## TITLE VII—AMATEUR RADIO PARITY

### SEC. 701. FINDINGS.

Congress finds the following:

(1) More than 730,000 radio amateurs in the United States are licensed by the Commission in the amateur radio services.

(2) Amateur radio, at no cost to taxpayers, provides a fertile ground for technical self-training in modern telecommunications, electronics technology, and emergency communications techniques and protocols.

(3) There is a strong Federal interest in the effective performance of amateur stations established at the residences of licensees. Such stations have been shown to be frequently and increasingly precluded by unreasonable private land use restrictions, including restrictive covenants.

(4) Commission regulations have for three decades prohibited the application to stations in the amateur service of State and local regulations that preclude or fail to reasonably accommodate amateur service communications, or that do not constitute the minimum practicable regulation to accomplish a legitimate State or local purpose. Commission policy has been and is to require States and localities to permit erection of a station antenna structure at heights and dimensions sufficient to accommodate amateur service communications.

(5) The Commission has sought guidance and direction from Congress with respect to the application of the Commission’s limited preemption policy regarding amateur service communications to private land use restrictions, including restrictive covenants.

(6) There are aesthetic and common property considerations that are uniquely applicable to private land use regulations and the community associations obligated to enforce covenants, conditions, and restrictions in deed-restricted communities. These considerations are dissimilar to those applicable to State law and local ordinances regulating the same residential amateur radio facilities.

(7) In recognition of these considerations, a separate Federal policy than exists at section 97.15(b) of title 47, Code of Federal Regulations, is warranted concerning amateur service communications in deed-restricted communities.

(8) Community associations should fairly administer private land use regulations in

the interest of their communities, while nevertheless permitting the installation and maintenance of effective outdoor amateur radio antennas. There exist antenna designs and installations that can be consistent with the aesthetics and physical characteristics of land and structures in community associations while accommodating communications in the amateur radio services.

### SEC. 702. APPLICATION OF PRIVATE LAND USE RESTRICTIONS TO AMATEUR STATIONS.

(a) AMENDMENT OF FCC RULES.—Not later than 120 days after the date of the enactment of this Act, the Commission shall amend section 97.15 of title 47, Code of Federal Regulations, by adding a new paragraph that prohibits the application to amateur stations of any private land use restriction, including a restrictive covenant, that—
