fore graduation, and all other matters affecting such appointments. In the administration of this section, the Secretary shall take such action as may be necessary and appropriate to insure that female individuals shall be eligible for appointment and admission to the Coast Guard Academy, and that the relevant standards required for appointment, admission, training, graduation, and commissioning of female individuals shall be the same as those required for male individuals, except for those minimum essential adjustments in such standards required because of physiological differences between male and female individuals.”;

“(1) in any port or place under the jurisdiction of the United States, in the navigable waters of the United States, or in any area covered by an international agreement negotiated pursuant to section 70005, may construct, operate, maintain, improve, or expand vessel traffic services, that consist of measures for controlling or supervising vessel traffic or for protecting navigation and the marine environment and that may include one or more of reporting and operating requirements, surveillance and communications systems, routing systems, and fairways;

“(2) shall require appropriate vessels that operate in an area of a vessel traffic service to utilize or comply with that service;

“(3)(A) may require vessels to install and use specified navigation equipment, communications equipment, electronic relative motion analyzer equipment, or any electronic or other device necessary to comply with a vessel traffic service or that is necessary in the interests of vessel safety.

“(B) Notwithstanding subparagraph (A), the Secretary shall not require fishing vessels under 300 gross tons as measured under section 14502, or an alternate tonnage measured under section 14302 as prescribed by the Secretary under section 14104, or recreational vessels 65 feet or less to possess or use the equipment or devices required by this subsection solely under the authority of this chapter;

“(4) may control vessel traffic in areas subject to the jurisdiction of the United States that the Secretary determines to be hazardous, or under conditions of reduced visibility, adverse weather, vessel congestion, or other hazardous circumstances, by—

“(A) specifying times of entry, movement, or departure;

“(B) establishing vessel traffic routing schemes;

“(C) establishing vessel size, speed, or draft limitations and vessel operating conditions; and

“(D) restricting operation, in any hazardous area or under hazardous conditions, to vessels that have particular operating characteristics or capabilities that the Secretary considers necessary for safe operation under the circumstances;

“(5) may require the receipt of prearrival messages from any vessel, destined for a port or place subject to the jurisdiction of the United States, in sufficient time to permit advance vessel traffic planning before port entry, which shall include any information that is not already a matter of record and that the Secretary determines necessary for the control of the vessel and the safety of the port or the marine environment; and

“(6) may prohibit the use on vessels of electronic or other devices that interfere with communication and navigation equipment, except that such authority shall not apply to electronic or other devices certified to transmit in the maritime services by the Federal Communications Commission and used within the frequency bands 157.1875–157.4375 MHz and 161.7875–162.0375 MHz.

“(b) **COOPERATIVE AGREEMENTS.**—

“(1) **IN GENERAL.**—The Secretary may enter into cooperative agreements with public or private agencies, authorities, associations, institutions, corporations, organizations, or other persons to carry out the functions under subsection (a)(1).

“(2) **LIMITATION.**—

“(A) A nongovernmental entity may not under this subsection carry out an inherently governmental function.

“(B) As used in this paragraph, the term ‘inherently governmental function’ means any activity that is so intimately related to the public interest as to mandate performance by an officer or employee of the Federal Government, including an activity that requires either the exercise of discretion in applying the authority of the Government or the use of judgment in making a decision for the Government.

“(c) **LIMITATION OF LIABILITY FOR COAST GUARD VESSEL TRAFFIC SERVICE PILOTS AND NON-FEDERAL VESSEL TRAFFIC SERVICE OPERATORS.**—

“(1) **COAST GUARD VESSEL TRAFFIC SERVICE PILOTS.**—Any pilot, acting in the course and scope of his or her duties while at a Coast Guard Vessel Traffic Service, who provides information, advice, or communication assistance while under the supervision of a Coast Guard officer, member, or employee shall not be liable for damages caused by or related to such assistance unless the acts or omissions of such pilot constitute gross negligence or willful misconduct.

“(2) **NON-FEDERAL VESSEL TRAFFIC SERVICE OPERATORS.**—An entity operating a non-Federal vessel traffic information service or advisory service pursuant to a duly executed written agreement with the Coast Guard, and any pilot acting on behalf of such entity, is not liable for damages caused by or related to information, advice, or communication assistance provided by such entity or pilot while so operating or acting unless the acts or omissions of such entity or pilot constitute gross negligence or willful misconduct.

“§ 7002. Special powers

“The Secretary may order any vessel, in a port or place subject to the jurisdiction of the United States or in the navigable waters of the United States, to operate or anchor in a manner the Secretary directs if—

“(1) the Secretary has reasonable cause to believe such vessel does not comply with any regulation issued under section 70034 or any other applicable law or treaty;

“(2) the Secretary determines such vessel does not satisfy the conditions for port entry set forth in section 70021 of this title; or

“(3) by reason of weather, visibility, sea conditions, port congestion, other hazardous circumstances, or the condition of such vessel, the Secretary is satisfied such direction is justified in the interest of safety.

“§ 7003. Port access routes

“(a) **AUTHORITY TO DESIGNATE.**—Except as provided in subsection (b) and subject to the requirements of subsection (c), in order to provide safe access routes for the movement of vessel traffic proceeding to or from ports or places subject to the jurisdiction of the United States, the Secretary shall designate necessary fairways and traffic separation schemes for vessels operating in the territorial sea of the United States and in high seas approaches, outside the territorial sea, to such ports or places. Such a designation shall recognize, within the designated area, the paramount right of navigation over all other uses.

“(b) **LIMITATION.**—

“(1) **IN GENERAL.**—No designation may be made by the Secretary under this section if—

“(A) the Secretary determines such a designation, as implemented, would deprive any person of the effective exercise of a right granted by a lease or permit executed or issued under other applicable provisions of law; and

“(B) such right has become vested before the time of publication of the notice required by paragraph (1) of subsection (c).

“(2) **CONSULTATION REQUIRED.**—The Secretary shall make the determination under paragraph (1)(A) after consultation with the head of the agency responsible for executing the lease or issuing the permit.

“(c) **CONSIDERATION OF OTHER USES.**—Before making a designation under subsection (a), and in accordance with the requirements of section 70004, the Secretary shall—

“(1) undertake a study of the potential traffic density and the need for safe access routes for vessels in any area for which fairways or traffic separation schemes are proposed or that may otherwise be considered and publish notice of such undertaking in the Federal Register;

“(2) in consultation with the Secretary of State, the Secretary of the Interior, the Sec-

retary of Commerce, the Secretary of the Army, and the Governors of affected States, as their responsibilities may require, take into account all other uses of the area under consideration, including, as appropriate, the exploration for, or exploitation of, oil, gas, or other mineral resources, the construction or operation of deep-water ports or other structures on or above the seabed or subsoil of the submerged lands or the Outer Continental Shelf of the United States, the establishment or operation of marine or estuarine sanctuaries, and activities involving recreational or commercial fishing; and

“(3) to the extent practicable, reconcile the need for safe access routes with the needs of all other reasonable uses of the area involved.

“(d) **STUDY.**—In carrying out the Secretary's responsibilities under subsection (c), the Secretary shall—

“(1) proceed expeditiously to complete any study undertaken; and

“(2) after completion of such a study, promptly—

“(A) issue a notice of proposed rulemaking for the designation contemplated; or

“(B) publish in the Federal Register a notice that no designation is contemplated as a result of the study and the reason for such determination.

“(e) **IMPLEMENTATION OF DESIGNATION.**—In connection with a designation made under this section, the Secretary—

“(1) shall issue reasonable rules and regulations governing the use of such designated areas, including rules and regulations regarding the applicability of rules 9 and 10 of the International Regulations for Preventing Collisions at Sea, 1972, relating to narrow channels and traffic separation schemes, respectively, in waters where such regulations apply;

“(2) to the extent that the Secretary finds reasonable and necessary to effectuate the purposes of the designation, make the use of designated fairways and traffic separation schemes mandatory for specific types and sizes of vessels, foreign and domestic, operating in the territorial sea of the United States and for specific types and sizes of vessels of the United States operating on the high seas beyond the territorial sea of the United States;

“(3) may, from time to time, as necessary, adjust the location or limits of designated fairways or traffic separation schemes in order to accommodate the needs of other uses that cannot be reasonably accommodated otherwise, except that such an adjustment may not, in the judgment of the Secretary, unacceptably adversely affect the purpose for which the existing designation was made and the need for which continues; and

“(4) shall, through appropriate channels—

“(A) notify cognizant international organizations of any designation, or adjustment thereof; and

“(B) take action to seek the cooperation of foreign States in making it mandatory for vessels under their control to use, to the same extent as required by the Secretary for vessels of the United States, any fairway or traffic separation scheme designated under this section in any area of the high seas.

“§ 7004. Considerations by Secretary

“In carrying out the duties of the Secretary under sections 70001, 70002, and 70003, the Secretary shall—

“(1) take into account all relevant factors concerning navigation and vessel safety, protection of the marine environment, and the safety and security of United States ports and waterways, including—

“(A) the scope and degree of the risk or hazard involved;

“(B) vessel traffic characteristics and trends, including traffic volume, the sizes and types of vessels involved, potential interference with the flow of commercial traffic, the presence of any unusual cargoes, and other similar factors;

“(C) port and waterway configurations and variations in local conditions of geography, climate, and other similar factors;

“(D) the need for granting exemptions for the installation and use of equipment or devices for use with vessel traffic services for certain classes of small vessels, such as self-propelled fishing vessels and recreational vessels;

“(E) the proximity of fishing grounds, oil and gas drilling and production operations, or any other potential or actual conflicting activity;

“(F) environmental factors;

“(G) economic impact and effects;

“(H) existing vessel traffic services; and

“(I) local practices and customs, including voluntary arrangements and agreements within the maritime community; and

“(2) at the earliest possible time, consult with and receive and consider the views of representatives of the maritime community, ports and harbor authorities or associations, environmental groups, and other persons who may be affected by the proposed actions.

“(2) enter into negotiations, through appropriate international bodies, and conclude and execute agreements to establish vessel traffic services in appropriate areas of the high seas.

“(c) **OPERATIONS.**—The Secretary, pursuant to any agreement negotiated under subsection (b) that is binding upon the United States in accordance with constitutional requirements, may—

“(1) require vessels operating in an area of a vessel traffic service to utilize or to comply with the vessel traffic service, including the carrying or installation of equipment and devices as necessary for the use of the service; and

“(2) waive, by order or regulation, the application of any United States law or regulation concerning the design, construction, operation, equipment, personnel qualifications, and manning standards for vessels operating in waters over which the United States exercises jurisdiction if such vessel is not en route to or from a United States port or place, and if vessels en route to or from a United States port or place are accorded equivalent waivers of laws and regulations of the neighboring nation, when operating in waters over which that nation exercises jurisdiction.

“(d) **SHIP REPORTING SYSTEMS.**—The Secretary, in cooperation with the International Maritime Organization, may implement and enforce two mandatory ship reporting systems, consistent with international law, with respect to vessels subject to such reporting systems entering the following areas of the Atlantic Ocean:

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Pennsylvania (Mr. SHUSTER) and the gentleman from Oregon (Mr. DEFAZIO) each will control 20 minutes.

The Chair recognizes the gentleman from Pennsylvania.

GENERAL LEAVE

Mr. SHUSTER. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks and include any extraneous material on S. 140.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. SHUSTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am very proud to come to the floor tonight, not only with another Coast Guard reauthorization bill, but it will be the last bill I will pass and the Committee on Transportation and Infrastructure will pass, as my chairmanship expires and I leave Congress here at the end of the year. So it is a proud moment for me.

I am especially proud that S. 140 was named the Frank LoBiondo Coast Guard Authorization Act of 2018.

This is a product of bicameral and bipartisan efforts. The Coast Guard is an armed service with a very difficult mission: to enforce all Federal laws on, under, and over the high seas in the jurisdiction of the United States.

This bill supports the Coast Guard and its servicemembers by authorizing funding for fiscal year 2018 and 2019.

The legislation includes three bills reported from the Transportation and Infrastructure Committee: the Coast Guard Improvement Reform Act of 2017; the Coast Guard Authorization Act of 2017; and the Federal Maritime Commission Authorization Act of 2017.

The bill promotes commercial and recreational vessel safety, protects the environment, modernizes Coast Guard administration laws, and provides protection for American business in regard to foreign shipping alliances.

□ 1815

Once again, it authorizes a heavy icebreaker to be purchased by the Coast Guard. We just hope the appropriators find the funding to do that for a much-needed icebreaker.

The bill is named for our colleague, FRANK LOBIONDO, who previously served as chairman and ranking member of the Coast Guard and Maritime Transportation Subcommittee during five different Congresses. His leadership on the subcommittee translated into many legislative victories for the Coast Guard and their hardworking Coast Guard members. So it is absolutely fitting to name this after FRANK LOBIONDO.

Mr. Speaker, I urge all Members to support the Frank LoBiondo Coast Guard Reauthorization Act by voting “yes” on S. 140, and I reserve the balance of my time.

Mr. DEFAZIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in full support of S. 140, legislation that we have been somewhat patiently waiting for the Senate to move on for over a year. This legislation incorporates three different bills passed and reported by the Transportation and Infrastructure Committee last year: H.R. 2518, the Coast Guard Authorization Act of 2017; H.R. 1726, the Coast Guard Improvement and Reform Act; and H.R. 2593, the Federal Maritime Commission Authorization Act.

This is going to provide both positive improvements in maritime policy, help with the competitiveness of the U.S. maritime industry, and it is going to be of substantial assistance to the Coast Guard. There are issues where we had some disagreement. It is not a perfect bill, but I am pleased to support it, and I urge all Members to support it.

I am particularly pleased with the 2-year authorized funding levels for the Coast Guard. It has been hurt over a number of years. Their budget has been too thin, and cuts imposed by the

Budget Control Act have been harmful. So this is a reasonable—not optimal—funding level, but it will meet both the acquisition and operational needs, and the Appropriations Committee will have the capability of meeting the targets we have set.

It would have a rigorous new process before the Coast Guard can permanently close any air facility it operates. In my home State of Oregon there was a rather sudden announcement of a closure of an air facility in the mid-coast, Newport, in Representative SCHRADER's district. The waters of the Pacific are extraordinarily cold year-round. Survival times are not long, and we were putting mariners—both recreational, commercial, and others—at risk. So we have now imposed a new process. There will have to be an extensive public review justification, and then Congress will also have time to review, evaluate, and, if necessary, reject future proposed closures.

I also support a provision in the bill that will allow certificates of documentation to be renewed on a multiyear basis. The Coast Guard has had a backlog forever on certificates of documentation, and they are annual. The rationale has been, well, we need to know your home port every year. We are going to have a process where you can get a 5-year certificate, and then if you change your home port, you have to report it within a certain number of days to the Coast Guard. That solves that issue.

There was a long-discussed provision that was very controversial on the Senate side on the Vessel Incidental Discharge Act. We came up with a compromise. Again, I don't know that it is optimal, but we can live with it. It sets strict technological standards for vessel discharges under the Clean Water Act to protect local waters, minimizing the introduction and spread of aquatic invasive species to where it was becoming an incredibly expensive and difficult problem. We don't need to spread anymore. It establishes a uniform national standard for ballast water treatment that will be developed both by the EPA and the Coast Guard to aid commercial carriers in movement of goods by providing regulatory certainty throughout the United States. It retains a significant role for individual States and citizens to protect their local waters, which has been a critical sticking point in prior efforts to pass this measure.

So under this proposal, States are guaranteed the ability to co-enforce and oversee implementation of the vessel discharge program, petition the EPA and Coast Guard to strengthen ballast discharge standard, should technologies that are more stringent become commercially available, and call for the establishment of no discharge zones in important and sensitive State waters, similar to those currently available for marine sewage. That, again, was not necessarily optimal, but I think it is workable and pro-

tections the interests of the State and our precious resources.

I want to acknowledge the chairman and thank him. This will be the last bill he manages on the floor. He has imposed regular order on the Transportation and Infrastructure Committee with the water resources development bills, the first long-term FAA bill in three decades, and now an excellent Coast Guard authorization in addition to other products.

I would like to also thank my ranking member—soon, perhaps, depending on where he decides to go—chairman of this subcommittee for his contributions. This is the third time that JOHN GARAMENDI has worked with the Republicans to deliver a good Coast Guard bill during his tenure. So, all in all, this is a strangely productive day for the House of Representatives, and I am proud to be here.

Mr. Speaker, I reserve the balance of my time.

Mr. SHUSTER. Mr. Speaker, I yield 2 minutes to the gentleman from Florida (Mr. MAST), who is the chairman of the Coast Guard and Maritime Transportation Subcommittee.

Mr. MAST. Mr. Speaker, I thank the chairman for yielding me time to speak in support of this act named after our friend, FRANK LOBIONDO. I thank the gentleman also for his time as chairman of the full committee.

As a Representative of Florida, the State with the second largest coastline in the country, I do have a profound respect for the men and women of the U.S. Coast Guard, and as a veteran as well. It has been an honor to work on such a bipartisan committee, which likewise has been filled with members who support the Coast Guard across a diverse set of evolving mission sets.

Every hour of every day the Coast Guard protects America's waterways. They promote a healthy environment, they ensure the safety of mariners, they enforce our laws, they keep us safe from piracy, and they keep us safe from smugglers.

Day in and day out I have had the opportunity to see some of their work firsthand. Recently I met with a search and rescue team in Pollocksville, North Carolina, as they worked tirelessly on behalf of communities impacted by Hurricane Florence. I see my local Coasties in places like Fort Pierce. I see them saving mariners young and old, those lost at sea. There is no doubt that their selfless heroism and their decisive work saved many lives in the Carolinas, just as it did in Florida's Panhandle after Michael and across the Nation, wherever disaster befalls us.

I am proud to support this bill, which also authorizes \$10.6 billion to strengthen and support the U.S. Coast Guard in its invaluable defense of our waterways and of our homeland.

I am especially glad to see the inclusion of my bill, the Jupiter Island Land Transfer Act. This provision will finally resolve a decades-old conserva-

tion issue in my district and transfer four critical acres of unused Coast Guard property to the Hobe Sound National Wildlife Refuge to ensure the endangered turtles will continue to thrive. By protecting this land, we are doing our part to help ensure that the natural beauty of the Treasure Coast is maintained and continues to be the driver of our economy for many decades to come.

Mr. Speaker, I ask my colleagues to join me in supporting the brave and hardworking men and women of the U.S. Coast Guard and their indispensable work by supporting the FRANK LOBIONDO Coast Guard Authorization Act.

Mr. DEFAZIO. Mr. Speaker, I yield 4 minutes to the gentleman from California (Mr. GARAMENDI), who is the ranking member.

Mr. GARAMENDI. Mr. Speaker, I will make this very brief. I know we are up against the clock here.

Mr. Speaker, I thank Mr. SHUSTER so very much for chairing the committee during my tenure on it and Mr. DEFAZIO, also, for his leadership. I want to also express my appreciation to the new chair, as well as the previous chair of the subcommittee, Mr. HUNTER, with whom I was able to work over the last 3 years.

Essentially, this is a good bill. It covers the things that the Coast Guard needs. It increases their funding to a level that is necessary. The title of the bill is proper. We all thank Mr. LOBIONDO for his many years of service.

There are a couple of things about the bill that I do want to speak to, and that is we have in the bill a backup system for the GPS that we so much rely upon now. It is finally going to get into the legislation. We also move forward with Blue Technologies and the autonomous, both air and underwater, vehicles that are going to be necessary for the Coast Guard to fully carry out its responsibilities.

Beyond that there are some things in the bill that are a compromise. I want to point one out that is very important, and that is section 834 to which I continue to object. This is a bill that actually allows for an aged wooden ship to ply the waters of the Mississippi. The Coast Guard correctly states that this vessel, constructed primarily of wood, and operating the overnight passenger trade, presents an unacceptable fire risk to its passengers and crew, and, accordingly, the Coast Guard is opposed to this particular section. It is unfortunate that is in the bill.

Mr. Speaker, I include in the RECORD two letters, one from the Department of Homeland Security and another one from the National Volunteer Fire Council.

ASSISTANT SECRETARY FOR
LEGISLATIVE AFFAIRS,
U.S. DEPARTMENT OF HOMELAND
SECURITY,

Washington, DC, June 28, 2017.

Hon. BILL SHUSTER,
Chairman, Committee on Transportation and
Infrastructure,

House of Representatives, Washington, DC.

DEAR REPRESENTATIVE SHUSTER: This letter sets forth Department of Homeland Security (DHS) views with regard to S. 89, a bill “[t]o amend title 46, United States Code, to exempt old vessels that only operate within inland waterways from the fire-retardant materials requirement if the owners of such vessels make annual structural alterations to at least 10 percent of the areas of the vessels that are not constructed of fire-retardant materials and for other purposes.”

Notwithstanding the form in which S. 89 is drafted, only one vessel, the Steamer DELTA QUEEN, would be eligible for the exemption. Because of the advanced age, construction, and configuration of the Steamer DELTA QUEEN, the vessel represents an unacceptable degree of fire safety risk to its passengers and crew. Given the risk that a marine casualty aboard the Steamer DELTA QUEEN poses to life, property, and infrastructure, the DHS must oppose S. 89.

Background:

The Steamer DELTA QUEEN is a 20th century vessel, the superstructure of which is constructed of wood. The vessel's boilers are original and open directly to the wood superstructure. Uniquely, the vessel's configuration has been altered such that the sole means of egress is the stage (gangway) on the bow.

In 1966, Congress stipulated that, “no passenger vessel of the United States . . . shall be granted a certificate of inspection . . . unless the vessel is constructed of fire-retardant materials (emphasis added).” During the ensuing decades, Congress temporarily delayed the effect of the mandate as it would apply to the Steamer DELTA QUEEN five separate times. Finally, in 2008, the temporary delay expired, and the mandate was made applicable to the Steamer DELTA QUEEN.

S. 89 would, once again, render the mandate inapplicable with regard to the Steamer DELTA QUEEN, provided that the vessel's owner or operator makes structural alterations to those portions of the vessel that are not constructed of fire-retardant materials.

Discussion:

The prospect of fire aboard the Steamer DELTA QUEEN while underway cannot be readily dismissed. In 2008, the United States Coast Guard's Traveling Inspector who was attending the vessel for examination noted “evidence of a lack of both short- and long-term maintenance that adversely impacts the safety of the vessel . . . [a]ll [of which has] to do with unintended or excess but unnecessary fireload [sic] (emphasis added).” The fire load was concentrated in the lower decks (i.e., the fire room, other mechanical areas, and the bilge, as well as in other non-public spaces that, at the time, were barewood compartments with no fire-rated insulation or finish). This fact is significant inasmuch as the most likely source of ignition would be the approximately 100-year-old boilers. The boilers' footprint (height) is not wholly contained within the steel hull; as such, the boilers open directly to the aged and dry wood superstructure. Given that the vessel itself is not divided by thermal and structural boundaries, a fire within any one compartment could readily spread horizontally and vertically. In a worst-case scenario, a fire would begin in the boilers, overwhelm the vessel's fire suppression system,

and spread throughout the whole of lower deck and into the berths and staterooms that sit atop the lower decks. If so, the planned evacuation would be hampered, if not precluded, because the only egress in the present (and not original) configuration is via the stage (gangway) on the bow, directly through the likely location of the fire. And if the vessel's propulsion system too were to fail during this scenario, the vessel could pose a threat to other vessels and improvements on or above the navigable waters.

Separately, DHS notes that 46 U.S.C. §3503(b)(1)(D) requires the vessel's owner/operator to “notify the Coast Guard of structural alterations to the vessel, and with regard to those alterations comply with any noncombustible material requirements that the Coast Guard prescribes for non-public spaces.” However, as late as 2008, the Traveling Inspector noted that:

Renovations, modifications[,] and or upgrades . . . were found to be limited to those associated with the installed sprinkler system only. Based on a review of Coast Guard records . . . there is no evidence of further modifications or structural fire protections upgrades since 1998 with most activity tapering off after 9/11/2001. Some existing non-public spaces, like the carpenter's shop[,] have been improved by cleaning and organizing, which helps reduce the fire load. Other non-public spaces, such as the laundry room[,] still only show bare wood construction with varying degrees of stainless steel similar to the galley, but as indicated, the installations are not consistent throughout with fire rating unknown.

The Coast Guard advises that, if it were to inspect the Steamer DELTA QUEEN today, those non-public spaces would likely still be found wanting.

Additionally, S. 89 includes a provision whereby passenger vessels having berth or stateroom accommodations for at least 50 passengers shall only be granted a certificate of inspection if, among other things, the vessel has multiple forms of egress off the vessel's bow and stern. While multiple forms of egress would be beneficial for the Steamer DELTA QUEEN during the period while she is exercising the proposed legislative exemption of S. 89, the implementation of a new standard would likely result in an unsubstantiated financial burden for the remainder of the passenger vessel industry not equipped with multiple forms of egress. Specifically, those vessels presently meeting the fire retardant requirements are not required, under current regulations, to meet a standard for multiple forms of egress off the bow and stern. If S. 89 is enacted those vessel owners and operators of presently compliant vessels, with only one form of egress, will incur costs associated with securing multiple forms of egress. Such costs will be borne with no identified benefit; all while the vessel that would benefit from multiple forms of egress, the Steamer DELTA QUEEN would continue to benefit from an exemption to the new standard.

Lastly, the DHS notes that S. 89 does not require the owner/operator to install thermal and structural boundaries, particularly about the boilers, and does not carry a monetary or non-monetary penalty for failure to comply with the proposed subparagraph (D) requirement. Given this infirmity, and in light of the lack of past compliance or improvements, DHS is not persuaded that allowing incremental alterations of some percentage of the vessel represents a viable solution.

In light of the aforementioned, DHS is resigned to oppose continuously any legislation that would provide any form of statutory relief for the Steamer DELTA QUEEN.

The Office of Management and Budget advises that, from the standpoint of the Ad-

ministration's program, there is no objection to the presentation of this letter to Congress.

I appreciate your interest in the Administration's concerns and input, and I look forward to working with you on future homeland security issues. An identical letter has been sent to Representative DeFazio, Senator Thune, and Senator Nelson.

If I may be of further assistance, please contact me.

Respectfully,

BENJAMIN CASSIDY,
Assistant Secretary for Legislative Affairs.

NATIONAL VOLUNTEER FIRE COUNCIL
November 19, 2018.

Hon. BILL SHUSTER,
Chairman, House Committee on Transportation
and Infrastructure, Washington, DC.

Hon. BRIAN MAST,
Chairman, Coast Guard and Maritime Transportation Subcommittee, Washington, DC.

Honorable Peter Defazio,
Ranking Member, House Committee on Transportation and Infrastructure, Washington, DC.

Honorable John Garamendi,
Ranking Member, Coast Guard and Maritime Transportation Subcommittee, Washington, DC.

DEAR CHAIRMAN SHUSTER, RANKING MEMBER DEFazio, CHAIRMAN MAST, AND RANKING MEMBER GARAMENDI: On behalf of the National Volunteer Fire Council (NVFC), which represents the interests of the nation's volunteer fire, EMS, and rescue services, I am writing in opposition to a provision that was included in S. 140, legislation reauthorizing the U.S. Coast Guard, to exempt from fire safety standards certain historical vessels wishing to operate as cruise ships providing overnight accommodations to passengers.

As the Department of Homeland Security (DHS) stated last year in opposing this provision: “The use of wood construction, even when supplemented by other fire safety measures, has failed time and again to provide an acceptable level of safety for United States citizens carried on board ships.” Fire safety standards have a proven track record of saving lives. Our members see this every day responding to fires in structures with and without modern fire safety protections. Fires occurring in updated structures are far less likely to kill or injure occupants and responders.

One of the greatest challenges that fire safety advocates face is the belief that many people have that fire will never happen to them. The widespread adoption and enforcement of fire safety standards has led to a significant decrease in the number of fires, fire-related deaths, and fire-related injuries in vessels and structures in the United States, in spite of the fact that the general public underestimates the risk posed by fire. I am concerned not only that the fire safety exemption in S. 140 will endanger the lives of the passengers and crew members aboard historical vessels, but also for the dangerous precedent that it sets.

If you have any questions regarding this communication please contact Dave Finger, Chief of Legislative and Regulatory Affairs.

Sincerely,

KEVIN D. QUINN,
Chair.

Mr. GARAMENDI. With that, I think I have consumed all the time allowed. I will simply close in this way: All in all this is our third effort to successfully pass legislation. I see the majority counsel over there. I thank JOHN so very much for working with us. And on the minority side DAVID is an extraordinary individual. It has been a pleasure working with him on this, the third

successful passage of the Coast Guard reauthorization.

Mr. Speaker, I rise to join my Chairman on the Transportation and Infrastructure Committee, Congressman BILL SHUSTER, and my Ranking Democrat Member on the Transportation Committee, Congressman PETER DEFAZIO, to endorse and support S. 140, the Frank LoBiondo Coast Guard Authorization Act of 2018.

The Coast Guard is a special Federal agency, one that is selfless in service and highly proficient in its work. Ironically, the Coast Guard also is an agency that is over-worked, under-resourced, and rarely given the thanks that the men and women of the Coast Guard so rightly deserve.

Today, with the passage of this legislation, we can say that we are at last stepping up and authorizing funding levels commensurate with the many demands we ask our Coast Guard to undertake. The 2.6 percent increases for both fiscal years 2018 and 2019 will go far to address the deferred needs of the Coast Guard.

This stands in sharp contrast to the folly of the Trump administration's skinny budget for Fiscal Year 2017 that actually sought to cut Coast Guard funding by \$1.3 billion—a gross mistake if there ever was one.

In general, I applaud Chairman SHUSTER and his staff, and Ranking Member DEFAZIO and his staff, for their cooperative and collegial, yet determined, negotiations with the other body to arrive at a final bill that advances or clarifies several maritime policy initiatives, improves Coast Guard administration and management, and enhances Coast Guard mission readiness and capabilities.

I am particularly pleased that this legislation advances the Coast Guard's future use of new technologies to improve maritime safety and security and maritime domain awareness.

Chief among these is my provision to direct the Department of Transportation to establish a reliable back-up timing system to function should the positioning, navigation and timing signals transmitted by GPS satellites be disrupted or degraded.

The loss of GPS signals has been characterized as a "single point of failure" for national security and for critical infrastructure systems. Simply stated, we no longer can afford to ignore this threat, and I urge members to join me and support this legislation today.

The bill also institutes a new acquisition policy for the Coast Guard to acquire unmanned aerial systems, or UAS. The inability of the Coast Guard to acquire UAS systems for its National Security Cutters is a chronic problem. Restricting the Coast Guard to acquire only systems already acquired and proven effective by other military or non-military agencies, should enable the Service to acquire a UAS system that meets its mission needs without, as they say, "re-creating the wheel."

In addition, the bill directs the Coast Guard to sponsor a National Academy of Science study on the status of unmanned, underwater vessels and their potential as mission platforms for the Coast Guard, especially for surveillance activities.

This study should help inform the work of the Coast Guard's Blue Technology Center of Expertise that Congress authorized earlier this year with the enactment of Public Law 115–265.

I also want to express my support for Title VII of the bill that reauthorize the activities of

the Federal Maritime Commission and enact some important amendments to the Shipping Act made necessary by the disruption and consolidation in the global container shipping market.

Overall, I am pleased that this legislation would authorize increased funding levels for fiscal years 2018 and 2019 for the Federal Maritime Commission. Increased funding should enable the Commission to improve its capabilities to monitor shipping trades that remain turbulent.

The bankruptcy of Hanjin Lines in 2016 and the subsequent consolidation of the few remaining ocean carriers into three large alliances produced shock waves in global shipping markets. These new alliances also sent shock waves to U.S. marine terminal operators, tug operators, bunkering operators, and other marine service providers.

Title VII of this bill amends the Shipping Act to make some targeted and strategic amendments to improve the legal standing of U.S. port service providers. Additionally, this title strengthens the authority of the Federal Maritime Commission to oversee and intervene, if necessary, in future interactions between these alliances and U.S. port service providers to ensure fair competition.

I support these amendments to the Shipping Act as a good first step. I expect that these ideas will require additional refinement as the process moves forward, especially on how best to protect confidential and proprietary information gathered by the Federal Maritime Commission to understand market dynamics. I am open to those discussions and look forward to improving the bill.

I also want to express my support for Title IX of the bill that establishes new authorities for the regulation of ballast water and incidental discharges from commercial vessels.

While perhaps not perfect, the measure does provide for uniform regulation of vessel discharges within the scope of the Clean Water Act. In addition, the legislation addresses several important issues raised by coastal states, none the least granting states the ability to establish "no discharge zones" if necessary to protect sensitive state waters.

In closing, this bill is non-controversial legislation that addresses the interests of the Coast Guard and U.S. maritime industry. It also addresses the needs of the members on both sides of the aisle, and both sides of the Capitol. I support the legislation and urge its adoption.

Although I spoke earlier to express my full support for the underlying bill, I rise now to express my strong opposition to a provision that the Senate inserted into the legislation over my objection.

The specific provision is section 834, Fire Retardant Materials. Nothing could be further from the truth.

What this provision actually does is reinstate an exemption from a longstanding fire safety requirement for passenger vessels carrying 50 or more people on overnight voyages to be constructed using fire retardant materials.

And although the provision does not clearly state the vessel or vessels that would benefit from this exemption, the reality is that there is only one vessel, the *Delta Queen*, an aged paddlewheel steamship whose superstructure is almost entirely built out of wood, for which the exemption will apply.

In 2008, the 110th Congress decided—wisely in my view—not to renew this ill-advised ex-

emption for the *Delta Queen* in favor of upholding maritime safety. It was the correct decision then, and it remains the correct decision today.

I have little choice but to raise my objections to this provision based on the manner by which the other body tacked it onto the Coast Guard bill despite the fact that companion legislation introduced in the House, H.R. 619, went nowhere.

This legislation would waive a critical maritime fire safety standard and consequently expose the American public to overnight travel on a vessel that the Coast Guard maintains is "an unacceptable fire hazard to passengers and crew."

The Coast Guard's position remains clear and unequivocal. As stated in its 2008 Special Inspection report, the Coast Guard found that "The combustible construction of the vessel presents an unacceptable fire risk that cannot be mitigated by the addition of fire suppression measures."

The Coast Guard also concluded that, "The vessel, constructed primarily of wood and operating in the overnight passenger trade, presents an unacceptable fire risk to its passengers and crew." Accordingly, the Coast Guard has been, and remains, opposed to legislation to renew the exemption from fire safety standards for the *Delta Queen*.

Mr. Speaker, I have included in the RECORD the administration's views letter stating its opposition to S. 89, which is the underlying provision in section 834.

This provision also has drawn opposition from the National Volunteer Fire Council. The Council concludes that the "fire safety exemption in S. 140 will endanger the lives of passengers and crew members aboard historical vessels, but also for the dangerous precedent it sets."

Mr. Speaker, I have included in the RECORD the Council's letter stating its opposition to section 834.

I commend the Coast Guard for upholding its fire safety standards. I fail to see why it makes any sense for the other body to advance legislation that would sharply contradict the Coast Guard's recommendations and compromise maritime safety.

The American public trusts Congress to ensure that our nation's transportation system remains the safest in the world. Section 834 violates that trust.

Mr. SHUSTER. Mr. Speaker, it is my honor to yield 2 minutes to the gentleman from New Jersey (Mr. LOBIONDO), who is the current chairman of the Subcommittee on Aviation, the former chairman of the Coast Guard and Maritime Transportation Subcommittee, and the namesake of this bill.

Mr. LOBIONDO. Mr. Speaker, I thank Chairman SHUSTER for yielding.

It is an honor to have represented the Coast Guard's only recruit training center in the Nation which is in my district. It is an honor to have represented the Coast Guard Air Station in Atlantic City, which is the largest helicopter air station that the Coast Guard has.

Most of all, I want to recognize the men and women of the Coast Guard whom this bill will benefit. There are very few issues that have been so bipartisan across the board in my time here

in Congress. When I first came, I didn't really understand the commitment that the men and women of the Coast Guard continue to make for our Nation, always being asked to do more and given less to do it.

In many respects I wish we could have done more over the years, but to be able to move forward with a bill like this that is so bipartisan I think speaks to our commitment as a legislative body to the men and women to whom we owe so much that protect our country.

I want to particularly thank Geoff Gosselin who is now with the full Transportation and Infrastructure Committee, but was on my staff for a number of years and really did an amazing and outstanding job with Coast Guard issues for me in helping me to understand them and move them forward. So I want to thank all of my colleagues who have made this day possible.

Mr. DEFAZIO. Mr. Speaker, I yield 2 minutes to the gentleman from the State of Washington (Mr. LARSEN).

Mr. LARSEN of Washington. Mr. Speaker, I rise in support of the FRANK LOBIONDO Coast Guard Authorization Act of 2018.

Protecting the maritime jobs of the hardworking Washingtonians in the second district of my State, including at Dakota Creek Industries in Anacortes, is a priority of mine. The passage of this legislation supports U.S. maritime defense policy and sustains a strong domestic shipbuilding industry. It is a win as well for the hundreds of men and women at Dakota Creek Industries, which is a key contributor to our regional economy.

I appreciate the coordination with Senator CANTWELL, Senator SULLIVAN, and Representative DON YOUNG as we have worked for a year and a half to find a path to save the hundreds of jobs at DCI.

I also want to thank my friend, FRANK LOBIONDO. It is fitting that this bill is named for him, as he is a champion of all things transportation. He has worked tirelessly for the people of New Jersey, the people of his district, and for the people of this country to ensure that we have an infrastructure system in this country that works for all of them.

It has been an honor to serve with him for nearly two decades, and I will miss the work of Representative FRANK LOBIONDO.

Mr. SHUSTER. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. HUNTER), who is the former chairman of the Subcommittee on Coast Guard and Maritime Transportation and an advocate for the Coast Guard.

Mr. HUNTER. Mr. Speaker, I first want to thank Chairman SHUSTER for giving me the opportunity to serve for nearly 6 years as the chairman of the Coast Guard and Maritime Transportation Subcommittee, and I would like to thank him for yielding me time.

□ 1830

Mr. Speaker, I rise in strong support of S. 140, the Frank LoBiondo Coast Guard Authorization Act of 2018. Congressman LOBIONDO is and has been a tireless advocate for the men and women of the Coast Guard, and there is no other name more fitting for this bill.

Let me run through a few of the things that I find extremely great about this bill.

Title 9 contains the Vessel Incidental Discharge Act, legislation that I have introduced for three consecutive Congresses. It was compromised a little bit in the Senate but is still getting done.

Mr. GARAMENDI and I held many, many subcommittee hearings together. He has been known to ask at the appropriate hearings about the backup to GPS. This question is always met with blank stares. This bill makes important progress on a backup GPS system.

Finally, specifically section 514 establishes this backup timing component of the GPS system. That is no doubt thanks to Mr. GARAMENDI's tireless work.

I am also pleased that the legislation establishes a land-based unmanned aircraft system program for the Coast Guard. They have never had their unmanned aerial vehicle program until now. They have had to rely on other services or agencies for this important capability. These additional UAS assets will strengthen the Coast Guard's ability to interdict contraband and improve search and rescue missions.

During the last 6 years, we have held 46 hearings and five roundtables. We have worked to protect the Jones Act and ensure that our country has a strong maritime industrial base, including a skilled pool of American shipyard workers and mariners who would be critical in a time of conflict.

Earlier this year, Congress enacted legislation coming out of the tragic El Faro accident to improve the safety of those American mariners. We have also worked to reduce burdensome regulations that harm U.S. maritime jobs and the competitiveness of the U.S. flag fleet.

We held joint hearings with the Committee on Homeland Security to shed light on security vulnerabilities at our ports and sought to enhance the screening of cargo entering our country and, with the Armed Services Committee, to look at the shared missions of the Navy and the Coast Guard in carrying out defense missions. We pushed the Coast Guard to act like the military service that they are.

The subcommittee also took massive steps to modernize our Nation's ice-breaker fleet and to encourage the Navy and Coast Guard to have a comprehensive plan for the Arctic.

Mr. Speaker, I want to end by thanking a few people. Some of the most fulfilling work serving as the subcommittee chairman was forming strong relationships with the men and women who guard our coasts. The

Coast Guard House Liaison Office and the Coast Guard fellows assigned to the subcommittee over the last 6 years have represented their service well. I would like to thank them for their hard work and camaraderie.

I also want to thank Congressman GARAMENDI for his friendship and being such a strong partner on these issues.

Finally, I want to thank the subcommittee's staff director, John Rayfield, and the exceptional committee staff who have been invaluable as a resource and worked tirelessly to carry out the subcommittee's mission.

With that, Mr. Speaker, I urge all Members to support the legislation.

Mr. DEFAZIO. Mr. Speaker, I yield 2 minutes to the gentleman from Connecticut (Mr. COURTNEY).

Mr. COURTNEY. Mr. Speaker, I rise today in support of the Frank LoBiondo Coast Guard Authorization Act of 2018.

This bill provides critical policy guidance to the Coast Guard as it protects our Nation's shores and maritime interests. The bill increases authorized funding levels, requires a review of our Arctic strategy and the Coast Guard's ability to achieve it, and provides authority to procure three new National Security Cutters.

The bill also includes a provision to ensure that public safety answering points that respond to 911 calls from vehicles in distress are trained to relay that information to the Coast Guard or tow companies.

Sector Long Island Sound has been working with municipality dispatch centers in Connecticut and New York to implement a training program to route these calls. I want to thank Mystic towboat Captain Jeff Dziedzic for bringing this issue to my attention and Congresswoman ESTY for working with my office last year to include this language in the bill.

Mr. Speaker, eastern Connecticut is the proud home of the U.S. Coast Guard Academy and Coast Guard Station New London. Therefore, I am particularly excited that this bill includes a provision that will help boost construction of the future National Coast Guard Museum to be built along the Thames River in New London. In particular, it authorizes engineering and design work to be performed by the Coast Guard in this project.

The Coast Guard is the only military service without its own museum. Under the leadership of Jim Coleman, Richard Grahm, Admiral Papp, Captain Wes Pulver, and many others, this project is well on its way to becoming a world-class destination to showcase the rich heritage of the Coast Guard, which dates back to 1790 when Alexander Hamilton created America's "first fleet," which, by the way, was organized before the U.S. Navy.

I would like to thank the chairman, Mr. SHUSTER, and Mr. LOBIONDO, as they depart. Again, they are great role models of bipartisan leadership and about getting results. I want to also

thank the ranking member, Mr. DEFazio, and also the subcommittee ranking member, JOHN GARAMENDI, for their hard work. I also thank Dave Jansen and John Rayfield for helping guide this bill to a successful conclusion.

Mr. Speaker, I urge support of this bill.

Mr. SHUSTER. Mr. Speaker, I yield 1 minute to the gentleman from Ohio (Mr. CHABOT).

Mr. CHABOT. Mr. Speaker, I rise in very strong support of this legislation.

I want to thank the chairman and the ranking member for their leadership.

I would like to highlight a specific portion of the bill. This provision preserves an important piece of American history and it supports American jobs. It would reinstate the Delta Queen's grandfathered status from a law that prohibits wooden boats from carrying overnight passengers.

Congress granted the Delta Queen a reprieve from that grandfathered law, which adversely impacts it, for four decades. In doing so, Congress recognized that the Delta Queen was constructed before the law that adversely impacted it was in place and that the law was intended to regulate vessels at sea, oceangoing vessels. It was never intended for river-faring boats like the Delta Queen. That is why Congress granted this reprieve for 40 years. We failed to do that back in 2008.

We are looking at \$100 million in development, in economic dollars in the river areas of this country, including the city of Cincinnati, my area. It used to be the home port. It will be one of the stops. It means a lot of jobs for a lot of people. It will be safely done.

Mr. DEFazio. Mr. Speaker, I yield myself such time as I may consume.

I want to thank Dave Jansen for his hard work and again congratulate the chairman on his last bill passing on the floor.

Mr. Speaker, I yield back the balance of my time.

Mr. SHUSTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I urge all my colleagues to support S. 140, the Frank LoBiondo Coast Guard Authorization Act of 2018. It is a good bipartisan bill. I urge all my colleagues to vote for it.

Finally, I would like to thank the staff on both sides of the aisle. On our side, especially, I thank the Coast Guard Subcommittee staff and John Rayfield, who heads up that staff, for his tremendous work. He just informed me that, under the subcommittee's jurisdiction, we will have authorized every single program under that committee's jurisdiction. Great work by John and his team on the subcommittee.

Mr. Speaker, I include in the RECORD the names of the staff on the committee.

From Chairman Shuster's Staff:
John Rayfield
Bonnie Bruce
Lt. Commander Luke Peterson

Kevin Reig
Maggie Chan
Kathy Loden
Brittany Smith
Hannah Matesic
Fred Miller
Geoff Gosselin
Chris Vieson
From Ranking Member DeFazio's Staff:
Dave Jansen
Kathy Dedrick
Alex Burkett
From the Office of Legislative Counsel:
Hank Savage
Tom Dillon

Mr. SHUSTER. Mr. Speaker, I would also like to thank all my members for the great support they have given me on both sides of the aisle to move a lot of bipartisan legislation. I want to thank them for that. I thank my subcommittee chairmen for their leadership in working with me.

Finally, I thank my counterpart, the leader of the Democrats on the Transportation and Infrastructure Committee, sometimes being a worthy foe, most of the time being a dependable and able ally. I thank him for all his work. I also thank him for the very, very thoughtful small going away gift that he gave me. I appreciate that greatly. Again, I finally thank him for all his effort and work.

I have no say in who is going to be the next chairman of the committee, but I can tell you that nobody is more able and knowledgeable about the transportation and infrastructure world than PETER DEFazio. I wish him the best and look forward to seeing him down the road.

Mr. Speaker, I urge passage of S. 140, and I yield back the balance of my time.

Mr. PASCRELL. Mr. Speaker, I rise today in strong support of S. 140, the Frank LoBiondo Coast Guard Authorization Act of 2018. Congressman LOBIONDO has served his constituents in New Jersey's 2nd congressional district well, including the Coast Guard Training Center Cape May in Cape May, New Jersey. From his position on the House Transportation and Infrastructure Committee, a panel on which we served together for a decade, he successfully fought on behalf of our state and the brave men and women in uniform who guard our nation. Congressman LOBIONDO has focused on strengthening our nation's maritime industry, which is a critical source of jobs and economic output in New Jersey. During his time in Congress, Congressman LOBIONDO fought to improve the lives of our service men and women and their families. Given his service to bettering the Coast Guard, it is fitting that this year's authorization legislation is named after Congressman FRANK LOBIONDO. I look forward to this bill's passage and strongly urge all my colleagues to support S. 140.

Mrs. TORRES. Mr. Speaker, I rise in support of S. 140, the Frank LoBiondo Coast Guard Authorization Act. No institution is more critical to our national defense and homeland security than the United States Coast Guard, and every day, the men and women of the Coast Guard carry out vital, life-saving missions, including drug interdiction and search and rescue. On November 9, I had the opportunity to tour the Coast Guard's District 11 fa-

cilities in Alameda, California. I was deeply impressed by the dedication and professionalism of the Coast Guard officials I met. However, I was also troubled by the state of some of Coast Guard's equipment. Resources for the Coast Guard are clearly needed, now more than ever, so it is deeply unfortunate that the Trump administration has sought to cut the Coast Guard's budget by as much as 14 percent and has transferred millions of dollars in Coast Guard funding to Immigration and Customs Enforcement. Congress should not allow the Trump administration to raid the Coast Guard budget to implement its anti-immigrant policies. But today, I urge all my colleagues to support S. 140, and I applaud the Chairman and Ranking Member for their hard work bringing this important measure to the floor. Likewise, it is vitally important that, as negotiations regarding the Fiscal Year 2019 Department of Homeland Security Appropriations Act continue, Congress include sufficient funding for the Coast Guard so that it has the resources it needs to carry out its vital missions.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Pennsylvania (Mr. SHUSTER) that the House suspend the rules and concur in the Senate amendment to the House amendment to the bill, S. 140.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the Senate amendment to the House amendment was concurred in.

A motion to reconsider was laid on the table.

BLOCKING PROPERTY OF CERTAIN PERSONS CONTRIBUTING TO THE SITUATION IN NICARAGUA—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 115-173)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Foreign Affairs and the Committee on the Judiciary and ordered to be printed:

To the Congress of the United States:

Pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*) (IEEPA), the National Emergencies Act (50 U.S.C. 1601 *et seq.*), section 212(f) of the Immigration and Nationality Act of 1952 (8 U.S.C. 1182(f)), and section 301 of title 3, United States Code, I hereby report that I have issued an Executive Order declaring a national emergency to deal with the threat posed by the situation in Nicaragua, including the violent response by the Government of Nicaragua to the protests that began on April 18, 2018, and the Ortega regime's systematic dismantling and undermining of democratic institutions and the rule of law, its use of indiscriminate violence and repressive tactics against civilians, as well as its corruption leading to the destabilization of Nicaragua's economy.

The Executive Order blocks all property and interests in property within
