

areas: diet quality and physical activity, food resource management, food safety, and food security.

The Expanded Food and Nutrition Education Program tends to be less flexible in how it delivers services than SNAP-Ed, but it has the capacity to reach more people than SNAP-Ed because it operates in more areas, both urban and rural, across this country.

Mr. Speaker, both of these educational programs are helping low-income families lead healthier lives and make better choices when it comes to nutritious food. Through education we can help ensure that American families—especially children—learn about the importance of a balanced diet as part of a healthy lifestyle and the joy of preparing their own meals.

Mr. Speaker, I look forward to strengthening these programs in the next farm bill so that we can continue to educate and serve American families.

CONCERNS BREWING ABOUT NUCLEAR POWER PLANT CONSTRUCTION

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. SHIMKUS) for 5 minutes.

Mr. SHIMKUS. Mr. Speaker, I rise to address concerns brewing in Lithuania and other Baltic States about the construction of a nuclear power plant. This plant is 12½ miles from the Lithuanian border and in sight of Vilnius, Lithuania's capital and largest city.

I speak here not only as a friend of the Baltic people and as a descendant of Lithuanian immigrants, but also as co-chair of the Baltic Caucus and chairman of the Subcommittee on Environment.

Like all my colleagues here, I am concerned about ensuring the security, integrity, and safety of nuclear projects in Europe and around the world. Here is the capital of Lithuania, Vilnius, and that is where the power plant is being built.

This site was first chosen during the era of the Soviet Union but was halted after the Chernobyl disaster in 1986, which contaminated a quarter of Belarus. Now, in 2019, Belarus is supposed to house a different Moscow-run nuclear power plant, this one run by the Russian state-owned company Rosatom.

This project is very environmentally sensitive. Both Lithuania and Belarus are signatories to the Espoo Convention. The Espoo Convention calls for member states to consult with bordering countries about such projects, to allow experts to review information about the projects, and to share information with bordering countries about safety and security of these projects.

Building a nuclear power plant is hard, especially when it is a country's first. That is why the International Atomic Energy Agency has recommended a six-step review process meant to prevent disasters like

Chernobyl's and the more recent one in Fukushima, Japan. But Belarus has chosen to skip four of the six steps, including crucial steps, and ignore the people in the land of Lithuania.

There is a real concern that the main purpose behind the project is to grow Russian influence and power, especially over energy, in the European Union. The President of Belarus said that the Astravets plant and another Russian plant are a fishbone in the throat of the European Union and the Baltic States.

Nuclear power plants in sensitive areas should be discussed within the Espoo Convention. Nearly all of Lithuania is within 186 miles of the plant, which means that, if a disaster were to strike, the land of Lithuania could be affected. The country's drinking water could also be affected since the plant is supposed to draw water from the Neris River that supplies drinking water to Lithuania.

But incidents are occurring that cast doubt on Belarus' commitment to working with neighbors and ensuring the plant is safe. In 2016, four accidents occurred, and Belarus has failed to be upfront with Lithuania about any of them.

A 330-ton nuclear reactor shell was allegedly dropped from about 13 feet last summer. Belarus did not reveal anything about the incident until independent media reported it, and then downplayed it.

Building a nuclear power plant requires care in construction according to the most stringent standards with the utmost transparency, and for the best reasons. This plant fails on all four counts. It is in the wrong location. It has been irresponsibly handled.

Instead of transparency, we have seen stonewalling and obfuscation. Instead of making the most economic sense, this plant seems to make good geopolitical sense—and for Russia, not for Belarus.

Mr. Speaker, let me be clear. No one here objects to the safe, secure design, construction, and running of a nuclear power plant. But the people of Lithuania are firmly opposed to irresponsible attitudes toward nuclear power, particularly so close to their most populous city.

This concern makes sense. As chairman of the House Subcommittee on Environment and long-time observer of Eastern Europe, Mr. Speaker, I can assure you that the people of the United States have no better friend than the people of Lithuania.

Lithuanians have the right and the responsibility to ensure their and their children's environmental security. They should not be expected to accept inadequate or misleading information about a serious, environmentally sensitive project right on their borders. The Government of Belarus should respect the commitments it has made, including with its neighbors.

Until these issues are resolved, Mr. Speaker, I cannot fault the Lithuanian

people for their concerns about the Astravets nuclear power plant. I share their concerns. I hope Belarus will calm their fears by allowing in international experts and representatives.

Belarus should also comply with the International Atomic Energy Agency's recommendations for the design, construction, and running of safe nuclear power plants.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until noon today.

Accordingly (at 10 o'clock and 12 minutes a.m.), the House stood in recess.

□ 1200

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. POE of Texas) at noon.

PRAYER

Rabbi Sanford D. Akselrad, Congregation Ner Tamid, Henderson, Nevada, offered the following prayer:

O source of wisdom, gathered before this august body, I ask Your blessings upon us.

Decisions impacting the fate of our country weigh heavily upon our leaders. They stand here with backs bowed, eyes turned downward, shoulders formed into an amorphous shrug.

I pray, therefore, that You will grant our leaders strength to stand tall.

With eyes raised skyward, seeing today, tomorrow, and the next, let them govern our country with compassion, courage, and insight.

Let them stand tall to give voice to those who feel unheard and presence to those too long ignored.

Let the pursuit of justice and mercy lift them with heavenly wings, closer still to Heaven than before.

Let them stand tall.

Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from New York (Mr. HIGGINS) come forward and lead the House in the Pledge of Allegiance.

Mr. HIGGINS of New York led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.
