishing Communities and Increasing Flexibility in Fisheries Management Act. It then went on to succeed in preventing overfishing by U.S. fishermen.
by a number of mechanisms in the bill that we will talk about in a moment.

The other way in which Magnuson-Stevens has been a huge success is that it has always been bipartisan. Both the original act and the subsequent reauthorizations of Magnuson-Stevens have always been essentially bipartisan. And unfortunately, Mr. Speaker, we are departing from that positive history with the bill we have before us today, and we need to get it back on track.

The keys to Magnuson-Stevens' success have included strict rules on rebuilding of fishery stocks and also very strict fishery-specific quotas, so that we can make sure that we prevent overfishing and ensure a sustainable fishery population. This is not so that we stop fishing, quite the contrary. The purpose of these mechanisms is so that we can continue to fish for future generations by maintaining sustainable populations.

Absent these mechanisms, these very successful provisions in Magnuson-Stevens' history teaches us what would happen. We have a history that is played out over and over again in this country and, frankly, around the world—that, without strict protections for sustainable fish populations, we will overfish them, we will deplete them.

It puts us on a path where the tragedy of the commons plays out over and over again, and the end result of that is fisheries closures. We are not helping the folks who want to fish. When we don't manage these populations, we are actually hurting them in the long run.

Now, Democrats have put forward a substitute amendment that is much closer to a clean reauthorization of Magnuson-Stevens. We think that is really the conversation we need to be having. What kind of clean reauthorization can we achieve? And are there consensus areas where we can actually improve Magnuson-Stevens?

The gentleman from Alabama might be surprised to find that Democrats strongly agreeing with him, that we could benefit from additional science, better science. There may be better data available on the red snapper in the Gulf. We are also working with Republicans to try to get that science and make it available to the decision-makers who set those rules for that fishery.

There is also more than meets the eye, even for that red snapper fishery because, while you are talking about a small number of days for recreational fishermen in Federal waters, you have got a much greater number of days in State waters.

You also can fish for red snapper and any other species just about any day you want. When you are in Federal waters, you can only keep them during those same 5 days, same number of days. Then it is because approximately half the fish caught are reserved for commercial fishermen who have made their case to the regional council that it is only fair that about half the fish ought to be available to them and about half the fish are allocated to recreational fishermen.

In those small number of days, believe it or not, recreational folks catch almost the same amount of fish that the commercial fishermen catch during a much greater number of days. There is always a little more than meets the eye. You hear sensational statistics people say there very small number of days available. There is, frankly, much more to the story.

Where do we agree is, if we can get better data, better science, better monitoring, all of this should be subject to discussion and revision in the councils. That is the flexibility of the Magnuson-Stevens Act, and that ought to be something that we can work on here together.

Unfortunately, though, Mr. Speaker, we have a Republican bill that is talking away some of the key provisions of the act that have actually been the very source of its great success over the years, so that heads in a wrong direction.

Then, unfortunately, we have the obligatory runs at NEPA and various environmental laws, including the Antiquities Act. This is no place to be carrying out that endless assault on America's environment.

Let's get back to that point of consensus, sustainable management of our fisheries. If we can do that, I think we have something we can work on together in this House.

Mr. BYRNE. Mr. Speaker, I yield myself such time as I may consume.

I appreciate the gentleman's comments. It is very important that we try to find ways to try to work together when the form of this bill that we worked on in the committee last year, which is almost identical to the one that we adopted this year, was before the Natural Resources Committee.

In Mr. DeFazio's opening statement, he said:

'Thank you, Chairman, and I appreciate the changes that were negotiated on a number of provisions in the bill.

Then he said:

'This has been traditionally a very bipartisan exercise, and this is, in good part, bipartisan.

Mr. PALLONE, same time, his opening statement in the committee last year on a virtually identical bill was:

'I do want to say that I do appreciate the fact that you reach out to us on the Democratic side of the aisle; and many of the provisions, as you mentioned, that are in the bill did come from input from the Democratic side.'

The gentleman referenced the substitute:

The substitute has been made in order and has given more time than anything else for us to debate.

We have really leaned back over backwards, particularly when you consider that the majority of amendments that we have made in order in this rule are amendments offered by the Democrats.

Now, I appreciate that the gentleman has a substitute—and we are going to give him an opportunity to talk about it—but if you look at his substitute, we might as well call his substitute 'The Environmental Litigation and Fisheries Disaster Creation Act of 2015' because that is what it is going to do.

This amendment would allow the Secretary of Commerce to accept outside funds from NGOs to support cooperative research projects. This gives the litigation community of the world an avenue to influence NOAA decision making.

This amendment requires the Secretary of Commerce to ignore current procedures and forces the Secretary to retroactively declare a fishery disaster in California from a January 2004 emergency proclamation on California drought.

Mr. HUFFMAN's amendment seems to single out and blame the Central Valley Project for a fishery disaster. As we all know, there are many factors for fish declines, mainly including ocean conditions.

This amendment seeks to blame farmers for a fishery disaster. Above all, this amendment erases the flexibilities, transparency, and science improvements made in the underlying bill, but we give him the opportunity to make his case before this House to show our willingness to work with them.

I was greatly surprised when I read the Statement of Administration Policy that we received from the administration when we were marking this bill up in Rules Committee yesterday, and I was most surprised at what they had to say about the snapper language. Now, that language came from me. I asked the committee to put it in the bill, and I am greatly appreciative of the fact that they did.

Remember what I said about what the science has done to our fishery in the Gulf of Mexico. Here is what the administration says:

H.R. 1335 would also severely undermine the authority of the Gulf of Mexico Regional Fishery Management Council by extending State jurisdiction over the recreational red snapper fishery to 9 miles in the Gulf of Mexico. We intend to give the States more authority by going out.

Now, yes, that would give us some flexibility for the fishing out there, but a lot of the reefs that these red snappers grow on are further out than 9 miles, so it doesn't solve the whole problem.

The administration goes on to say:

'This proposed extension of jurisdiction would create an untenable situation where recreational and commercial fishermen fishing side by side would be subject to different regulatory regimes.

How do they know in advance what the States are going to do? Why do they presume that that is going to be the case? They do so because they have such an aversion to the States having any control, any input, in the way that this fishery is governed.
They go on to say:

Absent an agreement among the States as to how to allocate recreationally caught red snapper, the bill would encourage interstate conflict and jeopardize the sustainability of this globally important fishery.

No one has a greater stake in making sure we keep this fish stock healthy than those of us that live on the Gulf Coast do. Whether we are in commercial fishing, whether we are in charter boat fishing, whether we are in recreational fishing, if we overfish this stock, it is gone; I won’t get to fish it with my grandson.

Future commercial fishermen won’t get to make money off of this and provide jobs. Charter boat people won’t be able to come down to the beach and enjoy themselves. No one wants that to happen.

The administration presumes that we are going to be so self-defeating that we would allow that to happen. I am greatly disappointed that, after all the work we did to solve this problem that was created by the government scientists, that still the administration is attacking us, still they are trying to keep us from solving this problem.

I appreciate what the gentleman had to say. I think we should try to work together on every bill we try to pass in this House; but, at some point, we have got to stand up for people who fish in this country. We have a right to fish in the waters of the United States, and the way Congress wrote the Magnuson-Stevens Act, which both my time.

They belong to the government scientists; they belong to the people of America.

Mr. Speaker, I reserve the balance of my time.

Mr. POLIS. Mr. Speaker, I yield myself such time as I may consume.

Here we are debating the gutting of the Magnuson-Stevens Act, which both sides agree has successfully helped restore some of our counts of wild stock, including snapper. It hardly seems the time to continue course without any scientific evidence that, somehow, we will get to a different place than we were when Congress wrote the Magnuson-Stevens Act to address the very issue, which it seems to be successfully addressing.

The gentleman from Alabama mentioned some remarks from Mr. DeFazio. I wanted to be clear that then-Ranking Member DeFazio opposed a similar bill, this similar bill, in the last Congress. He is not happy with the result last Congress. I am not sure of the context of the remarks he made, but he stood here on the floor urging his colleagues to oppose the bill. He opposed it as well in committee.

He was not happy with the result last time; he is not happy with the result this time, nor is our new ranking member of either the subcommittee or the committee. I should add it passed out of committee without a single Democratic vote. To be clear, there was not a bipartisan effort in committee to talk about the best policy with regard to fisheries.

Now, before I jump into the debate about fish populations and fisheries in our oceans—something I have to admit, as representing the landlocked State of Colorado, I had to take a crash course on in the last few days—I want to talk about some of the events from the last week that I think should merit congressional action.

One item that happened in the last week is a 16-year-old student from the Atlanta Public School system in Georgia was attacked in his courtyard just because he was gay. A crowd surrounded to watch as 15 people beat this young person into pulp while yelling derogatory slurs at him.

Again, we could be addressing that through passing the Student Non-Discrimination Act or the antibullying act from Representative SANCHEZ, but instead, we are talking about gutting Magnuson-Stevens protections of our fisheries.

Also this week, a south Texas family detention facility, similar to facilities in other parts of the country for immigrants who are caught in the wrong place at the wrong time, testimony came out that women and children were severely punished, abused, and neglected. We could be pursuing detention reform or immigration reform; but, again, we are not.

This last week, Los Angeles raised its minimum wage to $15 an hour. Now, in LA, that puts families closer to a living wage, but the bad news is this Congress refuses to take up any minimum wage. Whether it is a $12 proposal, which Democrats put forward, whether it is a $10.10 proposal, whether it is even a $9 proposal, this Congress has not, instead of bringing forward a bill to increase the minimum wage—by the way, when somebody works full time at minimum wage, they earn about $14,500 a year. I don’t know what we are saying to people where you work full time and we are forcing you to rely on government programs to subsist.

The Republican Party—people on public housing, on food stamps, on welfare, rather than helping them support their own way and regaining their dignity in the process, which is what raising the minimum wage would do; but, no, we are not talking about that here today. We are talking about gutting the Magnuson-Stevens Act.

21,000 gallons of oil spilled in the Pacific Ocean off the coast of Santa Barbara County—that is probably not good for the fish. For years following the eruption of an 11-mile long underground pipeline; but, instead of talking about a renewable energy future, instead of talking about ending our reliance on fossil fuels or a national renewable energy portfolio standard, we are talking about gutting our fisheries protection and gutting the Magnuson-Stevens Act.

Tragically, we had funerals for eight people who were killed in the derailment of the Amtrak train in Pennsylvania—some of those deaths caused by a lack of silence earlier on that, but rather than discussing measures that can prevent future derailment accidents—and I understand there is some technology that, when implemented, could have helped avoid this kind of accident—here we are again, discussing gutting the Magnuson-Stevens Act that has successfully protected our wild fisheries.

Gray while in police custody; but, instead of addressing nonlethal use of force or video cameras on police officers, we are discussing gutting the Magnuson-Stevens Act.

We all know that the Federal highway authorization is running up against the May 31 deadline. The body of this Congress chose to renew it for 60 days and just created another crisis in another 59 days; yet we are not discussing what a deal would look like, a bipartisan deal, nor reauthorization of the Federal highway trust fund.

Mr. Speaker, I reserve the balance of my time.

Mr. CZARNAKOWSKI. Mr. Speaker, while I yield myself such time as I may consume.

I am most thankful to the gentleman from Illinois for his remarks, because he is not happy with the result last Congress. I am not sure of the context of the remarks he made, but he text of the remarks he made, but he

This week, Los Angeles raised its minimum wage to $15 an hour. Now, in LA, that puts families closer to a living wage, but the bad news is this Congress refuses to take up any minimum wage. Whether it is a $12 proposal, which Democrats put forward, whether it is a $10.10 proposal, whether it is even a $9 proposal, this Congress has not, instead of bringing forward a bill to increase the minimum wage—by the way, when somebody works full time at minimum wage, they earn about $14,500 a year. I don’t know what we are saying to people where you work full time and we are forcing you to rely on government programs to subsist.

The Republican Party—people on public housing, on food stamps, on welfare, rather than helping them support their own way and regaining their dignity in the process, which is what raising the minimum wage would do; but, no, we are not talking about that here today. We are talking about gutting the Magnuson-Stevens Act.

21,000 gallons of oil spilled in the Pacific Ocean off the coast of Santa Barbara County—that is probably not good for the fish. For years following the eruption of an 11-mile long underground pipeline; but, instead of talking about a renewable energy future, instead of talking about ending our reliance on fossil fuels or a national renewable energy portfolio standard, we are talking about gutting our fisheries protection and gutting the Magnuson-Stevens Act.

Tragically, we had funerals for eight people who were killed in the derailment of the Amtrak train in Pennsylvania—some of those deaths caused by a lack of silence earlier on that, but rather than discussing measures that can prevent future derailment accidents—and I understand there is some technology that, when implemented, could have helped avoid this kind of accident—here we are again, discussing gutting the Magnuson-Stevens Act that has successfully protected our wild fisheries.

Gray while in police custody; but, instead of addressing nonlethal use of force or video cameras on police officers, we are discussing gutting the Magnuson-Stevens Act.

We all know that the Federal highway authorization is running up against the May 31 deadline. The body of this Congress chose to renew it for 60 days and just created another crisis in another 59 days; yet we are not discussing what a deal would look like, a bipartisan deal, nor reauthorization of the Federal highway trust fund.

One hundred eighty Democrats signed a discharge petition for a bill that seeks to renew the charter of the Export-Import Bank, a critical driver for job creation and American competitiveness, fully permissible under WTO rules, under proposed trade agreement rules. Other countries have these kinds of banks, and to unilaterally disarm would cost American jobs. But instead of talking about how Congress gets out of this political box on the Export-Import Bank, we are discussing gutting the Magnuson-Stevens fisheries protection legislation.

This Congress could do a better with regard to dealing with issues that I hear about from my constituents every day, day in and day out, whether that is fixing our broken immigration system, whether it is protecting our country from terrorism, whether it is preventing future Amtrak derailments. Those are the kinds of topics that, I think, the American people want to see us discussing here today rather than gutting an important piece of legislation which many charter fishermen, recreational fishermen, commercial fishermen applaud in having successfully sustained their livelihoods or their passions for the last generation.

Let’s talk about fish.

Mr. Speaker, I reserve the balance of my time.

Mr. CZARNAKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

I am most thankful to the gentleman from Illinois for his remarks, because he is not happy with the result last Congress. I am not sure of the context of the remarks he made, but he...
It would set an alarming precedent for the circumvention of our bedrock environmental laws by allowing fishery management councils to supersede NEPA, the National Environmental Policy Act; the Endangered Species Act; the Antiquities Act; and the National Marine Sanctuaries Act.

The Fishery Conservation and Management Act was introduced in 1976 to stop unregulated fishing that had demonstrably led to the depletion across a number of wild fisheries. In both 1996 and 2007, mention was made of laws that have been signed—bipartisan bills again. This bill passed committee without a single Democratic vote. Each time, through a comprehensive drafting process, good ideas from both sides of the aisle were put to paper.

Ironically, the one thing that, I think, the gentleman from Alabama and I can agree on is that the 2007 authorization has been successful. We have shown the increased health of our wild fisheries and the solutions that are bipartisan. Do we want to reverse course and jeopardize that, or do we want to move forward with scientific-backed evidence?

Unfortunately, the Republicans are trying to make sweeping changes to gut the Magnuson-Stevens Fishery Conservation and Management Act. This iteration of the bill was drafted with almost no Democratic input, and it passed out of committee without a single Democratic vote.

Look, if we want to go through this kind of exercise with a bill that the President has said he would veto—a bill that breaks with the proud bipartisan tradition of fisheries protection—why aren't we spending time on some of the issues I mentioned earlier, like immigration reform, like protecting LGBT students from discrimination, like socioeconomic disparities in our country, how we can deal with mental health among returning veterans who fought over the risk of terrorism here at home? Let's do that.

If we are going to talk fish, Mr. Speaker, let's at least bring up a bill that has been drafted by all stakeholders. Let's at least bring up a bill that ensures that the fishing community will have an industry in 10 years, in 20 years, in 50 years—a bill that protects the interests of our recreational fishermen and that preserves the health of our oceans for the enjoyment of all Americans and for the health of our planet now and into the future.

I reserve the balance of my time.

Mr. BYRNE. Mr. Speaker, I yield myself the balance of my time.

I invite the gentleman from Alabama to come to Colorado to fish our wonderful mountain trout, which we have in our streams and rivers. Obviously, he is no stranger to a different kind of fisheries management policy where, of course, our economy in Colorado relies on fishing and sportsmen as well, and I certainly understand that driver of jobs locally.

I think the disconnect here is that the gentleman talks about what the 2007 Magnuson-Stevens bill has accomplished in that it has reduced the number of days that people can fish. That was the action that was taken. The effect of that is that the wild stocks are up, so there are more snapper. I think both sides agree on that. I believe there is a direct causal link to the fact that there are more snapper because there have been fewer that have been taken out of the water. If we manage our fisheries for the short term, if we throw caution to the wind, people might have a good season or two, but it simply won't be there either for the future generation of recreationalists or for the kids who want to take their children fishing. Today, we have one rule covering one bill; yet the gentleman just spent the majority of his time discussing issues not covered in the rule before us.

Let me tell you that the people in my area who are having to walk the boat people have lost their boats. Dads who want to take their children fishing can't take their children fishing. It is destroying a way of life for people. I am not saying those other issues aren't important, that they are not serious, but they are not covered by this rule, and they are not in this bill. We need to debate that.

The gentleman said something about the 2007 act, that it was successful. Let me tell you what it has been successful in doing. We did, together, reduce the red snapper season to 10 days. That is what it has been successful in doing. It has been successful in almost decimating our charter boat fleets and in putting a lot of people out of work. I wonder if it was the other side about needing to put people to work. The people on these charter boats work. They lost their jobs because of this. It was successful all right. It was successful in destroying something that worked for people for generations. I have great respect for my fellow colleague from Colorado who is on the Rules Committee. I know he doesn't get to fish much in the Gulf of Mexico, but I extend an invitation to him. I will take him out there and let him catch some red snapper. I believe, Mr. Speaker, once he does that, he will be as enthusiastic for this bill as I am. I reserve the balance of my time.

Mr. POLIS. Mr. Speaker, I yield the balance of my time.

I think the disconnect here is that the gentleman talks about what the 2007 Magnuson-Stevens bill has accomplished in that it has reduced the number of days that people can fish. That was the action that was taken. The effect of that is that the wild stocks are up, so there are more snapper. I think both sides agree on that. I believe there is a direct causal link to the fact that there are more snapper because there have been fewer that have been taken out of the water. If we manage our fisheries for the short term, if we throw caution to the wind, people might have a good season or two, but it simply won't be there either for the future generation of recreationalists or for the kids who want to take their children fishing.

Now, this bill is about fish. If this rule allowed for the discussion of some of the other bills I mentioned, I could support it. If this bill allowed a debate on immigration, either to our Democratic proposal of a $12 an hour minimum wage or to whatever number the gentleman from Alabama would like—if he would like to propose $9 an hour, $8.50—I would be willing to support this rule, or if it even allowed 2 minutes of debate for raising the minimum wage.

Mr. Speaker, I would support this bill if it allowed for us to consider our bipartisan immigration reform measure. If we allowed that debate under this bill, I would do the same. I would support this rule if it allowed debate about the Student Nondiscrimination Act to make sure that LGBT students don't face bullying in our schools and so that it is a safe learning environment for all students. I would support this bill if it addressed what we have learned from the Amtrak derailment and prevented future derailments and saved lives.

None of those items, along with countless others, are included under this rule. In fact, many amendments under this rule, as well as the underlying bill, are related to fish.

No, I don't know deny that fish are important. We might be discussing our mountain trout someday here on the floor of the House and defending the President's efforts around clean water or on protecting some of our watersheds in Colorado. We have a lot of interest in protecting our fishing stock as well. But I would be proud to be able to tell my constituents that I have acknowledged have successfully helped restore the red snapper population—I would hope that perhaps our next rule will allow us to consider immigration reform, that perhaps our next rule will allow us to consider immigration reform, that perhaps our next rule will help us deal with the bullying in schools, that perhaps our next rule will save lives and prevent future derailments, and so many other issues.

I say to my colleagues that this particular bill needs to go back to the drawing board. It needs to go back to the drawing board to have a bipartisan format. If it is put to a vote on the floor of the House, the Natural Resources Committee, to include priorities from both sides and good science and continue to build upon the legacy of success that the 2007
bipartisan reauthorization of the Magnuson-Stevens Act has had in increasing the health of our wild fishing stocks. I encourage my colleagues to vote no on this rule.

I yield back the balance of my time.

Mr. BYRNE, Mr. Speaker, I yield myself the balance of my time.

I was listening very carefully to the gentleman from Colorado, and I accept his invitation to go trout fishing. I would accept that. Fishing of all kind is great for everybody to do, and I appreciate his invitation.

The reason we have the problem we have today is not because the Federal Government knows how many fish are out there. Remember what I said earlier—a reef fish is a reef fish, and they don't sample for reef fish on reefs. So, if you don't sample for reef fish on reefs, you are not going to find the fish. Now, we know there are so many fish out there that we allow to fish them and that snapper are not only eating other species but they are eating other snapper.

What our scientists have done is they have counted there with submersible vehicles with high-def cameras, and they count the fish on the reef and sample them that way. They have a real number. They do a real sampling so they get accurate data, and that is what government scientists don't.

My friend said that we should go back to the drawing board. We have waited too long already. We should have done this last year so that we could have had a real snapper season this year. It doesn't. Remember what I said earlier—a reef fish is a reef fish, and we have a snapper season next year, and that is not acceptable. We have enough fish out there—and the science from our region has proven it—to have a real snapper season. It is not just about snapper. We have these problems in other areas of the fishery that need to be taken care of and taken care of in a responsible way. No one is more environmentally conscious than someone who hunts and fishes, because that is where their enjoyment comes. We want it to be there for us and for our children and, now that I have a grandson, for my grandchildren.

I have appreciated this debate today. I always welcome the opportunity to draw attention to some of the real issues which are affecting my constituents back on the Gulf Coast. To some people up here, this issue doesn't mean much. To some people, they only listen to the political talking points put out by lobbyists or by political parties or by environmental groups. But to the government scientists don't.

The reason we have the problem we have today is not because the Federal Government knows how many fish are out there. Remember what I said earlier—a reef fish is a reef fish, and they don't sample for reef fish on reefs. So, if you don't sample for reef fish on reefs, you are not going to find the fish. Now, we know there are so many fish out there that we allow to fish them and that snapper are not only eating other species but they are eating other snapper.

What our scientists have done is they have counted there with submersible vehicles with high-def cameras, and they count the fish on the reef and sample them that way. They have a real number. They do a real sampling so they get accurate data, and that is what government scientists don't.

I have appreciated this debate today. I always welcome the opportunity to draw attention to some of the real issues which are affecting my constituents back on the Gulf Coast. To some people up here, this issue doesn't mean much. To some people, they only listen to the political talking points put out by lobbyists or by political parties or by environmental groups. But to the small restaurant employees in Gulf Shores or to the charter boat captain in Orange Beach or to the gas station in Foley or to the condo owners on Dauphin Island or to the thousands of families who spend time fishing on the Gulf Coast and all around our country, this bill is critically important. This bill is about getting the Federal Government off our backs so that we can fish.

Let's not fall back into another political debate. Let's come together on behalf of our Nation's coastal communities. Let's get some real relief for our fishermen. I encourage my colleagues to support this rule and to support this commonsense bill and to support the people of America and their freedom to fish in our waters.

Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The question was taken; and the previous question was ordered.

Mr. Speaker, today it is with great sorrow that I rise to mark the loss of one of Aurora's brightest lights. On May 12, 2015, while performing relief work following the Nepal earthquake, Corporal Sara Abigail Medina and five other marines tragically lost their lives in a helicopter crash.

Corporal Medina was from Aurora, Illinois, and graduated from East Aurora High School in 2010. While still in high school, she decided to serve her country by joining the Marines.

In the face of such a tragedy, we often ask why; and to paraphrase the President, whenever a disaster strikes, the world looks to America to lead because of our extraordinary people who rise to the challenge.

As a fellow Marine, I want to say that no words that I say on this floor will be able to fill the hole in the hearts of all those who knew and loved Sara, but still we must speak because all should know that Corporal Sara Medina gave her last full measure of devotion in service to her country, helping those who needed it most.

For her sacrifice and for her family's terrible loss, we offer our condolences and thanks of a grateful nation.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. Newton) will entertain Special Order speeches without prejudice to the resumption of legislative business.

TRANSPORTATION INFRASTRUCTURE

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2015, the gentlwoman from New Jersey (Mrs. WATSON COLEMAN) is recognized for 60 minutes as the designee of the minority leader.

Mrs. WATSON COLEMAN. Mr. Speaker, I ask unanimous consent that members have until 10 a.m. today to revise and extend their remarks and include extraneous material on the subject of my Special Order. The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New Jersey?

There was no objection.

Mrs. WATSON COLEMAN. Mr. Speaker, I am so pleased to join with my distinguished colleague, the gentlewoman from Florida, as we discuss an issue of great importance to my district and, quite frankly, to every Member of Congress: transportation infrastructure.

Last week our Nation endured a terrible tragedy as Amtrak Northeast Regional train 188 derailed in Philadelphia on its way to Trenton en route to New York. That accident killed eight Americans, including one of my constituents, injured more than 200, and disrupted service on the busiest rail corridor in the Nation for nearly a week.

In the days since the accident, investigators have indicated that high speeds may have played a significant role in the derailment, speeds that are not more than double the speed limit in that stretch of the track. My colleagues on the other side of the aisle have used those details to deflect attention away from discussing our Nation's investments, or the lack thereof, in rail and all of our other surface transportation infrastructure.

Mr. Speaker, burying our heads in the sand and waiting until an accident indisputably caused by lack of funding or maintenance to discuss that funding is dangerous, irresponsible, and, frankly, unacceptable: dangerous because millions of Americans every day are driving across dilapidated bridges, riding on outdated trains, and stuck in endless traffic when traveling to work, to school, and medical care; irresponsible because news coverage and the looming highway trust fund depletion have made transportation infrastructure a national focus; unacceptable because transportation infrastructure has traditionally been a bipartisan cause transportation infrastructure reauthorization that makes investments to give us the transportation system—rail, car, air, and sea—that we need.

Transportation infrastructure is critical for the businesses and employers in our district that ship goods to consumers across the globe. Transportation infrastructure creates good-paying jobs here, jobs that can't be outsourced, and jobs that will actually...
give working Americans a chance to climb into the middle class and beyond.

But like I mentioned earlier, my colleagues on the other side of the aisle would rather have us wait until an accident, a tribute to our lack of infrastructure decay to invest in our roads, our bridges, and our railways. In fact, a Los Angeles Times report recently noted that the last time Congress significantly increased Amtrak funding was 2008, following the 2008 Union Pacific–IowaPacific crash in California that killed 25 people.

This year, the day following the Philadelphia crash, my colleagues on the other side of the aisle voted to cut Amtrak funding by one-fifth. That is wrong; it is just plain wrong. It is insane, and it is out of touch.

Earlier this year, my Congressional Progressive Caucus colleagues and I introduced the People’s Budget, a budget that would fix our economy so that it will expand and provide opportunities for everyday working class Americans. A key provision in the People’s Budget was an investment of $820 billion to close our Nation’s infrastructure gap, funded by raising the gas tax by just 15 cents over the next 20 years.

Unfortunately, instead of the People’s Budget, Congress passed a far more dangerous Republican budget; and unfortunately, our infrastructure continues to crumble. Our roads are frequently congested, limiting productivity for millions of American workers; our airports appear run down compared to their competitors in Europe and Asia; and rail speeds around the world have long eclipsed even Amtrak’s fastest trains.

Our bridges continue to deteriorate and present real safety hazards, and our ports are in terrible disrepair, having negative economic impact. In fact, a report last week in The New York Times noted that while the train that derailed was traveling well above the speed limit, at 106 miles per hour, its speed was about half of the average speed of a French train from Paris to Marseille.

Federal and State investments in infrastructure have plunged in recent years, even as economists have repeatedly pointed to the benefits of increased spending and growing economic benefits and overhaul our transportation networks. This has to change before it is too late, Mr. Speaker.

The Congressional Progressive Caucus is here on the floor today to implore our colleagues to put transportation spending front and center. I know that the gentlewoman from Florida (Ms. Brown) agrees with me. I want to thank her for her leadership as a member of the House Committees on Transportation and Infrastructure.

I yield to the gentleman from New York (Mr. NADLER), who shares our passion about the importance of funding a comprehensive transportation bill.

Mr. NADLER. I thank the gentlewoman for yielding.

Mr. Speaker, for well over a decade we have advocated an 8% safe investment in our transportation infrastructure. According to DOT, there is an $808 billion backlog of investment needs on highways and bridges, including $480 billion in critical repair work. Public transit has an $83 billion backlog of deferred maintenance and repair needs, which increases by $2.5 billion each year as bus and rail infrastructure ages.

The American Society of Civil Engineers has given U.S. infrastructure an overall grade of D-minus because 54 percent of our major roads are rated poor or mediocre. One out of every four bridges in the United States, or 147,000 bridges, is structurally deficient or functionally obsolete, and 45 percent of Americans do not have access to transit.

Federal land management agencies need over $11 billion to address deferred maintenance needs on our roads and bridges. The Federal Highway Administration estimates that the cost of upgrading and modernizing these bridges is over $106 billion. An investment of $20 billion annually by all levels of government is needed through 2030 to draw down the backlog.

Bringing existing transit assets just up to a state of good repair will require an annualized investment level of $18.5 billion through the year 2030, an amount far in excess of current funding levels. An additional $4.3 billion over current spending levels from all levels of government is needed annually to eliminate the current backlog by 2030.

To accommodate future transit ridership growth and preserve transit systems, as much as $24.5 billion per year would need to be invested compared to only $14.2 billion currently invested, a gap of $10 billion a year.

The cost to our economy of not meeting our infrastructure needs is great. According to the 2013 American Society of Civil Engineers report, 42 percent of America’s major urban highways remain congested. Congestion costs commuters $121 billion a year in wasted time and fuel, or an average of $818 per commuter. I would guarantee you each commuter would rather spend the equivalent amount in taxes than waste that money sitting on a clogged highway.

In 2011, congestion caused urban Americans to travel 5.5 billion hours more and to purchase an extra 2.9 billion gallons of unnecessary fuel. Without existing transit services in place in 2011, travelers would have suffered an additional 865 million hours of delays and consumed 450 million more gallons of fuel.

Despite the condition of our infrastructure system caused by years of underinvestment, we are spending way too little today on roads, bridges, transit, and rail. The highway trust fund currently collects about $35 billion per year for the highway account and $5 billion for the transit account. According to CBO, the highway trust fund faces a shortfall of about $170 billion over the next 10 years. By 2020, the highway trust fund’s purchasing power will have dropped by 50% since 1990 because of inflation at a time when the country’s population will have increased 30 percent.

We currently spend about $50 billion a year on highways and transit, and the cost of the recent flights over revenue for the transportation bill have been merely to fill the gap to maintain current funding levels. The discussion should be much broader. It should be about how we can fund the program at a higher level to eliminate the backlog, increase capacity, meet a state of good repair, and eliminate the congestion in this country.

Today, this country spends about 1.7 percent of GDP of the entire economy on infrastructure. We used to spend almost 2 percent on infrastructure. Europe is spending 4 to 5 percent, and China is spending 9 percent. Who do you think, 30 years from now, is going to have a competitive economic system which depends on adequate up-to-date competitive transportation infrastructure and broadband?

In particular, for example, we have been underinvesting in our rail infrastructure as well. The passenger rail system needs at least $52 billion, or $2.5 billion per year for four years, just to meet ridership demands such as capacity improvements, such as tunnels to New York and to bring the system into a state of good repair. Of that amount, $21 billion is necessary for the backlog of projects on the Northeast corridor.

The Northeast corridor serves 51 million people and is the major corridor for Amtrak in the country. The $21 billion for the backlog of projects includes $13.8 billion in major infrastructure project backlog and $7.2 billion in basic infrastructure backlog.

Some of these major project needs include $1.5 billion to replace the Baltimore and Potomac Tunnel, which dates back to 1873; $950 million to replace the Gunpowder and Bush River Bridges; $850 million to replace the Susquehanna River Bridge; $350 million to replace the Highline Bridge and add a fourth track between Newark and New York; $750 million to replace the Portal Bridge, which can stop the entire Northeast corridor if it should fail; $1 billion can be invested to complete, and signal upgrades and bridge replacements near New Haven; $2.8 billion in upgrades to other movable bridges; $1.8 billion in additional catenary upgrades from Washington, D.C., to New York.

All this fund backlog, just to make sure the current system continues to operate and doesn’t fail. Additional funding over and above the $21 billion backlog, for a total of $64
billion, is needed for service improvements and projected increases in capacity on the Northeast corridor; yet Amtrak gets just $1.4 billion in the annual appropriations bill—or less than 2 percent of Federal transportation funding.

The Appropriations Committee recommended the other day that this be reduced to $1.1 billion, with a $64 billion backlog.

The fiscal year 2016 transportation appropriation bill just marked up in committee the day after the accident north of Philadelphia, cuts capital funding for Amtrak by $290 million, providing only $1.1 billion in FY 2016, $1 billion below the President’s request.

The President’s request for this year’s budget includes $5 billion for rail. Half of that is for Amtrak, to bring the system to a state of good repair, including $550 billion for the Northeast corridor.

As we have seen the results of the full investigation, the tragedy of Amtrak train 188 shows the importance of a reliable rail system to the Northeast region of this country. We cannot continue the decades of neglect that have left our public transportation system underfunded and resulted in a multibillion-dollar backlog to bring the system to a state of good repair.

It should not require a tragedy to spur action to address the glaring deficiency in our transportation and infrastructure network. We should act before accidents occur.

Rail safety is not a luxury; it is of fundamental importance to our citizens and our economy. Thousands of businesses and commuters in the Northeast depend on the rail for commerce and transportation every day. Congress must finally provide the resources necessary for ensuring the safety and reliability of our transportation and infrastructure system.

While this Congress has failed to make transportation funding a priority, the administration has taken the lead and proposed a long-term surface transportation reauthorization bill.

The GROW AMERICA Act provides a total of $478 billion over 6 years, a 45 percent increase for highways, bridges, public transportation, highway safety, and rail programs. It provides $317 billion for programs under the Federal Highway Administration, an increase of 29 percent over current levels. It allocates $18 billion for a new dedicated multimodal freight system. How is our economy supposed to operate without an efficient freight transportation system?

It provides $115 billion for programs under the Federal Railroad Administration, $6 billion for vehicle safety programs under the National Highway Traffic Safety Administration, $47 billion for truck and bus safety programs, and $16 billion for the Highway Safety Improvement Program.

It provides $7.5 for TIGER grants and $0 billion for TIFIA that could support $60 billion in loans. It provides $3.5 billion for transportation research and innovation to move people.

Several of the members of the Transportation Committee just introduced the GROW AMERICA Act in the House. Not all of us agree with everything in that bill.

For example, the Transportation Committee’s Special Panel on Freight, which I was the ranking Democrat on, made several unanimous bipartisan recommendations, including providing dedicated guaranteed funding for projects of national and regional significance. Reauthorizing this program is a top priority for many of us on the committee and should be included in any final bill.

It is important to start moving a long-term bill, where we can have an opportunity to shape these policy provisions, and the GROW AMERICA Act would serve as a good starting point.

The last surface transportation bill, MAP-21, expired last fall. The President's request for the next decade's transportation bill, MAP-21 itself was only a 2-year bill, breaking the tradition of Congress passing 5- or 6-year bills to provide the reliable and consistent funding required to implement long-term capital plans and projects that require a commitment beyond 1 fiscal year.

The last time we passed a long-term bill was 10 years ago, in 2005, in SAFETEA-LU. That bill was under-funded because of a resistance to raising the gasoline tax and identifying new revenue sources.

House and Senate leadership couldn’t come up with the additional $60 billion needed to replace the highway trust fund just to do a long-term bill at current levels, but this week, they put on the floor a tax extender that will cost $182 billion over 10 years, completely unaffordable.

The priorities of this Congress are completely out of whack. Our infrastructure is crumbling around us, and the majority continues to spend hundreds of billions of dollars on tax cuts for corporations and the wealthy, while leaving transportation funding to wither on the vine.

I am concerned we will be back here in July having this same conversation. We must demand now that this Congress spend the next 2 months, once and for all, making transportation funding a priority.

We must realize that what we have based our transportation program on since 1956, the gasoline tax, is a wasteful and outdated system. It is down 30 percent since 1999 because of inflation, and every year, we use fewer gallons because of an intelligent policy of energy conservation, of higher mileage per gallon; but that means fewer gallons of gasoline. We must either raise the gasoline tax or bring in a new source of revenue or both.

Finally, let me say that interest rates are at negative rates now. When interest rates are at negative rates, when you can borrow money and pay it back more cheaply, that is the time to borrow money to invest so that our children inherit not a great debt, but inherit an efficiently functioning economy and an investment in the country that makes the economy function.

We have always believed the Republican Party and their precursor, the Whigs, have always known this. They were the party in the 19th century of the American systems. What was the American system? Henry Clay’s system, the system that supported public funds for improvements in roads and canals and bridges and railroads, rather than the European system of letting the private sector do it.

Abraham Lincoln continued that tradition. The transcontinental railroad at a time of civil war, and Dwight Eisenhower did the Interstate Highway System, which we are still living with. These were Republican Party projects.

I only wish the Republican Party wasn’t completely turning its back on its own heritage.

We have, for the last century, a bipartisan heritage of funding our infrastructure so that the country can grow and the economy can prosper, but the Republican Party seems to have turned this back on this. I urge you to reconsider.

Stop turning your back. Join us in the Democratic Party in continuing our tradition of making this an economy that can function for all our people, where people can move and not waste their time sitting in traffic jams, where goods can move and the economy can function, businesses can flourish. That is what is at stake.

I am a proud Democrat of Florida, Mr. NADLER, first of all. I want to thank you for your comprehensive information about transportation infrastructure.

In my home State of Florida, we bring many visitors to Florida through Amtrak through the Auto Train. We have colleagues on the other side that want to privatize that system, and I want to know how that will affect New York, privatizing that Northeast corridor.

Mr. NADLER. Well, you have to remember the reason why Amtrak was created in the first place. We didn’t have public railroads in the 19th century. We didn’t have public railroads in
the first half of the 20th century, but by 1960 and 1970, many of the freight railroads were going bankrupt, and certainly, the passenger lines could no longer pay for themselves. They were all going bankrupt.

Congress ended the reality in 1970 that if it didn’t create something called Amtrak—it was named Amtrak—but something as a public corporation or publicly funded corporation, there would be no passenger rail in the United States.

The states did the same thing. What became various commuter rail agencies, like MTA in New York or SEPTA in Philadelphia and others, were created out of the bankrupt passenger operations of the private rail lines. No one could make money at it.

Amtrak has survived and has flourished in the sense of attracting more and more passengers, and it now has 77 percent of the market against the airlines in the Northeast corridor; and, thank God, it saves energy and time and congestion, despite the fact that it has been grossly underfunded by Congress.

The only section of Amtrak that makes money is the Northeast corridor from Washington to Boston. It subsidizes everything else. There would be no rail lines outside the Northeast corridor—not to Florida, not to Chicago, not to Denver, not to any place outside the Washington to Boston corridor—if they had to pay for themselves.

We, the Northeast corridor, subsidize the rest of Amtrak. From my point of view as a New Yorker, I would rather that weren’t the case; but I am an American. I think everybody ought to have the ability to travel and the ability to have an economy that functions, and so we cross-subsidize.

It would be better if Congress put money in and other sections of the country could become self-sustaining in rail. But that is what the history is that is very difficult.

I am not aware of any rail system or public transit system in the world that isn’t publicly subsidized. We subsidize every transportation system in this country. We subsidize the highway; we subsidize the airlines with the air traffic control, and we do it because we know the country has to move.

If we want an economy that generates goods and services for people, it has to have the time. It has to have the time to be more efficient; that is why I quoted the figures I did earlier in my remarks.

Prior to 1980, roughly, we used to spend about 4, 4 1⁄2 percent of GDP on infrastructure, and spending 17 percent of GDP on infrastructure. Of course, we are underinvesting, and our infrastructure is decaying. By infrastructure, I mean roads, highway, bridges, rail, airports, broadband—you name it.

China is spending 9 percent of GDP on infrastructure. We are competing with China. We are competing with other countries. If they can move goods and people more efficiently, that means their economy is going to be more efficient; their economy is going to be more competitive; they are going to be able to sell things more cheaply, generate things more cheaply, and out.sell us.

We have to compete in a world economy. We can’t be insulated. If we are going to compete in a world economy and have an economy that can generate the jobs, we can only compete if we have a transportation system. We also need an energy system, and other things, too, but an efficient transportation system. We are eating our seed corn. We benefited from prior generations’ investment, and now, we are not doing that investment.

I hear rhetoric on this floor all the time that we shouldn’t leave a debt. We have to have a balanced budget, and we shouldn’t leave a debt to our children.

Frankly, I would rather leave a debt to our children if we use that debt to build up our infrastructure in this country so that there are roads for our children to travel on, rails to ride on, airports to land in, schools to attend. That is an investment.

We have to make a distinction. It is one thing to waste money or spend it on something ephemeral. But to invest in it so that our children inherit a country with a functioning economy and with assets that we give them that they can use to make a more functioning economy, that is worth it.
Mrs. WATSON COLEMAN. Before the gentleman from New Jersey (Mr. PAYNE) begins, I really think I want to share something that I think is very germane to where the gentleman may be going.

Both of us live on and travel the Northeast corridor on the train back and forth to New Jersey, and we depend upon an efficient and a safe train ride to get us back to our homes and to get us back down here to do the people’s business.

I did mention that I lost a constituent because that train was on its way to Trenton, and it was letting off people in my district, and that train would have ultimately gone up to Newark and then on to New York.

I know that the Congressman has been tremendously impacted by the tragedy that took place, and knowing how important it is for us to be able to move to and from our homes safely and efficiently, and safely in the Northeast corridor. And I just wanted to sort of prestige the introduction of your coming to the microphone with sort of remembering that this is really close to home for you and me.

And the reason I say that is, as stated by the gentlewoman from New Jersey, the Northeast corridor is the way we are able to travel back and forth from our home to Washington, D.C., to do the people’s business. And so it is not uncommon that I could have been on that train and have taken it on numerous occasions.

My thoughts and prayers are with the victims of this horrific Amtrak train derailment and their families at this difficult time.

I also want to thank the first responders who put themselves in harm’s way to rescue passengers, and I wish all those injured a full and speedy recovery.

This tragedy, as we stated, has hit so close to home. Sometimes weekly, I travel, as do many of my constituents and colleagues, on this rail line. I have taken Amtrak’s 188 and had my wife and children on that specific train leaving here going back home.

As Members of Congress, we have a responsibility to ensure and enhance the public safety.

The derailment of Amtrak train 188 serves as an important reminder that if we are to meet this responsibility, we need to do our part in making sure that we take care of them.

I want to paraphrase the comments of the first President of the United States, George Washington. He said, ‘’Failure is not an option.’’ We need to pass this project.

Now, I want to thank the gentlewoman from New Jersey for her leadership and for providing this opportunity to discuss the veterans. I want to talk a little bit more about Amtrak, because I am the past chair of the Railroads, Pipelines, and Hazardous Materials Subcommittee, and I think Amtrak is more and more important.

As more Americans are turning to rail as their preferred mode of transportation, and job creation, and protection of our environment, the productivity of our Nation and our infrastructure.

Mr. PAYNE. Mr. Speaker, I thank the gentlewoman from New Jersey for allowing me this opportunity to discuss a tragedy, as the gentlewoman from New Jersey stated, that has hit very close to home.

And the reason I say that is, as stated by the gentlewoman from New Jersey, the Northeast corridor is the way we are able to travel back and forth from our home to Washington, D.C., to do the people’s business. And so it is not uncommon that I could have been on that train and have taken it on numerous occasions.

My thoughts and prayers are with the victims of this horrific Amtrak train derailment and their families at this difficult time.

And the reason I say that is, as stated by the gentlewoman from New Jersey, the Northeast corridor is the way we are able to travel back and forth from our home to Washington, D.C., to do the people’s business. My thoughts and prayers are with the victims of this horrific Amtrak train derailment and their families at this difficult time.
And at the end of this, Mr. Speaker, I want to take this opportunity to simply remind us that the transportation needs of our community both represent safety and security that we hold very sacred in our communities, but it also provides a benefit that we all can benefit from. Irrespective of Republican or Democrat, rural, urban, or suburban, there is a benefit to a transportation system that moves people, goods, and supplies where they are needed.

I yield back the balance of my time. Ms. MAXINE WATERS of California. Mr. Speaker, I thank my colleagues, Congresswoman BONNIE WATSON COLEMAN and Congresswoman CROOKS BROWN for organizing this Congressional Progressive Caucus Special Order Hour on Transportation Infrastructure Spending.

Last night, the House passed H.R. 2353 to extend the federal surface transportation programs for two months, through July 31st. If these programs had been allowed to expire, all federal funding to states and local governments would have stopped on May 31st, and numerous construction jobs on highways, bridges and transit systems could have been cancelled. According to the American Association of State Highway and Transportation Officials, this needless crisis brought uncertainty to 6,000 critical construction projects across the country, and left 660,000 good-paying construction jobs hanging in the balance.

I voted for this bill, but I did so reluctantly because what we really need is a multi-year transportation bill that will bring our nation's transportation system into the 21st century. A multi-year transportation bill with robust funding for highway, bridge and transit construction will create thousands of good jobs and provide certainty to states and local governments.

Federal investment in our nation's transportation system is essential. The American Society of Civil Engineers gave the public infrastructure of the United States a grade of "D+" in 2013 and estimated that we will need to invest $3.6 trillion by 2020 in order to improve the condition of our infrastructure.

Rebuilding our nation's transportation infrastructure creates jobs that are desperately needed throughout the country. The economy is still struggling to recover from the recession. The unemployment rate is 5.4 percent nationwide and is significantly higher in some minority and disadvantaged communities. Transportation funding is clearly good for the economy.

Congressional Republicans have had months to prepare a multi-year transportation bill. Unfortunately, all they did last night is punt the deadline two months deeper into the critical summer construction season. I urge my Republican colleagues to work with us over the next two months so we can finally pass a multi-year transportation bill before the July 31st deadline.

Congressional Republicans are further jeopardizing our nation's transportation system by slashing funding for TIGER. TIGER—formally known as Transportation Investment Generating Economic Recovery—is a nationwide competitive grant program that creates jobs by funding improvements in transportation infrastructure by states, local governments, and transit agencies. TIGER funds innovative projects that generate economic development and improve access to safe, reliable, and affordable transportation alternatives.

Earlier this year, the President requested $1.25 billion for TIGER in fiscal year 2016, as part of an expanded TIGER program that would provide $7.5 billion for TIGER over 6 years. This expanded TIGER program will create jobs, encourage innovation, and modernize transportation infrastructure for the 21st century.

I sent a letter to the Appropriations Committee urging full funding of the President's $1.25 billion request for TIGER in FY 2016, and a total of 146 Members of Congress signed my letter.

Nevertheless, the House Republicans' version of the FY 2016 Transportation and Housing Appropriations (THUD) bill provides only $100 million for TIGER. That's an 80 percent cut from FY 2015 and a small fraction of the President's request. This kind of drastic cut in TIGER will needlessly cripple highway and transit construction plans that are already struggling due to the uncertainty surrounding the future of the transportation bill.

We need more federal investment in transportation infrastructure, and we need it now! That is why I am introducing the TIGER Grants for Job Creation Act. This bill will provide an emergency supplemental appropriation totaling $7.5 billion dollars over the next six years for job creation through investments in transportation infrastructure. This emergency supplemental appropriation will fully fund the President's proposal for an expanded TIGER.

Passage of an emergency supplemental appropriation will provide funding for TIGER free from sequestration and without reducing funding for other important domestic priorities. This bill will also allow states, local governments, and transit agencies to begin immediately to plan projects and prepare grant applications. Thus, it will ensure an efficient use of funds and timely job creation.

I urge all of my colleagues to support the TIGER Grants for Job Creation Act and fully fund the President's request for TIGER, and I urge my colleagues to pass a multi-year transportation bill to bring our highways, bridges and public transit systems into the 21st century.

HOUR OF MEETING ON TOMORROW

Mr. JODY B. HICE of Georgia (during the Special Order of Mrs. WATSON COLEMAN). Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at 10 a.m. tomorrow.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia? There was no objection.

REAPPOINTMENT OF MEMBER TO BOARD OF TRUSTEES OF THE INSTITUTE OF AMERICAN INDIAN AND ALASKA NATIVE CULTURE AND ARTS DEVELOPMENT

The SPEAKER pro tempore. The Chair announces the Speaker's reappointment, pursuant to 20 U.S.C. 441d, of the following Member on the part of the House to the Board of Trustees of the Institute of American Indian and Alaska Native Culture and Arts Development:

Mr. BEN RAY Luján, New Mexico

APPOINTMENT OF INDIVIDUALS TO COMMISSION ON CARE

The SPEAKER pro tempore. The Chair announces the Speaker's appointment, pursuant to section 202(a) of the Veterans Access, Choice, and Accountability Act of 2014 (Public Law 113-146), and the order of the House of January 6, 2015, of the following individuals on the part of the House to the Commission on Care:

Mr. David P. Blum, Columbus, Ohio
Mr. Darin Selnick, Oceanside, California

Dr. Toby Cosgrove, Cleveland, Ohio

APPOINTMENT OF MEMBERS TO MEXICO-UNITED STATES INTER-PARLIAMENTARY GROUP

The SPEAKER pro tempore. The Chair announces the Speaker's appointment, pursuant to 22 U.S.C. 276h and the order of the House of January 6, 2015, of the following Members on the part of the House to the Mexico-United States Interparliamentary Group:

Ms. LINDA T. Sánchez, California
Mr. GENE GREEN, Texas
Mr. POLIS, Colorado
Ms. JACKSON LEE, Texas
Mrs. TORRES, California

CRIMINAL JUSTICE REFORM

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2015, the Chair recognizes the gentleman from Georgia (Mr. JOHNSON) for 30 minutes.

Mr. JOHNSON of Georgia. Mr. Speaker, I appear here tonight to talk about police and community relations throughout our country. The purpose of this Special Order is to talk about how the relationship between police and local communities can be repaired.

Over the last year, we have witnessed tensions rise between local law enforcement officers and local communities. The events we have witnessed across the country have highlighted the need for mending the strained relationships between police and communities across the country.

This week, the Judiciary Committee in the House held a hearing entitled, Policing Strategies for the 21st Century. The purpose of this hearing was to look at how law enforcement is trained and how it is received in our communities across the country.

The Senate also held a hearing this week. Their focus was on the use of body cameras.

I applaud my colleagues for holding hearings on criminal justice reform this week, but I hope that this is just the beginning of the end of the hearings that need to be held on so many different and very important and fundamental issues on the topic of
criminal justice reform. All of these issues scream out for public attention and for new solutions by this Congress. There are many conversations that need to be had about the best ways to improve policing practices, including ways to curb the use of excessive force, the way that law enforcement handles mental health evaluations for law enforcement. The list goes on and on.

I would like to start out by talking about three of my bills: the Grand Jury Reform Act, the Police Accountability Act, and the Stop Militarizing Law Enforcement Act.

Police militarization is an important subject that President Obama even weighed in on yesterday with the issuance of an executive order that incorporates my Stop Militarizing Law Enforcement Act. Both my bill and the President’s executive order call for a ban on the transfer of certain surplus military-grade weaponry and both impose strict oversight and transparency measures to ensure that the equipment that is transferred is used properly.

President Obama’s Law Enforcement Equipment Working Group called for law enforcement agencies to “embrace a guardian—rather than a warrior—mindset” to build trust and legitimacy both within agencies and with the public.

This statement is at the very core of what we need to change in our country. Military-grade weapons are made for one purpose, and that is to conduct war. When we see tanks and grenade launchers and this type of equipment being used by police, it enforces a message that we are at war in the streets of our very own country, the same way that we are at war in the streets of other countries. This has to change because our streets are not war zones, and we should not allow the unbridled proliferation of military weaponry onto our streets.

When we allow our streets to be flooded with surplus weaponry from the wars in Iraq and Afghanistan, we set the stage for a military mindset to take hold throughout the law enforcement community. And that, ladies and gentlemen, is definitely unhealthy. It is not good for the country because so many of our young people have lost confidence in our police departments and in our law enforcement community. And, that, I am afraid, is not good for our democracy. We need to try to do something to change it. And we can’t make effective changes without understanding the problem.

Now some would say that we need a military solution on the streets of America because we have become so lawless, but I would beg to differ. I would beg to differ strongly, as a matter of fact. We are dealing with citizens who still need to be protected.

By the way, most people in America are law-abiding citizens. There are some who become criminals, who stray and commit criminal acts. Sometimes those criminal acts actually place people’s lives at risk. And police and law enforcement are there to make sure that we know the difference.

All people want to be safe and secure in their homes and walking down the streets and in doing their business, in their life, work, and play pursuits. All of us want to be safe, and all of us realize that we must have law enforcement to enforce the laws. All of us should have a responsibility to each other to stay within the boundaries of the law, and we are partners in that regard. We, the citizens, partner among ourselves; and then we must partner with our law enforcement community to enable law enforcement to do the job that we need them to do.

So it is a relationship that is built on trust, and it is built on communication because law enforcement can only be effective in enforcing the law as it is with respect to the relationships that it has among people in the community.

That is why community-oriented policing is so important, to get police officers involved in the communities they serve: for them to get out of the car, go meet people, go develop relationships, and start the flow of dialogue. The citizens are who enable law enforcement to be most effective because that is where they get most of their information.

I will admit that people don’t communicate with law enforcement as much as they should, and it hurts us. The reasons for that is this breakdown in trust, which is exacerbated by the military equipment and by the military mindset, both of those going hand in hand.

Now, how do we stop it? First, by stopping the flow of that former military equipment to our streets. We must do that. And I am not here to say that law enforcement should not have what it needs in order to do what it is supposed to do, and that is to protect and serve, but it should not have a pipeline directly between the Department of Defense and law enforcement which supplies equipment to law enforcement, leaving out the civilian authority to make the determination of whether or not the equipment is needed.

So that is what the 1033 program does. That is what President Obama’s executive order, which tracks the language of the Stop Militarizing Law Enforcement Act, does, and that is to stop the flow and return control of the process of acquisition of law enforcement equipment back to the hands of the civilian authority. So that is the first thing that we need to do.

Mr. Speaker, the second thing we need to do is to ensure an analysis of the personnel that we have doing the law enforcement, because as I said, if you have been to a war zone, the statistics show that many of those who return from the battle suffer from post-traumatic stress and other illnesses that affect the mental health of the people. So we must take better care of the mental health of our law enforcement personnel, having been deployed to places where the flow of military-like equipment is very stressful, and sometimes that mental health can break down and people start making bad decisions. So we really must get a handle on that in this country.

Then once we get a handle on the militarization, there are some structural issues that need to be dealt with. One is the loss of confidence in the criminal justice process, i.e., the grand jury, the secret grand jury process as it relates to law enforcement, because what has become clear is that whenever there has been a killing of a civilian by law enforcement officer, it often results—or it most often results—in a finding of justifiable homicide. Indeed, most killings by law enforcement are justifiable; there is no question about that. But there is also no question about the fact that some of the killings are unjustifiable. When they are unjustifiable, they need to be dealt with in accordance with the law, which means prosecution.

The problem that we get with law enforcement officers who have acted outside of the law and have committed a
killing, what we get is a finding that the killing was justified despite the clear evidence to the contrary. I am not going to cite any specific cases, but I will say that these cases are well-known to the public. They appear on video. Even if your eyes deceive you and there is doubt, I think it is certainly justified in not having confidence in the process by which the finding that the killing was justified was rendered through. Basically I am talking about a secret grand jury process, and I will file the Grand Jury Reform Act, to get at this secret grand jury process and to bring transparency into the process.

Now, what usually happens, or what is the course of conduct in a police killing case, is that the killing itself will be investigated first, and oftentimes only by the very law enforcement agency that employed the officer involved in the incident. So what you have are friends and coworkers investigatory each other.

So when that happens, it tends to not be impartial. It tends to be biased in favor of the accused. What usually happens is, despite what may be clear about the facts, the decision always comes down justifiable by the law enforcement agency that is rendering the decision against its own.

Then the case goes to the local grand jury or to the local prosecutor, who is well-known and knows well the law enforcement involved who are the subject of the investigation. They know each other. They work together regularly to bring cases before the grand jury.

So when an officer is brought before the grand jury, often that officer is known to and by the district attorney. And even if not known, the fact that they are law enforcement gives them an inherent benefit; it gives them credibility; it gives them an edge, a positive edge, with the prosecution.

So the prosecutor then takes the investigation by the law enforcement agency that knows and loves the officer, takes that investigation before a grand jury, and presents the evidence, and the grand jury came back finding that the killing was justified.

We need more than that. We saw that in the case of Michael Brown in Ferguson, Missouri, where they did release the grand jury transcripts. We could see where the evidence, a boatload or a truckload, a dump truck of evidence was just dumped on the confused grand jury members who were charged on a law that was not even applicable, given bad law upon which to decide the case.

So we saw what happened in the grand jury proceeding in that case, and that, ladies and gentlemen, is not the only time I am sure that there has been abuse within the grand jury room. But we will never know because it is secret.

Lastly, I have filed a bill which is called the Police Accountability Act. What it would do would be to provide another tool for Federal prosecutors to be able to prosecute law enforcement officers for the offense of murder and all of the lesser included offenses should it appear that the process within the State did not work.

So those three bills I have discussed. Now, my colleague has arrived, Ms. JACKSON LEE, who, out of Houston, Texas, has ascended to the top spot, the ranking membership on the Crime, Terrorism, Homeland Security, and Investigations Subcommittee of the Judiciary Committee, upon which I also serve along with her. So with that, I will yield to the gentlewoman from Houston.
The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The text of the concurrent resolution is as follows:

H. CON. RES. 47

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of S. 178, an Act to provide for justice for the victims of [traffic], the Secretary of the Senate shall—

(1) in section 702(b)(2), insert “pilot program” after “identified by the”;

(2) strike section 1002 and insert the following:

**SEC. 1002. PROTECTIONS FOR HUMAN TRAFFICKING SURVIVORS.**

Section 1701(c) of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3786dd(c)), as amended by section 601 of this Act, is amended—

(1) in paragraph (1), by striking “or” at the end;

(2) in paragraph (2)(C), by striking the period at the end and inserting “; or”;

(3) by inserting after paragraph (2) the following:

‘‘(3) from an applicant in a State that has in effect a law—

‘‘(A) that—

‘‘(i) provides a process by which an individual who is a human trafficking survivor can move to vacate any arrest or conviction records for a non-violent offense committed as a direct result of human trafficking, including prostitution or lewdness;

‘‘(ii) establishes a rebuttable presumption that any arrest or conviction of an individual who is a human trafficking survivor is a result of being trafficked, if the individual—

‘‘(I) is a person granted nonimmigrant status pursuant to section 101(a)(15) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(15));

‘‘(II) is the subject of a certification by the Secretary of Health and Human Services under section 107(b)(1)(E) of the Trafficking Victims Protection Act of 2000 (22 U.S.C. 7105(b)(1)(E)); or

‘‘(III) has other similar documentation of trafficking, which has been issued by a Federal, State, or local agency; and

‘‘(B) that the identity of individuals who are human trafficking survivors in public and court records; and

‘‘(B) that does not require an individual who is a human trafficking survivor to provide official documentation as described in clause (I), (II), or (III) of subparagraph (A)(i) in order to receive protection under the law.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

**LEAVE OF ABSENCE**

By unanimous consent, leave of absence was granted to:

Mr. COHEN (at the request of Ms. PELOSI) for May 18 for the first vote.

**ADJOURNMENT**

Mr. POE of Texas. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o’clock and 1 minute p.m.),

under its previous order, the House adjourned until Thursday, May 21, 2015, at 10 a.m.

**EXECUTIVE COMMUNICATIONS, ETC.**

Under clause 2 of rule XIV, executive communications were taken from the Speaker’s table and referred as follows:

1529. A letter from the Chief Financial Officer, Department of Energy, transmitting a report of a violation of the Antideficiency Act, as required by 31 U.S.C. 1351; to the Committee on Appropriations.

1530. A letter from the Secretary, Department of Defense, transmitting a letter on the approved retirement of Admiral Samuel J. Locklear III, United States Navy, and his advancement to the grade of Admiral on the retired list; to the Committee on Armed Services.

1531. A letter from the Under Secretary, Personnel and Readiness, Department of Defense, transmitting a letter on the approved retirement of Lieutenant General Charles T. Cleveland, United States Army, and his advancement to the grade of lieutenant general on the retired list; to the Committee on Armed Services.

1532. A letter from the Chief Counsel, FEMA, Department of Homeland Security, transmitting the Department’s final rule—Suspension of Community Eligibility; Iowa: Buchanan County—Unincorporated Areas [Docket ID: FEMA-2015-0001] [Internal Agency Docket No.: FEMA-83883] received May 19, 2015, pursuant to 5 U.S.C. 501(a)(1)(A); to the Committee on Homeland Security and Governmental Affairs.

1533. A letter from the General Counsel, Pension Benefit Guaranty Corporation, transmitting the Corporation’s final rule—Affordable Options in Terminated Multi-Employer Plans; Interest Assumptions for Paying Benefits received May 19, 2015, pursuant to 5 U.S.C. 501(a)(1)(A); to the Committee on Education and the Workforce.

1534. A letter from the Secretary, Department of Commerce, transmitting a report prepared by the Department of Commerce’s Bureau of Industry and Security on the national emergency declared by Executive Order 13222 of August 17, 2001 and continued through August 7, 2009; to the Committee on Foreign Affairs.

1535. A letter from the Assistant Secretary, Legislative Affairs, Department of Energy, transmitting a letter on the retired list; to the Committee on Appropriations.

1536. A letter from the Assistant Secretary, Legislative Affairs, Department of Energy, transmitting a letter regarding commitments in the Joint Plan of Action, pursuant to the Iran Freedom and Counter-Proliferation Act of 2012, the Iran Sanctions Act of 1996, and Sec. 1245 of the National Defense Authorization Act for Fiscal Year 2012; to the Committee on Foreign Affairs.

1537. A letter from the Assistant Secretary, Legislative Affairs, Department of Energy, transmitting a certification, pursuant to Sec. 3(d) of the Arms Export Control Act, Transmittal No.: DDTC 15-004; to the Committee on Foreign Affairs.

1538. A letter from the Assistant Secretary, Legislative Affairs, Department of Energy,
transmitting a certification, pursuant to Sec. 36(c) of the Arms Export Control Act, Transmittal No.: DDTC 15-096; to the Committee on Foreign Affairs.

1539. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting a certification, pursuant to Sec. 36(c) of the Arms Export Control Act, Transmittal No.: DDTC 15-020; to the Committee on Foreign Affairs.

1540. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting a certification, pursuant to Sec. 36(c) of the Arms Export Control Act, Transmittal No.: DDTC 14-114; to the Committee on Foreign Affairs.

1541. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting a certification, pursuant to Sec. 36(c) of the Arms Export Control Act, Transmittal No.: DDTC 14-114; to the Committee on Foreign Affairs.

1542. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting a certification, pursuant to Sec. 36(c) of the Arms Export Control Act, Transmittal No.: DDTC 15-063; to the Committee on Foreign Affairs.

1543. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting a certification, pursuant to Sec. 36(c) of the Arms Export Control Act, Transmittal No.: DDTC 15-007; to the Committee on Foreign Affairs.

1545. A letter from the Assistant General Counsel, General Law, Ethics, and Regulation, Department of the Treasury, transmitting two reports pursuant to the Federal Vacancies Reform Act of 1998, Pub. L. 105-257; to the Committee on Oversight and Government Reform.

1546. A letter from the Federal Liaison Officer, Patent and Trademark Office, Department of Commerce, transmitting the Department’s final rule — Amendments to the Rules of Practice for Trials Before the Patent and Trademark Office (IPR Post-PTO-P-2015-0032) (RIN: 0561-AD00) received May 19, 2015, pursuant to 5 U.S.C. 801(a)(1); to the Committee on the Judiciary.

1547. A letter from the Administrator, Federal Aviation Administration, Department of Transportation, transmitting a report on Assistance Provided to Foreign Aviation Authorities for FY 2014, pursuant to 49 U.S.C. 40113(e)(4) and the FAA Modernization and Reform Act of 2012, Pub. L. 112-95; to the Committee on Transportation and Infrastructure.

1548. A letter from the Administrator, Federal Aviation Administration, Department of Transportation, transmitting a report on Assistance Provided to Foreign Aviation Authorities for FY 2013, pursuant to 49 U.S.C. 40113(e)(4) of the FAA Modernization and Reform Act of 2012, Pub. L. 112-95; to the Committee on Transportation and Infrastructure.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions of the following titles were introduced and severally referred, as follows:

By Mr. BRUGESS (for himself, Mr. LIEU, Mr. DUNCAN, Mrs. BLACKBURN, and Ms. LINDA T. SÁNCHEZ of California):

H.R. 2461. A bill to amend title XVIII of the Social Security Act to improve access to, and utilization of, bone mass measurement benefits under part B of the Medicare program, pursuant to the Budget Act of 2011, amount under such part for bone mass measurement; to the Committee on Energy and Commerce, and in addition to the Committee on Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. DeFAZIO (for himself and Ms. SLAUGHTER):

H.R. 2462. A bill to restore the application of the 2.5% excise tax to health insurance to protect competition and consumers; to the Committee on the Judiciary.

By Mr. BERIA (for himself and Mr. ROE of Tennessee):

H.R. 2463. A bill to authorize the Attorney General to provide grants for drug disposal sites; to the Committee on Energy and Commerce, and in addition to the Committee on the Judiciary, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. BENISHEK (for himself and Ms. SINEMA):

H.R. 2464. A bill to amend title 38, United States Code, to improve the accountability of the Secretary of Veterans Affairs to the Inspector General of the Department of Veterans Affairs; to the Committee on Veterans’ Affairs.

By Mr. JOLLY (for himself and Mr. LEIBRECHT):

H.R. 2465. A bill to amend title 38, United States Code, to make certain improvements to the Montgomery GI Bill payable under the Post-9/11 Educational Assistance Program of the Department of Veterans Affairs; to the Committee on Veterans’ Affairs.

By Mr. ROONEY of Florida:

H.R. 2466. A bill to require the President to submit a plan for resolving all outstanding claims relating to property confiscated by the Government of Cuba before taking action to ease restrictions on travel to or trade with Cuba, and for other purposes; to the Committee on Appropriations.

By Mr. PEARCE (for himself, Mrs. LUMMIS, Mr. LAMBORN, Mr. GOSAR, Mr. HUDSON, Mr. SCHWERTER, Mr. LAMAR, Mr. BACHRACH, Mr. WENSTRUP, Mr. POSEY, Mr. BROOKS of Alabama, Mr. FLEMING, and Mr. STEWART):

H.R. 2467. A bill to clarify that the Secretary of Homeland Security may undertake law enforcement and border security activities within the Organ Mountains-Desert Peaks National Monument, and for other purposes; to the Committee on Natural Resources.

By Mr. RUSH:

H.R. 2468. A bill to improve minority inclusion in clinical trials; to the Committee on Energy and Commerce.

By Mr. BLUMENTAURER (for himself, Ms. BONAMICI, and Mr. DeFAZIO):

H.R. 2469. A bill to amend the Federal Water Pollution Control Act to establish within the Environmental Protection Agency a Columbia River Basin Restoration Program; to the Committee on Transportation and Infrastructure, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. JACKSON LEE (for herself, Mr. RUSH, Mr. SCOTT of Virginia, Mr. JOHNSON of Georgia, Mr. NADLER, Mr. COHEN, Ms. LOFgren, Mr. LEWIS, Mr. RANGEL, Mr. DANNY K. DAVIS of Illinois, Mr. CLAY, Mr. CUMMINGS, and Mr. BASS):

H.R. 2470. A bill to require non-Federal prisons and detention facilities holding Federal prisoners under a contract with the Federal Government to make available to the public the same information pertaining to facility operations and to prisoners held in such facilities that Federal prisons and detention facilities are required to make available to the Committee on the Judiciary.

By Mr. BRADY of Texas:

H.R. 2471. A bill to cap nonprofit Federal Spending as a percent of GDP right-size the government, grow the economy, and balance the budget; to the Committee on the Budget, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. CLAY (for himself and Mr. GRAVES of Missouri):

H.R. 2472. A bill to amend the Public Health Service Act to establish a National Organ and Tissue Donor Registry Resource Center, to authorize grants for State organ and tissue donor registries, and for other purposes; to the Committee on Energy and Commerce.

By Mr. CLAY (for himself and Mr. NEUGEBAUER):

H.R. 2473. A bill to include credit unions as community financial institutions under the Federal Home Loan Bank Act; to the Committee on Financial Services.

By Ms. DIAZ BAXTER of herself, Mr. WELCH, Mr. COURTNEY, Ms. MAXINE WATERS of California, Mr. ELLISON, Mr. MCGOVERN, Ms. NORTON, Ms. SCHAKOWSKY, Ms. SLAUGHTER, and Mr. HASTINGS):

H.R. 2474. A bill to require the Commodity Futures Trading Commission to impose fees and assessments to recover the cost of appropriations to the Commission; to the Committee on Agriculture.

By Mr. FINCHER (for himself and Mr. HICKS of Tennessee):

H.R. 2475. A bill to provide for a one-year extension of the extended period of protections for members of uniformed services relating to mortgages, eminent domain, rent, and eviction under the Servicemembers Civil Relief Act; to the Committee on Veterans’ Affairs.

By Mr. BECK of Nevada:

H.R. 2476. A bill to amend title XVIII of the Social Security Act to facilitate the transition to Medicare for individuals enrolled in group health plans, to establish a 3-month open enrollment period under Medicare Advantage, and for other purposes; to the Committee on Ways and Means, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. ISSA (for himself, Mr. McHINERY, Mr. HULTEN, Mr. BLIJM, Mr. SCHWERTER, Mr. ABRAHAM, Mr. POLES, Mr. QUIGLEY, Mrs. CAROLYN B. MALONEY of New York, Mr. ELLISON, Mr. DELANEY, and Mr. ROYCE):

H.R. 2477. A bill to amend securities, commodity, and banking laws to make the information reported to financial regulatory agencies electronically searchable, and for other purposes; to the Committee on Financial Services, and in addition to the Committee on Agriculture, for a period to be subsequently determined by the Speaker, in
each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. SAM JOHNSON of Texas:
H. R. 2477. To amend the Internal Revenue Code of 1986 to require that IRS applicants submit their application in person at taxpayer assistance centers, and for other purposes; to the Committee on Ways and Means.

By Mr. LONG:
H. R. 2479. A bill to amend the Federal Food, Drug, and Cosmetic Act to provide for the issuance of up-to-date regulations and guidance applying to the dissemination by means of the Internet of information about medications, to the Committee on Energy and Commerce.

By Mr. BEN RAY LUJÁN of New Mexico (for himself, Mr. MICHELLE LUCIAN GRIEM of New Mexico, and Mr. PEARCE):
H. R. 2480. A bill to increase research, education, and treatment for cerebral cavernous malformations; to the Committee on Energy and Commerce.

By Mr. MEEHAN (for himself and Mr. CALDERON):
H. R. 2481. A bill to amend the Internal Revenue Code of 1986 to make certain contract research eligible for the research credit; to the Committee on Ways and Means.

By Mr. PAULSEN:
H. R. 2482. A bill to amend the Low-Income Housing Preservation and Resident Homeownership Act of 1990; to the Committee on Financial Services.

By Mr. PAULSEN:
H. R. 2483. A bill to amend the Internal Revenue Code of 1986 to provide standards for determining employment status, and for other purposes; to the Committee on Ways and Means.

By Mr. ROHRBACHER (for himself, Mr. CONAWAY, Mr. GOHMER, Mr. JONES, Mr. DESJARDINS, Mr. ZINKE, Mr. SAM JOHNSON of Texas, Mr. CARTER of Georgia, Mr. KING of Iowa, Mr. GORAS, and Mr. OLSON):
H. R. 2484. A bill to amend the Immigration and Nationality Act to provide that certain aliens who are pregnant are ineligible to receive visas and ineligible to be admitted to the United States, and for other purposes; to the Committee on the Judiciary.

By Mr. TOWRS (for herself, Mrs. BUSTOS, and Mrs. NAPOLITANO):
H. R. 2485. A bill to establish in the Department of the Treasury an infrastructure accelerator program to facilitate investments in and financing of certain infrastructure projects, and for other purposes; to the Committee on Transportation and Infrastructure.

By Mr. WELCH (for himself and Mr. GUTIERREZ):
H. R. 2486. A bill to amend the Internal Revenue Code of 1986 to disallow deductions for the payment of compensatory and punitive damages to a government, and for other purposes; to the Committee on Ways and Means.

By Mr. BRAT:
H. J. Res. 55. A joint resolution proposing a constitutional amendment for the establishment and funding of the United States Space Force; to the Committee on the Judiciary.

By Mr. POE of Texas:
H. Con. Res. 48. Concurrent resolution authorizing the use of Emancipation Hall in the Capitol Visitor Center for a ceremony to commemorate the 50th anniversary of the Vietnam War; to the Committee on House Administration.

By Mr. GRAYSON (for himself, Mr. ISRAEL, Mr. RUSH, and Mr. LIPINSKI):
H. Res. 279. A resolution urging respect for freedom of expression and human rights in Turkey; to the Committee on Foreign Affairs.

MEMORIALS
Under clause 3 of rule XII, memorials were presented and referred as follows:

28. The SPEAKER presented a memorial of the Legislature of the State of Washington, relative to Senate Joint Memorial No. 8008, asking the Congress to support the Conventional Arms Sales to the Government of Canada; to the Committee on Armed Services.

29. Also, a memorial of the House of Representatives of the State of Michigan, relative to Senate Resolution No. 29, memorializing the Congress to require the Department of Defense to ensure that replacement aircraft are assigned to Selfridge Air National Guard Base to compensate for the proposed elimination of the A-10 fleet; to the Committee on Armed Services.

30. Also, a memorial of the Legislature of the State of Florida, relative to Senate Memorial 866, expressing profound disagreement with the decision of the President of the United States to restore full diplomatic relations with Cuba; to the Committee on Foreign Affairs.

31. Also, a memorial of the Legislature of the State of Wyoming, relative to Senate Joint Resolution No. 3, requesting the Congress to amend the United States Constitution to permit the States to enter into agreements with the Federal Government to manage common resources or federal lands or water; to the Committee on Natural Resources.

32. Also, a memorial of the House of Representatives of the State of Maine, relative to Joint Resolution 62, requesting the President and the Congress to direct the U.S. Fish and Wildlife Service and the National Marine Fisheries Service to expand hatchery operations to rivers upriver from the State and with the many non-government organizations that are focused on restoring Atlantic salmon to their historic natal rivers; to the Committee on Natural Resources.

33. Also, a memorial of the Legislature of the State of Wyoming, relative to House Joint Resolution 5, requesting Congress to amend the United States Constitution to authorize congressional votes to approve or disapprove proposed federal regulations; to the Committee on the Judiciary.

34. Also, a memorial of the Legislature of the State of Washington, relative to Senate Joint Memorial No. 8013, requesting Congress to direct the Office of Management and Budget to provide the necessary resources to implement the requirements of the Water Resources Reform and Development Act of 2014; to the Committee on Transportation and Infrastructure.

35. Also, a memorial of the Legislature of the State of Wyoming, relative to House Joint Resolution No. 2, urging Congress to direct the U.S. Army Corps of Engineers to lift the freeze on longer commercial vessels; to the Committee on Transportation and Infrastructure.

CONSTITUTIONAL AUTHORITY STATEMENT
Pursuant to clause 7 of rule XII of the Rules of the House of Representatives, the following statements are submitted regarding the specific powers granted to Congress in the Constitution to enact the accompanying bill or joint resolution.

By Mr. BURGESS:
H. R. 2461. Congress has the power to enact this legislation pursuant to the following:

This bill is enacted pursuant to Congress’ legislative powers under Article I, Section 8, of the Constitution. Under this provision, Congress has the authority to regulate commerce among the several states and “To lay and collect Taxes, Duties, Imposts and Excises.”

By Mr. DeFAZIO:
H. R. 2462. Congress has the power to enact this legislation pursuant to the following:

By Mr. BRAT:
H. R. 2463. Congress has the power to enact this legislation pursuant to the following:

By Mr. BENNISHK:
H. R. 2464. Congress has the power to enact this legislation pursuant to the following:

By Mr. JOLLY:
H. R. 2465. Congress has the power to enact this legislation pursuant to the following:

By Mr. ROONEY of Florida:
H. R. 2466. Congress has the power to enact this legislation pursuant to the following:

By Mr. PAUL:
H. R. 2467. Congress has the power to enact this legislation pursuant to the following:

By Mr. BLUMENAUER:
H. R. 2468. Congress has the power to enact this legislation pursuant to the following:

By Ms. JACKSON LEE:
H. R. 2470.
Congress has the power to enact this legislation pursuant to the following:
This bill is enacted pursuant to the power granted to Congress under Article I, Section 8, Clauses 1 and 18 of the United States Constitution.

By Mr. BRADY of Texas:
H.R. 2473.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8 of the U.S. Constitution.

By Mr. CLAY:
H.R. 2473.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8.

By Mr. CLAY:
H.R. 2473.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8 of the United States Constitution.

By Mr. PAULSEN:
H.R. 2473.
Congress has the power to enact this legislation pursuant to the following:

Clause 1 of Section 8 of Article I of the United States Constitution.

By Mr. ROHRABACHER:
H.R. 2484.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 4 of the Constitution of the United States

By Mrs. TORRES:
H.R. 2485.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8.

By Mr. WELCH:
H.R. 2486.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 18: The Congress shall have Power To . . . make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers, and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof.

By Mr. BRAT:
H.J. Res. 55.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8.

By Mr. HECK of Nevada:
H.R. 2476.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section VIII: "The Congress shall have Power to regulate Commerce with foreign Nations, and among the several States, and with the Indian tribes.

By Mr. SAM JOHNSON of Texas:
H.R. 2478.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 3.

By Mr. ISSA:
H.R. 2477.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8 Clause 3

The Congress shall have power to regulate commerce with foreign nations, and among the several states, and with the Indian tribes.

By Mr. BEN RAY LUIJAN of New Mexico:
H.R. 2480.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 18 of the Constitution, which states "To make all Laws which shall be necessary and proper in the carrying into Execution the foregoing Powers, and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof".

By Mr. BEN RAY LUJÁN of New Mexico:
H.R. 2481.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section VIII.

By Mr. MEENAHAN:
H.R. 2481.
Congress has the power to enact this legislation pursuant to the following:

Article I Section 8 of the United States Constitution.

By Mr. PAULSEN:
H.R. 2482.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8 of the United States Constitution.

By Mr. PAULSEN:
H.R. 2483.
Congress has the power to enact this legislation pursuant to the following:

Clause 1 of Section 8 of Article I of the United States Constitution.

By Mr. ROHRABACHER:
H.R. 2484.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 4 of the Constitution of the United States

By Mrs. TORRES:
H.R. 2485.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8.

By Mr. WELCH:
H.R. 2486.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 18: The Congress shall have Power To . . . make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers, and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof.

By Mr. BRAT:
H.J. Res. 55.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8.

By Mr. HECK of Nevada:
H.R. 2476.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section VIII: "The Congress shall have Power to regulate Commerce with foreign Nations, and among the several States, and with the Indian tribes.

By Mr. SAM JOHNSON of Texas:
H.R. 2478.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 3.

By Mr. ISSA:
H.R. 2477.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8 Clause 3

The Congress shall have power to regulate commerce with foreign nations, and among the several states, and with the Indian tribes.

By Mr. BEN RAY LUIJAN of New Mexico:
H.R. 2480.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 18 of the Constitution, which states "To make all Laws which shall be necessary and proper in the carrying into Execution the foregoing Powers, and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof".

By Mr. BEN RAY LUJÁN of New Mexico:
H.R. 2481.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section VIII.

By Mr. BEN RAY LUJÁN of New Mexico:
H.R. 2481.
Congress has the power to enact this legislation pursuant to the following:

Article I, Section VIII.

By Mr. MEENAHAN:
H.R. 2481.
The Senate met at 9:30 a.m. and was called to order by the Honorable RAND PAUL, a Senator from the Commonwealth of Kentucky.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

O Lord, our rock, hear our praise today, for Your faithfulness endures to all generations. You hear our prayers and surround us with Your mercy. You are our strength and our shield. Listen to the melody of our gratitude, for You are the center of our joy.

Lord, thank You for illuminating our paths with Your precepts, dispelling the darkness of doubt and fear. Today, guide our lawmakers. Be their shepherd in these dangerous times. Give them eyes to see that You have not left Yourself without a witness in every living thing. Help them, Lord, to walk with reverence and sensitivity through all the days of their lives.

We pray in Your Holy Name. Amen.

PLEDGE OF ALLEGIANCE

The Presiding Officer led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. HATCH).

The legislative clerk read the following letter:

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable RAND PAUL, a Senator from the Commonwealth of Kentucky, to perform the duties of the Chair.

PRINCE G. HATCH, President pro tempore.

Mr. PAUL thereupon assumed the Chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

JUSTICE FOR VICTIMS OF TRAFFICKING ACT

Mr. MCCONNELL. Mr. President, yesterday’s House passage of the Justice for Victims of Trafficking Act represents a vital ray of hope for the countless victims of modern slavery who need our help. Victims groups and advocates tell us that this human rights legislation would provide unprecedented support to domestic victims of trafficking. They urged Congress to pass it.

We can now say that we have passed it. We can now say that hope is on the way for the victims who suffer in the shadows. Unfortunately, the victims of modern-day slavery had to wait entirely too long for help.

Last Congress, the House of Representatives did its job by passing several pieces of legislation, but the Senate failed to bring any trafficking legislation to the floor.

As a new majority, Senate Republicans were determined to make this matter a priority. Senator GRASSLEY promptly reported legislation out of the Judiciary Committee, and we quickly put it on the Senate floor.

As we all know by now, there was an unforeseen—to put it mildly—impediment to getting this bill done. But we were determined to see this legislation through to successful completion. Success was possible because the new majority kept its focus on facts, substance, and good policy for the people who remained our focus throughout the debate, and that is the victims of modern slavery.

I could not be more grateful to Senator CORNYN for his outstanding work on this issue. I thank the House for passing such an important human rights bill yesterday. Now I urge the President to sign this legislation from the new Congress as quickly as possible. The victims of such terrible abuse have had to wait entirely too long for Washington’s help. Let’s not make them wait a moment longer.

TRADE

Mr. McCONNELL. Mr. President, yesterday Senator WARNER, a Democrat, and Senator ERNST, a Republican, joined me in hosting a press conference with small business owners on the benefits of trade for entrepreneurs. I want to thank them both for coming. I thank Senator WARNER, in particular, for helping to lead his party on this issue.

We were joined by small business owners with some pretty incredible stories. These Americans highlighted opportunities that knocking down unfair overseas barriers to American products can provide to us here at home.

My favorite, obviously, was Chase Robbins, a constituent of mine from Shelbyville. After Chase was medically discharged from the Army, he was able to scrape together $1,600 with a buddy and start the kind of business he had already dreamed of as early as 2010. It is a business that specializes in just the kind of thing you would expect a young guy such as Chase to be into—high-performance auto parts. And, thanks to trade, it is now both a business that exports a percentage of its products and one that also employs fellow Kentuckians.

His is a small business with just three employees for now—just three for

This “bullet” symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
now—but it is a small business that is allowing him to live his dreams and to help others live theirs, too. It is a story countless other Americans know all too well and one we should do everything to encourage. Yet, while Chase has achieved success thanks to trade, he knows that until a lot more find what he is doing if the aim is to help businesses grow, help his employees earn more, and help other Kentuckians live their dreams too.

Here is what Chase said yesterday: As everyone knows, internationally, we have been confronted with barriers that compromise global markets. It was not long after sending our first shipment overseas that we realized trade rules were outdated for our business. Most of the agreements and rules were written before small businesses like ours were able to fully utilize the Internet to allow the global market. Trade agreements offer the best chance to lower barriers and increase market access for small companies like mine. We see a bright future for companies like ours in the export market but we need new trade deals to get there.

And this, Mr. President, is a business with three employees that is exporting products.

So it was Chase’s solution: “Trade Promotion Authority is the first step towards modernizing trade agreements,” he said, “and I encourage Congress to pass TPA as soon as possible.”

Entrepreneurs such as Chase know that trade matters to them, but it matters to many trade barriers, but other countries do. They know that many of these barriers are extremely unfair to American workers and American products. They know that passing trade promotion authority is the way to address such an unfair situation.

Our friends on the far left may try to cynically spin their war against the future of something other than what it truly is, but we all know better. It is no wonder President Obama has called them “wrong” and suggested that they make stuff up. What happens if the far left actually succeeds in its apparent quest to retain foreign tariffs that unfairly impact American workers and their paychecks? How is that good for us?

It would mean lost opportunities for American risk takers such as Chase and the employees who entrepreneurs such as him care about. It would mean lost opportunities for American manufacturers, lost opportunities for Kentucky farmers, and lost opportunities for more jobs, better wages, and a growing economy that can lift everyone up.

Jobs and a better economy are the kinds of things I am going to have to fight for. I think the legislation before us represents a great opportunity to do so. President Obama agrees, as well. So I am going to keep working to get votes on amendments—both Republican and Democrat amendments.

There are objections from the other side of the aisle. I would remind our colleagues that even with my strong support, the Senate cannot have a robust amendment process if every single amendment offered by Democrats or Republicans is objected to by our friends on the other side.

Our bill managers, Senator HATCH and Senator Wyden, are working hard. We hope to get past these objections so that we can find a consensus that can be considered. But we will need cooperation. The Senate cannot vote on amendments that are being prevented.

We hope to see more of that cooperation so we can pass good, fair, and enforceable amendments that will benefit our country and so many of the people we represent.

Let’s take a quick look at what the Republican leadership has achieved this year. The Keystone Pipeline legislation that is a bill that was nothing more than a favor for billionaires and special interests. It would allow foreign oil to be imported into the United States to be shipped to foreign countries. It has spent almost another month on the shutdown of the Department of Homeland Security—the shutdown of the Department of Homeland Security—during a time when ISIS is raging and all the other problems around the world, and they—the Republicans—want to shut down the Department of Homeland Security as it relates to Homeland Security.

We spent 3 weeks on a senseless delay over funding for victims of human trafficking, over an abortion issue that had nothing to do with human trafficking. I would respond to my friend, the majority leader, we would have passed this last Congress, except that they objected to it—short memory, I think.

Now, here we are spending the last week considering trade legislation that has done nothing—not a single thing—to help working middle-class Americans. In fact, it causes huge job losses. As Einstein said, if you keep doing the same thing over and over again and you expect a different result, that is the definition of insanity.

We can look at these trade bills over the years. Every one of them, without exception, causes job losses to American workers, millions of job losses. Yet they are going to try the same thing again and hope for a different result. That is the definition of insanity.

If the Senate is not actively advocating for the well-being of middle-class Americans, we are wasting our time. When the Republicans took over the Senate, the majority leader promised to make the needs of Americans a priority. Here is what he said last November: “Under a new majority, our focus would be on passing legislation that improves the economy, that makes it easier for American workers to find jobs, and that helps restore Americans’ confidence in their country and their government.”

Why then have we not moved toward legislation that makes it easier for American workers to find jobs, that helps us restore Americans’ confidence in their government? A few months after November—actually the beginning of this year—the majority leader reiterated a call for commonsense legislation that puts the middle class first. He said: “Let’s pass legislation that focuses on jobs and the real concerns of the middle class.”

But, again, what have the Senate Republicans done? They have stopped any effort made to help the middle class, whether it is minimum wage, equal pay for men and women, student debt, and on and on with things that would help the middle class. They have been ignored. We should be focusing on making it easier for American workers to find jobs, addressing the needs of the middle class and restoring America’s faith in our government.

It is not enough for the majority leader to promise to make of this month, Republicans will have the Senate to pass TPA as soon as possible.” He said, “and I encourage Congress to pass TPA as soon as possible.”

ISSUES FACING THE MIDDLE CLASS

Mr. REID. Mr. President, at the end of this month, Republicans will have been in charge of the Senate for almost half a year. How have they done to address issues facing the middle class?

Let’s take a quick look at what the Republican leadership has achieved this year. The Keystone Pipeline legislation that was a bill that was nothing more than a favor for billionaires and special interests. It would allow foreign oil to be imported into the United States to be shipped to foreign countries. It has spent almost another month on the shutdown of the Department of Homeland Security—the shutdown of the Department of Homeland Security—during a time when ISIS is raging and all the other problems around the world, and they—the Republicans—want to shut down the Department of Homeland Security as it relates to Homeland Security.

We spent 3 weeks on a senseless delay over funding for victims of human trafficking, over an abortion issue that had nothing to do with human trafficking. I would respond to my friend, the majority leader, we would have passed this last Congress, except that they objected to it—short memory, I think.

Now, here we are spending the last week considering trade legislation that has done nothing—not a single thing—to help working middle-class Americans. In fact, it causes huge job losses. As Einstein said, if you keep doing the same thing over and over again and you expect a different result, that is the definition of insanity.

We can look at these trade bills over the years. Every one of them, without exception, causes job losses to American workers, millions of job losses. Yet they are going to try the same thing again and hope for a different result. That is the definition of insanity.

If the Senate is not actively advocating for the well-being of middle-class Americans, we are wasting our time. When the Republicans took over the Senate, the majority leader promised to make the needs of Americans a priority. Here is what he said last November: “Under a new majority, our focus would be on passing legislation that improves the economy, that makes it easier for American workers to find jobs, and that helps restore Americans’ confidence in their country and their government.”

Why then have we not moved toward legislation that makes it easier for American workers to find jobs, that helps us restore Americans’ confidence in their government? A few months after November—actually the beginning of this year—the majority leader reiterated a call for commonsense legislation that puts the middle class first. He said: “Let’s pass legislation that focuses on jobs and the real concerns of the middle class.”

But, again, what have the Senate Republicans done? They have stopped any effort made to help the middle class, whether it is minimum wage, equal pay for men and women, student debt, and on and on with things that would help the middle class. They have been ignored. We should be focusing on making it easier for American workers to find jobs, addressing the needs of the middle class and restoring America’s faith in our government.

It is not enough for the majority leader to promise to make
they are going to lose jobs. Even though a majority of the Senators don't support this trade legislation, we have tried hard to improve it, and this trade adjustment assistance is one way we can try to improve it.

What was the Republican's first amendment to the trade bill? It was an amendment to strike a program known as trade adjustment assistance, which I just talked about, from the bill. This program helps those who lose their jobs because of trade. And they will lose their jobs.

As we talk about opening foreign markets to American products, surely we should do something so that American companies have the tools to compete internationally.

The Export-Import Bank is weeks away from expiring. If it expires, financing for billions of dollars of U.S. exports will disappear and thousands of American jobs will be in jeopardy. How much will it cost? Nothing. Zero. It is indispensable.

The Export-Import Bank is the last line of defense for American companies in the global competition.

We are losing internationally. We are losing trade. I don't think anyone can call the Boeing Company a leftwing liberal group, as the Republican leader.

The Republican leader refers to people who are complaining about what is going on here. Boeing thinks something should be done with the Export-Import Bank. Why? Because they can compete with Airbus and all of these other companies that build airplanes. If you don't have the Bank, they cannot compete.

Mr. President, I could pick any State of the 50—I was given here this morning the State of Virginia because the State of Virginia was mentioned in some of the remarks by the Republican leader. I have proof after page—millions and millions of dollars that benefit businesses in Virginia. That is the same all over the country—in Nevada, Kentucky, everywhere.

We have talked about trade that won't work. Let's talk about the Export-Import Bank, which does work. I so admire and appreciate the persistency and advocacy of the Senator from Washington, Ms. CANTWELL. But for her, this issue would be gone with all the other stuff that goes into the trash can because of the Republicans.

The Republican leader has said over and over again that he is opposed to the Bank. But it will kill all of the American people certainly support it and American businesses support it. Last year, this vital program sustained 165,000 jobs at no cost to the taxpayers. If we don't reauthorize this program, American businesses will be at a competitive disadvantage.

While the majority leader talks about restoring faith in government, he is standing in the way of forming the National Security Agency's illegal spying program. I did not make up the words "illegal spying program"; the Second Circuit Court said it. It is an illegal program.

These are just a few areas where renewed focus would create jobs and produce positive outcomes for middle-class Americans. The Republican leader should revisit his vision, which up to this point has only been words. There has been no action. This direction this Congress has taken so far has only focused on the desires of a few at the expense of many.

Mr. President, I ask unanimous consent that the numbers I referred to from the State of Virginia be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

**VIRGINIA COMPANIES FINANCED BY EX-IM BANK FY07–FY15**

*Source: Public Information, Ex-Im Bank Web Site*
Mr. REID. Will the Chair be kind enough to tell us what the business is today in the Senate?

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

ENSURING TAX EXEMPT ORGANIZATIONS THE RIGHT TO APPEAL ACT

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will resume consideration of H.R. 1314, which the clock will report.

The legislative clerk reads as follows:

A bill (H.R. 1314) to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determination of tax-exempt status of certain organizations.

Pending:

Hatch amendment No. 1221, in the nature of a substitute.

Hatch (for Flake) amendment No. 1243 (to amendment No. 1221), to strike the extension of the trade adjustment program.

Hatch (for Inhofe/Coons) modified amendment No. 1312 (to amendment No. 1221), to amend the African Growth and Opportunity Act to require the development of a plan for each sub-Saharan African country for negotiating and entering into free trade agreements.

Hatch (for McCain) amendment No. 1226 (to amendment No. 1221), to repeal a duplicative inspection and grading program.

Stabenow (for Portman) amendment No. 1299 (to amendment No. 1221), to make it a principal negotiating objective of the United States to address currency manipulation in trade agreements.

Brown amendment No. 1251 (to amendment No. 1221), to require all bilateral business agreements to include a provision that states the intent of the parties to address currency manipulation in trade agreements.

Hatch (for Shaheen) amendment No. 1227 (to amendment No. 1221), to make trade agreements work for American farmers.

Wyden (for Warren) amendment No. 1227 (to amendment No. 1221), to prohibit the application of the trade authorities procedures to an implementation of agreements with respect to a trade agreement that includes investor-state dispute settlement.

Hatch modified amendment No. 1411 (to the language proposed to be stricken by amendment No. 1463), containing perform the TPA.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, I want to take some time today to talk about proposals to include a currency manipulation negotiation objective in trade negotiations and the impact this issue is having on the debate over renewing trade promotion authority, or TPA.

Currency manipulation has, for many, become the primary issue in the TPA debate. It has certainly gotten the focus of the media and other outside observers. Indeed, I suspect that everyone who has an interest in the outcome of the TPA debate—both for and against—is watching closely to see how the Senate will address this particular matter.

Let me begin by saying that I recognize the frustrations many have regarding exchange rate policies of some of our trading partners, and we have committed to working with my colleagues to arrive at ways to improve currency surveillance and mechanisms
for responding to problems. However, I want to be as plain as I can on this issue. While currency manipulation is an important issue, it is inappropriate and counterproductive to try to solve this problem solely through free-trade agreements.

Nonetheless, I do not believe we should ignore currency manipulation, which is why, for the very first time, our TPA bill would elevate currency practices to a principal negotiation objective. If the proponents of an open and flexible currency system want to see more prescriptive language which would limit the range of tools available and require that trade sanctions be used to keep monetary policies in line, most notably, we have the Portman-Stabenow amendment, which would create a negotiating objective requiring enforceable currency standards among parties to a trade agreement. The administration goes on to say that these standards must be subject to the same dispute settlement procedures and remedies as all other elements of the trade agreement. While this approach may sound reasonable on the surface, there are a number of very serious and complex policy issues to consider. I will address those specific concerns in some detail in just a few minutes, but first I think we need to step back and take a look at the big picture.

I think I can boil this very complicated issue down to a single point. The Portman-Stabenow amendment will kill TPA. I am not just saying that; it is at this point a verifiable fact.

Yesterday, I received a letter from Treasury Secretary Lew outlining the Obama administration’s opposition to this amendment. The letter addresses a number of issues, some of which I will discuss later, but most importantly, at the end of the letter, Secretary Lew stated that he would recommend that the President veto a TPA bill that included this amendment. That is pretty clear. It doesn’t leave much room for interpretation or speculation. No TPA bill that contains the language of the Portman-Stabenow amendment stands a chance of becoming law.

I want to be clear. I have great respect for the authors of this amendment. They are my friends, and I believe they are well-intentioned. They have spent a lot of time making their case on their amendment, and I respect their points of view. But at this point, it is difficult—very difficult, in fact—for anyone in this Chamber to claim they support TPA and still vote in favor of the Portman-Stabenow amendment. The two, as of yesterday, have officially become mutually exclusive.

For me, this issue is pretty cut and dry. Here’s the idea that perhaps not everyone will view these developments the same way I do. But regardless of what anyone may think of Secretary Lew’s letter, the Portman-Stabenow amendment raises enough substantive policy concerns to warrant opposition on its own.

Offhand, I can think of four separate consequences we would run into if the Senate were to adopt this amendment, and all of them would have a negative impact on U.S. economic interests.

First, the Portman-Stabenow negotiating objective would put the Trans-Pacific Partnership—or TTP—Agreement at grave risk, meaning that our trade partners, including the United States, has ever shown the willingness to have their monetary policies subject to potential trade sanctions. Adopting this amendment will have, at best, an immediate chilling effect on the TTP negotiations, and at worst, it will stop them in their tracks. If you don’t believe me, then take a look at the United States, has ever shown the willingness to have their monetary policies subject to potential trade sanctions.

Second, the Portman-Stabenow amendment would put at risk the Federal Reserve’s independence in its ability to formulate and execute monetary policies designed to stabilize the U.S. economy. While some in this Chamber have made decries that our domestic monetary policies do not constitute currency manipulation, we know that not all of our trading partners see it that way.

Basing trade sanctions on existing international commentaries by foreign finance ministers and central bankers that our own Fed—Federal Reserve, that is—has manipulated the value of the dollar to gain trade advantage. If the Portman-Stabenow amendment is adopted into TTP, it will very likely kill TTP—or the Trans-Pacific Partnership—as well.

Nonetheless, I do not believe we would see much comfort. After all, the U.S. dollar is the global currency—that is, currently the global currency. If we fail to pass this bill—we have already started having the yuan become the global currency. I will say again that the U.S. dollar is a global currency. In fact, it is the primary reserve currency in the world, and its value has an impact on markets everywhere. So for the United States, the question as to what is a domestic monetary policy and what is not is open to a lot of debate, and I don’t think any of us want those debates being resolved in some international trade tribunal, which is what is going to happen in TTP and these rules be
be unreliable is fraught with risks—risks we should not undertake.

For example, IMF models recently showed that in 2013, Japan’s currency was anywhere between around 15 percent undervalued and 15 percent overvalued. In that range, which is an international trade tribunal to do if asked to set trade sanctions based on allegations of currency manipulation? Who in the heck knows. But if we insert these standards into our trade agreements, we would not only subject our trading partners to possible trade sanctions based on indefinite standards, the United States would face similar risks. This is a recipe for trade and currency wars—a situation I think we would all like to avoid.

Third, under this amendment—that is, the Portman-Stabenow amendment—the traditional role of the U.S. Treasury in setting exchange rate policies would be watered down and potentially overruled in international trade negotiations. Do we want that? Thus, adoption of the Portman-Stabenow amendment would give our country more tools to address these issues in a far more productive way.

Fourth, the Portman-Stabenow amendment would create incentives for our trading partners to evade regular reporting and transparency of exchange rate policies. If currency standards became enforceable and readily subject to sanctions under a trade agreement, the parties on that agreement would almost certainly start withholding full participation in reporting and monitoring mechanisms that would otherwise enable us to identify exchange rate interventions and work against them.

Put simply, we cannot enforce rules against unfair exchange rate practices. If we do not have information about the rules, we cannot enforce the rules. Under the Portman-Stabenow amendment, our trading partners are far more likely to engage in interventions in the shadows, hiding from detection out of fear that they could end up being subjected to trade sanctions. I don’t think anybody wants that, but that is what is going to happen.

For these reasons and others, the Portman-Stabenow amendment is the wrong approach. Still, I do recognize that currency manipulation is a legitimate concern and one we need to address in a serious, thoughtful way.

Toward that end, Senator Wyden and I have filed an amendment that would expand on the currency negotiating objective that is already in the TPA bill to give our country more tools to address currency manipulation without the problems and risks that would come part and parcel with the Portman-Stabenow amendment.

The Portman-Stabenow amendment would provide a single tool to address currency manipulation: enforceable rules subject to sanctions. As I think I have demonstrated, this, for a variety of reasons, is a pretty blunt, unreliable, and imprecise instrument, given the realities of the global economy.

By contrast, the Hatch-Wyden amendment would put a number of tools at our disposal. Specifically, the amendment calls for enhanced transparency, disclosure, reporting, monitoring, cooperative mechanisms, as well as enforceable rules. Our amendment, which would provide maximum flexibility, is a better alternative for addressing currency manipulation for a number of reasons.

First, it would preserve the integrity of our current trade negotiations. Once again, if we insert an absolute requirement for enforceable currency rules and required sanctions into the ongoing TPP negotiations, many, if not all, of our negotiating partners will almost certainly walk away. The Hatch-Wyden amendment would pose no threat to the TPP negotiations or any other trade deals.

Second, our amendment would not threaten the independence of the Federal Reserve or subject our own monetary and exchange rate policies to possible sanctions based on indefinite standards. Unlike the Portman-Stabenow amendment, it does not give other countries a roadmap to accuse the United States of using its policies intended for domestic growth and stability as tools for currency manipulation.

Third, it would increase transparency and accountability of our trading partners’ currency practices. This is absolutely crucial. Put simply, we cannot counteract practices that we cannot readily observe. The Portman-Stabenow amendment would tell our trading partners that if you engage in full reporting and transparency, you run the risk of having an international tribunal detect your actions in ways that will generate trade sanctions. The incentive to be transparent and instead to put their currency policies further in the shadows, hiding away information that could end up being used in trade disputes.

Our trade agreements should provide incentives for countries to go in the opposite direction: full disclosure and accountability of currency practices. The Hatch-Wyden amendment would provide a more effective incentive structure.

Finally, and in the current context, most importantly, the Hatch-Wyden amendment would not result in a veto of the TPA bill. It is, in fact, supported by the Obama administration, not to mention business and agriculture stakeholders across the country.

I suppose one could say we have come full circle. After what I hope has been an interesting discussion of important policy considerations, we are back at the same place with the same truth: if nothing I have said here today about the complexities of currency and monetary policy has resonated with my colleagues, this fact remains: A vote for the Portman-Stabenow amendment is a vote to kill TPA.

I am sure that sounds good to some of my colleagues who are fundamentally opposed to what we are trying to do here, but for those who support free trade, open markets, and high-paying American jobs, this truth is inescapable.

But, once again, this doesn’t mean we should stand by and do nothing about currency manipulation. The Hatch-Wyden amendment will provide an effective path to improve transparency, measurement, and monitoring of our trading partners’ currency practices, and effective and transparent ways to counteract anyone seeking to manipulate currencies for unfair trade advantage.

The Hatch-Wyden amendment will allow Congress to speak forcefully on the issue of currency manipulation without putting our trade agreements and domestic policies in limbo. For Senators who are sincerely concerned about currency manipulation—and I am one of those Senators—the Hatch-Wyden amendment would address these issues in a far more productive way.

At this point, the choice should be pretty clear. We have strong indications that the House cannot pass a TPA bill with the Portman-Stabenow language. Even if it could pass the House, Secretary Lew has made it very clear that包括 that provision in our bill would compel President Obama to veto it.

The Hatch-Wyden amendment, on the other hand, would strengthen our hand by providing a workable set of tools to counteract currency manipulation in a way that would protect our interests and achieve real results and, most importantly, it would preserve our ability to enact TPA so we can negotiate strong trade agreements that will help grow our economy and create jobs.

That is the choice we face with these two amendments. I call on my colleagues who support TPA to oppose the Portman-Stabenow currency amendment and support the Hatch-Wyden alternative.

With that, I yield the floor.

The PRESIDING OFFICER (Mr. Cotton). The Senator from Oregon.

Mr. WYDEN. Mr. President, first of all, I wish for colleagues to know that I think Chairman Hatch has made some very important points with respect to the currency issue and for colleagues to know that the approach of the chairman and me is to make sure we can have tough, enforceable currency rules without doing damage to American monetary policy or the ability to fight big economic challenges in the days ahead that we think would come about with the amendment offered by the Senator from Ohio, Mr. Portman.

By the way, I want colleagues to know that currency is going to be in the Customs conference. Chairman Hatch and I have discussed this point
as well. We felt very strongly about making sure there is a Customs conference that goes right to the heart of the enforcement agenda. In that Customs conference—and the chairman and I have been able to secure a commitment from the President and from Chairman RYAN—that Customs conference is going to take place right when we get back. The President of the United States indicated last night that he wants us to get this done in June. So we are going to have a chance to tackle currency in that conference. Senator BENNET worked closely with the chairman and I so we got something in the committee that we thought was a smart, practical step. The chairman and I are talking today about something that is also strong and enforceable that would not produce the downside I have outlined.

So I want colleagues to understand there is an opportunity, particularly on the currency issue, very quickly, to put in place very tough, practical rules that get us the upside in terms of protecting the American economy without some of the downsides I have outlined and that Chairman HATCH has described as well.

What I want to do particularly this morning is, given yesterday, talk about some of the very positive developments we saw yesterday. I wish to express my appreciation to Chairman HATCH again for working closely with me on these issues.

I will start by talking about Senator MENENDEZ. Senator MENENDEZ, as do many of us, feels very strongly about human trafficking, about compelled labor, about commercial sex. He has made it very clear he wants to stop trafficking and he wants us to come up with a fresh policy. So he offered an amendment in the Finance Committee and it passed. All over the press for the next few days—and Chairman HATCH reminds us accounts: Poison pill is going to end the possibility of finding a way forward on the trade promotion act. The headlines were everywhere. The general view in the press was Western civilization was about to lose—after all, the President put out a very strong statement explicitly stating what he wanted in that conference, and he wanted it in June. He talked again about Senator BROWN’s measures, 301, in this week saying: You bet there is going to be a conference in the Senate, and we are committed to getting this done. Chairman RYAN has indicated that he is going to take each of the trade bills—all four of them—up on the same day in the other body. He is going to pass them all, and then we will have a conference. After that happened, I was very pleased, well, that was good, but we are still not going to have much. Is the administration going to be for it?

So, yesterday, in consultation with Chairman HATCH and myself and others, the President put out a very strong statement explicitly stating what he wanted in that conference, and he wanted it in June. He talked again about Senator BROWN’s measures, 301, the level playing field, and the ENFORCE Act. I was very pleased he mentioned that good law.

So a tough, strong enforcement package is going to happen. I am going to insist on it. Chairman HATCH has pledged to me he is going to insist on it. It is going to happen. All of that was essentially nailed down in the last 24 hours.

So two big issues, two very significant issues, which were both considered to be show-stoppers: The Menendez amendment, fixed. All the headlines about poison pills, no longer valid. Senator MENENDEZ has fixed it.

Chairman HATCH, to his credit, has been willing to work with me and with the President. We are going to have a
strong enforcement package and we are going to have it in June and it is going to become law as part of the Customs conference.

The Senate spent a lot of time yesterday debating an important issue, which is the Export-Import Bank. She has been the one who has pointed out: If you have trade laws, which we are trying to promote with the trade promotion act, but you aren't using the tools that you need to get the maximum value—wring the maximum value out of those new laws—you are missing opportunities that are important for our Nation. So I urge the majority leader to work closely with Senator CANTWELL to make that happen.

Finally, I have been pleased to see a robust debate on a number of issues, particularly those issues that have been important to Senator WARREN and Senator BROWN. What I have said from the very beginning and what I am going to be here all day working on is this: There are Senators who feel strongly about the trade promotion act; there are Senators who are opposed to it. I am obviously for the agreement, but every single day I am looking for opportunities for both sides to be heard and to be able to advance their ideas. It started long before we actually had votes in the Senate Finance Committee, and it is going to continue every single day that I have the opportunity to serve in the Senate.

These are important issues. I thought it was particularly important that Senator WARREN's investor-state provision be able to get a vote early on in the proceeding—obviously an issue that has been great debate on—and there are many more important amendments in the package.

So I want colleagues on both sides of the aisle to know I am going to be here throughout the day—throughout the day—looking for ways that all Senators, whether they are for the agreement or against the agreement, will have an opportunity to have their priorities considered on this trade legislation.

I will just wrap up, colleagues, by way of saying that the reason this issue is so important is we still talk continually about how to get more high-wage jobs in our country. Continually we debate that because we want higher wages for our constituents. The evidence is that trade jobs pay better than do the nontrade jobs. We need more of them.

There was a report this morning that my State has a significant trade surplus, and we are very proud of that. There are other States that don't. Let's promote legislation that allows for trade cuts, secure our exports, particularly in the developing world, where there are going to be a billion middle-class consumers in 2025. We want them to "Buy American," because when they do, it creates the opportunity for us to have more of those export value-added, high-productivity jobs that pay our workers better wages and that strengthen our middle class.

It is like going to be a busy day, and I look forward to working, again, with both sides so Senators, whether they are for the TPA or whether they are against it, feel they have a chance to raise their issues and be treated fairly. With that, I yield the floor.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. BARRASSO. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL SECURITY

Mr. BARRASSO. Mr. President, today, President Obama is heading to Connecticut, where I understand he is going to congratulate graduates at the Coast Guard Academy. He plans to talk about threats to our national security.

I think many Americans would be astonished to learn the President's national security strategy is going to center on climate change. After all, Americans understand there are much more immediate threats facing our Nation, such as the fall of Ramadi in Iraq and the brutal terrorist attacks by ISIS. These are clear examples of the real threats that must be addressed by President Obama.

I would encourage the President to spend this time today addressing America's most pressing national security threats. The President and his national security team must deliver strong leadership and an effective strategy to fight the terrorists who want to attack our country and kill more Americans. This should be the focus of the President's speech today. This should be our most pressing national security concern.

OBAMACARE

Mr. President, I would also like to talk about an important issue that is facing Americans and they will soon need to be seeing, which is that next month the Supreme Court is expected to announce a decision in the case of King v. Burwell. This is a case that has been brought on behalf of millions of Americans who have been harmed by the President's unlawful expansion of his unpopular and unaffordable health care law.

Sometime before the end of June, the Court is going to announce if the law passed by Congress means what it says or if it means what the President wishes it had said. The law, written by Democrats in Congress, written behind closed doors, only authorized insurance subsidies for one group, and the President had the IRS pay subsidies to another group.

The President gave bureaucrats much more power to control the health care choices and decisions of people who never should have been caught under the law. The Supreme Court should strike down this alarming overreach by the President. If it does, that will give Congress an opportunity to address some of the devastating problems the health care law has caused.

There is another story that came out May 7 in the Connecticut Mirror. The article says that insurance companies selling health plans through the State's health insurance exchange are seeking to raise rates next year, with an average increase somewhere between 2 and nearly 14 percent.

You take a look; it is outrageous. I know the Senator from Connecticut has come to the floor saying that we should be celebrating ObamaCare—things have gone well—and he says these rate increases are too high. They are starting to learn that it was not just a 1-year deal.

There was another story that came out about premiums going up by 14 percent or even 2 percent? Why are they going up at all? Why are the promises Democrats made about the health care law not coming true? Why are ObamaCare rates set to soar again in 2016? Why are ObamaCare rates going up by an average of $2,500 per year, per family? It has not happened. For an average family who gets coverage through their work, the premiums have gone up about $3,500 since the President took office in 2009.

Are we still seeing headlines about premiums going up by 14 percent or even 2 percent? Why are they going up at all? Why are the promises Democrats made about the health care law not coming true? Why are ObamaCare rates set to soar again in 2016? Why are people in places like Connecticut still seeing headlines about their costs going up by 14 percent?

A few weeks ago, the Democratic leader said on the floor that ObamaCare is a "smashing success." He stood right over there and said it— it is a "smashing success." Is there a Democrat who thinks that a 14-percent increase to families in Connecticut is a
smashing success or that an 18.6-per-cent average across the country is a smashing success?

We are going to see this same story about soaring insurance rates repeated all across America. And it is not just the law’s premiums and deductibles that are causing problems for families. Here is a headline from the Washington Post on Friday: “Insured, but still not able to afford care.”

“Four in five who bought health coverage, some costs remained too high.” So they have insurance, but they are still not able to get care. People who have insurance have been avoiding going to see the doctor. That is according to a new study by the liberal advocacy group called Families USA. This was an advocacy group who was a huge supporter of the President's health care law and a huge supporter of the President. Even this group has to admit that coverage does not equal care. There is a difference. The group’s executive director is quoted in this article in the Washington Post as saying, “The key culprit as to why people have been unable to afford medical care despite coverage is high deductibles.”

Well, many people’s deductibles are too high. The reason the deductibles have gotten so high and so out of hand all of a sudden is that the health care law included so many more mandates.

Democrats who voted for this said they know better than the people at home, what the provision is they need. That is what the President said. The President said: I know better than you do. I know what your family needs. You do not. That is why the deductibles are so high. Insurance had to raise their premiums to cover the cost of all these new Washington mandates. They had to raise deductibles as well. This year, the average deductible for an Obamacare Silver Plan is almost $3,000 for a single person and more than $6,000 for a family.

People have Washington-mandated coverage, but they still cannot afford to go to the doctor. They are skipping tests. They are skipping follow-up care because of the high deductibles and copays. Why are people across the country having to put off getting care? Because they cannot afford it. Is that what Democrats mean when they say the law has been a smashing success, when the minority leader comes to the floor and says it is a smashing success? All across the country, Americans are struggling with the cost of health care under this health care law.

There was a study out this morning. In the paper The Hill, Sarah Ferris writes: “Underinsured” population has doubled in the US to 31 million.

One-quarter of people with healthcare coverage are paying so much for deductibles and out-of-pocket expenses that they are considered underinsured.

Thirty-one million Americans. Rising deductibles—even under Obamacare—are the biggest problem for most people who are considered underinsured.

Doubled. The number of underinsured people under the health care law has now doubled.

People are paying more as a result of the health law. And they are going to be paying even more next year and the year after that until we are able to do something to stop it. Republicans are offering real solutions that will end these destructive side effects. They have a plan. That means giving Americans and giving States the freedom, the choice, and the control over their health care decisions once again. Republicans understand that coverage does not equal care. Republicans understand what American families were asking for before this health care law was ever passed. That is what they are still asking for today.

It is time for Democrats to admit that their health care law did not work—it did not work out the way they promised—and to start working with Republicans on reforms that will give people the care they need from a doctor they choose at lower costs.

I yield the floor to the PRESIDING OFFICER. The Senator from Oregon.

Mr. MERKLEY. Mr. President, returning to the conversation about the Trans-Pacific Partnership, to be fast-track consideration of that Trans-Pacific Partnership, we should ask ourselves this question: Is this about our geopolitical goal of being the leader in writing the rules or is it about writing rules that actually work for working Americans? Because, you see, working Americans in America have under this goal of geopolitical influence. Oh, yeah, we had NAFTA, the North American Free Trade Agreement. We had CAFTA, the Central American Free Trade Agreement. What was the result of that? Well, we lost 5 million jobs in America. We lost 5 million jobs.

We lost 50,000 factories. If you go around Oregon, you can see those factory sites. I recently visited the Blue Heron site. Just a few years ago, there were hundreds of workers at the Blue Heron paper mill. Under the structure of one trade agreement—WTO—those jobs went to China. Paper manufacturing went to China. The equipment was pulled up out of that factory, leaving a big hole, and shipped overseas. That is what happened. We lost our factories. We lost our jobs.

There has been a lot of discussion that this is a new trade agreement, and that it establishes enforceable standards for labor. Well, perhaps the single most important standard is minimum wage. Minimum wage is about resisting the full exploitation of workers, the full race to the bottom. So, of course, I, and I think the President would say: Well, of course, we have addressed that. That is central. That is the central ingredient, is to make sure that there is not a race to the bottom and that we address the fact that every nation that will be part of this agreement will have to have a minimum wage, a minimum wage that rises over time, a minimum wage that provides a basic standard of living so that we do not have conditions of full exploitation, miserable sweatshops, if you will, that are producing goods here in America under this agreement.

So it may come as a shock to people across America that this most fundamental standard of minimum wage is not addressed in this agreement.

What do we have right now? We have 12 countries. We have two countries—Brunei and Singapore—with no minimum-wage standard at all. Then we have Mexico at 66 cents and Vietnam—for Vietnam, they set a monthly minimum wage and they vary it. So the number varies according to how you calculate it. Some would call it 57 cents; others would say 74 cents. Let’s just put it this way: The minimum wage in Vietnam is way under $1 per hour. In Malaysia, it is $1.54; Peru, $1.55; Chile, $2.25.

So does this Trans-Pacific Partnership have a requirement that there be a minimum wage that will rise up workers and stop these sweatshops around the world and so that we are not buying products from sweatshops with miserable, slave-like conditions? It does not. It has no such provision. It has no minimum wage, which leads us to another fundamental observation.

What this trade agreement does is set up a dynamic between these very low wage countries and countries that are developed and aspiring to create living-wage jobs here. But what happens when you have manufacturing in these high-wage countries and they have a minimum wage that is below the world standard? It is a race to the bottom. So does this Trans-Pacific Partnership have a requirement that there be a minimum wage that will rise up workers and stop these sweatshops around the world and so that we are not buying products from sweatshops with miserable, slave-like conditions? It does not. It has no such provision. It has no minimum wage, which leads us to another fundamental observation.

What this trade agreement does is set up a dynamic between these very low wage countries and countries that are developed and aspiring to create living-wage jobs here. But what happens when you have manufacturing in these high-wage countries and they have a minimum wage that is below the world standard? It is a race to the bottom. So does this Trans-Pacific Partnership have a requirement that there be a minimum wage that will rise up workers and stop these sweatshops around the world and so that we are not buying products from sweatshops with miserable, slave-like conditions? It does not. It has no such provision. It has no minimum wage, which leads us to another fundamental observation.
When he was campaigning for President, Ross Perot said: If you adopt NAFTA, you will hear the sound of the jobs leaving America.  

Well, that is exactly what happened—exactly what happened. So is it my position that this new generation trade agreement actually address this core problem? Well, the answer is, it does not. It does not do anything to address this disparity between very low wages and prosperous countries. This is going to be, as Ross Perot put it, another situation with a giant sucking sound of jobs leaving America.  

Proponents of this treaty say: Well, we have done something very significant. We have taken the labor and environmental side agreements and we have put them in the center of the agreement. This is pretty much like moving deck chairs on the Titanic. You move them from one location to another location. How does that change the outcome? Well, it doesn’t. It just means they are printed in a different part of the text. That is not very good news, if you will, to workers across the United States of America who have been assured there is something fundamentally different about this agreement.  

These labor standards and these environmental standards that are in the agreement—we have heard a lot about enforcement, and there is nothing new to enforce in these labor and environmental standards. I want to take a little detail here because there are some important enforcement standards that my colleagues have put forward. My colleague from Oregon has put forward the ENFORCE Act. This is important for enforcing tariffs. This is important for enforcing the movement of goods illegally through third parties in order to bypass tariffs in the United States. That is a good step forward, but that does not change the core of this issue which is enforcement of the labor and environmental standards.  

Now, we have the same basic standards in various trade agreements, and they are never enforced because there is no effective mechanism for enforcement. Let me expand a little bit on what has gone on and then point out what nothing has been done to fix it. You essentially have a set of standards and these standards are the International Labor Organization standards. ILO standards and ILO standards address a series of things. These ILO standards are things such as child labor. That is a bad idea. It should stop. It addresses that union organizing should be allowed, and that is a good thing. So the standards themselves are solid and respectable. But when a nation becomes part of the trade agreement, how do you have them enforce those standards. That is what is missing—no enforcement for these standards.  

There is a government-to-government process for consultations when the United States is upset that someone is not enforcing. Ultimately, they can file a case. That case can take years and years and years to adjudicate, and it never gets done. The number of labor standard enforcement actions that have been completed and no enforcement of environmental enforcement standards that have been completed is zero—zero, zero. So if we take a broken system from existing trade treaties and slip it into a new trade treaty, what is the expected result? Enforcement of these standards. All the parties know that. They can put these laws on the books, but there is not going to be enforcement.  

There is one case—one case alone—that we have sought to proceed to enforced and that is with Guatemala. With Guatemala, they have massive labor violations. They are not making the slightest attempt to follow the ILO. We have under that trade agreement in that nation, they come out and tell the government: What are you doing? The goal of the trade agreement was to create a stable environment for investments. You are destabilizing that by filling a country with unfair advantage, so don’t do it. In the end, if you ever got to an enforcement action, well, that would hurt us because we put our factory there, and now we would be subject to tariffs.  

So this combination means that structure is completely dysfunctional, and that structure is exactly what is in TPP. So this is why we are coming forward and saying now is the time to fix these.  

So is it a fact that this new generation trade agreement actually address this disparity between very low wages and prosperous countries. This is going to be, as Ross Perot put it, another situation with a giant sucking sound of jobs leaving America.  

Yesterday, I came to the floor and I tried to pull up amendments. We are being told the leaders on this bill want to choose, pluck, and pick just the amendments they want to allow to be debated, unlike in the past, where we would have had a situation where people have been invited to come to the floor and make their amendments pending, and then we worked through those amendments. So we spent time addressing the issues that Senators thought were important. That is a robust and open process. But despite the promises of the majority leader for an open and robust amendment process, we do not have that. We have a behind-the-scenes negotiation with amendments picked and plucked according to what the proponents of this deal want to have, and the rest of us are out in the cold.  

So I have these four amendments that I would be happy to pull up at any time that is allowed. I tried yesterday, so I will not try to do it again, but let me tell you the types of things they address. One is it takes on the core deficiency in the Trans-Pacific Partnership, which is it does not have any minimum wage. So it simply says:  

FOR AGREEMENTS THAT SUBJECT UNITED STATES WORKERS TO UNFAIR COMPETITION ON THE BASIS OF WAGES—The trade authorities procedures shall not apply to an implementing bill submitted with respect to a trade agreement entered into under section 103(b) unless the agreement—  

(A) establishes a minimum wage that each party to the agreement is required to establish and maintain before the trade agreement is implemented; and—  

So it is not something that is done down the road; it is done before it is implemented. Second—  

So, of course, it made sense that factories would be shipped from the United States to Mexico. Not only do you have enforcement, poor people in the higher countries are not enforced, but you have a minimum wage that is one-tenth of what it is in the United States. So I don’t specify in this amendment that the minimum wage has to be set at any particular level. That can be the subject of the negotiations. I don’t specify that it has to be raised by 10 percent a year to narrow the difference between the very low countries and the higher countries so we reduce the disparity.  

This is like taking a playing field that is tilted 10 to 1 against the workers of the United States of America—
May 20, 2015

CONGRESSIONAL RECORD — SENATE

to 1. It is not close to a level playing field. The American minimum wage is more than 10 times the Mexican minimum wage. It is a 10-to-1 disadvantage to American workers.

That is what we are talking about—the profound advantage that is built into this trade agreement. So I am suggesting: OK. At a minimum, the negotiated process, where that playing field is gradually brought to a more level situation, where the disparity is decreased, shouldn’t be that be a primary negotiating objective of the United States in these agreements? Aren’t we right now talking about explaining to the administration what they should negotiate in this agreement?

My colleague from Utah spoke earlier about the provision regarding currency manipulation and explained why he thought it would be unproductive to have it here—while it is very important—unproductive to have the amendment that SHAHEEN and PORTMAN, my colleagues, are introducing. But in the process, the purpose of this debate on the floor, to allow that amendment to be called up, to hear the views for it, to hear the views against it, and to lay out our vision to the administration.

Now, as you have pointed out that the administration has said it will not accept establishing a goal of enforceable currency manipulation provisions. Why is that? I can tell you because the administration told me. They said, if we put this on the table in the beginning, then we could probably raise it and have it be part of the conversation. But, you see, we have already negotiated this agreement. It is 95 to 98 percent done, and so we can’t possibly introduce something new into this process. That would disrupt all the groundwork we have laid.

So this is where the cart came before the horse. The treaty was negotiated without consultation with Congress about what could be in it. We all understand currency manipulation is a form of tariff. It is a form of tariff and subsidy.

When I came into the Senate, China’s currency manipulation was calculated to be equal to a 25 percent tariff on American products going to China and a 25 percent subsidy to Chinese products coming to the United States. Well, that is a huge tariff. Combine the two together—50 percent differential. That is not compatible in a bilateral agreement that was supposed to reduce—under the WTO—barriers. No. So we know it is a problem. Why not fix it, why not address it, why not debate it, why not discuss it, and why not struggle to find a solution. That is what Senators SHAHEEN and PORTMAN are saying; that that is an important element related to this unbalanced situation that is going to remove jobs from the United States.

Now, I am pointing out another deficiency; that is, that there is no minimum wage, that we are starting out with a 10-to-1 differential with Mexico, approximately a 10-to-1 differential with Vietnam, that there should be a minimum wage so we can stop the race to the bottom, and it should be gradually raised to decrease the disparity.

That is an issue worthy of debate, but I can’t get that debate onto this floor. One of the problems is: Do we want to allow debates on these amendments? They just want to choose and pick the subjects that they want to allow to be debated rather than the ones the Senators want to allow to be debated. That is not a robust and open amendment process.

Now, there is another flaw in this TPA, which is it has negotiating objectives. An objective is simply a wish, a hope, it is a desire, it is an inclination, but an objective is not an actual provision.

So we can say all the beautiful things we want about what our objectives should be, but instead we should be asking, What are the standards? What are the standards that need to be in a treaty? ”in order to allow that amendment to be brought back to the Senate under fast-track—because fast-track gets special privileges on the floor of the Senate.

So setting an objective doesn’t do the work because it doesn’t define what will come back to this body under this special privilege. We should convert those objectives into actual requirements. That is what one of my amendments does.

Then we can turn to the situation where the TPA has another deep flaw that many have pointed out that hasn’t been addressed, and this deep flaw is it sets up an international tribunal, an international tribunal that can essentially assess fines on our local government, it can assess fines on our State government, it can assess fines on the U.S. Government, unless our local government, or the State government, or the Federal Government change their laws.

Establishing a judicial organization with no accountability to the U.S. judiciary, that is a grant of sovereignty. That is our courts’ sovereignty being shipped to a tribunal of three corporate lawyers who get to decide whether there are massive fines levied against our local, State, and national governments. Well, that is certainly something that should be deeply concerning to us.

Now, the goal of this was to have some sort of judicial process substitute in countries that have a dysfunctional judicial process, and thereby encourage international investment. So you could have a situation where Vietnam and Malaysia would say: We know our judicial organization is corrupt or dysfunctional, so we will opt in for this dispute resolution structure because we want investment to come to our country. But judicial powers to an international tribunal of three corporate lawyers—corporate lawyers for whom there is no conflict of interest standard? They could be the advocates on one case and the judge on the next. That is really not in accordance with our norms of judicial conduct. So we aren’t even requiring our norms of judicial conduct to be applied to this international tribunal.

Furthermore, when we pass at the State or local or national level laws designed to protect the health and safety of our citizens, foreign investors are granted special privileges under this agreement because they can opt in and say: Your laws for consumer protection or the health and welfare of your citizens or to take on significant environmental hazards have hurt our investment, and we want to be compensated.

That is just wrong. Sure, if there was an unfair expropriation of someone’s assets, that is judicable under American law. It doesn’t require an international tribunal.

But what about when something is done for the safety and wellness of our citizens? Take, for example, asbestos. We tried to regulate asbestos in 1991. It was the last time any toxic chemical was considered under the Toxic Chemicals Act. We have done nothing in the intervening years. So let’s get over the hurdles that existed in 1991, and we have a new law, a new process, such as has been debated in the Committee on Environment and Public Works. That bill had bipartisan support. That was a fact, and we regulate asbestos, now the foreign investor says: Oh, we have an asbestos factory so you have to compensate us. That is a privilege that the domestic— the United States; the red, white, and blue—investor would not have.

Let’s say we regulate e-cigarettes—an effort by the tobacco company to addict our children to become lifetime users of nicotine and to do so through fancy flavors—chocolate, strawberry, cotton candy, and every candy flavor on Earth. You name it, they have a flavor of e-cigarette liquid designed to addict our children. So let’s say we ban that, and the foreign investor gets special privileges because they say: Oh, well, I set up a factory, and I was going to make $1 billion over the next 20 years, so I need $1 billion of compensation.

That is the type of structure that is embedded in here. So at a minimum, I think that any international tribunal should be opt-in. If we want to attract investment and we have a poor judicial system, opt in to this substitute to encourage investment. Maybe that is a win-win for a country with a poor judicial system and an investor who wants to attract investment to come to our country. But judicial powers to an international tribunal of three corporate lawyers—corporate lawyers for whom there is no conflict of interest standard? They could be the advocates on one case and the judge on the next. That is really not in accordance with our norms of judicial conduct. So we aren’t even requiring our norms of judicial conduct to be applied to this international tribunal.
those loans in the mortgage market. We don’t want a foreign investor saying: Well, our whole business was built on that; you owe us $1 billion. No, we are ending predatory wealth- striping practices and replacing them with fairer, 30-year mortgaging with full disclosure of who were allowed under the previous law. They were called steering payments. We ended steering payments.

Or on this issue of e-cigarettes, we are ending predatory wealth- striping practices and replacing them with fairer, 30-year mortgaging with full disclosure of who were allowed under the previous law. They were called steering payments. We ended steering payments.

Well, one of these tribunals, in a different trade agreement, struck down America’s country-of-origin labeling law. That is what I am talking about when I say we are giving the sovereignty of our judicial branch away to an international tribunal of corporate lawyers who can make decisions that affect us. That is simply wrong. We must fix this.

So I have an amendment that I would like to hear debated on this floor. Others may disagree with me. We have been elected to carry our views forward. There will be people here saying: No, it is fine we strip consumers of the ability to know where their meat is grown. It is fine to strip consumers of the knowledge of what ingredients have gone into their milk, if milk is imported, and so on and so forth. But I fundamentally disagree. I want to see us debate.

We are here to debate, so let us get these amendments up. Let us debate them, and let us quit stalling. Let us quit the gingerly strolls trying to rush this through in a manner where these fundamental issues have not been addressed—fundamental issues such as the fact that there is no minimum wage in this agreement, and that the playing field is tilted deeply against manufacturing in America: fundamental issues such as that there are negotiating objectives that should be negotiating requirements for a bill to have the privilege of getting fast-track treated. And fundamental issues such as that we should not have our environmental, public health, and consumer laws subject to an international tribunal; fundamental issues such as Americans having the right to label their products the way they decide, according to their statutes, and not have that overruled by an international group.

I would love to see this Senate function and to actually debate these fundamental amendments. And any effort to shove this bill through without having those types of debates is certainly not the open and robust amendment process that was promised by the majority leader. I yield the floor.

The PRESIDING OFFICER (Mr. SULLIVAN). The Senator from Iowa.

RENEWABLE FUEL STANDARD

Mr. GRASSLEY. Mr. President, while reading through the pages of the Wall Street Journal last week, I came with a sense of déjà vu. As many of my colleagues have heard me speak on the Senate floor many times each year over the last several years about ethanol and about misconceptions about that, these misconceptions showed up in an op-ed piece in the Wall Street Journal last week.

Once again, in this case it happens to be chain restaurants and chicken producers teaming up to smear homegrown biofuel producers at the expense of American farmers, farmers deserve to have a level playing field. It seems as if every couple of years producers team up with Big Oil to try to undermine the extremely successful Renewable Fuel Standard Program.

Here is a little history for everyone. In 2008, it was the big food producers led by the Grocery Manufacturers Association, because, presumably, in our society, grocery manufacturers have more prestige than Big Oil. In 2010 and 2012, it was global integrated meat producers, led by Smithfield Foods and the American Meat Institute, presumably because they have more prestige than Big Oil.

The opinion piece I am referring to in the Wall Street Journal this time was written by the head of the National Chicken Council and the National Council of Chain Restaurants. And under these circumstances, compared to the other two instances I cited, there is really no difference. They have prestige that Big Oil doesn’t have.

This article makes many of the same arguments that since 2005, when the renewable fuel standard was first adopted, costs of vital food commodities, including corn, grains, oilseeds, poultry, meat, eggs and dairy have risen dramatically. This is pure myth. The fact is consumer food prices have increased by an annual rate of 2.68 percent since 2005. In contrast, food prices increased by an average of 3.47 percent in the 25 years leading up to passage of the renewable fuel standard in 2007. Chicken breasts have been nearly flat over the past 7 years, averaging $3.43 per pound in 2007 and just 3 pennies more, to $3.46 per pound, in 2014. Corn prices are expected to average $3.50 per bushel this year, according to the Department of Agriculture. This would be the lowest price in nearly 10 years and 17 percent below the average price of $4.20 a bushel in 2007 when the renewable fuel standard was adopted. That is a fact. With ethanol production at record levels today, corn prices are lower now than they were in 2007. But I don’t know how many times over the last several years I have listened to this business about ethanol causing corn prices to go up and food prices would go up. And food prices went up. But when corn is $3.50, we don’t see food prices come down. It has been proven time and again by the EPA, by the USDA, and others: There is no correlation between corn prices or ethanol production and retail food inflation or food prices. Once again, that is just a simple fact.

Second, these authors claim that as a result of the renewable fuel standard, corn is being “diverted” from livestock feed to ethanol. Again, this claim is pure falsehood. Corn used for ethanol has come from the significant increase in corn production since 2005. In 2005, 8.8 billion bushels of corn. In 2014, 14.1 billion bushels of corn. Why? Because the market responds and the
farmers respond to the increased use of corn, and they will meet it whether it is for biofuels or anything else.

Here is something very significant: One-third of the corn used for ethanol production is returned to the market as another amount of corn which corn coproducts available for feed use is larger today than at any time in history. So it is hardly being diverted. But time after time, a prestigious newspaper as the Wall Street Journal continues to tell the people of this country that 40 percent of corn production goes to make ethanol. They are right—40 percent goes to the ethanol plant. But out of a 56-pound bushel of corn 45 pounds is left over for animal feed—and very efficient animal feed, let me say, badly in need and welcomed by farmers. In fact, some of it is even exported. But does the Wall Street Journal ever make that clear, that this is the right type of crop that is used for ethanol; it is 26 percent or 27 percent that is used for ethanol? So, just as I said, corn is not being diverted.

The same can be said for their misleading claim that ethanol production has contributed to global food scarcity. In the 15 years prior to the enactment of the renewable fuel standard in 2005, U.S. corn exports averaged 1.8 billion bushels per year. In the 10 years since the renewable fuel standard's passage, corn exports have averaged yet more—not a whole lot more but 1.84 billion bushels. So with 14.33 billion gallons of corn ethanol, corn exports are slightly higher than they were prior to the renewable fuel standard.

Another fact-check: The authors of the opinion piece also claim that corn ethanol has resulted in a significant increase in the volatility of food costs, which they say has led to higher prices for feed, let me say, badly in need and welcomed by farmers. In fact, some of it is even exported. But does the Wall Street Journal ever make that clear, that only 26 percent or 27 percent that is used for ethanol; it is 26 percent or 27 percent that is used for ethanol? So, just as I said, corn is not being diverted.

The same can be said for their misleading claim that ethanol production has contributed to global food scarcity. In the 15 years prior to the enactment of the renewable fuel standard in 2005, U.S. corn exports averaged 1.8 billion bushels per year. In the 10 years since the renewable fuel standard's passage, corn exports have averaged yet more—not a whole lot more but 1.84 billion bushels. So with 14.33 billion gallons of corn ethanol, corn exports are slightly higher than they were prior to the renewable fuel standard.

Finally, these two writers for the chain restaurants and for the chicken people claim that the increases in feed cost have affected the American production of beef, pork, and chicken. They state that production had increased consistently over the past 30 years but has now leveled off due to the higher cost of feed.

Again, this is nowhere near reality. Let's check the facts. The reality is that the Department of Agriculture is projecting beef and pork production to increase by 95.2 billion pounds this year up 10 percent from 2005. More growth is yet expected. The Department of Agriculture projects a production record of red meat and poultry in 2016, with 96.8 billion pounds up 12 percent from 2005. Just a few years ago, when corn prices had peaked at more than $7.50 a bushel, grocers, food producers, and restaurants were claiming—as I said once before but let me emphasize—that food inflation would approach 10 percent because of the renewable fuel standard. They warned then that they would be forced to pass those higher costs on to consumers. Fortunately, as I have hinted before, today the price of corn is $3.50—less than half of what it was; in fact, $1 below the cost of production.

With lower corn prices, have consumers seen a dramatic reduction in retail food prices? In other words, are the benefits of lower grain prices being passed on to the consumer by Big Food? Obviously not. Ask any person shopping in the grocery stores. Corn prices have come down by more than half in the past 2 1/2 years, so why are food producers holding prices steady or even increasing them? We accuse Big Oil of gouging. Isn't it about time, with $3.50 corn, that we accuse Big Food of price gouging?

The fact is, domestic renewable fuel producers are feeding and fueling the world at the same time. The 14.3 billion gallons of ethanol that was produced in the United States could more than displace the gasoline from all of the oil imported from Saudi Arabia. And where would we rather get our energy from volatiles? Part of the Middle East or producers right here in the United States? And I say that not only for ethanol; I say that for oil, I say that for natural gas and I say that for corn, and I say that for all sorts of alternative energy.

We should be proud of our Nation's farmers and biofuel producers. Efficiencies gained have allowed farmers to produce ever-increasing yields, with greater environmental stewardship, including using less water and less fertilizer. Ethanol production has also seen efficiency gains. In 1982, 1 bushel of corn produced about 2.5 gallons of ethanol. Today's ethanol plants are producing more than 2.8 billion gallons of ethanol. We have a plant in Ida County, IA, that can get almost 3 gallons of ethanol from 1 bushel of corn.

According to the U.S. Energy Information Administration, if ethanol yields per bushel had remained at the 1997 levels, it would have required 343 million bushels—or 7 percent more—of corn to produce the same amount of fuel last year. That corn would have required the use of 2.2 million additional acres—or approximately half the State of New Jersey—just to keep up when we had the more inefficient production of ethanol.

Homogrown biofuels are extending our fuel supply and lowering prices at the pump for consumers. Biofuels account for 10 percent of our transportation fuel today. This economic activity supports American farmers, rural communities and consumers alike. It allows them to keep money at home rather than sending it abroad.

In recent years, our national security and economic well-being have been too dependent on oil imports—and from where? From tin horn dictators and regimes that are always trying to harm Americans. We do not need to put a Navy fleet in harm's way to protect shipping lanes from the Middle East when we have biofuels that come right out of the Midwest of the United States.

Our country needs a true "all of the above" energy policy, as we all talk about, and biofuels are an important component of that policy.

Do you know who is really wrong with people who sometimes talk about "all of the above," the way I see it, from different segments of energy? There are people who say they are for all of the above, but they are for none of the below the ground. And then there are people who say they are for all of the above, but they are for all below the ground but not the things that come from above the ground, such as solar energy producing corn that produces ethanol, as an example, or wind.

In 2005 and again in 2007, the Federal Government made a commitment to homegrown renewable energy when Congress passed the renewable fuel standard. The policy is working. I intend to defend all attacks against this successful program, whether they come from Big Oil, the EPA, Big Food, Big Restaurant, or others.

Secondly, I tried to do something fact-checking by Mr. Brown and Mr. Green, who wrote that article, and I am not very good at saying exactly whether they ought to have one Pinocchio or four, but they ought to look at having a Pinocchio because they are wrong on so many instances.

Mr. President, I ask unanimous consent to have printed in the RECORD the article from the Wall Street Journal.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

(From the Wall Street Journal, May 15, 2015)

PAYING FOR ETHANOL AT THE PUMP AND ON THE PLATE

(By Mike Brown and Rob Green)

What do a franchise owner of four chain restaurants in Virginia, a food service distributor in Ohio and a poultry farmer in Kentucky have in common? They are all small-business owners who work in local communities and help Americans put food on the table.

But they have also all felt the failure of the federal corn-ethanol mandate, known as the Renewable Fuel Standard. Congress doesn't agree on much lately—but ending a policy that is broken will be very good at saying exactly whether they ought to have one Pinocchio or four, but they ought to look at having a Pinocchio because they are wrong on so many instances.

Mr. President, I ask unanimous consent to have printed in the RECORD the article from the Wall Street Journal.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

(From the Wall Street Journal, May 15, 2015)

PAYING FOR ETHANOL AT THE PUMP AND ON THE PLATE

(By Mike Brown and Rob Green)
Before it hit consumers so hard, the federal corn-ethanol mandate caused higher feed costs for poultry producers, cattle feeders, dairy farmers and others in the food chain. While corn prices are always fluctuating due to unforeseeable factors like the weather, the demand artificially created by the RFS has resulted in a significant increase in volatility of feed prices.

Consider: Between 1973 and 2007, corn prices averaged $2.39 a bushel, according to the U.S. Agriculture Department. The average price in 2008 jumped more than 100% between 2008 and 2014, to $5.04 a bushel. Even though corn prices have recently declined thanks to fabulous weather that produced two bumper crops, prices are still more than 50% higher than the historical average. Prices could surge even higher if the U.S. experiences anything less than ideal weather.

The resulting increases in feed costs have also affected the American production of beef, pork and chicken, which increased consistently over the past 30 years but has now leveled off due to the higher cost of feed. As a result, a 2012 study by Pricewaterhouse Coopers found that the RFS could cost restaurants $3.2 billion every year in increased food commodity costs.

Then there are restaurants. Wholesale food prices are, on average, 1% lower than the consumer price index by more than a full percentage point since the implementation of the RFS. In many instances, especially in the restaurant sector, food service owners are not able to pass on higher retail prices to consumers because of market competition—a concept that the corn-ethanol industry is unfamiliar with than thanks to an exemption from the ethanol mandate.

As if this were not enough, ethanol production has contributed to global food scarcity and hunger. No country exports more corn than the U.S., and 90% is exported in gas tanks, not on the world market. So much corn has been blended into gasoline that the higher percentage levels routinely render corn-ethanol mandates infeasible in many areas.

Fortunately, lawmakers in Congress see the chicken producer, the food service distributor, the restaurant owner and others in the food chain for what they are: major contributors to the U.S. economy. Legislation has been introduced in both the House and the Senate to repeal the RFS, to apply the ethanol mandate, with broad bipartisan support. Congress should take up this legislation and pass it to the president’s desk.

The food industry isn’t anti-ethanol. Repealing the fuel standard would simply require the ethanol industry to compete in the marketplace just like restaurants, food distributors and chicken farmers do every day—without a government mandate guaranteeing secure and growing sales.

I yield the floor.

The PRESIDING OFFICER. The majority leader.

The PRESIDENT'S LEADERSHIP AND ISIL

Mr. CORNYN. Mr. President, I come to the floor today to talk about the latest example of President Obama’s failure to lead in the international arena, to the detriment of our national security and the most significant national security threat we face today.

Over the weekend, the Iraqi city of Ramadi in Anbar Province—which is about 70 miles from Baghdad—fell to ISIL. Once a hotbed of Al Qaeda activity, Ramadi had been back and pacific since 2011, a sign of our successes in 2006 and 2007. That accomplishment was made possible due to the heroic efforts of some great Americans, such as Navy SEAL Chris Kyle, a Texan whom Al Qaeda called “the Devil of Ramadi” and whose service was chronicled in the book and the movie “American Sniper,” and LTC Sean McFarland, whose soldiers implemented a brilliant counterinsurgency strategy to win over the local population and drive out Al Qaeda in the process.

By the way, we are proud to have General McFarland today serving as commanding general of III Corps at Fort Hood, TX.

ISIL’s latest raid and capture of Ramadi is a significant setback for all of us who seek a stable and prosperous Iraq, and it represents this terrorist army’s biggest military victory this year.

Reports of the ISIL takeover of Ramadi are staggering. Faced with the oncoming ISIL forces, hundreds of Ramadi police and security officials fled the city, leaving behind American-made military equipment, including as many as 50 in the hands of our enemies. Those who managed to escape reported that many security officials, government workers, and even civilians were quickly killed execution-style.

In response, the Iraqi Government deployed its Shiite paramilitary troops to the province—a move that some experts believe could lead to even more sectarian strife. The Iraqis are looking for support anywhere they can get it. It is left to President Obama’s poor leadership and indecision, Iran is more than happy to fill that vacuum and take up the slack. It should come as no surprise that on Monday, the day after the fall of Ramadi, Iran’s Defense Minister arrived in Baghdad to hold consultations with the Iraqi Ministry of Defense.

Obviously, I am frustrated by the President’s lack of leadership and by the Obama administration’s failure to put together a strong and cohesive strategy to combat ISIL, but it is more serious than that. It is about what we have squandered in Iraq, what we bought with the blood of Americans and the money that came out of the pockets of American citizens.

Since ISIL began taking large swaths of territory last summer, this administration has taken an approach of paralysis by analysis—in other words, doing nothing. When they do take action, it seems ad hoc and piecemeal and not driven by a comprehensive strategy or any strategy that is apparent to me. I am not the only one who believes we do not have a strategy in the Middle East. This President’s own former Secretary of Defense, Bob Gates, said yesterday: “We’re basically sort of playing this [instability in the Middle East] day to day.” After affirming his belief that we have enduring interests in the region, Secretary Gates then added: “But I certainly don’t think we have a strategy.” I could not agree more with him.

Unfortunately, this takeover of Ramadi serves as just the latest example of a President whose policies are altogether rudderless in the Middle East, even as that region is riled with growing instability and grotesque violence. We can trace that to what happened in the area just a few years ago. I alluded to this a moment ago when the President ended negotiations with the Iraqis on a status of forces agreement, the Obama administration proceeded with a misguided plan to pull the plug on American presence in that country. And so, he squandered the blood and treasure of Americans who fought to give the people of Iraq a chance.

While it is true that the Iraqis had not agreed to the U.S. conditions to an enduring American presence, including legal immunity for our troops, this administration gave up and failed to expedite the political capital necessary to secure a status of forces agreement and to preserve the security gains we had made within six months ago. As a result, those security gains made in many areas of Iraq since the height of the violence in 2005 and 2006 have since evaporated.

As terrorist groups were flourishing in Syria, the President refused to initiate a program to arm vetted moderate Syrian rebels, disregarding the recommendations made by his most senior advisers, including then-CIA Director David Petraeus, then-Secretary of State Hillary Clinton, Joint Chiefs of Staff Martin Dempsey, and then-Secretary of Defense Leon Panetta. He rejected the advice from his most senior national security adviser. Instead, the President publicly remarked in January of last year that ISIL was the JV team of terrorist groups. And just a few months ago, President Obama boldly said that ISIL was “on the defensive.” Let me repeat that, within a few months ago, President Obama claimed ISIL was “on the offensive.” That is not exactly the case today, nor was it really then. That is not exactly the kind of leadership we need from our Commander in Chief. By failing to recognize our true enemy, ISIL, and the mission to degrade and ultimately destroy ISIL but not providing them with the strategy and the resources they need to do so, the President is essentially making them operate with one more hand tied behind their back. We know we have the most capable military in the world, but we cannot win a fight with our hands tied behind our backs or with these constraints—politically correct constraints—the President wants to make and not compromise the resources and the strategy and the focus we need in order to win. So I hope the President will reconsider after this latest dramatic setback in Ramadi. I hope President Obama will provide us with a strategy to degrade and destroy ISIL in Ramadi—a major city and capital of Iraq’s largest province—we see much more than just a symbolic setback, and I bet Chairman Dempsey wishes he could take those words back—he called it merely symbolic.

We see a dangerous development and a great obstacle to a more stable Iraq
and thus a more stable Middle East. But this is what gets to me: We had more than 1,000 brave American troops die in Anbar Province during combat operations since 2003. I do not want to see their lives having been given in vain and squandered. So I hope that this is a wakeup call to the Obama administration and that they will provide the Congress and the American people and our troops a clear path forward to defeat ISIL and to rid the world of this terror army.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Washington.

Ms. CANTWELL. Mr. President, 4 years ago, I joined my Republican colleagues on the Senate Finance Committee and voted to give the President of the United States trade promotion authority—4 years ago. I have been a supporter of trade promotion authority for a long time, but I also realize that when it comes to trade, there are issues on which we have to work together.

We are at a juncture now where it is hard to move forward here in the Senate. I would say to my colleagues on the other side of the aisle that there are important issues about the future of America in a global economy—the American people want to be assured that there are going to be tools for them to compete.

So the fact that the Finance Committee and the negotiators of the trade promotion authority spent months and months on whether we were going to have TAA—which is a program that helps laid-off workers who are impacted by trade—because some House conservatives did not support trade adjustment authority—workers being retrained when they are affected by trade agreements—we spent months and months because some conservatives in the House do not believe in government and do not believe in this program that helps support laid-off workers.

Then we had to spend weeks and weeks out here because people on the other side of the aisle—again at the behest of conservatives in the House—did not want to support enforcement.

Now we are at this juncture because the same conservatives, because of an ideological belief by the Heritage Foundation—not something about business and labor, no; actually, business is very supportive of export opportunities, such as a credit agency that helps them sell their products. Again, this conservative group is holding up trade legislation because they do not think that it meets their political standards, as my colleague from South Carolina, Senator Graham, that it is all about some private organization they are trying to politically tame to.

I say to my colleagues on the other side of the aisle that I have been a supporter of TPA for a long time, but I do not want to support a cloture motion and I do not plan to support moving ahead until we stop catering to this very minority group that does not support the basic tools the American people want to see when it comes to trade. They want to know that if they lose their jobs, they can get retrained. They want to know that if export markets are open, they will have some ability to sell their products to those developing countries and more importantly, banks will be there but can help get financial support from a bank in the United States with the help of a Federal export credit agency. And yes, we have to have some basic tools on enforcement.

So if the other side wants to resolve these problems and move ahead on a trade agreement, they have to stop catering to the conservatives in the House—and probably some of them do not even support trade overall—and start working with the people who do support trade.

As I said 4 years ago in the Finance Committee when I supported TPA, these policies are important tools for the U.S. economy. I feel strongly that in the United States trade can be a great asset in helping stabilize regions. I do not want to hold down other growing middle classes around the globe. We do not want to lose jobs here in the United States because of it.

So let's have the tools that go along with trade, and let's get these bills passed. But if we are going to continue to cater to a group in the House who claims they do not want government, I do not see how, in this debate, we are going to give the American people the tools that will give them security.

I yield the floor.

The PRESIDING OFFICER. The Senator from North Dakota.

Ms. HEITKAMP. Mr. President, first, I would like to offer my great thank-you to the Senator from Washington for advancing this very important bipartisan bill.

We have worked long and hard in my office and with Senator Kain to try to address the vast majority of issues that so many people have or allege to have regarding the Export-Import Bank. At the same time we are stalling that critical piece of infrastructure in our trade apparatus, China and India are pouring billions of dollars into their similar institution to increase their ability to export and make sure the jobs in their country are safe. We are unilaterally disarming, and the House has changed by not moving forward on the Export-Import Bank. And I share my colleague's comment: Who are we listening to?

This is one of those rare moments when it comes to trade, there are important tools and an important apparatus and they represent a huge part of what we need to do when 95 percent of all consumers live outside this country, but we need to do it in a way that recognizes that American workers are part of this structure and that we have to have the tools other countries utilize in order to make sure we are moving forward.

I give my great public thanks to Senator CANTWELL for her brave fight and knowing that as the chief Democratic sponsor of the bill we are promoting, I stand with her. I stand with her today.

Mr. President, I also want to talk today about an issue that is important to North Dakota, which is the fact that we are talking about eliminating trade barriers and improving opportunities for access to markets when we have a self-imposed access-to-market problem, and that is the trade embargo on Cuba. It is a barrier our government puts on our own farmers and ranchers, and it holds back their ability to export and hurts their bottom line.

I am talking about the U.S. embargo with Cuba, of course, specifically on private—private, private, private—visa activities that could enhance the sale of our agricultural goods to Cuba.

My great friend from Arkansas Senator BOOZMAN and I filed an amendment which would free our exporters to provide private—private, private—credit with no risk to the government or taxpayers for exports of agricultural products to Cuba. We had a hearing on this in the agriculture committee, and I must say it was the single issue raised by all of the experts on how we could, in fact, open our markets to Cuba. We would allow private-sponsored credit for these exports. This is a simple change to our regulation that will make our agricultural exporters more competitive against rice growers in Vietnam and corn growers in Brazil.

We know we are the highest quality producer of agricultural products and, and many of those products are grown in my great State of North Dakota. Yet we don't have access to that market because Cuban purchasers don't have access to credit.

Unfortunately, under the current regulations, our government has erected a trade barrier. While we talk about TPA, trade promotion authority, and increasing export opportunities, we
need to look at what we can do to increase opportunities for our own producers here right now. It does not take a long, drawn-out negotiation, costs no money, and just makes sense.

I urge my colleagues to join with me and support this important effort to remove our self-imposed trade barriers on our agricultural producers and to allow a private investment and sponsorship of the purchase of agricultural products in Cuba. With that, I yield to myself.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. ENZI. Mr. President, this has been an interesting few days as we have settled the way of disorder, but it is probably designed to operate. It is not supposed to be the fastest legislative body in the world. It is supposed to be one that goes over issues slowly and gives those issues full consideration.

I am relatively certain we will. It is not the purpose of this Senate to operate. It is the way it gets done and has been getting done for centuries in the United States.

I hope we can work through the process and get the bill finished. In fact, I am relatively certain we will. It is not the purpose of this Senate to operate. It is the way it gets done and has been getting done for centuries in the United States.

A BALANCED BUDGET

Mr. President, what I really want to talk about today is the importance of a balanced budget. Over the past few weeks, we have seen America reacting to a Congress, and especially the Senate, which is back to work doing the people’s business. The basic task of government should have eluded this normal legislative body over the past 8 years and has decimated the faith and trust of hard-working Americans who yearn for a government that is both accountable and effective, and that is why passing a balanced budget represented an important step forward.

Here are just a few of the headlines from around the Nation: “Senate Passes first joint congressional budget in six years,” “Senate Passes Cost-Cutting Budget,” “Budget A Fear Of Considerable Importance,” “Balanced Budget Will Focus on Every Dollar Spent,” “Balanced Budget, A Step Forward,” and “Congress approves the first 10-year balanced budget since 2001.”

We know passing a budget was important because it symbolizes a government that is back to work, but it is also important to understand why passing a balanced budget is so vital to our Nation.

What is the process? The Senate Budget Committee is tasked with the responsibility of setting spending goals. Congress has other committees that authorize government programs and are charged with overseeing their efficiency and effectiveness. We also have committees that allocate the exact dollars for these programs every year, but the Senate Budget Committee sets the spending goals. In other words, we set limits. This is why passing a budget is so important for our Nation. It lets the congressional policy makers know the dollars get to work immediately by following our spending limit. This year, we are giving them an early start, and Leader MCCONNELL is committed to allowing the Senate to do its job, and in history, if we can do that, we can help boost the economy and expand the opportunity for each and every American.

The big question is, What happens if interest rates go to their normal historical level? A balanced budget provides Congress and the Nation with a fiscal blueprint that challenges lawmakers to examine every dollar we spend. This is crucial because we currently spend about $330 billion in interest every year, which is a historically low interest rate of 1.7 percent. The Congressional Budget Office tells us that for every 1 percentage point that our interest rates rise, it will increase America’s overspending by $1,745 billion over the next 10 years. That is a huge hit.

To provide a clearer picture of how dire our Nation’s fiscal outlook is, we have a looming debt of $18 trillion, and it is on its way to $27 trillion. If the interest rate were to go to a modest 5 percent, we would owe $875 billion a year just for interest, which does not buy us anything. That is more than we spend on defense; that is more than we spend on everything else.

Interest on the debt could soon put America out of the business of funding defense, education, highways, and everything else we do. It is time to get serious. It is time both parties get serious about addressing our Nation’s chronic overspending.

In the budget, defense was given $90 billion more than the budget caps and $38 billion more than the President requested. We know both sides want the caps from the Budget Control Act removed, but at what price for our Nation and its hard-working taxpayers?

Our military leaders have already told us that the deficit is not going to be a threat to national security. Removing the threat of sequester by raising these debt caps without increasing the debt in the short term would require raising taxes. When it comes to defense, we are literally buying our own troops, and that is not acceptable. Those who, with a Democratic Congress, raised taxes to get his budget to that level.

Last year, Congress funded items the Department of Defense didn’t approve or ask for, and costs for major equipment exceeded approved amounts by billions—that is with a “b.” I know small businesses that were deprived of bids by companies that provided products different from the specs with no consequences. Taxpayers are making every day.

It is time for Congress to truly work together to reduce the deficit in a way that both parties can agree on and achieve real results and real progress for American families who are counting on us.

How do we boost economic growth? We know passing a balanced budget will allow Americans to spend more time working hard to grow their businesses or to advance their careers instead of paying about $630 billion in taxes and inefficient and ineffective regulations. Most importantly, it means every American who wants to find a good-paying job and fulfilling career has the opportunity to do just that.

A balanced budget will also boost the Nation’s economic output, but first we must get our overspending under control because Congress is already spending more tax revenue than at any point in history. If we can do that, we can help boost the economy and expand the opportunity for each and every American.

The Congressional Budget Office tells us the debt is a threat to national security and its hard-working taxpayers?

We know both sides want the caps from the Budget Control Act removed, but at what price for our Nation and its hard-working taxpayers?

Another important way to help the growth of our economy is to make the same tough decisions hard-working taxpayers are making every day.

This is Small Business Week, and I want to mention my appreciation for
Craig Kerrigan of the Oregon Trail Bank in Wyoming for writing a little article about the real issues for small business. Small business is the motor that drives this economy. He said:

If they can't make a profit, no one benefits. This is the reality. They will tell you that the biggest threats and challenges they face in today's economy are health care, taxes and excessive regulations.

A regulation affects a small business much more than it does a big business because they don't have a lot of people to spread the work over.

Going back to Craig Kerrigan's article:

They want to provide competitive salaries and benefits, and in most cases they do. But any cost that is forced upon them they either pass on to the consumer or they go out of business.

It is interesting to note that those who force these costs upon small business are not the ones paying for them, and it is always easier spending other people's money.

Mr. President, I ask unanimous consent that the entire letter by Craig Kerrigan be printed in the RECORD at the conclusion of my remarks.

How more effective government? One of the first places Congress should start is by reviewing the 260 programs whose authorization—that is their right to spend more money—has expired. Some of these programs are as old as 1983, yet we are still spending money on them every year. That means we have been paying for these expired programs for more than 30 years. It is not just the length of time these programs have overstayed their welcome, the funds we allocated to them every year are more than what the law called for. In some cases, that means we are spending as much as four times what we should be. You have to take care of your own doorstep.

Yesterday, I had an oversight hearing for the Congressional Budget Office, which comes under the direction of the Budget Committee. It was the first oversight hearing in 33 years. Everybody needs to take a look at the programs they are in charge of and see if there are not some changes that ought to be made since the invention of the mobile phone, and, of course, that was a mobile phone about that big. The 260 programs that have expired are over $2.935 billion—or $2.9 trillion—over 10 years. Eliminating these programs alone would almost balance the budget.

In business, programs are reviewed every year or sometimes every week to see if they still contribute to the business and its strategic plan, and if there is not some improvement that will make things work better, they often look for small savings to help strengthen the organization and contribute to its bottom line. But in Washington, programs are not reviewed, let alone questioned, let alone scrutinized. Not even big amounts are questioned.

Just think of how long it has been since we have taken a close examination of what we are spending money on. In 1983, "The Return of the Jedi" was the top movie and Americans were obsessed with the Rubik's Cube.

Savings are usually found in the spending details, but Congress has not examined the details. It just has the big picture, which was painted long ago and has now expired. It is time for each committee to take a look at these programs and decide if they are even worth funding anymore. After all, a project not worth doing at all would not be worth doing well or would not be worth continuing funding for it. But how would committees know if they have not looked at the program in years? How would they know if they don't have a way to measure how well the programs are working?

When I first came to the Senate, Yellowstone Park was going broke and threatening to shut down. Every year they spent money running out of money in August, and that is the prime time for the season. I checked the spending bill covering the park, and I found out it only lists how many employees and the total millions of dollars to spend. I asked for the details. Both the spending committee and the Department of Interior told me that was as much detail as they had. I asked for a printout of how the money was spent in the previous year. They said it would take about 30 days to get a list of what that consisted of, and I was sent a list of new buildings they wanted to construct. That is not delayed maintenance.

In 1999, the Park Service was cited by the Wyoming Department of Environmental Quality for raw sewage that was flowing into the Madison River, which prompted a request to Congress for emergency repair funds. I asked why that wasn't taken out of the National Park Service emergency budget. There was an emergency fund with plenty of money available immediately for the problem at that time. I didn't get an answer, but I found out that they got more by asking for additional funding at a time of crisis. That is not how government spending is supposed to be done.

That is why we need to have a balanced budget where we need to have people scrutinizing the items that are under the jurisdiction of their committees.

A balanced budget amendment is what many of the States are working on. We better show taxpayers that Congress is committed to a balanced budget, to make it ever more effective, because we are running out of time. It is not just because of the increase in the interest rates that are possible here, but currently, lawmakers in 27 States have passed resolutions for a Constitutional Convention to approve a balanced budget amendment, and there are new applications in nine other States that are close behind. If just seven of those nine States approve moving forward on the balanced budget issue, it would bring the total number of States to 34 States. That would meet the two-thirds requirement under article 1, section 5 of the Constitution for Congress to take action on a balanced budget amendment. If this happened, one of the most important functions of Congress—the power of the purse—would be drastically curtailed, because there would be a new constitutional limit on what Congress would be allowed to borrow.

Now, I mentioned before that I think we have been overspending. We are scheduled to overspend by $468 billion this year. How much do we get to actually make decisions on? That amount is $1,100 billion. If we were to balance the budget right now, we would have to do a 50-percent cut in everything we do, and that is not even talking about any increase in interest payments.

So, in conclusion, Americans are working harder than ever to make ends meet. Shouldn't their elected officials be willing to work harder too? We need to pass a balanced budget as an important step, but that is just a first step and, unfortunately, that was the easy part. Congress has to get serious about tackling its addiction to overspending and once again become good fiscal stewards of the taxes paid by each and every hard-working American taxpayer.

Earlier this month, on the 70th anniversary of Victory in Europe Day—or V-E Day—our National Guard had the rare privilege of seeing and hearing World War II airplanes, our Arsenal of Democracy, fly over the National Mall and the U.S. Capitol Building. This flight and these planes remind us that as a nation, we rise together or we fall together. Those planes also remind us that when we work together, we succeed together.

Let us commit to work together to end our overspending and balance our budget.

I yield the floor.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

"Focus on Real Issues for Small Businesses"

By Craig Kerrigan

In recognition of Small Business Week, I thought it appropriate to share some thoughts about small businesses that are not discussed as much as I feel they should be.

It is frustrating how many articles are written about our economy and the effects it has had on small businesses since the Great Recession, but they always seem to take an approach based on surveys, statistics, theories, opinions, analysis and general assumptions; almost illusory.

Let me offer a suggestion. I am sure almost all of you have a family member, friend or acquaintance who owns a small business here in Cheyenne or Laramie County.

JUST ASK THEM

If you do, just ask them what is happening in their business and about the management
decisions they have had to make to navigate the issues they face every day as they relate to our economic and political environment.

No more theories as to what should be happening in conjunction with the sure thing that really is happening, simply put, where theory meets reality.

For the purpose of this article, I will use businesses that employ between one and 50 employees with gross receipts or sales up to $7.5 million, although the definition varies from industry to industry.

They are the true backbone and lifeline of our local and national economy as they create 70 percent of new jobs. They are what I call our forgotten economy.

You can find someone in almost all business sectors—retail, construction, real estate, manufacturing, professional services and food service, to name a few.

Many of these small businesses are owned and operated by our friends and neighbors, people who go to work every day to provide a service that benefits our local economy. They have no set hours, no guaranteed benefits, no stock options and no perks.

In almost all cases, they started their business with their hard-earned savings, conversion of retirement accounts from previous employment, gifts from family and credit from a bank or someone they pledged their homes, vehicles and other personal property just to find enough cash to start their business.

Many have second jobs and take no salary from them. If they can make enough to pay the rent, it can be great.

I have been blessed to have been a banker in Cheyenne for almost 40 years, and I have been given a unique perspective from being both a banker and also an owner of a small business as many small community banks are privately and family-owned small businesses.

I had the chance to be involved in helping to facilitate business startups, expansions, restructures and unfortunately liquidating some that have had closed.

Every business has unique characteristics with the type of product or service they sell, the experience of ownership and management and the demographics of real employment.

They are in business to make a profit, but more importantly, they have a passion for what they do. They drive economic growth through innovation and entrepreneurship. They support not only themselves and their families, but they are responsible for the support of their employees and their families.

BIGGEST THREATS

If they can’t make a profit, no one benefits. This is the reality: They will tell you that the biggest threats and challenges they face in today’s economy are health care, taxes and excessive regulations. They want to provide competitive salaries and benefits, and in most cases they do. But any cost that is forced upon them either pass on to the consumer or they go out of business.

It is interesting to note that those who force the increased costs upon small businesses are not the ones paying for them, and it is always easier spending other people’s money.

The new health-care law affects decisions they have had to make as to the number of employees they can have and the type of benefits they can offer. Many are limiting employees they can have and the type of benefits they have had to make as to the number of full-time employees to less than 50 to avoid the costs of mandated health coverage.

If they don’t know what the next surprise is going to be with our tax code, it is almost impossible to operate a business. And if they are forced to follow a new regulation, they have to hire non-income producing overhead just to make sure they don’t get fined worse.

Many regulations are needed; it is when they are inefficient, duplicative and applied based on a “one size fits all” approach that they become overwhelming and result in unintended consequences.

How do I know this? As a banker, you cannot analyze the significance of any business unless you analyze financial information and communicate with management throughout the year.

Numbers are interpreted differently, but they never lie, and they are not based on theories. You have to know the business of the business and make decisions to help them make decisions that make sense for them.

Sounds simple, but there are many different business structures—sole proprietorships, corporations, partnerships and limited liability companies—and the businesses that do not have the luxury to staff human resources, compliance, legal or accounting departments.

So the next time you read an article about what should be happening, walk across the street or drive across town and talk with someone you know that owns a small business.

THANK THEM

The first thing you should do is thank them for everything they do to make our community a better place. Many of them are members of our Chamber of Commerce and unfailingly give of their time and money to support other small businesses.

Don’t be indifferent to our economic and political environment because the reality is you are paying for any increased costs to small businesses in the prices you pay.

So at the end of your visit, you will most likely hear “welcome to the real world.”

THE PRESIDING OFFICER (Mrs. Ernst). The Senator from Hawaii.

Mr. SCHATZ. Madam President, I wish to join my colleagues in voicing my opposition to granting fast-track authority. I oppose the procedures contained in this bill, and I am concerned about using fast-track to pass trade agreements that don’t reflect the best interests of the American people and can undermine the prerogatives of the Congress.

Some who support fast-track would have us believe that opposing this bill and TPP means opposing to a free market, to trade, and to commerce; but that is not true. Commerce is essential, and we should be promoting it. But corporate interests should not be the driving force behind policy decisions on public health, consumer safety, and the environment.

Just this week, a WTO ruling on our country-of-origin food labeling law provided a striking example of how what is called free trade can be used to evade consumer protection. The country-of-origin labeling law was passed by Congress, and it requires producers of meat and chicken to provide information to consumers on where the animal was raised and slaughtered. If we ask most people, they would want to know if their beef is from Texas or from Taiwan. And even if one isn’t particularly passionate about that issue, I think most people would agree that it is squarely within the prerogatives and the constitutional duties of the U.S. Congress to decide.

Consumers in the U.S. want to know where their food comes from. Through legitimate, democratic process, we passed a law to provide consumers with this information. But no matter how we have revised the rule pursuant to the law, it is apparently still not in line with our WTO commitments. It seems that we will have to repeal the law to avoid trade sanctions.

While our WTO obligations are not the same as our commitments under a free-trade agreement, it doesn’t require too much imagination to see how other U.S. laws will buckle under future trade agreements. This is why the deal-breaker for me is the investor-state dispute settlement, or ISDS for short.

ISDS provides a special forum outside its law, but well can collide our system that is just for foreign investors. These investors are given the right to sue governments over laws and regulations that impact their businesses—a legal right not granted to any other. This forum is not available to anyone other than foreign investors. It is not open to domestic businesses. It is not open to labor unions, civil society groups or individuals that allege a violation of a treaty obligation. The arbitrators that preside over these cases are literally not accountable to anyone, and their decisions cannot be appealed. To date, nearly 600 ISDS cases have been filed. Of the 274 cases that have been concluded, almost 80 percent have settled or have been decided in favor of the investor.

It is true that when a tribunal rules in favor of the investor, the arbitrators can’t force the government to change its laws; but they can order the government to pay the investor, which has the same effect. There is no limit to what compensation foreign investors can demand. The largest award to date was more than $2 billion.

A developing country that must pay this award, some it represents up to a third of their GDP. Most governments cannot risk such a settlement and end up avoiding this kind of conflict altogether. The government often agrees to change the law or regulation that is being challenged and still pays some compensation. The threat of a case can be enough to convince a government to back away from legitimate public health, safety or environmental policies.

ISDS cases cost millions of dollars to defend and take years to reach their final conclusion. The high profile cases filed by Philip Morris International and the tobacco companies indicate that these laws have had a chilling effect around the world. Several countries have been intimidated into holding off on passing their own laws to reduce smoking. Every year of delay is a victory for tobacconists. Every year we fail to act to attract new, young smokers. In the case of tobacco, the cost of ISDS could be human life.
I would hope that if we empower corporations to challenge democratically elected laws and regulations, that we would be doing so for an extremely compelling reason. But here is the thing: The rationale behind ISDS is extremely thin. Advocates claim that in vestors such as ISDS draw foreign investment into a country, but no one has actually been able to demonstrate that this link exists. Studies have not even been able to show a significant correlation between investor protection and the level of foreign investment in that country. Instead of driving decisions to invest, ISDS provisions are being manipulated by multinational corporations.

Some companies seem to be setting up complex corporate structures explicitly for the purpose of taking advantage of existing ISDS provisions. This is what Australia is alleging that Philip Morris did to challenge Australia’s tobacco laws. The Philip Morris Hong Kong entity bought shares in Philip Morris’s Australian company just 10 months after Australia announced its cigarette plain packaging rules. It seems that Philip Morris did this for no other purpose than to gain access to the ISDS provision in the Hong Kong-Australia Bilateral Investment Treaty.

ISDS is just another arrow in the quiver of legal options available to multinational corporations and no other person, to bring petitions to an international tribunal. I think it could have profound implications for public health, safety, and the environment far outweigh any real or imagined benefit of ISDS. For these reasons, I oppose fast-track and any trade agreement that contains an ISDS provision.

I yield the floor.
I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. WYDEN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection?

Mr. WYDEN. Madam President, I spoke a little bit this morning about this whole issue—and a very serious issue it is—of currency manipulation. In effect, we are going to have two mechanisms. My view is that what Chairman Hatch and I are seeking to do is to strengthen that and to take yet another step. We direct the administration to hold our trading partners accountable when they manipulate currencies by using the most effective tools available: enforceable rules, transparency, recording, monitoring, and a variety of cooperative mechanisms. My view is that what Chairman Hatch and I are seeking to do here strikes the right balance. We get the upside of confronting unfair currency manipulation, and we don’t pick up the downside, tying our hands with respect to policy options that are completely legitimate and important.

One of those policy options that I feel especially strongly about is ensuring that the Fed has the ability to use policies to strive towards full employment. So for me, this issue really comes down to making sure we have all the tools at the Fed and elsewhere for helping to create good jobs and economic stability. I urge that we not have another financial crisis. We want to make sure that the Fed is strong in the fight against currency manipulation, but to make sure that we also avoid the downside of restricting our monetary policy tools.

I hope my colleagues will think about the unintended consequences of the Portman amendment. If we were to have another unfortunate financial crisis—and no one wants that—we all want to make sure that the Federal Reserve has the full array of economic tools to get our economy moving again and to keep workers on the job. So we are going to be faced with this judgment, and I hope my colleagues will say that the approach Chairman Hatch and I have taken will allow us to build on the first-ever negotiating objective for currency that is in the bill and accept our amendment and recognize that, as I stated earlier, we are going to have another bite at the apple when currency is certain to be an important part of a Customs conference between the House and the Senate in June.
With that, I see my colleagues are here, and I yield the floor.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. CARDIN. Madam President, let me first say that I thank Senator VYDEN for his hard work. I am one of those who believe it is important for Congress to pass trade promotion authority. I don’t believe we can complete the TPP without trade promotion authority. I think TPP is an important strategic partnership for the United States as well as an economic partnership for the United States.

Hav ing said that, I listened carefully to Senator WYDEN where the administration has raised an objection to a particular amendment and saying if that gets on the bill, they would veto the trade promotion authority. I say that because many of us who support TPA have said: Look, let’s make sure we get it right. Let’s make sure that we have an open amendment process so that those who wish to make this the strongest possible bill, because we don’t get that many opportunities to take up trade legislation.

I just mention that because yes, I come to the floor to say that we need trade promotion authority. When you look at the fact that we are a democracy with separation of the branches of government, we cannot negotiate—355 of us—with our trading partners and enter into an agreement. We have to delegate negotiating authority, and that is what TPA does. At the time we delegate that, we also must make it clear what our trade objectives are about, and we also must take advantage of that opportunity to protect workers’ rights legitimately and make sure we have a level playing field for American companies. I think that is our responsibility.

In the discussion of this bill, I want to acknowledge that we do have part of this—the paid adjustment assistance. That is important to American workers. We have Customs legislation that I wish was in this bill, because I am concerned as to whether both will reach the finishing line. But it deals with strong enforcement, and “level the playing field” currency issues are all dealt with in a separate bill that we passed earlier. I guess last week we passed the legislation on the Customs.

Let me just talk for a moment about trade promotion authority. I am one of those who believe it is important for Congress to pass trade promotion authority in the TPP. That is important to American workers. I want to compliment Senator WYDEN and Senator HATCH and the Senate Finance Committee. In reading this legislation—and I hope you all had a chance to do it—you are going to find that this really does take our delegation of authority and our expectations to a much higher level than we have ever done on areas that have not been traditionally as clear on Congress.

I will just mention a few of those. Our overall trading objective is very clear to deal with labor standards. In quoting from the bill that is before us, on the overall negotiating objectives: “to promote respect of worker rights and the rights of children consistent with core labor standards of the ILO (as set out in section 11(7))”—defined as the International Labour Organization—and an understanding of the relationship between trade and worker rights: “to promote universal ratification and full compliance with ILO Convention No. 182 Concerning the Elimination of the Worst Forms of Child Labor.”

That is in our overall objective. I want to talk a moment about the principal negotiating objectives, because there is greater consequence to the principal negotiating objectives. There are provisions included in the principal negotiating objectives that are different from what we have done in any other TPA bill.

First, yes, it does deal with the core labor rights. The principal negotiating objective that I must show us that they have done deals with the “adopts and maintains measures implementing internationally recognized core labor standards.” That is included in there.

Second, the principal negotiating objectives is the requirement for environmental law: “its environmental laws in a manner that [cannot weaken] or reduces protections afforded in those laws in a manner affecting trade or investment.” This is the United States and that party . . . .

So what we have done is that we also put in there: “does not fail to effectively enforce its environmental or labor laws, through a sustained or recurring course of action or inaction . . . .” I read that into the record because I want to make it clear that if you believe we should be negotiating trade agreements and you believe that it is the only cause of trade and promotion and can’t be done through Members of Congress individually negotiating a trade agreement, and you believe you need to be clear as to what we expect, the principal negotiating objective is where you include that language. And we have been very clear in the principal negotiating objectives in regards to core labor standards and environmental standards, because we know that to have a level playing field, we are negotiating agreements with do not have the same high standards that we have for labor, do not have the same high standards we have for the environment—we want to make sure we are not placed at a disadvantage. So it is in the principal negotiating objectives.

But we have gone further than that. In the principal negotiating objectives we put for the first time anticorruption provisions. That is in the principal negotiating provisions: “to obtain high standards and effective domestic enforcement mechanisms . . . [to prohibit] such attempts to influence acts, decisions, or omissions of foreign government officials or to secure any such improper advantage”—these are anticorruption provisions: “to ensure that such standards level the playing field for United States persons in international trade and investment.”

Well, American companies cannot do that. We have laws that prohibit that, but there should not be anyone dealing with that. In the principal negotiating objectives, we instruct our negotiators to deal with these anticorruption issues. The administration must show we have made progress—not only progress, that we have enforceable standards against corruption that would disadvantage American companies doing business in those countries. The anticorruption, the effectiveness, the enforcement of legal regimes, and the rule of law of trading partners. This is, again, a principal negotiating objective which says we have to strengthen good governance, transparency, the effective operation of legal regimes, and the rule of law of trading partners of the United States, through capacity building and other appropriate means, and create a more open Democratic society and—I let me add this, this is in the bill—to promote respect for internationally recognized human rights.

That is a principal negotiating objective. We are talking about freedom of speech, freedom of assembly, association, religious freedom. We have in the administration—if they accept our bill and sign it into law—come back to us on how we have dealt with advancing good governance, transparency, and respect for internationally recognized human rights in the trade agreement that we brought forward.

This is the first time we have included anything similar to this in a trade promotion authority act. So this is a new level of expectation of what we would accept in the administration—if they accept our bill and sign it into law—come back to us on how we have dealt with advancing good governance, transparency, and respect for internationally recognized human rights in the trade agreement that we brought forward.

We used trade as a hammer to bring down the apartheid government of South Africa. Most recently, we used trade as a hammer when we needed to deal with normal trade relations with Russia in regard to a WTO issue—where we attached the Magnitsky law
to it—that I was proud to work on with Senator MCCAIN. I thank Senator MCCAIN for his strong leadership on the Magnitsky law.

We used that opportunity, a trade bill, to advance international human rights issues in holding Russia accountable to its own standards and what it did in regard to Sergei Magnitsky. So we should take advantage of the trade promotion authority act to advance basic human rights, particularly when we are dealing with countries that, quite frankly, are challenged in that regard.

I want to read one other provision that is in the current bill dealing with trade promotion authority and dealing with the principle negotiating objectives. It spells out very clearly that it is a principal negotiating objective. We have enforcement in it. It says:

To seek provisions that treat United States principal negotiating objectives equally with respect to the ability to resort to dispute settlement under the applicable agreement, the availability of equivalent settlement procedures, and the availability of equivalent remedies.

What does that mean? What that means is that this is not NAFTA agreement. In NAFTA, we did make advances on labor and environment, but we did not include it in the core agreement. It was not effective. We had no enforcement. We had these sidebar agreements. We learned that was not the way to do it. Well, this TPA says that in regard to human rights and good governance, in regard to labor and the environment, that they are in the principal negotiating objectives and there will be trade sanctions in regard to violations—if there are violations. We hope there are not. We hope they will make the progress. But we have effective ways of dealing with our principal negotiating objectives that include enforceable issues that I think are critically important.

I started my remarks by saying thank you to Senator Wyden. I thank him very much because he has really done an incredible job in where we are today. He points out that we are not there yet. I agree. We need an open amendment process here. We need to take up more amendments on the floor of the Senate. I say that as one of those Members who have not been bashful about trying to change the rules of the Senate.

I am told by people who have been here longer than I that the rules of the Senate work. You just have to be a little patient. OK. We will be a little patient. But let's figure out a way that we can have more votes on the floor of the Senate in regard to this bill.

We do not get a chance to take up trade bills very often. I have an amendment that I want to see acted upon. I do not think it is controversial, but it is extremely important. What that amendment would do is require the President, before commencing negotiations with potential trading partners, to take into account whether that potential trading partner has engaged in a consistent pattern of gross violations of internationally recognized human rights. This amendment appropriately puts gross violations of human rights on par with renegotiating requirements of other principal negotiating objectives. So before we start picking countries with which we are going to do trade agreements, let's make sure they are not gross violators of human rights.

Now, so everybody does not get nervous—because TPA is so far advanced—it would not be possible to have the free negotiating objectives certified by the President on TPA. I understand that. There is a blanket exemption in TPA in that regard, which applies also to the amendment I am offering. But I would hope our colleagues would agree that moving forward we would want the President to take that into consideration, to make sure we have a game plan, if we are dealing with a country that has engaged in gross violations of human rights, as to how we are going correct that activity through the opening of trade.

Trade with our country is a benefit. It should be with countries that share our basic values. Lowering trade barriers should not be seen as commitments to our basic values, and that is what my amendment would do. I would urge my colleagues, at the appropriate time, to make sure this amendment is considered. I would ask their support on this amendment. Let's continue to work through the process. Let's continue to improve the bill. Hopefully, we can reach a point where we can send to the President the appropriate legislation.

I yield the floor.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. Wyden. Madam President, no more than 2 minutes. Before my colleague leaves the floor, I just want to say that the Senator for Maryland, Senator Cardin has championed for decades the cause of labor rights, environmental rights, human rights. I so appreciate his leadership in this area.

For the first time, as a result of Senator Cardin's work, human rights will be a principle negotiating objective because Senator Cardin has been spot-on in saying trade must be about human rights. So that is No. 1.

Point No. 2, my colleague was absolutely right. I want to say there is an issue—I think that is a movement that is that we have more votes here. That is why I am going to be spending all day into the night trying to bring that about. I want my colleague to know I will also be very interested in working with him on this additional amendment he has to further build on what we have in the bill. I thank my colleagues for their patience.

I yield the floor.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. Graham. Madam President, I ask unanimous consent to address the Senate as in morning business, and when the Senator from South Carolina arises, to engage in a colloquy with the Senator from South Carolina, Mr. Graham.

The PRESIDING OFFICER. Without objection, it is so ordered.

FOREIGN POLICY AND ISIL

Mr. McCain. Madam President, today, the black flags of ISIL fly over the city of Ramadi, the capital of Iraq's Anbar Province. Anbar was once a symbol of Iraqis working together with brave young Americans in uniform to defeat Al Qaeda. Today, it appears to be a sad chapter of administration's indecisive air campaign in Iraq and Syria and a broader lack of strategy to achieve its stated objective of degrading and destroying ISIL.

Equally disturbing, reports indicate over 75,000 Iranian-backed Shiite militias are preparing to launch a counteroffensive in the larger Sunni province. Whatever the operational success Shite militias may have in Anbar would be far exceeded by the strategic damage caused by sectarianism and the fear and suspicion it breeds among Iraqi Sunnis.

Moreover, the prominent role of these militias continues to fuel the perception of a Baghdad government that is unwilling to protect Sunnis, which is devastating to the political reconciliation efforts that must be central to ensuring a united Iraq can rid itself of ISIL. Shiite militias and Iranian meddling will only foster the conditions that gave birth to ISIL in the first place.

Liberating Ramadi and defeating ISIL requires empowering Sunnis who want to rise and fight ISIL themselves, including by integrating them into Iraqi security forces, providing more robust American military assistance. Indeed, the Obama administration and its spokesperson have tried to save face for its failed policies by diminishing the importance of Ramadi to the campaign against ISIL and the future of Iraq. As ISIL forces captured and sacked Ramadi, the Pentagon's news page ran a story with the headline, "Strategy to Defeat ISIL is Working." Secretary of State John Kerry said Ramadi was a mere "target of opportunity."

White House Press Secretary Josh Earnest said yesterday we should not "light our hair on fire every time there is a setback in the campaign against ISIL. Meanwhile, Ramadi, Iraq, and the region are on fire. How could anyone—how could anyone say we should not light our hair on fire when news reports clearly indicate there are burning bodies in the streets of Ramadi, that ISIL is going from house to house, seeking out people and executing them. Tens of thousands of people are refugees. What does the President's spokesman say? That we should not light our hair on fire every time there is a setback."

The Secretary of State of the United States of America said Ramadi was a mere "target of opportunity." Have we completely lost—have we completely...
lost our sense of any moral caring and concern about thousands and thousands of people who are murdered, who are made refugees, who are dying as we speak—and the President’s Press Secretary says we should not light our hair on fire.

What does the President have to say today? The President of the United States today says: Well, it is climate change that we have to worry about. I am worried about climate change.

Do we give a damn about what is happening in the streets of Ramadi and the thousands of refugees and the people—innocent men, women, and children who are dying and being executed and their bodies burned in the streets? A few weeks ago, as ISIL closed in on Ramadi the Chairman of the Joint Chiefs of Staff said the city “is not symbolic in any way” and is “not central to the future of Iraq,” the capital of the Anbar Province, the place where we lost the lives of some 400 brave Americans in the first battle of Ramadi during the surge.

These are quotes from the media reports: Bodies, some burned, littered the streets as local officials reported the militants carried out mass killing of Iraqis and civilians.

Islamic state militants searched door-to-door for policemen and pro-government fighters and threw bodies in the Euphrates River in a bloody purge Monday after capturing the strategic city of Ramadi. . . . Some 500 civilians and soldiers died in the extremist killing spree. . . . The militant groups were going door-to-door with lists of government sympathizers and were breaking into the homes of policeman and pro-government tribesmen.

So the Chairman of the Joint Chiefs of Staff said it is not symbolic in any way. It is not central to the future of Iraq. It was in response to those comments that Debbie Lee sent a letter to General Dempsey. Debbie’s son, Marc Alan Lee, was the first Navy SEAL killed in the Iraq war. For his bravery he was awarded the Silver Star and his comrades renamed their base in Ramadi “Camp Marc Alan Lee.”

“I am shaking and tears are flowing down my cheeks as I watch the news and listen to the insensitive, pain-in-flicting comments made by you in regards to the fall of Ramadi” Debbie wrote General Dempsey.

She continues:

My son and many others gave their future in Ramadi, Ramadi mattered to them. Many military analysts say that as goes Ramadi so goes Iraq.

Debbie Lee is right. Ramadi does matter. It matters to the families of the 187 brave Americans who gave their lives and another 150 who were wounded, some of them still residing at Walter Reed hospital, who were wounded fighting to rid Ramadi of Al Qaeda from August 2005 to March 2007.

And it matters to the hundreds of thousands of Iraqis, mostly Sunnis, who call Ramadi home, who are forced to flee their homes, and feel their government cannot protect them against ISIL’s terror.

Ramadi’s fall is a significant defeat, one that should lead our Nation’s leaders to reconsider an indecisive policy and a total lack of strategy that has done little to roll back ISIL and has strengthened the malign sectarian influence of Iran.

I wish to do back. Yesterday, as I mentioned, Press Secretary Josh Earnest said: “Are we going to light our hair on fire every time there is a setback?”

It is one of the more incredible statements I have ever heard a public figure make. Well, General Dempsey’s comments are equally as absurd.

The Washington Post: “Fall of Ramadi reflects failure of Iraq’s strategy against ISIS, analysts say.”

Associated Press: “Rout in Ramadi calls U.S. strategy into question.”

Bloomberg: “Islamic State Victory Threatens to Unravel Obama’s Iraq Strategy.”

The only problem with that statement is there is no strategy to unravel.

The Daily Beast: “ISIS Counterpunch Stuns U.S. and Iraq.”

According to the Associated Press: “The United Nations says it is rushing aid to nearly 25,000 people fleeing for the second time in a month after the Islamic State group seized the key Iraqi city.

The U.N. reported 114,000 people fled Ramadi in April. The U.N. reports it has helped more than 130,000 people over the past alone.

Continuing: “Bodies, some burned, littered the streets as local officials reported the militants carried out mass killings of Iraq security forces and civilians. It goes on and on.

Before I turn to my friend from South Carolina, I just want to point out, my friends, that this did not have to happen. This is the result of a failed, feckless policy that called for, against all reason, the total and complete withdrawal from Iraq after we had won with the enormous expenditure of American blood and treasure, including 187 of them in the battle of Ramadi.

In 2011, Senator Lieberman, Graham, and I argued that the complete pullout from Iraq would “needlessly put at risk all of the hard-won gains the United States has achieved there at enormous cost in blood and treasure,” and potentially be “a very serious foreign policy and national security mistake for our country.”

We wrote a long article in the Washington Post. In October, 2011, on the day President Obama announced a total withdrawal of troops from Iraq, Senator McCain called the decision “a strategic victory for our enemies in the Middle East, especially the Iranian regime,” and warned that “I fear that all of the gains made possible by these brave Americans in Iraq, at such grave cost, are now at risk.” That was in 2011.

In December of 2011, Senators McCain and Graham predicted that if Iraq slid back into sectarian violence due to U.S. pullout, “the consequences will be catastrophic for the Iraqi people and U.S. interests in the Middle East, and a clear victory for Al Qaeda and Iran.

It goes on and on. Time after time, Senator Graham and I warned exactly what was going to happen in Iraq. It was not necessary to happen. It is because of this President’s refusal to leave a force behind.

Now, my friends, before I turn to my friend from South Carolina, what was said at the same time that Senator Graham, Senator Lieberman, and I were warning of this catastrophe? What was said at the same time?

February 2010, Vice President BIDEN: I am very optimistic about Iraq. I think it’s going to be one of the great achievements of this administration. You are going to have a stable government in Iraq that is actually moving toward a representative government.

In December 2011, at a Fort Bragg event marking the end of Iraq war, President Obama said:

But we are leaving behind a sovereign, stable and self-reliant Iraq. This is an extraordinary achievement, nearly 9 years in the making.

In March 2012—this is perhaps my favorite—Tony Blinken, then national security adviser to Vice President BIDEN, stated: “Iraq today is less violent, more democratic, and more prosperous than at any time in recent history.”

This is November of 2012, and President Obama on the Presidential campaign trail said:

The war in Iraq is over, the war in Afghanistan is winding down, al Qaeda has been decimated, Osama bin Laden is dead. The war in Iraq is over. The war in Afghanistan is winding down. Al Qaeda has been decimated. Osama bin Laden is dead.

So we have made real progress these last 4 years.

In January 2014—I guess this is my favorite—President Obama on ISIS:

The analogy we use around here sometimes, and I think is accurate, is if a jayvee team puts on Lakers uniforms that doesn’t make them Kobe Bryant.

He was talking about ISIS:

The analogy we use around here sometimes, and I think is accurate, is if a jayvee team puts on Lakers uniforms that doesn’t make them Kobe Bryant.

We are seeing a dark chapter in American history, and it is the getting darker. In response to a slaughter in Ramadi, the answer seems to be: “Let’s make America great on fire [over this].” That was by the President’s Press Secretary, and that Ramadi isn’t important at all, from the Chairman of the Joint Chiefs of Staff. This is a “temporary setback.” This is, according to the Secretary of State, “a target of opportunity.”

Where is our morality? Where is our decency? Where is our concern about
these thousands of people who are being slaughtered and displaced and their lives destroyed? And we shouldn't set our hair on fire? Outrageous.

I ask my friend, Senator Graham, what we should do next.

Mr. GRAHAM. We should understand that the direct threat of the homeland is growing by the day.

If you want to be indifferent to what is going on in Iraq and say that people are dying all over the world and that is no reason for us to care or get involved, because we can't be everywhere all the time doing everything for everybody, I would suggest to you that ISIL in Syria and Iraq represents a growing threat to our homeland. But you don't have to believe me. Ask our intelligence community.

Over 10,000 foreign fighters have gone into Syria in support of ISIL over the last few months. Their goal is to hit the American homeland, so this JV team is becoming an existential threat. All of a sudden, that is an overstatement—a real threat to the American homeland.

Ramadi is a big victory for them. It is a recruiting tool. They have been able to take on the Iraqi Army. They have been able to stand up to constant air assault by the American forces. They are surviving, and they are thriving.

So if you want to stop the flow of foreign fighters into the United States, you have to fight ISIL not just in Iraq but on the battlefield. Not only are they stronger today in Iraq and Syria than they have been in quite a while, but they are expanding their influence to Libya, Afghanistan, and throughout the region.

All I can tell you is their agenda includes three things—the purification of their religion, which means 3-year-old little girls are executed. Just hear what I said: They executed a 3-year-old little girl. They are enslaving women by the tens of thousands under some twisted version of Islam. What they are doing to people we can't really talk about on the floor, because I think it would be just beyond our ability to comprehend.

The second thing they want to do is to drive out all Western influence and create a caliphate where our allies have no place. The King of Jordan would be deposed. All the friends of the United States and people who live in peace, if they fall and their place becomes the most radical Islamic regime known in the history of the world, which will destroy Israel if they can—purify their religion, destroy Israel, and come after us.

President Obama, President Bush made mistakes. He adjusted, you have not. President Bush had a defining moment in his Presidency in 2006. The Iraq war was going very poorly. We had just gotten beaten on the Republican side, and the Iraq war was one of the reasons we had the ballot box.

Mr. MCCAIN. Could I interrupt my friend and point out that both of us, because of our perception that we were losing in Iraq, under our Republican President, called for the resignation of the Secretary of Defense and a new strategy. We saw with our own party in the White House that we were failing in Iraq and we could not succeed.

Mr. GRAHAM. Yes. I remember very vividly going to the White House after multiple visits to Iraq and telling President Bush: When your people tell you this is just a few dead-enders, and this is the result of bad reporting by our media, they are wrong.

Mr. MCCAIN. If staff happens, it happens. President Bush had a defining moment in his Presidency in 2006. The strategy we had in place up to 2006 was failing. And the way you know it was failing is that if you go back there often enough—I remember the first trip we took in Iraq after Baghdad fell. We were in three SUVs. We went downtown, shopping, and met with some leaders. And every time we went thereafter, it was always a bit worse, to the point that we were inside of a tank, virtually, to go outside the wire. It was clear to anybody who was paying attention at all in Iraq that it was not working. I remember talking to a sergeant at one of the mess halls and asking Sergeant, how is it going over here?

And his answer was: Well, not very well. We just drive around getting our ass shot off.

About 1 year later, maybe 2 years later, we went back to the same unit, to different sergeant, after the surge, and I asked another sergeant: How is it going?

Sir, we are kicking their ass.

So the bottom line is that I think Senator McCain and I have been more right than wrong. But we were willing to tell our own President it wasn't working. He did make mistakes. We all have. It is not about the mistakes you make. It is how you correct your own mistakes.

This President—President Obama, you are at a defining moment in your Presidency. If you do not change your strategy regarding ISIL in Iraq and Syria—because it is one and the same—then this country is very likely to get attacked in another 9/11 fashion. You need to listen to the people in the intelligence community and those who have been in the military in Iraq for a very long time. You are about to make a huge mistake if you don't change your strategy.

I know Americans are war weary, but let me just say this to the American people. The current strategy is going to fail, and one of the consequences of failure is the likelihood of our country or our allies getting hit and hit hard. We don't have enough American forces in Iraq to change the tide of battle. We need American trainers, advisers, Special Forces units, and forward air controllers to make sure the Iraqi Army can fight back either against ISIL and the fight for Ramadi.

If we keep the configuration we have today, it is just going to result in more losses over time.

Why do we need thousands of soldiers over there? To protect the millions of us here. And the only reason I would ever ask any soldier to go back overseas for any purpose is if I believed it was important to protect our homeland. And I do. This strategy that we have in place is a complete failure inside of Syria, particularly, and it is not working inside of Iraq.

We are on borrowed time, Senator McCain. President Obama, you need to listen to sound military advice. You need to build up the Iraqi military by having more of us on the ground to help them and turn the tide of battle before ISIL gets even stronger and they hit us here. If you don't adjust, the price that we are going to pay as a nation is, I believe, another attack on the homeland.

So at the end of the day, you can blame Bush, you can blame Obama, you can blame me, and you can blame Senator McCain. We are where we are. We are in a dire situation, and the President had a chance to win. And he turned the tide of battle. But he turned the tide of battle and turned it into a failure. And that is why it is important that we go to the American people and we say to the American people: We need a new strategy. We need more of our forces on the ground to turn the tide of battle and bring this war to a close.

President Bush, like every other leader in the world, had certain information—some of which proved to be fact, some of which was fiction. We made a fair share of mistakes, but he adjusted.

President Obama had good, sound advice in front of him to leave a residual force behind. He decided to go in a different direction. When they tell you at the White House that you didn't want us to stay, that is a complete, absolute fabrication and a rewriting of history. President Obama, Vice President Biden got the answer they wanted. They made a campaign promise to end the war in Iraq. They fulfilled that promise, but what they actually done is lost the war in Iraq. And the war in Iraq and what happens in Syria is directly tied to our own national security.

I hope the President will seize this opportunity to come up with a new strategy that will protect the homeland and reset order. Radical Islam is running wild in the Middle East, and as it runs wild over there, as they rape and murder, plunder and kill and crucify, to think those people will not eventually harm us I think is naive.

The only way we are going to stop ISIL and people like ISIL is to come up with a strategy that will allow us to win. This strategy that the President should place today will ensure the existence of ISIL as far as the eye can see, the fracturing of Iraq and Syria, and one day will inevitably lead to an attack on this country. All of this is preventable with a new strategy.

Mr. MCCAIN. Madam President, on behalf of Senator Graham and me and many others, I have a message for Marc Alan Lee's mother—the mother of the first Navy SEAL who was killed in the Iraq war and who, for bravery, was awarded the Silver Star—and 186 other mothers who lost their sons in the battle for Ramadi: I will never stop. I will never stop until we have
avenged their deaths. And we will bring freedom and democracy to Iraq.

But more importantly than that is the threat this radical Islam and the Iranians pose to our Nation and the young men and women who are serving in that military.

As a result of this President’s feckless policies, we have put the lives of the men and women who are serving in the military in much greater danger. My highest obligation is to do everything in my power to see that this situation is reversed and that they get the support and the equipment they need and most of all that they get a policy and a strategy that will succeed and defeat ISIS and Iran in their hegemonic ambitions.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. SULLIVAN). The Senator from Massachusetts.

Ms. WARREN. Mr. President, I come to the floor to support an amendment I filed with Senators MERKLEY, BALDWIN, and BLUMENTHAL. The amendment is simple. It says Congress shouldn’t make it easy to pass any trade deal that weakens our financial rules.

In 2008, we suffered through the worst financial crisis in generations. Millions of families lost their homes. Millions of people lost their jobs. Millions lost their retirement savings. And they watched as the government spent hundreds of billions of their tax dollars to bail out the giant banks.

In response, Congress passed some commonsense financial reforms—the Dodd-Frank act. These new rules cracked down on the cheating and lying of the financial marketplace. They required the big banks to raise more capital so they wouldn’t need a bailout if they started to stumble. They gave our regulators new tools to oversee the biggest banks to make sure the rules were followed.

It is not true the giant banks don’t like the new rules, so for 5 years now they have been on the attack. They have sent their armies of lobbyists and lawyers and their Republican friends in Congress to try to roll back the rules and let the giants of Wall Street run free again. Democrats stood strong to fight off these attacks because we knew that thoughtful rules can help stop the next financial crisis and protect our working families from another great recession. But now, if this fast-track bill passes, Democrats will be handing Republicans a powerful tool they can use to weaken our financial rules.

Here is how it works: This fast-track bill applies to any trade deal presented to Congress in the next 6 years, which is through the end of the Obama Presidency, through the entirety of the next Presidency, and into the Presidency after that. Fast-track prevents anyone in Congress from offering any amendments to the bill. And if the Senate, with fast-track, a trade bill can pass with just 51 votes, not the 60 typically required for major bills.

What if we have a Republican President in 2016 or 2020? Look, I hope that will not be the case, but this is a democracy and it is not up to me. Most Republicans—including ones currently running for President—are committed to rolling back financial reform. With fast-track, we weaken our financial rules in a trade deal and then ram it through Congress with just 51 votes in the Senate. That is a lot easier than the 60 votes needed for a head-on attack on the financial rules through the normal process.

This is a real risk. We are already deep into negotiations with the European Union over a massive trade agreement. The European negotiators are pressing hard to include financial reforms as part of that trade deal. And lobbyists from the United States have recognized that the European trade deal is a great opportunity to weaken America’s financial reforms. Here is what a member of the European Parliament said just a few months ago: “I have been approached by lobbyists that have clearly argued they want to have a weak European regulation, much weaker than Dodd-Frank, in order to use that afterwards as a level of undermining Dodd-Frank in the transatlantic negotiations.”

The big banks on both sides of the Atlantic are pushing for changes, too. A letter from some of the largest financial industry groups in Europe and the United States called for an “ambitious chapter” on financial regulations in the European trade deal. I don’t think they are looking to make our regulations stronger.

Michael Barr, a former senior Obama official at the Treasury Department and one of the architects of Dodd-Frank, said that the risk to Dodd-Frank in a European trade deal is “real and meaningful and worth worrying about” and that European officials are “barnstorming the U.S., looking for support to include financial services as part of the talks on the proposed Transatlantic Trade and Investment Partnership,” while the financial industry looks to use talks to “overturn the pesky—and highly effective—rules being implemented in the U.S. under the Dodd-Frank act.”

The Obama administration, to their credit, has stood strong against such proposals. Jack Lew noted in testimony before the House Financial Services Committee that there is “pressure to lower standards” on things such as financial regulations in trade deals but that the administration believes that is “not acceptable.” Our lead negotiator, U.S. Trade Representative Michael Froman, has said that the United States is “not open to creating any process designed to reopen, weaken, or undermine implementation” of Dodd-Frank. And the Obama administration says our trade deals should not include regulation of financial services. I agree. But this President won’t be President in 18 months, and there is nothing this President can do to stop the next President from reversing direction in the European negotiations.

Senator MCCONNELL certainly knows this. That is why he is telling Republicans that if we want the next Republican President to have a chance to do trade agreements with the rest of the world, this bill is about that President as well as this one.”

That is why I am proposing this amendment—to make sure no future President can fast-track a trade agreement that weakens our financial regulations. All of my colleagues who believe in holding the big banks accountable and keeping our financial system safe should support this amendment. I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. PORTMAN. Mr. President, I have come to the floor a number of times this week to talk about the trade issue, and we are now debating that legislation. I have put up this sign because it is being used by folks on our side of the aisle to talk about the importance of this agreement. It talks about a free trade agreement that will help our economy. I agree that it needs to be fair, and I agree we need to expand exports.

I support for the first time in 7 years giving the U.S. Government the ability to knock down barriers to our farmers, our workers, and our service providers so we can get a fair shake, but we have to be sure it is fair. And so to my colleagues who have put up this sign and then have opposed the amendment I am about to talk about, I hope they will focus on the fair part as well as the expansion of trade to make sure it does indeed give our farmers and workers a fair shake.

There has been a lot of debate about a particular amendment dealing with currency manipulation. It turns out everybody is against currency manipulation. Maybe that has been an evolution, but everybody is now saying the same thing. The question is whether it should be enforceable.

AMENDMENT NO. 129

There has been a lot of discussion on the floor here today about the amendment I am offering with Senator STABENOW, and frankly there has been some misinformation out here that I want to clarify.

First, I want to talk about what these two amendments do. They are very similar, with one exception. The amendment being offered by Senator HATCH and Senator WYDEN does not include our major definition—targeting protracted and large-scale intervention in the exchange markets by a party to a trade agreement to gain
Mr. PAUL. Mr. President, there comes a time in the history of nations when fear and complacency allow power to accumulate and liberty and privacy to suffer. That time is now. And I will not let the PATRIOT Act—the most unpatriotic of acts—go unchallenged.

At the very least, we should debate. We should debate whether we are going to relinquish our rights or whether we are going to have a full and able debate.
over whether we can live within the Constitution or whether we have to go around the Constitution.

The bulk collection of all Americans' phone records all of the time is a direct violation of the Fourth Amendment. The Second Appeals Court has ruled it is illegal.

The President began this program by Executive order. He should immediately end it through Executive order. For years, he has said the program is illegal. Yet, he does nothing. He says: Well, Congress can get rid of the PATRIOT Act; Congress can get of the bulk collection. Yet, he has the power to do it at his fingertips. He began this illegal program. The court has informed him that the program is illegal. He has every power to stop it. Yet, the President does nothing.

Justice Brandeis wrote that the right to be left alone is the most cherished of right present in the United States. Among civilized men. The Fourth Amendment incorporates this right to privacy. The Fourth Amendment incorporates this right to be left alone.

When we think about the bulk collection of records, we might ask, well, maybe I am willing to give up my freedom for security. Maybe if I just give up a little freedom, I will be more safe.

Most of the information that comes on what is safe comes from the people who have secret information you are not allowed to look at. So you have to trust the people—have you to trust those in our intelligence community they are being honest with you, that when they tell you something important these programs are and that you must give up your freedom, you must give up part of the Fourth Amendment—when they tell you this, you have to trust them.

The collection is having a great deal of difficulty trusting these people. When James Clapper, the head of the intelligence agency, the Director of National Intelligence, was asked point blank, are you collecting the phone records all of Americans in bulk, he said no. It turns out that was dishonest. Yet, President Obama still has him in place.

So when they say how important are these programs and how they are keeping us safe from terrorists, we are having to trust someone who lied to a congressional committee. It is a felony to lie to a congressional committee, and nothing has been done about this.

About a year ago, we began having this debate because a whistleblower came forward and said: Here is a warrant for all of the phone records from Verizon.

You say: Well, maybe they have evidence that people at Verizon were doing something wrong.

There is no evidence. This is that they want everyone's phone records.

I don't have a problem with going after terrorists and getting their records, but you should call a judge and you should say the name of the terrorist, and then you get their records as much as you want.

If I am the judge and they ask me for the Tsarnaev boy's records—the Boston Bomber—the Russians had investigated him. He had gone back to Chechnya. Yet, nobody asked for a warrant to look at his stuff. We didn't even know he went back to Chechnya. And then we had the disaster at the Boston Marathon.

I would make the argument that we spend so much time making the haystack bigger and bigger that we can't find the needle because the haystack is too darned big. We keep making it bigger and bigger, and we are taking resources away from the human analysts who should be looking and seeing when Tsarnaev travels outside of our country.

We recently had another terrorist travel from Phoenix to Texas. We had arrested him previously. My guess is there was sufficient cause—probable cause—for a real warrant to look at his activities, and we should. But I don't think we are going to look at everybody looking at every American's records.

In fact, when this came up, the government said: Well, we have captured 52 terrorists because of this. But then when the President's own privacy commission told him to stop, there was a debate about whether one had been aided by not found by these records and would have been found by other records.

We have to decide as a country whether we value our Bill of Rights, whether we value our privacy, or whether we are willing to give that up to feel safer. Because I am not even sure you really can argue that we are safer, but people will argue that they feel safer. But think about it. Is the standard to be that if you have nothing to hide, you have nothing to fear but that everything should be exposed to the government, that all of your records can be collected?

Some will say that are ex just boring old business records. Why would you care if they could find out who you called and how long you spoke on the phone? Well, two Stanford students did a study on this. They got an app and put the app on the phone—voluntarily—of 500 people. These people then made phone calls. All they looked at was how long they spoke—metadata—and whom they spoke to, the phone number to which they were connected. What they found was that 85 percent of the information, 85 percent of the time they could tell what their religion was; more than 70 percent of the time they could tell who their doctor was; they could tell what medications they took; they could tell what diseases they had. The government shouldn't have the ability to get that information unless they have suspicion, unless they have probable cause that you committed a crime.

When they looked at this, the appeals court was flabbergasted that the government would make the argument that this was somehow relevant to an investigation—because that is what the standard is. Under the Constitution, the standard is probable cause, which means there is some evidence or suspicion that you have done something illegal. But the standard now is relevance, which means, is it relevant to an investigation? But the court said that lower that lesser standard of relevance completely destroys any meaning of any words if we are going to say every American's phone record in the whole country is somehow relevant to an investigation.

But it gets worse. They don't even have to prove it. The government says to the court that they think it is relevant, but there is no challenge and there is no debate. It is just taken at face value, or at least it was until this court ruling was appealed. So we now have the second appeals court that said this bulk collection of phone records is illegal.

There are many different programs going on. This is the only one we know about. There are others. There are people collecting our records, and the only reason we know about it is not because the government was honest with you—government was dishonest. The Director of National Intelligence tried to lie to the people in Congress and say it didn't exist. So we know about this one, but what other programs are out there?

There is something called Executive Order 12333. There are some who believe this is just the government using the bulk collection; that there is an enormous amount of data being collected on people through this other program.

One question is, if there is no Fourth Amendment protection to your records, are they collecting your credit card bills? I don’t know the truth of that. I would sure like to know. I don’t know whether to trust their answer if I asked them, if they will be honest with us and say are they collecting our credit card records?

People might say: Well, your credit card records and just boring old business records. Why would you care?

But think about it. If the government has your Visa bill, they can tell whether you drink, whether you smoke, what restaurants you go to, what your reading material is, what magazines or books you read, what doctors you see, what medicines you buy? Do you buy medicine? Do you go to the gym? All of these things can be determined.

Not only can they determine stuff directly from your phone bill and directly from your Visa bill, they now have the ability to merge all of this information. Apparently, they have the ability to collect your contact lists, and sometimes they are collecting this in a way that is somewhat nefarious.

We are supposed to be spying on foreigners—foreigners who might attack us. I am all for that. But what happens is there is a lot of data that goes in and out of the country. In fact, sometimes an e-mail from New Jersey to Colorado
might go through a server in Brazil. Once it gets to a server in Brazil, they can not only look at your metadata—how long and whom you talked to—the content is now available. It all gets scooped up. It is all being analyzed. They are getting a social network of who your friends are. Some have said this could potentially have a chilling effect on the First Amendment.

There was a time in our country not too long ago, in the lifetime of most of us, we would do what the NAACP might not want your neighbors to know or if you were a member of the NAACP, you might not want your neighbors to know or if you were calling the ACLU or a member of the ACLU, you might not want your neighbors to know. It can have a chilling effects on your expression of your speech, whom you associate with, and whether you are fearful to have association with people because you are fearful that someone might be known by the government.

People say: Well, certainly that would never happen. During the civil rights era, many of the civil rights leaders were spied upon illegally by the government through illegal wiretaps.

Many Vietnam war protesters were also spied upon illegally by the government. They believe that the Fourth Amendment is to have checks and balances. Everything that is great about our country is checks and balances.

Let’s say we have a rapist or a murderer in Washington, DC, today. Let’s say it is a morning and the police come to the house. They think the rapist or murderer is inside. They do not just break the door down. If there is no commotion, no noise, no imminent danger, they stand outside and get on their cell phone and call a judge. Almost always the judge grants a warrant. Then the police go in.

But why do you want that to happen? Sometimes people come up to me and they say, police are in the NAACP. I work for the FBI. Many of my friends are policemen and work for the FBI, and they say “Don’t you trust us?” It is not about the individual. Laws are not about whether we trust one person or your brother is a policeman and your brother would never do anything wrong. It is not about your brother. It is not about your friend. It is about the potential for there to be a rotten apple. Someone who would take that power and abuse it. We have seen this not for most of us. It is for the exception. It is for something out of the ordinary. But it is also to prevent systemic bias from entering into the situation. For example, there was a time in the 18th century that might have been that a White person from the government might have decided they were going into the home of a Black person just because of racial bias. You get rid of bias by having checks and balances, by always saying you have to ask somebody else for permission.

When we were leading up to the war for our independence in about 1761, I believe, James Otis was arguing before the courts. He was arguing against something called the writs of assistance. A writ of assistance was a type of warrant, but it was a generalized warrant. No one’s name was on it; it just said: You are welcome to search anybody’s house to see they are paying the stamp tax.

Do you wonder why the Colonists hated the stamp tax? It was not just the tax; it was the fact that the government could break the door down, the papers come in, and they went through the papers. Writs of assistance were something called a general warrant.

This same battle had gone on in common law in England and developed as one of our precious rights that we actually kept from the English tradition.

John Adams wrote about James Otis fighting against these general warrants, and he said it was the spark that led to the American Revolution. That is how important this is.

The Fourth Amendment was a big deal to our Founders. The right to privacy, as Justice Brandeis said, the most cherished of rights, is a big deal. We should not be so fearful that we are willing to relinquish our rights without a spirited discussion. I am hopeful.

The debate over the PATRIOT Act, which enshrines all of this and got this started, goes on about three years or so. It has a sunset provision. It is set to expire in the next few days. But we are mired in a debate over trade. There is another debate over the highway bill. And the word is that we will not get any time to actually debate whether we are going to abridge the Fourth Amendment, whether we are going to accept something that one of the highest courts in our land has said is illegal. Are we going to accept that without any debate?

I, for one, say there needs to be a thorough debate, a thorough and complete debate about whether we should allow our government to collect all of our phone records all of the time.

In England, about the time of James Otis, there was another man by the name of John Wilkes. I learned about this story in reading my colleague Senator Lee’s book recently. John Wilkes was a rabble-rouser. He was a disserter. Some called him a libertine. I do not know about his morals, but I know he was not afraid of the King.

The King was becoming more and more powerful at that time. He said: Arrest anybody.

So they broke down John Wilkes’ door. They rifled through and ruined the contents of his house, arrested him, put him in irons, and took him to the Tower of London. They did the same to 49 other people. But John Wilkes was not about to take this lying down, so John Wilkes actually then decided that he would sue the King.

I tried doing the same thing. I tried suing the President, and it has not gone so well. But the thing is that everybody ought to think they have the ability and the equality to sue even their leaders.

I sued the King, and something remarkable happened. This was in the early the 1760s. When he sued the King, he actually won. I think the award was like 1,000 pounds, which would be a significant sum of money for us today’s terms. It was a big victory. It was part of the discussion on simultaneously over here with James Otis. It was a big deal.

So often my party does such a great job talking about the Second Amendment and the right to bear arms. I am not. All the thing is. I do not think you can adequately protect the Second Amendment unless you protect the Fourth Amendment, the right to privacy. Your house is your castle. The right to not have your castle invaded is so important.

I will give an example. A lot of people think we will be safer if we collect gun records. A few years ago, they collected all the gun records and they had them in Westchester County, near New York City. A newspaper they would publish them. They really did not think this through. But you can see the danger of what happens when the government has records and then releases them to everybody.

Imagine a woman who has been abused or beaten by her husband and has left him. She lives in fear of him finding her. Now the registration comes out and says where she lives and that she has a gun or, worse yet, where she lives and that she does not have a gun.

Think about prosecutors and our judges. I know many of them who put bad people away, and many of them have concealed carry. Many of them travel to work. The security meets them in the parking lot. They do not to work, but they worry. We have had sheriffs and we have had prosecutors killed in Kentucky because the criminals were angry that they were locked up.

We do not want all of our records by the government to be put out there in public for everybody to know where we live and whether we have a gun.
You can see the issue of privacy is not a small issue. It is a big issue. It was incredibly important to our Founding Fathers.

Some have said it is too late to even get this back. There have been articles written in the last few weeks that say that whether or not the PATRIOT Act expires, the government will just keep on doing what they are doing. In fact, there is a provision in the PATRIOT Act that says any investigation already begun before the deadline can go on perpetually.

The other thing is that there are people now writing—John Napier Tyte, who was the Internet watchdog for this program, wrote that he believes that Executive Order 12333 is really allowing all this bulk collection under what the President says are article II authorities. Article II gives the President and the executive branch different powers, but these are not unlimited powers. Some think that because the President has the absolute power when it comes to war, Article II actually comes after Article I. In article I, section 8, the President was told he does not get to initiate war. The most basic of powers with regard to war were not actually given to the President; they were given to Congress.

What is sad about this, what is going on now is that Congress has not shown sufficient interest in what the executive branch does on a host of things, whether it be regulation, whether it be the enormous bureaucracy, but really so much power has shifted and gone from Congress and wound up in the executive.

It is the same way with intelligence. We have intelligence committees, but the question is, Are they asking sufficient questions? There are some. Senator Wyden has been a leader in this. He and I have worked together. He really hasn't lead the leader because he has been on the Intelligence Committee. He has more information, really, than the rest of us do, but he at times has been hamstrung because once you know information, if it is told to you in a classified setting, you are not allowed to talk about it. Sometimes it actually makes sense, if you want to speak out, not to actually learn through the official channels but to read on the Internet because if you learn about it through official channels, you can't say anything about it even if the government is lying about it.

We are talking about an enormous amount of information. We are talking about all of your phone records all of the time.

Recently, there were some complaints by people in the newspaper. They said: Well, the government is really only getting one-third of your records; they are not getting enough of your records. Some want them to get more of your records.

The objective evidence shows, though, that we really have never gotten anyone independently; we have not found any terrorist independently of this. But still some people are so fearful, they are like: How can we get terrorists? What is sad about this, is we do not just let the Fourth Amendment lapse, and if we do not just let everybody pass out warrants.

That is what we do under the PATRIOT Act. We do not allow the police to write their own warrants. This is one of the fundamental separations we did with the Fourth Amendment. This was probably the most important thing we did, to separate police power from the judiciary, to have a check and a balance so you would never get systemic bias, so you would never get political or religious or racial bias in your judicial system. We separated these powers.

We now let the police write their own warrants. The FBI is allowed to write their own warrants. These are called national security letters. They do not have to be signed by a judge. There is no probable cause. If they come into your house, there is no ability for you to complain. In fact, sometimes they are now coming into our houses without us knowing about it. This is called a sneak-and-peek warrant. Like everything else, the government says we will not be overrun with terrorists if we do not let the government quietly sneak into our house when we are gone and put in listening devices, search through our papers and read all of our stuff while we are gone.

They do not have to have probable cause necessarily for these. It is a lower standard. But we are letting the FBI write this without a judge reviewing it.

I have a friend who is an FBI agent. I play golf with him. He is like: Don't you trust me? I do trust him. I do not trust everybody.

Madison said that if government was comprised of angels, we would not need restrictions, we would not need laws. Patrick Henry said that the Constitution is about restraining the power of government. It is not about the vast majority of good people who work in government. It is about preventing the one bad person who might get into government and decide to abuse the rights of individuals.

Some say: Well, the NSA has never abused anyone's rights. That may or may not be true. They are giving us the information. We do not get to independently look at the information. They are telling us. It is the same group who says they were not doing any bulk collection of data at all. But even if we presume they are telling us the truth, we really see the end of the story because the story should be that we do not want to allow the abuse of power to happen.

As the debate unfolded the first time for the PATRIOT Act, something occurred that happens frequently around here. There is not enough time. Hurry up, hurry up, there is not enough time. It is kind of like the debate right now. If we do not care enough, if we do not care what is happening, if we are going to relinquish our rights or constrain our rights to the Bill of Rights, even though we know it is coming up and that we have to do something else that occupies all of our time?

Senator Wyden and I have a series of amendments. Our amendments would try to reform some of this. Our amendments would say that NSLs, national security letters, cannot just be signed by the police, that they would have to go to a judge.

Wyden and I argue: Well, how would we catch terrorists? The same way we catch other people who are dangerous, such as murderers and rapists, anybody in our society. In fact, when you look at the criminal process for criminal warrants, you are not allowed to talk about it. Some-
Smith and go to Verizon, but it is an individualized warrant. I don’t think we should have generalized warrants.

There are some who want to replace the bulk collection of records with a different system where the government doesn’t store records, but the fear phase companies hold the records. I am also concerned about this for one big reason: The recent court case has now said the PATRIOT Act does not justify the collection of records, that it actually illegal. Now that the Supreme Court is now saying section 215 doesn’t allow a bulk collection, that in trying to reform this, what is called the USA FREEDOM Act, we will actually be granting new power to section 215 that the court says is not there. The court is saying that it stands logic on its head to say relevance means nothing, that everybody’s records in the whole country could be relevant.

We have even changed, over time, the investigations and whether there is a full-blown investigation at the beginning of an investigation. Who gets to decide or define what an investigation is? The bottom line is that we look at this, and as we move forward, we have to decide whether our fear is going to get the better of us.

Once upon a time, we had a standard in our country that was innocent until proven guilty. We have given up on so much. Now people are talking about a standard that is: If you have nothing to hide, you have nothing to fear. Think about it. Is that the standard we are willing to live under? Think about whether you believe you still have a privacy interest in the records that are held by the credit card companies, your bank or the phone company.

In the PATRIOT Act, they did something to make it easier to collect records and to override your privacy agreement. If you read the nitty-gritty of any of these agreements that you have when you are on the Internet, you do voluntarily say that your information will be shared in an anonymous way, but they promise they will not give your name to somebody.

The phone company has the same sort of privacy agreement, but what has happened through the PATRIOT Act is that we have given them liability protection. At first blush, you might say we have too many damn lawsuits, but that way we have a search warrant. When you are on the Internet, you do voluntarily say that your information will be shared in an anonymous way, but they promise they will not give your name to somebody.

The Congress is maybe a decade behind the people. If you look at this and say: Where are the American people on this, well, there has been poll after poll. Well over half the people—maybe well over 60 percent of the people—think the government has gone too far. But if you want an example of why the Senate and House doesn’t represent the people very well or why we are maybe a decade behind, I would bet that 20 percent of the people here would vote to just stop this—to truly just stop it—at the most; whereas, 60 to 70 percent of the public would stop these things.

You are not well represented. What has happened is that I think the Congress is maybe a decade behind the people. I think this is an argument for why we should limit terms. I think it is an argument for why we should have more turnover in office because we get up here and stay too long and get separated from the people. The people don’t want the bulk collection of their records, and if we were listening, we wouldn’t do that.

The vote in the House, while I don’t think the bill is perfect, and I think it may well continue bulk collection, was over 300 votes to end this program and to say we are no longer going to have bulk collection. Yet it looks like the majority in Congress still need bulk collection. In fact, the biggest complaint from the majority of this body is that we are not collecting
enough records and that we need to collect more records.

Can we have security and liberty at the same time?

I had breakfast with a high-ranking official from our intelligence community a few days ago, and he said to me: How much information do you get from metadata and how much do you end up getting from a warrant? He said, without question, you get more from a warrant. People talk about whether we can go one hop or two hops. That means if you are suspected of terrorism and you called 100 people—if you look at your records, that is one hop. If you look at the next 100 records, that is a second hop. As you go in, this pyramidal gets bigger and bigger until you are talking about tens of thousands of people.

As you get further and further away from the suspect, I see no reason you couldn’t keep getting warrants. If they say they are slow and insidious and there is not a judge, put more judges on the court. If they say they need them at 3 in the morning, put the judges on duty at 3 in the morning. We call judges for a warrant in the middle of the night in America. There is no reason why you can’t have security and the Constitution at the same time.

The President instituted the Privacy and Civil Rights Board. They went through a lot of this and some of the things they came up with, I think, were truly astounding. The amount of information, I think, is mindboggling—of what is being sucked up in this. There is something called section 702 of FISA, and this has allowed them to collect information on Americans who might have been communicating with a foreigner. You say: Well, that American is probably suspicious. Well, it goes out in ripples and it becomes this enormous amount of—cache of information.

When they looked at some of this recently—the Washington Post looked at this—they found that 9 of 10 intercepted conversations were not the intended target. So I think there was one estimate that in the last year we had 89,000 targets. If you multiply that and say it is only one-tenth of what we actually take, you are now looking at 900,000 records of people who had nothing to do with terrorism. They didn’t even know the person. They incidentally talked to a person who talked to the person. It could be the terrorist called Papa John’s and you called Papa John’s, so now you are in the same phone tree network. That can ripple out in waves. That information should not be collected, it should not be put in a database, and it should not be stored. Ultimately, we are collecting so much information that it is all of your information.

One thing that should concern us about—simply going from a system where the government collects all of these records and stores them in Utah to one where the phone company does it—actually some people in the NSA are acquiescing and saying it is not so bad. That concerns me that the NSA is saying “not so bad.” It concerns me that we are still going to have bulk collection.

The debate we really need to have is whether, if someone else is holding your records, if you still have any kind of privacy interest in your records. I personally think your phone records are still partially yours, in a way, or that I have an interest in them. This is going to become very important because your records ultimately—there probably will not even be any records in your house, they will be on your phone, and then your phone records are connected to the company. Who owns them? Do you have a right to privacy in those records? I think you can have security and freedom at the same time, but I think if we are not real, this is going to get away from us.

When they found out that 9 out of 10 intercepts were actually not the intended target, just ancillary information they picked up, they also found that 50 percent contained email addresses that were U.S. citizens. So let’s say you collect a million pieces of information and you are just gathering this up and you are intending to go after foreign targets who might be terrorists, but over half of this information, much of it incidentally gained, is actually U.S. citizens. So this is sort of an end run—they call it backdoor searches—but it is sort of an end run that has gone around the Constitution, gone around the Fourth Amendment, to collect information that we have actually said should be illegal to be collected that way, but we are doing it because we have done an end run around. Also realize you can send an email from Virginia to South Carolina and it might go over a server in Brazil. If your email goes over a foreign server, all of a sudden, boom, everything is done. The Constitution is out the door. Then they do the same thing to you. They can get around the Constitution. It is never revealed to you; nothing is ever presented to you. It is all done within the executive branch, with no advocate on your side.

There are several programs that came out through this that are being collected. It is not just the bulk collection. There is a program called PRISM that has been out there for a while and there is another one called Upstream. In PRISM, a program that collects Internet communications of foreign nationals from at least nine major Internet companies. I think this wouldn’t have happened if the Internet companies were not there. I think what would have happened is they would have said we are violating our obligation to our customers and we are going to fight against this. But the PATRIOT Act even made it worse. The PATRIOT Act made it a crime to reveal that you had been served with a warrant. So we have gone way beyond any typical constitutional mechanisms.

In the Upstream Program, a similar thing happened, but this is when the data is collected as it moves across U.S. junctions. The problem is not so much going after foreign communications but going after incidental and ancillary communications that involve American citizens.

John Napier Tye was a section chief for Internet freedom in the State Department’s Bureau of Democracy. He was going to give a speech about why I think this was very telling. This is reported in the Washington Post. He had written out his speech and he sent it for review. In his speech, he said: If U.S. citizens disagree with congressional and executive determinations regarding the proper scope of intelligence activities, they have the opportunity to change policy through democratic process.

And we think, Who could object to that? What would his colleagues say? How could they possibly object to that? So we have the right through democratic process to change policies? They had him strike “through intelligence processes” because I guess they apparently think we don’t have the democratic ability to change things. The truth is it may be true because a lot of this is being done by Executive order.

Executive Order No. 12333 has no congressional oversight. In fact, the question was asked recently of one of the Senate leaders. Will you investigate this? Now, there may well be a secret investigation going on, but there was some indication it was really outside of our purview.

I don’t think anything the executive branch does should be outside of our purview. The whole idea of having co-equal branches was to have checks and balances. One of the biggest problems I find in Washington is that sometimes the opposition party—if we have a Democratic President and a Republican Congress, you will get a little bit of adversity and a little bit of pitting ambition against ambition and check and balance. But the party that is in power also. What happens if the President doesn’t tend to push back, probably for partisan reasons. Now, it is not just the other party; it happens when Republicans are in power also. What happens is the political party that is in power tends to sort of be open to letting things move on, just letting the President accumulate more power. But I think this should be telling that when he said we could change things through democratic action, President Obama’s instructions to counsel told him that, no, that wasn’t true. He was instructed to amend the line and make a general reference to our laws and policies but to leave out intelligence policies as if we don’t really get a say in what they do and what information they collect on us.

John Napier Tye goes on to warn us. He says: Unlike section 215, Executive Order No. 12333 authorizes collection of the content of communications, not just metadata, even for U.S. citizens. So quite often we are told—we were told for years—don’t worry, they are
TheEleventhAmendment,among others, said that the Federal government must get a warrant to search your home, even the home of a citizen of the United States. There is a warrant requirement in the Constitution, and we always want to exclude American citizens from the warrant requirement.

So the question is, if we get rid of bulk collection, will the Executive continue to do it anyway?

The other question is, Why doesn’t the President stop this? It was started by Executive action and can be ended by Executive action at any time. Where is the Executive? How come the press gives him a free pass just to say Congress needs to fix this? Sure, I missed it up, I broke it; I am doing something that the second appeals court said is illegal, and I am going to keep on doing it until Congress does something. Why don’t we see any questions from the press? Why don’t we see anybody from the media saying, Mr. President, it is illegal. You started it. You were performing a program that is collecting all of the phone records from all Americans. It has been declared illegal from the second highest court in the land. Why don’t you stop? I have not ever heard the question asked of him.

With the Executive order, apparently because this, they say, is article II, and then article II to them means they can do whatever they want without any oversight by Congress, the conclusion by Justice Harlan is that there is nothing to prevent the NSA from collecting and storing all communications. This concerns me.

The President instituted or brought together a group called the Review Group on Intelligence and Communications Technologies. In it, they came forward with some recommendations. Recommendation No. 12 was that all of this data—this incidental data that is becoming part of these databases that is collected under these authorities—the Executive order—should be immediately purged unless there is a foreign intelligence component to it. The Review Group further recommended that a U.S. person’s incidentally collected data should never be used in a criminal proceeding against that person.

So now we are back to what I was talking about earlier. If you are going to go away from the Constitution, if you are going to say to catch bad guys we can’t really have the Constitution, we are going to have to have a bar that is a lot easier to cross that allows us to do kind of what we want, wouldn’t you want to exclude American citizens from being convicted or put in jail for a crime? How hard is that? It is kind of like this: The question is, if the government can come in without a valid search warrant, without announcing they are in your house, collect all of your data, would you want them to have hours and hours in your house without any probable cause and then start arresting you for this?

There are rumors we are doing this. There are rumors that intelligence warrants, which are nonconstitutional, which are a lower standard, are being used to get regular criminals. What they do is collect information through bulk data, now that they get enough to be convinced that you are a drug dealer, and then they arrest you by getting a traditional warrant, but they are using information they got illegally to get to you.

Section 213, this whole sneak-and-peak, where they go in without announcing that they have been in your house, 99.5 percent of the people arrested there who committed a domestic crime. They are not terrorists. So we are told you have to have a PATRIOT Act to get terrorists. Yet what we really find is that they are using it in a way that is not honest. They are using a lower standard—a standard less than the Constitution—and they are using that standard then to arrest people for basic domestic crime.

The President’s Review Commission in recommendation No. 12 recommended that this incidentally collected data not be used criminally against anybody. They gave their recommendation to the White House. The White House stated that the adoption of these recommendations they requested would require significant changes and indicated it had no plans to make any changes. So the President’s own commission says there is great danger in using a lower, less-than-constitutional standard to collect great amounts of information that can be searched. There is great danger to privacy. There is also great danger to using information collected outside of the Constitution. There is great danger in then using that for domestic prosecution, and the President said he has no intention of any changes.

When I think of this President, it is probably what disappoints me most. There were fleeting times when this President was in the U.S. Senate that he stood up for our Constitution. In fact, there is a quote from the President when he was running for office: ‘‘The White House stated that the adoption of these recommendations they requested would require significant changes and indicated it had no plans to make any changes. So the President’s own commission says there is great danger in using a lower, less-than-constitutional standard to collect great amounts of information that can be searched. There is great danger to privacy. There is also great danger to using information collected outside of the Constitution. There is great danger in then using that for domestic prosecution, and the President said he has no intention of any changes. When I think of this President, it is probably what disappoints me most. There were fleeting times when this President was in the U.S. Senate that he stood up for our Constitution. In fact, there is a quote from the President when he was running for office: ‘‘The right to be let alone is the most cherished of rights.’’ It is ‘‘the [right] most valued among civilized men.’’

We have this debate still sometimes, though, because some conservatives say: There is no right to privacy. I don’t see it in the Constitution. And conservatives who argue that there is no right to privacy aren’t remembering the 9th and 10th Amendments very well, particularly the 9th Amendment.

The Ninth Amendment says that all the rights aren’t listed, but those that aren’t listed are not to be disparaged. Even our Founding Fathers worried about this. Our Founding Fathers came and they at first thought we would just do the Constitution without the Bill of Rights. Some of them worried. They said: If we do the Bill of...
Rights, people will think that is all we have. If we list ten different amendments, they will think that is all of our rights. So they finally convinced everybody to go along with it by saying: We will put in the 9th and 10th amendment, with the 10th Amendment limiting what the Federal Government and everything else is left to the States and the people, respectively. But the Ninth Amendment, which is in many ways sort of the stepchild of our amendments, hasn't been adequately, I think, adhered to or recognized. It says that those rights not listed are not to be disparaged.

Sometimes we have this discussion because some people say it has to be enumerated. I agree completely if we are talking that the powers given to government should be enumerated. They are few—few and limited, the powers given to the government. But it is the opposite with your rights. Your rights are many and infinite. Your rights are enumerated, and you do have a right to privacy. So while the word “privacy” is not in the Constitution, in the Fourth Amendment, though, they do talk a lot about your privacy. It is about your home, that your home is your castle.

The exact words of the Fourth Amendment are:

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons and things to be seized.

The reason why we should worry about whether a warrant is individualized is we have had some tragic times in our history. During World War II we didn’t individualize the arrests of Japanese Americans. But we did say: That is so-and-so who lives in California, and we think they are communicating with Japan and telling our secrets. We indiscriminately rounded up all of the Japanese and incarcerated them.

There have been times in our history when we haven’t acted in an individualized manner. It happened throughout the South in the old Jim Crow South. We told people that we were going to relegate them to a certain status based on a general category.

So when we talk about individualizing warrants, we are talking about trying to prevent bias from occurring. Now, bias can occur for a lot of different reasons. I tell people that you can be a minority because of the color of your skin or the shade of your ideology. You can be a minority because of your religion. You can be a minority because you are home-schooled. But the thing is, if you are a minority, if you are a dissenter, if you dissent from the majority, you need to be very, very aware of your constitutional rights. Be very, very aware of the Bill of Rights.

The Bill of Rights isn’t so much for the prom queen. The Bill of Rights isn’t so much for the high school quarterback. Many people in life always seem to be treated fairly. The Bill of Rights is for those who are less fortunate, for those who might be a minority of thought, deed or race. We have to be concerned about the individualization of those who might be a minority of thought, deed or race. We have to be concerned about the individualization of the rights and the danger of people being treated in categories.

Right now we are treating every American in one category. There is a general veil of suspicion that is placed on every American now. Every American is somehow said to be under suspicion, because we are collecting the records of every American. We talk about metadata and whether or how much it means or what the government thinks it can determine from metadata. There are some people who say: Don’t worry. It is just your phone logs. It is no big deal. It is just boring old business records. We should be a little bit concerned by the words of one former member of Congress who said that “we kill people based on metadata.” He wasn’t referring to Americans. He was talking about terrorists. But we should be concerned that they are so confident of metadata that they would kill someone.

Instead of our believing that metadata is no big deal and just should be public information and anybody can have it, realize that your government is so certain of metadata that they would kill an individual over it. That seems to me to make the point that metadata is incredibly important, if we would make a decision to kill someone based on their metadata.

The Electronic Frontier Foundation has done a lot of work for privacy and deserves a lot of credit. Mark Jaycox writes in an issue from last year that “it is likely that the NSA conducts much more of its spying power under the President’s claimed ‘inherent’ powers and only governed by a document originally approved by Executive order.” So while we are superficially having a debate over the bulk collection of records that some claim are authorized under the PATRIOT Act, section 215, there is a whole other section that some privacy advocates are worried about that is even bigger.

I had a meeting recently with one of the founders of one of the huge social media companies, and he told me that he thinks we are missing some of the debate here, because he says everybody is talking about bulk collection of your phone records. He is convinced that there is ever so much more being collected through backbone channels. These backbone channels can occur in two ways. They can occur one way by going and looking at foreigners’ information and then coming through the backbone back into our country and looking at Americans’ information. Understanding has tentacles and spreads and it becomes this enormous grouping of incidental information. In fact, some have said 9 out of 10 pieces of data pulled in aren’t about terrorists; they are just incidental stuff.

What the President’s review commission says is we should delete that once we find it is not relevant to an investigation. The amazing thing is he can change his mind. He can, at any moment, say: Oh, I will stop when we find out what we are looking for. The PATRIOT Act doesn’t justify it.

Of course, instead of our believing that the government has taken something sort of set of circumstances—that the government thinks it can determine from your phone records, they would think that is all of our stuff and the government has taken something that was intended in one way, completely transformed it, and then when they are rebuked by the court, they are not chastened at all.

I wonder why nobody has had the guts of the White House to ask the President why he doesn’t stop this now. The President could today listen to this speech on the floor of the Senate, and he could change his mind. He could, this afternoon, with his pen—he says he has his pen and his cell phone—he can immediately stop the bulk collection of data. In fact, all of the alternatives he could continue and he could probably do now. He could also say he is going to collect the data with a warrant. He should be able to do that.

Someone should ask the President: Mr. President, why do you keep doing something the court has said is illegal? Why do you continue doing this, and why won’t you stop? And how could we possibly think that it is a responsible answer to say: Oh, I will stop when they make me. His own privacy commission says that what he is doing is illegal and should stop.

One of the things that people are worried about is that the government is forcing its way into the code source of different Facebook, Google, and different Internet companies. There are a couple of things that are occurring because of this. If you live in Europe, if you are Angela Merkel or if you are anybody in Europe, you might not want American stuff anymore.

There are already rumors in discussion that billions of dollars—there has been some estimating of over $100 billion which have been lost because we have not been a dynamic leader in software, in hardware, in the Internet. People don’t want our stuff because they don’t trust us anymore.
One of the reasons they don’t trust us is this. We have a group called the Tailored Access Operations that targets system administrators and installs malware while masquerading as Facebook servers. That is a little scary, I think. It has gone on for years, and they did everything to know everything that was going on and then looking at suspiscious people—and people for whom we have probable cause. If you think of almost every instance—I mean, go back to 9/11. We have not had FBI agents on the ground and for some reason or other, they got information from all of the innocent Americans and giving up who we are in this country. That is not what we need. We need to have this go to the Supreme Court.

But in this case, what the government is arguing is that every one of us is somehow relevant to an investigation. That is absurd. Finally, we get to the appellate court last week, and the appellate court says that. They say that, frankly, it is absurd to say that everybody in America is relevant to an investigation. Not only is it absurd, not only is it trifling, but it is a big mistake. Why do you think it is that there are not enough human analysts to know that Tsarnaev, the Boston Bomber, was plotting to bomb the Boston Marathon? Why did we not know he got on a plane to go to Chechnya? One of the things that we were told at least in the newspaper was that he had an alternate spelling of his name. I think it was Tsarni. They did not do it the right way. I think they should have gotten a warrant.

We have no oversight, no ability to debate it. We just willy-nilly say: ‘I am for spending more money and more time on analysts to investigate and look at the data connected to people of suspicion. But I do not want to spend a penny on collecting all of the information from all of the innocent Americans and giving up who we are in the process. We have to fight against terrorism. We have to protect ourselves. But if we give up who we are in the process, has it been worth it? Are
you really willing to give up your libert-y for security? What if the security you are getting is not even real? They said the 52 people who were caught through the bulk collection program—the President’s own privacy group investigated and said not one person was captured by na-ture of one, but they already had information on him from some other source.

Under the Executive order, we are still not talking about the PATRIOT Act, we are talking about something that nobody knows much about at all. No common Member has been, to my knowledge, informed of what is going on in this program; none of those not on the Intelligence Committee.

But they are using this information called the special procedures governing communications metadata analysis. This is allowing the NSA to use your metadata—phone records, et cetera, who you call, how long, under the PATRIOT Act and section 702 to create social networks of Americans. So not only are we collecting your data because the government says—and realize this; many of your elected officials are say- ing that you have no right to oppo-sitivity and the Constitution does not protect your records. They are collecting all of your records, some of it incidental, but they are creating these enormous databanks, but then they are connecting—you could put a pre-dator to other metadata to create social networks of who you are.

You should be alarmed. We should be in open rebellion saying: Enough is enough. We are not going to take it anymore. We should be in rebellion saying to our government that the Constitution that protects our free- doms must be obeyed. Where is the outrage?

I tend to think young people get it. Young people—you see them—their lives revolve around their cell phone. They realize that if I want to know about their lives, if I collect the data from their phones, I can get the content of their messages, but I also get the data on their phones—that I can know virtually everything about them. Do we want to live in a world where the govern-ment knows everything about us? Do we want to live in a world where the government has us under constant surveillance?

They will say: We are not looking at it; we are just keeping it in case we want to look at it. The danger is too great. Do let the government collect your information.

I think there is a valid question as to whether simply the collection of your information is something that goes against the Constitution. One of the other areas where we are seeing collection of data—I mean, it would just boggle your mind. We are not just talking about one program; we are talking about dozens of programs the government has instituted to look at your stuff.

There is another group called EPIC, the Electronic Privacy Information Center. They talk about suspicious activity reports. Those are reports your bank has to file whenever you deal in cash at the bank. There are certain dollar limits. They think, well, gosh, someone is probably a bad person if they are putting $5,500 in cash in the bank. We are talking about a lot of honest, law-abiding people do that.

Not too long ago, there was a Korean husband and wife. They owned a grocery store. They dealt with a lot of cash, and they were very successful. Three times a day, they deposited over $9,000, $8 to $10,000. They tried to stay under $10,000 because there were all kinds of extra paperwork if you were over $10,000. So what the government said is, you are structuring your deposits to evade people. You must be guilty of something.

The government then can accuse peo-ple of a crime and take their stuff. There is something called civil asset forfeiture. It does not require that you be convicted of anything. It only requires that you be accused of something.

There was a story not too long ago in Philadelphia—Christos Sourvelis. The teenager was selling drugs out of the back of the parents’ house. So they caught the kid and they were pun-ishing him, but they decided they would punish the parents, too. They confiscated the parents’ house and evicted the family. So the teenager makes a mistake by selling drugs, and what does the government do? They take the parents’ house. So you think that is going to help the kid or help anything get better in this situation by taking the house? But here is the rub: The kid did not even have to be convic-ted of anything. The kid did not own the house; he was just their kid.

If we allow all kinds of data to be out there to catch people and then we are not even going to require that you are convicted of a crime before we take property from you—take the stu ff—take the danger of allowing so much data to be collected. But we are currently convicting and taking people’s stuff or their money simply based on what they are using it for.

The Washington Post did a series of articles on this. Turns out that most people having their stuff taken are poor, often African American, often Hispanic, but for the most part poor. One guy was here in Washington and had $10,000 to buy equipment, such as a refrigerator or a com-mercial oven or something, for his res-taurant. They just stopped him and took his money. It took him years to get it back. He only got it back because the Institute for Justice defended him in getting it back. It turns justice on its head because he was basically considered to be guilty until he could prove himself innocent.

Realize, then, that people like this are sometimes being picked up because of suspicious activity reports. Suspicious activity reports make your bank into a policeman or a policewoman. When you deposit things, they are obligated to report you to the government. Does it sound something like “1984”? Does it sound like you have informants out there everywhere—see something, say something; that your banker is going to call the government if you put cash into the bank?

The burden should always be on the government to prove you are guilty of something. You should never be con-considered guilty without there being evidence, without there being a trial with a lawyer, with a verdict.

Some of this has gone into the war on drugs. The war on drugs has a lot of problems. But part of it has been the abuse of our civil liberties. Also, part of the war on drugs is that there has been a disparate racial outcome. What do I mean by that? There have been in-stances where—if you look at the surveys and you ask your-selves: Are White kids using drugs the same as Black kids? White kids are 80 percent of the public. How do we get the reverse for 80 percent of the population in jail is Black and Brown? It is a problem. If we can’t fig-ure it out, you are going to have to continue to realize why people are unhappy.

If you want to know why there is unhappiness in some of our cities, you should read The New Yorker. About 3 or 4 months ago they did a story about Kalief Browder. Kalief Browder was a 16-year-old Black kid from the Bronx. He lives in a poor situation. His family had no money, and he had been in trouble before.

That he was arrested, and he was sent to Rikers Island—16 years old, ar-rested, sent to Rikers Island. His bail was $3,000. His family couldn’t come up with $3,000. He was kept for 3 years without a trial. At least some of it was in solitary confinement.

He tried to commit suicide. Can you imagine how he must feel? Can you imagine how his parents must feel? Can you imagine how his friends feel, the kids he went to high school with. Do you think they think justice is occurring in our country?

We have to be careful we don’t let slip away who we are in the process of all of this fight against terrorism, all of this fight against drugs, because what happens is people take things that are bad. Terrorism is bad, drugs are bad. But we take this fight about something that is bad, we forget about the process of law, we forget about the rule of law, and we forget who we are in the process.

But if you want to know why people are unhappy in some of our big cities, you want to see that unhappiness in the street, it is because some people don’t think they are getting justice. I, frankly, agree with them. I think there isn’t justice in our country when this occurs.
Initially, the government had to show evidence that you were an agent of a foreign power, but this is no longer true. Now all you have to do is make a broad assertion that the arrest is related to an ongoing terrorism investigation.

The problem in the FISA Court is that when they take you to this court, it is secret. You don't get your own lawyer, and basically the government says to the FISA Court judge: Oh, yes, it is related to an investigation—but I don’t believe they are forced to show that it is relating to an investigation. In some ways, I think we have gone too far because what you end up having is you know there are people who are saying it is related, but the question is, Is there any evidence that there is a relation to it and how could there be a relationship of everybody in America to an investigation?

We also often have given gag orders, and this is one of the big complaints of the Internet companies. They get order after order after order, a national security letter. They get all of these suspicionless warrants, and then they are told they can’t talk about it or they go to jail. There are some people who got gag warrants who were librarians and for a decade or more were not allowed to talk to anybody to say that they had received this warrant.

The American Civil Liberties Union has written that the PATRIOT Act “violates the Fourth Amendment,” which says the government cannot conduct searches without obtaining a warrant and showing probable cause to believe that a person has committed or will commit a crime.

The ACLU goes on to say that it “violates the First Amendment’s guarantee of free speech by prohibiting the recipients of search orders from telling others [these are the gag orders] about those orders, even where there is no real need for secrecy.”

These are the gag orders. They also say that it “violates the First Amendment by effectively authorizing the FBI to launch investigations of American citizens in part for exercising their freedom of speech.” Now, they went back in and they wrote the rules and said: Oh, you are not supposed to say you are going to arrest someone, and this is a violation of speech. But the bottom line is that the opening we have given to the intelligence community is so wide that there are, for all practical purposes, no limitations on the gathering of your information.

In the Maryland v. Smith case, we kind of get to the point where we have said that telephone conversations are protected, but we have said trace-and-trap and pen register, where they collect your phone calls, is not. The problem is—and this is a problem that needs to be corrected by the courts—at this point they are essentially nonexistent. There are no protections in the court for any kind of warrant that has to be gotten for any kind of metadata.

The FBI need not show probable cause or even reasonable suspicion of criminal activity. It must only certify to a judge, without having to prove it, that such a search would be relevant to an ongoing investigation.

Also, typically in the past, when we gave warrants for wiretaps, they were sorted to entities. You kind of had to name the entities. But now we are giving the registar, trace-and-trap data on your phone calls nationwide. This is a severe departure from what we had had in the past because typically warrants were given under a judge's jurisdiction, so within a region. But now we have a blanket warrant where we can collect any of your phone records, anywhere, anytime, across the whole country. This goes against the history of the way we have had jurisprudence.

We talk a lot about phone data but your email data; but the government is allowed to look at—without a probable cause warrant—is able to look at whom you are communicating with and the header on the subject line. The government is also able to look at, through metadata, the Web sites you visit.

You can see how various groups would say that might be an infringement of their First Amendment because they are saying the government now knows I go to Electronic Frontier Foundation or I go to EPIC or I go to ACLU. I am concerned with civil liberties. Am I a potential problem to the government? I am concerned and I am trying to make sure the government problem the government now knows what Web sites I go to and that I am concerned with this?

Now, if the government would hear— they would say: No, that is not what we are doing.

But the other part of the question is maybe not yet, maybe not now, but you can also squelch and severely restrict First Amendment practices if just that if the legal of the government looking at it might change my behavior. There is all the evidence, there have been surveys, saying that 20, 25 percent of people doing things online are changing their behavior because they are afraid of the government.

The government argues that the list of Web sites and Web site addresses is simply transactional data, but I think there is much more you can garner from this data.

The PATRIOT Act that is due to expire is just three sections. Interestingly, the complaints that I have are a lot over section 215, which the government claims is their justification for collecting all of your phone records. Now, the courts have said otherwise. The appeals court said last week that the business records do not give them the authority to collect your records. In fact, the courts have been very specific that it is illegal.

The President is currently ignoring the court, and the President continues to collect your phone data, all of your phone data, all of the time, as much as they can get. They have not changed any of their behavior, that I know of, since it was declared to be illegal.

Some of the changes—I would repeal the whole thing. I would repeal the whole PATRIOT Act. But some of the changes that I would favor, if we were allowed to change it, if we could get a consensus in this body that would mirror the consensus that I think is in America—one you get outside the beltway of Washington and you go back into America, people are for this, the vast majority of people think the government shouldn’t collect all of their phone records all of the time.

But there are some changes we could make. I think the first thing we ought to do is not replace this system but basically say we are not going to collect data in bulk, that we are not going to collect your phone records, your credit card information, your emails, and where you go on the Web. We are not going to collect that in bulk.

I think we could change the PATRIOT Act to say we are only going to collect
They are like: Well, you know, we are going to maybe have some laws to prevent these companies from encrypting things. It is like: Don't you get it? Don't you get why companies—the encryption is a response to government. The encryption is a response to a government that has run amok basically collecting information, collecting all of our information. So if you are an American Internet company, if you are an American search engine or an American email company, what do you think you are saying? You are saying, Europeans back, the only way I am getting Asians back is to say I am going to protect them from my government. Isn't that a sad state of affairs?

They say: Well, now will you get terrorists if everything is encrypted? Edward Snowden was using an encrypted email server, and the company that was housing him—that was specifically the genre of their business. They had it encrypted because some people want to be private for a lot of different reasons, many of them legitimate—business, legal, personal reasons. But, anyway, when they came to get Edward Snowden's email, they didn't want to just get his email; they said they wanted the encryption keys for the entire business.

See, this is the problem. You have to realize they are zealots who don't seem too concerned with your privacy rights. Imagine what they are going to do if they say to Apple: We don't want just the encryption for you to let us in one time to see John Smith, who we think is a terrorist; we want you to let us in all of your products. If they force a good company like Apple to do that, who in the world would want anything from Apple anywhere in the world?

There is a danger that we will destroy this surveillance into their products.

(Mr. TOOMEY assumed the Chair.)

Senator Wyden has made a good point. If the government is going to mandate backdoor access to the code source and the government is going to say that Facebook or Google has to let them in a backdoor, that is a window, that is a breach of the wall, it is a breach of protection.

Senator Wyden and others have made a good point. He said: If you do that, you will be actually weakening these companies to attacks of cyber security because if somebody can get in, somebody else who is smart can get in as well.

So there is a danger to letting the government in.

There are dozens and dozens of these programs. The NSA has something called the Dishfire database. It stores years and years of text messages from around the world. That might be fine except for it ends up trapping people who are also American citizens as well. It ends up tracking and trapping purely domestic texts that are retransmitted outside the country.

They have a program called Tracfin that collects and accumulates gigabytes of credit card purchases. I don't know—for some reason, I am more appalled by the credit card purchases than I am the phone because I think of all the stuff you can buy with your credit card and what it indicates about you.

With phones—you can find out a lot with people's phone records. When the Stanford students looked at phone records, they found that 85 percent of the time they could tell your religion. They got a majority of the time, they could tell doctors. The vast majority of the time, they could tell what disease you had. The vast majority of the time, the government can then also connect you through social networking and tell an extraordinary amount about you.

With a credit card, it is even more explicit than that. They can tell if you drink, if you smoke, and how much, what magazines you buy, what books you read, what medicines you take. All that's going on and you cannot do anything. We are more and more and more that type of society. We are less and less a society of cash and more and more a society where everything is on paper. That should worry us. It should worry us that the government really should have a warrant to look at your records, when held by a third party, are not protected at all. That is not good, and that is debatable. That is true. I think it needs to be looked at again by the court, and I think there are those who will, in the court, say your third-party records are. The Maryland decision was 6 to 3.

Justice Marshall felt your third-party records should be protected. He specifically mentioned that there was a potential stifling effect for association, there was a potential stifling effect for speech, and he was quite concerned about the government really should have a warrant to look at your records.

My hope is that someday the Maryland v. Smith case will be relegated to the dustbin of history, into the same dustbin in which we put Olmstead. In Olmstead, they said you couldn't have any protection for your phone records.

It went on for 40 years. I think we still live with some of that because we have trained and taught the phone companies not to be great advocates for our privacy and there has to be seen a great deal of fighting on the part of the phone companies in advocating for us. Some of the Internet companies have begun to step up. But I would like to see both phone companies and Internet companies stand up and say: We are not going to give you access to us, and you will have to take us all the way to the Supreme Court.

If they did, if there was unified resistance among the consumer and among the companies to say: We are not going to let you have our data without a fight, and you are going to have to prove suspicion, and that you...
are going to have to get a specific warrant," I think then we might be able to get back to a more constitutional scenario.

Within the NSA, there has also been evidence of installing filters in the facilities of Internet and telecommunication companies, serving them with court orders, and building backdoors into their software and acquiring keys to break their encryption. If this becomes the norm, you can see how people will flee American products, and people who are not getting prosecuted for American things. There is an enormous, beyond-imagination economic punishment to our country that is occurring now and going to continue and worsen if we don’t wise up and send a signal.

So for those in this body who say: We need to collect more information. We are not getting enough information. Warrants be damned. I don’t care what they do. Take all my information, get as much as you want. And they will have to explain why they are destroying an American industry and why people around the world are going to say: We are alarmed at that, and we want some protection. If we are going to use American email, we want to know there is not going to be indiscriminate collection of our information.

Bill Binney was probably or is probably one of the highest ranking whistleblowers from the NSA. The things he has to say should disturb us because he probably knows more about this than any of us will ever know. Bill Binney said that without new leadership—this is in our intelligence agencies—new laws and top-to-bottom reform, the NSA will represent a threat of turnkey totalitarianism. The capability to turn its awesome power—now directed mainly against other countries—will now be turned on the American public.

Originally, all of these intelligence forays were to get foreigners. We lowered the standard, saying: Well, they do not live here. These are potentially terrorists, and so we are going to have a lower standard.

They started out as foreign searches. In fact, the NSA was originally intended to search for foreigners and to search the information of foreigners. And I am not opposed to that. In fact, I was on one of the Sunday morning programs, and someone asked: Well, are you for eliminating the NSA? I said: Of course not. I am for the NSA. I want the NSA to do surveillance that will help to protect us from attack.

Not only am I for surveillance, I am for looking as deep as it takes. But I want some suspicion. I want suspicion that this person—that there is some evidence against this John Doe. You don’t want to prove they are guilty; you just have to have something that points toward them being suspicious. You then go to the judge, and the judge says: Here is a warrant. And if there is evidence the people he called is suspicious, go back to the judge and get another warrant. Go deeper and deeper. There is no reason why this couldn’t be done nearly instantaneously. There is no reason why it couldn’t be done 24 hours a day. And there is no reason why you do not get security and the constitution as well.

This battle has not been just about records; it has also been about another key part of the Bill of Rights, which is the right to a trial by jury, the right to due process, but people outside of battle, particularly American citizens, should. In some of these cases, we are talking about American citizens accused of a crime—perhaps terrorism—everybody. Yet, we are going to say: Well, they do not really deserve trials. They do not deserve lawyers.

In fact, and I find this really hard to believe, one Senator said recently: Bill Binney was my lawyer for a judge, just droned them. Ha-ha.

The same guy said: Well, when they ask you for a lawyer, you just tell them to shut up.

About 10 years ago, Richard Jewell was thought to be the Olympic Bomber. Everybody said he did it. The TV convicted him within minutes. Everybody said he was the Olympic Bomber. He fit the profile: He wore glasses, he was an introvert, he had a backpack, and he seemed very helpful. Somehow, that was the profile. Everybody said he did it. The only problem is, he didn’t do it.

So here he was accused of being a terrorist, of exploding something, doing something terrible and killing innocent people. And I think to myself, if he had been a Black man in the South in 1920, what would have happened to him? Or if he had been any American in this century if the people who believe in no jurisprudence were really in charge. We should be afraid of ever letting these people get in charge of our government, because the thing is that Richard Jewell was innocent.

People say: Well, these aren’t just American citizens, they are enemy combatants, and we don’t give any kind of jurisprudence—no judges or lawyers for these people. They are enemy combatants.

Well, it kind of begs the question, doesn’t it? Why is getting to define who is an enemy combatant, and who is an American citizen? Are we really so frightened and so easily frightened that we would give up a thousand-year history, the Magna Carta, even before we had juries—even in the Greek and Roman times, we had juries. Are we really willing to give that up and give people a classification that the government assesses them that cannot be challenged, where people don’t get a lawyer, they do not get brought to a judge and told why they are being held, and we would hold them forever?

This was the debate over indefinite detention. The response I got during the debate was: Well, yeah, we would have to send them to Guantanamo Bay.

An American citizen? Sure, if they are dangerous.

Kind of begs the question, doesn’t it? Who gets to decide who is dangerous and who is not?

When this finally made it to the Supreme Court, though, whether you could hold an American citizen, the Supreme Court rejected the administration’s claim that “enemy combatants” were not entitled to judicial review. It took years and years finally have the Supreme Court tell people that the Bill of Rights was still in effect, that if you are an American citizen accused of a crime in our country, if you do have a right to a trial by jury, you do have the right of habeas corpus, you do have all of the rights of an American citizen. And no one can arbitrarily take those away from you. And no one can say: I don’t think that is potentially a problem, think of the South in the 1920s. Think of what would have happened if Richard Jewell were a Black man in the 1920s. He might not have lived the day. Think if Richard Jewell had been a Japanese American during World War II, when we decided that the right of habeas corpus didn’t apply to you if your parents were from Japan or if your grandparents were from Japan. Would there be an experiment I remember, I think in college—a psychology experiment. They put a person in a room, and they said: This person has information, and we are going to shock them just a little bit. Here is the dial. You get to decide.

They wanted to ask how high people would turn up the dial. It was pretty scary—a good amount of people you would imagine are normal, respectable people—how high they would turn the dial to shock someone or to torture somebody. So we think that wouldn’t happen, but it does.

Any time we make an analogy to horrific people in history—to Mussolini or Hitler—people say: You are exaggerating: it is a hyperbole. Maybe it is. Particularly to accuse anybody of that is a horrific analogy, and I am not doing that.

But what I would say is that if you are not concerned that democracy could produce bad people, I don’t think you are really seeing through too much. And if you are not concerned about procedural protections—procedural protections are how evidence is
gathered, how evidence is taken from your house, what rules the police have to obey.

People don’t quite get this. We don’t have a mature discussion on this. Any time we try to say that this should stop and that someone could be a bad policeman, the media dumb it down and say that we are saying policemen are bad. No, it is the opposite. Some 98 or 99 percent of the police are good. In fact, in the general public it is pretty close to that.

The thing is that we have the rules in place for the exception to the rule. We have these procedures in place because maybe it isn’t tomorrow that we decide that we are going to round up all the Japanese Americans again and put them in internment camps, but maybe next time it is Arab Americans. So we have to be concerned with this because we don’t know who the next group is that is unpopular.

The Bill of Rights isn’t for the prom queen. The Bill of Rights isn’t for the high school quarterback. The Bill of Rights is for those who have minority opinions. The Bill of Rights is for those who are oddballs, those who aren’t accepted, those who have unconventional thinking.

If we are so frightened that we are going to throw all the rules out and we are just going to say that here is my liberty, take it, and here are my records; if you say the standard will now be that if I have nothing to hide, I have nothing to fear and look at everything I do, then there will be a time and there will be a danger that, in giving up your freedom, in giving up your privacy, you will find that the world you live in is not the world you intended.

There have been good folks within the National Security Agency, who have talked about and have pointed out that we have gone too far. Bill Binney was one of those. He was a high-ranking NSA official who decided that they have gone too far.

The Bill of Rights is for those who are involved. I think we are overwhelmed by these procedures in place because we can’t accept the fact that we are going to round up all the American information from incidental collection. So the point is you stop the intelligence, the domestic intelligence program, period.

So Binney’s opinion was—this is the guy who wrote a lot of the original programs. Bill Binney said he would continue gathering information on foreigners. This is a guy who worked for 30 years for the NSA. He is not some dove who doesn’t want to do anything about terrorists. Bill Binney worked for 30 years to develop the programs to help us catch terrorists, but he felt it wasn’t proper or constitutional to collect Americans’ records without a warrant. He said if we get incidental records, destroy them; don’t collect them.

He says: Eliminate them. [The records of Americans are] irrelevant to anything that—

The incidental collection—

is going on. All the terrorists would have been caught by the process that we put in place for ThinThread—

ThinThread was a program they had before they went to the unconstitutional program—which was looking and focusing in on the groups of individuals that we already had identified and anybody in close proximity to them. In other words, this other simple rules like anybody that was looking at jihad advocating sites. . . .

Et cetera.

That would get them all, and you didn’t have to do the collection of all this other data that requires all that storage, transport of information to the storage, maintenance of it, interrogation programs, all of that added expense that they are incurring as a part of it over the last 10 years. You wouldn’t have any of that. . . .

Frontline then asks:

This problem of haystacks, how big a problem is that? Is that what we’ve done, is we’ve created a situation where the haystacks are bigger, and it’s almost impossible to find?

This was Frontline’s question. It is a question I have been asking, also. If you collect all of Americans’ records all of the time, if we collect all of your phone records, can we possibly look at them?

Now, computers are getting better, but still there has to be a human involved. I think we are overwhelmed with data. At one time about a year ago, I remember an article where I think they collected millions and millions of audio hours. They had just been collecting. They were vacuuming up everything. And I think they had only been able to listen to about 25 percent of it.

So the thing is that there is information that we need to get and we should get.

When the Tsarnaev boy—the Boston Bomber—went to Chechnya, we needed to know that. We needed to continue to see if there was evidence that we could take to a judge to continue to investigate him. So we do need surveillance. But what we don’t need is discriminate surveillance, and we don’t need the haystack to get so big that we can never find the terrorist in the stack.

Binney responds:

Well, what it simply means is if you use the traditional argument they say we’re trying to find a needle in a haystack, it doesn’t help to make the haystack orders of magnitude larger, because it makes it orders of magnitude more difficult to find that needle in the haystack.

Frontline:

And is that what they’ve done? Have we made that haystack so large that we are actually having trouble catching terrorists because we’re scooping up and swooping up all of America’s data?

Binney:

That’s what they’ve done. And now they’re looking at things like game playing and things like people doing that. I mean, this is ridiculous. How relevant is that to anything?

Frontline:

But they say there’s computers, and in Utah they’re going to be able to take all this stored data, and they’re going to be able to go through all of it, and they’re going to be able to connect the dots. Connect the dots—that’s what everybody wanted them to do after 9/11.

Bill Binney, former senior NSA:

See, that’s always been possible. Before 9/11 we were doing that. That was already happening. No, it wasn’t an issue at all. That’s why we should have picked this out from the beginning. We should have implemented the ThinThread that’s the program (pursuing that they’d already been working, [program that they’d already been working, the](the) connect-the-dots program on everything in the world, but we didn’t. That’s why we failed. It wasn’t a matter of not having the program; it was a matter of not implementing the program we had.

When 9/11 came, we gave medals to the heads of our intelligence agencies. No one was ever fired. Yet the 20th hijacker was caught a month in advance. Someone was caught in Minnesota for trying to take off in planes but not land them. The FBI agent there wrote 70 letters to his superior trying to get a warrant. It wasn’t that we had to dumb down and take away the procedural protection of warrants. The warrant wasn’t denied.

They would have a much stronger argument if they could say: We tried to catch the terrorists, but the judges kept saying no to warrants. That is absolutely not true. They didn’t ask the judge for warrants. So the 70 requests in Washington sat at FBI Headquarters and weren’t requested.
We also had another hijacker in Arizona training to take planes off. Once again, the FBI agent there was doing a great job in sending the information to Washington, and but people were not talking to each other. It had nothing to do with saying the Constitution is so far away to say the Constitution or we will never catch terrorists. It had nothing to do with that. But that is precisely the argument we have.

In the aftermath of 9/11, the PATRIOT Act was rushed to the floor—several hundred pages—and nobody read it. It didn’t come out of—there was one out of the committee. They didn’t use that. They rushed a substitute to the floor, and no one had time to read it. But people voted because they were fearful, and people said there could be another attack and Americans will blame me if I don’t vote on this.

But we are now at a stage where we should be asking if we are willing to give up our liberty for security?

Can you not have both? Can you not have the Constitution and your security? I think you can.

Several agents other than Bill Binney have also said—several national security officials—that the powers granted the NSA go far beyond the expanded counterterrorism powers granted by Congress under the PATRIOT Act.

The court now agrees with that. Any time someone tries to tell you that metadata is meaningless, don’t worry. It is just whom you call. It is just your phone records. It is not a big deal. Realize that we kill people based on metadata. So they must be pretty darned certain that they think they know something based on metadata.

So these are ostensibly or presumptively terrorists that are being killed. But what I would say is that if they are killing based on metadata, I would think you would want your own metadata pretty well protected.

To give you an example of how Representatives are sometimes getting it right, in the House of Representatives, they have seen and responded to the rights, in the House of Representatives, they have seen and responded to the vast majority of people do not want their phone records collected without warrant—what did they do when this passed 293 to 123? They stripped it out in secret in conference committee and it was gone. The main haven’t been like everything else around here. You wonder why your government is completely broken. We lumber from deadline to deadline, and it is on purpose really. We do deadline to deadline because we have to go. It is spring break. We are going to be late for spring break. We have to go, so we have to finish this up before we go.

It is how the budget is done. No one ever votes on whether we are going to spend X or Y whole bunch. They strip it down into 2,000 pages. Nobody reads it. It is placed on our desk that day. Nobody has any idea what is in it. None of your concerns about your Government are ever addressed. We just pass, boom, the whole thing and it is on the door. It is the same as the 702 which is an amendment to the FISA Act. The Senate now agrees with that. Any time someone tries to tell you that bulk collection, but it still passed overwhelmingly. Yet, in secret, somehow it is taken back out of the bill and never becomes law.

Now, while I don’t agree completely or really at all with the reform that has come forward out of the House, it is at least evident they are listening. They have a bill that would end the bulk collection of records to replace it with, I think, maybe another form of bulk collection, but it still passed overwhelmingly.

But do you know what you hear when it gets over here? They say the Senate is distanced more from the people and not as responsive—absolutely true and sometimes to the detriment of the public. Because the thing is that while it is overwhelmingly popular with the American people that we should not be collecting your phone records without a warrant—without a warrant with your name on it, and the House has acknowledged that they are doing something overwhelming to try to fix it—the first thing I hear over here from people is, well, we are not collecting enough of your phone records. They are disappointed that the government isn’t getting—they have access and they claim they can get it, they gain access to everything, but the Government really is not collecting all of it, so people are very disappointed; they want to collect more.

The American people say: Enough is enough. We want our privacy protected. We want the Government to take less of our records. Congress recognizes that—the House of Representatives. Then it comes over to the Senate, and the Senate says: Oh, my goodness. We want to collect more of your records. We do not think we are getting enough into your privacy. We do not think we have completely trashed the Bill of Rights enough; let’s try to get more of your records.

One of the other things the Massie-Lofgren amendment did—that did pass over there—was to get rid of and say that no funds would go to mandate or request that a person alter his product or service to permit electronic surveillance.

This is what is going on. What is pretty nefarious and antithetical to freedom is that our Government is telling companies like Facebook and Google and these other companies—they are forcing them to let the government have access into their products.

Everybody knows this is going on. It is no secret, and it is killing these companies in their work because non-Americans don’t want to use their email. They are afraid the government has forced their way into all their transmissions.

There is currently another bill in the House of Representatives by Representative POCAH, Representative MASSIE, Representative GRAYSON, and Representative McGOVERN that would repeal the entire thing. It repeals the PATRIOT Act and FISA amendments of 2008, permits the courts to conduct experiments on the courts to have appeal. It basically tries to make our intelligence courts more like an American court or American jurisprudence.

EPIC is the Electronic Privacy Information Center. They talk some about these national security letters I mentioned earlier. There are now hundreds of thousands of national security letters. These are letters that are warrants. They are not signed by judges. They are signed by agents in their office. This goes against the fundamental precept of our jurisprudence. The fundamental aspect was that we divided police from the judiciary. It is supposed to be a check and balance. In case the local policemen had some sort of bias, they always had to call somebody else. It is not perfect, but it is a lot better than not having a check and balance.

When we got to NSL—this comes out of the PATRIOT Act—they start out as warrants, but they are actually signed. They are not warrants. By the courts. This goes against the fundamental precept of our jurisprudence. The fundamental aspect was that we divided police from the judiciary. It is supposed to be a check and balance. In case the local policemen had some sort of bias, they always had to call somebody else. It is not perfect, but it is a lot better than not having a check and balance.

said that it had to be specific to an individual. That is one of the real problems with the bulk collection of records. They are not really based on suspicion of an individual because basically what is going on is collecting all of your records, indiscriminately.

The government is not even obeying the loose restrictions they put in place. The Constitution says you have to have probable cause. You have to present standard, not just to a judge. You don’t have to prove that they are guilty, but you have to have enough evidence that the judge says it looks like that person could be guilty of a crime.

So with the PATRIOT Act we lowered that standard and then lowered it again. For collecting information under the PATRIOT Act, all you have to do is say that the information you want is relevant to an investigation. When the PATRIOT Act was passed, the court basically said this is absurd. So 2 weeks ago, the court just below the Supreme Court said it is absurd to say that every American’s phone record is somehow relevant to a terrorism investigation. They said it takes the meaning of the word “relevant” and basically destroys any concept that the word has meaning at all.

The PATRIOT Act went to a much lower standard, not probable cause but just that it might be relevant to an investigation. And even with that lower standard, the court said that is absurd.

How does the President respond? The President responds by doing nothing. The President could end this program tomorrow. Every one of your phone records is being collected without suspicion, without relevance. In contradiction to even what the PATRIOT Act says, your records are being collected. The second highest court in the land has said this is illegal, and the President does nothing. The President said to Congress, Oh, yes; I will do it if Congress will do it.

It is an absurd situation. We did not start the program. The authors of the PATRIOT Act had no idea this was going on. The PATRIOT Act, according to the court, does not even justify this. We are looking at telephone records. We are looking at email records. EPIC, the Electronic Privacy Information Center, has another big complaint about this; that people were put for- ward and then told that they could not talk about it. The court says I object. That is one of the reforms Senator Wyden and I have talked about, having somebody represent a defendant stand up and say maybe all the phone records in the country are not relevant, maybe they are not relevant to an investigation. It would be absurd to say every American’s records would be relevant.

The government says we want all the phone records because they are relevant. No one stands up on the other side and says: I object. That is one of the reforms Senator Wyden and I have talked about, having somebody represent a defendant stand up and say maybe all the phone records in the country are not relevant, maybe they are not relevant to an investigation. It would be absurd to say every American’s records would be relevant.

I have seen several of my colleagues come to the floor of the Senate and talk about why we ought to keep a bulk phone record collection, and the statement has somehow been that this is absolutely key for strong counterterrorism. That is a baffling assertion. I say to my colleague from Kentucky, because even the Director of National Intelligence and the Attorney General are saying it is not. So what we have are Members of the Senate saying that bulk collection—some of them—ought to be preserved in order to fight terrorism, and the Director of National Intelligence and the Attorney General, two individuals who are not exactly soft on terror, saying it is not.

If Senators, and those who might be following this debate, are seeking a more detailed analysis, I hope they will check out the very lengthy report on surveillance that was issued by the President’s review group. This group’s members have some very impressive national security credentials. These are not people who are soft on fighting terror. One of them was the Senior Counterterror Adviser to both President Clinton and President Bush and another served as Acting Director of the CIA review group—a review group led by individuals with pristine antiterror credentials—said on page 104 of their report that “the information contributed to terrorist investigations by the use of section 215 [bulk] telephone meta-data was not essentially attacks and could readily have been obtained in a timely manner using [individual] section 215 orders.”

What this distinguished group of experts said supports what the Senator from Kentucky is saying and what I and others have been saying for some time.

The Senator from Kentucky pointed out my service on the Intelligence Committee. I think Senator Frmr Chairman and I are two of the five longest serving members in the committee’s history. We didn’t find out about bulk collection until it had been underway for quite some time because it was concealed from most members of the Intelligence Committee for several years. But given the fact that we began to see in 2006 and early 2007 what is at stake, this has been a fight that has been going on for 8 years.

An additional reason I appreciate the Senator from Kentucky being here now is that for these 8 years and multiple reauthorizations, it has always been the same pattern. It was almost like the night follows the day. Those who were in favor of dragnet surveillance and those who were in favor of the bulk collection program, in effect, wait until the very last minute and then they say: Oh, my goodness. It is a dangerous world. We have to continue this program just the way it is.

We have a colleague from Kentucky, and I know he shares my view on this, that there is no question that it is a very dangerous world. Anybody who has served on the Intelligence Committee, as I have for more than 14 years, and goes into those classified meetings on a weekly basis, does not walk out of there without the judgment that it is a very dangerous world. But what doesn’t make sense is to be pursuing approaches that don’t make us safer and compromise our liberties. That is what doesn’t make sense.

Last year, along with my colleagues Senator HINCH and Senator Mark Udall, I put forward a case that was before the Court of Appeals for the Second Circuit. It is an important court. It is one of the highest courts in our country.

In the brief, we said we “have reviewed this surveillance extensively and have seen no evidence that the bulk collection of Americans’ phone records has provided any intelligence of value that could not have been gathered through means that caused far less harm and at no greater costs than the intelligence service could have obtained in a timely manner using individual section 215 orders.”

What we are talking about, in effect, are conventional approaches with respect to court orders and then there are emergency approaches. So when the government believes it has to act to protect the American people, it can move quickly and then, in effect, come back and settle up later.

The conclusion we reached after reviewing bulk collection very carefully was based on 8 years’ worth of work, and of course we recently had this court declare bulk collection to be illegal.

My first question is, Does the Senator from Kentucky agree there is no evidence that dragnet surveillance now makes America any safer?

Mr. PAUL. Mr. President, that is a great question, and I also think it is very difficult to prove these things one way or another sometimes. We are at a great disadvantage because a lot of times they hold all of the information. I think it was nothing short of miraculous that you, Mr. President, were able to investigate this and show that in reality all of these folks who they allege could have been caught would have been caught through traditional surveillance and through traditional warrants.

I think this is a pretty important point because they want us to live in fear and give up the Fourth Amendment, but it turns out even the practical argument is not an accurate one because it turns out that almost always, if not always, the terrorists seem to be caught through sort of the normal channels of human intelligence, suspicion, and finding out something about them that causes us to investigate them.

I, like the Senator from Oregon, do want to catch terrorists and I also want to keep our freedom at the same time. I think it was a pretty important conclusion, not only because the review board backed by the Privacy and Civil Liberties Oversight Board as well, the review panel, two groups of folks from the administration.

I am also interested in hearing the Senator from Oregon talk about an op-ed he wrote which appeared in the Los Angeles Times in December. Senator WYDEN wrote that building a backdoor into every cell phone, tablet or laptop means directly creating weaknesses that hackers and foreign governments can exploit.

I would be interested in entertaining a question concerning that.

Mr. WYDEN. Mr. President, I apologize to my colleague that my colleague restate his question.

Mr. PAUL. This is on op-ed that was written by the Senator from Oregon and appeared in the LA Times in December. The op-ed says that building a backdoor into every cell phone, tablet or laptop means deliberately creating weaknesses that hackers and foreign governments can exploit.

I think expanding on that in the form of a question would help us to understand exactly what the Senator means by that.

Mr. WYDEN. What the Senator is asking about is a statement made by the FBI Director, Mr. Comey. This is not some kind of hidden article. It was on the front pages of all of our papers and he very clearly suggested that the NSA is suggesting, some consideration.

In fact, one of the last things I did as chairman of the Senate Finance Committee—I had a relatively short tenure there, 2014—was to hold a workshop in Silicon Valley last year. The problem stems from the fact that with the NSA overreach taking a huge toll on our companies and the confidence that consumers, both here and around the world, had in the privacy of their products, these companies said we have to figure out a way to make sure consumers here and around the world understand that we are going to protect their privacy. So they decided to put in place products that had strong encryption.

They felt that it was important to be able to assure their consumers that when they sold something, their privacy rights were protected. In doing so, of course, they also made it clear, as has always been the case, that when the government believes an individual could put our Nation at risk, you get an individual court order, you use emergency circumstances, and you could still access information.

The response by our government, which contributed to the problem by the NSA’s overreach in the first place, was our government saying: No, you are not going to be able to use that encryption to bring back the confidence that Americans and people around the world have in your products. There were projections that these companies were already losing billions and billions of dollars in terms of the consequences of loss of privacy.

The response of the government was to say: We are looking at requiring you to build weaknesses into your products and, in effect, create a backdoor so we can get easy entry.

(Mr. GARDNER assumed the Chair.)
I know at townhall meetings at home in Oregon, I have talked about the concept of our government requiring companies to build weaknesses into their products. People just slap their foreheads. They say: What is that all about? It is our way to make sure we have people that both support and keep us safe. It is not your job to tell companies to build weaknesses into their products.

In effect, you have to just throw up your hands when they say: We can't do it, so we ought to build weaknesses into the products.

As my colleague said, I pointed out that once you do that, it will not just be the good guys who have the keys, it will be bad guys who have the keys at a time when we are so concerned about cyber security.

I wish to ask my colleague one other question on one other topic he and I have spoken about at great length. Is the Senator from Kentucky troubled by the fact that the National Security Agency and other agencies of the intelligence community have not been forthright in recent years with respect to this bulk collection and the collecting of data on millions or hundreds of millions of Americans? As my colleague last week have been particularly troubled by this.

I ask the question because my colleagues and I have pointed out that we have enormous admiration for the rank-and-file in the intelligence field. These are the individuals whose faces we see day after day get up in the morning and contribute enormously to the well-being of the American people, and we have enormous respect for them. We are grateful to them. They are patriots, and they serve us well every day. Personally do not think they have been not exactly been straight or forthright in recent years with respect to the Constitution and trying to do it within the confines of the Constitution. But when you have someone at the very top who doesn't tell the truth in an open hearing under oath, that is very troubling and makes it difficult.

Mr. WYDEN. I appreciate my colleague's interest in that issue. He knows that it was very troubling that in 2012 and in 2013, we just weren't able to get straight answers to this question of collecting data on millions or hundreds of millions of Americans.

My colleague will recall that the former NSA Director said that—he had been to a conference—and that he was not involved in collecting “dossiers” on millions of Americans. Having been on the committee at that point for over a dozen years, I said: Gee, I am not exactly sure what a “dossier” means in that context.

So we began to ask questions, both public ones, to the extent we could, and private ones, about exactly what that information was, and the answers to those questions. We just couldn't get answers.

The Intelligence Committee traditionally doesn't have many open hearings. By my calculus, we probably get to ask questions in an open hearing for maybe 20 minutes, maximum, a year. So after months and months of trying to find out exactly what was meant, we felt it was important to ask the Director of National Intelligence exactly what it was that made the government collecting data and the like. So at our open hearing, I said: I am going to have to ask the Director of National Intelligence about this. And because I have long felt that it was important not to try to trick people or ambush them or anything of the sort, we sent the question in advance to the head of national intelligence. We sent the exact question: Does the government collect any type of data at all on millions or hundreds of Americans? We asked it so that he would have time to work on it and then reflect on it. We waited to see if the Director would get back to us and say: Please don't ask it. There has always been a kind of informal tradition in the Intelligence Committee of being respectful of that. We didn't get that request, so I asked it. When I asked: Does the government collect any type of data at all on millions of Americans, the Director said no. I knew that he was not being forthright, straightforward, truthful answer, so we asked for a correction. We couldn't get a correction.

I would say to my colleague that since that time, through his representative, have given five different reasons why they responded as they did, further raising questions in my mind, not with respect to the rank-and-file in the intelligence community—the thousands and thousands of hard-working members of the intelligence community my colleague and I feel so strongly about and respect so greatly.

I wish to ask just one other question with respect to where we are at this point. Mr. President, as the Senator from Kentucky holds the floor, no one will be able to offer a motion to consider an extension of the USA PATRIOT Act. But at some point in the near future, whether it is this weekend, next week or next month, my analysis is the proponents of phone record collection are going to seek a vote in the Senate to continue the Patriot Act. Then, I ask the Senator from Kentucky, what is it that Mr. President, I wonder if you have determined what is the best for the country. They are patriotic people, they have the keys at a time I feel so strongly about and respect so greatly.
I don’t think those inside Washington are listening very well, so I think those inside Washington have not come to the conclusion yet. But I think the Senator from Oregon is right. There may be enough of us now to say: Hey, wait a minute, you are not going through something that isn’t even doing what you said it is going to do.

No one said at the time of the PATRIOT Act that it meant we could collect all records of all Americans all the time. No one did. My friends over at the House, one of the cosponsors of the bill, JAMES SENSENBRENNER, knew all about the PATRIOT Act. He was a proponent of the PATRIOT Act, and he said never in his wildest dreams did he think that what he voted for would say we could gather all the records all the time.

But I am interested in another question, and that would be whether the Senator from Oregon has a question that will help us to better understand, if we were to stop bulk collection from tomorrow, if we were to eliminate what is called section 215 of the PATRIOT Act, if we were to do that, is there still concern and worry about what is called Executive Order 12333?

I am not aware of whether the Senator can or can’t talk about this or what is public. From what I have read in public and from one of the insightful articles from John Napier Tye, the section chief for Internet freedom in the State Department, he has written that his concern is that this Executive order may well allow a lot of bulk collection that is not justified and not given sanction under the PATRIOT Act.

Does the Senator from Oregon have a question that might help the American public to understand that?

Mr. WYDEN. I would just say to my colleague that we always have to be vigilant about secret law. And we have, in effect, found our way into this ominous place where the Senator from Kentucky and I have been describing here this afternoon really because of secret law.

As I wrap up with this question and hearing the concern of my colleague—because I think that is what is at the heart of his question, that “secret law” is what the interpretation is in the intelligence community of the laws written by the Congress. Very often those secret interpretations are very different from what an American may read on the Internet or on their laptop. For example, on section 215, bulk phone records collection, I don’t think very many people in Kentucky or Oregon took out their laptop, read the PATRIOT Act, and said: Oh, that authorizes collecting all the phone records on millions of law-abiding Americans.

There is nothing that even suggests something like that, but that was a secret interpretation.

So I am very glad the Senator from Kentucky has chosen to have us wrap up at least this part of our discussion with the questions that we have directed to each other on this question of secret law because, as my colleague from Kentucky and I have talked about, we both feel that operations of the intelligence community—what are called sources and methods—they absolutely have to be secret and classified because if Americans could know—Patriotic Americans who work in the intelligence community could suffer grievous harm if sources and methods and the actual operations were in some way leaked to the public. But that is what the interpretation is, in the intelligence community of the laws written by the Congress. Very often those secret interpretations are very different from what an American will expect we will be back on the floor of this. As I indicated by my question, I yield the floor back to him.

Mr. PAUL. Mr. President, I would like to thank the Senator from Oregon for his insightful questions. One of the things we talked a little bit about as Senator Wyden and I were going through a series of questions was some of the differences that have been put in place by the President and have come out and said that the program—the Executive order—the President put in place two panels, a review panel and another one called the Privacy and Civil Liberties Oversight Board, and, interestingly, both panels told him the same thing: that what he was doing was illegal and wrong and it ought to stop. Then the President came out and said “That is great,” but then he keeps doing it.

I don’t quite understand because I like the President and I take him at his word, and he says: Well, yes, I am balancing this and that, and they told me this, and if Congress stops it, I will obey Congress. It is like, we didn’t start this. The President started this program by himself. He didn’t tell us about it. Maybe one or two people knew about it. Almost all of the representatives didn’t, and no Americans knew about it. And then when we asked them about it, they lied to us and said they weren’t doing it.

The President has two official panels, and they both said it is illegal and ought to stop. And the PATRIOT Act doesn’t justify what they are doing. And this was all created by Executive order.

So what is the President’s response? He just keeps collecting your records. Doesn’t work in the Fourth Amendment, in this strange or unusual that the President will continue a program that his own advisors tell him is illegal and that the courts have now said is illegal, and he goes on. This isn’t all one-sided. That is for one political party. But in my political party, there are people saying: I guess the President’s advisors say it is illegal, the court says it is illegal, but, man, they are not collecting enough. I just wish they were collecting more Americans’ records without a warrant.

What a bizarre world, that people don’t seem to be listening to the
courts, to the experts, or to the Constitution.

The Privacy and Civil Liberties Oversight Board, though, I think really had some insightful comments. They give a description, first of all, of collecting all of your phone calls, and a sentence, and I think they don’t quite get to the importance. “Nearly all.” So we are not talking about 1,000 records. We are not talking about 1 million records. We are talking about nearly all of the records in the entire United States. There are probably over 100 million phones, I am thinking, in the United States, so over 100 million records. Every record has thousands of pieces of information in it, so we are talking about billions of bits of information that the government can collect. I don’t have a problem if they want to collect the phone data of terrorists. In fact, I want them to. I don’t have a problem if they will go 100 hops into the data if they have a warrant. If John Doe calls John Doe, look at his phone records. Ask a judge to put his name on the warrant and look at all of his records. If there are 100 people he called and they are people you suspicion of, call them, too. Go to the next hop, hop, go to the next hop. There is no limit. But just do it appropriately. Do it appropriately with a warrant with somebody’s name on it. I see no reason why we can’t do this with the Constitution. We are now collecting the records of hundreds of millions of people without a warrant, and I think it needs to stop.

The President’s own commission says to stop. Here is what the commission says: “From 2001 through early 2006 the NSA metadata—some data based on a Presidential authorization.”

So, interestingly—and this ought to scare you, too—they didn’t even use the PATRIOT Act in the beginning at all. The President just wrote a note to the head of the NSA and said: Just start collecting all their stuff, without any kind of warrant. And then later on they started saying: Well, maybe the PATRIOT Act justifies this. But for 5 years they collected data with no warrant and with no legal justification, and there’s something they call the inherent powers of the President, article II powers.

Article II is the section of the Constitution that gives the President powers. We designate what the President can do. Article I designates what we can do. Interestingly, our Framers put Article I first, and those of us in Congress think that maybe they thought the powers of Congress were closer to the people and more important, and they delegated powers to us, and they were very specific.

But what concerns me about the bulk collection is that for 5 years it wasn’t even done with regard to the PATRIOT Act. I am guessing it was done under the Executive order. As much as I don’t like the PATRIOT Act and would like to repeal the PATRIOT Act and simply use the Constitution. I think if we repeal the PATRIOT Act —they would still do what they want. Your government has run amok. Things are run-away, and the government really is not paying attention to the rule of law.

For the first time in 2006 the court got involved. The intelligence court at that time finally heard the first order under section 215. So for 5 years they were collecting all the phone records with just a Presidential order. Now we do it under the PATRIOT Act.

But the rule of law is about checks and balances. It is about balancing the executive branch and the legislative branch and the judiciary branch. It is about balancing the police in the judiciary. We talked about warrants and the police.

I see on the floor one of the Nation’s leading experts in the Fourth Amendment and the Constitution, who has recently written a book on this, and I told him recently I have been stealing some of his ideas, and he gave me credit for it. But I talked earlier on the floor about the story of John Wilkes, and if the Senator from Utah is interested in telling us a little bit of the story, I would like to hear a little bit from his angle or in the form of a question or any other question he has.

Mr. LEE. I would like to be clear at the outset that while the Senator from Kentucky and I come to different conclusions with regard to the specific question as to whether we should allow section 215 of the PATRIOT Act to expire, I absolutely stand with the junior Senator from Kentucky and, more importantly, I stand with the American people.

With regard to the need for a transparent, open amendment process and for an open, honest debate in front of the American people on the important issues facing our Nation, including this one—and I certainly agree with the Senator from Kentucky that the American people deserve better than what they are getting, and, quite frankly, it is time that they expect more from the Senate.

On issues as important as this one, on issues as important as the right to privacy of our citizens and our national security, this is not a time for more cliffs, more secrecy, and more eleven-hour backroom deals that are designed to mix conflict, mix crisis in a purposely arranged time crunch in which the American people are presented with something where they don’t really have any real options. It is time for the kind of bipartisan, bicameral compromise that is embodied in the USA FREEDOM Act. While I often criticize Congress for our economic deficits, our financial deficits, the core of this current challenge we face is centered around the Congress’s deficit of trust—in this particular circumstance, the Senate’s deficit of trust. Members of our body routinely tell the American people to just trust us. Trust us, we will get it right. Just trust us, we will appropriately balance all the competing concerns.

I think it is time that we trust the American people by having an honest discussion with them emanating from right here on the floor of the Senate. It is time to discuss and debate and to amend the House-passed USA FREEDOM Act.

I am confident that Senator PAUL and others among my colleagues who have different ideas from mine will be happy to offer and debate amendments to improve it and make it something perhaps that they could even support. In fact, as far as I am aware, Senator PAUL and others have amendments that they are eager and anxious and willing and ready to present and to discuss here on the floor and voted on right here on the floor of the Senate.

But first I am calling on my Republican and Democratic colleagues to help repair the dysfunctional legislative process and the governmental bodies that we have here. The Intelligence Committee, the Judiciary Committee, and others among my colleagues who have different ideas from mine will be happy to offer and debate amendments to improve it and make it something perhaps that they could even support. In fact, as far as I am aware, Senator PAUL and others have amendments that they are eager and anxious and willing and ready to present and to discuss here on the floor and voted on right here on the floor of the Senate.

The greatest challenge to policy-making today is perhaps distrust. The American people distrust their government. They distrust Congress in particular. It is not without reason. For their part, Washington policymakers seem to distrust the people.

Almost as pressing for the new majority here in the Senate is that the distrust that now exists between grass-roots conservative activists and elected Republican leaders can be particularly toxic. Leaders can respond to this kind of distrust in one of two ways. One option involves the bare-knuckles kind of partisanship that the previous Senate leadership exhibited over the last 8 years, twisting rules, blocking debate, and blocking amendments, while systematically disenfranchising hundreds of millions of Americans from meaningful political representation right here in this Chamber. But they chose, in most cases, to block rather than to work, and to disrupt the democratic process is something Republicans should oppose in principle. In fact, it is something we oppose in principle.

We should throw open the doors of Congress, throw open the doors of the Senate, and restore genuine representative democracy to the American Republic. What does this mean? Well, it means no more cliff crises, no more secret negotiations, no more ‘‘take it or leave it’’ deadline deals, no more passing bills without reading them, and no more procedural manipulation to block debate and compromise. These are the
 abuses that have created today’s status quo—the very same status quo that Republicans have been elected to correct.

What too few in Washington appreciate and what this new Republican majority in Congress must appreciate if we wish to correct the Americans’ distrust of their public institutions is totally justified. There is no misunderstanding here. Americans are fed up with Washington, and they have every right to be. The exploited status quo in Washington has ripped apart America’s economy and their government, and its entrenched defenders, powerful and sometimes rich in the process. This situation was created by both parties, but repairing it is now going to fall to those of us in this body right now. It is our job to win back the public’s trust. That cannot be done simply by passing bills or even better bills. The only way to gain trust is to be trustworthy. I think that means that we have to invite the people back into the process, to give them back the moral legitimacy that Congress alone no longer confers.

In order to restore this trust, Members will have to expose themselves to inconvenient amendment votes, inconvenient discussion, and scrutiny of legislation we are considering. The result of some votes in the face of certain bills may, indeed, prove unpredictable, but the costs of an open source, transparent process are worth it for the benefits of greater inclusion and more diverse voices and views and for the opportunity such a process would offer to rebuild the internal and the external trust needed to govern with legitimacy.

My friend and colleague, the junior Senator from Kentucky, has referred to a story of which I have become quite fond, a story that I have written about and talked about in various venues throughout my State and throughout America. It was told to me by a lawmaker, a lawmaker who served several hundred years ago, a lawmaker named John Wilkes—not to be confused with John Wilkes Booth, Lincoln’s assassin. This John Wilkes served in the English Parliament in the late 1700s.

In 1769, John Wilkes found himself at the receiving end of anger and resentment by the administration of King George III. King George III and his ministers were angry with John Wilkes.

At the time, there were these weekly news circulars, weekly news magazines that went out and would often just extol the virtues of King George III and his ministers. One of them was called the Briton. The Briton was written, produced, and published by those who were loyal to the King, and they would say only glowing things about the King. They would write things about the King saying: Oh, the King is fantastic. The King can do no wrong. Had sliced bread been invented as of 1763, I am sure the Briton would have reported that the King was the greatest thing since sliced bread. All they could say were nice things about the King because they were written by the King’s people.

Well, John Wilkes decided to buck that trend. He started his own weekly circular called the North Briton. The point of this was not to criticize the King; The North Briton took the angle that it was supposed to be in the interests of the people that he reported the news and that he made commentary. So in the North Briton John Wilkes would say nice things about the King or question King George III and the actions of the King and of the King’s ministers.

This proved problematic for some in the administration of King George III. The last straw seemed to come with the publication of the 45th edition of the North Briton, North Briton No. 45. When North Briton No. 45 was released, the King and his ministers went crazy. Before long, John Wilkes found himself arrested. John Wilkes found himself subject to an invasive search pursuant to a particular type of warrant. It had become, unfortunately, all too common in that era, a type of warrant we will refer to as a general warrant. Rather than naming a particular place and things that might be searched and seized, this warrant simply identified an offense and said: Go after anyone and everyone who might in some way be involved in it. It gave unfettered, unlimited discretion on the part of the warrant—after all, anyone and everyone who might be executed.

So they went through his house even though he was not named in the warrant, even though his home, his address, was not identified in the warrant. They searched through everything. John Wilkes was, understandably, outraged by this, as were people throughout the city of London when they became aware of it. John Wilkes, while in jail, decided he was going to fight back. He fought in open court the terms and the conditions of his arrest. He ended up fighting against this general warrant. He eventually won his freedom.

Over time, he was reelected repeatedly to Parliament. In time, he also brought a civil suit against King George III’s ministers who were involved in the execution of this general warrant, and he won. He was awarded 4,000 pounds, which was a very substantial sum of money at the time. The other people who were subjected to the same type of search under the same general warrant were also awarded a recovery under this same theory, to the point that, in present-day terms, there were many millions of dollars that had to be paid out by King George III and his ministers to the plaintiffs who sued under this theory that they were unlawfully subjected to a search under a general warrant.

In time, the number 45, in connection with the North Briton No. 45—the publication that had sparked this whole inquiry—the number 45 became synonymous with the name John Wilkes, and then John Wilkes in turn became synonymous with the cause of liberty. People throughout Britain and throughout America would celebrate the number 45 or even celebrating the number 45. It was not uncommon for people to buy drinks for their 45 closest friends. It was not uncommon to write the number 45 on the side of buildings, taverns, saloons. It was not uncommon for the number 45 to be raised in connection with cries for the cause of liberty. So the number 45, the name John Wilkes, and the cause of liberty all became wrapped up into one.

It was against this backdrop that the United States was becoming its own Nation. When it did become its own Nation, when we adopted a Constitution, and when we decided shortly thereafter to adopt a Bill of Rights, one of the very first amendments we adopted was the Fourth Amendment. The Fourth Amendment responded to this particular call for freedom by guaranteeing that in the United States we would not have general warrants. The Fourth Amendment makes that clear. It contains a particularity requirement stating that any person or any subject to search warrants would have to be described with particularity. The persons would have to be identified or at least an area or a set of objects would have to be identified rather than the government just saying: Go after anyone and everyone who might be connected with this offense or with this series of events.

At that time, there were no such things as telephones. Those would not come along for a very long time. They certainly did not imagine, could not have imagined, the types of communications devices we have today. Nevertheless, the principles that they embraced at the time are still valid today, and they are still relevant today. The principles embodied in the Fourth Amendment are still very much applicable today. The freedom we embraced then is still embraced today by the American people, who, when they become aware of it, tend to be offended by the notion that the NSA can go out and get an order that requires the providers of telephone services to just give up all of their data, to give up all of their calling records, to give those over to a government agency, put them into a database and keep track of where everyone’s telephone calls have gone.

The idea behind this program is to build and maintain a database storing information regarding each call you have made and each call that has been made to you, what time each call occurred, and how long it lasted. This is an extraordinary amount of information, information that, while perhaps relatively innocuous in small pieces, might be pieced together in a database—one that includes potentially more than 300 million Americans, one that goes back 5 years at a time—can
be used or could easily be abused in such a way that would allow the government to paint a painfully clear portrait, a silhouette of every American. Some researchers have suggested, for example, that through metadata alone, it could be determined how old or young a person is, what your political views are, your religious affiliation, what activities you engage in, the condition of your health, and all other kinds of personal information.

One and only one of the above-bits of information is certain that will always be the case. We know how these things happen. They tend to abuse it. We understand something about human nature. We understand what happens to people one year from now, 2 years from now, 5 years, 10 years or 15 years from now? We know how it ends. We know it now. It is the way things are. They are certain that will always be the way things are. They have had the key to the door and would use it, if they were given the chance.

It has been the policy of the Congress to paint a painfully clear portrait of every American. To do this, the Congress has given the government power to collect metadata and to analyze and use that data in any way they see fit. The government is currently collecting only telephone call metadata right now, but they are inclined to begin collecting other types of data. This type of dragnet operation is incompatible with our legal system. It is incompatible with hundreds of years of Anglo-American legal precedence. It is incompatible with the spirit, if not the letter, of the U.S. Constitution, and it is not something we should embrace.

At the end of the day, we need to do something with this program. Not everyone in this Chamber agrees on what that something is, and not everyone in this Chamber who believes we need reform or who believes the NSA’s program of bulk metadata collection is wrong agrees on the same solution. But the way for us to get to a solution must involve open, transparent debate and discussion, and it absolutely must involve open, transparent debate and discussion, and it absolutely should involve an open amendment process.

So if there are those who have concerns with the legislation passed by the House of Representatives last week by a vote of 338 to 88, I welcome their input. I welcome any amendments they may have. I welcome the opportunity to make the bill better, to make it more compatible with this or that interest, to make it do a better job of balancing the privacy and national security interests at stake.

But we have to have that debate and discussion, and we have to have that process in order for the American people to be well represented and well served. We cannot continue to function by cliff. Government-by-cliff is a recipe for disaster. Government-by-cliff results in a take-it-or-leave-it, one-size-fits-all approach that is not something we should embrace. It is not something we should embrace.

I would ask my distinguished colleagues: do we have any inclination to abuse this program for nefarious political purposes or otherwise, or is there any evidence that the NSA is currently collecting metadata only with respect to phone calls. But under the same reading of section 215 of the PATRIOT Act that the NSA has used to collect this metadata—a reading with which I disagree and a reading with which the U.S. Court of Appeals for the Second Circuit disagreed in its thoughtful, well-written opinion just about 2 weeks ago—even though the NSA is currently collecting only telephone call metadata right now, there is nothing about the NSA conducting in any way the online activities described in section 215 of the PATRIOT Act—which is incorrect, by the way, an incorrect reading—but there is nothing about that reading that would limit the NSA to collecting only metadata related to telephone calls.

So who is to say the NSA might decide to broaden its reach or to expand its collection efforts? Might we not see the same kind of expansion of the NSA’s powers as we have seen in the past? Might we not see the same kind of expansion of the NSA’s powers as we have seen in the past? Might we not see the same kind of expansion of the NSA’s powers as we have seen in the past? Might we not see the same kind of expansion of the NSA’s powers as we have seen in the past? Might we not see the same kind of expansion of the NSA’s powers as we have seen in the past? Might we not see the same kind of expansion of the NSA’s powers as we have seen in the past? Might we not see the same kind of expansion of the NSA’s powers as we have seen in the past? Might we not see the same kind of expansion of the NSA’s powers as we have seen in the past? Might we not see the same kind of expansion of the NSA’s powers as we have seen in the past? Might we not see the same kind of expansion of the NSA’s powers as we have seen in the past? Might we not see the same kind of expansion of the NSA’s powers as we have seen in the past? Might we not see the same kind of expansion of the NSA’s powers as we have seen in the past? Might we not see the same kind of expansion of the NSA’s powers as we have seen in the past?
from Kentucky, if there are not ways in which we could come to an agreement, if we as a body couldn't come to an agreement on how best to resolve this difficult circumstance, if the cause of protecting American national security is irreconcilably in conflict with the protection of our people's privacy under the Fourth Amendment and, most importantly, I would ask my friend from Kentucky if privacy isn't, in fact, part of our security rather than being in conflict with it. I would be interested in any thoughts my friend from Kentucky might have on that issue.

Mr. PAUL. Mr. President, the Senator from Utah makes a very good point and also asks some very good questions.

In saying that we tend to work against deadlines here, I often say we lurch from deadline to deadline, and the American people wonder what the heck we are doing in between the deadlines.

The PATRIOT Act has been due to expire for 3 years. It is on a sunset of 3 years. We knew 3 years ago that this debate was coming. There should be plenty of time and, I think, adequate time to discuss the issues that affect the Bill of Rights, that affect rights that were encoded into our Constitution from the very beginning.

So I think without question the issue is of great importance and then we should debate it! But too often budgetary measures—or maybe this measure—get so crowded up against deadlines that people are like: Oh, we don't have time for amendments. The problem is, if you don't have amendments, you are not really having debate.

I think the Senator characterized very well that we both agree the bulk collection of data is wrong. We think that goes against the spirit and the letter of the Constitution.

However, at least half of us that we would encounter in this body don't even agree with that supposition. They believe, as many of them have pointed out, we are not collecting enough, and they don't care how we collect it, let's just collect more.

So we are on different sides of opinion, two groups here. And then some of us aren't exactly on the same page as our colleague from Kentucky knows, if there are not ways in which we could come to an agreement on how best to resolve this difficult circumstance, if the cause of protecting American national security is irreconcilably in conflict with the protection of our people's privacy under the Fourth Amendment and, most importantly, I would ask my friend from Kentucky if privacy isn't, in fact, part of our security rather than being in conflict with it. I would be interested in any thoughts my friend from Kentucky might have on that issue.

Mr. PAUL. Mr. President, the Senator from Utah makes a very good point and also asks some very good questions.

I think the Senator characterized very well that we both agree the bulk collection of data is wrong. We think that goes against the spirit and the letter of the Constitution.

However, at least half of us that we would encounter in this body don't even agree with that supposition. They believe, as many of them have pointed out, we are not collecting enough, and they don't care how we collect it, let's just collect more.

So we are on different sides of opinion, two groups here. And then some of us aren't exactly on the same page as the solution if you all agree on the problem. I think you could work through it. But we agree on the problem, two groups here. And then some of this debate today is, hopefully for a few minutes, from my limited experience—all parties of the Constitution.

Some of the amendments we have been interested in presenting as a way to fix this—so first you have to agree with what the problem is. We think the problem is that the government should collect all of the phone records all of the time without putting your name on a warrant, without telling a judge that they have suspicion that you have committed a crime. We think that collecting everyone's phone records all of the time without putting your name on a warrant, without telling a judge that they have suspicion that you have committed a crime, violates the spirit—if not the letter—of what James Otis fought against, it is like what John Adams said was the spark that led to the American Revolution.

So we think the American people also believe this, that the American people believe their records shouldn't be collected in bulk, that there should not be this enormous gathering of our records.

What we need to do is get to a consensus where everybody agrees that is a problem. But the body is still divided. About half of the Senate believes we should collect more records, that we are not invading your privacy enough, that privacy doesn't matter—that, by golly, let the government collect all of your records to be safe.

Well, when the privacy commission looked at this, when Senator Wyden and I, and when other people who have the intimate knowledge looked at this, their conclusion was that the bulk collection of our records, this invasion of privacy, isn't even working, that we aren't capturing terrorists we wouldn't have caught otherwise by this information. The practical argument that says we will give up our privacy to keep us safe, even that argument is not a valid argument.

But we have been looking at some of the possible solutions—and I see the Senator from New Mexico and would be pleased to entertain a question if he has a question.

(Mr. LEE assumed the Chair.)

Mr. HEINRICH. Yes. I thank my friend from Kentucky and ask him if he would yield for a question without losing his right to the floor.

I want to start out by prefacing this for a few minutes, from my limited experience—just between you and me, little over 2 years, and I am on the Intelligence Committee now—by saying there is simply no question that our Nation's intelligence professionals are incredibly dedicated, patriotic men and women make us. It is because we keep our country safe and free and, in that, they should be able to do their job, secure in the knowledge that their agencies have the confidence of the American people. And Congress—those of us here—needs to preserve the ability of those agencies to collect information that is truly necessary to guard against real threats to our national security.

The Framers of the Constitution, as my colleague from Kentucky knows, made the point that government officials had no power—no power—to seize the records of individual Americans without evidence of wrongdoing. And it was so important that they literally enshrined and embedded this principle in the Fourth Amendment to the Constitution.

In my view, the bulk collection of Americans' private telephone records by the NSA in this program clearly violates the spirit—if not the letter—of the Fourth Amendment.

Just 6 months after my first Senate intelligence briefing, former National Security Agency contractor Edward Snowden leaked documents that exposed the NSA's massive collection of Americans' cell phone and Internet data. And as my friend from Kentucky said, not just a few Americans but literally millions of innocent Americans were caught up in what is effectively a dragnet program.

It was made clear to the public that the government had convinced the FISA Court to accept a sweeping reinterpretation of section 215 of the PATRIOT Act, which ignited, in my view, a very necessary and long overdue public conversation about the trade-offs made by our government between protecting our Nation and respecting our constitutional liberties.

I think well-intentioned leaders had, during the previous decade, come down on the side of national security with a willingness to sacrifice privacy protections in the process. And what became obvious was that because of our continued lack of knowledge of Al Qaeda and other terrorist organizations, some within our government believed we still needed to collect every scrap of information available in order to ensure that, should we ever need it, we could query this information and track down U.S.-based threats. In doing so, the government ended up collecting billions of innocent Americans' communications that were linked in case after case after case not to terrorists but to innocent Americans.
Wisconsin Republican Congressman JIM SENSENBRENNER, who I served with in the House of Representatives, who was one of the authors of the original underlying legislation—the PATRIOT Act itself—said a couple of years ago: “The PATRIOT Act never would have passed . . . had there been any inclination at all that it would have authorized bulk collections.”

As this debate increasingly moved to the public sphere, I joined my colleagues on the Select Committee on Intelligence chaired by Senator WTVDEN, who was just here on the floor a few minutes ago, and former Senator Mark Udall—in pressing the NSA and the Director of National Intelligence for some clear examples in which the bulk information collected under this metadata program, under section 215, was uniquely responsible for the capture of a terrorist or the thwarting of a terrorist plot. They could not provide any—not a single solitary example—nor could they or any staff of any of our colleagues hold the data itself and why for so long.

Thankfully, a review panel set up by President Obama agreed with us and recommended that the government end its bulk collection of telephone metadata.

I will admit, however—and my friend from Kentucky has brought this up on several occasions already—that I am incredibly disappointed that the President has simply used his existing authority to unilaterally roll back some of the unnecessary blanket metadata collection. Some have claimed this inaction is evidence that the President secretly supports maintaining the current program as is. That, however, is nonsense.

The President has asked Congress to give him additional authorities so that he can carry out the program in an effective manner, and the USA Freedom Act stop short of that.

The Republican-led House of Representatives last week passed that bill—the USA Freedom Act—by a vote of 338 to 88, with large majorities from both parties. At a time when everyone believes we agree on nothing, large majorities of Republicans and Democrats supported that piece of legislation.

Further, the Second Circuit Court of Appeals ruling that the NSA is violating the law by collecting millions of Americans’ records is evidence that we have gone too far and need to recalibrate and, in my view, refocus our efforts. Why on Earth, I would ask, would we extend a law that this court has found to be illegal?

Given the overwhelming evidence that the current bulk collection program is not only unnecessary but also illegal, I think we have reached a critical turning point, and I want to thank my colleague from Kentucky for coming to the floor to force us all to have this conversation.

Mr. HEINRICH. Mr. President, I thank the Senator from New Mexico for that great question.

I think there is no way we can square this bulk collection with the Fourth Amendment. I think part of the problem, though, is that we, over a long period of time, diminished the protections of records held by third parties. And I think one of the debates we need to get hopefully to the Supreme Court sometime soon is whether you give up your privacy interest in records that are held by third parties.

I think there will come a time that your papers are held in your house—there are no papers in your house. There may not be paper. But there is still the concept of records. Records were traditionally on paper, and they were traditionally in your house. But now your most private papers are held digitally by your phone, and then by the people who are in charge of the different organizations such as phone, email, et cetera.

I think there has to be Fourth Amendment protection of these. Those who look at the court cases, and go back to probably the last important case, the Maryland v. Smith case, often say there is no Fourth Amendment protection at all for these records. In fact, the government will tell you they can do whatever they want with email, with text, and with all of these things.

And I am not convinced they are not using other programs, such as this Executive order program, to actually collect many other kinds of metadata other than just telephone metadata.

So I am very worried about it. I think we need help from the courts. But we need help from the legislative body to represent the will of the people. And I think the will of the people is very clear that the majority of people think we have gone too far and that we need to stop this indiscriminate vacuuming up of all Americans’ phone records regardless of whether there is suspicion.

Mr. HEINRICH. Mr. President, I would ask the Senator from Kentucky an additional question. I found it very helpful before I came to the floor today and I want to thank my colleague again for raising these critical issues—to go back and read the Fourth Amendment, and I thought it would be worthwhile just to briefly read that once again here on the floor because I think it really puts you in the mind of some of the greatest Americans who ever lived.

Our Framers wrote a constitution that has survived for well over 200 years now. It has survived Republicans. It has survived Democrats. It has survived political parties that came and went, and it has survived great conflicts time and again.

The Fourth Amendment says: “The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.”

I would ask my friend from Kentucky his views on the resilience of this constitutional document and how he can possibly read the actual text of this Fourth Amendment without realizing that those Framers really meant for this to apply into the future to things that we hadn’t foreseen yet but using the broadest terminology available, such as words like effects and papers?

I yield the floor and thank the Senator from Kentucky once again. This is one of those issues that unite people on the left and the right, Republicans and Democrats, who care about our national security but also care about our constitutional liberties. I think the time to fix this is upon us. And without shining a light on this, we certainly are not going to be able to make the progress we need. We have an opportunity here, and we should seize it.

I yield the floor to the Senator from Kentucky.

Mr. PAUL. Mr. President, I thank the Senator from New Mexico for coming down and for being a great supporter of the Fourth Amendment.

One of the things I think is interesting is that in our current culture we seem to devalue the Fourth Amendment. You go to all kinds of groupings and gatherings, and there is a lot of talk of the Second Amendment, talk of the First Amendment, but there hasn’t been so much of the Fourth Amendment until we got to this point with the collection of data seeming to be running amok.

One of our Founding Fathers was George Mason. He was considered to be
an anti-Federalist. He was a guy who really stood on principle, but also he was a guy who had the audacity to actually not sign the Constitution, even though he was asked and he was there and could have.

On December 17, 1787, he refused to sign the Constitution and returned to his native State as an outspoken opponent of the ratification contest. His objection to the proposed Constitution was that it lacked a declaration of rights. Mason felt that a declaration of rights was what we call a Bill of Rights—a necessity in order to curb Federal overreach.

Mason, though, was also famous for being an author of the Virginia Declaration of Rights, which was written a decade or so before our Constitution and upon which many things were based. He wrote in the first paragraph of the U.S. Declaration of Independence something similar to what we hear in the Declaration of Independence:

That nature equally free and independent, and have certain inherent rights, of which, when they enter into a state of society, they cannot by any compact deprive or abridge, the enjoyment of life and liberty, with the means of acquiring and possessing property, and pursuing and obtaining happiness and safety.

In the Declaration of Rights, which comes from 1776, for Virginia, he also was instrumental in including article IX. Article IX is basically the precursor to the Fourth Amendment. In it, he wrote:

That general warrants, whereby any officer or messenger may be commanded to search suspected places without evidence of a fact committed, or to seize any person or persons not named, or whose offence is not particularly described and supported by evidence, are grievous and oppressive, and ought not to be granted.

So from the very beginning, the Fourth Amendment was a big deal. It was a deal that the fact that it wasn’t included caused George Mason to say he couldn’t sign the Constitution. It was a big enough deal that this debate went on for a while, and finally the resolution of getting the Constitution included that there would ultimately be a Bill of Rights. Thomas Jefferson wrote about the Bill of Rights. He said:

A bill of rights is what the people are entitled to against every government on earth, general or particular, and what no just government should refuse, or rest on inferences.

I like the way he put it: A Bill of Rights is what the people are entitled to against every government. It is a protection.

Jefferson also described the Constitution as the chains of the Constitution. The chains were to bind government and to prevent government from abusing its authority.

When we have adhered to this, when we paid strict attention to it, we have maximized our freedom. When we have let our guard down, when we have allowed our guard to stray away, when we have allowed the government to usurp authority to gain and grab and take more power, it has been at the expense of freedom.

I think we can be safe and have our freedom as well. I think we can obey the Constitution and catch terrorists at the same time. I think, in fact, frankly—strictly from a practical point of view—I think we gain more information by using the Constitution. By having less indiscriminate collection of data and by localization of discriminating data—a data that is based on suspicion, data that is based on tips, data that is based on human intelligence, data that we can focus all of our human energy on—I think we actually can catch more terrorists. I think there has been instance after instance where we did have information on terrorists and we failed to act, perhaps because we are spending so much time and so much energy on the indiscriminate collection of data.

William Brennan is one of our famous justices, and he said of the Framers:

The Framers of the Bill of Rights did not purport to "create" rights. Rather, they designed the Bill of Rights to prevent government from infringing rights and liberties presumed to be preexisting.

We didn’t create the rights. Government didn’t create your rights. Your rights come naturally to you. For those of us who believe in a Creator, they come from our Creator. But they are important to protect. They should be protected against all forms of even majority. It is why some of us think it is very important to say that we are a Republic, we are a democracy, that no minority should be able to take away our rights. That is why this is important. I think these questions ultimately get to the Supreme Court. Because no matter what the majority says here, no matter what the majority of the legislature says, the Bill of Rights lists and codifies rights that cannot and should not be taken away by a majority: the rights that we have to be secure in our person, house, papers, and effects. The Framers said, the most cherished of rights, the right to be left alone. But this debate is a long and ongoing debate. For nearly 100 years, from the Olmstead case in 1928 to the present, we have had a discussion and a struggle and a controversy over what parts of our conversations are to be protected and what parts are not to be protected.

I think a lot of our problems really originated with going the wrong way in 1928 with the Olmstead case. Because we went for a long period of time—we went for two generations thinking that your phone calls were not private and that your phone calls were not protected by the Fourth Amendment. Then, in the mid-1960s, and we reversed that and we said your conversations are to be protected. But within a decade we made the wrong decision again and said that your records are not private. I think that your Fourth Amendment, your records once held by the phone company, aren’t to be protected. I think that was a mistake.

I think it is also a mistake to think we are literally talking about paper in your house because there is quickly coming a time in which technology will be such that there will be no papers. Papers will be another word for records, but your records will not be kept in your house.

They already aren’t. There was a discussion of this in whether we can search a person’s individual phone, and the Court did rule I think in an accurate way. The Court justices said that, basically, the information found on your phone is more personal and more extensive than probably any papers that were ever in any home in a time before electronics. So we are going to have to catch up to electronics, we are going to have to catch up to the digital age, and we are going to have to decide does the individual maintain a privacy interest and/or a property interest.

I, frankly, think that when the phone companies hold my records, that they are partly mine; that there is a property interest and a privacy interest I haven’t relinquished. Unless I have given explicit permission, I don’t think I have given up my privacy. In fact, my times is the thing.

Many times what we have actually said is, when I agree to do banking with you or I agree to have you hold my telephone calls or I agree to do Internet searches with you, I have an express agreement, an express agreement often. The agreement is so explicit to defend my privacy that when they don’t, they are actually fearful of being sued. And so all of this craziness, all of this overreach, all of this loss of our privacy comes with a little additional caveat that is written into all the laws and everybody is clamoring for and it is what we want now—liability protection. They want to be able to violate their privacy agreement. So we give them liability protection. They don’t want it, but they realize they are violating and could be accused of violating our privacy agreement.

So as much as I hate and despise frivolous lawsuits, the threat of suing somebody causes them to obey their contract. If they don’t have the threat—if you say: Well, we are going to have contracts, but we are not going to enforce them with the threat of a lawsuit, then contracts become meaning less. So it is really important that as we move forward, we say to people the privacy agreement you signed is a real document, it is a real contract, and it should be protected.

When referring to the Bill of Rights, Gen. Smedley Butler, who was a two-time Medal of Honor winner, said:

There are only two things we should fight for. One is the defense of our homes and the other is the Bill of Rights.

When I have gone to the young men and women who have fought bravely for our country—young men and women who have lost limbs, families of those who have lost lives—that is what
I hear from every one of them. I hear from them that they were fighting to defend the Bill of Rights. They were fighting to defend our Constitution.

What saddens me is that while they were fighting for our Constitution, while they were fighting for the Bill of Rights, their legislatures weren’t fighting for the Bill of Rights. Their legislators were turning the other way. Their legislators were so fearful of attack that they gave up on the Bill of Rights and said: here is my liberty, just give me security. This is a long-standing debate. Franklin had it right—those who are willing to give up their liberty may end up with neither.

Now, some would ask: Why am I here today? What do I propose to get out of this? Is there an end point when I will go home and be quiet and quit talking about the Bill of Rights?

I think there could be. I think if the leadership of both parties in the Senate would agree to have amendments and have votes—and I will give some examples of some things that we think—most of these will ultimately be introduced in all likelihood by Senator Wyden and I. I will start with the first one. This is based upon an amendment that he and I have worked on together. This amendment would prohibit mandates on companies that alter their products to enable government surveillance. So this amendment prohibits any mandates from government agencies requiring private companies to alter their security features—their source code—to allow the government to get into their stuff and into your lives.

This amendment would apply to computer services, hardware, software, and electronic devices made available to the general public.

Currently, the government is requiring and sometimes telling companies they can even tell you this. They are requiring access to certain products. There have been stories of them inserting malware on Facebook, giving you access to Facebook, and then getting into your Facebook account through the Facebook code source. I know Facebook has objected to this and fought them on this, but our amendment would say that the government just can’t do this. The government cannot force different social networking sites and Internet software to make it so the government can’t force them to give the government access indiscriminately.

The question would be: Can the government require things specifically? Absolutely, yes. Present evidence to get a warrant, and realize that when they want to make you so afraid that you give up all your records, realize that warrants aren’t hard to get. The FISA warrants are almost without question agreed to, maybe to a fault. Ninety-nine percent-plus of all the warrants agreed to are granted. I think it isn’t too much of a step to say we should ask and request warrants.

The second amendment we would consider putting forward, if we were allowed to and allowed to have votes on, would replace the PATRIOT Act extension with comprehensive surveillance reform. We would replace the extension of expiring authorities with substantial reforms already passed by Senators Wyden and Paul and others in the Intelligence Oversight and Surveillance Act of 2013.

This amendment would end bulk collection. We would close the section 702 backdoor search loophole, which allows the government to say they are searching foreigners’ records but in reality gather up 90 percent of the records being American records and called incidental. We would close this backdoor loophole where actually American records are being collected, not foreign records. We would create a constitutional advocate to argue before the FISA Court, before the intelligence court.

The reason I think this is necessary is that the court has somewhat become a rubberstamp for the government, and we aren’t allowing any kind of opposing arguments and we really aren’t having any argument. For example, we have loosened the standard from the constitutional standard, which is probable cause, and we have said it is relevant. So we get to relevance. But when you come before the court, I don’t think they’re going to be asked to prove whether it is relevant. Certainly they must not because they are somehow approving the collection of everybody’s records in the United States—which I don’t know of anybody who believes the word “relevant” can include everybody.

So if we had an advocate or we had someone to say this is the other side—I think it is really important. I am not a lawyer, but I understand they argue that if they can do it, why can’t I, who believe good standards, can accept a little bit of that—a slightly lower standard for people who do not live here and are not American citizens and are not part of our country. It has its dangers, but even I might be able to accept that. But what I cannot accept is that you lower the constitutional standard. You are going to use a terrorist warrant that has a lower procedural hurdle, and then you are going to use it for domestic crime.

This was originally the way it was. This is why you have to worry about the slippery slope. Back in the 1970s, they said: OK, we are going to have a different standard to get foreign targets and we have good standards, can accept a little bit of that—a slightly lower standard for people who do not live here and are not American citizens and are not part of our country. It has its dangers, but even I might be able to accept that. But what I cannot accept is that you lower the constitutional standard. You are going to use a terrorist warrant that has a lower procedural hurdle, and then you are going to use it for domestic crime.

That is exactly what is going on now. We should be appalled that they destroyed the Fourth Amendment for certain crimes and we did not do anything about it.

Section 215 of the PATRIOT Act is called sneak-and-peek. The government can go into your house and never tell you they were there. They can look through all of your records. They can steal stuff. They can replace it. They can do all kinds of things and place listening devices—all without ever telling you.

This is in contradiction to what most people have accepted the Fourth
Amendment to be. But if you look at who is being convicted with section 213, 99.5 percent of the people are for drugs, for domestic crime. What we have done is that we have taken a domestic crime and we say the Constitution no longer applied. We only got right to the Fourth Amendment for these crimes.

For about 11,000 people a year, the Constitution no longer applies to them. We are using a lower standard. If you want to make this even worse, think about the drug use. They are convicted of drug crimes in our country. Three out of four people being convicted of drug crimes in our country are Black or Brown. But if you ask who are the kids who are using drugs, equal numbers of White and Black kids are using drugs. But three out of four people in jail are Black or Brown. Then you find out that not only have we messed up the war on drugs such that it has a racial element to it, but we are now using a lower standard in this case, not the Constitution, and the end result is a racial outcome.

This is an enormous problem. Related to so much of what is going on in our country, so much of the anger you are seeing comes from this injustice. You now have people going to jail. You have people going to jail for 15, 20, 30 years.

There is a woman by the name of Mary Martin from Mason County, IA. Her mother just died recently. She had never been convicted of any other crime. She was a meth addict. She was probably going to die if she stayed on the drugs, so it was good that she got off the drugs. She got caught. She got 15 years in prison.

For about 11,000 people a year, the Constitution no longer applies to them. They let her out of prison for a couple of hours. Her dad is getting older, and she wishes she had been there to help her parents. She did mess up. She was a drug addict. Her boyfriend was a drug addict. They locked the cell phone in the house. They were selling the drugs. He was a meth addict. She was probably going to die if she stayed on the drugs, so it was good that she got off the drugs. She got caught. She got 15 years in prison.

You have people in Kentucky and be out on parole in 12 years. Yet we put this woman in jail for an addiction. She had never been convicted of any other crime. No judge in their right mind would ever give someone 15 years—nobody would have. The judges basically are telling the defendants and telling the press: I would never do this. This is the wrong thing to do, but I am forced to do this. Compound this with the fact that the war on drugs has had a racial outcome. You put the two together and you say: Well, we are no longer obeying the Constitution, and there is a racial outcome.

What is evidence doing now? Where is the President on this issue? I have talked to the President about criminal justice. I think he sincerely wants to help. But here is the thing. The President could today stop the program. He could stop collecting stuff through the sneak-and-peek. He can say we are no longer going to do the bulk collection. Most of these things originated out of Executive order. He could stop them any time he wanted to. Would stop it. We would say no more spying against Americans and no more use of this information for non-terrorism criminal cases.

We have another amendment that goes to the heart of what I think should be decided by the Supreme Court. We call this the amendment that would protect the privacy of Americans’ records held by third parties. We think that your records do retain a privacy interest. This amendment—should the leadership agree to allow us to have amendments—would establish a clear principle consistent with the Fourth Amendment. As it relates to government, an individual’s records, if given to a third party for a specific business purpose, are equally secure in their person as those that remain in their possession, unless the third party informs the individual that it intends to share the information. This amendment affirms that the government cannot circumvent warrant requirements by taking Americans’ records from third parties, and it protects the constitutional rights during engagement and regular communication and commerce.

I think we had a vote on this a while back. I do not think we were that successful. I think we got four people to vote—to say that your records should be protected by Fourth Amendment. Most people do not realize this. Most people have no idea that the government’s position, and, currently, maybe the Supreme Court’s position, is that you do not have any right—Fourth Amendment right—in your records unless you have them in your house.

I think this is something about which the more people understand and the more people are drawn to this issue, maybe people will demand that we have some justice here. We live in an era where ultimately no one is going to have paper records in their house. All of your records are going to be electronic. Because they are held and they are managed somehow by a third party, legally can we have given up our rights? The thing is that the government might say if your cell phone is in your house, then they do. But the cell phone is connected to someplace outside your house. Your email is being served on some server somewhere. I see no way that it could be construed that you have given up your right to privacy because someone else is holding the records for you because that is the way in the digital age we have come to hold records.

We talked a little bit earlier about trust. I think trust is incredibly important. I do not discount that the vast majority of people who work in our intelligence community are honest, trustworthy, and patriotic. I think we all want the same thing. We want to protect our country. We want to protect our loved ones. We want to honor the memory of those who died on 9/11 by capturing and stopping the people who would attack us. But the question is, are we more or less effective in catching terrorists if we use the Constitution, if we use traditional warrants?

I think, without question, if you talk to people, they will tell you that they get a great deal more information and more specific information by using warrants.

Let’s say tomorrow we elected a President who eliminated the bulk collection of data. Let’s just say it happened. What do you think would happen? People say: Oh, the sky would fall. We would be overrun with jihadists. Maybe we could rule on the Constitution. Maybe we could do it constitutional. The information is out there. There are warrants. If you make the warrants specific, there is no limit to what you cannot get through a warrant. The warrants are given the vast majority of the time.

People complain and say it would take too long; it would be inconvenient. Make it better then. Put your judges on 24 hours a day. Appoint 24 fully reading; let, in, a normal fault the time, and let’s do this. There is no reason why you cannot have security and liberty at the same time.

Another amendment we have—should the leadership agree to allow us to have amendments—to have a debate on this—is an amendment that would require the court to approve national security letters. In a 3-year period between 2003 and 2006, 140,000 national security letters were given out. National security letters are warrants that are below the constitutional bar. They do not meet the constitutional bar because they are not being signed by a judge. They are being signed by the police. You got rid of one of the great protections we had, which was the check and balance that the police would always go to the judiciary. It was a different branch.

The judge is sitting at home, hopefully reading it in a reasoned fashion. The judge is not in hot pursuit. The judge is not letting their emotions—the judge was not just punched by one of the convicts. The judge is sitting at home in a reasoned fashion trying to make a reasonable decision. But still, the vast majority of the time, warrants are given.

If there is a policeman outside the house of an alleged rapist, and they want to go in, they call on a cell phone. The judge almost always says yes. It is the same for murder.

Does anybody imagine that there would be a judge in our country and that you call and say: John Doe—we have evidence that he traveled to Yemen last year. We have evidence that he talked to Joe Smith, and we have evidence that he is a terrorist, and we want a warrant to tap his phone.

Let’s say: I am the biggest privacy advocate in the world. I will sign the warrant immediately. I do not know of anybody that will not sign warrants to allow searches to occur. But you have the check and balance. It does not get out of control. What happened and what is happening now is we let down our guard. We have no checks and balances. So what does the government do?
when you are not watching? If you look away, the government will abuse their power. Lord Acton said: “Power corrupts, and absolute power corrupts absolutely.” The corollary to that would be: When you are not watching, power grows. They will do whatever they can get away with. They will do it in the name of patriotism. Actually, I do not even question their motives. They believe themselves to be patriotic, but they think we have to do anything it takes to survive whether it travesnes the Constitution or contravenes the Bill of Rights. The people who do this—their motives are good, but they are confused in a sense, and they do not fully comprehend what we are giving up in the process.

This amendment would require judges to sign national security letters. It would make them more like warrants. In practice, national security letters have become warrants written by judges without court review and approval, granting them almost unfettered access to individual email and phone communication data, as well as consumer information such as bank and credit records.

The least of the national security letters must also obey a gag order. Not only does the Government come to you with a less than constitutional permit or a less than constitutional warrant, but they then tell you that you cannot talk about it. You may go to jail for 5 years if you tell somebody you had a warrant served on you.

This amendment would require that a government obtain approvals from a court prior to issuing an NSL to a private entity, thus forcing them to demonstrate a clear need for information as part of an investigation.

Amendment 6 would create a new channel for legal appeals for those subjected to government surveillance orders. The amendment would empower individuals or companies, ordered by the government to hand over information about users or customers, to make constitutional challenges that would be in order in the U.S. court of appeals. My understanding right now is that it is very difficult to appeal a FISA order. They are secret. You are not allowed to be in the court, so you are not allowed to participate in the process. I think, also, you can get outside of FISA by appealing, but I think you have to exhaust something called a writ of certiorari. It is a special condition, and it is not so automatic. My understanding is that the court will grant these things, but they do not occur very often. They are an extraordinary thing.

We would like to make it a little bit more of a facility of getting to a normal appeal—the way a normal appeal would occur. We have been pushing to allow that there would be more of an automatic sort of appeal here.

One of the other amendments would say there is no liability immunity for companies that break their agreements with users. Like I said, while I am not in favor of lawsuits and I do not like the idea of frivolous lawsuits, I think if you do not protect the contract and if you have a privacy agreement that says they are not going to share your information with anybody, the only way they will protect it is if there is the threat that they could be sued for not protecting it. I think the contracts become not worth the paper or the click “I agree to this” and become meaningless. If companies you are told they can go around it. The companies have all specifically requested this because I think they fear that every day the government is requesting them to breach the privacy contract. So in order to enable the privacy contract, I think we have to get to a point where people can sue if their privacy is violated.

I think there can be a mixture of opinions on what Snowden did. I think that we have to guard against this.

So we have the intelligence director lying to us and saying the program doesn’t exist, and then we have some— there has to be laws against revealing secrets, so I can’t say we should have everybody revealing secrets. At the same time, I think the law says that those who are reporting to Congress should tell the truth.

So I came over to the Senate floor, and I will be happy to entertain a question without losing the floor.

Mr. DAINES. Will the Senator from Kentucky yield for a question without losing his right to the floor?

Mr. PAUL. Mr. President, I will yield to the Senator from Montana.

Mr. DAINES. I thank my colleague for raising this important issue on the Senate floor today. It wasn’t all that long ago that I served as a House Member. I served one term in the House and then came over to the Senate this year. I came over to the Senate floor, and I stood in support of my colleague’s efforts to protect the American civil liberties and ensure drones are not being used to target American citizens on our own soil.

In fact, I am grateful to see that in the Senate Chamber today, we have five House Members standing with the Senator from Kentucky as he makes his very important point which relates to our Constitution and our freedom.
Well, 2 years later, we are here again, and the threats to America's civil liberties and constitutional freedoms remain ever present. As my colleague from Kentucky is well aware, I spent more than 12 years in the technology section before being elected to Congress. I know firsthand the power that Big Data holds. I also know the great risks that arise when that power is abused.

There is a clear and direct threat to Americans' civil liberties that comes from the bulk collection of our personal information in our phone records. I, like so many Montanans, am deeply concerned about the NSA's bulk metadata collection program and its impact on our constitutional rights. In fact, just last night, I hosted a telephone townhall meeting with thousands of Montanans, and one of the issues I heard most about was the NSA's bulk data collection program and when is Congress finally going to put a stop to it. In fact, this is one of the issues I hear most about from my fellow Montanans.

I brought down just a few of the thousands of letters I received from Montanans on the NSA's dangerous bulk metadata program. For example, I have a letter from Adam, who lives in Missoula. Adam writes:

I'm writing to ask you to allow Section 215 of the PATRIOT Act to expire on June 1st of this year. While it is only one provision of the law, it would at least begin to curtail the surveillance of Americans. As Americans we should be free to communicate without the threat of the government monitoring those communications. Wanting to keep your life private does not mean you have something to hide—only that your life isn't any of the government's business as long as you are not infringing on the liberty of others.

At the end of the day, giving up our liberties because of the threat of terrorism truly jeopardizes the threat of terrorism winning. To be free inherently means a person also incurs risks.

Even though he was speaking about taxes, I believe he's talking about terrorism: "Those who would give up essential Liberty, to purchase a little temporary Safety, deserve neither Liberty nor Safety."

Jes from my hometown of Bozeman, MT, wrote:

I am writing to you as your constituent. NSA spying needs a comprehensive overhaul. But in the meantime, I urge you to show that you care about the Constitution by voting against reauthorization of Section 215 of the USA PATRIOT Act. Section 215 has been used to invade the privacy of millions of people.

The demand in Congress and the NSA have argued that collecting cell detail records ("metadata") is not privacy invasion, the information collected by the government is not used, it only permits an intimate portrait of the lives of millions of Americans.

What's more, the collection of cell detail records is not even necessary to keep us safe. The President, the Privacy and Civil Liberties Oversight Board and the President's Review Group have all admitted that collection of metadata is not necessary for the refinement of our intelligence community.

PCLOB (Privacy and Civil Liberties Oversight Board) went so far as to note that it could not identify a single time in which bulk collection under Section 215 made a concrete difference in the outcome of a counterterrorism investigation.

That's why I strongly support reform by committing to a no vote on reauthorization of Section 215. A vote against reauthorization is a vote for the Constitution. Thank you for opposing unconstitutional surveillance and for supporting a free and secure Internet.

Montanans are right to be concerned. This program is a direct threat to our constitutional rights. It has jeopardized our civil liberties with little proven effectiveness, and I am the son of a U.S. marine.

Several weeks ago, I was with Leader McConnell and other Senators. When we went to Israel, we met with Prime Minister Netanyah. When we went to Jordan, we met with King Abdullah. When we went to Iraq, we met with Prime Minister al-Abadi. When we were both in Baghdad, we went up to Erbil and met with the leaders of the Kurds, including Mr. Barzani. We then went to Afghanistan. We were in Kabul, and we were in Jalalabad. We met with President Ghani. We heard directly from the leaders in the Middle East, we heard directly from our U.S. military, and we heard directly from intelligence about what is going on in the Middle East.

As the father of four and someone who strongly believes in a strong national defense and the importance of protecting our homeland, I weigh these issues very deeply. These are heavy issues we must look at as we want to ensure we protect the homeland and, just as important, protect the Constitution and the constitutional rights of the American people.

As my colleague is likely aware, a 2014 report from the Privacy and Civil Liberties Oversight Board, which is a nonpartisan, independent privacy board, found that the NSA's bulk data collection program had "contributed only minimal value when combating terrorism beyond what the government already achieves through . . . other alternative means."

Like the New York-based Second Circuit U.S. Court of Appeals recently unanimously confirmed, this oversight board found that section 215 of the PATRIOT Act does not provide authority for the NSA's bulk metadata collection program. In fact, the report states: "Under the Fourth and Fourteenth Amendments, the NSA acquires a massive number of calling records from telephone companies each day, potentiely including the records of every call made across the nation. Yet Section 215 does not authorize the NSA to acquire anything at all."

It is illegal, it is an overreach of power, and it is a direct threat to our First and Fourth Amendment rights.

In fact, the report goes on to conclude:

The program lacks a viable legal foundation under Section 215, implicates constitutional violations, is not needed for the Fourth Amendment, raises serious threats to privacy and civil liberties as a policy matter, and has shown only limited value. For these reasons, the government should end the program.

I stand here today with the people of Montana. I stand here today with my colleagues from Kentucky, I stand here today with five Members of the U.S. House who are seated in the back of the Senate Chamber: Congressman Duncan of South Carolina, Congressman Blum of Iowa, Congressman of Kentucky, Labrador of Idaho, and Congressman of Michigan.

I think it is important that the Senate recognize what the President's House did last week when it passed the USA FREEDOM Act. That vote was 338 to 88. To suggest that this is just a small minority of Congressmen and women who support the USA FREEDOM Act—this is the chairman of the Intelligence Committee, the chairman of the Armed Services Committee, and the chairman of the Homeland Security and Governmental Affairs Committee, amongst many others, who made sure we strike the right balance between protecting the homeland and protecting our civil liberties.

The people of Montana, my colleague from Kentucky, the five Members from Congress who are here at this moment, and millions of Americans know I strongly agree with their view on the USA FREEDOM Act.

Like all Americans, I understand the great risks that face our national security and the threats from North Korea, and the threats from Iran grow stronger each and every day. We must be prepared. We must ensure our intelligence and law enforcement agencies have the tools they need to protect and defend our Nation. But these objectives—national security and protection of our civil liberties—are not mutually exclusive. We can and we must achieve both. We must maintain a balance between protecting our Nation's security while also maintaining our civil liberties and our constitutional rights.

All of us standing here today took an oath to protect and defend the Constitution. I took that oath just a few steps away from where I am speaking here today, between myself and the President's Office chair, occupied at the moment by the Senator from Utah, Mr. Lee.

As all of us here today know, the fight to protect our Constitution and America's civil liberties is far from over. We must remain vigilant and we must also ensure that we have robust and transparent debate about these programs and what reforms must be implemented to protect America's civil liberties. That is why I support the USA FREEDOM Act, which would end the NSA's bulk metadata collection program and why I strongly believe that Congress must engage in an open amendment process. American people must have their voices heard, and an open amendment process will help ensure that happens.
Mr. MANCHIN. Mr. President, will the Senator from Kentucky yield?
Mr. PAUL. I will, without yielding the floor.

Mr. MANCHIN. I know the Senator from Kentucky agrees with me that the protection of our civil liberties should be bipartisan and above politics. I know he agrees that we can and must protect our citizens without violating their civil liberties. Again, I don’t always agree with my good friend from Kentucky on this issue, but when it comes to this Nation’s intelligence gathering and security, we agree more than we don’t.

As was he, I was deeply troubled by the revelation that our country was engaged in bulk collection—I think we all were surprised—and that millions of private citizens’ data was gathered unknowingly and unjustifiably.

In 2013, Edward Snowden revealed to the American public that the NSA was engaging in “bulk data collection,” in sweeping up virtually every cell phone record of an enormous number of Americans, again for no reason. The U.S. spying program did this by systematically and indiscriminately collecting millions of Americans’ phone records by simply digging up every phone record that came into its net even if it wasn’t remotely related to a broad, general search. These are not searches that targeted potential threats or an individual; it was just a huge database of documenting what millions of law-abiding citizens were doing.

That is not what this country was based on, and I think the Senator from Kentucky has made that very clear. I know the Senator from Kentucky believes this was wrong, as I do. That is not just our opinion; national security experts, legal experts, the American public, and even several courts have said that the bulk collection of data is not only unconstitutional but also unnecessary to our national security. And my friend from Kentucky has confirmed that the President’s review group has said that bulk data collection is related to a relevant, particular threat or an individual group; it was just a huge database of documenting what millions of law-abiding citizens were doing.

The Senate bill will end the bulk data collection program. I believe this bill, USA FREEDOM Act of 2015, moves us in a positive direction. It ends the bulk data collection program and ensures that the collection of data is related to a relevant, particular threat or an individual group; it when it comes to this Nation’s intelligence gathering and security, we agree more than we don’t.

Mr. PAUL. I wish to thank the Senator from Montana for that excellent synopsis of the issues as well as for the great question.

I think the reports by the review committee and the privacy committee, both commissioned by the President, both bipartisan, are incredibly powerful because not only did they look at the constitutional issue of whether this is a bulk or a general warrant versus an individual warrant, they also looked practically that it wasn’t working, it wasn’t adding anything to our intelligence. So I think we have sort of a dual reason now to say this is a big problem.

One of the things about this issue is that when we examine the evidence—and the privacy commission actually looked at classified evidence; they looked to see whether it was adding anything to this—I am thoroughly convinced that we can catch terrorists with traditional constitutional warrants.

When I have talked to former high-ranking heads of our security agencies, they freely admit they get more information with a warrant. It is a little more work. It has to be more specific. But I am also a believer in that because we have generalized what we are looking for and it is indiscriminate, that maybe we are missing people because we are overwhelmed with data. We are overwhelmed with things at the airports. I would much prefer that we have less indiscriminate searches at the airports and be more specific in looking at the manifestations of who is flying and trying to find out who are the risks.

So I do think that, without question, this is not a constitutional program. It is not even legal under the PATRIOT Act. I know the Senator from Kentucky also said we should do everything we can to stop it.

I appreciate the support of the Senator from Montana.

One of the things about this issue is that it really is a bipartisan issue. It is an issue where there are people who feel strongly on both sides of the aisle. The Senator from Oregon was here earlier and the Senator from New Mexico, and I now see the Senator from West Virginia who is a loud and consistent voice on this.

Does the Senator from West Virginia have a question?
Mr. PAUL. Let me make sure I have the question correct. The Senator’s question is on my concerns on the USA FREEDOM Act?

Mr. MANCHIN. USA FREEDOM 2015.

Mr. PAUL. I want to like it because it ends bulk collection, and I am all for ending bulk collection. So we all agree—the people for it agree with the problem; it is a question of the solution.

It says there have to be specific selector terms on U.S. persons. Part of my problem is that “person” is still not defined as corporations. My concern is that you could put the word “Verizon” in there, and the government wouldn’t be collecting the records, but you still could get all records from Verizon. Does the Senator see what I mean? That is one of my concerns with the way it has been written.

My other general concern is that we would still be having bulk collection. It wouldn’t be bulk collection by the government, but it would still be bulk collection but through the phone companies.

I don’t like the liability protection because I think it makes it more likely than not that the privacy agreement won’t be as respected if they cannot be sued for violating the privacy agreement.

Those are a couple of concerns. I don’t know if they are insurmountable, but those are a couple of concerns.

Mr. MANCHIN. I think we both agree and most of the people in this body agree that the bulk collection is wrong. It has been proven to be illegal, it shouldn’t have been done, and it should be stopped. I think we all agree on that.

I think we still face considerable threats from around the world on a daily basis, if not even greater than that. We are looking to try to find a balance, and I think the Senator from Kentucky is valuable in helping us find that balance. That is what we are looking for. I know our colleague, Senator Lee from Utah, has made a gallant effort in trying to find that balance and making sure that we don’t overstep.

The private companies are collecting. They already have that information anyway. It is not just sweeping from NSA, as they had been doing. Basically, I am understanding by this bill, the USA FREEDOM Act of 2015, that basically we would have to demonstrate to the FISA Court reasonable, articulately suspicion that its search term is associated with a foreign terrorist organization. They can’t even go into those records until that is shown. That is what the people interpreting what we have now are interpreting 215 to mean we can collect all of the American records in bulk.

If there were a circumstance where I was necessary to pass USA FREEDOM and if it were that close, if people were willing to look at the bill and say we would make a person, an individual—see, the big thing for me is that the warrant should be individualized. And I am concerned that if we use the word “person” and if it can be replaced with the word “Verizon” and we still collect all the records, I would feel disappointed if we thought we got rid of bulk collection and a year or 2 from now they finally admit it, they admit: Oh, we are still doing the very same thing. We are doing Verizon. We are getting all of Verizon’s records. We are just making them process it, and we are paying them for it.

That doesn’t make me feel that don’t happen.

Mr. MANCHIN. I guess we are caught in that Citizens United decision, it sounds like.

Mr. PAUL. In a different way, we are talking about whether in the intelligence selector numbers a person is a corporation and whether can have a single warrant.

I think if you want phone records from Verizon, it should say “Verizon” and not the records of John Doe. It shouldn’t just say that we want all the records from Verizon. That is a general warrant. I am still fearful that the USA FREEDOM Act might not limit that.

Mr. MANCHIN. If the FREEDOM Act goes away and the way they are doing bulk collection, which we agree should be done away with—and we don’t come to some agreement—are you concerned that we might be in more jeopardy by not being in place where we can get about why we have to have a warrant?

Mr. PAUL. I guess that is also where I probably differ. I think we are just as safe or safer with nothing, because the Constitution allows the searching of records. And I am all for it, but I would do it through warrants.

The point is that in metadata, one can do a hop or two with these less-than-constitutional warrants or whatever. But with a real warrant, we can get into the data. It really would chase the rabbit down the hole. I would look very hard with suspicion, and I think warrants are generally easy to get. This is the point I don’t get about why we have to have warrants with a lower constitutional standard, because I think the FISA warrants are almost never turned down, but neither are criminal warrants. If you are a policeman standing in front of a house, you are somehow just going to get a no. But if you are a policeman saying, I want to search all my neighbors’ houses, then the judge is going to say no, and that is a good thing. So I think traditional warrants—I think people have somehow just convinced themselves that we can’t catch terrorists with traditional warrants, but I think you can go through a lot of data with traditional warrants, too.

Mr. MANCHIN. Your sincere belief is that if this sunsets, this bulk collection in the way the PATRIOT Act has been enforced before—if it sunsets and it goes away, which we agree that we are trying to replace that before the sunset—you believe the system we have now would not be sufficient?

Mr. PAUL. I think that also and within the context of—we have six or seven amendments that we would like to offer. I can’t guarantee that we could win any of them, but there is a chance maybe we could win another reform.

So for example, one of the reforms that some people think may be as important as all the bulk collection is the ability of the government to tell an Internet provider that they have to create a backdoor to their product for the government to go through—and some of the backdoor stuff through 702.

We think there are some other things that may well be as big as this. I also think there is the question of the government to not only use traditional warrants. They have some they are using under Executive order, as well, and we still have a host of other types of warrants and subpoenas being used. But I would never be for this in a heartbeat if I thought it was going to put the country in danger. I think we will be safer because of it and so will our liberty.

Mr. MANCHIN. It is a good point in the bill that we will be considering, the 2015 FREEDOM Act. It expands the opportunity for the appellate review of the FISA Court decisions, which I think the Senator has had a problem
Mr. MANCHIN. It sounds like we are not that far apart. I think we are all going down the same path, trying to keep the homeland as secure as possible while protecting the rights of all Americans. I appreciate that. I hope that we do. These are important issues. It is a different world that we live in. It is a threatened world that our children are being raised in. We want to do everything we can to protect them, and I know you do, too.

With that, I think we all came to an agreement that was done before was wrong. So we all come unanimously to that agreement, and finding a pathway forward is what we are working on now. So I appreciate your sincerity and your intent to try and reach out and find that. I hope you can find that comfort level so we can move forward and still have a protected country.

Thank you.

Mr. PAUL. I am not sure I understand the question, but I do believe as to the court case right now, there is a way, but it is going to have to involve some give and take to figure out. There is a way, but it is going to have to involve some give and take to figure out. So I think their No. 1 reason is pretty strong. There can't be a connection or relevancy containing significant legal protection at all for records that are no longer going to be real records that you can hold in your hand. I think almost all of our records will be virtual and held in space somewhere, and I think you still have to have a personal privacy protection in those.

Mr. MANCHIN. So the bill that we have not—an agreement because they were relevant to an investigation actually starts after they have collected all of your records.

So how can section 215 say that you can collect data, call records, that you can hold in your hand, that needs to be fixed, because technology has made it such that our records are no longer going to be real records. I think we have a significant number.

Mr. PAUL. There is a lot that I like in the bill. It is just a matter of whether or not I can be convinced that it doesn’t allow bulk collection under another name. I am still worried about that. But I am open to it.

Some of these things—this is a very important bill. I mean, we could have a week of discussion on this bill, and amendments and a process. The only reason we are getting a little bit of this is because I am kind of forcing the process. The only reason we are getting a little bit of this is because I am kind of forcing the issue. I like to see the amendments voted on. All the other stuff we are doing around here is important but has no deadline. We could have done it next week or 2 weeks from now—all the stuff we are doing right now.

But anyway, that is what I am going to be asking for—the ability to present the appellate review of the FISA Court decisions. I think and I understand that you are saying they can get a FISA order no matter what.

Mr. PAUL. I am not sure I understand the question, but I do believe as to this court case right now, there is a way, but it is going to have to involve some give and take to figure out. So I think their No. 1 reason is pretty strong. There can’t be a connection or relevancy containing significant legal protection at all for records that are no longer going to be real records that you can hold in your hand. I think almost all of our records will be virtual and held in space somewhere, and I think you still have to have a personal privacy protection in those.

Mr. MANCHIN. So the bill that we have not—an agreement because they were relevant to an investigation actually starts after they have collected all of your records.

But anyway, that is what I am going to be asking for—the ability to present the appellate review of the FISA Court decisions. I think and I understand that you are saying they can get a FISA order no matter what.
Those are pretty strong words. The Policy and Civil Liberties Oversight Board commissioned by the President, which is bipartisan, looked at the classified data and said it didn’t find a single incident—not one incident—in which they were collecting calling data or the outcome of a counterterrorism investigation.

Moreover, we are aware of no instance in which the program directly contributed to the discovery of a previously unknown terrorist... What does this mean? We are not pushing a button and generating terrorists out of this. The terrorists are coming from real information. You have to realize that this misinformation and this wrong-headed information has been used forever—for 15 years—to justify the fact that we should give up on the Fourth Amendment and we should give up on protections.

Over and over people say that if we only had the PATRIOT Act, we wouldn’t have had 9/11. The two terrorists they claim we would have gotten were already dead. We already knew about them. An informant lived with them for a year. The FBI wasn’t talking to the CIA, they weren’t looking at lists, and they didn’t know they would come back. The CIA didn’t know. It had nothing to do with having bulk collection of our records. We knew about these people. It was crummy work. It was people not doing their job.

I repeat: No one was ever fired. We gave rewards. We gave medals of honor to even intelligence community and no one was ever fired. There were some true heroes—the FBI agent in Arizona and the FBI agent in Minnesota who actually discovered potential hijackers. The 20th hijacker was captured before 9/11. The 20th hijacker was captured a month before 9/11. That is the person who should have gotten the Medal of Honor. The person who would not listen to him should have been fired. I have no understanding or awareness that anybody was ever fired over 9/11.

The Policy and Civil Liberties Board goes on to say that our review suggests that section 215 of the PATRIOT Act, the bulk collection of records, offers little unique value. They explore a little bit of whether there is a privacy problem with collecting all of these records and what are the implications of collecting all of these records. The government’s collection of a person’s entire telephone call history has a significant and detrimental effect on an individual’s privacy.

Beyond such individual privacy intrusions, permitting the government to routinely collect calling records of the entire Nation fundamentally shifts the balance of power between the State and its citizens. With its power of criminal and criminal prosecution, the government possesses unique threats to privacy when it collects data on its own citizens.

Compound this with the fact that the government—you could say: Well, they are just collecting this data at a lower standard, but if you are not a terrorist you do not have to worry. But here is the problem. They are collecting this data with the lower standard, a less-than-constitutional standard, and then they are also prosecuting you for domestic crimes.

Section 215 of the PATRIOT Act is being used 99.5 percent of the time for domestic crime. We are putting drug dealers in jail. That is another question and another story. But then we could say: Okay. For drug dealers, we are not going to have the Constitution anymore, we are going to have the PATRIOT Act for drug dealers. Let’s be honest about it. The war on drugs has had a disparate impact, a disproportionate impact on people of color. So you have to admit to all the young Black men and all the young Brown men you put in prison that we are no longer using the Constitution to stick you in prison, we are using the PATRIOT Act to put you in prison.

We need to be honest with people. If the PATRIOT Act is about terrorism, they should adopt my amendment that says you cannot be put in jail for a domestic crime under the PATRIOT Act. Why? Because the PATRIOT Act has dumbed down and loosened the standards. We do not have probable cause, we have relevance. Realize that relevance, as they say in the Commission, has become completely circular and void of meaning. If you are saying that all the records in the country are somewhere relevant to an investigation that has not yet begun.

They make a great point here about the fact that not only does this stifle or invade your privacy, it may well stifle your speech and your association. If you are going to be associating with minority causes, unpopular causes, whether you are a kid from the North or you are a kid from the South, if you went down to be in favor of civil rights, they are going to collect your phone numbers, who belongs to the NAACP or the ACLU, they say: Yet, even though there is no evidence of abuse... And this is the big argument. Everyone says: Well, there has never been any abuse, so it is fine to keep doing this.

Yet, while the danger of abuse may seem remote, given historical abuse of personal information by the government during the 20th century, they are the exception that proves the rule. I could not agree more. Moreover, the bulk collection of telephone records can be expected to have a chilling effect on the free exercise of speech and association because individuals and groups engaged in sensitive or controversial work have less reason to trust in the confidentiality of their relationship as revealed by their calling patterns.

Realize that they are taking your phone records, your calling lists, your buddy lists, your ISP address, your email. They are integrating this into some network where they can pull your name up and find out who are all your buddies, who are all your friends, who are all your Facebook friends.

Realize the potential danger of having so much information, so much of a dossier on every American citizen, even if they are not using it. But when you think about it, well, these we are not doing it and good people are running these agencies, realize that the head of the Agency lied to us about this program at all. He said it did not exist. So when you get to be trusting these people to protect your individual privacy, realize that—at the very top of the intelligence community, the most famous person in our country dealing with intelligence lied to a congressional committee and said that this program did not even exist.

The report goes on to say that the inability to expect privacy, vis-a-vis the government and one’s telephone communications, means that people engaged in wholly lawful activities, but who for reasons justifiably do not wish the government to know about their communications, must either forego such activities, reduce their frequency or take costly measures to hide them from the government surveillance.

The telephone records program thus harms the ability of advocacy organizations to communicate confidentially with members, donors, legislators, whistleblowers, members of the public.

Initially, in the 1970s when we set up the surveillance court, the security court, the FISA Court, it was done with individualized warrants. They got information through individualized warrants.

Beginning in 2004, though, the role of the security court changed when the government approached the court with its first request to approve a program involving what is now referred to as bulk collection. For the first several years, we did bulk collection—they just did it. They just said it was under the inherent authorities of the President. This should scare us because there are people who believe that the inherent authorities of the President are unlimited. That would not be a President. There would be another name for that.

But if there are no limits to what the President can do, there is another name for it and it is not President. The Commission goes on to say that the judge’s decision—decisionmaking would be clearly enhanced if they could have adversarial views. And the privacy commission advocates exactly what I am advocating for, that you should have a lawyer in there with you and that there should be an adversarial type of procedure.

Because the thing is, is that it is like any other dispute. If you have ever heard two people arguing, figuring out the truth is listening to both sides and trying to gather what the truth is. So I think that we get to the truth a lot more if we had someone asking questions, realizing that section 215 of the PATRIOT Act says that the information has to be relevant to an investigation.
Without having someone in there to argue your case, the court appears to have not really had a great deal of discussion or, to my mind, thought about whether bulk collection is somehow relevant. You might argue that if there were a court in the Judicial branch, that maybe someone would stand up and say to the judge: How can this be relevant? What investigation is it relevant to?

See, I think the FISA Court became such a rubberstamp that you were not even having these questions asked because how could you ask that question. If you are an advocate for someone who does not want to give up their information, you can ask the question whether it is relevant to an investigation, and then the government would say: Well, we are going to do it. It will be relevant when we do an investigation.

No court, you would think, would understand or accept that, if it were an adversarial procedure where you have a lawyer on both sides. I don't think you can truly have justice—I think you can argue your case, the court appears to demand whether it is relevant to a investigation, and then the government would say: This be relevant? What investigation is that? No court, you would think, would ever have that kind of dialogue. I think courts can protect individual names and I want them to. I thought Senator Wyden made a great point when he was out here. Intelligence activities, at their core, we have to protect the names of operatives. You do not want the code out there, like if we have a great code and we are stealing information from our enemies and we are eavesdropping on our enemies, we do not want the code out there that shows how smart we are and how our technology works. But if we are going to do something like collect the records of all Americans, that is a constitutional question. You can have opinions on both sides of it. I do not think there is much of a valid constitutional reason for believing in this. But you can have an opinion. In a democratic Republic, we can argue it back and forth. But you really would have to have the ability to have a discussion over these things. Because I think without that, I do not think we can actually get to justice.

Mr. COONS addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Kentucky yield for a question?

Mr. PAUL. Mr. President, I would yield for a question but not yield the floor.

Mr. COONS. Mr. President, I am wondering whether the Senator from Kentucky would not be enough to confirm for me where I think the issue is that is before the Senate today. So if I might, I will speak for a few minutes about what I think is the core issue before us on the floor and then ask the Senator whether he would confirm that this is his understanding as well.

At the outset, I will say it is relatively rare for my colleague from Kentucky and I to come to the floor in agreement but on an issue, but it has happened before on exactly this issue. I think it is important that it be clear to folks that there are concerns on both sides of the aisle on the critical underlying issues about how we balance privacy and liberty, security and our civil liberties.

For nearly a decade, our government has operated a program that collects massive amounts of information from innocent Americans without any specific suspicion they have done anything wrong. Let me put that another way. For years, any American’s communications are collected and a database maintained by the government, but we don’t have the ability to search out the names or who is involved. If we have to answer a question, we have to have a warrant.

That program has been carried out under Section 215 of the PATRIOT Act. It is based on the liberal interpretations of the original law, all in the name of our national security. Yet the bulk collection program has had disputes and not arguably clear benefit to our national security. There is not one clear publicly confirmed instance of a plot being foiled because of this section 215 program. I have long been concerned about the scope and the reach of our intelligence community’s bulk collection program.

Interestingly, in 2011 I voted, along with my colleague from Kentucky, against the straight reauthorization of the PATRIOT Act. I believed then, as I believe now, it would be irresponsible for Congress to continue reauthorizing the law without taking steps to address concerns about unlawful surveillance it has allowed, particularly given the fact that earlier this month a U.S. Federal circuit court specifically deemed this program illegal.

Fortunately, we have an alternative, which I believe the Senator from Kentucky has been expounding on behalf of, the USA FREEDOM Act, a bipartisan bill passed by the House just last week by an overwhelming margin—I think it was 338 to 88. It would end bulk collection by only allowing the Federal Government to seek call records retained by the telecommunications industry once it has established a record is relevant to an ongoing investigation. Records would no longer be stored by the government and remain in the hands of telecommunications companies, which under FRC rules, in order to ensure that there is customer access to records in the case of a dispute, they are retained for 18 months. This bill strikes the balance by protecting American’s privacy and ensuring our government can still keep our Nation safe.

In fact, there are some who might argue that the USA FREEDOM Act would allow a stronger and more robust and more effective series of actions to keep our Nation safe. I urge my colleagues to support it. I know these are difficult decisions for us to make. I know all we have concerns about our Nation’s security, but we have to all have concerns about our Nation’s freedom.

We fought for it from the very beginning of democracy. I want to just thank and salute Members here, colleagues, and in particular my colleague from Kentucky for being consistent that we have clarity about time. We were told 4 years ago, when the reauthorization fight was happening, that time had run out and that we needed to reauthorize it, without considering needed reforms that were discussed and debated in the Judiciary Committee.

Two years ago, some of the core elements of this were exposed to the world. A lot of my constituents raised legitimate and serious concerns about it. Whether we are being asked to extend it for 2 weeks or 2 days or 2 hours, I think time has run out and we even discuss reauthorizing a program that has explicitly been held illegal. We instead need to come together and take up and pass the USA FREEDOM Act.

Would my colleague from Kentucky confirm that is the situation on the floor at the moment and on behalf of which he was speaking?

Mr. PAUL. I think what is still unclear to me is what will be taken up and what votes there will be on this. I believe that the debate is a very important one, that it is one we should engage in and have a chance to talk about, and there should be amendments. As you know, sometimes the amendments get offered and then things sort of fall away.

I want to ensure that on something this important that comes up only once every 3 years and on which the court just below the Supreme Court has said we are doing something illegal, that we don’t just gloss over and say we are going to keep on doing something the courts have said is illegal.

As far as the end result of where it goes, I want to end bulk collection. So I agree with all of the people on the USA FREEDOM side. I am a little concerned that we might be transferring government bulk collection to privately held bulk collection.

In the selector terms they use in the USA FREEDOM Act, it says “person.” It says “specific person.” I think it defines “person,” though, as still including corporations. My concern is that you could write into specific person “Verizon” again, and we are back where we started.

So if we could get to a point of No. 1, allowing some amendments to be voted on and maybe changing it such that you can’t have—see, to me, the better issue here is not versus a specific warrant. I don’t want warrants that you can get everybody’s records all at once or even one company’s. I want the warrant to say—and I am fine with getting terrorists. I want to get terrorists. If John Doe is a potential terrorist, put his name on it. You can go as deep as you want into the phone records, but do specific warrants. But I don’t like it if you just say: I want everybody’s records from a phone company.

So I am concerned that we are trading one bulk collection for another form, and I need to be a little more assuring on that. I think there might be
I don’t know the outcome, but I was uncertain enough that I came today to come to try to draw attention to it. And if I had a request today, it would be the leadership to let amendments to go forward, that we agree on having a pretty free amendment process.

This is only every 3 years, and it is a big deal. We don’t have much legislation come before us where an activity has been said to be illegal by an appellate court, we continue to do it, and then people want to advocate to continue to do something that is illegal. But I am going to try to see what I can get. But I am going to try to get an answer—maybe today—from leadership on whether they will allow amendments to this. I want to be pretty certain that is going to happen because they seem to fall away sometimes.

Mr. TESTER addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Kentucky yield for a question?

Mr. PAUL. I want to continue to keep the floor. I yield for a question without losing the floor.

Mr. TESTER. Mr. President, first, I thank the Senator from Kentucky for what he is doing. I think this is very important, and I stand here today with my colleagues on both sides of the aisle to protect Americans’ privacy rights.

I am very much concerned by the overreach we have seen in the name of national security, and I oppose efforts to reauthorize any piece of it without real reforms.

Folks in Montana know I have been an opponent of the PATRIOT Act since it was signed into law. Why? Because the PATRIOT Act violates law-abiding citizens’ rights to privacy—something we hold dear in this country. We do need to make this country as secure as we possibly can, but we cannot do that at the expense of our constitutional rights.

It has been talked about here earlier today that a Federal court recently ruled that bulk data collections are illegal, flat illegal. But keep in mind that the NSA used the PATRIOT Act to authorize those data collections. Yet, in the Senate, some of our colleagues think we should reauthorize those expiring provisions without even having a debate on the merits.

We have seen this before. It has happened several times since I have been in the Senate.

Trying to jam an extension of the PATRIOT Act through the Senate at the last minute is not fair to this body, and it is not fair at all to the American people. We deserve a real debate on privacy and security in the Senate. It is too important of an issue not to. We have to put some sideboards on our national intelligence agencies so that they can keep us safe without violating our constitutional rights. We need a real debate on this issue.

Last week, the majority leader made a decision to deprive the Senate and the public of debate by taking up a trade bill which we could have passed in June. No doubt about it, we are approaching the Memorial Day recess. It is a book that will come, but we have work to do. I will continue to work with my colleagues to ensure that we make real reforms to the PATRIOT Act. If the people in this body don’t know that this is important, they don’t know the Constitution.

I thank everybody who spoke on the floor today. We need to have a debate. We need to have a debate on what the PATRIOT Act is about, how it is being utilized, and how we need to move forward. An extension is unacceptable.

I yield the floor back to the Senator from Kentucky and thank him for the work he has done on this issue.

Mr. PAUL. I think this is further evidence that there is bipartisan support for the Constitution.

The PATRIOT Act went too far. We have heard from both Senators from Montana, from opposite parties, who both wanted to defend the individual, wanted to defend the Bill of Rights, and think that we have let the government go too far. I think the American people agree with this as well.

I think with good intention—this is one of those things that are kind of perplexing, if you think about it. If you ask most Americans, if you do a poll or a survey or ask most Americans “Should the government be allowed to look at your phone records without any suspicion that you have committed a crime?” I think there are a very low number who think that. But then when you get to Washington, it is almost the opposite. You have people in Washington who have two viewpoints that are really out of step with what the American people want.

I think the American people really have decided that the bulk collection of records is wrong, that it is unconstitutional. The second highest court in the land has said it is illegal. Yet, you still have a significant body of people in this country saying: Not only keep it, but we want more of it. And I think that is further evidence that this are good people.

The American people really have decided that the bulk collection of records is wrong, that it is unconstitutional. The second highest court in the land has said it is illegal. Yet, you still have a significant body of people in this country saying: Not only keep it, but we want more of it. And I think that is further evidence that this are good people.

I wrote something about “1984” a couple of years ago, and I said when I read it the first time—and a new big brother, you know, was the danger of all these things. I thought, Oh, this is terrible. But I felt comforted. I read it probably in 1978.

We didn’t have the technology to eavesdrop on everyone. We didn’t have the technology to know everyone’s whereabouts. We didn’t have the technology to have cameras in every house. The whole idea that the PATRIOT Act violates law-abiding citizens’ rights to privacy—something we hold dear in this country. We do need to make this country as secure as we possibly can, but we cannot do that at the expense of our constitutional rights.

I think without question—one of my concerns is about the PATRIOT Act that has previously been investigated before will also be the leadership to let amendments to go forward, that we agree on having a pretty free amendment process.

This is only every 3 years, and it is a big deal. We don’t have much legislation come before us where an activity has been said to be illegal by an appellate court, we continue to do it, and then people want to advocate to continue to do something that is illegal. Yet, you still have a significant body of people in this country saying: Not only keep it, but we want more of it. And I think that is further evidence that this are good people.

I write something about “1984” a
worries me a little more that we are not even really paying attention to the PATRIOT Act; we are doing whatever we want. It is sort of a lawlessness that allows us to collect bulk records because there is no relevance to an investigation. As they said in the privacy commission, they are collecting the records before there is any investigation. So there is no relevancy to an investigation. The investigation hasn’t started yet, unless the investigation could be everything. I like the way they put it. They said we would have to destroy the definition of “relevancy” to believe that there is any component of relevancy to these investigations.

But we are collecting records of every American all of the time right now. It may not be just phone records; they say the biggest source of collection now is probably actually through section 215 of FISA, the FISA amendment. We are exactly clear who gets scooped up in that.

Once again, if these are the records of foreigners, if these are the records of people bent upon attacking us, I am all for giving them to the intelligence agencies. But it disappoints me that the President, who was once considered by some to be somewhat of a civil libertarian, does nothing. When the President ran for office, he said that national security letters ought to be signed by judges. He was in the exact same place where I am on civil liberties with regard to these warrants, the national security letters. Yet, his administration issues them by the hundreds of thousands. I don’t think they are even reporting these anymore for us. I think they were reporting them for a few years, but we are no longer getting information on them.

It disappoints me that the President is not really willing to do anything about this. The President could end the bulk collection tomorrow. It is done by Executive order; it could be undone by Executive order. It is disingenuous, at the very least, that the President says: Oh, yes, we are going to balance liberty and security. Well, no, he is not. He is not balancing anything. He is just continuing to collect all of our records without a warrant. He is continuing to do bulk or general collection of records without a warrant.

I think the American people are ready for us to be done with this. My hope is that during today we will call attention to this and that the American people will say: Who are these people who want to keep collecting our records without a warrant, and why do they say that they have investigated the people who have investigated it have determined that no one has been captured by this program, no one has been uniquely identified by this program?

So there really is a consideration of whether we are going to listen to the American people. Are we going to wake up? Are we a representative body?

This question is, Are we going to allow a debate on something that only comes around every 3 years or are we going to say “My goodness, it is the weekend, it is Memorial Day weekend, and we are up against a deadline, and we just don’t have time to listen to this. We don’t have time to talk about the Bill of Rights because we just don’t have time.”? There are at least 10 or 15 of us who will cosponsor about 5 or 6 amendments that we want votes on. Frankly, I think with the mood of the country, we have a chance on a few of these.

I would like to see how a vote would turn out on the idea, for example, that we are using a less-than-constitutional standard to gather information that we say is for terrorism, but then we put people in jail domestically for crimes that are completely and entirely unrelated to terrorism; that whether or not we can use information gathered in a nonconstitutional or a less-than-constitutional way is going to be used for domestic crimes.

If you believe that, it means we are carving out in our domestic laws an area where the Constitution doesn’t entirely apply. Section 215 allows the entering of the house in a nonconstitutional way—a way that, if it were done in a straight-up fashion, the courts would say it is illegally gathered information and wouldn’t be admissible in court.

I think we ought to have a vote. Is the PATRIOT Act our less-than-constitutional way of gathering information to be used in domestic court?

Here is the other question, if will they be honest with us: Are they using them in any other courts? Are there IRS investigations that begin as terrorism investigations but end up in IRS court?

In some ways, I think yes is the answer. We have now the IRS basing investigations of people maybe for political purposes but definitely for the purposes of whether individuals are doing transactions in certain ways or whether their records are in a certain way. And because it is done this way, we are not really requiring convictions before we take their stuff. This is a separate but related problem because it has to do with using records to gain entrance to people and to then take their stuff without a conviction.

That is an important question. Are we innocent until proven guilty? Are we really going to allow the government to take possession of your things, to take possession of your things without a conviction? I think the presumption of innocence is an incredibly important doctrine that we shouldn’t so casually dismiss.

This is a poll that was commissioned by the ACLU on Monday, and they asked a sample of 500 likely voters between the ages of 18 and 39 a few questions. It says: Which of the following statements about reauthorizing the PATRIOT Act do you agree with more? Some people say Congress should modify the PATRIOT Act to limit government surveillance and protect Americans’ privacy. Sixty percent agreed.

Other people say Congress should preserve the PATRIOT Act and make no changes because it has been effective in keeping America safe from terrorists and other threats to national security, like ISIS or Al Qaeda. That was 34 percent.

Those are the overall numbers. If you look at it by all parties—Democrats, Independents, and GOP—it is 58 percent or greater. In fact, Democrats and Republicans are pretty equal, which is interesting, with 59 percent of Democrats and 58 percent of Republicans thinking we have gone too far in the PATRIOT Act and that Americans’ privacy is being disturbed by the PATRIOT Act.

If you look at Independents, it is 75 percent among men who are Independent and 65 percent among women who are Independent.

The survey asked people: Do you find it concerning that the U.S. Government is collecting and storing your personal information, like your phone records, emails, bank statements, and other communications? Eighty-two percent are concerned the government is storing this information.

Over three-quarters of voters found four different examples of government spying personally concerning to them: The government accessing personal communications, information or records without a warrant, 95 percent—using that information for things other than stopping terrorists, such as I mentioned, doing convictions for crimes, were the most compelling examples for voters.

The survey asked whether the government accesses any of your personal communications, information, or records you share with a company without a judge’s permission, people were asked to tell them whether they were concerned with this issue. Eighty-three percent were concerned.

When asked about the government using information collected without a
Once we are doing valid warrants, we are not doing this sort of dragnet. We are not doing this sort of vacuuming up of everything. We are not becoming overwhelmed with a lot of incidental data. We are specifically going to the heart of things. We are specifically going to a warrant that can actually get the people who are attacking us.

When we look at the privacy report we have talked a little bit about—the Privacy and Civil Liberties Oversight Board, I basically said very explicitly to the President that what he was doing is illegal—it does still boggle my mind the President was told by his own privacy board what he was doing was illegal and he just keeps doing it. It somewhat boggles the mind that he was told by the appellate court that what he is doing is illegal and yet he just keeps doing it.

It is an incredible deflection. It is incredibly disingenuous when the President said it was to balance liberty and security, and I am just waiting for Congress to tell me what to do. Well he didn’t wait for Congress to tell him to collect the phone records. In fact, we never did such a thing.

Even the people intimately involved with passing the PATRIOT Act—those who were the cosponsors and authors of the PATRIOT Act—have all said they never intended and don’t believe the PATRIOT Act gives any justification for bulk collection of records. So Congress never authorized the bulk collection of records.

Two different Commissions the President has put forward—the privacy and civil liberties as well as the review commission—have both told him it is illegal. Yet he keeps going on.

I have heard very little questioning of the President or his people about this. I kind of wonder why we don’t ask more questions, why we just sort of accept what the President tells us. I think the courts have shown that if a President tells a court that a program is legal, the court will follow that. But they would not if the court had knowledge that the program was illegal. It is an incredible deflection. And the Supreme Court struck down what Truman had done.

I think we need to revisit that debate because what’s at stake in our country—and it may well be the biggest problem in the country and is part of what is going on with this bulk collection but really is part of a bigger problem—is that power has drifted away from Congress or has been abdicated and given up. We gave the power to the Presidency, and we didn’t do it just in one fell swoop. It wasn’t just Republicans. It wasn’t just Democrats.

It was a little bit of both, and it has been going on for probably over 100 years now. I think it accelerated in the era of Wilson, but over decades it has gotten bigger and bigger and bigger. Under the New Deal, the executive branch grew an alarming amount, and more recently it continues to grow by leaps and bounds.

It may well be that the No. 1 issue we face as a country is that we have had what some have described as a collapse in the separation of powers. Madison talked about that each branch would have ambition to protect their own power; so we would pit ambition against ambition and then each would jealously guard their power, and, as such, power wouldn’t grow. Power would be checked. But power has grown and has grown alarmingly so and mostly grown and gravitated to the executive branch.

In the short time I have been here, I have seen that in many ways the least of our bureaucrats are more powerful probably in some ways than the greatest of our legislators, and the most powerful of our legislators are something of less power than bureaucrats.

Almost every constituent that comes to talk to me from Kentucky and has a problem with their government has me explore the problem and explore the solution, we discover that Congress didn’t pass their problem. Congress didn’t write the rule that is beleaguering them. Congress didn’t inflict the punishment that is making it difficult for them to run their business. It was done by an un-elected bureaucrat.

This has grown, and sometimes it has grown from even when we had good intentions. We tried to do the right thing and it turned out wrong. Probably that is really the story of Washington as well.

Take even the Clean Water Act. The Clean Water Act I support. I would have voted for it from 1974. It says you can’t discharge pollutants into navigable stream. I agree with that. The problem is that over about a 40-year period we have come to define dirt as a pollutant and my backyard as a navigable stream. So, once again, we have taken our eye off the prize.

The Clean Water Act requires us not to have the government involved with—big bodies of water, bodies of water between the States, rivers, lakes, oceans,
air—there is a role for the government to be involved. But because we have people abusing the rights of private property owners and saying, if you put dirt in your backyard, we will put you in jail, it has become sort of the point of craziness. But it is all executive branch overreach.

There was a case that went to the Supreme Court a few years ago in Idaho. A couple lived near a lake but about a mile from a lake. They didn’t live on the lake itself. It was on an incline, and there were houses on both sides of their property. So they bought their property and started doing what everybody else did—back-hoeing, creating a footprint, filling it and putting down footers.

The EPA showed up and said: You are destroying a wetland, and we are going to fine you $37,000 a day.

They were kind of like: Well, I thought we were in a wetland, there would be water or standing water or it would look like the Everglades or there would be some sort of evidence that it was wetlands.

They asked: Yes, there is evidence. If any one of 300 different species of plants grows in your backyard, we can define it as a wetland. If we can take leaves and flip the leaves over and they are black on the bottom, it indicates there is moisture on the leaves and you could be a wetland.

This all came out of crazy executive overreach. We did not do any of that. Congress did not do one iota of this expansion. It was done some by these law courts—these EPA courts—but it was done a lot by executive definition of what a wetland is.

In the early 1990s, under a Republican President, we redefined wetlands. They commissioned a book—a 150-page book, 300-page book—and they just redefined what a wetland was. By redefining what a wetland was, we doubled the amount of wetlands in the country overnight—not by preserving land but by redefining a lot of land that really is not a wetland.

Now, through the waters of the United States, we are connecting everybody to the ocean somehow and saying that every bit of land is somehow connected to navigable water.

I was talking to one of the Senators from Idaho a year or so ago and I liked what he told me. He told me: In Idaho, we have a very precise definition of what a navigable stream is. You put a log in it—these EPA courts—but it was done a lot by executive definition of what a wetland is.

In the early 1990s, under a Republican President, we redefined wetlands. They commissioned a book—a 150-page book, 300-page book—and they just redefined what a wetland was. By redefining what a wetland was, we doubled the amount of wetlands in the country overnight—not by preserving land but by redefining a lot of land that really is not a wetland.

Now, through the waters of the United States, we are connecting everybody to the ocean somehow and saying that every bit of land is somehow connected to navigable water.

A guy named John Pozsgai was a Hungarian immigrant. He came here from communism and he loved our country. He worked hard and he had a mechanic shop in Morristown, NJ. It wasn’t in the greatest part of town. It was on the leg of a bridge. Across the street from him was a dump. It didn’t flood on occasion, but the reason it flooded was because the ditches were full of 7,000 tires. People were just throwing all kinds of crap there. There were all kinds of rotted-out automobiles. It was a junkyard, so they had thrown all this stuff out there.

He bought the land pretty cheaply because it was a junkyard, and he decided to clean it up. He picked up 7,000 tires. It was a rural area. There were all kinds of rotted-out automobiles. And, lo and behold, when he cleaned the drainage ditches, it no longer flooded. But he started putting some dirt on there and the government said he was breaking the law and that he was again contaminating the wetlands. He was a Hungarian and he didn’t like to be told what to do, and I can understand the sentiment. So he just kept putting dirt on there. He decided to do it at night, and they caught him—him and his son. I don’t know—a quarter million dollars on cameras and surveillance to catch a guy putting dirt on his own land.

He was bankrupted. They put him in jail and told him to pay him 200,000 and some thousand dollars. They wiped him out so he couldn’t pay the taxes. They broke his spirit. I met his daughter. It is just a tragic case.

So if you wonder why some of us are worried about the government having all of our records—

I talked earlier about what happened in Westchester, and this is an appalling thing. This should make you concerned about having records. In Westchester—I think that is where the Clintons live. Anyway, they decided they would reveal all the gun records. So in Westchester they revealed whether you had a gun or didn’t have a gun and where you did.

Can you imagine how that might be a problem? Let’s say you are a wife who has been beaten by your ex-husband and you live in fear of him and you either have a gun or you don’t have a gun. Either way, you don’t want your ex-husband to know where you live.

And particularly if you don’t have a gun, you don’t want your ex-husband who beat you to know you don’t have a gun.

Think if you are a prosecutor or a judge. They get threatened by the people they put in jail. Would you want your name in the paper with your address and that you have a gun or don’t have a gun?

So you can see how privacy is kind of a big deal. Privacy can mean life and death in that kind of situation.

I think we ought to be more cognizant of what a big deal this is and what a big deal the Bill of Rights is. We shouldn’t be so flippant that we are like: Oh, yes, whatever. We have to be safe. Maybe we catch a terrorist, maybe we don’t, but we have to do this and we just have to give up some of our freedom to be secure.

It turns out, though, when we look at the objective evidence, it doesn’t appear we are safer. It appears that when they have alleged that we are safer, what has happened is that it doesn’t look like we have gotten any unique intelligence from these things.

I think there is probably nothing more important than discussing the Bill of Rights and talking about our civil liberties. I think we need to have an adequate debate. It is supposed to be what the Senate was famous for.

My hope is that from drawing some attention to this issue today we will get an agreement, and that is the agreement we are going to ask for. We are going to ask for an agreement from both parties to allow amendments to the PATRIOT Act, and we could start any time they are ready. If somebody wants to send a message to the leadership that if they are ready to come out and allow debate and allow amendments on the PATRIOT Act or a promise to do this before the expiration, we could probably get something moving.

I think the American people are ready for that debate. We can look at the statistics, particularly among young people. It is a 70- to 80-percent issue, where young people are saying, for goodness’ sake, we don’t want our records scooped up and backed up by the government without any suspicion.

I think also young people get this more than others because when used to their records being digital, they are used to their records being on their phone. They are very aware that their
records are stored on a server somewhere, and they have grown to expect privacy.

Some say, oh, that is crazy. Young people share their information all the time. Well, you do and you don't. I share my information, not to sell my information. I am to be anonymous. They will market to me, but they promise to keep me anonymous. We are comforted by the fact that we have a privacy agreement, and that if millions of people sued them, they couldn’t get away with revealing our information.

What I don’t like about some of the different things we are doing—and this includes the USA Freedom Act—is that we give liability protection. When we give liability protection, I think there is an invitation to say: You know what. Your privacy agreement isn’t really that important, and if you breach it, nobody is allowed to sue you. So I think that is something we ought to be very concerned about if we continue having a debate on this and we do end up having amendments on this, that we consider taking out the liability protection.

I also think the most important thing is if we decide that bulk collection is wrong, we need to understand how you get bulk collection. You get bulk collection because you have a nonspecific warrant. You don’t have an individualized warrant; you have a general warrant.

This is what we have been fighting since the time of John Wilkes in 1760 in England, to James Otis in the 1760s here through John Adams. The debate and the thing that we found most egregious was that the idea of the most objectionable was the idea that a warrant for your information wouldn’t have your name on it, it wouldn’t be individualized or that it wouldn’t be without suspicion or that it would occur without a judge’s warrant. It really was one of the things that annoyed us more than anything else. One of the things that Adams said was the spark of our war for independence was just the sheer gall of British soldiers coming into a house without a warrant because most of the records are in your house. We don’t see basically the physical and abrupt entry into your house anymore, but it happens nonetheless. It happens in just less of a physical way because your records are virtual now. But how we let people come into our house is pretty important.

On the issue of warrants—this isn’t specific to the PATRIOT Act, but it is a related issue. The issue is whether we should allow people to come into our house in the middle of the night with what is called a no-knock raid. The sneak-and-peek, they come in and leave. But the no-knock raid, you know they are there when they come. The problem is that people were being woken up in the middle of the night and they were grabbing their gun by their bedside. If they are in a high-crime neighborhood, they have a gun by their bedside. They are sometimes shooting the police. Mostly they are looking for drugs. I hate drugs about as much as anybody. I have seen addiction to drugs, I have worked with people as a physician and I know what addiction is. I am worried about war- rant, even a warrant can be supported by someone making an accusation. It is not perfect. In fact, there are some people who complain warrants are too easy to get. But the thing is there is no evidence that it is really overly hard to get a warrant. If we went back to the Constitution—I had this debate years ago the last time I came up for re- newal, and I was walking along with one of the other Senators who sup- ported the PATRIOT Act. He acted as though he knew I was coming. I said, at midnight, what will we do? My re- sponse was maybe we could live with the Constitution at least for a while. We did for hundreds of years.

Is there anything so unique about the things we live in that they should not still live under the Constitution? The Fourth Amendment has its origins in English common law. The saying that a man’s home is his castle, this is the idea that someone has the right to de- fend their castle or home from invasion from the government.

Based on the castle doctrine in the 1600s, landowners first recorded legal protection from casual searches from government. Some of the famous cases were actually in the 1760s, but even at least 100 years in advance of that, they were beginning to develop protections for people from the government.

It is interesting to realize this is not a new phenomenon where we are talk- ing about new protections from government. We protect ourselves and government helps us protect ourselves from others who may be violent against us. But we have always—for hundreds and hundreds of years—been aware that government does bad things too. If you do not ration the amount of power you give to government, you can get to the point where the great abuse comes from government itself. So they began to use warrants. But in England they could quickly develop over whether a general warrant was ade- quate or a specific warrant. This is where John Wilkes comes in. This is where James Otis comes in.

One of the debates over the separa- tion of powers that we have—this is pretty common going on, although I think the people who believe in unlimited inherent powers are probably the majority of Washington. But there is a debate over what people call article II powers. The article II is the Ex- ecutive and is derived from the Consti- tution, but there are people who sort of believe in this unlimited nature. There is really nothing that restrains
it. In fact, some have said even in the debate over this, the Executive Order No. 1233 that is involved in some of this records production, it is really none of our business because it is article II. It is part of the inherent powers of the President to, in times of war or times of conflict, to do whatever they need to do.

I think that is a dangerous supposition, to think that really there are times when there are no checks and balances. I personally think probably one of the most genius things we siphoned out of our Founding Fathers was the checks and balances and the division of power.

Montesquieu was one of the philosophers the Founding Fathers looked to and some say when we were setting up the separation of powers that he was probably where we got the example. Montesquieu said that when the Executive begins to legislate, a form of tyranny will ensue because you have lowered so much power to gravitate to one body and you have not divided the power. The division of power was one of the—if not the most important—the most important things we got from our Founding Fathers. But we are having this collapse of the separation of powers. It is getting to be where there is an ancillary body which is Congress, and then there is the executive branch, the behemoth, the leviathan.

The executive branch is so large that really the separation of powers in the land are being written by bureaucrats. No one elects and no one can unelect. In an average year, there are over 200 regulations that will cost the economy $100 million apiece. We do not vote on any of them. We vote indirectly for the President, but I think that is so indirect that it is a real problem.

I think what we have now is an executive branch that legislates. The collapse of the separation of powers is a collapse of equilibrium. This collapse of equilibrium is what kept power in check. When I think who is to blame for this, it is not one party; it is really both parties.

When we have a Republican in office, Republicans tend to forgive the Republican President and give them more power. When we have a Democrat in office, the Democrats tend to forgive a Democrat and give the Democrat more power.

A more honest sort of approach to this or a more statesman’s like approach to this would be that if we were able to have both parties stand up as a body and if there were pride in the institution of Congress—pride such that we were jealous of our power that we were pitifully in rebellion to keep our position against the President regardless of the President’s party affiliation—then we might have a chance.

A lot of the things about collection of bulk data were not known for years and years but have been—though not for a long time. One of the things I found most troubling in the John Napier Tye op-ed was that he said—he was giving a speech and he said: Well, the good news is that if the American people are upset, if they are upset about things, intelligence activities, and they think it is an overreach, they have every opportunity to use the democratic process to change things. This went through and the White House censor—counsel, adviser, boss—decided they needed to take that out of his speech because they did not want to imply, really, that intelligence activities could be changed through action, because they took the opinion apparently that the inherent powers of article II are not subject to democratic action.

When I think of the people who say that the inherent powers are unlimited and the President has these powers that are not to be checked by Congress, I do not think of a Presidency, I think of a different word, and it is not “President.” I am very concerned about whether we are going to let this go on. There are some other side effects that come from this. As you allow the executive branch unlimited power and as you allow the bureaucracy to grow, a consequence has been seen that the debt has grown to alarming proportions. We borrow about $1 million a minute. We have an $18 trillion debt. As the debt has grown larger and the executive branch has grown bigger, your Congress men and women have grown more ancillary and more peripheral to the entire process. But I am one who believes there are limits. I think there is a limit to how much debt we can incur and how rapidly we can incur it.

I think already we have seen sort of an anchor or a burden, an effect on the economy that pulls us down and causes growth to be less vibrant. Some say 1 million jobs a year are being prevented from being created because of this.

I think that if we are not careful, this collapse of the separation power, this collapse of equilibrium, as we let this get away from us, we are also getting away from the control over our future. We are letting the power accumulate in such a rapid fashion that if you want to see how much power is accumulating, you can almost make the analogy of looking at the debt clock. If you go to debtclock.org and watch the debt—the debt as the debt grows larger and larger, you basically are seeing a diminishment of a corresponding diminishment of your freedom. It is of concern.

It is of concern how rapidly this is happening. There are two philosophic reasons we should be concerned about power. One is that power corrupts. More basic than that is that as power grows, there has to be a corresponding loss of your freedom. I call this the liberty argument for minimizing government. Much democracy is created because of this argument. Thomas Payne said that government is a necessary evil. What did he mean by that? I think what he meant by that is that you need government. We need government for a stabilizing force. There are things government needs to do. But it is a necessary evil because you have to give up your liberty to have some government. How do you give up your liberty? You give up some of what you are. Your liberty is who you are. Your liberty is what you produce with your hands, and your liberty is what people will pay you to do with your hands, what you do to produce. That is your income. That is you. That is your liberty.

If we have 100 percent taxation, I would say you have no liberty. You are essentially a slave to the State. If you have 50 percent, you are only half slave, half free. The thing is that the smaller your government, the lower your taxation and the more free you are. But it is an argument for, if you are concerned about freedom, you would want as small a government as you possibly could have. That still did the things that you think are necessary.

The other argument I like for why you should keep your government small is what I call the efficiency argument. The efficiency was best expounded by Milton Friedman, who said that nobody spends somebody else’s money as wisely as their own. There is sort of a truism to that. You think about it in your own life. If I ask you for $1,000 to invest in an enterprise, you will think: How long did it take me to earn $1,000. You will think: I had to pay taxes, I had to save, I had to pay all my expenses to get this $1,000. You will think how much you prize that, and you will not make the decision in an easy fashion. You will make your decision not perfectly, but if you compare your decision spending your money to a politician spending the money, it is just bound to be a wiser decision. It is a more heart-wrenching decision, but it is typically being a better decision. If you ask a politician for $1 million, that might be equivalent to $1,000 or it might not mean anything to him. You might ask him for $10 million.

Think about it this way: We gave $500 million to one of the richest guys in our country to build something that nobody seemed to want, and he lost all of the money. And you think to yourself, do you think the person in the Department of Energy that gave $500 million to one of the richest guys in the country to build something we didn’t want feels bad or doesn’t sleep well at night? No. I think they gave that person the money because that person was a big contributor. They were an activist for their candidate, so when the candidate got in power, they used the Department of Energy as their own personal piggybank to pass out loans to their friends. Nobody feels bad about the fact that they lost the money because they won the auction. The efficiency argument for why you should think the government should be small.
Before the PATRIOT Act, there was something called Stellar Wind. This was a secret also, and we didn’t learn about this for many years, but this was started immediately after 9/11 and was revealed by Thomas Tamm at the New York Times in 2006. But it was basically a bulk collection under two different administrations. One administration got a great deal of grief for this, and then the next party ran and said: We are going to change these things and do things differently. And they did them the same or more so. There really had not been any change, and I guess that is why some people are concerned as to whether we will truly get change.

The program’s activities in Stellar Wind involved mining large databases of communications of American citizens, including emails, telephone conversations, financial transactions, and Internet activity. William Binney, a retired leader within the NSA, said he had a whistleblower who believed he had programs to be unconstitutional.

The intelligence community was also able to obtain from the Treasury Department suspicious activity reports. So we are back to these banking reports that are issued.

If we decide to fix bulk records and try to do something about this injustice, the main thing is we should be aware that this is not the only program. There are probably another dozen programs. There are probably another dozen we have not even heard of that they will not tell any of us about. And realize that they are not asking Congress for permission; they are doing what they want.

We did not give them permission under the PATRIOT Act to do a bulk collection of phone records. They are doing it with no authority or inherent authority or some other authority because the courts have already told them there is no authority under the PATRIOT Act. There is also no commonsense logic that could explain—no commonsense logic that could say there is a relevancy to all the data of every American.

When Stellar Wind came about, there were internal disputes within the Justice Department about the legality of the program because the data was being collected for large numbers of people, not just the subjects of FISA warrants. The Stellar Wind cases were referred to by FBI agents as pizza cases because many seemingly suspicious cases turned out to be food takeout orders. Imagine also that if we are looking for interconnecting spots, a lot of people who order pizza.

According to Mueller, approximately 99 percent of the cases led nowhere. Nevertheless, internal counsel for the administration said that because the Nation had been thrust into an armed conflict by foreign attack, the President has determined in his role as Commander in Chief that it is essential for defense against a further attack to use these wiretapping capabilities within the United States. The inherent constitutional authority to order warrantless wiretapping.

The memo goes one step further. It says that the President has the inherent constitutional authority to order warrantless wiretapping, not any kind of a subpoena—an authority that Congress cannot curtail.

If we really believe bulk collection is wrong and if we really believe we need to be a check and balance on the President, we should just be getting started with reining him in on bulk collection because the President—this was the previous administration—says these authorities they are using cannot be narrowed further. If you talk about a Presidency that has powers that are not checked by Congress, I don’t think you are talking about a Presidency here. There is another name for that kind of leader, but it is not a “President.”

The argument here is astounding. The argument is that they can collect anything they want without a warrant because the President has the inherent constitutional authority to order warrantless wiretapping—no authority Congress cannot curtail. I think that is alarming.

A few years later, the Office of Legal Counsel came back—this is also from the administration—and concluded that at least the email program was not legal, and then—Acting Attorney General James Comey refused to authorize it.

William Binney, a former NSA code breaker whom we have talked about before, has talked about some of the activities of the NSA and said they have highly secured rooms that tap into major switches and satellite communications at both AT&T and Verizon.

The article—I believe this was the New York Times—suggested that supposedly dispatched Stellar Wind—supposedly they were no longer doing this—continues as an active program. This conclusion was supported by the exposure of room 641A in AT&T’s operation center in San Francisco in 2006. It gets back to the trust factor.

The Director of National Intelligence said they were not collecting any bulk data, but he wasn’t telling the truth. They tell us Stellar Wind ended back in 2005 or 2006, but then we find a room at AT&T that is still hooked up directly to the NSA.

I would like to see the phone companies be better defenders of our privacy, but with the PATRIOT Act, we gave them immunity. Even if there were some individuals in the phone companies who cared about your privacy and thought your phone conversations should be protected, why do it? You can’t sue them. If you have a privacy agreement with your phone company, they don’t care. Nobody can sue them. You have no protection. You have no standing in the court to protect yourself. That is one of the problems with the PATRIOT Act, is that we are giving immunity protection once again to the phone companies for something new.

One question I would ask, if there was anybody who would actually tell me the NSA was no longer doing this, would it be them? Would they have already given them liability protection under the PATRIOT Act, why are they getting it again under the USA FREEDOM Act unless we are asking them to do something new that they didn’t have permission for?

The other thing about the USA FREEDOM Act is that if we think bulk collection is wrong, why do we need new authorities? Why are we giving them some kind of new authority? Are the new authorities they are using new authorities they are not using now? We have already had section 215 of the PATRIOT Act on one hand and then expanding it on another?

I think when people are dishonest with you, you are right to be doubtful and you are right to try to circumscribe and to put their power in a box so you can watch them and make sure they are honest.

In June of 2013, the Washington Post and the Guardian published an article from the Office of the Inspector General—a draft report dated March of 2009 that detailed the Stellar Wind Program. So in 2009, there was evidence that Stellar Wind was still going on. And realize that Stellar Wind is not what we are talking about. Stellar Wind would be other bits of information that are being collected beyond your phone records.

I think if we had somebody here or if we had somebody who would honestly tell us, I would sure like to know if they are still collecting and not collecting all of our credit card information. I have a feeling it is probably done. I don’t know, and I have not been told, so I am not revealing a secret. I guess it is done. I am guessing all of your records are collected because the thing is, we have the audacity of the executive branch saying they have inherent constitutional authority to do anything they want, to order warrantless wiretapping. According to the executive branch, they have an authority that Congress cannot curtail. That doesn’t sound like the Office of the Presidency to me; it sounds like a governmental official whom you have no control over. It sounds inconsistent or antithetical to a constitutional republic. How can you have a Presidency that has unlimited power? That is what they are telling you.

They are telling you it is in the service of good. We are going to catch terrorists, and we are going to do good things. We are going to look at all of your information, but we are never going to abuse your privacy.

During September 2014, the New York Times asserted, “Questions persist
after the release of a newly declassified version of a legal memo approving the NSA Stellar Wind program, a set of warrantless surveillance and data collection activities secretly authorized after 2001.” The article addressed the release of a redacted and declassified version of the 2004 memo. Note was made that the bulk program—telephone, Internet, and email surveillance of American citizens—remained secret until the revelations by Edward Snowden and that to date, significant portions of the memo remain redacted in the newly released version as well as that doubts and questions about its legality continue to persist.

When we go back to the Privacy and Civil Liberties Oversight Board, as they get closer to their conclusion, they talk once again about the idea that you are only hearing one side. I think that no matter how honest and no matter how patriotic people are, one side just won’t do it. You can’t find the whole truth when only the government presents their position. The Privacy and Civil Liberties Oversight Board said that the proceedings with only one side being presented raises concerns that the court does not take adequate account of positions other than those of the government. They recommended the creation of a panel of private attorneys and special advocates who can be brought into cases involving novel and significant issues by FISA Court judges.

I think this would be a step in the right direction, but I think also that what we need to do is we should really probably give you the ability to have your own attorney. If this is a court proceeding, I think you need your own attorney so you have somebody who works for you and is your advocate. But a special advocate would be better than what we have.

The Board goes on to conclude that “transparency is one of the foundations of democratic governance. Our constitutional system of government relies upon the participation of an informed electorate. This in turn requires public access to information about the activities of the government. Transparency supports accountability.”

I could not agree more. It is even more important when we talk about the intelligence agency because of the extraordinary power we give to these people, the extraordinary power we give them to invade our privacy and to have tools to invade our privacy. We have to trust them, so there needs to be a degree of transparency. But transparency doesn’t have to involve state secrets. It doesn’t have to involve codes or names. But the transparency needs to involve what they are doing. Do we think any terrorist in the world doesn’t realize that all of the information is being scarfed up? It is not a secret anymore.

So we should have an open debate in a free society about how it should be done and whether we can gather information in a way that is consistent with the Constitution.

When we get to the Privacy and Civil Liberty Board’s recommendations, they have several good recommendations.

No. 1, the government should end its section 215 bulk telephone records program. They say that the program as it is constituted implicates constitutional concerns under the First and Fourth Amendments. This is the President’s Privacy and Civil Liberties Oversight Board.

Without the current section 215 program, the government would still be able to seek telephone calling records directly from the communications providers through other existing legal authorities. I think the other existing legal authorities could be the Constitution. Could we not just call a judge and get a warrant and go down to the phone company and get what we want? I think there is a way we can do this that is still consistent with the Constitution.

(Mr. GARDNER assumed the Chair.)

The other recommendation they have, other than ending the program, is that when the bulk collection program was put in, a person’s records were purged so there is no chance that this can be abused again in the future.

One of the arguments for the NSA has been that they collect the data, it is in a database, but it is only accessed when there is a reason, a call reasonable, articulable suspicion.

One of the recommendations of the privacy board, though, was that they not be given the ability to judge whether there is a reasonable, articulable suspicion; that it would actually go to an independent judge to determine that. So the recommendation of the privacy board was that these should go to the review of the FISA Court before they are able to query the database.

There are many different groups who have been fighting for our privacy in this country, and it is a coalition of people both from the right and from the left. We have seen it today as different Senators have come to the floor. We have had Senators from the Republican Party as well as from the Democratic Party. We have had those from the right, from the left, conservatives, libertarians, and we have had progressives. We have a coalition of folks who also have one thing in common, and that is the belief that the Bill of Rights should be protected.

Among the private groups who have done a good job with this is Electronic Frontier Foundation. They have been one of the groups who have done a good job. In one of their newsletters, they quote RON WYDEN, who says: We have not yet seen any evidence showing that the NSA’s dragnet collection of America’s phone records has produced any uniquely valuable intelligence.

Patrick Eddington writes for CATO. CATO is another group who has been a good supporter of privacy. In an article that talks about the upcoming battle from a couple of weeks ago, he writes—this is on the USA FREEDOM Act, and this is sort of the big debate because many people on both sides of the aisle think the bulk collection of records is unconstitutional. We think it exceeds the government’s power and it exceeds the Constitution. But what many are proposing to replace it with is the USA FREEDOM Act.

This is what Patrick Eddington writes: The USA FREEDOM Act claims to address the controversy of phone metadata program, but a close reading of the bill reveals that it actually leaves key PATRIOT Act definitions of “person” or “U.S. person” intact, so a person is defined as any individual, including officer or employee of the Federal Government, or any group, entity, association, corporation, or foreign power.

So the question I have is, it sounds good that we are going to make the program constitutional, but then we get a definition of who is a person when we say it is going to be a specific U.S. person. The problem is that we then define “person” as “corporation.” So we get back to the same argument: If we are going to search the database of a person’s records, we would say that a person is Verizon, we are again stuck collecting everybody’s records.

What I don’t want to have happen and what I won’t be able to support is that we take the bulk collection of a person’s records, just under a different venue. I am not sure that one’s privacy has been protected more if it were now just asking the phone companies for bulk collection where we were taking their data, sourcing it, and getting it from the companies after they gave it to the government. I am just not sure if it is that much—distinctly different.

In the USA FREEDOM Act, they talk about the idea that we will get special treatment for the metadata collection of a person’s records, just under a different venue. I think that is a good idea. But Patrick Eddington points out a flaw. He says that the FISA Court has sole discretion to appoint or not appoint these amicus curiae or these special advocates. So it could be that a FISA Court that really has not been too inquisitive, a FISA Court that has determined that all of your records are somehow relevant, may not be the most inquisitive to appoint an advocate for you if they have been able to define ‘‘relevance’’ as meaning all of the metadata.

Another deficiency of the USA FREEDOM Act is that it does not address bulk collection under Executive Order 12333. The bill also fails to address bulk collection under section 702 of the FISA Amendments Act.

One could say: What are you complaining about? You are getting some improvement. You still have problems, but you are getting some improvement.

I guess my point is that we are having this debate, and we have it very often. We are having the debate every 3 years, and some people have tried to make this permanent, where
we would never have any debate. Even though we are only having it every 3 years, it is still uncertain whether I will be granted any amendments to this bill.

So, yes, I would like to address every-thing while we can. I think we ought to address section 702. I think we ought to— for goodness sake, why won’t we have some hearings on Executive Order 12333? I think they may be having them in secret, but I go back to what Senator Wyden said earlier. I think the principles of the law could be discussed in public. We don’t have to reveal how we do stuff. Do we think anybody in the world thinks we are not looking at their stuff? Why don’t we explore the legality and the laws of how we are doing it as opposed to leaving it unsaid and unknown in secret?

Part of our secrecy is sort of back-firing on us also because what is happening is— in keeping this secret, people believe the worst. Everybody around the world believes the worst about it. Everybody around the world believes that they are having all their stuff looked at, that their emails are being looked at. This is a business practice in Europe and you are trying to negotiate a secure deal—a deal where you don’t want your competitors to know what you are offering to buy a certain company—I would think you probably would want the American email, and I would guess that is what is happening.

American companies are starting to try to figure out a way around this, are trying to offer encryption. What does the government do? The President’s administra-tion is all over the airwaves, all over Washington, all over the place talking about how the companies are somehow evil for wanting to encrypt their data.

I think the Secretary of the Depart-ment of Homeland Security in my com-mittee the other day, and I said: You realize it is your fault. Is it the compa-nies’ fault that they are trying to pro-protect their information for their cus-tomers? Is it the government’s fault by making them do it? It is your fault for bullying them and stealing their information and stealing all of Americans’ information. We are simply reacting to the bully that you are.

Most of the issues Patrick Eddington points out in his piece are issues that we actually have amendments for that would make the bill stronger. So if there are arguments that maybe the USA FREEDOM Act could be made bet-ter— definitely reauthorizing it by itself is a big mistake, but if alter-natives are going to be offered, maybe we could try to offer alternatives that make the USA FREEDOM Act better.

The other idea Patrick Eddington puts forward is that there is no bar on the government imposing backdoors being built into electronic devices. That is what we have talked about be-fore, that the government is mandating to different companies that they have to have access to their product.

I think it is an under-discussed develop-ment that the companies are going to be more at risk for sabotage by for-eign countries, foreign governments, and sabotage from hackers if they build a portal. So if the government says “We need a portal to stick our big nose in your business and suck up all your data,” I think that sophisticated hackers and sophisticated foreign governments will say that most of American software now has a flaw, and the American Govern-ment is getting into it. What do we think these backdoors will do? They will develop programs to look for the flaws and churn through until they find our flaws.

It is the opposite of what we should be doing. We should be trying to keep foreign governments, foreign spooks, and foreign competitors out of our stuff, including the U.S. Government, but we are doing the opposite.

There is a lot left to be desired with the USA FREEDOM Act. I try to be supportive of moving forward, but I can’t support it unless we are able to incorporate some of the other ideas I think are necessary.

The people say we are just not doing enough, enough, enough. They say: We have to collect more data. We are only collecting a third of the data. We have to get more data.

The interesting thing is that we are spending $52 billion on intel-ligence in our country—$52 billion. We are spending $10 billion in the NSA alone. It is $167 per person in the United States. I think it is hard to argue we are not doing enough already. I think it can be made, though, that we are doing it in such a haphazard, all-collecting, all-con-suming, indiscriminate way that maybe we are not getting the best bang for our buck.

There have been many groups out there. We mentioned Electronic Fron-tier Foundation, TechFreedom, Liberty Coalition, GenOpportunity, Competitive Enterprise Institute, FreedomWorks—a lot of different groups that are oppo-sed to this bulk collection of data.

There is an interesting article recently written by Anthony Romero with the ACLU, and the title of it is “The Sun Must Go Down on the PA-triot Act.” It refers back to both of the review groups we talked about and the Privacy and Civil Lib-erties Oversight Board, and he says and reiterates a point that is incredibly important, that: “there was no evidence at all that the NSA’s massive surveillance program had ever played a pivotal role in any investigation.”

I think we ought to be able to figure out something from this, and we ought to be able to figure out not only is there a constitutional question of this, there is also the question of whether practically it is doing anything to make us safer. If it is not making us safer, it is extraordinarily expensive and we are losing our freedom in the process. Why don’t we shut it down?

Different advocacy groups for a vari-ety of opinions have put forward the idea that I think was represented in the NAACP v. Alabama. I believe this was back in the seventies, which set forth a First Amendment claim, and this claim is that there is a vital rela-tionship between freedom of associa-tion and private communications. The point is that sometimes when you are protesting either for or against something that is very unpopular, sometimes you even worry about your safety. There were people who lost their lives in the freedom movement, in the civil rights movement. There were people who lost their lives. And you can understand how in those days people might have been worried for anybody to know they belonged to the NAACP or they opposed the Jim Crow laws in the South. But it was an impor-tant case because it talks about how the fact is that information can be kept private and should be kept private for fear it will chill speech, for fear it will put a damper on who people would associate with, for fear it would put a damper on dissent, which is a fundamental aspect of a Republic.

In a letter from a couple weeks ago from some congressional leaders, they point out something that I think bears repetition: Mass surveillance, the bulk collection, harms our economy. Mass surveillance will cost the digital econ-omy up to $130 billion in lost revenue by 2016.

We are not getting any new bad guys with this, we are abrogating privacy, and we are losing money.

The Internet companies in our coun-try, the whole software world, the whole hardware, all of this, have been some of America’s greatest triumphs, some of America’s greatest ingenuity. Yet we are willing to squash all that in a battle that really is going to damage our privacy, isn’t helping us in the war against terrorism, and is going to make it such that nobody in the world is going to want to sell us products. I think it is a disgrace and, once again, I don’t think it is purposeful. Nobody wants to harm our companies, but I think it is just another unintended consequence—a bad policy not thought through.

The ACLU commentary on the USA FREEDOM Act has come up with some ideas of things they think would make the bill stronger. One, they say the bill could be amended to prevent surveil-lance of individuals with no nexus to terrorism.

The 2015 USA FREEDOM Act would au-thorize the collection of records and communica-tions identified by a “specific term,” which would stop the government from conducting indiscriminate surveillance of virtually all citizens and from engaging in narrower but still-egregious forms of abuse, like the surveillance of everyone in an entire zip code or all those who use a given communica-tion provider, like Gmail. However, the current SST definition is still not strong enough to prevent “bulk collection.”

This is the point I have been making, and this is something you need to be very careful about in Washington, be-cause the minute you think you have
won a battle, secretly you have been beaten. You just don’t know it yet. We may still get a reform like this and then find out we are still going to get bulky collection; that a corporation’s name can be put in the specific selector term, and we were worried about the government giving Verizon’s records. Now we are just sending a warrant to Verizon that has their name in it and we are getting all of their records.

The example they put here is that you could still end up having the surveillance of everyone in the entire ZIP Code or all of those who use a given communications provider like Gmail. So Gmail is a specific term. Are we not still back where we were and have we really fixed the problem?

The ACLU goes on to say that the bill should be amended to narrow the SST definition—the selector term—to prevent this kind of bulky surveillance. The bill should also make crystal clear who is authorized with the Second Circuit—which has come out since this bill was written—that section 215 cannot be used to amass Americans’ records for open-ended data-mining purposes unmoored from any specific investigation. I think this is incredibly important.

The USA FREEDOM Act wants to take a step forward, but we need to make sure the ruling from the Second Circuit that has already passed, that we don’t do something that either means that case or we don’t do something that actually expands the power of 215 when the court has already restricted the power of 215.

The ACLU’s second recommendation is that we should include procedures to ensure that the government purges irrelevant information. Right now the bill would allow the collection of irrelevant information under 215 and other authorities without minimization procedures.

This kind of reminds me—if you want to know how much information we are grabbing up and how worried to be about it, there was an article in the Washington Post a couple of months ago, and it said the President had been minimized 1,227 times. We are collecting the President’s data, all right. You can say, well, we are being fair, we are getting everybody’s. For goodness’ sake, we should not be collecting the President. In doing that, you might inadvertently have somebody reading that who really shouldn’t be reading the President’s information. We should not be collecting the President’s information. That is ridiculous. But we are minimizing the President, which means we are finding the relevant information and then hoping nobody has read it in the process.

There were earlier versions of the USA FREEDOM Act that included some of these specific protections on getting rid of or minimizing irrelevant information from bulky surveillance. This is sort of the problem. This bill started out pretty good in the House, got out of committee, got sort of eaten up on the floor, and wound up losing a lot of the better stuff that was in it.

The third recommendation is what we mentioned a few minutes ago, which is that if we are going to be moving away from doing surveillance on the telephones of Americans, which is what we are doing at it is a strong advocate that goes before the FISA Court. As the Second Circuit Court decision observes, adversarial judicial process is vital, especially on matters as critically important as the government’s authority to spy on its own citizens. It is an important point, the adversarial judicial process.

There are some—Judge Napolitano has written on this—and I think he has made the point that without an adversarial process, you really can’t have a judicial process. If you don’t have people on both sides arguing or advocating for a position, there really isn’t a court. It really is not a judicial proceeding that we can recognize as finding justice. But the FISA Court only hears from one side, the government.

But the ACLU points out that these advocates participate solely at the discretion of the court and can make arguments that do not advance privacy and civil liberties.

Yet, if you are hired by the government, are you really going to be the best advocate for privacy?

The fourth suggestion that the ACLU has to make the USA FREEDOM Act clear, consistent with the Second Circuit decision observes, adversarial process, you really can’t even have a judicial process. If you don’t have people on both sides arguing or advocating for a position, there really isn’t a court. It really is not a judicial proceeding that we can recognize as finding justice. But the FISA Court only hears from one side, the government.

that is what we are going to pass. I think it would be better to be done with bulk collection. Let's be done with bulk collection. Let's start over.

But let's not replace it with something that may end up being just as bad. The sacrifices made in the bill in order to make this modest measure grew more dramatic. For instance, the USA FREEDOM Act was always a threat to court challenges and may have mooted the ACLU's tremendous court win last week, if it had passed last week before the point I have been making. The luckiest thing we ever got is that we did not pass the USA FREEDOM Act last year because the courts are probably going to do right now a better job than legislation.

If fact, we might be better off not passing the USA FREEDOM Act and seeing what the courts will do for us on this because there is a danger it moots the case. But there is a danger also that it is seen as actually giving justification to the program, which I guess is kind of mooting the case as well. The ruling in the appellate court could also—they are agreeing with what I just said—do more than USA FREEDOM Act to do, because it interprets the word 'relevance', saying it does not authorize bulk collection and that that word is not used in section 215.

So I think that is a good point, that the court is saying that the word 'relevance' does not authorize bulk collection. So it is not bulk collecting going on, but there is no authorization from 215 on it.

Here is the question: Is USA FREEDOM going to allow Buckley—perhaps bulk—collection, and do we wind up actually giving back more power to the intelligence community when we are trying to limit their power? I think we need to be very careful with what we do here.

Sunlight goes on to say—Sean Vitka: It's unclear whether the primary goal of USA FREEDOM, the rewriting of Section 215 to stop bulk collection, is already accomplished and whether USA FREEDOM could open the door to more secret interpretations and new venues of surveillance. I think that is an incredibly important question. Several groups that initially supported USA FREEDOM have backed away from it. ACLU and EFF agree that the USA FREEDOM Act as it stands now is not worthy of support. I think some of these may be neutral on it, but they have backed away from some of their support. Some of the concerns that Sean Vitka talks about here are shortcomings in the USA Freedom Act. He says that it accepts the premise that mass surveillance under these programs is necessary, despite the findings of the congressional joint inquiry and the 9/11 Commission to the contrary, and also despite that the Privacy and Civil Liberties Oversight Board found that it was unnecessary.

Sean Vitka goes on to say that one of his other concerns is that the USA FREEDOM Act effectively continues mass surveillance under section 215 of the PATRIOT Act through the use of multiple NSA-supplied selector terms. So you could say that we are only going to do individual terms, but then you do a bunch of them. By the time we do a bunch, are we really individualizing or are we not growing it into bulk collection?

They include the following among those selection terms—one they are worried about: the Internet protocol address or cloud source accounts of entities organizations, in contravention of the Fourth Amendment's particularized probable-cause-based warrant.

Additionally, Sunlight goes on to point out what I pointed out as well, that the term ‘person’ is not defined as an individual natural person, and the bill does not alter the PATRIOT Act’s original definition of person, which includes any individual, officer or employee of the Federal Government or any group, entity, association, corporation.

You know, I really feel what we could be doing back here is—we think we won. We get the USA FREEDOM Act, and then 2 years from now, we find out they are plugging the names of Verizon into their servers and that they are still collecting all the records from Verizon. So I think unless you can limit this to an individual, a natural person, I think really this is one of the biggest problems we have with the USA FREEDOM Act at this point.

Sean Vitka goes on to say that there is a concern that it expands the corporate immunity. We have discussed that as well—oh—that by removing that companies act in good faith, we also are going to pay the companies now to do this as well.

Judge Napolitano wrote about this just the other day, May 14. He writes: A decision last week about NSA spying on a phone call by a judge. Court of Appeals in New York City sent shock waves through the government. The court ruled that a section of the PATRIOT Act that is to go to the phone company, on which the government has relied as a basis for its bulk collection and acquisition of telephone data the past 14 years, does not authorize that acquisition. This may sound like legal mumbo-jumbo but it goes to the heart of the relationship between the people and their government and a free society.

The PATRIOT Act is the centerpiece of the Federal Government’s false claim that by surrounding our personal liberties to it, it can somehow keep us safe. The liberty-for-security offer has been around for millennia and was poignant at the time of the founding of the American Republic.

The Framers addressed it in the Constitution itself, where they recognized the right to privacy and assured against its violation by government, by intentionally forcing it to jump through some difficult hoops before it can capture our thoughts, words, or private behavior. These hoops are the requirement of a search warrant requirement, by employing language so intentionally vague that the government can interpret it at will.

TRIOT Act directs that NSA applications for authority to spy on Americans are to be made, and you have the totalitarian stew that we have been force fed since 2001.

Because the FISA court meets in secret, Americans did not know that the feds were spying on us all of the time and relying on their own unnatural reading of the words in the PATRIOT Act to justify it until Edward Snowden spilled the beans on his former employer nearly 2 years ago.

Here is another reason I think to question whether USA FREEDOM may be the best bill for us. There was an article in the Daily Beast the other day, called the USA FREEDOM Act last year because the courts did not alter the PATRIOT Act to justify it until Edward Snowden spilled the beans on his former employer nearly 2 years ago.

That was supposed to be the declawing of America's biggest spy service, but what no one wants to say out loud is that this is a big win for the NSA, and a huge nothing burger for the privacy community.'’

It was a former senior intelligence official, one of a half a dozen who spoke to The Daily Beast about the phone records program and efforts to change it.

'Here's the dirty little secret that many spooks are loath to utter publicly, but have been admitting in private for the past two years: The program—

The bulk collection program—which was exposed in documents leaked by Edward Snowden in 2013, is more trouble than it's worth. It is 'way expensive and very cumbersome.' The former official said. It requires the agency to maintain huge databases of all Americans' landline phone calls. But it doesn't contribute many leads on terrorist or attacks. And it's nowhere near the biggest contributor of information about terrorism that ends up on the President's desk or other senior decision makers.

If, after the most significant public debate about balancing surveillance and government in a generation, Congress can be assured that NSA has to give up, they're getting off easy. The bill that the House passed yesterday, called the USA FREEDOM Act, doesn't actually suspend the program. Rather, it requires that phone companies, not the NSA, hold on to the records.
That bears repeating. At least from the author’s perspective of this article, the USA FREEDOM Act does not actually suspend the phone records program. Rather, it requires the phone companies, not the NSA, to hold onto the records. The author asks:

“Good! Let them take them. I’m tired of holding onto this,” a current senior U.S. official told The Daily Beast. It requires teams of lawyers to ensure that the NSA is complying with Section 215 of the PATRIOT Act, which authorizes the program, as well as the internal regulations on how records can and cannot be used.

The phone records program has become a political lightning rod, the most controversial of all of the classified operations that Snowden exposed. The program, as well as the internal regulations on how records can and cannot be used, has been working together on this. The author mentions the Electronic Frontier Foundation, the Electronic Privacy Information Center, the ACLU, FreedomWorks, Bill of Rights Defense Committee, The Constitution project—across the spectrum, right and left.

The question is on encryption, whether the government will be able to break through the encryption that businesses are trying to devise to keep them out.

There is an article in the New York Times, though this is from 1¼ years ago, saying:

The National Security Agency is winning its long-running secret war on encryption, using supercomputers, technical trickery, court orders and behind-the-scenes persuasion to undermine the major tools protecting the privacy of everyday communications in an Internet age . . . . The agency has circumvented or cracked much of the encryption, or digital scrambling, that guards global commerce and banking systems.

Continuing:

“For the past decade, N.S.A. has led an aggressive, multipronged effort to break widely used Internet encryption technologies,” said a 2010 memo describing a briefing about N.S.A. accomplishments for employees of its British counterpart.

I think the encryption thing is a big deal and will continue to be something that is a bone of contention between the tech industry and the government.

With regard to what we do in order to protect ourselves from the government, I think encryption will continue to take off.

Ms. CANTWELL. Will the Senator yield for a question without losing the floor?

Mr. PAUL. Yes, without losing the floor.

Ms. CANTWELL. I am so pleased to hear my colleague talk about encryption technology because it is clearly something very important in this privacy debate. I hear with interest, as you cite that article, that one of the key things about the encryption debate is several years ago, those involved at the highest levels of government basically decided that instead of being able to break the encryption code, that maybe it would be a good idea to put an actual government chip in every computer. That was the clipper chip. And the notion was that then the NSA and other people wouldn’t have to worry about breaking the code. They would just have a government backdoor to our technology.

In fact, there were many people—I keep saying you are going to say instead of “Intel inside” you are going to say “U.S. Government inside” of every computer. Is that what we were trying to do?

So the clipper chip battle in the 1990s was a very famous debate about exactly how we were going to proceed on making sure that we were guaranteeing privacy to U.S. citizens. So clearly we were successful in defeating the clipper chip, but it took a lot of time and a lot of energy.

So I thank my colleague for continuing to fight on these important issues. You mentioned many of the organizations that were also involved in that battle. Are you saying that now you believe there are new government efforts to thwart our encryption capabilities?

Mr. PAUL. I thank the Senator for that question. I think there is a new sort of political rhetoric attacking encryption, but I think there will be more efforts. This article is from about a year ago, but I think what is going to happen from this—and what I have been hearing from people—is there is ultimately going to be encryption that is not going to be broken. They are going to have encryption—the only way to get to the encryption is through the individual. This is being done because the government has overplayed their hand. Because the government has been such a bully on this, companies are going to continue to get further and further away. What they are going to do is the encryption will only be in control of the user. When that happens, the government is not getting any information at all.

So they are taking a tool that probably has been useful to a certain degree—and I don’t mind if we are doing it through warrants and specific extradition—but I think they are pushing companies so hard that I think encryption is going to be put in a place where even the company cannot get to it.

Ms. CANTWELL. If I could ask another question of the Senator without losing him the right to the floor, this is a debate, as you were just saying, I think I understand your premises that there are three legs to the stool. There is a Federal Government that wants access, but they should go through the judiciary system, and there are separately the entities that have the actual records, which are the telecom companies, and that keeping those separate, but I think this is being such a bully on them, which is not exactly what the phone companies had acquired or kept for any business purposes, it just puts personal data and information at risk.

Am I understanding that correctly?
Mr. PAUL. I think I understand that question. The phone companies aren’t excited about it, but they will do it if they are paid and told to do it, basically. But the phone companies, I don’t know. I don’t how much objection they have had to the current system and the new system. They probably don’t want it because increasingly communications systems around the globe are merging. They are becoming integrated. It is not as if the communications systems stop at a nation’s border. So I think this is a particularly important issue. As we have talked about, the amendments we are interested in offering, I think this is a particularly important bipartisan effort. I don’t think people have known a whole lot about how the backdoor search loophole takes place.

We have supported section 702, because when there are dangerous threats overseas, we want our government to be able to ensure it is taking steps to protect the American people. But having more and more Americans swept up in these searches, particularly the changing nature of a communications system being integrated, strikes me as a very big problem.

I am going to be back to join my colleague very shortly, but I would be very interested in your colleague’s thoughts on the importance of closing this backdoor search loophole.

We have tried in the past, I think that now we have had a chance to walk this through in terms of what it really means, my hope is we can finally close it.

What would my colleague’s reaction be with respect to the importance of this?

Mr. PAUL. I think it is a great question, and some are saying that through the backdoor of abusing 702, that if there were 90,000 people targeted last year through using this 702, that we collected information on 900,000 individuals who were incidental and were not the target at all. So for every one byte of data we are collecting on somebody, we are collecting nine bytes of data on somebody who is not the target.

But that becomes part of this enormous data center that we are building. And many of those people are Americans who were getting through the backdoor.

But I are that today I want the leadership to allow us to have our amendments. That is one of our amendments. That is a joint amendment we have worked on. We have been working on these things for months. This only comes up every 3 years. Should they not give us a day to have a vote on some of these amendments?

Mr. WYDEN. I thank my colleague, I will be back to rejoin him in a few minutes, I do so appreciate my colleague’s stamina and passion.

I went to school on a basketball scholarship, and I think I have been able to stay in a little bit of shape, but my friend from Kentucky has sure shown both his commitment and his stamina. I am going to have to take a brief meeting on one of the issues pending, but I intend to join my colleague here before too long.

I thank the Senator. I will have additional questions at that time.

I return the floor to Senator PAUL.

Mr. PAUL. I thank the Senator for that question.

In The New York Times, in March of 2014, Clira Miller writes about some of the costs on U.S. tech companies that are occurring from some of this:

Microsoft has lost customers, including the government of Brazil.

It is spending more than a billion dollars to build data centers overseas to reassure foreign customers that their information is safe from the prying eyes in the United States government.

And tech companies abroad, from Europe to South America, say they are gaining customers that are shunning U.S. providers. One of the reasons is that they now think their information is safe from the prying eyes of the U.S. government.

The estimates are in the billions of dollars lost to American companies.

Even as Washington grapples with the diplomatic and political fallout of Mr. Snowden’s leaks, the more urgent issue, according to tech executives, is economic.

Tech executives, including Mark Zuckerberg of Facebook, raised the issue when they went to the White House for a meeting with President Obama.

It is impossible to see now the full economic ramifications of the spying disclosures—part because many companies are locked into multiyear deals, but also because the pieces are beginning to add up as businesses question the trustworthiness of American technology products.

The confirmation hearing last week for the new NSA chief, the video appearance of Mr. Snowden at a technology conference in Texas and the drip of new details about government spying have kept attention focused on an issue that many tech executives hoped would go away.

Despite the tech companies’ assertions that they provide information on their customers only when required under law—and not knowingly through a back door—the perception that they are providing private information to the NSA is felt most in the daily conversations between tech companies with products to pitch and their wary customers. The topic of the surveillance, which rarely came up before, now is among the most frequent conversations, as one tech company executive described it, “We’re hearing from customers, especially global enterprise customers, that they care more than ever about where their content is stored and how it is used and secured,” said John E. Frank, deputy general counsel at Microsoft, which has been publishing reports that it allows customers to store their data in Microsoft data centers in certain countries.
Isn't that sad? Isn't it sad that a great American company is having to advertise that they are storing their information in other countries because in America we are not protecting your privacy? Isn’t that sad, that a great American company, in order to stay in business, has to advertise that customers that they are keeping their information in another country?

At the same time, Mr. Castro said, companies say they believe the Federal Government is making a bad situation worse. “Most of the companies in this space are very frustrated because there hasn’t been any kind of response that’s made it so they can get, you know, these customers and say, ‘See, this is what’s different now, you can trust us again,’” he said.

In some cases, that has meant forgoing potential revenue.

Though it is hard to quantify missed opportunities, American businesses are being left off some requests for proposals from foreign customers that previously would have included them, said James Staten, a cloud computing analyst at Forester who has read client documents from Microsoft, Google, and Yahoo, which have asked government agencies abroad to spy on American citizens.

The result has been a boon for foreign companies. Runbox, a Norwegian email service that markets itself as an alternative to American services like Gmail and says it does not comply with foreign court orders seeking personal information, reported a 34 percent annual increase in customers after news of the NSA surveillance.

Brazil and the European Union, which had used American underwater cables for international communication, last month decided to build their own cables between Brazil and Portugal, and gave the contract to Brazilian and Spanish companies. Brazil also announced plans to abandon Microsoft Outlook for its own email system that uses Brazilian data centers.

So you have two sort of contrary opinions in wondering which direction we go. Some who want more collection of data and say we are not collecting enough data say they might live with it if we add in and force the phone companies to keep the data. Right now, the bulk collection for a system where the phone companies have the bulk collection but you are still having the same sort of collection of data.

My concern with the USA FREEDOM Act is that it still, I believe, may allow for a nonspecific warrant. It still may allow for bulk collection in the sense that it says you have to select a specific person, but the specific person can be a corporation. So if you still have a bulk collection for a government that says, ‘Okay, if we put the name “Verizon” in and you are getting all of Verizon’s customers and the only difference is the phone company is holding the information and then divulging it versus the government holding it, I am not so sure we have had so much of an improvement.

Some will say we just need to be safe, we just need to do whatever it takes, that it doesn’t matter if we give up any kinds of basic freedoms or privacy in the process. But I think we give up on who we are as a people that basically, at all cost, regardless of what it takes, we are going to do this to keep ourselves safe.

The thing is that even the President’s privacy commission and the President’s review commission—I mean, two independent, nonpartisan bodies—ended up saying that they didn’t think anybody was independently captured, that there was no unique information that was actually gotten from either of these programs, that the collection of data hadn’t made us safer but it has infringed upon our privacy.

I think if we don’t have a significant debate on this, if we continue to say “Well, we are up against a deadline, and because there is a deadline, we don’t have time for amendments,” I think we run a real risk with the American people. Congress has about a 10-percent approval rating right now, and some argue that might be a little bit high considering how a job we are doing—a 10-percent approval rating.

The vast majority of the American people think we have gone too far in the bulk collection of records. In the ACLU survey we looked at a little bit earlier, in the age group between 19 to 39, over 80 percent of people think we have gone too far and we are not protecting privacy.

(Mr. SCOTT assumed the Chair.)
American products. I think it is kind of sad. Not only do they not want their data held in a center in our country, they don’t want their data crossing into our country. I don’t think we have to be that fearful of our citizens. We have to give up who we are in the process. I have met some of our young soldiers who have come back with missing limbs. I have met the parents of some who have died. And to a person, they say they were fighting for our Bill of Rights and they were fighting for our Constitution. It is difficult for me to understand how we can take into account the sacrifice they made in war and at the same time, while we are here safe at home, we can’t even protect the documents they are fighting for.

I see no reason why we can’t rely on the Constitution. I see no reason why we can’t rely on traditional warrants. Warrants are not hard to get. Warrants are easy to get. Warrant are, if anything, very easy to get. On the FISA Court, turning down a warrant is almost nonexistent. So I see no reason why we can’t try using the Constitution for a while.

I am concerned that the problem is bigger than just what we are talking about today. We are talking about the bulk collection of records supposedly under section 215 of the PATRIOT Act. If we stop that, how much have we stopped? How much is still in existence? How much are we still doing through other avenues? I think probably the most alarming thing we have come across as I have been talking today is the idea that some people believe the President has inherent powers that are not subject to Congress. That, to me, is very alarming.

It also means that I think that because this opinion persists within the executive, there are in all likelihood many programs like the bulk collection of data—many programs that we don’t know about, some that we have heard about. It is still not clear to me whether the Stellar Wind Program is completely gone, which involves more than just telephone data, email conversations, computer addresses, and credit cards. What is the government collecting? How much is being collected and under what authority?

It is true that there are people—some of them elected officials—who believe in the inherent powers of the Presidency that cannot be challenged even by Congress. We have a lot of work if that is really what we are up against.

I think it would be a big step forward if we do something about the bulk collection of data. But I think, given the court case, it is concerning to me that we might actually make the court case or the future of it moot and that we actually could make things worse. It wouldn’t be the first time we have made things worse, thinking we were fixing things and made it worse.

From the opinion of the Second Circuit Court, here are some quotes:

The court writes:

That telephone metadata do not directly reveal the content of telephone calls does not vitiate these concerns arising out of the government’s bulk collection of such data. . . . the startling amount of detailed information metadata can reveal, information that cannot be obtained by examining the contents . . .

I think this is a good point because many people want to downplay what metadata is or what you can determine from it. But here is the court acknowledging that you may actually get more detailed information from metadata than what you once got from obtaining the content.

When we think about how true this is, think about if someone were just to take your papers. What could they find? How many people even have personal letters anymore? People don’t have anything on paper that is personal at all. A lot of people pay their bills online. It is amazing; if you put the compilation of all the metadata together, what you can determine.

Remember that a high-ranking intelligence official said that we kill people based on metadata. But if we are killing people based on metadata, the assumption is that they can get an enormous amount of information from metadata, and we should be very careful about relying on that.

They give an example of the sort of metadata and what it can determine:

For example, a call to a single-purpose telephone number such as a “hotline” might reveal that one individual is a victim of domestic violence or rape; a veteran; suffering from an addiction of one type or another; contemplating suicide; or reporting a crime. Metadata can reveal civil, political, or religious affiliations; they can also reveal an individual’s social status, or whether and when he or she is involved in intimate relationships.

The more metadata the government collects and analyzes, furthermore, the greater the capacity for such metadata to reveal ever more private and previously unascertainable information about individuals.

That is sort of interesting also about metadata. We have so much online and so much information on our phones that you could probably be in someone’s house for a month and never find that in paper because so much of our lives revolve through the phone, through things we order and phone calls and all of that, that in the old days what could have been gotten through someone’s castle, through someone’s actual papers in their house, I think pales in comparison to what you can get simply through metadata even without a warrant.

They make another point, too:

Finally, as appellants . . . point out, in today’s technologically based world, it is virtually impossible for an ordinary citizen to avoid contacting himself or herself on a regular basis simply by conducting his ordinary affairs.

The order thus requires Verizon to produce call detail records every day on all telephone calls made through its systems or using its service where one or both ends of the phone call are located in the United States.

It is hard for me to believe that there are people who don’t understand that what we are talking about here is a general warrant. This is what we fought the Revolution over. This is, as John Adams said, the spark that led to the Revolution. The spark that led to the Revolution was the whole worry and concern, one, that soldiers were writing the warrants, and the other concern was that in writing the warrants, they weren’t specific to anyone, they were being written in a general fashion, and that by writing them generally, there could be an injustice in having an entire group who ends up being subject to a warrant that is not specific.

Some have said that the appellate court, we also hear that the metadata has a reach far beyond almost imagination.

In the article “As Congress Haggles over Patriot Act, We Answer 6 Basic Questions,” which was published on May 6, 2015, there is an article they ask about the PATRIOT Act debate.

Most of the talk has been about telephone surveillance, but the question is this:

What about the NSA’s surveillance of email and other Internet activities?

This congressional debate has nothing to do with any of NSA’s surveillance Internet activity.

That’s mostly because of the fact that those programs are authorized by different laws.

The PRISM program, for example, which collects a vast amount of Internet data . . . is covered under section 702 of the FISA Amendments Act.

Some have said that the PRISM Program probably is collecting more information in many ways, maybe even dwarfing the bulk collection of the phone records. So if we don’t address section 702 in this debate, this is also what we were talking about earlier, is the backdoor, the ability to say: Well, we are investigating someone in a foreign country, but really they are trying to get access to someone in our country through the backdoor. If we don’t address this, we may well not be addressing a significant part of the problem.

This is one of the other questions:

Is there anything else in the House bill we should know about?

The bill [the USA FREEDOM Act] lifts the secrecy surrounding key decisions made by the secret Foreign Intelligence Surveillance Court. Going forward, some will be made public.

I think this is a step in the right direction. There are a lot of legal decisions, and I think we can discuss the pros and cons of the legal decision without having to know the specific details. I think Senator Wyden made a good point on this earlier when he said that it is not the operational details we need to know, but when we are questioning and debating the law, there is
no reason why that shouldn’t be public knowledge.

One of the reasons we would like to see the court rulings, too, is that the FISA Court found bulk data collection constitutional. I still find that somewhat surprising that there is anything less than a rubber stamp could find it somehow reasonable to say that collecting all of our records in advance really is relevant to an investigation. I think it is a pretty significant violation of privacy, that they are not going to query the data until after they get it. So there is no investigation until they have already collected the data.

The other point is that when they say it is relevant, is anybody really determining that arguing one way or the other or do we just accept what the NSA says, that the data is relevant?

Nobody knows what will come of this debate. My hope in going on all day with this debate and trying to force the issue is not to allow for some votes on some amendments to this. We shouldn’t have just an up-or-down vote on whether to extend the PATRIOT Act. I think that when we have 80 percent of the population in some cases but 30 percent of the population saying that the bulk collection of all of our phone records all of the time without a warrant is something that has gone too far and needs to stop, it is an insult to the American people. I think that if we are not going to have any vote at all, they would just have a vote up or down on extending this.

I think we really do need to have a vote, and the vote needs to be on many different alternatives. It shouldn’t just be on one alternative. It needs to be on section 702 and the FISA amendments. It should be on a variety of things that could make this better—whether FBI agents should be able to write their own warrants or whether they should be signed by judges. There are a variety of things we need to be talking about. The Senate could simply take up the House bill and pass the House bill, but I think that is unlikely.

A guesting article from The Boston Globe, a while back. It says: ‘‘What your metadata says about you: From MIT’s Cesar Hidalgo, a new window on what your email habits reveal.’’ The article is written by Abraham Rieseman.

As recently as a few weeks ago, ‘‘metadata’’ was an obscure term known mainly to techies and academics. Broadly defined, metadata is data about other data. For the phone company, it might be the time and length of your calls, but not the conversation itself; in the context of email, it means information such as the sender and recipients of a message—basically, everything except what the message actually says.

We spoke earlier about the suspicious activity reports. These are reports that the government requires that you send to your banking, and it is a pretty significant intrusion into the banking affairs and also into an individual’s affairs.

This is an article that was written by the ACLU about suspicious activity reports. Law enforcement agencies have long collected information about their routine interactions with members of the public. Sometimes they call these ‘‘field interrogation reports’’ or ‘‘stop and frisk records.’’ This documentation, on the one hand, provides a measure of accountability over police activity. But it also creates a database that law enforcement and intelligence agencies are increasingly seeking to mine this data. It is described as ‘‘reasonable suspicion’’ as the standard for police stops in Terry v. Ohio in 1968. This standard required suspicions supported by articulable facts suggesting criminal activity was about...

In the suspicious activity reports, though, these kinds of programs threaten this reasonable time-tested law enforcement standard by encouraging the tendency to report behaviors that do not rise to reasonable suspicion. So it is one thing to say that someone has done something that rises to reasonable suspicion, but it is another to say that activity that could be perfectly normal, like withdrawing $1,000 from the bank or putting $1,000 in the bank, somehow is suspicion of a crime that we should be investigating.

A lot of this stuff has gotten really, really out of control. It is one of the things where actually the newspapers have done a pretty good job of reporting some of the stuff—not necessarily the suspicious activity reports but on some of the other confiscations of people’s assets without really evidence of a crime but maybe evidence that they have cash.

You can be driving down the road in DC and make an unsafe lane change and the government asks you if you have more than $2,000, and they say that the bank and the government takes it or the government says: Well, you have $2,000. We will let you keep $1,000 if you sign a statement saying that you will not sue us to get the $1,000 back.

Believe it or not, that is stuff that is still happening in our country. It is called civil asset forfeiture. To make it worse, we actually give a perverse incentive. We say to the local officials that if you capture money from people, we will give you a percentage of it—so the more you have, the more you can get.

Some people have shown that people actually go after things that are paid off. There was a motel in New Jersey, the Motel Caswell, Local officials decided they would go after that because, they said, there had been some drug dealings at the motel. It turned out there were 6 people in the motel selling drugs out of 180,000 visits or something ridiculous.

It turned out there were other hotels that had a higher percentage of drug busts done at the hotel, but they owed money and the Motel Caswell was completely paid off. It may have been part of the decisionmaking process, because when the government came and seized the hotel for illegal activity, they took the hotel and went and sold it, but it has a lien against it. The bank owns it, and you do not get to sell it very easily. It will be paid. They were going to sell it. It is a $1.5 million hotel and then, I guess, the local police forces would benefit by that.

It is not just with our records that there is a problem. It is also with the concern for how we adjudicate justice in our country. As we go forward, I think we need to be worried about not only the way our records are collected, but we need to be concerned about justice in general.

As I have traveled around the country, one of the things I have seen is what I call an underrun of unease in our country. I traveled to Ferguson. I have been to Chicago. I have been to most of our major cities, and I have also been to some of the places where there has been this anger.

I think people are angry because they do not feel that government is treating them justly. People do not like to be treated arbitrarily. In fact, there are some who have given the notion of what is acceptable, what is good government and what is bad government, what is good law and what is bad law, what is just and what is unjust. But whether it is arbitrary or not, Hyack in the St. Louis Post-Dispatch talks about that arbitrariness, not having the predictability of knowing what the law will do. That the law does not do the same thing to all individuals is a definition of the injustice that causes people to be unhappy about the way their government treats them.

My fear is that this arbitrary nature of collecting bulk records, of collecting all of our records without a significant warrant—the problem here is going to be that the government then has a sense of unease that is in our cities and in our country at-large. What happens is that everybody is not treated exactly equal. People do not have the same resources to try to escape the clutches of Big Brother when either data or information is used against them.

One of the little-noticed sections in the USA FREEDOM Act deals with the safety of maritime navigation and nuclear terrorists and conventions implementation. Interestingly, there is a provision somehow in this for civil forfeiture. But I think the biggest problem with civil forfeiture is that we allow it to occur without a conviction. I think no one should have their possessions taken from them. I think you should be innocent until proven guilty. I see that the Senator from Connecticut has a question. I would be happy to entertain a question without losing the floor.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. BLUMENTHAL. Mr. President, I thank my colleague from Kentucky for giving me the opportunity to ask a
question. In the preface to that question, I would like to make a couple of remarks if he will yield to me for that purpose.

My colleague from Kentucky has taken the floor tonight in the highest tradition of the Senate to make a point that should be meaningful to all of us who care about our democracy. My colleagues, including the Senator from Kentucky, have made a number of important points about the dangers of mass surveillance and the harms caused by the bulk collection of Americans' data.

I agree with those who have pointed out that the USA FREEDOM Act is a strong compromise solution for protecting Americans' freedom and security at the same time as striking a balance between preserving our security and protecting our precious rights.

I want to highlight for the Senator from Kentucky, in his very insightful remarks, as well as for my colleagues and others who are interested in this topic, a particular part of that legislation—the provisions that deal with the adversarial process in the FISA Court.

The bulk collection program is a powerful example of why we need a strong adversarial process. We know that bulk metadata collection is unnecessary. The President's own review group has made that clear. We also know that bulk metadata collection is un-American. This country was founded by people who strongly adhered to the general warrant, and no general warrant in our history has swept up as much information about innocent Americans as the orders permitting the bulk collection of Americans' data.

Last week, the Second Circuit Court of Appeals held that bulk collection is also unauthorized by the law. More than 9 years after the government began bulk collection, we are finally told by the highest court to consider the question that the bulk collection program was never authorized by Congress.

How do we get here? How do we arrive at a place where one of the most respected courts of appeals in the United States says that the executive branch of our government has been collecting data on innocent Americans without legal authority to do so—in fact, breaking the law by invading Americans' privacy?

We know that since the FISA Court failed its most crucial test. In May of 2006, the FISA Court was asked whether the Federal Government could collect phone records of potentially every single American. The argument hinged on the word “relevance” in the statute. Under the statute, the Federal Government can collect relevant information. The court had to decide whether “relevant information” means all information.

That does not strike me as a difficult question. Does “relevant information” mean all information? It did not strike the Second Circuit Court of Appeals as a difficult question either.

The Second Circuit held that the Federal Government’s interpretation is “unprecedented and unwarranted.” Those are strong words for a court normally extraordinarily reserved and understated in its characterization of illegality by the executive branch. But the court said emphatically that the Government was breaking the law.

Never before in the history of the Nation had such a bizarre interpretation been entertained. At the very least, the FISA Court would recognize that its May 2006 decision was important.

If this question had gone to a regular article III court, it would have been immediately recognized as a momentous decision, permitting bulk collection of data on every American. Liti-gants on both sides would have, in effect, pulled out all the stops in their arguments. Yet not only did the FISA Court get the question wrong in May of 2006, it did not even have to write an opinion, not even to have raised it and addressed it in its opinion. Of course, nobody knew it at the time because the opinion itself was kept secret, as were all of the proceedings on this issue.

The FISA Court upheld the government’s bulk collection program, and it did so without even writing an opinion explaining its legal reasoning. Not until the program was made public roughly 8 years later was an opinion written, and every opinion released so far has omitted key issues or ignored key precedent.

If the court had written an opinion, at least Congress would have quickly known what the court had done, not to mention the American people who would have known what the court had done, but the court wrote nothing. It chose to be silent and secret, and apparently believed this issue merited no notice to the Congress that should get such an important question so disastrously and desperately wrong is fundamentally broken.

Let me be clear. I do not mean to denigrate the judges of the FISA Court. Any judge, no matter how wise and well attuned to legal issues, needs to hear both sides of an argument in order to avoid mistakes. Courts make better decisions when they hear both sides.

In fact, during a hearing on this issue in the Judiciary Committee, I had the opportunity to ask one of the Nation’s foremost jurists whether she could do her job without hearing from both sides of an argument, and she was quite clear that she could not. Adversarial briefing, she explained, is essential to good decisionmaking.

We know as much from our own everyday lives that we make better decisions when we know the argument against what we are going to do, what we are going to think, and what we are going to say. It is the genius of the American system of jurisprudence that judges listen to both sides in open court before they make a decision.

Their rulings are public, and they themselves are evaluated and judged.

Nine years after the FISA Court’s ruling in May of 2006, we continue to wrestle with the impact of the court’s grievous, egregious error, but we cannot simply fix the mistakes without fixing the court. We cannot fix the system without remedying the process because that process is so broken, it will make more mistakes—not only predictable mistakes but inevitable mistakes.

As technology evolves, we cannot say with certainty what the next big privacy issue will be. In 2006, the FISA Court decided whether the government can collect all of our phone records. In 2020, the government will have some new means of surveillance, and they will want to try it. In 2030, we will have another.

We need a FISA Court that we can trust to get the question right. Trust, of the court and the judicial system that authorizes the surveillance of Americans’ private lives is at issue here.

We need a FISA Court that operates transparently, openly, and with accountability. A court that operates in secret and hears only the views of the government and faces only minimal appellate reviews cannot be trusted to pass the next big test.

The USA FREEDOM Act would fix this systemic problem. It would demand, under certain circumstances, that the FISA Court hear from both sides of the issue and explain why it is making a decision and also explain why it has decided not to release such cases if it chooses to do so. That would bring transparency to the FISA Court decision, requiring them to be released unless there is good reason not to release them. It preserves the confidentiality of the court where necessary, but it also protects the fundamental, deeply rooted sense of American justice that adversarial, open process is important—indeed, essential—to democracy. And it would provide some appellate review if some form of review in an appellate court so that if mistakes are made, they are more likely to be caught and stopped before they result in fundamental invasion of private rights.

In short, the USA FREEDOM Act will make the FISA Court look more like our courts Americans deal with in other walks of life, more like the courts they know when they are litigants, and more like the courts our Founders anticipated.

What would they have thought about a court that hears cases in secret, makes secret decisions, operates in secrecy, and issues secret rulings? They would get it wrong. They would have thought that that sounds a lot like the Star Chamber, that sounds a lot like the so-called courts that caused our rebellion.

This change will help ensure that we are not back in this Chamber 9 years from now debating the next mass surveillance program that started without
Congress actually authorizing it, as did metadata collection. It will help ensure that strictures of our Constitution are obeyed in spirit and letter. It will help ensure that programs designed to keep Americans safe can command the respect and trust they need to be effective. We need those programs. National security must be preserved and protected, but we need not sacrifice fundamental rights in the process.

Unless and until this essential reform is enacted, along with the other essential reforms contained in the USA FREEDOM Act, I will oppose any reauthorization of section 215.

The question that I ask my colleague from Kentucky and the point that I think he has made so powerfully and eloquently relates to this essential feature of our American jurisprudence system. Are not open adversarial courts essential to the truth and confidence of the American people, and do we not need this kind of fundamental reform in order to preserve our basic liberties?

I ask this question of my colleague and friend from Kentucky because I think it is decisive. On the floor of this Senate tonight raises fundamental issues that need to be discussed and addressed.

I thank the Senator from Kentucky for the opportunity to ask this question and address this body.

I thank the Presiding Officer.

Mr. PAUL. I thank the Senator from Connecticut for that question.

I take the points my friend was making through the question had to do with the whole idea of relevance, which is sort of an amazing thing.

I think the quote from the privacy and civil liberties commission really hits the nail on the head—that they cannot be regarded as relevant to any FBI investigations required by the statute without redefining the word “relevant” in a manner that is circular, unlimited in scope, and out of step with the case law.

The interesting thing is that we want a body that works a little more like a courtroom, and I think you can only get the truth if you have people on both sides. If you have people on one side, it is an inevitability that the truth is going to be lost and you are going to list in one direction. If you have a huge step forward, but it does boggle the mind that we can have them arguing that this is relevant to an investigation that has not yet occurred because we are collecting data and then we are going to mine it at some other time for some investigation. So it couldn’t be relevant to an investigation because there is not yet an investigation when they are collecting the data. And no FISA Court seemed to question that, so it concerns me as there is a very good kind of undertaking at finding the truth.

So I think the Senator is exactly right, and I believe there are things we can definitely do to make it better. I think the bottom line is that we should not collect bulk data on people who are not suspected of a crime.

One of the sections of the PATRIOT Act that doesn’t get quite as much discussion is 215. This is the sneak-and-peek section and it is not up for renewal, but it is something that also shows how we have really gone awry on that.

Radley Balko has written about this in the Washington Post, and it is how something small just a little bit at a time and grows bigger and bigger.

From 2001 to 2003, law enforcement only did 47 sneak-and-peek searches. The 2010 report said it was up to 3,970, and 3 years later, in 2013, there were 11,129 sneak-and-peek searches. That is an increase of over 7,000 requests. That is exactly what privacy advocates argued in 2001 would happen.

The interesting thing is that when you look to see who exactly we are arresting at the very least be given the time to read it. There’s also a lot of Beltway scorn and 3 years later, in 2013, there were only did 47 sneak-and-peek searches. The 2010 report said it was up to 3,970, and 3 years later, in 2013, there were 11,129 sneak-and-peek searches. That is an increase of over 7,000 requests. That is exactly what privacy advocates argued in 2001 would happen.

The interesting thing is that when you look to see who exactly we are arresting at the very least be given the time to read it. There’s also a lot of Beltway scorn and 3 years later, in 2013, there were only did 47 sneak-and-peek searches. The 2010 report said it was up to 3,970, and 3 years later, in 2013, there were 11,129 sneak-and-peek searches. That is an increase of over 7,000 requests. That is exactly what privacy advocates argued in 2001 would happen.

implemented after 9/11 allows the NSA to hand over information to traditional domestic law-enforcement agencies, without any connection to terrorism or national security investigations.

But instead of being truthful with criminal defendants, judges, and even prosecutors about where the information came from, DEA agents are reportedly obscuring the source of these tips.

For example, a law enforcement agent could receive a tip from foreign surveillance, and he could look for a specific car in a certain place.

But instead of relying solely on the tip, the agent could pretend to find his or her own reason to stop and search the car.

Agents are directed to keep SOD under wraps and not to mention in their reports where they got their information.

If we are going to use standards that are less than the Constitution for IRS investigations, for drug investigations, we ought to just be honest with people that we are no longer using the Constitution. If we are going to use the Constitution, then we shouldn’t be hiding evidence obtained through foreign surveillance and through a lower standard to be used in domestic crime.

(Mr. CRUZ assumed the Chair.)

Parallel construction, which is basically keeping secret the source of tips and then using them and reconstructing and trying to come up with a different reason for why law enforcement stopped someone, is something that really—if we are not going to be honest about it, somebody is going to figure it out, and we are going to have to fix it.

After an arrest was made, agents then pretended that their investigation began with the traffic stop, not with the tip they got from our foreign surveillance agencies.

The training document reviewed by Reuters refers to this process as parallel construction.

Senior DEA agents who spoke on behalf of the Agency but only on the condition of anonymity said the process is kept secret to protect sources and investigative methods. Realize they are also keeping it secret from a judge, the defense lawyers, and the prosecution.

Some have questioned the constitutionality of this program.

"That's outrageous," said Tampa attorney James Felman, a vice chairman of the criminal justice section of the American Bar Association. "It strikes me as indefensible." Lawrence Lustberg, a New York defense lawyer, said any systematic government encryption. "It strikes me as indefensible.

The DOJ is not supposed to be doing anything domestically. We now have them involved in bulk collection, but we also now have them involved in drug enforcement.

The article continues:

DEA officials in a highly secret office called the Special Operations Division are assigned to handle "tips" from the NSA, according to Reuters. Tips from the NSA are added to a DEA database that includes intelligence intercepts, wiretaps, informants, and a massive database of telephone records. This is problematic because it appears to break down the barrier between foreign counterterrorism investigations and ordinary domestic criminal investigations.

Because the SOD's work is classified, DEA cases that began as NSA leads can't be seen to have originated from an NSA source.

So what does the DEA do? It makes up a story of how the agency really came to the DEA in a case in parallel construction, Reuters explains. Some defense attorneys and former prosecutors said that parallel construction may be legal to establish probable cause for an arrest, but they said employing the practice as a means of disguising how an investigation began may violate pretrial discovery rules by burying evidence that could prove useful to criminal defendants.

The report makes no explicit connection between the DEA and the earlier NSA bulk phone surveillance uncovered by Snowden.

In other words, we don't know for sure if the DEA's Special Operations Division is getting tips from the same database that has been the subject of multiple congressional hearings. We just know that a special outfit within the DEA sometimes gets tips from the NSA.

There is another reason the DEA would rather not admit the involvement of NSA data in their investigations. It might lead to a constitutional challenge to the very law that gave rise to the evidence.

Earlier this year, federal courts said that if law enforcement agencies wanted to use NSA data in court, they had to say so beforehand and give the defendant a chance to contest the legality of the surveillance. Lawyers for Adele Daoud, who was arrested in a federal sting operation and charged, suspect that he was identified using NSA information but were never told.

Surveys show most people support the NSA's bulk surveillance program strongly when the words "terrorism" or "courts" are included in the question. When pollsters draw no connection to terrorism, the support tends to wane. What will happen when the program makes the news? It will certainly raise questions about the legal underpinnings.

Some of the companies have begun to push back on the backdoor mandates that are coming from government to get into our information.

In one of the most public confrontations of a top U.S. Intelligence official by Silicon Valley in recent years, a senior Yahoo Inc. official peppered [NSA] director, Adm. Mike Rogers, at a conference on Monday over digital spying.

The exchange came during a question and answer session at a data security conference in California that people in "positions of responsibility" should do everything they can to protect privacy, not steal information.

Rogers attempted to parry the questions but also signaled he welcomed the debate.

Still, Mr. Rogers did little to deflect recent accusations about the NSA activities. For example, he refused to comment on recent reports that the NSA and its U.K. counterpart have agreed to use information from Gemalto NV, a large Dutch firm that is the world's largest manufacturer of cellphone SIM cards.

I think the accusations continue to mount. Everywhere we look, we see the NSA working with others to collect information. We see them wondering about having backdoor mandates built into their products.

I think the Senator from Oregon has been great at pointing this out and has written several op-eds talking about what the harm is of leaving basically a portal or an opening for our government but one that may well be exploited by hackers and may well be exploited for other purposes.

Mr. WYDEN. I think my colleague has made the point with respect to our protocol—parallel construction—actually arguing that companies should build weaknesses into their systems.
I note my colleague has been on his feet now for somewhere in the vicinity of 9 hours, so I think we are heading into the home stretch. For people who are listening, I think they really are first and foremost interested in how this Senate on a bipartisan basis, can come up with policies that ensure that we both protect our privacy and our security. As my colleague said, they are not mutually exclusive.

So I think what I would like to do is wrap up my questioning tonight by talking about how this bulk phone record collection and related practices is an actual intrusion on liberty, and to start the conversation, you have to first and foremost get through this whole concept of metadata. We heard people say: What is the big deal about metadata? And for quite some time we had Senators saying: What is everybody upset about? This is just “innocent metadata.”

Well, metadata, of course, is data about data, but it is not quite so innocent. If you know who someone calls, when that person calls, and for how long they talk, that reveals a lot of private information. Personal relationships, medical concerns, religious or political affiliations are just several of the possibilities. Most people that I talk to don’t exactly like the government vacuuming up private information if those persons have done nothing wrong. Now, this is especially true if the people in question address issues about the location and movements of everyone with a cell phone. And we have not gotten into this in the course of this evening, but I want to take just a minute because I think, again, it highlights what the implications are.

I have repeatedly pushed the intelligence agencies to publicly explain what they think the rules are for secretly turning American cell phones into tracking devices. They have now said that they are not collecting information about the location and movements of anyone with a cell phone. And we have not gotten into this in the course of this evening, but I want to take just a minute because I think, again, it highlights what the implications are.

Now, to be clear, I don’t think the government should be electronically tracking Americans’ movements without a warrant. What is particularly troubling to me is there is nothing in the PATRIOT Act that addresses this. In addition to this sweeping bulk collection authority to phone records. Government officials can use the PATRIOT Act to collect, collate, and retain medical records, financial records, library records, gun purchase records—you name it. Collecting that information in bulk, in my view, would have a very substantial impact on the privacy of ordinary Americans.

I want to be clear, I am not saying this is what is happening today, but I want to really clearly state what the government could do in the future. So my question, as my colleague, who has been on his feet for a long time, moves to begin to wrap up his comments this evening, I would like my colleague’s thoughts on the impact of NSA collection of bulk records on innocent Americans. I also would be interested in his views with respect to whether it is possible to get the government to give straight answers about the tracking of the location and movements of Americans with cell phones that took place in the past. I would be interested in my colleague’s thoughts on this, as he has been able to do so in the Intelligence Committee trying to make this better.

I think so often our Intelligence Committees don’t have enough people who are really concerned with the Bill of Rights as well as national defense. I think over the years you have been able to continue this battle in a healthy way, understanding both sides of it, both with national security but also understanding that who we are as a country is that we not only give that up—that we not give up our most basic of freedoms in doing this.

I think that power tends to be something people don’t give up on easily. So when you have power that you give to people, you have to have oversight. It is incredibly important that we do have oversight on what we are giving up, but it is also important that we see what has gone wrong. The FISA Court was aghast that basically they were not getting answers about the tracking of the location and movements of Americans with cell phones, and any policies that information to change practices on a lot of these areas that have really gotten out of hand.

The goal of being here today has been to ask tough questions. And not enough tough questions have been asked. And my colleague in the amendments we are talking about really seeks to get answers and use that information to change practices on a lot of these areas that have really gotten out of hand. I appreciate my colleague talking about the FISA Court in connection with this. I think it is, for listeners, the Foreign Intelligence Surveillance Act that one of the most bizarre judicial bodies in our country’s history, created to apply commonly understood legal concepts, such as probable cause, to the government’s request for warrants to track terrorists and spies. But over the last decade, the FISA Court has been tasked with interpreting broad new surveillance laws and has been setting sweeping precedents about the government’s surveillance storing, all of it being done in secret.

And I will say—and I would be interested in my colleague’s thoughts on this—that it is time that the court’s significant legal interpretations be made public—be made public so there are no more secret laws; that the people of this country have the chance to engage in debate about laws that govern them. I also think there ought to be somebody there who can say on these questions where there are major exceptional circumstances there ought to be somebody there who can say: Look, there may be other considerations than the government’s point...
of view. But transparency here is critical so that Congress and the courts can hold the intelligence community accountable. I want to mention, once again, we are talking about policies. We are not talking about matters that are going to reveal secret operations or source and method secrets. We are talking about policy.

So I think it would be helpful, again, as we move to wrap up, if my colleague from Kentucky could outline some of the reforms in the foreign intelligence court, something that he thinks would be most helpful in terms of promoting transparency and accountability, that do not compromise sources and methods—because I think my colleague has some good ideas in this area—and what, in my colleague's view, would be most important with respect to getting reforms in this secret court in a way that would ensure more transparency for the public and still protect our vital intelligence officials who are in the field.

Mr. PAUL. I think that is a good question, and the Senator's office and my office have worked for a while to try to come up with FISA reforms. One of them is sort of in the USA FREEDOM Act, and it could be better, saying that there ought to be a special advocate so there is an adversarial proceeding.

One of the problems in the USA FREEDOM Act, as it is written, is that the only independently appointed body that has been the FISA Court and doesn't have to be appointed by the FISA Court. It may well be that a FISA Court that has given a rubberstamp to bulk collection may not be as inclined to give a special advocate so there is an adversarial proceeding.

For example, if you are being told by a FISA Court that bulk collection of all the phone data in our country is legal, you should have a route to an appellate court, an automatic route out of FISA to an appellate court. I think allowing for an escape hatch for people to appeal.

But I have seen, at least in the lay press—really just takes your breath away. For example, if you are being told by a FISA Court that bulk collection of all the phone data in our country is legal, you should have a route to an appellate court, an automatic route out of FISA to an appellate court. I think allowing for an escape hatch for people to appeal.

Mr. PAUL. I think that is a good question, and the Senator's office and my office have worked for a while to try to come up with FISA reforms. One of them is sort of in the USA FREEDOM Act, and it could be better, saying that there ought to be a special advocate so there is an adversarial proceeding.

So, yes, it is going to remain an ongoing concern, an ongoing challenge, because I think there is a sense that the executive branch is the only one that can really deal with this kind of information in a timely kind of fashion. Well, what we have seen, with respect to bulk phone record collection, is that this has been a program that has not been about timely access to relevant information.

Experts with national security clearances—we talked about those individuals this afternoon, this evening, would be significant concerns with respect to ensuring the liberties of the American people are protected without compromising our safety. Let's check them off: bulk phone collection, millions and millions of phone records of law-abiding Americans; the Executive order No. 12333 that we talked about today, another very important area; and then section 702, the Foreign Intelligence Surveillance Act of 2001, whether a foreigner is the target and the records of Americans are swept up. So I think we are addressing exactly one of the concerns that has come out in the last few days with respect to what Americans are concerned about.

I know there has just been a brand-new major survey that has been done. My colleagues may have touched on it sometime in the course of the day. Americans particularly want to know what information about them is being collected and who is doing the collecting. In each of these three areas that I mentioned, there are substantial questions with respect to the privacy rights of Americans.

Mr. PAUL. One of the comments that we went through tonight was an opinion by one of the attorneys in the Bush administration. They said, basically, that there were authorities that they were given that were inherent to the President and that Congress has no ability—I guess I would be interested, in the form of a question, if the Senator can answer whether he believes there are article II powers of surveillance of American citizens that Congress has no business questioning?

Mr. WYDEN. My colleague is—and I remember those days well—basically summing up the argument of the Bush administration. I and others pushed back very hard, because I thought it would essentially, if taken to this kind of logical analysis, basically strip the legislative branch of its ability to do vigorous oversight.

So my colleague has summed up what was the position of the Bush Administration. But like so many other positions that were taken during that period of time, once there was an opportunity to make sure people understood how sweeping it was—what my colleague has described is an extraordinary expansion of executive branch power. It would be this kind of information in a timely kind of fashion. Well, what we have seen, with respect to bulk phone record collection, is that this has been a program that has not been about timely access to relevant information.

Experts with national security clearances—we talked about those individuals this afternoon, this evening, would be significant concerns with respect to ensuring the liberties of the American people are protected without compromising our safety. They said, basically, that there were authorities that they were given that were inherent to the President and that Congress has no ability—I guess I would be interested, in the form of a question, if the Senator can answer whether he believes there are article II powers of surveil-
though, had been that it would go to the Supreme Court. My understanding is it has been remanded to a lower court. I think one of the things that we really need is that we need a ruling that updates Maryland v. Smith. We need a ruling that talks about the fact that those records can no longer be held in a virtual fashion. I think there needs to be a ruling that comes from the Court that acknowledges that you still retain a privacy interest in your records, even when they are being held outside the house—and whether or not the Fourth Amendment protects those. You often have advocates from the government who say that the fourth amendment does not apply to any records once they are outside your house or in other hands. I really think that you do not give up your privacy interest when you let someone else hold your records, that you still maintain your privacy even though someone else holds these records.

Mr. WYDEN. I think my colleague has made an important point with respect to the Smith case. The Smith case was not made for the digital age. That is a big part of what we have sought to do throughout this debate, is to try to make sure that people really understand the implications in the digital age of what these policies, you know, mean for their privacy.

I see my colleagues are on the floor and I want to give them some time. But since you mentioned this question of the court cases, I think there was really striking language recently by Judge Leon of the U.S. District Court for the District of Columbia to clarify what we have sought to do throughout this debate, is to try to make sure that people really understand the implications in the digital age of what these policies, you know, mean for their privacy.

I see my colleagues are on the floor and I want to give them some time. But since you mentioned this question of the court cases, I think there was really striking language recently by Judge Leon of the U.S. District Court for the District of Columbia to clarify what we have sought to do throughout this debate, is to try to make sure that people really understand the implications in the digital age of what these policies, you know, mean for their privacy.

You have made that point. I want it not to be—in fact, we are certain they will hold their records, that you still maintain a privacy interest in your records, even when they are being held outside the house—and whether or not the Fourth Amendment protects those. You often have advocates from the government who say that the fourth amendment does not apply to any records once they are outside your house or in other hands. That is a big part of what we have sought to do throughout this debate, is to try to make sure that people really understand the implications in the digital age of what these policies, you know, mean for their privacy.

I see my colleagues are on the floor and I want to give them some time. But since you mentioned this question of the court cases, I think there was really striking language recently by Judge Leon of the U.S. District Court for the District of Columbia to clarify what we have sought to do throughout this debate, is to try to make sure that people really understand the implications in the digital age of what these policies, you know, mean for their privacy.

You have made that point. I want it not to be—in fact, we are certain they will hold their records, that you still maintain a privacy interest in your records, even when they are being held outside the house—and whether or not the Fourth Amendment protects those. You often have advocates from the government who say that the fourth amendment does not apply to any records once they are outside your house or in other hands. I really think that you do not give up your privacy interest when you let someone else hold your records, that you still maintain your privacy even though someone else holds these records.

Mr. WYDEN. I think my colleague has made an important point with respect to the Smith case. The Smith case was not made for the digital age. That is a big part of what we have sought to do throughout this debate, is to try to make sure that people really understand the implications in the digital age of what these policies, you know, mean for their privacy.

I see my colleagues are on the floor and I want to give them some time. But since you mentioned this question of the court cases, I think there was really striking language recently by Judge Leon of the U.S. District Court for the District of Columbia to clarify what we have sought to do throughout this debate, is to try to make sure that people really understand the implications in the digital age of what these policies, you know, mean for their privacy.

You have made that point. I really think that you do not give up your privacy interest when you let someone else hold your records, that you still maintain your privacy even though someone else holds these records.
will not be—the same people who work there 1 year from now or 2 years from now or 5 years or 10 years or 15 years from now.

And we know something about human nature, which is that humans, when given power, will sometimes abuse that power. Sometimes they will abuse that power to the detriment of others. Sometimes they will do it for personal financial gain. Sometimes they will do it for political gain. Sometimes they will do it in order to further certain interests. That is exactly why it is so important to put boundaries around the authority of government. That, of course, is what the Constitution is. This is our set of boundaries. This is our fence around government authority. It is there for a reason. It is there to make sure the American people are protected against government.

So, first, the Founding Fathers put in place this structure that explained how government would be by very American law and then it carefully positioned this series of fences around the government to make sure power wasn’t abused against the people.

It is interesting, when the PATRIOT Act was enacted and when it was subsequently reauthorized several years later, Congress put in place a relevance requirement. Congress put in place—in section 215 of the PATRIOT Act—a requirement that the business records that were obtained by the NSA, pursuant to section 215 of the PATRIOT Act, had to be relevant to an investigation, relevant to some things they were doing.

Here again, as with the language of the Fourth Amendment of the Constitution, there is some play in the joints of the term “relevance.” Some things might be relevant in one situation and not another. Whether it is relevant is going to depend on a lot of facts: the circumstances pertaining to the investigation in question, but it stretches the term “relevant” or the concept of relevance beyond its breaking point, beyond any reasonable definition.

If you deem something to be relevant, so long as it might in some future investigation—one that has not yet arisen—become relevant, such that you had to gather every record of every phone call made in America, such that NSA wants to go after every record of every phone call made by every American going back 5 years, storing that series of records in a single database that can be queried for up to 5 years in advance. Let’s just go through this exercise for a minute. Think to yourself, how many phone calls have I made in the last 5 years? How many distinct phone numbers have I called in the last 5 years?

Well, if somebody has called 1,000 phone numbers—or, let’s say, made phone calls to 500 phone numbers and received phone calls from another group of 500 phone numbers, for a total of 1,000 phone numbers over the last 5 years, then that is 1,000 numbers. Then the NSA goes out one hop beyond that and connects each person, each phone number with whom the original person had contact. Let’s assume that each of those phone numbers had, in turn, contacts with other people. You get up to 1 million phone numbers pretty quickly.

But each time the NSA collects these data points, each data point taken in isolation might not say much about any person. But as our friend and our colleague from Oregon noted a few minutes ago, it is by using that combination of data points, by aggregating all of those data points together, someone can tell an awful lot about a person.

In fact, there are researchers who, having used similar metadata and similar sets of metadata in their own databases, have concluded that they can tell what religion a person belongs to, what political affiliation a person belongs to, their degree of religiosity, and their degree of political activity.

They can tell what someone’s hobbies are. They can tell whether they have children, whether they are married. They can tell how healthy they are, what physical ailments they might suffer from. In many instances, they can tell what medications they are on. And all of these things are made more efficient by virtue of the automation in this system.

So while it is true people point out that under section 215 of the PATRIOT Act, under this particular program, the NSA is not listening to telephone conversations. They are not listening to them.

Interestingly enough, this is very often a straw man argument that is thrown out by those who want to make sure that section 215 of the PATRIOT Act is reauthorized without any reforms. They claim that those who are opposed to this type of action are out there falsely claiming that the NSA is listening to phone calls over this program.

Well, that accusation of falsehood is, itself, false. That accusation of falsehood is, itself, a straw man effort. It is a red herring. It is a lie. It is a lie intended to malign and mischaracterize those of us who have genuine, legitimate concerns with this very program, because the fact is we don’t make that argument. The argument we are making is that the NSA doesn’t even need to do that. The NSA can tell all kinds of things about people just by looking at that data.

Because it is automated and because it is within a system that operates with a series of computers, they can tell very quickly it is a lot less human resource-intensive than it would be if they were having to listen to countless hours of phone conversations. It is a lot more efficient. Again, I want to be clear. I have no proof that the NSA is currently abusing this particular program. I am not aware of any evidence that such abuse is occurring. And I am willing to assume, for purposes of this discussion, that the men and women who work at the NSA have nothing but the best interests of the American people and American national security at heart.

But how long will this remain the case? And how safe, how fair is it of us to assume that will always be the case? We can scarcely afford—for the sake of our children, our grandchildren, and the people who will come after us—we cannot afford to simply assume this will always be the case.

We have to remember what happened a few decades ago when Senator Frank Church and his committee looked into wiretap abuses that had happened within the government. We have to remember the Church report that was released at the end of that investigation.

That report concluded that every presidential administration since FDR through Richard Nixon had utilized law enforcement and intelligence-gathering agencies inside the Federal Government to go engage in political espionage. So that technology, which was then only a few decades old, had been whitewashed for a long time. The abuse of this technology had gone, of course, unreported for many decades, but it had nonetheless been occurring.

Again, I don’t know. I can’t prove it. I can’t provide evidence that such abuse is going on right now. But I think all of us, in order to be honest with ourselves, would have to acknowledge that there is at least some risk that if it is not occurring now, at some point it will occur in the future. This temptation is simply too strong for most mortals to resist, particularly in an area such as this where there is, with good reason, very little ability for the outside world to observe what is going on inside the particular government agency.

Now, that is exactly why I happen to support what was passed by the House of Representatives last week. What was passed by the House of Representatives last week in the form of the USA FREEDOM Act was something that would require the NSA to, instead of going out to all the telephone companies and saying, send us all of your records, we want your calling records, just give us your records, we care whether it is relevant to a particular phone call, particular to a specific number that was itself involved in terrorist activity or foreign surveillance activity, we don’t care about that, just tell it to us—far from doing that, what the USA FREEDOM Act would require is for the government to show that they needed records related to a telephone number that was itself involved in some kind of activity. They wouldn’t have the ability to go to all these telephone companies and just say send us everything.

They would instead have the power to get a court order, to get those
records of those phone calls that might well be connected to terrorism based on their contact with a phone number that was related to such activities or their contact with somebody else, with some other phone number that was, in turn, having some kind of communication to someone involved in those activities.

Not all of us agree on this and, Senator Paul, you and I don’t agree on this particular bill, but we do agree on the underlying concern. And we agree that the Senate works best, that the Senate serves the American people well when it lives up to its self-described reputation as being the world’s greatest deliberative legislative body. We would all be better off if we were able to put this bill on the floor right now— if this bill were able to come to the floor and it were subjected to open, honest debate and discussion so the American people could see we were debating this and so that you, Senator Paul, and our other colleagues who have ideas as to how we could make this legislation better would have the opportunity to introduce, in the form of an amendment, improvements to this legislation.

I hope you'll quite artificulately just a few hours ago some very thoughtful reforms, some very well-thought-through improvements, amendments that you would make to this legislation. I think we would all be better off if we took that kind of approach.

Now, we have seen in the last few months what can happen. When we came back in January, we saw that the desks in the Senate Chamber had been rearranged. Many of us were pleased. We didn’t shed a tear at the realignment of the desks, and we have noticed that this realignment of the desks reflected a change in the political attitude among Americans. But, more importantly for us, it was the precursor to some very positive developments in the Senate.

We saw that within just a few weeks after this shift in power had occurred, we had cast more votes on the floor of the Senate than we had in the entire previous year. Within a few months, we had cast more votes on the floor of the Senate than we had cast in the 2 years previous to that. That was a good sign.

This is a good sign. It is not just because we had cast more votes, but because those votes represent something—they represent the fact that we are actually debating and discussing and we are allowing each Senator to have his or her views heard. We are putting ourselves on record as to what we believe represents good policy and what does not.

I think we would be in a much better position to address the national security needs of our great country if we had such an opportunity with respect to this legislation. That is one of the reasons I came to the floor yesterday, along with one of our colleagues, the senior Senator from Vermont, and asked unanimous consent to bring this bill—the House-passed USA FREEDOM Act, H.R. 2048—to the floor and to have open debate and discussion and an open amendment process, with the understanding we would turn back to the trade promotion authority bill as soon as the Senate was ready, and after this legislation, as soon as we had finished debating and discussing it, voting on amendments and voting on the legislation,

I am a big believer in free trade. I like free trade. I think free trade is good. I would like to see us get to both of these pieces of legislation. But importantly, H.R. 2048 is a piece of legislation that has kind of a fuse attached to it. Section 215 of the PATRIOT Act is set to expire at the end of this month, and many of us believe we ought to at least have a debate and discussion before that happens, a debate and discussion about what, if anything, would take its place, about whether we need it and where it needs to fit in, if so, what that might look like. So that is why we made this request. This request we regarded as a very reasonable one was, unfortunately, one that drew an objection, so we were not able to bring it to the floor.

The U.S. Court of Appeals for the Second Circuit, based in New York, recently addressed this issue of whether section 215 of the PATRIOT Act can appropriately be read to authorize the NSA to collect ‘metadata’ and a metadata collection program. The U.S. Court of Appeals for the Second Circuit answered that question in the negative and concluded there is no statutory authority for the NSA to collect this type of metadata. It doesn’t have the authority. It cannot collect bulk metadata on this basis.

As the Second Circuit concluded, the business records sought under that provision have to be relevant. There has to be some kind of restriction that makes it clear that what the NSA is investigating. And of course their only relevance here, under this program, is that they exist; it is that they represent phone calls made by someone in the United States, that they were made under a telephone network in the United States. That can’t be the answer. That cannot reflect a proper understanding of this concept of relevance that is in section 215 of the PATRIOT Act. It can’t, and it doesn’t.

This court ruling is one of the many reasons why we are having this debate and why we shouldn’t be willing to simply reauthorize section 215 of the PATRIOT Act with the understanding that the NSA will continue operating this program as if we reauthorize it. NSA is one of the reasons why I have been so insistent on having this discussion and so unwilling to support even a shorter term reauthorization of the PATRIOT Act—because they are interpreting section 215 in the PATRIOT Act they present an alarming point.

We have to remember that the Constitution is worth protecting. It is worth protecting even when we can’t point to anything bad that is happening right now, even when we can’t point to any specific abuse that is occurring.

Bulk data collection is itself a type of abuse. There is a type of constitutional injury even where we can’t identify anything secondary from that. We can’t point to any horrible secondary effect from it; it is in and of itself wrong.

The wrongness of this program can be illustrated when we take to its logical conclusion the very arguments presented by the NSA for this type of activity. Let me explain. The metadata that is collected by the NSA right now relates exclusively to telephone calls. The records they collect involve records of who you call, when you called them, who calls you, when they called you, and how long the phone call at issue lasted. That is it.

But if the NSA is correct in its interpretation of section 215 for this metadata, not only would they be able to collect all kinds of other records of conversations, metadata regarding emails you have either sent or received, who you sent them to and who you received them from, your Internet traffic, where you have purchased online, who has purchased something from you online, all kinds of things. From that metadata, they could clearly paint a much more vivid picture of you, a profile built as a mosaic from a billion data points. They can tell everything about you from that type of metadata.

Sure, the NSA is not collecting that type of metadata right now. They are not doing it right now. But if we reauthorize this without limitation, if we reauthorize section 215 of the PATRIOT Act and we impose any kind of restriction on it, there is absolutely no reason why the NSA couldn’t conclude tomorrow or next week or a year from now or later that it wants to collect this kind of data as well. I would suspect nearly all Americans would be shocked and horrified to think the NSA could and would and might at some point in the future collect that kind of information on where you shop online, your credit card bills, your hotel reservations, like that, things that could easily be connected back to an individual and easily give rise to abuse either for partisan political purposes or for some other nefarious purpose.

I also want to point out that those who are in favor of this program and those who vigorously defend its constitutionality routinely rely on a decision rendered by the Supreme Court in the late 1970s in a case called Smith v. Maryland. They point out that in that Maryland the Supreme Court upheld the constitutionality of some police activity that involved the collection of calling data. The Supreme Court
Court concluded in that case that there was not a sufficiently significant expectation of privacy in records of calls that somebody had made and received such that the collection of that data would require a search warrant.

I am not altogether certain that Smith v. Maryland was decided correctly, but let’s assume for a minute that it was decided correctly and just address the fact that it is a decision that remains. It is precedent that is followed throughout the courts of the United States. That is fine. Let’s just accept the fact that it is on the books. But it is very, very different—not just quantitatively different but also qualitatively different—when you are dealing with a single criminal investigation and not just with maybe a few weeks of calling records but when you are dealing with 5 years of calling records not on one person, of one target in one criminal investigation by one group of law enforcement officers, but 300 million people stretched out over 5 years.

That calling data becomes more significant, moreover, when Americans become more attached to their telephones when their telephones aren’t something that is just plugged into the wall but something that is carried with them every moment of every day. This, by the way, adds to the potential list of metadata that would be collected because of course many people now have telephones that track their location. I don’t see any reason why, based on the interpretation of section 215 of the PATRIOT Act and the interpretation of the Fourth Amendment, that the NSA has put forward, they couldn’t start collecting the location data as well, which would further undermine privacy issues.

So Smith v. Maryland, whether you like it or not, is precedent. It is precedent that is followed by the courts in America, but it is not the end of the story. It certainly doesn’t get you over the hump when it comes to this type of collection. Saying that what was considered by the courts in Maryland is the same thing as what the NSA is trying to do here is a little bit like comparing a pony ride to a ride to the Moon and back. They both involve some form of transportation, but they are worlds apart, drastically different, and so much so that they can’t really even be compared.

Our technology has changed dramatically over the years—so much so that if we don’t stop and think about it, we might not even recognize it.

A few years ago when my son James was about 10 years old, he came up with a really good idea that he announced to us. He said: You know, I have been thinking about it, and I am going to invent something.

We said: What is that?

He said: Well, I am going to invent a telephone that is attached to the wall. It will be attached to the wall so it can’t be removed. It will have a wire that runs into the wall, and that is how the telephone will work.

We looked at him and wondered what gave him this idea and what gave him the idea that that was somehow unique.

We said: Well, first of all, what makes you think that hasn’t already been invented? And secondly, why would you want to do that?

He said: Well, I think it is a great idea because it is the only way you wouldn’t lose your phone.

Only then did we realize what he was saying. Only then did we realize that what he was telling us was that during his lifetime, he had never seen in our home a phone that was attached to the wall. He had seen cell phones and he had seen cordless landline phones, and he had seen telephones get lost from time to time.

So our technology does change, and as our technology changes, we have to take that into account. Well, our technology has changed now to the point where we can now collect all kinds of personal facts about us through metadata, through the type of metadata involved here, and it is only getting more and more this way every single day as we transact more and more of our day-to-day business over the telephones. The telephones become more sophisticated, more portable, and more capable of processing more and more data.

The text of the Fourth Amendment I quoted just a few minutes ago is still very relevant today. The fact that the Fourth Amendment refers specifically to the right of the people to be secure in their persons, their houses, and their papers and effects is still relevant today and should remind us of the fact that our persons, our houses, and our papers and effects more and more really become a part of this—they really become a part of our telephones.

Our papers are not always physical papers. More and more, they are not. Increasingly, they are electronic documents that previously would have been physically signed on a hard copy, a stack of papers—increasingly you can do business transactions without ever handling a physical paper. Increasingly, you can do those things electronically. People often prefer to do that way. It saves time. It saves money. But as more and more of our lives are played out on these portable digital devices, it becomes more and more important for us to be remember that the Fourth Amendment ramifications when the government wants to get involved in what we do on those same devices.

That is why it is not really fair any more to simply rely reflexively on Smith v. Maryland to say this is all constitutional, nor is it fair to say that your phone company already has this record, so there is no reason why the government shouldn’t have it. I actually don’t even see that comparison.

Some people think this is somehow persuasive. I don’t find it persuasive at all. There is a world of difference between allowing a private business with which you have voluntarily chosen to interact to have your business records, particularly when it is a private business that you want to have that information so that private business can keep track of how much you owe them or how much they owe you—there is a world of difference between a private business entity having those records and the government having those records.

The worst thing that a private business can do is perhaps send you too many annoying emails that you don’t want asking you for more business or maybe it can give some of your personal data to somebody else who will in turn make phone calls you don’t want to receive or send you emails you don’t want to receive.

That private business has no ability to put you in prison. That private business has no ability to levy taxes on you. That private business has no ability to make your life a living hell in the same way that your government has the ability to do those things—not just the ability but, lately, with increasing frequency, with strong and seemingly irresistible inclination.

This is not a victimless offense against the spirit of the way that your government is following the letter of the Constitution. These kinds of things have real-world ramifications. They ought to be troubling to all of us, and we ought to want to do something about them.

For these reasons, Senator Paul, I would ask you, don’t you think it would be much better to put this bill on the floor now and allow for an open amendment process, one in which you and each of our other colleagues could have an opportunity to provide input, to try to improve the legislation, and to try to do something meaningful with this legislation, rather than just simply ignore it, pretend it didn’t exist, sweep it under the rug or wait until we are up against a critical cliff between when the Senate, much to my chagrin and the chagrin of many of our colleagues, is set to adjourn and leading up to the moments when this program is set to expire? Wouldn’t we be better off to take this up and debate this under the light of day, under the view of the American people?

Mr. Paul. I think the Senator from Utah asked a great question, and I think he framed the debate over the Fourth Amendment very well.

I think if we asked to put the bill on the floor at this hour, we may not be able to find anybody awake to ask permission to have the bill tonight. We haven’t been able to locate anyone to get the bill this evening, so I am afraid we will have to say no.

But we have been asking for a full and open debate. Your solution, as well as mine, as well as Wyden’s, as well as other’s, is to have a full debate on the floor for this measure between a private and the government having those records.

There were a couple of things you said that I thought were particularly worth commenting on.
People say that because there is no evidence that the program is being abused, there is no evidence that we are searching the records of certain people of certain race or religion or abusing people for some reason, that is proof somehow that no abuse is occurring.

But I agree with you that the collection alone is an abuse in and of itself. To me, the basic point and the biggest part of the point is that what we are dealing with is something that is a genuine abuse of the Fourth Amendment. There is nothing specific about collecting all of the records from all Americans all of the time. There is nothing specific about the name “Verizon.” I tell people that I don’t know anybody named Mr. Verizon. So that can’t be a specific individualized warrant. That is a general warrant. That is what we fought the Revolution over—to individualize warrants, to individualize what we were requesting, and, I believe, to win.

We accepted a lower standard to go after foreigners, to go after terrorists. And part of me says that maybe we could do that just for terrorists. But now we are using it for domestic crime. One of the biggest things I would like to change is that nothing within the PATRIOT Act or any of this could be used to convict somebody in a domestic court.

Section 213–sneak-and-peak—99.5 percent of the time is used for domestic drug crime now. We have the NSA sharing data that is supposed to be collected on foreigners with the domestic DEA and then making up another scenario where they might have heard about this. But they didn’t really hear about this from the NSA.

I think the public at large thinks we have gone way too far—way too far with the bulk collection records. It is not only what we have done, but it is just an absolute—everything in the PATRIOT Act, which I object to—no justification for collecting the records. The idea that records could be relevant to an investigation that has not yet occurred puts logic on its head, puts its topsy-turvy to where words don’t mean anything.

I am very concerned that there is a lot of surveillance that we don’t know about, not only through the PATRIOT Act justification but through Executive order. It concerns me that there are still people who are arguing that article II gives unlimited authority to the President, that there is no congressional check and balance to the President with regard to surveillance. There are people making that argument—that there is no limitation to Presidential power.

I think one of the best things our Founding Fathers gave us was this check and balance so we had coequal branches. I think it is a great thing with the Fourth Amendment that a warrant had to be signed by somebody who wasn’t a policeman, who wasn’t a soldier. This is one of the additional things I would like to do because we don’t get to talk about this very much. We have the ability, and we are talking about the bulk collection of records, but we should also talk about whether we should have hundreds of thousands of people playing cops by FBI agents. I think warrants should have a check and balance where you have a judge.

There is something that is so civilizing and something that levels the playing field and keeps abuse from happening when a policeman tonight in DC, in front of a house, who wants to go in, is calling someone who is not in hot pursuit and who hasn’t just had a physical altercation with the people they are chasing—somebody who is dispassionate and unconnected to the heat of the crime—who is going to give permission for this policeman to go into a house.

We say that a man’s house is his castle, and he can defend it. That was the whole idea—that things within the castle were the man’s or woman’s, we would say now. But it is not only that your records are in the castle anymore. They are in the cloud. And records are virtual. We no longer have the households that have no paper records.

The amazing thing about records is they are now saying that with metadata records, they can discover more than we could have discovered in a lifetime of our personal letters in your house, because so much information is there, so much can be connected between the dots between all of these things.

I am still not convinced that we aren’t collecting data on credit cards, on emails. I think some of this is done through the Executive order that most of us are not privy to. The only people that know anything about Executive Order 12333 and what they are doing on it are the Intelligence Committee. I am not convinced we aren’t collecting email data.

They currently say that your email—is this the bill you promoted—after 6 months, your email has no protection. Before 6 months, I think the only protection is to the content, not to the header, not to the addressee.

We currently have the opinion. We desperately need the Supreme Court to rule on this. We have the Smith v. Maryland decision, which was in the premodern age, as far as data goes and as far as your papers being held. We desperately need a decision.

My hope was that the appellate court decision would go to the Supreme Court. But my understanding—being just a doctor—looking at the other way. It has been remanded lower and may never make it to the Supreme Court. I don’t know that. But I think we do need something at the Supreme Court level.

There have been many who are now arguing that the appellate court—this again from a physician, not a lawyer—is really binding and that there could eventually be some legal injunction against what the government is doing.

But for goodness sake, it perplexes me that the President says: Oh, yes, we need a balanced approach, and I am listening to my privacy commission. I am listening to the review board. Yet I create a program outside of what the President says is an Executive order, and I am unwilling to stop it even though the appellate court has told me it is illegal.

He is unwilling to stop it. I think that sort of defines disingenuous—that he is going to stop it as soon as Congress stops it.

It is so hard to get anything done here. We have had vast majorities—not only for the USA Freedom Act but for Thomas Massay’s act. We had a vast majority over there to defund it—for Justin Amash, for defunding things that we were doing—big majorities. It is another evidence that the Senate is further distanced from the people, that the House is closer. They are hearing the message stronger.

I think the message is a strong one, and the message is really—I mean, really, the vast majority of Americans are very unhappy with having all of their records collected. That really to me gets back to the whole idea of whether we should accept or validate general warrants. It is still part of my concern, a little bit, with the reform. I want the reform—it could go a long way if we no longer have the ability to put the word “corporate” in there and if it were specifically individuals. And I think we have a chance to go maybe even a little further than we have gone in the reform that is being offered to say that we shouldn’t be able to request all of the records from a corporation, because there is some retained privacy and there is some retained property interest even in your records. And I think there always has been.

They talk about an expectation of privacy. I would think that if you have a contract, when you sign the agreement, you are agreeing to a privacy contract with an Internet provider or a search provider or a telephone company. I think that is indicating, as they talk about in the cases, an expectation of privacy. Well, I have signed an agreement with the company, and they promised me and I promised them. I would think that for certain is an expectation of privacy in the eyes of the court.

(Mr. RUBIO assumed the Chair.)

So I don’t understand how they can argue we have completely given up our rights and that we can only at all retain an interest in our records.

I am very much convinced this is an important debate—that the Bill of Rights is something that we shouldn’t look at lightly; that we should, as we get forward, make sure we protect the things that are important. We shouldn’t hurry up and have deadlines, and then say we are not going to have time to debate it.
I see the Senator from Texas, who is also a defender of the Fourth Amendment, is here, and I would be happy to take a question without losing the floor.

Mr. CRUZ. I thank the Senator from Kentucky. I want to note that because I agree on a great many issues, although we don’t agree entirely on this issue. But I want to take the opportunity to thank the Senator from Kentucky for his passionate defense of liberties. His is a voice this body needs to listen to. I would note that the Senator from Kentucky’s voice have altered the debate in this Chamber and have helped reframe the Congress and the American people on the critical importance of defending our liberty.

I think protecting the Bill of Rights is a fundamental responsibility of the Federal Government. And it is breaking that over the last 6 years we have seen a Federal Government that not only fails to protect the Bill of Rights but that routinely violates the constitutional liberties of American citizens and routinely violates the Bill of Rights.

I listened to the learned remarks and questions from the Senator from Utah, where he noted that under the justifications for the current bulk collection of metadata, it is the position of the Federal Government that they have the full constitutional authority not only to collect metadata but to collect the positional location of every American. If any of us carry our cell phone, wherever we go, it is the position of the Obama administration that the Federal Government has the full constitutional authority to track the location of every American citizen no matter where we are. That is a breathtaking assertion of power.

I would note that we do not merely need to speculate that that is the Obama administration’s position. Indeed, in a recent case before the U.S. Supreme Court, the Obama administration argues that law enforcement could place a GPS locator on the automobile of any and every law-abiding citizen in this country and track the location of your automobile and my automobile with no probable cause, no articulable suspicion, no nothing.

The Obama administration argued that the Fourth Amendment and the Bill of Rights say nothing about the Federal Government placing a GPS locator on the automobile of private law-abiding citizens.

Thankfully, the U.S. Supreme Court rejected that position. It did not reject that position 5 to 4 or 6 to 3 or 7 to 2; the U.S. Supreme Court rejected that radical antiprivacy position of the Obama administration unanimously 9 to 0.

I am entirely in agreement with my friend the Senator from Utah that the right resolution of the issue before this body is for the U.S. Senate to pass the USA FREEDOM Act. I am an original sponsor of that bipartisan legislation.

The USA FREEDOM Act does two things: No. 1, it ends the Federal Government’s bulk collection of phone metadata for law-abiding citizens. I am entirely in agreement with my friend, the Senator from Kentucky, that the Federal Government should not be collecting the data of millions of law-abiding citizens with no evidentiary basis to do so. I would end this program, and the USA FREEDOM Act does that.

At the same time, the USA FREEDOM Act maintains the tools to target terrorists. We are living in a dangerous world with the rise of ISIS and Al Shabaab and Boko Haram, not to mention Al Qaeda and radical Islamic terrorism across the globe. The threat to the American homeland has never been greater.

It is critical that law enforcement and national security maintain the tools so that if there is a credible basis to believe that a particular individual is planning a terrorist attack, we can intercept these communications and we can prevent that terrorist attack before, God forbid, they murder innocent Americans in the homeland. Those critical words there are “particular individual.”

What the Fourth Amendment envisions is not that law enforcement’s hands are tied; law enforcement has tools to stop crimes. But as my friend the Senator from Kentucky has so powerfully observed, the Fourth Amendment was designed to prevent general warrants. It was designed to prevent the government from assuming that everyone in the country is automatically guilty and we will seize your information. Rather, the tools of law enforcement and national security should be particularized based on the facts of the evidence.

That is why I support the USA FREEDOM Act because it accomplishes protective goals of our privacy rights and the Bill of Rights of law-abiding citizens, but it ensures we have the tools to prevent acts of terrorists. I would note two points that are important. There are a number of Members of this body, including a number of Members of my party and the party of this Senator from Kentucky, who argue that the PATRIOT Act should be reauthorized with no changes, and they argue to do so would jeopardize our national security.

There are two facts that are critical to assessing whether to support to this argument. No. 1, the Members of this body have received confidential classified briefing briefings, the most classified briefings of this administration. We are not at liberty to convey the specific details of those briefings. But the Members of this body have been told, No. 1, the USA FREEDOM Act would provide effective tools so that we can prevent acts of terrorists.

Indeed, they have gone further to say that it is entirely possible that under the USA FREEDOM Act, the national security team would have more effective tools to stop actual terrorists than they do today under the bulk metadata collection of law-abiding citizens. That is worth underscoring. The national security professionals in this body have said the USA FREEDOM Act could well be more effective in providing the tools to stop terrorists than the current status quo. That argument needs to sit in for everyone arguing that we have to maintain the status quo to end this program. As we have been told, that the USA FREEDOM Act could be more effective, that argument suddenly falls to the ground.

Secondly, I address my friends in the Republican Party who have preferred to reauthorize the PATRIOT Act. Even if that is their preference, it is abundantly, abundantly clear that a clean reauthorization to the PATRIOT Act “ain’t” passing this body and it certainly “ain’t” passing the House of Representatives. I would note that the USA FREEDOM Act passed the House of Representatives 338 to 88. It was not a narrow victory. It was overwhelming. So even if Members of this body would prefer to reauthorize the PATRIOT Act in its entirety, the votes “ain’t” there.

So the choice they face is letting it expire altogether, losing the tools we have to prevent real terrorists from carrying out acts of terrorism or accepting a commonsense middle ground that to a popularly reauthorized USA FREEDOM Act in its entirety, the votes “ain’t” there.

I will say this: With my friend the Senator from Kentucky, I entirely agree that he is fully entitled to introduce his amendments to this bill. This body should engage in a full and open debate considering amendments, and the Senator from Kentucky should be able to propose reasonable commonsense improvements to the USA FREEDOM Act.

We ought to debate them on the merits in a full and open process. There was a time not too long ago when this body was called the world’s greatest deliberative body. Debate is what we are supposed to do on the merits.

If the defenders of the PATRIOT Act right now are so confident of their position, they should be prepared to debate the Senator from Kentucky on the floor to debate each of the Members of this body on the merits, and to arrive at the right policy that both protects our constitutional rights and ensures we have all the tools we need to protect the safety of American citizens against acts of terrorism and maintain the tools to target the bad guys.

I will say this: With my friend the Senator from Kentucky, I entirely agree that he is fully entitled to introduce his amendments to this bill. This body should engage in a full and open process. There was a time not too long ago when this body was called the world’s greatest deliberative body. Debate is what we are supposed to do on the merits.

I will note standing here with the Senator from Kentucky and with the Senator from Utah at 11:40 p.m., I am reminded of the movie “The Blues Brothers” saying: Jake, we have got to get the band back together again. I am 0% defrocked of preparing to stand here with this same band of brothers in the wee hours of the morning. I will make a couple of final observations in
that not too long ago I was sitting in the little water. That was advice he authored to follow. It was good advice, and I am glad to see my friend is following it as well.

This is an exceptionally important issue that this body should be focused on. The responsibility to protect the Bill of Rights and the constitutional rights of every American. Mr. PAUL. I want to thank the Senator from Texas for joining in the battle to defend the Bill of Rights and the Fourth Amendment. I know he is sincere in that approach. There is absolutely no excuse not to debate this and no excuse not to vote on a sufficient amount of amendments, to try to make this better, to try to make the bulk collection of records go away. That is what the American people want. It is what the Constitution demands. It is what the Bill of Rights does.

The question I would ask my friend Senator from Kentucky is, is there any excuse for this body not taking seriously our obligation to protect the Bill of Rights and the constitutional rights of every American?

Mr. PAUL. I want to thank the Senator from Texas for joining in the battle to defend the Bill of Rights and the Fourth Amendment. I know he is sincere in that approach. The question I would ask my friend Senator from Kentucky is, is there any excuse for this body not taking seriously our obligation to protect the Bill of Rights and the constitutional rights of every American?
I thank my staff for their help in a long day, and I thank the American people for considering the arguments and for helping us to hopefully push this toward the reform where we all respect the Fourth Amendment and the Bill of Rights once again. I thank the Presiding Officer, and I relinquish the floor. I suggest the absence of a quorum.

Mr. President, I ask unanimous consent that the Senate proceed to a period of morning business, with Senators permitted to speak for up to 10 minutes each. Without objection, it is so ordered.

Mr. Cassidy. Mr. President, I ask unanimous consent that the Senate proceed to a period of morning business, with Senators permitted to speak for up to 10 minutes each. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I want to speak briefly about a recent decision of the Government of Colombia to end the aerial fumigation of coca.

Since the beginning of Plan Colombia 15 years ago, the United States, at huge cost, has financed a fleet of aircraft, fuel, herbicide, and pilots to spray coca fields in Colombia. When this first began we were told that in 5 years the spraying, along with billions of dollars in U.S. military and other aid, would cut by half the flow of cocaine coming to the United States.

Fifteen years later, that goal remains elusive. While the cultivation of coca has been reduced, aerial fumigation is not the solution to this problem. It is prohibitively expensive and unsustainable by the Government of Colombia. It also defies common sense. One Colombian official told me the cost of aerial fumigation is approximately $7,000 per hectare, while the cost to purchase the coca produced in one hectare is $400. In other words, for one-fifteenth the cost of aerial fumigation you could buy the coca and burn it.

The process also ignores the reality of rural Colombia where most coca farmers are impoverished and have no comparable means of earning income. Absent viable economic alternatives they resort to the dangerous business of growing coca, often at the behest of the FARC rebels or other armed groups.

The active ingredient in the herbicide used in the fumigation is glyphosate, a common weed killer. It is used by farmers and gardeners in the United States and other countries, including Colombia.

But controversy has plagued the aerial fumigation since its inception. It is no surprise that Monsanto, which manufactures the chemical, insists that glyphosate poses no threat to humans. But some Colombian farmers, whose homes are often located next to their fields, have claimed that they or their children suffered skin rashes, difficulty breathing, and other health problems after their property was sprayed. Others have complained that the herbicide has drifted into and destroyed licit food crops.

Scientists have studied glyphosate for many years and have differed about its safety. Some studies have concluded it is harmless. The Environmental Protection Agency says it has “low acute toxicity.” Others have linked it to birth deformities in amphibians. Most recently, the International Agency for Research on Cancer, IARC, an affiliate of the World Health Organization, reported that glyphosate is “probably carcinogenic to humans,” and that there is “limited evidence” that it can cause non-Hodgkin’s lymphoma and lung cancer.

I have been concerned for years about aerial fumigation in Colombia. While I am no scientist, I have wondered how the people of my State would react to the spray of a chemical herbicide in areas where they live, grow food, and raise animals. I have also noted the conflicting views in the scientific literature, and we are all aware of instances when manufacturers insisted on a product was safe only to discover years later—too late for some—who were exposed—that it was not. And, of course, there have been times when companies knew of the risk and chose to either ignore it or cover it up, motivated by profit over the welfare of the public.

It is for these reasons that I have included a provision in the annual Department of State and foreign operations appropriations bill that requires the Secretary of State to certify that glyphosate is “probably carcinogenic” to humans, including pregnant women and children, or the environment, including endemic species.” Each year, the Secretary has made the certification.

The IARC study changes things. Although glyphosate remains controversial and Monsanto points out that the IARC study is not based on new field research, President Santos has responded in a responsible way unless further research definitively contradicts it. It would simply be unconscionable for the Government of Colombia to ignore a study by the World Health Organization that a chemical sprayed over inhabited areas is potentially carcinogenic.

I commend President Santos for this decision. I am sure it was not an easy one, as it will inevitably be blamed for increases in coca cultivation. But anyone who thinks that spraying chemicals in the air is a solution to the illegal drug trade is deluding themselves. It is enormously expensive and not something U.S. taxpayers can or should pay for indefinitely. It has already gone on for a decade and a half. And it does nothing to counter the economic incentive of coca farmers to support their families.

The Department of State reacted with the following statement:

Any decision about the future of aerial eradication in Colombia is a sovereign decision of the Colombian government, and we will respect that. The United States hopes eradication at the government’s request and our collaboration has always been based on Colombia’s willingness to deploy this useful tool in the fight against narcotics trafficking. We intend to redouble our efforts to use other tools such as enhanced manual eradication; interdiction (both land and maritime); and improved methods to investigate, dismantle, and prosecute criminal organizations, including through anti-money laundering programs. We will also continue our longer-term capacity building programs, especially those related to rule of law institutions, and continue to help Colombia increase its governmental presence in the countryside as we recognize those to be the real keys to permanent change.

That was the right response. President Santos has staked his legacy on negotiations to end the armed conflict in Colombia. After decades of war that have uprooted millions of people and destroyed the lives of countless others, a peace agreement would finally make it possible to address the lawlessness, injustice, and poverty that are at the root of the conflict. The United States should support him.

Mr. LEAHY. Mr. President, it is with great appreciation and a touch of sadness that I note the pending retirement of Michael Schirling, who has served as police chief of the city of Burlington, VT, with great distinction for the last 7 years.

His youthful appearance belies the fact that Chief Schirling has been with the department for more than 25 years, first serving as an auxiliary officer while still attending the University of Vermont.

Chief Schirling has held many titles over these years: patrol officer, detective, investigator, director, commander, deputy chief, and finally chief. In other words, this Burlington native rose through the ranks. And throughout this impressive career, Chief Schirling has always sought a better way to do the job.

Exemplary in his career, he co-founded the Vermont Internet Crimes Against Children Task Force, which recognized the potential for abuse as the Internet came of age. The task force has been critical to the investigation and prosecution of high-technology crimes that target those who are most vulnerable.

After he took reins of the department, Chief Schirling grew concerned that officers were spending too much time on paperwork and data entry, taking precious time away from policing. In response he designed his own dispatch and records management software system. The Valcour system—
named after an island with historical significance on Lake Champlain—was launched in 2011. Not only has it proven more efficient, it has resulted in enormous cost savings for his department and others throughout Vermont that have used it.

But perhaps most important, Chief Schirling has been a leader in understanding the importance of community policing. He stepped up foot patrols around the neighborhoods, stressing the importance of public engagement. He hosted community outreach events, including barbecues and monthly coffee sessions. He developed data-driven policing efforts to track the hot spots for crime. He implemented a street outreach program in coordination with the local mental health agency. The list goes on, but it is fair to say that the work of Chief Schirling will leave its mark on our State’s largest city for many years to come. Chief Schirling recognized the value of 21st century policing long before we heard the term. For these reasons, I have often called on Chief Schirling to share his experiences and ideas in testimony before the Senate Judiciary Committee. His guidance on issues of critical importance, including his support for the Bulletproof Vest Partnership Program, has been invaluable over these years.

Chief Schirling and the Burlington Police Department recently marked the 150th anniversary of the department, and I was grateful to be a part of that celebration. As he prepares for retirement, I have no doubt there is another chapter for Chief Schirling still to be written. I will eagerly await his next move.

LGBT VETERANS MONUMENT AT LINCOLN NATIONAL CEMETERY

Mr. DURBIN. Mr. President, this Memorial Day weekend, as our country remembers and honors those who have served America, a national cemetery in Elwood, IL, will make a distinguished mark on our Nation’s history. Lincoln National Cemetery will become a tribute to the Nation’s first monument honoring fallen Lesbian, Gay, Bisexual, and Transgender, LGBT, veterans.

A recognition of our fallen LGBT service members is long overdue. This monument serves as a testament to those members of our military who have shown devotion to their country in the eyes of discrimination. It is in their memory that we move toward a more just and equal future.

The monument comes nearly 4 years after the repeal of Don’t Ask Don’t Tell. With repeal, our country took a step to move past the prejudices of the past and toward a day when all Americans—civilians in our country with honesty and pride. This monument recognizes that service with a fitting dedication that reads:

Gay, lesbian, bisexual and transgender people have served honorably and admirably in America’s military service. In their memory and appreciation of their selfless service and sacrifice this monument was dedicated.

This monument serves as a reminder to all of us that it is our job to envision and create a more just and equal nation where there are no prerequisites to serve your country. All of our servicemembers join the military to serve America and make a better world. It is our honor that service is making this world a more just and equal future.

COMMEMORATING NORTH CAROLINA’S VETERANS AND SERVICEMEMBERS

Mr. BURR. Mr. President, this Memorial Day weekend is the 56th anniversary of Charlotte Motor Speedway’s annual tribute that brings together more than 110,000 guests to celebrate our military patriots and reflect on their service and sacrifice. This event has remained one of the largest military recognize events on Memorial Day weekend for more than five decades, honoring members of our armed services, veterans, Medal of Honor recipients, and remembering our fallen. This year’s celebration continues their tradition by showcasing military aircraft in a patriotic flyover, infantry and artillery exhibits, ground demonstrations of our Nation’s military strength, and a 21-gun salute to our fallen.

Our servicemembers courageously stand between America and those who would do us harm, volunteering to make the ultimate sacrifice to preserve freedom. I commend all of those in the racing community for their continued support and annual tribute to our men and women in uniform.

RECOGNIZING HOMEFRONT HEROES

Mr. BOOZMAN. Mr. President, May is recognized as National Military Appreciation Month. In addition to a time when we honor the men and women who wear our Nation’s uniform, we must also remember our military families who make tremendous sacrifices.

These husbands and wives support our troops at home, during training missions and deployments. Military spouses are essential to the wellbeing of our service members and the strength of our national defense. We honor them with a special day honoring their role—National Military Spouse Appreciation Day.

Arkansas is home to thousands of military personnel. Their spouses are the homefront heroes who serve our country out of uniform. I asked Arkansans to share the roles their spouses play in their military career. I want to highlight some of the ways Arkansas National Guard spouses support their partners called to service.

MSG Tracy Oates of Hayes and her husband, Cedric, have been married just over 1 year. Master Sergeant Hayes says her husband had no idea what he was getting into when he married a soldier. He has had to deal with the early mornings, late nights, and long weeks of her being away from home all while taking care of their 15-year-old son Ke’cy and making certain he is prepared to school, practices and other events while Master Sergeant Hayes travels out-of-State for training. He also makes sure the family pets are well cared for all while maintaining a traveling choir of over 30 children. Master Sergeant Hayes shared with me:

He makes it look easy. My husband’s support of the past year has made serving a whole lot less stressful. I am very thankful for love and support he has given me. Thank you Cedric for your commitment.

Naomi Howard is familiar with military life as the daughter of CW4 Arthur Troy. The military also paved the way for her love connection to her husband SFC James Howard. The couple met after James attended the Employer Support of the Guard and Reserve, ESGR, briefing given by Naomi upon his return from deployment to Egypt. The couple spent the first 14 months of their marriage apart while James was deployed with the HHC 39th IBCT to Iraq.

In 2004, the couple settled into a routine life in Cabot, AR, with James serving on Active Guard/Reserve duty, and Naomi working as a civilian at the National Guard Bureau Professional Education Center. In 2007, James deployed to Iraq again and was away from home for more than 1 year. James told me:

During this time Naomi did an amazing job raising four young children on her own. Since then, Naomi has continued working at the National Guard Bureau’s Professional Education Center and supporting me in my continued military service. Being in the military requires long hours and time away from home, yet my wife has continued to support me, more than I could have ever imagined.

Not only is she a strong support for her husband and children, but she is doing this all while working and attending college as a full-time student. She was named to the Central Baptist College President’s List for Fall 2014 for maintaining a 4.0 GPA. “She juggles more than I could ever imagine and she excels at doing so,” James said.

Wanda Thomen has been married for 28 years to Deputy Commander CPT Randy Thomen of the National Guard and is a mother of two children, Myranda and Phelan. Wanda served as an active duty airman and was honorably discharged in March 1998. Her prior service experience helps her to understand better those, as a service member, her role as a spouse. She previously served as president of the Auxiliary of the National Guard Association of Arkansas whose motto is “The Other Half.” She also worked as the 39th Infantry Brigade Family Readiness Support assistant. She has been active during deployments, injuries, illness, and everyday activities as her husband continues his military career and
Wanda continues to give back to the troops and their families.

Thank you to Cedric, Naomi, Wanda, and all of our military spouses for your support at home while your loved one is away defending our Nation. We thank you for your dedication and commitment to our Armed Forces, your family and extended military family.

HONORING WEST VIRGINIA VETERANS

Mrs. CAPITO. Mr. President, I wish to welcome some of West Virginia’s most outstanding citizens to Washington. This week, as part of the fifth annual Always Free Honor Flight Program, we will recognize veterans from my home State for their dedicated commitment to our country. In light of West Virginia’s proud tradition of military service, it gives me great pleasure to honor men and women who answered the call of duty during America’s hour of need.

Since its inception, the Always Free Honor Flight Program has taken up the important task of thanking those to whom we owe our deepest gratitude. As the daughter of a World War II veteran, this is something very near and dear to my heart. This year, we are joined by 29 Vietnam, Korea and World War II veterans from all across southern West Virginia.

These brave patriots sacrificed the comforts of home to defend the cause of freedom in a foreign land. The perseverance of our soldiers during these conflicts cannot be overstated. These individuals embody the extraordinary sacrifice exhibited by our service men and women throughout the greatest conflicts of the 20th century.

One veteran on this year’s trip, SGT John M. Watson, Jr., who served with the renowned Tuskegee Airmen, will be honored with the Congressional Gold Medal for his service during World War II.

In addition to Sergeant Watson, West Virginia veterans participating in this year’s Always Free Honor Flight Program include Joseph F. Graham, Bluefield, WWII; Staff Sergeant Robert Graham, Hinton, Vietnam and Korean war; First Sergeant Melvin L. Grubb, Bluefield, WWII and Korean war; Staff Sergeant Robert G. Kushner, Charleston, Korean war; Airman First Class Herbert R. Dickerson, Beckley, Korean war; Corporal Billy G. Cooper, Milton, Korean war; Corporal James W. Bennett, Charleston, Korean war; Richard L. Graham, Beckley Korean war; Petty Officer Second Class William B. Sowers, Princeton, Korean war; Petty Officer Third Class Charles E. Turley, Scott Depot, Korean war; Colonel Jack E. Fincham, Brenton, Vietnam war; Sergeant Philip Templeton, Milton, Vietnam war; Petty Officer Second Class John W. Fleming, Princeton, Vietnam war; Master Sergeant Edward F. Simmons, Bluefield, Vietnam war; Airman Second Class Nancy J. Simmons, Bluefield, Vietnam war; Sergeant Fred R. Smith, Hurricane, Vietnam war; Sergeant Marshall G. Mann, Princeton, Vietnam war; Sergeant James R. Bond, Midway, Vietnam war; Senior Airman Allan D. Harbour, Princeton, Vietnam war; Sergeant First Class Andrew J. Thomas, Bluefield, Vietnam war; Captain Charles H. Mann, Athens, Vietnam war; Seaman Thomas E. Caruso, Lashmeet, Vietnam war; Sergeant Gordon L. Caldwell, Jr., Bluefield, Vietnam war; Lance Corporal Robert L. Beckley, Vietnam war; Senior Airman Mary Byrd, Nitro, Vietnam war; Corporal Johnny L. Sanson, Cyclone, Vietnam war; Sergeant Dennis C. Hurley, Cyclone, Vietnam war; Corporal William Cox, Bluefield, Vietnam war; and Corporal William L. Harry, Butler, TN, Korean war.

Veterans participating in the Honor Flight as “guardians” include Command Sergeant Major Kevin L. Harry from Milton; Sergeant First Class Mark A. Harry from St. Albans, and Specialist Selena K. Barker of Milton. These men and women are voluntarily dedicating their time to helping ensure that our veterans receive the thank-you they deserve.

A great debt of gratitude is also owed to Dreama Denver, president of the Denver Foundation and Little Buddy Radio. These nonprofit organizations, which were founded by Dreama and her husband, Bob Denver, established the Always Free Honor Flight Network in West Virginia.

I am so proud of the service and sense of duty that defines the American people. As the beneficiaries of that service, one of the most sacred tasks we hold is properly honoring the dedication of our veterans. In bringing them together with the symbols of their sacrifice, we can express our unyielding gratitude while demonstrating our lasting commitment to preserving their memories and the greatest honors of serving in the United States Senate is representing citizens who have given so much to their country. I take seriously the duty of ensuring that their sacrifice is honored with the same steadfast conviction with which they defended the rights and freedoms of every American. Today, I ask my colleagues to join me in welcoming and thanking these exceptional West Virginia veterans.

RECOGNIZING KAREN LOVE

Mr. PORTMAN. Mr. President, I wish to recognize Karen A. Love upon her retirement from the Department of Defense, DOD, after over 36 years in civil service. Because of her unique expertise, Karen was promoted to the position of Deputy for Legislative Operations in OASD LA, managing congressional committees’ questions and inserts for the FY16 budget, all reporting requirements, and the legislative appeals process for DOD. Karen’s last position with DOD was as the Deputy Director for Operations for the OASD LA, where she was instrumental in the oversight of the office’s role in support of the DOD’s legislative mission and was a critical participant in the legislative affairs consolidation effort directed by the Deputy Secretary of Defense.

During Karen’s distinguished career of over 28 years with DOD, she supported eight Assistant Secretaries of Defense for Legislative Affairs and served under eleven Secretaries of Defense.

I am honored to recognize and thank Karen for her dedicated Federal service to the country and wish her the best as she begins the next chapter of her life.

SOUTH BEND, INDIANA 150TH ANNIVERSARY

Mr. DONNELLY. Mr. President, I wish to honor the city of South Bend on its 150th anniversary and to recognize the many contributions of South Bend’s citizens to the great State of Indiana, to our country and the world.

South Bend’s history stretches back to the 1860s, when the St. Joseph Potawatomi settled along the future St. Joseph River. European settlers established fur trading posts in the early 19th century. Soon after, Father Edward Sorin arrived and founded the University of Notre Dame. Less than a decade later, in 1851, the first train passed through South Bend and development and economic growth soon followed. The town of South Bend became the city of South Bend on May 22, 1865, when it was granted a city charter. The city of South Bend quickly became a manufacturing center and continues to innovate to this day. In 1852, Henry and Clement Studebaker opened the H&C Studebaker blacksmith shop.
After the Studebakers’ younger brothers joined them, they became the Studebaker Brothers Manufacturing Company. Studebaker became the world’s largest wagon and buggy manufacturer and then entered the automotive industry. The company had some famous customers, such as Thomas Edison, who purchased the second Studebaker electric car in 1902. The Studebaker Corporation would go on to bring opportunity and hundreds of jobs to families across northern Indiana.

As business boomed for the Studebaker Corporation, new businesses opened and South Bend grew. In the early 1900s, the Bendix Corporation, Honeywell, the South Bend Toy Company, AlliedSignal, and other well-known companies opened their doors. Like many communities across the country, South Bend changed with the times. Companies, like Studebaker, were forced to close their doors, but the innovative spirit of South Bend carried on. South Bend is taking its manufacturing roots in a new direction, creating a high-tech hub in northern Indiana. Transforming old factory grounds into the high-tech Ignition Park, the city has opened its doors to data centers and turbomachinery research. There are many exciting entrepreneurial efforts that will continue to create jobs and opportunities for South Bend residents.

Today, South Bend is one of the largest cities in Indiana and has a population of more than 100,000 citizens. The city is not only critical to Indiana’s economy but also a top destination for visitors to our State. Top attractions in the South Bend area include Potawatomi Park Zoo, the Studebaker National Museum, South Bend Chocolate Company, and the nearby University of Notre Dame.

A center of world-renowned academic excellence, the University of Notre Dame, from a small school for boys founded by Father Sorin in 1842 to one of the most prestigious universities in the country. With excellent academic and athletic programs, Notre Dame attracts students from around the Nation and about 50 different countries. Important to our South Bend community, the university is the area’s largest employer and an active member of the community. Our community is home to other outstanding higher education institutions, including St. Mary’s College, Holy Cross College and Indiana University at South Bend, which draw the best and brightest students from across the State.

The city of South Bend also has a long history of outstanding public servants. Vice President Schuyler Colfax was a South Bend native, serving as Congressman, then Speaker of the House during the Civil War, and finally as Vice President to Ulysses S. Grant. Former Indiana Governor Joe Kernan once called the city “mayor of the times” to call South Bend home. Former Congressman John Brademas, a South Bend Central graduate, was an active participant in the civil rights movement, working hard to both integrate schools and increase their funding across the entire country.

Today, I also congratulate the current leaders of South Bend: mayor Pete Buttigieg, the member of the South Bend Common Council, and all of the other hardworking city officials for their many contributions to making this “21st Century City” the thriving city it is today.

The city of South Bend reflects our Hoosier values and its citizens serve as an example of how hard work and dedication lead to success, opportunity, and prosperity. I came to South Bend as a student in 1972. I was privileged to have met my wife and raised our family there. And today, we continue to call the South Bend community our home.

It is also a great honor to represent the city of South Bend in the Senate. On behalf of the State of Indiana, I congratulate each and every citizen of South Bend on the city’s 150th anniversary and wish you an equally bright and prosperous future.

### ADDITIONAL STATEMENTS

**HOPKINTON, NEW HAMPSHIRE 250TH ANNIVERSARY**

- **Ms. AYOTTE.** Mr. President, today I honor Hopkinton, NH—a town in Merrimack County that is celebrating the 250th anniversary of its founding. I am proud to join citizens across the Granite State in recognizing this special milestone.

Hopkinton, previously known as New Hopkinton by the original settlers from Hopkinton, MA, was incorporated in 1765 by colonial Governor Benning Wentworth, and included three communities of Hopkinton, Contoocook Village, and Weecoskane Hopkinton. As a centrally located town, Hopkinton gained an influential reputation. Its farms thrived on fertile land fed by local bodies of water and businesses continued to prosper as State leaders and prominent business owners moved to the area to be closer to the center of activity.

As the town’s influence grew, it came to be known as one of the most powerful locations in the State. Coincidentally, the New Hampshire Legislature met in Hopkinton four times during the years of 1798 to 1807. The civic-minded residents of the town later petitioned for Hopkinton to become the State’s capital city, but the neighboring town of Concord eventually won the bid in 1814 and now houses the New Hampshire Legislature.

Hopkinton is home to two historic covered bridges, including the Rowell’s Bridge that was built in 1838 and the Contoocook Railroad Bridge that spans the beautiful Contoocook River and is the only one of its kind in existence. With 1290 acres of protected land, Hopkinton is rich in natural beauty with sprawling forests, numerous hiking and biking trails, as well as access to countless outdoor activities including canoeing, kayaking and cross-country skiing.

The town’s population has grown to over 5,500 residents, but their record of service is indicative of a much larger trend. The people of Hopkinton have a strong commitment to the spirit of community and volunteerism, as evidenced by the hard work and dedication of its residents involved with the planning and celebration of the 100th anniversary of the renowned Hopkinton State Fair this coming September and the town’s special sestercentennial anniversary.

Hopkinton and its residents have greatly contributed to the life and growth of New Hampshire. I ask my colleagues to join me today in extending congratulations to the people of Hopkinton as they celebrate the town’s 250th anniversary.

**TRIBUTE TO DIANE JUERGENSMEYER**

- **Mr. BLUNT.** Mr. President, I wish to honor Diane Juergensmeyer of St. Elizabeth, MO, for her dedication and service to the St. Elizabeth High School, her community, and the entire State of Missouri. From 1980 through 2010, Juergensmeyer coached St. Elizabeth High School’s women’s softball team to 8 state victories, including 358 fall championship wins, while also teaching reading skills, English, speech, and drama in the classroom.

Overall, the St. Elizabeth Lady Hornets won eight conference titles under her leadership, not to mention three Class 1 State championship titles in 1992, 1994, and 2002, and another as an assistant in 2011.

As the daughter of Leonard and Marie Schanzmeyer, Juergensmeyer grew up in a large family on a farm where a fundamental respect for hard work and competition were instilled in her at a young age. She played on St. Elizabeth’s first softball team and has remained a key contributor to the growth of the sport’s popularity as it is seen in Missouri today.

After graduating from St. Elizabeth High School in 1976, she attended Central Missouri University. Shortly after graduating from Central Missouri University, she returned to her local high school to coach, teach, and even drive the bus. Her dedication to her community has remained constant and has remained a force in her efforts to make the St. Elizabeth Lady Hornets the respected softball program that it is today.

In addition to her coaching and teaching careers, Juergensmeyer served on the Missouri Softball Advisory Committee for 8 years and the National Federation Softball rules committee for 4 years. She was also named the 11th District’s Outstanding Missourian in 2004.

Diane Juergensmeyer has played a major role in the success of the Lady
Hornets and the St. Elizabeth community, and her legacy will continue to impact future generations through the foundations she helped put in place, so her induction into the Missouri Sports Hall of Fame comes as no surprise. I congratulate Coach Juergensmeyer on her many successes and wish her the best in her future endeavors.

RECOGNIZING ROD DANIELS

- Mr. CARDIN, Mr. President, I wish to recognize WBAL-TV 11 anchorman Rod Daniels for his career of journalistic service to the residents of the Greater Baltimore area. Mr. Daniels has been a trusted voice on WBAL-TV 11 for more than 30 years, and his steady and colorful reporting has remained consistent and creative throughout that time. On the occasion of his final nightly broadcast, which will occur this Friday, I would like to thank Mr. Daniels both for his service and his dedication to bringing viewers the nightly news with a regular measure of hope.

At the time of his retirement, Mr. Daniels will have distinguished himself as the longest continually serving nightly anchor in the Baltimore media market, no small accomplishment against the backdrop of industry-wide newsroom downsizing that has characterized the media business during much of his career. Mr. Daniels came to Baltimore in 1984 and has been there through tragedies like the 9/11 attacks and all-too-recent riots following the death of Freddie Gray. His exclusive coverage when the Roman Catholic Church elevated Baltimore archbishops to its College of Cardinals rightly garnered national awards. So it was no surprise, then, that Baltimore turned to Mr. Daniels when it was time to host the welcome celebration for Pope John Paul II at Camden Yards, an enormous compliment and honor.

Throughout his career, Mr. Daniels has shown an ongoing commitment to craft, charity, and community. He has spent countless hours speaking to school groups, serving on the boards of organizations like the National Aquarium in Baltimore, and hosting events to battle deadly diseases like cystic fibrosis and cancer. Mr. Daniels even has taken the Polar Bear Plunge into the frigid waters of the Chesapeake Bay to raise more than $5 million in contributions for scholarships and programs, in addition to nearly $3 million of in-kind donations. For her unparalleled commitment to service, generosity, and tireless devotion to the betterment of Montgomery County, she has been recognized with numerous accolades, including Jewish Women International’s Women to Watch Community Leader Award in 2011, the Volunteer Council President’s Award in 2009, the Victims’ Rights Foundation’s Game Changer Award in 2014, and an honorary degree in public service from her alma mater Montgomery College in 2002.

Ms. Newman will be retiring from her position as director of Leadership Montgomery in September, after more than a quarter-century of education and guidance. Her compassionate spirit, inspirational leadership, and unwavering devotion to civic improvement have long inspired the greater Montgomery County community. Many of the people Ms. Newman have touched have taken the lessons that they have learned at Leadership Montgomery into business and government, and through her leadership roles. I ask my colleagues to join me in expressing sincere appreciation and congratulations to Mr. Daniels for his many contributions and accomplishments throughout his distinguished career.

CONGRATULATING ESTHER B. NEWMAN

- Mr. CARDIN. Mr. President, I wish to recognize Esther B. Newman, the founder and chief executive officer of Leadership Montgomery, a not-for-profit community organization dedicated to public service and management training in Montgomery County, MD. Mrs. Newman’s vision of compassionate outreach, effective and inspirational leadership, and community improvement have long nurtured the people of Montgomery County, effecting positive change for nearly 40 years.

Ms. Newman was born and raised in Washington, DC. She began her secondary education while balancing the responsibilities of motherhood. She graduated from Montgomery College, one of Maryland’s premier community colleges, with an associate’s degree in mental health in 1975. She later earned a B.A. in human administration from Antioch University and an M.S. in applied behavioral science from Johns Hopkins University.

The foundations of Ms. Newman’s legendary philanthropy were established shortly after her graduation from Montgomery College when she established the Family Life Center of Montgomery County in 1976, where she served as director until 1979. She then transitioned into work at Olney, MD’s Montgomery General Hospital as a public relations consultant, simultaneously contributing to the local Courier-Gazette newspapers as a community correspondent and serving as an officer on the Upper Montgomery Community Mental Health Center Citizens Advisory Committee.

Throughout the 1980s, Ms. Newman continued to serve in an extensive capacity across Montgomery County, encompassing a diverse portfolio of health care focused outreach, volunteer service, and civic leadership positions. In 1981, Ms. Newman joined the Olney Chamber of Commerce and became a board member in 1984. By 1983, she had moved into a leadership role as the program director of the YMCA of Montgomery County and later joined the Montgomery County Chamber of Commerce, where she held the role of executive director from 1986 through 1988.

As the decade drew to a close, Ms. Newman drew on her years of public service and leadership experience and formulated a curriculum of management training retreats, lectures, and educational guidelines. She worked with the late Larry Pignone of the Century Way and shared Leadership Montgomery in 1989, where she has served as director ever since. The core program of Leadership Montgomery, which incorporates youth, business executive, senior, and emerging leader training modules, is aimed at inspiring the next generation of business and civic leaders in Montgomery County and beyond. Above all, Leadership Montgomery strives to establish a more inclusive management community comprised of people with diverse backgrounds and perspectives.

In the 26 years since its founding, Leadership Montgomery has enriched and educated more than 2,000 graduates. The success of this mission is reflected in the program’s accomplished alumni, with local Board of Education members, Circuit Court judges, members of both the Maryland Senate and House of Delegates, and Montgomery County Councilmembers among them.

Throughout her career in public life, Esther Newman has also helped to raise more than $5 million in contributions for scholarships and programs, in addition to nearly $3 million of in-kind donations. For her unparalleled commitment to service, generosity, and tireless devotion to the betterment of Montgomery County, she has been recognized with numerous accolades, including Jewish Women International’s Women to Watch Community Leader Award in 2011, the Volunteer Council President’s Award in 2009, the Victims’ Rights Foundation’s Game Changer Award in 2014, and an honorary degree in public service from her alma mater Montgomery College in 2002.

Ms. Newman will be retiring from her position as director of Leadership Montgomery in September, after more than a quarter-century of education and guidance. Her compassionate spirit, inspirational leadership, and unwavering devotion to civic improvement have long inspired the greater Montgomery County community. Many of the people Ms. Newman have touched have taken the lessons that they have learned at Leadership Montgomery into business and government, through her leadership roles. I ask my colleagues to join me in wishing her all the best for a restful and fulfilling retirement.

TRIBUTE TO DAVID G. BAKERIAN

- Mr. CARPER. Mr. President, it is with great pleasure that I rise on behalf of the Delaware delegation to honor the service of David G. Bakerian upon his retirement as president, CEO and treasurer of the Delaware Bankers Association. David has dedicated the past 22 years of his life to helping lead the banking industry and keeping it alive and thriving in Delaware for the countless people it employs and serves.

As president of the Delaware Bankers Association, David has been critical to ensuring that a significant part of America’s banking industry—one of Delaware’s top employers—maintained
its home in in the First State and continues to thrive while serving customers in the First State and around the world. Tens of thousands of Delawareans rely on the good jobs that our State’s financial services provide, jobs that help the lives of people who know Dave is known for being honest, and even if someone didn’t always like the answer, they respected him for doing the right thing, not what was easy or expedient. He also is admired for his positive, can-do attitude regardless of the magnitude of the challenges he and the members of the Delaware Bankers Association have faced over the years.

Over more than two decades, David has worked with three Governors and testified before and advised 11 separate Delaware General Assemblies on a variety of banking legislative matters, including credit cards, trust administration, interstate banking and branching, foreclosure mediation, and consumer protection. Prior to his appointment at the Delaware Bankers Association, he led the Delaware Bankers Association in a cooperative venture with the University of Delaware’s Center for Economic Education and Entrepreneurship, the Federal Reserve Bank of Philadelphia, and the Consumer Credit Counseling Services of Delaware and Maryland to form Keys to Financial Success, a high school credit course focused on financial literacy. The program is still offered today in 28 high schools in Delaware with more than 4,200 students participating. In 2011, David was elected to a 1-year chairmanship of the State Association Division of the American Bankers Association. In this role, he became the national spokesperson for the 50 State bankers associations and held a seat on the American Bankers Association board of directors. He is the only Delawarean ever to serve in this national leadership role. His service in that role is a source of pride to our State.

While David is passionate about banking, he actually began his career in education and studied to become a college professor. He possesses a remarkable ability to write clearly and communicate effectively. Those skills have helped him go on to such a successful career in banking, in part because of his ability to explain highly complex issues to almost anyone and everyone. His passion for education can be seen in his own academic achievements—earning his bachelor’s degree from Siena College in New York, he went on to receive a master’s degree from the University of West Florida and a postgraduate certificate in higher education administration from the University of Pennsylvania. Prior to his appointment at the Delaware Bankers Association, he served as executive director of the Delaware Chapter of the American Institute of Banking. He began his tenure at Delaware AIB in 1985 and oversaw the educational unit.

Through his tireless efforts, David Bakerian has made a positive difference in not only the banking community but the education community and the community writ large. I am delighted to salute David and thank him for his many years of service to Delaware and to congratulate him on a truly remarkable and distinguished career. His losses to spending more time with his grandchildren in his garden and refining his culinary skills in the kitchen. In closing, on behalf of the people of Delaware, as well as on behalf of Senator Coons and Congressman CARNEY, I want to wish David and his wife Pam, his son Nick, and his daughters Alex and Catherine, along with his son-in-law Jeff and his grandchildren Adam and Madeline, the very best in all that lies ahead.

TRIBUTE TO DEBORAH BLONG

- **Mr. DAINES.** Mr. President, I wish to commend Deborah Blong from Missoula, MT, who was recently recognized as the recipient of the American Network of Community Options and Resources 2015 Direct Support Professional, DSP, of the Year Award for the State of Montana. This award recognizes Ms. Blong’s dedication and hard work every day in her efforts to support members of the Montana community with intellectual, developmental, and other significant disabilities. Ms. Blong’s selflessness is clear. In addition to taking care of her husband who suffers from Parkinson’s disease, she manages a home with eight residents—four have Prader-Willi syndrome and three others struggle with chronic obstructive pulmonary disease. She works 14-hour days, often 6 to 7 days a week.

Deborah Blong makes a difference each and every day for those whom she cares for. For 20 years, Ms. Blong has been a pivotal influence on those around her. For her efforts, Ms. Blong has earned the thanks of a grateful State.

Ms. Verhelst was chosen in February by the Nevada State Society to represent Nevada in the National Conference of State Societies and the Cherry Blossom Princess Program. Nevada is proud to support one of our own as she joins young women from across the Nation in community involvement and educational, leadership, and cultural activities throughout the year. In April, she was selected as U.S. Cherry Blossom Queen at the Official Cherry Blossom Grand Ball and Coronation of the United States Cherry Blossom Queen, a tradition that began in 1948. As U.S. Cherry Blossom Queen, Ms. Verhelst will have the opportunity to represent both the Silver State and the United States while she visits the Japan Prime Minister, Shinzo Abe, during her official United States Cherry Blossom Queen Goodwill Ambassador trip in May.

I wish to congratulate Ms. Verhelst on her excellent representation of Nevada in her role as Nevada Cherry Blossom Princess and U.S. Cherry Blossom Queen. She should be proud of her achievements.

I join the citizens of Nevada in congratulating Ms. Verhelst on her accomplishment and wish her all the best during her United States Cherry Blossom Queen Goodwill Ambassador trip and in all of her future endeavors.

CONGRATULATING DR. COLLEEN CRIPPS

- **Mr. HELLER.** Mr. President, today, I wish to congratulate Dr. Colleen Cripps on her retirement after serving the great State of Nevada for 25 years with the Nevada Division of Environmental Protection, NDEP. It gives me great pleasure to recognize her years of hard work and commitment to making the Silver State the best it can be.

Dr. Cripps stands as a true example of someone who has spent many years dedicated to her home State. She was born in Ely, NV, attended UNR, and earned her master of arts in public administration and her doctor of philosophy in biochemistry from the University of Nevada, Reno. Throughout her career with NDEP, Dr. Cripps served as chief of the Bureau of Air Quality; deputy administrator; responsible for the agency’s Air, Waste, and Federal Facilities Bureau; and acting administrator and administrator of NDEP. Her positive legacy in the department will be felt for years to come.

Dr. Cripps’ commitment to her cause goes beyond her career. She served on numerous industry-related boards, such as the National Association of Clean Air Agencies, NACAA’s, executive board, and was one of Nevada’s observers in the Western Regional Air Partnership and the Western States Air Resources Council’s board, serving on the executive committee and as vice president. She also represented Nevada in the Western Regional Air Partnership as a delegate and was one of Nevada’s observers in the Western Climate Initiative. Her years of service to the Silver State are invaluable.

CONGRATULATING NOELLE VERHELST

- **Mr. HELLER.** Mr. President, today, I wish to congratulate Noelie Verhelst on being selected not only as Nevada’s Cherry Blossom Princess for the 2015 Centennial Cherry Blossom Festival in Washington, DC, but also on being selected as U.S. Cherry Blossom Queen. Ms. Verhelst is the first Nevada Cherry Blossom Princess to be selected as U.S. Cherry Blossom Queen, a well-deserved accolade.

Ms. Verhelst is a shining example of someone who truly cherishes the Silver State. She was raised in Las Vegas, attended the University of Nevada, Las Vegas, received her degree in political science. Prior to moving to Washington, DC, she worked in Governor Brian Sandoval’s Office of Economic Development. She currently works for Congressman Joe Heck (NV-3) as a legislative correspondent. Her dedication and service to the great State of Nevada are greatly appreciated.
I am grateful for her dedication to the people of Nevada. She exemplifies the highest standards of leadership and service and should be proud of her long and meaningful career. Today, I ask all of my colleagues to join me in congratulating Dr. Cripps on her retirement. She made an incalculable contribution for all that she has done to make Nevada a better place. I offer her my best wishes for many fulfilling years to come.

TRIBUTE TO JOE LOMBARDO

• Mr. ISASKON. Mr. President, it is an honor today to personally recognize Mr. Joe Lombardo, who will soon retire from Gulfstream Aerospace in Savannah, GA for his significant contributions to the aviation industry. His forethought, leadership, and commitment to improving the industry are evidenced in his 40 years of hard work.

Beginning in 1975, Mr. Lombardo helped pave the way for the future of flight. He started at Douglas Aircraft, a division of McDonnell Douglas Corporation, working on the DC-10/MD-11 Trijet program. Mr. Lombardo was later responsible for the MD-88/MD-90 Twinjet operation.

In 1996, after 20 years at Douglas Aircraft, Mr. Lombardo joined Gulfstream Aerospace in Savannah. There he held positions as the vice president of production and the chief operating officer. He also served as president from 2007 to 2011 and as the executive vice president of the Aerospace Group for General Dynamics, Gulfstream’s parent company.

During his tenure at Gulfstream, Mr. Lombardo was instrumental in the co-production of the Gulfstream IV/SP and Gulfstream GV and the development of the Gulfstream G650 and the Gulfstream G280.

Mr. Lombardo’s contributions extend to his community. He served on the Corporate Angel Network’s board of directors and as the chairman of the Board of Governors of Ocean Exchange. He is the recipient of the National Management Association’s Silver Knight Award and was awarded the Cliff Henderson Trophy by the National Aeronautic Association in 2012 for his aviation leadership.

It is my pleasure to join Mr. Lombardo’s colleagues, family, and friends in celebrating his dedicated career and all his many contributions to the aerospace industry and community.

REMEMBERING BOBBY ANDREW

• Ms. MURKOWSKI. Mr. President, I wish to recognize a man who was well known across my State, and in many circles across our Nation. Bobby Andrew, an Alaska Native Yupik leader, passed away on May 12 at the age of 73 near Aleknagik in southwest Alaska.

Aleknagik is 16 miles northwest of its hub community of Dillingham, a small town of about 2,500 residents, which sits at the confluence of the Nushagak River, an inlet of Alaska’s Bristol Bay.

Bobby was seen as a leader by many Native and non-Native Alaskans. At a young age Bobby attended territorial and BIA schools in Southwest Alaska and then went off to Ohio to earn an accounting degree from Dyar Spencer Business College, now known as Chancellor University in Cleveland. He then returned home to bring his education back to Alaska.

Bobby was a recognized subsistence hunter and fisherman who was respected by many across the State. He taught much of the importance of traditional knowledge and passing along important Alaska Native values.

Bobby was a known advocate for land and water protection in Alaska. As a writer and public speaker Bobby took his advocacy across the State, Nation, and overseas. He often visited places like Juneau, Washington, DC, and London when asked to speak about Alaska. He said that “where there was fire, there was water, where he was needed, he would go.”

Bobby loved Alaska, loved his family—especially his grandchildren—and he was an important voice for Alaska. He passed naturally at his cabin, a place he loved, where he went to rest after fishing. He will be missed.

RECOGNIZING COLONEL KEVIN KENNEDY

• Mr. THUNE. Mr. President, today I recognize Colonel Kevin Kennedy, commander of the 28th Operations Group at Ellsworth Air Force Base, near Rapid City, SD. Colonel Kennedy has been the commander at Ellsworth for the past 2 years, and has served in his position admirably.

Colonel Kennedy began his career at the Air Force Academy in Colorado. He is a B-1 pilot who went on to serve at Ellsworth on multiple occasions, including as deputy commander of the 28th Operations Group as recently as 2010. During his career he also served as the vice commander of the 379th Air Expeditionary Wing in South West Asia and as the director of the Air Force Strategic Study Group at the Pentagon here in DC.

When he came back to Ellsworth 2 years ago as base commander, my office was working with the Air Force on a 9-year project to expand the Powder River Training Complex, which is the primary training airspace for the B-1 bombers based at Ellsworth, as well as the B-52 bombers based in Minot Air Force Base, ND. When Colonel Kennedy arrived at Ellsworth as base commander, he made the completion of the Powder River Training Complex one of his top priorities, and he assured me that this airspace expansion would be completed under his watch. This was not a pledge he took lightly. Be it emphasizing the need for this airspace within the Air Force hierarchy or driving forward on this Powder River Training Complex expansion, which was approved by the FAA a few months later. Once this airspace is charted and operational, Ellsworth Air Force Base will save up to $23 million a year by being able to train closer to home. In addition, other aircraft from around the Nation can come to South Dakota to utilize this training space, improving overall readiness. The expanded Powder River Training Complex is a national treasure.

I want to thank Colonel Kennedy for his commitment to this project and for his service to our Nation. He really is a shining example of the dedication and leadership that makes America’s Air Force the greatest in the world.

RECOGNIZING INNOGENOMICS TECHNOLOGIES

• Mr. VITTER. Mr. President, small businesses often have the unique ability to pinpoint serious problems in their communities while working with local agencies and other small businesses to get things done. Sometimes these small businesses provide groundbreaking, innovative technological solutions to problems that have gone unsolved for decades. As we close out National Small Business Week, I am proud to recognize InnoGenomics Technologies of New Orleans, LA. as a Small Business of the Day for National Small Business Week.

In the wake of Hurricane Katrina’s devastation, Dr. Sudhir Sinha, president and CEO of InnoGenomics Technologies, had the idea to develop a new DNA marker system to aid in identifying victims of natural disasters. Developed with the support of National Science Foundation Small Business Innovation Research, SBIR, grants, InnoGenomics Technologies’ patented technology gives forensic scientists the ability to test the most challenging DNA submissions to solve crimes and save lives. Additionally, the InnoGenomics Technologies team is currently developing a new method to detect and monitor cancer—a liquid biopsy that can be conducted through a minimally invasive blood test. Combined, these two groundbreaking endeavors are advancing and revolutionizing healthcare and forensic investigations.

Congratulations again to InnoGenomics Technologies for being selected as a Small Business of the Day for National Small Business Week.
Thank you for your continued commitment to innovating DNA technologies to solve crimes and save lives right in the heart of Louisiana.

RECOGNIZING HARING CATFISH

Mr. VITTER. Mr. President, small businesses often set a high standard for quality and service across the United States. Commitment to reaching these high thresholds is most important in our agriculture and food industries. One small business that has continually held itself to the highest bar for quality and service is Haring Catfish, located in Wisner, LA—the Small Business of the Day for National Small Business Week.

Haring Catfish is known for its fresh, high-quality, and delicious seafood. Opened in the early 1960s by Walter Carl “Pete” Haring, Sr., Haring Catfish has since grown to processing over 300,000 pounds of catfish per week. Haring Catfish’s commitment to the highest quality catfish through healthy, high protein diets has elevated them to be one of the most-recognized catfish farms in the United States. Haring Catfish has received many meritorious awards, including the Louisiana Catfish Farmer of the Year Award, Catfish Farmers of America Award of Excellence, and the Small Business Person of the Year Award by the U.S. Small Business Administration.

Congratulations again to Haring Catfish for being selected as a Small Business of the Day for National Small Business Week. Thank you for your continued commitment to providing the high-quality and delicious catfish in Louisiana.

RECOGNIZING RAISING CANE’S CHICKEN FINGERS

Mr. VITTER. Mr. President, just as important as it is to recognize our small businesses, it is often important to also recognize our small business success stories—especially those that make a substantial impact in their industries and in their communities. As a part of National Small Business Week, I am proud to recognize the Louisiana small business success story of Raising Cane’s Chicken Fingers.

In the early 1990s, Todd Graves was inspired to open a chicken finger restaurant. After the bank turned down the money necessary to open Raising Cane’s Chicken Fingers in Baton Rouge, LA, in 1996. The business has since grown to processing over 300,000 pounds of catfish per week. Haring Catfish’s commitment to the highest quality catfish through healthy, high protein diets has elevated them to be one of the most-recognized catfish farms in the United States. Haring Catfish has received many meritorious awards, including the Louisiana Catfish Farmer of the Year Award, Catfish Farmers of America Award of Excellence, and the Small Business Person of the Year Award by the U.S. Small Business Administration.

Congratulations again to Raising Cane’s Chicken Fingers for being recognized as a small business success story during the 2015 National Small Business Week. Your commitment to giving back to your local communities and remembering your small business beginning is recognized and greatly appreciated.

TRIBUTE TO COLONEL WILLIAM P. DAVIS

Mr. VITTER. Mr. President, today I honor the career of one of Louisiana’s heroes and most accomplished residents, retired Marine Corps Col. William P. Davis. Colonel Davis was born at Camp Pendleton, CA, the son of a career marine, and spent his youth following his father’s postings. He is a combat veteran of Operation Desert Storm, and subsequently assigned as the supply, fiscal, and contracting officer for Landing Force Training Command Atlantic. In 1997, he was assigned to his first tour at the Marine Forces Reserve, New Orleans, LA. During that period, he was a parent volunteer for the Young Marines chapter in Slidell, LA, where he organized training events and tours to units and bases. In addition, he provided classes for the annual regimental encampment as well as at recruit training events.

Colonel Davis was operations officer for Joint Task Force Civil Support, a military organization under the U.S. Northern Command, Everett, WA, where he led a team of technical experts in planning post-incident recovery from chemical, biological, radiological or nuclear incidents. He supported planning for the 2006 Winter Olympics, 2006 Southeast Asian Games, and other exercises across the world. During Hurricane Katrina’s aftermath in 2005, he worked with Federal, military, State, and local authorities in support of response operations.

In 2005, Colonel Davis was selected to New Orleans in 2006, becoming assistant chief of Staff at Marine Forces Reserve. He led a staff of 80 people charged with overseeing construction, maintenance, and repairs of 187 reserve sites nationwide, including the construction of the 25-acre Marine Corps Support Facility in New Orleans. From 2011 until recently, Colonel Davis was the inaugural commandant of the New Orleans Military and Maritime Academy, a charter high school where all students are cadets of the Marine Corps Junior Reserve Officers Training Corps Program and are focused on college preparation with an emphasis on science, technology, engineering, and math. In his job as commandant, Colonel Davis has helped positively shape the lives of several hundred cadets from the region. After 4 years of operation, the academy has test results and student performance improvement ranked well above average with national progress.

Beginning in 2016, Colonel Davis will leave Louisiana to become the next national executive director and CEO of the Young Marines. Colonel Davis is an accomplished executive whose commitment to young people has always been fundamental during his career. He is highly regarded for strategic thinking, sound financial management, marketing expertise, and exceptional project management skills. He is a distinguished leader who will bring military expertise and business experience to the Young Marines.

I am pleased to join with the Senate in honoring the career of retired Col. William P. Davis. We thank him for his service to our country and congratulate him as he begins the next chapter of his career.

MESSAGES FROM THE HOUSE

At 9:49 a.m., a message from the House of Representatives, delivered by Mr. Novotny, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 178. An act to provide justice for the victims of trafficking.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2250. An act making appropriations for the Legislative Branch for the fiscal year ending September 30, 2016, and for other purposes.

H.R. 2533. An act to provide an extension of Federal-aid highway, highway safety, motor carrier safety, transit, and other programs funded out of the Highway Trust Fund, and for other purposes.

At 11:06 a.m., a message from the House of Representatives, delivered by Mr. Novotny, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 874. An act to amend the Department of Energy High-End Computing Revitalization Act of 2004 to improve the high-end computing research and development programs of the Department of Energy, and for other purposes.

H.R. 1119. An act to improve the efficiency of Federal research and development, and for other purposes.

H.R. 1156. An act to authorize the establishment or designation of a working group under the National Science and Technology Council to identify and coordinate international science and technology cooperation opportunities.

H.R. 1158. An act to improve management of the National Laboratories, enhance technology commercialization, facilitate public-private partnerships, and for other purposes.

MEASURESREFERRED
The following bills were read the first and the second times by unanimous consent, and referred as indicated:
H.R.874. An act to amend the Department of Energy High-End Computing Revitalization Act of 2004 to improve the high-end computing research and development program of the Department of Energy, and for other purposes; to the Committee on Energy and Natural Resources.
H.R.1139. An act to improve the efficiency of Federal research and development, and for other purposes; to the Committee on Commerce, Science, and Transportation.
H.R.1150. An act to authorize the establishment or designation of a working group under the National Science and Technology Council to identify and coordinate international science and technology cooperation opportunities; to the Committee on Foreign Relations.
H.R.1158. An act to improve management of the National Laboratories, enhance technology commercialization, facilitate public-private partnerships, and for other purposes; to the Committee on Energy and Natural Resources.
H.R.1561. An act to improve the National Oceanic and Atmospheric Administration’s weather research through a focused program of investment on affordable and attainable advancements in observational, computing, and modeling capabilities to support substantial improvement in weather forecasting and prediction of high impact weather events, to expand commercial opportunities for, and provision of weather data, and for other purposes.

The following concurrent resolution, in which it requests the concurrence of the Senate:
H.Con.Res.47. Concurrent resolution to correct the enrollment of S.179.

INTRODUCTIONOFBILLSANDJOINTRESOLUTIONS
The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred:
By Mr. THUNE (for himself, and Mr. BENNET):
S.1390. A bill to help provide relief to State education budgets during a recovering economy; to the Committee on Health, Education, Labor, and Pensions.
By Mr. UDALL (for himself and Mr. HENRICH):
S.1391. A bill to increase research, education, and treatment for cerebral cavernous malformations; to the Committee on Health, Education, Labor, and Pensions.
S.1392. A bill to require certain practitioners authorized to prescribe controlled substances to complete continuing education; to the Committee on Health, Education, Labor, and Pensions.
By Mr. THUNE (for himself, Mrs. CAPITO, Mr. COTTON, Mrs. FISCHER, Mr. FLAKE, Mr. INHOFE, Mr. LEE, and Mr. ROBERTS):
S.1393. A bill to require the Administrator of the Environmental Protection Agency to include an economic analysis for a proposed or final rule an analysis that does not include any other proposed or unimplemented rule; to the Committee on Environment and Public Works.
By Mr. MERRICKLY (for himself and Mr. WYDEN):
S.1394. A bill to amend the Federal Water Pollution Control Act to establish within the Environmental Protection Agency a Columbia River Basin Restoration Program; to the Committee on Environment and Public Works.
By Ms. MURKOWSKI:
S.1396. A bill to reinstate certain mining claims in the State of Alaska; to the Committee on Energy and Natural Resources.
By Mr. THUNE (for himself and Ms. STABENOW):
S.1398. A bill to establish a demonstration program requiring the utilization of Value-Based Insurance Design in order to demonstrate that the copayments or coinsurance for Medicare beneficiaries for selected high-value prescription medications and clinical services can increase their utilization and ultimately improve clinical outcomes, enhance beneficiary satisfaction, and lower health care expenditures; to the Committee on Finance.

CONGRESSIONAL RECORD—SENATE S3183
May 20, 2015
H.R.1561. An act to improve the National Oceanic and Atmospheric Administration’s weather research through a focused program of investment on affordable and attainable advancements in observational, computing, and modeling capabilities to support substantial improvement in weather forecasting and prediction of high impact weather events, to expand commercial opportunities for, and provision of weather data, and for other purposes.

At 10:22 p.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H.R.1561. An act to improve the National Oceanic and Atmospheric Administration’s weather research through a focused program of investment on affordable and attainable advancements in observational, computing, and modeling capabilities to support substantial improvement in weather forecasting and prediction of high impact weather events, to expand commercial opportunities for, and provision of weather data, and for other purposes.

By Mr. THUNE for the Committee on Commerce, Science, and Transportation.

The following executive reports of nominations were submitted:
By Mr. THUNE for the Committee on Commerce, Science, and Transportation.
By Mr. ALEXANDER (for himself, Mr. COONS, Ms. MURKOWSKI, Mr. CANTWELL, Mr. GARDNER, Mrs. FEDERSTEIN, and Mr. HEINRICH):
S.1388. A bill to extend, improve, and consolidate energy research and development programs, and for other purposes; to the Committee on Energy and Natural Resources.
By Mr. BENNET:
S.1389. A bill to amend the Internal Revenue Code of 1986 to permanently extend and increase expensing limitations, and for other purposes; to the Committee on Finance.
By Mr. DURBIN:
S.1400. A bill to amend the Small Business Act to direct the task force of the Office of Veterans Business Development to provide access to and manage the distribution of excess or surplus property to veteran-owned small businesses; to the Committee on Small Business and Entrepreneurship.
By Mr. TILLIS (for himself and Mr. BURRI):
S.1401. A bill to provide for the annual designation of cities in the United States as an “American World War II City”; to the Committee on Armed Services.
By Mr. LEAHY (for himself and Mr. GRASSLEY):
S.1403. A bill to allow acceleration certificates awarded under the Patents for Humanity Program to be transferable; to the Committee on the Judiciary.
By Mr. RUBIO:
S.1403. A bill to amend the Magnuson-Stevens Fishery Conservation and Management Act to promote sustainable conservation and management for the Gulf of Mexico and South Atlantic fisheries and the communities that rely on them, and for other purposes; to the Committee on Commerce, Science, and Transportation.
By Mr. PORTMAN (for himself, Mr. McCAIN, Mr. ISAKSON, and Mr. CORNYN):
S.1404. A bill to free States to spend gas taxes on their transportation priorities; to the Committee on Environment and Public Works.
By Mr. FRANKEN:
S.1405. A bill to require a coordinated response to coal fuel supplies that could impact electric power system adequacy or reliability; to the Committee on Energy and Natural Resources.
By Mr. VITTER:
By Mr. HELLER (for himself, Mr. RUSCH, Mr. HEINRICH, and Mr. TASSO):
S.1407. A bill to promote the development of renewable energy on public land, and for other purposes; to the Committee on Energy and Natural Resources.
By Mr. PETERS (for himself, Mr. ALEXANDER, and Mr. STABENOW):
S.1408. A bill to provide for a program of research, development, demonstration, and commercial application in vehicle technologies at the Department of Energy; to the Committee on Energy and Natural Resources.

SUBMISSIONOFCONCURRENTANDSENATERESOLUTIONS
The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. CORNYN:
S.1397. A bill to amend the Internal Revenue Code of 1986 to require that ITIN applicants submit their application in person at taxpayer assistance centers, and for other purposes; to the Committee on Finance.
ADDITIONAL COSPONSORS

S. 45
At the request of Mr. KING, the name of the Senator from West Virginia (Mr. MANCHIN) was added as a cosponsor of S. 85, a bill to amend the Higher Education Act of 1965 to establish a simplified income-driven repayment plan, and for other purposes.

S. 127
At the request of Mrs. SHAHEEN, the name of the Senator from New Hampshire (Ms. HIRONO) was added as a cosponsor of S. 127, a bill to prohibit Federal funding for motorcycle checkpoints, and for other purposes.

S. 149
At the request of Mr. HATCH, the name of the Senator from Florida (Mr. RUBIO) was added as a cosponsor of S. 149, a bill to amend the Internal Revenue Code of 1986 to repeal the excise tax on medical devices.

S. 356
At the request of Mr. LEE, the name of the Senator from New Hampshire (Ms. MCCLAIN) was added as a cosponsor of S. 356, a bill to improve the provisions relating to the privacy of electronic communications.

S. 389
At the request of Ms. HIRONO, the names of the Senators from California (Mrs. BOXER) and the Senator from Washington (Ms. CANTWELL) were added as cosponsors of S. 389, a bill to amend section 1111(h)(1)(C)(i) of the Elementary and Secondary Education Act of 1965 to require that annual State report cards reflect the same race categories as the annual decennial census of population.

S. 491
At the request of Ms. KLOBUCHAR, the name of the Senator from Missouri (Mrs. McCASKILL) was added as a cosponsor of S. 491, a bill to lift the trade embargo on Cuba.

S. 524
At the request of Mr. WHITEHOUSE, the name of the Senator from Utah (Mr. HATCH) was added as a cosponsor of S. 524, a bill to authorize the Attorney General to award grants to address the national epidemics of prescription opioid abuse and heroin use.

S. 862
At the request of Mr. DONNELLY, the name of the Senator from South Carolina (Mr. SCOTT) was added as a cosponsor of S. 862, a bill to amend the Truth in Lending Act to modify the definitions of a mortgage originator and a high-cost mortgage.

S. 711
At the request of Ms. AYOTTE, the name of the Senator from Maine (Ms. COLLINS) was added as a cosponsor of S. 711, a bill to amend section 520J of the Public Service Health Act to authorize grants for mental health first aid training programs.

S. 731
At the request of Mrs. BOXER, the name of the Senator from New Mexico (Mr. Udall) was added as a cosponsor of S. 713, a bill to prevent international violence against women, and for other purposes.

S. 746
At the request of Mr. WHITEHOUSE, the names of the Senators from New York (Mr. CARDEN) and the Senator from Maryland (Mr. CARDIN) were added as cosponsors of S. 746, a bill to provide for the establishment of a Commission to Accelerate the End of Breast Cancer.

S. 796
At the request of Mr. GRASSLEY, the name of the Senator from Michigan (Mr. PETERS) was added as a cosponsor of S. 746, supra.

S. 802
At the request of Mr. RUBIO, the name of the Senator from New York (Mrs. GILLIBRAND) was added as a cosponsor of S. 802, a bill to authorize the Secretary of State and the Administrator of the United States Agency for International Development to provide assistance to support the rights of women and girls in developing countries, and for other purposes.

S. 804
At the request of Mrs. SHAHEEN, the name of the Senator from Minnesota (Ms. KLOBUCHAR) was added as a cosponsor of S. 804, a bill to amend title XVIII of the Social Security Act to specify coverage of continuous glucose monitoring devices, and for other purposes.

S. 862
At the request of Ms. MIKULSKI, the name of the Senator from Hawaii (Mr. SCHUTZER) was added as a cosponsor of S. 862, a bill to amend the Fair Labor Standards Act of 1938 to provide more effective remedies to victims of discrimination in the payment of wages on the basis of sex, and for other purposes.

S. 950
At the request of Mr. CASEY, the name of the Senator from California (Mrs. BOXER) was added as a cosponsor of S. 950, a bill to amend the Internal Revenue Code of 1986 to provide for a refundable adoption tax credit.

S. 974
At the request of Mr. DURBIN, the name of the Senator from Minnesota (Mr. FRANKEN) was added as a cosponsor of S. 974, a bill to amend the Fair Labor Standards Act of 1938 to prohibit employment of children in tobacco-related agriculture by deeming such employment as oppressive child labor.

S. 1004
At the request of Mr. KIRK, the name of the Senator from Texas (Mr. CORNYN) was added as a cosponsor of S. 1004, a bill to amend title 38 of the United States Code, to encourage the nationwide observance of two minutes of silence each Veterans Day.

S. 1020
At the request of Mr. VITTER, the name of the Senator from Maine (Ms. Collins) was added as a cosponsor of S. 1020, a bill to direct the Consumer Product Safety Commission and the National Academy of Sciences to study the vehicle handling requirements proposed by the Commission for recreational off-highway vehicles, and to prohibit the adoption of any such requirements until the completion of the study, and for other purposes.

S. 1085
At the request of Mrs. MURRAY, the name of the Senator from Wisconsin (Mr. DAINES) was added as a cosponsor of S. 1085, a bill to expand eligibility for the program of comprehensive assistance for family caregivers of the Department of Veterans Affairs, to expand benefits available to participants under such program, to enhance special compensation for members of the uniformed services who require assistance in everyday life, and for other purposes.

S. 1122
At the request of Mr. DURBIN, the name of the Senator from Rhode Island (Mr. WHITEHOUSE) was added as a cosponsor of S. 1122, a bill to require that chapter 1 of title 9 of the United States Code, relating to the enforcement of arbitration agreements, shall not apply to enrollment agreements made between students and certain institutions of higher education that prohibit limitations on the ability of students to pursue claims against certain institutions of higher education.

S. 1123
At the request of Mr. LEE, the name of the Senator from New Jersey (Mr. MENENDEZ) was added as a cosponsor of S. 1123, a bill to reform the authorities of the Federal Government to require the production of certain business records, conduct electronic surveillance, use pen registers and trap and trace devices, and use other forms of information gathering for foreign intelligence, counterterrorism, and criminal purposes, and for other purposes.
At the request of Mr. Coons, the names of the Senator from Michigan (Ms. Stabenow) and the Senator from Montana (Mr. Tester) were added as cosponsors of S. 1126, a bill to modify and extend the National Guard State Partnership Program. S. 1130

At the request of Mrs. Boxer, the name of the Senator from Montana (Mr. Tester) was added as a cosponsor of S. 1130, a bill to amend title 10, United States Code, to improve procedures for legal justice for members of the Armed Forces, and for other purposes. S. 1176

At the request of Mr. Udall, the name of the Senator from New York (Mrs. Gillibrand) was added as a cosponsor of S. 1130, a bill to amend the Internal Revenue Code of 1986 to reform the system of public financing for Presidential elections, and for other purposes. S. 1214

At the request of Mr. Menendez, the names of the Senator from Rhode Island (Mr. Whitehouse) and the Senator from Vermont (Mr. Leahy) were added as cosponsors of S. 1214, a bill to prevent human health threats posed by the consumption of equines raised in the United States. S. 1229

At the request of Mr. Donnelly, the name of the Senator from North Dakota (Mr. Hoeven) was added as a cosponsor of S. 1239, a bill to amend the Clean Air Act with respect to the ethanol waiver for the Reid vapor pressure limitations under that Act. S. 1300

At the request of Mrs. Feinstein, the names of the Senator from Ohio (Mr. Portman), the Senator from Wyoming (Mr. Enzi), the Senator from Texas (Mr. Cruz) and the Senator from Washington (Ms. Capito) were added as cosponsors of S. 1300, a bill to amend the section 221 of the Immigration and Nationality Act to provide relief for adoptive families from immigrant visa feeds in certain situations. S. 1312

At the request of Ms. Murkowski, the name of the Senator from South Carolina (Mr. Scott) was added as a cosponsor of S. 1312, a bill to modernize Federal policies regarding the supply and distribution of energy in the United States, and for other purposes. S. 1324

At the request of Ms. Murkowski, the name of the Senator from Rhode Island (Mr. Whitehouse) was added as a cosponsor of S. 1334, a bill to strengthen enforcement mechanisms to stop illegal, unreported, and unregulated fishing, to amend the Tuna Conventions Act of 1950 to implement the Antigua Convention, and for other purposes. S. 1345

At the request of Mrs. Shaheen, the name of the Senator from Illinois (Mr. Kirk) was added as a cosponsor of S. 1345, a bill to amend title XVIII of the Social Security Act to improve access to diabetes self-management training by authorizing certified diabetes educators to provide diabetes self-management training services, including as part of telehealth, under part B of the Medicare program. S. 1377

At the request of Mr. Leahy, the name of the Senator from New Mexico (Mr. Heinrich) was added as a cosponsor of S. 1377, a bill to amend title 18, United States Code, to clarify and expand Federal criminal jurisdiction over Federal contractors and employees outside the United States, and for other purposes. S. RES. 143

At the request of Mr. Schatz, the names of the Senator from California (Mrs. Boxer), the Senator from Minnesota (Mr. Franken) and the Senator from New York (Mrs. Gillibrand) were added as cosponsors of S. Res. 143, a resolution supporting efforts to ensure that students have access to debt-free higher education. S. RES. 148

At the request of Mr. Kirk, the name of the Senator from Arkansas (Mr. Boozman) was added as a cosponsor of S. Res. 148, a resolution condemning the Government of Iran's state-sponsored persecution of its Baha'i minority and its continued violation of the International Covenants on Human Rights. AMENDMENT NO. 1227

At the request of Mrs. Shaheen, the name of the Senator from New Jersey (Mr. Menendez) was added as a cosponsor of amendment No. 1227 proposed to H.R. 1314, a bill to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations. AMENDMENT NO. 1299

At the request of Mr. Portman, the names of the Senator from Vermont (Mr. Sanders), the Senator from New Mexico (Mr. Heinrich), the Senator from Connecticut (Mr. Murphy), the Senator from New Mexico (Mr. Udall), the Senator from Connecticut (Mr. Blumenthal) and the Senator from Rhode Island (Mr. Reed) were added as cosponsors of amendment No. 1299 proposed to H.R. 1314, a bill to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations. AMENDMENT NO. 1299

At the request of Mr. Merkley, the names of the Senator from Hawaii (Mr. Schatz), the Senator from Wisconsin (Ms. Baldwin), the Senator from Ohio (Mr. Brown) and the Senator from Massachusetts (Ms. Warren) were added as cosponsors of amendment No. 1369 intended to be proposed to H.R. 1314, a bill to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations. AMENDMENT NO. 1370

At the request of Mr. Merkley, the name of the Senator from Massachusetts (Ms. Warren) was added as a co-sponsor of amendment No. 1370 intended to be proposed to H.R. 1314, a bill to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations. AMENDMENT NO. 1390

At the request of Mr. Franken, the name of the Senator from Massachusetts (Ms. Warren) was added as a cosponsor of amendment No. 1390 intended to be proposed to H.R. 1314, a bill to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations. AMENDMENT NO. 1411

At the request of Mr. Hatch, the names of the Senator from Oregon (Mr. Wyden), the Senator from Delaware (Mr. Carper), the Senator from Virginia (Mr. Warner), the Senator from Virginia (Mr. Kaine), the Senator from Colorado (Mr. Bennet), the Senator from Missouri (Mrs. McCaskill), the Senator from Texas (Mr. Cornyn), the Senator from Tennessee (Mr. Alexander), the Senator from Tennessee (Mr. Corker), the Senator from Nevada (Mr. Heller) and the Senator from Indiana (Mr. Coats) were added as co-sponsors of amendment No. 1411 proposed to H.R. 1314, a bill to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations. AMENDMENT NO. 1370
than $100 of work on the claim in the preceding year. 30 U.S.C. 28(d)(1). The waiver provision further states: "If a small miner waiver application is determined to be defective for any reason, the claimant shall have a period of 60 days from the date of written notification of the defect or defects by the Bureau of Land Management to: A) cure such defect or defects or (B) pay the . . . claim maintenance fee(s) due for such a period."

Since past revisions of the law, there have been a series of incidents where miners have argued that they submitted their applications and affidavits of annual labor in a timely manner, but due to clerical error by U.S. Bureau of Land Management officials, mail delays or for unexplained reasons, the applications or documents were not recorded as having been received in a timely fashion. In that case BLM has terminated the claims, deeming them null and void. While miners and claim holders have argued that the law provides them time to cure claim defects, BLM has argued that the cure only applies when applications or fees have been received in a timely manner. Thus, there is no administrative remedy for BLM believes that clerical errors by BLM or mail issues resulted in loss or the late recording of claim extension applications and paperwork.

There have been a number of cases where Congress has been asked to over-ride BLM determinations and reinstate mining claims simply because of the disputes over whether the claims had been filed in a timely manner. Congress in 2005 reinstated such claims in a previous Alaska case. Claims in two other incidents were reinstated following a U.S. District Court case in the 10th Circuit first in 2009 in the case of Miller v. United States and in a second Alaska case in 2013. Legislation to correct this problem actually was approved by the Senate in 2007, but did not ultimately become law.

In the past three Congresses I have introduced legislation intended to short circuit continued litigation and pleas for claim reinstatement by clarifying the intent of Congress that miners do have to be informed that their claims are in jeopardy of being voided and given 60 days of notice to cure defects before the BLM officials submit their applications and to submit affidavits of annual labor, should their submittals not be received and processed by BLM officials on time. If all defects are not cured within 60 days— the obvious intent of Congress in passing the original act—then claims should be subject to voidance. But this administration has opposed the legislation arguing that it would be too expensive to notify all small miners who fail to file their small miner waiver documents on time and giving them time to solve the defect prior to the loss of their claims. It has even been suggested that giving small miners simple due process would just encourage miners to ignore the deadline for filing of their fee waivers.

I clearly find the cost argument unpersuasive. Many Federal departments and agencies, the Federal Com- mission to the FCC for example, routinely sends out notices on permit and license applications. The FCC sends out hundreds of thousands of such notices to Americans who have small radio licenses expiring yearly, warning them that they need to file applications for license renewal. The Bureau of Land Management certainly should be able to afford a few hundred stamps to perform a similar service. Given the value of claims placed at risk and the bother, inconvenience and fear of loss of claims, it is highly unlikely that miners would avoid filing their waiver paperwork on time just because a notification process was clearly in place before claims could be terminated.

But after facing the clear opposition of this administration over 6 years to resolving this inequity, today I simply file legislation to remedy the injustices for two of my constituents who have lost their rights, in one case to nine mineral claims on the Kenai Peninsula, near Hope, Alaska, and in the second case to a single placer claim in the Fortymile District of northeast Alaska. The transition language proposed will allow claims for Mr. John Trautner, who had lost title to claims that he had held from 1982 to 2004. Mr. Trautner suffered this loss even though he had a consistent record of having paid the annual labor assessment fee for the previous 22 years. The local BLM office did have a time-date-stamped record that the maintenance fee waiver certification form had been filed weeks before the deadline, but just not a record that the affidavit of annual labor had arrived when he dropped it off in the office in Anchorage at the same time.

In the second case, it will reinstate a claim held by Mr. and Mrs. Vernon Thurneau, now of Wasilla, who lost their claim after mining it continuously for 38 years in 2009, simply because of a holiday season error. In this case the Thurneau’s paid their fees on time, and turned in their proof of labor affidavit to the Fairbanks Recorders Office in December before the deadline. They then dropped off the date stamp, that they produced the information in a timely manner. But because of the Christmas holidays they simply forgot to turn/mail in the form to the BLM Anchorage office until after Jan. 1, missing the BLM’s required Dec. 31 deadline. Because of a holiday delay, they lost their claim and 38 years of work.

This legislation, supported in the past by the Alaska Miners Association, will simply reinstate the two sets of claims that have been held by the government over the past decade. In response to complaints by the Department of the Interior that past versions of my legislation improperly would have resulted in the patenting of the claims by the granting of a first final certificate in the Trautner case, I have modified this bill simply to reinstate the claims, but not to take steps to confirm patents. By this bill Mr. Trautner will have what many other miners for Congress to reconsider the merits of the moratorium on patent issuance first imposed on the Mining Law of 1872 by Congress in 1995. It is simple justice that Mr. Trautner and the Thurneau family receive their mining claims back, since Congress clearly thought it was giving miners a guaranteed opportunity to remedy claim defects when it created the small miner waiver provisions in 1995. Return of the claims will cost the government nothing and likely will result in added federal revenues, hopefully preventing this bill from facing any procedural issues. I hope that justice will finally prevail in these cases this Congress, even though I regret that I see no means to fix the larger inequity in the interpretation of the small miner waiver statute for the foreseeable future.

By Mr. CORNYN:

S. 1397. A bill to amend the Internal Revenue Code of 1986 to require that ITIN applicants submit their application in person at taxpayer assistance centers, and for other purposes; to the Committee on Finance.

Mr. CORNYN. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 1397 Be it enacted by the Senate and House of Representa-tives of the United States of America in Congress assembled,

SEC. 1. SHORT TITLE.

This Act may be cited as the "ITIN Reform Act of 2015."

SEC. 2. REQUIREMENTS FOR THE ISSUANCE OF ITINS.

(a) IN GENERAL.—Section 6109 of the Internal Revenue Code of 1986 is amended by adding at the end the following:

"(1) SPECIAL RULES RELATING TO THE ISSUANCE OF ITINS.—
"(A) the applicant submits an application together with the required documentation.
"(B) in the case of an applicant who resides outside the United States or an individual taxpayer identification number to an individual only if the requirements of paragraphs (2) and (3) are met.

"(2) IN-PERSON APPLICATION.—The requirements of this paragraph are met if, with respect to an individual taxpayer identification number:

"(A) the applicant submits an application in person, using Form W-7 (or any successor form) and including the required documentation, at a taxpayer assistance center of the Internal Revenue Service, or

"(B) in the case of an applicant who resides outside of the United States, the applicant submits the application in person to an employee of the Internal Revenue Service or a designee of the Secretary at a United States diplomatic mission, consular mission, or other entity, together with the required documentation.

"(3) INITIAL ON-SITE VERIFICATION OF DOCUMENTATION.—The requirements of this paragraph are met if, together with each application, an employee of the Internal Revenue Service at the taxpayer assistance center, or
S. 1400. A bill to amend the Small Business Act to direct the task force of the Office of Veterans Business Development to provide access to and manage the distribution of excess or surplus property to veteran-owned small businesses; and the Committee on Small Business and Entrepreneurship.

Mr. DURBIN. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 1400

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE. - This Act may be cited as the "Veterans Small Business Enhancement Act of 2015".

SEC. 2. ACCESS TO EXCESS OR SURPLUS PROPERTY FOR VETERAN-OWNED SMALL BUSINESSES. - Section 32(c)(3)(B) of the Small Business Act (15 U.S.C. 637(c)(3)(B)) is amended—

(1) in clause (v), by striking "; and" and inserting "; and";

(2) in clause (vi), by striking the period at the end and inserting "; and";

(3) by adding at the end the following new clause:

"(vii) providing access to and managing the distribution of excess or surplus property owned by the United States to small business concerns owned and controlled by veterans, pursuant to a memorandum of understanding between the task force and the head of the applicable state agency (as defined in section 348 of title 46, United States Code)."

By Mr. TILLIS (for himself and Mr. BURR):

S. 1400. A bill to provide for the annual designation of cities in the United States as an "American World War II City"; to the Committee on Armed Services.

Mr. TILLIS. Mr. President, I am pleased to introduce legislation to designate the Secretary of the Navy to designate one city each year as a World War II city, beginning with Wilmington, NC, as America’s first World War II City.

The names of the 10,000 Tarheels, who paid the ultimate price in World War II are memorialized on the bulkhead of the battleship USS North Carolina in downtown Wilmington.

During World War II, the USS North Carolina, known affectionately throughout the Navy as the "Showboat", participated in every major naval offensive in the Pacific area of operations and earned 15 battle stars. She steamed over 300,000 miles. Although Japanese radio claimed six of these attacks came off North Carolina.

During World War II, Wilmington was the home of the North Carolina Shipbuilding Company. The shipyard was created as part of the U.S. Government’s Emergency Shipbuilding Program. Workers built 243 ships in Wilmington during the five years the company operated.

Wilmington was the site of three prisoner-of-war, POW, camps from February 1944 through April 1946. At their peak, the camps held 550 German prisoners. The first camp was located on the corner of Shipyard Boulevard and Columbus Beach Road, the old Confederate post Fort Fisher housed German prisoners and also served as a training site for the Coastal Artillery and anti-aircraft units. A smaller contingent of prisoners was assigned to a smaller site, working in the officers' mess and grounds keeping, at Bluetenthal Army Air Field, which is now Wilmington International Airport.

Bluetenthal Army Air Field was used by the United States Army Air Forces’ Third Air Force for antisubmarine patrols and training.

I want to thank my colleague Senator BURR for bringing this idea to establish a process to recognize Wilmington and other American cities for their efforts during the war years, to the Senate. But I also wish to single out Wilbur Jones, a Wilmington native and military historian who has poured so much of his time and soul into ensuring that the people of southeastern North Carolina never forget the contributions of our state to victory in the Atlantic and the Pacific.

By Mr. LEAHY (for himself and Mr. GRASSLEY):

S. 1402. A bill to allow acceleration certificates awarded under the Patents for Humanity Program to be transferable; to the Committee on the Judiciary.

Mr. LEAHY. Mr. President, the American intellectual property system is rightly held as the global standard for promoting innovation and driving economic growth. This is particularly true of our patent system. The fundamental truth that our Founders recognized more than 200 years ago, that limited exclusive rights and limited inventors incentivize research and development, continues to benefit consumers and the American economy at large.
A healthy patent system should do more than drive economic development; it should incentivize research and discoveries that advance humanitarian needs. I have worked to promote policies that encourage intellectual property holders to apply their work to address global humanitarian challenges. Today, I continue that effort by joining with Senator GRASSLEY to introduce the bipartisan Patents for Humanity Program Improvement Act.

This bipartisan legislation strengthens a program created by the United States Patent and Trademark Office, PTO, in 2012. The PTO’s Patents for Humanity Program provides rewards to selected patent holders who use their invention to address a humanitarian issue that significantly affects the public health or quality of life of an impoverished population. Those who receive the award are given a certificate to accelerate certain PTO processes, as described in the program rules.

The award that have been recognized by this program help underserved people throughout the world. Award winners have worked to improve the treatment and diagnosis of devastating diseases, improve nutrition and the environment, and combat the spread of dangerous counterfeit drugs. These are innovations that will make a real difference in the lives of people who are not always the beneficiaries of cutting-edge technology.

Following a Judiciary Committee hearing in 2012 I asked then-PTO Director Kappos whether the Patents for Humanity program would be more effective, and more attractive to inventors, if the acceleration certificates awarded were transferable to a third party. He responded that it would, and that it would be particularly beneficial to small businesses that win the award. Since that time, other small start-ups and global health groups have emphasized that making the certificates transferable would improve their usability and increase the incentives of the Patents for Humanity Award. The Patents for Humanity Program Improvement Act makes this enhancement to the program. It is a straightforward, cost-neutral bill that will strengthen this award and encourage innovations to be used for humanitarian goods.

When Congress can establish policies that provide business incentives for humanitarian endeavors, it should not hesitate to act. I urge the Senate to work swiftly to pass this legislation.

SUBMITTED RESOLUTIONS

SENATE CONCURRENT RESOLUTION 17—ESTABLISHING A JOINT SELECT COMMITTEE TO CONDUCT REGULATORY REFORM

Mr. ROUNDs (for himself, Mr. MANCHIN, Mr. THUNE, Mr. INHOFE, Mrs. CAPITO, Mr. RISCH, Mr. HOEVEN, and Ms. COLLINS) submitted the following concurrent resolution; which was referred to the Committee on Rules and Administration:

S. CON. RES. 17

Whereas there are more than 3,500 rules issued every year by more than 50 Federal agencies;

Whereas a rule is defined in section 551 of title 5, United States Code, as “the whole or part of an agency statement of general or particular applicability and future effect designed to implement, interpret, or prescribe law or policy”;

Whereas subchapter II of chapter 5, and chapter 7, of title 5, United States Code (commonly known as the “Administrative Procedure Act”) establishes standards for the issuance of rules using formal rulemaking and informal rulemaking procedures;

Whereas informal rulemaking, also known as “notice and comment” rulemaking or “section 553” rulemaking, is the most common type of rulemaking;

Whereas in rulemaking proceedings, formal hearings must be held and interested parties must be given the chance to comment on the proposed rule or regulation, and that rule or regulation is required to be published in the Federal Register;

Whereas, according to a 2005 study commissioned by the Small Business Administration, the cost of all rules in effect was approximately $1,100,000,000,000 per year, more than the people of the United States paid in Federal income taxes in 2009;

Whereas, according to the 2014 Ten Thousand Commandments report by the Competitive Enterprise Institute, the top 6 Federal rulemaking agencies (which, in 2013, were the Departments of the Treasury, Commerce, Interior, Health and Human Services, and Transportation and the Environmental Protection Agency) account for 49.3 percent of all Federal rules;

Whereas, according to the 2014 Ten Thousand Commandments report by the Competitive Enterprise Institute, small businesses pay more in per-employee regulatory costs, and firms with fewer than 20 employees pay an average of $10,585 per employee, compared to $7,755 for those with 500 or more employees;

Whereas, according to the 2014 Ten Thousand Commandments report by the Competitive Enterprise Institute, regulatory costs amount to an average of $14,974 per household, which is 23 percent of the average household income, and 26 percent of the expenditure budget of $51,442;

Whereas, according to a 2011 study by the Weidenbaum Center at Washington University, it is estimated that the budgetary cost of administering and enforcing Federal regulations by Federal agencies for fiscal year 2012 amounted to more than $57 billion (in 2013 dollars), which represents a 10.5 percent increase in 2 years;

Whereas chapter 8 of title 5, United States Code (commonly known as the “Congressional Review Act”) established a mechanism through which Congress could overturn Federal regulations by enacting a joint resolution of disapproval;

Whereas the Congressional Review Act requires that rules that have a $100,000,000 effect or more on the economy are submitted by agencies to both Houses of Congress and published by the Office of the Federal Register; and

Whereas, since the enactment of the Congressional Review Act in 1996, the procedures under the Act have been used 1 time to overturn a rule: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring),

SECTION 1. SHORT TITLE.

This resolution may be cited as the “Regulation Sensibility Through Oversight Restoration Resolution of 2015” or the “RESTORE Resolution of 2015”.

SEC. 2. JOINT SELECT COMMITTEE ON REGULATORY REFORM.

There is established a joint select committee to be known by the Joint Select Committee on Regulatory Reform (hereinafter in this resolution referred to as the “Joint Select Committee”).

SEC. 3. DUTIES OF JOINT SELECT COMMITTEE.

(a) DEFINITIONS.—In this section, the terms “agency” and “rule” have the meanings given those terms in section 551 of title 5, United States Code.

(b) DUTIES.—The Joint Select Committee shall—

(1) conduct a systematic review of the process by which rules are promulgated by agencies;

(2) hold hearings on the effects of and how to reduce regulatory overreach in all sectors of the economy;

(3) conduct a review of the Code of Federal Regulations to identify rules and sets of rules that should be repealed;

(4) submit to the Senate and the House of Representatives—

(A) recommendations for legislation—

(i) to create a process under which an agency, before promulgating a rule, shall—

(I) seek advice from Congress;

(II) publish the proposed rule;

(III) hold a public comment period on the proposed rule;

(IV) seek advice from Congress based on the public comments; and

(V) hold issuance of the rule until Congress can review the rule for a period of not more than 1 year; and

(ii) to ii) create a process to appropriately sunset as many rules as possible;

(B) recommendations for ways to reduce the financial burden placed on the various sectors of the economy in order to comply with regulations;

(C) an analysis of the feasibility of the creation of a permanent Joint Committee on Rules Review in accordance with subsection (c)(2); and

(D) an analysis of the feasibility of requiring each agency to submit each proposed rule of the agency to the appropriate committee of Congress for review in a similar manner as set forth for a permanent Joint Committee on Rules Review under subsection (c); and

(E) a list of rules and sets of rules that the Joint Select Committee recommends should be repealed.

(c) ANALYSIS OF PERMANENT JOINT COMMITTEE ON RULES REVIEW.—The Joint Select Committee shall analyze the feasibility of the creation of a permanent Joint Committee on Rules Review. The Joint Committee on Rules Review would—

(1) review each proposed rule that an agency determines is likely to have an annual effect on the economy of $50,000,000 or more before promulgating a rule; or

(2) require each agency to submit to the Committee—

(A) the text of each proposed rule of the agency described in paragraph (1); and

(B) an analysis of the economic impact of the rule on the economy;

(3) require each agency to revise a proposed rule submitted under paragraph (2) if the Committee determines that the proposed rule—

SEC. 4. APPOINTEES OF JOINT SELECT COMMITTEE.

The joint select committee shall consist of 4 Members of the Senate, 4 Members of the House of Representatives, and 2 alternates.

SEC. 5. TERRITORY AND POSSESSION REPRESENTATION.

The joint select committee shall consist of 2 Members appointed by the Senate; 2 Members appointed by the House of Representatives; and 2 alternates, each to be appointed by the leadership of each House of Congress.”

SCHOFIELD, Mr. GRASSLEY, Mr. MANCHIN, Mr. HUBERT, Mr. THUNE, Mr. INHOFE, Mr. ROSS, Mr. KAPPOs, Mr. RISCH, Mr. HOEVEN, and Ms. COLLINS.”
(A) needs to be significantly rewritten to accomplish the intent of the agency or address the recommendations or objections of the Committee;
(B) may not be exercised in the absence of delegated authorization from Congress;
(C) is not in proper form;
(D) is inconsistent with the intent of Congress, the provisions of law that the proposed rule implements; or
(E) is not a reasonable implementation of the law.
(4) shall not delay the effective date of a proposed rule for a period of more than 1 year beginning on the date on which the agency submits the proposed rule under paragraph (2);
(5) may not adopt a final rule without any delay in the effective date of the rule if the agency designates the rule as an emergency rule, unless the Committee by majority vote determines that the rule is not an emergency rule; and
(6) if applicable, recommend that Congress should overturn a final rule promulgated by an agency by enacting a joint resolution of disapproval.

SEC. 4. COMPOSITION OF JOINT SELECT COMMITTEE.
(a) MEMBERS.—
(1) GENERAL.—The Joint Select Committee shall be composed of 30 members, of whom—
(A) 15 shall be appointed by the majority and the minority leaders of the Senate from among Members of the Senate in a manner that reflects the ratio of the number of Members of the Senate from the majority party to the number of Members of the Senate from the minority party on the date of enactment of this Act; and
(B) 15 shall be appointed by the Speaker and the minority leader of the House of Representatives among Members of the House of Representatives in a manner that reflects the ratio of the number of Members of the House of Representatives from the majority party to the number of Members of the House of Representatives from the minority party on the date of enactment of this Act.
(2) DATE.—The appointments of the members of the Joint Select Committee shall be made not later than 30 days after the date of adoption of this concurrent resolution.
(b) VACANCIES.—Any vacancy in the Joint Select Committee shall not affect its powers, but shall be filled in the same manner as the original appointment.
(c) CHAIRPERSON AND VICE CHAIRPERSON.—
(1) CHAIRPERSON.—The members of the Joint Select Committee shall elect a Chairperson, which shall, to the extent permitted by law, access to any such information or materials obtained by any other department or agency of the Federal Government or by any other governmental department, agency, or body investigating the matters described in section 3(b).
(2) INTERIM REPORTS.—The Joint Select Committee shall have, to the fullest extent permitted by law, access to any such information, correspondence, memoranda, papers, documents, tapes, and any other materials in whatever form the Joint Select Committee considers advisable.
(3) COOPERATION OF OTHER COMMITTEES.—In carrying out the duties of the Joint Select Committee, the Joint Select Committee may obtain the input and cooperation of any other standing committee of the Senate or the House of Representatives.

SEC. 7. REPORTS.
(a) GENERAL.—Not later than 90 days after the date on which the Joint Select Committee submits the joint concurrence of the Chairperson and Vice Chairperson, the Joint Select Committee shall submit to the Senate and the House of Representatives a report, which shall contain—
(1) the results and findings of the reviews and hearings carried out by the Joint Select Committee pursuant to this resolution; and
(2) any information required to be submitted under paragraphs (1) and (2) of subsection (a) of section 3.
(b) INTERIM REPORTS.—The Interim Reports of the Joint Select Committee may submit to the Senate and the House of Representatives such interim reports as the Joint Select Committee considers appropriate.

SEC. 8. ADMINISTRATIVE PROVISIONS.
(a) STAFF.—
(1) GENERAL.—The Joint Select Committee may employ such additional rules or procedures if the Chairperson and Vice Chairperson agree, or if the Joint Select Committee, by majority vote determines, that such additional rules or procedures are necessary or advisable to conduct the duties of the Joint Select Committee.

(b) ADDITIONAL RULES AND PROCEDURES.—The Joint Select Committee may adopt such additional rules or procedures if the Chairperson and Vice Chairperson agree, or if the Joint Select Committee, by majority vote determines, that such additional rules or procedures are necessary or advisable to conduct the duties of the Joint Select Committee.

(c) MAJORITY STAFF.—The Joint Select Committee may adopt such additional rules or procedures if the Chairperson and Vice Chairperson agree, or if the Joint Select Committee, by majority vote determines, that such additional rules or procedures are necessary or advisable to conduct the duties of the Joint Select Committee.

(d) MAJORITY STAFF.—The majority staff shall be appointed and may be removed, by the Chairperson and shall work under the general supervision and direction of the Chairperson.

(e) MINORITY STAFF.—The minority staff shall be appointed and may be removed, by the Vice Chairperson and shall work under the general supervision and direction of the Vice Chairperson.

(f) NONDESIGNATED STAFF.—Nondesignated staff shall be appointed, and may be removed, jointly by the Chairperson and Vice Chairperson, and shall work under the joint general supervision and direction of the Chairperson and Vice Chairperson.

(c) MAJORITY STAFF.—The Chairperson shall fix the compensation of all personnel of the majority staff of the Joint Select Committee.

(d) MINORITY STAFF.—The Vice Chairperson and Vice Chairperson shall jointly fix the compensation of all personnel of the minority staff of the Joint Select Committee.

(e) NONDESIGNATED STAFF.—The Chairperson and Vice Chairperson shall jointly fix the compensation of all nondesignated staff.

(f) PAY AND BENEFITS.—All employees of the Joint Select Committee shall be treated as employees of the agencies of discharging pay and processing benefits.

(g) FACILITIES.—The Joint Select Committee may use, with the prior consent of the Chairperson and the Speaker of the House of Representatives, the facilities of any other committee of the House of Representatives, whenever the Joint Select Committee or the Chairperson and Vice Chairperson consider that such action is necessary or appropriate to enable the Joint Select Committee to carry out the responsibilities, duties, or functions of the Joint Select Committee under this resolution.

(h) DETAIL OF EMPLOYEES.—The Joint Select Committee may use on a reimbursable basis, with the prior consent of the Chairperson and the Speaker of the House of Representatives, the services of personnel of the department or agency.

(i) TEMPORARY AND INTERMITTENT SERVICES.—The Joint Select Committee may provide temporary services or functions of individual consultants or organizations.

(j) ETHICS.—The Joint Select Committee shall establish ethical rules for the members and employees of the Joint Select Committee, which shall, to the extent practicable, be comparable to the ethical rules that apply to employees of the Senate.

(k) AUTHORIZATION OF APPROPRIATIONS.—For the expenses of the Joint Select Committee, there are authorized to be appropriated $3,000,000 for fiscal year 2015, to remain available until expended.

SEC. 9. EFFECTIVE DATE; TERMINATION.
(a) EFFECTIVE DATE.—This resolution shall take effect on the date of adoption of this concurrent resolution.
(b) TERMINATION.—The Joint Select Committee shall terminate on the date that is 1 year after the appointment of the members of the Joint Select Committee.
(c) DISPOSITION OF RECORDS.—Upon termination of the Joint Select Committee, the members of the Joint Select Committee shall become the records of any committee or committees designated by the majority leader of the Senate and the Speaker of the House of Representatives to the concurrence of the minority leader of the Senate and the House of Representatives.
AMENDMENTS SUBMITTED AND PROPOSED

SA 1412. Mr. MANCHIN submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1413. Mr. MANCHIN (for himself and Ms. WARREN) submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1414. Mr. MANCHIN submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1415. Ms. CANTWELL submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1416. Mrs. SHAHEEN submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1417. Ms. HEITKAMP submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1418. Mr. INHOFE submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1419. Mr. SULLIVAN submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1420. Mr. SULLIVAN submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1421. Ms. BLUMENTHAL (for himself and Mr. BROWN) submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1422. Mr. HEINRICH submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1423. Mrs. SHAHEEN submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1424. Mrs. FEINSTEIN submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1425. Ms. HIRONO submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1426. Ms. SCHFATZ submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1427. Mr. SCHATZ submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1428. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1429. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1430. Mr. MENENDEZ submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1431. Mr. FRANKEN (for himself and Ms. STABENOW) submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1432. Ms. BALDWIN submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1433. Ms. BALDWIN submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1434. Mr. HATCH submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1435. Mr. HATCH submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1436. Ms. MACDONALD submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1437. Ms. WASHINGTON (for himself and Mr. BROWN) submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1438. Mr. SCHATZ submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 1412. Mr. MANCHIN submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1414. Mr. MANCHIN submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1428. Mr. SANDERS submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1429. Mr. SANDERS submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1430. Mr. MENENDEZ submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1431. Mr. FRANKEN (for himself and Ms. STABENOW) submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1432. Ms. BALDWIN submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1433. Ms. BALDWIN submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1434. Mr. HATCH submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1435. Mr. HATCH submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1436. Ms. MACDONALD submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1437. Ms. WASHINGTON (for himself and Mr. BROWN) submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1438. Mr. SCHATZ submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1428. Mr. SANDERS submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1429. Mr. SANDERS submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1430. Mr. MENENDEZ submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1431. Mr. FRANKEN (for himself and Ms. STABENOW) submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1432. Ms. BALDWIN submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1433. Ms. BALDWIN submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1434. Mr. HATCH submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1435. Mr. HATCH submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1436. Ms. MACDONALD submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1437. Ms. WASHINGTON (for himself and Mr. BROWN) submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1438. Mr. SCHATZ submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1428. Mr. SANDERS submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.

SA 1429. Mr. SANDERS submitted an amendment intended to be proposed to the bill H.R. 1314, supra; which was ordered to lie on the table.
TITLE III—MISCELLANEOUS

SEC. 301. EXTENSION OF AUTHORITY OF EXPORT-IMPORT BANK OF THE UNITED STATES.

(a) In General.—Section 7 of the Export-Import Bank Act of 1945 (12 U.S.C. 635f) is amended by striking “September 30, 2014” and inserting “December 31, 2015”.

(b) Rule of Construction.—Section 1(c) of the Export-Import Bank Act of 1945 (12 U.S.C. 635 note) is amended by striking “September 30, 2014” and inserting “December 31, 2015”.

(d) Effective Date.—The amendments made by this section shall take effect on the date of enactment of this Act or June 30, 2015.

SA 1413. Mr. MANCHIN (for himself and Ms. WARREN) submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:

On page 78, line 22, strike “as a whole” and insert “as a whole, on the economy of each State.”.

SA 1414. Mr. MANCHIN submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:

Beginning on page 44, strike line 10 and all that follows through page 45, line 9, and insert the following:

(iii) either House of Congress to consider any extension approval resolution not after June 30, 2018.

SA 1416. Mrs. SHAHEEN submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:

At the end of section 109, add the following:

(c) Outreach and Input From Small Businesses to Trade Promotion Authority.—Section 609 of title 5, United States Code, is amended by adding at the end thereof the following:

"(x) Not later than 30 days after the date on which the President submits the notification required under section 5(a) of the Bipartisan Congressional Trade Priorities and Accountability Act of 2015, the Chief Counsel for Advocacy of the Small Business Administration (in this subsection referred to as the ‘Chief Counsel’) shall convene an Interagency Working Group (in this subsection referred to as the ‘Working Group’), which shall consist of an employee from each of the following agencies, as selected by the head of such agency or an official delegated by the head of such agency:

(1) The Office of the United States Trade Representative.
(2) The Department of Commerce.
(3) The Department of Agriculture.

(2) Any other agency that the Chief Counsel, in consultation with the United States Trade Representative, determines to be relevant with respect to the subject of the trade agreement being negotiated pursuant to section 3(b) of the Bipartisan Congressional Trade Priorities and Accountability Act of 2015 (in this subsection referred to as the ‘covered trade agreement’), shall submit an annual report on the progress of the Working Group only if the Working Group determines that—

(i) the office or department is acting as the ‘Working Group’;

(ii) the number of small entity participants by the ‘Working Group’.

The Working Group shall identify a diverse group of small entities, representatives of small entities, or a combination thereof, to provide information and feedback on the economic impacts of the covered trade agreement on small entities, which shall—

(i) identify the most important priorities, opportunities, and challenges to various industries from the covered trade agreement;

(ii) assess the impact for new small entities to start exporting, or increase their exports, to markets in the covered trade agreement;

(iii) analyze the competitive position of industries likely to be significantly affected by the covered trade agreement;

(iv) identify any rule of an agency that should be modified to become compliant with the covered trade agreement; and

(v) include an overview of the methodology used to develop the report, including the number of small entity participants by industry, how those small entities were selected, and any other factors that the Chief Counsel may determine appropriate.

(3) To ensure that negotiations for the covered trade agreement are not disrupted, the President may require that the Chief Counsel delay submission of the report under subsection (2) until after the negotiations of the covered trade agreement are concluded, provided that the delay allows the Chief Counsel to submit the report to Congress not later than 45 days before the Senate or the House of Representatives acts to approve or disapprove the covered trade agreement.

(B) The Chief Counsel shall, to the extent practicable, coordinate the submission of the report under this paragraph with the United States International Trade Commission, the United States Trade Representative, other agencies, and trade advisory committees to avoid unnecessary duplication of reporting requirements.

(d) State Trade Expansion Program.—Section 22 of the Small Business Act (15 U.S.C. 632) is amended—

(1) by redesignating subsection (l) as subsection (m) and—

(2) by inserting after subsection (k) the following:

(1) STATE TRADE EXPANSION PROGRAM.—

(I) DEFINITIONS.—In this subsection—

(A) the term ‘eligible small business concern’ means a business concern that—

(i) is organized or incorporated in the United States;

(ii) is operating in the United States;

(iii) has access to sufficient resources to bear the costs associated with trade, including the costs of packing, shipping, freight forwarding, and customs brokers;

(B) the term ‘program’ means the State Trade Expansion Program established under paragraph (2); and

(C) the term ‘rural small business concern’ means an eligible small business concern located in a rural area, as that term is defined in section 1390(a)(2) of the Internal Revenue Code of 1986.

(Sec. 301. Extension of Authority of Export-Import Bank of the United States.)
(D) the term ‘socially and economically disadvantaged small business concern’ has the meaning given that term in section 8(a)(4)(A) of the Small Business Act (15 U.S.C. 637(a)(18));

(E) the term ‘State’ means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, and the Commonwealth of the Northern Mariana Islands, and American Samoa.

(2) ESTABLISHMENT OF PROGRAM.—The Association Administrator shall establish a State Trade Expansion Program, to make grants to States to carry out programs that assist eligible small business concerns in—

(A) a market expansion sales trip;

(B) a subscription to services provided by the Department of Commerce;

(C) the payment of website fees;

(D) the design of marketing media;

(E) a trade show exhibition;

(F) participation in training workshops;

(G) a reverse trade mission;

(H) procurement of consular services (after consultation with the Department of Commerce to avoid duplication); or

(I) any other initiative determined appropriate by the Association Administrator.

(3) GRANTS.—

(A) JOINT REVIEW.—In carrying out the program, the Administrator may make a grant to a State to increase the number of eligible small business concerns in the State exploring significant new trade opportunities.

(B) CONSIDERATIONS.—In making grants under this subsection, the Association Administrator may give priority to an application that proposes a program that—

(i) focuses on eligible small business concerns as part of a trade expansion program;

(ii) demonstrates intent to promote trade expansion by—

(I) socially and economically disadvantaged small business concerns;

(II) small business concerns owned or controlled by women; and

(III) rural small business concerns; and

(iii) includes—

(I) activities which have resulted in the highest return on investment based on the most recent year; and

(II) the adoption of shared best practices included in the annual report of the Administrator.

(C) LIMITATIONS.—

(i) SINGLE APPLICATION.—A State may not submit more than 1 application for a grant under this subsection in any 1 fiscal year.

(ii) PROPORION OF AMOUNTS.—The total value of grants made under the program during a fiscal year to the 10 States with the highest percentage of eligible small business concerns, based upon the most recent data available from the Department of Commerce, shall not be more than 40 percent of the amount appropriated for the program for that fiscal year.

(iii) DURATION.—The Association Administrator shall award a grant under this program for a period of not more than 2 years.

(D) APPLICATION.—

(i) IN GENERAL.—A State desiring a grant under the program shall submit an application at such time, in such manner, and accompanied by such information as the Association Administrator may establish.

(ii) CONSULTATION TO REDUCE DUPLICATION.—A State desiring a grant under the program shall—

(I) before submitting an application under clause (i), consult with applicable trade agencies in the Executive Office of the President and the Department of Commerce; and

(II) document the consultation conducted under clause (I) in the application submitted under subsection (a) of this section.

(4) COMPETITIVE BASIS.—The Association Administrator shall award grants under the program on a competitive basis.

(5) FEDERAL SHARE.—The Federal share of the cost of an expansion program carried out using a grant under the program shall be—

(A) for a State that has a high trade volume, as determined by the Association Administrator, not more than 65 percent; and

(B) for a State that does not have a high trade volume, as determined by the Association Administrator, not more than 75 percent.

(6) NON-FEDERAL SHARE.—The non-Federal share of the cost of a trade expansion program carried out using a grant under the program shall be comprised of not less than 50 percent cash and not more than 50 percent of indirect costs and in-kind contributions, except that no such costs or contributions may be derived from funds from any other Federal program.

(7) REPORTS.—

(A) INITIAL REPORT.—Not later than 120 days after the date of enactment of this subchapter, the Inspector General of the General Services Administration shall submit to the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business of the House of Representatives a report, which shall include—

(I) a description of the structure and procedures for the program; and

(ii) a list of the States receiving a grant under the program.

(B) ANNUAL REPORTS.—

(i) IN GENERAL.—The Association Administrator shall submit a report to the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business of the House of Representatives a report, which shall include—

(I) a description of the merit-based review process to the program;

(ii) a description of the performance of the activities being conducted and the results of the measurements; and

(iii) the overall management and effectiveness of the program.

(B) REPORTS.—

(i) PILOT PROGRAM.—Not later than 6 months after the date of enactment of this subchapter, the Inspector General of the General Services Administration shall submit to the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business of the House of Representatives a report regarding the performance of the review conducted under subparagraph (A).

(8) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out the program—

(A) $30,000,000 for fiscal year 2016;

(B) $35,000,000 for fiscal year 2017;

(C) $40,000,000 for fiscal year 2018;

(D) $45,000,000 for fiscal year 2019; and

(E) $50,000,000 for fiscal year 2020.

(9) MEMBERSHIP OF REPRESENTATIVES OF STATE TRADE PROMOTION AGENCIES ON TRADE PROMOTION COORDINATION COMMITTEE.—

(A) IN GENERAL.—The TPCC shall also include 1 or more members appointed by the President, after consultation with associations representing State trade promotion agencies, who are representatives of State trade promotion agencies.

(B) TERM.—A member appointed under subparagraph (A) shall serve for a term of 2 years.

(C) PERSONNEL MATTERS.—

(i) NO COMPENSATION.—A member of the TPCC appointed under subparagraph (A) shall serve without compensation.

(ii) TRAVEL EXPENSES.—A member of the TPCC appointed under subparagraph (A) shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized by law for Federal employees, traveling on official business for the TPCC.

(iii) ADMINISTRATIVE ASSISTANCE.—The Secretary of Commerce, or the head of another agency, as appropriate, shall make available to a member of the TPCC appointed under subparagraph (A) administrative services and assistance, including a security clearance, as the member may reasonably require to carry out services for the TPCC.

(10) STATE AND FEDERAL EXPORT PROMOTION COORDINATION WORKING GROUP.

(A) STATE AND FEDERAL EXPORT PROMOTION COORDINATION WORKING GROUP.—There is authorized to be appropriated to—

(B) REPORTS.—

(i) PILOT PROGRAM.—Not later than 6 months after the date of enactment of this subchapter, the Inspector General of the General Services Administration shall submit to the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business of the House of Representatives a report regarding the performance of the review conducted under subparagraph (A).

(9) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out the program—

(A) $30,000,000 for fiscal year 2016;

(B) $35,000,000 for fiscal year 2017;

(C) $40,000,000 for fiscal year 2018;

(D) $45,000,000 for fiscal year 2019; and

(E) $50,000,000 for fiscal year 2020.

(e) MEMBERSHIP OF REPRESENTATIVES OF STATE TRADE PROMOTION AGENCIES ON TRADE PROMOTION COORDINATION COMMITTEE.—

(A) IN GENERAL.—The TPCC shall also include 1 or more members appointed by the President, after consultation with associations representing State trade promotion agencies, who are representatives of State trade promotion agencies.

(B) TERM.—A member appointed under subparagraph (A) shall serve for a term of 2 years.

(C) PERSONNEL MATTERS.—

(i) NO COMPENSATION.—A member of the TPCC appointed under subparagraph (A) shall serve without compensation.

(ii) TRAVEL EXPENSES.—A member of the TPCC appointed under subparagraph (A) shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized by law for Federal employees; traveling on official business for the TPCC.

(iii) ADMINISTRATIVE ASSISTANCE.—The Secretary of Commerce, or the head of another agency, as appropriate, shall make available to a member of the TPCC appointed under subparagraph (A) administrative services and assistance, including a security clearance, as the member may reasonably require to carry out services for the TPCC.

(5) STATE AND FEDERAL EXPORT PROMOTION COORDINATION WORKING GROUP.—There is authorized to be appropriated to—
in export promotion and export financing activities. "

(b) ESTABLISHMENT.—The President shall establish a Small Business Interagency Task Force on Export Financing (in this section referred to as the 'Working Group') as a subcommittee of the Trade Promotion Coordinating Committee (in this section referred to as the 'TPCC'). (c) PURPOSES.—The purposes of the Working Group are—

"(1) identify issues related to the coordination of Federal resources relating to export promotion and export financing with such resources provided by State and local governments; (2) to identify ways to improve coordination with respect to export promotion and export financing activities through the strategic planning developed under section 2312(c); (3) to develop a strategy for improving coordination of Federal and State resources relating to export promotion and export financing, including methods to eliminate duplication of effort and overlapping functions; and (4) to develop a strategic plan for considering and implementing the suggestions of the Working Group as part of the strategic plan developed under section 2312(c)."

"(d) The Secretary of Commerce shall select the members of the Working Group, who shall include—

"(1) representatives from State trade agencies representing regionally diverse areas; and (2) representatives of the departments and agencies that are represented on the TPCC, who are designated by the heads of their respective departments or agencies to advise the head on ways of promoting the exportation of United States goods and services."

(g) REPORT ON IMPROVEMENTS TO EXPORT.GOV AS A SINGLE WINDOW FOR EXPORT INFORMATION.—

"(1) IN GENERAL.—Not later than 180 days after the date of enactment of this Act, the Associate Administrator for International Trade of the Small Business Administration shall, after consultation with the entities specified in paragraph (2), submit to the appropriate congressional committees a report that includes the recommendations of the Associate Administrator for improving the experience provided by the Internet website Export.gov (or a successor website) including (A) a comprehensive resource for information about exporting articles from the United States; and (B) a single website for exporters to submit all information required by the Federal Government with respect to the exportation of articles from the United States."

the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:

On page 116, beginning on line 4, strike “and national security,” and insert “occupational safety and health, compensation in cases of occupational injuries and illnesses, and social security and retirement,”

SA 1423. Mrs. SHAHEEN submitted an amendment intended to be proposed to amendment SA 1221 submitted by Mr. CARDIN, to amend the section to insert ‘‘occupational safety and health, compensation in cases of occupational injuries and illnesses, and social security and retirement,’’

SA 1424. Mrs. FEINSTEIN submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:

Beginning on page 17 of the amendment, strike line 14 and all that follows through page 18, line 11.

SA 1424. Mrs. FEINSTEIN submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:

TITTLE III—TRADE PREFERENCES FOR NEPAL

SEC. 301. SHORT TITLE. This title may be cited as the “Nepal Trade Preferences Act”.

SEC. 302. SENSE OF CONGRESS. It is the sense of Congress that it should be an objective of the United States to use trade policies and trade agreements to contribute to the reduction of poverty and the elimination of hunger.

SEC. 303. ELIGIBILITY REQUIREMENTS. (a) In General.—The President may authorize the provision of preferential treatment under this title to textile and apparel articles imported from Nepal to which preferential treatment is extended under this title to the extent that the United States and attributed to the 35-percent reduction in duty applied to the 35-percent reduction in duty on the day before the date of the enactment of this Act.

(b) ARTICLES DESCRIBED.—(1) IN GENERAL.—An article is described in this subsection if—

(A)(i) the article is the growth, product, or manufacture of Nepal; and

(B) in the case of a textile or apparel article, Nepal is the country of origin of the article, as determined under section 102.1 of title 19, Customs and Border Protection regulations in effect on the day before the date of the enactment of this Act;

(2) the article is classified under any of the following subheadings of the Harmonized Tariff Schedule of the United States and is extended under this title to the extent that the United States and attributed to the 35-percent reduction in duty on the day before the date of the enactment of this Act:

SEC. 304. DETERMINATION OF TRADE PREFERENCES FOR NEPAL. SEC. 305. DETERMINATION OF TRADE FACILITATION AND CAPACITY BUILDING. (a) FINDINGS.—Congress makes the following findings:

(1) The World Bank has found evidence that the overall export competitiveness of Nepal has been declining since 2005. Indices compiled by the World Bank and the Organization for Economic Co-operation and Development found that export costs in Nepal are high with respect to both air cargo and container shipments relative to other low-income countries. Such indices also identify particular weaknesses in Nepal with respect to automation of customs and other trade functions, involvement of local exporters and importers in preparing regulations and trade rules, and export finance.

(b) ESTABLISHMENT OF TRADE FACILITATION AND CAPACITY BUILDING PROGRAM.—Not later than 180 days after the date of the enactment of this Act, the President shall, in consultation with the Government of Nepal, establish a trade facilitation and capacity building program for Nepal—

(1) to enhance the central export promotion agency of Nepal to support successful exporters and to build awareness among potential exporters in Nepal about opportunities abroad and ways to manage trade documentation and regulations in the United States and other countries;

(2) to provide export finance training for financial institutions in Nepal and the Government of Nepal;

(3) to assist the Government of Nepal in maintaining publication of all trade regulations, forms for exporters and importers, tax information, and other guides and information relating to exporting goods on the Internet and developing a robust public-private dialogue, through its National Trade Facilitation Committee, for Nepal to identify timelines for implementation of key reforms and solutions, as provided for under the Agreement on Trade Facilitation of the World Trade Organization.

(c) IN GENERAL.—An article described in subsection (b) may enter the customs territory of the United States free of duty.

SEC. 306. REPORTING REQUIREMENT. Not later than one year after the date of the enactment of this Act, and annually thereafter, the President shall submit a report to Congress on the implementation of this title, the compliance of Nepal with section 306(a), and the trade and investment policy of the United States with respect to Nepal.

SEC. 307. TERMINATION OF PREFERENTIAL TREATMENT. No preferential treatment extended under this title shall remain in effect after December 31, 2025.
SEC. 308. EFFECTIVE DATE.

The provisions of this title shall take effect on January 1, 2016.

SA 1425. Ms. HIRONO submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:

At the end of title II, add the following:

SEC. 311. EXPANSION OF ADJUSTMENT ASSISTANCE TO TERRITORIES.

(a) In General.—Except as provided in subsection (b), during the period beginning on October 1, 2015, and ending on June 30, 2021, workers, firms, and agricultural commodity producers in American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, or the Virgin Islands of the United States shall be eligible for adjustment assistance under chapters 2 through 6 of title II of the Trade Act of 1974 (19 U.S.C. 2271 et seq.) to the same extent as workers, firms, and agricultural commodity producers in a State (as defined in section 247 of that Act (19 U.S.C. 2271)).

(b) Exception.—Benefits under sections 231 through 234 of the Trade Act of 1974 (19 U.S.C. 2291 through 2294) and under section 234 of the Trade Act of 1974 (19 U.S.C. 2291) shall not be available to workers in American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, or the Virgin Islands of the United States.

(c) FORMULA FOR TRAINING FUNDS.—In making distributions of funds for a fiscal year under section 234 of the Trade Act of 1974 (19 U.S.C. 2294), the Secretary of Labor shall distribute an amount equal to 1 percent of such funds among American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, and the Virgin Islands of the United States, based on criteria established by the Secretary.

(d) REGULATORY CHANGES.—The Secretary of Labor and the heads of other appropriate agencies shall make the necessary changes to the regulations governing the Department of Labor and those other agencies in order to carry out this section.

SA 1426. Ms. HIRONO submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:

On page 64, between lines 16 and 17, insert the following:

(f) Consultations With Trade Advisory Committees.—

(1) In General.—Section 135 of the Trade Act of 1974 (19 U.S.C. 2155) is amended by striking subsection (m) and inserting the following:

"(m) CONGRESSIONAL CONSULTATIONS WITH ADVISORY COMMITTEES.—

"(1) Consultations by congressional committees.—An appropriate congressional committee may request consultations with an advisory committee established under subsection (b) or (c) with respect to trade agreements in effect or negotiations for trade agreements.

"(2) Consultations by members of congress and congressional staff.—Members of Congress and staff of such Members with proper security clearances may consult with individual members of an advisory committee established under subsection (b) or (c) with respect to trade agreements in effect or negotiations for trade agreements.

"(3) APPLICATION OF CERTAIN FACA REQUIREMENTS.—(A) The approval of the designated Federal officer for an advisory committee established under subsection (b) or (c) shall not be required with respect to consultations under paragraph (1) or (2).

"(4) REPORTS.—(A) In general.—An advisory committee established under subsection (b) or (c) may at any time submit to the President a report on matters being considered by the committee without the approval of the designated Federal officer for that committee.

"(B) Submission to Congress.—A report submitted to the President under paragraph (1), including any dissenting or minority views, shall be submitted to the congressional committees and Members of Congress and staff of such Members with proper security clearances.

"(5) Public Availability.—If a report of an advisory committee submitted to the President under paragraph (1) does not include any classified information, the advisory committee may request the designated Federal officer for that committee to make the report available to the public.

"(6) Consultation.—After dissemination of a report of an advisory committee to Congress and staff of such Members with proper security clearances.

"(7) LIMITATIONS ON PROCEDURES WITH RESPECT TO AGREEMENTS WITH CERTAIN COUNTRIES.—The trade authorities procedures shall not apply to any implementing bill submitted with respect to a trade agreement or trade agreements entered into under section 103(b) with a country with respect to which the United States has not yet promulgated import rules as required by section 904(b) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 384(b)).

SA 1427. Mr. SCHATZ submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:

At the end of section 106(b), add the following:

"(7) LIMITATIONS ON PROCEDURES WITH RESPECT TO AGREEMENTS WITH CERTAIN COUNTRIES.—The trade authorities procedures shall not apply to any implementing bill submitted with respect to a trade agreement or trade agreements entered into under section 103(b) with a country with respect to which the United States has not yet promulgated import rules regulating the importation of prescription drugs.

SA 1428. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:

At the end of section 106(b), add the following:

"(7) LIMITATIONS ON PROCEDURES WITH RESPECT TO AGREEMENTS WITH CERTAIN COUNTRIES.—The trade authorities procedures shall not apply to any implementing bill submitted with respect to a trade agreement or trade agreements entered into under section 103(b) with a country with respect to which the United States has not yet promulgated import rules that seek to protect wildlife, forests, or living marine resources.

SA 1429. Mr. MENENDEZ submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:

At the end of section 106(b), add the following:

"(7) LIMITATIONS ON PROCEDURES WITH RESPECT TO AGREEMENTS WITH CERTAIN COUNTRIES.—The trade authorities procedures shall not apply to any implementing bill submitted with respect to a trade agreement or trade agreements entered into under section 103(b) with a country with respect to which the United States has not yet promulgated import rules regulating the importation of prescription drugs.

SA 1430. Mr. MENENDEZ submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:
SA 1432. Mr. FRANKEN (for himself and Ms. STABENOW) submitted an amendment intended to be proposed to amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for an affordable private-market-based appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. 199. COMMUNITY COLLEGE AND INDUSTRY PARTNERSHIPS PROGRAM.

(a) Grants authorized.—From funds appropriated under section 199A, the Secretary of Labor (in coordination with the Secretary of Education and the Secretary of Commerce) shall award competitive grants to eligible entities described in subsection (b) for the purpose of developing, offering, improving, and providing educational or career training programs for workers.

(b) Eligible entity.

(1) Partnerships with employers or an employer or industry partnership.

(A) General definition.—For purposes of this section, an ‘‘eligible entity’’ means any of the entities described in subparagraph (B) (or a consortium of any of such entities) in partnership with employers or an employer or industry partnership representing multiple employers.

(B) Description of entities.—The entities described in subparagraph (A) are—

(i) a community college;

(ii) a 4-year public institution of higher education (as defined in section 101(a) of the Higher Education Act of 1965 (20 U.S.C. 1001(a)) that offers 2-year degrees, and that will use funds provided under this section for activities at the certificate and associate degree levels;

(iii) a Tribal College or University (as defined in section 316(b) of the Higher Education Act of 1965 (20 U.S.C. 1056(b))), or a private or nonprofit, 2-year institution of higher education (as defined in section 102 of the Higher Education Act of 1965 (20 U.S.C. 1002));

(iv) an instructional partnership described in paragraph (1) that meets the criteria established under subsection (d).

(2) Additional partners.

(A) Authorization of additional partners.—In addition to partnering with employers or an employer or industry partnership representing multiple employers as described in paragraph (1), an entity described in paragraph (2) may include in the partnerships described in paragraph (1) or more of the organizations described in subparagraph (B). Each eligible entity that includes additional partners shall collaborate with the State or local board in the area served by the eligible entity.

(B) Organizations.—The organizations described in this subparagraph are as follows:

(i) A provider of adult education (as defined in section 101 of the Higher Education Act of 1965 (20 U.S.C. 1001)).

(ii) A community-based organization.

(iii) A joint labor-management partnership.

(iv) A State or local board.

(v) Any other organization that the Secretaries consider appropriate.

(c) Educational or Career Training Program.—For purposes of this section, the Secretary shall establish criteria for an educational or career training program leading to a recognized postsecondary credential for which an eligible entity submits a grant proposal under subsection (d). The Secretary shall use funds provided under this section for training programs by individuals eligible for financial assistance under title IV of the Higher Education Act of 1965 (20 U.S.C. 1070 et seq.).

(d) Application.—An eligible entity seeking a grant under this section shall submit an application containing a grant proposal, for an educational or career training program leading to a recognized postsecondary credential, to the Secretaries at such time and containing such information as the Secretaries determine is required, including a detailed description of—

(i) the extent to which the educational or career training program described in the grant proposal fits within an overall strategic plan consisting of—

(A) the State plan described in section 102 or 103, for the State involved;

(B) the local plan described in section 108, for each local area that comprises a significant portion of the area to be served by the eligible entity; and

(C) a strategic plan developed by the eligible entity;

(ii) the extent to which the program will meet the needs of employers in the area for skilled workers in in-demand industry sectors and occupations;

(iii) the extent to which the program will meet the educational or career training needs of workers in the area;

(iv) the specific educational or career training program and how the program meets the criteria established under subsection (e), including the manner in which the grant will be used to develop, offer, improve, and provide the educational or career training program;

(v) any previous experience of the eligible entity in providing educational or career training programs, the absence of which shall not automatically disqualify an eligible entity from receiving a grant under this section; and

(vi) how the program leading to the credential meets the criteria described in subsection (e).

(e) Criteria for Award.—

(1) In general.—Grants under this section shall be awarded based on criteria established by the Secretaries, that include the following:

(A) A determination of the merits of the grant proposal submitted by the eligible entity involved to develop, offer, improve, and provide an educational or career training program to be made available to workers.

(B) An assessment of the likely employment opportunities available in the area to individuals who complete an educational or career training program that the eligible entity intends to develop, offer, improve, and provide.

(C) An assessment of prior demand for training programs by individuals eligible for financial assistance under title IV of the Higher Education Act of 1965 (20 U.S.C. 1070 et seq.), as well as availability and capacity of existing training
programs to meet future demand for training programs.

"(2) Priority.—In awarding grants under this section, the Secretary shall give priority to applications that—

(A) include a partnership, with employers or an employer or industry partnership, that—

(i) pays a portion of the costs of educational or career training programs; or

(ii) agrees to hire individuals who have attained a recognized postsecondary credential related to an educational or career training program of the eligible entity;

(B) enter into a partnership with a labor organization or workforce management training program to provide, through the program, technical expertise for occupationally specific education necessary for a recognized postsecondary credential leading to skilled occupation in an in-demand industry sector;

(C) are focused on serving individuals with barriers to employment, low-income, non-traditional students, students who are dislocated workers, students who are veterans, or students who are long-term unemployed;

(D) include any eligible entities serving areas with high unemployment rates;

(E) are eligible entities that include an institution of higher education eligible for assistance under Title III or V of the Higher Education Act of 1965 (20 U.S.C. 1051 et seq.; 20 U.S.C. 1101 et seq.); and

(F) include a partnership, with employers or an employer or industry partnership, that increases domestic production of goods.

(1) USE OF FUNDS.—Grants funds awarded under this section shall be used for one or more of the following:

(1) The development, offering, improvement, and provision of education or career training programs that provide relevant job training for skilled occupations, that lead to recognized postsecondary credentials, that meet the needs of employers in in-demand industry sectors, and that may include registered apprenticeship programs, on-the-job training programs, and programs that support employers in upgrading the skills of their workforce.

(2) The development and implementation of policies and programs to expand opportunities for students to earn a recognized postsecondary credential, including a degree, in in-demand industry sectors and occupations, including by—

(A) facilitating the transfer of academic credits between institutions of higher education, including the transfer of academic credits for courses in the same field of study;

(B) articulation agreements and policies that guarantee transfers between such institutions, including through common course numbering and use of a general education core curriculum;

(C) developing or enhancing student support services programs.

(3) The creation of career pathway programs and occupational training programs that provide a sequence of education or training that will meet the needs of employers in in-demand industry sectors and occupations, including by—

(A) blend basic skills and occupational training;

(B) facilitate means of transitioning participants from non-credit occupational, basic skills, or developmental coursework to for-credit coursework within and across institutions;

(C) build or enhance linkages, including the alignment of dual environment programs and early college high schools, between secondary education or adult education programs (including programs established under Title IV of the Workforce Investment Act of 1998 (29 U.S.C. 2801 et seq.)) and the National Guard or Reserves, to enter skilled occupations in in-demand industry sectors; and

(D) are innovative programs designed to increase the provision of training for students, including students who are members of the National Guard or Reserves, to enter skilled occupations in in-demand industry sectors; and

(E) support paid internships that will allow students to simultaneously earn credit for workplace-based experiences and gain relevant employment experience in an in-demand industry sector or occupation, which shall include opportunities that transition individuals into employment.

(4) The development and implementation of—

(A) a Pay-for-Performance program that leads to a recognized postsecondary credential, for which an eligible entity agrees to be reimbursed under the grant primarily on the basis of achievement of specified performance outcomes and criteria agreed to by the Secretary; or

(B) a Pay-for-Success program that leads to a recognized postsecondary credential, for which an eligible entity—

(i) enters into a partnership with an investor, such as a philanthropic organization that provides funding for a specific project to address a clearly measurable educational or career training need in the area to be served under the grant; and

(ii) agrees to be reimbursed under the grant only if the program serves specified performance outcomes and criteria agreed to by the Secretary.

SEC. 198A. AUTHORIZATION OF APPROPRIATIONS.

(1) IN GENERAL.—There are authorized to be appropriated such sums as may be necessary to carry out the program established by section 199.

(B) ADMINISTRATIVE COST.—Not more than 5 percent of the amounts made available under subsection (a) may be used by the Secretary to administer the program described in that subsection, including providing technical assistance and carrying out evaluations for the program described in that subsection.

(C) PERIOD OF AVAILABILITY.—The funds appropriated pursuant to subsection (a) for a fiscal year shall be available for Federal obligation for that fiscal year and the succeeding 2 fiscal years.

SEC. 198B. DEFINITION.

For purposes of this title, the term "community college" has the meaning given the term "junior or community college" in section 312(f) of the Higher Education Act of 1965 (20 U.S.C. 1026(f)).

CONFORMING AMENDMENT.—The table of contents for the Workforce Innovation and Opportunity Act is amended by inserting after the items relating to subtitle E of title I the following:

"Subtitle F—Community College to Career Fund"

"Sec. 199. Community college and industry collaboration for the development of education and training programs.

"Sec. 199A. Authorization of appropriations.

"Sec. 199B. Definition."

(d) EFFECTIVE DATE.—This section, including the amendments made by this section, take effect as if included in the Workforce Innovation and Opportunity Act.

SA 1433. Ms. BALDWIN submitted an amendment intended to be proposed to amendment SA 1312 submitted by Mr. INHOFE (for himself and Mr. COONS) to the amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:

"(d) I N ADDITION TO the amendments proposed by amendment SA 1221 submitted by Mr. BROWN (for himself, Mr. PETTERS, Mr. SCHUMER, Ms. STABENOW, Mr. MENENDEZ, and Mr. CASEY) to the amendment SA 1221 proposed by Mr. HATCH to the bill H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations; which was ordered to lie on the table; as follows:

"(1) Section 6033(e) of the internal revenue code of 1986 shall apply to the changes made by section 501 of the落下式kids in compliance with the Trafficking Victims Protection Act of 2000."
AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. CORNYN. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on May 20, 2015, at 10:30 a.m., in room SR-253 of the Russell Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. CORNYN. Mr. President, I as unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on May 20, 2015, at 2:30 p.m., in room SR-253 of the Russell Senate Office Building to conduct a Subcommittee hearing entitled “Improvements and Innovations in Fishery Management and Data Collection.”

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. CORNYN, Mr. President, I as unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on May 20, 2015, at 10 a.m., to conduct a hearing entitled “The U.S.-S. Cuban Relations—The Way Forward.”

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. CORNYN, Mr. President, I as
unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on May 20, 2015, at 2:30 p.m., to conduct a hearing entitled “Nominations.”

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON HEALTH, EDUCATION, LABOR AND PENSIONS

Mr. CORNYN. Mr. President, I as unanimous consent that the Committee on Health, Education, Labor and Pensions be authorized to meet during the session of the Senate on May 20, 2015, at 10 a.m., in room SD–430 of the Dirksen Senate Office Building to conduct a hearing entitled “Reauthorizing the Higher Education Act: Exploring Institutional Risk-sharing.”

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON INDIAN AFFAIRS

Mr. CORNYN. Mr. President, I ask unanimous consent that the Committee on Indian Affairs be authorized to meet during the session of the Senate on May 20, 2015, in room SD–628 of the Dirksen Senate Office Building, at 2:15 p.m., to conduct a hearing entitled “Addressing the Needs of Native Communities Through Indian Water Rights Settlements.”

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON VETERANS’ AFFAIRS

Mr. CORNYN. Mr. President, I ask unanimous consent that the Committee on Veterans’ Affairs be authorized to meet during the session of the Senate on May 20, 2015, at 10 a.m., in room SH–216 of the Hart Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL COMMITTEE ON AGING

Mr. CORNYN. Mr. President, I ask unanimous consent that the Special Committee on Aging be authorized to meet during the session of the Senate on May 20, 2015, in room SD–626 of the Dirksen Senate Office Building, at 2:15 p.m., to conduct a hearing entitled “Challenging the Status Quo: Solutions to the Hospital Observation Stay Crisis.”

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON THE CONSTITUTION

Mr. CORNYN, Mr. President, I ask unanimous consent that the Committee on the Judiciary, Subcommittee on the Constitution, be authorized to meet during the session of the Senate on May 20, 2015, at 2:30 p.m., in room SD–226 of the Dirksen Senate Office Building, to conduct a hearing entitled “Taking Sexual Assault Seriously: The Rape Kit Backlog and Human Rights.”

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON REGULATORY AFFAIRS AND FEDERAL MANAGEMENT

Mr. CORNYN. Mr. President, I ask unanimous consent that the Subcommittee on Regulatory Affairs and Federal Management of the Committee on Homeland Security and Governmental Affairs be authorized to meet during the session of the Senate on May 20, 2015, at 10 a.m., to conduct a hearing entitled “21st Century Ideas for the 20th Century Federal Civil Service.”

The PRESIDING OFFICER. Without objection, it is so ordered.

CORRECTING THE ENROLLMENT

OF S. 178

Mr. CASSIDY. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H. Con. Res. 47, which is at the desk.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The senior assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 47) to correct the enrollment of S. 178.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. CASSIDY. I ask unanimous consent that the concurrent resolution be agreed to and the motion to reconsider be laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 47) was agreed to.

MEASURE READ THE FIRST

TIME—H. R. 2353

Mr. CASSIDY. Mr. President, I understand there is a bill at the desk and I ask for its first reading.
ORDERS FOR THURSDAY, MAY 21, 2015

Mr. CASSIDY. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until 9 a.m., Thursday, May 21; that following the prayer and pledge, the morning hour be deemed expired, the Journal of proceedings be approved to date, and the time for the two leaders be reserved for their use later in the day; that following leader remarks, the Senate then resume consideration of H.R. 1314, with the time until the cloture vote at 10 a.m. equally divided in the usual form.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

ADJOURNMENT UNTIL 9 A.M. TOMORROW

Mr. CASSIDY. If there is no further business to come before the Senate, I ask unanimous consent that it stand adjourned under the previous order.

There being no objection, the Senate, at 11:57 p.m., adjourned until Thursday, May 21, 2015, at 9 a.m.
COMMEMORATING THE 240TH ANNIVERSARY OF THE MECKLENBURG DECLARATION OF INDEPENDENCE

HON. RICHARD HUDSON
OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. HUDSON. Mr. Speaker, it is with great pride that I rise today to commemorate the 240th anniversary of the Mecklenburg Declaration of Independence.

Meck Dec Day marks a defining moment in our nation's history when brave North Carolinians—united by their common pursuit of freedom—stepped forward to become the very first Americans to declare independence from the tyrannical crown of Great Britain. This courageous act of defiance paved the way for the establishment of the United States of America and our great experiment in democracy.

North Carolina's bold leaders and citizens resisted British occupation during the Revolutionary War, prompting British Commander General Cornwallis to describe our fearless city as "a hornet's nest of rebellion."

It's in this spirit that our community continues to stand for liberty, justice and freedom. I am so proud of our heritage and for the leadership that the State of North Carolina continues to provide this great nation.

Mr. Speaker, on this historic anniversary, I want to congratulate the city of Charlotte and all North Carolinians.

I welcome each and every one of my colleagues to join us in celebrating this important moment in our history and the great North Carolinians who risked everything to lay claim to our rights and freedom.

HONORING ARMY PRIVATE HENRY JOHNSON AND ARMY SERGEANT WILLIAM SHEMIN

HON. JOHN KATKO
OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. KATKO. Mr. Speaker, I rise today to honor the brave service of Army Private Henry Johnson and Army Sergeant William Shemin. Army Private Henry Johnson and Army Sergeant William Shemin valiantly fought to defend our nation during World War I.

Army Private Henry Johnson entered the Army on June 5, 1917. He served in Company C, the 156th New York Infantry Regiment, an all-black National Guard unit. In 1918, Army Private Henry Johnson's unit, then the 369th Infantry Regiment, was ordered into battle in France and fought in front-line combat. Army Private Johnson courageously risked his life to defend those of his fellow soldiers.

Army Sergeant William Shemin entered the Army on October 2, 1917. He served as a member of Company G, 2nd Battalion, 47th Infantry Regiment, 4th Division, American Expeditionary Forces, originally located in Syracuse, New York. In May of 1918, Army Sergeant Shemin arrived in France to fight as a rifleman within the 15th New York Infantry Regiment, an all-black National Guard unit. In 1918, Army Sergeant Shemin not only put himself in danger to rescue his wounded fellow soldiers, but also took command of his platoon following the death of his superior officers.

Army Private Henry Johnson and Army Sergeant William Shemin proudly served and represented New York and our entire nation. Nearly 100 years after their service, Army Private Henry Johnson and Army Sergeant William Shemin will be awarded the Medal of Honor by President Obama on June 2nd. It is a privilege to share in the recognition of these American heroes, Army Private Henry Johnson and Army Sergeant William Shemin.

HONORING ALIVIA DAVIS, WINNER OF THE 2015 FOURTH CONGRESSIONAL DISTRICT OF FLORIDA ART COMPETITION

HON. ANDER CRENSHAW
OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. CRENSHAW. Mr. Speaker, I rise today to recognize Alivia Davis, winner of the 2015 Fourth Congressional District of Florida Art Competition in my home town of Jacksonville, Florida. Nationally, the Congressional Art Competition recognizes some of the finest high school student artists, and there is no doubt that Alivia belongs among this illustrious group. Her drawing, titled "Magnif.eyed," could not be a better representation of the artistic ability of Northeast Florida, and I am proud to recognize her on the House Floor today.

Alivia recently completed her freshman year of high school at Stanton College Preparatory School, an academically renowned high school in Jacksonville. Competing against thousands of high school students across the Fourth Congressional District, Alivia's artistic ability and execution set her apart from the rest. Alivia's "Magnif.eyed" depicts her younger brother's face as seen beneath a magnifying glass. The attention to detail is extraordinary; the hair is vivid and lifelike, the eyes incredibly vibrant, and the shading meticulously applied. Alivia shows artistic skills far beyond her years.

Alivia comes from a large and loving family. Her proud father and mother, Daniel and Rebekah, as well as her siblings Caroline, Chris, and Gabe, have been a constant source of support throughout her life. Tony Wood, her art teacher at Stanton College Preparatory School, and a renowned artist himself, has paintings displayed in various art galleries around Jacksonville. He mentored and encouraged Alivia to submit her artwork for the competition, and I can only hope that in her up-coming years at Stanton, he will continue to guide Alivia in all of her artistic abilities.

RECOGNIZING NACHA ON ENABLING UBQUITOUS SAME-DAY PAYMENTS DURING DIRECT DEPOSIT AND DIRECT PAYMENT VIA ACH MONTH

HON. GERALD E. CONNOLLY
OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. CONNOLLY. Mr. Speaker, I rise to recognize May as the Direct Deposit and Direct Payment via Automated Clearing House (ACH) Month. NACHA—The Electronic Payments Association serves as trustee of the ACH Network, enabling payments such as direct deposit and direct payment via ACH. Annually, the network processes 23 billion ACH transactions valued at more than $40 trillion. As a self-governing, collaborative rule maker and educator, NACHA helps to expand and diversify electronic payments, ensuring the Network remains universal and secure, creating value, and enabling innovation for all participants.

To coincide with this year's recognition of Direct Deposit and Direct Payment via ACH Month, the NACHA membership has approved an Operating Rules change to enable same-day settlement capabilities for virtually any ACH transaction. The proposal received broad support from financial institutions, businesses, government agencies and regulators, consumer groups, and other interested parties. This new same-day service ACH allows the financial services industry to offer an option to consumers, businesses and governments, who want to move their money faster.

I commend NACHA's commitment to enhancing the versatility and improving the strength of the ACH Network for consumers, governments, businesses, and financial institutions that rely on the network to move their money via ACH. This introduction of same-day ACH is an immediate action undertaken by financial institutions to modernize the payments system, and it creates a building block for a variety of innovative products and services.

Mr. Speaker, I ask that my colleagues join me in recognizing NACHA—The Electronic Payments Association for its work to move payments safely and more efficiently through electronic payments, ensuring the Network remains universal and secure, creating value, and enabling innovation for all participants.
The House in Committee of the Whole House on the state of the Union had under consideration the bill (H.R. 1735) to authorize appropriation for the fiscal year 2016 for military activities of the Department of Defense and for military construction, to prescribe military personnel strengths for such fiscal year. At 7:38 a.m.

Mr. VAN HOLLEN. Mr. Chair, I rise today in opposition to H.R. 1735, the FY16 National Defense Authorization Act.

The National Defense Authorization Act is one of the most important pieces of legislation that this body votes on each year. While this bill does authorize much needed funding for our men and women in uniform, ultimately it ignores the current budget landscape that our military is facing.

Consistent with the Republican budget, this year’s defense authorization bill uses the Overseas Contingency Operations budget as a backdoor loophole to get around sequestration by funding $38 billion of the Pentagon’s regular base budget activities with war funds—a blatant abuse of the budget process. Just one year ago, House Republicans criticized the abuse of the OCO loophole in their budget report, stating that it “undermines the integrity of the budget process” and that the Budget Committee would “oppose increases above the levels the Administration and our military commanders say are needed to carry out operations unless it can be clearly demonstrated that such amounts are war-related.”

Moreover, following the strategy of the Republican budget, the NDAA begins the process of locking in sequestration for non-defense programs, which will have a devastating impact on investments critical to the nation. We need to get back to the table to have an honest debate about our budget and renegotiate the funding caps for both defense and nondefense. Only then will we be able to provide the necessary resources for our national security needs and to ensure we keep the nation’s commitments to education, research, infrastructure, and other crucial drivers of economic prosperity.

I also have many problems with a number of misguided provisions in this year’s NDAA. Once again, this year’s NDAA includes a provision to continue funding restrictions on the construction or modification of detention facilities in the United States to house Guantanamo detainees. I strongly opposed Rep. Walorski’s amendment to keep Guantanamo open for at least two more years beyond FY2016 and was disappointed that an amendment offered by Ranking Member Smith to prevent a framework for closure of Guantanamo by the end of 2016 was rejected.

I also oppose efforts by Republicans to strike an important provision in this bill which would have stated that it was the sense of the House that our military should review whether “DREAMers,” or illegal immigrants, allowed to remain in the United States, should serve in the Armed Forces. In addition, I object to provisions that prohibit the Pentagon from entering into contracts to construct alternative energy sources that have the potential to save money and enhance our energy security. Finally, I object to the inclusion of unrequested funding for many weapons systems, including an extra $1.15 billion for four F/A–18 aircraft and $128 million for extra UH–60 helicopters.

Despite my opposition to the overall legislation, I was pleased that a bipartisan amendment I introduced with Congressman Mulvaney was adopted and will require Congress to report on how funds authorized for overseas contingency operations were ultimately used. I also supported the increased 2.3 percent pay raise for our troops and their families.

While this legislation does authorize much needed funding for programs that benefit our men and women in uniform, ultimately, this bill falls short in too many areas. It is my hope that many of my objections to the NDAA will be resolved in Conference with the Senate but I can’t support it in its current form.

**AMERICAN COMMUNITY SURVEY ON THE WAY TO 3 MILLION HOMES**

Mr. POE of Texas. Mr. Speaker, it’s Friday night. You come home from work, tired and hungry for supper.

There is a big stack of mail on the table you sift through, including one piece addressed to you from the government.

You open the envelope only to find a survey. The survey asks you a series of questions like: How many toilets do you have in your house? When do you leave and return from work? Does anyone in your home suffer from mental illness? Does your house have a sink with a faucet? Do you have a refrigerator?

This government-mandated questionnaire is known as the American Community Survey. Three million Americans each year are “lucky” enough to be selected to answer this mandatory survey. The American Community Survey is independent from the Census. This survey is more intrusive, more personal and more time consuming. Not to mention, it is 28 pages long and mandatory.

Understandably, many people dismiss this survey, tossing it out or feeling too uncomfortable to divulge such personal information. But throwing it away does not make it disappear.

If you fail to answer the survey, the government will come to your home with phone calls. If the calls go unanswered or the survey is incomplete, the calls will increase from weekly to daily. Then the eyes of the federal government are sent to houses of the unwilling, to ring the doorbell and peak in the window. This is harassment. No one wants the government dropping in on their home. Quite the opposite, the majority of Americans want the government to leave them alone. And on top of all the harassment and intimidation by Census Bureau emissaries, citizens who still choose not to answer, are threatened with a criminal penalty, and in some cases face up to a $5,000 fine.

In an effort to help protect America’s privacy, I reintroduced legislation that would make the American Community Survey voluntary. This survey is another example of unnecessary and completely unwarranted government intrusion.

The federal government has no right to force Americans to divulge such private information. This is especially information that they are uncomfortable giving away.

But this is happening all over America and even right here in Southeast Texas. I have had neighbors contact me for years complaining about this government harassment.

According to the Constitution, article 1, section 2, a count of the nation’s population is required to be conducted every ten years. The purpose of the Census is to apportion congressional seats and levy direct taxes. But the American Community Survey achieves none of that, except information on American’s toilet flushing patterns.

I believe in a limited government and will work to protect American citizens from government abuse and harassment. Bottom line, Americans should have the choice on whether they want to tell Washington how many toilets they have.

And that’s just the way it is.

**CELEBRATING 50TH ANNIVERSARY OF HEAD START**

Mr. POE of Texas. Mr. Speaker, I rise to congratulate and celebrate Head Start on its 50th birthday of service to children and families.

Fifty years ago yesterday, President Lyndon Johnson stood in the White House Rose Garden and announced the creation of Head Start.

This pioneering federal program became a foundation of his historic anti-poverty plan. Head Start was designed to ensure that children from low-income families had access to a quality early childhood education.

This program has long served as a catalyst for long-term educational achievement and is considered the nation’s premier school readiness program.

Head Start recognizes that parents are the initial and most important educators in their child’s life and works to inspire and support affirming parental involvement with their children.

In addition to building strong parent-child relationships, Head Start along with Early Head Start, provides extensive services to promote strong mental, social, and emotional development in children from birth to age five.

Head Start also provides children and their families with health screenings and nutritional education, among other integral services. The services offered to our communities by Head Start are copious and invaluable.

Evidence-based studies have shown that Head Start is tremendously effective at promoting academic success in school, avoiding crime, and fostering the development of productive, successful leaders.

Head Start is one of the longest running programs in the United States whose mission is to address systemic poverty, and it has indeed yielded impressive results.

In just 2014, Head Start served over 20,000 children and families in North Carolina alone,
including nearly 5,000 in my congressional district. Since its creation 50 years ago, more than 32 million children and families have reaped the benefits of Head Start.

Mr. Speaker, I ask that my colleagues join me in congratulating Head Start for 50 years of service and enrichment to our nation's children and their families. Its involvement in the lives of our young people is exceptionally significant and deserving of our sincere appreciation.

IN HONOR OF LIFEGUARD THOMAS HOLT

HON. JUAN VARGAS
OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. VARGAS. Mr. Speaker, I rise today to honor Thomas Holt for the outstanding commitment and dedication he has demonstrated to the City of Imperial Beach. Mr. Holt started his public service as an ocean lifeguard in 1967. During his 47 years of service, Thomas Holt made thousands of ocean rescues and provided medical aid to hundreds of beach visitors.

On March 1, 2014, Mr. Holt officially retired at the age of 70. His service is a remarkable achievement in the ocean lifeguarding field. Mr. Holt is recognized by his lifeguard colleagues and the community of Imperial Beach as a hardworking, reliable and dedicated mentor.

Mr. Holt has devoted his life to preserving the lives of others. His outstanding achievements, his leadership and his commitment to the people of California’s 51st District, are an inspiration to us all.

RECOGNIZING ST. JOHN’S–ST. ANDREW’S CATHOLIC SCHOOL CENTENNIAL

HON. TOM EMMER
OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. EMMER of Minnesota. Mr. Speaker, I rise today in honor of St. John’s–St. Andrew’s Catholic School in Meire Grove, Minnesota, as it celebrates its centennial.

The Catholic School in Meire Grove, Minnesota, as it celebrates its centennial.

IN RECOGNITION OF COL. ALFRED ROBERT FRENCH II

HON. RUBEN GALLEGO
OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. GALLEGO. Mr. Speaker, I rise today to salute, congratulate and recognize Col. Alfred Robert French II, M.D., for his distinguished military career and years of dedicated service to our nation as we celebrate his upcoming 89th birthday.

Mr. Speaker, I ask that this body join me in congratulating Head Start for 50 years of service and enrichment to our nation’s children and their families. Its involvement in the lives of our young people is exceptionally significant and deserving of our sincere appreciation.

IN HONOR OF LIFEGUARD THOMAS HOLT

HON. JUAN VARGAS
OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. VARGAS. Mr. Speaker, I rise today to honor Thomas Holt for the outstanding commitment and dedication he has demonstrated to the City of Imperial Beach. Mr. Holt started his public service as an ocean lifeguard in 1967. During his 47 years of service, Thomas Holt made thousands of ocean rescues and provided medical aid to hundreds of beach visitors.

On March 1, 2014, Mr. Holt officially retired at the age of 70. His service is a remarkable achievement in the ocean lifeguarding field. Mr. Holt is recognized by his lifeguard colleagues and the community of Imperial Beach as a hardworking, reliable and dedicated mentor.

RECOGNIZING ST. JOHN’S–ST. ANDREW’S CATHOLIC SCHOOL CENTENNIAL

HON. TOM EMMER
OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. EMMER of Minnesota. Mr. Speaker, I rise today in honor of St. John’s–St. Andrew’s Catholic School in Meire Grove, Minnesota, as it celebrates its centennial.

Founded in 1915, the current schoolhouse was built to meet the growing needs of a thriving Catholic community. After years of remodeling and improvements, and a shift towards being a parochial school, St. John’s–St. Andrew’s now consists of 40 families. An impressive growth, considering Catholic education in the area began with a deserted log church.

For a century, central Minnesotans have sent their sons and daughters to this historic school knowing that they will receive a substantive education centered around Christ. For many, this Catholic tradition spans several generations.

I pray that these children continue to grow in their faith and that they continue to follow Christ’s example of service and respect.

Mr. Speaker, I ask that this body join me in congratulating St. John’s–St. Andrew’s Catholic School on 100 years, and thanking them for building such a strong Catholic-educated community. May their success continue for decades to come.

IN RECOGNITION OF COL. ALFRED ROBERT FRENCH II

HON. RUBEN GALLEGO
OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. GALLEGO. Mr. Speaker, I rise today to salute, congratulate and recognize Col. Alfred Robert French II, M.D., for his distinguished military career and years of dedicated service to our nation as we celebrate his upcoming 89th birthday.

Col. French II was raised in Bisbee, AZ and attended Bisbee High School, Worthen Military Academy and Valley Forge Military Academy, graduating in 1944. Upon graduation, Col. French sought immediate induction into the U.S. Army and his journey in the service of our nation began in a crowded ship that left Brooklyn, New York, bound for Le Havre, France.

Upon arrival, Col. French II was requisitioned by the 61st Signal Battalion of the Third Army and began his service as a driver and a courier in Eider Oberstein, Germany. On occasion, he would drive through Germany, the Netherlands, Belgium, Luxemburg and France, all in one day. He also spent time in the Saar Protectorate, and then moved to Neckerslum, Germany, where he served as a Guard in a Displaced Persons (DP) camp.

Col. French was eventually transferred to Heidelberg, Germany and assigned to the 79th field Artillery group. There, Col. French II had the honor of attending General Patton's funeral service.

Col. French II returned to Phoenix, AZ, and studied at the University of Arizona. Soon after, however, he decided to continue his service to our country by reenlisting in the Army. He was deployed to Japan with the Army of Occupation and subsequently participated in the first battle of the Korean War as part of Task Force Smith, the first U.S. ground maneuver unit to enter combat in Korea.

Throughout his years of service, Col. French II has won numerous awards and distinctions, including the Bronze Star Medal, the Combat Infantry Badge, the Korean Service Medal, and the UN Service Medal.

After the war, Col. French II returned to Phoenix, AZ, and utilized the G.I. Bill to receive a B.S. from Arizona State University. He later graduated from Tulane Medical School with a specialty in Ophthalmology in 1959 and joined his father, Harry French, M.D., in private practice. Col. French II joined the Army National Guard in 1976 and served until 1993.

Mr. Speaker, Col. Alfred French II is a proud member of the Greatest Generation. He fought for our freedom in two different wars and has lived a life defined by service and integrity. I am deeply honored to recognize all that Col. French II has achieved and pleased to congratulate him as he celebrates his 89th birthday.

HONORING COACH BILL GUTHRIDGE

HON. DAVID E. PRICE
OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. PRICE of North Carolina. Mr. Speaker, I come to the floor today to honor the memory of Coach Bill Guthridge.
of Bill Guthridge, long-time basketball coach at UNC-Chapel Hill, a skilled and dedicated mentor and leader on and off the court.

Bill is best remembered for his illustrious coaching career. He won two national championships in three decades alongside Coach Dean Smith, and he was an assistant coach on the gold medal-winning 1984 Olympic basketball team. After Dean retired, Bill was named head coach of the Tar Heels and took Carolina to two Final Fours in three seasons. All told, he played or coached in more Final Fours than anyone else in NCAA history.

Bill was content to operate behind the scenes, and he liked to tell the story that he and his wife Leesie enjoyed an anniversary dinner in Chapel Hill the night before he took over for Coach Smith without being recognized by a single student or basketball fan.

But anyone who knew anything about Carolina basketball understood the critical contribution that Bill made to the program, and his passing on May 12 has brought forth a torrent of fond memories and tributes.

Those tributes include an appreciation for the remarkable role Bill and Leesie have played in the community of Chapel Hill since their arrival in 1967. I have personally appreciated their encouragement and counsel, and my wife and I have admired the generosity with which they have extended themselves to support numerous good and visionary causes.

As a former UNC student, I particularly appreciate their efforts to renovate and modernize the Undergraduate Library through the creation of the William W. and Elise P. Guthridge Library Fund.

I am not alone in appreciating Bill Guthridge’s contribution to our community. Ask anyone who knew him—and many who didn’t—and you will hear about his quiet devotion to the students he coached, his loyalty to his colleagues and friends, and his commitment to community betterment.

I feel very fortunate to have called Bill Guthridge a friend, and I am honored to pay tribute to his many contributions and the lasting impact they have made on the University and the community.

PERSONAL EXPLANATION

HON. BARBARA LEE
OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Ms. LEE. Mr. Speaker, I was not present for roll call votes 240 through 242. Had I been present, I would have voted yes on #240, yes on #241, and yes on #242.

IN RECOGNITION OF 2015 EASTERN AREA CONFERENCE OF THE LINKS, INCORPORATED

HON. CHARLES B. RANGEL
OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. RANGEL. Mr. Speaker, from April 22nd through April 26th, 2015, The Eastern Area of the Links, Incorporated hosted their 43rd Eastern Area Conference at the elegant Foxwoods Resort and Casino in Connecticut. This year’s conference theme “Leveraging the Legacy of Friendship and Service” is apropos as we congratulate the 2015 Eastern Area Conference Co-Chairs Sisters Links Price and Wilson for organizing this annual meeting. The Eastern Area of the Links is comprised of 73 chapters in the states of Connecticut, Delaware, the District of Columbia, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, Rhode Island, and Virginia.

As one of the nation’s oldest and largest volunteer service organizations of extraordinary women, the Links are committed to enriching, sustaining and ensuring the culture and economic survival of African Americans and other persons of African ancestry. With a membership of 12,000 professional women of color, which also includes my beautiful wife Alma Rangel and my daughter Alicia, the Links Incorporated has established 274 chapters in forty-two states and in three sovereign nations.

Throughout my public and political career, I have witnessed the astonishing work and outstanding community service provided by The Eastern Area of the Links, which has attracted hundreds of distinguished individual achievers and accomplished women of color, who continue to make a difference for our most vulnerable communities in the Eastern States of our Nation. Today, under the leadership of Eastern Area Director Dianne S. Hardison, the outstanding programming of the Eastern Area of the Links, Incorporated has five facets which include Services to Youth, The Arts, National Trends and Services, Community Trends and Services, and Health and Human Services.

The Eastern Area of the Links initiated a Women’s Issues Program, under the Chairmanship of Dr. Marcella Maxwell that evolved into a National Trends Facet Component. The focus of the Women’s Issues Program for 2013-2015 was to honor and empower Women who have served in our Nation’s Armed Forces as they transitioned from military life to civilian life. The Eastern Area Links initiated programs to mentor, educate, train, and employ women veterans as they transitioned from Combat to Corporate.

Partnering with Dress For Success, FedEx, Citi Corporation, Home Depot, Macy’s, College and Universities; and veteran organizations such as the 369th Veterans’ Association, New York City Mayor’s Office of Military Affairs, Veterans of Foreign Wars, the American Legion, Temple University, Syracuse University, Philadelphia Community College, Medgar Evers College, York College, and the Borough of Manhattan College of the City University of New York, the Eastern Area of the Links Combat to Corporate program has successfully given women veterans, many of whom are single mothers and homeless the opportunity to achieve the American dream and raise their families with dignity and resources.

Mr. Speaker, I ask that you and my esteemed colleagues of the great Eastern States of our Union join me in recognition of the 2015 Eastern Area Conference of the Links, Incorporated, which has focused its mission to support Women Veterans From Combat to Corporate and Women in the Armed Forces that continue to serve our Country proudly and with distinction today.

REMEMBERING MAURIE BERMAN

HON. MIKE QUIGLEY
OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. QUIGLEY. Mr. Speaker, I rise today to remember and honor the life of an important and respected member of the Chicago community.

On May 17th we lost a local legend. Mr. Maurie Berman, founder of the famous Superdawg passed away at the age of 89. After serving his nation in WWII, Mr. Berman returned to Chicago to serve his community. His vision was to serve delicious Chicago style hotdogs without customers even having to leave their cars. In May 1948, Maurie and his wife, Flaurie, opened the first Superdawg at the end of the streetcar line at Devon and Milwaukee Avenues in Chicago. It would be one of the first drive-in restaurants of its time with Flaurie as the first car-hop.

Almost 60 years later, for countless hungry people fed, Superdawg has become a Chicago institution. The business has been passed down from generation to generation with Maurie’s great-granddaughter putting in her first shift just a few weeks ago.

Mr. Berman was known not only for serving one of the best hotdogs, but also for being a truly caring person. He was a loving husband, father, grandfather, great-grandfather, friend as well as a highly respected member of his community. Maurie never missed an opportunity to help his employees in times of need.

IN HONOR OF THE 2014 FAIRFAX COUNTY LAND CONSERVATION AND TREE PRESERVATION AwardeES

HON. GERALD E. CONNOLLY
OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. CONNOLLY. Mr. Speaker, I rise to recognize the recipients of the Fairfax County 2014 Land Conservation and Tree Preservation Awards. Fairfax County is considered one of the best counties in the nation in which to live, work, and raise a family. One reason for this designation is the innovative environmental protection policies that have been implemented by the County and embraced by its business partners, and I was pleased to have led that effort during my tenure as Chairman of the Board of Supervisors. These awards recognize the following developers, designers, and site superintendents, who have excelled in their stewardship of the environment:

LARGE COMMERCIAL: CINDER RED ROAD BUS DIVISION

Owner: Washington Metropolitan Area Transit Authority

Project Manager: Fred Robertson

Superintendent: Denver Callahan

Contractor: Strittmatter Contracting, LLC

Engineer: Wendel

Site Inspector: Jim Gets

LARGE SINGLE FAMILY RESIDENTIAL: GAMBILL POINT

Owner: Brookfield Ridge Road, LLC
Project Manager: Scott Gookin & James T. Devine
Superintendent: Donnie Stewart & Billy Huff
Contractor: William A. Hazel, Inc.
Engineer: Land Design Consultants, Inc.
Site Inspector: Keith Anthony

SMALL SINGLE FAMILY RESIDENTIAL: ABBOTSWOOD
Owner: Palisades Development, LLC
Project Manager: Mike DROPik
Superintendent: Donnie Stewart & Billy Huff
Contractor: William A. Hazel, Inc.
Engineer: Walter L. Phillips, Inc.
Site Inspector: Jim Getts

INP fill LOT: 1602 FALLS RUN ROAD, MCLEAN
Owner: Joe & Sarah Shames
Project Manager: Ross Richmond
Superintendent: Rich Shaffer
Contractor: Joy Custom Design Build, LLC.
Engineer: LS2 PC Engineering
Site Inspector: Frank Degboe
Outstanding Engineering Firms: Wendel
(Cinder Bed Road Bus Division)
Outstanding Superintendent: Clarke Newhill and Billy Huff (Gambrill Pointe)
Outstanding Contractor: Strittmatter Construction, LLC (Cinder Bed Road Bus Division)

Outstanding Developer/Owners: Washington Metropolitan Area Transit Authority (Cinder Bed Road Bus Divisions)
Certificate of Voluntary Merit: Jackson Ayers, Member of Boy Scouts of America, Troop 1599, Eagle Scout Service Project
Best Protected Environmentally Sensitive Site: Washington Metropolitan Area Transit Authority (Cinder Bed Road Bus Division)
Outstanding E/S Inspectors of the Year: Frank Degboe (North Branch), Jorge Tague (Central Branch), Jim Getts (South Branch)
Outstanding E/S Plan Reviewers of the Year: Rosha Gafoor (North Branch), Jennifer Vargas (Central Branch), Ambachew Nigatu (South Branch)

TREES PLANTING AWARDS:
Project: Capital One—Rt. 123 Median and Tree Transplanting
Developer: Capital One
Landscaper: Ruppert Landscape, Inc.

Davis/Gilford Construction
Project: East Market at Fair Lake, Phase III
Developer: Peterson Companies
Design: Lewis Scully Gionet TWS Designs, Inc.
Landscaper: KT Enterprises
Project: Jennings Toyota
Developer: Chesapeake Contracting Group
Design: Walter L. Phillips, Inc.
Landscaper: Live Green
Project: Newington DVS Maintenance Facility
Developer: EE Reed Construction
Design: Adtek Engineers
Landscaper: Blake Landscapes

TREE PRESERVATION AWARD RECIPIENTS:
Developer: Mount Vernon Ladies’ Association
Engineer: Rummel Klepper & Kahl
Tree Preservation Consultant: The Care of Trees
Tree Preservation Contractor: Bartlett Tree Experts
Project: The Preserve at Scott’s Run
Builder: Stanley Martin Homes
Engineer: And Design Consultants
Tree Preservation Consultant: Zimar & Associates

 project: Unitarian Universalist Congregation of Fairfax
Developer: UUCF
Engineer: Bovman Consulting Group, Ltd.
Tree Preservation Consultant: Davey Resource Group
Tree Preservation Contractor: The Care of Trees

Mr. Speaker, I ask my colleagues to join me in congratulating these honorees. Fairfax County and its residents have benefited greatly from the collaborative spirit that is represented by these awards today, and I thank each of the awardees for their efforts.

IN SUPPORT OF THE TOM LANTOS FOUNDATION FOR HUMAN RIGHTS ANNUAL SOLIDARITY SABBATH

HON. ALCEE L. HASTINGS OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Mr. HASTINGS. Mr. Speaker, I rise today in support of the Tom Lantos Foundation for Human Rights annual Solidarity Sabbath. Held on May 22, 2015, this trans-Atlantic event provides a timely and unique framework within which leaders here in the United States and Europe can express solidarity with the Jewish community at a time when acts of social cohesion are more urgent than ever. The Solidarity Sabbath encourages leaders of all faiths, races, and backgrounds to band together in support of Jewish communities across North America and Europe by participating in a range of Sabbath services and related activities. In the current geo-political climate, where we have seen the ugly resurgence of anti-Semitism and Holocaust denial, particularly in Europe, it is imperative that we unite against intolerance and baseless hatred. I urge leaders both at home and abroad to participate in this important event and stand up for tolerance, peace and co-existence. When leaders of diverse backgrounds come together in defense of fundamental human rights, all of our communities are the beneficiaries.

Indeed, this Solidarity Sabbath initiative is most timely. Sadly, in the past few months we have witnessed a dramatic surge in anti-Semitic incidents across Europe, including the January murders of four Jewish customers at a kosher supermarket in Paris, and the murder of a Jewish man guarding a synagogue in Copenhagen in February. Painful, vivid memories of the two Jewish men murdered in a kosher supermarket in Paris, and the murder of a kosher supermarket in Paris, and the murder of a Jewish man guarding a synagogue in Copenhagen in February.

It is imperative that we stand with the Jewish community and demand that our European allies work diligently and without delay to confront and put an end to these heinous acts. Hatred and persecution based on race or religion have no place in our world. Each and every one of us has the responsibility to make our own communities safer and more tolerant.

For this very reason, I am pleased to have recently introduced a bipartisan resolution with Representative ROBERT DOLD of Illinois to combat the rise of anti-Semitic violence in Europe, which endorses our European friends to engage our communities and to help combat this disturbing trend while also committing the United States to abetting this effort in every way possible.

Mr. Speaker, the power of togetherness cannot be overemphasized. Indeed, it is the bond shared by those of us dedicated to love and tolerance that will form the basis upon which we will defeat bigotry and demagoguery in all of its forms. I urge my colleagues to stand with me in this important expression of tolerance and co-existence.

TRIBUTE TO SHERIFF MICHAEL “MIKE” SCROGGINS

HON. LUKE MESSER OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Mr. MESSER. Mr. Speaker, I rise today to pay tribute to the life of Sheriff Michael “Mike” Scroggins, a devoted civil servant and long-time political leader in Delaware County.

Mike is a lifelong Hoosier and leaves behind a legacy of public service in our state. After nearly 30 years as a police officer, including 11 years as a Uniform Division Commander, he ran successfully for Delaware County Sheriff in both 2010 and 2014. He is also a proud graduate of the respected FBI National Academy.

He devoted his entire adult life to protecting and bettering his community and for that he will always be remembered. Sheriff Scroggins was a member of Whitney Lodge #229, the Indiana Sheriff’s Association, and the Mt. Olive Community Church. He was also actively involved with the Delaware County Council, making public appearances regularly to advocate for his officers and his department. In his free time, Mike enjoyed fishing trips and spending time with his family.

Today, it is my privilege to honor the life of Mike Scroggins. My thoughts and prayers go out to Mike’s family, and may God comfort those left behind with his peace and strength.

TRIBUTE TO VICTIMS OF THE ARMENIAN GENOCIDE

HON. ADAM B. SCHIFF OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Mr. SCHIFF. Mr. Speaker, I rise today to memorialize and record a courageous story of survival of the Armenian Genocide. The Armenian Genocide, perpetrated by the Ottoman Empire from 1915 to 1923, resulted in the death of 1.5 million Armenian men, women, and children. As the U.S. Ambassador to the Ottoman Empire, Henry Morgenthau documented at the time, it was a campaign of “race extermination.”

The campaign to annihilate the Armenian people failed, as illustrated by the proud Armenian nation and prosperous diaspora. It is difficult if not impossible to find an Armenian family not touched by the genocide, and while there are some survivors still with us, it is imperative that we record their stories. Through the Armenian Genocide Congressional Record Project, I hope to document the harrowing stories of the survivors in an effort to preserve their accounts and to help educate the Members of Congress now and in the future of the necessity of recognizing the Armenian Genocide. Below is one of those stories:
From Arshalous Darbinyan, an Armenian Woman, on Behalf of Her Father, Barkey Vardani Darbinyan, and Grandparents, Arshalous Markari Darbinyan and Vardan Sarkis Darbinyan

Arshalous Markari Darbinyan was happily married to Vardan Sarkisi Darbinyan. The Darbinyans were one of the wealthy families of Van. They were well respected community intellectuals. In the spring of 1915, at the time of deportation and forced relocation Arshalous Darbinyan was an expectant mother. Andranik Zorava (a very close friend of the family) personally appointed one of his assistants to deliver a carriage to the Darbinyan residence. They left everything behind, hoping to return in one piece. In a chaotic rush they were forced to even bury their gold and most of the jewelry in their garden, and left behind the pharmacy they owned. The handmade carpets and rugs, and furniture were stuffed in the wine cellar, as they naively believed that once everything settled they would return home.

Unfortunately, when they were halfway there in the middle of the road the carriage flipped over. Arshalous was injured the most. She lost her baby. Also, she received several injuries on her face. Her husband, though in pain himself did his best to help cope with the situation. They suffered emotionally and physically, went through hardships, eyewitnessed the genocide and were lucky enough to survive. They were separated from their siblings, and the family was scattered around the world. Some of them ended up in Fresno, CA and the rest settled in Armenia.

CITATION TO RECOGNIZE PRAIDER GENERAL DENNIS D. DOYLE, DEPUTY CHIEF OF STAFF, G-3/5/7, OFFICE OF THE SURGEON GENERAL, U.S. ARMY

HON. MARCY KAPTUR OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Ms. KAPTUR. Mr. Speaker, we cannot thank our public servants enough for the job that they do every day in and out. The Federal Government simply cannot function properly without good leaders who are committed to the world and security of our Nation.

BG Dennis Doyle distinguished himself by exceptionally meritorious service and superb achievements at the Office of the Surgeon General and the United States Army from 1 November 2005 to 1 November 2015 while serving in a succession of high positions. His outstanding leadership, passionate pursuit of excellence, and tireless efforts greatly contributed to the overall readiness of the Army, the transformation of Army Medicine to a System for Health and the delivery of high quality health care to our Armed Forces. During his tenure as Commander of the 10th Combat Support Hospital (CSH) in Fort Carson, Colorado, BG Doyle was hand selected to also command the 43rd Area Support Group (Rear) while the 4th Infantry Division deployed. He superbly commanded both organizations ensuring the Group sustained a high level of readiness in support of Fort Carson tenant units. He proved a steadfast supporter to the local community, and all post operations supporting deployed Fort Carson units in combat. While deployed with the 10th CSH, BG Doyle delivered world class combat health care for nearly 40,000 patients, which included 4,000 admissions and over 8,500 operating room procedures with many of these involving the most difficult combat trauma cases in the world. His success in this tremendously challenging mission was not only driven by his chain of command but also by the U.S. Ambassador, the Commander of Multinational Forces-Iraq, the Commander of Multinational Coalition-Iraq, the Iraqi Prime Minister, and many U.S. and Iraqi government officials. BG Doyle worked tirelessly to direct and influence the right Army Medicine capabilities in support of the Army's and DoD's rebalancing strategy. He was also designated as Commanding General, Tripler Army Medical Center, U.S. Army Pacific Surgeon, Chief, Medical Service Corps, and Manager for the Hawaii enhanced Multi-Service Market (eMSM). His overall performance and contributions were nothing short of stellar.

Balancing five hats, he effectively established connections, and strengthened and influenced strategic partnerships with Pacific countries including Korea, Japan, Philippines and Thailand. His PRMC team provided unmatched support to USARPAC and USPACOM in the Asia-Pacific. His strategic leadership inspired trust in the health system throughout the Pacific achieving patient satisfaction rates of over 85 percent. In addition, PRMC’s Integrative Pain Management Center ranked as the best in the Army because of the close clinical collaboration with multiple disciplines and an emphasis on patient education and self-medication. The Surgeon General personal selected BG Doyle to serve as her Deputy Chief of Staff, G-3/5/7 based on his unparalleled operational experience, strategic acumen and proven leadership. His transformation behaviors for Soldiers, Family members and health by targeting Sleep, Activity and Nutrition were recognized as magnificent, not only during a period of significant cultural and organizational transformation. Upon assuming his role, BG Doyle was immediately faced with operationalizing The Surgeon General’s transformation from a healthcare system to a System for Health. He infused irreversible momentum in promoting the Performance Triad, the primary mechanism to influence readiness and health by targeting Sleep, Activity and Nutrition behaviors for Soldiers, Family members and all 3.9 million beneficiaries. In the Total Strategic partnerships with PACOM countries, PRMC has been instrumental in driving forward COMPO 2 and implementation with full support from the Chief of the Army Reserve and Army National Guard. The nuances of implementation in the Reserve Components have been fully explored to ensure that this plan is replicable for our Citizen Soldiers. Furthermore, BG Doyle’s operational perspective was instrumental in ensuring the direct correlation of Army Medicine command structures with supported Army Corps and ASCC commanders. The decisions currently being enacted represent the largest command transformation in decades and will ensure that MEDCOM is a balanced, agile and streamlined organization positioned to support Army Force 2025 and Beyond.
Relief Act protection against foreclosure for Congress extended the Servicemembers Civil of foreclosure protection for military receiving new orders. their homes or purchase new ones upon re-state market in some areas of the country can make it difficult for military members to sell things. Additionally, a slow recovering real-es-tive duty, are facing financial challenges, such as servicemembers, particularly those leaving ac-tive duty, are facing financial challenges, such as potentially losing their home. These financial challenges still exist for many servicemembers, particularly those reaclimating to civilian life after serving abroad.

Our nation’s military personnel are the best in the world, willingly putting their lives on the lines to protect our freedoms every day. The least we can do for them is to ensure they have a home when they leave active duty service.

The gentleman from Washington, Mr. HECK, and I are pleased to be introducing this bill today. I encourage my colleagues to join me in supporting this legislation.

TRIBUTE TO NORA TRAMPE

HON. DAVID YOUNG
OF IOWA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Mr. YOUNG of Iowa. Mr. Speaker, I rise today to recognize and congratulate Nora Trampe upon winning the Congressional Art Competition in the 3rd Congressional District of Iowa. Nora, a student at Roosevelt High School, is the daughter of Dr. Kate Garst of Des Moines, Iowa. The Congressional Art Competition, “An Artistic Discovery,” is open to high school students nationwide. Since 1982, the competition has been an opportunity for Members of Con-gress to encourage and recognize the artistic talents of their young constituents. The winner is selected by a panel of 16 judges, one from each county in Iowa’s 3rd District.

Nora’s piece, “100% Awesome,” was named the winner out of over 75 entries. It is a unique and creative piece that symbolizes all the things that make Iowa such a special place. Nora’s creativity and dedication to her craft is admirable. The example set by this young woman demonstrates the rewards of harnessing one’s talents and sharing them with the world. “100% Awesome” will be displayed in the halls of the Capitol for all to ad-mire and enjoy.

I commend Nora for her artistic talents and I know that my colleagues in the United States Congress will join me in congratulating her for being chosen as the winner of the Congress-sional Art Competition in the 3rd Congres-sional District of Iowa. It is an honor to serve Iowans like Nora and I wish her the best of luck in her future academic and artistic endeavours.

THANKS JIM CARR FOR YOUR YEARS OF SERVICE TO SPRING VALLEY LAKE

HON. PAUL COOK
OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Mr. COOK. Mr. Speaker, I rise today to thank James H. Carr aka “Jim Carr” who is being recognized for his many years of service to the Spring Valley Lake Community and the Spring Valley Lake Country Club.

1980 was the beginning of the Carr family’s life at Spring Valley Lake and Spring Valley Lake Country Club. After completion of Jim’s “SVL weekender home” in 1980 the first 8 years of weekends were like “mini-vacations” of fishing, and golf with little thought as to the ramifications of both national and local political decisions being made.

Decisions made in 1988 would force Jim to become involved and protective of his “golf and fishing paradise” when it was learned George AFB would be closed. Then in 1990 the Country Club lost more members with the decommissioning of the “Wingless Eagle” Air Force squadron from George AFB.

Jim became concerned the Country Club would not survive and had several conversa-tions with the new general manager Greg Davis. In one of the conversations Greg Davis stated his mission directed by Mr. Dedman Sr. was to turn the club around or it would be sold by ClubCorp. It was at that time Jim was asked to Chair the Board of Governors of the Club.

In late 2002 Jim became more active in the Spring Valley Lake Home Owners Association when contacted by a small group of residents that had become aware of deficit spending by the Association. The only solution was to find and elect people to the Association Board with financial/business experience and the will to make tough financial decisions. It took several years, but with the help of many concerned citizens the Association became financially sound and well managed.

I wish Jim the best in his retirement. The Eighth District of California and Spring Valley Lake are thankful for your service.

IN HONOR OF JAMES T. POWELL

HON. GEORGE HOLDING
OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Mr. HOLDING. Mr. Speaker, we have all had teachers who were inspirations as well as educators. For twenty seven years, James T. Powell was that kind of teacher at my alma mater, Wake Forest University. I would like to pay personal tribute to Professor Powell—who is retiring this year.

I can say, from personal experience, the years a young man or woman spends at Wake Forest shapes the rest of their lives—whether they’re recalling burning the midnight oil, pouring over the literature of “The Ancients,” or watching Rodney Rogers race down the basketball court.

Back when I was a student, studying the “Iliad” and “Odyssey” were not the most pop-ular subjects on campus—but Professor Powell always kept packed lecture halls.

He was not only applauded and revered by his students and fellow professors—he was also formally recognized for his service, being awarded the Reid-Doyle Prize for Excellence in Teaching in 1996, the Award for Excellence in Advising in 2003, and the Kulynych Family Outstanding Delta Kappa Award for Contributions to Student Life.

Professor Powell was also a leader in many campus groups—Phi Beta Kappa, Secretary to the Faculty, the Judicial Council—where he
said that the PATRIOT Act—first passed into law, it is a right to privacy. More than 13 years after the underpinning of the National Security Agency’s (NSA) nationwide bulk collection program.

Yet a ruling last week by the Second Circuit found that the bulk collection of phone records under this section violated the law. The right to privacy is a fundamental American value. And it is clear that the practice of unconstrained alteration of bulk data collection endangers that right.

Last week’s court decision underscores this—and makes clear that more robust surveillance reforms are needed. While the USA Freedom Act is a good step forward, it does not go far enough. And I recognize the hard work of my good friend and colleague, Ranking Member John Conyers, on this important bill. More than thirteen years after the passage of the PATRIOT Act, Congress must do more to balance our national security with the protection of our civil liberties.

The USA Freedom Act should include more robust protections to prevent the surveillance of individuals with no nexus to terrorism or any specific investigation. This would ensure adequate protections against indiscriminate surveillance from the government and ensure that Section 215 cannot be used to collect Americans’ records unrelated to any specific investigation. We should also be working for more robust minimization procedures to ensure that information collected under Section 215 is not stored in databases for years. This type of provision was included in a previous version of this bill and must be restored. We should also work to limit additional authorities outside of Section 215 that have been used to collect Americans’ records in bulk. We know that the government has used other authorities—such as administrative subpoena laws—to collect Americans’ records in bulk. And finally, H.R. 2048 should be amended to ensure that the government does not use authorities under Section 702 as a backdoor to conduct surveillance on Americans. Section 702 allows the government to intercept contents of Americans’ electronic communications with individuals abroad—and stores them in a database—without a warrant. Reforms to Section 702 should be included in this bill.

Mr. Speaker, I applaud my colleagues for working in bipartisan manner on this bill. Yet I believe that additional reforms were needed to adequately protect Americans’ fundamental right to privacy. More than 13 years after the PATRIOT Act was first passed into law, it is time for Congress to let Section 215 expire and work toward serious and meaningful surveillance reform.

**PERSONAL EXPLANATION**

**HON. STEVE COHEN**

**OF TENNESSEE**

**IN THE HOUSE OF REPRESENTATIVES**

**Wednesday, May 20, 2015**

Mr. COHEN. Mr. Speaker, on May 18, 2015, my flight was delayed and I was unable to vote on H.R. 91.

If present, I would have vote “yea” on H.R. 91.

**H.R. 2048, THE USA FREEDOM ACT**

**HON. BARBARA LEE**

**OF CALIFORNIA**

**IN THE HOUSE OF REPRESENTATIVES**

**Wednesday, May 20, 2015**

Ms. LEE. Mr. Speaker, I rise in opposition to H.R. 2048, the USA Freedom Act. This bill makes important improvements to the PATRIOT Act, including to Section 2154, which is the underpinning of the National Security Agency’s (NSA) nationwide bulk collection program.

Yet a ruling last week by the Second Circuit found that the bulk collection of phone records under this section violated the law. The right to privacy is a fundamental American value. And it is clear that the practice of unconstrained alteration of bulk data collection endangers that right. Last week’s court decision underscores this—and makes clear that more robust surveillance reforms are needed. While the USA Freedom Act is a good step forward, it does not go far enough. And I recognize the hard work of my good friend and colleague, Ranking Member John Conyers, Jr., on this important bill. More than thirteen years after the passage of the PATRIOT Act, Congress must do more to balance our national security with the protection of our civil liberties.

The USA Freedom Act should include more robust protections to prevent the surveillance of individuals with no nexus to terrorism or any specific investigation. This would ensure adequate protections against indiscriminate surveillance from the government and ensure that Section 215 cannot be used to collect Americans’ records unrelated to any specific investigation. We should also be working for more robust minimization procedures to ensure that information collected under Section 215 is not stored in databases for years. This type of provision was included in a previous version of this bill and must be restored. We should also work to limit additional authorities outside of Section 215 that have been used to collect Americans’ records in bulk. We know that the government has used other authorities—such as administrative subpoena laws—to collect Americans’ records in bulk. And finally, H.R. 2048 should be amended to ensure that the government does not use authorities under Section 702 as a backdoor to conduct surveillance on Americans. Section 702 allows the government to intercept contents of Americans’ electronic communications with individuals abroad—and stores them in a database—without a warrant. Reforms to Section 702 should be included in this bill.

Mr. Speaker, I applaud my colleagues for working in bipartisan manner on this bill. Yet I believe that additional reforms were needed to adequately protect Americans’ fundamental right to privacy. More than 13 years after the PATRIOT Act was first passed into law, it is time for Congress to let Section 215 expire and work toward serious and meaningful surveillance reform.

**H.R. 2048, THE USA FREEDOM ACT**

**HON. CHRIS VAN HOLLEN**

**OF MARYLAND**

**IN THE HOUSE OF REPRESENTATIVES**

**Wednesday, May 20, 2015**

Mr. VAN HOLLEN. Mr. Speaker, I rise today in strong opposition to H.R. 36. This bill would ban abortions after 20 weeks without an adequate exception to protect a woman’s health—a violation of Roe v. Wade—and would impose unreasonable burdens on rape and incest survivors. The legislation is the latest attack by House Republicans on women’s health, and what’s even more insulting is that they brought it to the floor during Women’s Health Week.

H.R. 36 would deny a woman the right to an abortion even if she is experiencing serious medical complications from pregnancy, or her physician is unable to diagnose her fetus with severe and lethal anomalies until after 20 weeks. These anomalies frequently lead to fetal death before or shortly after birth. Moreover, by imposing criminal penalties on physicians who provide abortion care, the bill would eventually lead to the deterioration of the critical patient-doctor relationship.

As you know, Republicans pulled an earlier version of this bill after a clash in their caucus over the exception for adult rape survivors which would require women to report the crime to law enforcement before they could get an abortion. That language has been modified to require rape survivors to seek and provide documentation of medical treatment or counseling 48 hours prior to an abortion. The bill also includes unfair reporting and documentation requirements for minors who have survived rape and incest. Without a doubt these barriers are deliberately designed to restrict a woman’s right to choose.

I’m pleased to see a range of organizations voice strong opposition to this bill including the American College of Obstetricians and Gynecologists, American Nurses Association, American Public Health Association, NARAL Pro-Choice America, Planned Parenthood Federation of America, National Organization for Women, National Women’s Law Center, National Council of Jewish Women, and others.

Mr. Speaker, I urge my colleagues to stand up for women’s health and oppose this bill.

**RECOGNIZING THE VOLUNTEERS OF THE SHEPHERD’S CENTER OF OAKTON-VIENNA**

**HON. GERALD E. CONNOLLY**

**OF VIRGINIA**

**IN THE HOUSE OF REPRESENTATIVES**

**Wednesday, May 20, 2015**

Mr. CONNOLLY. Mr. Speaker, I rise today to recognize the volunteers of the Shepherd’s Center of Oakton-Vienna for their many contributions to the Northern Virginia community. Organized in 1997, the Shepherd’s Center of Oakton-Vienna (SCOV) is a non-profit that provides services to help older adults continue living independently, and it offers programs that supply opportunities for enrichment, learning, and socialization.

Every year, approximately 200 volunteers support older residents who want to age in place in their homes and stay engaged in social activities. Services are available free of charge to anyone age 50 or older who resides in the local community.

Last year was a particularly successful year for SCOV. In 2014, drivers provided over 1100 round-trip rides for medical reasons and other errands. Volunteers made regular contact with individuals who may have limited interaction and may feel isolated at their homes. “Handy Helpers” made minor home repairs to help older adults keep their homes safe and livable. The Health Team provided individual health counseling, referral to community resources, and blood pressure readings. Volunteers also run programs such as Lunch n’ Life, Adventures in Learning, trips and outings, special events, and caregivers’ support groups. All told, SCOV served more than 3000 individuals in 2014. For these accomplishments, SCOV was recognized as 2014 Outstanding Volunteer Caregiving Program by the National Volunteer Caregiving Network.

The services and programs offered by this extraordinary organization help to ensure that our seniors stay connected to the community through promotion of active lifestyles, ongoing social integration, and availability of resources for older residents to use their experience, training, and skills in significant roles in society. Mr. Speaker, I ask that my colleagues join me in recognizing the Shepherd Center of Oakton-Vienna for its work to enable older adults in our community to age in place and enjoy their golden years with dignity and independence. I thank the many volunteers who generously dedicate their time and efforts to the welfare of our neighbors. The value of their contributions cannot be overstated and are deserving of our highest praise.

**HONORING THE SERVICE OF VIRGINIA AIR NATIONAL GUARD BRIGADIER GENERAL WAYNE A. WRIGHT**

**HON. ROBERT J. WITTMAN**

**OF VIRGINIA**

**IN THE HOUSE OF REPRESENTATIVES**

**Wednesday, May 20, 2015**

Mr. WITTMAN. Mr. Speaker, I rise today to recognize and thank Brigadier General Wayne A. Wright for his 34 years of service to our nation and to congratulate him on his announced retirement.
Brigadier General Wayne A. Wright retires as the Chief of Staff/Air Component Commander, Virginia Air National Guard, responsible for the command and control of 1,230 Virginia Air National Guard members, representing five organizations. Provided to the Governor of the Commonwealth of Virginia, the Air Guard military forces protect and defend the Commonwealth, and when activated to federal military duty, provide those same forces to the President of the United States.

General Wright entered the United States Air Force and received his commission in 1981 after graduating from the University of South Carolina. He transitioned from active duty to the Georgia Air National Guard in 1992. General Wright has held various leadership and command positions at the squadron, group, wing and major command levels. His assignments involved operations and formal training of United States Air Force and allied Command and Control personnel. He also worked in the developmental and operational testing arena. General Wright is a Master Air Battle Manager with qualifications in six ground-based Command and Control systems including joint and allied systems.

General Wright has been awarded the Legion of Merit, Meritorious Service Medal (with 2 Bronze Oak Leaf Clusters), Air Force Commendation Medal (with 2 Bronze Oak Leaf Clusters), Army Commendation Medal, Air Force Achievement Medal (with 1 Bronze Oak Leaf Cluster), Air Force Outstanding Unit Award (with 2 Bronze Oak Leaf Clusters), Air Force Organizational Excellence Award, Combat Readiness Medal, National Defense Service Medal, Army Achievement Medal with 1 Bronze Service Star), Global War on Terrorism Service Medal, Humanitarian Service Medal, Air Force Overseas Ribbon Short Tour, Air Force Overseas Ribbon Long Tour, Air Force longevity Service Award Ribbon (with 1 Silver and 1 Bronze Oak Leaf Cluster), and the Air Force Training Ribbon.

Brigadier General Wright has excelled throughout his distinguished career and I am honored to pay tribute to this Airman. I thank Wayne’s wife, Jeanette, and their daughter, Jessica and Son-in-law, Jeremy along with Wayne’s wife, Jeanette, and their daughter, Dawson for the many years they have supported Wayne while he served his country. I wish Wayne and Jeanette Godspeed, and continued happiness as they start a new chapter in their lives.

As the parade’s line the streets all across the towns.
As throughout the Nation in graveyards planted flags are found.
When, we as a Nation take the time to stop and pause.
To remember and honor all of those patriot’s in their just cause.
Because, Memorial Day represents America’s very Heart so clear.
Her very soul all in what we hold dear!
For on no other day do we as a Nation remember and grieve so here.
And shed such tears, as above all else this ranks each year.
For all of those who now lie in soft cold quiet graves.
Who over the decades have shown, how men and women of honor behave!
I’m sorry but your son Johnny’s not coming home!
But for the greater good their fine lives they gave!
Because Freedom Is Not Free, but with only most precious lives bought and paid!
A price so high and grave!
Remember this, and remember them this Memorial Day!
And give thanks to all of their families with tears upon their faces.
Whose hearts are this and everyday so break in places!
And thank all those heroes who came back from war.
Without arms and legs and PTS the more!
Who the rest of their young lives must endure.
Memorial Day is our heart and soul, the one fine reason we have all that we behold!
Our Freedom bought and paid for with the blood of human gold!
The one’s who will never get that chance to grow old.
Carry them in your hearts so, and give thanks and remember what to them you owe!
Memorial Day is but, America’s Heart and Soul!

CONGRATULATING CORNELIA “CONNIE” BAER

HON. JULIA BROWNLEY
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015
Ms. BROWNLEY of California. Mr. Speaker, today I rise to recognize Cornelia “Connie” Baer, an exemplary civic servant, advocate, and community leader in Ventura County. Connie has embodied public service through her staunch leadership and advocacy, as well as steadfast dedication and continued commitment to our community. Over several decades, Connie has generously given her time and energy as a valued and highly respected board member and representative for an array of organizations, including the Harbor Community Council, the National Women’s Political Caucus, and the League of Women Voters. Both locally and nationally, Connie has been a vocal advocate for equality. She was instrumental in the founding of the Stonewall Democrats of Ventura County. In addition, she has played a significant role in the establishment and development of the Ventura County Women’s Political Council, which encourages all women to actively engage and participate in the political process.
Additionally, since earning her bachelor’s degree in International Relations, Connie has been an active alumnus of the University of Southern California (USC). Connie also attended the Southwestern University School of Law, where she received her Juris Doctor degree, and later embarked on a respected career in law in Ventura County. Connie’s dedication and outstanding volunteerism is best illustrated by her 19 years of service on the Ventura County Medical Resource Foundation’s Board of Directors. Through her service and leadership, Connie has successfully assisted the organization in furthering its mission of supporting the medical needs of Ventura County’s under-served and vulnerable communities.
From providing the life-saving medical equipment for premature infants to providing dental and vision care to children of low-income households to funding breast cancer prevention, early detection and treatment programs, the Ventura County Medical Resource Foundation is ensuring that quality health care services are readily available and accessible to all of Ventura County’s residents. However, this outstanding organization could not offer these invaluable services if it were not for the remarkable generosity and commitment of individuals such as Connie Baer.
For these reasons, it is my sincere pleasure to join the Ventura County Medical Resource Foundation in recognizing Connie Baer with the 2015 Trailblazer Award for her extraordinary life of leadership and service to the entire Ventura County community.

HONORING THE LIFE OF JUDGE DAVID SILVA

HON. FILEMON VELA
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015
Mr. VELA. Mr. Speaker, I rise today to honor the life of Judge David Silva. Born in Beeville, Texas, on May 26, 1944, to Marcos and Altagracia Silva, Judge Silva passed away on March 16, 2015, after losing a long battle with leukemia.
Judge Silva’s life exemplified the American Dream. He graduated from A.C. Jones High School in 1963, before joining the U.S. Air Force to faithfully serve his country. While in the Air Force, Silva attended Boise State College in Idaho and married Yolanda Olivaras.
One year after being honorably discharged from the U.S. Air Force, Silva graduated from Bee County College. He would go on to earn a Bachelor of Arts Degree in American History in 1975 and a Master of Arts Degree in Interdisciplinary Studies: History, Psychology and Sociology from Texas A&M University in Corpus Christi, Texas.
Judge Silva understood how education would forever transform his life. From 1974 until his passing, he taught at Beeville College, helping students realize their potential through education.
In addition to his active role in educating citizens of Beeville, he was a church pastor, served on the Juvenile Board to help at-risk youth, provided guidance to the Local Emergency Planning Committee, and helped plan the future of Beeville. Silva’s contributions to his community are without equal.
In 2004, Silva’s reputation for fairness, dedication, and love for his community earned him
an appointment to the Beeville Municipal Court. This moment in Silva’s life arrived after decades of dedicated effort and service to his community. He worked his way through high school as a janitor in the same courthouse where he would later serve as a judge. He lived a life defined by integrity, commitment, and dedication.

Silva would continue to be a pillar of the Beeville community during his later years. He found time to help lead community boards as he continued his passion for education. His capacity to perform at a high level was second to none.

Our community suffered a tremendous loss with Judge Silva’s passing, but his legacy will be preserved by the positive change he made in our community and through the many students who had the privilege to learn from him in the classroom.

Judge David Silva is survived by his beloved wife of 44 years, Yolanda Olivares Silva; his daughters, Cassandra Dianne Silva (Casey Hawkins), and Cristianna Dawn Silva Meineke (Aaron Meineke); siblings, John Marks Silva, Amanda Silva, and Grace Ramirez (Adolfo). He is also survived by a grand-daughter, Audria Nouvelle Diem Silva.

On this day, I remember Judge David Silva. May he forever rest in peace.

RECOGNIZING THE LIFE AND SERVICE OF BISHOP CURTIS E. MONTGOMERY

HON. DEREK KILMER OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Mr. KILMER. Mr. Speaker, I rise today to recognize the life and service of Bishop Curtis Montgomery of Tacoma, WA. Curtis epitomized the role that long-standing faith leaders play in their community. He was a tireless advocate for the members of his congregation and the greater Tacoma community.

Bishop Montgomery was a key leader who shepherded Tacoma’s Hilltop neighborhood through the civil rights struggles of the 1960s and the gang and drug violence of the 1980s. His steadfast leadership and staunch belief in the power of community involvement will be remembered in the revitalization of this historically significant neighborhood.

His contributions to the Hilltop include the establishment of Christ Temple Church in 1959, which later became Greater Christ Temple Church in 1977. Under his leadership, Greater Christ Temple Church has become much more than a place for worship. Parishioners are community leaders, volunteers, and advocates for the work that Curtis has espoused his entire life.

One of his most esteemed accomplishments was the realization of the Oasis of Hope Center. This faith-based community outreach center was the culmination of Bishop Montgomery’s efforts and long-standing vision to provide a safe and stable place for the community to serve their neighbors. Opened in 2004, the Oasis of Hope Center has operated feeding programs, a clothing bank, counseling services, and numerous other arts organizations.

Mr. Speaker, last year there were over 500 Hilltop community members served at the Center’s annual Share the Harvest Thanksgiving Dinner. I have been told there were more volunteers than they could possibly need for that dinner. This simple fact is just one piece of evidence representing his legacy and his vision. Scripture tells us that God loves a cheerful giver. It’s safe to say God loves Curtis Montgomery—those who have given so much, to so many, for so long.

Bishop Curtis Montgomery was born in Selma, AL, which was central in the civil rights struggles of the 1950s and 1960s. He was raised to stamp out discrimination and racism. In addition to a safer and more equitable society, he would not be forgotten—that his legacy was etched with his brothers and sisters in Selma, 50 years later.

On behalf of his congregation and the people of the Hilltop Neighborhood in Tacoma, WA, I stand today to honor the life-time achievements of Bishop Curtis Montgomery of Greater Christ Temple Church in the Congress of the United States.

HONORING MS. ANDREA JENKINS

HON. KEITH ELLISON OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Mr. ELLISON. Mr. Speaker, I rise today in recognition of Andrea Jenkins, who has been chosen to serve as Grand Marshal for the 2015 Twin Cities Pride parade and festival because of her distinguished contributions to the citizens of Minnesota in the form of art and activism.

Ms. Jenkins has been among the Twin Cities’ leading advocates for transgender equity, especially at the intersections of race and class. During her 12-year career as a policy aide for the Minneapolis City Council, Ms. Jenkins was central in raising the profile of transgender issues among Minnesota’s most influential policymakers. Under her leadership, the City of Minneapolis started the Transgender Issues Work Group, a roundtable dedicated to changing city ordinances to improve the lives of transgender citizens. Local and national media outlets have covered her inspiring efforts to raise awareness of an often-overlooked segment of the population. At a time when our nation is seeing an epidemic of violence against transgender individuals—specifically trans women of color—Ms. Jenkins’s work is critical.

In addition to her work in the political realm, Ms. Jenkins is an award-winning poet and performance artist. Her work has been honored by the Jerome Foundation, Intermedia Arts, The Playwrights’ Center, the Walker Art Center, the Givens Foundation, the Loft Literary Center, and countless other arts organizations.

In 2011, she was named a Bush Fellow. On top of crafting nuanced pieces that reflect her identity as a trans woman of color, Ms. Jenkins serves on numerous boards and panels, including serving as the board chair of Intermedia Arts. This leadership has allowed Ms. Jenkins to create some of the Twin Cities’ most inclusive and boundary-pushing events, frequently centering the voices of those at “the margins of the margins.” One such event, the Queer Voices reading series, is the longest-running series of its kind in the country.

Recently, Ms. Jenkins left her position with the City of Minneapolis to begin curating the Transgender Oral History Project, part of the University of Minnesota’s Jean-Nickolaus Tretter Collection. In this role, she will travel throughout the upper Midwest to document the experiences of transgender people. This permanent record will serve as one of the nation’s most comprehensive catalogs of contemporary transgender life.

At a time when the T in LGBT is often overlooked, Andrea Jenkins has helped move the spotlight to the trans community. Her work has sparked conversation, propagated knowledge, and forged a path for future trans leaders. Her work in our community is inestimable and I congratulate her on being selected Grand Marshall. I am proud to call her a friend and ally.

EXPRESSING SUPPORT FOR THE HELP HIRE OUR HEROES ACT

HON. JULIA BROWNLEY OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Ms. BROWNLEY of California. Mr. Speaker, I rise today to urge the House to bring to the floor my bill, the Help Hire our Heroes Act.

My bill would renew the Vocational Rehabilitation Assistance Program (VRAP) and permit additional veterans to participate in the program. As you may know, the VRAP program provides up to 12 months of re-training assistance to veterans in need of employment training, but who are unable to participate in other VA programs because of their age and time since active duty service.

Specifically, the program provided training assistance to unemployed veterans between the ages of 35 and 60 who are no longer eligible for the GI Bill. Veterans could use these benefits at community colleges and technical schools in occupations that the Department of Labor identified as “high demand.”

The VRAP program started in 2012, but funding for this program expired in March 2014 and the VA has not been able to enroll new veterans in VRAP.

In 2014, there were 573,000 unemployed veterans; 65 percent of whom were age 45 and up. I simply do not understand why the Majority has allowed this important veterans’ job training program to lapse. It has resulted in thousands of older, qualified veterans being unable to access job training to help them find work.

As we approach Memorial Day, Congress should be doing all it can to help unemployed veterans find work. Please bring my bill to the floor, so that we can renew the Veterans Re-training Assistance Program.
HON. CHRIS VAN HOLLEN
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 19, 2015

The House in Committee of the Whole House on the state of the Union had under consideration the bill (H.R. 2250) making appropriations for the Legislative Branch for the fiscal year ending September 30, 2016, and for other purposes:

Mr. VAN HOLLEN. Mr. Chair, I rise in reluctant support of H.R. 2250, a bill to fund the operations of the U.S. House of Representatives for 2016 and for other purposes.

In these times of needed fiscal discipline, everyone must do their part. We are bound by funding caps and, though the president has put forward a blueprint to address sequestration, the Republican leadership has chosen to disregard the plan. As a result, appropriators have produced a bill that makes deep cuts to agencies and programs that support the legislative branch when compared to the president’s request.

H.R. 2250 provides a total of $3.341 billion for vital House and House affiliated functions as well as for greater Congressional operations. This is a reduction from the president’s request of $200 million. Within the total available funding, $492.2 million is provided for the Architect of the Capitol which oversees maintenance and repairs of House and Senate office buildings in addition to many other important buildings in the Congressional complex. Excluding Senate items, this is an $84 million reduction in funding for maintenance of the Capitol Visitor Center, the Capitol Grounds, the Library of Congress and the U.S. Botanical Garden. $591.4 million is provided in the bill to fund Library of Congress (LOC) operations. In addition to being the repository of the nation’s print and recorded media, the LOC serves as the research arm of Congress, helping to inform the legislative debate on Capitol Hill. This bill cuts its funding by $33 million below the president’s request. The bill also reduces funding for the Government Accountability Office (GAO). The GAO functions as the “congressional watchdog” by investigating how federal agencies spend American taxpayer dollars. This bill funds GAO at $522 million, which is $31 million less than the president’s request. H.R. 2250 does increase funding for the Capitol Police when compared to enacted funding levels, but the increase is actually a $10 million cut when compared to the president’s request.

I believe spending taxpayer dollars carefully should always be a priority of Congress, and seeking ways to reduce government spending should also be a priority. There are funding reductions in the bill that I support, including the pay freeze for Members of Congress. But the American people expect us to make wise cuts. They don’t want us cutting for the sake of cutting—especially when vital services may be impacted. The president’s budget contained a strategy to address sequestration that would have made many of these cuts unnecessary. I regret that my Republican colleagues chose to ignore it.

HON. BRADLEY BYRNE
OF ALABAMA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. BYRNE. Mr. Speaker, I rise today to recognize the retirement of a great American and my dear friend, Coast Guard Captain Samuel Duke Walker.

Captain Walker has served as Commander of Coast Guard Sector Mobile since July of 2013. Before coming to Southwest Alabama, he served as Chief of Response for the Eighth Coast Guard District, where he also served as the Federal On-Scene Coordinator for the Deepwater Horizon Spill of National Significance Response.

Captain Walker graduated from the U.S. Coast Guard Officer Candidate School in 1987. He is a graduate of Rhode Island College with a degree in Electronic Design, and he also holds a Master of Business Administration degree from the University of South Alabama’s South of Business.

During his time with the Coast Guard, Captain Walker has earned many accolades. Captain Walker was promoted to the rank of Captain on July 1, 2008, and he served as President of the Class of 2009 at the National War College. His decorations include the Legion of Merit, Bronze Star, Meritorious Service Medal, Coast Guard Commendation Medal, Coast Guard Achievement Medal, and Combat Action Ribbon.

Captain Walker has been a leader in the Coast Guard, but he has also been a leader in the local community. Captain Walker has called Mobile home for much of his life, and he is a 2001 graduate and Class President of Leadership Mobile. During a recent boating tragedy in Mobile Bay, Captain Walker acted as a steady leader and reassuring voice to members of the community. It is safe to say that Captain Walker has truly become a member of the Southwest Alabama community.

Mr. Speaker, I want to thank Captain Walker, his wife, and their three children for their dedicated service to the United States Coast Guard, the Gulf Coast, and the entire nation.

So on behalf of the people of Alabama’s First Congressional District, I want to wish Captain Walker all the best in his retirement. We will miss his service to the Coast Guard, but I am happy to know Captain Walker will continue to call Mobile home.

HON. ROD BLUM
OF IOWA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 20, 2015

Mr. BLUM. Mr. Speaker, today I want to congratulate the Dubuque Fighting Saints of the United States Hockey League (USHL) on their successful 2014–2015 season.

The Fighting Saints, led by head coach and general manager Matt Shaw, finished the regular season 36–19–5, resulting in 3rd place in the Eastern Conference and earning them a berth in the playoffs. Bob Nebhahn posted the second lowest GAA in the USHL for the season at 2.31 and forward Brett Boe posted the second lowest GAA in the USHL for the season at 2.31 and forward Brett Boe completed the season in the top 10 in the league for goals scored with 28 for the year.

The Fighting Saints won the “Cowbell Cup,” winning the head to head matchups among the three teams in eastern Iowa, finishing one game ahead of the Waterloo Blackhawks and two games ahead of the Cedar Rapids RoughRiders.

The impact of the team extends outside the arena and into the greater Dubuque community. Through the “Live Like a Saint” initiative with Two by Two Character Development, the Saints visit local schools and teach empathy, kindness, respect, responsibility, teamwork, and the importance of physical education to young people.

I would like to extend my sincerest congratulations to the 2014–15 Dubuque Fighting Saints for their successful season and thank them for their charity work in the Dubuque community.

I look forward to cheering them on next year to a championship.
Mr. OLSON. Mr. Speaker, I rise today to thank OakBend Medical Center for providing quality healthcare for Fort Bend County for 65 years. OakBend Medical Center is the largest full service healthcare facility in Fort Bend County. As Fort Bend County continues to grow, medical centers like this provide easy access to professional care. With the traffic congestion we experience as our region continues to grow, easy access to critical care is essential.

On behalf of the Twenty-Second Congressional District of Texas, thank you again to OakBend Medical Center for 65 years of service to the Fort Bend community. We look forward to many more years of exceptional medical care.

FOSTER YOUTH SHADOW DAY

HON. DAVID G. REICHERT
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Mr. REICHERT. Mr. Speaker, I rise to talk a little bit about foster care. As many of my colleagues are aware, today is Foster Youth Shadow Day and this morning I had the pleasure of meeting with Dawna—a foster youth who spent 7 years in the foster care system of my home state of Washington.

Fortunately for Dawna, she was adopted when aged out of care. But for many foster kids this is not the case. In 2013, over 23,000 kids aged out without finding a forever family. And, even the kids that do find their forever families are often mistreated and even abused while in the system. Dawna was overprescribed psychotropic medications and forced unnecessarily into an adolescent psychiatric hospital. Her story is not the only one like it. When I was Chairman of the Human Resources Subcommittee of the Ways and Means Committee we held a hearing on this very issue and heard many other similar stories. This is a tragedy and it is unacceptable.

We can do more to help our youth in foster care, they are our responsibility and we cannot let them down. I will continue to fight to provide youth in the foster system the best possible care, and to help them find forever families, and I urge the rest of this Congress to do the same.

TRIBUTE TO ISAAC JOE

HON. JAMES E. CLYBURN
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Mr. CLYBURN. Mr. Speaker, I rise today to pay tribute to Mr. Isaac C. Joe on the occasion of his upcoming 100th birthday. As a soldier, educator, and civic leader, Mr. Joe has devoted his life to public service, and I join many in his community in wishing him a happy birthday.

Born on June 24, 1915, Mr. Joe grew up in Thomastown, South Carolina, a small town in Lee County. As an African American in the Jim Crow South, he had to walk five miles each way to a school that was only open seven months of the year, while the white schools remained in session for nine months. He persevered to work his way through Morris College, from which he graduated in 1940. Mr. Joe has been dedicated to his alma mater ever since, donating 83 acres of land to the college in 2013.

Mr. Joe began his teaching career in Lee County immediately after college. But after just one year in the classroom, he put his teaching career on hold to serve in the United States Army. He was in basic training when Pearl Harbor was bombed and rose to the rank of Master Sergeant, working at regimental headquarters. Although Mr. Joe’s six years in the Army took him away from his students, he put his teaching skills to good use, teaching some of his fellow soldiers how to read, write, and sign their names so that they could collect their paychecks.

In 1954, seven years after Mr. Joe returned to the classroom, the United States Supreme Court issued its Brown v. Board of Education decision outlawing segregation in public schools. Inspired by this decision, Mr. Joe returned to school himself, earning his master’s degree from South Carolina State College in 1956. He returned to the Lee County school system in 1957 as principal of the newly built Mount Pleasant High School in Elliott, where he served until his retirement in 1977.

Mr. Joe’s community involvement has continued in the decades since his retirement. In 1989, he was elected to a term in the South Carolina House of Representatives, serving from 1981 to 1983. He is an active member of St. Mark’s Baptist Church in Bishopville where he has held various leadership roles and spearheaded numerous committees and projects.

Mr. Speaker, I ask that you and my colleagues join me in wishing Mr. Joe a very happy 100th birthday. It is a remarkable milestone befitting a remarkable man. I wish him good health and Godspeed.

HONORING DR. MARGARET “PEG” BURKE LEE

HON. JANICE D. SCHAKOWSKY
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Ms. SCHAKOWSKY. Mr. Speaker, I rise today to recognize Dr. Margaret “Peg” Burke Lee for her distinct service to the people of the 9th Congressional District of Illinois and Oakton Community College. Dr. Lee will be retiring in June of this year, and I would like to congratulate her on 30 years of commitment to our community.

Since Dr. Lee became vice president of academic affairs at Oakton Community College in 1985, her achievements have captured national recognition for the College while serving 450,000 residents in 16 municipalities—including a salute by The New York Times recognizing Oakton Community College as one of the top 10 community colleges in the nation. Dr. Lee’s commitment and contributions to education and Oakton are immeasurable. She has been recognized by college staff members and community members as a relationship builder inside and outside of the college community, a legacy she is proud to share.

Dr. Lee was named one of the “Most Powerful and Influential Women of Illinois” by the National Diversity Council in 2012. In March 2011, Holy Family Medical Center honored her with its second annual C.A.R.E.S. Award for exemplifying Resurrection Health Care’s Core Values: compassion, accountability, respect, excellence and service.

Dr. Lee has contributed to multiple educational events across the world, including in China, Netherlands, Thailand, and Spain. She was part of a diplomatic delegation to India where she traveled with Under Secretary of State for Public Diplomacy and Public Affairs Karen Hughes and five other college and university presidents to build bridges to American higher education through meetings with government, university, and business leaders. In addition, Dr. Lee is the author of several monographs on global education in community colleges and the critical role of language learning in developing cultural competence.

Dr. Lee holds a doctorate and a master’s degree in English language and literature from the University of Chicago, where she was a Ford Foundation Fellow in the Humanities and a Woodrow Wilson Dissertation Scholar in Women’s Studies. At the age of 17, she spent 8 years as a nun, a perspective and experience that she brought to her role as a college administrator. She has always taught with compassion and enthusiasm through most of the most in need. Dr. Lee is known to go above and beyond to improve the quality of life in the community and she has touched the lives of many people through her commitment to providing innovative educational programs at the college.

In January, the Margaret Burke Lee Science and Health Careers Center opened on Oakton Community College’s Des Plaines campus. It is home to Oakton’s anatomy and physiology, biology, chemistry, earth science, medical laboratory technology, nursing, physics, and physical therapy assistant programs. Dr. Lee’s legacy will continue at Oakton not only through this new facility, but through the fabric of Oakton Community College. After she announced her retirement, dozens of posts were made on Facebook demonstrating how much she is loved by the people she mentored over the past 30 years.

I want to sincerely congratulate Dr. Lee for everything she has accomplished at Oakton Community College and for the people of the 9th Congressional District of Illinois. Your legacy will live on and will never be forgotten. May you enjoy this new chapter in your life including additional time you can spend with your nine children and 14 grandchildren.

REMEMBERING AND HONORING MARINE SERGEANT WARD MARK JOHNSON IV

HON. JOHN L. MICA
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Mr. MICA. Mr. Speaker, I rise today to honor Marine Sergeant Ward Mark Johnson IV, a fallen hero who died while on a mission...
of mercy in Nepal on May 12, 2015. Sgt. Ward spent time growing up in Central Florida where today our community remembers his service to our nation.

Sgt. Johnson enlisted in the Marine Corps on March 23, 2009 after earning two degrees from Florida State College of Florida. Assigned to the Marine Light Attack Helicopter Squadron (HMLA) 69, Johnson served diligently in Afghanistan with the 31st Marine Expeditionary Unit prior to being deployed to Nepal as a crew chief in charge of maintaining the helicopter as a testament to his outstanding performance, Johnson has been awarded the Navy and Marine Corps Achievement Medal, the Air Medal with Strike/Flight Numerals 5, the Marine Corps Good Conduct Medal and the Afghanistan Campaign Medal. Sgt. Ward Mark Johnson IV will always be remembered for the honor and courage with which he fulfilled his duties, and for the love and joy he gave his family and friends. This was his third deployment around the world and he never wavered in his commitment to his family, the Corps and his country. As you know, Mr. Speaker, our military deployed on a humanitarian mission to earthquake-ravaged Nepal, and Sgt. Johnson answered that call. With him were five other Marines who perished. We mourn their loss and extend our sympathy to their families.

Sgt. Johnson was a patriot in every sense of the word and is remembered by a loving family and countless friends. He is survived by his wife Haley; their two young children, Nathan and Noah; and his parents, Mark and Shirley Johnson who reside in Florida's 7th Congressional District.

Mr. Speaker, I ask you and my colleagues to join me in remembering and honoring Marine Sergeant Ward Mark Johnson IV. We extend the condolences of this Congress and the American people, who he served gallantly, epitomizing the very best of our nation.

HON. KEVIN YODER
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Mr. YODER. Mr. Speaker, I rise today to recognize the career of one of the most dedicated teachers of the Third Congressional District in Kansas.

Nancy Bonneau Worth is shutting the doors to her Brookwood Elementary classroom for summer break for the last time next week. She’s ending a thirty year career as an educator, twenty of them at Brookwood. It began at Norman Rockwell Elementary School in her home state of Nebraska. She then moved to Great Bend, Kansas, where she worked for a short period at Barton County Community College before transitioning into District education teacher in the Great Bend School District.

Her Masters in Speech Pathology brought her to the Third District to teach at the Kansas School for the Deaf before moving on to Tall Hills Elementary, and eventually Brookwood. In fact, she integrated sign language into her teaching even after she left KSD by teaching her students to sign the Pledge of Allegiance every morning before school.

Hundreds of successful children, teenagers, and young adults throughout Kansas have called Mrs. Worth their teacher over the years—and are better people because of it. Congratulations on your retirement, Mrs. Worth and thank you for everything you have done for Kansans.

Your impact on our district and state is immeasurable.

IN RECOGNITION OF MAY AS NATIONAL HAMBURGER MONTH

HON. ROB BLUM
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Mr. BLUM. Mr. Speaker, with summer approaching, many lowans are firing up their barbecues. While hotdogs, bratwursts, and pork chops are all traditional family favorites, I rise today in special recognition of the hamburger—a delicious staple of grilling season.

May is National Hamburger Month which warrants special recognition in Iowa. Iowa’s beef products are considered some of the best in the world, supplying several well-known steakhouses around the U.S., including here in D.C.

According to the Iowa Beef Industry Council, Iowa is home to over 26,000 cattle operations, with ranches in all 20 counties in my district. Furthermore, the cattle industry in Iowa supports over 15,000 jobs and injects over $6 billion into the economy. Additionally, the cattle industry supports a growing economy in Iowa by using corn as a feed source, consuming over 148 million bushels of corn every year.

Iowa’s ranchers and packers play important roles in making sure consumers have safe and nutritious ground beef for our burgers.

For great hamburger recipes, cooking tips, and beef safety information, I encourage all my constituents to visit www.iabeef.org.

HON. DINA TITUS
OF NEVADA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Ms. TITUS. Mr. Speaker, Nevada lost a very good man when Gary Gray was killed recently in an automobile accident coming down from the Alps. Gary truly changed the face of politics in Nevada: he elected candidates at every governmental level; he proudly pushed a progressive agenda; and he professionalized the campaign business. He was a civic activist, a pillar of the community, and a citizen of the world. He leaves a void that cannot be filled.

Bon voyage, mon ami.

HON. JANICE D. SCHAKOWSKY
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 20, 2015

Ms. SCHAKOWSKY. Mr. Speaker, I rise today to honor and celebrate Rabbi Herman and Lotte Schaalman, an internationally-renowned and beloved couple, on their 99th and 100th birthdays. Rabbi Schaalman celebrated his 99th birthday on April 28, 2015 and Lotte Schaalman celebrated her 100th birthday on January 13, 2015.

Rabbi Schaalman was the Senior Rabbi at Emanuel Congregation in Edgewater, in my district, for 32 years, and is in his 28th year as a Rabbi Emeritus. The Schaalmans will be honored at a special event on May 31, 2015 at Emanuel Congregation, which is establishing the Rabbi Herman and Lotte Schaalman Fund, to assure that their remarkable legacy of service will continue.
For decades, Margaret has devoted her time to advancing conservative principles as a member of the Tuolumne County Republican Central Committee, the Tuolumne County Republican Women Federated, and the California Federated Republican Women’s Central Division.

Margaret served multiple terms as President of the Tuolumne County Republican Women Federated. She has also held a variety of positions within the organization, and tirelessly supports Republican candidates and values.

In addition to her party contributions, Margaret currently serves as the 1st Vice President of the Tuolumne County Republican Women Federated, the 2nd Vice President of the California Federated Republican Women’s Central Division, and the Treasurer of the Tuolumne County Republican Central Committee. She does all of this while simultaneously presiding as Chair of the Tuolumne Chamber of Commerce’s Governmental Affairs Committee.

With all of these roles, it is clear that Margaret is a fundamental pillar in the local community. She is highly respected and known for her high moral character. She’s regularly involved in events, but more than that, she is the first to volunteer in support of her state, and her community.

Margaret balances her lifetime commitment to the Republican Party with her lifetime commitment to her family. Perhaps the only responsibility she places above her dedication to Tuolumne is her role as a widowed mother. Margaret gives her free time to Republican efforts, but her primary focus remains caring for her adult daughter, who is suffering from effects of a severe stroke.

Mr. Speaker, Margaret Davis does not just stand for conservative values; she lives by them. Tuolumne County Republicans consider Margaret Davis a remarkable example. California will continue to benefit from her efforts for years to come, and I rise to express my profound gratitude for her tremendous service.

SENATE COMMITTEE MEETINGS
Title IV of Senate Resolution 4, agreed to by the Senate of February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place and purpose of the meetings, when scheduled and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, May 21, 2015 may be found in the Daily Digest of today’s RECORD.
**Daily Digest**

**Senate**

**Chamber Action**

*Routine Proceedings, pages S3089–S3199*

**Measures Introduced:** Nineteen bills and one resolution were introduced, as follows: S. 1390–1408, and S. Con. Res. 17.  

**Measures Passed:**

*Enrollment Correction:* Senate agreed to H. Con. Res. 47, to correct the enrollment of S. 178.

**Measures Considered:**

**Ensuring Tax Exempt Organizations the Right To Appeal Act—Agreement:** Senate continued consideration of H.R. 1314, to amend the Internal Revenue Code of 1986 to provide for a right to an administrative appeal relating to adverse determinations of tax-exempt status of certain organizations, taking action on the following amendments proposed thereto:

- Hatch Amendment No. 1221, in the nature of a substitute.  
- Hatch (for Flake) Amendment No. 1243 (to Amendment No. 1221), to strike the extension of the trade adjustment assistance program.  
- Hatch (for Inhofe/Coons) Modified Amendment No. 1312 (to Amendment No. 1221), to amend the African Growth and Opportunity Act to require the development of a plan for each sub-Saharan African country for negotiating and entering into free trade agreements.  
- Hatch (for McCain) Amendment No. 1226 (to Amendment No. 1221), to repeal a duplicative inspection and grading program.  
- Stabenow (for Portman) Amendment No. 1299 (to Amendment No. 1221), to make it a principal negotiating objective of the United States to address currency manipulation in trade agreements.

**Pending:**

- Brown Amendment No. 1251 (to Amendment No. 1221), to require the approval of Congress before additional countries may join the Trans-Pacific Partnership Agreement.

- Wyden (for Shaheen) Amendment No. 1227 (to Amendment No. 1221), to make trade agreements work for small businesses.  
- Wyden (for Warren) Amendment No. 1327 (to Amendment No. 1221), to prohibit the application of the trade authorities procedures to an implementing bill submitted with respect to a trade agreement that includes investor-state dispute settlement.

A unanimous-consent agreement was reached providing for further consideration of the bill at approximately 9 a.m., on Thursday, May 21, 2015.

**Messages from the House:**

**Measures Referred:**

**Measures Read the First Time:**

**Executive Reports of Committees:**

**Additional Cosponsors:**

**Statements on Introduced Bills/Resolutions:**

**Additional Statements:**

**Amendments Submitted:**

**Authorities for Committees to Meet:**

**Adjournment:** Senate convened at 9:30 a.m. and adjourned at 11:57 p.m., until 9 a.m. on Thursday, May 21, 2015. (For Senate’s program, see the remarks of the Acting Majority Leader in today’s Record on page S3199.)

**Committee Meetings**

(Committees not listed did not meet)

**BUSINESS MEETING**

*Committee on Commerce, Science, and Transportation:* Committee ordered favorably reported the following business items:

**Pages S3092**
S. 1331, to help enhance commerce through improved seasonal forecasts, with an amendment in the nature of a substitute;

S. 1297, to update the Commercial Space Launch Act by amending title 51, United States Code, to promote competitiveness of the U.S. commercial space sector, with an amendment in the nature of a substitute;

S. 1326, to amend certain maritime programs of the Department of Transportation, with an amendment in the nature of a substitute;

S. 1040, to direct the Consumer Product Safety Commission and the National Academy of Sciences to study the vehicle handling requirements proposed by the Commission for recreational off-highway vehicles and to prohibit the adoption of any such requirements until the completion of the study, with an amendment in the nature of a substitute;

S. 1359, to allow manufacturers to meet warranty and labeling requirements for consumer products by displaying the terms of warranties on Internet websites;

S. 806, to amend section 31306 of title 49, United States Code, to recognize hair as an alternative specimen for preemployment and random controlled substances testing of commercial motor vehicle drivers and for other purposes, with an amendment in the nature of a substitute;

S. 1315, to protect the right of law-abiding citizens to transport knives interstate, notwithstanding a patchwork of local and State prohibitions;

S. 1334, to strengthen enforcement mechanisms to stop illegal, unreported, and unregulated fishing, to amend the Tuna Conventions Act of 1950 to implement the Antigua Convention, with an amendment in the nature of a substitute;

S. 1335, to implement the Convention on the Conservation and Management of the High Seas Fisheries Resources in the North Pacific Ocean, as adopted at Tokyo on February 24, 2012;

S. 1251, to implement the Amendment to the Convention on Future Multilateral Cooperation in the Northwest Atlantic Fisheries, as adopted by Lisbon, Portugal on September 28, 2007;

S. 1336, to implement the Convention on the Conservation and Management of the High Seas Fishery Resources in the South Pacific Ocean, as adopted at Auckland on November 14, 2009;

H.R. 1020, to define STEM education to include computer science, and to support existing STEM education programs at the National Science Foundation;

H.R. 710, to require the Secretary of Homeland Security to prepare a comprehensive security assessment of the transportation security card program, with an amendment in the nature of a substitute; and

The nominations of Daniel R. Elliott III, of Ohio, to be a Member of the Surface Transportation Board, Mario Cordero, of California, to be a Federal Maritime Commissioner, and a routine list in the Coast Guard.

IMPROVEMENTS AND INNOVATIONS IN FISHERY MANAGEMENT AND DATA COLLECTION

Committee on Commerce, Science, and Transportation: Subcommittee on Oceans, Atmosphere, Fisheries, and Coast Guard concluded a hearing to examine improvements and innovations in fishery management and data collection, after receiving testimony from Kathryn D. Sullivan, Under Secretary of Commerce for Oceans and Atmosphere, and Administrator, National Oceanic and Atmospheric Administration; Robert Beal, Atlantic States Marine Fisheries Commission, Arlington, Virginia; Brett Fitzgerald, Snook and Game Fish Foundation, Lake Worth, Florida; and Steven A. Murawski, University of South Florida, St. Petersburg.

OVERSIGHT OF EPA SCIENTIFIC ADVISORY PANELS AND PROCESSES

Committee on Environment and Public Works: Subcommittee on Superfund, Waste Management, and Regulatory Oversight concluded an oversight hearing to examine scientific advisory panels and processes at the Environmental Protection Agency, including S. 543, to amend the Environmental Research, Development, and Demonstration Authorization Act of 1978 to provide for Scientific Advisory Board member qualifications, public participation, after receiving testimony from J.
